MOLECULAR BIOLOGY, B.A.

ABOUT THE MAJOR

Molecular biology is the basic science that seeks an understanding of biological processes in terms of the properties and functions of the molecules that make up living cells. The scope of questions addressed in molecular biology ranges from evolution to development to the regulation of gene expression. A career in molecular biology requires a strong background in biology as well as a solid foundation in chemistry, mathematics, and physics.

The molecular biology major has been designed primarily for three groups of students:

a. those who plan to enter a research career in molecular biology or related areas such as biochemistry, genetics, oncology, microbiology, cell biology or developmental biology;

b. pre-professional students who plan to enter either a research or clinical career in medicine, or allied health fields;

c. students who plan to teach biology at the college or secondary-school levels.

Students with other interests are also welcome, of course. Career opportunities for students with an undergraduate degree in molecular biology are amazingly diverse. Graduates of the program have gone into patent law, science journalism, forensics, philosophy, nutrition, genetic counseling, veterinary medicine, anthropology, archeology, marine biology, theology, and much more.

Molecular Biology, B.A.

HOW TO GET IN

To declare the molecular biology major, students must contact or make an appointment with the molecular biology student services coordinator.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world.

BREADTH AND DEGREE REQUIREMENTS:

COLLEGE OF LETTERS & SCIENCE

BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here.
### BACHELOR OF ARTS DEGREE REQUIREMENTS

**Requirements Detail**

**Mathematics**
- Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.

**Foreign Language**
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language

Note: A unit is one year of high school work or one semester/term of college work.

**L&S Breadth**
- Humanities, 12 credits: 6 of the 12 credits must be in literature
- Social Sciences, 12 credits
- Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

**Liberal Arts and Science Coursework**
- 108 credits
- 60 intermediate or advanced credits

**Major**
- Declare and complete at least one (1) major

**Total Credits**
- 120 credits

**UW-Madison Experience**
- 30 credits in residence, overall
- 30 credits in residence after the 90th credit

**Minimum GPAs**
- 2.000 in all coursework at UW–Madison
- 2.000 in intermediate/advanced coursework at UW–Madison

### NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

### REQUIREMENTS FOR THE MAJOR

#### MATHEMATICS, CHEMISTRY & PHYSICS

<table>
<thead>
<tr>

**Molecular Biology - 3 credits from:**
- AGRONOMY/HORT 339: Plant Biotechnology: Principles and Techniques I
- AGRONOMY/HORT 340: Plant Cell Culture and Genetic Engineering
BIOCHEM/GENETICS/MICROBIO 612 Prokaryotic Molecular Biology
BIOCHEM/GENETICS 620 Eukaryotic Molecular Biology
GENETICS 545 Genetics Laboratory
HORT/PATH-BIO 500 Molecular Biology Techniques
HORT/GENETICS 550 Molecular Approaches for Potential Crop Improvement

Advanced Courses - 6 credits from 2 areas:

Development
BOTANY 500 Plant Physiology
ZOOLOGY 470 Introduction to Animal Development
ZOOLOGY 555 Laboratory in Developmental Biology
ZOOLOGY 625 Development of the Nervous System

Microbiology
BOTANY/PL PATH 505 Plant-Microbe Interactions: Molecular and Ecological Aspects
MICROBIO 303 Biology of Microorganisms
MICROBIO 304 Biology of Microorganisms Laboratory
MICROBIO 330 Host-Parasite Interactions
MICROBIO/SOIL SCI 425 Environmental Microbiology
MICROBIO/PL PATH 622 Plant-Bacterial Interactions
MICROBIO/ONCOLOGY/PL PATH 640 General Virology-Multiplication of Viruses
M M & I/BIOCHEM 575 Biology of Viruses

Genetics
AGRONOMY/HORT 338 Plant Breeding and Biotechnology
GENETICS/BOTANY/HORT 561 Introductory Cytogenetics
GENETICS/MD GENET 565 Human Genetics
GENETICS 566 Advanced Genetics
MICROBIO 470 Microbial Genetics & Molecular Machines
MICROBIO/GENETICS 607 Advanced Microbial Genetics

Cell Biology (Endocrinology, Neurobiology, Immunology)
BIOCHEM/PHMCOL-M/ZOOLOGY 630 Cellular Signal Transduction Mechanisms
BIOCORE 587 Biological Interactions
MICROBIO/M M & I/PATH-BIO 528 Immunology
M M & I 341 Immunology

ONCOLOGY 401 Introduction to Experimental Oncology
ONCOLOGY/MICROBIO/PL PATH 640 General Virology-Multiplication of Viruses
ZOOGOGY/PSYCH 523 Neurobiology
ZOOGOGY 570 Cell Biology

