

IMPLEMENTATION SCIENCE AND COMMUNITY HEALTH OUTCOMES, CAPSTONE CERTIFICATE

People who are interested in solving problems in community health, health services, or health policy, may want to supplement their training with the Capstone Certificate in Implementation Science and Community Health Outcomes.

Current research investments reflect an emphasis on research that looks for ways to translate what has been learned in controlled settings into positive outcomes in clinical practice and community health. This research requires the ability to:

- consider multiple factors that interact to influence a community or organization;
- form and manage research partnerships with communities and organizations;
- evaluate whether a health intervention or prevention method works or will be used; and
- articulate policy implications of health issues and interventions.

The Capstone Certificate in Implementation Science and Community Health Outcomes focuses on the development of these skills.

Depending on a student's course load, requirements can be completed in two to three years. The certificate requirements are flexible in that you may propose qualifying courses to be considered as elective credit. All courses are face-to-face and taught on the UW–Madison campus during weekdays.

Further detail, including tuition and costs, is available at the Clinical & Community Outcomes Research website (https://ictr.wisc.edu/certificate-research-programs/?_ga=1.132168526.1391686154.1484336426) or by contacting the institute which hosts the program:
