The Department of Forest and Wildlife Ecology provides science-based teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the rich traditions of Aldo Leopold (the Department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors—forest science and wildlife ecology—that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation for graduate training in forestry, wildlife, ecology, and related fields. The forest science program is accredited by the Society of American Foresters. The wildlife ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the M.S. and Ph.D. levels. See the Graduate Guide (http://guide.wisc.edu/graduate) for additional information.

**PEOPLE**

**PROFESSORS**

Bowe, Scott  
Drake, David  
Karasov, William  
Kruger, Eric  
Mladenoff, David  
Radeloff, Volker  
Ribic, Christine  
Rickenbach, Mark (chair)  
Samuel, Michael  
Stanosz, Glen  
Townsend, Philip  
Van Deelen, Timothy

**ASSOCIATE PROFESSORS**

Lutz, R. Scott  
Ozdogan, Mutlu  
Pauli, Jonathan  
Peery, M. Zach  
Pidgeon, Anna  
Rissman, Adena

**ASSISTANT PROFESSORS**

Johnston, Craig
