The occupational therapy program resides in the Department of Kinesiology (https://kinesiology.education.wisc.edu/) and offers two graduate programs options in the OTD: an entry-level doctor of occupational therapy (Entry-Level (http://guide.wisc.edu/graduate/kinesiology/occupational-therapy-otd/occupational-therapy-entry-level-otd/)) and a post-professional doctor of occupational therapy (Post-Professional (http://guide.wisc.edu/graduate/kinesiology/occupational-therapy-otd/occupational-therapy-post-professional-otd/)). Occupational therapists interested in pursuing advanced research training may also apply to the M.S. (http://guide.wisc.edu/graduate/kinesiology/kinesiology-ms/) or Ph.D. (http://guide.wisc.edu/graduate/kinesiology/kinesiology-phd/) in Kinesiology with a specialization in Occupational Science. The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the disciplines of occupational therapy and science.
