INTERDISCIPLINARY COURSES (ENGINEERING) (INTEREGR)

INTEREGR 101 — CONTEMPORARY ISSUES IN THE ENGINEERING PROFESSION
2 credits.

A survey of the engineering profession's contemporary role in society. Emphasis on the engineer's responsibility to society, including concerns for business principles, safety, ethics, and the environment; the role of engineers in achieving economic stability, growth, and improving the human condition. Enroll Info: None

Requisites: None
Course Designation: Breadth - Social Science
Level - Elementary
L&S Credit: Counts as Liberal Arts and Science credit in L&S
Repeatable for Credit: No
Last Taught: Fall 2012

INTEREGR 102 — INTRODUCTION TO SOCIETY'S ENGINEERING GRAND CHALLENGES
2 credits.

Description and discussion of how engineering disciplines address specific engineering grand challenges in society. Focus on societal and multicultural issues encountered in engineering, as well as economic, ethical and political constraints on engineering solutions. Development of students' professional skills. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2016

INTEREGR 103 — CORE COMPETENCIES FOR ENGINEERING LEADERS
2 credits.

Leadership is a core aspect of successful engineers, but it is rarely part of a formal curriculum. The course provides a solid foundation of leadership theory and practice to help future engineering professionals to be more effective in their technical work. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2013

INTEREGR 110 — INTRODUCTION TO ENGINEERING
1 credit.

For first-year students in the College of Engineering. Introduction to engineering disciplines and professional fields; engineering design process; grand challenges; sustainability, societal, multicultural and global issues encountered in engineering; economic and ethical constraints on engineering solutions; and employment and educational opportunities in engineering. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2018

INTEREGR 111 — INTRODUCTION TO THE ENGINEERING DESIGN PROCESS AND PROFESSION
2 credits.

Introduction to the engineering design process and profession through applied problem-solving. Emphasis on the engineering design process in industry, teamwork and communication skills; the engineer's responsibilities to customers and society; and the role of engineers in improving the human condition. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2015

INTEREGR 150 — DIRECTED STUDIES IN ENGINEERING FOUNDATION COURSES
0 credits.

Directed study through College of Engineering Supplementary Instruction program. Group discussion and problem-solving coaching to enhance understanding of physics and its applications to engineering. Enroll Info: None

Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021

INTEREGR 160 — INTRODUCTION TO ENGINEERING DESIGN
3 credits.

This course provides the incoming freshman with an overview of engineering based on a "hands-on" experience with a client-centered engineering design project, which includes: 1) a team-based design project, 2) a survey of engineering disciplines, and 3) an introduction to computer tools and lab techniques. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2016

INTEREGR 170 — DESIGN PRACTICUM
3 credits.

Introduction to design via the invention, fabrication and testing of a device that solves a problem proposed by a real world client. Information retrieval techniques, specification writing, methods for enhancing creativity, analysis techniques, scheduling, selection methodologies, cost estimating, sustainability in design, shop safety, engineering ethics, opportunities for engineering students (ie, study abroad, internships, co-ops), major exploration, fabrication equipment and techniques, and oral and written communication. Enroll Info: None

Requisites: None
Course Designation: Sustain - Sustainability
Repeatable for Credit: No
Last Taught: Spring 2021

INTEREGR 200 — CAREER ORIENTATION
1 credit.

Career planning; consideration of types of work in engineering; interviewing procedures and effective use of placement services; opportunities, division of work, and requirement for engineers in many fields. Enroll Info: None

Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2014
INTEREGR 301 — ENGINEERING AND BIOLOGY: TECHNOLOGICAL SYMBIOSIS
1-4 credits.

Combining engineering with biology can result in fascinating new technologies. This course explores 3 topics at the very forefront of bioengineering innovation as well as the social, political, and ethical issues that can affect realization. Enroll Info: None
Requisites: M E 306, E M A 303, BSE 249, E C E 230, B M E 320, M S & E 330, or CIV ENGR 320, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Fall 2014

INTEREGR 303 — APPLIED LEADERSHIP COMPETENCIES IN ENGINEERING
3 credits.

Introduction to basic leadership theories and perspectives; application of said theories to real-life experiences (both engineering and otherwise) through reflections, course discussion, readings, and experiential education in their local communities. Social Change Model of Leadership Development and Servant Leadership theory, viewed through an Applied Critical Leadership Theory lens. Enroll Info: None
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2020

INTEREGR 397 — ENGINEERING COMMUNICATION
3 credits.

Communication for engineering, science, and technology: theory and practice in planning, preparing, and critiquing reports, proposals, and workplace correspondence; persuasive argumentation, ethical decision-making strategies, multidisciplinary communication skills, research strategies, collaborative work; oral presentations. Enroll Info: None
Requisites: Satisfied Communications A requirement and junior or senior standing only
Course Designation: Gen Ed - Communication Part B
Repeatable for Credit: No
Last Taught: Spring 2021

INTEREGR 413 — CURRENT ISSUES IN INTERNATIONAL ENGINEERING
1 credit.

Provides a comparative examination and analysis of global trends and regional variations for engineering concepts, standards and practices. Using organizational case studies, the course will describe and analyze multi-national engineering operations and summarize best practices and caveats. Enroll Info: None
Requisites: INTEREGR 397, E P D 397, or concurrent enrollment
Repeatable for Credit: No
Last Taught: Fall 2020

INTEREGR 477 — TOOLS FOR PROTOTYPING AND MANUFACTURING
1-3 credits.

Tools for prototyping and manufacturing physical objects along with some of the underlying theory for how the tools work. Tools include 3D printers, 3D scanners, thermoformers, CNC routers, welders, wood saws, mills, lathes, laser cutters, waterjets, machine tools, general electronics, microcontrollers and Virtual Reality. Enroll Info: None
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

INTEREGR 601 — TOPICS IN INTERDISCIPLINARY ENGINEERING
1-3 credits.

Interdisciplinary topics of special interest to undergrad and grad students in engineering. Enroll Info: None
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021

INTEREGR 941 — COLLABORATIVE CAPSTONE II
3 credits.

Explore chosen opportunity area through prototyping, user testing, and iteration. Creation of final, high resolution design, with communication and launch plan for startup, product or service. Practice behaviors of design thinking - ethics, critique, and storytelling. Enroll Info: None
Requisites: INTER-HE 940
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
