PHYSICS, M.A.

DEPARTMENT OVERVIEW

The Department of Physics has a strong tradition of graduate study and research in astrophysics; atomic, molecular, and optical physics; condensed matter physics; high energy and particle physics; plasma physics; quantum computing; and string theory. There are many facilities for carrying out world-class research (https://www.physics.wisc.edu/research/areas). We also have a large professional staff: 45 full-time faculty (https://www.physics.wisc.edu/people/staff) members; 11 faculty members holding joint appointments with other departments; 34 assistant, associate, and senior scientists; and 46 postdocs.

The department occupies all of Chamberlin Hall and a portion of Sterling Hall, located in the central campus area. The Physics Library (http://physics.library.wisc.edu) is in Chamberlin Hall, is large and convenient to use. It has complete electronic access to databases and, of course, copy machines, and comfortable chairs. The department maintains a fine instrument and machine shop and an electronics shop (http://uw.physics.wisc.edu/~eshop) staffed by skilled electronics technicians. There is, in addition, a student-staff machine shop open to graduate students and supervised by an experienced machinist who assists and instructs shop users. Several computers are available for general computing, and a number of smaller machines are used for on-line control of experiments and for data collection. The Division of Information Technology (DoIT) (http://www.doit.wisc.edu) has a large professional staff which assists users, provides contract programming services and offers a wide variety of computing courses. Researchers have free access to large scientific computing resources (http://aci.wisc.edu/services/large-scale). Many research programs in physics use the Physical Sciences Laboratory (PSL) (http://www.psl.wisc.edu).

M.A. DEGREE DETAILS

The department offers the master of arts and master of science degrees in physics, and the doctor of philosophy degree with a major in physics.

The master of arts degree is a purely academic degree, requiring 30 credits of graduate work and passage of the qualifying examination at the master's level. It is designed to strengthen the student's physics background and enhance the opportunities for employment as a physicist or in physics education.

ADMISSIONS

Admission is competitive. All applicants are reviewed and evaluated on the basis of previous academic record, three letters of recommendation, statement of purpose for graduate study, undergraduate physics. A good academic record in an undergraduate physics major, as a graduate student in physics, or other firm evidence of mastery of undergraduate physics.

1. A good academic record in an undergraduate physics major, as a graduate student in physics, or other firm evidence of mastery of undergraduate physics.

2. Working knowledge of oral and written English.
3. Ability to communicate effectively with undergraduate students.

4. Good standing as a graduate student in the University of Wisconsin. This is a university requirement for holding an assistantship. “Good standing” is defined in terms of quantity of academic work carried (number of credit hours) and the quality of the work (B average for a graduate student).

5. When several candidates are qualified according to the preceding criteria, we give preference to those who show the most promise for Ph.D. research as judged by the Committee on Assistantships and Fellowships.

6. Last-minute or short-term appointments may be made on a temporary (one semester) basis by the chairperson. Such limited term appointments do not carry any assurance of continuing support.

7. Reappointments (from limited-term status) to teaching assistantships with assurance of continuing support are made by the department after receiving the recommendation of the Teaching Assistant Review Committee. In addition to the criteria listed under (1), the criteria for reappointment as a teaching assistant include:

8. Satisfactory performance as a teaching assistant.

9. Satisfactory progress as a graduate student, as discussed above. Whenever possible, teaching assistantships are half-time appointments. However, appointments less than half-time may be used to meet a special need of an individual appointee, or to cover special, often last-minute, teaching assignments.

10. If a teaching assistant transfers to another department, the commitment to continuing support is terminated. However, exceptions may be made for joint Ph.D. programs or in other special circumstances, at the option of the department.

Regular Half-Time Teaching Assignments

The following assignments are typical half-time assignments. A teaching assistant should be able to do a satisfactory job in one of these assignments without exceeding the 360 hour per semester workload for half-time appointment. The amount of time spend on the assignments may, of course, fluctuate from week-to-week.

