ANIMAL SCIENCES (AN SCI)

AN SCI 1 — COOPERATIVE EDUCATION/CO-OP IN ANIMAL SCIENCES
1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career. Students receive credit only for the term in which they are actively enrolled and working. The same work experience may not count towards credit in AN SCI 399. Enroll Info: So st, and consent of supervising instructor and academic advisor.

Requisites: None

Repeatable for Credit: No

Last Taught: Spring 2019

AN SCI/DY SCI 101 — INTRODUCTION TO ANIMAL SCIENCES
4 credits.

Anatomy physiology, nutrition, genetics, reproduction, marketing, meats and management of dairy and beef cattle, swine, sheep, poultry and horses; lectures, laboratories and discussion. Field trips. Enroll Info: None

Requisites: None

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Repeatable for Credit: No

Last Taught: Fall 2020

AN SCI 110 — ANIMAL HANDLING
1 credit.

Hands-on course that gives students an understanding of livestock handling techniques, proper restraint, administering injections, and drawing blood samples. Students also learn about animal response to human presence and the effect of facility design on animal behavior.

Enroll Info: An Sci/DY SCI/AN SCI 101

Requisites: Freshman or Sophomore standing. Must have taken DY SCI/AN SCI 101.

Repeatable for Credit: No

Last Taught: Spring 2017

AN SCI 150 — CAREER ORIENTATION ANIMAL/POULTRY SCIENCES
1 credit.

An introduction to resume preparation, student employment, internships, and graduate and professional school programs with presentations by numerous graduates who discuss their career path following a B.S. degree in Animal Science or Poultry Science. Enroll Info: None

Requisites: DY SCI/AN SCI 101

Repeatable for Credit: No

Last Taught: Spring 2020

AN SCI 200 — THE BIOLOGY AND APPRECIATION OF COMPANION ANIMALS
3 credits.

A systematic coverage of many of the animals (including birds) that humans keep as their social companions. The classification, nutritional requirements, environmental considerations, reproductive habits, health, legal aspects and economics of companion animals and their supportive organizations. Enroll Info: Crse in zoo or equiv or cons inst. Open to Fr

Requisites: None

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Repeatable for Credit: No

Last Taught: Fall 2020

AN SCI 220 — GROWTH, COMPOSITION AND EVALUATION OF MEAT ANIMALS
4 credits.

Principles and application of objective and subjective techniques for identifying quantitative and qualitative traits associated with breeding animals, market animals and meat. Statistics, growth, anatomy, genetics. Field trips to livestock farms and meat processing plants. Enroll Info: An SCI/DY SCI/AN SCI 101 or cons inst

Requisites: None

Repeatable for Credit: No

Last Taught: Fall 2020

AN SCI 221 — ADVANCED MEAT ANIMAL EVALUATION LAB
2 credits.

Review and practical application of subjects covered in Animal Sciences 220. Field trips to livestock farms, meat processing plants and to the National Meat Animal Evaluation Contest. Enroll Info: AN SCI 220 cons inst

Requisites: None

Repeatable for Credit: No

Last Taught: Spring 2018

AN SCI 250 — HORSE SCIENCE AND MANAGEMENT
3 credits.

General principles. Emphasis on anatomy and physiology, management, behavior, reproduction, health, and nutrition. Lab period offers hands-on learning opportunities and short field trips. Mandatory field trip on a weekend day. Enroll Info: None

Requisites: Completion of Animal Sciences/Dairy Science 101 is required.

Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Repeatable for Credit: No

Last Taught: Spring 2019
AN SCI 289 — HONORS INDEPENDENT STUDY
1-2 credits.
Enroll Info: Enrolled in the CALS Honors Program Sophomore or Junior standing. INTER-AG 288
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2007

AN SCI 299 — INDEPENDENT STUDY
1-3 credits.
Enroll Info: Open to Freshmen, Sophomore or Junior standing written consent of instructor
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

