INTEGRATED SCIENCE (INTEGSCI)

INTEGSCI 100 — EXPLORING BIOLOGY
2 credits.

A first-year course focused on the core concepts in biology (evolution; transformation of energy and matter; information exchange and storage; structure and function; systems biology), professions in biology, and the foundational skills and knowledge needed for successful academic and post-graduate careers in biology.

Requisites: First year students or first year transfer students only
Course Designation: Breadth - Biological Sci. Counts toward the Natural Sci req
Level - Elementary
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2023

INTEGSCI 110 — BIOHOUSE SEMINAR: BIOLOGY FOR THE 21ST CENTURY
1 credit.

Focused on developing skills in cooperative learning with peers and visiting scientists; integrating information across disciplines; communicating science; careers in biology; and, illustrating how biology can help solve society’s pressing issues.

Requisites: Member of BioHouse Residential Learning Community
Repeatable for Credit: No
Last Taught: Fall 2023

INTEGSCI 140 — EXPLORING SERVICE IN STEM
1 credit.

A discussion-based seminar introducing first-year STEM students to the world of public service from the perspective of both the university and its community partners. Classroom activities and direct campus and off-campus experiences are included. Service opportunities include STEM outreach, sustainability, and public health. Involves approximately 1 hour per week of public service.

Requisites: First Year Students only
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Develop awareness of and access to service opportunities within STEM
Audience: Undergraduate

2. Develop awareness of the relationship between the university and the community
Audience: Undergraduate

3. Develop reflective approaches to public service and community engagement.
Audience: Undergraduate

4. Explore the interactions of STEM, scientists and engineers, and society
Audience: Undergraduate

5. Recognize and honor diversity and cultural context
Audience: Undergraduate
INTEGSCI 150 – EXPLORING RESEARCH IN STEM
1 credit.

Offers an overview of the research process and opportunities to build skills in reading scientific literature. Understand different approaches to science and to be flexible in thinking about gathering evidence or solving problems. Supports articulation of research interests, identifying potential research mentors, and writing professional emails to secure research opportunities. Explore STEM careers and pathways that can come from engaging in research.

**Learning Outcomes:**

1. Read scientific literature efficiently and understand what information can be found in each section of a primary research article.

2. Identify your personal research interests and find faculty members whose research interests align with yours.

3. Write professional emails to potential research mentors.

4. Identify disparities between majority and minority group participation in STEM careers and articulate strategies to reduce the disparities.

5. Explore STEM careers and learn about the pathways to pursue those careers.

**Audience:** Undergraduate

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

---

INTEGSCI 230 – EXPLORING DISCIPLINE-BASED LEADERSHIP & MENTORING
2 credits.

Students will build practical peer leadership and mentoring skills, while evaluating and reflecting on personal experiences among a group of peers who challenge and learn from each other as they explore leadership. Class activities are designed to develop critical thinking around student development issues and provide strategies for integrating discussions of diversity, ethics, social justice, community, and civic responsibility into leadership experiences.

**Learning Outcomes:**

1. Identify strategies to promote inclusion for students with diverse identities, including identities that are underrepresented in STEM and higher education

2. Develop peer leadership skills and relate them to the UW-Madison Leadership Framework

3. Connect students with campus and community resources to support their success

4. Apply knowledge and skills to be able to effectively lead your peers in various STEM contexts on campus

5. Reflect on personal goals, strengths, experiences, and identities to inform your ongoing development as a student leader

**Audience:** Undergraduate

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

---

INTEGSCI 240 – SERVICE WITH YOUTH IN STEM
2 credits.

Teaches students about community engagement experiences, focusing on building community partnerships, understanding organizational missions and community needs, assessment of informal science outreach experiences, and issues related to scientific literacy and access to science.

**Learning Outcomes:**

1. Describe relevance of personal identities to experiences in higher education and STEM

2. Identify strategies to promote inclusion for students with diverse identities, including identities that are underrepresented in STEM and higher education

3. Develop peer leadership skills and relate them to the UW-Madison Leadership Framework

4. Connect students with campus and community resources to support their success

5. Apply knowledge and skills to be able to effectively lead your peers in various STEM contexts on campus

6. Reflect on personal goals, strengths, experiences, and identities to inform your ongoing development as a student leader

**Audience:** Undergraduate

**Requisites:** None

**Course Designation:** Level - Elementary

**L&S Credit:** Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024
INTEGSCI 260 – ENTERING RESEARCH PART 1
1 credit.

Seminar course for sophomore or transfer students to begin independent research in science, technology, engineering or mathematics. Taken concurrently with 1-3 research credits with faculty member. Supports independent research experience.

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2021

INTEGSCI 261 – ENTERING RESEARCH PART 2
1 credit.

Seminar course for sophomore or transfer students continuing independent research in science, technology, engineering or mathematics. Taken concurrently with 1-3 research credits with faculty member. Supports independent research experience.

Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2018

INTEGSCI 299 – INDEPENDENT STUDY
1-3 credits.

