The B.S. in pharmaceutical sciences is not a major, but is an internal degree granted to current doctor of pharmacy (Pharm.D.) students after they complete their second year of the Pharm.D. program. In order to qualify for the B.S. in pharmaceutical sciences, students must have attended UW–Madison prior to entering the School of Pharmacy, and must meet all degree requirements. More detailed information about this degree may be found on the school website (https://pharmacy.wisc.edu/programs/pharmd/curriculum/bs-ps).

Students interested in pursuing an undergraduate degree offered by the School of Pharmacy may want to investigate the B.S. Pharmacology/Toxicology (http://guide.wisc.edu/undergraduate/pharmacy/pharmacy/pharmacology-toxicology-bs) program. This interdisciplinary major in the biomedical sciences can serve as a foundation for further education in graduate or professional degree programs, or for entry-level scientific employment.
