

# TEACHING AND LEARNING IN HEALTHCARE PROFESSIONS, GRADUATE/ PROFESSIONAL CERTIFICATE

## LEARNING OUTCOMES

### LEARNING OUTCOMES

1. Demonstrate the ability to design, analyze, and evaluate curricula by applying foundational knowledge of curriculum development processes, components, and frameworks within healthcare professions education.
2. Assess and integrate current trends, professional and societal issues, and evidence-based practices into curriculum design and delivery to ensure relevance and impact in healthcare education.
3. Compare and contrast traditional and innovative program structures at undergraduate and graduate levels, analyzing their implications for healthcare practice and educational outcomes.
4. Apply selected teaching and learning theories, utilizing active learning strategies, interprofessional education, and educational technologies to foster student engagement and success in diverse student populations.
5. Construct and implement plans for assessing individual and aggregate student learning outcomes, ensuring alignment with program objectives and fostering continuous improvement.
6. Create inclusive learning environments that address diverse student needs, promote equity, and foster a supportive atmosphere.
7. Engage in ongoing professional development by leveraging feedback, reflective practices, current research, and best practices to enhance teaching effectiveness and educational leadership.