Courses // Assignment

PHYSICS 103, PHYSICS 104 // 3 laboratory-discussion sections
PHYSICS 109 // 4 laboratory sections PHYSICS 201, PHYSICS 202, PHYSICS 207, PHYSICS 208 // 2 laboratory-discussion sections

Representative breakdowns of allocation of the 360 hours among duties such as preparation, meeting classes and labs, attending lectures and course meetings, conferences with individual students, helping with registration, etc., is available in the department office.

Evaluation of Teaching Performance

The teaching performance of each teaching assistant is evaluated every semester by the TA review committee. The appointments of teaching assistants who are given unsatisfactory ratings may be terminated. Outstanding teaching assistants may be nominated for one of the campus-wide teaching awards. Material considered in the review will include the results of teaching evaluation questionnaires filled out by the students in the teaching assistant’s sections, the evaluation of the teaching assistant by the faculty member in charge of the course, and any other relevant information submitted to the committee by students, faculty, the teaching assistant in question, or other teaching assistants.

A summary of the results of the evaluation is sent to each TA, and a copy is maintained by the department. Teaching assistants are required to look at this information after the review, since it is often valuable for self-evaluation and improvement.

Research Assistantships

Research assistantships are made available by individual professors to students who have decided on their field of research. Most departmental RA appointments are made for an annual (12 months) period.

Both in-state and out-of-state tuition will be waived for research assistants holding combined graduate assistant appointments of one-third time or greater. However, all students must still pay the segregated fees, which are $630.12 per semester for full-time students for the 2017–18 year.

Applicants who wish to be considered for an RA appointment should contact the faculty (https://www.physics.wisc.edu/people/faculty) directly.

Fellowships

Fellowships, including University Fellowships and Advanced Opportunity Fellowships, are awarded by the Graduate School upon recommendation of the Department of Physics. In addition, the department may have additional fellowships—funded by endowments from physics department alumni—available for first-year graduate students. Information on these fellowships is available on the department website (https://www.physics.wisc.edu/academics/gradstudents/fellowships).

Information on nondepartmental fellowships can be found on the Graduate School funding page (http://grad.wisc.edu/studentfunding/types).

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (http://guide.wisc.edu/graduate/policiesandrequirementstext), in addition to the program requirements listed below.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich,
interactive learning environment. For more information about the online nature of a specific program, contact the program.  
**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.  
**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

### CURRICULAR REQUIREMENTS

<table>
<thead>
<tr>
<th>Minimum Credit Requirement</th>
<th>30 credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Residence Credit Requirement</td>
<td>30 credits</td>
</tr>
<tr>
<td>Minimum Graduate Coursework Requirement</td>
<td>Half of degree coursework (15 credits out of 30 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (<a href="https://registrar.wisc.edu/course-guide/">https://registrar.wisc.edu/course-guide/</a>). No 300-level courses will be counted toward the 30 credit minimum.</td>
</tr>
</tbody>
</table>

#### Overall
- **Graduate GPA Requirement:** 3.00 GPA required.
- **Other Grade Requirements:** The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.
- **Assessments and Examinations:** All master of arts degree candidates must pass the qualifying examination at the master’s level.
- **Language Requirements:** Contact the program for information on any language requirements.

### REQUIRED COURSES

All graduate degree candidates are required to take five core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 711</td>
<td>Theoretical Physics-Dynamics</td>
<td>3</td>
</tr>
<tr>
<td>PHYSICS 715</td>
<td>Statistical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>PHYSICS 721</td>
<td>Theoretical Physics-Electrodynamics</td>
<td>3</td>
</tr>
<tr>
<td>PHYSICS 731</td>
<td>Quantum Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>PHYSICS 732</td>
<td>Quantum Mechanics</td>
<td>3</td>
</tr>
</tbody>
</table>

The remaining 15 credits may be earned through a combination of coursework, directed study, and research, to be determined by the advisor in consultation with the student.

