Geographic information science (GIScience) addresses the fundamental issues surrounding the use of computer technology to help people work with geographic information. GIScience is a field devoted to the acquisition, representation, management, analysis, and visualization of geospatial data. It is a relatively new discipline that incorporates geography, cartography, spatial analysis, computer science and other related fields, including geodesy, cognition, statistics, and mathematics. As an academic discipline, GIScience is concerned with both theoretical and applied issues relating to the creation, analysis, and visualization of spatiotemporal information. It is inherently interdisciplinary in both its methods and applications. Here at UW–Madison, we are committed to the integration of GIScience with substantive geographic questions.

**ADMISSIONS**

For more information, contact: Marguerite Roulet, Graduate Program Director (maroulet@wisc.edu).

**REQUIREMENTS**

All students pursuing a concentrated minor in Cart/GIS are required to connect with a faculty member with whom they can work to establish a reasonable course list to complete 9 credits in the department. That faculty member will, ultimately, be responsible for signing off on completion of the minor. Students interested in the geography minor are encouraged to explore the department’s faculty pages (http://www.geography.wisc.edu/faculty/) and contact one or more faculty with shared research interests.

**PEOPLE**

**Faculty:**

Department Chair: John (Jack) Williams

Associate Professors: Aslıgül Göçmen, Quanying Huang, Jenna Loyd, Sarah Moore, Stephen Young

Assistant Professors: Christian Andresen, Song Gao, Ken Keefover-Ring, Almita Miranda, Jen Rose Smith
