Each EAP student must complete five courses (13 credits), including an introductory course, a capstone course, a professional skills seminar, and one course from each of two categories: Energy Analysis and Energy Policy. Courses in the Energy Analysis category involve quantitative analysis of the technical and economic factors that shape society’s use of energy resources. Courses in the Energy Policy category involve the social, political, and environmental factors that underly decision-making around energy choices.

Some courses listed in the Energy Analysis category may have some overlap with the Energy Policy category, and vice versa. Students who wish to use a course for the opposite category that it is listed in should submit a written request to the EAP Academic Coordinator or Faculty Chair. Students should provide a course syllabus and a written justification for why the course should qualify for the other category in the context of their overall course of study, with the EAP Chair making the final decision on whether to accept the request.

The following courses are offered regularly, though other courses (with approval by the EAP faculty program committee) may fulfill one of the requirements below (see note under Other Qualifying Courses (p. 2)).

### Energy Analysis

Choose one of the following:

- **A A E/ECON 371** Energy, Resources and Economics
- **A A E/ENVIR ST/POP HLTH/ PUB AFFR 881** Benefit-Cost Analysis
- **AGROECOL/AGRONOMY/ENVIR ST 724** Agroecosystems and Global Change

### Energy Policy

Choose one of the following:

- **ENVIR ST 349** Climate Change Governance
- **ENVIR ST/ATM OCN 355** Introduction to Air Quality
- **ENVIR ST/GEOG 439** US Environmental Policy and Regulation
- **ENVIR ST/ECON/POLI SCI/URB R PL 449** Government and Natural Resources
- **ENVIR ST/POP HLTH 471** Introduction to Environmental Health
- **ENVIR ST/POP HLTH 502** Air Pollution and Human Health
- **ENVIR ST/POP HLTH 739** Climate Change, Human and Planetary Health
- **ENVIR ST/POLI SCI/PUB AFFR 866** Global Environmental Governance
- **GEOSCI/ENVIR ST 411** Energy Resources
- **LAW 848** Introduction to Environmental Law
- **POP HLTH/M&ENVTOX 789** Principles of Environmental Health: A Systems Thinking Approach
- **URB R PL 551** Climate Action Planning: Sustainable Transportation

### Total Credits

13

Because this is a 2-credit course, students selecting this course option are required to take an additional 1-credit course in consultation with the certificate coordinator.
OTHER QUALIFYING COURSES
Because the scheduling of the preceding courses is coordinated with the needs of their home departments, EAP cannot guarantee that specific courses will always be offered at specific times or rotations. Each semester, the EAP program faculty will consider other qualifying courses for the upcoming semester that fulfill one of the categories above. Once approved, the EAP Academic Coordinator will distribute a list of course offerings for the upcoming semester to students in the EAP program.

COURSE SUBSTITUTIONS
Students may propose course substitutions by contacting the Academic Coordinator or the Faculty Chair. The EAP Chair makes the final decision. Students should provide a course syllabus and a letter of endorsement from the faculty member teaching the course, preferably before the start of the course. The substitution proposal will be considered based upon the following criteria:

1. the extent to which the course content is devoted to energy
2. the rigor of methodology applied to the course material
3. the context of the class with respect to the student’s study plan
