1

MOLECULAR AND CELLULAR PHARMACOLOGY, PHD

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Gain a broad understanding of the pharmacological principles that underlie all biological processes.
- Become aware of the current limitations of the state of understanding of this discipline and the strategies that are required to advance the field of pharmacology.
- Creates new approaches in research, scholarship, or performance that makes a substantive contribution.
- 4. Conduct independent research using a breadth of pharmacological processes.
- 5. Think critically to address research challenges using a broad range of the theories, research methods, and approaches to scientific inquiry.
- Collaborate with investigators within the program, university, and beyond since current and future advances in pharmacological sciences demand interdisciplinary skills.
- 7. Fosters ethical and professional conduct in the sciences, including but not limited to: exposition of the scientific method; ethical design of experimental protocols; reproducibility in science; professional behavior in industrial, government, and academic settings; documentation of scientific results; communication to other scientists and the public; peer review; and confidentiality.
- 8. Communicates complex ideas in a clear and understandable manner.
- 9. Explore career development opportunities in industry, government, and academia to realize professional goals and paths.
- Develop teaching and mentoring skills in both lecture and laboratory settings.
