The minor requires 10 credits (or 13 credits for students who choose the 6-credit B M I/POP HLTH 551/B M I/POP HLTH 552 sequence), including three required courses and a fourth elective required course. Note:

For students who are funded by the TL1 Predoctoral Training Program, the minor requires additional training as described on the TL1 website (https://ictr.wisc.edu/career-development-awards-2/).

---

The 1-credit B M I 699 is for students with instructor consent who have prior statistics (no biostatistics coursework). Students who take this option must also complete 2 credits of POP HLTH/MEDICINE/NURSING 705 Seminar in Interdisciplinary Clinical Research Evidence or another biostatistics course chosen in consultation with the program faculty director.
