LANDSCAPE ARCHITECTURE, M.S.

LEARNING OUTCOMES

1. Engage critically with the scholarship and theory of landscape architecture.

2. Demonstrate advanced critical thinking and the ability to explore ideas in depth and synthesize information with a high degree of competence.

3. Demonstrate an advanced understanding of landscape spaces, functions, and dynamics, as well as interactions between people and the built and natural environment.

4. Demonstrate a deep understanding of and the ability to critically evaluate the principles, theories, technical skills and recent research findings specific to at least one of the program’s focus areas: Restoration Ecology and Ecological Design; and Community-Focused Design.

5. Design and conduct original research, and communicate the results to scholars as well as to practitioners engaged in landscape decision-making and stewardship.

6. Describe and apply principles of ethical and professional conduct.