AN SCI/FOOD SCI 305 — INTRODUCTION TO MEAT SCIENCE AND TECHNOLOGY
4 credits.
Application of biological, technological, and economical principles to muscle and related tissue utilized for food. Enroll Info: None
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 103, 109, or 115) or graduate/ professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI/NUTR SCI 311 — COMPARATIVE ANIMAL NUTRITION
3 credits.
Nutrients and their source, assimilation, function and requirement. Enroll Info: None
Requisites: Must have completed BMOLCHEM 314 Intro to Human Biochemistry or CHEM 341 Intro Organic Chemistry or CHEM 343 Intro Organic Chemistry or BIOCHEM 501 Intro Biochemistry
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI 313 — ANIMAL FEEDS AND DIET FORMULATION
1 credit.
Designed as a companion course for Dairy Science 311 (comparative animal nutrition) with emphasis on quantitative and practical aspects of animal feeds and diet formulation. Enroll Info: MATH 112, Dy SCI/AN SCI/DY SCI 101, or consent of instructor; concurrent registration in Dy SCI/An SCI/NUTR SCI/AN SCI/DY SCI 311 recommended
Requisites: DY SCI/AN SCI 101
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2019

AN SCI 314 — POULTRY NUTRITION
3 credits.
Provides a conceptual understanding of nutrient requirements for optimal growth and production of commercial poultry species. The use of computer programming for feed formulation is emphasized. Field trips are planned. Enroll Info: An Sci/DY SCI/AN SCI 101 or Pou SCI 101
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2019

AN SCI 315 — POULTRY ENTERPRISE MANAGEMENT
3 credits.
Fundamental business and economic principles and practices for successful poultry production with emphasis on problem solving in flock management. Software application core programs will be Microsoft Office for Windows suite. Enroll Info: An Sci/DY SCI/AN SCI 101 or Pou SCI 101, Ag Econ 215 or ECON 101 or equivalent. Open to Freshmen
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2019

AN SCI/DY SCI 320 — ANIMAL HEALTH AND DISEASE MANAGEMENT
3 credits.
Principal causes and identification of animal diseases, common diseases of farm animals, zoonoses and public health, disease prevention and management including biosecurity measures and host immune responses. Enroll Info: ZOOLOGY/BIOLOGY 101/102, BIOLOGY/BOTANY/ZOOLOGY 152, Biocore or cons inst
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2016

AN SCI/FOOD SCI 321 — FOOD LAWS AND REGULATIONS
1 credit.
Food laws and regulations, regulatory and commerical grading standards used in the food industry. Enroll Info: None
Requisites: Junior standing
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/BOTANY/MICROBIO 335 — THE MICROBIOME OF PLANTS, ANIMALS, AND HUMANS
3 credits.
Examination of the structure and function of microbial communities that live inside and on host organisms (plants, animals, and humans). Introduction to general concepts of the microbiome and microbiota, and their relationship to host nutrition, health, and disease. Enroll Info: None
Requisites: MICROBIO 303
Repeatable for Credit: No
Last Taught: Spring 2020
AN SCI/DY SCI 361 — INTRODUCTION TO ANIMAL AND VETERINARY GENETICS
2 credits.

The molecular basis for inheritance of monogenic and polygenic traits related to animal disease and production. An introduction to the principles of improving animal health and performance by selection and mating systems in companion animals, horses, livestock, and poultry. Enroll Info: Genetics 160 or 466 or con reg course in statistics

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI 362 — VETERINARY GENETICS
2 credits.

The genetic basis for predisposition to disease or resistance to disease in livestock and companion animal species. Genetic defects, their discovery, diagnosis and treatment. Enroll Info: Dy Sci/AN SCI/DY SCI 361; or Genetics 160 or 466 Zool/Bot 152

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI 363 — PRINCIPLES OF ANIMAL BREEDING
2 credits.

Application of the principles of quantitative genetics to the improvement of livestock and poultry; breeding value estimation and selection techniques; effects of inbreeding and hybrid vigor; crossbreeding systems. Enroll Info: Dy Sci/AN SCI/DY SCI 361

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI 370 — LIVESTOCK PRODUCTION AND HEALTH IN AGRICULTURAL DEVELOPMENT
3 credits.

Physical, biological and social nature of animal agriculture systems and their improvement in developing countries; analysis of the state of livestock research and development in the developing countries and the world role of U.S. animal agriculture. Enroll Info: An Sci/DY SCI/AN SCI 101 or cons inst

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Sustain - Sustainability
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI/DY SCI 373 — ANIMAL PHYSIOLOGY
3 credits.

