**BIOLOGY CORE CURRICULUM (BIOCORE)**

**BIOCORE 181 – BECOMING A SCIENTIST: DOING BIOLOGY RESEARCH**
2 credits.

Orientation to biology research on campus, work in a research team to investigate a novel research question, and do biology research on a choice of topics: from ecology and physiology to cell biology. Emphasis is on critical thinking required in designing and conducting experiments, analyzing and interpreting data, and communicating findings orally and in writing.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Elementary
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:**
1. Apply approaches for being a successful college student
   Audience: Undergraduate

2. Communicate what biology research looks like, sounds like, and feels like at UW Madison
   Audience: Undergraduate

3. Do biology research and engage as a member of a biology research community
   Audience: Undergraduate

**BIOCORE 381 – EVOLUTION, ECOLOGY, AND GENETICS**
3 credits.

Basic principles of ecology and interrelations between individuals, populations, communities, ecosystems and their environment; transmission genetics and introduction to population genetics; origin of life, evolutionary mechanisms, ancestral relationships among species, and the diversity of life.

**Requisites:** Declared in Biology Core Curriculum Honors Certificate

**Course Designation:** Gen Ed - Communication Part B
Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:**
1. Understand what we know, how we know, and what we don’t know in ecology, transmission genetics and evolution at the intermediate level
   Audience: Undergraduate

2. Apply scientific theory, concepts, reasoning, and quantitative and qualitative approaches to understand and solve problems
   Audience: Undergraduate

3. Use terminology accurately and effectively within appropriate conventions of the discipline
   Audience: Undergraduate

4. Find, evaluate and relate relevant information found in primary scientific literature using core library resources
   Audience: Undergraduate

5. Build a logical argument in writing based on critical reading, and use of evidence and scientific reasoning
   Audience: Undergraduate

6. Analyze a problem using a systems approach, recognizing levels of biological scale and organization
   Audience: Undergraduate

7. Work as a member of a productive, collaborative group
   Audience: Undergraduate

8. Demonstrate scientific communication skills and the ability to translate scientific concepts to a broader community using appropriate style and disciplinary conventions
   Audience: Undergraduate
BIOCORE 382 – EVOLUTION, ECOLOGY, AND GENETICS LABORATORY
2 credits.
Writing-intensive with opportunities to make observations and generate and test questions. Includes ecology field trips and research projects that focus on genetics and evolution.
Requisites: BIOCORE 381 or concurrent enrollment
Course Designation: Gen Ed - Communication Part B
Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2023

BIOCORE 383 – CELLULAR BIOLOGY
3 credits.
Cellular and molecular basis of life. The main themes are the structure and function of cells and organelles, the flow of energy in cells, and the storage, expression, and regulation of genetic information.
Requisites: BIOCORE 381
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2024

BIOCORE 384 – CELLULAR BIOLOGY LABORATORY
2 credits.
Writing-intensive with opportunities to generate and test questions utilizing concepts and procedures of cell biology. Includes research projects in subcellular fractionation, protein structure and enzyme catalysis, molecular genetics of C.elegans worms, and signal transduction in yeast.
Requisites: BIOCORE 383 or concurrent enrollment
Course Designation: Gen Ed - Communication Part B
Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2024

BIOCORE 401 – PEER MENTORING
1 credit.
Develops mentoring, group facilitation, leadership, and interpersonal skills used in peer learning and leading mentored study groups. Focuses on the pedagogy, skills, and effective techniques used to facilitate learning in small groups. Discuss lower order to higher order cognitive levels using Blooms Taxonomy, and reciprocal mentor observations.
Requisites: BIOCORE 381, 383, and (BIOCORE 382 or 384)
Course Designation: Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2023

BIOCORE 485 – PRINCIPLES OF PHYSIOLOGY
3 credits.
Study the physiology of and consider how plants and animals interact with their environments to survive, obtain nutrients, exchange gases, and reproduce, also how the complex systems of neural and endocrine regulation in animals and hormonal and environmental regulation in plants allow cells and organs to communicate.
Requisites: BIOCORE 383
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes:
1. Frame biological questions about physiological systems, formulate testable hypotheses to guide in answering the questions, design experiments to test hypotheses (including appropriate controls), and predict/recognize/graph data that support these hypotheses.
   Audience: Undergraduate
2. Build logical arguments about the operation of physiological systems based on evidence.
   Audience: Undergraduate
3. Use and manipulate basic mathematical equations that model physiological systems.
   Audience: Undergraduate
4. Integrate past experience, accumulated knowledge, and creativity to solve complex physiological problems.
   Audience: Undergraduate
5. Recognize diversity in organismal design and response to environmental challenges
   Audience: Undergraduate
6. Define the components of regulatory systems, propose models to explain observed physiological phenomena, and explain the fundamental role of regulation in physiological processes.
   Audience: Undergraduate
7. Explain and give specific examples to demonstrate how structure - function relationships underlie/determine physiological phenomena.
   Audience: Undergraduate
8. Evaluate the reliability and validity of scientific information.
   Audience: Undergraduate
9. Use scientific terminology precisely and appropriately.
   Audience: Undergraduate
10. Demonstrate effective scientific discourse as a member of a group.
    Audience: Undergraduate
BIOCORE 486 – PRINCIPLES OF PHYSIOLOGY LABORATORY

2 credits.

Experience the process of science by collaborating on independent experiments to investigate your questions about animal and plant physiology. Emphasis is on critical thinking required in designing and conducting experiments, analyzing and interpreting data, and communicating findings orally and in writing.

**Requisites:** BIOCORE 485 or concurrent enrollment

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

**Level:** Intermediate

**L&S Credit:** Counts as Liberal Arts and Science credit in L&S

**Honors:** Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:**

1. Appropriately utilize Biocore 485 lecture concepts in an applied setting.
   Audience: Undergraduate

2. Engage in the process of science, including the problem-solving involved in designing and executing experiments, and the critical thinking required to carefully analyze and interpret results.
   Audience: Undergraduate

3. Work with tools & procedures to investigate biology.
   Audience: Undergraduate

4. Concisely, clearly, and precisely communicate your plans and findings to others using written and oral communication
   Audience: Undergraduate

5. Utilize quantitative reasoning skills (statistical analysis skills).
   Audience: Undergraduate

6. Work as a member of a productive, collaborative research team
   Audience: Undergraduate

7. Build on, apply, and integrate concepts & skills that you learn in other Biocore courses.
   Audience: Undergraduate

8. Contribute to a safe, sustainable, socially and ethically responsible learning environment
   Audience: Undergraduate

BIOCORE 587 – BIOLOGICAL INTERACTIONS

3 credits.

A capstone course to build on and integrate the knowledge and skills gained in previous Biocore coursework through readings and analysis of primary scientific literature. Work in small groups to analyze current and emerging topics through the lens of scientific research. Topics include signaling pathways, systems biology, genetic disease, and cancer.

**Requisites:** BIOCORE 485

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

**Level:** Advanced

**L&S Credit:** Counts as Liberal Arts and Science credit in L&S

**Honors:** Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

BIOCORE 699 – DIRECTED STUDY

1-3 credits.

Independent mentored study as arranged with a faculty member

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

**L&S Credit:** Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024
