Students in the joint Ph.D. program are assigned a home degree program and follow the regulations of that program with regard to seminar requirements, language requirements, financial aid, and regulations for satisfactory progress. Since the joint Ph.D. meets the doctoral minor requirement of the Graduate School, no formal minor is required of students receiving a joint Ph.D. However, students who wish to have a minor field recorded on the transcript may complete a regular Option A or Option B minor.

The joint Ph.D. student's work is supervised by a committee consisting of three faculty members (two from the home degree program). The preliminary examinations test the student's competence in both history and history of science, medicine, and technology, balancing the material and fields between the two departments (e.g., two in each, or three in one and two in the other). The number of prelim fields must equal the number required of students majoring exclusively in history or in

history of science, medicine, and technology, plus one. Preparation of the Ph.D. dissertation is guided by the student's supervising committee. Satisfactory completion and defense of the dissertation constitute the final requirements for the joint Ph.D. degree.

## FUNDING

Prospective students should see the program website (<https://histsci.wisc.edu/grads/funding.shtml>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of the required coursework must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Total credits transferred for the Ph.D. requirements, including those approved for the M.A., may not exceed 19 credits. No credits earned more than ten years before admission to the Ph.D. program may be used. A maximum of 5 credits earned between five and ten years before admission to the Ph.D. program may be used. No credits carrying a grade below B may be applied toward graduate credit requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements. No credits carrying a grade below B are transferable.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

### TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

For admission to graduate study, a high-quality undergraduate record is more important than the particular program pursued. Graduate students have begun work in the History of Science with a wide variety of undergraduate majors ranging across the natural sciences, the social sciences, and the humanities, although some prior exposure to college-level study of history is desirable.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Regardless of whether or not an individual is awarded a master's degree in HSMT at the UW–Madison, the doctoral level learning goals are inclusive of the master's level learning goals.
- Articulates research problems clearly and understands the limits of current theories, knowledge, or practices within HSMT.
- Pushes the boundaries of current knowledge in HSMT in formulating research questions, in the selection or use of primary sources, or in interpreting evidence.
- Demonstrates breadth within their learning experiences.
- Communicates complex ideas in a clear and understandable manner.
- Gains appropriate experience relating to designing and teaching university-level courses.
- Is able to articulate the broader significance of their work and the discipline of HSMT to scholars in other fields or disciplines and to the wider public.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Hsia (chair), Broman, Keller, Lederer, Mitman, Nyhart, Schatzberg; Associate Professor Houck; Assistant Professors Gómez, Jackson, Nelson; Senior Lecturer Rider

## HISTORY, DOCTORAL MINOR

### REQUIREMENTS

Students in other departments who wish to pursue a minor in history must reach agreement (before beginning minor course work) on an appropriate program of study with a history faculty member, who serves as the minor advisor. The program must include at least 9 credits of graduate-level work. Students are encouraged to take at least six credits of work in graduate seminars. See the *History Graduate Handbook* (<http://history.wisc.edu/graduate/graduatehandbook.pdf>) or contact the graduate coordinator for details.

## PEOPLE

**Faculty:** Professors Sweet (chair), Bernault, Boswell, Chamberlain, Cohen, Cronon, Desan, Dunlavy, Enstad, Hansen, Hirsch, Johnson,

Jones, Kantrowitz, Kleijwegt, Koshar, Mallon, McCoy, McDonald, Michels, Mitman, Neville, Plummer, Reese, Roberts, Scarano, Sharpless, Sommerville, Stern, Sweet, Wandel, Winichakul, Wink, Young; Associate Professors Cheng, Dennis, Enke, Hall, Kodesh, Ratner-Rosenhagen, Shoemaker, Thal; Assistant Professors Bitzan, Callaci, Chamedes, Chan, Ciancia, Dinces, Haynes, Hennessy, Ipsen, Kim, Kinzley, Lapina, Murthy, Taylor, Ussishkin, Whiting

## HISTORY, M.A.

The Department of History offers the master of arts and doctor of philosophy degrees as well as minor work for doctoral students in other fields. The program is designed to meet the needs of the Ph.D. candidate; most students earn the master's degree en route to the Ph.D. The department only occasionally accepts a student for terminal master's work.

The department trains resourceful researchers, committed teachers, and engaged public intellectuals. We offer a rigorous course of study that combines independent and collaborative work and that emphasizes scholarly and intellectual connectedness. The department strongly supports the Wisconsin Idea, the principle that education should influence and improve people's lives beyond the university classroom. For more than 100 years, this idea has guided the university's work. Students pursue a variety of careers, both inside and outside the academy.

Graduate students in the Department of History specialize in one of the following subfields or study programs, each of which sets its own programmatic requirements, consistent with Graduate School policies and subject to the approval of the department as a whole: African history; Central Asian history; East Asian history; European history; Latin American and Caribbean history; Middle Eastern history; South Asian history; Southeast Asian history; and United States history. See also Program in Gender and Women's History below. For details on the M.A. and Ph.D. requirements of the study programs, see the *History Graduate Handbook* or contact the graduate coordinator. For information about the faculty's areas of geographic and thematic specialization, see the department's faculty specialty page ([http://history.wisc.edu/faculty\\_specialty.htm](http://history.wisc.edu/faculty_specialty.htm)).

The department offers multiyear support packages to all incoming graduate students. Support begins with a fellowship in the first year and includes additional years of comparable support (teaching assistantships, project assistantships, and internal or external fellowships), provided the student makes satisfactory progress and performs well as a graduate assistant. Contact the graduate coordinator for details.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

30 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

16 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

Half of the degree coursework (15 credits out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

With program approval, students are allowed to count up to 6 credits of graduate coursework from other institutions.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

With program approval, students are allowed to count up to 7 credits of UW–Madison undergraduate coursework.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

With program approval, students are allowed to count coursework numbered 300 or above taken as a UW–Madison University Special student, up to a maximum of 15 credits.

**CREDITS PER TERM ALLOWED**

15 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Contact the program for information on any additional required courses.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended

from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**ASSESSMENT AND EXAMINATIONS**

Contact the program for information on required assessments and examinations.

**TIME CONSTRAINTS**

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**LANGUAGE REQUIREMENTS**

Contact the program for information on any language requirements.

**ADMISSIONS**

The department requires an applicant to have a bachelor's degree from an accredited institution, with a minimum overall grade point average of 3.0 (on a 4.0 scale), and a minimum 3.0 grade point average in history courses taken as an undergraduate (although successful applicants generally have far higher GPAs). The department occasionally admits superior students who have not had the equivalent of a history major. The department requires the Graduate Record Exam. The GRE must have been taken during the five years preceding application to the graduate program. Those taking the GRE need take only the general aptitude portion of the exam.

Applicants must also submit official transcripts from all colleges attended, three letters of recommendation, the selection of study sheet, and a statement of purpose (personal statement). All fields require a writing sample. International students must submit Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Michigan English Language Assessment Battery (MELAB) scores if English is not the language of the country of the student's permanent residence. Upon admission, they must also take the SPEAK test, the institutional version of the Test for Spoken English, in order to hold the teaching assistantships that constitute an element of multiyear support packages.

Each applicant is judged on the basis of previous academic record, letters of recommendation (especially those provided by historians or scholars in related fields), the personal statement, the writing sample, and other criteria including GRE scores.

Admission is highly competitive. The deadline for application is December 1. Although the department may review exceptional applications arriving after that date, most slots are filled in the review that occurs in January.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates and critiques the theories, research methods, and approaches to historical inquiry in the student's primary field of study.
- Demonstrates understanding of the primary field of study in a historical and global context.
- Is able to identify and make appropriate use of relevant historical sources.
- Demonstrates the ability to evaluate and synthesize large bodies of scholarship or evidence.
- Is able to construct a significant and persuasive historical argument that makes an original contribution to historical knowledge.
- Communicates complex ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Recognizes and applies established principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Sweet (chair), Bernault, Boswell, Chamberlain, Cohen, Cronon, Desan, Dunlavy, Enstad, Hansen, Hirsch, Johnson, Jones, Kantrowitz, Kleijwegt, Koshar, Mallon, McCoy, McDonald, Michels, Mitman, Neville, Plummer, Reese, Roberts, Scarano, Sharpless, Sommerville, Stern, Sweet, Wandel, Winichakul, Wink, Young; Associate Professors Cheng, Dennis, Enke, Hall, Kodesh, Ratner-Rosenghagen, Shoemaker, Thal; Assistant Professors Bitzan, Callaci, Chamedes, Chan, Ciancia, Dinces, Haynes, Hennessy, Ipsen, Kim, Kinzley, Lapina, Murthy, Taylor, Ussishkin, Whiting

## HISTORY, PH.D.

The Department of History offers the master of arts and doctor of philosophy degrees as well as minor work for doctoral students in other fields. The program is designed to meet the needs of the Ph.D. candidate; most students earn the master's degree en route to the Ph.D. The department only occasionally accepts a student for terminal master's work.

The department trains resourceful researchers, committed teachers, and engaged public intellectuals. We offer a rigorous course of study that combines independent and collaborative work and that emphasizes scholarly and intellectual connectedness. The department strongly supports the Wisconsin Idea, the principle that education should influence and improve people's lives beyond the university classroom. For more than 100 years, this idea has guided the university's work. Students pursue a variety of careers, both inside and outside the academy.

Graduate students in the Department of History specialize in one of the following subfields or study programs, each of which sets its own programmatic requirements, consistent with Graduate School policies and subject to the approval of the department as a whole: African history; Central Asian history; East Asian history; European history; Latin American and Caribbean history; Middle Eastern history; South Asian history; Southeast Asian history; and United States history. See also Program in Gender and Women's History below. For details on the

M.A. and Ph.D. requirements of the study programs, see the *History Graduate Handbook* or contact the graduate coordinator. For information about the faculty's areas of geographic and thematic specialization, see the department's faculty specialty page ([http://history.wisc.edu/faculty\\_specialty.htm](http://history.wisc.edu/faculty_specialty.htm)).

The department offers multiyear support packages to all incoming graduate students. Support begins with a fellowship in the first year and includes additional years of comparable support (teaching assistantships, project assistantships, and internal or external fellowships), provided the student makes satisfactory progress and performs well as a graduate assistant. Contact the graduate coordinator for details.

### OTHER DEGREE OPTIONS

#### Bridge Program with Afro-American Studies

This is an academic partnership designed to allow students to complete the M.A. in Afro-American studies and the Ph.D. in history. It enables the Afro-American studies student who specializes in the history area to meet the basic requirements of the history M.A. while completing a degree in Afro-American studies. Students may apply simultaneously to the two departments or may apply to the Department of History after they begin their program in Afro-American studies, usually in the fall of the first or second M.A. year. For details, contact the graduate coordinator.

#### Joint Ph.D. in History and History of Science

Students who wish to obtain a joint Ph.D. in history and history of science, medicine, and technology are initially admitted to one of the departments, and should indicate interest in the joint Ph.D. program at that time. After completion of a master's degree in history or history of science, medicine, and technology (or an approved alternative), the student applies for admission to the other department and, at the same time, to a standing committee of the two departments for admission to the joint program. Having been admitted to the other department and to the joint program, the student then applies to the Graduate School for approval of the joint Ph.D. (See the Graduate School's academic policy regarding joint degrees (<http://grad.wisc.edu/acadpolicy>) for more information and deadlines.) The student's application to the standing committee should take the same form as required by the Graduate School and should be prepared in close consultation with department faculty/staff.

Students in the joint Ph.D. program are assigned a home department and follow the regulations of that department with regard to seminar requirements, language requirements, financial aid, and regulations for satisfactory progress. Since the joint Ph.D. meets the doctoral minor requirement of the Graduate School, no formal minor is required of students receiving a joint Ph.D. However, students who wish to have a minor field recorded on the transcript may complete a regular Option A or Option B minor, or the internal minor of the department.

The joint Ph.D. student's work is supervised by a committee consisting of three faculty members (two from the home department). The preliminary examinations test the student's competence in both history and history of science, medicine, and technology, balancing the material and fields between the two departments (e.g. two in each, or three in one and two in the other). The number of prelim fields must equal the number required of students majoring exclusively in history or in history of science, medicine, and technology, plus one. Preparation of the Ph.D. dissertation is guided by the student's supervising committee. Satisfactory completion and defense of the dissertation constitute the final requirements for the joint Ph.D. degree.

**Individual Joint Ph.D.**

Students in other departments who wish to pursue a joint Ph.D. (one degree, two majors) with history must first be admitted to the history department. The proposal for the degree must be approved by the department's Graduate Council before it is submitted to the Graduate School. Students admitted to a joint Ph.D. will satisfy all the normal requirements of their field in history except the minor requirement.

**Concentration in the History of Gender and Women**

The concentration in gender and women's history offers training with a specific geographic area of specialization while also providing opportunities for students to explore their research interests in gender and women's history in a global perspective.

Students may enter this concentration through any of the department's study programs. Students who wish to be considered for the concentration in gender and women's history should indicate this on their Graduate School application.

Students in the concentration of gender and women will generally choose courses within and meet all the requirements of their geographic areas of specialization, while also meeting some additional requirements for the women's/gender history concentration and working under the supervision of a scholar active in the field of gender and women's history within their geographic area. All students in the concentration will take a team-taught core seminar on the comparative and transnational history of women and gender.

**FUNDING**

Prospective students should see the program website ([http://history.wisc.edu/graduate\\_fundingoffered.htm](http://history.wisc.edu/graduate_fundingoffered.htm)) for funding information.

**REQUIREMENTS****MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS**

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

**DOCTORAL DEGREES**

Ph.D.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

51 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

32 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

Half of the degree coursework (26 credits out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

With program approval, students are allowed to count up to 12 credits of graduate coursework from other institutions.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

With program approval, students are allowed to count up to 7 credits of UW–Madison undergraduate coursework.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

With program approval, students are allowed to count coursework numbered 300 or above taken as a UW–Madison University Special student, up to a maximum of 15 credits.

**CREDITS PER TERM ALLOWED**

Non-dissertator students: 15 credits

Dissertators: 3 credits related to their dissertations

**PROGRAM-SPECIFIC COURSES REQUIRED**

Contact the program for information on any additional required courses.

**DOCTORAL MINOR/BREADTH REQUIREMENTS**

Doctoral students must complete a doctoral minor.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

The department requires an applicant to have a bachelor's degree from an accredited institution, with a minimum overall grade point average of 3.0 (on a 4.0 scale), and a minimum 3.0 grade point average in history courses taken as an undergraduate (although successful applicants generally have far higher GPAs). The department occasionally admits superior students who have not had the equivalent of a history major. The department requires the Graduate Record Exam. The GRE must have been taken during the five years preceding application to the graduate program. Those taking the GRE need take only the general aptitude portion of the exam.

Applicants must also submit official transcripts from all colleges attended, three letters of recommendation, the selection of study sheet, and a statement of purpose (personal statement). All fields require a writing sample. International students must submit Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or Michigan English Language Assessment Battery (MELAB) scores if English is not the language of the country of the student's permanent residence. Upon admission, they must also take the SPEAK test, the institutional version of the Test for Spoken English, in order to hold the teaching assistantships that constitute an element of multiyear support packages.

Each applicant is judged on the basis of previous academic record, letters of recommendation (especially those provided by historians or scholars in related fields), the personal statement, the writing sample, and other criteria including GRE scores.

Admission is highly competitive. The deadline for application is December 1. Although the department may review exceptional applications arriving after that date, most slots are filled in the review that occurs in January.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- By the end of their degree work, students receiving a doctoral degree in the history department are expected to achieve the learning goals specified for the master's degree as well as the following learning goals.
- Articulates research problems clearly and understands the limits of current theories, knowledge, or practices in the discipline of history.
- Pushes the boundaries of current historical knowledge in formulating research questions, in the selection or use of primary sources, or in interpreting evidence.
- Demonstrates breadth of historical and cultural knowledge.
- Is able to articulate the broader significance of their work to scholars in other fields or disciplines and to the broader public.
- Is able to design and teach courses at the undergraduate or graduate level.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Sweet (chair), Bernault, Boswell, Chamberlain, Cohen, Cronon, Desan, Dunlavy, Enstad, Hansen, Hirsch, Johnson, Jones, Kantrowitz, Kleijwegt, Koshar, Mallon, McCoy, McDonald, Michels, Mitman, Neville, Plummer, Reese, Roberts, Scarano, Sharpless, Sommerville, Stern, Sweet, Wandel, Winichakul, Wink, Young; Associate Professors Cheng, Dennis, Enke, Hall, Kodesh, Ratner-Rosenhagen, Shoemaker, Thal; Assistant Professors Bitzan, Callaci, Chamedes, Chan, Ciancia, Dinces, Haynes, Hennessy, Ipsen, Kim, Kinzley, Lapina, Murthy, Taylor, Ussishkin, Whiting

## HISTORY OF MEDICINE

**Administrative Unit:** Medical History and Bioethics

**College/School:** School of Medicine and Public Health

**Minors and Certificates:** Doctoral Minor

The department offers graduate instruction in the history of European, American and non-Western medicine and public health. M.A. and Ph.D. degrees are awarded in conjunction with the history of science department. In addition, a doctoral minor in the history of medicine is available. Information on the major program History of Science, Medicine, and Technology can be found under the heading History (p. 366) in this Guide. A departmental program in medical ethics offers interdisciplinary courses in bioethics, philosophy, and law.

The department welcomes graduate students from a variety of backgrounds in the sciences and humanities and allows students flexibility in meeting their academic needs.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- History of Medicine, Doctoral Minor (p. 376)

## PEOPLE

**Faculty:** Professors Lederer (chair), Broman, Charo, Hausman, Hogle, Keller, Mitman, Ossorio; Associate Professors Houck, Kelleher, Streiffer, Wendland; Assistant Professors DeLancey, Gomez

## HISTORY OF MEDICINE, DOCTORAL MINOR

### REQUIREMENTS

Requirements for a minor in history of medicine are a minimum of 10 credits in MED HIST courses, including at least one 900-level seminar.

### ADMISSIONS

Please contact the chair, Susan Lederer, for additional information (selederer@wisc.edu).

## PEOPLE

**Faculty:** Professors Lederer (chair), Broman, Charo, Hausman, Hogle, Keller, Mitman, Ossorio; Associate Professors Houck, Kelleher, Streiffer, Wendland; Assistant Professors DeLancey, Gomez

## HORTICULTURE

**Administrative Unit:** Horticulture

**College/School:** College of Agricultural and Life Sciences

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The department provides graduate training leading to the master of science and the doctor of philosophy in horticulture. Specializations are available in several aspects of crop science: organic and sustainable horticulture, diversified crop production for urban and regional food systems, environmental impact of horticultural practices, environmental regulation of plant growth and development, plant breeding, cytogenetics, biochemistry and molecular biology of horticultural plants, microculture and biotechnology, weed control and herbicide physiology, and biostatistics. Students have the opportunity to develop their research projects using vegetables, fruits, trees, ornamentals, turf, specialty crops, or model species such as *Arabidopsis thaliana*.

The department houses research labs, controlled environment chambers, and greenhouse facilities. Field-plot areas with associated storage and laboratory facilities are available at the UW–Madison Arboretum, Horticulture Research Farm at Arlington, and the Agriculture Research

Stations managed by the College of Agricultural and Life Sciences at selected locations throughout the state. In conjunction with the farm at Sturgeon Bay, the world's largest collection of tuber-bearing Solanums is maintained by the Inter-Regional Potato Introduction Project and is available for research use.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Horticulture, Doctoral Minor (p. 376)
- Horticulture, M.S. (p. 376)
- Horticulture, Ph.D. (p. 378)

## PEOPLE

**Faculty:** Professors Goldman (chair), Bamberg, Colquhoun, Havey, Jiang, Krysan, Nienhuis, Palta, Patterson, Simon, Spooner, Yandell; Associate Professors Bethke, Jansky, Jull, Weng; Assistant Professors Atucha, Dawson, Endelman, Zalapa

## HORTICULTURE, DOCTORAL MINOR

### REQUIREMENTS

Doctoral students in other departments who wish to receive a minor in horticulture must complete a minimum of 10 graduate credits in horticulture, including 2 credits of HORT 910 Seminar. Interested students should contact the department for more information.

## PEOPLE

**Faculty:** Professors Goldman (chair), Bamberg, Colquhoun, Havey, Jiang, Krysan, Nienhuis, Palta, Patterson, Simon, Spooner, Yandell; Associate Professors Bethke, Jansky, Jull, Weng; Assistant Professors Atucha, Dawson, Endelman, Zalapa

## HORTICULTURE, M.S.

The department provides graduate training leading to the master of science and the doctor of philosophy in horticulture. Specializations are available in several aspects of crop science: organic and sustainable horticulture, diversified crop production for urban and regional food systems, environmental impact of horticultural practices, environmental regulation of plant growth and development, plant breeding, cytogenetics, biochemistry and molecular biology of horticultural plants, microculture and biotechnology, weed control and herbicide physiology, and biostatistics. Students have the opportunity to develop their research projects using vegetables, fruits, trees, ornamentals, turf, specialty crops, or model species such as *Arabidopsis thaliana*.

The department houses research labs, controlled environment chambers, and greenhouse facilities. Field-plot areas with associated storage and laboratory facilities are available at the UW–Madison Arboretum, Horticulture Research Farm at Arlington, and the Agriculture Research Stations managed by the College of Agricultural and Life Sciences at selected locations throughout the state. In conjunction with the farm at

Sturgeon Bay, the world's largest collection of tuber-bearing Solanums is maintained by the Inter-Regional Potato Introduction Project and is available for research use.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

18 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Allowed; coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Students are allowed to count no more than 7 credits numbered 300 or above toward the minimum graduate degree credit requirement; if those courses are numbered 700 or above they may count toward the minimum graduate coursework requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

The department accepts applications for fall, spring, and summer entry.

The applicant's academic preparation should include fundamental courses in the plant sciences such as botany, bacteriology, genetics, and physiology, as well as courses in chemistry (general, organic, quantitative), physics, mathematics, and biochemistry. The academic average should be at least 3.0 (on a 4.0 scale) with evidence of proficiency in subjects related to agriculture and plant sciences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates the theories, research methods, and approaches to inquiry used in the field of horticulture.
- Identifies sources and assembles evidence pertaining to questions in the field of horticulture.
- Understands the primary field of horticulture in a global context.
- Selects and utilizes the most appropriate methodologies and practices.
- Synthesizes information pertaining to questions or challenges in the field of horticulture.
- Communicates clearly in ways appropriate to the field of horticulture.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical conduct.

## PEOPLE

**Faculty:** Professors Goldman (chair), Bamberg, Colquhoun, Havey, Jiang, Krysan, Nienhuis, Palta, Patterson, Simon, Spooner, Yandell; Associate Professors Bethke, Jansky, Jull, Weng; Assistant Professors Atucha, Dawson, Endelman, Zalapa

## HORTICULTURE, PH.D.

The department provides graduate training leading to the master of science and the doctor of philosophy in horticulture. Specializations are available in several aspects of crop science: organic and sustainable horticulture, diversified crop production for urban and regional food systems, environmental impact of horticultural practices, environmental regulation of plant growth and development, plant breeding, cytogenetics, biochemistry and molecular biology of horticultural plants, microculture and biotechnology, weed control and herbicide physiology, and biostatistics. Students have the opportunity to develop their research projects using vegetables, fruits, trees, ornamentals, turf, specialty crops, or model species such as *Arabidopsis thaliana*.

The department houses research labs, controlled environment chambers, and greenhouse facilities. Field-plot areas with associated storage and laboratory facilities are available at the UW–Madison Arboretum, Horticulture Research Farm at Arlington, and the Agriculture Research Stations managed by the College of Agricultural and Life Sciences at selected locations throughout the state. In conjunction with the farm at Sturgeon Bay, the world's largest collection of tuber-bearing Solanums is maintained by the Inter-Regional Potato Introduction Project and is available for research use.

## FUNDING

Prospective students should see the program website (<http://horticulture.wisc.edu/academics/graduate-program-2/funding>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 credits out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Allowed; coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Students are allowed to count no more than 7 credits numbered 300 or above toward the minimum graduate degree credit requirement; if those courses are numbered 700 or above they may count toward the minimum graduate coursework requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

The department accepts applications for fall, spring, and summer entry.

The applicant's academic preparation should include fundamental courses in the plant sciences such as botany, bacteriology, genetics, and physiology, as well as courses in chemistry (general, organic, quantitative), physics, mathematics, and biochemistry. The academic

average should be at least 3.0 (on a 4.0 scale) with evidence of proficiency in subjects related to agriculture and plant sciences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates challenges, frontiers and limits with respect to knowledge within the field of horticulture.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of horticulture.
- Creates research that makes a substantive contribution to the field of horticulture.
- Demonstrates breadth within their learning experiences.
- Communicates complex or ambiguous ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Fosters ethical conduct and professional guidelines.

## PEOPLE

**Faculty:** Professors Goldman (chair), Bamberg, Colquhoun, Havey, Jiang, Krysan, Nienhuis, Palta, Patterson, Simon, Spooner, Yandell; Associate Professors Bethke, Jansky, Jull, Weng; Assistant Professors Atucha, Dawson, Endelman, Zalapa

## HUMAN DEVELOPMENT AND FAMILY STUDIES

### DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL

- Human Development and Family Studies, Doctoral Minor (p. 379)

## HUMAN DEVELOPMENT AND FAMILY STUDIES, DOCTORAL MINOR

Any student enrolled in a UW–Madison doctoral program can pursue a doctoral minor in human development and family studies. The graduate program in HDFs, located within the School of Human Ecology, offers courses on individual and family development throughout the lifespan and across ecological settings. These courses focus on a range of topics, including risk and resilience throughout the life span, competent child rearing, positive development, poverty and the family, mindfulness and contemplative practices for child and family well-being, development in multicultural contexts, policy, adult development and relationships, adolescence, and aging and the family. Courses that address the applications of research to practice are also part of the curriculum. Recent offerings include courses in prevention science, family policy, evidence-based intervention, and bridging the gap between research and practice. Reflecting the multidisciplinary orientation of the program, faculty and students employ a wide array of methods in their work. Faculty possess expertise in areas as diverse as longitudinal

modeling, community-based research, interpretive interviewing, program evaluation, observational methods, survey methodology, action research, and ethnography. The program explicitly values both qualitative and quantitative methods. For more information, see this link (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/hdfs-graduate-program>).

## REQUIREMENTS

(Must comply with Graduate School Policy for Option A Minors.) The HDFS doctoral minor requires at least 9 credits of HDFS coursework, with no more than 3 credits below the 700 level. HDFS courses that are cross-listed with another department should be taken as an HDFS course. Students must receive a grade of B or better in each course.

## ADMISSIONS

Graduate students interested in pursuing an Option A doctoral minor should complete the minor agreement form available on the HDFS website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/hdfs-graduate-program/forms-and-documents>) and consult with the chair of the graduate program, who will help them identify an HDFS faculty member to serve as their faculty advisor.

## HUMAN ECOLOGY—SCHOOL-WIDE

**Administrative Unit:** School of Human Ecology

**College/School:** School of Human Ecology

**Admitting Plans:** MFA, M.S., Ph.D.

**Degrees Offered:** MFA, M.S., Ph.D.

**Minors and Certificates:** Doctoral Minors in Human Development and Family Studies, and in Human Ecology

**Named Options:** Civil Society and Community Research (Ph.D.); Consumer Behavior and Family Economics (M.S./Ph.D.); Design Studies (M.S./Ph.D./MFA); Human Development and Family Studies (M.S./Ph.D.);

Human ecology is the study of the complex relationships between human beings and their environments. The school offers advanced degrees with four program specializations: civil society and community research, consumer behavior and family economics, design studies, and human development and family studies. Each program option has its own faculty, curriculum, and requirements. Prospective graduate students apply for the human ecology degree, the umbrella degree under which the degree options are offered. Inquiries should be made to the individual department offering the desired program specialization.

All of the school's graduate programs provide opportunities for interdisciplinary, advanced course work with an intensive research or creative discovery experience. Faculty and students are also involved with institutes and centers administered in the School of Human Ecology and across the campus such as the Arts Institute, Center for Child and Family Well-Being, the Center for Financial Security, the Institute on Aging, the Kohl's Center for Retailing Excellence, the Nelson Institute for Environmental Studies, the Center for Non-Profits, the Institute for Research on Poverty, and the Waisman Center. With access to courses and resources in and beyond the School of Human Ecology, graduate students in human ecology's program options gain the skills and specialized expertise that will be required to be successful scholars,

artists/designers, and workers in academic, service, government, and business settings worldwide.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Human Ecology, Doctoral Minor (p. 380)
- Human Ecology, M.S. (p. 381)
- Human Ecology, MFA (p. 384)
- Human Ecology, Ph.D. (p. 387)

## PEOPLE

**Faculty:** *Civil Society and Community Studies:* Professors Jasper (chair), Flanagan, Morales, Zeldin; Associate Professors Bakken, Christens; Assistant Professors Gaddis, Horowitz, Sarmiento, Sparks  
*Consumer Behavior and Family Economics:* Professors Wong (chair), Bartfeld, Zepeda; Associate Professor Collins; Assistant Professors Addo, Warmath

*Design Studies:* Professors Rengel (chair), Angus, Dong, Sarmadi, Nelson; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto

*Human Development and Family Studies:* Professors Dilworth-Bart (chair), Bogenschneider, Raison, Poehlmann-Tynan, Roberts, Small; Associate Professors Duncan, Hartley, Nix, Papp; Assistant Professors Halpern-Meekin, Kirkorian, Litzelman

## HUMAN ECOLOGY, DOCTORAL MINOR

Any student enrolled in a UW–Madison doctoral program can pursue a doctoral minor in human ecology. The graduate program within the School of Human Ecology (SoHE) provides rich interdisciplinary training and scholarship focused on exploring the human condition and well-being in relation to ecological settings—physical, social, community, and built surroundings. The school's philosophy is that individual development and well-being are promoted through interactions with ecological settings. Research, creativity, teaching, and outreach are directed toward a positive impact on these settings and the patterns of human behavior within them. Faculty members possess expertise in areas as diverse as longitudinal modeling, community-based research, interpretive interviewing, program evaluation, observational methods, survey methodology, action research, and ethnography.

## REQUIREMENTS

The human ecology doctoral minor requires at least 9 credits taken through a combination of coursework in at least two different School of Human Ecology departments: Civil Society and Community Studies (CSCS); Consumer Science (CNSR SCI), Design Studies (DS), Human Development and Family Studies (HDFS), and Interdisciplinary–Human Ecology (INTER-HE). No more than 3 credits can be taken below the 700 level. Human Ecology courses that are cross-listed with another department should be enrolled in through the respective Human Ecology department. Students must receive a grade of B or better in each course.

## ADMISSIONS

Graduate students interested in pursuing an Option A doctoral minor should complete the attached minor agreement form and consult with the chair of the Graduate Program in Human Ecology who will help them identify a SoHE faculty member to serve as their faculty advisor.

## PEOPLE

**Faculty:** *Civil Society and Community Studies:* Professors Jasper (chair), Flanagan, Morales, Zeldin; Associate Professors Bakken, Christens; Assistant Professors Gaddis, Horowitz, Sarmiento, Sparks  
*Consumer Behavior and Family Economics:* Professors Wong (chair), Bartfeld, Zepeda; Associate Professor Collins; Assistant Professors Addo, Warmath  
*Design Studies:* Professors Rengel (chair), Angus, Dong, Sarmadi, Nelson; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto  
*Human Development and Family Studies:* Professors Dilworth-Bart (chair), Bogenschneider, Raison, Poehlmann-Tynan, Roberts, Small; Associate Professors Duncan, Hartley, Nix, Papp; Assistant Professors Halpern-Meekin, Kirkorian, Litzelman

## HUMAN ECOLOGY, M.S.

Human ecology is the study of the complex relationships between human beings and their environments. The school offers advanced degrees with four program specializations: civil society and community research, consumer behavior and family economics, design studies, and human development and family studies. Each program option has its own faculty, curriculum, and requirements. Prospective graduate students apply for the human ecology degree, the umbrella degree under which the degree options are offered. Inquiries should be made to the individual department offering the desired program specialization.

All of the school's graduate programs provide opportunities for interdisciplinary, advanced course work with an intensive research or creative discovery experience. Faculty and students are also involved with institutes and centers administered in the School of Human Ecology and across the campus such as the Arts Institute, Center for Child and Family Well-Being, the Center for Financial Security, the Institute on Aging, the Kohl's Center for Retailing Excellence, the Nelson Institute for Environmental Studies, the Center for Non-Profits, the Institute for Research on Poverty, and the Waisman Center. With access to courses and resources in and beyond the School of Human Ecology, graduate students in human ecology's program options gain the skills and specialized expertise that will be required to be successful scholars, artists/designers, and workers in academic, service, government, and business settings worldwide.

## CONSUMER BEHAVIOR AND FAMILY ECONOMICS (CBFE)

The Department of Consumer Science develops and disseminates information on the ways in which the interactions among consumers, business, and government can enhance the interests and well-being of consumers, families, and communities. The program focuses on various dimensions of well-being including economic/financial security, consumer empowerment, health, food security, housing security,

sustainability, and the public policy that affects those dimensions of well-being. The program is interdisciplinary; current faculty have degrees in diverse fields including economics, marketing, sociology, retailing, social work, and consumer science. Some faculty have joint appointments with Cooperative Extension, providing students with opportunities for training in outreach and applied research.

Both Ph.D. and M.S. thesis students work closely with faculty members, often collaborating on research and outreach programs. M.S. students can pursue a non-thesis option (not eligible for financial aid) but must complete a research thesis if they intend to pursue a Ph.D. (eligible for financial aid). Ph.D. concentrations include both consumer behavior and family economics; however all Ph.D. students must complete core courses in consumer behavior, family economics, and research methods.

## DESIGN STUDIES (DS)

The Design Studies Graduate Program takes an integrated, interdisciplinary approach toward design and its relationship with human needs and environments, clothing, textiles, and other material objects. This perspective integrates aesthetic, cultural, historical, technical, and behavioral knowledge and methods. Students gain knowledge and insight through descriptive, analytical and creative activities.

The program's graduate faculty is comprised of interdisciplinary scholars, designers, scientists and artists who are equipped to mentor graduate students as they build individual programs of study based on personal goals and interests. Faculty and students use a variety of investigative methods, including qualitative and quantitative research methods as well as various kinds of creative scholarship. Specific approaches might include design visualization, simulation, humanistic and scientific analysis, interpretive interviewing and ethnographic research, post-occupancy evaluation, survey research, historical investigation, material culture, and cultural analysis, critical analysis, and studio or laboratory experimentation. While the backgrounds and scholarship areas of the faculty are diverse, the program is tied together by an interest in the relationship between people and their relationship to objects, culture and environments.

The program offers three degrees: an M.S., MFA, and Ph.D. On all degree levels, students specialize in a general area of design, as listed below. At the doctoral level, students focus on basic or applied research. At the M.S. level, students focus on research, applications of research, or studio performance. At the MFA level, students focus on studio work. All students work with an advisor and graduate committee to develop a focused course of study.

The Design Studies Graduate Program is especially appropriate for self-starting students who like the challenge of tailoring a graduate program to their needs and welcome the opportunity to draw from the excitement and resources of a large university, while still working closely with faculty mentors. The program may be less appropriate for those who are more comfortable with the structure of a predetermined course of study.

All students are encouraged to collaborate with other campus units, including departments such as art, art history, engineering, folklore, history, landscape architecture, theater and drama, and architecture (at UW-Milwaukee); groups or programs that link departments, such as area studies programs; interdisciplinary programs such as the Arts Institute or the Institute on Aging; or "clusters" such as those in material culture and visual culture. Within the school students have access to computer labs supporting design visualization, the Gallery of Design (<http://sohe.wisc.edu/what-we-do/design-gallery>), the Helen Louise Allen Textile Collection (<http://sohe.wisc.edu/what-we-do/helen-louise-allen-textile>

collection), and the Ruth Ketterer Harris Library (<https://sohe.wisc.edu/research-development/textile-collection/textile-resources-2/ruth-ketterer-harris-library>) of textile and design-related materials.

## SPECIALIZATIONS

The graduate program option in Design Studies department addresses diverse aspects of design inquiry, focusing on design as a complex inter-relationship between people and the built environment or people and textiles. There are three primary areas of emphasis:

**Studio-based design inquiry (MFA)** emphasizes discovering new insights, processes and relationships through the creative process. Faculty and graduate students who conduct studio based design inquiry work on either one of the following concentration areas or work across them.

- *Textile/clothing forms, art and design* is a studio-based approach that focuses on the conceptual, technical and aesthetic possibilities of textiles (an art approach is taken, rather than industry focus).
- *Interior environments* focuses on design as a complex interrelationship between people and the built environment. The studio-based option emphasizes discovering new insights, processes and relationships through the creative process.

**Research-based design inquiry** emphasizes discovering new insights and relationships through the application of theories and methods drawn from the social sciences, engineering, and humanities. Graduate students who are involved with research based design inquiry work within one of the following three concentration areas.

- *Design history and material culture* examines design in its historical context, as both a process and a product. The program defines design broadly to include architecture, interior design, industrial design, decorative arts, and other areas of material culture.
- *Environmental design research* addresses the interaction between people and their built, natural, and/or virtual environments with a clear goal to create environments that are sustainable and responsive to human needs. The faculty and graduates of the program have pioneered studies in environment behavior, evidence-based design, building evaluation, sustainability, aging and environment, children's environment, environments for special populations, and emerging technologies and applications of virtual reality.
- *Textile science* provides in-depth understanding of the physical and chemical properties of natural and synthetic fibers and their interaction with dyes, finishes and plasma.

**Integrated design inquiry (M.S., MFA, Ph.D.)** emphasizes a melding of both studio based and research based design inquiry; this incorporates a framework of evidence (or research) based design, combining studio based inquiry with research strategies such as action research or post occupancy evaluation.

## HUMAN DEVELOPMENT AND FAMILY STUDIES (HDFS)

Human development and family studies offers an interdisciplinary approach to the study of families and individuals across the lifespan with an emphasis on research and its application to practice, programs, and policy. Graduate study in this option leads to the M.S. or the Ph.D.

The HDFS graduate program option is served by 13 full-time faculty members plus affiliated faculty members. Faculty members are professionally active with strong records of national and international scholarship. The faculty bring the perspectives of many different

disciplines to their work, including psychology, human development and family student, sociology, education, and psychiatry. Faculty members conduct basic research to understand families and their members and applied research and outreach to promote positive outcomes in human development and family life.

Faculty and graduate students in HDFS collaborate on research and outreach-engagement projects in a wide variety of substantive areas focusing on the well-being of individuals, couples, and families. Current areas of scholarly activity include infant, early childhood, adolescent and adult development; risk, and resilience; intimate and family relationships; family/informal caregiving; health and well-being; health equity; developmental disabilities; educational television and media effects; school readiness and related intervention; cognitive development; incarceration effects on family well-being; family policy; contemplative practices and mindfulness; parenting; therapeutic potential of ancient practices; and translational science.

Reflecting the multidisciplinary orientation of the program, faculty and students employ a wide array of methods in their work. Faculty possess expertise in areas as diverse as multilevel, longitudinal, nonlinear, and dyadic modeling; physiological measurement; program evaluation; observational methods; experimental methods; survey methodology; and community-based research. The program explicitly values both qualitative and quantitative approaches to inquiry and encourages students to become proficient in both.

Central to the mission of the program is the creation, dissemination, and application of scientific knowledge to address real world problems and issues. Applied work of current faculty and students includes public policy education, community building, outreach education, and prevention programs. Because of the department's affiliation with the University of Wisconsin Cooperative Extension, numerous opportunities are available for involvement in applied settings throughout the state.

There is a demand for professionals trained in research, teaching, and outreach in the areas of human development and family studies in higher education, government, and human and family service programs. Regardless of whether HDFS graduates pursue careers in academic or applied settings, they are prepared for a life of scholarship and service.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available named options in Consumer Behavior and Family Economics, Design Studies, and Human Development and Family Studies

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count up to 9 credits of graduate coursework taken at other institutions or taken as a UW–Madison Special student. Prior coursework taken at other institutions may not be used to satisfy the minimum graduate residence credit requirement. Credits earned five or more years prior to admission to a master's degree are not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, up to 7 credits numbered 300 or above from a UW–Madison undergraduate degree are allowed to count toward degree credit; undergraduate courses must be numbered 700 or above to count toward the minimum graduate coursework requirement. No undergraduate coursework may count toward the graduate residence requirement.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count up to 9 credits of graduate coursework taken at other institutions or taken as a UW–Madison Special student. Coursework must be numbered 300 or above for residence and degree credit requirement and 700 or above for minimum graduate coursework (50%) requirement. Credits earned five or more years prior to admission to a master's degree are not allowed to satisfy requirements. Use of Special student credit may require payment of tuition difference.

## CREDITS PER TERM ALLOWED

12 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Applicants must apply online and pay the required application fee to the Graduate School. Applicants must meet all Graduate School requirements including a bachelor's degree from an accredited institution and an undergraduate GPA of 3.0 or higher (on a 4.0 scale). Each of the three program areas sets additional minimum requirements and requires additional application material. See each program option for admission requirements.

Applicants to any one of the School of Human Ecology degree program options should list "Human Ecology (code 549)" as the graduate major on their application. Their individual statement of purpose should clearly indicate the degree option to which they are applying.

## ADMISSION (CBFE)

In addition to the Graduate School requirements, applicants to the M.S. and Ph.D. degrees in consumer behavior and family economics must submit Graduate Record Exam (GRE) or Graduate Management Admission Test (GMAT) scores; three letters of recommendation, at least two of which should be from individuals familiar with the applicant's academic work and write about their reasons for and ability to complete graduate training; original transcripts from all post-high school institutions attended; and a statement of interest describing the reasons for undertaking graduate study in this area and at the University of Wisconsin–Madison and research interests. Submission of a copy of a relevant research paper or thesis in English is encouraged of all applicants. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. All international students

whose language is not English should submit a writing sample such as a research paper in English.

Admission to the Ph.D. requires a background in consumer behavior, family economics, or a related discipline, as well as specific course prerequisites outlined on the Ph.D. checklist. Qualified applicants without a master's degree may request admission directly to the Ph.D. program. An interview by phone or in person may be required. Students may be admitted with deficiencies but will be required to complete any deficiencies before enrollment or during the first semester of study.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/consumer-behavior-family-economics>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu)

### ADMISSION (DS)

In addition to meeting the Graduate School minimum requirements, the applicant to design studies must submit an essay to the design studies department stating the applicant's reason for pursuing a graduate degree, their specific topic of interest, and future professional goals. Students applying for specializations in research-based areas, including environment and behavior, material culture (history of interiors, history of textiles and clothing), and textile science must also submit a scholarly paper, written in English and authored solely by the applicant. This may be an undergraduate research paper, senior thesis or published article. Students applying for specialization in studio-based areas, including design visualization and application or textile art and design, must submit a portfolio of design work with descriptive information about the projects shown. All applications must also include three letters of recommendation from former professors or others familiar with the applicant's ability to pursue graduate study and original transcripts from all post-high school institutions attended.

Graduate Record Exam (GRE) scores are required for the Ph.D. but is not required for the MS or MFA plan. Personal biographical statement and CV are also required for Ph.D. applications. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. See our webpage and the UW Graduate School website for minimum test scores and other details about applying to UW–Madison and the Design Studies department.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/design-studies>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

### ADMISSION (HDFS)

In addition to an online application, the department requires the following materials: the HDFS supplemental application form including a 500-750 word statement describing the applicant's reasons and plans for graduate study and future professional goals; Graduate Record Exam (GRE) scores; three letters of recommendation from former professors or others familiar with the applicant's ability to complete graduate studies; and original transcripts from all post-high school institutions attended. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System

(IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/hdfs-graduate-program>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate, critique, or elaborate the theories, research methods, and approaches to inquiry or schools of practice in one's area of study.
- Identify sources and assemble evidence pertaining to questions or challenges in the area of study.
- Understand the social, political, ethical, and economic contexts of research and creative scholarship.
- Compare and contrast multiple paradigms for describing reality (e.g. personal history, world view, philosophic tradition, discipline).
- Select and/or utilize the most appropriate methodologies and practices.
- Communicate clearly in ways appropriate to a variety of audiences.

### PROFESSIONAL CONDUCT

- Recognize and apply principles of ethical conduct.

### ADDITIONAL LEARNING GOALS

- Understand the human ecology perspective by examining and explaining the relations among humans and their natural, social, and built environments using an interdisciplinary and transdisciplinary lens.
- Recognize the nature and significance of diversity as related to one's area of study.

## PEOPLE

**Faculty:** *Civil Society and Community Studies:* Professors Jasper (chair), Flanagan, Morales, Zeldin; Associate Professors Bakken, Christens; Assistant Professors Gaddis, Horowitz, Sarmiento, Sparks  
*Consumer Behavior and Family Economics:* Professors Wong (chair), Bartfeld, Zepeda; Associate Professor Collins; Assistant Professors Addo, Warmath  
*Design Studies:* Professors Rengel (chair), Angus, Dong, Sarmadi, Nelson; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto  
*Human Development and Family Studies:* Professors Dilworth-Bart (chair), Bogenschneider, Raison, Poehlmann-Tynan, Roberts, Small; Associate Professors Duncan, Hartley, Nix, Papp; Assistant Professors Halpern-Meehin, Kirkorian, Litzelman

## HUMAN ECOLOGY, MFA

Human ecology is the study of the complex relationships between human beings and their environments. The school offers advanced degrees with four program specializations: civil society and community research, consumer behavior and family economics, design studies, and human development and family studies. Each program option has its own

faculty, curriculum, and requirements. Prospective graduate students apply for the human ecology degree, the umbrella degree under which the degree options are offered. Inquiries should be made to the individual department offering the desired program specialization.

All of the school's graduate programs provide opportunities for interdisciplinary, advanced course work with an intensive research or creative discovery experience. Faculty and students are also involved with institutes and centers administered in the School of Human Ecology and across the campus such as the Arts Institute, Center for Child and Family Well-Being, the Center for Financial Security, the Institute on Aging, the Kohl's Center for Retailing Excellence, the Nelson Institute for Environmental Studies, the Center for Non-Profits, the Institute for Research on Poverty, and the Waisman Center. With access to courses and resources in and beyond the School of Human Ecology, graduate students in human ecology's program options gain the skills and specialized expertise that will be required to be successful scholars, artists/designers, and workers in academic, service, government, and business settings worldwide.

## DESIGN STUDIES (DS)

The Design Studies Graduate Program takes an integrated, interdisciplinary approach toward design and its relationship with human needs and environments, clothing, textiles, and other material objects. This perspective integrates aesthetic, cultural, historical, technical, and behavioral knowledge and methods. Students gain knowledge and insight through descriptive, analytical and creative activities.

The program's graduate faculty is comprised of interdisciplinary scholars, designers, scientists and artists who are equipped to mentor graduate students as they build individual programs of study based on personal goals and interests. Faculty and students use a variety of investigative methods, including qualitative and quantitative research methods as well as various kinds of creative scholarship. Specific approaches might include design visualization, simulation, humanistic and scientific analysis, interpretive interviewing and ethnographic research, post-occupancy evaluation, survey research, historical investigation, material culture, and cultural analysis, critical analysis, and studio or laboratory experimentation. While the backgrounds and scholarship areas of the faculty are diverse, the program is tied together by an interest in the relationship between people and their relationship to objects, culture and environments.

The program offers three degrees: an M.S., MFA, and Ph.D. On all degree levels, students specialize in a general area of design, as listed below. At the doctoral level, students focus on basic or applied research. At the M.S. level, students focus on research, applications of research, or studio performance. At the MFA level, students focus on studio work. All students work with an advisor and graduate committee to develop a focused course of study.

The Design Studies Graduate Program is especially appropriate for self-starting students who like the challenge of tailoring a graduate program to their needs and welcome the opportunity to draw from the excitement and resources of a large university, while still working closely with faculty mentors. The program may be less appropriate for those who are more comfortable with the structure of a predetermined course of study.

All students are encouraged to collaborate with other campus units, including departments such as art, art history, engineering, folklore, history, landscape architecture, theater and drama, and architecture (at UW-Milwaukee); groups or programs that link departments, such as area studies programs; interdisciplinary programs such as the Arts Institute

or the Institute on Aging; or "clusters" such as those in material culture and visual culture. Within the school students have access to computer labs supporting design visualization, the Gallery of Design (<http://sohe.wisc.edu/what-we-do/design-gallery>), the Helen Louise Allen Textile Collection (<http://sohe.wisc.edu/what-we-do/helen-louise-allen-textile-collection>), and the Ruth Ketterer Harris Library (<https://sohe.wisc.edu/research-development/textile-collection/textile-resources-2/ruth-ketterer-harris-library>) of textile and design-related materials.

## SPECIALIZATIONS

The graduate program option in Design Studies department addresses diverse aspects of design inquiry, focusing on design as a complex interrelationship between people and the built environment or people and textiles. There are three primary areas of emphasis:

**Studio-based design inquiry (MFA)** emphasizes discovering new insights, processes and relationships through the creative process. Faculty and graduate students who conduct studio based design inquiry work on either one of the following concentration areas or work across them.

- *Textile/clothing forms, art and design* is a studio-based approach that focuses on the conceptual, technical and aesthetic possibilities of textiles (an art approach is taken, rather than industry focus).
- *Interior environments* focuses on design as a complex interrelationship between people and the built environment. The studio-based option emphasizes discovering new insights, processes and relationships through the creative process.

**Research-based design inquiry** emphasizes discovering new insights and relationships through the application of theories and methods drawn from the social sciences, engineering, and humanities. Graduate students who are involved with research based design inquiry work within one of the following three concentration areas.

- *Design history and material culture* examines design in its historical context, as both a process and a product. The program defines design broadly to include architecture, interior design, industrial design, decorative arts, and other areas of material culture.
- *Environmental design research* addresses the interaction between people and their built, natural, and/or virtual environments with a clear goal to create environments that are sustainable and responsive to human needs. The faculty and graduates of the program have pioneered studies in environment behavior, evidence-based design, building evaluation, sustainability, aging and environment, children's environment, environments for special populations, and emerging technologies and applications of virtual reality.
- *Textile science* provides in-depth understanding of the physical and chemical properties of natural and synthetic fibers and their interaction with dyes, finishes and plasma.

**Integrated design inquiry (M.S., MFA, Ph.D.)** emphasizes a melding of both studio based and research based design inquiry; this incorporates a framework of evidence (or research) based design, combining studio based inquiry with research strategies such as action research or post occupancy evaluation.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER OF FINE ARTS

MFA, with available named option in Design Studies

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

60 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

24 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (30 credits out of 60 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count up to 20 credits of graduate coursework taken at other institutions or as a UW–Madison Special student (with a maximum of 9 special student credits as part of the 20). Prior coursework taken at other institutions may not be used to satisfy the minimum graduate residence credit requirement. Credits earned five or more years prior to admission to an MFA degree are not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, up to 7 credits numbered 300 or above from a UW–Madison undergraduate degree are allowed to count toward degree credit; undergraduate courses must be numbered 700 or above to count toward the minimum graduate coursework requirement. No undergraduate coursework may count toward graduate residence requirement.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count up to 20 credits of graduate coursework taken at other institutions or as a UW–Madison Special student (with a maximum of 9 special student credits as part of the 20). Special student coursework must be numbered 300 or above for residence and degree credit and 700 or above for minimum graduate coursework (50%) credit.

Credits earned five or more years prior to admission to an MFA degree are not allowed to satisfy requirements. Use of Special student credit may require payment of tuition difference.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Applicants must apply online and pay the required application fee to the Graduate School. Applicants must meet all Graduate School requirements including a bachelor's degree from an accredited institution and an undergraduate GPA of 3.0 or higher (on a 4.0 scale). Each of the three program areas sets additional minimum requirements and requires

additional application material. See each program option for admission requirements.

Applicants to any one of the School of Human Ecology degree program options should list "Human Ecology (code 549)" as the graduate major on their application. Their individual statement of purpose should clearly indicate the degree option to which they are applying.

## ADMISSION (DS)

In addition to meeting the Graduate School minimum requirements, the applicant to design studies must submit an essay to the design studies department stating the applicant's reason for pursuing a graduate degree, their specific topic of interest, and future professional goals. Students applying for specializations in research-based areas, including environment and behavior, material culture (history of interiors, history of textiles and clothing), and textile science must also submit a scholarly paper, written in English and authored solely by the applicant. This may be an undergraduate research paper, senior thesis or published article. Students applying for specialization in studio-based areas, including design visualization and application or textile art and design, must submit a portfolio of design work with descriptive information about the projects shown. All applications must also include three letters of recommendation from former professors or others familiar with the applicant's ability to pursue graduate study and original transcripts from all post-high school institutions attended.

Graduate Record Exam (GRE) scores are required for the Ph.D. but is not required for the MS or MFA plan. Personal biographical statement and CV are also required for Ph.D. applications. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. See our webpage and the UW Graduate School website for minimum test scores and other details about applying to UW–Madison and the Design Studies department.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/design-studies/mfa>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate challenges, frontiers and limits with respect to theory, knowledge or practice within the area of study.
- Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within one's area of study.
- Consider the role of social, political, ethical, and economic contexts of research and creative scholarship in one's area of study.
- Consider the role of multiple paradigms for describing reality in one's area of study.
- Create research, scholarship or performance that makes a substantive contribution to one's field.
- Communicate complex or ambiguous ideas in a compelling manner to a variety of audiences.

## PROFESSIONAL CONDUCT

- Foster ethical conduct and professional guidelines.

## ADDITIONAL LEARNING GOALS

- Contribute to advancing the human ecology perspective by reflecting the relations among humans and their natural, social, and built environments and applying an interdisciplinary and/or transdisciplinary lens in one's area of professional practice.
- Reflect the nature and significance of diversity in one's area of professional practice.

## PEOPLE

**Faculty:** *Civil Society and Community Studies:* Professors Jasper (chair), Flanagan, Morales, Zeldin; Associate Professors Bakken, Christens; Assistant Professors Gaddis, Horowitz, Sarmiento, Sparks  
*Consumer Behavior and Family Economics:* Professors Wong (chair), Bartfeld, Zepeda; Associate Professor Collins; Assistant Professors Addo, Warmath  
*Design Studies:* Professors Rengel (chair), Angus, Dong, Sarmadi, Nelson; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto  
*Human Development and Family Studies:* Professors Dilworth-Bart (chair), Bogenschneider, Raison, Poehlmann-Tynan, Roberts, Small; Associate Professors Duncan, Hartley, Nix, Papp; Assistant Professors Halpern-Meekin, Kirkorian, Litzelman

## HUMAN ECOLOGY, PH.D.

Human ecology is the study of the complex relationships between human beings and their environments. The school offers advanced degrees with four program specializations: civil society and community research, consumer behavior and family economics, design studies, and human development and family studies. Each program option has its own faculty, curriculum, and requirements. Prospective graduate students apply for the human ecology degree, the umbrella degree under which the degree options are offered. Inquiries should be made to the individual department offering the desired program specialization.

All of the school's graduate programs provide opportunities for interdisciplinary, advanced course work with an intensive research or creative discovery experience. Faculty and students are also involved with institutes and centers administered in the School of Human Ecology and across the campus such as the Arts Institute, Center for Child and Family Well-Being, the Center for Financial Security, the Institute on Aging, the Kohl's Center for Retailing Excellence, the Nelson Institute for Environmental Studies, the Center for Non-Profits, the Institute for Research on Poverty, and the Waisman Center. With access to courses and resources in and beyond the School of Human Ecology, graduate students in human ecology's program options gain the skills and specialized expertise that will be required to be successful scholars, artists/designers, and workers in academic, service, government, and business settings worldwide.

## CIVIL SOCIETY AND COMMUNITY RESEARCH (CSCR)

The civil society and community research faculty areas of research include: civil society, the nonprofit sector, civic engagement, developmental psychology, community and organizational development, youth civic engagement, community psychology, applied medical anthropology, sustainability, education, inter-generational partnerships, program evaluation and learning assessment, community–university partnerships, and philanthropy and giving.

The department offers a human ecology Ph.D. specializing in civil society and community research. Theoretically, the program focuses on grassroots institutions, nonprofit organizations, voluntary associations, and social networks that strive to benefit the common good. Methodologically, the program focuses on mixed method inquiries, with an emphasis on integrating participatory approaches with advanced quantitative and qualitative analysis. The program prepares students to use the processes of research and outreach to strengthen civil society.

The CSCR program is served by ten full-time faculty members plus three additional affiliated faculty members. All faculty members are professionally active with strong records of national and international scholarship. They bring perspectives of many disciplines to their work, including community psychology, developmental psychology, sociology, education, medical and cultural anthropology, and community action. Reflecting the multidisciplinary orientation of the program, faculty possess expertise in areas as diverse as longitudinal modeling, interpretive interviewing, program evaluation, observational methods, survey methodology, community-based research, and ethnography.

The CSCR program is committed to collaborations between faculty and graduate students in the arenas of research, teaching, and outreach. Current areas of scholarly activity include youth civic engagement, community organizing, inter-generational partnerships, social trust, program evaluation, coalition building, voluntary associations, adult learning, community development, place-based education and stewardship, and social change. Faculty and students not only conduct research in these areas, they affirmatively support policies and programs. The department maintains strong connections with Cooperative Extension's Divisions of Youth Development, Family Living, and Program Planning and Evaluation.

Graduates of CSCR are prepared for careers as professors in academic departments including human ecology, community development, community research and action, nonprofit management, community sociology, and applied developmental science. Students will also be prepared for careers as senior staff in technical assistance organizations, foundations, public agencies and advocacy/public education units. Others will choose to use their research and consultation skills to support grassroots organizations.

## CONSUMER BEHAVIOR AND FAMILY ECONOMICS (CBFE)

The Department of Consumer Science develops and disseminates information on the ways in which the interactions among consumers, business, and government can enhance the interests and well-being of consumers, families, and communities. The program focuses on various dimensions of well-being including economic/financial security, consumer empowerment, health, food security, housing security, sustainability, and the public policy that affects those dimensions of well-

being. The program is interdisciplinary; current faculty have degrees in diverse fields including economics, marketing, sociology, retailing, social work, and consumer science. Some faculty have joint appointments with Cooperative Extension, providing students with opportunities for training in outreach and applied research.

Both Ph.D. and M.S. thesis students work closely with faculty members, often collaborating on research and outreach programs. M.S. students can pursue a non-thesis option (not eligible for financial aid) but must complete a research thesis if they intend to pursue a Ph.D. (eligible for financial aid). Ph.D. concentrations include both consumer behavior and family economics; however all Ph.D. students must complete core courses in consumer behavior, family economics, and research methods.

## DESIGN STUDIES (DS)

The Design Studies Graduate Program takes an integrated, interdisciplinary approach toward design and its relationship with human needs and environments, clothing, textiles, and other material objects. This perspective integrates aesthetic, cultural, historical, technical, and behavioral knowledge and methods. Students gain knowledge and insight through descriptive, analytical and creative activities.

The program's graduate faculty is comprised of interdisciplinary scholars, designers, scientists and artists who are equipped to mentor graduate students as they build individual programs of study based on personal goals and interests. Faculty and students use a variety of investigative methods, including qualitative and quantitative research methods as well as various kinds of creative scholarship. Specific approaches might include design visualization, simulation, humanistic and scientific analysis, interpretive interviewing and ethnographic research, post-occupancy evaluation, survey research, historical investigation, material culture, and cultural analysis, critical analysis, and studio or laboratory experimentation. While the backgrounds and scholarship areas of the faculty are diverse, the program is tied together by an interest in the relationship between people and their relationship to objects, culture and environments.

The program offers three degrees: an M.S., MFA, and Ph.D. On all degree levels, students specialize in a general area of design, as listed below. At the doctoral level, students focus on basic or applied research. At the M.S. level, students focus on research, applications of research, or studio performance. At the MFA level, students focus on studio work. All students work with an advisor and graduate committee to develop a focused course of study.

The Design Studies Graduate Program is especially appropriate for self-starting students who like the challenge of tailoring a graduate program to their needs and welcome the opportunity to draw from the excitement and resources of a large university, while still working closely with faculty mentors. The program may be less appropriate for those who are more comfortable with the structure of a predetermined course of study.

All students are encouraged to collaborate with other campus units, including departments such as art, art history, engineering, folklore, history, landscape architecture, theater and drama, and architecture (at UW–Milwaukee); groups or programs that link departments, such as area studies programs; interdisciplinary programs such as the Arts Institute or the Institute on Aging; or "clusters" such as those in material culture and visual culture. Within the school students have access to computer labs supporting design visualization, the Gallery of Design (<http://sohe.wisc.edu/what-we-do/design-gallery>), the Helen Louise Allen Textile Collection (<http://sohe.wisc.edu/what-we-do/helen-louise-allen-textile-collection>), and the Ruth Ketterer Harris Library (<https://sohe.wisc.edu/>

research-development/textile-collection/textile-resources-2/ruth-ketterer-harris-library) of textile and design-related materials.

## SPECIALIZATIONS

The graduate program option in Design Studies department addresses diverse aspects of design inquiry, focusing on design as a complex inter-relationship between people and the built environment or people and textiles. There are three primary areas of emphasis:

**Studio-based design inquiry (MFA)** emphasizes discovering new insights, processes and relationships through the creative process. Faculty and graduate students who conduct studio based design inquiry work on either one of the following concentration areas or work across them.

- *Textile/clothing forms, art and design* is a studio-based approach that focuses on the conceptual, technical and aesthetic possibilities of textiles (an art approach is taken, rather than industry focus).
- *Interior environments* focuses on design as a complex interrelationship between people and the built environment. The studio-based option emphasizes discovering new insights, processes and relationships through the creative process.

**Research-based design inquiry** emphasizes discovering new insights and relationships through the application of theories and methods drawn from the social sciences, engineering, and humanities. Graduate students who are involved with research based design inquiry work within one of the following three concentration areas.

- *Design history and material culture* examines design in its historical context, as both a process and a product. The program defines design broadly to include architecture, interior design, industrial design, decorative arts, and other areas of material culture.
- *Environmental design research* addresses the interaction between people and their built, natural, and/or virtual environments with a clear goal to create environments that are sustainable and responsive to human needs. The faculty and graduates of the program have pioneered studies in environment behavior, evidence-based design, building evaluation, sustainability, aging and environment, children's environment, environments for special populations, and emerging technologies and applications of virtual reality.
- *Textile science* provides in-depth understanding of the physical and chemical properties of natural and synthetic fibers and their interaction with dyes, finishes and plasma.

