GENETICS (GENETICS)

GENETICS 1 — COOPERATIVE EDUCATION/CO-OP IN GENETICS
1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career. Students receive credit only for the term in which they are actively enrolled and working. The same work experience may not count towards credit in GENETICS 399. Enroll Info: So st, and consent of supervising instructor and academic advisor.

Requisites: None
Repeateable for Credit: Yes, unlimited number of completions

GENETICS 133 — GENETICS IN THE NEWS
3 credits.

The science of genetics is at the heart of many issues facing our society, and as such, genetics is often in the news. This course explores the underlying genetics and methodologies to gain a deeper understanding of the science behind the headlines so that we can make more informed decisions as citizens. This course is intended for non-biological science majors, but a high school or college-level biology course is recommended as a prerequisite. Enroll Info: None

Requisites: None
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Elementary
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeateable for Credit: No
Last Taught: Spring 2019

GENETICS 155 — FRESHMAN SEMINAR IN GENETICS
1 credit.

This seminar will introduce freshman to the discipline of genetics, to the UW Laboratory of Genetics, to some of the research projects the faculty are pursuing, to resources available at UW-Madison, and to the career options open to an individual with a genetics undergraduate degree. Enroll Info: None

Requisites: None
Repeateable for Credit: No
Last Taught: Fall 2018

GENETICS 289 — HONORS INDEPENDENT STUDY
1-2 credits.

Enroll Info: Enrolled in the CALS Honors Prgm Soph or Junior standing.

INTER-AG 288
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeateable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2010

GENETICS 299 — INDEPENDENT STUDY
1-3 credits.

Enroll Info: Freshmen, Sophomore or Junior standing written consent of instructor. Open to Freshmen

Requisites: Consent of instructor
Repeateable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

GENETICS 375 — SPECIAL TOPICS
1-4 credits.

Enroll Info: None
Requisites: None
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeateable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2018

GENETICS 399 — COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

Enroll Info: So, Jr or Sr st and cons supervising inst, advisor, and internship program coordinator

Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Workplace - Workplace Experience Course
Repeateable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2016

GENETICS 400 — STUDY ABROAD IN GENETICS
1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Enroll Info: Current enrollment in a UW-Madison study abroad program

Requisites: None
Repeateable for Credit: Yes, unlimited number of completions

GENETICS 466 — PRINCIPLES OF GENETICS
3 credits.

Genetics in eukaryotes and prokaryotes. Includes Mendelian genetics, mapping, molecular genetics, genetic engineering, cytogenetics, quantitative genetics, and population genetics. Illustrative material includes viruses, bacteria, plants, fungi, insects, and humans. Students may not enroll for GENETICS 466 and GENETICS 467/468. Enroll Info: None

Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 381 or BOTANY/BIOLOGY 130 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 104 or CHEM 109 or CHEM 118). Not eligible to enroll if credit earned for GENETICS 467 or 468
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeateable for Credit: No
Last Taught: Spring 2019
GENETICS 467 — GENERAL GENETICS 1
3 credits.

Genetics of eukaryotes and prokaryotes. Includes Mendelian genetics, probability and hypothesis testing, genetic mapping, molecular genetics, gene expression and genetic engineering. Illustrative material includes viruses, bacteria, plants, fungi, insects, and humans. Students may not enroll for GENETICS 466 and GENETICS 467/468. Enroll Info: None
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 381 or BOTANY/BIOLOGY 130 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 104 or CHEM 109 or CHEM 115). Not eligible to enroll if credit earned for GENETICS 466
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 468 — GENERAL GENETICS 2
3 credits.

Genetic analysis, population genetics, evolution and quantitative genetics. Includes mutant screens, pathway analysis, mosaic analysis, reverse genetics, genomics, Hardy-Weinberg linkage equilibrium, inbreeding, genetic drift, natural selection, population structure, inheritance of complex traits, domestication and human evolution. Students may not enroll in GENETICS 466 and GENETICS 467/468. Enroll Info: None
Requisites: GENETICS 467 (not eligible to enroll if credit earned for GENETICS 466)
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 470 — BASIC CYTOLOGY AND LABORATORY PROCEDURES
1 credit.

A comprehensive review of cellular biology, the study of optical methods with emphasis on the light microscope and the various techniques used in preparation and staining of specimens for cytologic and histologic study. Enroll Info: Stdnt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 471 — ADVANCED LABORATORY PROCEDURES
1 credit.

