LEARNING OUTCOMES

1. Engage critically with the scholarship and theory of landscape architecture.

2. Demonstrate advanced critical thinking and the ability to explore ideas in depth and synthesize information with a high degree of competence.

3. Demonstrate an advanced understanding of landscape spaces, functions, and dynamics, as well as interactions between people and the built and natural environment.

4. Demonstrate a deep understanding of and the ability to critically evaluate the principles, theories, technical skills and recent research findings specific to at least one of the program’s focus areas: Restoration Ecology and Ecological Design; and Community-Focused Design.

5. Design and conduct original research, and communicate the results to scholars as well as to practitioners engaged in landscape decision-making and stewardship.

6. Describe and apply principles of ethical and professional conduct.