**Integrated design inquiry** (M.S., MFA, Ph.D.) emphasizes a melding of both studio based and research based design inquiry; this incorporates a framework of evidence (or research) based design, combining studio based inquiry with research strategies such as action research or post occupancy evaluation.

## HUMAN DEVELOPMENT AND FAMILY STUDIES (HDFS)

Human development and family studies offers an interdisciplinary approach to the study of families and individuals across the lifespan with an emphasis on research and its application to practice, programs, and policy. Graduate study in this option leads to the M.S. or the Ph.D.

The HDFS graduate program option is served by 13 full-time faculty members plus affiliated faculty members. Faculty members are professionally active with strong records of national and international scholarship. The faculty bring the perspectives of many different disciplines to their work, including psychology, human development and

family student, sociology, education, and psychiatry. Faculty members conduct basic research to understand families and their members and applied research and outreach to promote positive outcomes in human development and family life.

Faculty and graduate students in HDFS collaborate on research and outreach-engagement projects in a wide variety of substantive areas focusing on the well-being of individuals, couples, and families. Current areas of scholarly activity include infant, early childhood, adolescent and adult development; risk, and resilience; intimate and family relationships; family/informal caregiving; health and well-being; health equity; developmental disabilities; educational television and media effects; school readiness and related intervention; cognitive development; incarceration effects on family well-being; family policy; contemplative practices and mindfulness; parenting; therapeutic potential of ancient practices; and translational science.

Reflecting the multidisciplinary orientation of the program, faculty and students employ a wide array of methods in their work. Faculty possess expertise in areas as diverse as multilevel, longitudinal, nonlinear, and dyadic modeling; physiological measurement; program evaluation; observational methods; experimental methods; survey methodology; and community-based research. The program explicitly values both qualitative and quantitative approaches to inquiry and encourages students to become proficient in both.

Central to the mission of the program is the creation, dissemination, and application of scientific knowledge to address real world problems and issues. Applied work of current faculty and students includes public policy education, community building, outreach education, and prevention programs. Because of the department's affiliation with the University of Wisconsin Cooperative Extension, numerous opportunities are available for involvement in applied settings throughout the state.

There is a demand for professionals trained in research, teaching, and outreach in the areas of human development and family studies in higher education, government, and human and family service programs. Regardless of whether HDFS graduates pursue careers in academic or applied settings, they are prepared for a life of scholarship and service.

## FUNDING

Prospective students should see the program website (<https://sohe.wisc.edu/graduate-students/funding>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., with available named options in Civil Society and Community Research, Consumer Behavior and Family Economics, Design Studies, and Human Development and Family Studies

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

51 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

32 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

Half of degree coursework (26 credits out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

With program approval, students are allowed to count up to 18 credits of graduate coursework taken at other institutions or as a UW–Madison Special student (with a maximum of 9 special student credits as part of the 18). Prior coursework taken at other institutions may not be used to satisfy the minimum graduate residence credit requirement. Credits earned ten or more years prior to admission to a doctoral degree are not allowed to satisfy requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

With program approval, up to 7 credits numbered 300 or above from a UW–Madison undergraduate degree are allowed to count toward degree credit; undergraduate courses must be numbered 700 or above to count toward the minimum graduate coursework requirement. No undergraduate coursework may count toward the graduate residence requirement.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

With program approval, students are allowed to count up to 18 credits of graduate coursework taken at other institutions or as a UW–Madison Special student (with a maximum of 9 special student credits as part of the 18). Coursework must be numbered 300 or above for residence and degree credit and 700 or above to satisfy the minimum graduate coursework (50%) requirement. Credits earned ten or more years prior to admission to a doctoral degree are not allowed to satisfy requirements. Use of Special student credit may require payment of tuition difference.

**CREDITS PER TERM ALLOWED**

12 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Contact the program for information on any additional required courses.

**DOCTORAL MINOR/BREADTH REQUIREMENTS**

Doctoral students must complete a doctoral minor.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher

grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

**ASSESSMENT AND EXAMINATIONS**

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**LANGUAGE REQUIREMENTS**

Contact the program for information on any language requirements.

**ADMISSIONS**

Applicants must apply online and pay the required application fee to the Graduate School. Applicants must meet all Graduate School requirements including a bachelor's degree from an accredited institution and an undergraduate GPA of 3.0 or higher (on a 4.0 scale). Each of the three program areas sets additional minimum requirements and requires additional application material. See each program option for admission requirements.

Applicants to any one of the School of Human Ecology degree program options should list "Human Ecology (code 549)" as the graduate major on their application. Their individual statement of purpose should clearly indicate the degree option to which they are applying.

## ADMISSION (CSCR)

To be considered for admission to the Civil Society and Community Research (CSCR) Ph.D. option, the department requires the following materials: completed online graduate application form indicating “Human Ecology” as the applicant’s program major and Ph.D. as the applicant’s degree; statement describing the applicant’s reasons and plans for graduate study and future professional goals; Graduate Record Exam (GRE) scores; three letters of recommendation from former professors or others familiar with the applicant’s ability to complete graduate studies; original transcripts from all post-high school institutions attended; list of awards, honors, and/or publications; and a writing sample.

International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. All international students whose language is not English should submit a writing sample such as a research paper in English.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/civil-society-community-research>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

## ADMISSION (CBFE)

In addition to the Graduate School requirements, applicants to the M.S. and Ph.D. degrees in consumer behavior and family economics must submit Graduate Record Exam (GRE) or Graduate Management Admission Test (GMAT) scores; three letters of recommendation, at least two of which should be from individuals familiar with the applicant’s academic work and write about their reasons for and ability to complete graduate training; original transcripts from all post–high school institutions attended; and a statement of interest describing the reasons for undertaking graduate study in this area and at the University of Wisconsin–Madison and research interests. Submission of a copy of a relevant research paper or thesis in English is encouraged of all applicants. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. All international students whose language is not English should submit a writing sample such as a research paper in English.

Admission to the Ph.D. requires a background in consumer behavior, family economics, or a related discipline, as well as specific course prerequisites outlined on the Ph.D. checksheet. Qualified applicants without a master’s degree may request admission directly to the Ph.D. program. An interview by phone or in person may be required. Students may be admitted with deficiencies but will be required to complete any deficiencies before enrollment or during the first semester of study.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/consumer-behavior-family-economics>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu)

## ADMISSION (DS)

In addition to meeting the Graduate School minimum requirements, the applicant to design studies must submit an essay to the design studies department stating the applicant’s reason for pursuing a graduate

degree, their specific topic of interest, and future professional goals. Students applying for specializations in research-based areas, including environment and behavior, material culture (history of interiors, history of textiles and clothing), and textile science must also submit a scholarly paper, written in English and authored solely by the applicant. This may be an undergraduate research paper, senior thesis or published article. Students applying for specialization in studio-based areas, including design visualization and application or textile art and design, must submit a portfolio of design work with descriptive information about the projects shown. All applications must also include three letters of recommendation from former professors or others familiar with the applicant’s ability to pursue graduate study and original transcripts from all post-high school institutions attended.

Graduate Record Exam (GRE) scores are required for the Ph.D. but is not required for the MS or MFA plan. Personal biographical statement and CV are also required for Ph.D. applications. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores. See our webpage and the UW Graduate School website for minimum test scores and other details about applying to UW–Madison and the Design Studies department.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/design-studies>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

## ADMISSION (HDFS)

In addition to an online application, the department requires the following materials: the HDFS supplemental application form including a 500-750 word statement describing the applicant’s reasons and plans for graduate study and future professional goals; Graduate Record Exam (GRE) scores; three letters of recommendation from former professors or others familiar with the applicant’s ability to complete graduate studies; and original transcripts from all post-high school institutions attended. International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). International students who hold degrees from U.S. institutions do not need to submit language test scores.

Additional information is available on the program website (<https://sohe.wisc.edu/graduate-students/research-and-creative-scholarship/hdfs-graduate-program>), and from the chair of graduate admissions at [caps@sohe.wisc.edu](mailto:caps@sohe.wisc.edu).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate challenges, frontiers and limits with respect to theory, knowledge or practice within the area of study.
- Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within one’s area of study.
- Consider the role of social, political, ethical, and economic contexts of research and creative scholarship in one’s area of study.
- Consider the role of multiple paradigms for describing reality in one’s area of study.

- Create research, scholarship or performance that makes a substantive contribution to one's field.
- Communicate complex or ambiguous ideas in a compelling manner to a variety of audiences.

## PROFESSIONAL CONDUCT

- Foster ethical conduct and professional guidelines.

## ADDITIONAL LEARNING GOALS

- Contribute to advancing the human ecology perspective by reflecting the relations among humans and their natural, social, and built environments and applying an interdisciplinary and/or transdisciplinary lens in one's area of professional practice.
- Reflect the nature and significance of diversity in one's area of professional practice.

## PEOPLE

**Faculty:** *Civil Society and Community Studies:* Professors Jasper (chair), Flanagan, Morales, Zeldin; Associate Professors Bakken, Christens; Assistant Professors Gaddis, Horowitz, Sarmiento, Sparks  
*Consumer Behavior and Family Economics:* Professors Wong (chair), Bartfeld, Zepeda; Associate Professor Collins; Assistant Professors Addo, Warmath  
*Design Studies:* Professors Rengel (chair), Angus, Dong, Sarmadi, Nelson; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto  
*Human Development and Family Studies:* Professors Dilworth-Bart (chair), Bogenschneider, Raison, Poehlmann-Tynan, Roberts, Small; Associate Professors Duncan, Hartley, Nix, Papp; Assistant Professors Halpern-Meekin, Kirkorian, Litzelman

## INDUSTRIAL AND SYSTEMS ENGINEERING

**Administrative Unit:** Industrial and Systems Engineering

**College/School:** College of Engineering

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor in Industrial and Systems Engineering; Graduate/Professional Certificate in Patient Safety

**Named Options:** Human Factors and Systems Engineering (M.S.); Systems Engineering and Analysis (M.S.)

The Department of Industrial and Systems Engineering offers opportunities for graduate study leading to the master of science and the doctor of philosophy degrees in industrial engineering. Five areas of specialization are available, each designed to produce graduates capable of leading new and developing areas within industrial and systems engineering. The five areas, each with its own courses of study and admission procedures, are: decision science/operations research, health systems, human factors and ergonomics, manufacturing and production systems, and quality engineering. Since each area offers faculty, research, and courses that are unique, both with respect to each other and to much of industrial and systems engineering taught elsewhere, it is advisable to see Graduate Program (<https://www.engr.wisc.edu/academics/graduate-academics>) on the department website for further information.

The specialization in *decision science/operations research* trains students in analytical methodologies useful for solving decision problems, especially problems that involve the allocation of scarce resources. Graduate study focuses on applied probability and statistics, decision analysis, optimization modeling, and optimization algorithms.

The *health systems* specialization seeks to train students to look at broad issues in health care, including long-term care, prevention, quality improvement, health care financing, and system evaluation. Understanding how people solve problems is a basic requirement for health systems engineers, who must apply scientific methods in a value-laden setting.

The specialization in *human factors and ergonomics* is concerned with the quality of work lives, ergonomics, and occupational safety and health for both workers and management. By examining, designing, testing, and evaluating the workplace and how people interact within it, human systems engineers can create productive, safe, and satisfying work environments.

The specialization in *manufacturing and production systems* is intended to provide the skills and knowledge necessary to compete successfully in a manufacturing environment. These skills include knowledge of the theory of manufacturing materials and processes and their control; knowledge of the essentials of manufacturing systems design and analysis; and knowledge of and hands-on experience with modern manufacturing technology.

The *quality engineering* specialization is designed to provide the necessary background for quality engineering careers in industry or government. Emphasis is on the foundations of quality improvement, job and organizational design, and process control.

The graduate/professional certificate in patient safety is an interdisciplinary effort between the Department of Industrial and Systems Engineering, School of Nursing, School of Pharmacy, Department of Medical Physics, and Department of Population Health Sciences.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Industrial Engineering, Doctoral Minor (p. 393)
- Industrial Engineering, M.S. (p. 393)
- Industrial Engineering, Ph.D. (p. 394)
- Patient Safety, Graduate/Professional Certificate (p. 396)

## PEOPLE

**Faculty:** Professors Bier (chair), Brennan, Carayon, Lee, Li, Linderoth, Radwin, Shi, Vanderheiden, Veeramani, Zhou; Associate Professors Alagoz, Krishnamurthy, Li, Luedtke, McLay, Wiegmann; Assistant Professors: Del Pia, Liu, Wang, Werner; Affiliate Professors Bowers, Burnside, Carnes, DeCroix, Ferris, Greenberg, Finster, Maravelias, Noyce, Pugh, Qian, Sesto, Shah, Smith, Steege, Thomadsen, Vanness, Wright

## INDUSTRIAL ENGINEERING, DOCTORAL MINOR

Industrial and systems engineering is an engineering discipline focusing on the design, analysis, improvement and implementation of complex systems that include humans, materials, equipment and other resources. The learning outcome of the doctoral minor is to gain general proficiency and distinctive attainment in one or more concentration areas in industrial and systems engineering, including: decision science and operations research, manufacturing production systems, health systems engineering, and human factors and ergonomics.

### REQUIREMENTS

A Ph.D. candidate from another department taking an Option A doctoral minor in industrial engineering must complete a minimum of nine credits of ISyE courses numbered 300 or above. A minimum GPA of 3.20 is required for this set of courses. A course with a grade of C or lower cannot be used to satisfy the minor requirement. Students may transfer up to three credits from another university to satisfy the minor requirement, subject to the approval of the Academic Affairs Cluster.

### ADMISSIONS

For admissions, please contact the ISyE coordinator in the Academic Affairs Cluster (<https://www.engr.wisc.edu/academics/student-services/academic-advising/graduate-engineering-students>).

### PEOPLE

**Faculty:** Professors Bier (chair), Brennan, Carayon, Lee, Li, Linderoth, Radwin, Shi, Vanderheiden, Veeramani, Zhou; Associate Professors Alagoz, Krishnamurthy, Li, Luedtke, McLay, Wiegmann; Assistant Professors: Del Pia, Liu, Wang, Werner; Affiliate Professors Bowers, Burnside, Carnes, DeCroix, Ferris, Greenberg, Finster, Maravelias, Noyce, Pugh, Qian, Sesto, Shah, Smith, Steege, Thomadsen, Vanness, Wright

## INDUSTRIAL ENGINEERING, M.S.

The Department of Industrial and Systems Engineering offers opportunities for graduate study leading to the master of science and the doctor of philosophy degrees in industrial engineering. Five areas of specialization are available, each designed to produce graduates capable of leading new and developing areas within industrial and systems engineering. The five areas, each with its own courses of study and admission procedures, are: decision science/operations research, health systems, human factors and ergonomics, manufacturing and production systems, and quality engineering. Since each area offers faculty, research, and courses that are unique, both with respect to each other and to much of industrial and systems engineering taught elsewhere, it is advisable to see Graduate Program (<https://www.engr.wisc.edu/academics/graduate-academics>) on the department website for further information.

The specialization in *decision science/operations research* trains students in analytical methodologies useful for solving decision problems, especially problems that involve the allocation of sparse resources.

Graduate study focuses on applied probability and statistics, decision analysis, optimization modeling, and optimization algorithms.

The *health systems* specialization seeks to train students to look at broad issues in health care, including long-term care, prevention, quality improvement, health care financing, and system evaluation. Understanding how people solve problems is a basic requirement for health systems engineers, who must apply scientific methods in a value-laden setting.

The specialization in *human factors and ergonomics* is concerned with the quality of work lives, ergonomics, and occupational safety and health for both workers and management. By examining, designing, testing, and evaluating the workplace and how people interact within it, human systems engineers can create productive, safe, and satisfying work environments.

The specialization in *manufacturing and production systems* is intended to provide the skills and knowledge necessary to compete successfully in a manufacturing environment. These skills include knowledge of the theory of manufacturing materials and processes and their control; knowledge of the essentials of manufacturing systems design and analysis; and knowledge of and hands-on experience with modern manufacturing technology.

The *quality engineering* specialization is designed to provide the necessary background for quality engineering careers in industry or government. Emphasis is on the foundations of quality improvement, job and organizational design, and process control.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Not allowed for graduate residence credit requirement but allowed for graduate degree credit requirement and graduate coursework (50%)

requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

Not allowed for graduate residence credit requirement but allowed up to 6 credits numbered 300 level or above toward the graduate degree credit requirement but not toward the 50% graduate coursework except for 700 level or above courses. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

Allowed up to 15 credits numbered 300 or above toward graduate residence credit requirement and graduate degree credit requirement. If the courses were numbered 700 or above they may count toward the minimum graduate coursework (50%) requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### **CREDITS PER TERM ALLOWED**

12 credits

### **PROGRAM-SPECIFIC COURSES REQUIRED**

Yes, consult with program for details.

### **OVERALL GRADUATE GPA REQUIREMENT**

3.0

### **OTHER GRADE REQUIREMENTS**

Grades of C and D received by a candidate in any graduate course will not be counted as credit toward the degree. These grades will be counted in the graduate GPA.

### **PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### **ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### **ASSESSMENTS AND EXAMINATIONS**

Examinations: No

### **TIME CONSTRAINTS**

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their

absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### **LANGUAGE REQUIREMENTS**

No language requirements.

## **ADMISSIONS**

Although an undergraduate industrial engineering degree is recommended, students from any discipline with a strong quantitative science emphasis are encouraged to apply. Applicants are strongly advised to review the prerequisites for each area of specialization at the department website (<https://www.engr.wisc.edu/academics/graduate-academics>).

Each application is judged on the basis of previous academic record, Graduate Record Exam (GRE) scores for the general test, three letters of recommendation, and the statement of purpose. Admission is very competitive and application deadlines are extremely important.

## **LEARNING OUTCOMES**

### **KNOWLEDGE AND SKILLS**

- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in industrial and systems engineering including areas such as decision science and operations research, quality engineering, manufacturing and health systems, and/or human factors.
- Identifies sources and assembles evidence pertaining to questions or challenges in industrial and systems engineering.
- Demonstrates understanding of the industrial and systems engineering field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate industrial and systems engineering methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in industrial and systems engineering.
- Communicates clearly in ways appropriate to industrial and systems engineering.

### **PROFESSIONAL CONDUCT**

- Recognizes and applies principles of ethical and professional conduct.

## **PEOPLE**

**Faculty:** Professors Bier (chair), Brennan, Carayon, Lee, Li, Linderoth, Radwin, Shi, Vanderheiden, Veeramani, Zhou; Associate Professors Alagoz, Krishnamurthy, Li, Luedtke, McLay, Wiegmann; Assistant Professors: Del Pia, Liu, Wang, Werner; Affiliate Professors Bowers, Burnside, Carnes, DeCroix, Ferris, Greenberg, Finster, Maravelias, Noyce, Pugh, Qian, Sesto, Shah, Smith, Steege, Thomadsen, Vanness, Wright

## **INDUSTRIAL ENGINEERING, PH.D.**

The Department of Industrial and Systems Engineering offers opportunities for graduate study leading to the master of science and

the doctor of philosophy degrees in industrial engineering. Five areas of specialization are available, each designed to produce graduates capable of leading new and developing areas within industrial and systems engineering. The five areas, each with its own courses of study and admission procedures, are: decision science/operations research, health systems, human factors and ergonomics, manufacturing and production systems, and quality engineering. Since each area offers faculty, research, and courses that are unique, both with respect to each other and to much of industrial and systems engineering taught elsewhere, it is advisable to see Graduate Program (<https://www.engr.wisc.edu/academics/graduate-academics>) on the department website for further information.

The specialization in *decision science/operations research* trains students in analytical methodologies useful for solving decision problems, especially problems that involve the allocation of sparse resources. Graduate study focuses on applied probability and statistics, decision analysis, optimization modeling, and optimization algorithms.

The *health systems* specialization seeks to train students to look at broad issues in health care, including long-term care, prevention, quality improvement, health care financing, and system evaluation. Understanding how people solve problems is a basic requirement for health systems engineers, who must apply scientific methods in a value-laden setting.

The specialization in *human factors and ergonomics* is concerned with the quality of work lives, ergonomics, and occupational safety and health for both workers and management. By examining, designing, testing, and evaluating the workplace and how people interact within it, human systems engineers can create productive, safe, and satisfying work environments.

The specialization in *manufacturing and production systems* is intended to provide the skills and knowledge necessary to compete successfully in a manufacturing environment. These skills include knowledge of the theory of manufacturing materials and processes and their control; knowledge of the essentials of manufacturing systems design and analysis; and knowledge of and hands-on experience with modern manufacturing technology.

The *quality engineering* specialization is designed to provide the necessary background for quality engineering careers in industry or government. Emphasis is on the foundations of quality improvement, job and organizational design, and process control.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 credits out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Not allowed for graduate residence credit requirement but allowed for graduate degree credit requirement and graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Not allowed for graduate residence credit requirement but allowed up to 6 credits numbered 300 level or above toward the graduate degree credit requirement but not toward the 50% graduate coursework except for 700 level or above courses. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

Allowed up to 15 credits numbered 300 or above toward graduate residence credit requirement and graduate degree credit requirement. If the courses were numbered 700 or above they may count toward the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

No program-specific courses required.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral ISyE students are required to complete a minor.

In addition to requirement of minor, the Ph.D. program of ISyE has a requirement on breadth to make the Ph.D. student achieve minimum competence in multiple areas within industrial and systems engineering. It consists of taking at least two courses (6 credits) from a list of ISyE courses and attaining a grade of B or above in both courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.0

## OTHER GRADE REQUIREMENTS

Grades of C and D received by a candidate in any graduate course will not be counted as credit toward the degree. These grades will be counted in the graduate GPA.

## PROBATION POLICY

Students who are admitted with deficiencies but do not complete these courses within the first year are subject to probation.

## ADVISOR

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

In addition to the Graduate School policies, two faculty members must be from ISyE.

## ASSESSMENTS AND EXAMINATIONS

Examinations: qualifying exam, preliminary exam, and final oral defense.

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

The qualifying examination requirement must be satisfied by the end of the seventh semester of enrollment after earning the M.S. in Industrial Engineering or its equivalent from any institution.

The preliminary exam must be taken within five years after the time of passing the qualifying exam.

The Ph.D. defense must be completed within **five years** after passing the preliminary examination.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Although an undergraduate industrial engineering degree is recommended, students from any discipline with a strong quantitative science emphasis are encouraged to apply. Applicants are strongly advised to review the prerequisites for each area of specialization at the

department website (<https://www.engr.wisc.edu/academics/graduate-academics>).

Each application is judged on the basis of previous academic record, Graduate Record Exam (GRE) scores for the general test, three letters of recommendation, and the statement of purpose. Admission is very competitive and application deadlines are extremely important.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within industrial and systems engineering.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the industrial and systems engineering.
- Creates research, scholarship, or performance that makes a substantive contribution to the industrial and systems engineering field.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of industrial and systems engineering to society.
- Communicates complex ideas in a clear and understandable manner to variety of audience.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Bier (chair), Brennan, Carayon, Lee, Li, Linderoth, Radwin, Shi, Vanderheiden, Veeramani, Zhou; Associate Professors Alagoz, Krishnamurthy, Li, Luedtke, McLay, Wiegmann; Assistant Professors: Del Pia, Liu, Wang, Werner; Affiliate Professors Bowers, Burnside, Carnes, DeCroix, Ferris, Greenberg, Finster, Maravelias, Noyce, Pugh, Qian, Sesto, Shah, Smith, Steege, Thomadsen, Vanness, Wright

## PATIENT SAFETY, GRADUATE/ PROFESSIONAL CERTIFICATE

The graduate/professional certificate in patient safety is an interdisciplinary effort between the Department of Industrial and Systems Engineering, School of Nursing, School of Pharmacy, Department of Medical Physics, and Department of Population Health Sciences. Patient safety is of national and international importance and there is a shortage of people with expertise in the design of safe health care systems and technologies that can improve patient safety. Such expertise is important to physicians, nurses, pharmacists, and other health care professionals, and engineers. The certificate in patient safety provides students with knowledge and skills in an array of topics necessary for the identification, analysis, and control of patient safety programs.

## INFORMATION SCHOOL

**Administrative Unit:** Information School

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., Ph.D.

**Degrees Offered:** M.A., Ph.D.

**Minors and Certificates:** Doctoral Minor in Library and Information Studies; Doctoral Minor in Print Culture History; Specialist Certificate in Library and Information Studies

**Named Options:** Campus Delivered Program (M.A.); Distance Delivered Program (M.A.)

The Information School or “the iSchool at UW–Madison” is a professional school offering M.A. and Ph.D. degrees and an undergraduate digital studies certificate.

The Information School faculty are known for scholarly work in the areas of information policy and ethics, user behaviors and literacies, print culture, library and information technology history, electronic publishing, and the social aspects of information and communications systems. They have made valuable scholarly contributions in the areas of medical information retrieval systems, online search behavior and search effectiveness, publisher e-journal licensing practices, information technology history, print culture and library history, information ethics and policy, and youth and new media. Faculty are widely involved in different research areas on campus. For example, the iSchool hosts the Center for the History of Print and Digital Culture, a research center focused on authorship, reading, publication and distribution of print and digital materials. The Information School faculty members are involved with the Holtz Center for Science and Technology Studies, the Wisconsin Institute for Discovery, the Center for Financial Security, and the Games Learning & Society group.

The Information School is well known for its public-good, community engagement orientation. The Information School is home to several student organizations that shepherd long-term, information-justice projects including the Jail Library Group, the Tribal Library Archives and Museums Group, and the Allied Drive Literacy Project.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Library and Information Studies, Doctoral Minor (p. 397)
- Library and Information Studies, M.A. (p. 397)
- Library and Information Studies, Ph.D. (p. 399)
- Library and Information Studies, Specialist Certificate (p. 401)
- Print Culture History, Doctoral Minor (p. 402)

## PEOPLE

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## LIBRARY AND INFORMATION STUDIES, DOCTORAL MINOR

### REQUIREMENTS

UW–Madison students seeking a doctoral minor in library and information studies work with a School of Information faculty member (serving as minor field advisor) to plan a 12-credit course of study that best meets the student’s educational goals. Students may take count Information School M.A.–level courses and Ph.D. seminars toward this minor.

### PEOPLE

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## LIBRARY AND INFORMATION STUDIES, M.A.

The master’s degree in the Information School (iSchool) prepares graduates to develop and provide information services that create, collect, organize, store, analyze, find, distribute, and use information in a diverse, technological, and global society. At the master’s level, the school prepares information professionals to work in five broad overlapping areas of the information professions.

**Librarianship:** Graduates obtain employment in college and university librarianship, public librarianship, youth and young adult librarianship, electronic collections management, science and health librarianship, research data management, and school library media centers.

**Archives in a Digital Age** (on campus program only): Graduates obtain employment in digital asset management, digital preservation and curation, digital archives, corporate archives, government archives, special collections, and tribal libraries archives and museums.

**Information Management:** Graduates obtain employment in information analysis and visualization, knowledge management, prospect research, systems analysis, digital asset management, records management and compliance, research data management, information systems analysis and project management.

**Organization of Information:** Graduates obtain employment in metadata management, taxonomy and ontology development and implementation, digital asset management, cataloging, XML and linked data, and database management.

**User-Centered Systems Design and Evaluation:** Graduates obtain employment in user experience design, systems analysis and project management, IT training, educational technology support, digital asset management and curation, content management, and database development and management.

The master’s degree requires 39 credit hours. Students attending on a full-time basis generally complete the program in two academic years with summer work; part-time students complete it in three to four years.

Students gain hands-on experience as part of their degree through the school's required 3-credit field practicum. Students may choose practicum settings based on their career goals and combine real-life work with classroom sessions that provide support and encourage reflection and professional growth.

## M.A. PROGRAM SPECIALIZATIONS

Some M.A. program specializations require specific coursework or other requirements.

**Graduate/Professional Certificate in Strategic Innovation: Technology, Organizations, and Society:** The Information School offers a specialization in information innovation and organizational change in conjunction with the School of Business graduate/professional certificate (p. 466) which can be completed as part of the school's M.A. degree (on-campus program only).

**Certificate in Leadership:** iSchool students can earn the UW–Madison Certificate in Leadership ([https://cfli.wisc.edu/leadership\\_certificate.htm](https://cfli.wisc.edu/leadership_certificate.htm)) as part of their Information School M.A. degree (on campus and online programs).

**Double degrees:** The iSchool offers double degrees with the UW Law School, the School of Music, and the Department of Art History. These require separate admissions and additional coursework. (on campus program only)

**School Library Media Services and Administration:** A valid teaching license is required for school library media certification in the state of Wisconsin. The teaching license can be obtained before or after completing the School of Information MA; it is not required for admission. For licensed classroom teachers with master's degrees, web-based school library media certification courses are available through the UW System School Library Education Consortium (UWSSLEC).

Online students (distance degree option) should note: Specialized courses in art, music and law, as well as courses offered outside the Information School that may be part of specializations or double degrees, are generally not available online. For a distance student with academic background in one of these areas, combining the general LIS degree with the specialized background may be the best preparation.

The master's program is accredited by the American Library Association, recognized by the Wisconsin Division for Libraries, Technology, and Community Learning for certification of public librarians, and recognized by the state's Department of Public Instruction for licensing of school library media specialists.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., with available named options Campus Delivered Program, and Distance Delivered Program

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

39 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

33 credits after admission to the Information School

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

A minimum of 30 credits must be taken from graduate-level Information School M.A. coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

The remaining 9 credits of coursework must be 300 level or above and may not include iSchool undergraduate coursework.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students may count up to 6 credits of approved graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With approval, UW–Madison undergraduates accepted into the Information School program may count up to 7 graduate iSchool credits (450 and above) toward their M.A. degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Students are allowed to count up to 9 approved credits of coursework numbered 450 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

M.A.–face-to-face option:

8 to 12 credits in a regular semester is considered full time at the graduate level by the Information School. Course load maximums are 12 credits in a regular semester, 8 credits in the summer term and 3 credits in the intersession.

M.A.–online option:

8 to 12 credits in a regular semester is considered full time at the graduate level. 6 credits is recommended for online students.

### PROGRAM-SPECIFIC COURSES REQUIRED

Required Courses:

| Code      | Title                                                 | Credits |
|-----------|-------------------------------------------------------|---------|
| L I S 601 | Information: Perspectives and Contexts                | 3       |
| L I S 602 | Information: Organization and Search                  | 3       |
| L I S 603 | Research and Assessment for Information Professionals | 3       |

Also, 3 credits from a set of approved graduate level management courses and at least 3 credits from a set of approved graduate level technology courses. Students in school library media have additional required courses; for details, see the iSchool website.

## OVERALL GRADUATE GPA REQUIREMENT

3.0 GPA required

## OTHER GRADE REQUIREMENTS

Within the student's total program, one grade of BC or C is allowable in either a required or elective course if it is balanced by a grade of A or AB earned prior to or concurrently with the unsatisfactory grade. A second grade of BC or C or any grade of D or F will normally result in the student being dropped from the program.

## PROBATION POLICY

A student may be placed on probation or suspended from the Graduate School for low grades or for failing to resolve incompletes in a timely fashion. In special cases the Graduate School permits students who do not meet these minimum standards to continue on probation upon recommendation and support of their advisor.

## ADVISOR / COMMITTEE

All continuing students are required to meet with their advisor prior to registering for each semester. Failure to do so will result in a hold being placed on the student's registration.

## ASSESSMENTS AND EXAMINATIONS

Candidates must complete a minimum of a 120-hour practicum, and must complete a portfolio.

## TIME CONSTRAINTS

The maximum period for completion of the M.A. (under special circumstances) is seven calendar years. Contact the department for more information.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The school admits students to its on campus and online master's programs once a year, for fall semester. Applications are available in September and are due December 15. Note that the online program is called the "distance degree option" in all admissions forms, and students from any geographical location (including Madison, Wisconsin) are welcome to apply.

The Graduate School requires a bachelor's degree from a regionally accredited U.S. institution, or a comparable degree from an international institution. A minimum undergraduate grade-point average (GPA) of 3.00 (on a 4.00 scale) in the last 60 earned credit hours is required.

Application evaluation criteria include academic abilities, professional promise, leadership and community engagement. An undergraduate

program that includes breadth in liberal arts and sciences is required. Any major is acceptable. Prior work experience related to information professions is useful, but is not required. The GRE is not required.

International students: TOEFL or equivalent scores are required if English is not the native language, or if the undergraduate instruction was not in English. The Information School follows UW Graduate School rules regarding English proficiency exams. See the Graduate School website (<http://grad.wisc.edu>) for updated information. For more information about admission to the master's program, see MA Application (<http://www.slis.wisc.edu>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students apply key concepts with respect to the relationship between power, knowledge, and information.
- Students apply key concepts with respect to theories and practices of literacies, reading, and information use.
- Students organize and describe print and digital information resources.
- Students select and evaluate print and digital information resources.
- Students analyze information needs of diverse individuals and communities.
- Students understand and use appropriate information technologies.

### PROFESSIONAL CONDUCT

- Students evaluate and debate information policy and ethics issues applicable in local, national or global contexts.
- Students apply core ethical principles to professional practice.
- Students evaluate, problem solve and think critically, both individually and in teams.
- Students demonstrate good oral and written communication skills.
- Students participate in extracurricular activities in the field.
- Students demonstrate innovation and skills necessary for leadership.

## PEOPLE

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## LIBRARY AND INFORMATION STUDIES, PH.D.

The doctoral degree is a research degree designed to prepare academics to research and teach in information schools. The program emphasizes scholarly writing, interdisciplinary and boundary-spanning inquiry, employment of theory to frame and guide inquiry and analysis, expertise with cutting edge scholarship techniques (including those using new technologies), and preparation in undergraduate and graduate teaching. For more information, see the Ph.D. program description and the Ph.D. program planning guide on the Information School website.

The Information School or “the iSchool at UW–Madison” is a professional school offering M.A. and Ph.D. degrees and an undergraduate digital studies certificate.

School faculty are known for scholarly work in the areas of information policy and ethics, user behaviors and literacies, print culture, library and information technology history, electronic publishing, and the social aspects of information and communications systems. They have made valuable scholarly contributions in the areas of medical information retrieval systems, online search behavior and search effectiveness, publisher e-journal licensing practices, information technology history, print culture and library history, information ethics and policy, and youth and new media. Faculty are widely involved in different research areas on campus. For example, the iSchool hosts the Center for the History of Print and Digital Culture, a research center focused on authorship, reading, publication and distribution of print and digital materials. Faculty members are involved with the Holtz Center for Science and Technology Studies, the Wisconsin Institute for Discovery, the Center for Financial Security, and the Games Learning & Society group.

The iSchool is well known for its public-good, community engagement orientation. The school is home to several student organizations that shepherd long-term, information-justice projects including the Jail Library Group, the Tribal Library Archives and Museums Group, and the Allied Drive Literacy Project.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits including dissertator credits, 990s and 999s

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits after admission to the Information School

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

The majority of a Ph.D. student’s coursework must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>). Courses at the 300–600 level should be taken sparingly and must be approved by the student’s advisor.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students may count up to 9 credits of approved graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits counted toward a UW–Madison undergraduate degree are allowed to count toward the PhD degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Students are allowed to count up to 9 approved credits of coursework numbered 450 or above taken as a UW–Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON I-SCHOOL M.A.

M.A. graduates who are accepted into the Information School Ph.D. program may count up to 10 qualified credits from their iSchool M.A. degree toward their Ph.D. Qualified courses include iSchool Ph.D. seminars (900 level) and research methods courses (e.g. L I S 603 Research and Assessment for Information Professionals).

### CREDITS PER TERM ALLOWED

8 to 12 credits in a regular semester is considered full time at the graduate level. Course load maximums are 12 credits in a regular semester, 8 credits in the summer term and 3 credits in the intersession.

### PROGRAM-SPECIFIC COURSES REQUIRED

A general research methods course is required of all students. This must be a graduate-level course, and if not taken at the iSchool (L I S 603 Research and Assessment for Information Professionals) the student must present a transcript and, if possible, a syllabus to the course. In addition, students must take Ph.D. research seminar L I S 910 Smr-Research Design & Methodology for Library & Information Studies and are required to take a minimum of two semesters of statistics and one semester of qualitative research. Each student must take at least one course in each of three (out of four) designated areas to develop a breadth of knowledge about the field.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.5 GPA required

### OTHER GRADE REQUIREMENTS

To remain in good academic standing within the iSchool Ph.D. program, a student must maintain a 3.5 overall GPA, not carry any incomplete grades in courses (other than 999s) for more than 1 semester, and pass all mastery demonstration paper deadlines by appointed deadlines.

### PROBATION POLICY

Students who fail to meet any of the above criteria will receive a letter of warning from the Ph.D. program director placing them on probationary status. They will have one additional semester (not including summer) to change their status. If they do not successfully change their status,

they will be asked to leave the program. If students do not expect to successfully change their status within the probationary semester, they can request that the Ph.D. committee grant a probation extension; however, an extension will be granted only if the student can prove likelihood of success in the upcoming semester. The student should send a letter asking for an extension and providing evidence of likelihood of success to the Ph.D. program director.

## ADVISOR / COMMITTEE

The Information School Ph.D. Committee serves as the Progress Evaluation Committee for doctoral students. Upon admission, the Ph.D. committee chair serves as the default advisor for all students. At any point, the student may switch to a major professor/advisor based on similarities in research interests. The student's doctoral committee shall be five members of the graduate faculty; no fewer than three are to be from the iSchool faculty and at least one shall be from outside the school.

## ASSESSMENTS AND EXAMINATIONS

Each student is required to fulfill at least one teaching practicum and at least two different research practica. Students will demonstrate mastery of the required subject areas and research skills through three mastery demonstration papers and a program portfolio. Presentation and successful defense of a program portfolio and statement of intent constitutes the preliminary examination. Successful defense of the program portfolio and statement of intent constitutes formal acceptance into candidacy for the Ph.D. degree.

## TIME CONSTRAINTS

Completion of the degree should be within a three- to four-year period beyond earning the master's degree.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing their program portfolio and statement of intent may be required to take additional coursework, redefend their program portfolio and statement of intent, and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No; however, coursework in a foreign language may be required if necessary for completing research activities.

## ADMISSIONS

Ph.D. admissions at the Information School require GRE scores, a GPA of 3.0 (on a 4.0 scale) or better in the last 60 hours of academic credit earned; a master's degree in an appropriate field; a detailed written statement of the area of research interest, fit with current faculty and the purpose for pursuing doctoral study; and an interview with the school's Ph.D. committee or other faculty members serving on the committee's behalf. International students must meet the Graduate School's language and degree requirements.

Applicants whose GPA falls below the required level must provide other evidence of academic ability. (Advice on the type of evidence

appropriate to the applicant should be requested from the administrator of the doctoral program.) Applicant qualifications for admission will be reviewed by the school's Ph.D. committee, which will make an admissions recommendation to the director who, in turn, makes a recommendation to the Graduate School. The criteria used in this review include academic promise, the probability that the school's doctoral program will meet the goals and research interests of the applicant, and that the applicant will be able to complete the program successfully. Under certain circumstances, admission may be approved on a probationary basis or with deficiencies. Students will not normally be permitted to continue longer than the first year on probation. For more information see the Ph.D. program admissions page.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to employ specific methodologies appropriate to areas of study.
- Students will be able to demonstrate basic capacities to employ new digital data collection and analysis methodologies.
- Students will be able to demonstrate knowledge of a range of theories in research areas as well as core LIS theories.
- Students will be able to add to existing bodies of theory, scholarship or scientific knowledge through critique, testing or extension in scholarly output.
- Students will be able to demonstrate scholarly excellence.
- Students will be able to demonstrate skills and experience in teaching.

### PROFESSIONAL CONDUCT

- Students will be able to demonstrate mastery of scholarly writing genre.
- Students will be able to demonstrate strong oral communication skills.
- Students will be able to demonstrate involvement in the LIS academic community.

## PEOPLE

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## LIBRARY AND INFORMATION STUDIES, SPECIALIST CERTIFICATE

### REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

## **SPECIALIST CERTIFICATE**

Specialist Certificate

## **MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

42 credits

## **MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

24 graduate credits after admission to the Information School

## **MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

Half of degree coursework (21 out of 42 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

All coursework must be above 300 level and may not include iSchool undergraduate coursework.

## **PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

Students may count up to 10 credits of approved graduate coursework from other institutions.

## **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

No credits from a UW–Madison undergraduate degree may count toward the specialist certificate.

## **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

No courses taken as UW–Madison Special student may count toward the specialist certificate.

## **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON INFORMATION SCHOOL M.A.**

Students may count up to 10 credits of graduate coursework from an iSchool M.A. degree.

## **CREDITS PER TERM ALLOWED**

8 to 12 credits in a regular semester is considered full time at the graduate level.

## **PROGRAM-SPECIFIC COURSES REQUIRED**

Up to half of the credits should be from academic units related to the student's specialization (including but not limited to the iSchool). All coursework must be 300 level or above and may not include iSchool undergraduate courses (e.g., 301, 351). 999s and 990s are appropriate.

See program website for details.

## **OVERALL GRADUATE GPA REQUIREMENT**

At least a 3.0 GPA required; see program website for more details.

## **OTHER GRADE REQUIREMENTS**

3.0 GPA required.

## **PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

See program webpage for any program-specific additional probation policies.

## **ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

See program webpage for any program-specific additional details.

## **ASSESSMENTS AND EXAMINATIONS**

The candidate is required to prepare and publicly defend a major project/paper in addition to completing credit hour requirements.

## **TIME CONSTRAINTS**

Students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

See program website for any program-specific time constraints.

## **LANGUAGE REQUIREMENTS**

No language requirements unless assigned by program.

## **PEOPLE**

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## **PRINT CULTURE HISTORY, DOCTORAL MINOR**

## **REQUIREMENTS**

Students are required to take a minimum of 12 credits in courses whose subjects may range from the history of mass communications, cartography, literature, education, consumer movements, and library and information studies, to subjects dealing with gender, race, age, social class, and sexual orientation issues. At least 3 credits must be from

seminar studies at the 900 level. To determine if a course is eligible, contact the print culture doctoral minor director.

## PEOPLE

**Faculty:** Professors Eschenfelder (director), Downey, Kim, Whitmire; Associate Professors Smith; Assistant Professors Rubel, Senchyne, Willett

## INSTITUTE FOR CLINICAL AND TRANSLATIONAL RESEARCH

**Administrative Unit:** Institute for Clinical and Translational Research

**College/School:** School of Medicine and Public Health

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S. in Clinical Investigation; Ph.D. in Clinical Investigation

**Minors and Certificates:** Doctoral Minor in Clinical Investigation; Graduate/Professional Certificate in Clinical and Community Outcomes; Graduate/Professional Certificate in Fundamentals of Clinical Research

The Institute for Clinical and Translational Research (ICTR) is the administrative home of the M.S. and Ph.D. in clinical investigation, and the certificates in clinical and community outcomes research, and fundamentals of clinical research.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Clinical Investigation, Doctoral Minor (p. 403)
- Clinical Investigation, M.S. (p. 404)
- Clinical Investigation, Ph.D. (p. 405)
- Clinical and Community Outcomes, Graduate/Professional Certificate (p. 407)
- Fundamentals of Clinical Research, Graduate/Professional Certificate (p. 408)

## CLINICAL INVESTIGATION, DOCTORAL MINOR

Doctoral or professional program students in engineering, nursing, veterinary medicine, and other disciplines may want to minor in clinical investigation as a way to learn about applications of science to clinical disciplines. A doctoral minor in clinical investigation provides students with a focus on interdisciplinary clinical and translational research while they pursue a related scientific area of graduate study.

## REQUIREMENTS

**Minor curriculum.** The doctoral minor in clinical investigation requires 10 credits. The list of requirements follows.

**Doctoral minor students should be aware of two policies:**

1. Students with permission to take the 1-credit required biostats course, who then take ethics and electives courses for the low end of possible credits might have to take another elective course, because 10 credits minimum are required for the minor.
2. No course that counts for the major can also count for the minor. Frequently this means that students must take two ethics courses—one for the major and one for the minor.

### Courses

- **B M I/STAT 541 Introduction to Biostatistics** (3 credits) or **B M I 699 Independent Study** (1 credit). Both courses require instructor consent. The 1-credit B M I 699 Independent Study is for students who have prior statistics (not biostatistics) coursework.
- **B M I/STAT 542 Introduction to Clinical Trials I** (3 credits, spring). Course emphasis is on clinical trials study design. B M I/STAT 541 Introduction to Biostatistics (or equivalent) is a prerequisite.
- **One lecture course in responsible (ethical) conduct of research** (1–2 credits) selected from the following list or an equivalent course approved by the executive committee:
  - **MED HIST 545 Ethical and Regulatory Issues in Clinical Investigation** (1 credit, summer)
  - **PHARMACY 800 Research Ethics: Scientific Integrity and the Responsible Conduct of Research** (2 credits, alternate falls, 2018, 2020, etc.)
  - **SURG SCI 812 Research Ethics and Career Development** (2 credits, fall)
  - **OBS&GYN 955 Responsible Conduct of Research for Biomedical Graduate Students** (2 credits, fall)
  - **NURSING 802 Ethics and the Responsible Conduct of Research** (1 credit, spring)
  - **ONCOLOGY 675 Advanced or Special Topics in Cancer Research** (listed as Advanced or Special Topics, 1 credit, spring)
- **Elective courses** to reach at least 10 credits total from the GPCI curriculum, selected from the following list of options:
  - **NURSING/MEDICINE/POP HLTH 705 Seminar in Interdisciplinary Clinical Research Evidence** (2 credits, summer)
  - **FAM MED 701 Perspectives in Multidisciplinary Clinical & Translational Research** (2 credits, fall). An overview of clinical investigation and translational research.
  - **POP HLTH/SOC 797 Introduction to Epidemiology** (3 credits, fall)
  - **B M I 544 Introduction to Clinical Trials II** (3 credits, fall). Course emphasis is on clinical trial implementation and management, regulatory requirements, and data collection and management strategies. B M I/STAT 541 Introduction to Biostatistics (or equivalent), B M I/STAT 542 Introduction to Clinical Trials I, and instructor consent are prerequisites.

**Procedure to declare the minor in clinical investigation.** After discussion with the major faculty advisor, the student completes and submits the Intent to Complete a Ph.D. Minor in Clinical Investigation form. The form specifies the proposed courses proposed to meet the minor requirements, the timetable for taking the courses, and a signature by the student's advisor. Clinical Investigation is an External (Option A) minor.

## ADMISSIONS

Admissions: Sally Wedde, Graduate Program in Clinical Investigation (rec-education@hslc.wisc.edu)

## PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Smith; Associate Professor Yen

## CLINICAL INVESTIGATION, M.S.

Clinical investigation is a field in which teams of health care professionals, biostatisticians, and others imagine, design, and conduct clinical research, and then take discoveries to human or animal patient populations in the health care system or in communities.

The graduate program in clinical investigation (GPCI) offers a 30-credit M.S. degree, 51-credit Ph.D. degree and a 10-credit minor in clinical investigation for doctoral students in other programs. GPCI is housed in the UW Institute for Clinical and Translational Research (ICTR) and is designed in response to a need for clinical research training programs. The ICTR Clinical and Translational Science Award (CTSA) facilitates the UW–Madison's ability to offer a spectrum of graduate programs in clinical research.

This applied, clinical and translational graduate program complements the areas of clinical research training by the population health graduate program. The focus of GPCI is to provide physicians, clinical scientists, and other health care professionals with the knowledge and skills needed to conduct and translate basic science discoveries into clinical applications through patient (human or animal)–oriented research. The graduate program trains students to help move research toward solutions for patient populations more quickly.

Representatives from the Schools of Medicine and Public Health, Nursing, Pharmacy and Veterinary Medicine, and the College of Engineering met as a task force in 2006 to design the program. All ICTR academic partners are represented in the curriculum. They are joined by partner Marshfield Clinic as members of the faculty executive committee that guides the program.

The curriculum draws from existing courses in the partner schools, and includes new courses developed exclusively for the GPCI. Coursework provides a solid foundation in research methods and analysis, including biostatistics, study design, and ethical conduct. Through electives and a research requirement, students pursue their own areas of specialization in patient-oriented clinical research.

The knowledge and skills acquired while earning a degree in clinical investigation can be applied to jobs in academic institutions; private industry, including pharmaceutical companies, insurers and managed care organizations; government agencies; non-profit organizations; and a range of local to international organizations.

Applicants ideally will have a health professional degree (M.D., DVM, Pharm.D., Ph.D., BSN, BSE, MPT, DPT). Clinical Investigation students are unique among UW–Madison graduate students because they enter the

program with a terminal degree (with exceptions) and they are seeking training to directly apply their work with patients.

Full-time and part-time enrollment is available. Most core courses meet at 4 p.m. or later, to accommodate the schedules of working health professionals.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

34 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, an M.S. student's graduate coursework from other institutions no longer than five years ago may count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, M.S. and Ph.D. students may be allowed to count graduate-level courses that they took as a Special student. Because the program provides flexibility to clinical professionals who frequently begin their graduate careers part time as Special students, the program may allow up to 15 such credits for M.S. and Ph.D. students. Courses taken as a Special student numbered under the 700 level do not count toward the 50% graduate coursework requirement.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

All M.S. students are required to complete 6 elective credits.

Contact program for list of specific courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all core curriculum coursework.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

M.S. students select their faculty advising (degree) committees by the end of the first semester in the program. Students and the advisors who sign the form are asked to meet annually or more.

## ASSESSMENTS AND EXAMINATIONS

Defense of M.S. thesis required. The thesis is submitted in writing to the degree committee two weeks prior to the defense date; the thesis is defended verbally during the defense meeting.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The program accepts applications each February 1 for the M.S. and Ph.D. for the fall term only. Exceptions for spring admission are made rarely and only if the applicant has taken fall prerequisite courses.

The faculty executive committee for the program considers all aspects of each application. The applicant must meet the minimum requirements of the Graduate School plus those of the program, listed here:

- Have a focused area of interest in patient-oriented clinical research and a passion for continuing in a career in patient-oriented research
- Ideally have a health professional degree (M.D., DVM, Pharm.D., Ph.D., BSN, BSE, MPT, DPT).
- Have GRE scores if the applicant does not have a graduate or medical professional degree from a U.S. institution
- Identify a primary advisor to mentor and support the applicant throughout graduate study.

Acceptance into the program will depend in part on identification of a research program that aligns with a student's research interests

and career goals, a student's fit with the program and likelihood of successfully completing a graduate degree. Acceptance into the program does not assure funding. Identification of a faculty advisor and research area of study is a key consideration in the admissions process but does not guarantee admission.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

**As an active scholarly participant in a multidisciplinary research team, conduct research projects that:**

- Lead to translation of research among the laboratory, clinic and population through technological or systems innovations, including but not limited to drug therapies, medical devices, biological materials, clinical processes, and/or behavioral interventions.
- Are appropriately patient-oriented.
- Draw on the expertise of collaborators in multiple disciplines.
- Integrate clinical and translational science across multiple departments, schools and colleges, clinical and research institutes, and healthcare delivery organizations.
- Determine when it is appropriate to use a patient-oriented research design to investigate a translational clinical problem.
- Understand the principles of multidisciplinary patient-oriented clinical research protocols.
- Analyze, interpret and report research findings of clinical studies through peer-reviewed scientific channels and to a lay audience.

### PROFESSIONAL CONDUCT

- Apply and foster professional, ethical and responsible conduct of clinical research.

## PEOPLE

**Faculty:** Adams, Asthana, Barrett, Benca, Carnes, Chappell, Coen, Connor, DeMets, Dempsey, Doepfer, Drezner, Emborg, Fowler, Gangnon, Gern, Gumperz, Heiderscheit, Ikonomidou, Iskandar, Jackson, Jarjour, Kahl, Keely, Kennedy, Kent, Kim, Li, Liu, Mathur, Mendonca, O'Connor, Page, Pearce, Pyle, Rabago, Raval, Reeder, Safdar, Sheibani, Smith, Sondel, Sorkness, Suresh, Thibeault, Wald

## CLINICAL INVESTIGATION, PH.D.

Clinical investigation is a field in which teams of health care professionals, biostatisticians, and others imagine, design, and conduct clinical research, and then take discoveries to human or animal patient populations in the health care system or in communities.

The graduate program in clinical investigation (GPCI) offers a 30-credit M.S. degree, 51-credit Ph.D. degree and a 10-credit minor in clinical investigation for doctoral students in other programs. GPCI is housed in the UW Institute for Clinical and Translational Research (ICTR) and is designed in response to a need for clinical research training programs. The ICTR Clinical and Translational Science Award (CTSA) facilitates the UW-Madison's ability to offer a spectrum of graduate programs in clinical research.

This applied, clinical and translational graduate program complements the areas of clinical research training by the population health graduate program. The focus of GPCI is to provide physicians, clinical scientists, and other health care professionals with the knowledge and skills needed to conduct and translate basic science discoveries into clinical applications through patient (human or animal)–oriented research. The graduate program trains students to help move research toward solutions for patient populations more quickly.

Representatives from the Schools of Medicine and Public Health, Nursing, Pharmacy and Veterinary Medicine, and the College of Engineering met as a task force in 2006 to design the program. All ICTR academic partners are represented in the curriculum. They are joined by partner Marshfield Clinic as members of the faculty executive committee that guides the program.

The curriculum draws from existing courses in the partner schools, and includes new courses developed exclusively for the GPCI. Coursework provides a solid foundation in research methods and analysis, including biostatistics, study design, and ethical conduct. Through electives and a research requirement, students pursue their own areas of specialization in patient-oriented clinical research.

The knowledge and skills acquired while earning a degree in clinical investigation can be applied to jobs in academic institutions; private industry, including pharmaceutical companies, insurers and managed care organizations; government agencies; non-profit organizations; and a range of local to international organizations.

Applicants ideally will have a health professional degree (M.D., DVM, Pharm.D., Ph.D., BSN, BSE, MPT, DPT). Clinical Investigation students are unique among UW–Madison graduate students because they enter the program with a terminal degree (with exceptions) and they are seeking training to directly apply their work with patients.

Full-time and part-time enrollment is available. Most core courses meet at 4 p.m. or later, to accommodate the schedules of working health professionals.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

60 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, a Ph.D. student's graduate coursework from other institutions no longer than ten years ago may count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, M.S. and Ph.D. students may be allowed to count graduate level courses that they took as a Special student. Because the program provides flexibility to clinical professionals who frequently begin their graduate careers part time as Special students, the program may allow up to 15 such credits for M.S. and Ph.D. students. Courses taken as a Special Student numbered under the 700 level do not count toward the 50% graduate coursework requirement.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact program for list of specific courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Breadth in the clinical investigation doctoral program is achieved as described in the graduate program handbook, located here (<https://ictr.wisc.edu/documents/overview-brochure-for-graduate-program-in-clinical-investigation>).

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all core curriculum coursework.

### PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

Ph.D. students select their faculty advising (degree) committees by the end of the first semester in the program. Students and the advisors who sign the form are asked to meet annually or more; dissertators twice a year or more.

## ASSESSMENTS AND EXAMINATIONS

Oral preliminary exam required.

Defense of Ph.D. dissertation required. The thesis is submitted in writing to the degree committee two weeks prior to the defense date; the thesis is defended verbally during the defense meeting.

## TIME CONSTRAINTS

Doctoral students are expected to pass the final oral examination and deposit the dissertation no later than five years from the date of passing the preliminary examination. The oral examination is the oral defense of the completed dissertation. Full-time students generally complete the dissertation within two years of the preliminary examination. Part-time students may take longer.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The program accepts applications each February 1 for the M.S. and Ph.D. for the fall term only. Exceptions for spring admission are made rarely and only if the applicant has taken fall prerequisite courses.

The faculty executive committee for the program considers all aspects of each application. The applicant must meet the minimum requirements of the Graduate School plus those of the program, listed here:

- Have a focused area of interest in patient-oriented clinical research and a passion for continuing in a career in patient-oriented research
- Ideally have a health professional degree (M.D., DVM, Pharm.D., Ph.D., BSN, BSE, MPT, DPT).
- Have GRE scores if the applicant does not have a graduate or medical professional degree from a U.S. institution
- Identify a primary advisor to mentor and support the applicant throughout graduate study.

Acceptance into the program will depend in part on identification of a research program that aligns with a student's research interests and career goals, a student's fit with the program and likelihood of successfully completing a graduate degree. Acceptance into the program does not assure funding. Identification of a faculty advisor and research area of study is a key consideration in the admissions process but does not guarantee admission.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

Design, execute and lead research projects that:

- Lead to translation of research among the laboratory, clinic and population through technological or systems innovations, including but not limited to drug therapies, medical devices, biological materials, clinical processes, and/or behavioral interventions.
- Are appropriately patient-oriented.
- Draw on the expertise of collaborators in multiple disciplines.
- Integrate clinical and translational science across multiple departments, schools and colleges, clinical and research institutes, and healthcare delivery organizations.
- Determine when it is appropriate to use a patient-oriented research design to investigate a translational clinical problem.
- Analyze, interpret and report research findings of clinical studies through peer-reviewed scientific channels and to a lay audience.
- Disseminate knowledge through teaching and mentoring students/trainees.

### PROFESSIONAL CONDUCT

- Apply and foster professional, ethical and responsible conduct of clinical research.

## PEOPLE

**Faculty:** Adams, Asthana, Barrett, Benca, Carnes, Chappell, Coen, Connor, DeMets, Dempsey, Doepfer, Drezner, Emborg, Fowler, Gangnon, Gern, Gumperz, Heiderscheit, Ikonomidou, Iskandar, Jackson, Jarjour, Kahl, Keely, Kennedy, Kent, Kim, Li, Liu, Mathur, Mendonca, O'Connor, Page, Pearce, Pyle, Rabago, Raval, Reeder, Safdar, Sheibani, Smith, Sondel, Sorkness, Suresh, Thibeault, Wald

## CLINICAL AND COMMUNITY OUTCOMES, GRADUATE/ PROFESSIONAL CERTIFICATE

### REQUIREMENTS

The certificate in clinical and community outcomes research curriculum consists of five courses and one project for a total of 14 to 15 credit hours. Depending on course load, students may be able to complete course requirements within two years.

| Code                                                             | Title                                                         | Credits |

| I SY E 961 Graduate Seminar in Industrial Engineering <sup>4</sup>        |       |
| Total Credits                                                             | 14-15 |

<sup>1</sup> The certificate advisor can help students choose courses that qualify as fulfilling these requirements. At least one of the courses must be from outside the student's major. For important details and a list of suggested courses, see "Electives: Certificate in Clinical and Community Outcomes Research," under "Curriculum" on the program website (<https://ictr.wisc.edu/T2TRCertificate>).

<sup>2</sup> See "Project" under "Curriculum" on the program website (<https://ictr.wisc.edu/T2TRCertificate>).

<sup>3</sup> POP HLTH 990 Research is offered through the Health Innovations Program (HIP). AQORN is an informal lunchtime seminar that is open to University of Wisconsin faculty, staff, and students interested in health services research. AQORN meets for 90 minutes, sometimes as frequently as twice a month. At each meeting, someone who has a research project in progress presents information about their project. Then the group discusses and exchanges information and ideas relevant to the project. See the program website (<https://ictr.wisc.edu/T2TRCertificate>) for course-credit requirements and enrollment procedures.

<sup>4</sup> I SY E 961 Graduate Seminar in Industrial Engineering is offered through the Department of Industrial and Systems Engineering. Since I SY E 961 is not offered on a regular basis, the alternative is for a student to sign up for a one-credit independent study with Professor Pascale Carayon ([carayon@engr.wisc.edu](mailto:carayon@engr.wisc.edu) ([Carayon@ie.engr.wisc.edu](mailto:Carayon@ie.engr.wisc.edu))). The student will be required to watch all of the patient safety seminars (SEIPS—Systems Engineering Initiative for Patient Safety) that have been videotaped over the years. The student will write two one-page summaries of two seminars that are due on the last day of class. The SEIPS seminars are available on the Video Library website (<https://videos.med.wisc.edu>) > Series > Community Academic Partnership (CAP) Patient Safety.

## GRADUATE/PROFESSIONAL CERTIFICATE PREREQUISITES AND APPLICATION AND ENROLLMENT PROCEDURES

Graduate and professional students from any discipline are eligible to apply for enrollment in the graduate/professional certificate program. To be considered for admission, complete the following application procedures.

1. Print and complete the certificate application form (available on the program website (<https://ictr.wisc.edu/T2TRCertificate>)).
2. Send the completed application to Sharon Schumacher, 5137 Cooper Hall, University of Wisconsin, Madison, WI 53705; [scschumache2@wisc.edu](mailto:scschumache2@wisc.edu).
3. Applications are reviewed on a rolling basis by the certificate advisory committee.
4. Notification of admission to the certificate program: If the student has completed the application procedures described above, notification of the admission decision will be received within three weeks. Students with questions about the status of the application should contact Sharon Schumacher at [scschumache2@wisc.edu](mailto:scschumache2@wisc.edu).
5. After the student is admitted, the certificate advisory committee will review the stated research interests and recommend an advisor. An objective is to match students with an advisor from a discipline other than their own, to expose students to a variety of perspectives. Students will be notified with the name and contact information of their advisor. They should schedule a meeting with the certificate advisor within the first month of the certificate program to identify learning and career objectives, and to discuss the program in relation to student goals.
6. **Note to Ph.D. students:** Ph.D. students may want to start the graduate/professional certificate program early enough to be finished before starting the dissertation because university policy states: "If a dissertator wants to pursue a graduate degree or certificate in another area, the dissertator fee status will be discontinued and regular graduate fees will be assessed, with possible consequences listed above." See the Graduate School's policy on Dissertator Status (<https://grad.wisc.edu/acadpolicy/#dissertationstatus>).

## FUNDAMENTALS OF CLINICAL RESEARCH, GRADUATE/PROFESSIONAL CERTIFICATE

**Administrative Unit:** Institute for Clinical and Translational Research  
**College/School:** School of Medicine and Public Health  
**Minors and Certificates:** Graduate/Professional Certificate

To conduct patient-oriented clinical studies adequately, it is necessary to understand the principles of research design and statistical analysis. With increasing complexities in clinical research, it is imperative that clinical researchers receive a minimum training in clinical research methods. The objective of the certificate in the fundamentals of clinical research is to provide formalized training in clinical research methodology and a practicum in research design and statistical analysis in patient-oriented clinical research. Areas of study include: biostatistics, epidemiology, research ethics and the responsible conduct of research, and clinical trials design and implementation.