Preparation of non-gynecologic cytologic specimens using several different instrument methodologies. Application of universal precautions and safety in the handling of unknown biologic hazards. Introduction to histologic preparatory techniques and special staining methods. Enroll Info: Stdnt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 520 — NEUROGENETICS
2 credits.

Genetic basis of neural development and function, the genetic basis of neurodevelopmental disorders, and the genetic approaches to studying the development, function, and diseases of the nervous system. Enroll Info: None
Requisites: GENETICS 466, 467, BIOCORE 587, ZOOLOGY/PSYCH 523, or PSYCH 454 (or NTP 523 prior to Fall 2017)
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS/BIOL 522 — EVOLUTION SEMINAR SERIES- UNDERGRADUATE
1 credit.

The Evolution Seminar Series exposes students to diverse topics in contemporary evolutionary biology. Most weeks, one or more guest lecturers present their own primary research on a specialized topic in evolutionary biology. Diverse seminars include perspectives from genetics, ecology, geoscience, zoology, botany, microbiology, systematics, molecular biology, and integrative research. Some weeks feature special topics and discussions on pedagogical, legal, outreach, or other issues in evolutionary biology. Students learn to think critically about methodology, experimental design and interpretation, and how conclusions are reached in evolutionary biology by reading primary and secondary literature, attending seminars, discussing topics with speakers and other students, moderating discussions, and preparing a written report. Enroll Info: Prior or concurrent enrollment in ZOOLOGY/ANTHRO/BOTANY 410
Requisites: None
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 525 — EPIGENETICS
2 credits.

Introductory course in epigenetics - the layer of chemical information that sits on top of the genome - that switch genes ‘on’ or ‘off’. Will introduce how the epigenome, in collaboration with the genome, controls versatile biological processes and cell fates. Will also cover the latest advances of how humans can control their own epigenetic destiny by lifestyle, diet, and other environmental factors. Enroll Info: None
Requisites: GENETICS 466 or 468
Repeatable for Credit: No
GENETICS 527 — DEVELOPMENTAL GENETICS FOR CONSERVATION AND REGENERATION
3 credits.

Human-induced factors such as changes in land use and global climate are causing rapid worldwide biodiversity loss. Can modern molecular genetics contribute to species preservation? In this course, we will first explore the challenges and potential of molecular genetic methods based on biobanking, gene editing and nuclear transfer for animal biodiversity preservation. Topics covered will include: i) maternal factors and early animal development, ii) interspecies somatic cell nuclear transfer (iSCNT) and oocyte-mediated reprogramming in animal cloning, iii) developmental, phylogenetic and ecological considerations for biobanking, iv) gene editing and synthetic biology as potential tools to recapture biodiversity. Use knowledge in animal population status, developmental genetics and phylogeny to address real-life problems involving the conservation of threatened animal populations. Enroll Info: None

Requisites: GENETICS 466, 467, or BIOCORE 381
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No

GENETICS 528 — BANKING ANIMAL BIODIVERSITY: INTERNATIONAL FIELD STUDY IN COSTA RICA
1 credit.

Study abroad course that provides an on-site educational experience where we use developmental genetics concepts to guide projects of biobanking and oocyte-mediated cloning, as a potential last-defense resort for the preservation of living species under risk of extinction. It will provide hands-on experience in current research and activities in biodiversity areas, including visits to biodiversity-rich ecosystems, on site seminars and demonstrations, biodiversity preservation activities, as well as exposure to local culture and social needs. Enroll Info: GENETICS 527 is recommended

Requisites: GENETICS 466, 467, BIOCORE 381, or ZOOLOGY 470
Repeatable for Credit: No

GENETICS 545 — GENETICS LABORATORY
2 credits.

Students gain practical experience in classical and molecular genetic laboratory techniques using plants, animals, and fungi. Topics include complementation and linkage analysis, gene mapping, library screening, yeast and bacterial transformation, restriction analysis, PCR, sequencing, and Southern blot analysis. Enroll Info: GENETICS 466 or equiv

Requisites: None
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 546 — EVOSYSBIO: MODELING IN EVOLUTIONARY SYSTEMS BIOLOGY
3 credits.

