NURSING PRACTICE, DNP

The School of Nursing Doctor of Nursing Practice (DNP) program prepares nurses for leadership roles as advanced practice nurses (clinical nurse specialists or nurse practitioners) who provide direct care and lead practice development and evaluation. Students in the DNP program choose from three population foci: adult/gerontology (acute care or primary care), pediatrics, or psychiatric mental health. Those interested in dual preparation as an advanced practice nurse and nurse educator may add a nursing education focus.

The program is available for nurses with a baccalaureate degree in nursing (post-B.S. option) and nurses with a master’s degree in nursing practice (post-M.S. option). The post-B.S. option can be completed by following a three-year or four-year program plan and requires a minimum of 71 credits (68 credits in the program plan plus 3-credit graduate statistics requirement). The post-M.S. option is designed to be completed in two years on a part-time basis and requires a minimum of 51 credits. Up to 18 credits will be accepted from the student’s M.S. degree; a minimum of 32 credits must be completed as a graduate student on the UW–Madison campus. Students admitted to either option follow the course sequence designated in the program plan and progress as a group.

The program of study features a combination of formal course work, clinical practice, and scholarly inquiry. Most coursework is delivered in a hybrid format, utilizing both required in-person class sessions and distance learning technologies.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding/) is available from the Graduate School. Be sure to check with your program for individual policies and restrictions related to funding.

PROGRAM RESOURCES

Several forms of financial aid are available for graduate students in the School of Nursing. These include fellowships, scholarships, project and teaching assistantships, and loans. Most graduate assistantships cover the cost of tuition and provide a monthly stipend. Awards are made in the spring for the following academic year.

Graduate Research Scholars (GRS) fellowships are designed to support highly qualified underrepresented students in the doctoral programs. Doctoral students who are preparing to be full-time faculty in nursing programs are also eligible for the Nurse Faculty Loan Program (NFLP). These loans, supported by the federal government, are available to cover tuition and other educational expenses. When graduates become full-time faculty members, up to 85 percent of the NFLP loan will be canceled over a four-year period.

Additional information on financial aid including application procedures is available in the School of Nursing Academic Affairs Office.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd/) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

Career advising, funding, and professional development opportunities are shared with all students by a member of the School of Nursing Academic Affairs staff. Information on these support services can be found on the Student Site (https://students.nursing.wisc.edu/career-advising/career/).

LEARNING OUTCOMES

1. Integrate nursing science and theory with evidence, ethics, professional obligations, and knowledge from other disciplines as the basis for specialty-focused advanced nursing practice. (Essential 1)
2. Demonstrate advanced levels of clinical judgment, systems thinking, leadership, and accountability in designing, delivering, and evaluating evidence-based care to improve individual and population health outcomes (Essentials 2 and 8)
3. Evaluate evidence to determine & implement best practice (Essential 3)
4. Develop, implement, and evaluate new practice approaches based on nursing science and theory, as well as knowledge from other disciplines. (Essential 3)
5. Function as a practice specialist in clinical scholarship, quality improvement, and collaborative knowledge-generating research. (Essential 3)
6. Use information systems technology to monitor health, identify needs, and evaluate outcomes of care and system improvements. (Essential 4)
7. Translate knowledge into practice and policy to protect and improve health and health systems. (Essential 5)
8. Partner with intraprofessional and interprofessional teams to contribute nursing perspective and lead change in health outcomes and complex systems of care. (Essential 6)
9. Critically evaluate how social determinants of health, cultural background and environment impact health outcomes. (Essential 7)
10. Develop, implement, and evaluate programs and advanced practice interventions to improve health, access patterns, and gaps in care of individuals, aggregates, or populations. (Essential 8)