Students will develop an understanding of physiological processes that regulate the body, learn the anatomy and function of different physiological systems, describe interactions between organ systems, study regulation of an organ system from the molecular to whole animal level, and identify differences between species in the same systems. Enroll Info: None

Requisites: ZOOLOGY/BIOLOGY 101 or (BOTANY/BIOLOGY/ZOOLOGY 151 and BOTANY/BIOLOGY/ZOOLOGY 152)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2020

AN SCI 375 — SPECIAL TOPICS
1-4 credits.

Enroll Info: None
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

AN SCI 399 — COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

Enroll Info: So or Jr or Sr st cons of supervising inst, advisor, and internship program coordinator
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S Workplace - Workplace Experience Course
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

AN SCI 400 — STUDY ABROAD IN ANIMAL SCIENCES
1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Enroll Info: Current enrollment in a UW-Madison study abroad program
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

AN SCI/DY SCI 414 — RUMINANT NUTRITION & METABOLISM
3 credits.

Ruminant Nutrition integrates nutritional and biochemical concepts to understand digestive and metabolic processes in dairy and beef cattle, which are then quantitatively represented to predict and manipulate production and health outcomes. Enroll Info: None

Requisites: NUTR SCI/AN SCI/DY SCI 311 and (BIOCHEM 301 or 501)
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
AN SCI 415 — APPLICATION OF MONOGASTRIC NUTRITION PRINCIPLES
2 credits.

Nutrient requirements for growth and production of monogastric animals. Discuss concepts of establishing nutrient requirements and feeding strategies. Laboratory exercises are designed to develop problem solving skills required for the assessment of nutritional adequacy and economical soundness of feeding programs. Enroll Info: An Sci/DY SCI/AN SCI/NUTR SCI 311 313

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 433 — EQUINE BUSINESS & MANAGEMENT
3 credits.

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2018

AN SCI/ DY SCI 434 — REPRODUCTIVE PHYSIOLOGY
3 credits.

Principles of reproductive physiology, improvement of fertility, and artificial insemination. Enroll Info: Jr st, An Sci/DY SCI/AN SCI 101, or Zool 101 102; Zool 151 152 recommended

Requisites: None
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 435 — ANIMAL SCIENCES PROSEMINAR
2 credits.

Methods of assessing information quality are studied. Each student develops an analytical and critical seminar on a topic of personal interest in the animal sciences. Enroll Info: Sr st

Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 430 — SHEEP PRODUCTION
3 credits.

Application of recent research in breeding, feeding, health, and management to develop an efficient sheep production system. Includes an active, hands-on laboratory working with sheep. Prior completion of DY SCI/AN SCI 313 highly recommended. Enroll Info: NUTR SCI/AN SCI/DY SCI 311, DY SCI/AN SCI 361, or DY SCI/AN SCI 434

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2016

AN SCI 431 — BEEF CATTLE PRODUCTION
3 credits.

Application of genetics, systems of mating, physiology, nutrition and economics to the production of beef. Prior completion of DY SCI/AN SCI 313 highly recommended. Enroll Info: None

Requisites: NUTR SCI/AN SCI/DY SCI 311, DY SCI/AN SCI 361, or DY SCI/AN SCI 434
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 432 — SWINE PRODUCTION
3 credits.

Application of research findings in breeding, feeding, management and marketing to modernize production. Lab: Farm visits, practical exercises in testing changes, "tools" used by producers. Prior completion of DY SCI/AN SCI 313 highly recommended. Enroll Info: NUTR SCI/AN SCI/DY SCI 311, DY SCI/AN SCI 361, or DY SCI/AN SCI 434

Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
AN SCI 444 — LABORATORY TECHNIQUES IN MAMMALIAN GAMETE AND EMBRYO BIOLOGY
3 credits.