All organisms are Systems that Evolve in their Biological contexts. EvoSysBio focuses on this bigger picture. How do intra-organismal and trans-organismal processes interact during evolution? Accurate answers require trans-disciplinary collaborations for building diverse model-ensembles, from biochemistry to ecology. Investigating biological systems of their choice, students are gently introduced to aspects of quantitative modeling, data science, and biological model curation, while learning the Evolvix modeling language for running simulations to support a collaborative grant proposal presented at the end. Students actively learn to (i) link models to observable data they curate, (ii) make predictions and quantify their uncertainty, (iii) define and limit the scope of models using critical thinking, causal analysis, and independent research skills, and (iv) communicate across disciplinary boundaries. This course is open to all aiming to grow their modeling skills at any level. All modeling problems can be simplified, or rendered unsolvable by poor boundary choices. Thus, students from different disciplines can customize their learning. Enroll Info: None

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 548 — THE GENOMIC REVOLUTION
3 credits.

Profound advances are now possible thanks to genomic data and analysis. Introduces the structure, function, and evolution of genomes. It also outlines the realized and prospective benefits of genomic technology for human health, agriculture, and conservation. Enroll Info: None

Requisites: GENETICS 466, 468, or BIOCORE 587
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS/HORT 550 — MOLECULAR APPROACHES FOR POTENTIAL CROP IMPROVEMENT
3 credits.

Introduction of basic concepts of plant molecular biology and molecular techniques in current use. Topics include: organization and regulation of plant genes, gene cloning and analysis, transformation systems for plants, and molecular techniques for crop improvement. Enroll Info: None

Requisites: BIOCHEM 501 and (GENETICS 466 or 467); or graduate/professional standing
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019
GENETICS/MD GENET/ZOOLOGY 562 — HUMAN CYTOGENETICS
2 credits.

Fundamental principles of cytogenetics and special problems of human cytogenetics for biology and medical students. Enroll Info: None
Requisites: GENETICS 466, 468, BIOCORE 587, or declared in Master of Genetic Counselor Studies program
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 564 — GENOMICS AND PROTEOMICS
3 credits.

The basic principles of genomics, proteomics and bioinformatics will be taught through active-learning techniques that include: readings of primary literature, group presentations, peer review, bioinformatic lab exercises, science writing, and project-based learning experiences. Emphasis will be placed upon how to effectively communicate science (written, oral and written). Topics include: genomic sequencing, phylogeny, domain analysis, transcriptomics, CRISPR screens, chemical genomics, quantitative proteomics and protein networks. Capstone course. BIOCHEM 501 and MICROBIO 303 are recommended. Enroll Info: None
Requisites: GENETICS 466, 468, or BIOCORE 587. Not open to graduate students
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS/MD GENET 565 — HUMAN GENETICS
3 credits.

Principles, problems, and methods of human genetics. Surveys aspects of medical genetics, biochemical genetics, molecular genetics, cytogenetics, quantitative genetics, and variation as applied to humans. Enroll Info: None
Requisites: Graduate standing, GENETICS 466, 468, or BIOCORE 587
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 566 — ADVANCED GENETICS
3 credits.

Principles of classical and modern genetic analysis taught through readings in the scientific literature and group projects. Capstone course. Enroll Info: None
Requisites: Declared in Genetics undergraduate program and GENETICS 466, 468, or BIOCORE 587
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 567 — COMPANION RESEARCH SEMINAR
1 credit.

Student-led discussions on scientific, societal, and professional topics relevant to Senior research and selected original research presentations. This course is a companion seminar for independent research and together will fulfill the Genetics major capstone requirement. Students should have completed GENETICS 466, 468 or BIOCORE 587 in previous semesters. Concurrent enrollment in GENETICS 699, GENETICS 681, or GENETICS 399 is required. Enroll Info: None
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 568 — THE CENTRAL NERVOUS SYSTEM
1 credit.

Anatomy, physiology, histology and pathology of the central nervous system and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen preparation. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 569 — THE BREAST
1 credit.

Anatomy, histology, physiology and pathology of the breast and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cell patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 570 — THE FEMALE REPRODUCTIVE SYSTEM
8 credits.

Anatomy, histology, physiology, and pathology of the female reproductive tract and the corresponding cellular manifestations which provide diagnostic information. Cellular changes due to therapy and specimen collection. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018
GENETICS 571 — CLINICAL PRACTICE I
1 credit.

