The Energy Analysis and Policy certificate (EAP) provides students with the opportunity to customize their graduate experience, adding energy training to any graduate degree program offered at the University of Wisconsin–Madison. Graduate students can complete the EAP certificate by selecting courses that meet both their degree and EAP requirements. As such, most students can add EAP onto a degree without any additional time or cost. Many prospects choose UW–Madison specifically to participate in the EAP program, while others join EAP upon learning about it after matriculation.

Since its formation in 1980, EAP has provided students with the skills and knowledge needed by professionals in government, energy companies, consulting firms, and other organizations. EAP draws students from across campus. Particularly large student groups from public policy, environmental studies, engineering, and urban planning pursue the certificate because of the program's interdisciplinary curriculum which considers a wide range of technical, economic, political, and social factors that shape energy policy formulation and decision-making.

**ADMISSIONS**

EAP welcomes applications from students in any graduate degree program at UW-Madison that allows students to pursue a certificate. Students may apply to the EAP program concurrently with their graduate school application or once they have matriculated at UW-Madison. Acceptance into EAP is contingent on enrollment in a graduate degree program.

While there are no prerequisites to the program, it is recommended that EAP applicants have completed at least one college-level course in each of the following five subject areas: physical science (physics or chemistry); natural science (biology, environmental, geology or atmospheric and oceanic); economics; social sciences or humanities (besides economics); and calculus or statistics.

**HOW TO APPLY**

To declare the certificate, students must complete the online Energy Analysis and Policy (EAP) application form (https://go.wisc.edu/EAP-apply/), which includes the following elements:

1. Information on prior educational attainment
2. Information on degree program being pursued
3. A brief statement of interest in the EAP program
4. For prospective students applying to the Environment and Resources MS or PhD programs, the EAP application provides a matching service with potential thesis advisors.

**DEADLINES**

Applications to EAP may be submitted at any time, but applicants are encouraged to apply before the end of their first year in graduate school to ensure timely completion of certificate requirements. Students may take courses that meet certificate requirements prior to completing their application.

### REQUIREMENTS

Each EAP student must complete five courses (13 credits), including an introductory course, a capstone course, a professional skills seminar, and one course from each of two categories: Energy Analysis and Energy Policy. Courses in the Energy Analysis category involve quantitative analysis of the technical and economic factors that shape society's use of energy resources. Courses in the Energy Policy category involve the social, political, and environmental factors that underly decision-making around energy choices.

Some courses listed in the Energy Analysis category may have some overlap with the Energy Policy category, and vice versa. Students who wish to use a course in the opposite category that it is listed in should submit a written request to the EAP Academic Coordinator or Faculty Chair. Students should provide a course syllabus and a written justification for why the course should qualify for the other category in the context of their overall course of study, with the EAP Chair making the final decision on whether to accept the request.

The following courses are offered regularly, though other courses (with approval by the EAP faculty program committee) may fulfill one of the requirements below (see note under Other Qualifying Courses (p. 2)).

#### Energy Analysis

Choose one of the following:

- A A E/ECON 371 Energy, Resources and Economics
- A A E/ENVR ST/ POP HLTH/ PUB AFFR 881 Benefit-Cost Analysis
- AGROECOL/ AGRONOMY/ ENVR ST 724 Agroecosystems and Global Change
- ENVR ST/ A A E/ECON/ URB R PL 671 Energy Economics
- BSE 460 Biorefining: Energy and Products from Renewable Resources
- CBE 562 Special Topics in Chemical Engineering (Topic: Energy and Sustainability)
- CIV ENGR/ G L E 421 Environmental Sustainability Engineering
- CIV ENGR 639 Special Topics in Geotechnical Engineering (Topic: Wind Energy Site/Design)
or G L E 401 Special Topics in Geological Engineering
E C E 356 Electric Power Processing for Alternative Energy Systems
E C E 427 Electric Power Systems
ENVIR ST/ BSE 367 Renewable Energy Systems
M E 466 Air Pollution Effects, Measurements and Control
  or CIV ENGR 422 Air Pollution Effects, Measurements and Control
M E 469 Internal Combustion Engines
M E/CBE 567 Solar Energy Technology
N E 571 Economic and Environmental Aspects of Nuclear Energy

Energy Policy 3

Choose one of the following:

ENVIR ST 349 Climate Change Governance
ENVIR ST/ ATM OCN 355 Introduction to Air Quality
ENVIR ST/ ECON/POLI SCI/ URB R PL 449 Government and Natural Resources
ENVIR ST/ POP HLTH 471 Introduction to Environmental Health
ENVIR ST/ POP HLTH 502 Air Pollution and Human Health
ENVIR ST/ POP HLTH 560 Health Impact Assessment of Global Environmental Change
ENVIR ST/ POLI SCI/ PUB AFFR 866 Global Environmental Governance
GEOSCI/ ENVIR ST 411 Energy Resources
LAW 848 Introduction to Environmental Law
POP HLTH/ M&ENVTOX 789 Principles of Environmental Health: A Systems Thinking Approach

Total Credits 13

OTHER QUALIFYING COURSES
Because the scheduling of the preceding courses is coordinated with the needs of their home departments, EAP cannot guarantee that specific courses will always be offered at specific times or rotations. Each semester, the EAP program faculty will consider other qualifying courses for the upcoming semester that fulfill one of the categories above. Once approved, the EAP Academic Coordinator will distribute a list of course offerings for the upcoming semester to students in the EAP program.

COURSE SUBSTITUTIONS
Students may propose course substitutions by contacting the Academic Coordinator or the Faculty Chair. The EAP Chair makes the final decision. Students should provide a course syllabus and a letter of endorsement from the faculty member teaching the course, preferably before the start of the course. The substitution proposal will be considered based upon the following criteria:

1. the extent to which the course content is devoted to energy
2. the rigor of methodology applied to the course material
3. the context of the class with respect to the student’s study plan

PEOPLE

For up-to-date contact information of EAP faculty and staff, visit eap.wisc.edu/faculty (https://eap.wisc.edu/faculty/)

FACULTY EXECUTIVE PROGRAM COMMITTEE
Paul Wilson (Certificate Chairperson), Rob Anex, Alan Carroll, Xiaodong Du, Tracey Holloway, Bernard Lesieutre, Gregory Nemet, Jonathan Patz, Scott Williams, Anna Gade (Ex Officio)

EAP FACULTY AFFILIATES
Vicki Bier, Sarah Johnston, J. Paul Kelleher, Douglas Reinemann, Matt Turner, Daniel Vimont