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

#### MAJOR-SPECIFIC POLICIES

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://www.physics.wisc.edu/sites/default/files/grad_handbook_2017-18b.pdf) is the repository for all of the program’s policies and requirements.

#### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

No coursework from other institution may count toward any graduate degree in physics.

**UW–Madison Undergraduate**

Up to 7 credits in courses numbered 500 or above may be used to satisfy minimum degree requirements.

**UW–Madison University Special**

With program approval and payment of difference in tuition (between Special and graduate tuition), students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

#### PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

#### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis. The director of graduate studies (DGS) serves as the academic advisor to all master of arts degree candidates. The DGS will meet regularly with the Master’s candidate to monitor progress toward the degree.

#### CREDITS PER TERM ALLOWED

15 credits

#### TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements;
that coursework may not count toward Graduate School credit requirements.

**OTHER**

Typical funding is through 50% assistantships. Virtually 100% of enrolled students are funded for the duration of their degree. All programs are full time and require full-time student enrollment during fall and spring terms.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information ([https://grad.wisc.edu/funding](https://grad.wisc.edu/funding)) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

**PROFESSIONAL DEVELOPMENT OPPORTUNITIES FOR PHYSICS GRADUATE STUDENTS**

Our students have multiple opportunities for professional development throughout their graduate careers. As an integral part of research experience, students regularly work at CERN, national laboratories (Argonne, FermiLab), IceCube Neutrino Observatory at the South Pole etc.

Students are encouraged to travel to relevant conferences across the U.S. and the globe. Our students regularly attend the annual American Physical Society (APS) March Meeting and are encouraged to attend APS meetings in their sub-field throughout the year. We also encourage students to attend summer schools at various host institutions to expand their knowledge and to interact with fellow scientists in their field.

All incoming graduate students receive extensive TA training during a week long, comprehensive program designed and implemented by our Director of Introductory Labs. Students are also encouraged to join the DELTA program on campus which provides excellent training and mentorship for those interested in teaching. Each spring we offer a for credit course PHYSICS 603 Workshop in College Physics Teaching.

This gives our students the opportunity to learn effective teaching methods, do research into new teaching practices, and provides a forum for students and the instructor to openly discuss challenges and rewards of teaching.

Students are also encouraged to attend Graduate School sponsored Professional Development events and participate in Graduate School Professional Development resources, such as the Individual Development Plan (IDP).

**LEARNING OUTCOMES**

1. Mastery of the core physical concepts (classical mechanics, electricity and magnetism, quantum mechanics, and statistical mechanics).

2. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in physics.

3. Identifies sources and assembles evidence pertaining to questions or challenges in physics.

4. Demonstrates understanding of the physics in an historical, social, or global context.

5. Selects and/or utilizes the most appropriate methodologies and practices.

6. Evaluates or synthesizes information pertaining to questions or challenges in physics.

7. Communicates clearly in ways appropriate to the field of physics.

8. Recognizes and applies principles of ethical and professional conduct.

**PEOPLE**

**Faculty:** Professors Dasu (chair), D. Anderson, Balantekin, Barger, Boldyrev, Carlsmith, Chung, Coppersmith, Eom, Eriksson, Everett, Forest, Gilbert, Halzen, Hanson, Hashimoto, Hegna, Heinz, Herndon, Ioffe, Joynt, Karle, Knezevic, Lagally, Lawler, Lazarian, Lin, McCammon, McDermott, Onellion, Rzchowski, Saffman, Sarff, Shiu, W. Smith, Sovinec, Terry, Timbie, Vavilov, Walker, Westerhoff, Winokur, Wu, Yavuz, Zweibel; Associate Professors Egedal, Levchenko, Pan; Assistant Professors Bai, Bechtol, Brar, Kats, Kolokowitz, Palladino, Vandenbroucke, Vetsigian