Clinical practicum to develop diagnostic expertise involving the microscopic examination of routine gynecologic specimens (Pap smears). Observe the signout of abnormal cytologic specimens by cytopathologist staff. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 572 — THE RESPIRATORY SYSTEM
3 credits.

Anatomy, histology, physiology and pathology of the respiratory tract and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 573 — THE GENITOURINARY SYSTEM
2 credits.

Anatomy, physiology, histology and pathology of the urinary tract and male reproductive systems and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of didactic information with microscopic cell patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 574 — THE GASTROINTESTINAL SYSTEM
3 credits.

Anatomy, histology, physiology and pathology of the gastrointestinal system and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 575 — MISCELLANEOUS SYSTEMS
3 credits.

Anatomy, histology, physiology and pathology of skin, thyroid, lymph nodes and other sites and the corresponding cellular manifestations which provide diagnostic information. Emphasis on specimen collection by fine needle aspiration. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 576 — EFFUSIONS
2 credits.

Anatomy, physiology, histology and pathology of the body cavities. Cytologic manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 577 — APPLIED CYTOLOGY I
1 credit.

Written and practical application of the comprehensive body of knowledge to all aspects of preparation, evaluation, correlation and diagnosis of cytologic specimens. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 578 — APPLIED CYTOLOGY II
1 credit.

Written and practical application of the advanced comprehensive body of knowledge to all aspects of preparation, evaluation, correlation and diagnosis of cytologic specimens. Practice in nationally offered cytologic examinations. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2018
GENETICS/MICROBIO 607 — ADVANCED MICROBIAL GENETICS
3 credits.

Molecular genetic methods and related aspects of prokaryotic and lower eukaryotic biology, as well as critical analysis of the scientific literature. Approximately two-thirds of the course will focus on prokaryotes and one-third on lower eukaryotic microbes. Enroll Info: GENETICS 466 or equiv; BIOCHEM 501 or equiv; Grad st or cons inst

Requisites: None

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

Last Taught: Spring 2018

GENETICS/AN SCI 610 — QUANTITATIVE GENETICS
3 credits.

An advanced approach with emphasis on statistical foundations. Classical theory with extensions to maternal and paternal effects. Selection theory is considered in depth. Enroll Info: GENETICS 466 and Statistics 572 or cons inst

Requisites: None

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

Last Taught: Fall 2017

GENETICS/BIOCHEM/MICROBIO 612 — PROKARYOTIC MOLECULAR BIOLOGY
3 credits.

Molecular basis of bacterial physiology and genetics with emphasis on molecular mechanisms; topics include nucleic acid-protein interactions, transcription, translation, replication, recombination, regulation of gene expression. Enroll Info: Bact 370 or equiv BIOCHEM 501 or equiv; or cons inst

Requisites: None

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

Last Taught: Fall 2018

GENETICS/AGRonomy/AN SCI/HORT 615 — GENETIC MAPPING
3 credits.

Computing-intensive course to prepare students for genetic mapping research; linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS). Enroll Info: Recommended preparation is undergraduate courses in genetics and statistics and prior experience writing R scripts (such as module 1 of STAT 327).

Requisites: Graduate/professional standing

Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

GENETICS/BIOCHEM/MD GENET 620 — EUKARYOTIC MOLECULAR BIOLOGY
3 credits.

This course focuses on the basic molecular mechanisms that regulate DNA, RNA, and protein metabolism in eukaryotic organisms. This course is intended for advanced undergraduates and first year graduate students with a firm knowledge of basic biochemistry. Enroll Info: None

Requisites: BIOCHEM 501 or 508 or graduate standing

Course Designation: Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

Last Taught: Spring 2019

GENETICS/ENTOM/ZOOLOGY 624 — MOLECULAR ECOLOGY
3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology. Enroll Info: None

Requisites: ZOOLOGY 466, GENETICS 467 or BIOCORE 383 or graduate student standing

