ANTHRO 337 – LITHICS AND ARCHAEOLOGY

3 credits.

Explores the ways in which humans have used of rocks and associated minerals, i.e. lithics and lapidary technology, to create utilitarian as well as ornamental objects in the past and the present. Stone tools, stone beads, carved stone images and reliefs have been recovered in the archaeological record provide a unique perspective on the ways in which humans have adapted in the past. It will also explore gender roles in lithic technology and how specific technologies were used to create utilitarian as well as ornamental and symbolic objects. The archaeological examples will be studied through readings, films and class discussion, as well as laboratory experiments in the manufacture and examination of a wide range of artifacts. Ethnographic and archaeological examples of chipped and ground stone tools, stone beads, carved soft and hard stone seals, and stone vessels will also be examined. Students will gain a new perspective of the critical role of lithic technologies in long term human adaptive strategies as well as in ornament and symbolic art. Enroll Info: None