Provides academic credit for research, library, and/or laboratory work under direct guidance of a faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

INTEGSCI 320 – INTERNSHIP
1-3 credits.

Provides academic credit for skill development in authentic contexts in science education including service, peer mentoring, and leadership. See class notes for additional information.

Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

INTEGSCI 340 – SERVICE WITH YOUTH IN STEM II
2 credits.

Applies communication skills and social awareness issues in ways that enable students to work with increasing levels of independence in building and maintaining community relationships compared to INTEGSCI 240. Includes a lab section applied to lecture experiences to prepare for work with children in elementary after-school science clubs and to focus on different styles of communication. The multi-disciplinary focus of the after-school lessons develops connections between students’ field of study and others within STEM. In the service learning component, students apply academic knowledge through science education and outreach experiences in a community-focused and culturally sensitive way. Students work with underrepresented students in the Madison metropolitan area in elementary after-school science clubs, and are expected to critically reflect on the ties between their academic and community partnerships, and differences between campus and community culture.

Requisites: INTEGSCI 240
Course Designation: Level - Intermediate
L&S Credit - Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No

Learning Outcomes:
1. communicate and collaborate with adult after-school staff members from a variety of cultures and backgrounds.
   Audience: Undergraduate

2. independently design informal educational science experiences for youth.
   Audience: Undergraduate

3. assess appropriate strategies for designing developmentally appropriate science lessons.
   Audience: Undergraduate

4. describe the importance of communication and distinctions between informal and technical communication.
   Audience: Undergraduate

5. critically reflect on experiences in the community and connect these experiences broadly to service learning, scientific literacy, and cultural context.
   Audience: Undergraduate
INTEGSCI 341 – SERVICE WITH YOUTH IN STEM PRACTICUM
1 credit.

Apply communication, cultural competency, and leadership skills to work with community partners in a service learning practicum. Work with underrepresented students in the Madison metropolitan area in elementary after-school science clubs, and critically reflect on the ties between their academic and community partnerships, and differences between campus and community culture. Work with different community partners than they did in previous Service with Youth in STEM courses. This practicum combines the service experience with an in-class component to prepare to provide opportunities to critically reflect upon the ties between academic preparation and community partnerships, and on their experiences in varied community settings.

**Requisites:** INTEGSCI 340
**Course Designation:** Level - Intermediate
**L&S Credit:** Counts as Liberal Arts and Science credit in L&S
**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:**
1. Encourage interaction between scientists and community members from a variety ages and backgrounds
   Audience: Undergraduate
2. Experience working with community organizations that have different missions and serve different populations than students’ previous participation in community relationships
   Audience: Undergraduate
3. Continue to develop mutually beneficial relationships between the University and the community
   Audience: Undergraduate
4. Deepen their understanding of diverse social factors that impact youth development, participation, and education
   Audience: Undergraduate
5. Critically reflect on experiences in the community and connect these experiences broadly to service learning, cultural context, and similarities and differences in working with different community groups
   Audience: Undergraduate

INTEGSCI 375 – SPECIAL TOPICS IN INTEGRATED SCIENCE
1-3 credits.

This course examines various special topics in science or science education. See class notes for additional information. Requisites vary by topic.

**Requisites:** None
**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

INTEGSCI 605 – SCIENTIFIC TEACHING FOR TAS
1 credit.

The goal of this course is to arm Teaching Assistants with survival skills in scientific teaching through theory, practice, and learning community. We will work together to learn the core themes of scientific teaching (active learning, assessment, and diversity) and apply them, in real time, to the courses in which the TAs are concurrently teaching. This course is open to graduate students only.

**Requisites:** Consent of instructor
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

INTEGSCI 640 – PUBLIC SERVICE IN STEM
1 credit.

Discusses the fundamentals of public service and civic engagement in the STEM (science, technology, engineering, and math) disciplines grounded in evidence-based knowledge and research. Provides an overview of the core pathways of public service, the knowledge required to effectively initiate and cultivate community partnerships, and the skills necessary to reflect upon personal experiences with community engagement activities. Fosters understanding of the broader impacts in STEM fields and prepares students to begin specializing in a specific pathway and develop relationships with a community partner.

**Requisites:** Consent of instructor
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:**
1. Develop knowledge, skills, and values that support their engagement with the community from a scholarly perspective.
   Audience: Graduate
2. Develop an ethical and sustainable approach to building community relationships.
   Audience: Graduate
3. Build reflective process and metacognitive skills into community engagement practices to inform personal development.
   Audience: Graduate
4. Develop community as a cohort around shared interest and experience in community engagement.
   Audience: Graduate
5. Identify and critique ways that STEM and society interact in diverse contexts.
   Audience: Graduate
6. Develop a personal approach to creating a culturally responsive, inclusive environment in campus and community spaces.
   Audience: Graduate
INTEGSCI 650 – COLLEGE SCIENCE TEACHING
1 credit.

Covers the fundamentals of learning theory and practical strategies for teaching science courses, while also developing community around this shared experience. The cohort will work together to learn the core themes of scientific teaching (active learning, assessment, and diversity) in theory so that they can make informed decisions about their teaching in the future. This course is required for Teaching Fellows Program participants.