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Repeatable for Credit: No

Last Taught: Spring 2019
GENETICS/CHEM 626 — GENOMIC SCIENCE
2 credits.
This course is designed to bring cutting-edge topics in the genomic sciences into the reach of traditionally "pure" chemistry, biology, engineering, computer science statistics students. It is also designed for enabling biologically-oriented students to deal with the advances in analytical science so that they may incorporate new genomic science concepts into their own scientific repertoires. Intended for graduate students and for undergraduates with extensive research experience. Enroll Info: None
Requisites: Graduate standing
Course Designation: Breadth - Physical Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 627 — ANIMAL DEVELOPMENTAL GENETICS
3 credits.
Advanced Genetics course focusing on genetic mechanisms of animal embryonic development, with particular emphasis on central molecular circuitries that control development and genetic analytical tools used to reveal them. Using a combination of lectures and primary research literature reading/student-led seminars, we will address topics including maternal and epigenetic inheritance, the egg-to-embryo transition, pattern formation, organogenesis, coordination of cellular and molecular mechanisms, and animal models of human congenital disorders. Prior completion of ZOOLOGY 470 is recommended. Enroll Info: None
Requisites: GENETICS 466, 468, or BIOCORE 587
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 631 — PLANT GENETICS
2 credits.
Covers the basic concepts of genetics and genomics as applied to plants, including discussions on breeding systems (modes of reproduction, sex determination, self incompatibility and crossing barriers), linkage analysis, genome structure and function (structure, function and evolution of nuclear and organellar chromosomes; haploidy and polyploidy; expression regulation and epigenetics), and a description of current methodologies used in the analysis of these processes. Our objective is to instigate in students a broader knowledge and understanding of the principles and methodologies used in plant genetics such that they can adopt them most effectively in their own research projects, and can describe and discuss them more thoroughly with the general public. Enroll Info: None
Requisites: GENETICS 466, 468, or BIOCORE 587
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2017

GENETICS 633 — POPULATION GENETICS
3 credits.
This is a graduate-level(and upper-level undergraduate) course in population genetics, aimed at preparing students to initiate research in this field. We will explore how genetic variation is influenced by mutation and recombination, population size changes and migration, and natural selection for or against new mutations. Undergraduates who have completed GENETICS 468, GENETICS 466, or BIOCORE 587 may contact the instructors to discuss the appropriateness of this course for their curriculum. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Grad 50% - Counts toward 50% graduate coursework requirement
Last Taught: Fall 2018

GENETICS/BOTANY/ZOOLOGY 645 — MODELING IN POPULATION GENETICS AND EVOLUTION
3 credits.
Introduction to mathematical techniques and approaches for predicting evolutionary change within populations. Concentrates on classic population genetic models and results, including selection on one and several loci; mutation; non-random mating; drift. Evaluation based on periodic problem sets and independent projects. Enroll Info: Intro evolution, intro genetics, calculus, or cons inst
Requisites: None
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2010

GENETICS/BOTANY/M M & I/MICROBIO/PL PATH 655 — BIOLOGY AND GENETICS OF FUNGI
3 credits.
Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models Aspergillus nidulans and Neurospora crassa as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions. Enrollment open to graduate students, but undergraduates welcome to contact instructor for permission. All students should have some prior coursework in genetics (such as GENETICS 466 or 467) and microbiology (such as MICROBIO 303). It is also recommended that students take PL PATH 300 332 prior to this course. Enroll Info: Graduate or professional standing
Requisites: None
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018
GENETICS 660 — EVOLUTIONARY GENOMICS
2 credits.

We will present and discuss modern topics in evolutionary genomics, including genomic approaches, their application to evolutionary biology, and insights gleaned from such studies. Topics include evolution of genome architecture, gene content, and sequences. The course also covers molecular evolution as applied to the genome scale. Enroll Info: GENETICS 466 or Biocore 301/302 sequence or equivalent, and consent of instructor
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2017

GENETICS 662 — CANCER GENETICS
2 credits.

Cancer remains one of the most difficult health issues facing our society. There is hope in the horizon due to an increasing understanding of both genetic and epigenetic alterations in cancer. In particular, DNA sequencing of human cancers is becoming more common in major health care centers, and there is expectation that this technology will allow for personalized medicine. Thus, there has been a rapid increase in this knowledge over the last decade. It is expected that students will become aware of the current major issues in cancer research and will be able to critically evaluate the cancer genetics literature. Enroll Info: None
Requisites: GENETICS 466, 467 or BIOCORE 383
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 670 — SEMINAR IN CLINICAL CYTOGENETICS
1 credit.

