Mode of Instruction Definitions

**Accelerated:** Accelerated programs are offered at a fast pace that condenses the time to completion. Students typically take enough credits aimed at completing the program in a year or two.

**Evening/Weekend:** Courses meet on the UW–Madison campus only in evenings and/or on weekends to accommodate typical business schedules. Students have the advantages of face-to-face courses with the flexibility to keep work and other life commitments.

**Face-to-Face:** Courses typically meet during weekdays on the UW-Madison Campus.

**Hybrid:** These programs combine face-to-face and online learning formats. Contact the program for more specific information.

**Online:** These programs are offered 100% online. Some programs may require an on-campus orientation or residency experience, but the courses will be facilitated in an online format.

**Minimum Residence**

| Requirement | 32 credits |

**Graduate Coursework**

| Requirement | 26 credits must be graduate-level coursework. Details can be found in the Graduate School’s Minimum Graduate Coursework (50%) policy (https://policy.wisc.edu/library/UW-1244/). |

REQUIRED COURSES

Choose your coursework in consultation with your major professor. The Graduate School requires a minimum of 32 total credits prior to taking the CBMS prelim B and 51 credits to graduate (any combination of didactic or lab courses, seminars and research).

- 20 didactic credits.
- PhD students must register for four semesters of PATH-BIO 930 Advanced Seminar and present twice after the first two semesters. One presentation must be completed prior to passing to dissertator status. The second presentation may take place after reaching dissertator status, but no later than the semester prior to the student’s
dissertation defense. PhD students will take the course P/S/U (Progress/Satisfactory/Unsatisfactory) unless they are presenting.

- 27 Research 990 credits (minimum, unless you take more didactic or laboratory courses).

Approved and Recommended Courses

The following is a list of core courses taken by many students and recommended courses that are appropriate to specific research areas. These courses are suggestions only; the student and their committee ultimately decide the best coursework plan for each student’s specific program, with final approval from the program’s academic committee. Students are responsible for determining that the coursework chosen meets the Graduate School’s criteria for graduate work.
