SCIENCE COMMUNICATION, GRADUATE/PROFESSIONAL CERTIFICATE

The Department of Life Sciences Communication (LSC) is a world leader in science communication research, education, and practice. The Certificate in Science Communication allows students enrolled in any graduate or professional program at UW-Madison to supplement their existing graduate coursework with a transcriptable certificate in science communication. The certificate is appropriate not only for students in the physical sciences, biological sciences, and engineering fields, but also for students in professional degree programs (law, veterinary medicine, etc.).

Graduate students interested in the ethical, legal, and social implications of emerging technologies, or who want to build an intellectual foundation for a future career in policy or various mission agencies (e.g., AAAS policy fellowships) dealing with public understanding and communication of science will find this certificate particularly valuable.

More information may be found on the department website (https://lsc.wisc.edu/).

ADMISSIONS

This certificate is open to any UW-Madison student enrolled in a graduate level program outside of LSC (GRAD, LAW, MED, PHARM, VMED). Before applying to the certificate, students are encouraged to consult with their advisor and/or graduate program coordinator from their major department. As part of the declaration form, students will be required to confirm that they have received consent from their advisor/degree program to pursue the certificate.

For students to declare their intent to pursue the Graduate Certificate in Science Communication, they must complete the Certificate Declaration Form. This form must be completed prior to graduation.

Students should contact the Director of Academic Programs or Student Services Coordinator with questions about the certificate, declaration process, or course selection.

Students are not allowed to earn both the science communication graduate certificate and Ph.D. minor in life sciences communication.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding/) is available from the Graduate School. Be sure to check with your program for individual policies and restrictions related to funding.

REQUIREMENTS

- Total credits required: 10
- Minimum cumulative GPA of 3.5 or higher in all LSC courses

- Courses must be at the 300 level or above and must have the graduate attribute to count toward the minimum graduate coursework (50%) rule.
- Previous coursework from other institutions and undergraduate coursework at UW-Madison cannot be counted toward the certificate.

Select two approved electives

- LSC 350 Visualizing Science and Technology 3
- LSC 430 Communicating Science with Narrative 3
- LSC 432 Social Media for the Life Sciences 3
- LSC 435 Theory and Practice of Integrated Marketing Communication 3
- LSC 440 Contemporary Communication Technologies and Their Social Effects 3
- LSC 532 Web Design for the Sciences 3
- LSC 560 Scientific Writing 3
- LSC 561 Writing Science for the Public 3
- LSC 625 Risk Communication 3
- LSC 660 Data Analysis in Communications Research 3
- LSC/ENVIR ST/JOURN 823 Science and Environment Communication 3
- LSC 875 Special Topics 1-4
- LSC 902 Public Opinion of Life Science Issues 3

Total Credits 10

LEARNING OUTCOMES

1. Communicate complex ideas effectively across different audiences, including underrepresented or particularly vulnerable audiences.
2. Select and utilize the most appropriate theories, methodologies, tools, and practices to communicate about science.
3. Collect relevant evidence designed to answer questions related to scientific challenges faced by industry, universities, and non-profits.
4. Discuss some of the ethical, legal, and social implications of science.

**Faculty:** Professors: Brossard (chair), Meiller, Scheufele (director of academic programs), Xenos; Associate Professors: Shaw, Shepard; Assistant Professors: Chen, Chinn, Li, Newman.