This course is designed as an immersion experience based on the gradual release methodology of information delivery. Students are engaged in active/process learning whereby the principles and themes presented in the lecture portion of the course are immediately put into practice in the laboratory component of the course. Expected learning outcomes and learning objectives are therefore integrated into each lecture and laboratory. Each subsequent learning objective builds upon the knowledge acquired from the previous learning objective thus developing a scaffold or framework from which to proceed. This course will present students with challenges from cognitive and affective domains as they process information from both biological and ethical perspectives. Problem solving and conflict resolution skills will be displayed as students challenge themselves with the development of fine motor/coordination based skills as well as understanding that the product of their efforts has the potential to result in a live offspring. The bovine (cow/bull) will serve as our model in this performance-based course as students are expected to demonstrate competency in the nuances and complexities associated with the production of embryos in a completely artificial (in vitro) environment. The student will be expected to demonstrate critical thinking by developing a simulated professional enterprise involving one or more of the assisted reproductive technologies they are exposed to. Students will demonstrate proficiency in and competency of in vitro maturation, fertilization, embryo development, cell culture, sterile bench technique, synchronization of the female estrus cycle, embryo transfer, non-surgical embryo recovery and cryopreservation by completing 2 complete cycles of embryo production in vitro. Students work in teams of 3-4 individuals. During the first production cycle students will perform all tasks while observing and working alongside of the instructor. The second production cycle will require the students to perform independently (of the instructor) who will only intervene in the event that the actions of the student will be lethal to the process and/or outcome. Each week (Monday) students will be presented with a controversial subject or topic related to cellular biology and/or reproduction. These ethical dilemmas are almost entirely within the realm of human assisted reproduction. Using any means and/or media desired, students are required to formulate responses in favor and in opposition of said topic. Each Friday, following the course quiz, students will be randomly selected to defend one side of the argument by articulating their viewpoint from the assigned perspective even if it is not their personal opinion. The objective of this exercise is to demonstrate the nature and influence bioethics may have on policy decisions impacting future research endeavors and/or science based initiatives. As well, students will grapple with representing a viewpoint they may be in personal conflict with. Enroll Info: Animal Sciences 434 or consent of instructor
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2018

AN SCI/DY SCI/FOOD SCI/SOIL SCI 472 — ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT
1 credit.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; food security; the role of women in agriculture, and the role of dairy products in a healthy diet. Enroll Info: None
Requisites: None
Course Designation: Sustain - Sustainability
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/DY SCI/FOOD SCI/SOIL SCI 473 — INTERNATIONAL FIELD STUDY IN ANIMAL AGRICULTURE AND SUSTAINABLE DEVELOPMENT
2 credits.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; and the role of women in agriculture and the role of dairy products in a healthy diet. Enroll Info: None
Requisites: DY SCI/AN SCI/FOOD SCI/SOIL SCI 472
Course Designation: Sustain - Sustainability
Repeatable for Credit: No

AN SCI 503 — AVIAN PHYSIOLOGY
3 credits.

Principles of organ and system function with emphasis on male and female reproduction, embryonic development and factors affecting hatchability. Enroll Info: An Sci/DY SCI/AN SCI 101 or consent of instructor
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2019

AN SCI 508 — POULTRY PRODUCTS TECHNOLOGY
3 credits.

Procurement, processing and distribution of poultry meat, eggs and derived products; factors affecting quality, including methods of determining quality. Enroll Info: None
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2019
AN SCI 511 — BREEDER FLOCK AND HATCHERY MANAGEMENT
3 credits.
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2019

AN SCI 512 — MANAGEMENT FOR AVIAN HEALTH
3 credits.
The occurrence, etiology, clinical signs, control and prevention of infectious and noninfectious diseases commonly affecting domestically reared poultry. Instruction in avian necropsy, zoonosis, sanitation and regulation. Enroll Info: An Sci/DY SCI/AN SCI 101 Zool 101 102 or Zool 151 or cons inst
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2019

AN SCI/FOOD SCI 515 — COMMERCIAL MEAT PROCESSING
2 credits.
Principles and procedures in the commercial manufacture of processed meat products; sausage manufacturing, curing, smoking, freezing and packaging. Enroll Info: None
Requisites: AN SCI/FOOD SCI 305, FOOD SCI 410, or graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019

AN SCI/F&W ECOL/ZOOLOGY 520 — ORNITHOLOGY
3 credits.
Introduction to bird biology, ecology, and behavior. Topics include the evolutionary origin of birds and flight, anatomy and physiology, functional morphology, migration, communication, reproductive strategies, ecological adaptations and roles, and biogeographical patterns. Enroll Info: None
Requisites: ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151 and 152 or BIOCORE 381 and 382
Course Designation: Grad 50% - Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

AN SCI/F&W ECOL/ZOOLOGY 521 — BIRDS OF SOUTHERN WISCONSIN
3 credits.
Outdoor and indoor labs/lectures emphasizing identification of southern Wisconsin birds by sight and vocalization. Two required Saturday field trips in Southern Wisconsin. Enroll Info: None
Requisites: ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151 and 152 or BIOCORE 381 and 382
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI 610 — QUANTITATIVE GENETICS
3 credits.
An advanced approach with emphasis on statistical foundations. Classical theory with extensions to maternal and paternal effects. Selection theory is considered in depth. Enroll Info: GENETICS 466 and Statistics 572 or cons inst
Requisites: None
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019

