SOC/ILS/JEWISH 423 – MODERN JEWISH THOUGHT

3 credits.

How do Jews fit into the modern world? While the "Jewish Question" initially referred to debates about Jewish emancipation (the struggle for equal citizenship and social integration that started with the French Revolution), it later served to describe modern Jewish political and social thought about the identity, place, and role of the Jews in the modern world. Beginning in the late 19th century, as cultural assimilation, economic impoverishment in eastern Europe, and rising antisemitism sowed doubts about the viability of emancipation and traditionalism alike, Jewish thinkers proposed new answers to the Jewish question. Learn about some of the major answers they debated, including revolutionary universalistic utopias (socialism and Communism), various forms of Jewish nationalism, hyphenated identities, cultural pluralism, and cosmopolitanism. Work to contextualize these ideas historically while also considering whether and how they remain relevant to the present.

SOC 550 – COMPARATIVE RACIAL INEQUALITY

3 credits.

An introduction to the sociological study of racial orders in comparative and historical perspective. As W.E.B. Du Bois famously wrote, "The problem of the twentieth century is the problem of the color line," but as he also insisted, the social meaning of race is shaped by specific historical and economic contexts. Half of the content focuses on the American experience, especially over the last 50 years, exploring historical and contemporary meanings of race in America, and how racial dynamics have changed (and not changed) across time. The other half continues to explore the American experience, but now using a comparative historical approach, discussing patterns of racial inequality and social change in South Africa and Brazil, both to understand how these issues have played out in those contexts, and to gain new insights into our experiences in the United States.
