ANATOMY 329 – HUMAN ANATOMY-KINESIOLOGY
2 credits.

Laboratory with dissection of human cadaver specimens and study of prosections.
Requisites: ANAT&PHY 338
Repeatable for Credit: No
Last Taught: Spring 2017

Learning Outcomes: 1. Acquire and apply foundational knowledge of anatomy through the study of prosected human cadavers and specimens.
Audience: Undergraduate

2. Develop spatial reasoning skills and an understanding of structure-function relationships.
Audience: Undergraduate

3. Collaborate with other students to learn in the anatomy lab.
Audience: Undergraduate

ANATOMY 622 – HUMAN ANATOMY FOR PHYSICAL AND OCCUPATIONAL THERAPY STUDENTS
6 credits.

Dissection-based gross human anatomy relevant with a physical and occupational therapy focus. Special emphasis is placed on the musculoskeletal and peripheral nervous systems, and living subject and surface anatomy.
Requisites: Declared in Doctor of Physical Therapy Program or Occupational Therapy OTD Program
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023

Learning Outcomes: 1. Acquire foundational knowledge of anatomy, with an emphasis on the musculoskeletal and peripheral nervous systems.
Audience: Graduate

2. Develop spatial reasoning skills in the anatomy lab.
Audience: Graduate

3. Explore structure-function relationships and their clinical implications.
Audience: Graduate

4. Develop clinical reasoning skills by solving anatomically-based clinical problems.
Audience: Graduate

5. Develop team-based professional skills.
Audience: Graduate

ANATOMY 699 – INDEPENDENT STUDY
1-4 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2019

Learning Outcomes: 1. Define learning objectives for an independent, dissection-based anatomy project.
Audience: Undergraduate

2. Create a detailed dissection of a specific anatomical region or structure.
Audience: Undergraduate

3. Design and construct an individual project integrating anatomy, histology, embryology, and neuroanatomy with a relevant clinical condition.
Audience: Undergraduate

4. Define learning objectives for an independent, dissection-based anatomy project.
Audience: Undergraduate