AN SCI/AGRONOMY/GENETICS/HORT 615 — GENETIC MAPPING
3 credits.
Computing-intensive course to prepare students for genetic mapping research; linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS). Enroll Info: Recommended preparation is undergraduate courses in genetics and statistics and prior experience writing R scripts (such as module 1 of STAT 327).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

AN SCI/NUTR SCI 626 — EXPERIMENTAL DIET DESIGN
1 credit.
Discuss nutrient requirements, composition of ingredients used to meet requirements and the mathematical steps involved in diet formulation with emphasis on research animals and human subjects. Enroll Info: None
Requisites: Graduate/professional standing, STATS 301 and (NUTR SCI/BIOCHEM 510 or concurrent enrollment)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
AN SCI 681 — SENIOR HONOR THESIS
2-4 credits.
Enroll Info: Honors program candidacy
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 682 — SENIOR HONORS THESIS
2-4 credits.
Continuation of 681. Enroll Info: Honors program candidacy AN SCI 681
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

AN SCI 681 — SENIOR HONOR THESIS
2-4 credits.
Enroll Info: Honors program candidacy
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI 691 — THESIS
2 credits.
Enroll Info: Sr st cons inst
Requisites: Consent of instructor
Repeatable for Credit: No

AN SCI 692 — THESIS
2 credits.
Enroll Info: None
Requisites: Consent of instructor
Repeatable for Credit: No

AN SCI 699 — SPECIAL PROBLEMS
1-3 credits.
Enroll Info: Sr st and cons inst
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

AN SCI/FOOD SCI 710 — CHEMISTRY OF THE FOOD LIPIDS
2 credits.
Chemical constitution, structures, reactions, stereochemistry of fats, phospholipids, related compounds; methods of isolation, characterization; synthesis; relation of structure to physical properties.
Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019

AN SCI 699 — PRACTICUM IN ANIMAL SCIENCES TEACHING
1-3 credits.
Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance. Enroll Info: None
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI/DY SCI 824 — RUMINANT NUTRITIONAL PHYSIOLOGY I
4 credits.
Focuses on rumen microbiology, metabolite modeling, as well as protein and VFA nutrition and metabolism. Students should have undergraduate coursework in ruminant nutrition, biochemistry, and microbiology as background. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2017

AN SCI/DY SCI 825 — RUMINANT NUTRITIONAL PHYSIOLOGY II
4 credits.
Focuses on calf and heifer nutrition, regulation of dry matter intake, plant and forage chemistry, vitamins, lipids, and starch. Students should have undergraduate coursework in ruminant nutrition, biochemistry, and microbiology as background. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

AN SCI/GENETICS/POP HLTH 849 — GENETIC EPIDEMIOLOGY
3 credits.
This course will provide an introduction to genetic epidemiology. Topics will include a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, including participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates, and choice of analytic methods. We will briefly discuss some of the original study designs and then focus on current study designs for the remainder of the class. Additional emerging topics will be briefly touched upon. Students will complete short homework assignments to enforce concepts learned during lectures, discuss journal articles, and prepare a very short grant application for the mid-term project. In the final weeks of class, students will work together to analyze data from a real genetic study, prepare tables, interpret the findings, and present their project to their peers. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
AN SCI 875 — SPECIAL TOPICS
1-4 credits.
Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

AN SCI/DY SCI 931 — SEMINAR IN ANIMAL NUTRITION
1 credit.
Discussion of literature that has a bearing on animal nutrition. Students are to survey the literature and present a seminar. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

AN SCI/DY SCI/GENETICS 951 — SEMINAR IN ANIMAL BREEDING
0-1 credits.
Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

AN SCI/OBS&GYN/ZOOLOGY 954 — SEMINAR IN ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY
0-1 credits.
Promotes scientific and professional development. Presenters develop and deliver research presentations to a scientific audience, field questions, and receive critiques about their presentation style and scientific approach. Additional presentations include professional development, career advancement opportunities, and topics of interest to the endocrinology and reproduction community at large. Enroll Info: None
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

AN SCI 990 — RESEARCH
1-12 credits.
Enroll Info: None
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020
