ENTOMOLOGY, B.S.

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insect species—with estimates ranging as widely as from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans—sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology under the bachelor of science degree program.

Students interested in graduate work should consult the Graduate School Catalog (http://guide.wisc.edu/graduate).

See the department website (http://www.entomology.wisc.edu) for current course rotation information.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/enteringthecollege#text).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (http://guide.wisc.edu/undergraduate/requirementsforundergraduatetext) section of the Guide.

Requirements Detail

<td>• Quantitative Reasoning Part A &amp; Part B *</td>
<td></td>
</tr>
</tbody>
</table>

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics). College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

ENTOM 468 Studies in Field Entomology 3 3

Total Credits 36-43

1 If MATH 171 is taken, student must take MATH 217.
2 Suggested courses/subjects include GENETICS 466, CHEM 341, CHEM 342 CHEM 343, CHEM 344, CHEM 345, PHYSICS 104, PHYSICS 202, PHYSICS 208, ENTOM not used elsewhere, BOTANY, ZOOLOGY, F&W ECOL, MICRO, PL PATH.

Option 3:
BIOCORE 381 Evolution, Ecology, and Genetics
BIOCORE 382 Evolution, Ecology, and Genetics
BIOCORE 383 Genetics Laboratory
BIOCORE 384 Cellular Biology

Select 12 additional credits from any biological or physical science course (at least 8 credits must be 300-level or 200-level courses with the intermediate-level designation). 2

**Physics**
Select one of the following: 3-5
PHYSICS 103 General Physics
PHYSICS 107 The Ideas of Modern Physics
PHYSICS 109 Physics in the Arts
PHYSICS 115 Energy
PHYSICS 201 General Physics
PHYSICS 207 General Physics

**Entomology Core**
ENTOM/ZOOLOGY 302 Introduction to Entomology 4

Select 11 credits as follows: 11
Must select at least 3 credits from at least two subsets (organismal, suborganismal, or applied) and may select up to 3 credits from subset called "other"

**Capstone**
ENTOM 468 Studies in Field Entomology 3 3

Total Credits 36-43

1 If MATH 171 is taken, student must take MATH 217.
2 Suggested courses/subjects include GENETICS 466, CHEM 341, CHEM 342 CHEM 343, CHEM 344, CHEM 345, PHYSICS 104, PHYSICS 202, PHYSICS 208, ENTOM not used elsewhere, BOTANY, ZOOLOGY, F&W ECOL, MICRO, PL PATH.

3 ENTOM 468, taken after the junior year, is the recommended capstone course (can double count in Core Courses). ENTOM 681 Senior Honors Thesis, ENTOM 682 Senior Honors Thesis, ENTOM 691 Senior Thesis, ENTOM 699 Special Problems can be substituted in special circumstances (and can double count up to 3 credits in Core Category); see advisor.

Entomology, B.S.

ENTOM 451  Basic and Applied Insect Ecology  1
Laboratory (requires enrollment in ENTOM 450)  

ENTOM 468  Studies in Field Entomology  3

ENTOM/BOTANY/ ZOOLOGY 473  Plant-Insect Interactions  3

The following three courses:

ENTOM/ AGRONY/ F&W ECOL/ M&ENVTOX 632  Ecotoxicology: The Chemical Players  3

ENTOM/ AGRONY/ F&W ECOL/ M&ENVTOX 633  Ecotoxicology: Impacts on Individuals  3

ENTOM/ AGRONY/ F&W ECOL/ M&ENVTOX 634  Ecotoxicology: Impacts on Populations, Communities and Ecosystems  3

ENTOM 701  Advanced Taxonomy  3

ENTOM 450 Basic and Applied Insect Ecology and ENTOM 451 Basic and Applied Insect Ecology Laboratory can count toward either the organismal or applied categories, not both

SUBORGANISMAL

Code  Title  Credits
ENTS 321  Physiology of Insects  3
ENTS/BOTANY/PL PATH 505  Plant-Microbe Interactions: Molecular and Ecological Aspects  3
ENTS/GENETICS/ZOOLOGY 624  Molecular Ecology  3

APPLIED

Code  Title  Credits
ENTS/M M & I/PATH-BIO/ZOOLOGY 350  Parasitology  3
ENTS 351  Principles of Economic Entomology  3
ENTS/ZOOLOGY 371  Medical Entomology  3
ENTS 450  Basic and Applied Insect Ecology  3
ENTS 451  Basic and Applied Insect Ecology Laboratory  1
ENTS/F&W ECOL 500  Insects in Forest Ecosystem  2

FOUR-YEAR PLAN

SAMPLE ENTOMOLOGY FOUR-YEAR PLAN

Freshman

Fall  Credits  Spring  Credits
CHEM 103 or 109  4-5  CHEM 104  5
MATH 112, 113, 114, or 171  3-5  MATH 113, 211, 217, or 221  3-5
COMM A or Elective  3 Electives (to reach ~15 credits)  5-8
First Year Seminar  1

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology.
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.
4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

ENTS 699  Special Problems  1-4

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree  To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency  Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work  Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
Additional Elective Course 1

Total Credits 27-33

1 When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)

For additional Biological or Physical Science courses students may want to choose from the following depending on interest

* Health/graduate school: CHEM 343/CHEM 344/CHEM 345, PHYSICS 104 or PHYSICS 207, GENETICS 466, MICROBIO 303/MICROBIO 304, BIOCHEM 501

Students may reduce the number of required courses via:
- Testing out of Comm-A
- Using ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology to satisfy Comm-B
- Testing out of Quantitative Reasoning, Part A
- Earning AP/IB credits
- Using ENTOM/ZOOLOGY 371 Medical Entomology for International Course

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN ENTOMOLOGY

Undergraduate students are assigned to two advisors, the Entomology undergraduate faculty advisor Dr. Dan Young (http://labs.russell.wisc.edu/ento/people/faculty/young) and Sara Rodock (rodock@wisc.edu (p. 4): appointment scheduling link (http://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html)). However, since the vast majority of entomology B.S. students do independent research during their undergraduate career, it is important to meet with other entomology faculty members (http://labs.russell.wisc.edu/ento/people/faculty) to learn about all of the research possibilities.

Undergraduates in entomology are strongly urged to meet with their advisor before they enroll for the upcoming term.

For more information about the entomology B.S. or the department in general, please contact Dr. Dan Young or the Student Services Coordinator, Sara Rodock (rodock@wisc.edu or 608-262-9926).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to entomology students, please visit our Internship & Job Resources (http://labs.russell.wisc.edu/ento/graduate-study/internships-and-job-resources) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to entomology B.S. students, please visit the CALS “Building Your Career” (http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development) page. Students in the major are welcome to make an individual appointment with Sara Rodock (rodock@wisc.edu; appointment link for current UW–Madison students (https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html)) to discuss a number of career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

While entomology clearly is “big science,” our department prides itself on a “small campus” feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

Very nearly all our majors have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates 1–3 credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

Many of our undergraduate majors are also involved in service learning and teaching through our departmental “Insect Ambassadors (http://labs.russell.wisc.edu/insectambassadors)” outreach program to K/12, various clubs, and organizations. We are committed (http://labs.russell.wisc.edu/ento/outreach) to the UW System goal to provide Wisconsin’s citizens with opportunities to benefit from, and contribute to, the state’s growing “knowledge economy” through the land-grant university three-fold mission of teaching, research and public service. We also have an active Undergraduate Entomology Society for majors—or any UW–Madison students interested in entomology. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (http://labs.russell.wisc.edu/wirc) as well as possible participation in WIRC sponsored collecting expeditions in Wisconsin and around the United States.