Overview of the basic features of chromosome structure and behavior including karyotyping clinical correlates of numerical and structural chromosome aberrations, sex chromosome abnormalities, breakage syndromes and the chromosomal changes associated with the development of cancer. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS 671 — ADVANCED CLINICAL PRACTICE
8 credits.

Clinical practicum to develop diagnostic expertise of cytologic specimens. Examine challenging cases with emphasis on diagnostic pitfalls. Observe patient clinics related to cytologic specimen collection. Participate at clinical experiences in fine needle aspiration, histology, and a private cytology laboratory. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2018

GENETICS 672 — SEMINAR IN LABORATORY OPERATIONS AND QUALITY CONTROL
1 credit.

Review the fundamentals of basic administrative functions and regulatory requirements including planning, organizing, supervising and controlling business management, record keeping, data processing and laboratory safety. Quality assurance procedures necessary for obtaining, processing, diagnosing and reporting cytologic specimens. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS 673 — SEMINAR IN CLINICAL CYTOLOGY
1 credit.

Preparation of a case study or clinical topic of choice by each student to present to a peer professional group of cytology staff and medical faculty. Preparation of a referenced scientific term paper or participation in an approved research project or class project pertaining to clinical cytology. Enroll Info: Stdt must be enrolled in the cytotechnology internship prgm at the WI State Lab of Hygiene
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS/MD GENET 677 — ADVANCED TOPICS IN GENETICS
1-3 credits.

Contents vary; consideration of subjects not included in the curriculum. Enroll Info: None
Requisites: Graduate standing or GENETICS 466, GENETICS 468 or BIOCORE 383
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018

GENETICS 681 — SENIOR HONORS THESIS
2-4 credits.

Enroll Info: Honors candidacy
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018

GENETICS 682 — SENIOR HONORS THESIS
2-4 credits.

Continuation of 681. Enroll Info: Honors program candidacy
GENETICS 681
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2018
### GENETICS 699 — SPECIAL PROBLEMS
1-3 credits.

- Advanced work not covered in regular courses. Enroll Info: Cons inst and Sr st
- Requisites: Consent of instructor
- Course Designation: Level - Advanced
- L&S Credit - Counts as Liberal Arts and Science credit in L&S
- Repeatable for Credit: Yes, unlimited number of completions
- Last Taught: Spring 2019

### GENETICS 701 — ADVANCED GENETICS
3 credits.

- Advanced Genetics is the first semester course of a 2-semester core series (GENETICS 701 and GENETICS 702) for first-year graduate students in the Genetics doctoral degree program. This series provides professional level training in genetic mechanisms and analysis as applied to genetic transmission, gene expression, forward and reverse genetics, population and quantitative genetics, molecular genetics, genomics, developmental genetics and epigenetics. Lectures are coupled with assigned readings of peer-reviewed literature that serve as the basis for graded in-class presentations and discussion, homework questions and essays. Enroll Info: None
- Requisites: Declared in Genetics doctoral program
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: No
- Last Taught: Fall 2018

### GENETICS 702 — ADVANCED GENETICS II
3 credits.

- Advanced Genetics II is the second semester course of a 2-semester core series for first-year graduate students in the Genetics doctoral degree program. This series provides professional level training in genetic mechanisms and analysis as applied to genetic transmission, gene expression, forward and reverse genetics, population and quantitative genetics, molecular genetics, genomics, developmental genetics and epigenetics. Lectures are coupled with assigned readings of peer-reviewed literature that serve as the basis for graded in-class presentations and discussion, homework questions and essays. Enroll Info: None
- Requisites: GENETICS 701
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: No
- Last Taught: Spring 2019

### GENETICS/BIOCHEM 703 — TOPICS IN EUKARYOTIC REGULATION
2 credits.

- Design and interpretation of experiments addressing molecular mechanisms of eukaryotic regulation. For first year graduate students with firm knowledge of basic biochemistry, molecular biology and genetics. Enroll Info: None
- Requisites: Must have taken Genetics/Microbiology 612 and consent of instructor
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: No
- Last Taught: Spring 2013

### GENETICS/MD GENET 707 — GENETICS OF DEVELOPMENT
3 credits.

- A research-level analysis of the current status of the investigation of processes controlling differential gene activity and cellular behavior. The major emphasis is genetic. In successive years, the focus moves from the gene to the cell to the organism. Enroll Info: None
- Requisites: Declared in Genetics graduate program
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: Yes, unlimited number of completions
- Last Taught: Spring 2019