Biochemistry and Physical Chemistry
BIOCHEM 508 General Biochemistry II
BIOCHEM/NUTR SCI 510 Biochemical Principles of Human and Animal Nutrition
BIOCHEM 550 Topics in Medical Biochemistry
BIOCHEM 551 Biochemical Methods
BIOCHEM/BOTANY 621 Plant Biochemistry
CHEM 561 Physical Chemistry
CHEM 565 Biophysical Chemistry
PHYSIOL 533 Molecular Physiology

Quantitative and Computational Sciences
B M I/COMP SCI 576 Introduction to Bioinformatics
BOTANY 563 Phylogenetic Analysis of Molecular Data
COMP SCI/I SY E/MATH 425 Introduction to Combinatorial Optimization
F&W ECOL/HORT/STAT 571 Statistical Methods for Bioscience I
F&W ECOL/HORT/STAT 572 Statistical Methods for Bioscience II
STAT 333 Applied Regression Analysis
STAT/B M I 541 Introduction to Biostatistics

Total Credits 15-18

LABORATORY/INDEPENDENT RESEARCH
2 credits from:

Code Title Credits

Lab/Research courses:
HORT/PATH-BIO 500 Molecular Biology Techniques
GENETICS 545 Genetics Laboratory
BMOLCHEM 504 Human Biochemistry Laboratory
MICROBIO 304 Biology of Microorganisms Laboratory
BIOCHEM 551 Biochemical Methods
ZOOGOGY 555 Laboratory in Developmental Biology

Thesis/Directed Study:
MOL BIOL 681 Senior Honors Thesis & MOL BIOL 682 and Senior Honors Thesis
MOL BIOL 691 Senior Thesis & MOL BIOL 692 and Senior Thesis
MOL BIOL 699 Directed Studies in Molecular Biology
For assistance finding a directed lab or research experience and for information about scholarships, see the advisor for this program and/or consult the Undergraduate Research page (http://www.molecularbio.ls.wisc.edu/57.htm).

**RESIDENCE AND QUALITY OF WORK**
- 2.000 GPA in all MOL BIOL and major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence
- 15 credits in MOL BIOL, taken on the UW–Madison campus

**HONORS IN THE MAJOR**
Students may declare Honors in the Molecular Biology Major in consultation with the Molecular Biology undergraduate advisor.

**HONORS IN THE MOLECULAR BIOLOGY MAJOR REQUIREMENTS**
To earn a B.A. or B.S. with Honors in the Major in Molecular Biology students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 GPA for all MOL BIOL courses, and all courses accepted in the major
- Complete the Molecular Biology advanced course requirement utilizing the courses indicated with the above, taken for Honors credit and with grades of B or better earned in each individual course
- Complete a two-semester Senior Honors Thesis in MOL BIOL 681 Senior Honors Thesis and MOL BIOL 682 Senior Honors Thesis, for a total of 6 credits
- Complete MOL BIOL 686 Senior Honors Seminar in Molecular Biology

**UNIVERSITY DEGREE REQUIREMENTS**

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Degree</strong></td>
<td>To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.</td>
</tr>
<tr>
<td><strong>Residency</strong></td>
<td>Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. &quot;In residence&quot; means on the UW–Madison campus with an undergraduate degree classification. &quot;In residence&quot; credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.</td>
</tr>
<tr>
<td><strong>Quality of Work</strong></td>
<td>Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.</td>
</tr>
</tbody>
</table>

**LEARNING OUTCOMES**

1. Summarize the energetic and thermodynamic basis of life.

2. Define and explain the molecular basis of life and relationships between the structure and function of biological macromolecules.

3. Describe the nature of the cell and its role as the basic unit of life.

4. Understand the nature of the genetic material and its roles in inheritance, evolution, and cellular function.

5. Demonstrate comprehension of basic molecular biology laboratory techniques.

6. Utilize the scientific method to solve biological problems characteristic of today's society.

7. Understand the primary scientific literature and apply concepts from literature to draw conclusions about modern topics in the field.

8. Communicate scientific ideas in written and oral form.

**ADVISING AND CAREERS**
Students in the major are assigned to a team of advisors composed of a faculty advisor and a the major's student services coordinator. See the major's advising page (http://bacmajor.ls.wisc.edu/advising.htm) for a list of advisors and for the student services coordinator information. The faculty advisor provides guidance specific to the molecular biology discipline through discussions about undergraduate experiences (i.e., research, coursework, internships) that will help prepare students for graduate work or a career after graduation. The student services coordinator provides guidance specific to the discipline, and also helps students with major declarations, course selection, registration, DARS, L&S degree and major requirements, and tracking progress toward graduation, as well as connecting students with important resources on campus.

**PEOPLE**
Committee of Advisors: Ahmad (Dermatology), Amann (Zoology), Fabry (Pathology and Laboratory Medicine), Filutowicz (Bacteriology), Martin (Biochemistry), McMahon (Civil Engineering and Environmental Engineering), Schuler (Comparative Biosciences)