## ADMISSIONS

### APPLICATION GUIDELINES

The Institute for Clinical and Translational Research (ICTR) is the administrative home of the certificate in clinical and community outcomes research. Detailed information about the curriculum, admission requirements, application procedures, and student services coordinators is posted on the ICTR website (<http://www.ictr.wisc.edu>).

Whether a student enrolls in the graduate/professional certificate or capstone certificate program will depend on their educational goals. (Course requirements are the same for all.)

## REQUIREMENTS

The certificate in fundamentals of clinical research consists of six required courses for a total of 16 semester credits.

| Code                                                                         | Title                                                        | Credits |
|------------------------------------------------------------------------------|--------------------------------------------------------------|---------|
| <b>Required Courses</b>                                                      |                                                              |         |
| B M I/STAT 541                                                               | Introduction to Biostatistics                                | 3       |
| B M I/STAT 541                                                               | Introduction to Biostatistics                                | 3       |
| B M I 544                                                                    | Introduction to Clinical Trials II                           | 3       |
| B M I/STAT 546                                                               | Practicum in Clinical Trial Data Analysis and Interpretation | 3       |
| Select one lecture course in ethical conduct of research from the following: |                                                              | 1-2     |
| SURG SCI 812                                                                 | Research Ethics and Career Development                       |         |
| MED HIST 545                                                                 | Ethical and Regulatory Issues in Clinical Investigation      |         |
| NURSING 802                                                                  | Ethics and the Responsible Conduct of Research               |         |
| ONCOLOGY 675                                                                 | Advanced or Special Topics in Cancer Research                |         |
| POP HLTH/SOC 797                                                             | Introduction to Epidemiology                                 | 3       |
| Total Credits                                                                |                                                              | 16-17   |

## ADMISSIONS

Applications to the certificate program are considered on a rolling basis.

## INSTITUTE FOR REGIONAL AND INTERNATIONAL STUDIES

**Administrative Unit:** Institute for Regional and International Studies

**College/School:** College of Letters & Science

**Admitting Plans:** M.A.

**Degrees Offered:** M.A. in Latin American, Caribbean, and Iberian Studies; M.A. in Russian, East European and Central Asian Studies; M.A. in Southeast Asian Studies

**Minors and Certificates:** Doctoral Minor in African Studies; Doctoral Minor in East Asian Studies; Doctoral Minor in Global Studies; Doctoral Minor in Latin American, Caribbean, and Iberian Studies; Doctoral Minor in Russian; Doctoral Minor in Russian, East European and Central Asian Studies; Doctoral Minor in Southeast Asian Studies; Graduate/Professional Certificate in African Studies; Graduate/Professional Certificate in European Studies; Graduate/Professional Certificate in Russian, East European and Central Asian Studies; Graduate/Professional Certificate in Southeast Asian Studies

## AFRICAN STUDIES

The African Studies Program facilitates interdisciplinary teaching and research among scholars who focus on Africa. The program is recognized nationally for its excellence in academic offerings. More than 80 faculty are members of the program and offer courses in 35 departments.

## EAST ASIAN STUDIES

The Center for East Asian Studies acts as a clearinghouse and coordinating center bringing together an interdisciplinary group of faculty, staff, and students interested in the study of China, Japan, Korea, and Tibet. The center promotes and supports study of the region through academic programs, conferences, public lectures, and fellowships. Although the center does not presently offer a graduate degree, it does offer a doctoral minor and also supports students in other graduate programs who wish to focus on the East Asian region. More than 40 core and affiliate faculty members offer courses related to East Asia in the humanities, social sciences, and other fields through approximately 20 departments in six schools and colleges. Graduate students pursuing study of Chinese, Japanese, Korean, Tibetan, or certain other Chinese minority languages may apply for Foreign Language and Area Studies (FLAS) Fellowships and other awards administered by the center. The East Asian Collection of Memorial Library houses a large collection of vernacular and English-language materials on East Asia.

## EUROPEAN STUDIES

The European studies program, in cooperation with the Jean Monnet Centre of Excellence (JMCE), and the DAAD Center for German and European Studies (CGES) promotes knowledge and understanding of Europe both on and off campus. Established in 1968, the graduate/professional certificate program provides integrated interdisciplinary studies on contemporary Europe for graduate students. The program brings together scholars on campus interested in different aspects of Europe to discuss topics of mutual interest. More than twenty UW–Madison departments offer courses on Europe (apart from language courses), providing the largest number of courses on any region of the world other than the United States.

## GLOBAL STUDIES

The global studies minor is both interdepartmental and interdisciplinary. Global Studies and the Center for World Affairs (WAGE) jointly support the minor, which draws on faculty expertise and courses from more than 30 departments and programs across all colleges. The vast majority of listed courses are housed in Letters & Science departments.

## LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES

The Latin American, Caribbean, and Iberian Studies (LACIS) Program offers three graduate programs: master of arts, a doctoral minor, and a dual degree in law and Latin American, Caribbean, and Iberian studies.

The mission of the graduate program is to provide an interdisciplinary foundation for the study of Latin America, the Caribbean, Spain, and Portugal. The University of Wisconsin–Madison is nationally recognized for excellence in research and teaching on these regions. The LACIS program includes a core faculty of more than 50 members and course offerings in 40 disciplines and professional schools, including agricultural and applied economics, anthropology, business, community and environmental sociology, comparative literature, environmental studies, gender and women's studies, geography, history, law, music, political science, population health, Quechua, Yucatec Maya, sociology, and Spanish and Portuguese.

Core faculty have received extensive national and international recognition. Faculty research interests include development and labor economics; Andean ethnohistory and ethnology; African Diaspora art;

conservation of the neotropics; cultural geography; social history of Latin America; democratic consolidation; Brazilian social stratification; comparative social movements; Luso-Brazilian literature and culture; colonial and modern Latin American literature, film, and culture; Spanish literature from the medieval to the modern period; and political economy. UW–Madison also publishes the journal *Luso-Brazilian Review*.

While the majority of candidates in the program are from the United States, a significant number are from Latin America, the Caribbean, and Iberia. Since 1994, 30 percent of the program's candidates have been Latino/Latin American/Caribbean. Seventy percent have been women. Funding assistance for candidates specializing in Latin America, the Caribbean, and Iberia includes Title VI Foreign Language and Area Studies (FLAS) fellowships, Helen Firstbrook Franklin Fellowship, Advanced Opportunity Fellowship (if applicable), Latin America course (260) teaching assistantships, and the Tinker-Nave Field Grant Program. Please contact the program office for more information on funding opportunities.

## RUSSIAN, EAST EUROPEAN AND CENTRAL ASIAN STUDIES

The Russian, East European and Central Asian studies (REECAS) program draws on the strength of long-established programs in anthropology, language and literature, political science, geography, history, folklore, sociology, and law. Faculty research interests include ethnicity and nationalism, legal problems of privatization, the politics and cultures of borderland regions in Eurasia, and the thought and politics of East-Central Europe.

Applicants are strongly encouraged to apply for the Foreign Language and Area Studies (FLAS) (<http://flas.wisc.edu>) fellowship, which is administered through CREECA and is due approximately February 15.

The departments offering courses pertaining to Russia, Eastern and Central Europe, and Central Asia include Anthropology, Communication Arts, Comparative Literature and Folklore Studies, Geography, History, Jewish Studies, Journalism, Languages and Cultures of Asia, Law, Political Science, Slavic Languages and Literature, Scandinavian Studies, Sociology, and Theatre and Drama.

## SOUTHEAST ASIAN STUDIES

The Center for Southeast Asian Studies offers a formal graduate program in Southeast Asian studies and facilitates interdisciplinary study on Southeast Asia in intercollege, professional, and other degree programs throughout the university. The Southeast Asian studies program provides students with the opportunity to concentrate their study of this dynamic region in several disciplines and professional areas: anthropology, communications (journalism), development, education, economics, environmental studies, geography, history, linguistics, literature, music and dance (performing arts), political science, public health, religion, sociology, and urban and regional planning, as well as natural resources, business, and law, and public policy. Faculty expertise and library holdings are particularly strong for in-depth study of Cambodia, Indonesia, Laos, Philippines, Thailand, and Vietnam. The goal of the program is to provide students with a strong area and language background on Southeast Asia and to prepare them for a range of academic and professional careers.

Language study is a critical component in area studies, and the center encourages students to develop proficiency in at least one Southeast Asian language. During the academic year, instruction is offered through the Department of Asian Languages and Cultures in five Southeast

Asian languages: Filipino (Tagalog), Hmong, Indonesian, Thai, and Vietnamese. Each language is offered at two or more levels of instruction, with advanced readings and literature courses available in Indonesian. The center also facilitates participation in the Southeast Asian Studies Summer Institute (SEASSI), which provides instruction during the summers at multiple levels in eight languages of the region: Burmese, Filipino, Hmong, Indonesian/Malaysian, Javanese, Khmer, Lao, Thai, and Vietnamese, and depending on enrollments, Javanese. Though SEASSI is hosted by the center and based in Madison, it is open to students from anywhere. More information is available on the SEASSI website (<http://seassi.wisc.edu>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- African Studies, Doctoral Minor (p. 411)
- African Studies, Graduate/Professional Certificate (p. 412)
- East Asian Studies, Doctoral Minor (p. 413)
- European Studies, Graduate/Professional Certificate (p. 415)
- Global Studies, Doctoral Minor (p. 417)
- Latin American, Caribbean, and Iberian Studies, Doctoral Minor (p. 417)
- Latin American, Caribbean, and Iberian Studies, M.A. (p. 418)
- Russian, Doctoral Minor (p. 420)
- Russian, East European and Central Asian Studies, Doctoral Minor (p. 420)
- Russian, East European and Central Asian Studies, Graduate/Professional Certificate (p. 420)
- Russian, East European and Central Asian Studies, M.A. (p. 421)
- Southeast Asian Studies, Doctoral Minor (p. 425)
- Southeast Asian Studies, Graduate/Professional Certificate (p. 426)
- Southeast Asian Studies, M.A. (p. 426)

## PEOPLE

### AFRICAN STUDIES

**Faculty:** Professors Hutchinson (chair) (African Studies/Anthropology), Adell (Afro-American Studies), Anderson (Music), Barrows (Agricultural and Applied Economics), Baumann (Nursing), Bernault (History), Bershady (Astronomy), Bloch (Curriculum and Instruction), Bosu (Veterinary Medicine), Bunn (Anthropology), Carter (Agricultural and Applied Economics), Chavas (Agricultural and Applied Economics), Christensen (Animal Health and Biomedical Sciences), Cowell (African Languages and Literature), Drewal (Art History/Afro-American Studies), Fair (Journalism and Mass Communication), Gallagher (Astronomy), Gjerde (Medicine and Public Health), Graziano (Medicine and Public Health), Haq (Medicine and Public Health), Hauner (African Languages and Literature), Hewson (Curriculum and Instruction), Johnson-Powell (Medicine and Public Health), Klug (Law), Ladson-Billings (Medicine and Public Health), Langston (Forest and Wildlife Ecology), McClintock (English), Memon (Languages and Cultures of Asia), Naughton (Geography), Nixon (English), Ntambi (Biochemistry), Olaniyan (African Languages and Literature/English), Payne (Political Science), Popkewitz (Curriculum and Instruction), Posner (Agronomy), Reed (Animal Sciences), Reschovsky (Agricultural and Applied Economics), Schatzberg (Political Science), Scheub (African Languages and Literature), Schleicher (African Languages and Literature), Seidman

(Sociology), Shapiro (Agricultural and Applied Economics), Songolo (African Languages and Literature/French and Italian), Tesfagiorgis (Afro-American Studies), Thompson (Law), Tripp (Political Science/Gender and Women's Studies), Turner (Geography), Verna (Art), Wilcots (Astronomy), Zeichner (Curriculum and Instruction); Associate Professors Al-Ghadeer (African Languages and Literature), Anstett (Family Medicine), Chamberlain (History), Conway (Communication Arts), Conway (Pediatrics), Foltz (Agricultural and Applied Economics), Jenson (French and Italian), Lambert (Anthropology), Madureira (Comparative Literature), Nesper (Anthropology), Pickering (Anthropology), Sapega (Spanish and Portuguese), Stambach (Educational Policy Studies), Sweet (History); Assistant Professors Hark (Design), Keller (History of Science), Kendall (Educational Policy Studies), Kodesh (History), Sellers (Social Work), Straus (Political Science), Wendland (Medicine and Public Health/Anthropology)

## EAST ASIAN STUDIES

**Faculty:** Professors Davis (Engineering Professional Development), Dong (Design Studies/SOHE), Dunne (Asian Languages and Cultures), Furumoto (Theater and Drama), Kern (Asian Languages and Cultures), Li (Linguistics), McGloin (Asian Languages and Cultures), Mori (Asian Languages and Cultures), Nienhauser (Asian Languages and Cultures), Ohnesorge (Law), Ohnuki-Tierney (Anthropology), Pan (Communication Arts), Phillips (Art History), Sidel (Law), Ridgely (director) (Asian Languages and Cultures), Young (History), Zhou (Anthropology); Associate Professors Cheng (History), Dennis (History), D'Etcheverry (Asian Languages and Cultures), Geyer (Asian Languages and Cultures), Huang (Asian Languages and Cultures), Huntington (Asian Languages and Cultures), Meulenbeld (Asian Languages and Cultures), Miyamoto (Psychology), Raymo (Sociology), Shi (Agricultural and Applied Economics), Thal (History), Zhang (Asian Languages and Cultures); Assistant Professors Chan (History), Choy (Dance/Education), Fan (Theater and Drama), Kim (History), Kinzley (History), Li (Art History), Lim (Asian Languages and Cultures), Murthy (History), Yang (Asian Languages and Cultures), Zhu (Asian Languages and Cultures)

## EUROPEAN STUDIES

**Faculty:** Chair: Professor Ringe (Political Science); Faculty Steering Committee: Professors Allen (Scandinavian Studies), Brossard (Life Sciences Communication), Covington (European Studies), Ferree (Sociology), Klug (Law), Livorni (French and Italian), Olds (Geography), Potter (German), Silberman (German), Wolf (Scandinavian Studies)

## LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES

**Faculty:** Professors Scarano (LACIS director) (History), Allen (Plant Pathology), Albuquerque (Spanish and Portuguese), Apple (Curriculum and Instruction), Barham (Agricultural and Applied Economics), Beilin (Spanish and Portuguese), Bilbija (Spanish and Portuguese), Calderon (Music), Collins (Sociology), Corfis (Spanish and Portuguese), De Ferrari (Spanish and Portuguese), Drewal (Art History), Egea (Spanish and Portuguese), Escalante (Art), Ewig (Gender and Women's Studies), Frantzen (Spanish and Portuguese), Hildner (Spanish and Portuguese), Hill (English/American Indian Studies), Hutchinson (Spanish and Portuguese), Madureira (Spanish and Portuguese), Mallon (History), Marquez (Nelson Institute for Environmental Studies/Political Science), Medina (Spanish and Portuguese), Mello (Business), Naughton (Geography), Neinhuis (Horticulture), Olaniyan (African Languages and Literature), Patz (Nelson Institute for Environmental Studies), Pevehouse (Political Science), Podesta, (Spanish and Portuguese), Popkewitz (Education), Radano (Ethnomusicology), Rojas (Journalism and Mass Communication), Sanchez (Spanish and Portuguese),

Strier (Anthropology), Sweet (History), Sytsma (Botany), Tochon (Curriculum and Instruction), Tripp (Political Science), Waller (Botany and Environmental Studies), Wattieux (Animal Science), Zamora (Spanish and Portuguese), Zepeda (Consumer Science); Associate Professors Alix-Garcia (Agricultural and Applied Economics), Cabrera (Dairy Science), Close (Spanish and Portuguese), Emshwiller (Botany) Gaus (Medicine), Hernandez (Spanish and Portuguese), Huneus (Law), Kallenborn (Design Studies), Marin-Spiotta (Geography), Pellegrini (Spanish and Portuguese), Schechter (Agricultural and Applied Economics), Stafford (Spanish and Portuguese, Walker (Dance) ; Assistant Professor Clayton (Anthropology), Associate Faculty Barrett (Sociology), DiPrete Brown (Global Health), Egon (Spanish and Portuguese), Gemrich (Spanish and Portuguese), Kaaikiola Strobusch (Spanish and Portuguese), Vargas, (LACIS associate director); Lecturers Druc (Anthropology), Muniagurria (Economics), Muyolema (Anthropology), Woodward (Botany)

## RUSSIAN, EAST EUROPEAN AND CENTRAL ASIAN STUDIES

**Faculty:** Professors Gerber (chair) (Sociology), Belodubrovskaya (Communication Arts), Bethea (Slavic Languages), Brenner (Jewish Studies), Buenger (Art History), Chamberlain (History), Ciancia (History), Dale (Art History), Danaher (Slavic Languages), Derin (Languages and Cultures of Asia), Dolinin (Slavic Languages), DuBois (Scandinavian Studies), Evans-Romaine (Slavic Languages), Filipowicz (Slavic Languages), Gehlbach (Political Science), Hendley (Law, Political Science), Herrera (Political Science), Hirsch (History), Hollander (Jewish Studies), Johnson (Educational Leadership and Policy Analysis), Kaiser (Geography), Kepley (Communication Arts), Kydd (Political Science), Lapina (Slavic Languages), Livanos (Comparative Literature), Longinovic (Slavic Languages), McDonald (History), Michels (History), Miernowska (Slavic Languages), Neville (History), Radeloff (Forest and Wildlife Ecology), Reynolds (Slavic Languages), Schamiloglu (Languages and Cultures of Asia), Shevelenko (Slavic), Tishler (CREECA, Slavic Languages), Tumarkin (Slavic Languages), van de Water (Slavic Languages), Wink (History)

## SOUTHEAST ASIAN STUDIES

**Faculty:** Professors Bowie (Anthropology), Cowell (African Languages & Literature), Coxhead (Agricultural & Applied Economics), Gade (Nelson Institute for Environmental Studies), Gunther (Journalism & Mass Communications), Hansen (center director) (History), Macken (Linguistics), A. McCoy (History), Olds (Geography), Rafferty (Asian Languages & Cultures), Sidel (Law), Winichakul (History), Zhou (Anthropology); Associate Professors Nobles (Sociology); Assistant Professors Baird (Geography), Choy (Dance/Asian American Studies), Ho (Curriculum and Instruction/Education), Kim (Anthropology); Faculty Associates Barnard (Asian Languages & Cultures), Cullinane (History/Southeast Asian Studies), M. McCoy (Communication Arts/Southeast Asian Studies); Lecturers Chanprasert-Elbow (Asian Languages & Cultures), Dinh (Asian Languages & Cultures), Lee (Asian Languages & Cultures, Zamar (Asian Languages & Cultures); Librarian Ashmun (Southeast Asia Collection, Memorial Library)

## AFRICAN STUDIES, DOCTORAL MINOR

The doctoral minor in African studies is for students completing a Ph.D. at the University of Wisconsin–Madison who wish to focus their study on Africa. It requires four courses or seminars in two departments outside

the student's major department. The African studies minor is completed under "Minor Option A" of the Graduate School regulations.

## SUGGESTIONS FOR STUDENTS PURSUING THE DOCTORAL MINOR IN AFRICAN STUDIES

- **Early Approval of Minor Program:** It is the student's responsibility as a graduate student to determine that all courses/seminars being completed are eligible for inclusion in the doctoral minor. Students are encouraged to consult with the African Studies Program advisor before taking courses intended to be included in the minor.
- **Language Training:** In planning the program, students should bear in mind the strong desirability of attaining competence in an African language. For many kinds of research, ability to use a language as a research tool is indispensable.
- **Auditing Courses:** In addition to courses and seminars formally taken for credit, students are encouraged to audit additional offerings to develop a broad competence in African studies.

## REQUIREMENTS

- Complete a minimum of 12 graduate credits from the African Studies Program core curriculum ([http://africa.wisc.edu/?page\\_id=26](http://africa.wisc.edu/?page_id=26)) in four courses or seminars outside the major field, and from at least two different departments. (Agricultural and applied economics, and economics courses/seminars are considered to be of one discipline for purposes of the minor.)
- Graduate credit is available only for courses with numbers of 300 or higher.
- At least one of these four units must be a course or seminar at the 700 to 900 level. No thesis or dissertation credits (990) may be used.
- Introductory first-year language courses may not be used for the doctoral minor in African studies even if they are numbered 300 or higher. Language courses may count for the minor only in so far as they do not overlap with departmental language requirements. When a department requires an African language for the Ph.D., language courses may count toward the minor only above and beyond four semesters of study in one language.
- Include no more than one independent reading and research course in the four courses or seminars submitted.

## SPECIAL CIRCUMSTANCES AND CONDITIONS IN COMPLYING WITH THE DOCTORAL MINOR

- **Grade Point Average:** A 3.0 grade point average is required for all courses submitted for the minor.
- **Credits from Other Universities:** Courses from other universities that were taken for graduate credit may count toward the minor with approval of the African Studies Program. Normally, only two of the required four courses or seminars may come from outside the University of Wisconsin–Madison. Exceptions may be proposed by petition.
- **Courses Taken as an Undergraduate:** Courses taken while the candidate was an undergraduate student are not eligible for credit toward the doctoral minor, including courses with graduate-level numbers.

## ADMISSIONS

- Meet with the African Studies Program advisor. To make an appointment, send an email to Aleia McCord, [aleia.mccord@wisc.edu](mailto:aleia.mccord@wisc.edu).
- Submit the Ph.D. Minor in African Studies application form and obtain the approval and signature of major professor. After you have completed the preliminary Ph.D. examinations, the African Studies Program director or designate will sign the warrant indicating completion of the minor.

## PEOPLE

**Faculty:** Professors Hutchinson (chair) (African Studies/Anthropology), Adell (Afro-American Studies), Anderson (Music), Barrows (Agricultural and Applied Economics), Baumann (Nursing), Bernault (History), Bershaday (Astronomy), Bloch (Curriculum and Instruction), Bosu (Veterinary Medicine), Bunn (Anthropology), Carter (Agricultural and Applied Economics), Chavas (Agricultural and Applied Economics), Christensen (Animal Health and Biomedical Sciences), Cowell (African Languages and Literature), Drewal (Art History/Afro-American Studies), Fair (Journalism and Mass Communication), Gallagher (Astronomy), Gjerde (Medicine and Public Health), Graziano (Medicine and Public Health), Haq (Medicine and Public Health), Hauner (African Languages and Literature), Hewson (Curriculum and Instruction), Johnson-Powell (Medicine and Public Health), Klug (Law), Ladson-Billings (Medicine and Public Health), Langston (Forest and Wildlife Ecology), McClintock (English), Memon (Languages and Cultures of Asia), Naughton (Geography), Nixon (English), Ntambi (Biochemistry), Olaniyan (African Languages and Literature/English), Payne (Political Science), Popkewitz (Curriculum and Instruction), Posner (Agronomy), Reed (Animal Sciences), Reschovsky (Agricultural and Applied Economics), Schatzberg (Political Science), Scheub (African Languages and Literature), Schleicher (African Languages and Literature), Seidman (Sociology), Shapiro (Agricultural and Applied Economics), Songolo (African Languages and Literature/French and Italian), Tesfagiorgis (Afro-American Studies), Thompson (Law), Tripp (Political Science/Gender and Women's Studies), Turner (Geography), Verna (Art), Wilcots (Astronomy), Zeichner (Curriculum and Instruction); Associate Professors Al-Ghadeer (African Languages and Literature), Anstett (Family Medicine), Chamberlain (History), Conway (Communication Arts), Conway (Pediatrics), Foltz (Agricultural and Applied Economics), Jenson (French and Italian), Lambert (Anthropology), Madureira (Comparative Literature), Nesper (Anthropology), Pickering (Anthropology), Sapega (Spanish and Portuguese), Stambach (Educational Policy Studies), Sweet (History); Assistant Professors Hark (Design), Keller (History of Science), Kendall (Educational Policy Studies), Kodesh (History), Sellers (Social Work), Straus (Political Science), Wendland (Medicine and Public Health/Anthropology)

## AFRICAN STUDIES, GRADUATE/PROFESSIONAL CERTIFICATE

The graduate certificate in African studies is awarded to students at the graduate level at the University of Wisconsin–Madison to certify advanced training in African studies. It is awarded by the African Studies Program and the Graduate School.

## REQUIREMENTS

- Complete at least 12 credits of African Studies Program core courses or extended core courses taught by an African Studies Program faculty member.
- Graduate credit is available only for courses numbered 300 or higher.
- Maintain a grade point average of 3.0 (on a 4.0 scale).
- Fulfill the requirements for a master's or doctoral degree at the University of Wisconsin–Madison.
- Include 9 credits outside the major department. No more than 3 credits will count from the major department.
- Complete at least one graduate-level seminar in African studies with a grade of AB or better. It may be in the major field.

## ADDITIONAL TERMS

- Include no more than 3 credits of directed reading and research or independent reading (AFRICAN 699 Directed Study, AFRICAN 999 Independent Reading and Research). No thesis/dissertation credits (AFRICAN 990 Thesis) may be included.
- Only one course in a single language may count toward the certificate, but two languages courses count if they are in different African languages.
- **Note:** All African languages and literature courses may count toward the graduate certificate within the limits set by the distribution requirements described above.

## ADMISSIONS

### Application for Graduate Certificate in African Studies

- Contact Aleia McCord, assistant director and advisor, at [aleia.mccord@wisc.edu](mailto:aleia.mccord@wisc.edu).
- Submit the application form for the graduate certificate in African studies and obtain the approval and signature of the major professor. After the student has completed the requirements for the graduate certificate in African studies, the African Studies Program director or designate will inform the major department that the student has earned the certificate.

## PEOPLE

**Faculty:** Professors Hutchinson (chair) (African Studies/Anthropology), Adell (Afro-American Studies), Anderson (Music), Barrows (Agricultural and Applied Economics), Baumann (Nursing), Bernault (History), Bershady (Astronomy), Bloch (Curriculum and Instruction), Bosu (Veterinary Medicine), Bunn (Anthropology), Carter (Agricultural and Applied Economics), Chavas (Agricultural and Applied Economics), Christensen (Animal Health and Biomedical Sciences), Cowell (African Languages and Literature), Drewal (Art History/Afro-American Studies), Fair (Journalism and Mass Communication), Gallagher (Astronomy), Gjerde (Medicine and Public Health), Graziano (Medicine and Public Health), Haq (Medicine and Public Health), Hauner (African Languages and Literature), Hewson (Curriculum and Instruction), Johnson-Powell (Medicine and Public Health), Klug (Law), Ladson-Billings (Medicine and Public Health), Langston (Forest and Wildlife Ecology), McClintock (English), Memon (Languages and Cultures of Asia), Naughton (Geography), Nixon (English), Ntambi (Biochemistry), Olaniyan (African Languages and Literature/English), Payne (Political Science),

Popkewitz (Curriculum and Instruction), Posner (Agronomy), Reed (Animal Sciences), Reschovsky (Agricultural and Applied Economics), Schatzberg (Political Science), Scheub (African Languages and Literature), Schleicher (African Languages and Literature), Seidman (Sociology), Shapiro (Agricultural and Applied Economics), Songolo (African Languages and Literature/French and Italian), Tesfagiorgis (Afro-American Studies), Thompson (Law), Tripp (Political Science/Gender and Women's Studies), Turner (Geography), Verna (Art), Wilcots (Astronomy), Zeichner (Curriculum and Instruction); Associate Professors Al-Ghadeer (African Languages and Literature), Anstett (Family Medicine), Chamberlain (History), Conway (Communication Arts), Conway (Pediatrics), Foltz (Agricultural and Applied Economics), Jenson (French and Italian), Lambert (Anthropology), Madureira (Comparative Literature), Nesper (Anthropology), Pickering (Anthropology), Sapega (Spanish and Portuguese), Stambach (Educational Policy Studies), Sweet (History); Assistant Professors Hark (Design), Keller (History of Science), Kendall (Educational Policy Studies), Kodesh (History), Sellers (Social Work), Straus (Political Science), Wendland (Medicine and Public Health/Anthropology)

## EAST ASIAN STUDIES, DOCTORAL MINOR

Students who are candidates for the Ph.D. degree in another department or program may obtain an interdisciplinary minor in East Asian studies by earning a minimum of 12 credits in East Asian area studies. The credits must be earned in at least three departments other than the major department.

## REQUIREMENTS

## COURSES

Interdisciplinary courses may be taken from many departments. Courses must contain a minimum of 25 percent East Asian content. For a more complete and up to date listing of currently available courses, please contact East Asian Studies. UW–Madison Graduate School regulations concerning the use of cross-listed courses as part of the minor are to be observed when selecting courses. Because the instructors and contents of a course may change over time, please consult the East Asian studies student advisor for confirmation on whether a course may count for a doctoral minor.

**Faculty:** Professors Davis (Engineering Professional Development), Dong (Design Studies/SOHE), Dunne (Asian Languages and Cultures), Furumoto (Theater and Drama), Kern (Asian Languages and Cultures), Li (Linguistics), McGloin (Asian Languages and Cultures), Mori (Asian Languages and Cultures), Nienhauser (Asian Languages and Cultures), Ohnesorge (Law), Ohnuki-Tierney (Anthropology), Pan (Communication Arts), Phillips (Art History), Sidel (Law), Ridgely (director) (Asian Languages and Cultures), Young (History), Zhou (Anthropology); Associate Professors Cheng (History), Dennis (History), D'Etcheverry (Asian Languages and Cultures), Geyer (Asian Languages and Cultures), Huang (Asian Languages and Cultures), Huntington (Asian Languages and Cultures), Meulenbeld (Asian Languages and Cultures), Miyamoto (Psychology), Raymo (Sociology), Shi (Agricultural and Applied Economics), Thal (History), Zhang (Asian Languages and Cultures);

Assistant Professors Chan (History), Choy (Dance/Education), Fan (Theater and Drama), Kim (History), Kinzley (History), Li (Art History), Lim (Asian Languages and Cultures), Murthy (History), Yang (Asian Languages and Cultures), Zhu (Asian Languages and Cultures)

**EUROPEAN STUDIES, GRADUATE/PROFESSIONAL CERTIFICATE**

The European studies program offers graduate students the opportunity to earn a certificate in European studies. Acquiring the certificate is of value to graduate students who need to demonstrate the breadth of their expertise in European studies when applying for jobs. For example, applicants for such academic positions as a joint appointment with a European studies center or a position within a single discipline but teaching courses focused on Europe (e.g., European politics, European history, or the economics of the European Union) are often required to demonstrate a knowledge of the continent that extends beyond their own discipline.

The structure of the certificate is intended to give students the greatest possible flexibility in developing their own programs. Each student will seek admission to the Graduate School through regular procedures and enroll in the specific major program in which the student intends to pursue a higher degree. The student's program of European coursework must be developed by the student in consultation with the advisor and approved by the chair of European studies. Coursework should consist of at least 15 credits in courses from at least three disciplines that either cover Europe as a whole (such as history of Europe since 1945) or that together cover at least two separate European countries (e.g., modern French history, and German cultural studies). Students must also demonstrate a working knowledge of at least one European language in addition to English. (Acceptable proof of knowledge includes transcripts, test scores, or a language evaluation from a faculty member.) To assure competence in the major discipline, the European studies certificate will only be awarded after a student has completed at least the master's degree in the major program.

Doctoral students may use the certificate to fulfill requirements toward a distributed minor.

**REQUIREMENTS****COURSES**

Below is a sampling of regularly offered courses in European studies. Additional courses with significant European content may be offered in any single semester—for more information, consult the website (<http://europe.wisc.edu/certificate>) of the Center for European Studies. All civilization, culture, and literature courses offered in any of the European language departments also qualify for the certificate; language, grammar, and conversation courses do not.

## PEOPLE

**Faculty:** Chair: Professor Ringe (Political Science); Faculty Steering Committee: Professors Allen (Scandinavian Studies), Brossard (Life Sciences Communication), Covington (European Studies), Ferree (Sociology), Klug (Law), Livorni (French and Italian), Olds (Geography), Potter (German), Silberman (German), Wolf (Scandinavian Studies)

## GLOBAL STUDIES, DOCTORAL MINOR

A doctoral minor in global studies will be of interest to doctoral students who plan for careers in public policy, research, and academia, as well as those interested in careers in government, media, and the private and nonprofit sectors. The minor emphasizes systemic approaches to globalization in an interdisciplinary context, thereby distinguishing itself from existing graduate course work in international studies that emphasize specialization in particular areas of the world (e.g., East Asian studies or African studies) or specific aspects of globalization (e.g., global health or global legal studies). The minor is intended to provide doctoral students with an institutional setting to pursue the study of globalization as a complement to their major degree program.

## REQUIREMENTS

Students who minor in global studies will be required to take the core Global Studies Graduate Seminar (INTL ST 720 Global Studies Seminar) and related course work. In addition to the 3-credit Global Studies Graduate Seminar, students must take 9 credits from a list of

approved courses. Students must take one course from three of the four categories:

1. Global Culture and Humanity
2. Global Commons
3. World Affairs and the Global Economy
4. Human Security and Global Citizenship

See the program website (<http://global.wisc.edu>) for the course listings.

## LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES, DOCTORAL MINOR

Candidates for a Ph.D. degree in other departments may obtain a minor in Latin American, Caribbean and Iberian studies by taking a minimum of 12 credits in graduate courses related to Latin America, the Caribbean, Spain, or Portugal. A list of courses available for LACIS credit is prepared each semester by the program staff. This work is to be done outside the major field of the candidate's doctoral specialization. One course cross-listed with the major may be used for the minor so long as it is not taught by a faculty member from the major department and is not a required course for the major. The LACIS M.A. may be used as a Ph.D. minor, as long as the degree program meets the minor requirements. The LACIS Ph.D. minor is an Option A minor. All Ph.D. minor candidates must consult with the program director or associate director at the time they begin their work for the Ph.D. minor. Certification of proficiency in Spanish or Portuguese is required. Contact the LACIS office for information on language certification.

## REQUIREMENTS

A minor in Latin American, Caribbean and Iberian studies consists of at least 12 graduate credits in LACIS-approved coursework.

## PEOPLE

**Faculty:** Professors Scarano (LACIS director) (History), Allen (Plant Pathology), Albuquerque (Spanish and Portuguese), Apple (Curriculum and Instruction), Barham (Agricultural and Applied Economics), Beilin (Spanish and Portuguese), Bilbija (Spanish and Portuguese), Calderon (Music), Collins (Sociology), Corfis (Spanish and Portuguese), De Ferrari (Spanish and Portuguese), Drewal (Art History), Egea (Spanish and Portuguese), Escalante (Art), Ewig (Gender and Women's Studies), Frantzen (Spanish and Portuguese), Hildner (Spanish and Portuguese), Hill (English/American Indian Studies), Hutchinson (Spanish and Portuguese), Madureira (Spanish and Portuguese), Mallon (History), Marquez (Nelson Institute for Environmental Studies/Political Science), Medina (Spanish and Portuguese), Mello (Business), Naughton (Geography), Neinhuis (Horticulture), Olaniyan (African Languages and Literature), Patz (Nelson Institute for Environmental Studies), Pevehouse (Political Science), Podesta, (Spanish and Portuguese), Popkewitz (Education), Radano (Ethnomusicology), Rojas (Journalism and Mass Communication), Sanchez (Spanish and Portuguese), Strier (Anthropology), Sweet (History), Sytsma (Botany), Tochon (Curriculum and Instruction), Tripp (Political Science), Waller (Botany and Environmental Studies), Wattieux (Animal Science), Zamora (Spanish and Portuguese), Zepeda (Consumer Science); Associate Professors Alix-

Garcia (Agricultural and Applied Economics), Cabrera (Dairy Science), Close (Spanish and Portuguese), Emswiller (Botany) Gaus (Medicine), Hernandez (Spanish and Portuguese), Huneeus (Law), Kallenborn (Design Studies), Marin-Spiotta (Geography), Pellegrini (Spanish and Portuguese), Schechter (Agricultural and Applied Economics), Stafford (Spanish and Portuguese, Walker (Dance) ; Assistant Professor Clayton (Anthropology), Associate Faculty Barrett (Sociology), DiPrete Brown (Global Health), Egon (Spanish and Portuguese), Gemrich (Spanish and Portuguese), Kaaikiola Strobusch (Spanish and Portuguese), Vargas, (LACIS associate director); Lecturers Druc (Anthropology), Muniagurria (Economics), Muyolema (Anthropology), Woodward (Botany)

## LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES, M.A.

The Latin American, Caribbean, and Iberian Studies (LACIS) Program offers three graduate programs: master of arts, a doctoral minor, and a dual degree in law and Latin American, Caribbean, and Iberian studies.

The mission of the graduate program is to provide an interdisciplinary foundation for the study of Latin America, the Caribbean, Spain, and Portugal. The University of Wisconsin–Madison is nationally recognized for excellence in research and teaching on these regions. The LACIS program includes a core faculty of more than 50 members and course offerings in 40 disciplines and professional schools, including agricultural and applied economics, anthropology, business, community and environmental sociology, comparative literature, environmental studies, gender and women's studies, geography, history, law, music, political science, population health, Quechua, Yucatec Maya, sociology, and Spanish and Portuguese.

Core faculty have received extensive national and international recognition. Faculty research interests include development and labor economics; Andean ethnohistory and ethnology; African Diaspora art; conservation of the neotropics; cultural geography; social history of Latin America; democratic consolidation; Brazilian social stratification; comparative social movements; Luso-Brazilian literature and culture; colonial and modern Latin American literature, film, and culture; Spanish literature from the medieval to the modern period; and political economy. UW–Madison also publishes the journal *Luso-Brazilian Review*.

While the majority of candidates in the program are from the United States, a significant number are from Latin America, the Caribbean, and Iberia. Since 1994, 30 percent of the program's candidates have been Latino/Latin American/Caribbean. Seventy percent have been women. Funding assistance for candidates specializing in Latin America, the Caribbean, and Iberia includes Title VI Foreign Language and Area Studies (FLAS) fellowships, Helen Firstbrook Franklin Fellowship, Advanced Opportunity Fellowship (if applicable), Latin America course (260) teaching assistantships, and the Tinker-Nave Field Grant Program. Please contact the program office for more information on funding opportunities.

Originally established in the 1930s, the program has a long history of university and federal support. Since 1961, LACIS has been recognized as a National Resource Center (NRC) by the U.S. Department of Education, which provides Title VI support for program activities and for FLAS fellowships. The program has a faculty of extraordinary diversity and across-the-board strength. These strengths encompass not only the classic social science and humanities fields, but also the natural and ecological sciences and the agricultural and professional schools. It is unlikely that any one university exceeds the overall range of UW–

Madison's faculty expertise in Latin American, Caribbean, and Iberian studies. The UW–Madison's general excellence is reflected by its consistent ranking among the top ten graduate universities in the United States.

## DUAL DEGREE PROGRAM

Candidates interested in earning a dual degree in law and Latin American, Caribbean, and Iberian studies must apply to both programs and must meet the degree requirements for both programs. Applicants should follow normal procedures for admission to the Graduate School. They may, however, substitute LSAT scores for the GRE. The dual degree program can be completed in seven semesters. Typically, the student begins the LACIS portion of the program in the second year of Law School. See the program office for more information on course work.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the degree coursework (15 credits out of a total 30 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS FROM: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

Students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. The student would not be allowed to count courses toward the 50% graduate coursework minimum unless taken at the 700 level or above.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

6 credits of LACIS/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/POLI SCI/PORTUG/SOC/SPANISH 982 Interdepartmental Seminar in the Latin-American Area (or equivalent seminar)

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

The program director or associate director will be the formal advisor for all students in the program. In addition, students are expected to work with a faculty advisor to complete a final paper to be defended to a three member committee.

## ASSESSMENT AND EXAMINATIONS

Candidates are expected to finish the degree in four semesters of full-time study; after four semesters, the student must petition for extension. Time to degree will be customized for students in dual or articulated degree programs. Students must also petition for part-time (fewer than 6 credits per semester) status.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

## LANGUAGE REQUIREMENTS

Candidates must obtain certification of basic proficiency in Spanish or Portuguese or offer proof of proficiency.

## ADMISSIONS

Admission to the master's program is competitive and requires a strong undergraduate academic background, a clear demonstration of interdisciplinary interests, and a strong statement of purpose illustrating the applicant's goals. In addition to the online application, applicants must submit to the program: transcript(s) of all undergraduate work,

three letters of recommendation, Graduate Record Exam (GRE) scores, a statement of reasons for graduate study, and a current CV.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students should demonstrate an understanding of the principal historical, societal, scientific and humanist concerns that are rooted in the realities of the broader Latin American, Caribbean and Iberian regions. These include but are not limited to: knowledge of pre-colonial indigenous societal organizations; the experience of colonialism; the biodiversity of the region; and the regions tumultuous social, economic and political trajectory and the specific challenges these have posed for the peoples of the regions. In particular, students should demonstrate an understanding of the unique historical trajectory of these regions as the product of the global confluence of various cultural, social, political and economic influences beginning in the late 15th century. This includes not only the especially profound mutual impact of Iberian colonization of the Americas, but also the larger context of European imperial conflict in the Western Hemisphere, the central place of African slavery in the development of the Atlantic economy, and the significant and multifaceted role that the United States has played in shaping Latin America and the Caribbean. Students should recognize how these histories and contemporary realities impact more specific questions, contemporary or historical, and humanist, social scientific or scientific in nature.
- Within students' more specific area of interest, they should be able to articulate key theoretical and empirical concerns and identify appropriate theoretical approaches to the problem of interest and identify empirical sources that can help to answer that question or problem.
- Students should demonstrate proficiency, and preferably advanced language ability, in either Spanish or Portuguese. Additional indigenous language learning, such as Kichwa, Quechua, Quich and Nahuatl, are also encouraged.
- Students should demonstrate the ability to conduct interdisciplinary research that
  - a. includes a critical literature review,
  - b. selects appropriate research methodologies,
  - c. proposes an appropriate research design to collect, analyze, interpret, and present findings, and
  - d. successfully carries out this research plan.
- Students should demonstrate the ability to articulate and elaborate their research findings.

### PROFESSIONAL CONDUCT

- Students should recognize and apply principles of ethical and professional conduct. This includes, in particular, an understanding of the ethics of research and professional activities in cross-cultural contexts.

## PEOPLE

**Faculty:** Professors Scarano (LACIS director) (History), Allen (Plant Pathology), Albuquerque (Spanish and Portuguese), Apple (Curriculum and Instruction), Barham (Agricultural and Applied Economics), Beilin

(Spanish and Portuguese), Bilbija (Spanish and Portuguese), Calderon (Music), Collins (Sociology), Corfis (Spanish and Portuguese), De Ferrari (Spanish and Portuguese), Drewal (Art History), Egea (Spanish and Portuguese), Escalante (Art), Ewig (Gender and Women's Studies), Frantzen (Spanish and Portuguese), Hildner (Spanish and Portuguese), Hill (English/American Indian Studies), Hutchinson (Spanish and Portuguese), Madureira (Spanish and Portuguese), Mallon (History), Marquez (Nelson Institute for Environmental Studies/Political Science), Medina (Spanish and Portuguese), Mello (Business), Naughton (Geography), Neinhuis (Horticulture), Olaniyan (African Languages and Literature), Patz (Nelson Institute for Environmental Studies), Pevehouse (Political Science), Podesta, (Spanish and Portuguese), Popkewitz (Education), Radano (Ethnomusicology), Rojas (Journalism and Mass Communication), Sanchez (Spanish and Portuguese), Strier (Anthropology), Sweet (History), Sytsma (Botany), Tochon (Curriculum and Instruction), Tripp (Political Science), Waller (Botany and Environmental Studies), Wattieux (Animal Science), Zamora (Spanish and Portuguese), Zepeda (Consumer Science); Associate Professors Alix-Garcia (Agricultural and Applied Economics), Cabrera (Dairy Science), Close (Spanish and Portuguese), Emshwiller (Botany) Gaus (Medicine), Hernandez (Spanish and Portuguese), Huneeus (Law), Kallenborn (Design Studies), Marin-Spiotta (Geography), Pellegrini (Spanish and Portuguese), Schechter (Agricultural and Applied Economics), Stafford (Spanish and Portuguese, Walker (Dance) ; Assistant Professor Clayton (Anthropology), Associate Faculty Barrett (Sociology), DiPrete Brown (Global Health), Egon (Spanish and Portuguese), Gemrich (Spanish and Portuguese), Kaaikiola Strohubusch (Spanish and Portuguese), Vargas, (LACIS associate director); Lecturers Druc (Anthropology), Muniagurria (Economics), Muyolema (Anthropology), Woodward (Botany)

## RUSSIAN, EAST EUROPEAN AND CENTRAL ASIAN STUDIES, GRADUATE/PROFESSIONAL CERTIFICATE

The graduate/professional certificate in REECAS provides graduate students with a general background in the areas of anthropology, economics, foreign policy, geography, government and politics, history, language and literature, law, and sociology. It also provides specific knowledge about one of these areas. With its emphasis on interdisciplinary study, a REECAS certificate enhances the training of Ph.D. candidates who wish to teach and do research at the college level, and serves the needs of M.A. and Ph.D. students who wish to make a career in broadcasting, government service, journalism, library work, or other professions requiring a well-rounded acquaintance with this diverse and highly important area.

Although there is a certain amount of flexibility built into the REECAS certificate to select courses and a language involving Eastern Europe other than Russian, students seeking a career in a field connected with REECAS would do best to combine the study of another language with Russian. Czech, Finnish, Polish, Russian, Serbo-Croatian, Turkish/Azeri, and Uzbek are offered regularly; Bulgarian, Kazak, and Romanian may be taught from time to time. The certificate student, in consultation with the graduate advisor, must choose an academically coherent group of courses which focuses on a specific geographic area and language.

### REQUIREMENTS

To receive the certificate, a student must take 12 credits of required courses distributed over three programs. Of these required courses, one must be a seminar in which a research paper is written on a topic approved by the major professor. The student must demonstrate a working knowledge of one language of Eastern Europe or the former Soviet Union before beginning the second year of REECAS and will be expected to write the seminar paper utilizing original source material in the target language(s). Students should contact the program office for specific information regarding these requirements.

### PEOPLE

**Faculty:** Professors Gerber (chair) (Sociology), Belodubrovskaya (Communication Arts), Bethea (Slavic Languages), Brenner (Jewish Studies)

## RUSSIAN, DOCTORAL MINOR

## RUSSIAN, EAST EUROPEAN AND CENTRAL ASIAN STUDIES, DOCTORAL MINOR

### REQUIREMENTS

Recognition of interdisciplinary training at the graduate level can be acquired with a REECAS certificate. Doctoral minor requirements in specific fields can also be fulfilled under the REECAS program. The requirements for a doctoral minor under Option A (external minor) may be satisfied by completing 9 credits of graduate courses in Russian, East European and Central Asian studies. These nine credits must be distributed over at least two departments outside the student's major department. Students should contact the program office for specific information regarding these requirements. Doctoral students may not earn both the REECAS graduate/professional certificate and the REECAS doctoral minor.

### PEOPLE

**Faculty:** Professors Gerber (chair) (Sociology), Belodubrovskaya (Communication Arts), Bethea (Slavic Languages), Brenner (Jewish Studies), Buenger (Art History), Chamberlain (History), Ciancia (History), Dale (Art History), Danaher (Slavic Languages), Derin (Languages and

Studies), Buenger (Art History), Chamberlain (History), Ciancia (History), Dale (Art History), Danaher (Slavic Languages), Derin (Languages and Cultures of Asia), Dolinin (Slavic Languages), DuBois (Scandinavian Studies), Evans-Romaine (Slavic Languages), Filipowicz (Slavic Languages), Gehlbach (Political Science), Hendley (Law, Political Science), Herrera (Political Science), Hirsch (History), Hollander (Jewish Studies), Johnson (Educational Leadership and Policy Analysis), Kaiser (Geography), Kepley (Communication Arts), Kydd (Political Science), Lapina (Slavic Languages), Livanos (Comparative Literature), Longinovic (Slavic Languages), McDonald (History), Michels (History), Miernowska (Slavic Languages), Neville (History), Radeloff (Forest and Wildlife Ecology), Reynolds (Slavic Languages), Schamiloglu (Languages and Cultures of Asia), Shevelenko (Slavic), Tishler (CREECA, Slavic Languages), Tumarkin (Slavic Languages), van de Water (Slavic Languages), Wink (History)

## RUSSIAN, EAST EUROPEAN AND CENTRAL ASIAN STUDIES, M.A.

The master of arts degree program in Russian, East European and Central Asian studies provides interdisciplinary area studies training for emerging professionals and future leaders in business, development, government, journalism, law, publishing, and the military. The curriculum is designed to promote a broad understanding of the cultural, political, economic, social, and historical factors that have shaped the development of societies in Eurasia, Russia, and Central and Eastern Europe; mastery in Russian, East European, or Central Asian languages at a level necessary for doing advanced research on and professional work in the region; and knowledge of methodological and analytical approaches of different disciplines that will contribute to a better understanding of the region and will prepare students for conducting advanced research. The program requires both area studies and language training.

The M.A. program is designed to be completed in three semesters, but motivated students who enter with prior language study and commit to intensive summer coursework have the option of completing the course of study within 12 calendar months. Students will work closely with the M.A. advisor, who serves as their primary graduate studies advisor, to ensure that their course of study is both coherent and sufficiently interdisciplinary.

## FUNDING

Each year a faculty committee selects a limited number of deserving graduate students (in any field of study) for Foreign Language and Area Studies (FLAS) Fellowships. Applicants must be citizens or permanent residents of the United States and must demonstrate their commitment to the study of a language of Russia, Eastern Europe, or Central Asia, and to related area studies topics. Applications and supporting materials for the FLAS fellowship competition must be submitted by approximately February 15 each year. For more information and an application, see Foreign Language & Area Studies (FLAS) Fellowships (<http://flas.wisc.edu>).

Students interested in studying Polish may be eligible to apply for a Michael and Emily Lapinski fellowship ([http://slavic.lss.wisc.edu/new\\_web/?q=node/71](http://slavic.lss.wisc.edu/new_web/?q=node/71)), administered through the Department of Slavic Languages and Literature. The annual deadline is March 1. Please contact the Slavic department for more information.

CREECA also nominates eligible incoming graduate students in its M.A. program for the Advanced Opportunity Fellowship (for targeted students). To be considered for university funding, all application materials must be received by the early January deadline indicated on the CREECA M.A. application form.

A limited number of teaching assistantships and project assistantships may be available in CREECA and in specific departments that offer high-enrollment courses on REECAS. Information about these assistantships can be obtained by writing or calling CREECA and the respective departments. In addition to these opportunities, other fellowships and financial assistance are available outside CREECA. For further information, incoming graduate students should write directly to the appropriate department or organization.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits of coursework numbered 300 or above taken as a UW-Madison undergraduate student. Coursework earned five or more years prior to admission to a Master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## COURSES

In addition to language classes each term, students will be required to complete a minimum of 22 non-language (area studies) credits from the course list to be distributed as follows:

1. Seven courses in Russian, East European and Central Asian studies at or above the 300 level (21 credits). These courses must be distributed over at least three departments. At least 50% of credits applied towards the graduate degree credit requirement must be with courses designed for graduate work. Courses with the graduate level coursework attribute are identified and searchable in the University's Course Guide ([http://public.my.wisc.edu/portal/f/u12411s4/p/CourseGuide-Browse-Courses.u12411n31/detached/render.u?pcM=view&pP\\_action=advancedSearch&pP\\_form-submit=true](http://public.my.wisc.edu/portal/f/u12411s4/p/CourseGuide-Browse-Courses.u12411n31/detached/render.u?pcM=view&pP_action=advancedSearch&pP_form-submit=true)).
2. At least 6 of these credits (two courses) must be graduate-level **seminars** (700 through 900 level). REECAS M.A. students are expected to use original language source material in their graduate seminar papers.
3. A 1-credit "Introduction to REECAS" module (SLAVIC 755 Topics in Slavic Literature). The course number of this module varies, depending on the home department of the faculty director of CREECA. Students are required to attend the weekly CREECA lecture series and to write four short essays based on the content of those lectures. Papers are read and evaluated by the CREECA director and associate director.
4. Students may elect to write a master's thesis, but this is not required. This 3-credit, faculty-supervised, independent research course could count toward the required 22 non-language credits, but could not take the place of a required graduate-level seminar. The master's thesis will demonstrate the student's ability to engage in original research in his or her chosen field, including the ability to use original-language material.

Language learning is an integral part of the program, and students will be required to enroll in language courses each term. Students already proficient in their main language will be expected to choose another Slavic or Central Eurasian language for the duration of their program. For degree completion, students must have a minimum of two years of university-level study (or the equivalent) of a regional language with at least three years of study strongly recommended. During the academic year, the program offers Czech, Finnish, Kazak, Persian, Polish, Russian, Bosnian/Croatian/Serbian, and Turkish (Turkish–Azeri).

<sup>1</sup> When topic is Russia, Eastern Europe, or Central Asia.

## ADMISSIONS

Students entering the master's program must have a bachelor's degree from an accredited institution and provide evidence of academic achievement and intellectual ability, including a minimum total grade point average of 3.0 (on a 4.0 scale) and a 3.4 in related area courses, letters of recommendation, and strong scores on the Graduate Record Exam (GRE). There is no minimum admission requirement for language, but students are strongly advised to complete two years of area language study before entering the program.

Applicants for admission to the M.A. degree program in Russian, East European and Central Asian studies should submit an online application. The following materials are required: statement of purpose, official transcripts from all postsecondary institutions attended, three letters of recommendation, Graduate Record Exam (GRE) scores, language questionnaire, and application for university fellowships for incoming students. Speakers of English as a second language must submit Test of English as a Foreign Language (TOEFL), or International English Language Testing System (IELTS) scores as well.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

Students who complete the M.A. in Russian, East European, and Central Asian studies (REECAS) in good standing should demonstrate an understanding of the cultural, political, economic, social, and historical factors that have shaped the development of societies in Eurasia, Russia, and East and Central Europe.

- Students should be able to articulate, critique, and/or elaborate the theories, research methods, and approaches to inquiry in one or more of the disciplines represented in the interdisciplinary field of Russian, East European, and Central Asian studies (REECAS).
- Students should be able to identify sources and assemble evidence pertaining to questions or challenges in REECAS.
- Students should demonstrate an understanding of Russian, East European, and Central Asian studies in a historical, social, or global context.
- Students should select and utilize appropriate methodologies and practices in one or more of the disciplines represented in the interdisciplinary field of REECAS.
- Students should evaluate and synthesize information pertaining to questions or challenges in REECAS and should communicate clearly in written and spoken work in ways appropriate to REECAS.

## PROFESSIONAL CONDUCT LEARNING GOALS

- Students should recognize and apply principles of ethical and professional conduct in the context of Russian, East European, and Central Asian studies.

## ADDITIONAL LEARNING GOALS

- Language proficiency: Students will develop speaking, listening, writing, and reading skills in one or more of the languages of Russia, East and Central Europe, and Central Eurasia, and integrate these skills to communicate in a variety of social and academic situations.

## PEOPLE

**Faculty:** Professors Gerber (chair) (Sociology), Belodubrovskaya (Communication Arts), Bethea (Slavic Languages), Brenner (Jewish Studies), Buenger (Art History), Chamberlain (History), Ciancia (History), Dale (Art History), Danaher (Slavic Languages), Derin (Languages and Cultures of Asia), Dolinin (Slavic Languages), DuBois (Scandinavian Studies), Evans-Romaine (Slavic Languages), Filipowicz (Slavic Languages), Gehlbach (Political Science), Hendley (Law, Political Science), Herrera (Political Science), Hirsch (History), Hollander (Jewish Studies), Johnson (Educational Leadership and Policy Analysis), Kaiser (Geography), Kepley (Communication Arts), Kydd (Political Science), Lapina (Slavic Languages), Livanos (Comparative Literature), Longinovic (Slavic Languages), McDonald (History), Michels (History), Miernowska (Slavic Languages), Neville (History), Radeloff (Forest and Wildlife Ecology), Reynolds (Slavic Languages), Schamiloglu (Languages and Cultures of Asia), Shevelenko (Slavic), Tishler (CREECA, Slavic Languages), Tumarkin (Slavic Languages), van de Water (Slavic Languages), Wink (History)

## SOUTHEAST ASIAN STUDIES, DOCTORAL MINOR

The doctoral minor in Southeast Asian studies is offered to students who are enrolled in a doctoral program at the university and are interested in focusing their disciplinary program on Southeast Asia. Students interested in obtaining this minor should first consult with their disciplinary adviser to clarify the type of minor required and then consult with the center's associate director, who serves as the advisor for the minor in Southeast Asian studies.

## PEOPLE

**Faculty:** Professors Bowie (Anthropology), Cowell (African Languages & Literature), Coxhead (Agricultural & Applied Economics), Gade (Nelson Institute for Environmental Studies), Gunther (Journalism & Mass Communications), Hansen (center director) (History), Macken (Linguistics), A. McCoy (History), Olds (Geography), Rafferty (Asian Languages & Cultures), Sidel (Law), Winichakul (History), Zhou (Anthropology); Associate Professors Nobles (Sociology); Assistant Professors Baird (Geography), Choy (Dance/Asian American Studies), Ho (Curriculum and Instruction/Education), Kim (Anthropology); Faculty Associates Barnard (Asian Languages & Cultures), Cullinane (History/Southeast Asian Studies), M. McCoy (Communication Arts/Southeast

Asian Studies); Lecturers Chanprasert-Elbow (Asian Languages & Cultures), Dinh (Asian Languages & Cultures), Lee (Asian Languages & Cultures, Zamar (Asian Languages & Cultures); Librarian Ashmun (Southeast Asia Collection, Memorial Library)

## SOUTHEAST ASIAN STUDIES, GRADUATE/PROFESSIONAL CERTIFICATE

### REQUIREMENTS

The graduate/professional certificate in Southeast Asian studies is awarded to graduate students in other degree programs who are interested in documenting their advanced training in Southeast Asian studies. It requires the completion of 20 credits from the Southeast Asian studies core courses, approved by the center's director. Doctoral students may not earn both the doctoral minor and graduate/professional certificate in Southeast Asian studies.

### PEOPLE

**Faculty:** Professors Bowie (Anthropology), Cowell (African Languages & Literature), Coxhead (Agricultural & Applied Economics), Gade (Nelson Institute for Environmental Studies), Gunther (Journalism & Mass Communications), Hansen (center director) (History), Macken (Linguistics), A. McCoy (History), Olds (Geography), Rafferty (Asian Languages & Cultures), Sidel (Law), Winichakul (History), Zhou (Anthropology); Associate Professors Nobles (Sociology); Assistant Professors Baird (Geography), Choy (Dance/Asian American Studies), Ho (Curriculum and Instruction/Education), Kim (Anthropology); Faculty Associates Barnard (Asian Languages & Cultures), Cullinane (History/Southeast Asian Studies), M. McCoy (Communication Arts/Southeast Asian Studies); Lecturers Chanprasert-Elbow (Asian Languages & Cultures), Dinh (Asian Languages & Cultures), Lee (Asian Languages & Cultures, Zamar (Asian Languages & Cultures); Librarian Ashmun (Southeast Asia Collection, Memorial Library)

## SOUTHEAST ASIAN STUDIES, M.A.

The M.A. degree in Southeast Asian studies is an interdisciplinary program designed to meet the unique needs of two broad groups of students: those seeking certification of area expertise en route to a disciplinary doctoral degree and those seeking a terminal M.A. en route to a wide range of careers in Southeast Asia, including employment in business, journalism, and various government and international organizations. The program requires two years of coursework (or the equivalent) in a Southeast Asian language and 30 graduate credits in Southeast Asian studies courses.

The Center for Southeast Asian Studies administers a formal graduate program in Southeast Asian studies and facilitates interdisciplinary study on Southeast Asia in intercollege, professional, and other degree programs throughout the university. The Southeast Asian studies program provides students with the opportunity to concentrate their study of this dynamic region in several disciplines and professional areas: anthropology, communications (journalism), development, education, economics, environmental studies, geography, history, linguistics,

literature, music and dance (performing arts), political science, public health, religion, sociology, and urban and regional planning, as well as natural resources, business, and law, and public policy. Faculty expertise and library holdings are particularly strong for in-depth study of Cambodia, Indonesia, Laos, Philippines, Thailand, and Vietnam. The goal of the program is to provide students with a strong area and language background on Southeast Asia and to prepare them for a range of academic and professional careers.

Language study is a critical component in area studies, and the center encourages students to develop proficiency in at least one Southeast Asian language. During the academic year, instruction is offered through the Department of Asian Languages and Cultures in five Southeast Asian languages: Filipino (Tagalog), Hmong, Indonesian, Thai, and Vietnamese. Each language is offered at two or more levels of instruction, with advanced readings and literature courses available in Indonesian. The center also facilitates participation in the Southeast Asian Studies Summer Institute (SEASSI), which provides instruction during the summers at multiple levels in eight languages of the region: Burmese, Filipino, Hmong, Indonesian/Malaysian, Javanese, Khmer, Lao, Thai, and Vietnamese, and depending on enrollments, Javanese. Though SEASSI is hosted by the center and based in Madison, it is open to students from anywhere. More information is available on the SEASSI website (<http://seassi.wisc.edu>).

### COURSES

Interdisciplinary courses may be taken from many departments. Courses must contain a minimum of 25 percent Southeast Asia content to be counted for all the graduate programs. For a more complete and up-to-date listing of currently available courses, contact the Center for Southeast Asian Studies. Because the instructors and contents of many courses may change over time (especially for graduate level topics courses and seminars), students should consult the Center for Southeast Asian Studies for confirmation on whether a course may count for the M.A. degree, the graduate certificate, or the doctoral minor.

### FUNDING

The center offers two graduate-level fellowships each year: Foreign Language and Area Studies (FLAS) fellowships, funded by the U.S. Department of Education (Title VI); and Center Fellowships, funded by the center's Mellon endowment. Both fellowships provide full tuition and a monthly stipend and are awarded to deserving graduate students (in any discipline) with a strong commitment to the study of Southeast Asia. The center also provides Field Research Grants to be used to support doctoral dissertation and pre-dissertation research on Southeast Asia. Applicants for FLAS fellowships must be citizens or permanent residents of the U.S. and must apply to study one of the languages offered during the academic year: Filipino, Hmong, Indonesian, Thai, or Vietnamese. Center fellowships are generally awarded by semester and are open to all graduate students committed to the study of Southeast Asia. Field Research Grants can be awarded to graduate students in any field of study. Applications for FLAS, Center Fellowships, and Field Research Grants can be obtained directly from the center's office (or downloaded from the website) and must be submitted, along with all supporting materials, by the first week of February each year. The center also nominates eligible incoming graduate students in its M.A. program for two university-wide competitions: Advanced Opportunity Fellowships (for minority students) and University Fellowships (for students with outstanding academic records). In addition to these opportunities, other fellowships and financial assistance are available outside the center. For

further information, incoming graduate students should write directly to the appropriate department and to the Office of Student Financial Aid. For additional information on the fellowships offered by the center, consult the center's website (<http://seassi.wisc.edu>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

M.A.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the required credits (15 credits out of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, student are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW-Madison University Special student.

#### CREDITS PER TERM ALLOWED

15 credits

#### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

#### OVERALL GRADUATE GPA REQUIREMENT

3.00

#### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a

graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

#### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

#### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

#### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

#### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

#### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Applicants for admission to the M.A. degree program in Southeast Asian Studies should submit the online application on the Graduate School website. The following materials are required and should be submitted to the center: statement of purpose, official transcripts of all undergraduate and graduate study, three references, and Graduate Record Exam (GRE) scores for U.S. citizens; most international students are also required to submit Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores (for recommended test scores, see the Graduate School website).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate knowledge of one or more regions of Southeast Asia, focusing on a research question(s), problem or case study situated within a broader analytic framework and knowledge of the cultures, religions, history, anthropology, geography, economics, literature, and/or languages within scholarship on Southeast Asia.

- Demonstrate proficiency in reading, speaking, and listening in one or more Southeast Asian languages, at least at the proficiency level of four semesters.
- Analyze and synthesize information and ideas within the context of interdisciplinary Southeast Asian studies.
- Understand, respond to, and construct arguments across disciplines relating to the study of Southeast Asia.
- Apply their knowledge to solutions of intellectual as well as practical problems.

## PROFESSIONAL CONDUCT

- Recognize and apply principles of professional and ethical conduct.

## ADDITIONAL LEARNING GOALS

- Conduct academic research using an appropriate range of social scientific and/or humanistic sources, methodologies, and critical theories.
- Communicate effectively in writing and orally.

## PEOPLE

**Faculty:** Professors Bowie (Anthropology), Cowell (African Languages & Literature), Coxhead (Agricultural & Applied Economics), Gade (Nelson Institute for Environmental Studies), Gunther (Journalism & Mass Communications), Hansen (center director) (History), Macken (Linguistics), A. McCoy (History), Olds (Geography), Rafferty (Asian Languages & Cultures), Sidel (Law), Winichakul (History), Zhou (Anthropology); Associate Professors Nobles (Sociology); Assistant Professors Baird (Geography), Choy (Dance/Asian American Studies), Ho (Curriculum and Instruction/Education), Kim (Anthropology); Faculty Associates Barnard (Asian Languages & Cultures), Cullinane (History/Southeast Asian Studies), M. McCoy (Communication Arts/Southeast Asian Studies); Lecturers Chanprasert-Elbow (Asian Languages & Cultures), Dinh (Asian Languages & Cultures), Lee (Asian Languages & Cultures), Zamar (Asian Languages & Cultures); Librarian Ashmun (Southeast Asia Collection, Memorial Library)

## JOURNALISM AND MASS COMMUNICATION

**Administrative Unit:** Journalism and Mass Communication

**College/School:** College of Letters & Science

**Admitting Plans:** M.A.

**Degrees Offered:** M.A.

Graduate programs in journalism and mass communication are designed for advanced academic preparation in the various fields of mass communication and journalism, and for training in research and teaching. The School of Journalism and Mass Communication offers three options for the master of arts: professional-track M.A. (30 credits in multi-media communication and topic specialization); thesis-track M.A. (30 credits in theory and methods plus thesis); and non-thesis M.A. (30 credits with tight focus on journalism and mass communication concepts).

The school is a recognized leader in teaching and research in a variety of topics including the process and effects of mass communication; communication campaigns; community and social movements; consumer and popular culture; health and science communication;

history of mass communication; international communication; media accountability and criticism; media law and policy; new media technology; political communication and public opinion; and race, gender and mass communication. Graduate work prepares students to use and contribute to the research and scholarship in these and many other areas. Identifying important questions, gathering evidence, and understanding standards of inference are dominant features of all graduate degree programs.

Funding is available in the form of teaching assistantships, research assistantships and project assistantships. Qualified students also will be recommended for university fellowships.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Journalism and Mass Communication, M.A. (p. 429)
- Mass Communications, Doctoral Minor (p. 431)
- Mass Communications, Ph.D. (p. 431)

## RESOURCES

### FACILITIES

The Center for Journalism Ethics (<https://ethics.journalism.wisc.edu>) advances the ethical standards and practices of democratic journalism through discussion, research, teaching, professional outreach, and newsroom partnerships. Students, faculty, leading journalists and members of the public participate in conferences, workshops, and publications. The center tracks and analyzes ethical issues for all media platforms on its website. The center contributes to the teaching of ethics in the school's curriculum. Students have the opportunity to write for the center's website, cover conferences, and contribute to research.

The Mass Communication Research Center is an interdisciplinary research facility that conducts research into all phases of communication and provides a common meeting ground for scholars with an interest in communication behavior. It also provides an opportunity for graduate students to participate in research programs and to initiate and conduct their own thesis projects.

The Center for Communication and Democracy is a research and action project at UW–Madison. The goals of the center are to study how citizens can use new communications technologies to advance democratic discussion and civic participation; to explore the relationships between geographic communities and the emerging world of cyberspace; to explore the structural relations among communications and information markets, the civic sector, and government to find relationships necessary to build and sustain a public sphere in communication that is not dominated by the market, while sustaining economic growth and technological innovation; and to ask what government policies are most appropriate for combining the vibrancy of the market with the common needs of citizens in the sphere of communication.

The Mass Communication History Center, a part of the Wisconsin Historical Society, provides scholars access to private collections, papers, and various types of unpublished materials relating to the growth of mass communication in the United States and other parts of the world. The Wisconsin Historical Society also has a large collection of bound and microfilm files of American and foreign newspapers.

The Center for Environmental Communication and Education Studies focuses on teaching and research within the wider sphere of mass media communication of science, environment, and technology. The center maintains a small library of books and articles and provides resources for students who wish to conduct research on various aspects of media coverage of science and technology.

## PEOPLE

**Faculty:** Professors Baughman, Culver, Downey, Drechsel, Fair, Friedland, Gunther, Kim, McLeod, Riddle, Robinson, Rojas, D. Shah, H. Shah, Vaughn; Assistant Professors Graves, Palmer, Wagner, Wells

## JOURNALISM AND MASS COMMUNICATION, M.A.

Three available tracks:

1. Professional-track master's focused on specialized training in multimedia skills that lead to careers in mass media industries.
2. Thesis-track master's focused on developing skills in mass communication research and typically leading to enrollment in a doctoral program.
3. Non-thesis master's for students interested in basic concepts and theories in journalism and mass communication studies but not in advanced doctoral-level training.

Graduate programs in journalism and mass communication are designed for advanced academic preparation in the various fields of mass communication and journalism, and for training in research and teaching. The School of Journalism and Mass Communication offers three options for the master of arts: professional-track M.A. (30 credits in multi-media communication and topic specialization); thesis-track M.A. (30 credits in theory and methods plus thesis); and non-thesis M.A. (30 credits with tight focus on journalism and mass communication concepts).

The school is a recognized leader in teaching and research in a variety of topics including the process and effects of mass communication; communication campaigns; community and social movements; consumer and popular culture; health and science communication; history of mass communication; international communication; media accountability and criticism; media law and policy; new media technology; political communication and public opinion; and race, gender and mass communication. Graduate work prepares students to use and contribute to the research and scholarship in these and many other areas. Identifying important questions, gathering evidence, and understanding standards of inference are dominant features of all graduate degree programs.

## FUNDING

Funding is available in the form of teaching assistantships, research assistantships and project assistantships. Qualified students also will be recommended for university fellowships.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., with available professional track and research/thesis track

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of the required coursework (15 of 30 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, up to 7 credits numbered 300 or 400 and advanced courses at the 500 and 600 level that assess graduate students separately from undergraduate students from a UW-Madison undergraduate degree are allowed to count toward the degree. Courses that qualify include:

| Code      | Title                                              | Credits |

| JOURN 699                       | Directed Study                                 | 1-6 |

Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count up to 15 credits of coursework taken as a UW–Madison Special student. This includes courses numbered 300 or 400 and advanced courses at the 500 and 600 level which are identified with the Graduate Level Coursework attribute in the University's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>). Courses that qualify include:

| Code      | Title                                                 | Credits |
|-----------|-------------------------------------------------------|---------|
| JOURN 345 | Principles and Practice of Strategic<br>Communication | 4       |
| JOURN 401 | In-Depth Reporting                                    | 4       |
| JOURN 404 | Interpretation of Contemporary<br>Affairs             | 4       |
| JOURN 405 | Creative Nonfiction                                   | 4       |
| JOURN 411 | Multimedia Design                                     | 4       |
| JOURN 419 | Electronic News for Web and<br>Broadcast              | 4       |
| JOURN 445 | Creative Campaign Messages                            | 4       |
| JOURN 447 | Strategic Media Planning                              | 4       |
| JOURN 449 | Account Planning and Strategy                         | 4       |
| JOURN 475 | Special Topics in Advanced<br>Concepts and Skills     | 1-4     |

Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

No program-specific courses required.

### OVERALL GRADUATE GPA REQUIREMENT

3.25 GPA required.

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all core curriculum coursework.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

### ADVISOR / COMMITTEE

M.A. thesis track students are required to have a thesis committee of three faculty members.

M.A. professional track students are required to have one faculty advisor.

### ASSESSMENTS AND EXAMINATIONS

M.A. thesis track requires a formal thesis and defense; the Professional M.A. track requires a portfolio presentation.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

To apply for the master's, students must have a four-year bachelor's degree, an undergraduate GPA of 3.0 (on a 4.0 scale), and completed Graduate Record Exam (GRE). Three letters of recommendation are required of all applicants. GRE scores (verbal, quantitative, and analytical writing tests) are required for U.S. students and international students. International students are also required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Test scores must be furnished to the school before the application is considered complete.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Attain mastery in an area of the mass communication field. This encompasses an ability to articulate, critique, or elaborate theories,

research methods, and approaches to inquiry in the chosen field of study. (Research)

- Identify sources and assemble evidence pertaining to questions or challenges in the field of communication. (Research)
- Demonstrate understanding of the primary field of study in a historical, social, psychological, cultural or global context. (Research)
- Select and/or utilize the most appropriate methodologies and practices. (Research)
- Evaluate or synthesize information pertaining to questions or challenges in the field of communication. (Research)
- Develop professional communication skills related to gathering, assessing, compiling and disseminating information, by selecting and/or utilizing the most appropriate methodologies and practices and the evaluation and synthesis of information. (Professional)
- Demonstrate understanding of the journalism field of study. (Professional)
- Select and/or utilize the most appropriate professional journalistic practices. (Professional)
- Evaluate or synthesize information pertaining to questions or challenges in their field of journalistic specialization. (Professional)
- Attain mastery in an area of the mass communication field. This encompasses an ability to articulate, critique, or elaborate theories and approaches to inquiry in the chosen field of study. (Non-Thesis)
- Develop in-depth and specialized expertise in a topic of interest. In doing so students will be able to identify sources of information and assemble evidence pertaining to questions in that area. (Non-Thesis)
- Demonstrate understanding of the primary field of study. (Non-Thesis)
- Select and/or utilize the most appropriate professional practices. (Non-Thesis)
- Evaluate or synthesize information pertaining to questions or challenges in their field of specialization. (Non-Thesis)

## PROFESSIONAL CONDUCT

- Communicate clearly in ways appropriate to the field of study. (Research)
- Communicate clearly in ways appropriate to journalism practice. (Professional)
- Communicate clearly in ways appropriate to the field of study. (Non-Thesis)

## PEOPLE

**Faculty:** Professors Baughman, Culver, Downey, Drechsel, Fair, Friedland, Gunther, Kim, McLeod, Riddle, Robinson, Rojas, D. Shah, H. Shah, Vaughn; Assistant Professors Graves, Palmer, Wagner, Wells

## MASS COMMUNICATIONS, DOCTORAL MINOR

A candidate for a Ph.D. degree in another area may earn a doctoral minor in mass communications by taking a minimum of 10 credits in the School of Journalism and Mass Communication. Typically, the student will write a dissertation combining research in the major and minor fields. This minor is open to any Ph.D. students who seek to complement their

main area of research with a thorough understanding of communication dynamics and how these dynamics affect society.

## REQUIREMENTS

A minor in mass communications consists of at least 10 graduate credits in the School of Journalism and Mass Communication seminars and colloquia.

## ADMISSIONS

Contact Lisa Aarli, graduate advisor, [aarli@wisc.edu](mailto:aarli@wisc.edu).

## MASS COMMUNICATIONS, PH.D.

The Ph.D. degree in mass communications is an interdisciplinary program offered jointly by the Department of Life Sciences Communication and the School of Journalism and Mass Communication.

The program offers several internationally recognized areas of research and teaching excellence:

- health communication
- science communication
- environmental communication
- political communication
- risk communication
- social marketing
- brand communication
- public opinion
- international communication
- media processes and effects
- race and culture
- social and psychological factors affecting communication
- ethics, law and history

Working closely with their major professor and committee, students draw from courses offered in departments across the campus to develop a plan of study in preparation for independent and original research in their areas of interest.

## FUNDING

Prospective students should see the program website (<https://masscommphd.wisc.edu/funding>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

**DOCTORAL DEGREE**

Ph.D.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

65 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

32 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

At least 50% of the required coursework (33 of 65 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

In consultation with the student's advisor, and with program approval, students are allowed to count no more than 33 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

With program approval, up to 7 credits numbered 600 and above from a UW–Madison undergraduate degree are allowed to count toward the degree. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

In consultation with the student's advisor and with program approval, students are allowed to count no more than 12 credits of coursework numbered 600 and above taken as a UW–Madison Special student. Coursework taken ten years prior to admission to the doctoral program is not allowed to satisfy requirements.

**CREDITS PER TERM ALLOWED**

15 credits for non-dissertators; dissertators must enroll for exactly 3 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Attendance of both seminars in the joint seminar sequence (JOURN/LSC 901 Colloquium in Mass Communication and LSC 700 Colloquium in Life Sciences Communication ) is strongly recommended for new graduate students.

Additional requirements are detailed in the Academic Policies and Procedures Handbook for Graduate Work in the joint Ph.D. program in mass communications.

**DOCTORAL MINOR/BREADTH REQUIREMENTS**

Breadth is provided via interdisciplinary training (minor requirement waived).

**OVERALL GRADUATE GPA REQUIREMENT**

3.50 GPA required

**OTHER GRADE REQUIREMENTS**

Courses in which the student earns a grade below B do not count toward the 65 credit minimum, but they do count in the cumulative GPA.

**PROBATION POLICY**

Doctoral students must do the following to maintain satisfactory progress:

1. Earn a minimum 3.5 cumulative GPA by the end of the second semester in residence and maintain that GPA for the duration of the degree program.
2. Remove grades of Incomplete in the semester following their occurrence. A course proposal cannot be approved until all incompletes are removed.
3. Complete preliminary exams within three to six months of completing coursework.
4. Maintain steady progress toward completion of degree, including final oral exam and deposit of dissertation. Fulltime students can expect four to five years; completion will vary for part-time students.

**ADVISOR / COMMITTEE**

Doctoral committees must include at least two members from outside the Department of Life Sciences Communication and the School of Journalism and Mass Communication.

**ASSESSMENTS AND EXAMINATIONS**

Doctoral students must pass preliminary exams once coursework is completed.

**TIME CONSTRAINTS**

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**LANGUAGE REQUIREMENTS**

No language requirements.

**ADMISSIONS**

Applicants for this program are expected to have demonstrated an interest and background in communication research by having earned a thesis-based M.A. or M.S. degree in communication or other relevant disciplines. The admissions committee, however, may accept other evidence of suitable preparation.

Students must meet the minimum requirements for admission set by the Graduate School. Applicants must submit an online application, GRE scores, a statement of purpose, official transcripts from all previously attended institutions, a CV, and three letters of recommendation. Letters of recommendation should come from people who can speak to the scholarly abilities of the applicant. International applicants are required to take and attain a satisfactory score on the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS) exam. Test scores must be furnished to the school before the application is considered complete.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate research problems, potentials, and limits with respect to theory, knowledge, and practice within the field of study. Demonstrating comprehensive and intensive knowledge of the theories, concepts, frameworks, empirical findings, and controversies in the field.
- Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study. Demonstrating a comprehensive and intensive knowledge of appropriate and relevant research methods and analytical techniques.
- Create research or scholarship that makes a substantive contribution to knowledge.
- Demonstrate breadth within their learning experiences.
- Advance contributions of the field of study to society.
- Communicate complex ideas effectively.

### PROFESSIONAL CONDUCT

- Students earning a doctorate in mass communications will foster ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Baughman, Brossard (LSC Chair), Downey, Drechsel, Dunwoody, Friedland, Gunther, Loew, McLeod, Mitchell, Meiller, Reaves, Rojas (SJMC Director of Graduate Studies,) Scheufele (LSC Director of Graduate Studies), D Shah, H Shah (SJMC Chair), Vaughn. Associate Professors: Kim, Riddle, Robinson, Shaw, Shepard, Wagner. Assistant Professors: Culver, Graves, Palmer, Stenhouse, Wells

## KINESIOLOGY

**Administrative Unit:** Kinesiology

**College/School:** School of Education

**Admitting Plans:** M.S., OTD, Ph.D.

**Degrees Offered:** M.S. in Kinesiology; M.S. in Occupational Therapy; OTD in Occupational Therapy; Ph.D. in Kinesiology

**Minors and Certificates:** Doctoral Minor in Kinesiology

The mission of the Department of Kinesiology is to create, interpret, transmit, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life. The M.S. and Ph.D. in kinesiology are available with research specialization (thesis or dissertation) in biomechanics, exercise physiology, exercise psychology, motor control and behavior, physical activity epidemiology, and occupational science.

The M.S. in kinesiology with the nonthesis option provides courses that cover the breadth of the kinesiology field and electives, and it may include a final project. This degree supports an interest in coaching/teaching (team or individual), personal training or fitness instruction, or it may supplement the practice of physical therapy, athletic training, or other allied health professions, or any individual purpose a student may have. No thesis is required.

The occupational therapy program resides in the Department of Kinesiology and offers two graduate professional programs, an entry-level master of science (MS-OT (p. 439)) and a post-professional doctor of occupational therapy (OTD (p. 441)). Occupational therapists interested in pursuing a Ph.D. may also apply to the occupational science track of the Ph.D. in kinesiology (p. 436). The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the disciplines of occupational therapy and science.

Graduate training in kinesiology can be directed toward the degrees of M.S. and/or Ph.D. in kinesiology. Both of these degrees combine advanced courses with the option of an intensive research experience. Department research facilities are well equipped, and faculty and graduate students have access to other specialized research facilities across campus. Faculty and graduate student research is currently supported by funding from the state and federal government, research foundations, and private industry. Faculty are affiliated with the Institute on Aging; Cardiovascular Research Center; Center for Neuroscience/Neuroscience Training Program; departments of Biomedical Engineering, Mechanical Engineering, Medicine, Neurology, Population Health Science, and Psychology; McPherson Eye Research Institute; Harlow Center for Biological Psychology; interdepartmental graduate program in Nutritional Sciences; Trace Research and Development Center; VA Geriatric Research and Education Center; Waisman Center; and Wisconsin Alzheimer's Institute.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Kinesiology, Doctoral Minor (p. 433)
- Kinesiology, M.S. (p. 434)
- Kinesiology, Ph.D. (p. 436)
- Occupational Therapy, M.S. (p. 439)
- Occupational Therapy, OTD (p. 441)

## PEOPLE

### KINESIOLOGY

**Faculty:** Professors Edwards (chair), Cook, Diffie, Koltyn, Schrage; Associate Professors Benedict, Eldridge, Gruben, Larson, Mason, van Kan; Assistant Professors Ausderau, Barnes, Bell, Hornberger, Pickett, Travers

### OCCUPATIONAL THERAPY

**Faculty:** Professors Benedict (OT program coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot>).

## KINESIOLOGY, DOCTORAL MINOR

The Department of Kinesiology's mission is to research, teach and apply knowledge related to movement, exercise and human occupation, with the ultimate goal of enhancing human health, productivity and quality of life. The Department of Kinesiology offers graduate courses that reflect the breadth of the discipline, including biomechanics, exercise psychology, exercise physiology, motor control and behavior, physical

activity epidemiology and occupational science. A minor from the Department of Kinesiology is tailored to each student's individual interests, career goals, needs and background. The learning goals for the doctoral minor are to demonstrate an understanding of the major current and past theories, research findings, methodologies and techniques in one or more of the broad areas of inquiry represented within the Department of Kinesiology.

## REQUIREMENTS

The student must complete 9 credits in kinesiology courses such that all of the following conditions are satisfied:

- All credits must be in courses numbered 300 and above
- At least 3 credits are taken in courses numbered 700 and above
- The student receives a satisfactory grade (C or above) for all credits
- The GPA of the credits counted is at least 3.00
- All credits are taken as a graduate student

## ADMISSIONS

Graduate students in other programs at UW–Madison who plan to minor in kinesiology should contact the Department of Kinesiology graduate studies chair early in their graduate program to ensure acceptance into and adequate mentoring in the minor program (see Information for Prospective Students (<http://kinesiology.education.wisc.edu/kinesiology/academics/graduate-programs/prospective-students>)). When students meet with the graduate studies chair, they will fill out a course plan. The department's graduate studies chair, the student's doctoral committee mentor, and the student must sign the course plan.

## PEOPLE

### KINESIOLOGY

**Faculty:** Professors Edwards (chair), Cook, Diffie, Koltyn, Schrage; Associate Professors Benedict, Eldridge, Gruben, Larson, Mason, van Kan; Assistant Professors Ausderau, Barnes, Bell, Hornberger, Pickett, Travers

### OCCUPATIONAL THERAPY

**Faculty:** Professors Benedict (OT program coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot>).

## KINESIOLOGY, M.S.

The mission of the Department of Kinesiology is to create, interpret, transmit, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

The M.S. and Ph.D. in kinesiology are available with research specialization (thesis or dissertation) in biomechanics, exercise physiology, exercise psychology, motor control and behavior, physical activity epidemiology, and occupational science.

The M.S. in kinesiology with the nonthesis option provides courses that cover the breadth of the kinesiology field and electives, and it may include

a final project. This degree supports an interest in coaching/teaching (team or individual), personal training or fitness instruction, or it may supplement the practice of physical therapy, athletic training, or other allied health professions, or any individual purpose a student may have. No thesis is required.

An M.S. in occupational therapy (MS–OT) prepares students for entry into the occupational therapy profession. This is a professional degree open to students with a bachelor's degree in any field from an accredited college or university. No thesis is required.

Graduate training in kinesiology can be directed toward the degrees of M.S. and/or Ph.D. in kinesiology. Both of these degrees combine advanced courses with the option of an intensive research experience. Department research facilities are well equipped, and faculty and graduate students have access to other specialized research facilities across campus. Faculty and graduate student research is currently supported by funding from the state and federal government, research foundations, and private industry. Faculty are affiliated with the Institute on Aging; Cardiovascular Research Center; Center for Neuroscience/Neuroscience Training Program; departments of Biomedical Engineering, Mechanical Engineering, Medicine, Neurology, Population Health Science, and Psychology; McPherson Eye Research Institute; Harlow Center for Biological Psychology; interdepartmental graduate program in Nutritional Sciences; Trace Research and Development Center; VA Geriatric Research and Education Center; Waisman Center; and Wisconsin Alzheimer's Institute.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S. with available occupational science track, thesis tracks in biomechanics, epidemiology, exercise psychology, exercise physiology, motor behavior, and non-thesis track

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

M.S.–non-thesis track: 32 credits  
M.S.–occupational science track: 31 credits  
M.S.–all other thesis-based tracks: 30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of the required degree coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 15 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken in UW-Madison University Special student status. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

KINES 991 Research in Physical Activity- Theory and Design required for all non-OT tracks; wide variation in required courses among tracks, see Graduate Program Areas (<http://go.wisc.edu/7ap7xd>) on the program website.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

Course numbered 300 and above with a grade of A, AB, B, or S count toward minimum credit requirement; grades of BC or C count only if equal credits of AB and A offset the lower grades to average B (3.00). See the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#minimumcreditrequirement>) for more information.

The grading system is also described in the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#gradingsystem>).

## PROBATION POLICY

The status of a graduate student's progress is either:

1. Good standing (progressing according to standards; any funding guarantee remains in place); or
2. Probation (not progressing according to standards but permitted to keep enrolling; funding guarantee may be lost; specific plan with dates and deadlines for removal of probation may be required; or
3. Unsatisfactory progress (not progressing according to standards; not permitted to keep enrolling, dismissal, leave of absence or change of advisor or program likely required).

An overall GPA below 3.0 will place the student on academic probation. If a 3.0 GPA not regained in the subsequent semester the student may be dismissed from the program or allowed to continue provisionally for 1 semester based on advisor appeal to the Graduate School. The Graduate

School's probation policy is described in the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#probation>).

## ADVISOR / COMMITTEE

All students must have an assigned advisor to meet UW information management needs, and accordingly, and of its own volition, the department assigns an advisor to each student.

M.S.–non-thesis track: graduate studies Studies chair

M.S.–all other thesis-based tracks: research faculty

A thesis committee, for those tracks requiring a thesis, are gathered prior to the thesis proposal in consultation with the faculty advisor and consistent with Graduate School policy (<http://grad.wisc.edu/acadpolicy/#committees>). Normally the proposal committee would continue as the thesis defense committee.

## ASSESSMENTS AND EXAMINATIONS

No formal examination specific to the M.S. is required. Curricular requirements vary among tracks within the program, and in all tracks all didactic courses must be passed, in conformity with GPA and grad requirements, above. For tracks requiring a thesis, the thesis defense committee has discretion to accept or reject the thesis at the student's defense. Repeat defense, if required, is at the discretion of the advisor. Until the thesis proposal stage, satisfactory research performance is at the discretion of the faculty advisor in any thesis track.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Within the Department, completion of required courses and proposal of the thesis, when applicable, within two years of matriculation is considered satisfactory progress. See the program handbook (<http://kinesiology.education.wisc.edu/docs/kinesiology-documents/grad-program-pols-procds-manual-posted-to-web-site-14-oct-2011.pdf?sfvrsn=0>) for more information.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Admission to the M.S. and Ph.D. graduate programs requires satisfactory completion of the department's general prerequisite courses, listed below, or their equivalent. A degree in occupational therapy fulfills the department's prerequisites for occupational science admission. Students lacking some prerequisite courses may be considered for admission with 'deficiencies.' The deficiencies must be made up during (or before) the student's graduate studies, but the student retains eligibility for departmental financial support. Generally, deficiencies may not exceed 12 credits, and if they do, normally the student would enroll as a nondegree Special student or make up the deficiencies in some other way before graduate admission. Graduate students in Kinesiology are given priority for assistantship support from department funds, and students from other departments are not supported by department funds unless there are no eligible students in the Kinesiology department. Individual specialization areas may have specific course requirements in addition

to the following department prerequisite courses. Please contact the department or see the web site for detailed information.

| Code                                                                              | Title                                                 | Credits |
|-----------------------------------------------------------------------------------|-------------------------------------------------------|---------|
| <b>Prerequisite courses and credits (or courses to be taken as deficiencies):</b> |                                                       |         |
| CHEM 103                                                                          | General Chemistry I                                   | 4       |
| ANATOMY/<br>KINES 328                                                             | Human Anatomy                                         | 3       |
| ANATOMY/<br>KINES 329                                                             | Human Anatomy-Kinesiology                             | 2       |
| PHYSIOL 335                                                                       | Physiology                                            | 5       |
| <b>Select two of the following courses, or equivalents:</b>                       |                                                       |         |
| KINES 314                                                                         | Physiology of Exercise                                | 4       |
| KINES 315                                                                         | Assessment and Research in Physical Activity Pedagogy | 3       |
| KINES 318                                                                         | Biomechanics of Human Movement                        | 3       |
| KINES 330                                                                         | Research in Kinesiology                               | 2       |
| KINES 350                                                                         | Introduction to Exercise Psychology                   | 3       |
| KINES 360                                                                         | Lifespan Motor Development                            | 3       |
| KINES 361                                                                         | Motor Learning and Performance                        | 3       |

For admission, the Graduate School requires, as does the Kinesiology department, a minimum 3.0 GPA (on a 4.0=A scale) on the last 60 semester hours (or equivalent) of undergraduate coursework. An applicant must submit official Graduate Record Exam (GRE) scores, academic transcripts from each institution attended, a minimum of three letters of recommendation, and a statement of reasons for graduate study. The statement should name the applicant's intended area(s) of specialization and provide specific details on why the applicant names the area(s). Faculty in the intended research specialization(s) will decide whether the applicant is acceptable for the graduate program in the Department of Kinesiology. If a professor in the area of specialization agrees to serve as the prospective student's advisor, then the department's graduate office recommends the applicant for admission to the Graduate School. A committee reviews, and an individual advisor is not required for, nonthesis admissions. Please consult the kinesiology website (<http://www.education.wisc.edu/kinesiology>) for further details of these requirements and procedures.

All doctoral students in the Department of Kinesiology must satisfy the Ph.D. general field requirement by completing at least two graduate-level kinesiology courses of at least 2 credits each (4–6 credits total) at UW–Madison, in two different areas outside the student's area of specialization. These courses must be completed on the UW–Madison campus and must not have been used to fulfill an undergraduate deficiency or requirements for the master's degree. A Ph.D. minor is optional.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students in thesis-based tracks will master fundamental knowledge in at least one of the broad areas of specialization represented in the Department of Kinesiology.
- Students will demonstrate understanding of major current and past theories, research findings, methodologies, and techniques in their areas of specialization.

- Students will identify sources and assemble evidence pertaining to questions or challenges in their area of specialization.
- Students in thesis-based tracks will complete an original research project in one of the broad areas of specialization represented in the Department of Kinesiology.
- Students will select and utilize appropriate methodologies to conduct research, analyze, and interpret resulting data.
- Students will prepare a thesis or research report describing their research project.
- Students will communicate clearly in ways appropriate to their area of specialization.
- Students in the non-thesis track will demonstrate fundamental knowledge in the broad areas of specialization represented in the Department of Kinesiology.
- Students will demonstrate an understanding of the major current and past theories, research findings, methodologies and techniques in each of the broad areas of inquiry represented within the Department of Kinesiology.
- Students will retrieve and examine scientific literature, evaluate evidence for and against hypotheses, and be able to discuss strengths and weaknesses in existing literature.

## PROFESSIONAL CONDUCT

- Students in the thesis-based tracks will recognize and apply principles of professional and ethical conduct.
- Students will use scientific rigor when designing experiments, collecting and analyzing data, interpreting and reporting results.
- Students in the non-thesis track will recognize and apply principles of professional and ethical conduct.

## PEOPLE

### KINESIOLOGY

**Faculty:** Professors Edwards (chair), Cook, Diffie, Koltyn, Schrage; Associate Professors Benedict, Eldridge, Gruben, Larson, Mason, van Kan; Assistant Professors Ausderau, Barnes, Bell, Hornberger, Pickett, Travers

### OCCUPATIONAL THERAPY

**Faculty:** Professors Benedict (OT program coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot>).

## KINESIOLOGY, PH.D.

The mission of the Department of Kinesiology is to create, interpret, transmit, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

The M.S. and Ph.D. in kinesiology are available with research specialization (thesis or dissertation) in biomechanics, exercise physiology, exercise psychology, motor control and behavior, physical activity epidemiology, and occupational science.

The M.S. in kinesiology with the nonthesis option provides courses that cover the breadth of the kinesiology field and electives, and it may include a final project. This degree supports an interest in coaching/teaching

(team or individual), personal training or fitness instruction, or it may supplement the practice of physical therapy, athletic training, or other allied health professions, or any individual purpose a student may have. No thesis is required.

An M.S. in occupational therapy (MS-OT) prepares students for entry into the occupational therapy profession. This is a professional degree open to students with a bachelor's degree in any field from an accredited college or university. No thesis is required.

Graduate training in kinesiology can be directed toward the degrees of M.S. and/or Ph.D. in kinesiology. Both of these degrees combine advanced courses with the option of an intensive research experience. Department research facilities are well equipped, and faculty and graduate students have access to other specialized research facilities across campus. Faculty and graduate student research is currently supported by funding from the state and federal government, research foundations, and private industry. Faculty are affiliated with the Institute on Aging; Cardiovascular Research Center; Center for Neuroscience/Neuroscience Training Program; departments of Biomedical Engineering, Mechanical Engineering, Medicine, Neurology, Population Health Science, and Psychology; McPherson Eye Research Institute; Harlow Center for Biological Psychology; interdepartmental graduate program in Nutritional Sciences; Trace Research and Development Center; VA Geriatric Research and Education Center; Waisman Center; and Wisconsin Alzheimer's Institute.

## FUNDING

Prospective students should see the program website (<http://kinesiology.education.wisc.edu/kinesiology/academics/graduate-programs/financial-support>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., with available track in occupational therapy

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

50% of degree coursework (26 credits out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 15 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken in UW-Madison University Special student status. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

KINES 991 Research in Physical Activity- Theory and Design required for all non-OT tracks; wide variation in required courses among tracks, see Graduate Program Areas (<http://go.wisc.edu/7ap7xd>) on the program website.

A 10-credit Ph.D. minor and a minimum 4-credit, two-course general field requirement pertain to the Ph.D., with courses descriptively but not specifically prescribed. See Kinesiology Graduate Program Policies & Procedures Manual (<http://go.wisc.edu/6701qm>) (section 6).

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a minor, currently minimum 10 credits, either "distributed" (several departments) or in a single outside department. Students must consult their advisors on minor requirements.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

Course numbered 300 and above with a grade of A, AB, B, or S count toward minimum credit requirement; grades of BC or C count only if equal credits of AB and A offset the lower grades to average B (3.00). See the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#minimumcreditrequirement>) for more information.

The grading system is also described in the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#gradingsystem>).

### PROBATION POLICY

The status of a graduate student's progress is either:

1. Good standing (progressing according to standards; any funding guarantee remains in place); or

2. Probation (not progressing according to standards but permitted to keep enrolling; funding guarantee may be lost; specific plan with dates and deadlines for removal of probation may be required; or
3. Unsatisfactory progress (not progressing according to standards; not permitted to keep enrolling, dismissal, leave of absence or change of advisor or program likely required).

An overall GPA below 3.0 will place the student on academic probation. If a 3.0 GPA not regained in the subsequent semester the student may be dismissed from the program or allowed to continue provisionally for 1 semester based on advisor appeal to the Graduate School. The Graduate School's probation policy is described in the Graduate School's Academic Policies and Procedures (<http://grad.wisc.edu/acadpolicy/#probation>).

## ADVISOR / COMMITTEE

Ph.D. students work with two (or three) committees during their studies.

1. Preliminary exams Committee (three graduate faculty members)
2. Dissertation committee (five members)
  - a. Proposal committee
  - b. Defense committee

Ordinarily the proposal and defense committees have the same membership, absent death or other incapacity of a committee member between the time of proposal and defense. Committee members selected by the student in consultation with the faculty advisor to be consistent with Graduate School policy (<http://grad.wisc.edu/acadpolicy/#committees>).

## ASSESSMENTS AND EXAMINATIONS

Ph.D. students must:

1. pass all didactic courses in conformity with GPA and grad requirements;
2. pass preliminary exams (<http://grad.wisc.edu/acadpolicy/#preliminaryexaminations>) (sometimes called "comprehensives") administered by a three-member faculty committee (<http://kinesiology.education.wisc.edu/docs/kinesiology-documents/grad-program-pols-proceeds-manual-posted-to-web-site-14-oct-2011.pdf?sfvrsn=0>); and
3. successfully propose and defend a dissertation before a five-member committee constituted as above in this chart.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years (<http://grad.wisc.edu/acadpolicy/#fiveyearrule>) after passing the preliminary examination may be required to take and pass another preliminary examination to be readmitted to candidacy.

Within the department, completion of required courses and passing preliminary exams within three years of starting the Ph.D. program is considered satisfactory progress. See the program handbook (<http://kinesiology.education.wisc.edu/docs/kinesiology-documents/grad-program-pols-proceeds-manual-posted-to-web-site-14-oct-2011.pdf?sfvrsn=0>) for more information.

program-pols-proceeds-manual-posted-to-web-site-14-oct-2011.pdf?sfvrsn=0) for more information.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Admission to the M.S. and Ph.D. graduate programs requires satisfactory completion of the department's general prerequisite courses, listed below, or their equivalent. A degree in occupational therapy fulfills the department's prerequisites for occupational science admission. Students lacking some prerequisite courses may be considered for admission with 'deficiencies.' The deficiencies must be made up during (or before) the student's graduate studies, but the student retains eligibility for departmental financial support. Generally, deficiencies may not exceed 12 credits, and if they do, normally the student would enroll as a nondegree Special student or make up the deficiencies in some other way before graduate admission. Graduate students in Kinesiology are given priority for assistantship support from department funds, and students from other departments are not supported by department funds unless there are no eligible students in the Kinesiology department. Individual specialization areas may have specific course requirements in addition to the following department prerequisite courses. Please contact the department or see the web site for detailed information.

| Code                                                                              | Title                                                 | Credits |
|-----------------------------------------------------------------------------------|-------------------------------------------------------|---------|
| <b>Prerequisite courses and credits (or courses to be taken as deficiencies):</b> |                                                       |         |
| CHEM 103                                                                          | General Chemistry I                                   | 4       |
| ANATOMY/<br>KINES 328                                                             | Human Anatomy                                         | 3       |
| ANATOMY/<br>KINES 329                                                             | Human Anatomy-Kinesiology                             | 2       |
| PHYSIOL 335                                                                       | Physiology                                            | 5       |
| <b>Select two of the following courses, or equivalents:</b>                       |                                                       |         |
| KINES 314                                                                         | Physiology of Exercise                                | 4       |
| KINES 315                                                                         | Assessment and Research in Physical Activity Pedagogy | 3       |
| KINES 318                                                                         | Biomechanics of Human Movement                        | 3       |
| KINES 330                                                                         | Research in Kinesiology                               | 2       |
| KINES 350                                                                         | Introduction to Exercise Psychology                   | 3       |
| KINES 360                                                                         | Lifespan Motor Development                            | 3       |
| KINES 361                                                                         | Motor Learning and Performance                        | 3       |

For admission, the Graduate School requires, as does the Kinesiology department, a minimum 3.0 GPA (on a 4.0=A scale) on the last 60 semester hours (or equivalent) of undergraduate coursework. An applicant must submit official Graduate Record Exam (GRE) scores, academic transcripts from each institution attended, a minimum of three letters of recommendation, and a statement of reasons for graduate study. The statement should name the applicant's intended area(s) of specialization and provide specific details on why the applicant names the area(s). Faculty in the intended research specialization(s) will decide whether the applicant is acceptable for the graduate program in the Department of Kinesiology. If a professor in the area of specialization agrees to serve as the prospective student's advisor, then the department's graduate office recommends the applicant for admission to the Graduate School. A committee reviews, and an

individual advisor is not required for, nonthesis admissions. Please consult the kinesiology website (<http://www.education.wisc.edu/kinesiology>) for further details of these requirements and procedures.

All doctoral students in the Department of Kinesiology must satisfy the Ph.D. general field requirement by completing at least two graduate-level kinesiology courses of at least 2 credits each (4–6 credits total) at UW–Madison, in two different areas outside the student's area of specialization. These courses must be completed on the UW–Madison campus and must not have been used to fulfill an undergraduate deficiency or requirements for the master's degree. A Ph.D. minor is optional.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate academic mastery in at least one of the broad areas of specialization represented in the Department of Kinesiology.
- Students will demonstrate a broad understanding of major current and past theories, research findings, methodologies, and techniques in their area of specialization both orally and in writing.
- Students will retrieve and examine scientific literature, evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions.
- Students will formulate ideas, concepts, designs and/or techniques beyond the current boundaries of knowledge with their area of specialization.
- Students will demonstrate a broad knowledge of the field of kinesiology extending beyond their area of specialization.
- Students will develop and complete original research that makes a substantive contribution in advancing their area of specialization.
- Students will develop testable hypotheses and predictions for their own realistic and feasible research projects.
- Students will conduct independent research and analyze and interpret resulting data.
- Students will clearly communicate their ideas in both oral and written form through the preparation and defense of a dissertation.

### PROFESSIONAL CONDUCT

- Students will foster ethical and professional conduct.
- Students will use scientific rigor when designing experiments, collecting and analyzing data, interpreting and reporting results.

## PEOPLE

### KINESIOLOGY

**Faculty:** Professors Edwards (chair), Cook, Diffie, Koltyn, Schrage; Associate Professors Benedict, Eldridge, Gruben, Larson, Mason, van Kan; Assistant Professors Ausderau, Barnes, Bell, Hornberger, Pickett, Travers

### OCCUPATIONAL THERAPY

**Faculty:** Professors Benedict (OT program coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot>).

## OCCUPATIONAL THERAPY, M.S.

The occupational therapy program resides in the Department of Kinesiology and offers two graduate professional programs, an entry-level master of science (MS–OT) and a post-professional doctor of occupational therapy (OTD (p. 441)). Occupational therapists interested in pursuing a Ph.D. may also apply to the occupational science track of the Ph.D. in Kinesiology (p. 436). The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the disciplines of occupational therapy and science.

The M.S. program is a two-year professional program designed to prepare students for practice. It is accredited by the Accreditation Council on Occupational Therapy Education (ACOTE (<http://www.aota.org/education-careers/accreditation.aspx>)). At the master's level, supervised fieldwork experiences with children and adults are provided in a variety of settings. This program meets the requirements for OTR certification set by the National Board for Certification of Occupational Therapy (NBCOT (<http://www.nbcot.org>)).

The post-professional OTD program is a part-time, structured, predominantly online curriculum serving occupational therapist's need for distance access and flexibility in acquiring advanced practice skills. The OTD program trains occupational therapists to become visionary leaders, engage in inter-professional education and practice, and facilitate research translation.

The Ph.D. program in kinesiology–occupational science track provides relevant classroom and laboratory experiences for the scholar–researcher interested in occupational science. The academic program consists of coursework within the Department of Kinesiology and in related areas such as psychology, statistics, population health, engineering, or education. Students completing the program will be prepared for careers as university professors and researchers. For further information about this degree, see Occupational Science (<http://kinesiology.education.wisc.edu/kinesiology/academics/graduate-programs/current-students>) on the department website.

A bridge program can be designed for students who wish to pursue entry-level professional training and further advanced graduate study at the OTD or Ph.D. level. Such students follow a modified sequence of coursework, fieldwork training, and research experience in order to satisfy all academic and certification requirements.

## COURSE INFORMATION

Information about the MS–OT curriculum design, course sequence, and course descriptions can be found here (<http://kinesiology.education.wisc.edu/ot/academics/ms-in-occupational-therapy-msot/curriculum/sequence-of-classes>).

## FUNDING

Financial assistance, sometimes available to graduate students in occupational therapy, consists of scholarships, fellowships, and teaching, project or research assistant positions. Financial assistance is limited; opportunities vary by program and from year to year. Students enrolled in the OTD program are not permitted to accept teaching assistantships, project assistantships, research assistantships, or other appointments that would result in a tuition waiver. Students who are considering

applying for financial support should see the OT program M.S. or OTD webpages (<http://kinesiology.education.wisc.edu/ot/about>) for further information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

61 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

50% of degree course work (31 credits out of 61 total credits) must be completed in graduate level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://public.my.wisc.edu/portal/f/u12411s4/p/CourseGuide-Browse-Courses.u12411n31/max/render.uP?pCp>).

### PRIOR COURSEWORK REQUIREMENTS: GRAD WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 15 credits of graduate course work from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENT: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 15 credits of course work numbered 300 or above taken in UW–Madison University Special student status. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

The MS–OT has a prescribed curriculum of 61 credits, with potential for electives. See Curriculum (<http://kinesiology.education.wisc.edu/>

[ot/academics/ms-in-occupational-therapy-msot/curriculum](http://kinesiology.education.wisc.edu/ot/academics/ms-in-occupational-therapy-msot/curriculum)) on the OT website.

### OVERALL GRADUATE GPA REQUIREMENT

Minimum 3.00 GPA required.

### OTHER GRADE REQUIREMENTS

The Graduate School requires students maintain a graduate grade point average (GPA) of 3.00 (on a 4.00 scale) for courses numbered 300 and above (excluding research) to receive a degree. Conditions for probationary status may require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School. See Probation (<http://grad.wisc.edu/acadpolicy/#probation>) on the Graduate School website.

### ADVISOR / COMMITTEE

All students must have an assigned advisor to meet UW information management needs, and accordingly, and of its own volition, the department assigns an advisor to each student. Assigned advisors in the M. S. in Occupational Therapy (MS–OT) program are graduate research or clinical faculty. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

### ASSESSMENT AND EXAMINATIONS

No formal examination specific to the MS is required. Curricular requirements (all didactic courses) must be passed, in conformity with GPA and grad requirements, above.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Level II fieldwork must be completed within 24 months of completion of coursework.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants for all graduate programs must complete a UW–Madison Graduate School application (<http://grad.wisc.edu/admissions/process>).

### M.S. IN OCCUPATIONAL THERAPY (PROFESSIONAL)

Admission to the entry-level professional program in occupational therapy requires:

- a bachelor's degree (or equivalent) from a regionally accredited school of higher education by the start of the program
- transcripts from each college, university, or technical college attended showing work completed and in progress
- Graduate Record Exam (GRE) scores
- documentation of paid or volunteer experience in at least two different settings serving persons across the lifespan with physical, behavioral or mental health disabilities
- direct observation of occupational therapists, or Certified Occupational Therapy Assistants, providing services is highly recommended
- a minimum of three letters of recommendation
- a personal statement responding to prompts provided on the graduate application page
- at least a "C" or better in the following prerequisite courses or their equivalent:

| Code                                                                                                                                                       | Title                                                | Credits |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|---------|
| One of the following:                                                                                                                                      |                                                      | 3       |
| HDFS 362                                                                                                                                                   | Development of the Young Child                       |         |
| ED PSYCH 320                                                                                                                                               | Human Development in Infancy and Childhood           |         |
| PSYCH 460                                                                                                                                                  | Developmental Psychology                             |         |
| HDFS 363                                                                                                                                                   | Development from Adolescence to Old Age <sup>1</sup> | 3       |
| PSYCH 405                                                                                                                                                  | Abnormal Psychology                                  | 3-4     |
| ANATOMY/<br>KINES 328                                                                                                                                      | Human Anatomy                                        | 3       |
| PHYSIOL 335                                                                                                                                                | Physiology                                           | 5       |
| Applicants may complete 6–8 credits (two semesters) of combined anatomy and physiology (with lab) to fulfill both the anatomy and physiology prerequisites |                                                      | 6-8     |

<sup>1</sup> Applicants who complete a lifespan/human development course should complete a second course in child or adult development.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### FOUNDATIONAL KNOWLEDGE

- Demonstrate an understanding of the physical, psychological and contextual substrates of human occupation in typical and nontypical development.
- Discuss the role of personal and environmental factors on involvement in daily activities and community participation.
- Critically examine and apply theories associated with the science of human occupation and models of interprofessional practice to service delivery.
- Demonstrate knowledge of one's own role and those of other professions to appropriately assess and address the needs of clients and populations served.

#### SCIENTIFIC INQUIRY AND THEORY DEVELOPMENT

- Articulate current problems facing the profession of occupational therapy in an interprofessional context with respect to theory, knowledge and practice.

- Identify and critique current knowledge, theories and evidence to inform practice.
- Demonstrate necessary skills for designing a scholarly proposal that includes a research question, relevant literature, samples, design, measurement and data analysis.
- Participate in scholarly activities that evaluate professional practice, service delivery, and/or professional issues.

### PRACTICE REASONING AND DECISION MAKING

- Appropriately assess clients' participation in daily life activities and employ an interprofessional approach to determining the clients' needs within the context of family and society.
- Identify factors within the environment that influence participation in home and community life.
- Plan for discharge in collaboration with the client and family and terminate occupational therapy when appropriate.

### PROFESSIONAL CONDUCT

- Articulate the values of the occupational therapy profession.
- Work with individuals of other professions to maintain a climate of mutual respect and shared values.
- Describe the varied roles of the occupational therapist as practitioner, educator, researcher, and entrepreneur.
- Establish appropriate therapeutic relationships with individuals, groups, organizations and systems.
- Use effective interpersonal communication and demonstrate effective and culturally sensitive group communication.
- Demonstrate use of safety precautions with the client during the process of practice.
- Demonstrate knowledge of legal and ethical issues related to care in health, education, and community settings.

### PEOPLE

**Faculty:** Professors Benedict (OT Program Coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot>).

### OCCUPATIONAL THERAPY, OTD

The occupational therapy program resides in the Department of Kinesiology and offers two graduate professional programs, an entry-level master of science (MS–OT (p. 439)) and a post-professional doctor of occupational therapy (OTD). Occupational therapists interested in pursuing a Ph.D. may also apply to the occupational science track of the Ph.D. in Kinesiology (p. 436). The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the disciplines of occupational therapy and science.

The M.S. program is a two-year professional program designed to prepare students for practice. It is accredited by the Accreditation Council on Occupational Therapy Education (ACOTE (<http://www.aota.org/education-careers/accreditation.aspx>)). At the master's level, supervised fieldwork experiences with children and adults are provided in a variety of settings. This program meets the requirements for OTR certification set

by the National Board for Certification of Occupational Therapy (NBCOT) (<http://www.nbcot.org>).

The post-professional OTD program is a part-time, structured, predominantly online curriculum serving occupational therapist's need for distance access and flexibility in acquiring advanced practice skills. The OTD program trains occupational therapists to become visionary leaders, engage in inter-professional education and practice, and facilitate research translation.

The Ph.D. program in kinesiology–occupational science track provides relevant classroom and laboratory experiences for the scholar–researcher interested in occupational science. The academic program consists of coursework within the Department of Kinesiology and in related areas such as psychology, statistics, population health, engineering, or education. Students completing the program will be prepared for careers as university professors and researchers. For further information about this degree, see Occupational Science (<http://kinesiology.education.wisc.edu/kinesiology/academics/graduate-programs/current-students>) on the department website.

A bridge program can be designed for students who wish to pursue entry-level professional training and further advanced graduate study at the OTD or Ph.D. level. Such students follow a modified sequence of coursework, fieldwork training, and research experience in order to satisfy all academic and certification requirements.

## COURSE INFORMATION

The OTD course sequence and descriptions can be found here (<http://kinesiology.education.wisc.edu/ot/academics/ms-in-occupational-therapy-msot/curriculum/sequence-of-classes>).

## FUNDING

Financial assistance, sometimes available to graduate students in occupational therapy, consists of scholarships, fellowships, and teaching, project or research assistant positions. Financial assistance is limited; opportunities vary by program and from year to year. Students enrolled in the OTD program are not permitted to accept teaching assistantships, project assistantships, research assistantships, or other appointments that would result in a tuition waiver. Students who are considering applying for financial support should see the OT program M.S. or OTD webpages (<http://kinesiology.education.wisc.edu/ot/about>) for further information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

OTD

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

64 credits (34 beyond the M.S.)

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

50% of degree course work (32 credits out of 64 total credits) must be completed in graduate level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://public.my.wisc.edu/portal/f/u1241s4/p/CourseGuide-Browse-Courses.u1241n31/max/render.uP?pCp>).

### PRIOR COURSEWORK REQUIREMENTS FROM: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count up to 30 credits of graduate coursework from other institutions. Coursework should be less than five years old to be considered, additional justification and/or documentation are needed for work taken between five and ten years. Work more than ten years old will not be considered.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNDERGRADUATE

No undergraduate coursework will be allowed to count toward OTD requirements.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. These credits are considered part of the total allowable credits available for a student to transfer. Coursework should be less than five years old to be considered; additional justification and/or documentation is needed for work taken between five and ten years.

Work more than ten years old will not be considered.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

The OTD has a prescribed curriculum of 64 credits. See Curriculum (<https://kinesiology.education.wisc.edu/otd/academics/otd-curriculum>) on the OT website.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Breadth is provided via interdisciplinary training (minor requirement waived).

### OVERALL GRADUATE GPA REQUIREMENT

Minimum 3.00 GPA required.

### OTHER GRADE REQUIREMENTS

The Graduate School requires students maintain a graduate grade point average (GPA) of 3.00 (on a 4.00 scale) for courses numbered 300 and above (excluding research) to receive a degree. Conditions for probationary status may require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School. See Probation (<http://grad.wisc.edu/acadpolicy/#probation>) on the Graduate School website.

## ADVISOR

Every graduate student is required to have an advisor to meet UW information management needs, and accordingly, and of its own volition, the department assigns an advisor to each student. The advisor is a graduate or clinical faculty member.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis. The OTD Program Coordinator will advise students in the early stages of their studies. The advisor may also serve on the student's capstone project committee.

## ASSESSMENT AND EXAMINATIONS

Curricular requirements (all didactic courses) must be passed, in conformity with GPA and grad requirements, above. Capstone project proposal and final product must be reviewed and approved by a committee of graduate faculty per Graduate School policy.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants for all graduate programs must complete a UW–Madison Graduate School application (<http://grad.wisc.edu/admissions/process>).

## OTD (POST-PROFESSIONAL)

An official copy of a current state license to practice OT in the U.S. will be required for admission.

A minimum equivalency of 30 UW–Madison credit hours taken as a graduate student beyond the Bachelor's degree is also required. It is expected that most applicants will meet this requirement through having obtained a master's degree in occupational therapy or related field. Individuals with a bachelor's degree in OT may apply but will be required to complete graduate credits (as outlined on our website (<http://kinesiology.education.wisc.edu/otd/admissions/otd-credit-deficiencies>)) to meet any deficiencies.

In addition, applicants must submit a personal statement responding to prompts provided on the graduate application page; a current resume or CV; official transcripts per the instructions on the application page; and letters of recommendation (two required, one additional optional) from professors, co-workers, supervisors, and/or other professionals who

can speak to the applicant's capacity to be an adult learner, potential for leadership, and capabilities to succeed as a graduate student.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### FOUNDATIONAL KNOWLEDGE

- Demonstrate in-depth knowledge of the evolution of the profession, the social and global forces influencing practice, delivery models, policies, and systems, including interprofessional and emerging areas of practice.
- Articulate and apply underlying theories, concepts and techniques of occupational therapy intervention to health promotion and well-being for the prevention of disease and dysfunction.

#### SCIENTIFIC INQUIRY AND THEORY DEVELOPMENT

- Articulate the knowledge, roles and practices of other professions with whom occupational therapists typically engage in practice.
- Formulate systems to gather, analyze and interpret data from a practice setting.
- Translate evidence into best practice for the continued development of the profession.
- Develop and implement an interprofessional, scholarly capstone project that addresses an identified service system, intervention or programmatic problem, relates theory to practice and demonstrates synthesis of advanced knowledge in a practice area.
- Demonstrate an understanding of the process for locating and securing grants and how grants can serve as a fiscal resource for scholarly and programmatic activities.
- Evaluate the outcomes of the capstone project and communicate findings to an interprofessional audience in a clear, understandable manner through a peer-reviewed report or presentation.

#### PRACTICE REASONING AND DECISION MAKING

- Empirically monitor client progress and treatment efficacy in practice.
- Identify and apply appropriate tools for measuring practice outcomes at the individual and systems level.
- Synthesize current knowledge, available evidence and responses to interventions to inform new approaches to practice problems.
- Demonstrate the skills necessary to lead and manage an interprofessional team.

### PROFESSIONAL CONDUCT

- Demonstrate commitment to professional growth through the creation, implementation and monitoring of a career development plan.
- Demonstrate active involvement in professional development, leadership, and advocacy for the benefit of constituents and the profession.

## PEOPLE

**Faculty:** Professors Benedict (OT Program Coordinator), Edwards; Associate Professor Larson; Assistant Professors Ausderau, Pickett, Travers. Additional instructors are listed here (<https://>

kinesiology.education.wisc.edu/occupational-therapy-homepage/people-of-ot).

## LA FOLLETTE SCHOOL OF PUBLIC AFFAIRS

**Administrative Unit:** La Follette School of Public Affairs

**College/School:** College of Letters & Science

**Admitting Plans:** MPA

**Degrees Offered:** MPA in International Public Affairs; MPA in Public Affairs

**Minors and Certificates:** Doctoral Minor in Public Affairs

The mission of the Robert M. La Follette School of Public Affairs is to improve the design of public policy and the practice of governance. Faculty conduct innovative policy and management research and train, mentor and educate students to work in public affairs in the United States and around the world. The school's faculty are economists, political scientists, sociologists, and public affairs scholars who are experts in government finance, social and poverty policy, education policy, emergency management, international dimensions of poverty, environmental regulation, international trade policy, program evaluation, the policy making process, public sector performance, and health care.

### MASTER OF PUBLIC AFFAIRS (MPA)

Through the master of public affairs (MPA) degree program, students learn the skills needed to transform an interest in public affairs into serious careers. The program offers rigorous professional training across several disciplines and prepares graduates to take positions as managers and analysts in government at all levels, in the rapidly growing nonprofit sector, and in private consulting firms.

### LAW AND PUBLIC AFFAIRS

Increasingly, careers in the federal, state and local governments as well as nonprofit organizations and private sector businesses require an understanding of public administration, policy analysis, and public affairs, as well as law. Many students choose to pursue the dual law and public affairs degree because of their interest in these organizations. A total of 111 credits, 75 credits at the Law School and 36 credits at the La Follette School of Public Affairs, are required for the dual degree program. The law and public affairs program generally takes four years to complete.

### MASTER OF PUBLIC AFFAIRS AND MASTER OF PUBLIC HEALTH (MPA/MPH)

The master of public affairs and master of public health dual degree program prepares students for careers as policy analysts and public managers in the increasingly important area of health care. Dual degree MPA/MPH students develop a firm foundation in policy analysis and public management offered by public affairs experts and a deep substantive knowledge in public health that can only be offered through a program in the School of Medicine and Public Health.

### NEUROSCIENCE AND PUBLIC AFFAIRS OR INTERNATIONAL PUBLIC AFFAIRS (PH.D./MPA OR MIPA)

This dual degree program leads to the Ph.D. in neuroscience (awarded by the neuroscience training program) and a master of public affairs degree, (awarded by the Robert M. La Follette School of Public Affairs). The program in neuroscience and public affairs will educate students who wish to use a critical understanding of neuroscience to inform

public policy. In coming decades, advances in brain science promise to fundamentally transform our understanding of the human mind, behavior, and mental health, posing new challenges for policy in areas such as education, health, welfare, and security. Graduates pursue academic and policy careers.

### PUBLIC AFFAIRS AND URBAN AND REGIONAL PLANNING (MPA OR MIPA AND M.S. IN URBAN AND REGIONAL PLANNING)

A double degree in planning and public affairs is available from the Department of Planning and Landscape Architecture the La Follette School of Public Affairs. The three-year, 66-credit program culminates in an M.S. degree in urban and regional planning and a master of public affairs or master of international public affairs degree. Admission must be secured from both departments, though application for admission need not be simultaneous. Students may apply for both programs using the same graduate school electronic application.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- International Public Affairs, MIPA (p. 444)
- Public Affairs, Doctoral Minor (p. 446)
- Public Affairs, MPA (p. 446)

## PEOPLE

**Faculty:** Professors Blank, Cancian, Chinn, Haveman, Herd, Meyer, Moynihan, Smeeding, Weimer, Wolfe, Yackee (director); Associate Professors: Collins, Copelovitch, Fletcher, Nemet, Wallace; Assistant Professors: O'Brien, Tjernstrom

## INTERNATIONAL PUBLIC AFFAIRS, MIPA

Through rigorous professional training across disciplines, the master of international public affairs (MIPA) degree program prepares students from the United States and around the world to engage in governance in ways that meet the challenges of globalization. Graduates work in government at home and abroad, in businesses involved in the global economy, in non-governmental agencies, in consulting firms analyzing implications of international policies, and in many other areas. Students can focus on environmental policy, trade and finance, economic development, a specific region and language, or propose an alternate focus utilizing courses from public affairs and other graduate departments.

Some students choose to pursue a dual degree with the Law School, a double degree with the Department of Urban and Regional Planning, or a dual degree with the School of Medicine and Public Health's neuroscience Ph.D. program. MIPA and MPA students can also pursue a graduate/professional certificate in energy analysis and policy, or in transportation management and policy.

## FUNDING

La Follette School fellowships and scholarships are offered on a competitive basis to all public affairs and international public affairs applicants. Priority consideration is given to applications received by January 1. Applications are accepted after this date on a rolling admission basis.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

MIPA, with available accelerated track

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

MIPA: 42 credits

MIPA accelerated track: 36 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

MIPA: 16 credits

MIPA accelerated track: 36 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (21 out of 42 total credits) must be completed in graduate-level coursework. For MIPA accelerated track, 21 of 36 must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements. This work does not appear on UW–Madison transcript nor count toward graduate career GPA.

#### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Up to 7 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. This work will not appear on the student's graduate transcript. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

#### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

#### CREDITS PER TERM ALLOWED

MIPA: 13 credits are advised if a student hold other appointments on campus. Students need advisor approval to take 15 credits.

MIPA accelerated track: 15 credits

#### PROGRAM-SPECIFIC COURSES REQUIRED

For program-specific courses, see the MIPA website (<http://www.lafollette.wisc.edu/degreeprograms/mipa.html>).

#### OVERALL GRADUATE GPA REQUIREMENT

3.0 GPA required

#### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all core curriculum coursework.

#### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

#### ADVISOR/COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

#### ASSESSMENTS AND EXAMINATIONS

Requirements are determined by the program.

#### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirement.

## ADMISSIONS

Applicants for the MIPA program should submit transcripts showing undergraduate performance with at least the equivalent of a 3.0 G.P.A. (on a 4.0 scale), statement of purpose, GRE scores, and a resume. Preferred prerequisite courses are introductory microeconomics and introductory macroeconomics, an introductory course in calculus or statistics, a comparative politics or international relations course, and language study. Applicants without this background may be admitted with the understanding that these courses will be completed before beginning the program.

Every applicant whose first language is not English and whose complete four-year undergraduate instruction was not in English, must provide official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or the Michigan English Language Assessment Battery (MELAB). The applicant must provide at least one of these minimum standardized test scores: TOEFL computer-based test score 237, TOEFL internet-based test score 92, IELTS score 7, or MELAB 82. Even if a student has the minimum score, the program can require the admitted applicant to take the on-campus ESL exam and register for any recommended English-as-a-second-language course(s) in the first semester of graduate study.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- (Knowledge) Students will demonstrate understanding of major current and past policy debates, research findings, and analytical methodologies in each of the following core areas: microeconomic policy analysis, macroeconomic policy analysis, quantitative tools for policy analysis, policy analysis, and international governance.
- (Knowledge) Students will demonstrate critical thinking skills. They will retrieve and examine the policy literature and evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions.
- (Applied research skills) Students will read, comprehend, and effectively summarize policy research and policy-relevant academic research.
- (Applied research skills) Students will effectively summarize data for a general (nonacademic) or policy audience.
- (Applied research skills) Students will demonstrate competency in methods of inferential statistics including those associated with multivariate regression models.

### PROFESSIONAL CONDUCT

- (Professional and ethical conduct) Students will identify and appropriately respond to scenarios involving the ethical and professional responsibilities of public administration.
- (Professional and ethical conduct) Students will demonstrate the ability to maintain human subjects protections when designing studies, collecting data and reporting results.

- (Professional and ethical conduct) Students will know and adhere to high levels of professional conduct, ethical decision-making and legal and regulatory compliance.
- (Professional and ethical conduct) Students will demonstrate the ability to maintain fidelity to objective social science-based research methods.

## ADDITIONAL LEARNING GOALS

- (Communication) Students will communicate in clear written language: a real-world policy problem, relevant scholarly studies and practical applications, a policy-analytic method to investigate the problem, and client-oriented advice to mitigate the problem.
- (Communication) Students will communicate substance of point 1 highly concisely and in language understandable to a non-specialist.
- (Communication) Students will communicate substance of point 2 orally.
- (Professional skills and career preparation) Students will develop effective job-seeking tools and utilize job-seeking techniques.
- (Professional skills and career preparation) Students will complete high quality group projects, including demonstration of effective project management and teamwork.

## PEOPLE

**Faculty:** Professors Blank, Cancian, Chinn, Haveman, Herd, Meyer, Moynihan, Smeeding, Weimer, Wolfe, Yackee (director); Associate Professors: Collins, Copelovitch, Fletcher, Nemet, Wallace; Assistant Professors: O'Brien, Tjernstrom

## PUBLIC AFFAIRS, DOCTORAL MINOR

### PUBLIC AFFAIRS, MPA

Through the master of public affairs (MPA) degree program, students learn the skills needed to transform an interest in public affairs into serious careers. The program offers rigorous professional training across several disciplines and prepares graduates to take positions as managers and analysts in government at all levels, in the rapidly growing nonprofit sector, and in private consulting firms.

The curriculum builds on foundational courses taught by core La Follette School faculty. Students choose from a wide range of courses to meet individual interests and career goals with guidance from a program and faculty advisor. A student can focus on social and poverty policy, environmental policy, energy policy, education policy, urban planning, health policy, policy analysis, or public management, or propose an alternate focus utilizing courses from public affairs and other graduate departments.

Students occasionally find it advantageous to earn two graduate degrees concurrently. The La Follette School offers a double degree program with the Department of Urban and Regional Planning, a dual degree with the Law School, and with two programs in the School of Medicine and Public Health—neuroscience (Ph.D.) and public health (MPH). MIPA and MPA students can pursue a graduate/professional certificate in energy analysis and policy and/or in transportation management and policy.

## FUNDING

La Follette School fellowships and scholarships are awarded on a merit basis to all public affairs and international public affairs applicants. Priority consideration is given to applications received by the priority admission date January 1. Applications are accepted after this date on a rolling admission basis.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

MPA, with available accelerated track

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

MPA: 42 credits

MPA with accelerated track: 36 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

MPA: 16 credits

MPA with accelerated track; 36 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (21 out of 42 total credits) must be completed in graduate-level coursework. For MPA accelerated track, 21 of 36 must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Requirements are determined by the program.

#### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

#### LANGUAGE REQUIREMENTS

No language requirement.

## ADMISSIONS

Applicants to the master of public affairs must submit official transcripts showing at least a 3.0 undergraduate GPA (on a 4.0 scale), three references, a resume, a statement of purpose and Graduate Record Exam (GRE) scores. Preferred prerequisite courses are an introductory course in microeconomics, an introductory course in calculus or statistics, and an introductory American government course. Applicants without this background may be admitted with the understanding that these courses will be completed before beginning the program.

Every applicant whose first language is not English and whose full-four-year undergraduate instruction was not in English, must provide official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) or the Michigan English Language Assessment Battery (MELAB). The applicant must provide at least one of these minimum standardized test scores: TOEFL computer-based test score 237, TOEFL internet-based test score 92, IELTS score 7, or MELAB 82. Even if a student has the minimum score, the program can require the admitted applicant to take the on-campus ESL exam and register for any recommended English-as-a-second-language course(s) in the first semester of graduate study.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- (Knowledge) Students will demonstrate understanding of major current and past policy debates, research findings, and analytical methodologies in each of the following core areas: microeconomic policy analysis, quantitative tools for policy analysis, policy analysis, the policymaking process, and public management.
- (Knowledge) Students will demonstrate critical thinking skills. They will retrieve and examine the policy literature and evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions.
- (Applied Research Skills) Students will read, comprehend, and effectively summarize policy research and policy-relevant academic research.
- (Applied Research Skills) Students will effectively summarize data for a general (non-academic) or policy audience.
- (Applied Research Skills) Students will demonstrate competency in methods of inferential statistics including those associated with multivariate regression models.

### PROFESSIONAL CONDUCT

- (Professional and Ethical Conduct) Students will identify and appropriately respond to scenarios involving the ethical and professional responsibilities of public administration.
- (Professional and Ethical Conduct) Students will demonstrate the ability to maintain human subjects protections when designing studies, collecting data and reporting results.
- (Professional and Ethical Conduct) Students will know and adhere to high levels of professional conduct, ethical decision-making and legal and regulatory compliance.

- (Professional and Ethical Conduct) Students will demonstrate the ability to maintain fidelity to objective social science-based research methods.

## ADDITIONAL LEARNING GOALS

- (Communication) Students will communicate substance of point 1 highly concisely and in language understandable to a non-specialist.
- (Communication) Students will communicate substance of point 2 orally.
- (Professional Skills and Career Preparation) Students will develop effective job-seeking tools and utilize job-seeking techniques.
- (Professional Skills and Career Preparation) Students will complete high quality group projects, including demonstration of effective project management and teamwork.

## PEOPLE

**Faculty:** Professors Blank, Cancian, Chinn, Haveman, Herd, Meyer, Moynihan, Smeeding, Weimer, Wolfe, Yackee (director); Associate Professors: Collins, Copelovitch, Fletcher, Nemet, Wallace; Assistant Professors: O'Brien, Tjernstrom

## LANGUAGE INSTITUTE

**Administrative Unit:** Language Institute

**College/School:** College of Letters & Science

**Admitting Plans:** Ph.D.

**Degrees Offered:** Ph.D.

**Minors and Certificates:** Doctoral Minor

Second language acquisition or SLA is the systematic study of learning, using, and sometimes losing any form of language beyond the mother tongue. Research in SLA is a burgeoning field because today there are more people who use at least two languages than there are monolinguals. For individual learners and for every community in diaspora, second language acquisition is an experience that challenges their knowledge of language, their understanding of different cultures, and their personal identity. These challenges are studied by SLA researchers, scholars whose training is in a variety of fields—linguistics, psychology, sociology, education, anthropology, and communication arts—a variety that makes the study of SLA richly interdisciplinary.

The Ph.D. program in second language acquisition at the University of Wisconsin–Madison is a rigorous and coherently interdisciplinary academic program in a field that embodies the university's mission to foster the study of globally important issues. In their coursework, students in the program learn from the experiences of a distinguished faculty in many departments and, in their dissertation research, students share with faculty the discovery of new knowledge. Students develop a thorough understanding of the many facets of SLA, including language pedagogy, the study of multilingualism, language acquisition and loss, and multilingual language use in contexts of education, the workplace, and the family. Through the program, students develop skills in research in the sociology and psychology of knowing two or more languages and in the linguistics of languages in contact. A Ph.D. in SLA opens the door

to scholarly and professional careers as university faculty, directors of foreign language programs, educational policy makers, and multilingual specialists.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Second Language Acquisition, Doctoral Minor (p. 449)
- Second Language Acquisition, Ph.D. (p. 450)

## PEOPLE

**Faculty:** Professors Chavez (German), Evans-Romaine (Slavic Languages and Literature), Frantzen (Spanish and Portuguese), Hawkins (Curriculum and Instruction), Mori (East Asian Languages and Literature), Tochon (Curriculum and Instruction), Young (English); Associate Professors Allen, Geyer (East Asian Languages and Literature), Stafford (Spanish and Portuguese), Pacheco (Curriculum and Instruction), Thompson (African Languages and Literature); Assistant Professor Cho

## SECOND LANGUAGE ACQUISITION, DOCTORAL MINOR

The Option A minor in second language acquisition (SLA) offers graduate students both a theoretical and a practical background in the increasingly important area of SLA. After completing the minor, students will be prepared to understand research in SLA and to develop teaching curricula based on principles of second language learning and teaching.

Student must come to the SLA minor with a minimal background in second language acquisition and learning methodology, and in linguistics, obtained through the listed prerequisite courses or their equivalents.

## REQUIREMENTS

**Note:** In spring 2015, the SLA steering committee approved new requirements for the SLA minor, effective fall 2015. Those students who began the minor before fall 2015 have the option to complete the old requirements or the new. See pre-fall 2015 requirements ([http://www.sla.wisc.edu/sites/sla.wisc.edu/files/SLA-Minor-Requirements\\_2014-15.docx](http://www.sla.wisc.edu/sites/sla.wisc.edu/files/SLA-Minor-Requirements_2014-15.docx)).

The SLA minor consists of 9 credits: a required course, and two elective courses, which must be taken outside the student's home department. Students without a background in linguistics and language pedagogy are encouraged to take introductory linguistics and teaching methodology courses before starting the SLA minor. Students may transfer up to 3 credits from prior graduate work, upon approval.

### NEW REQUIREMENTS (EFFECTIVE FALL 2015)

All students are required to take ENGL 318 Second Language Acquisition *or* CURRIC 673 Learning Second Language and Literacies. Students also choose **two courses** (from outside of their home departments) **from the approved SLA list** below. With approval of the SLA minor advisor, students may count up to 3 credits (one course) of prior graduate study toward the minor.

The courses for the SLA minor may be taken in any appropriate sequence.

The total for the minor is thus three courses (9 credits). The two elective courses should be taken outside the student's home department. (Exceptions can be made for students with a literature focus.)

Students wishing to minor in SLA should first contact the relevant SLA committee member (<http://sla.wisc.edu/people/faculty>) in their department who will refer them to the SLA minor advisor. Students declaring the minor are required to meet with Professor Naomi Geyer, (email: [nfgeyer@wisc.edu](mailto:nfgeyer@wisc.edu)) SLA minor advisor, before registering for SLA minor courses.

For more information on the minor for doctoral students, see the Graduate School policy on minors (<https://grad.wisc.edu/acadpolicy/#minors>).

### REQUIRED COURSES FOR THE SLA DOCTORAL MINOR

SLA doctoral minors must complete one of two courses:

- ENGL 318 Second Language Acquisition *or*
- CURRIC 673 Learning Second Language and Literacies

Students declaring the SLA minor who wish to take either of these courses should notify the instructor and the SLA minor advisor of their intention as early as possible so that a slot in the course may be reserved.

### TRANSFERRING CREDITS FROM PRIOR GRADUATE WORK

With approval by the SLA minor advisor, students may count up to 3 credits of prior graduate study from outside UW–Madison. Typically a course syllabus (translated into English, if necessary, and with credit hours clearly stated) is required to determine whether the course can count toward the SLA doctoral minor.

### ELECTIVES

Students are required to take two courses (6 credits) outside of their home departments from the list of approved courses below. Students select courses for a balanced program according to individual interest. All courses must be approved by the SLA minor advisor, who will monitor the overall coherence of each student's minor program, with input from the student's departmental SLA advisor. Other courses can be considered, but require preapproval by the SLA Steering Committee. To be approved for the minor, courses must contain a foreign language or second language focus as evidenced by course material (e.g., syllabus or reading list), provided by the student to the SLA minor advisor.

#### African Cultural Studies

- AFRICAN 701 Advanced Topics in African Linguistics\*

#### Curriculum and Instruction (C&I)

- CURRIC 673 Learning Second Language and Literacies
- CURRIC 674 Advanced Methods in Teaching English as a Second Language
- CURRIC 675 General Seminar\*
- CURRIC 743 Educational Technology for Deep Language Learning\*\*
- CURRIC 964 Seminar in World Language Education

- CURRIC 975 General Seminar (with appropriate topic; see SLA PhD minor advisor for consent)

### English

- ENGL 414 Global Spread of English (Instructor and SLA advisor consent required.)
- ENGL 420 Topics in English Language and Linguistics
- ENGL 703 Research Methods in Composition Studies
- ENGL/SOC 710 Interaction Analysis: Talk as Social Organization
- ENGL 711 Research Methods in Applied Linguistics
- ENGL 713 Topics in Contemporary English Linguistics\*
- ENGL 715 Advanced Second Language Acquisition
- ENGL 905 Seminar-Topics in Applied English Linguistics\*

### French and Italian

FRENCH/ITALIAN 821 Issues in Methods of Teaching French and Italian \*/\*\*

### German

- GERMAN 727 Topics in Applied Linguistics\*

### Sociology

- SOC 735 Ethnomethodology & Conversation Analysis

### Spanish

(Note: Spanish courses are generally offered in Spanish; contact instructor)

- SPANISH 544 Contemporary Issues in Applied Spanish Linguistics
- SPANISH 630 Topics in Hispanic Linguistics (with appropriate topic)
- SPANISH 815 Seminar in Language: Modern Spanish (with appropriate topic)
- SPANISH 830 Seminar: The Spanish Grammatical Tradition (with appropriate topic)

\*Topics courses. Students should see the SLA Minor Advisor for approval of topics appropriate for the minor.

\*\*Courses must be taken for a total of 3 credits, in one or multiple enrollments.

## ADMISSIONS

### Administration

Prof. Cathy Stafford (<http://sla.wisc.edu/faculty/catherine-stafford>)(director): [cstafford@wisc.edu](mailto:cstafford@wisc.edu)

Contact Prof. Stafford for questions having to do with the academic program.

Wendy Johnson (<http://sla.wisc.edu/content/wendy-johnson>) (program coordinator): [wjohnso@wisc.edu](mailto:wjohnso@wisc.edu)

Contact Ms. Johnson with questions of a logistical or procedural nature.

Malliga Somasundaram (financial and payroll specialist): [msomasundara@wisc.edu](mailto:msomasundara@wisc.edu)

Contact Ms. Somasundaram for questions regarding fellowships, benefits, reimbursements, and all things financial.

### PhD Minor

Prof. Naomi Geyer (<http://sla.wisc.edu/faculty/naomi-geyer>)(PhD minor advisor): [nfgeyer@wisc.edu](mailto:nfgeyer@wisc.edu)

Students wishing to minor in SLA should first contact the relevant SLA committee member in their department who will refer them to the chair of the SLA minor program. Students declaring the minor are required to meet with the SLA Minor Advisor before registering for SLA minor courses.

### SLA Faculty and Academic Staff

Core SLA members advise, direct, or co-direct dissertations of students in the program. Their research focuses on Second Language Acquisition, as demonstrated in publications, presentations at research conferences, professional service activities, and/or graduate teaching.

**Affiliate Members** (<http://sla.wisc.edu/content/affiliate-faculty-and-academic-staff>)

Affiliate SLA faculty and academic staff teach courses related to SLA, co-advise dissertations, and may serve on administrative committees.

### SLA Listserves

[uwsla-corefaculty@lists.wisc.edu](mailto:uwsla-corefaculty@lists.wisc.edu)

[uwsla-affiliatefaculty@lists.wisc.edu](mailto:uwsla-affiliatefaculty@lists.wisc.edu)

[uwsla-phdmajors@lists.wisc.edu](mailto:uwsla-phdmajors@lists.wisc.edu)

[uwsla-phdminors@lists.wisc.edu](mailto:uwsla-phdminors@lists.wisc.edu)

[uwsla-all@lists.wisc.edu](mailto:uwsla-all@lists.wisc.edu) (includes all SLA-affiliated students and faculty)

## PEOPLE

**Faculty:** Professors Chavez (German), Evans-Romaine (Slavic Languages and Literature), Frantzen (Spanish and Portuguese), Hawkins (Curriculum and Instruction), Mori (East Asian Languages and Literature), Tochon (Curriculum and Instruction), Young (English); Associate Professors Allen, Geyer (East Asian Languages and Literature), Stafford (Spanish and Portuguese), Pacheco (Curriculum and Instruction), Thompson (African Languages and Literature); Assistant Professor Cho

## SECOND LANGUAGE ACQUISITION, PH.D.

Second language acquisition or SLA is the systematic study of learning, using, and sometimes losing any form of language beyond the mother tongue. Research in SLA is a burgeoning field because today there are more people who use at least two languages than there are monolinguals. For individual learners and for every community in diaspora, second language acquisition is an experience that challenges their knowledge of language, their understanding of different cultures, and their personal identity. These challenges are studied by SLA researchers, scholars whose training is in a variety of fields—linguistics,

psychology, sociology, education, anthropology, and communication arts—a variety that makes the study of SLA richly interdisciplinary.

The Ph.D. program in second language acquisition at the University of Wisconsin–Madison is a rigorous and coherently interdisciplinary academic program in a field that embodies the university's mission to foster the study of globally important issues. In their coursework, students in the program learn from the experiences of a distinguished faculty in many departments and, in their dissertation research, students share with faculty the discovery of new knowledge. Students develop a thorough understanding of the many facets of SLA, including language pedagogy, the study of multilingualism, language acquisition and loss, and multilingual language use in contexts of education, the workplace, and the family. Through the program, students develop skills in research in the sociology and psychology of knowing two or more languages and in the linguistics of languages in contact. A Ph.D. in SLA opens the door to scholarly and professional careers as university faculty, directors of foreign language programs, educational policy makers, and multilingual specialists.

## FUNDING

Students in the SLA program, depending on their qualifications, may receive financial support through several departments, programs, and institutes. Many students who minor in a foreign language or ESL work as graduate teaching assistants for the department in which that language is taught. Other students work as graduate project assistants for the Language Institute or other units on campus. In addition to these TA and PA positions, select SLA students receive university fellowships (including the Advanced Opportunity Fellowships) upon entry into the program or when working on their dissertations. If they meet the specific eligibility criteria, students may also compete, with the program's support, in other grant and fellowship competitions, such as Foreign Language and Area Studies (FLAS) Fellowships. Additional funding opportunities are included in the information for current students on the SLA website (<http://www.sla.wisc.edu/content/funding-resources>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

36 credits coursework plus 9 dissertation credits, for a total of 45 credits.

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework

attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions or the UW–Madison. Coursework earned ten years or more prior to admission to the doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Prior coursework from the UW–Madison undergraduate career may not be applied toward the program.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Prior coursework from the UW–Madison University Special student career may not be applied toward the program.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

ENGL 318 Second Language Acquisition and ENGL 711 Research Methods in Applied Linguistics, and research methods: one course in qualitative and one in quantitative research methods chosen from an approved list

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete an emphasis totaling 12 credits. The emphasis is normally fulfilled by completion of an Option A or B minor; however, if the Option A minor is only 9 credits, the student must choose an additional, 3-credit course on a related topic. Students will submit their plan for completing the emphasis by the end of the first year.

### OVERALL GRADUATE GPA REQUIREMENT

3.0 GPA required

### OTHER GRADE REQUIREMENTS

Incompletes must be resolved by the end of the next fall or spring term in which the student is enrolled. In addition, all incompletes must be resolved before students may take any portion of the preliminary examination.

### PROBATION POLICY

Those students not meeting satisfactory progress requirements may be put on probation for a semester.

### ADVISOR / COMMITTEE

Students are required to meet with their advisor at least once each semester to review their progress, select courses, and to discuss any outstanding issues or questions.

### ASSESSMENTS AND EXAMINATIONS

Students must take preliminary exams within one semester of completing coursework.

In order to help identify possible funding sources, students whose first language is not English are required to take the SPEAK test, a test of spoken English administered by the Department of English, within the first semester.

### TIME CONSTRAINTS

Students whose first language is not English are required to take the SPEAK test within the first semester.

Students must submit plans for completing the emphasis requirement and the language requirement for approval by the steering committee within their first year of the program.

Students typically complete all of the coursework requirements within two years of enrolling in the Program. Students are required to complete all coursework and fulfill the language requirement before taking the preliminary examinations.

Students must take the preliminary examination within one semester of completing coursework.

Graduate School regulations require Ph.D. candidates to defend their dissertation five years from the date of passing their preliminary examinations.

### LANGUAGE REQUIREMENTS

The SLA Ph.D. major requires oral as well as reading proficiency at the advanced level in two languages, including English. Students may not be recommended for preliminary exams until they have fulfilled both parts of the language requirement.

Typically, the student must demonstrate an advanced level of academic oral and reading proficiency in two languages prior to taking preliminary exams. A plan for meeting this requirement is developed by the student and advisor within the first semester of the student's program. The plan must be approved by the advisor and the SLA steering committee by the end of the first academic year.

### COURSES

For detailed information about course requirements, students should consult the SLA Student Handbook (<http://www.sla.wisc.edu/content/major-requirements>).

## ADMISSIONS

The SLA doctoral program requires a master's degree in a foreign language, English, applied linguistics, linguistics, or education. The SLA program requires GRE scores. The GRE examination must be taken within five years before your application to the SLA doctoral program. Please refer to the program website (<http://www.sla.wisc.edu/admissions>) for application deadlines, required application materials, and required modes of submitting these materials. In addition, general requirements for admission, stipulated by the graduate school (e.g., evidence of English proficiency for certain international students) apply.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### KNOWLEDGE

- Students will demonstrate a strong overall understanding of the scope of the discipline of SLA (e.g., the theories on which research in the field is based; the type of questions that researchers in SLA address; and the variety of techniques used to answer these questions).
- Students will demonstrate an in-depth understanding of theories and research findings related to their focal areas of interest.
- Languages: Students will demonstrate an advanced level of academic oral and reading proficiency in two languages, including English.
- Research: Students will develop and complete original research that advances a specific area of SLA research.
- Students will retrieve, evaluate, and interpret academic publications, and use this information to identify a gap in literature and to develop theoretical frameworks and research designs for their own research projects.
- Students will learn to design realistic and feasible research projects and to prepare necessary protocols.
- Students will collect data following relevant protocols and analyze/interpret the resulting data.
- Students will reflect on the procedures and results of their own projects to identify limitations and propose possible future studies.
- Students will present their research articulately and informatively to diverse audiences.
- Students will prepare manuscripts resulting from their independent research for publication in professional journals and other suitable venues.
- Students will be able to give and receive feedback orally and in writing.

#### TEACHING

- Students will be able to design a course, evaluating the program's and students' needs and identifying suitable learning objectives, as well as materials, methods, and activities to reach the objectives.
- Students will create and execute lesson plans, making changes as they become necessary.
- Students will identify methods to evaluate their students' progress, and provide feedback and assistance, and/or readjust their approach, as needed.

### PROFESSIONAL CONDUCT

- Students will communicate effectively as a member of a professional community.
- Students will seek opportunities to engage in service to the program, the university and/or to the wider community.
- Students will understand responsibilities of researchers who work with human subjects and follow institutional and professional guidelines to adhere to a code of ethics.

## PEOPLE

**Faculty:** Professors Chavez (German), Evans-Romaine (Slavic Languages and Literature), Frantzen (Spanish and Portuguese), Hawkins (Curriculum and Instruction), Mori (East Asian Languages and Literature), Tochon (Curriculum and Instruction), Young (English); Associate Professors Allen, Geyer (East Asian Languages and Literature), Stafford (Spanish and Portuguese), Pacheco (Curriculum and Instruction), Thompson (African Languages and Literature); Assistant Professor Cho

## LAW—SCHOOL-WIDE

**Administrative Unit:** Law School

**College/School:** Law School

**Minors and Certificates:** Doctoral Minor in Law; Graduate/Professional Certificate in Consumer Health Advocacy

Students interested in pursuing a J.D. degree should contact the Law School Admissions Office (<http://law.wisc.edu/prospective/apply.html>).

Students interested in pursuing a J.D. degree in conjunction with a graduate degree should contact the Law School Admissions Office (<http://law.wisc.edu/prospective/apply.html>) and the graduate program of interest for more information. In addition, established dual degrees are offered with the Nelson Institute for Environmental Studies; Latin American, Caribbean, and Iberian Studies Program; departments of Community and Environmental Sociology, Sociology and Rural Sociology, Philosophy, and Political Science; La Follette School of Public Affairs; School of Business; School of Library and Information Studies; Public Health Program and others.

Students interested in pursuing an LL.M. or S.J.D. degree should contact the Law School Graduate Programs Office (<http://law.wisc.edu/grad>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Consumer Health Advocacy, Graduate/Professional Certificate (p. 453)
- Law, Doctoral Minor (p. 453)

## CONSUMER HEALTH ADVOCACY, GRADUATE/PROFESSIONAL CERTIFICATE

### REQUIREMENTS

The consumer health advocacy graduate/professional certificate is a complementary certificate available to all UW–Madison graduate students, and for professional students from the schools of Nursing, Pharmacy, Medicine and Public Health, and Law.

## LAW, DOCTORAL MINOR

### REQUIREMENTS

Coursework in the Law School may be offered as a minor toward the doctoral degree. Only enrolled non-dissertator Ph.D. students can pursue a doctoral minor in Law. There is no process for applying for a law minor; the minor is not officially recorded on the student's transcript until the minor is completed and the doctoral degree is conferred.

For a minor in law, doctoral candidates must complete 10 credits. The minimum grade requirement is a weighted average of B (on the University, not Law School, grade scale). The same grading standards will be applied.

See Courses & Schedules (<http://www.law.wisc.edu/academics/courses>) for information on Law School courses.

## LIFE SCIENCES COMMUNICATION

**Administrative Unit:** Life Sciences Communication

**College/School:** College of Agricultural and Life Sciences

**Admitting Plans:** M.S.

**Degrees Offered:** M.S.

**Minors and Certificates:** Doctoral Minor

The department offers a master's degree in life sciences communication, with available research/thesis or available professional course-based tracks.

The thesis track requires 30 credits. Study programs match the interests and needs of individual students. However, all students must take a communication theory course, a research methodology course and a statistics course. The program requires a thesis based on original research.

The professional track is a course-based program (30 credits total) that is designed to prepare students for professional careers in life sciences communication and related fields. Students in this track will not usually pursue a Ph.D. program in the future. In fact, many graduate programs (including life sciences communication) do not accept a non-thesis master's as a criterion for admission to their Ph.D. program.

Teaching and research in the department focus on science communication in the areas of emerging technologies, bioenergy, environment, agriculture, health, and food.

The M.S. in life sciences communication and Ph.D. in mass communications (p. 454) graduate programs provide advanced professional training in communication and preparation for communication research and teaching. Students in the professional track M.S. program are studying for careers in a variety of fields, including consulting, policy, journalism, strategic communication, marketing and market research, particularly in science-related fields.

For more information on the master's program, funding, resources, and FAQs, go to the "graduate" tab on the life sciences communication website (<http://lsc.wisc.edu>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Life Sciences Communication, Doctoral Minor (p. 454)
- Life Sciences Communication, M.S. (p. 454)

## PEOPLE

**Faculty:** Professors Brossard (chair), Loew, Meiller, Reaves, Scheufele (director of graduate studies); Associate Professors Shaw, Shepard; Assistant Professor Stenhouse

## LIFE SCIENCES COMMUNICATION, DOCTORAL MINOR

### REQUIREMENTS

The doctoral minor in life sciences communication is a course-based minor (10 credits) for students enrolled in other Ph.D. programs who would like to supplement their existing Ph.D. coursework with a minor in science communication. It is particularly valuable for graduate students in the natural and physical sciences or in engineering who are interested in the ethical, legal, and social implications (ELSI) of emerging technologies, or in communication and public attitudes about science and technology. More information may be found on the department website (<http://lsc.wisc.edu/ph-d-minor-in-life-sciences-communication>).

## PEOPLE

**Faculty:** Professors Brossard (chair), Loew, Meiller, Reaves, Scheufele (director of graduate studies); Associate Professors Shaw, Shepard; Assistant Professor Stenhouse

## LIFE SCIENCES COMMUNICATION, M.S.

The department offers a master's degree in life sciences communication, with available research/thesis or available professional course-based tracks.

The thesis track requires 30 credits. Study programs match the interests and needs of individual students. However, all students must take a communication theory course, a research methodology course and a statistics course. The program requires a thesis based on original research.

The professional track is a course-based program (30 credits total) that is designed to prepare students for professional careers in life sciences communication and related fields. Students in this track will not usually pursue a Ph.D. program in the future. In fact, many graduate programs (including life sciences communication) do not accept a non-thesis master's as a criterion for admission to their Ph.D. program.

Teaching and research in the department focus on science communication in the areas of emerging technologies, bioenergy, environment, agriculture, health, and food.

The M.S. in life sciences communication and Ph.D. in mass communications graduate programs provide advanced professional training in communication and preparation for communication research and teaching. Students in the professional track M.S. program are studying for careers in a variety of fields, including consulting, policy, journalism, strategic communication, marketing and market research, particularly in science-related fields.

For more information on the master's program, funding, resources, and FAQs, go to the "graduate" tab on the life sciences communication website (<http://lsc.wisc.edu>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.: with available professional course-based track and research/thesis track

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

M.S.—professional course-based track: 30 course credits

M.S.—research/thesis track: 24 credits coursework, up to 6 credits of 990/thesis for total of 30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 out of 30 total credits) must be completed in courses numbered 700 or higher, or in any LSC courses numbered 300–699. Courses in LSC in this range have:

1. an additional graduate-level component and
2. assess graduate students separately from undergraduate students.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

In consultation with the student's advisor and with program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned ten or more years prior to admission to a master's is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count no more than 12 credits of coursework numbered 600 or above taken as a UW–Madison Special student. Coursework earned ten or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits (however, 12 credits are highly encouraged)

## PROGRAM-SPECIFIC COURSES REQUIRED

LSC 720 Introduction to Communication Theory and Research, one graduate-level research methods course, one graduate-level statistics course.

## OVERALL GRADUATE GPA REQUIREMENT

3.5 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework to count it toward the 30-credit total.

## PROBATION POLICY

Students must be in good standing in accordance with the Graduate School Policies and Procedures in order to earn and retain an assistantship within the department. Students who fall out of good standing must meet with the director of graduate studies.

## ADVISOR / COMMITTEE

All students are required to meet with their advisor a minimum of once per semester.

## ASSESSMENTS AND EXAMINATIONS

The research/thesis track requires a formal thesis and oral defense; the non-thesis track requires a comprehensive report or course narrative, and presentation at the culmination of coursework.

## TIME CONSTRAINTS

Students who pursue the thesis-track master's degree will have a limit of four semesters (including summer semesters) of 990/thesis enrollment. The four-semester limit starts with the first semester a student takes 990 credits, whether or not in conjunction with other courses. Students will not be allowed to take leave once their 990 enrollment commences. Students who do not produce and defend a thesis at the end of the four semesters will be issued a professional-track thesis.

If a student in good standing encounters extenuating circumstances and wishes to interrupt her/his program of graduate study, the student can take a leave of absence but must notify the LSC graduate committee in writing prior to the start of the semester they wish to take leave, and specify the reason and anticipated length of the leave. If the student wishes to extend the leave, she or he must again notify the LSC graduate committee in writing to the director of graduate studies and the student services coordinator. The leave of absence guarantees re-entry to the program if the student applies to the Graduate School for readmission within the time period specified. Students whose requests are denied may later apply for readmission, but their acceptance cannot be guaranteed.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Students must meet the minimum requirements for admission set by the Graduate School. Applicants must submit an online application, GRE scores, a statement of purpose, official transcripts from all previously attended institutions, a CV/resume, and three letters of recommendation. Letters of recommendation should come from people who can speak to the scholarly abilities of the applicant. International applicants are required to take and attain a satisfactory score on the Test of English as a Foreign Language (TOEFL), or the International English Language Testing System (IELTS) exam. In order to be eligible for various fellowships and teaching assistantships, early application is recommended. A life sciences communication graduate program application checklist is available for applicants on the program website (<http://lsc.wisc.edu/wp-content/uploads/sites/25/2014/09/LSC-grad-programs-applicant-checklist.pdf>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate research problems, potentials, and limits with respect to theory, knowledge, and practice within the field of study. Demonstrating knowledge of the theories, concepts, frameworks, empirical findings, and controversies in the field.
- Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Demonstrates understanding of the primary field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies, tools, and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates complex ideas effectively across different audiences.

### PROFESSIONAL CONDUCT

- Recognizes, fosters, and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Brossard (chair), Loew, Meiller, Reaves, Scheufele (director of graduate studies); Associate Professors Shaw, Shepard; Assistant Professor Stenhouse

## LINGUISTICS

**Administrative Unit:** Linguistics

**College/School:** College of Letters & Science

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.A., Ph.D.

**Minors and Certificates:** Doctoral Minor

The Department of Linguistics admits students for the Ph.D. degree in linguistics, and awards a master of arts degree to students in a UW–Madison Ph.D. program upon the completion of the M.A. requirements. Students admitted to the linguistics Ph.D. program must attend the department orientation and must consult with the chair in person by the beginning of classes. All students proposing to minor in linguistics must also consult with the chair, who is the minor advisor, prior to beginning the minor.

The department focuses on research in formal theories of language (encompassing cross-linguistic studies in syntax, phonology, and morphology) and American Indian languages. Other specializations, including historical-comparative linguistics or articulatory and experimental phonetics, may be created by means of interdepartmental study. Students consult with their graduate advisors in establishing their areas of specialization and in working out a coherent program. Applied linguistic studies such as the theory and practice of language teaching or the history and structure of a particular language or language family are handled in other departments, or may be assembled as a program of individual study.

The department maintains a phonetics laboratory for teaching and research in experimental and acoustic phonetics, and also maintains a specialized library collection in the Graduate Reading Room, 1151 Van Hise Hall.

The linguistics graduate student handbook is available online on the program's website (<http://vanhise.lss.wisc.edu/ling/?q=node/15>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Linguistics, Doctoral Minor (p. 456)
- Linguistics, M.A. (p. 456)
- Linguistics, Ph.D. (p. 458)

## PEOPLE

**Faculty:** Professors Li, Macaulay, Macken, Raimy (Chair), Valentine

## LINGUISTICS, DOCTORAL MINOR

### REQUIREMENTS

The doctoral minor consists of 12 credits chosen in consultation with the minor advisor. The minor in linguistics will normally include

| Code                   | Title                                                       | Credits |
|------------------------|-------------------------------------------------------------|---------|
| LINGUIS/<br>ANTHRO 301 | Introduction to Linguistics:<br>Descriptive and Theoretical | 3       |
| LINGUIS 303            | Language, History, and Society                              | 3       |
| LINGUIS 310            | Phonology                                                   | 3       |
| LINGUIS 330            | Syntax                                                      | 3       |

A doctoral minor program must be approved by the minor advisor before it commences.

## PEOPLE

**Faculty:** Professors Li, Macaulay, Macken, Raimy (Chair), Valentine

## LINGUISTICS, M.A.

The Department of Linguistics admits students for the Ph.D. degree in linguistics, and awards a master of arts degree to students in a UW–Madison Ph.D. program upon the completion of the M.A. requirements. Students admitted to the linguistics Ph.D. program must attend the department orientation and must consult with the chair in person by the beginning of classes. All students proposing to minor in linguistics must also consult with the chair, who is the minor advisor, prior to beginning the minor.

The department focuses on research in formal theories of language (encompassing cross-linguistic studies in syntax, phonology, and morphology) and American Indian languages. Other specializations, including historical-comparative linguistics or articulatory and experimental phonetics, may be created by means of interdepartmental study. Students consult with their graduate advisors in establishing their areas of specialization and in working out a coherent program. Applied linguistic studies such as the theory and practice of language teaching or the history and structure of a particular language or language family are handled in other departments, or may be assembled as a program of individual study.

The department maintains a phonetics laboratory for teaching and research in experimental and acoustic phonetics, and also maintains a specialized library collection in the Graduate Reading Room, 1151 Van Hise Hall.

The linguistics graduate student handbook is available online on the program's website (<http://vanhise.lss.wisc.edu/ling/?q=node/15>).

## FUNDING

The department currently supports teaching assistantships for LINGUIS 101 Human Language, usually awarded to graduate students after their first year of study. Project assistantships are often available from both inside and outside the department. Advanced Opportunity Fellowships are possible for targeted students who are U.S. citizens or permanent residents. A small number of fellowships are available and are administered through the Graduate School. TA appointments in other departments, for instance in language departments or in the English as a second language program, are sometimes possible based on a student's skill set, since being a student in those departments is not a condition of employment.

## REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

## MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

All linguistics courses must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>). This will be a total of at least 24 credits out of 30.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Four 300-level linguistic courses; two 500-level linguistics courses; Linguistics 800 Research Methods and Materials; one additional 500+ level linguistics course; and two additional approved courses. Contact program for list of specific courses.

### OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a minimum GPA of 3.0.

### OTHER GRADE REQUIREMENTS

Students must maintain a GPA of 3.67 in substantive courses taken in the Department of Linguistics after the third semester. Student must complete the required courses with a GPA of 3.25 to earn the M.A. degree.

### PROBATION POLICY

Probation is a warning to a student who is not making satisfactory progress in the graduate program of the linguistics department. Departmental probation for grades or failure to make satisfactory

progress lasts for one academic year (two consecutive semesters), while probation for an unsatisfactory prelim paper or unfinished Incompletes lasts for one semester.

If a student on probation clears up the problem that led to probation within the time period allotted, nothing else happens, and the student can continue with the program.

If the student does not resolve the problem (e.g. raise the GPA or successfully complete a prelim), the student is dropped from the program at the end of the probationary period.

### ADVISOR / COMMITTEE

Every graduate student must have an official faculty advisor. New students are usually assigned to the chair by default, unless they come with the intention of working with a particular faculty member. By the end of the first year, students must decide whom they would like to work with, and must ask that person if they are willing to serve as advisor. If the faculty member agrees, the student is responsible for having the faculty member sign the blue advisor agreement form, and for making sure that it is placed in the student's file. All permanent faculty members in the department (including affiliated faculty but excluding visiting faculty) may serve as advisors. Faculty from other departments may not serve as official advisors, even though they may co-chair committees.

Every faculty member has the right to refuse to become a student's advisor. Every graduate student has the right to choose any faculty member as advisor, so long as the faculty member agrees. Students should also feel free to change advisors at any time, without fear of offending a faculty member. If a student changes advisors, a new advisor agreement form must be signed and filed, and the previous advisor must be notified by the student in writing.

The advisor guides the student in the choice of appropriate courses, in the planning of prelims and the dissertation, in choosing prelim committees and the dissertation committee, and in other professional matters. Students are reminded, however, that the fulfillment of departmental requirements is ultimately the student's responsibility.

Each semester, the student must consult in person with the advisor about courses for the following semester. Registration is blocked until this is done, and is only unblocked when the student turns in the relevant form to the department, signed by the advisor.

### ASSESSMENTS AND EXAMINATIONS

Submit and defend on prelim paper by the end of the fourth semester. Contact the program for further details.

### TIME CONSTRAINTS

The prelim paper must be completed by the end of the fourth semester.

### LANGUAGE REQUIREMENTS

Knowledge of two languages is required. One must be English. The language requirements can be satisfied in multiple ways and the program should be contacted directly for further details.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of linguistics.
- Identifies sources of data and assembles evidence pertaining to questions or challenges in the field of linguistics.
- Demonstrates understanding of linguistics in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of linguistics.
- Communicates clearly in ways appropriate to the field of linguistics.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Li, Macaulay, Macken, Raimy (Chair), Valentine

## LINGUISTICS, PH.D.

The Department of Linguistics admits students for the Ph.D. degree in linguistics, and awards a master of arts degree to students in a UW–Madison Ph.D. program upon the completion of the M.A. requirements. Students admitted to the linguistics Ph.D. program must attend the department orientation and must consult with the chair in person by the beginning of classes. All students proposing to minor in linguistics must also consult with the chair, who is the minor advisor, prior to beginning the minor.

The department focuses on research in formal theories of language (encompassing cross-linguistic studies in syntax, phonology, and morphology) and American Indian languages. Other specializations, including historical-comparative linguistics or articulatory and experimental phonetics, may be created by means of interdepartmental study. Students consult with their graduate advisors in establishing their areas of specialization and in working out a coherent program. Applied linguistic studies such as the theory and practice of language teaching or the history and structure of a particular language or language family are handled in other departments, or may be assembled as a program of individual study.

The department maintains a phonetics laboratory for teaching and research in experimental and acoustic phonetics, and also maintains a specialized library collection in the Graduate Reading Room, 1151 Van Hise Hall.

The linguistics graduate student handbook is available online on the program's website (<http://vanhise.lss.wisc.edu/ling/?q=node/15>).

## FUNDING

The department currently supports teaching assistantships for LINGUIS 101 Human Language, usually awarded to graduate students after their first year of study. Project assistantships are often available from both inside and outside the department. Advanced Opportunity Fellowships are possible for targeted students who are U.S. citizens or permanent residents. Select three linguistics seminars (LINGUIS 97X)

Contact program for list of specific courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

A 12-credit minor that is approved by the student's advisor is required.

## OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a minimum GPA of 3.0.

## OTHER GRADE REQUIREMENTS

Students must maintain a GPA of 3.67 in substantive courses taken in the Department of Linguistics after the third semester.

## PROBATION POLICY

Probation is a warning to a student who is not making satisfactory progress in the graduate program of the linguistics department. Departmental probation for grades or failure to make satisfactory progress lasts for one academic year (two consecutive semesters), while probation for an unsatisfactory prelim paper or unfinished Incompletes lasts for one semester.

If a student on probation clears up the problem that led to probation within the time period allotted, nothing else happens, and the student can continue with the program.

If the student does not resolve the problem (e.g. raise the GPA or successfully complete a prelim), the student is dropped from the program at the end of the probationary period.

## ADVISOR / COMMITTEE

Every graduate student must have an official faculty advisor. New students are usually assigned to the chair by default, unless they come with the intention of working with a particular faculty member. By the end of the first year, students must decide whom they would like to work with, and must ask that person if they are willing to serve as advisor. If the faculty member agrees, the student is responsible for having the faculty member sign the blue advisor agreement form, and for making sure that it is placed in the student's file. All permanent faculty members in the department (including affiliated faculty but excluding visiting faculty) may serve as advisors. Faculty from other departments may not serve as official advisors, even though they may co-chair committees.

Every faculty member has the right to refuse to become a student's advisor. Every graduate student has the right to choose any faculty member as advisor, so long as the faculty member agrees. Students should also feel free to change advisors at any time, without fear of offending a faculty member. If a student changes advisors, a new advisor agreement form must be signed and filed, and the previous advisor must be notified by the student in writing.

The advisor guides the student in the choice of appropriate courses, in the planning of prelims and the dissertation, in choosing prelim committees and the dissertation committee, and in other professional matters. Students are reminded, however, that the fulfillment of departmental requirements is ultimately the student's responsibility.

Each semester, the student must consult in person with the advisor about courses for the following semester. Registration is blocked until this is done, and is only unblocked when the student turns in the relevant form to the department, signed by the advisor.

## ASSESSMENTS AND EXAMINATIONS

Submit and defend on two prelim papers. One by the end of the fourth semester and the other by the end of the eighth semester. Contact the program for further details.

## TIME CONSTRAINTS

The first prelim paper must be completed by the fourth semester, the second prelim paper must be completed by the eighth semester, all language and course requirements must be completed by the end of the semester in which the second prelim paper is defended, and a dissertation proposal must be submitted and defended within two weeks of the defense of the second prelim paper.

## LANGUAGE REQUIREMENTS

Knowledge of three languages is required. One must be English. The second must be a non-Indo-European language or a modern Indic language. The third is determined in consultation with the advisor according to the student's research goals. Students must complete their language requirements before their second prelim exam. The language requirements can be satisfied in multiple ways and the program should be contacted directly for further details.

## ADMISSIONS

The department admits only students whose goal is the Ph.D. degree in linguistics. Admission to the Ph.D. program does not require an undergraduate degree in linguistics. Admission is based on the applicant's personal statement, three letters of recommendation, Graduate Record Exam (GRE) scores, TOEFL scores if applicable, and transcripts of prior academic work. The personal statement is considered carefully to ensure that the applicant's goals are compatible with the program offered by the department.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Regardless of whether an individual is awarded a master's degree, the doctoral level learning goals are inclusive of the master's level learning goals.
- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of linguistics.

- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within linguistics.
- Creates research that makes a substantive contribution to the understanding of human language.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of linguistics to society.
- Communicates complex ideas in a clear and understandable manner.

## PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Li, Macaulay, Macken, Raimy (Chair), Valentine

## MANAGEMENT AND HUMAN RESOURCES

**Administrative Unit:** Management

**College/School:** School of Business

**Admitting Plans:** MBA

**Degrees Offered:** M.A. in Arts Administration; M.S. in Management and Human Resources; MBA in Arts Administration; MBA in Management and Human Resources

**Named Options:** Strategic Human Resource Management (MBA)

**Specializations:** Graduate/Professional Certificates in Entrepreneurship; Strategic Innovation: Technology, Organizations, and Society

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 700 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to the master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

The Graduate School sets minimum requirements for admissions (<http://grad.wisc.edu/admissions/requirements>). Academic program admission requirements are often more rigorous than those set by the Graduate School. Please check the program's website for details.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to apply foundational knowledge in arts and core business topics to arts and/or nonprofit contexts that include evidence-based analysis, cultural sensitivity, artistic integrity, and appreciation for the research foundations of their work.
- Students will be able to create, communicate, and execute a strategic plan with mission-based outcomes that relies on research-based evidence, a historical context to forecast future trends, and stakeholder engagement.
- Students will be able to adaptively develop and manage the necessary resources in a mission-based organizational context to create sustainable systems that meet the needs of diverse stakeholders and honors the culture of the communities served.
- Students will be able to successfully articulate their ideas to a diverse set of constituents and stakeholders via multiple methods so as to be informative, persuasive and inspiring.
- Students will be able to make significant contributions to the thought leadership, and industry insight that strengthens and provides service to the field, lifelong learning, and career development.

### PROFESSIONAL CONDUCT

- Students will develop self-awareness and leadership skills necessary to:
  - a. utilize creativity and art to articulate a clear vision;
  - b. engage/inspire a diverse group of colleagues,
  - c. evaluate the immediate and long-term ethical impacts of one's actions on stakeholders;
  - d. and influence and promote progress in a variety of professional roles and contexts.
- Students will be able to engage and sustain a strong cross-functional network of professionals.

## BUSINESS: ARTS ADMINISTRATION, MBA

For more four decades, the School of Business arts administration major has been the graduate degree program of choice for high-potential arts and cultural managers seeking intensive training in business, an immersion in strategic and innovative thinking, and a broad and dynamic knowledge of nonprofit cultural management. The degree has delivered on that promise through its world-class business curriculum, continual interaction with leading practitioners, and hands-on work experiences for every student. See the program website (<http://beta.bus.wisc.edu/>)

programs/mba-programs/full-time-mba/career-specializations/arts-administration) for more information.

## FUNDING

Prospective students should see the program website for funding information.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

<sup>1</sup> Full-time MBA students may be allowed to enroll in up to 18 credits per term in the 2016–2017 academic year. Contact the Wisconsin School of Business for more information.

## ADMISSIONS

Admission consideration for the MBA program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores, and work experience, personal achievements, motivation, communication skills (written and oral), international exposure, and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case-by-case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS) or show the completion of an Interlink

program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

## LEARNING OUTCOMES

  - d. and influence and promote progress in a variety of professional roles and contexts.
- Students will be able to engage and sustain a strong cross-functional network of professionals.

## BUSINESS: MANAGEMENT AND HUMAN RESOURCES, M.S.

The M.S. degree is designed for students who wish to pursue very specialized studies within one of two specific fields: global real estate (in the business: real estate and urban land economics M.S.) and finance (within the business: finance, investment and banking M.S.). With previous undergraduate exposure to the functional areas of business, students are able to gain a more extensive focus in one of these two specific areas of business.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni

have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission consideration requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. Work experience is not required. Applicants should have an undergraduate minimum grade point average (GPA) of 3.0 or higher on a 4.0 scale. In addition to academic credentials, test scores, personal achievements, motivation, communication skills (written and oral) and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE), taken within five years of the starting term, is

required of all applicants to the Ph.D. and M.S. programs. Also, all domestic (including Puerto Rico) and international applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL). A recommended minimum TOEFL score of 106 (New iBT), obtained within two years of the intended starting term, is needed for admission consideration. International applicants who have completed a four-year bachelor's degree in a country where the official language is English may request a waiver of the TOEFL requirement. A master's degree from an English-speaking institution does not qualify for a waiver of the TOEFL. The school accepts IELTS and Pearson Test of English as substitutes for TOEFL.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Understand the connection between human resource management and overall business strategy.
- Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
- Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance.
- Comprehend the various challenges currently facing the labor and employment relations system to be able to address these challenges.

### PROFESSIONAL CONDUCT

- Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
- Design work systems and roles that allow employees to contribute to organization performance.

## PEOPLE

**Faculty:** Professors Trevor (chair), Aldag, Coff, Dunham, Gerhart; Associate Professors Eckhardt, Ganco, Posen, Stajkovic, Terlaak, Triana; Assistant Professors Kim, Navis, Sarada, Shin

## BUSINESS: MANAGEMENT AND HUMAN RESOURCES, MBA

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## NAMED OPTION IN STRATEGIC HUMAN RESOURCES MANAGEMENT

The Wisconsin program in strategic human resource management (SHRM) produces leaders who are equipped with the necessary skills to change tomorrow. The curriculum combines expertise in human resources with the knowledge required to be a strategic business partner. Many of the functional areas of HR and core competencies are covered through academic courses and program activities outside the classroom. The combination of core MBA learning, specialized courses, applied learning opportunities, and human resources internships sets the Wisconsin SHRM program apart from its competitors. See the program website (<http://beta.bus.wisc.edu/programs/mba-programs/full-time-mba/career-specializations/strategic-human-resource-management>) for more information.

### FUNDING

Prospective students should see the program website for funding information.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

MBA, with available named option Strategic Human Resource Management

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No credits of prior coursework are allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

No credits of prior coursework are allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits<sup>1</sup>

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

<sup>1</sup> Full-time MBA students may be allowed to enroll in up to 18 credits per term in the 2016–2017 academic year. Contact the Wisconsin School of Business for more information.

## ADMISSIONS

Admission consideration for the MBA program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores and work experience, personal achievements, motivation, communication skills (written and oral), international exposure and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case by case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS), or show the completion of an Interlink program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Understand the connection between human resource management and overall business strategy.
- Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
- Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance.
- Comprehend the various challenges currently facing the labor and employment relations system to be able to address these challenges.

### PROFESSIONAL CONDUCT

- Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
- Design work systems and roles that allow employees to contribute to organization performance.

## ENTREPRENEURSHIP, GRADUATE/ PROFESSIONAL CERTIFICATE

**Administrative Unit:** Management and Human Resources

**College/School:** School of Business

**Degrees Offered:** Graduate/Professional Certificate

The graduate/professional certificate in entrepreneurship seeks to provide entrepreneurial knowledge and skills to students who desire to launch a new organization, work more effectively in startup situations, or explore and better understand the regulatory policies that affect company formation and performance. The certificate is available to all UW–Madison graduate degree-seeking students (excluding University Special students).

A student who has completed this certificate will have good foundational skills in recognizing promising opportunities and building a new organization or venture to create social/economic value.

Students who successfully complete the requirements for the certificate and submit the required certificate declaration and certificate completion forms to the Department of Management and Human Resources office will have the certificate noted on their official university transcripts by the Office of the Registrar.

## REQUIREMENTS

The 12-credit program draws upon entrepreneurship courses in the School of Business, but students may select approved, elective courses from a variety of schools and colleges across the university that address the ability to launch and lead new ventures. Approved courses develop and deepen students' capacity to: assess opportunities, analyze the structure of markets, develop new products, perform financial analysis, understand the consequences of entity types, use intellectual property strategically in dynamic markets, form effective teams, and formulate strategies for organizational growth. Other courses help students better understand the role of entrepreneurial activity in economic growth and the achievement of societal goals.

## ADMISSIONS

To indicate interest in the certificate, students should have the following information available:

- UW–Madison student identification number
- UW–Madison-issued email address
- Name of current program or major

## STRATEGIC INNOVATION: TECHNOLOGY, ORGANIZATIONS, AND SOCIETY, GRADUATE/ PROFESSIONAL CERTIFICATE

**Administrative Unit:** Management and Human Resources

**College/School:** School of Business

**Degrees Offered:** Graduate/Professional Certificate

The graduate/professional certificate in strategic innovation seeks to provide knowledge and skills to students around the development of innovative products, services, and processes within an existing organization. The certificate is available to all UW–Madison graduate degree-seeking students (excluding University Special students).

## REQUIREMENTS

The 12-credit program draws upon strategy and related courses in the School of Business, but students may select approved, elective courses from a variety of schools and colleges across the university that deepen students' capacity for:

- Analyzing new markets
- Managing research and product development processes in existing organizations
- Supporting organizational creativity
- Articulating innovative business models
- Identifying and appropriating the value of intellectual property
- Assessing society-level innovation systems

The certificate program offers foundational skills and knowledge appropriate for graduate students who anticipate working in dynamic organizations that depend on innovation to compete in the marketplace and/or use innovation to create value for society more broadly.

A student who has completed the certificate will be prepared to execute in-depth new product development plans for an existing organization or identify and evaluate innovation challenges in society.

Students who successfully complete the requirements for the certificate and submit the required certificate declaration and certificate completion forms to the Department of Management and Human Resources office will have the certificate noted on their official university transcripts by the Office of the Registrar.

## ADMISSIONS

To indicate interest in the certificate, students should have the following information available:

- UW–Madison student identification number
- UW–Madison-issued email address
- Name of current program or major

## MARKETING

**Administrative Unit:** Marketing

**College/School:** School of Business

**Admitting Plans:** MBA

**Degrees Offered:** MBA, M.S.

**Named Options:** Marketing Research (MBA); Product Management (MBA)

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the

School of Business faculty bring a variety of real-world experience to the program.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Business: Marketing, MBA (p. 469)

## PEOPLE

**Faculty:** Professors Thompson (chair), Arora, Heide, Moreau, O'Guinn, Thompson; Associate Professors Epp, Hoban, Lim, Peck, Tanner; Assistant Professors Chung, Liu, Mallucci, Polman, Weiss

## BUSINESS: MARKETING, M.S.

The M.S. degree in the School of Business is currently designed for students who wish to pursue very specialized studies within one of two specific fields: global real estate (in the business: real estate and urban land economics M.S.) and finance (within the business: finance, investment and banking M.S.). With previous undergraduate exposure to the functional areas of business, students are able to gain a more extensive focus in one of these two specific areas of business.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

A master's degree from an English-speaking institution does not qualify for a waiver of the TOEFL. The school accepts IELTS and Pearson Test of English as substitutes for TOEFL.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to clearly articulate a business recommendation based on a discovered consumer insight (A.C. Nielsen Specialization)
- Students will be able to demonstrate a knowledge of or ability to grow business profitably through marketing research efforts (A.C. Nielsen Specialization)
- Students will be able to articulate a business problem and translate it into a marketing research question (A.C. Nielsen Specialization)
- Students will be able to evaluate a business problem and apply an appropriate marketing research technique to address the problem (A.C. Nielsen Specialization)

- Graduates will be able to develop key elements of a brand's business plan that drive growth (Brand Specialization)
- Graduates will be able to perform business analytics used to improve a brand's business results (Brand Specialization)

## PROFESSIONAL CONDUCT

- Students will articulate a plan for achieving their industry professional aspirations (A.C. Nielsen Specialization)
- Graduates will be able to demonstrate professional protocols for succeeding in the corporate environment (Brand Specialization)

## ADDITIONAL LEARNING GOALS

- Students will summarize current challenges faced by the marketing research industry and know potential solutions or how the industry is approaching the challenge (A.C. Nielsen Specialization)
- Graduates will be able to effectively communicate in order to drive growth for their brand's business (Brand Specialization)
- Graduates will understand how to lead a cross-functional brand and product team to achieve a goal or an objective (Brand Specialization)

## PEOPLE

## BRAND AND PRODUCT MANAGEMENT

The Center for Brand and Product Management is the nation's first university-based center focused on producing talent and knowledge in the field of brand and product management. The center was established to fill a gap—no one was training business students to be top-notch brand managers. Brand management is the one “specialty” that requires a breadth of business skills. The Center for Brand and Product Management's unique environment—and uniquely effective blend of curriculum and applied learning—builds those skills. Since its inception in 2003, the Center for Brand and Product Management has had 100 percent internship placement and strong full-time placement at some of the best consumer-packaged-goods companies around the country. Students leave with a network, a community, and a portfolio of applied learning experiences. See the program website (<http://beta.bus.wisc.edu/>

[programs/mba-programs/full-time-mba/career-specializations/brand-product-management](http://beta.bus.wisc.edu/programs/mba-programs/full-time-mba/career-specializations/brand-product-management)) for more information.

## MARKETING RESEARCH

There is no better foundation for marketing action than marketing research. The A.C. Nielsen Center for Marketing Research offers the premier full-time MBA program with a specialization in marketing research. The center was established in 1990 and is built on the legacy and funding of the Arthur C. Nielsen Jr. family, pioneers in the field of marketing research. It was created to train MBA students in the specialized ideas, issues, and techniques of marketing research, as well as to help discover and disseminate new marketing research knowledge. See the program website (<http://beta.bus.wisc.edu/programs/mba-programs/full-time-mba/career-specializations/marketing-research>) for more information.

## FUNDING

Prospective students should see the program website for funding information.

## PEOPLE

**Faculty:** Professors Thompson (chair), Arora, Heide, Moreau, O'Guinn, Thompson; Associate Professors Epp, Hoban, Lim, Peck, Tanner; Assistant Professors Chung, Liu, Mallucci, Polman, Weiss

## MATERIALS SCIENCE AND ENGINEERING

**Administrative Unit:** Materials Science and Engineering

**College/School:** College of Engineering

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

Meeting many of the most critical challenges facing modern society requires advances in the materials that underpin new technologies. Examples include providing carbon-free and renewable energy, clean water, advanced medical treatments and devices, and sustainable materials manufacturing. New materials are also required for continued economic growth in areas as diverse as aerospace, computing, and sensors.

Materials scientists and engineers at UW–Madison work toward solutions to these problems via research in a wide variety of areas.

Research areas include ceramics, computational material science; composites; corrosion; electrical, optical, magnetic materials; growth and synthesis; joining; materials for energy; metals; materials characterization and microscopy; nanomaterials; phase transformations; photonics; polymers and biomaterials; materials for nuclear energy; quantum computing; self-assembly; semiconductors; structural materials and mechanical properties; surfaces and interfaces; sustainability; thin films; and wear.

More broadly, the field of materials science and engineering is in the middle of a revolution in how we design and deploy new materials. The old way is by trial and error, which involves laboratory testing of hundreds or thousands of candidate materials, which is costly and can take decades to develop a new materials and deploy it in practical technologies. The emerging new method leverages advances in computational materials science; materials databases, data science, and machine learning; and high throughput materials synthesis and characterization to achieve true design of materials. The goal is to develop and deploy new materials much more quickly and much lower cost than ever before. Materials design is a major theme of materials research on campus, organized around the areas of materials design via atomically controlled thin film systems, modular design of nanomaterials, and integrated experimental and computational materials engineering. Materials design and these themes cut across the research and application areas list above.

Materials research extends across campus, well beyond the boundaries of the Department of Materials Science and Engineering, so graduate students in materials can pursue research with a large number of affiliate faculty. Faculty emphasize the cross-cutting, interdisciplinary nature of materials research, which is also reflected by the diverse

undergraduate backgrounds of the student body, many of whom do not have undergraduate degrees in materials.

Materials research benefits from major campus facilities, including the Materials Science Center, the Wisconsin Microscopy and Characterization Center, Wisconsin Center for Applied Microelectronics, and the Soft Materials Laboratory. Research is supported by major centers, including the National Science Foundation Materials Research Science and Engineering Center and the Grainger Institute for Engineering.

Materials graduates from Wisconsin find long-term success in careers in private industry, national laboratories, and academia in the US and around the world.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Materials Engineering, Ph.D. (p. 473)

## PEOPLE

**Faculty:** Professors: Babcock, Eom, Evans, Gopalan, Kou, Lagally, Lakes, Morgan, Perepezko, Robertson, Stone, Szlufarska, Voyles; Associate Professors: Arnold, Wang; Assistant Professors: Kawasaki.

**Affiliate Faculty:** Abbott, Allen, Andrew, Ashton, Beebe, Booske, Botez, Cai, Chesler, Coppersmith, Cramer, Crone, Drugan, Eriksson, Eriten, Goldsmith, Gong, Gunasekaran, Hamers, Hitchon, Jiang, Jin, Kats, Keely, Klingenberg, Knevic, Kuech, Kulcinski, Li, Lynn, Ma, Masters, Mawst, McDermott, Murphy, Negrut, Ogle, Onellion, Osswald, Palecek, Pfefferkorn, Ploeg, Reed, Root, Rowlands, Rzchowski, Sarmadi, Shohet, Sridharan, Thelen, Turng, van der Weide, Vanderby, Weibel, Wendt, Williams, Winokur, Xu, Yu

## MATERIALS ENGINEERING, M.S.

**The requirements for the M.S. in materials engineering have been merged with materials science. See Materials Science and Engineering (p. 471).**

**Admission to the program has been suspended. The information that appears in this entry is provided for the benefit of students currently admitted to the program.**

**Administrative Unit:** Material Sciences and Engineering

**College/School:** College of Engineering

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., M.Eng., Ph.D.

**Minors and Certificates:** Doctoral Minor

The department mission is to provide local, national, and international leadership in materials research and education. Graduate research in materials science and engineering covers a full range of cutting-edge technologies.

Department faculty run internationally recognized research programs which span the field to include computational materials science, biomaterials, nanomaterials, energy related materials, metals, polymers, electronic materials, ceramics, and composites. Of the 17 full-time faculty in the Department of Materials Science and Engineering, five senior faculty belong to the National Academy of Engineering and five assistant

professors introduce expertise in exciting new areas. Faculty at all levels bring leadership in research and education.

The creation of advanced materials and devices requires the application of increasingly sophisticated concepts and tools. Tailored materials with desired properties can be engineered through control of the structure of solids at all length scales ranging from centimeters down to the atomic level. Students of materials are engaged in creating and understanding new materials and new materials phenomena. After they leave Wisconsin, materials graduates find careers in private industry, national laboratories, and academia.

The UW offers two graduate programs in materials: Materials Engineering (MS&E) and the Materials Science Program (MSP). Students who apply to one are usually considered by the other. Department faculty supervise the thesis work of students from both MS&E and MSP.

The vast majority of students receive financial aid in the form of fellowships, research or teaching assistantships, or advanced opportunity grants.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 15 of the required 30 credits must be in courses designed for graduate work, which may include graduate-level math—EP 547; graduate-level thermodynamics—MS&E 530; any courses taken at the 700 level or above (including classroom courses and master's research, thesis, and seminar courses); and MS&E courses numbered 400 or higher that either have a graduate student enrollment >50% in any given semester—MS&E 448, 560, 570, or assess graduate students separately from undergraduate students—MS&E 553.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count graduate coursework from other institutions toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW—MADISON UNDERGRADUATE

Up to 7 credits numbered 300 or above can be counted toward the minimum graduate degree credit requirement. Up to 7 credits of MS&E courses numbered 700 or above can be counted toward the minimum graduate coursework (50%) requirement. No credits can be counted toward the minimum graduate residence credit requirement.

### PRIOR COURSEWORK REQUIREMENTS: UW—MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW—Madison Special student toward the minimum graduate residence credit requirement, and the minimum graduate degree credit requirement; if that coursework is numbered 700 or above it may satisfy the minimum graduate coursework (50%) requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENTS AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

**The requirements for the M.S. in Materials Engineering have been merged with Materials Science. See "Materials Science & Engineering". Admission to the program has been suspended. The information that appears in this entry is provided for the benefit of students currently admitted to the program.**

Admission to the graduate program in the Department of Materials Science and Engineering is based on the student's previous academic record, Graduate Record Exam (GRE) scores, letters of recommendation, and a personal statement. Admission is competitive.

**For more information:** Materials Science and Engineering, 1509 University Avenue #276A, Madison, WI 53706; msaegradquery@engr.wisc.edu; www.engr.wisc.edu/mse.

## PEOPLE

**Faculty:** Professors Babcock (chair), Eom, Kou, Lagally, Peercy, Perepezko; Associate Professor Stone (associate chair); Assistant Professors Evans, Gildrie-Voyles, Gopalan, Morgan, Szlufarska

## MATERIALS ENGINEERING, PH.D.

**The requirements for the Ph.D. in materials engineering have been merged with materials science. See Materials Science and Engineering (p. 471). Admission to the program has been suspended. The information that appears in this entry is provided for the benefit of students currently admitted to the program.**

**Administrative Unit:** Material Sciences and Engineering

**College/School:** College of Engineering

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., M.Eng., Ph.D.

**Minors and Certificates:** Doctoral Minor

The department mission is to provide local, national, and international leadership in materials research and education. Graduate research in materials science and engineering covers a full range of cutting-edge technologies.

Department faculty run internationally recognized research programs which span the field to include computational materials science, biomaterials, nanomaterials, energy related materials, metals, polymers, electronic materials, ceramics, and composites. Of the 17 full-time faculty

in the Department of Materials Science and Engineering, five senior faculty belong to the National Academy of Engineering and five assistant professors introduce expertise in exciting new areas. Faculty at all levels bring leadership in research and education.

The creation of advanced materials and devices requires the application of increasingly sophisticated concepts and tools. Tailored materials with desired properties can be engineered through control of the structure of solids at all length scales ranging from centimeters down to the atomic level. Students of materials are engaged in creating and understanding new materials and new materials phenomena. After they leave Wisconsin, materials graduates find careers in private industry, national laboratories, and academia.

The UW offers two graduate programs in materials: Materials Engineering (MS&E) and the Materials Science Program (MSP). Students who apply to one are usually considered by the other. Department faculty supervise the thesis work of students from both MS&E and MSP.

The vast majority of students receive financial aid in the form of fellowships, research or teaching assistantships, or advanced opportunity grants.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 26 of the required 51 credits must be in courses designed for graduate work, which may include graduate-level math—EP 547; graduate-level thermodynamics—MS&E 530; any courses taken at the 700 level or above (including classroom courses and master's research, thesis, and seminar courses); and MS&E courses numbered 400 or higher that either have a graduate student enrollment >50% in any given semester—MS&E 448, 560, 570, or assess graduate students separately from undergraduate students—MS&E 553.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count graduate coursework from other institutions toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Up to 7 credits numbered 300 or above can be counted toward the minimum graduate degree credit requirement. Up to 7 credits of MS&E courses numbered 700 or above can be counted toward the minimum graduate coursework (50%) requirement. No credits can be counted toward the minimum graduate residence credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement, and the minimum graduate degree credit requirement; if that coursework is numbered 700 or above it may satisfy the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENTS AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

**The requirements for the M.S. in Materials Engineering have been merged with Materials Science. See "Materials Science & Engineering". Admission to the program has been suspended. The information that appears in this entry is provided for the benefit of students currently admitted to the program.**

## PEOPLE

**Faculty:** Professors Babcock (chair), Eom, Kou, Lagally, Peercy, Perepezko; Associate Professor Stone (associate chair); Assistant Professors Evans, Gildrie-Voyles, Gopalan, Morgan, Szlufarska

## MATHEMATICS

**Administrative Unit:** Mathematics

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., Ph.D.

**Degrees Offered:** M.A., Ph.D.

**Minors and Certificates:** Doctoral Minor

**Named Options:** Foundations of Advanced Studies (M.A.)

**Specializations:** Algebra and Number Theory, Analysis and Differential Equations, Applied and Computational Mathematics, Logic, Geometry and Topology, Probability

The department offers the doctor of philosophy degree with a major in mathematics and a master of arts degree in mathematics.

The Ph.D. degree requires proficiency in basic and advanced graduate mathematics and the completion of a dissertation containing a significant piece of original research in some area of mathematics. The scope of the research program in mathematics is broad. The Ph.D. specialty and dissertation may be in any area of mathematics, including but not limited to algebra, algebraic geometry, applied mathematics, combinatorics, computational mathematics, complex analysis, differential equations, differential geometry, dynamical systems, harmonic analysis, logic, mathematical biology, number theory, probability, and topology. A complete list of faculty and their areas of expertise is available through the department website (<https://www.math.wisc.edu/graduate>).

Students in the Ph.D. program also have the option to earn a master of arts degree.

The M.A. degree is available with the named option titled foundations of advanced mathematics. It is designed to strengthen the student's mathematics background and enhance the opportunities for applications to Ph.D. programs and for employment as a mathematician in nonacademic environments.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

## PEOPLE

**Faculty:** Professors Angenent, Assadi, Bolotin, Boston, Căldăraru, Craciun, Denissov, Ellenberg, Feldman, Gong, Jin, Lempp, Mari Beffa (chair), Miller, Mitchell, Paul, Seeger, Seppäläinen, Smith, Terwilliger, Thiffeault, Viaclovsky, Waleffe, Yang, Zlatoš; Associate Professors Anderson, Arinkin, Gurevich, Maxim, Roch, Stechmann, Valkó; Assistant Professors Andrews, Dymarz, Erman, Kent, Kim, Li, Marshall, Sam, Spagnolie, Stovall, Street, Tran, B. Wang, L. Wang, M. Wood, P. Wood, Yin; Affiliate Faculty Bach, Cai, Del Pia, Ferris, Ron, Sifakis.

## MATHEMATICS, DOCTORAL MINOR

### REQUIREMENTS

## I. THE MATH DEPARTMENT MINOR REQUIREMENTS

The general requirements for a minor are stated in the Guide. Listed here are the requirements for a mathematics minor under Option A. The mathematics department does not supervise programs under Option B.

1. A math minor consists of at least 12 graduate credits in mathematics courses that are approved by a math minor advisor. These courses must be taken as a graduate student. All courses must be completed with a grade of B or better.

Graduate mathematics credits transferred from another university may be considered but prior approval by the math minor advisor is necessary.

2. At least 6 credits must be in courses above Math 700.

3. At most one course cross-listed with the major department may be used for the math minor. This course must be staffed by the mathematics department and it may not be applied to any requirement for the major department.

4. According to rules of the Graduate School, graduate credit can be given only for courses above 300. The math department has a more restrictive policy; it typically does not consider math courses below 500 as graduate courses. Hence, credit for math classes below 500 will not be counted for the doctoral minor in mathematics.

## II. THE PROCESS

1. Students should plan which courses they would like to use to meet the minor requirements. They can use this form ([http://www.math.wisc.edu/files/Math\\_Minor\\_Outside\\_Form.pdf](http://www.math.wisc.edu/files/Math_Minor_Outside_Form.pdf)) for planning the coursework. Students and the math minor advisor complete this form and students keep a copy of it. (Students can print a copy of the form and fill in some parts before the meeting.) Completion of the planning form is not required, but a completed form, signed by a math minor advisor, does offer a guarantee that the math department will accept the courses for a minor. The course program for a math minor must be approved by a math minor advisor at some point, but this approval could also be obtained after the courses have been taken.

2. Students will need a form signed by a math minor advisor certifying approval of their course selection for the math minor, and/or certifying completion of the minor requirements. The department may have forms for these purposes, or students can use a Math Department Minor Agreement Form ([http://atrium.math.wisc.edu/sites/default/files/graduate\\_minor\\_in\\_mathematics\\_form.pdf](http://atrium.math.wisc.edu/sites/default/files/graduate_minor_in_mathematics_form.pdf)).

3. When everything is completed, students need to have the Graduate School warrant signed. The major department will request a warrant from the Graduate School. Students take the warrant to one of the math minor advisors for a signature and then take it back to the major department. For more information, contact the graduate administrator at [grad\\_program@math.wisc.edu](mailto:grad_program@math.wisc.edu)

## ADMISSIONS

Ph.D. students who are not students in the mathematics department and wish to minor in mathematics should contact one of the math department minor advisors (<http://math.wisc.edu/contactus/#gradminor>).

## PEOPLE

**Faculty:** Professors Angenent, Assadi, Bolotin, Boston, Căldăraru, Craciun, Denissov, Ellenberg, Feldman, Gong, Jin, Lempp, Mari Beffa (chair), Miller, Mitchell, Paul, Seeger, Seppäläinen, Smith, Terwilliger, Thiffeault, Viaclovsky, Waleffe, Yang, Zlatoš; Associate Professors Anderson, Arinkin, Gurevich, Maxim, Roch, Stechmann, Valkó; Assistant Professors Andrews, Dymarz, Erman, Kent, Kim, Li, Marshall, Sam, Spagnolie, Stovall, Street, Tran, B. Wang, L. Wang, M. Wood, P. Wood, Yin; Affiliate Faculty Bach, Cai, Del Pia, Ferris, Ron, Sifakis.

## MATHEMATICS, M.A.

The department offers the doctor of philosophy degree with a major in mathematics and a master of arts degree in mathematics.

The Ph.D. degree requires proficiency in basic and advanced graduate mathematics and the completion of a dissertation containing a significant piece of original research in some area of mathematics. The scope of the research program in mathematics is broad. The Ph.D. specialty and dissertation may be in any area of mathematics, including but not limited to algebra, algebraic geometry, applied mathematics, combinatorics, computational mathematics, complex analysis, differential equations, differential geometry, dynamical systems, harmonic analysis, logic, mathematical biology, number theory, probability, and topology. A complete list of faculty and their areas of expertise is available through the department website (<https://www.math.wisc.edu>).

Students in the Ph.D. program also have the option to earn a master of arts degree.

The M.A. degree is available with the named option titled foundations of advanced mathematics. It is designed to strengthen the student's mathematics background and enhance the opportunities for applications to Ph.D. programs and for employment as a mathematician in nonacademic environments.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., with available named option in Foundations of Advanced Studies

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

The coursework must consist of graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students in the M.A. program are allowed to count no more than 14 credits of graduate coursework from other institutions. Coursework

earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No more than 7 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

M.A.: 30 graduate credits related to mathematics, including at least 24 credits in the mathematics department (cross-listed courses included). At least 12 credits from a specified list of 700 core courses must be taken. Advanced computer science which involves substantial programming. (Requirement waived with two passed qualifying exams.)

M.A., FAS option: MATH 522 Analysis II and MATH 542 Modern Algebra. 30 graduate credits in mathematics, including at least 12 credits from a specified list of 700 core courses must be taken.

### OVERALL GRADUATE GPA REQUIREMENT

M.A.: 3.3 GPA required

M.A., FAS option: 3.0 GPA required

### OTHER GRADE REQUIREMENTS

At least 12 credits from a specified list of 700 courses are required to be passed with grade B or higher.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing.
2. Probation.
3. Unsatisfactory progress.

### ADVISOR / COMMITTEE

M.A.: Students are recommended to meet with an advisor.

M.A., FAS option: Before each fall semester, students will submit a tentative plan of study and meet with a graduate advisor.

### ASSESSMENTS AND EXAMINATIONS

n/a

### TIME CONSTRAINTS

Two years. Extensions have to be approved by the program.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their

absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Admission is competitive. Applicants to the Ph.D. program are automatically considered for financial support. For more information about application to the Ph.D. and M.A. programs, see the department's admission website (<https://www.math.wisc.edu/graduate/admissions>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students learn a substantial body of mathematics presented in introductory graduate level courses in mathematics.
- Students select and utilize appropriate methodologies to solve problems.
- Students communicate clearly in written/oral presentations.

### PROFESSIONAL CONDUCT

- Students recognize and apply principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Angenent, Assadi, Bolotin, Boston, Căldăraru, Craciun, Denissov, Ellenberg, Feldman, Gong, Jin, Lempp, Mari Beffa (chair), Miller, Mitchell, Paul, Seeger, Seppäläinen, Smith, Terwilliger, Thiffeault, Viaclovsky, Waleffe, Yang, Zlatoš; Associate Professors Anderson, Arinkin, Gurevich, Maxim, Roch, Stechmann, Valkó; Assistant Professors Andrews, Dymarz, Erman, Kent, Kim, Li, Marshall, Sam, Spagnolie, Stovall, Street, Tran, B. Wang, L. Wang, M. Wood, P. Wood, Yin; Affiliate Faculty Bach, Cai, Del Pia, Ferris, Ron, Sifakis.

## MATHEMATICS, PH.D.

The department offers the doctor of philosophy degree with a major in mathematics and a master of arts degree in mathematics.

The Ph.D. degree requires proficiency in basic and advanced graduate mathematics and the completion of a dissertation containing a significant piece of original research in some area of mathematics. The scope of the research program in mathematics is broad. The Ph.D. specialty and dissertation may be in any area of mathematics, including but not limited to algebra, algebraic geometry, applied mathematics, combinatorics, computational mathematics, complex analysis, differential equations, differential geometry, dynamical systems, harmonic analysis, logic, mathematical biology, number theory, probability, and topology. A complete list of faculty and their areas of expertise is available through the department website (<https://www.math.wisc.edu/graduate>).

Students in the Ph.D. program also have the option to earn a master of arts degree.

The M.A. degree is available with the named option titled foundations of advanced mathematics. It is designed to strengthen the student's mathematics background and enhance the opportunities for applications to Ph.D. programs and for employment as a mathematician in nonacademic environments.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

54 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

For students in the Ph.D. program the coursework in the mathematics department is expected to consist only of graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students in the Ph.D. program are allowed to count no more than 22 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No more than 7 credits from a UW-Madison undergraduate degree are allowed to count toward the degree. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison

Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

No program-specific courses required.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.3 GPA required

## OTHER GRADE REQUIREMENTS

No additional grade requirements.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing.
2. Probation.
3. Unsatisfactory progress.

## ADVISOR / COMMITTEE

Students who are not yet working with a dissertation advisor are required to meet semiannually with their academic advisor. All students must have a dissertation advisor by the end of the sixth semester.

## ASSESSMENTS AND EXAMINATIONS

All students are required to pass at least one qualifying exam by the beginning of their fourth semester (the spring semester of the second year), and two by the beginning of their sixth semester (the spring semester of the third year.)

Students must satisfy all the requirements for dissertator status by the end of the eighth semester (end of fourth year).

## TIME CONSTRAINTS

Eight years. Extensions have to be approved by the program.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Admission is competitive. Applicants to the Ph.D. program are automatically considered for financial support. For more information

about application to the Ph.D. and M.A. programs, see the department's admission website (<https://www.math.wisc.edu/graduate/admissions>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students learn a substantial body of mathematics in introductory and research level graduate courses in mathematics.
- Students complete a dissertation under the guidance of an advisor. The dissertation should make an original and substantive contribution to its subject matter.
- Students demonstrate breadth within the learning experiences.
- Students present research in seminar talks, conferences or publications.
- Students communicate complex ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Students foster ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Angenent, Assadi, Bolotin, Boston, Căldăraru, Craciun, Denissov, Ellenberg, Feldman, Gong, Jin, Lempp, Mari Beffa (chair), Miller, Mitchell, Paul, Seeger, Seppäläinen, Smith, Terwilliger, Thiffeault, Viaclovsky, Waleffe, Yang, Zlatoš; Associate Professors Anderson, Arinkin, Gurevich, Maxim, Roch, Stechmann, Valkó; Assistant Professors Andrews, Dymarz, Erman, Kent, Kim, Li, Marshall, Sam, Spagnolie, Stovall, Street, Tran, B. Wang, L. Wang, M. Wood, P. Wood, Yin; Affiliate Faculty Bach, Cai, Del Pia, Ferris, Ron, Sifakis.

## MECHANICAL ENGINEERING

**Administrative Unit:** Mechanical Engineering

**College/School:** College of Engineering

**Admitting Plans:** M.Eng., M.S., Ph.D.

**Degrees Offered:** M.S., M.Eng., Ph.D.

**Minors and Certificates:** Doctoral Minor

**Named Options:** Automotive Engineering (M.S.); Controls (M.S.); Polymer Science (M.Eng.)

The department offers a master of science (M.S.) and doctor of philosophy (Ph.D.) in mechanical engineering. The graduate programs are designed to train outstanding students for advanced work in industry and research and development through a combination of coursework and hands on research. Online programs in the department include an M.S. with named option in controls and a master of engineering (M.Eng.) with named option in polymer science.

The Department of Mechanical Engineering has a long history of excellence in graduate education. The department is consistently ranked in the top 20 in the United States for graduate programs in mechanical engineering. The department offers research opportunities in a large number of established and emerging research specializations. Broad research themes within the department include: biomechanics, computational engineering, energy, manufacturing, and mechanics and controls. Excellent research facilities are available for specialized research within these broad areas for studies in: biomechanics,

combustion, computational design, controls, cryogenics, dynamics and vibrations, fluid dynamics, fluid power, geometric modeling and prototyping, heat and mass transfer, internal combustion engines, laser diagnostics, manufacturing processes, mechanics, mechatronics, polymer and composites processing, powertrain control, robotics, solar energy, and more.

A list of mechanical engineering faculty and their respective areas of specialization is available on the department's website (<http://directory.engr.wisc.edu/me/faculty>).

The mechanical engineering graduate student handbook is also available on the program website (<https://www.engr.wisc.edu/app/uploads/2016/09/ME-Grad-handbook-Update-September-2016.pdf>).

## ONLINE PROGRAMS

The mechanical engineering M.Eng. named option: polymer science is a fully online degree that includes an interdisciplinary curriculum of courses incorporating the latest research and practices in plastics and polymer manufacturing. It is designed to prepare engineers for professional practice in the polymer industry. Please visit the Department of Engineering Professional Development's website (<https://epd.wisc.edu/online-degree/master-of-engineering-polymer-science>) for complete information about the online polymer science program.

The mechanical engineering M.S. named option: controls is a primarily online degree that includes a full curriculum of courses incorporating the latest research and practices in drive, converter control, and sensor integration. This program consists of 27 online credits and 3 credits taken on campus through a summer laboratory course. The program includes courses in both mechanical engineering and electrical engineering and is designed for practicing engineers. Please visit the Department of Engineering Professional Development's website (<http://epd.wisc.edu/online-degree/mechanical-engineering-controls>) for complete information about the online controls program.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Mechanical Engineering, Doctoral Minor (p. 479)
- Mechanical Engineering, M.Eng. (p. 479)
- Mechanical Engineering, M.S. (p. 481)
- Mechanical Engineering, Ph.D. (p. 483)

## PEOPLE

**Faculty:** Professors Engelstad, Ghandhi (chair), Lorenz, Moskwa, Nellis, Osswald, Pfothenhauer, Rowlands, Rutland, Sanders, Shapiro, Thelen, Turng; Associate Professors Krupenkin, Negrut, Pfefferkorn, Ploeg, Qian, Rothamer, Shedd, Suresh, Trujillo, Zinn; Assistant Professors Adamczyk, Eriten, Henak, Kokjohn, Miller, Min, Roldan-Alzate, Rudolph; Faculty affiliates Allen, Bonazza, Clemons, Corradini, Holloway, Kammer, Luzzio, Reindl, Scarlet, Schauer, Smith

## MECHANICAL ENGINEERING, DOCTORAL MINOR

### REQUIREMENTS

Ph.D. candidates from other departments who wish to minor in mechanical engineering are required to complete a minimum of 9 formal credits of mechanical engineering courses numbered 400 or above with grades of B or better (grades of BC and below are not accepted for the minor). One of these formal courses must be at the 700 level or above.

### PEOPLE

**Faculty:** Professors Engelstad, Ghandhi (chair), Lorenz, Moskwa, Nellis, Osswald, Pfothenhauer, Rowlands, Rutland, Sanders, Shapiro, Thelen, Turng; Associate Professors Krupenkin, Negrut, Pfefferkorn, Ploeg, Qian, Rothamer, Shedd, Suresh, Trujillo, Zinn; Assistant Professors Adamczyk, Eriten, Henak, Kokjohn, Miller, Min, Roldan-Alzate, Rudolph; Faculty affiliates Allen, Bonazza, Clemons, Corradini, Holloway, Kammer, Luzzio, Reindl, Scarlet, Schauer, Smith

## MECHANICAL ENGINEERING, M.ENG.

The department offers a master of science (M.S.) and doctor of philosophy (Ph.D.) in mechanical engineering. The graduate programs are designed to train outstanding students for advanced work in industry and research and development through a combination of coursework and hands on research. Online programs in the department include an M.S. with named option in controls and a master of engineering (M.Eng.) with named option in polymer science.

The Department of Mechanical Engineering has a long history of excellence in graduate education. The department is consistently ranked in the top 20 in the United States for graduate programs in mechanical engineering. The department offers research opportunities in a large number of established and emerging research specializations. Broad research themes within the department include: biomechanics, computational engineering, energy, manufacturing, and mechanics and controls. Excellent research facilities are available for specialized research within these broad areas for studies in: biomechanics, combustion, computational design, controls, cryogenics, dynamics and vibrations, fluid dynamics, fluid power, geometric modeling and prototyping, heat and mass transfer, internal combustion engines, laser diagnostics, manufacturing processes, mechanics, mechatronics, polymer and composites processing, powertrain control, robotics, solar energy, and more.

A list of mechanical engineering faculty and their respective areas of specialization is available on the department's website (<http://directory.engr.wisc.edu/me/faculty>).

The mechanical engineering graduate student handbook is also available on the program website (<https://www.engr.wisc.edu/app/uploads/2016/09/ME-Grad-handbook-Update-September-2016.pdf>).

## ONLINE PROGRAMS

The mechanical engineering M.Eng. named option: polymer science is a fully online degree that includes an interdisciplinary curriculum of courses incorporating the latest research and practices in plastics and polymer manufacturing. It is designed to prepare engineers for professional practice in the polymer industry. Please visit the Department of Engineering Professional Development's website (<https://epd.wisc.edu/online-degree/master-of-engineering-polymer-science>) for complete information about the online polymer science program.

The mechanical engineering M.S. named option: controls is a primarily online degree that includes a full curriculum of courses incorporating the latest research and practices in drive, converter control, and sensor integration. This program consists of 27 online credits and 3 credits taken on campus through a summer laboratory course. The program includes courses in both mechanical engineering and electrical engineering and is designed for practicing engineers. Please visit the Department of Engineering Professional Development's website (<http://epd.wisc.edu/online-degree/mechanical-engineering-controls>) for complete information about the online controls program.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available named option in Controls

M.Eng., with available named option in Polymer Science

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

M.S. 18 credits, M. Eng. 16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 out of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

M.S. With program approval, students are allowed to count graduate coursework from other institutions (up to 50% of the formal course requirement) toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

M. Eng.: no transfer credits are allowed.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

M.S.: Up to 7 credits numbered 400 or above may be counted toward the minimum graduate degree credit requirement. These credits may be counted toward the minimum graduate coursework (50%) requirement if they are in courses numbered 700 or above. No credits may be counted toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

M.Eng.: With advisor approval, students are allowed to count no more than 7 credits of graduate level coursework from their undergraduate career at UW–Madison. These credits may be counted toward the minimum graduate coursework (50%) requirement if they are in courses numbered 700 or above. No credits can be counted toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement and the minimum graduate degree credit requirement. These credits may be counted toward the minimum graduate coursework (50%) requirement if they are in courses numbered 700 or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

M.S.: Two semesters of M E 903 Graduate Seminar are required. These should be taken the first two semester the student is in residence.

M. Eng. – named option Polymer Science: See program-specific information on the program website (<https://epd.wisc.edu/online-degree/master-of-engineering-polymer-science/#/about>).

### OVERALL GRADUATE GPA REQUIREMENT

M.S. 3.00 GPA required.

### OTHER GRADE REQUIREMENTS

Students must earn a C or above in all formal coursework.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal from program, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

All students are required to obtain a mechanical engineering faculty advisor who assists them in planning a course sequence that meets degrees requirements and who will discuss career objectives with the students.

An M.S. thesis committee must include student's mechanical engineering faculty advisor and at least two other faculty members.

## ASSESSMENTS AND EXAMINATIONS

The thesis track requires that the student pass a formal thesis defense.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Language Requirements

No language requirements

## ADMISSIONS

Students with a strong background in mechanical engineering or a related field with interest in furthering their education in mechanical engineering are encouraged to apply for admission to the department. Applicants accepted into the program generally have an undergraduate grade point average well above the graduate school minimum of 3.0 on a 4.0 scale. All applicants are required to take the Graduate Record Exam (GRE). Applications are evaluated on the basis of previous academic record, GRE scores, letters of recommendation, and a personal statement. For more information on admission requirements see the department website (<https://www.engr.wisc.edu/admissions/graduate-admissions>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- demonstrate a strong understanding of mathematical, scientific, and engineering principles in the field.
- demonstrate an ability to formulate, analyze, and solve advanced engineering problems.
- demonstrate creative, independent problem solving skills.
- apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools to these problems.

### PROFESSIONAL CONDUCT

- recognize and apply principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Engelstad, Ghandhi (chair), Lorenz, Moskwa, Nellis, Osswald, Pfothenauer, Rowlands, Rutland, Sanders, Shapiro, Thelen, Turng; Associate Professors Krupenkin, Negrut, Pfefferkorn, Ploeg, Qian, Rothamer, Shedd, Suresh, Trujillo, Zinn; Assistant Professors Adamczyk, Eriten, Henak, Kokjohn, Miller, Min, Roldan-Alzate, Rudolph; Faculty

affiliates Allen, Bonazza, Clemons, Corradini, Holloway, Kammer, Luzzio, Reindl, Scarlat, Schauer, Smith

## MECHANICAL ENGINEERING, M.S.

The department offers a master of science (M.S.) and doctor of philosophy (Ph.D.) in mechanical engineering. The graduate programs are designed to train outstanding students for advanced work in industry and research and development through a combination of coursework and hands on research. Online programs in the department include an M.S. with named option in controls and a master of engineering (M.Eng.) with named option in polymer science.

Excellent research facilities are available for specialized

research within these broad areas for studies in: biomechanics, combustion, computational design, controls, cryogenics, dynamics and vibrations, fluid dynamics, fluid power, geometric modeling and prototyping, heat and mass transfer, internal combustion engines, laser diagnostics, manufacturing processes, mechanics, mechatronics, polymer and composites processing, powertrain control, robotics, solar energy, and more.

A list of mechanical engineering faculty and their respective areas of specialization is available on the department's website (<http://directory.engr.wisc.edu/me/faculty>).

The mechanical engineering graduate student handbook is also available on the program website (<https://www.engr.wisc.edu/app/uploads/2016/09/ME-Grad-handbook-Update-September-2016.pdf>).

## ONLINE PROGRAMS

The mechanical engineering M.Eng. named option: polymer science is a fully online degree that includes an interdisciplinary curriculum of courses incorporating the latest research and practices in plastics and polymer manufacturing. It is designed to prepare engineers for professional practice in the polymer industry. Please visit the Department of Engineering Professional Development's website (<https://epd.wisc.edu/online-degree/master-of-engineering-polymer-science>) for complete information about the online polymer science program.

The mechanical engineering M.S. named option: controls is a primarily online degree that includes a full curriculum of courses incorporating the latest research and practices in drive, converter control, and sensor integration. This program consists of 27 online credits and 3 credits taken on campus through a summer laboratory course. The program includes courses in both mechanical engineering and electrical engineering and is designed for practicing engineers. Please visit the Department of Engineering Professional Development's website (<http://epd.wisc.edu/online-degree/mechanical-engineering-controls>) for complete information about the online controls program.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT:

60 credits

## MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (31 credits out of 62 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count graduate coursework from other institutions toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Up to 7 credits numbered 300 or above can be counted toward the minimum graduate degree credit requirement. These credits may be counted toward the minimum graduate coursework (50%) requirement if they are in courses numbered 700 or above. No credits can be counted toward the minimum graduate residence credit requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement and the minimum graduate degree credit requirement. These credits may be counted toward the minimum graduate coursework (50%) requirement if they are in courses numbered 700 or above. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

Ph.D.: 15 credits

Ph.D. dissertator status: 3 credits of M E 990 Dissertator Research and Thesis

## PROGRAM-SPECIFIC COURSES REQUIRED

Two semesters of M E 903 Graduate Seminar are required. These should be taken the first two semester the student is in residence. If an M.S. degree is received at UW–Madison, additional M E 903 credits are not required.

At least 18 credits of thesis (M E 790 Master's Research and Thesis, M E 890 PhD Research and Thesis, M E 990 Dissertator Research and Thesis) are required with an overall grade of S.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Minor required.

Minor Option A: Requirements for external minor are defined by the department of that minor. Selection of this option requires the approval of the minor department.

Minor Option B (distributed) requires a minimum of 12 formal course credits of graduate-level courses. The coursework should form a coherent group of courses for which the graduate credit is allowed. The approval of the advisor and the graduate committee are required.

## OVERALL GRADUATE GPA REQUIREMENT

3.25 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a C or above in all formal coursework. PhD candidates may not have any more than two Incompletes on their record at any one time.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal from program, leave of absence or change of advisor or program).

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time), this will be deemed unsatisfactory progress and the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students must have a mechanical engineering faculty advisor who assists them in planning a course sequence that meets degree requirements and who will discuss career objectives with the student. A preliminary committee must include student's mechanical engineering faculty advisor and at least three other faculty members. A final oral defense committee must include student's mechanical engineering faculty advisor and at least four other faculty members, one of whom must be from outside of the mechanical engineering department.

## ASSESSMENTS AND EXAMINATIONS

All Ph.D. applicants must take the Ph.D. qualifying exam no later than the second semester after completing their master degree. The Ph.D. candidate will need to pass a qualifying exam, preliminary exam, and a final defense in order to obtain a degree.

## TIME CONSTRAINTS

Ph.D. students must complete their preliminary exam within five years of passing their qualifying exam.

The preliminary must be passed at least 9 months prior to the thesis defense.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing

the preliminary examination may be required to take another preliminary examination to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Students with a strong background in mechanical engineering or a related field with interest in furthering their education in mechanical engineering are encouraged to apply for admission to the department. Applicants accepted into the program generally have an undergraduate grade point average well above the graduate school minimum of 3.0 on a 4.0 scale. All applicants are required to take the Graduate Record Exam (GRE). Applications are evaluated on the basis of previous academic record, GRE scores, letters of recommendation, and a personal statement. For more information on admission requirements see the department website (<https://www.engr.wisc.edu/department/mechanical-engineering/academics/phd-in-mechanical-engineering>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- demonstrate an ability to synthesize knowledge from a subset of the biological, physical, and social sciences to help frame problems critical to the future of their discipline.
- conduct original research.
- demonstrate an ability to create new knowledge and communicate it to their peers.

### PROFESSIONAL CONDUCT

- fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Engelstad, Ghandhi (chair), Lorenz, Moskwa, Nellis, Osswald, Pfothenauer, Rowlands, Rutland, Sanders, Shapiro, Thelen, Turng; Associate Professors Krupenkin, Negrut, Pfefferkorn, Ploeg, Qian, Rothamer, Shedd, Suresh, Trujillo, Zinn; Assistant Professors Adamczyk, Eriten, Henak, Kokjohn, Miller, Min, Roldan-Alzate, Rudolph; Faculty affiliates Allen, Bonazza, Clemons, Corradini, Holloway, Kammer, Luzzio, Reindl, Scarlet, Schauer, Smith

## MEDICAL PHYSICS

**Administrative Unit:** Medical Physics

**College/School:** School of Medicine and Public Health

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

One of the basic science departments of the UW–Madison School of Medicine and Public Health, the Department of Medical Physics offers comprehensive training in diagnostic and therapeutic medical physics and in health physics. Achievement of the M.S. or Ph.D. in this department reflects strong scholarship in one of the top medical physics programs in the United States. Graduates are prepared for teaching,

research, and clinical physics positions in medical centers, national laboratories, and universities, and in the medical and nuclear technology industries.

Medical physicists may participate professionally in the radiation treatment of cancer patients, in advanced medical imaging and diagnostic procedures, or in related areas of research and teaching. Health physicists may operate radiation protection programs at nuclear industrial facilities, hospitals, or laboratories, or may perform research on methods of measuring ionizing radiations (i.e., dosimetry).

A unique quality of the medical physics program is the broad range of expertise and research interests of the faculty. Students receive training in diagnostic x-ray physics, x-ray computerized tomography, magnetic resonance imaging and spectroscopy, nuclear medicine and positron emission tomography (PET) imaging, biomagnetism, medical ultrasound, elastography, radiation dosimetry, radiation treatment planning, and radiobiology.

The Ph.D. is primarily a research degree that extends the student's depth of knowledge in one of the specialty areas. Faculty positions at universities, research positions, and an increasing number of clinical physics positions require the Ph.D. degree. Medical physics faculty maintain close collaborative ties with faculty in other departments, including human oncology, radiology, cardiology, medicine, psychiatry, and pharmacology, broadening the scope of research opportunities open to medical physics students and providing access to sophisticated clinical facilities.

The department also houses the Medical Radiation Research Center and Accredited Dosimetry Calibration Laboratory, one of four in the U.S. accredited by the American Association of Physicists in Medicine. In addition, the department provides clinical support services to the radiology and human oncology departments. It also operates a PET radiotracer production facility, a medical image analysis laboratory, and a small bore MRI scanner in the medical school's small animal imaging laboratory. Each of these facilities provides unique training and support for graduate students.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Medical Physics, Doctoral Minor (p. 486)
- Medical Physics, M.S. (p. 486)
- Medical Physics, Ph.D. (p. 488)

## PEOPLE

**Faculty:** Professors Jackson (chair), Alexander, Bayouth, Block, Campagnola, Chen, Christian, DeJesus, DeWerd, Fain, Grist, Hall, Henderson, Jeraj, Korosec, Meyerand, Pepler, Reeder, Thomadsen, Varghese, Wakai; Associate Professors Brace, Cai, Emborg, Ranallo, Vetter, Weichert, Wieben; Assistant Professors Bednarz, Birn, Culberson, Kissick, Li, Nagle, Prabhakaran, Smilowitz, Speidel; Emeritus Professors DeLuca, Holden, Mackie, Madsen, Mistretta, Nickles, Paliwal, Van Lysel, Zagzebski

## MEDICAL PHYSICS, DOCTORAL MINOR

### REQUIREMENTS

A candidate for the Ph.D. in another department who wishes to minor in medical physics is required to elect a minimum of 9 credits. The medical physics graduate committee chair should be consulted for detailed information.

### PEOPLE

**Faculty:** Professors Jackson (chair), Alexander, Bayouth, Block, Campagnola, Chen, Christian, DeJesus, DeWerd, Fain, Grist, Hall, Henderson, Jeraj, Korosec, Meyerand, Peppler, Reeder, Thomadsen, Varghese, Wakai; Associate Professors Brace, Cai, Emborg, Ranallo, Vetter, Weichert, Wieben; Assistant Professors Bednarz, Birn, Culberson, Kissick, Li, Nagle, Prabhakaran, Smilowitz, Speidel; Emeritus Professors DeLuca, Holden, Mackie, Madsen, Mistretta, Nickles, Paliwal, Van Lysel, Zagzebski

## MEDICAL PHYSICS, M.S.

One of the basic science departments of the UW–Madison School of Medicine and Public Health, the Department of Medical Physics offers comprehensive training in diagnostic and therapeutic medical physics and in health physics. Achievement of the M.S. or Ph.D. in this department reflects strong scholarship in one of the top medical physics programs in the United States. Graduates are prepared for teaching, research, and clinical physics positions in medical centers, national laboratories, and universities, and in the medical and nuclear technology industries.

Medical physicists may participate professionally in the radiation treatment of cancer patients, in advanced medical imaging and diagnostic procedures, or in related areas of research and teaching. Health physicists may operate radiation protection programs at nuclear industrial facilities, hospitals, or laboratories, or may perform research on methods of measuring ionizing radiations (i.e., dosimetry).

A unique quality of the medical physics program is the broad range of expertise and research interests of the faculty. Students receive training in diagnostic x-ray physics, x-ray computerized tomography, magnetic resonance imaging and spectroscopy, nuclear medicine and positron emission tomography (PET) imaging, biomagnetism, medical ultrasound, elastography, radiation dosimetry, radiation treatment planning, and radiobiology.

The Ph.D. is primarily a research degree that extends the student's depth of knowledge in one of the specialty areas. Faculty positions at universities, research positions, and an increasing number of clinical physics positions require the Ph.D. degree. Medical physics faculty maintain close collaborative ties with faculty in other departments, including human oncology, radiology, cardiology, medicine, psychiatry, and pharmacology, broadening the scope of research opportunities open to medical physics students and providing access to sophisticated clinical facilities.

The department also houses the Medical Radiation Research Center and Accredited Dosimetry Calibration Laboratory, one of four in the U.S. accredited by the American Association of Physicists in Medicine. In addition, the department provides clinical support services to the radiology and human oncology departments. It also operates a PET radiotracer production facility, a medical image analysis laboratory, and a small bore MRI scanner in the medical school's small animal imaging laboratory. Each of these facilities provides unique training and support for graduate students.

### FUNDING

The department typically supports 85–90 percent of students enrolled in the medical physics graduate program through department or university fellowships, research or teaching assistantships, or NIH–NRSA traineeships. All awards include a comprehensive health insurance program and remission of tuition. The student is responsible for segregated fees.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

29 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (16 out of 32 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 3 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to the master's degree program is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, 7 credits in medical physics courses from a UW–Madison undergraduate degree above the undergraduate graduation requirements are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to the master's degree program is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

All students in the program are required to take 8 core curriculum courses, namely MED PHYS/B M E/H ONCOL/PHYSICS 501 Radiological Physics and Dosimetry, MED PHYS/PHYSICS 563 Radionuclides in Medicine and Biology, MED PHYS/B M E 566 Physics of Radiotherapy, MED PHYS/B M E 567 The Physics of Diagnostic Radiology, MED PHYS/N E 569 Health Physics and Biological Effects, MED PHYS/B M E 573 Medical Image Science: Mathematical and Conceptual Foundations, MED PHYS/B M E 578 Non-Ionizing Diagnostic Imaging, and MED PHYS 701 Ethics and the responsible conduct of research and practice of Medical Physics along with associated laboratories (totaling 25 credits). These core courses, along with an acceptable course in anatomy / physiology, satisfy CAMPEP course requirements. Masters degree students must also complete 2 credits of Journal Club (MED PHYS 990 Research).

Health Physics: Candidates must complete 8 core courses totaling 25 credits, including MED PHYS/B M E/H ONCOL/PHYSICS 501 Radiological Physics and Dosimetry, MED PHYS/PHYSICS 563 Radionuclides in Medicine and Biology, MED PHYS/B M E 566 Physics of Radiotherapy, MED PHYS/B M E 567 The Physics of Diagnostic Radiology, MED PHYS/N E 569 Health Physics and Biological Effects, MED PHYS/B M E 573 Medical Image Science: Mathematical and Conceptual Foundations, MED PHYS/B M E 578 Non-Ionizing Diagnostic Imaging, and MED PHYS 701 Ethics and the responsible conduct of research and practice of Medical Physics plus an independent reading course on Health Physics Rules and Regulations for 1 credit. N E 427 Nuclear Instrumentation Laboratory and N E 571 Economic and Environmental Aspects of Nuclear Energy must also be taken. In addition, 6 elective credits are required. anatomy for 3 credits or physiology for 5 credits (or alternative) is required as one of the electives. This is a total of 36 credits, including 2 credits of Journal Club (MED PHYS 990 Research).

An exemption from the core curriculum requirement requires the approval of the chair of the Graduate Committee. If the entirety of the core curriculum is not taken, the student will not satisfy the CAMPEP core curriculum requirement.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

See Medical Physics Graduate Student Handbook ([http://www.medphysics.wisc.edu/graduate/documents/handbook\\_june\\_2014.pdf](http://www.medphysics.wisc.edu/graduate/documents/handbook_june_2014.pdf)) for department criteria for satisfactory academic progress.

## PROBATION POLICY

See Medical Physics Graduate Student Handbook ([http://www.medphysics.wisc.edu/graduate/documents/handbook\\_june\\_2014.pdf](http://www.medphysics.wisc.edu/graduate/documents/handbook_june_2014.pdf)) for more information.

## ADVISOR / COMMITTEE

Candidates must acquire a major professor/advisor by the beginning of the second semester of study.

## ASSESSMENTS AND EXAMINATIONS

Candidates are expected to take the qualifying examination by the end of the second year of study. Contact the department for more information.

## TIME CONSTRAINTS

The qualifying examination should be taken by the end of the second year. Master's degree course requirements should be completed by the end of the second year.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

About 150 applicants per year are attracted to the medical physics program. Each fall the program admits 15–20 students based on academic record. This results in an average enrollment of approximately 100 students each semester. Less than one-fourth of the students pursue the M.S. degree as a terminal degree, and the remainder continue on to the Ph.D.

A bachelor's degree in physics is considered the best preparation for graduate study in medical physics, but majors such as nuclear engineering, biomedical engineering, electrical engineering, or chemistry may also be acceptable. The student's math background should include calculus, differential equations, linear algebra, and Fourier analysis, such as might be learned in modern optics or undergraduate quantum theory. Some facility in computer programming and electronic instrumentation is desirable. One year of chemistry, a year of biology, and an introductory course in physiology are also advantageous.

Beginning graduate students should start their studies in the fall semester, as the course sequence is based on that assumption. Students applying for admission should submit an online application and all supporting documentation by December 1 (for domestic applications; international applications are due November 15), to ensure consideration for admission and financial support to begin the following fall.

Admission to the graduate program is competitive. Applications are judged on the basis of a student's previous academic record, Graduate Record Exam (GRE) scores, research experience, letters of recommendation, and personal statement of reasons for interest in graduate study in medical physics.

The application process is in two parts:

1. Complete the online application to the Graduate School and pay application fee.
2. Provide electronic copies of resume (include awards, fellowships, and scholarships received, publications, volunteer activities, and research experience); the "applicant data sheet"; personal statement of reasons for interest in graduate study in medical physics; and mail **two** official sets of paper transcripts to the department. *Note:* Recommendation letters are submitted electronically through the online application. To report Graduate Record Exam (GRE) scores, use Institution Code 1846 for the University of Wisconsin–Madison.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, and/or elaborates theories, research methods, and approaches to inquiry or schools of practice in the field of medical physics.
- Identifies sources and assembles evidence pertaining to questions or challenges in the field of medical physics.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates and/or synthesizes information pertaining to questions or challenges in the field of medical physics.
- Communicates clearly in both oral and written formats.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Jackson (chair), Alexander, Bayouth, Block, Campagnola, Chen, Christian, DeJesus, DeWerd, Fain, Grist, Hall, Henderson, Jeraj, Korosec, Meyerand, Pepler, Reeder, Thomadsen, Varghese, Wakai; Associate Professors Brace, Cai, Emborg, Ranallo, Vetter, Weichert, Wieben; Assistant Professors Bednarz, Birn, Culberson, Kissick, Li, Nagle, Prabhakaran, Smilowitz, Speidel; Emeritus Professors DeLuca, Holden, Mackie, Madsen, Mistretta, Nickles, Paliwal, Van Lysel, Zagzebski

## MEDICAL PHYSICS, PH.D.

One of the basic science departments of the UW–Madison School of Medicine and Public Health, the Department of Medical Physics offers comprehensive training in diagnostic and therapeutic medical physics and in health physics. Achievement of the M.S. or Ph.D. in this department reflects strong scholarship in one of the top medical physics programs in the United States. Graduates are prepared for teaching, research, and clinical physics positions in medical centers, national laboratories, and universities, and in the medical and nuclear technology industries.

Medical physicists may participate professionally in the radiation treatment of cancer patients, in advanced medical imaging and diagnostic procedures, or in related areas of research and teaching. Health physicists may operate radiation protection programs at nuclear industrial facilities, hospitals, or laboratories, or may perform research on methods of measuring ionizing radiations (i.e., dosimetry).

A unique quality of the medical physics program is the broad range of expertise and research interests of the faculty. Students receive training in diagnostic x-ray physics, x-ray computerized tomography, magnetic resonance imaging and spectroscopy, nuclear medicine and positron emission tomography (PET) imaging, biomagnetism, medical ultrasound, elastography, radiation dosimetry, radiation treatment planning, and radiobiology.

The Ph.D. is primarily a research degree that extends the student's depth of knowledge in one of the specialty areas. Faculty positions at

universities, research positions, and an increasing number of clinical physics positions require the Ph.D. degree. Medical physics faculty maintain close collaborative ties with faculty in other departments, including human oncology, radiology, cardiology, medicine, psychiatry, and pharmacology, broadening the scope of research opportunities open to medical physics students and providing access to sophisticated clinical facilities.

The department also houses the Medical Radiation Research Center and Accredited Dosimetry Calibration Laboratory, one of four in the U.S. accredited by the American Association of Physicists in Medicine. In addition, the department provides clinical support services to the radiology and human oncology departments. It also operates a PET radiotracer production facility, a medical image analysis laboratory, and a small bore MRI scanner in the medical school's small animal imaging laboratory. Each of these facilities provides unique training and support for graduate students.

## FUNDING

The department typically supports 85–90 percent of students enrolled in the medical physics graduate program through department or university fellowships, research or teaching assistantships, or NIH–NRSA traineeships. All awards include a comprehensive health insurance program and remission of tuition. The student is responsible for segregated fees.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

54 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

42 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Seventy-five percent of degree coursework (40 credits out of 54 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 12 credits of medical physics graduate coursework from other institutions.

coursework earned five years or more prior to admission to the doctoral degree program is not allowed to satisfy requirements.

### **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

With program approval, 7 credits in medical physics courses from a UW–Madison undergraduate degree above the undergraduate graduation requirements are allowed to count toward the degree.

### **PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

With program approval, students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW–Madison Special student. Coursework earned five years or more prior to admission to the doctoral degree program is not allowed to satisfy requirements.

### **CREDITS PER TERM ALLOWED**

15 credits

### **PROGRAM-SPECIFIC COURSES REQUIRED**

Completion of the core and elective course requirements as defined for the master's degree is required. See the master's degree specific courses section of this table.

### **DOCTORAL MINOR/BREADTH REQUIREMENTS**

The 54 credits needed to satisfy the Ph.D. degree requirement must include 9 credits of graduate-level courses (greater than and including 300 level) constituting a minor subject area, consisting of a coherent body of work complementary to the candidate's research. The objective of the minor course requirement is to add a defined breadth to the candidate's education. Please see the Medical Physics Graduate Student Handbook (<https://www.medphysics.wisc.edu/graduate>) for more information regarding minor options.

### **OVERALL GRADUATE GPA REQUIREMENT**

3.00 GPA required

### **OTHER GRADE REQUIREMENTS**

See Medical Physics Graduate Student Handbook ([http://www.medphysics.wisc.edu/graduate/documents/handbook\\_june\\_2014.pdf](http://www.medphysics.wisc.edu/graduate/documents/handbook_june_2014.pdf)) on department criteria for satisfactory academic progress.

### **PROBATION POLICY**

See Medical Physics Graduate Student Handbook ([http://www.medphysics.wisc.edu/graduate/documents/handbook\\_june\\_2014.pdf](http://www.medphysics.wisc.edu/graduate/documents/handbook_june_2014.pdf)) for more information.

### **ADVISOR / COMMITTEE**

Candidates must acquire a major professor/advisor by the beginning of the second semester of study.

See Medical Physics Graduate Student Handbook ([http://www.medphysics.wisc.edu/graduate/documents/handbook\\_june\\_2014.pdf](http://www.medphysics.wisc.edu/graduate/documents/handbook_june_2014.pdf)) for department criteria for doctoral committee.

### **ASSESSMENTS AND EXAMINATIONS**

The qualifying examination should be taken by the end of the second year. Students should complete the preliminary examination by the end of the third year. Permission from the graduate committee and department chair is required if the exam needs to be taken after the third

year. Defense of a dissertation is required within five years of successful completion of the preliminary examination.

### **TIME CONSTRAINTS**

The qualifying examination should be taken by the end of the second year. Students should complete their preliminary examination by the end of the third year. Permission from the graduate committee and department chair is required if the exam needs to be taken after the third year. Defense of a dissertation is required within five years of successful completion of the preliminary examination.

### **LANGUAGE REQUIREMENTS**

No language requirements.

## **ADMISSIONS**

About 150 applicants per year are attracted to the medical physics program. Each fall the program admits 15–20 students based on academic record. This results in an average enrollment of approximately 100 students each semester. Beginning graduate students should start their studies in the fall semester, as the course sequence is based on that assumption. Students applying for admission should submit an online application and all supporting documentation by December 1 (for domestic applications; international applications are due November 15), to ensure consideration for admission and financial support to begin the following fall.

Admission to the graduate program is competitive. Applications are judged on the basis of a student's previous academic record, Graduate Record Exam (GRE) scores, research experience, letters of recommendation, and personal statement of reasons for interest in graduate study in medical physics.

The application process is in two parts:

1. Complete the online application to the Graduate School and pay application fee.
2. Provide electronic copies of resume (include awards, fellowships, and scholarships received, publications, volunteer activities, and research experience); the "applicant data sheet"; personal statement of reasons for interest in graduate study in medical physics; and mail two official sets of paper transcripts to the department. Note: Recommendation letters are submitted electronically through the online application. To report Graduate Record Exam (GRE) scores, use Institution Code 1846 for the University of Wisconsin–Madison.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of medical physics.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of medical physics.
- Creates research, scholarship, or performance that makes a substantive scientific contribution.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of medical physics to society.
- Communicates complex ideas in a clear and understandable manner in both oral and written formats.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Jackson (chair), Alexander, Bayouth, Block, Campagnola, Chen, Christian, DeJesus, DeWerd, Fain, Grist, Hall, Henderson, Jeraj, Korosec, Meyerand, Peppler, Reeder, Thomadsen, Varghese, Wakai; Associate Professors Brace, Cai, Emborg, Ranallo, Vetter, Weichert, Wieben; Assistant Professors Bednarz, Birn, Culberson, Kissick, Li, Nagle, Prabhakaran, Smilowitz, Speidel; Emeritus Professors DeLuca, Holden, Mackie, Madsen, Mistretta, Nickles, Paliwal, Van Lysel, Zagzebski

## MEDICINE AND PUBLIC HEALTH—SCHOOL-WIDE

### DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE PROFESSIONAL/CERTIFICATES

- Endocrinology-Reproductive Physiology, Doctoral Minor (p. 490)
- Endocrinology-Reproductive Physiology, M.S. (p. 490)
- Endocrinology-Reproductive Physiology, Ph.D. (p. 492)
- Molecular and Environmental Toxicology, Doctoral Minor (p. 495)
- Molecular and Environmental Toxicology, M.S. (p. 495)
- Molecular and Environmental Toxicology, Ph.D. (p. 497)
- Neuroscience, Doctoral Minor (p. 499)
- Neuroscience, M.S. (p. 499)
- Neuroscience, Ph.D. (p. 501)
- Physiology, Doctoral Minor (p. 504)
- Physiology, M.S. (p. 504)
- Physiology, Ph.D. (p. 506)

## ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY, DOCTORAL MINOR

## ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY, M.S.

**Administrative Unit:** Basic Research, Biotechnology, and Graduate Studies

**College/School:** College of Agricultural and Life Sciences, School of Medicine and Public Health

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The Endocrinology and Reproductive Physiology (ERP) Program is a multidisciplinary degree-granting program designed to promote research in both endocrinology and reproductive biology, to provide training and experience for pre- and post-doctoral students interested in these fields, and to provide training in problems of endocrine physiology and reproductive physiology in animals and humans. The program trains master's and Ph.D. candidates for teaching and research careers in all aspects of the interrelated fields of endocrinology and reproductive physiology—basic, clinical and translational. Students have access to a full range of research facilities throughout campus. A joint M.D./Ph.D. degree is also offered by the School of Medicine and Public Health and student trainees are eligible to train for the Ph.D. in the ERP program.

Postdoctoral Fellows are encouraged to join the program as associate members and participate in the program's diverse activities. While postdoctoral positions are arranged directly with individual faculty members, ERP also seeks NIH support in this area. The program supports and mentors the training of both Ph.D. and M.D. fellows in translational studies.

The multidisciplinary research and the diverse interests of the faculty make possible many approaches to the study of both endocrinology and reproduction, providing the individual student with a wide selection of research training experiences. Research opportunities are available, but not limited to: endocrine molecular signaling, endocrine physiology in body function and dysfunction, stem-cell programming, gamete and embryo biology, pregnancy, lactation, neuroendocrinology and placenta development. Research models range from molecular and cellular all the way to whole animal including nonhuman primates and humans.

All students complete a core set of courses during the first two years of enrollment in the program including participation in the weekly seminar program. After fulfilling core course requirements, students have the ability to design a curriculum that meets individual research and career interests. Students also have multiple opportunities to present research work in courses, seminars and symposia, and at regional, national and international scientific meetings. The preliminary exam for Ph.D. candidates is based on the research project and is structured in the form of a competitive grant proposal. Part one of the exam is development of the written proposal and submission to the thesis committee for review. Part two is focused on the rebuttal and oral review of the comments. Students should aim to complete the preliminary exam by the start of the third year of study and defend the thesis in the fifth year.

All students are required to form a thesis committee during the first year of study and have an annual meeting with the members. A written progress report must be submitted annually to the program administrator.

## FUNDING

More than 95 percent of the program's enrolled students are supported by a research assistantship or fellowship. Incoming applicants are considered for competitive fellowships during the admissions process; no additional application is required. Additional fellowship support for minority and educationally disadvantaged students is also available (prospective students should contact the program administrator at the time of application). Teaching assistantships are discouraged until the student has passed the preliminary exam. Training-grant support may be considered in the third through fifth years of study for Ph.D. students, assuming the student meets citizenship criteria, satisfactory academic progress, has a project that is relevant to the mission of NICHD, and continued funding by the National Institutes of Health. Financial support generally includes tuition remission, monthly stipend check, and participation in the State of Wisconsin health insurance program. Benefit costs change on an annual basis; contact the program administrator for current rates. Support for international students varies by faculty advisor. International students offered admission will be required to submit a notarized financial statement prior to visa documents being issued.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S. with available terminal, and MFM fellows tracks

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half (16 credits of the required 30) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the program director. One course may be substituted for another due to background and interest. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher. Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for their degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the program director. One course may be substituted for another due to background, interest, or program-related career relevance. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher or choose one with different emphasis (e.g., clinical). Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the program director. One course may be substituted for another due to background, interest, or program-related career relevance. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher or choose one with different emphasis (e.g., clinical). Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for the degree.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission to the program is competitive; applications are due December 1 of each year for fall semester. Potential applicants will have a major in the biological sciences, a minimum undergraduate GPA of 3.3/4.0, and appropriate preparatory courses in physiology, chemistry, biochemistry, biology, physics, calculus, statistics, organic chemistry, and genetics. Prior laboratory research experience is strongly recommended.

The application process includes the completion and submission of the online Graduate School application, payment of the application fee, submission of a personal statement for graduate study, receipt of GRE scores and TOEFL or International English Language Testing System (IELTS) scores (TOEFL and IELTS are for international applicants) by Educational Testing Service, receipt of three letters of recommendation, and a current curriculum vitae. Applicants are strongly encouraged to use the online reference feature in the Graduate School application system. Transcripts from all colleges and universities attended should be sent directly to the program administrator.

Completed applications for fall entry are reviewed by a panel of faculty. Applicants who pass this first step will be contacted and have materials distributed to all faculty in the program for further consideration. Otherwise applications for spring or summer term are possible, but only with the approval of the admissions committee.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry in the field of study.

- Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Demonstrates understanding of the primary field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates clearly in ways appropriate to the field of study.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Bird (director) (Obstetrics and Gynecology), Abbott (Obstetrics and Gynecology), Alarid (Oncology), Bosu (Medical Sciences/Veterinary Medicine), Downs (Cell and Regenerative Biology), Drezner (Medicine), Golos (Comparative Biosciences), Jefcoate (Cell and Regenerative Biology), Khatib (Dairy Sciences), Kling (Pediatrics), Levine (Neuroscience), Magness (Obstetrics and Gynecology), Martin (Biochemistry), Ntambi (Biochemistry/Nutritional Sciences), Odorico (Surgery), Parrish (Animal Sciences), Pelegri (Genetics), Peterson (Pharmacy), Schuler (Comparative Biosciences/Veterinary Medicine), Shah (Obstetrics and Gynecology), Terasawa (Pediatrics), Thomson (Cell and Regenerative Biology), Wiltbank (Dairy Science), Xu (Oncology), and Zheng (Obstetrics and Gynecology); Associate Professors Atwood (Medicine), Audhya (Biomolecular Chemistry), Duello (Obstetrics and Gynecology), Jorgensen (Comparative Biosciences), Liu (Surgery), Patankar (Obstetrics and Gynecology), Payseur (Genetics), Vezina (Comparative Biosciences/Veterinary Medicine), and Watters (Comparative Biosciences/Veterinary Medicine); Assistant Professors Alisch (Psychiatry), Arendt (Comparative Biosciences), Blum (Cell and Regenerative Biology), Davis (Medicine), Hernandez (Dairy Science), Kimple (Medicine), Kreeger (Biomedical Engineering), Merrins (Medicine), and Salih (Obstetrics and Gynecology)

Students also have multiple opportunities to present research work in courses, seminars and symposia, and at regional, national and international scientific meetings. The preliminary exam for Ph.D. candidates is based on the research project and is structured in the form of a competitive grant proposal. Part one of the exam is development of the written proposal and submission to the thesis committee for review. Part two is focused on the rebuttal and oral review of the comments. Students should aim to complete the preliminary exam by the start of the third year of study and defend the thesis in the fifth year.

All students are required to form a thesis committee during the first year of study and have an annual meeting with the members. A written progress report must be submitted annually to the program administrator.

## FUNDING

More than 95 percent of the program's enrolled students are supported by a research assistantship or fellowship. Incoming applicants are considered for competitive fellowships during the admissions process; no additional application is required. Additional fellowship support for minority and educationally disadvantaged students is also available (prospective students should contact the program administrator at the time of application). Teaching assistantships are discouraged until the student has passed the preliminary exam. Training-grant support may be considered in the third through fifth years of study for Ph.D. students, assuming the student meets citizenship criteria, satisfactory academic progress, has a project that is relevant to the mission of NICHD, and continued funding by the National Institutes of Health. Financial support generally includes tuition remission, monthly stipend check, and participation in the State of Wisconsin health insurance program. Benefit costs change on an annual basis; contact the program administrator for current rates. Support for international students varies by faculty advisor. International students offered admission will be required to submit a notarized financial statement prior to visa documents being issued.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half (26 credits of the required 51) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the program director. One course may be substituted for another due to background and interest. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher. Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for their degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the program director. One course may be substituted for another due to background, interest, or program-related career relevance. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher or choose one with different emphasis (e.g., clinical). Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

Courses taken that fulfill equivalent program requirements may be considered to exempt a class. Exemptions must be discussed with the

program director. One course may be substituted for another due to background, interest, or program-related career relevance. Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to have this refresher or choose one with different emphasis (e.g. clinical). Decisions of the director are final.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for the degree.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students are not required to complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students

completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission to the program is competitive; applications are due December 1 of each year for fall semester. Potential applicants will have a major in the biological sciences, a minimum undergraduate GPA of 3.3/4.0, and appropriate preparatory courses in physiology, chemistry, biochemistry, biology, physics, calculus, statistics, organic chemistry, and genetics. Prior laboratory research experience is strongly recommended.

The application process includes the completion and submission of the online Graduate School application, payment of the application fee, submission of a personal statement for graduate study, receipt of GRE scores and TOEFL or International English Language Testing System (IELTS) scores (TOEFL and IELTS are for international applicants) by Educational Testing Service, receipt of three letters of recommendation, and a current curriculum vitae. Applicants are strongly encouraged to use the online reference feature in the Graduate School application system. Transcripts from all colleges and universities attended should be sent directly to the program administrator.

Completed applications for fall entry are reviewed by a panel of faculty. Applicants who pass this first step will be contacted and have materials distributed to all faculty in the program for further consideration. Otherwise applications for spring or summer term are possible, but only with the approval of the admissions committee.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
- Creates research, scholarship, or performance that makes a substantive contribution.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.
- Communicates complex ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Bird (director) (Obstetrics and Gynecology), Abbott (Obstetrics and Gynecology), Alarid (Oncology), Bosu (Medical Sciences/Veterinary Medicine), Downs (Cell and Regenerative Biology), Drezner

(Medicine), Golos (Comparative Biosciences), Jefcoate (Cell and Regenerative Biology), Khatib (Dairy Sciences), Kling (Pediatrics), Levine (Neuroscience), Magness (Obstetrics and Gynecology), Martin (Biochemistry), Ntambi (Biochemistry/Nutritional Sciences), Odorico (Surgery), Parrish (Animal Sciences), Pelegri (Genetics), Peterson (Pharmacy), Schuler (Comparative Biosciences/Veterinary Medicine), Shah (Obstetrics and Gynecology), Terasawa (Pediatrics), Thomson (Cell and Regenerative Biology), Wiltbank (Dairy Science), Xu (Oncology), and Zheng (Obstetrics and Gynecology); Associate Professors Atwood (Medicine), Audhya (Biomolecular Chemistry), Duello (Obstetrics and Gynecology), Jorgensen (Comparative Biosciences), Liu (Surgery), Patankar (Obstetrics and Gynecology), Payseur (Genetics), Vezina (Comparative Biosciences/Veterinary Medicine), and Watters (Comparative Biosciences/Veterinary Medicine); Assistant Professors Alisch (Psychiatry), Arendt (Comparative Biosciences), Blum (Cell and Regenerative Biology), Davis (Medicine), Hernandez (Dairy Science), Kimple (Medicine), Kreeger (Biomedical Engineering), Merrins (Medicine), and Salih (Obstetrics and Gynecology)

## MOLECULAR AND ENVIRONMENTAL TOXICOLOGY, DOCTORAL MINOR

### REQUIREMENTS

Students in other fields who elect to minor in molecular and environmental toxicology must satisfactorily complete a total of 10 credits in the program. Satisfactory completion of the minor requires a B average or better in the selected courses.

### PEOPLE

**Faculty:** See Faculty ([http://metc.wisc.edu/people\\_category/faculty](http://metc.wisc.edu/people_category/faculty)) on program website.

## MOLECULAR AND ENVIRONMENTAL TOXICOLOGY, M.S.

**Administrative Unit:** Molecular and Environmental Toxicology  
**College/School:** College of Agricultural and Life Sciences, School of Pharmacy, School of Medicine and Public Health  
**Admitting Plans:** M.S., Ph.D.  
**Degrees Offered:** M.S., Ph.D.  
**Minors and Certificates:** Doctoral Minor

Molecular and environmental toxicology is a multidisciplinary subject that involves the study of mechanisms of action of environmental toxicants on humans and other organisms and the behavior of these toxicants in the environment. The UW–Madison Molecular and Environmental Toxicology Center's graduate program provides students with expert knowledge in at least one specialty plus a broad understanding of other specialties that contribute to the resolution of environmental toxicology problems. The center is sponsored by the School of Medicine and Public Health as well as the College of Agricultural and Life Sciences, the School of Veterinary Medicine and the School of Pharmacy. The center links researchers in numerous academic departments who are working on problems in this area.

An interdisciplinary graduate program leading to the doctor of philosophy or a master of science in molecular and environmental toxicology is offered by the center under the direction of an executive committee composed of faculty affiliated with the center. The program offers two general approaches: mechanisms of pathobiology of chemically induced disease and environmental activities of chemicals. Each approach is subdivided into focal areas including metabolic and genetic toxicology, neurotoxicology, and immunotoxicology; and ecotoxicology, bioremediation, and distribution and assessment of environmental chemicals. All students participate in a core curriculum that addresses these various areas and that is supplemented by other advanced, specialized courses. Students perform research under the guidance of one of the center's graduate faculty members.

Recipients of graduate degrees in molecular and environmental toxicology pursue careers in governmental agencies (policymaking, regulations, standard setting, or research), private industry (e.g., hazardous waste management, occupational safety, consumer affairs, research and development, or regulatory compliance), and the academic community (teaching and research). The center office maintains specific information concerning career placements.

### FUNDING

Financial aid is provided to all students, usually in the form of grant-supported research assistantships, institutional fellowships, or advanced opportunity fellowships for minority or disadvantaged students. Students are encouraged to contact individual professors in their areas of interest to determine whether support is available for working in that lab.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with non-thesis, and research/thesis tracks

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half (16 credits of the required 30) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Prior coursework that a student wants to have considered must be presented within the first month of UW–Madison residency. Core courses may be appealed, subject to Graduate Achievement Committee approval. Credit total of core course exemptions will need to be made up as electives. Elective credits may be appealed, subject to Graduate Achievement Committee approval; further electives will not need to be taken.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Core courses taken as an undergraduate will not need to be retaken, commonly including M&ENVTOX/MEDICINE/ONCOLOGY/PATH/PHM SCI/PHMCOL-M/POP HLTH 625 Toxicology I and M&ENVTOX/MEDICINE/PATH/PHM SCI/PHMCOL-M/POP HLTH 626 Toxicology II from the Pharm/Tox program and M&ENVTOX/AGRONOMY/ENTOM/F&W ECOL 634 Ecotoxicology: Impacts on Populations, Communities and Ecosystems in the F&W Ecol program. Equivalent number of didactic elective credits from graduate-level courses must be taken to fulfill the previously taken credits/courses.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Core courses taken as a UW–Madison University Special student will not need to be taken, commonly including M&ENVTOX/MEDICINE/ONCOLOGY/PATH/PHM SCI/PHMCOL-M/POP HLTH 625 Toxicology I and M&ENVTOX/MEDICINE/PATH/PHM SCI/PHMCOL-M/POP HLTH 626 Toxicology II, as a student prepares for the toxicology program. Equivalent number of didactic elective credits from graduate-level courses must be taken to fulfill the previously taken credits/courses.

## CREDITS PER TERM ALLOWED

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

To qualify for graduate study in molecular and environmental toxicology, applicants normally have a bachelor's degree in a biological or physical science, with at least a 3.0 GPA (on a 4.0 scale). The following courses should be completed before entrance to the program: four semesters of chemistry, including at least one of organic (depending on the planned direction within the program, a semester of either analytical chemistry or biochemistry is highly recommended); one semester of math-based physics (a second semester is highly recommended); and three semesters of biology, including coverage of introductory genetics. One or more semesters of calculus is highly recommended. If applicants have not taken one semester of statistics, biometrics, or an equivalent course, and one semester of biochemistry equivalent to the UW–Madison Biochem 501 course, then these courses must be taken as part of the program and will fulfill elective credit requirements for the major.

Students with a limited number of deficiencies may be admitted, but must eliminate these deficiencies early in their graduate study. Applicants are required to take the Graduate Record Exam (GRE). International students should also send scores of the Test of English as a Foreign Language (TOEFL), or International English Language Testing System (IELTS).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to teach science, engaging audiences and helping them to learn.
- Students will demonstrate a didactic knowledge of both molecular toxicology and environmental toxicology.
- Students will be able to design future experiments and present them as a proposal, which contains background information, experimental processes, and account for any set-backs.
- Students will be able to write for a proper audience, revising and responding to reviewers as appropriate.
- Students will be able to verbally communicate their science and do-so in a clear manner for a variety of audiences.

### PROFESSIONAL CONDUCT

- Students will understand that science and research is based on trust - trust between scientists and colleagues, trust between scientists and policy makers, trust between scientists and advisory boards, and trust between scientists and society.

If applicants have not taken one semester of statistics, biometrics, or an equivalent course, and one semester of biochemistry equivalent to the UW–Madison Biochem 501 course, then these courses must be taken as part of the program and will fulfill elective credit requirements for the major. Students with a limited number of deficiencies may be admitted, but must eliminate these deficiencies early in their graduate study. Applicants are required to take the Graduate Record Exam (GRE). International students should also send scores of the Test of English as a Foreign Language (TOEFL), or International English Language Testing System (IELTS).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to teach science, engaging audiences and helping them to learn.
- Students will demonstrate a didactic knowledge of both molecular toxicology and environmental toxicology.
- Students will be able to design future experiments and present them as a proposal, which contains background information, experimental processes, and account for any set-backs.
- Students will be able to verbally communicate their science and do-so in a clear manner for a variety of audiences.
- Students will be able to write for a proper audience, revising and responding to reviewers as appropriate.

### PROFESSIONAL CONDUCT

- Students will understand that science and research is based on trust - trust between scientists and colleagues, trust between scientists and policy makers, trust between scientists and advisory boards, and trust between scientists and society.

## PEOPLE

**Faculty:** See Faculty ([http://metc.wisc.edu/people\\_category/faculty](http://metc.wisc.edu/people_category/faculty)) on program website.

## NEUROSCIENCE, DOCTORAL MINOR

Neuroscience as a discipline is at a vital juncture. Groundbreaking advances such as mapping of the human genome, development of advanced molecular, genetic, and imaging technologies, and novel integrative approaches have expanded knowledge about the workings of the brain as never before. With this increased understanding, neuroscientists now envision significant treatments for numerous diseases, including neurodegenerative diseases, psychiatric illnesses, and developmental and emotional disorders. The doctoral minor in neuroscience is both interdepartmental and interdisciplinary. The course

curriculum draws on expertise from faculty who are spread across over 22 departments on campus.

A doctoral minor in neuroscience will be of interest to doctoral students who are interested in augmenting the discipline to their research. The minor emphasizes the core sequence of cell and molecular neuroscience and systems neuroscience as well as a midlevel graduate course in one of the two areas: cell/molecular/developmental or systems/behavior.

## REQUIREMENTS

To complete the Minor, you are required to complete 9 credits. NTP/PHMCOL-M/PHYSIOL 610 Cellular and Molecular Neuroscience, NTP/ANATOMY/PHMCOL-M/PHYSIOL/PSYCH 611 Systems Neuroscience and a NTP mid-level course must be completed as part of the requirement. A list of approved NTP mid-level courses can be found here: <http://ntp.neuroscience.wisc.edu/mid-levels.htm>. Students must receive a grade point average of 3.0 for all required courses to receive the minor.

## ADMISSIONS

Contact Mallory Musolf ([musolf@wisc.edu](mailto:musolf@wisc.edu), 608-262-4932).

## NEUROSCIENCE, M.S.

**Administrative Unit:** Neuroscience Training Program

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The neuroscience training program (NTP) was established in 1971. Currently, it comprises over 100 faculty members whose research interests range from molecular neurobiology to integrative systems. The program is designed to prepare students for careers in research and teaching. On average the number of students in the program is approximately 50, half of whom are women. The program is best suited for students who are independent and wish to take a direct role in determining their graduate education. Training leads to the Ph.D. degree in neuroscience or the M.D./Ph.D. degree in cooperation with the School of Medicine and Public Health.

The doctoral program of each graduate student in the training program is tailored to meet individual needs. Each student's program is supervised by an advisory committee of five faculty members selected by the student in consultation with the major professor. During the first year students complete three laboratory rotations and take one-semester courses in molecular/cellular neuroscience and systems neuroscience. Students also take one upper-level course in molecular/cellular and systems neuroscience. Additional advanced courses may be taken to complement individual research interests.

A preliminary examination is required of all Ph.D. degree candidates at the end of the second year of graduate study. The examination consists of two written papers that are presented orally to the student's advisory committee. The first paper is a critical evaluation of a research topic outside the student's major area of interest. The second paper is a thesis research proposal. Additional requirements for the Ph.D. degree are attendance at the weekly neuroscience seminar and completion of one semester of teaching.

The central forum for intellectual exchange in the program is the neuroscience seminar (NTP 900 Neuroscience Seminar: Current Topics in Neurobiology), which meets weekly and is attended by neuroscience students and faculty. During an academic year, members of the program choose six topics in current neuroscience research for consideration. Topics are reviewed intensively in study groups supervised by faculty sponsors. Critical summaries of each topic are then presented by students to participants in the seminar as a series of lectures and discussions. Each three- to four-week topic session concludes with a lecture by an outside invited speaker who is well known for his or her research in the topic area. In the course of every three- to four-year period, most of the major research areas in neuroscience are reviewed in the neuroscience seminar; consequently, students become familiar with the breadth of contemporary neuroscience.

The average time taken by students to complete the Ph.D. degree is five years. The program prepares students for careers primarily in research and teaching in universities and colleges and careers outside of academia. Of the more than 200 students who have earned the Ph.D. degree in the program, more than 95 percent have careers in biomedical science.

## NEUROSCIENCE & PUBLIC POLICY PROGRAM

The neuroscience & public policy program (N&PP) offers three integrated degree tracks with the cooperation of the neuroscience training program, the La Follette School of Public Affairs and the University of Wisconsin-Madison Law School. The N&PP is based on two strongly held beliefs: first, that sound science and technology policy and law are essential for the well-being of societies; second, that a step toward ensuring such policy is to train future scientists in the making of public policy or the law and prepare them to participate in bringing science and society closer together.

The program offers students the opportunity to earn a Ph.D. degree in neuroscience as well as a master of public affairs (MPA), a master of international public affairs (MIPA), or juris doctorate (J.D.). In each of the degree tracks, the program brings together faculty from neuroscience, public policy, bioethics, sociology, and law and other related fields to train research neuroscientists who will be qualified to help shape public policy or the law. The cross-disciplinary training combines didactic and laboratory research training in neuroscience with a classroom-based and hands-on education in public policy or the law.

For more information about the double and dual degree tracks offered through the neuroscience & public policy program including admissions and program requirements please visit the program website (<http://ntp.neuroscience.wisc.edu/npp.htm>).

## FUNDING

Each student receives a stipend that covers tuition, fees, living costs, and health insurance and is guaranteed for five years if progress is satisfactory. Financial support is provided from the program's NIH training grant, fellowships, and faculty research grants. Limited support is available for international students.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval credits from former graduate institutions may be allowed to count toward degree. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval credits from graduate-level courses (numbered 300 or above) taken as an undergraduate at UW-Madison may be allowed to count toward degree up to 7 credits. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, coursework numbered 300 or above taken as a UW-Madison Special student may be allowed to count toward the degree up to 15 credits. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Candidates must satisfactorily complete one year of coursework that covers molecular, cellular, and integrative neurobiology. Enrollment in at least 2 credits of NTP 900 Neuroscience Seminar: Current Topics in Neurobiology is required.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA Required

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Candidates must select the advisory committee by the end of the second semester of the first year of graduate study.

## ASSESSMENTS AND EXAMINATIONS

A research paper or presentation based on at least one year of laboratory research must be submitted to the advisory committee.

## TIME CONSTRAINTS

Master's degree students who are absent for five or more years will not be given credit for prior work.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 503)

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will develop the knowledge base necessary for a career as an independent, professional scientist.
- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in neuroscience.
- Identifies sources and assembles evidence pertaining to questions or challenges in neuroscience.
- Demonstrates understanding of the primary field of neuroscience in a historical, social or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in neuroscience.
- Communicates clearly in ways appropriate to the field of neuroscience.

## PROFESSIONAL CONDUCT

- Students will receive training in responsible conduct of research, and will learn and foster principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professor Mary Halloran (director). For a comprehensive faculty list, visit the program website (<http://ntp.neuroscience.wisc.edu/faculty-research.htm>).

## NEUROSCIENCE, PH.D.

**Administrative Unit:** Neuroscience Training Program

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, coursework numbered 300 or above taken as a UW-Madison Special student may be allowed to count toward the degree up to 15 credits. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Enrollment for NTP 900 Neuroscience Seminar: Current Topics in Neurobiology each semester; NTP/PHMCOL-M/PHYSIOL 610 Cellular and Molecular Neuroscience Cellular and Molecular Neuroscience; NTP/ANATOMY/PHMCOL-M/PHYSIOL/PSYCH 611 Systems Neuroscience Systems Neuroscience; NTP/PHYSIOL 700 Professional Development for Biomedical Graduate Students Professional Development; one intermediate/advanced course in molecular/cellular/developmental neuroscience; one intermediate/advanced course in systems/behavioral neuroscience; and other advanced courses as recommended by the advisory committee.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Completion of a doctoral minor is not required of students in the NTP doctoral program.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA Required

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher

grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

Failure to pass the preliminary examination before the start of the spring semester of the third year will result in being placed on probation. Two consecutive semesters of enrollment on probation precludes continuation in the program.

## ADVISOR / COMMITTEE

Candidates must select the advisory committee by the end of the second semester of the first year of graduate study.

## ASSESSMENTS AND EXAMINATIONS

Candidates must meet with their advisory committee once per semester until they become a dissertator and then once per year thereafter.

The preliminary examination consists of two papers: a dissertation proposal, and a critical research paper unrelated to the proposal. The preliminary examination should be completed by the end of the second summer of graduate study. Students who fail one or both parts of the preliminary examination may retake the examination within two months. Failure to pass the examination the second time will result in dismissal from the program.

The final dissertation must be submitted to the advisory committee and an oral defense of the thesis must be given. The thesis defense consists of a public presentation of the thesis followed by a closed meeting with the advisory committee. Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

The final dissertation must be completed by the end of the fifth academic year. If the dissertation is not completed by the end of the summer following the sixth academic year, the student's advisory committee must meet with the steering committee to present a written statement explaining why the dissertation has not been completed.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The admissions deadline for the neuroscience training program is December 1<sup>st</sup>; no exceptions will be made for late materials so we strongly encourage prospective applicants to send in required materials as early as possible. Admission to the program is based mainly on demonstrated ability and interest in science and mathematics. The minimum course prerequisites are mathematics through calculus and a year each of chemistry, physics, and biology. All course prerequisites must be taken at the college level. Applicants for admission must submit all undergraduate and graduate transcripts directly to the neuroscience training program, three letters of recommendation, scores from the GRE general test, and a statement of research interests and goals. Prior laboratory research experience, though not required, is a component of successful applications.

For more information about neuroscience training program admissions, see the admissions tab on the program website (<http://ntp.neuroscience.wisc.edu/admissions.htm>).

Prospective international students should visit the program website (<http://ntp.neuroscience.wisc.edu/admissions-international.htm>) for more information related to international admissions.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will develop the knowledge base necessary for a career as an independent, professional scientist.
- Students will demonstrate an in-depth understanding of the current knowledge, research questions, research findings and methodologies within their specific field of neuroscience.
- Students will acquire breadth of knowledge in several areas of neuroscience through directed reading and participation in seminar subgroups.
- Students will develop critical thinking skills. They will evaluate the scientific literature, evaluate evidence for and against hypotheses, identify knowledge gaps, identify strengths and weaknesses in existing literature, synthesis knowledge, and develop conclusions.

### RESEARCH

- Students will develop and complete original research that advances their specific area of neuroscience.
- Students will formulate ideas, concepts, and experimental design beyond the current boundaries of neuroscience knowledge.
- Students will evaluate and interpret professional scientific literature and use this information to develop theoretical frameworks, testable hypotheses, and predictions for their own research projects.
- Students will receive training and experience with leading edge technologies currently driving the neuroscience field.
- Students will design research projects and prepare necessary protocols.
- Students will conduct independent research and analyze and interpret resulting data.
- Students will prepare and submit manuscripts resulting from their independent research for publication in professional, peer-reviewed journals.

### COMMUNICATION

- Students will learn to effectively communicate to diverse audiences through writing, oral presentations, and discussions.
- Students will write clear and concise research articles for publication in professional, peer-reviewed journals.
- Students will present their research at scientific conferences and in formal and informal seminars.
- Students will learn methods of communication needed to interact with professional colleagues and to request grant support.
- Students will present research articulately and informatively to diverse audiences.
- Students will have with opportunities to engage in public outreach and education.

### TEACHING

- Students will learn teaching and mentoring skills necessary for future scientific careers.
- Students will receive training and serve as teaching assistants for an approved course or outreach program.

- Students will have opportunities to mentor others in a laboratory or research setting.

## PROFESSIONAL CONDUCT LEARNING GOALS

- Students will receive training in responsible conduct of research, and will learn and foster principles of ethical and professional conduct.
- Students will learn to use scientific rigor when designing experiments, collecting and analyzing data, interpreting and reporting results.
- Students will be trained in the ethics of publishing.
- Students will know and adhere to laws, regulations, occupational health and safety standards.

## ADDITIONAL LEARNING GOALS

### CAREER PREPARATION

- Students will be provided with diverse training that will prepare them for a range of flexible and sustainable careers (e.g., academia, industry, government, science policy and administration, science commerce, science writing, law, and science education and outreach at all levels).
- Students will develop broadly applicable skills in critical thinking and problem solving.
- Students will have opportunities to develop skills in leadership, project management, teamwork, and communication and to develop collaborations with nonacademic partners.

## PEOPLE

**Faculty:** Professor Mary Halloran (director). For a comprehensive faculty list, visit the program website (<http://ntp.neuroscience.wisc.edu/faculty-research.htm>).

## PHYSIOLOGY, DOCTORAL MINOR

## PHYSIOLOGY, M.S.

**Administrative Unit:** Basic Research, Biotechnology and Graduate Studies

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The physiology graduate training program is interdisciplinary in its approach to scientific research, reflecting the breadth of the discipline of physiology. Powerful new tools in modern biology make it possible to link the cellular and molecular with integrative levels in physiological systems, the cardiovascular, respiratory, renal, endocrine, neurophysiological, gastrointestinal, musculoskeletal, and metabolic systems. The program provides doctoral training in mechanistic studies that use these new tools to study the functions of molecules, cells, tissues, and organ systems in preparation for careers in biomedical research, biotechnology, and academic teaching. Students learn through lecture courses, seminar courses, seminars by speakers from campus and from other institutions, journal clubs and, most important, from their research mentors. Students are encouraged to interact with other training programs and research centers to broaden their knowledge

and experience. Gaining expertise in public speaking is an important component of the program.

## FUNDING

Financial aid is provided to all students, usually in the form of grant-supported research assistantships, institutional fellowships, teaching assistantships, or advanced opportunity fellowships for minority or disadvantaged students. Students are encouraged to contact individual professors in their areas of interest to determine whether support is available for working in that lab.

## REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

## MASTER'S DEGREES

M.S.

## MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

## MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half (16 credits of the required 30) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Courses taken that fulfill the equivalent requirements may be considered to exempt a class:

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 Fundamentals of Human Physiology may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 Cellular and Molecular Neuroscience may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Courses taken that fulfill the equivalent requirements may be considered to exempt a class:

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Courses taken that fulfill the equivalent requirements may be considered to exempt a class:

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 30 credits for the degree.

## CREDITS PER TERM ALLOWED

12 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Physiology core curriculum includes:

| Code                         | Title                                                     | Credits |
|------------------------------|-----------------------------------------------------------|---------|
| PHYSIOL 435                  | Fundamentals of Human Physiology (or equivalent)          | 5       |
| STAT/F&W ECOL/<br>HORT 571   | Statistical Methods for Bioscience I                      | 4       |
| or ONCOLOGY 675              | Advanced or Special Topics in Cancer Research             |         |
| NTP/PHMCOL-M/<br>PHYSIOL 610 | Cellular and Molecular Neuroscience                       | 4       |
| NTP/PHYSIOL 700              | Professional Development for Biomedical Graduate Students | 1       |
| PHYSIOL 901                  | Seminar                                                   | 1       |

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a

graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 507)

## LEARNING OUTCOMES

## KNOWLEDGE AND SKILLS

- Students will be able to teach physiology, engaging audiences and helping them to learn.
- Students will demonstrate a didactic knowledge of physiology.
- Students will be able to describe past science, propose future experiments, and defend their ideas to peers in a proposal format.
- Students will be able to write for a proper audience, revising and responding to reviewers as appropriate.
- Students will be able to verbally communicate their science and do so in a clear manner for a variety of audiences.

## PROFESSIONAL CONDUCT

- Students will understand that science and research is based on trust —trust between scientists and colleagues, trust between scientists and policy makers, trust between scientists and advisory boards, and trust between scientists and society.

## PEOPLE

**Faculty:** See faculty list (<http://pgtp.wisc.edu/faculty>) on the program website.

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 Fundamentals of Human Physiology may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 Cellular and Molecular Neuroscience may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Courses taken that fulfill the equivalent requirements may be considered to exempt a class:

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

Courses taken that fulfill the equivalent requirements may be considered to exempt a class:

If demonstrated didactic knowledge of physiology, then PHYSIOL 435 may be exempted.

If considerable background in neuroscience, then NTP/PHMCOL-M/PHYSIOL 610 may be exempted.

Statistics courses may be considered by the student's advisory committee for exemption; however, students are still strongly encouraged to participate.

These exemptions do not waive a student from any credits, merely from taking the courses. The student will still need to accumulate 51 credits for the degree.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Physiology core curriculum includes:

| Code                         | Title                                                     | Credits |
|------------------------------|-----------------------------------------------------------|---------|
| PHYSIOL 435                  | Fundamentals of Human Physiology (or equivalent)          | 5       |
| STAT/F&W ECOL/<br>HORT 571   | Statistical Methods for Bioscience I                      | 4       |
| or ONCOLOGY 675              | Advanced or Special Topics in Cancer Research             |         |
| NTP/PHMCOL-M/<br>PHYSIOL 610 | Cellular and Molecular Neuroscience                       | 4       |
| NTP/PHYSIOL 700              | Professional Development for Biomedical Graduate Students | 1       |
| PHYSIOL 901                  | Seminar                                                   | 1       |

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Given the interdisciplinary nature of physiology, students from a variety of undergraduate backgrounds qualify for admission to the program. Entering students generally have degrees in biology, chemistry, physics or engineering, and have usually taken courses in biology, biochemistry, chemistry, mathematics, and physics. Students may be admitted to the program without having completed one or more of these courses but will be required to take them in their first year of graduate school. In addition to the online application, applicants for admission should submit official transcripts from each previous undergraduate and postgraduate institution; three letters of recommendation; a one-page personal statement describing research experience and personal goals, and indicating faculty with research activities of interest to the student. Graduate Record Exam (GRE) scores are requested from all students. International students should also send scores of the Test of English as a Foreign Language (TOEFL), or International English Language Testing System (IELTS).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be able to teach physiology, engaging audiences and helping them to learn.
- Students will demonstrate a didactic knowledge of physiology.
- Students will be able to describe past science, propose future experiments, and defend their ideas to peers in a proposal format.
- Students will be able to write for a proper audience, revising and responding to reviewers as appropriate.
- Students will be able to verbally communicate their science and do so in a clear manner for a variety of audiences.

### PROFESSIONAL CONDUCT

- Students will understand that science and research is based on trust –trust between scientists and colleagues, trust between scientists

and policy makers, trust between scientists and advisory boards, and trust between scientists and society.

## PEOPLE

**Faculty:** See faculty list (<http://pgtp.wisc.edu/faculty>) on the program website.

## MOLECULAR AND CELLULAR PHARMACOLOGY

**Administrative Unit:** Molecular and Cellular Pharmacology Graduate Training Program

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The molecular and cellular pharmacology (MCP) program, in cooperation with the Center for Training in Pharmacology and Drug Development (CTPDD), offers interdisciplinary graduate training in the field of molecular and cellular pharmacology. The primary emphasis is doctoral training in molecular biology, biochemistry, genetics, and cell biology with a focus on integrating these methodologies with modern pharmacology. Other related degree programs under the direction of program faculty are cellular and molecular biology, environmental toxicology, neuroscience, biomolecular chemistry, and genetics.

The MCP program emphasizes study of the basic molecular and cellular mechanisms involved in the regulation of cellular events and cellular signal transduction mechanisms and the interaction of hormones, drugs, and chemicals with living systems. The faculty provides expertise in such challenging areas as the molecular events related to neurotransmitter receptor G-protein effector signaling; molecular structure of neurotransmitter receptors; genetic approaches to mechanisms for elucidating synaptic transmission; molecular mechanisms of action drugs of abuse and neurotransmitter transporters; phosphoinositide-generated second messengers and their regulation of membrane protein function and cell growth; regulation of tissue-specific gene transcription; molecular mechanisms of erythropoiesis; molecular mechanisms of leukemogenesis; regulation of hormone and neurotransmitter release; mechanism of action of polypeptide hormones; peptide-hormone receptors; control of steroid synthesis; induction of drug-metabolizing enzymes; chemical initiation and prevention of cancer; mechanisms and regulation of antibiotic action and resistance. Aside from providing insight into drug action, studies in pharmacology have led to important advances in our understanding of fundamental biological processes.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Molecular and Cellular Pharmacology, Ph.D. (p. 508)

## PEOPLE

**Faculty:** Professors Anderson, Auger, Beebe, Bement, Bresnick, Chapman, Cryns, Czajkowski, Denu, Greenspan, Hardin, Hayney, Huttenlocher,

Jackson, Jefcoate, Johnson, Kalejta, Kamp, Keck, Keely, Kimble, Kolesar, Kwon, Li, Martin, Miyamoto, Mosher, Murphy, Raines, Rapraeger, Schuler, Sheibani, Svaren, Thomson, Tibbetts, Wassarman, Xu, Yang, Zhang, Zhao; Associate Professors Audhya (director), Balijepalli, Burkard, Buxton, Chanda, Chang, Ge, Hornberger, Jorgensen, Kuo, Kalejta, Lee, Masters, Pagliarini, Roopra, Striker, Tang, Weaver, Wheeler, Xing; Assistant Professors, Blum, Collier, Jiang, Johannsen, M. Kimple, R. Kimple, Kreeger, Lamming, Lou, Rui, Saha, Sherer, Sridharan

## MOLECULAR AND CELLULAR PHARMACOLOGY, PH.D.

The molecular and cellular pharmacology (MCP) program, in cooperation with the Center for Training in Pharmacology and Drug Development (CTPDD), offers interdisciplinary graduate training in the field of molecular and cellular pharmacology. The primary emphasis is doctoral training in molecular biology, biochemistry, genetics, and cell biology with a focus on integrating these methodologies with modern pharmacology. Other related degree programs under the direction of program faculty are cellular and molecular biology, environmental toxicology, neuroscience, biomolecular chemistry, and genetics.

The MCP program emphasizes study of the basic molecular and cellular mechanisms involved in the regulation of cellular events and cellular signal transduction mechanisms and the interaction of hormones, drugs, and chemicals with living systems. The faculty provides expertise in such challenging areas as the molecular events related to neurotransmitter receptor G-protein effector signaling; molecular structure of neurotransmitter receptors; genetic approaches to mechanisms for elucidating synaptic transmission; molecular mechanisms of action drugs of abuse and neurotransmitter transporters; phosphoinositide-generated second messengers and their regulation of membrane protein function and cell growth; regulation of tissue-specific gene transcription; molecular mechanisms of erythropoiesis; molecular mechanisms of leukemogenesis; regulation of hormone and neurotransmitter release; mechanism of action of polypeptide hormones; peptide-hormone receptors; control of steroid synthesis; induction of drug-metabolizing enzymes; chemical initiation and prevention of cancer; mechanisms and regulation of antibiotic action and resistance. Aside from providing insight into drug action, studies in pharmacology have led to important advances in our understanding of fundamental biological processes.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

**DOCTORAL DEGREES****MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

51 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

32 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

Half of the degree coursework (26 of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

With program approval, students are allowed to count no more than 7 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE**

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

**PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL**

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**CREDITS PER TERM ALLOWED**

15 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Contact the program for information on any additional required courses.

**DOCTORAL MINOR/BREADTH REQUIREMENTS**

Doctoral students are not required to complete a minor, but may do so if they wish.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result

in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

**ASSESSMENT AND EXAMINATIONS**

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**LANGUAGE REQUIREMENTS**

Contact the program for information on any language requirements.

**ADMISSIONS**

The Graduate School sets minimum requirements for admissions (<https://grad.wisc.edu/admissions/requirements>). Academic program admission requirements are often more rigorous than those set by the Graduate School. Please check the program website for details.

**LEARNING OUTCOMES****KNOWLEDGE AND SKILLS**

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
- Creates research, scholarship, or performance that makes a substantive contribution.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.
- Communicates complex ideas in a clear and understandable manner.

## PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Anderson, Auger, Beebe, Bement, Bresnick, Chapman, Cryns, Czajkowski, Denu, Greenspan, Hardin, Hayney, Huttenlocher, Jackson, Jefcoate, Johnson, Kalejta, Kamp, Keck, Keely, Kimble, Kolesar, Kwon, Li, Martin, Miyamoto, Mosher, Murphy, Raines, Rapraeger, Schuler, Sheibani, Svaren, Thomson, Tibbetts, Wassarman, Xu, Yang, Zhang, Zhao; Associate Professors Audhya (director), Balijepalli, Burkard, Buxton, Chanda, Chang, Ge, Hornberger, Jorgensen, Kuo, Kalejta, Lee, Masters, Pagliarini, Roopra, Striker, Tang, Weaver, Wheeler, Xing; Assistant Professors, Blum, Collier, Jiang, Johannsen, M. Kimple, R. Kimple, Kreeger, Lamming, Lou, Rui, Saha, Sherer, Sridharan

## MEAD WITTER SCHOOL OF MUSIC

**Administrative Unit:** Mead Witter School of Music

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., M.M., DMA, Ph.D.

**Degrees Offered:** M.A. in Music; M.M. in Music: Education; M.M. in Music: Performance; DMA in Music: Performance; Ph.D. in Music

**Minors and Certificates:** Doctoral Minor in Music

**Specializations:** Music History, Ethnomusicology, and Music Theory

The mission of the Mead Witter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

## DEGREES AND MAJORS

The master of music is offered in music: performance with concentrations in brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings; string development; guitar; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The master of music is also offered in music: education. This degree is appropriate for those who wish to emphasize music content. Those who wish to explore music education within the context of education at large should consider the curriculum and instruction M.S. program in the School of Education.

The master of arts in music is offered with concentrations in ethnomusicology, music history, and music theory.

A double master's degree with the School of Library and Information Studies is also offered.

The DMA (doctor of musical arts) and the Ph.D. are the highest degrees conferred by the Mead Witter School of Music. The DMA is granted

for evidence of general proficiency and distinctive attainment in a specialized field of performance. The student's ability in independent investigation is demonstrated through a series of recitals and in a final project presenting original research or creative scholarship.

The DMA in music: performance is offered with concentrations in: brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings (includes guitar); string development; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The Ph.D. in music, a research degree, is offered in the areas of ethnomusicology, historical musicology, and music theory.

Master's degrees require a minimum of 30 credits; Ph.D. and DMA degrees require significant work beyond the master's degree, including the extensive independent work described above. Each degree track varies slightly and may impose additional requirements. Contact the Mead Witter School of Music graduate office for complete explanations of the degrees offered at the master's or doctoral levels: gradadmissions@music.wisc.edu

## FACILITIES

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Mead Witter School of Music organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community.

The Mosse Humanities Building, built in 1969, houses most of the music classrooms, rehearsal rooms, faculty studios, and 111 practice rooms. Most recitals and concerts take place in one of three performance spaces: Mills Concert Hall, Morphy Recital Hall, and Eastman Organ Recital Hall. The school's extensive collection of instruments, both common and unusual, is available to both faculty and students. Music Hall with its clock tower, built in 1879, is a campus landmark. Renovated in 1985, it is the home of the opera program. The new Hamel Music Center is scheduled for opening in Fall, 2018 and will include a concert hall, a recital hall, and a large ensemble rehearsal space.

Memorial Library is the home of the Mills Music Library, which offers extensive research and circulating collections, attractive study space, and personal staff assistance with research. Music materials on campus number over half a million, ranging from scores and sheet music to archival collections and historic audio recordings. Through Mills Music Library and other UW–Madison libraries, students have access to a wide range of online research databases as well as millions of articles, books, and streaming media. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams–Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

The Mead Witter School of Music is a member of the National Association of Schools of Music (NASM), the national accreditation body for schools of music, and was reaccredited in 2014.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Music, Doctoral Minor (p. 511)

- Music, M.A. (p. 511)
- Music, Ph.D. (p. 513)
- Music: Education, M.M. (p. 516)
- Music: Performance, DMA (p. 519)
- Music: Performance, M.M. (p. 521)

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC, DOCTORAL MINOR

### REQUIREMENTS

The music Ph.D. and music: performance DMA programs in the Mead Witter School of Music require a minor field of study. Doctoral minors provide students with the opportunity to broaden their course of graduate study. Students, in consultation with their major professor and the director of graduate studies, may choose among internal minor options within the school, minors in other fields, or even a self-designed minor. Most minors require 9–12 credits of graduate-level work. Some restrictions apply to combinations of certain minor and major programs. For details of the specific course work involved and options available, contact the Mead Witter School of Music graduate office.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC, M.A.

The mission of the Mead Witter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

## DEGREES AND MAJORS

The master of music is offered in music: performance with concentrations in brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings; string development; guitar; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The master of music is also offered in music: education. This degree is appropriate for those who wish to emphasize music content. Those who wish to explore music education within the context of education at large should consider the curriculum and instruction M.S. program in the School of Education.

The master of arts in music is offered with concentrations in ethnomusicology, music history, and music theory.

A double master's degree with the School of Library and Information Studies is also offered.

The DMA (doctor of musical arts) and the Ph.D. are the highest degrees conferred by the Mead Witter School of Music. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams–Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

The Mead Witter School of Music is a member of the National Association of Schools of Music (NASM), the national accreditation body for schools of music, and was reaccredited in 2014.

## FUNDING

Through the generosity of Paul J. Collins, the Mead Witter School of Music is the recipient of a substantial fellowship fund which, in combination with the Graduate School and University Foundation, allows the school to offer multiple-year funding to the highest quality graduate students in performance. The Collins fellowships, along with The Lorna Wendt and Anonymous Fund Fellowships for Choral and Voice students are offered as Wisconsin Distinguished Fellowships and provide full tuition and fees, a generous stipend, additional funds, and comprehensive health care. Nomination by a performance faculty member—usually following an on-site audition—is required for consideration.

The Mead Witter School of Music also offers teaching and project assistantships in music history, music theory, piano, conducting, voice, and other performance areas. These positions offer tuition remission plus a salary and health care benefits. In addition, the Mead Witter School of Music selects qualified applicants for the Chancellor's Fellowship, University Fellowship, and Advanced Opportunity Fellowship. The UW–Madison Office of Student Financial Services assists students in obtaining general grants and loans. All Mead Witter School of Music students who receive funding are required to enroll full-time with 8–12 graduate credits.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., with available tracks in ethnomusicology, historical musicology, and music theory

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the coursework (15 out of the minimum of 30 total credits) in each program must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Each track of study has different course requirements. Students must consult with their advisor in their first semester to determine expected course of study.

### OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative grade point average (GPA) of 3.25.

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework.

### PROBATION POLICY

M.A. students who fail to make satisfactory progress in any of the four following areas: grades, course load, time constraints, or exams, will be notified in writing by the DGS. At the end of the second semester of failing to make satisfactory progress the student is placed on probation effective the next semester. This action suspends financial aid (but does not affect loans or work-study). For details see Satisfactory Progress for Master's Students (<http://uwsom.wpengine.com/wp-content/uploads/2014/05/MastersSatisfactoryProgress.pdf>).

### ADVISOR / COMMITTEE

M.A. students have one advisor and two committees. The advisor is their principal faculty mentor. The two committees are:

1. thesis committee

- exam committee.

For more details see the School of Music Graduate Handbook (<http://www.music.wisc.edu/wp-content/uploads/2014/05/SOM-Graduate-Handbook-Booklet.pdf>).

## ASSESSMENTS AND EXAMINATIONS

All M.A. tracks require a formal master's thesis.

## TIME CONSTRAINTS

The following time limits apply to the master's degrees in the School of Music. Exceptions to the following can be made only upon recommendation of the graduate committee and approval of the DGS (director of graduate studies):

- All M.M. and M.A. students with university funding (TA, PA, fellowship, etc.) must complete all requirements for the master's degree within four semesters (not counting summer sessions or M.A. thesis credits), or six semesters if the funding appointment is more than 33.33%.
- Part-time and unfunded M.M. and M.A. students who have not completed the degree in seven years should submit a letter of intent and statement of progress to the DGS (director of graduate studies). The letter should include a statement of intent to complete the degree, factors that have impeded progress, what work they need to complete to finish the degree, as well as how and when they intend to complete the degree.

## LANGUAGE REQUIREMENTS

M.A.: historical musicology track: intermediate German reading

M.A.: ethnomusicology track: intermediate filed language or French or German

M.A.—theory track: no requirement

## ADMISSIONS

### ADMISSION TO THE MASTER OF MUSIC AND MASTER OF ARTS PROGRAMS

Minimum admission requirements of the Graduate School apply to all applicants for graduate study in music. The Mead Witter School of Music has additional requirements. Applicants should have a bachelor's degree in music or equivalent foundational course work as required by each area of study. An undergraduate GPA of 3.0 (on a 4.0 scale, calculated on the last 60 credit hours) is necessary for full admission. M.M. applicants in music education should have an undergraduate degree in music education and at least two years of music teaching experience—interested students are encouraged to contact the music education faculty prior to application. M.A. applicants are required to submit Graduate Record Exam (GRE) scores and samples of research and writing. Both the M.A. and the M.M. programs involve substantial academic work and require excellent reading, writing, and speaking skills. Therefore, all international students are required to submit a TOEFL score. See the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>) for information on minimum score requirements. The Mead Witter School of Music does **not** waive the TOEFL score requirement for students who have completed a degree at an American university. Typically, performance applicants are required to audition in person. For details on specific

audition requirements and additional application materials, visit the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- articulates and critiques the theories, research methods, and approaches to inquiry in music-related scholarship.
- identifies and employs a variety of sources and analytical approaches to inform discussion of topics in music.
- demonstrates knowledge of musical study in historical and cultural contexts.
- selects appropriate methodologies for research and discussion of musical topics.
- rationally evaluates and synthesizes information from both primary sources and secondary scholarship, posing original questions and offering fresh insight into musical topics.
- communicates clearly, both verbally and in writing, to colleagues in the field.

### PROFESSIONAL CONDUCT

- recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC, PH.D.

The mission of the Wead Mitter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

## DEGREES AND MAJORS

The master of music is offered in music: performance with concentrations in brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings; string development; guitar; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The master of music is also offered in music: education. This degree is appropriate for those who wish to emphasize music content. Those

who wish to explore music education within the context of education at large should consider the curriculum and instruction M.S. program in the School of Education.

The master of arts in music is offered with concentrations in ethnomusicology, music history, and music theory.

A double master's degree with the School of Library and Information Studies is also offered.

The DMA (doctor of musical arts) and the Ph.D. are the highest degrees conferred by the Mead Witter School of Music. The DMA is granted for evidence of general proficiency and distinctive attainment in a specialized field of performance. The student's ability in independent investigation is demonstrated through a series of recitals and in a final project presenting original research or creative scholarship.

The DMA in music: performance is offered with concentrations in: brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings (includes guitar); string development; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The Ph.D. in music, a research degree, is offered in the areas of ethnomusicology, historical musicology, and music theory.

Master's degrees require a minimum of 30 credits; Ph.D. and DMA degrees require significant work beyond the master's degree, including the extensive independent work described above. Each degree track varies slightly and may impose additional requirements. Contact the Mead Witter School of Music graduate office for complete explanations of the degrees offered at the master's or doctoral levels: [gradadmissions@music.wisc.edu](mailto:gradadmissions@music.wisc.edu)

## FACILITIES

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Mead Witter School of Music organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community.

The Mosse Humanities Building, built in 1969, houses most of the music classrooms, rehearsal rooms, faculty studios, and 111 practice rooms. Most recitals and concerts take place in one of three performance spaces: Mills Concert Hall, Morphy Recital Hall, and Eastman Organ Recital Hall. The school's extensive collection of instruments, both common and unusual, is available to both faculty and students. Music Hall with its clock tower, built in 1879, is a campus landmark. Renovated in 1985, it is the home of the opera program. The new Hamel Music Center is scheduled for opening in Fall, 2018 and will include a concert hall, a recital hall, and a large ensemble rehearsal space.

Memorial Library is the home of the Mills Music Library, which offers extensive research and circulating collections, attractive study space, and personal staff assistance with research. Music materials on campus number over half a million, ranging from scores and sheet music to archival collections and historic audio recordings. Through Mills Music Library and other UW–Madison libraries, students have access to a wide range of online research databases as well as millions of articles, books, and streaming media. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams–Witmark Collection, a treasury

of early American musical theater materials, and the Wisconsin Music Archives.

The Mead Witter School of Music is a member of the National Association of Schools of Music (NASM), the national accreditation body for schools of music, and was reaccredited in 2014.

## FUNDING

Through the generosity of Paul J. Collins, the Mead Witter School of Music is the recipient of a substantial fellowship fund which, in combination with the Graduate School and University Foundation, allows the school to offer multiple-year funding to the highest quality graduate students in performance. The Collins fellowships, along with The Lorna Wendt and Anonymous Fund Fellowships for Choral and Voice students are offered as Wisconsin Distinguished Fellowships and provide full tuition and fees, a generous stipend, additional funds, and comprehensive health care. Nomination by a performance faculty member—usually following an on-site audition—is required for consideration.

The Mead Witter School of Music also offers teaching and project assistantships in music history, music theory, piano, conducting, voice, and other performance areas. These positions offer tuition remission plus a salary and health care benefits. In addition, the Mead Witter School of Music selects qualified applicants for the Chancellor's Fellowship, University Fellowship, and Advanced Opportunity Fellowship. The UW–Madison Office of Student Financial Services assists students in obtaining general grants and loans. All Mead Witter School of Music students who receive funding are required to enroll full-time with 8–12 graduate credits.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., with available tracks in ethnomusicology, historical musicology, and music theory

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

Ph.D.—ethnomusicology track: 72 credits

Ph.D.—historical musicology track: 69 credits

Ph.D.—music theory track: 63 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified

and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to up to 30 credits of graduate coursework from other institutions in the form of a master's degree or the equivalent. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Each track of study has different course requirements. Students must consult with their advisor in their first semester to determine expected course of study.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor consisting of at least 9 credits (most are 12 credits).

## OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative grade point average (GPA) of 3.25.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework.

## PROBATION POLICY

Ph.D. students who fail to make satisfactory progress in any of the following four areas: grades, course load, time constraints, or exams, will be notified in writing by the DGS. At the end of the second semester of failing to make satisfactory progress the student is placed on probation effective the next semester. This action suspends financial aid (but does not affect loans or work-study). For details see Satisfactory Progress for Doctoral Students (<http://uwsom.wpengine.com/wp-content/uploads/2014/05/DoctoralSatisfactoryProgressDocument.pdf>).

## ADVISOR / COMMITTEE

Ph.D. students have one advisor and two committees. The advisor is their principal faculty mentor. The two committees are:

1. preliminary exam committee
2. dissertation committee.

For more details see the School of Music Graduate Handbook (<http://www.music.wisc.edu/wp-content/uploads/2014/05/SOM-Graduate-Handbook-Booklet.pdf>).

## ASSESSMENTS AND EXAMINATIONS

All Ph.D. students are required to take preliminary written and oral exams after all coursework (except for research or dissertation credit) has been completed.

## TIME CONSTRAINTS

DMA and Ph.D. students in the School of Music are allowed a maximum of four calendar years from the date of enrollment in the program to complete all coursework requirements and successfully pass preliminary examinations. A student not completing the course requirements (apart from the dissertation or project requirements) by the end of the fourth year will be placed on probation for the following 12 months. During this period, the student will not be eligible for financial aid. A student who fails to complete the coursework requirements and pass preliminary examinations during the 12-month probation period may be withdrawn from the program. The Doctoral Research Project Committee (DPRC) or Ph.D. dissertation committee may grant up to a one-semester extension to the above guidelines. Exceptions beyond that can be made only upon recommendation of the graduate committee and approval of the DGS (director of graduate studies).

## LANGUAGE REQUIREMENTS

Ph.D.–ethnomusicology track: Intermediate-level reading proficiency is required in two research-related languages, one of which must be French or German. The second language may be French or German, or may be a field language.

Ph.D.–historical musicology track: Intermediate-level reading proficiency is required in two languages, one of which must be German. The second language may be French, Italian, or any other language central to the proposed doctoral research.

## ADMISSIONS

### ADMISSION TO THE DMA AND PH.D. PROGRAMS

Minimum admission requirements of the Graduate School apply to all applicants for graduate study in music. The Mead Witter School of Music has additional requirements. Applicants should have a master's degree in music or equivalent foundational course work as required by each area of study. A cumulative GPA of 3.0 (on a 4.0 scale, calculated on the last 60 credit hours) is necessary for full admission. Admission to the DMA program assumes a high level of performance ability determined by audition. Composition applicants must have completed a master's degree or equivalent in composition. Both the DMA and the Ph.D. programs involve substantial academic work and require excellent reading, writing, and speaking skills. Therefore, all international students are required to submit a TOEFL score. See the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>) for information on minimum score requirements. The Mead Witter School of Music does **not** waive the TOEFL score requirement for students who have completed a degree at an American university. All Ph.D. applicants and DMA piano applicants must submit a scholarly paper as part of the application. Ph.D. students are expected to submit Graduate Record Exam (GRE) scores. Typically, performance applicants are required to audition in person. For details on specific audition requirements and additional application materials, visit the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- articulates research problems, potentials and limits with respect to theory and cultural understanding of music.
- formulates ideas and concepts beyond the current boundaries of knowledge in the field of music study.
- demonstrates breadth within the learning experiences in an area of study outside the principal field of inquiry.
- accomplishes research that makes a substantive contribution to the field.
- creates well-written monographs based upon original research that make substantive contributions to the field.
- communicates complex ideas in a clear and understandable manner, both verbally and in writing.

### PROFESSIONAL CONDUCT

- fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC: EDUCATION, M.M.

The mission of the Wead Mitter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

The UW–Madison Office of Student Financial Services assists students in obtaining general grants and loans. All Mead Witter School of Music students who receive funding are required to enroll full-time with 8–12 graduate credits.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.M.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the coursework (15 out of the minimum 30 total credits) in each program must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Each track of study (e.g., cello, brass, etc.) has different course requirements. Students must consult with their advisor in their first semester to determine expected course of study.

## OVERALL GRADUATE GPA REQUIREMENT

M.M. students must maintain a cumulative grade point average (GPA) of 3.25

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework.

## PROBATION POLICY

M.M. students who fail to make satisfactory progress in any of the four following areas: grades, course load, time constraints, or exams, will be notified in writing by the DGS. At the end of the second semester of failing to make satisfactory progress the student is placed on probation effective the next semester. This action suspends financial aid (but does not affect loans or work-study). See details at the Satisfactory Progress for Masters Students (<http://uwsom.wpengin.com/wp-content/uploads/2014/05/MastersSatisfactoryProgress.pdf>).

## ADVISOR / COMMITTEE

M.M. students have two advisors and two committees. One advisor is the DGS the other is their performance instructor or major professor. The two committees are:

1. recital committee
2. exam committee.

For more details see the School of Music Graduate Handbook (<http://www.music.wisc.edu/wp-content/uploads/2014/05/SOM-Graduate-Handbook-Booklet.pdf>).

## ASSESSMENTS AND EXAMINATIONS

M.M. in music education students turn in a final project. All M.M. programs require a comprehensive exam during the final semester.

## TIME CONSTRAINTS

The following time limits apply to master's degrees in the School of Music. Exceptions can be made only upon recommendation of the graduate committee and approval of the DGS (director of graduate studies):

1. All M.M. and M.A. students with university funding (TA, PA, fellowship, etc.) must complete all requirements for the master's degree within four semesters (not counting summer sessions or M.A. thesis credits), or six semesters if the funding appointment is more than 33.33%.
2. Part-time and unfunded M.M. and M.A. students who have not completed the degree in seven years should submit a letter of intent and statement of progress to the DGS (director of graduate studies). The letter should include a statement of intent to complete the degree, factors that have impeded progress, what work they need to complete to finish the degree, as well as how and when they intend to complete the degree.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

### ADMISSION TO THE MASTER OF MUSIC AND MASTER OF ARTS PROGRAMS

Minimum admission requirements of the Graduate School apply to all applicants for graduate study in music. The Mead Witter School of Music has additional requirements. Applicants should have a bachelor's degree in music or equivalent foundational course work as required by each area of study. An undergraduate GPA of 3.0 (on a 4.0 scale, calculated on the last 60 credit hours) is necessary for full admission. M.M. applicants in music education should have an undergraduate degree in music education and at least two years of music teaching experience—interested students are encouraged to contact the music education faculty prior to application. M.A. applicants are required to submit Graduate Record Exam (GRE) scores and samples of research and writing. Both the M.A. and the M.M. programs involve substantial academic work and require excellent reading, writing, and speaking skills. Therefore, all international students are required to submit a TOEFL score. See the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>) for information on minimum score requirements. The Mead Witter School of Music does **not** waive the TOEFL score requirement for students who have completed a degree at an American university. Typically, performance applicants are required to audition in person. For details on specific audition requirements and additional application materials, visit the School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- communicates clearly in multiple modes, including written and verbal, a well-developed foundational understanding, scholarly and practically, of the field of music education as it currently exists.
- demonstrates understanding of music education from multiple perspectives, including but not limited to social, cultural, historical and musical perspectives.
- draws upon extensive understandings of music learning and teaching as socially situated and constructed in multiple ways, honoring human difference as a rich source of information and demonstrates this in coursework and final projects.

### PROFESSIONAL CONDUCT

- understands and applies principles of ethical and professional conduct.
- respects colleagues and values contributions of others in both individual and collaborative endeavors.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler,

Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC: PERFORMANCE, DMA

The mission of the Mead Witter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

## DEGREES AND MAJORS

The master of music is offered in music: performance with concentrations in brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings; string development; guitar; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The master of music is also offered in music: education. This degree is appropriate for those who wish to emphasize music content. Those who wish to explore music education within the context of education at large should consider the curriculum and instruction M.S. program in the School of Education.

The master of arts in music is offered with concentrations in ethnomusicology, music history, and music theory.

A double master's degree with the School of Library and Information Studies is also offered.

The DMA (doctor of musical arts) and the Ph.D. are the highest degrees conferred by the Mead Witter School of Music. The DMA is granted for evidence of general proficiency and distinctive attainment in a specialized field of performance. The student's ability in independent investigation is demonstrated through a series of recitals and in a final project presenting original research or creative scholarship.

The DMA in music: performance is offered with concentrations in: brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings (includes guitar); string development; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The Ph.D. in music, a research degree, is offered in the areas of ethnomusicology, historical musicology, and music theory.

Master's degrees require a minimum of 30 credits; Ph.D. and DMA degrees require significant work beyond the master's degree, including the extensive independent work described above. Each degree track varies slightly and may impose additional requirements. Contact the Mead Witter School of Music graduate office for complete explanations of the degrees offered at the master's or doctoral levels: [gradadmissions@music.wisc.edu](mailto:gradadmissions@music.wisc.edu)

## FUNDING

All doctoral students are required to complete a minor consisting of at least 9 credits (most are 12 credits).

## OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative grade point average (GPA) of 3.25.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework.

## PROBATION POLICY

DMA Students who fail to make satisfactory progress in any of the following four areas: Grades, Course Load, Time Constraints, or Exams will be notified in writing by the DGS. At the end of the second semester of failing to make satisfactory progress the student is placed on Probation effective the next semester. This action suspends financial aid (but does not affect loans or work-study). See details in the Satisfactory Progress for Doctoral Students (<http://uwsom.wpengine.com/wp-content/uploads/2014/05/DoctoralSatisfactoryProgressDocument.pdf>).

## ADVISOR / COMMITTEE

DMA students have two advisors and two committees. One advisor is the DGS the other is their performance instructor. The two committees are:

1. doctoral performance and research committee

2. a preliminary exam committee.

For more details see the School of Music Graduate Handbook (<http://www.music.wisc.edu/wp-content/uploads/2014/05/SOM-Graduate-Handbook-Booklet.pdf>).

## ASSESSMENTS AND EXAMINATIONS

All DMA programs require five to six recitals at 1 credit each and require preliminary written and oral exams after all coursework (apart from dissertation/project credit) is completed.

## TIME CONSTRAINTS

DMA and Ph.D. students in the School of Music are allowed a maximum of four calendar years from the date of enrollment in the program to complete all coursework requirements and successfully pass preliminary examinations. A student not completing the course requirements (apart from the dissertation or project requirements) by the end of the fourth year will be placed on probation for the following 12 months. During this period, the student will not be eligible for financial aid. A student who fails to complete the coursework requirements and pass preliminary examinations during the 12-month probation period may be withdrawn from the program. The Doctoral Research Project Committee (DPRC) or Ph.D. dissertation Committee may grant up to a one semester extension to the above guidelines. Exceptions beyond that can be made only upon recommendation of the graduate committee and approval of the DGS (director of graduate studies).

## LANGUAGE REQUIREMENTS

DMA: all tracks require intermediate-level reading proficiency in one foreign language, usually French or German. DMA in voice performance requires proficiency in German, French and Italian. See individual programs for details.

## ADMISSIONS

Minimum admission requirements of the Graduate School apply to all applicants for graduate study in music. The Mead Witter School of Music has additional requirements. Applicants should have a master's degree in music or equivalent foundational course work as required by each area of study. A cumulative GPA of 3.0 (on a 4.0 scale, calculated on the last 60 credit hours) is necessary for full admission. Admission to the DMA program assumes a high level of performance ability determined by audition. Composition applicants must have completed a master's degree or equivalent in composition. Both the DMA and the Ph.D. programs involve substantial academic work and require excellent reading, writing, and speaking skills. Therefore, all international students are required to submit a TOEFL score. See the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>) for information on minimum score requirements. The Mead Witter School of Music does **not** waive the TOEFL score requirement for students who have completed a degree at an American university. All Ph.D. applicants and DMA piano applicants must submit a scholarly paper as part of the application. Ph.D. students are expected to submit Graduate Record Exam (GRE) scores. Typically, performance applicants are required to audition in person. For details on specific audition requirements and additional application materials, visit the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- produces public performances of cohesive programs of music in which original ideas are communicated clearly and energetically.
- creates compositions and/or performances that clearly reflect well-developed original musical ideas.
- applies deep knowledge of technique, style, and cultural contexts to performance or creation of music.
- effectively expresses ideas both verbally and in writing so as to foster understanding among colleagues.
- demonstrates breadth within learning experience in an area of study outside the principal field of performance or composition.

### PROFESSIONAL CONDUCT

- fosters ethical and professional conduct both in individual creative work and in collaborative endeavors.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## MUSIC: PERFORMANCE, M.M.

The mission of the Mead Witter School of Music is:

- to provide a rich, integrated program of undergraduate and graduate education that promotes the highest levels of professional, creative, and scholarly development while challenging students to achieve their greatest potential;
- to cultivate an environment that inspires creativity, stimulates intellectual curiosity, and fosters critical thinking; and
- to serve the university community, the public, and the profession through performance, composition, scholarship, music education, outreach, and engagement.

### DEGREES AND MAJORS

The master of music is offered in music: performance with concentrations in brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings; string development; guitar; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The master of music is also offered in music: education. This degree is appropriate for those who wish to emphasize music content. Those who wish to explore music education within the context of education at large should consider the curriculum and instruction M.S. program in the School of Education.

The master of arts in music is offered with concentrations in ethnomusicology, music history, and music theory.

A double master's degree with the School of Library and Information Studies is also offered.

The DMA (doctor of musical arts) and the Ph.D. are the highest degrees conferred by the Mead Witter School of Music. The DMA is granted for evidence of general proficiency and distinctive attainment in a specialized field of performance. The student's ability in independent investigation is demonstrated through a series of recitals and in a final project presenting original research or creative scholarship.

The DMA in music: performance is offered with concentrations in: brass; composition; percussion; piano performance; collaborative piano; piano performance and pedagogy; organ; strings (includes guitar); string development; voice; opera; woodwinds; multiple woodwinds; choral conducting; orchestral conducting; wind conducting.

The Ph.D. in music, a research degree, is offered in the areas of ethnomusicology, historical musicology, and music theory.

Master's degrees require a minimum of 30 credits; Ph.D. and DMA degrees require significant work beyond the master's degree, including the extensive independent work described above. Each degree track varies slightly and may impose additional requirements. Contact the Mead Witter School of Music graduate office for complete explanations of the degrees offered at the master's or doctoral levels: [gradadmissions@music.wisc.edu](mailto:gradadmissions@music.wisc.edu)

## FUNDING

Through the generosity of Paul J. Collins, the Mead Witter School of Music is the recipient of a substantial fellowship fund which, in combination with the Graduate School and University Foundation, allows the school to offer multiple-year funding to the highest quality graduate students in performance. The Collins fellowships, along with The Lorna Wendt and Anonymous Fund Fellowships for Choral and Voice students are offered as Wisconsin Distinguished Fellowships and provide full tuition and fees, a generous stipend, additional funds, and comprehensive health care. Nomination by a performance faculty member—usually following an on-site audition—is required for consideration.

The Mead Witter School of Music also offers teaching and project assistantships in music history, music theory, piano, conducting, voice, and other performance areas. These positions offer tuition remission plus a salary and health care benefits. In addition, the Mead Witter School of Music selects qualified applicants for the Chancellor's Fellowship, University Fellowship, and Advanced Opportunity Fellowship. The UW-Madison Office of Student Financial Services assists students in obtaining general grants and loans. All Mead Witter School of Music students who receive funding are required to enroll full-time with 8–12 graduate credits.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.M., with tracks in brass, choral conducting, collaborative piano, composition, guitar, multiple woodwinds, opera, orchestral conducting, organ, percussion, piano, piano pedagogy, string development, strings, vocal performance, wind conducting, and woodwinds

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

- Brass track: 30 credits
- Choral Conducting track: 32 credits
- Collaborative Piano track: 32 credits
- Composition track: 30 credits
- Guitar track: 30 credits
- Multiple Woodwinds track: 33 credits
- Music Education track: 31 credits
- Opera track: 30 credits
- Orchestral Conducting track: 30 credits
- Organ track: 33 credits
- Percussion track: 31 credits
- Piano Performance track: 32 credits
- Piano Performance and Pedagogy track: 34 credits
- String Development track: 31 credits
- String Performance track: 33 credits
- Vocal Performance track: 32 credits
- Wind Conducting track: 30 credits
- Woodwinds track: 30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the coursework (15 out of the minimum 30 total credits) in each program must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Each track of study (e.g., cello, brass, etc.) has different course requirements. Students must consult with their advisor in their first semester to determine expected course of study.

### OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative grade point average (GPA) of 3.25

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all coursework.

### PROBATION POLICY

M.M. students who fail to make satisfactory progress in any of the four following areas: grades, course load, time constraints, or exams, will be notified in writing by the DGS. At the end of the second semester of failing to make satisfactory progress the student is placed on probation effective the next semester. This action suspends financial aid (but does not affect loans or work-study). See details in the Satisfactory Progress for Master's Students (<http://uwsom.wpengine.com/wp-content/uploads/2014/05/MastersSatisfactoryProgress.pdf>).