### GENETICS/BOTANY/ENTOM/ZOOLOGY 820 — FOUNDATIONS OF EVOLUTION
2 credits.

- Through reading and analysis of the primary literature, this course will explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Students will read key papers related to each controversial topic, will debate the pros and cons of competing viewpoints, and will reflect on the relevance of the issues to contemporary evolutionary biology. Students will also write a paper that analyzes one topic in more detail. This course is intended for graduate students who plan to specialize in evolutionary biology, broadly construed. Enroll Info: None
- Requisites: Graduate/professional standing
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: No
- Last Taught: Fall 2018

### GENETICS/BIOCHEM/BOTANY 840 — REGULATORY MECHANISMS IN PLANT DEVELOPMENT
3 credits.

- Molecular mechanisms whereby endogenous and environmental regulatory factors control development; emphasis on stimulus perception and primary events in the signal chain leading to modulated gene expression and cellular development; lecture. Enroll Info: BIOCHEM 501 or 601 BOTANY 500 or Biocore 301 323
- Requisites: Graduate/professional standing
- Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
- Repeatable for Credit: No
- Last Taught: Fall 2018
GENETICS/AN SCI/POP HLTH 849 — GENETIC EPIDEMIOLOGY
3 credits.

This course will provide an introduction to genetic epidemiology. Topics will include a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, including participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates, and choice of analytic methods. We will briefly discuss some of the original study designs and then focus on current study designs for the remainder of the class. Additional emerging topics will be briefly touched upon. Students will complete short homework assignments to enforce concepts learned during lectures, discuss journal articles, and prepare a very short grant application for the mid-term project. In the final weeks of class, students will work together to analyze data from a real genetic study, prepare tables, interpret the findings, and present their project to their peers. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2017

GENETICS 875 — SPECIAL TOPICS
1-4 credits.

Special topics of current interest to graduate students. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

GENETICS 885 — ADVANCED GENOMIC AND PROTEOMIC ANALYSIS
3 credits.

With the availability of genome sequences and high-throughput techniques, organismal physiology can now be examined on a global scale by monitoring the behavior of all genes or proteins in a single experiment. This course will present modern techniques in genomics and proteomics, with particular focus on analyzing the data generated by these techniques. Course material will cover genomic sequencing, comparative sequence analysis, phylogeny construction and phylogenomics, transcription factor motif discovery, DNA microarray analysis, techniques in mass spectrometry, proteomic screening methods, and protein-interaction network analysis. In addition to lecture time, the course includes computer lab where students get hands-on experience analyzing genomic and proteomic datasets. Students should have coursework in general statistics and intermediate or advanced genetics. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018

GENETICS/MD GENET/POP HLTH 888 — PUBLIC HEALTH GENOMICS
1 credit.

Public health genomics uses knowledge gained from genetic and molecular research along with a consideration of ethical, legal, and social implications (ELSI) to prevent disease and improve the health of the population. Students enrolled in this course will be provided an introduction to public health genomics through a review of fundamental principles of genetics, followed by lectures and discussions on the use of genetic information in clinical and research settings and its implications for disease management and prevention. Students will also gain an awareness of policies that guide public health and will be able to discuss current ethical, legal, and social implications of these policies. These learning objectives will be met through readings and videos, lectures, and discussions of recent journal articles and current topics in public health genomics. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS/B M E/B M I/BIOCHEM/CBE/COMP SCI 915 — COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE
1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees. Enroll Info: None
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

GENETICS/AN SCI/DY SCI 951 — SEMINAR IN ANIMAL BREEDING
0-1 credits.

Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

GENETICS/AGRONOMY/HORT 957 — SEMINAR-PLANT BREEDING
1 credit.

Graduate seminar in Plant Breeding Plant Genetics (PBPG) that requires students to give oral scientific presentations on topics chosen by the instructors and/or the student’s thesis research. This seminar is coordinated by PBPG faculty on a rotating basis. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019
GENETICS 990 — RESEARCH
1-12 credits.

Enroll Info: None
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

GENETICS 993 — SEMINAR IN GENETICS
0-1 credits.

Sections deal with various aspects of genetics: Drosophila, maize, immunogenetics, developmental genetics, or other special topics. Students may enroll in two or more sections if they wish. Enroll Info:
None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2018
