GLOBAL HEALTH ONLINE, GRADUATE/PROFESSIONAL CERTIFICATE

The complex, existential problems challenging today’s world — emerging infectious diseases and pandemics, food insecurity and starvation, climate change impacts on health, antimicrobial resistance, fundamental inequities in access to nutrition and healthcare — transcend national boundaries and require expertise and perspectives from across the biomedical, social, and physical sciences to achieve creative solutions. The UW-Madison Certificate in Global Health Online provides students with the knowledge and skills to address health challenges and disparities around the world. The largely asynchronous, online format provides maximum flexibility for students to complete the certificate effectively within the context of primary degree, work and/or family responsibilities.

ADMISSIONS

As a graduate/professional certificate program, this certificate is intended for degree-seeking graduate and professional students who would like to add the certificate to their primary course of study.

The application period is January 15 through April 30 for the following fall term start.

In addition to the Certificate in Global Health Online application form, which will be available on the program’s website during the application period, program applicants are required to submit a current resume and original transcripts from all post-secondary schools attended. (Applicants who are currently enrolled in or have been accepted to a UW–Madison health sciences or graduate studies program may request to have copies of their transcripts sent from their program administrator to the School of Medicine and Public Health [SMPH] Office of Global Health.)

Students who already hold an Undergraduate Certificate in Global Health from UW–Madison are encouraged to contact the SMPH Office of Global Health to discuss options for advanced study. Please do not apply for the graduate/professional certificate.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding/) is available from the Graduate School. Be sure to check with your program for individual policies and restrictions related to funding.

Students currently enrolled in a graduate/professional degree program at UW-Madison do not pay additional tuition for the certificate online coursework. However, responsibility for funding the global health field experience lies with the student. Depending on the site, nature, and duration of the experience, costs could range from $1000 to $4000*, including program fees, travel, and in-country living expenses. In some cases, students may be permitted to increase their student financial aid package to help pay these expenses. For students participating in the faculty-led field courses, scholarships are available through the International Academic Programs (IAP)/Study Abroad office that manages these programs. Additionally, primary degree programs and/or student organizations may also have funds available to help support field experience costs.

REQUIREMENTS

Minimum Residence Credits: 11

- At least half of the graduate/professional certificate credits must be earned “in residence” (which includes on campus and distance-delivered courses) at UW-Madison.
- Students must earn a minimum 3.0 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.
- Courses in which a student elects the pass/fail option will not count toward completion of requirements.

Required Coursework: 11 credits

Completion of eleven credits is required for the certificate, including ten core course credit requirements and one credit of global health field experience. A description of the requirements is provided below.

Global Health Field Experience 1

PUBLHLTH 710

Independent Study 1

Total Credits 11

1 For independent study field experiences, certificate students must prepare a proposal, to be reviewed and approved by his or her advisor and the Certificate Program Director, which describes project goals and objectives and outlines a tentative schedule of activities. Students must register for independent study credit in an appropriate school or department (a 699 course number in most health sciences and graduate departments). All students completing independent field experiences are required by the School of Medicine and Public Health (SMPH) to execute an affiliation agreement between the field
site organization and the SMPH/University of Wisconsin–Madison. Upon completion of the independent field experience, all students must submit to the Certificate program office:

- A summary of reflections on the field course/experience. (This may take the form of a journal kept throughout the field course/experience, or if a journal was not kept, a template will be provided);
- An instructor evaluation of the student;
- A reference-cited, academic paper/project report; and
- A site evaluation.

DETAILS ON THE GLOBAL HEALTH FIELD EXPERIENCE
A global health field experience/course is an academic credit-based learning experience in a setting relevant to global health. Field experiences/courses are generally carried out during the summer (less commonly within the normal academic calendar if they do not interfere with class attendance or completion of requirements for registered coursework). Students must be in good academic standing to participate in a global health field experience. One week of on-site learning is equivalent to 1 credit. (While field experience credits may range from 1-6, only one field experience credit counts toward the certificate requirements.)

Students may elect to complete either: a) a faculty-led interdisciplinary group field course administered by the UW–Madison Office of International Academic Programs (i.e., POP HLTH 645 Global Health Field Course), or b) an independent study field experience at the site of their choice, with approval of an academic advisor and the certificate faculty program director (see footnote 1 above). Field experiences usually take place in a country outside the United States, but may also be carried out in the United States, working with international/under-served populations or addressing health issues that have global implications. Students may also work with international agencies, such as the United Nations, the World Health Organization, Centers for Disease Control and Prevention, or nongovernmental organizations.

For POP HLTH 645 Global Health Field Course faculty-led group courses (Thailand, Uganda, Ecuador), students are required to apply to participate in the field course through the campus-wide Office of International Academic Programs and complete a country-specific orientation program. Upon satisfactory completion of the field course, students will receive credit for POP HLTH 645 Global Health Field Course.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd/) to build skills, thrive academically, and launch your career.

The Certificate in Global Health Online provides comprehensive student support and mentoring to maximize professional development for participating students. The programs coordinator will serve as the first line of student support for basic, procedural issues regarding the certificate program (e.g., access to the application portal, tracking of completed program requirements, monitoring of international travel requirements and paperwork, general questions). The faculty program director will serve as the primary advisor to students for issues regarding coursework as related to program requirements; global health content knowledge questions; advice, recommendations, and contacts for field projects; and, any student concerns regarding the program and academic/non-academic problems that may arise. All course faculty have extensive international field experience and will serve as equally important sources of information and personal contacts for students’ field projects and mentoring for overall development of professional skills in global health. Additionally, they will share the role of advising students regarding academic issues specific to their own courses.

LEARNING OUTCOMES

1. Exhibit the ability to describe and compare the health care systems in different areas of the world (such as: understanding of pros and cons of systems, comparison to the U.S. system, and trends in the evolution of health care systems over time).

2. Demonstrate knowledge of the epidemiology of common global health concerns, both communicable and non-communicable (such as: differences between high/middle/low income countries and programs to mitigate the impacts of these health issues such as the millennium and sustainable development goals).

3. Demonstrate the ability to integrate information from multiple perspectives into an assessment of a country/location’s health status (such as: history, politics, culture, societal structure, economics, environmental sciences, health care system(s), health databases, disease epidemiology, human rights, human subjects protections).

4. Model ethical behavior in global health engagement (such as: appreciation of the bidirectional nature of learning and mutual benefits between stakeholders and learners, cultural humility and flexibility, recognition of the importance of program sustainability over time, openness to new information/ideas).

5. Demonstrate professionalism, effective communication, leadership, problem-solving, and collaboration across multiple health education disciplines and stakeholders in addressing a global health issue (including an understanding of One Health approaches).

6. Exhibit the ability for growth in one’s approach to global health work through self-assessment and structured reflection (such as: personal biases and perspectives, views on equity and disparities, personal limitations).

PEOPLE

Information on the Certificate in Global Health Online program personnel can be found on the People tab of the program’s website: https://globalhealth.wisc.edu/people/
