Admissions to the Energy Analysis and Policy doctoral minor have been suspended as of fall 2022 and will be discontinued as of fall 2026. If you have any questions, please contact the department.

Those wishing to pursue Energy Analysis and Policy to fulfill their doctoral breadth requirement may do so through the Energy Analysis and Policy graduate certificate (http://guide.wisc.edu/graduate/environmental-studies/energy-analysis-policy-graduate-professional-certificate/).

The Energy Analysis and Policy (EAP) doctoral minor provides PhD students with the opportunity to customize their graduate experience and add energy training to their degree program at the University of Wisconsin-Madison. The EAP doctoral minor fulfills the “Option A” minor requirement for PhD students and adds an energy credential to one’s transcript. Graduate students can complete either the EAP doctoral minor or the EAP graduate certificate (http://guide.wisc.edu/graduate/environmental-studies/energy-analysis-policy-graduate-professional-certificate/), but not both.

Since its formation in 1980, EAP has provided students with the skills and knowledge needed by professionals in government, energy companies, consulting firms, and other organizations. EAP draws students from across campus. Particularly large student groups from public policy, environmental studies, engineering, and urban planning pursue the certificate because of the program’s interdisciplinary curriculum which considers a wide range of technical, economic, political, and social factors that shape energy policy formulation and decision-making.

**ADMISSIONS**

**ADMISSIONS**

Admissions to the Energy Analysis and Policy doctoral minor have been suspended as of fall 2022 and will be discontinued as of fall 2026. If you have any questions, please contact the department.

EAP welcomes applications from students in any doctoral degree program at UW-Madison. Students may apply to the EAP program concurrently with their graduate school application or once they have matriculated at UW-Madison.

While there are no prerequisites to the program, it is recommended that EAP applicants have completed at least one college-level course in each of the following five subject areas: physical science (physics or chemistry); natural science (biology, environmental, geology or atmospheric and oceanic); economics; social sciences or humanities (besides economics); and calculus or statistics.

**HOW TO APPLY**

To apply for the EAP doctoral minor, students must complete the online Energy Analysis and Policy (EAP) application form (https://go.wisc.edu/EAP-apply/), which includes the following elements:

- Department of Energy Analysis and Policy, University of Wisconsin-Madison
- Personal statement
- Academic transcripts
- CV
- Three letters of recommendation

Applications to EAP may be submitted at any time, but applicants are encouraged to apply early in their graduate career to ensure timely completion of doctoral minor requirements and to access additional benefits (e.g. funding, networking events) available exclusively to students in the EAP program. Students may take courses that meet the minor requirements prior to completing their application.

**DEADLINES**

1. Information on prior educational attainment
2. Information on degree program being pursued

Applications to EAP may be submitted at any time, but applicants are encouraged to apply early in their graduate career to ensure timely completion of doctoral minor requirements and to access additional benefits (e.g. funding, networking events) available exclusively to students in the EAP program. Students may take courses that meet the minor requirements prior to completing their application.

**REQUIREMENTS**

Each EAP student must complete four courses (12 credits), including an introductory course, a capstone course, and one course from each of two categories: Energy Analysis and Energy Policy. Courses in the Energy Analysis category involve quantitative analysis of the technical and economic factors that shape society’s use of energy resources. Courses in the Energy Policy category involve the social, political, and environmental factors that underly decision-making around energy choices.

Some courses listed in the Energy Analysis category may have some overlap with the Energy Policy category, and vice versa. Students who wish to use a course for the opposite category that it is listed in should submit a written request to the EAP Academic Coordinator or Faculty Chair. Students should provide a course syllabus and a written justification for why the course should qualify for the other category in the context of their overall course of study, with the EAP Chair making the final decision on whether to accept the request.

The following courses are offered regularly, though other courses (with approval by the EAP faculty program committee) may fulfill one of the requirements below (see note under Other Qualifying Courses (p. 2)).

Energy Analysis

Choose one of the following:

- A A E/ECON 371 Energy, Resources and Economics
- A A E/ENVIR ST/ POP HLTH/ PUB AFFR 881 Benefit-Cost Analysis
- AGROECOL/ AGRONOMY/ ENVIR ST 724 Agroecosystems and Global Change
- ENVIR ST/ A A E/ECON/ URB R PL 671 Energy Economics
- BSE 460 Biorefining: Energy and Products from Renewable Resources
Choose one of the following:

- ENVIR ST 349 Climate Change Governance
- ENVIR ST/ATM OCN 355 Introduction to Air Quality
- ENVIR ST/ECON/POLI SCI/URB R PL 449 Government and Natural Resources
- ENVIR ST/POP HLTH 471 Introduction to Environmental Health
- ENVIR ST/POP HLTH 502 Air Pollution and Human Health
- ENVIR ST/POLI SCI/PUB AFFR 866 Global Environmental Governance
- GEOSCI/ENVIR ST 411 Energy Resources
- LAW 848 Introduction to Environmental Law
- POP HLTH/M&ENVTOX 789 Principles of Environmental Health: A Systems Thinking Approach

Total Credits: 12

OTHER QUALIFYING COURSES

Because the scheduling of the preceding courses is coordinated with the needs of their home departments, EAP cannot guarantee that specific courses will always be offered at specific times or rotations. Each semester, the EAP program faculty will consider other qualifying courses for the upcoming semester that fulfill one of the categories above. Once approved, the EAP Academic Coordinator will distribute a list of course offerings for the upcoming semester to students in the EAP program.

COURSE SUBSTITUTIONS

Students may propose course substitutions by contacting the Academic Coordinator or the Faculty Chair. The EAP Chair makes the final decision. Students should provide a course syllabus and a letter of endorsement from the faculty member teaching the course, preferably before the start of the course. The substitution proposal will be considered based upon the following criteria:

1. the extent to which the course content is devoted to energy
2. the rigor of methodology applied to the course material
3. the context of the class with respect to the student’s study plan
