

# BIOMEDICAL ENGINEERING: ACCELERATED PROGRAM, MS

## REQUIREMENTS

### MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (<http://guide.wisc.edu/graduate/#policiesandrequirements>), in addition to the program requirements listed below.

### NAMED OPTION REQUIREMENTS MODE OF INSTRUCTION

| Face to Face | Evening/<br>Weekend | Online | Hybrid | Accelerated |
|--------------|---------------------|--------|--------|-------------|
| Yes          | No                  | No     | No     | Yes         |

#### Mode of Instruction Definitions

**Accelerated:** Accelerated programs are offered at a fast pace that condenses the time to completion. Students typically take enough credits aimed at completing the program in a year or two.

**Evening/Weekend:** Courses meet on the UW–Madison campus only in evenings and/or on weekends to accommodate typical business schedules. Students have the advantages of face-to-face courses with the flexibility to keep work and other life commitments.

**Face-to-Face:** Courses typically meet during weekdays on the UW–Madison Campus.

**Hybrid:** These programs combine face-to-face and online learning formats. Contact the program for more specific information.

**Online:** These programs are offered 100% online. Some programs may require an on-campus orientation or residency experience, but the courses will be facilitated in an online format.

### CURRICULAR REQUIREMENTS

| Requirements                            | Detail   |
|---|--|
| Minimum Credit Requirement              | 30 credits   |
| Minimum Residence Credit Requirement    | 16 credits   |
| Minimum Graduate Coursework Requirement | 15 credits must be graduate-level coursework. Refer to the Graduate School: Minimum Graduate Coursework (50%) Requirement policy: <a href="https://policy.wisc.edu/library/UW-1244">https://policy.wisc.edu/library/UW-1244</a> ( <a href="https://policy.wisc.edu/library/UW-1244/">https://policy.wisc.edu/library/UW-1244/</a> ). |

|                                  |   |
|----------------------------------|---|
| Overall Graduate GPA Requirement | 3.00 GPA required. Refer to the Graduate School: Grade Point Average (GPA) Requirement policy: <a href="https://policy.wisc.edu/library/UW-1203">https://policy.wisc.edu/library/UW-1203</a> ( <a href="https://policy.wisc.edu/library/UW-1203/">https://policy.wisc.edu/library/UW-1203/</a> ). |
| Other Grade Requirements         | n/a   |
| Assessments and Examinations     | There are no degree-specific assessments and examinations outside of those given in individual courses.   |
| Language Requirements            | None.   |

### REQUIRED COURSES

The required coursework is designed to complement each student's interests and background in biomedical engineering.

| Code   | Title | Credits   |
|--|-------|-----------|
| <b>General Requirements</b>                            |       |           |
| 2 semesters of B M E 701                               |       | 2         |
| Bioscience credits                                     |       | 3         |
| Engineering credits, numbered 400 and above            |       | 12        |
| Elective credits selected in consultation with advisor |       | 7-13      |
| Project or Independent Study (B M E 790 or B M E 799)  |       | 0-6       |
| <b>Total Credits</b>                                   |       | <b>30</b> |

Students choose one of the following areas of specialization. Of the credits above, 15 credits must be in one area of specialization.

#### Biomaterials and Tissue Engineering<sup>1</sup>

Biomaterials and tissue engineering employ a diverse range of approaches to develop methods to diagnose and treat diseases, create living tissue environments that may be used to restore the function of a damaged organ, and uncover biological mechanisms related to tissue development and disease. Graduate students trained in biomaterials and tissue engineering are expected to gain a detailed understanding of cellular and molecular biology, materials science, and engineering methods.

| Code   | Title  | Credits          |
|--|--|------------------|
| <b>Required courses:</b>   |  |                  |
| <i>At least 3 credits of Bioscience. Relevant options include:</i> |  | <i>3 or more</i> |
| BIOCHEM 501  | Introduction to Biochemistry                       |                  |

### Biomechanics <sup>1</sup>

Biomechanists use experiments and computational tools to investigate the mechanical aspects of biological systems, at levels ranging from whole organisms to organs, tissues, and cells. Graduate students trained

in biomechanics are expected to gain a detailed understanding of mechanics, mathematics, biology, and engineering.

| Code   | Title   | Credits           |
|--|---|-------------------|
| <b>Required courses:</b>   |   |                   |
| <i>At least 3 credits of a Bioscience. Relevant options include:</i> |   | <i>3 or more</i>  |
| ANAT&PHY 335   | Physiology  |                   |
| ANAT&PHY 435   | Fundamentals of Human Physiology  |                   |
| BIOCHEM/<br>GENETICS/<br>MD GENET 620                                | Eukaryotic Molecular Biology  |                   |
| CRB/B M E 670  | Biology of Heart Disease and<br>Regeneration  |                   |
| KINES 773  | Cardiorespiratory Adaptions to<br>Environment and Exercise                                |                   |
| ZOOLOGY 570  | Cell Biology  |                   |
| <i>At least 12 credits of Engineering. Relevant options include:</i> |   | <i>12 or more</i> |
| B M E/M E 414  | Orthopaedic Biomechanics - Design<br>of Orthopaedic Implants                              |                   |
| B M E/M E 415  | Biomechanics of Human Movement  |                   |
| B M E/M E 505  | Biofluidics   |                   |
| B M E/M E 516  | Finite Elements for Biological and<br>Other Soft Materials                                |                   |

### Biomedical Imaging and Optics<sup>1</sup>

Biomedical imaging and optics research develops and utilizes new experimental and computational tools to characterize tissue structure across multiple size scales. A particular focus is on human health, especially with respect to achieving superior diagnostic/prognostic tools for a spectrum of diseased states. Graduate students trained in this track are expected to gain a detailed understanding of mathematics, biology and engineering as well as optical and/or physical methods.

| Code   | Title  | Credits           |

### Medical and Microdevices<sup>1</sup>

Medical and microdevices involve the use of electronic and computational tools to develop devices used in diagnosis and treatment of disease ranging from the systemic to the cellular and molecular levels.

## Neuroengineering<sup>1</sup>

Neuroengineering is the convergence of neuroscience, computation, device development, and mathematics to improve human health. Neuroengineering brings together state-of-the-art technologies for the development of devices and algorithms to assist those with neural disorders. It is also used to reverse engineer living neural systems via new algorithms, technologies and robotics. Students pursuing this track are involved in all of these endeavors so that as the next generation of engineers, they will transcend the traditional boundaries of neuroscience, technology, engineering and mathematics.

| E C E/COMP SCI/ M E 539  | Introduction to Artificial Neural Networks                                  |                   |
| NTP/MED PHYS 651   | Methods for Neuroimaging Research   |                   |

## Electives (taken in consultation with your faculty advisor):

|                     |   |
|---------------------|---|
| COMP SCI 320        | Data Science Programming II   |
| COMP SCI 368        | Learning a Programming Language (multiple 1-credit options, including R, C++, and Matlab) |
| COMP SCI/ B M I 567 | Medical Image Analysis  |
| COMP SCI/ E C E 766 | Computer Vision   |
| COMP SCI/ B M I 767 | Computational Methods for Medical Image Analysis  |
| MATH 443            | Applied Linear Algebra  |

## Systems and Synthetic Biology<sup>1</sup>

Systems and synthetic biology utilizes experimental and computational tools in an iterative fashion to analyze and regulate biological systems.

| Code   | Title   | Credits           |
|--|---|-------------------|
| <b>Required courses:</b>   |   |                   |
| <i>At least 3 credits of Bioscience. Relevant options include:</i>   |   | <i>3 or more</i>  |
| BIOCHEM 570  |   |                   |
| BIOCHEM 919  | Synthetic Biology Seminar   |                   |
| BIOCHEM 501  | Introduction to Biochemistry  |                   |
| BIOCHEM/ GENETICS/ MICROBIO 612                                      | Prokaryotic Molecular Biology   |                   |
| BIOCHEM/ GENETICS/ MD GENET 620                                      | Eukaryotic Molecular Biology  |                   |
| BIOCHEM 729  | Advanced Topics   |                   |
| M M & I/PATH-BIO 528   | Immunology  |                   |
| ZOOLOGY 570  | Cell Biology  |                   |
| <i>At least 12 credits of Engineering. Relevant options include:</i> |   | <i>12 or more</i> |
| B M E 550  | Introduction to Biological and Medical Microsystems   |                   |
| B M E 556  | Systems Biology: Mammalian Signaling Networks   |                   |
| B M E 780  | Methods in Quantitative Biology   |                   |
| B M E/CBE 560  | Biochemical Engineering   |                   |
| B M E 602  | Special Topics in Biomedical Engineering (CRISPR Genome Editing and Engineering Laboratory) |                   |
| CBE 781  | Biological Engineering: Molecules, Cells & Systems  |                   |
| CBE/B M E 782  | Modeling Biological Systems   |                   |
| CBE 660  | Intermediate Problems in Chemical Engineering   |                   |
| <b>Electives (taken in consultation with your faculty advisor):</b>  |   |                   |
| B M I/STAT 541   | Introduction to Biostatistics   |                   |
| B M I/COMP SCI 576   | Introduction to Bioinformatics  |                   |
| B M I/COMP SCI 775   | Computational Network Biology   |                   |

|                        |   |
|------------------------|---|
| B M I/<br>COMP SCI 776 | Advanced Bioinformatics   |
| B M I 826              | Special Topics in Biostatistics and<br>Biomedical Informatics   |
| COMP SCI 368           | Learning a Programming Language<br>(multiple 1-credit options available,<br>including R, C++, and Matlab) |
| MATH 443               | Applied Linear Algebra  |
| MATH 519               | Ordinary Differential Equations   |
| MATH 619               | Analysis of Partial Differential<br>Equations   |

### Footnotes

<sup>1</sup> These pathways are internal to the program and represent different curricular paths a student can follow to earn this degree. Pathway names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

### Other Policy

Students in this program may not take courses outside the prescribed curriculum without faculty advisor and program director approval. Students in this program cannot enroll concurrently in other undergraduate or graduate degree programs.