**Requisites:** Consent of instructor
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement
**Repeatable for Credit:** No
**Last Taught:** Spring 2024

**Learning Outcomes:**
1. Explain the core ideas of Scientific Teaching (active learning, assessment, and diversity) and how they benefit instructors and students.
   Audience: Graduate

2. Design and implement instructional units for college courses based on Scientific Teaching principles.
   Audience: Graduate

3. Find and utilize resources to support teaching and learning.
   Audience: Graduate

4. Apply reflective practice and metacognitive skills to inform personal teaching development.
   Audience: Graduate

5. Develop community with colleagues around interest and shared experience in teaching.
   Audience: Graduate

INTEGSCI 660 – RESEARCH MENTOR TRAINING PRACTICUM
1 credit.

Practicum course for graduate, post-doctoral or senior undergraduate students to be taken concurrently while mentoring an undergraduate engaged in an independent research experience.

**Requisites:** None
**Repeatable for Credit:** Yes, unlimited number of completions
**Last Taught:** Spring 2024

INTEGSCI 675 – SPECIAL TOPICS
1-3 credits.

This course examines various special topics in science or science education. See Class Notes for additional information.

**Requisites:** Graduate/professional standing
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement
**Repeatable for Credit:** Yes, unlimited number of completions
**Last Taught:** Spring 2020

INTEGSCI 699 – INDEPENDENT STUDY
1-3 credits.

Provides academic credit for advanced research, library, and/or laboratory work under direct guidance of a faculty member. Students are responsible for arranging the work and credits with the supervising faculty member.

**Requisites:** Consent of instructor
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement
**Repeatable for Credit:** Yes, unlimited number of completions
**Last Taught:** Spring 2024

INTEGSCI 740 – COMMUNITY RELATIONSHIPS AND MATERIALS DEVELOPMENT IN STEM PUBLIC SERVICE
1 credit.

Provides opportunities for practical application of public service knowledge. Discusses development of a workplan for long-term projects, provides strategies to initiate community partnerships, and fosters development of materials for use in a community-based practicum. Includes time to work intensively on acquiring pathway-specific knowledge and skills and opportunities to practice, problem-solve, and support cohort members within and across public service pathways.

**Requisites:** INTEGSCI 640
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement
**Repeatable for Credit:** No
**Last Taught:** Summer 2023

**Learning Outcomes:**
1. Apply their knowledge of approaches to community partnerships to the development of personal and organizational relationships
   Audience: Graduate

2. Develop pathway-specific materials in collaboration with peers and community partners that appropriately engage stakeholders in STEM, are inclusive, and grounded in evidence
   Audience: Graduate

3. Develop pathway-specific knowledge, skills, and attitudes
   Audience: Graduate

INTEGSCI 750 – INSTRUCTIONAL MATERIALS DESIGN FOR COLLEGE SCIENCE TEACHING
1 credit.

Designed to provide a practical application of pedagogical knowledge through the development of instructional materials for use in a university science education context. The process will be based around cohorts of participants working together to identify learning objectives, and create evidence-based assessments and learning experiences to target those objectives. This course is required for Scientific Teaching Fellows Program participants.

**Requisites:** INTEGSCI 650
**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement
**Repeatable for Credit:** Yes, unlimited number of completions
**Last Taught:** Summer 2023
INTEGSCI 840 — MENTORED PRACTICUM IN STEM PUBLIC SERVICE
1 credit.

Develops community-engagement in STEM (science, technology, engineering, and math) through a mentored public service experience. Provides opportunities to refine and implement skills necessary to work with a community partner to implement and evaluate a project that is mutually beneficial in process and product. Places emphasis on professional development within a selected pathway (direct service, community engaged teaching, policy and governance, or social entrepreneurship/corporate social responsibility). Includes time to meet within specialized pathways and as a full cohort throughout the implementation of the practicum experience.

**Requisites:** INTEGSCI 740

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:**
1. Conduct an effective public service practicum in their public service pathway of specialization
   **Audience:** Graduate

2. Develop and exhibit a sense of professional identity as a community engagement professional
   **Audience:** Graduate

3. Strengthen civic leadership and advocacy skills
   **Audience:** Graduate

4. Reflect on the practicum experience and use this experience to inform future community engagement
   **Audience:** Graduate

INTEGSCI 850 — MENTORED PRACTICUM IN COLLEGE SCIENCE TEACHING
1 credit.

Continues the development of graduate student's skills in teaching and learning college science courses by providing a mentored, independent teaching experience. Participants will have the opportunity to see how theories of learning and teaching play out in real instructional settings by implementing instructional activities and then evaluating the outcomes of those activities on the basis of student artifacts. A particular emphasis will be placed on participants creating an inclusive learning environment for teaching diverse student populations. The course also provides participants with frameworks for teaching and managing their own courses, should they pursue academic positions after graduate school. This course is required for Scientific Teaching Fellows Program participants.

**Requisites:** INTEGSCI 750

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023
