

PHYSICS THEMATIC TRACK

The Department of Physics invites international students to take courses within their department through the VISP thematic track in Physics (<https://visp.wisc.edu/thematic-physics/>).

Physics courses beyond the introductory level do not necessarily have explicit prerequisites in mathematics but are mathematical and quantitative in nature. VISP students interested in taking intermediate and advanced physics courses as part of this VISP thematic track program should have completed, or are in the process of completing intermediate math classes.

Available for fall and spring semesters and during the summer term. Most physics courses are offered during both the fall and spring semesters. Summer term courses are available at the introductory level.
