1

COMMUNICATION SCIENCES AND DISORDERS, PHD

LEARNING OUTCOMES

LEARNING OUTCOMES

- (Foundations of Research) Possess foundational knowledge about the particular subject area of the chosen area, and be fully conversant with the classic and contemporary literature.
- 2. (Foundations of Research) Master data collection techniques specific to their chosen area of research.
- (Foundations of Research) Fully conversant with the theoretical issues and tensions within their chosen area of research.
- (Foundations of Research) Gain high-level knowledge and expertise in the statistical analysis of research data and graphical approaches to exploration of data sets.
- 5. (Foundations of Research) Communicate complex ideas in a clear and understandable manner.
- (Dissertation) Design and execute an original experiment (or experiments) that clearly fills a gap in the existing literature and is worthy of publication(s) in peer-reviewed journals.
- 7. (Dissertation) Skill, experience, and knowledge base to defend the dissertation work to a committee of five faculty members.
- 8. (Professional Conduct) Design and conduct experiments.
- (Professional Conduct) Formulate research questions that are based on sound analyses of existing literature, and that show evidence of logical argument.
- (Professional Conduct) Understand how to examine data for patterns that are meaningful and patterns that reflect likely data collection errors.
- 11. (Professional Conduct) Write research proposals and learn to develop carefully argued proposals and explanations.
- 12. (Professional Conduct) Make presentations of their research at national and international conferences.
- 13. (Professional Conduct) Pass a summary exam (6 hours written, 2 hours oral) that admits them to candidacy for the PhD degree.