### ADVISOR / COMMITTEE

M.M. students have two advisors and two committees. One advisor is the DGS the other is their performance instructor or major professor. The two committees are:

1. recital committee
2. exam committee.

For more details see the School of Music Graduate Handbook (<http://www.music.wisc.edu/wp-content/uploads/2014/05/SOM-Graduate-Handbook-Booklet.pdf>).

### ASSESSMENTS AND EXAMINATIONS

All M.M. programs (except M.M. in music education, M.M. in string development, and M.M. in composition) have a 4-credit recital requirement. M.M. students in composition turn in a thesis/project (composition). M.M. students in string development turn in a final project. All M.M. programs require a comprehensive exam during the final semester.

### TIME CONSTRAINTS

The following time limits apply to the master's degrees in the School of Music. Exceptions to the following can be made only upon

recommendation of the graduate committee and approval of the DGS (director of graduate studies):

1. All M.M. and M.A. students with university funding (TA, PA, fellowship, etc.) must complete all requirements for the master's degree within four semesters (not counting summer sessions or M.A. thesis credits), or six semesters if the funding appointment is more than 33.33%.
2. Part-time and unfunded M.M. and M.A. students who have not completed the degree in seven years should submit a letter of intent and statement of progress to the DGS (director of graduate studies). The letter should include a statement of intent to complete the degree, factors that have impeded progress, what work they need to complete to finish the degree, as well as how and when they intend to complete the degree.

## LANGUAGE REQUIREMENTS

M.M. voice track and M.M. opera track students must complete the equivalent of, or demonstrate proficiency equivalent to, one college-level **year** each of French, Italian, and German language study.

M.M. (all other tracks): no language requirements.

## ADMISSIONS

Minimum admission requirements of the Graduate School apply to all applicants for graduate study in music. The Mead Witter School of Music has additional requirements. Applicants should have a bachelor's degree in music or equivalent foundational course work as required by each area of study. An undergraduate GPA of 3.0 (on a 4.0 scale, calculated on the last 60 credit hours) is necessary for full admission. M.M. applicants in music education should have an undergraduate degree in music education and at least two years of music teaching experience—interested students are encouraged to contact the music education faculty prior to application. M.A. applicants are required to submit Graduate Record Exam (GRE) scores and samples of research and writing. Both the M.A. and the M.M. programs involve substantial academic work and require excellent reading, writing, and speaking skills. Therefore, all international students are required to submit a TOEFL score. See the Mead Witter School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>) for information on minimum score requirements. The Mead Witter School of Music does **not** waive the TOEFL score requirement for students who have completed a degree at an American university. Typically, performance applicants are required to audition in person. For details on specific audition requirements and additional application materials, visit the School of Music graduate admissions website (<http://www.music.wisc.edu/admissions/graduate>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- communicates well-developed musical ideas clearly and energetically in performance and, where applicable, in compositions.
- demonstrates knowledge of appropriate stylistic details in performance of music from a variety of historical periods and cultural origins.

- draws upon extensive understanding of a variety of musical cultures and historical periods for the preparation of a performance or a composition.
- selects the most appropriate methods of technique or notation to achieve the intended result in performance.
- shows ability to express, verbally and in writing, musical ideas and interpretive conclusions to peers and colleagues.

## PROFESSIONAL CONDUCT

- recognizes and applies principles of ethical and professional conduct.
- respects colleagues and values contributions of others in collaborative endeavors.

## PEOPLE

**Faculty:** Professors Cook (director), Aley, Bartley, Blasius, Bowles, Calderon, Chisholm, Crook, Davis, Dembski, DiSanza, Dill, Doing, Earp, Fischer, Fulmer, Hyer, Jensen, Johnson, Jutt, Karp, Koza, Leckrone, Perry, Potter, Radano, Rowe, Schaffer, Schwendinger, Smith, Stowe, Swack, B. Taylor, C. Taylor, Thimmig, Vardi; Associate Professors Dobbs, Hetzler, Johnson, Teeple, Vallon; Assistant Professors Grabois, Park Altino, Wallmann

## NURSING—SCHOOL-WIDE

**Administrative Unit:** School of Nursing

**College/School:** School of Nursing

**Admitting Plans:** DNP, Ph.D.

**Degrees Offered:** M.S., DNP, Ph.D.

**Minors and Certificates:** Doctoral Minor; Nurse Educator, Graduate Professional Certificate

The School of Nursing offers a programs leading to the doctor of philosophy degree and the doctor of nursing practice (DNP). The school also has a unique early entry Ph.D. program to bridge or accelerate progression to the Ph.D. level for undergraduate nursing students. Postdoctoral training opportunities are also available.

The mission of the School of Nursing is to prepare nurse leaders who improve human health through practice, education and research. Our strategic priorities are to advance science through research and scholarship, prepare nurse leaders for the health challenges of the 21st century, foster strategic partnerships to promote human health, achieve the school's commitment to diversity, and create the preferred future of the School of Nursing.

Nursing faculty members are well prepared for their roles as scholars, clinicians, and teachers. Many have postdoctoral experience in nursing and related disciplines. They have wide-ranging clinical expertise foundational to their experiences with doctoral students. Many faculty have been awarded prestigious federal and private research and training awards and are well known for their expertise in university, local, national, and international communities.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; nursing homes; and public

health agencies. The University's location in Wisconsin's capital offers opportunities for involvement in state government and policy making.

Signe Skott Cooper Hall, the School of Nursing's new facility, features state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff and the communities and populations served. Adjacent to Cooper Hall, the Health Sciences Learning Center (HSLC) brings together students in nursing, medicine, and pharmacy, and includes the Ebling Library and University Book Store.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Nurse Educator, Graduate/Professional Certificate (p. 524)
- Nursing Practice, DNP (p. 524)
- Nursing, Doctoral Minor (p. 526)
- Nursing, M.S. (p. 526)
- Nursing, Ph.D. (p. 528)

## PEOPLE

**Faculty:** Professors May (dean), Bowers, Brennan, Kwekkeboom, Lauver, Oakley, Zahner; Associate Professors Tluczek, Ward; Assistant Professors Bratzke, Gretebeck, King, Roberts, Steege, Torres, Yoon

## NURSE EDUCATOR, GRADUATE/PROFESSIONAL CERTIFICATE

The 9-credit program of study consists of two 3-credit nurse educator courses (NURSING 785 Foundations of Curriculum Development and Evaluation in Nursing Education and NURSING 786 Foundations of Teaching and Learning in Nursing), and a 3-credit teaching practicum experience (NURSING 787 Nursing Education Practicum). The nurse educator courses will be delivered in a hybrid format (primarily online with regularly scheduled in-class sessions).

Those who complete the certificate are recognized for their specialized skills, knowledge, and abilities in the nurse educator role. The certification of nurse educators provides a means for faculty members to demonstrate their expertise in the science of nursing education. Obtaining the certificate signifies a commitment to professional development and to continuously improve the methods of teaching needed in the field of nursing.

Student who complete the certificate are eligible to sit for the National League for Nursing (NLN) Certified Nurse Educator Examination. NLN recognizes the nurse educator role as a specialty area of practice.

## NURSING PRACTICE, DNP

The School of Nursing doctor of nursing practice (DNP) program prepares nurses for leadership roles as advanced practice nurses (clinical nurse specialists or nurse practitioners) who provide direct care and lead practice development and evaluation. Students in the DNP program choose from three population foci: adult/gerontology (acute care or primary care), pediatrics, or psychiatric mental health. Those interested in

dual preparation as an advanced practice nurse and nurse educator may add a nursing education focus.

The program is available for nurses with a baccalaureate degree in nursing (post-B.S. option) and nurses with a master's degree in nursing (post-M.S. option). The post-B.S. option can be completed in three years of full-time study or five years on a part-time basis and requires a minimum of 71 credits. The post-M.S. option is designed to be completed in three years on a part-time basis and requires a minimum of 51 credits. Up to 18 credits will be accepted from the student's M.S. degree; a minimum of 32 credits must be completed as a graduate student on the UW–Madison campus. Students admitted to either option follow the course sequence designated in the program plan and progress as a group.

The program of study features a combination of formal course work, clinical practice and scholarly inquiry. Most course work is delivered in a hybrid format, utilizing both in-person class sessions and distance learning technologies.

## FUNDING

Several forms of financial aid are available for graduate students in the School of Nursing. These include fellowships, scholarships, project and teaching assistantships and loans. Most graduate assistantships cover the cost of tuition and provide a monthly stipend. Awards are made in the spring or early summer for the following academic year.

Advanced Opportunity Fellowships are designed to support highly qualified underrepresented students in the doctoral programs. Doctoral students who are preparing to be full-time faculty in nursing programs are also eligible for the Nurse Faculty Loan Program (NFLP). These loans, supported by the federal government, are available to cover tuition and other educational expenses. When graduates become full-time faculty members, up to 85 percent of the NFLP loan will be canceled over a four-year period.

Additional information on financial aid including application procedures is available in the School of Nursing Academic Programs Office.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

DNP

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

Post–B.S.: 71 credits

Post–M.S.: 51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

Post–B.S.: 54 credits

Post–M.S.: 32 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the University's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Post-B.S.: With program approval, students are allowed to count up to 18 credits of graduate coursework from other institutions. Graduate work should be less than five years old to be considered; additional justification and/or documentation are needed for work taken between five and ten years. Work more than ten years old will not be considered.

Post-M.S.: With program approval, students are allowed to count up to 18 credits of graduate coursework from other institutions. Graduate work should be less than five years old to be considered; additional justification and/or documentation are needed for work taken between five and ten years. Work more than ten years old will not be considered unless students are board certified advanced practice nurses (ANP) and have continuous practice as an APN.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No undergraduate coursework will be allowed to count toward DNP requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. These credits are considered part of the total allowable credits available for a student to transfer. Coursework should be less than five years old to be considered; additional justification and/or documentation is needed for work taken between five and ten years. Work more than ten years old will not be considered.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the School for a list of specific courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

DNP students are not required to complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

A student may not receive more than one grade below a B (or a U grade) in any 12 month period.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a student has not returned to satisfactory progress by the determined deadline, a decision about whether the student will be permitted to continue will be made by the graduate

programs committee (or appropriate subcommittee) with input from the student's advisor.

## ADVISOR / COMMITTEE

Progression is reviewed each semester by academic programs office staff and advisors.

## ASSESSMENTS AND EXAMINATIONS

No examinations are required.

## TIME CONSTRAINTS

Post-B.S.: Students must complete the requirements within six years of admission. Upon the advisor's recommendation, the associate dean for academic programs may grant a one-year extension.

Post-M.S.: Students must complete the requirements within four years of admission to the program. Upon the advisor's recommendation, the associate dean for academic programs may grant a one-year extension.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

*Admission requirements for the DNP program (post-baccalaureate) are:*

- Bachelor's degree in nursing from an accredited (CCNE or NLN) program with an undergraduate GPA of at least 3.0 (on a 4.0 scale) on the last 60 credits of the most recent baccalaureate degree
- Licensure as a professional nurse with one year of professional nursing experience required, preferably related to the population of interest
- Application essay (see School of Nursing website (<http://www.son.wisc.edu>) for specific criteria)
- Three letters of recommendation
- Curriculum vitae or resume
- English proficiency scores: Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. See the Graduate School's Admission Requirements (<http://grad.wisc.edu/admissions/requirements>) for more information on the English proficiency requirement.

*Additional admission requirements for the DNP program (post-master's) are:*

- Cumulative grade point average (GPA) of at least 3.5 (4.0 basis) for the M.S. degree in nursing
- A graduate level statistics course with a grade of B or better completed within five years of application
- Evidence of certification as an advanced practice nurse, if applicable

All application materials must be received by February 1 for admission in the fall semester.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Integrate nursing science with knowledge from the biophysical, psychosocial, analytical, and organizational sciences as the basis for advanced level nursing practice.
- Use information systems technology to evaluate outcomes of care, care systems, and quality improvement.
- Develop and evaluate new practice approaches based on nursing theories and theories from other disciplines.
- Employ consultative and leadership skills with intraprofessional and interprofessional teams to create change in complex health care delivery systems.
- Demonstrate leadership in the development of institutional, local, state, federal, and/or international health policy.
- Function as a practice specialist in collaborative knowledge-generating research.
- Develop, implement, and evaluate interventions to improve health status and access patterns, and to address gaps in care of individuals, aggregates, or populations.
- Design, implement and disseminate results of a scholarly endeavor that uses evidence to improve practice or patient outcomes.
- Employ consultative and leadership skills with intraprofessional and interprofessional teams to create change in complex health care delivery systems.
- Demonstrate advanced levels of clinical judgment, systems thinking, and accountability in designing, delivering, and evaluating evidence-based care to improve patient outcomes.
- Lead the evaluation of evidence to determine and implement best practice.
- Demonstrate leadership in the development of institutional, local, state, federal, and/or international health policy.
- Demonstrate advanced levels of clinical judgment, systems thinking, and accountability in designing, delivering, and evaluating evidence-based care to improve patient outcomes.
- Critically evaluate how social determinants of health, cultural background and physical environment impact health outcomes.
- Communicates complex research findings and implications in a clear and understandable manner to lay and professional audiences.

### PROFESSIONAL CONDUCT

- Guide, mentor, and support other nurses to achieve excellence in clinical nursing practice.
- Function as a practice specialist in collaborative knowledge-generating research.
- Demonstrates knowledge of professional obligations, codes of ethics and institutional policies and procedures that guide nursing scholarship and practice.

## PEOPLE

**Faculty:** Professors May (dean), Bowers, Brennan, Kwekkeboom, Lauver, Oakley, Zahner; Associate Professors Tluczek, Ward; Assistant Professors Bratzke, Gretebeck, King, Roberts, Steege, Torres, Yoon; Clinical Professors Kruger, Pinekenstein, Solheim; Clinical Associate

Professors Greene, R. Gretebeck, Williams; Clinical Assistant Professors Bryan, Dwyer, Eisch, Endicott, Fiegel-Newlon, Fisher, Gilmore-Bykovskiy, Halm, Lothe, McGranahan, Newton, Saladar, Sasse, Williams; Clinical Instructors Dachel, Hermsen, Kobernusz

## NURSING, DOCTORAL MINOR

### REQUIREMENTS

The requirements for a Ph.D. candidate from another program for an Option A minor in nursing are 10 credits of graduate-level course work to include at least 6 credits at the 800 level. No more than 4 of the 10 credits may be transfer credits. Any transfer credits from master's-level course work must have been taken within five years of admission to the Ph.D. program.

### PEOPLE

**Faculty:** Professors May (dean), Bowers, Brennan, Kwekkeboom, Lauver, Oakley, Zahner; Associate Professors Tluczek, Ward; Assistant Professors Bratzke, Gretebeck, King, Roberts, Steege, Torres, Yoon

## NURSING, M.S.

The School of Nursing is no longer admitting students to the M.S. program or the M.S./MPH dual degree program. The M.S. program for advanced practice has transitioned to the doctor of nursing practice (DNP) degree (p. 524).

### REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

36 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

27 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (18 out of 36 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count up to 9 credits of graduate coursework from other institutions. Graduate work should be less than five years old to be considered; additional justification and/or documentation are needed for work taken between five and ten years. Work ten or more years prior to admission to the program will not be considered.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. These credits are considered part of the total allowable credits available for a student to transfer. Coursework should be less than five years old to be considered; additional justification and/or documentation is needed for work taken between five and ten years. Work ten or more years prior to admission to the program will not be considered.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the School for a list of specific courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

Student progression is reviewed annually.

## ASSESSMENTS AND EXAMINATIONS

No formal examination required.

## TIME CONSTRAINTS

Requirements for the degree must be completed within five years of admission.

## LANGUAGE REQUIREMENTS

No language requirements.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- **Background for Practice from Sciences and Humanities:** Recognizes that the master's-prepared nurse integrates scientific findings from nursing, biopsychosocial fields, genetics, public health, quality improvement, and organizational sciences for the continual improvement of nursing care across diverse settings.
- **Organizational and Systems Leadership:** Recognizes that organizational and systems leadership are critical to the promotion of high quality and safe patient care. Leadership skills are needed that emphasize ethical and critical decision making, effective working relationships, and a systems-perspective.
- **Quality Improvement and Safety:** Recognizes that a master's-prepared nurse must be articulate in the methods, tools, performance measures, and standards related to quality, as well as prepared to apply quality principles within an organization.
- **Translating and Integrating Scholarship into Practice:** Recognizes that the master's-prepared nurse applies research outcomes within the practice setting, resolves practice problems, works as a change agent, and disseminates results.
- **Informatics and Healthcare Technologies:** Recognizes that the master's-prepared nurse uses patient-care technologies to deliver and enhance care and uses communication technologies to integrate and coordinate care.
- **Health Policy and Advocacy:** Recognizes that the master's-prepared nurse is able to intervene at the system level through the policy development process and to employ advocacy strategies to influence health and health care.

### PROFESSIONAL CONDUCT

- **Interprofessional Collaboration for Improving Patient and Population Health Outcomes:** Recognizes that the master's-prepared nurse, as a member and leader of interprofessional teams, communicates, collaborates, and consults with other health professionals to manage and coordinate care.
- **Ethical Practice:** Recognizes and applies principles of ethical and professional conduct.

### ADDITIONAL LEARNING GOALS

- **Master's-Level Nursing Practice:** Recognizes that nursing practice, at the master's level, is broadly defined as any form of nursing intervention that influences healthcare outcomes for individuals, populations, or systems. Master's-level nursing graduates must have an advanced level of understanding of nursing and relevant sciences as well as the ability to integrate this knowledge into practice. Nursing practice interventions include both direct and indirect care components.
- **Clinical Prevention and Population Health for Improving Health:** Recognizes that the master's-prepared nurse applies and integrates broad, organizational, client-centered, and culturally appropriate concepts in the planning, delivery, management, and evaluation of evidence-based clinical prevention and population care and services to individuals, families, and aggregates/identified populations.

## PEOPLE

**Faculty:** Professors May (dean), Bowers, Brennan, Kwekkeboom, Lauver, Oakley, Zahner; Associate Professors Tluczek, Ward; Assistant Professors Bratzke, Gretebeck, King, Roberts, Steege, Torres, Yoon

## NURSING, PH.D.

The emphasis on theory and practice of nursing prepares nurse scientists to: develop and/or test theory that drives nursing practice; design and conduct clinical efficacy and effectiveness trials of nursing interventions to improve health; and build a program of research around a clinical problem, phenomenon, or population of interest that will shape patient care across various settings. The emphasis on policy and leadership prepares nurse scientists with the conceptual strategies and methodological skills to assess and address the biobehavioral, social and economic public policy factors that influence the definition of what constitutes health problems and the manner in which they are treated.

The School of Nursing offers a program leading to the doctor of philosophy degree. The school also has a unique early entry Ph.D. program to bridge or accelerate progression to the Ph.D. level for undergraduate nursing students. Postdoctoral training opportunities are also available.

The mission of the School of Nursing is to prepare nurse leaders who improve human health through practice, education and research. Our strategic priorities are to advance science through research and scholarship, prepare nurse leaders for the health challenges of the 21st century, foster strategic partnerships to promote human health, achieve the school's commitment to diversity, and create the preferred future of the School of Nursing.

Nursing faculty members are well prepared for their roles as scholars, clinicians, and teachers. Many have postdoctoral experience in nursing and related disciplines. They have wide-ranging clinical expertise foundational to their experiences with doctoral students. Many faculty have been awarded prestigious federal and private research and training awards and are well known for their expertise in university, local, national, and international communities.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; nursing homes; and public health agencies. The University's location in Wisconsin's capital offers opportunities for involvement in state government and policy making.

Signe Skott Cooper Hall, the School of Nursing's new facility, features state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff and the communities and populations served. Adjacent to Cooper Hall, the Health Sciences Learning Center (HSLC) brings together students in nursing, medicine, and pharmacy, and includes the Ebling Library and University Book Store.

## EARLY ENTRY PH.D. OPTION

The early-entry Ph.D. option is designed for undergraduate students who are interested in research as a career and the Ph.D. as a goal. With the

assistance of a faculty advisory committee, early entry students plan an individualized program of study and research, drawing on existing undergraduate and graduate courses in nursing and related disciplines. Two degrees are awarded to students who complete this option: bachelor of science in nursing (B.S.), granted by the School of Nursing, and doctor of philosophy (Ph.D.), granted by the Graduate School.

## DOCTOR OF PHILOSOPHY DEGREE

The purpose of the Ph.D. program is to prepare researchers to develop, evaluate and disseminate new knowledge in nursing and health science. The program is characterized by early and continuous training in research through a close mentoring relationship with faculty, a strong scientific base in nursing, and supporting courses in a related (i.e., minor) discipline. Graduates with a research doctorate are prepared to assume positions as faculty as well as research scientists and research directors in a variety of educational, clinical and governmental settings.

The program is designed to be completed in four years full time and requires a minimum of 52 credits. Students may be accepted into the Ph.D. program either post-baccalaureate or post-master's. Students are encouraged to enroll full-time. If part-time study is necessary, a minimum of 6 credits per semester is required.

In collaboration with the faculty mentor(s), students plan a course of study that constitutes a unified program and fulfills the program requirements. Students select an emphasis in

1. theory and practice of nursing
2. policy and leadership.

The emphasis on theory and practice of nursing prepares nurse scientists to: develop and/or test theory that drives nursing practice; design and conduct clinical efficacy and effectiveness trials of nursing interventions to improve health; and build a program of research around a clinical problem, phenomenon, or population of interest that will shape patient care across various settings. The emphasis on policy and leadership prepares nurse scientists with the conceptual strategies and methodological skills to assess and address the biobehavioral, social and economic public policy factors that influence the definition of what constitutes health problems and the manner in which they are treated.

## FUNDING

Several forms of financial aid are available for graduate students in the School of Nursing. These include fellowships, traineeships, scholarships, research, project and teaching assistantships, and loans. Most graduate assistantships cover the cost of tuition and provide a monthly stipend. Awards are made in the spring or early summer for the following academic year. Full-time Ph.D. students receive priority for teaching and research assistantships administered by the School of Nursing. Students in the Ph.D. program have also been successful in competing for federal National Research Service Awards (NRSA) which are individual predoctoral fellowships.

Advanced Opportunity Fellowships are designed to support highly qualified underrepresented students in the doctoral programs. Doctoral students who are preparing to be full-time faculty in nursing programs are also eligible for the Nurse Faculty Loan Program (NFLP). These loans, supported by the federal government, are available to cover tuition and other educational expenses. When graduates become full-time faculty

members up to 85% of the NFLP loan will be canceled over a four-year period.

Additional information on financial aid including application procedures is available in the School of Nursing Academic Programs Office.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

52 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 out of 52 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 18 credits of graduate coursework from other institutions. Graduate work should be less than five years old to be considered; additional justification and/or documentation are needed for work taken between five and ten years. Work ten or more years prior to admission to the program will not be considered.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval up to 7 credits numbered 300 or above will be allowed to count toward the Ph.D. degree. This applies to students in the Early Entry Ph.D. route in the School of Nursing.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. These credits are considered part of the total allowable credits available for a student to transfer. Coursework should be less than five years old to be considered; additional justification and/or documentation is needed for work taken between five and ten years. Work ten or more years prior to admission to the program will not be considered.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the School for a list of specific courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All Ph.D. students are required to complete a minor.

Overall Graduate GPA Requirement

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

A student may not receive more than one grade below a B (or a U grade) in any 12 month period.

### PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a student has not returned to satisfactory progress by the determined deadline, a decision about whether the student will be permitted to continue will be made by the graduate programs committee (or appropriate subcommittee) with input from the student's advisor.

### ADVISOR / COMMITTEE

Ph.D. students complete an annual progression review which includes a written review from the advisor. This is submitted to the Ph.D. Admission, Progression and Funding (APF) Subcommittee of the GPC. APF reviews the student CVs and advisor comments to gain an overall sense of student progression in the program. Comments from the APF regarding progression are then sent to the advisor who shares the result of the review with the student. (See Policy and Procedures for PhD Progression Reviews.)

### ASSESSMENTS AND EXAMINATIONS

To be eligible for the comprehensive candidacy examination, candidates must have completed all formal coursework requirements.

### TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

*Admission requirements for the Ph.D. program are:*

- Bachelor's degree in nursing from an accredited (CCNE or NLN) program with an undergraduate GPA of at least 3.0 (on a 4.0 scale) on the last 60 credits of the most recent baccalaureate degree
- Satisfactory scores on the Graduate Record Examination (GRE)
- Application essay (see School of Nursing website for specific criteria)
- Satisfactory academic references
- Copies of two original papers or other scholarly work
- Curriculum vitae or resume

- English proficiency scores: Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. See t (<https://grad.wisc.edu/catalog/admission.htm>)he Graduate School's Requirements for Admission (<http://grad.wisc.edu/admissions/requirements/>) for more information on the English proficiency requirement.

Applications should be submitted for priority consideration by December 1 for admission in the fall semester.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Masters in-depth knowledge in a substantive area of nursing.
- Articulates research problems, potentials and limits with respect to nursing theory, knowledge, and practice.
- Formulates new ideas, concepts, designs, and/or techniques based on critical evaluation of knowledge in nursing and other relevant disciplines.
- Assumes leadership in the creation of original research that makes a substantive contribution to health.
- Demonstrates cultural knowledge and cross-cultural skills in nursing scholarship.
- Demonstrates breadth in learning experiences through intra- and cross-disciplinary study, and integration of research, teaching, mentoring, and service to the profession.
- Negotiates and works successfully with interprofessional teams.
- Develops and disseminates nursing knowledge to meet the health needs of local, national, and global populations.
- Communicates complex research findings and implications in a clear and understandable manner to lay and professional audiences.

### PROFESSIONAL CONDUCT

- Demonstrates knowledge of professional obligations, codes of ethics, and institutional policies and procedures that guide nursing scholarship.
- Demonstrates the capacity to identify ethical issues, seek guidance from appropriate resources and adhere to ethical principles and professional norms in the resolution of moral dilemmas.

## PEOPLE

**Faculty:** Professors May (dean), Bowers, Brennan, Kwekkeboom, Lauver, Oakley, Zahner; Associate Professors Tluczek, Ward; Assistant Professors Bratzke, Gretebeck, King, Roberts, Steege, Torres, Yoon

## NUTRITIONAL SCIENCES

**Administrative Unit:** Nutritional Sciences

**College/School:** College of Agricultural and Life Sciences

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

Modern nutrition is a multidisciplinary, integrative science, and the Interdepartmental Graduate Program in Nutritional Sciences (IGPNS) has been developed to meet this diversity in approach and objective. Thus, students can focus their training in one of three emphasis groups:

1. biochemical and molecular nutrition,
2. human nutrition, or
3. animal nutrition.

The degrees offered are the Master of Science and the Doctor of Philosophy in Nutritional Sciences.

It is the program's goal to provide graduate students interested in nutrition with an opportunity to obtain specialized training in a specific research area and also to obtain a general background in the science and practice of nutrition. The program is sufficiently flexible to allow students with a wide variety of undergraduate degrees to meet the background prerequisites. The program draws on the strengths of faculty in a number of the university's colleges and academic departments to enhance the instructional and research experience.

The training objectives of the IGPNS are to provide students with an understanding of basic nutritional principles as they apply to both humans and animals, to provide them with current knowledge in a specific area of emphasis, to make them aware of the integrative and multidisciplinary nature of nutrition research, and to direct them toward a successful career through the thesis and publications.

**Biochemical and molecular nutrition.** This emphasis group focuses on the application of biochemical and physiological approaches to the understanding of nutrient function and metabolism in systems ranging from the whole animal to the molecular level.

**Human nutrition.** This emphasis group takes a comprehensive view of human nutrition with emphasis on the maintenance and promotion of human health. It utilizes diverse research approaches to carry out studies on nutrient requirements, metabolism, and interactions. Research may involve physiological and biochemical studies, animal models and epidemiological, and educational or clinical interventions.

**Animal nutrition.** This emphasis group takes a comprehensive view of animal nutrition with a focus on expanding understanding of nutrient utilization. Research activities involve both the performance of domestic animals and general comparative nutrition across animal species. Studies may range from applied animal feeding trials to basic studies on nutrient metabolism or integrated whole-animal metabolism with an emphasis on quantification and regulation.

Thirty-three students from throughout the world are currently enrolled in the program. Twenty-four are doctoral candidates and nine are seeking master's degrees.

The graduate faculty have well-developed, competitively funded research programs and have been recognized for their activities by receiving national awards. They are active in national and international nutrition activities, and serve on editorial boards, as society officers, and as participants in numerous workshops and on advisory committees.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Clinical Nutrition, M.S. (p. 531)

- Nutritional Sciences, Doctoral Minor (p. 532)
- Nutritional Sciences, M.S. (p. 533)
- Nutritional Sciences, Ph.D. (p. 535)

## PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Groblewski, Lai, Ney, Ntambi, Smith, Sunde, Tanumihardjo; Associate Professors Olson, Yen; Assistant Professor Parks. Members of the Interdepartmental Graduate Program in Nutritional Sciences from outside the department: Adams, Anderson, Armentano, Attie, Binkley, Carey, Clagett-Dame, Combs, Cook, Crenshaw, Davis, Denu, Drezner, Engin, Goldman, Hayes, Hernandez, Kanarek, Karasov, Kemnitz, Kimple, Kling, Knoll, Kudsk, Lamming, Mares, Merrins, Pagliarini, Prolla, Reed, Robbins, Schaefer, Simon, White.

## CLINICAL NUTRITION, M.S.

**Administrative Unit:** Nutritional Sciences  
**College/School:** College of Agricultural and Life Sciences  
**Admitting Plans:** M.S.  
**Degrees Offered:** M.S.

The M.S. in clinical nutrition is focused on core nutrition, clinical nutrition, professional skills, and electives (including public health). This is advanced learning at its best, and is ideal for people with a strong background in clinical nutrition, confidence working at the graduate level, and a commitment to become leaders in clinical nutrition and dietetics. The curriculum is designed to prepare students to translate research; recognize and formulate responses to evolving developments in clinical nutrition practice, policy, and research; and lead and manage professional teams to design nutrition-related services.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress in addition to the requirements of the program.

#### MASTER'S DEGREES:

M.S.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 5 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count no more than 14 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code          | Title                                                            | Credits |
|---------------|------------------------------------------------------------------|---------|
| NUTR SCI 710  | Human Energy Metabolism                                          | 2       |
| NUTR SCI 711  | Personalized Nutrition: Genetics, Genomics, and Metagenomics     | 1       |
| NUTR SCI 720  | Advanced Nutrition Assessment                                    | 1       |
| NUTR SCI 650  | Advanced Clinical Nutrition: Critical Care and Nutrition Support | 3       |
| NUTR SCI 651  | Advanced Clinical Nutrition - Pediatrics                         | 3       |
| NUTR SCI 652  | Advanced Nutrition Counseling and Education                      | 3       |
| NUTR SCI 653  | Clinical Nutrition Research                                      | 3       |
| Total Credits |                                                                  | 16      |

In addition, students are required to complete 4 credits of "Professional Skills" from the following:

| Code                         | Title                         | Credits |
|------------------------------|-------------------------------|---------|
| Select one of the following: |                               | 4       |
| E P D 700                    | Connected Learning Essentials |         |
| E P D 701                    | Writing for Professionals     |         |
| E P D 702                    | Professional Presentations    |         |
| E P D/L I S 703              | Managing Digital Information  |         |
| E P D/GEN BUS/ M H R 783     | Leading Teams                 |         |
| E P D/GEN BUS/ OTM 784       | Project Management Essentials |         |
| E P D 712                    | Ethics for Professionals      |         |
| Total Credits                |                               | 4       |

Students are also required to complete 5 credits from the following (Note: A maximum of 3 credits from EPD courses may be used to fulfill this requirement:

| Code                           | Title                                                           | Credits |
|--------------------------------|-----------------------------------------------------------------|---------|
| Select a total of 5 credits:   |                                                                 | 5       |
| POP HLTH 780                   | Public Health: Principles and Practice                          |         |
| POP HLTH 785                   | Health Systems, Management, and Policy                          |         |
| POP HLTH/<br>M&ENVTOX 789      | Principles of Environmental Health: A Systems Thinking Approach |         |
| POP HLTH 879                   | Politics of Health Policy                                       |         |
| NUTR SCI 699                   | Special Problems                                                |         |
| E P D/ACCT I S/<br>GEN BUS 781 | Financial and Business Acumen <sup>1</sup>                      |         |
| E P D 706                      | Change Management <sup>1</sup>                                  |         |
| E P D/GEN BUS/<br>M H R 785    | Effective Negotiation Strategies <sup>1</sup>                   |         |
| E P D/GEN BUS/<br>MARKETNG 782 | Marketing for Non-Marketing Professionals <sup>1</sup>          |         |
| E P D 713                      | Key Legal Concepts for Professionals <sup>1</sup>               |         |
| E P D 708                      | Creating Breakthrough Innovations <sup>1</sup>                  |         |
| E P D 704                      | Organizational Communication and Problem Solving <sup>1</sup>   |         |

<sup>1</sup> Any EPD course (700, 701, 702, 703, 783, 784) not used in "4 credits of Professional Skills" requirement above; courses may not count twice.

#### Overall Graduate GPA Requirement

3.00

#### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all core curriculum coursework.

#### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards).
2. Probation (not progressing according to standards but permitted to enroll; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

Students must be in good academic standing with the Graduate School, their program, and their advisor. The Program Director and the Graduate School regularly reviews the record of any student who received grades of BC, C, D, F, or I in courses numbered 300 or above, or grades of U in research and thesis. This review could result in academic probation with a hold on future enrollment, and the student may be suspended from graduate studies.

The program director and the Graduate School may also put students on probation for incompletes not cleared within one term. All incomplete grades must be resolved before a degree is granted.

#### ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30.

Failure to do so will result in a hold being placed on the student's registration. The meeting may be held via telephone, skype, or in person.

#### ASSESSMENTS AND EXAMINATIONS

No formal examination is required.

#### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

Students may count the coursework completed before their absence for meeting graduate degree credit requirements; the Graduate School will not count that work toward the Graduate School's minimum residence credit minimum.

#### LANGUAGE REQUIREMENTS

No language requirements.

#### PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Smith; Associate Professor Yen

## NUTRITIONAL SCIENCES, DOCTORAL MINOR

The doctoral minor in nutritional sciences aims to articulate, critique, and elaborate the theories, research methods, and approaches to inquiry in nutritional sciences. Specific knowledge areas of focus include intermediary metabolism, functions and metabolism of vitamins and minerals, nutrition-related diseases such as obesity and diabetes, and fundamental principles of epidemiology and nutrition policy.

Those completing the doctoral minor in nutritional sciences are expected to identify sources and assemble evidence pertaining to questions or challenges in nutritional sciences, recognize the most appropriate methodologies and practices, evaluate or synthesize information pertaining to questions or challenges in nutritional sciences, communicate clearly in ways appropriate to the field of nutritional sciences, and recognize and apply principles of ethical professional conduct.

#### REQUIREMENTS

9 credits:

1. NUTR SCI/BIOCHEM 510 Biochemical Principles of Human and Animal Nutrition (3 cr)
2. NUTR SCI/BIOCHEM 619 Advanced Nutrition: Intermediary Metabolism of Macronutrients (3 cr)

3. Three courses selected from the following:\*
  - a. NUTR SCI/POP HLTH 621 Introduction to Nutritional Epidemiology (1 cr)
  - b. NUTR SCI/M&ENVTOX 623 Advanced Nutrition: Minerals (1 cr)
  - c. NUTR SCI 625 Advanced Nutrition: Obesity and Diabetes (1 cr)
  - d. NUTR SCI/AN SCI 626 Experimental Diet Design (1 cr)
  - e. NUTR SCI 627 Advanced Nutrition: Vitamins (1 cr)
  - f. NUTR SCI 881 Seminar-Topics in Human and Clinical Nutrition (1 cr) or NUTR SCI/BIOCHEM 901 Seminar-Nutrition and Metabolism (Advanced) (presentation required)

\*Appropriate NUTR SCI 875 Special Topics courses can be used to substitute for any of the 1-credit courses above with prior approval of the graduate program coordinator.

## ADMISSIONS

Admissions: Graduate Program Coordinator—Jonathan King  
(jmking4@wisc.edu)

## PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Groblewski, Lai, Ney, Ntambi, Smith, Sunde, Tanumihardjo; Associate Professors Olson, Yen; Assistant Professor Parks. Members of the Interdepartmental Graduate Program in Nutritional Sciences from outside the department: Adams, Anderson, Armentano, Attie, Binkley, Carey, Clagett-Dame, Combs, Cook, Crenshaw, Davis, Denu, Drezner, Engin, Goldman, Hayes, Hernandez, Kanarek, Karasov, Kemnitz, Kimple, Kling, Knoll, Kudsk, Lamming, Mares, Merrins, Pagliarini, Prolla, Reed, Robbins, Schaefer, Simon, White.

## NUTRITIONAL SCIENCES, M.S.

Modern nutrition is a multidisciplinary, integrative science, and the Interdepartmental Graduate Program in Nutritional Sciences (IGPNS) has been developed to meet this diversity in approach and objective. Thus, students can focus their training in one of three emphasis groups:

1. biochemical and molecular nutrition,
2. human nutrition, or
3. animal nutrition.

The degrees offered are the Master of Science and the Doctor of Philosophy in Nutritional Sciences.

It is the program's goal to provide graduate students interested in nutrition with an opportunity to obtain specialized training in a specific research area and also to obtain a general background in the science and practice of nutrition. The program is sufficiently flexible to allow students with a wide variety of undergraduate degrees to meet the background prerequisites. The program draws on the strengths of faculty in a number of the university's colleges and academic departments to enhance the instructional and research experience.

The training objectives of the IGPNS are to provide students with an understanding of basic nutritional principles as they apply to both humans and animals, to provide them with current knowledge in a specific area of emphasis, to make them aware of the integrative and

multidisciplinary nature of nutrition research, and to direct them toward a successful career through the thesis and publications.

**Biochemical and molecular nutrition.** This emphasis group focuses on the application of biochemical and physiological approaches to the understanding of nutrient function and metabolism in systems ranging from the whole animal to the molecular level.

**Human nutrition.** This emphasis group takes a comprehensive view of human nutrition with emphasis on the maintenance and promotion of human health. It utilizes diverse research approaches to carry out studies on nutrient requirements, metabolism, and interactions. Research may involve physiological and biochemical studies, animal models and epidemiological, and educational or clinical interventions.

**Animal nutrition.** This emphasis group takes a comprehensive view of animal nutrition with a focus on expanding understanding of nutrient utilization. Research activities involve both the performance of domestic animals and general comparative nutrition across animal species. Studies may range from applied animal feeding trials to basic studies on nutrient metabolism or integrated whole-animal metabolism with an emphasis on quantification and regulation.

Thirty-three students from throughout the world are currently enrolled in the program. Twenty-four are doctoral candidates and nine are seeking master's degrees.

The graduate faculty have well-developed, competitively funded research programs and have been recognized for their activities by receiving national awards. They are active in national and international nutrition activities, and serve on editorial boards, as society officers, and as participants in numerous workshops and on advisory committees.

## FUNDING

Assistantships and fellowships are available to support students. Information about financial assistance may be obtained from the department office.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available tracks in biochemical and molecular, and human nutrition

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With approval of the certification committee, students are allowed to count up to 14 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With approval of the certification committee, students may count up to 7 credits from a UW-Madison undergraduate degree, numbered 400 and above, toward the M.S. degree, provided that the course satisfies a requirement within the student's core curriculum or IGPNS emphasis group. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS FROM: UW-MADISON UNIVERSITY SPECIAL

With approval of the certification committee, students are allowed to count no more than 14 credits of coursework taken as a UW-Madison Special student, provided the course satisfies a requirement within the student's core curriculum or IGPNS emphasis group and is numbered 300 or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

12 credits: fall and spring semesters

2 credits: per eight-week summer session

| NUTR SCI 799              | Practicum in Nutritional Sciences Teaching (or equivalent experience) | 1-3     |

Select a research methods or data analysis course

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The IGPNS requires a cumulative 3.0 GPA for all courses taken in the UW Graduate School. Grades in research (Nutri Sci 991) are not included in the calculation of the GPA. A student who does not maintain a 3.0 GPA can continue on probationary status for two semesters at the recommendation of the major professor. If, at that time, the student does not achieve a cumulative 3.0 GPA, they will be dropped from the program.

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Students must complete either a research-based thesis or a literature-based report that passes scholarly review.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Candidates for graduate study in nutritional sciences should have a strong background in mathematics, chemistry, and biological and medical sciences or social sciences. Specific prerequisites for the graduate program include five to six semesters of chemistry, three semesters of biological sciences including a course in animal physiology, mathematics through trigonometry, and a course in calculus or statistics. Students who have not completed all the requirements may be admitted, but deficiencies should be made up during the first year of graduate study.

In general, all applicants must have a minimum grade point average of at least 3.0 (on a 4.0 scale). Graduate Record Exam (GRE) scores are required as well as three references and a personal statement. Acceptance requires approval by the Department of Nutritional Sciences and the Graduate School.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, and elaborates the theories, research methods, and approaches to inquiry in nutritional sciences. Specific knowledge areas of focus include intermediary metabolism, functions and metabolism of vitamins and minerals, nutrition-related diseases such as obesity and diabetes, and fundamental principles of epidemiology and nutrition policy.
- Identifies sources and assembles evidence pertaining to questions or challenges in nutritional sciences.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in nutritional sciences.
- Communicates clearly in ways appropriate to the field of nutritional science. This includes the composition of primary research and review articles. Demonstrates competent communication in the form of oral and poster presentations.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Groblewski, Lai, Ney, Ntambi, Smith, Sunde, Tanumihardjo; Associate Professors Olson, Yen; Assistant Professor Parks. Members of the Interdepartmental Graduate Program in Nutritional Sciences from outside the department: Adams, Anderson, Armentano, Attie, Binkley, Carey, Clagett-Dame, Combs, Cook, Crenshaw, Davis, Denu, Drezner, Engin, Goldman, Hayes, Hernandez, Kanarek, Karasov, Kemnitz, Kimple, Kling, Knoll, Kudsk, Lamming, Mares, Merrins, Pagliarini, Prolla, Reed, Robbins, Schaefer, Simon, White.

## NUTRITIONAL SCIENCES, PH.D.

Modern nutrition is a multidisciplinary, integrative science, and the Interdepartmental Graduate Program in Nutritional Sciences (IGPNS) has been developed to meet this diversity in approach and objective. Thus, students can focus their training in one of three emphasis groups:

1. biochemical and molecular nutrition,
2. human nutrition, or
3. animal nutrition.

The degrees offered are the Master of Science and the Doctor of Philosophy in Nutritional Sciences.

It is the program's goal to provide graduate students interested in nutrition with an opportunity to obtain specialized training in a specific research area and also to obtain a general background in the science and practice of nutrition. The program is sufficiently flexible to allow students with a wide variety of undergraduate degrees to meet the background prerequisites. The program draws on the strengths of faculty in a number of the university's colleges and academic departments to enhance the instructional and research experience.

The training objectives of the IGPNS are to provide students with an understanding of basic nutritional principles as they apply to both humans and animals, to provide them with current knowledge in a specific area of emphasis, to make them aware of the integrative and multidisciplinary nature of nutrition research, and to direct them toward a successful career through the thesis and publications.

**Biochemical and molecular nutrition.** This emphasis group focuses on the application of biochemical and physiological approaches to the understanding of nutrient function and metabolism in systems ranging from the whole animal to the molecular level.

**Human nutrition.** This emphasis group takes a comprehensive view of human nutrition with emphasis on the maintenance and promotion of human health. It utilizes diverse research approaches to carry out studies on nutrient requirements, metabolism, and interactions. Research may involve physiological and biochemical studies, animal models and epidemiological, and educational or clinical interventions.

**Animal nutrition.** This emphasis group takes a comprehensive view of animal nutrition with a focus on expanding understanding of nutrient utilization. Research activities involve both the performance of domestic animals and general comparative nutrition across animal species. Studies may range from applied animal feeding trials to basic studies on nutrient metabolism or integrated whole-animal metabolism with an emphasis on quantification and regulation.

Thirty-three students from throughout the world are currently enrolled in the program. Twenty-four are doctoral candidates and nine are seeking master's degrees.

The graduate faculty have well-developed, competitively funded research programs and have been recognized for their activities by receiving national awards. They are active in national and international nutrition activities, and serve on editorial boards, as society officers, and as participants in numerous workshops and on advisory committees.

## FUNDING

Assistantships and fellowships are available to support students. Information about financial assistance may be obtained from the department office.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D. with available tracks in animal nutrition, biochemical and molecular, and human nutrition

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With approval of the certification committee, students are allowed to count up to 19 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With approval of the certification committee, students are allowed to count up to 7 credits from a UW–Madison undergraduate degree, numbered 400 and above, toward the Ph.D. degree, provided the course satisfies a requirement within the student's core curriculum or IGPNS

emphasis group. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework taken as a UW–Madison Special student, provided the course satisfies a requirement within the student's core curriculum or IGPNS emphasis group. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

Non-dissertators:

12 credits: fall and spring semesters  
2 credits: per eight-week summer session

Dissertators: 3 credits per semester

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete either a distributed minor, or a minor within a specific department.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The IGPNS requires a cumulative 3.0 GPA for all courses taken in the UW Graduate School. Grades in research (Nutri Sci 991) are not included in the calculation of the GPA. A student who does not maintain a 3.0 GPA can continue on probationary status for two semesters at the recommendation of the major professor. If, at that time, the student does not achieve a cumulative 3.0 GPA, they will be dropped from the program.

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Students must take and pass two preliminary exams. Students must take the first exam prior to the end of the fifth semester and the second exam by the end of the sixth semesters; summer session does not count as a semester. Students may choose the order of the research exam and the general knowledge exam.

Students must defend a final thesis.

### TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a Doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

A student's program may appeal these time limits through a written request to the Graduate School Office of Admissions and Academic Services.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Candidates for graduate study in nutritional sciences should have a strong background in mathematics, chemistry, and biological and medical sciences or social sciences. Specific prerequisites for the graduate program include five to six semesters of chemistry, three semesters of biological sciences including a course in animal physiology, mathematics through trigonometry, and a course in calculus or statistics. Students who have not completed all the requirements may be admitted, but deficiencies should be made up during the first year of graduate study.

In general, all applicants must have a minimum grade point average of at least 3.0 (on a 4.0 scale). Graduate Record Exam (GRE) scores

are required as well as three references and a personal statement. Acceptance requires approval by the Department of Nutritional Sciences and the Graduate School.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, and practice in nutritional sciences. Specific knowledge areas of focus include intermediary metabolism, functions and metabolism of vitamins and minerals, nutrition-related diseases such as obesity and diabetes, and fundamental principles of epidemiology and nutrition policy.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge in nutritional sciences.
- Creates original research and scholarship that makes a substantive contribution to nutritional sciences.
- Demonstrates breadth of knowledge of nutritional sciences.
- Advances contributions of the field of nutritional sciences to society.
- Communicates complex ideas in a clear and understandable manner through both written and oral presentations.

### PROFESSIONAL CONDUCT

- Fosters and practices ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Eide (chair), Eisenstein, Groblewski, Lai, Ney, Ntambi, Smith, Sunde, Tanumihardjo; Associate Professors Olson, Yen; Assistant Professor Parks. Members of the Interdepartmental Graduate Program in Nutritional Sciences from outside the department: Adams, Anderson, Armentano, Attie, Binkley, Carey, Clagett-Dame, Combs, Cook, Crenshaw, Davis, Denu, Drezner, Engin, Goldman, Hayes, Hernandez, Kanarek, Karasov, Kemnitz, Kimple, Kling, Knoll, Kudsk, Lamming, Mares, Merrins, Pagliarini, Prolla, Reed, Robbins, Schaefer, Simon, White.

## ONCOLOGY

**Administrative Unit:** Oncology

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The graduate program in cancer biology offers a course of study and research leading to the Ph.D. degree. Although a master's degree is offered under special circumstances, students are not admitted for a master's degree.

The Cancer Biology Graduate Program was established at the McArdle Laboratory for Cancer Research in 1940 as the first graduate program in the United States to offer a degree in basic cancer research. The program now includes more than 50 faculty trainers from multiple departments including Oncology, Medicine, Human Oncology, Cell and Regenerative Biology, Medical Microbiology and Immunology, and others. This interdepartmental structure offers students remarkably diverse training opportunities that span the entire breadth of cancer biology research from haploid or diploid genetics, viral and chemical carcinogenesis,

eukaryotic cell and molecular biology, virology, molecular toxicology, and whole-animal carcinogenesis. Through the graduate curriculum, students are introduced to the body of knowledge that has been derived directly from experiments on the induction, properties, and therapy of cancer, and receive the necessary background to conduct independent research.

Curriculum requirements are designed to be flexible, providing a maximal opportunity for specialization within this multidisciplinary field. Students learn through core and elective courses; by participation in seminars, conferences, and journal clubs related to their specific areas of expertise; and most important, from their research advisors. Students who join the program select research advisors after conducting a minimum of three monthlong rotations in different laboratories during the first semester. After choosing an advisor, students will also create an advisory committee of five faculty members who will provide guidance throughout the process of earning the Ph.D. degree. The average time to complete the Ph.D. is 5.5 years. The program prepares students for careers in teaching and research in academia, government, and industry.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Cancer Biology, M.S. (p. 538)
- Cancer Biology, Ph.D. (p. 540)

## PEOPLE

**Faculty:** Professors Alarid (co-director), Loeb (co-director), Ahlquist, Alexander, Allen-Hoffmann, Beebe, Bradfield, Bresnick, Bushman, Cryns, Drinkwater, Friedl, Friesen, Gould, Griep, Harari, Hoffmann, Huttenlocher, Jarrard, Kalejta, Keely, Kenney, Kiessling, Lambert, McNeel, Mertz, Miyamoto, Mosher, Raines, Rapraeger, Schuler, Shull, Sugden, Xu; Associate Professors Audhya, Kennedy, Marker, Moser, Ricke, Striker, Tibbetts, Wheeler, Xing, Zhang; Assistant Professors Burkard, Halberg, Johannsen, Kimple, Rui, Sherer, Weaver. For the most current list of faculty and descriptions of their research interests, the program website (<http://www.cancerbiology.wisc.edu/faculty/faculty.html>).

## CANCER BIOLOGY, M.S.

The graduate program in cancer biology offers a course of study and research leading to the Ph.D. degree. Although a master's degree is offered under special circumstances, students are not admitted for a master's degree.

The Cancer Biology Graduate Program was established at the McArdle Laboratory for Cancer Research in 1940 as the first graduate program in the United States to offer a degree in basic cancer research. The program now includes more than 50 faculty trainers from multiple departments including Oncology, Medicine, Human Oncology, Cell and Regenerative Biology, Medical Microbiology and Immunology, and others. This interdepartmental structure offers students remarkably diverse training opportunities that span the entire breadth of cancer biology research from haploid or diploid genetics, viral and chemical carcinogenesis, eukaryotic cell and molecular biology, virology, molecular toxicology, and whole-animal carcinogenesis. Through the graduate curriculum, students are introduced to the body of knowledge that has been derived directly

from experiments on the induction, properties, and therapy of cancer, and receive the necessary background to conduct independent research.

Curriculum requirements are designed to be flexible, providing a maximal opportunity for specialization within this multidisciplinary field. Students learn through core and elective courses; by participation in seminars, conferences, and journal clubs related to their specific areas of expertise; and most important, from their research advisors. Students who join the program select research advisors after conducting a minimum of three monthlong rotations in different laboratories during the first semester. After choosing an advisor, students will also create an advisory committee of five faculty members who will provide guidance throughout the process of earning the Ph.D. degree. The average time to complete the Ph.D. is 5.5 years. The program prepares students for careers in teaching and research in academia, government, and industry.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available thesis and non-thesis tracks

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits numbered 300 or above from a UW-Madison undergraduate degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison

special student. Coursework earned five or more years prior to admission to a Master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code         | Title                                                  | Credits |
|--------------|--------------------------------------------------------|---------|
| ONCOLOGY 703 | Carcinogenesis and Tumor Cell Biology                  | 3       |
| ONCOLOGY 675 | Readings in Cancer Biology                             |         |
| ONCOLOGY 675 | Statistical Problems in Genetics and Molecular Biology |         |
| ONCOLOGY 675 | Problems in Cancer Research                            |         |
| ONCOLOGY 675 | Appropriate Conduct in Science                         |         |
| ONCOLOGY 675 | Seminar                                                |         |

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in the following courses, otherwise the course must be repeated: ONCOLOGY 703 Carcinogenesis and Tumor Cell Biology and ONCOLOGY 675 Advanced or Special Topics in Cancer Research

### PROBATION POLICY

A semester GPA below 3.0 or an incomplete grade (I) will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained or the Incomplete grade is not cleared during the subsequent semester of full-time enrollment, the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

### ADVISOR / COMMITTEE

All students are required to have an Advisor. Students must create a certification committee by the end of their first year. Master's thesis committees must have at least three committee members. Non-thesis master's committees must have at least one graduate faculty member from the student's program.

### ASSESSMENTS AND EXAMINATIONS

Thesis track—requires a formal thesis.

Non-thesis track—no formal examination required.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 540)

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
- Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Demonstrates understanding of the primary field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates clearly in ways appropriate to the field of study.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Alarid (co-director), Loeb (co-director), Ahlquist, Alexander, Allen-Hoffmann, Beebe, Bradfield, Bresnick, Bushman, Cryns, Drinkwater, Friedl, Friesen, Gould, Griep, Harari, Hoffmann, Huttenlocher, Jarrard, Kalejta, Keely, Kenney, Kiessling, Lambert, McNeel, Mertz, Miyamoto, Mosher, Raines, Rapraeger, Schuler, Shull, Sugden, Xu; Associate Professors Audhya, Kennedy, Marker, Moser, Ricke, Striker, Tibbetts, Wheeler, Xing, Zhang; Assistant Professors Burkard, Halberg, Johannsen, Kimple, Rui, Sherer, Weaver. For the most current list of faculty and descriptions of their research interests, the program website (<http://www.cancerbiology.wisc.edu/faculty/faculty.html>).

## CANCER BIOLOGY, PH.D.

The graduate program in cancer biology offers a course of study and research leading to the Ph.D. degree. Although a master's degree is offered under special circumstances, students are not admitted for a master's degree.

The Cancer Biology Graduate Program was established at the McArdle Laboratory for Cancer Research in 1940 as the first graduate program in the United States to offer a degree in basic cancer research. The program now includes more than 50 faculty trainers from multiple departments including Oncology, Medicine, Human Oncology, Cell and Regenerative Biology, Medical Microbiology and Immunology, and others. This interdepartmental structure offers students remarkably diverse training opportunities that span the entire breadth of cancer biology research from haploid or diploid genetics, viral and chemical carcinogenesis, eukaryotic cell and molecular biology, virology, molecular toxicology, and whole-animal carcinogenesis. Through the graduate curriculum, students

are introduced to the body of knowledge that has been derived directly from experiments on the induction, properties, and therapy of cancer, and receive the necessary background to conduct independent research.

Curriculum requirements are designed to be flexible, providing a maximal opportunity for specialization within this multidisciplinary field. Students learn through core and elective courses; by participation in seminars, conferences, and journal clubs related to their specific areas of expertise; and most important, from their research advisors. Students who join the program select research advisors after conducting a minimum of three monthlong rotations in different laboratories during the first semester. After choosing an advisor, students will also create an advisory committee of five faculty members who will provide guidance throughout the process of earning the Ph.D. degree. The average time to complete the Ph.D. is 5.5 years. The program prepares students for careers in teaching and research in academia, government, and industry.

## FUNDING

The program is committed to ensure continuing financial support for all cancer biology Ph.D. students in good standing. Financial support includes a competitive stipend and tuition remission. All graduate students are also eligible for comprehensive health insurance. Ph.D. students are supported from a variety of different sources including research assistantships from faculty research grants, fellowships, and NIH training grants. There is no teaching requirement for cancer biology students; however, many opportunities exist on campus for those who wish to gain teaching experience.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 credits out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework

earned five or more years prior to admission to a master's degree or doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits numbered 300 or above from a UW–Madison undergraduate degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

| Code         | Title                                                  | Credits |
|--------------|--------------------------------------------------------|---------|
| ONCOLOGY 703 | Carcinogenesis and Tumor Cell Biology                  | 3       |
| ONCOLOGY 675 | Readings in Cancer Biology                             |         |
| ONCOLOGY 675 | Statistical Problems in Genetics and Molecular Biology |         |
| ONCOLOGY 675 | Problems in Cancer Research                            |         |
| ONCOLOGY 675 | Appropriate Conduct in Science                         |         |
| ONCOLOGY 675 | Seminar                                                |         |

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Minor—not required. Students who wish to complete a minor have the option to do so.

Breadth Requirements—all doctoral students must complete at least three elective courses outside of the required core curriculum. If a student chooses to complete a minor, the minor coursework may fulfill the elective requirements.

Students are expected to consult with their advisor/committee concerning minor/breadth requirements by the end of their first year.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in the following courses, otherwise the course must be repeated: ONCOLOGY 703 Carcinogenesis and Tumor Cell Biology and ONCOLOGY 675 Advanced or Special Topics in Cancer Research

## PROBATION POLICY

A semester GPA below 3.0 or an incomplete grade (I) will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained or the Incomplete grade is not cleared during the subsequent semester of full-time enrollment, the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students are required to have an advisor. Students must create a certification committee (advisor plus four additional faculty members) by the end of their first year. After passing their preliminary examination, students are required to conduct a progress report meeting with their certification committee each year. Failure to do so may result in a hold being placed on the student's registration.

## ASSESSMENTS AND EXAMINATIONS

All doctoral students must pass an oral preliminary examination. All requirements for a doctoral degree, except for the dissertation, must be completed at this time.

Six months before the final oral defense, all doctoral students must present a semifinal dissertation proposal to their committee for approval.

All doctoral students must pass a final oral defense of their doctoral dissertation and subsequently deposit the dissertation in the Graduate School.

## TIME CONSTRAINTS

All doctoral students must pass their preliminary examination by the end of their second year (August 31). Under special circumstances, a one-semester extension may be granted when justified in writing by the student and advisor.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Students seeking admission to the program must complete a bachelor's degree in biology, biochemistry, chemistry, molecular biology, or a related area from an accredited college or university and should have a grade point average of at least 3.0 (on a 4.0 scale). The background of the student should include basic courses in these areas as well as several advanced courses in chemistry, microbiology, biochemistry, genetics, physiology, and molecular biology. Prior laboratory research experience is highly desirable.

Applicants must submit a completed application online, personal statement (reasons for graduate study), official college transcripts, Graduate Record Exam (GRE) scores (the subject test is recommended, but not required), and three letters of recommendation.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
- Creates research, scholarship, or performance that makes a substantive contribution.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.
- Communicates complex ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Alarid (co-director), Loeb (co-director), Ahlquist, Alexander, Allen-Hoffmann, Beebe, Bradfield, Bresnick, Bushman, Cryns, Drinkwater, Friedl, Friesen, Gould, Griep, Harari, Hoffmann, Huttenlocher, Jarrard, Kalejta, Keely, Kenney, Kiessling, Lambert, McNeel, Mertz, Miyamoto, Mosher, Raines, Rapraeger, Schuler, Shull, Sugden, Xu; Associate Professors Audhya, Kennedy, Marker, Moser, Ricke, Striker, Tibbetts, Wheeler, Xing, Zhang; Assistant Professors Burkard, Halberg, Johannsen, Kimple, Rui, Sherer, Weaver. For the most current list of faculty and descriptions of their research interests, the program website (<http://www.cancerbiology.wisc.edu/faculty/faculty.html>).

## OPERATIONS AND TECHNOLOGY MANAGEMENT

**Administrative Unit:** Operations and Information Management

**College/School:** School of Business

**Admitting Plans:** MBA

**Degrees Offered:** MBA, M.S.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Business: Operations and Technology Management, M.S. (p. 542)
- Business: Operations and Technology Management, MBA (p. 544)

## PEOPLE

**Faculty:** Professors Morris (chair), De Croix, Hausch, Siemsen, Wemmerlov; Associate Professors Finster, Kim, Lazimy; Assistant Professors Bavafa, Tong

## BUSINESS: OPERATIONS AND TECHNOLOGY MANAGEMENT, M.S.

The M.S. degree in the School of Business is currently designed for students who wish to pursue very specialized studies within one of two specific fields: global real estate (in the business: real estate and urban land economics M.S.) and finance (within the business: finance, investment and banking M.S.). With previous undergraduate exposure to the functional areas of business, students are able to gain a more extensive focus in one of these two specific areas of business.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. ## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

## MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 700 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to the master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a

faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission consideration requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. Work experience is not required. Applicants should have an undergraduate minimum grade point average (GPA) of 3.0 or higher on a 4.0 scale. In addition to academic credentials, test scores, personal achievements, motivation, communication skills (written and oral) and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE), taken within five years of the starting term, is required of all applicants to the Ph.D. and M.S. Programs. Also, all domestic (including Puerto Rico) and international applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL). A recommended minimum TOEFL score of 106 (New iBT), obtained within two years of the intended starting term, is needed for admission consideration. International applicants who have completed a four-year bachelor's degree in a country where the official language is English may request a waiver of the TOEFL requirement. A master's degree from an English-speaking institution does not qualify for a waiver of the TOEFL. The school accepts IELTS and Pearson Test of English as substitutes for TOEFL.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Apply foundational theories and knowledge from core management and engineering disciplines to make effective business decisions based on cross-functional thinking whether in general operations and technology management or in a chosen specialty area (such as healthcare operations or technology product management).
- Apply core operations principles about processes and technologies to the design, justification, operation, assessment, and improvement of organizational and system performance from both financial and nonfinancial perspectives.

## PROFESSIONAL CONDUCT

- Effectively lead and manage organizational and technological change that supports and improves business processes and creates value for customers.
- Develop enduring networks and relationships with industry partners.

## PEOPLE

**Faculty:** Professors Morris (chair), De Croix, Hausch, Siemsen, Wemmerlov; Associate Professors Finster, Kim, Lazimy; Assistant Professors Bavafa, Tong

## BUSINESS: OPERATIONS AND TECHNOLOGY MANAGEMENT, MBA

Developing leaders who create business value, OTM is an MBA specialization suited for those seeking advanced positions as consultants, analysts, product or service managers, project leaders, business developers, or operations, information technology and supply chain managers—while priming themselves for senior leadership roles. OTM students gain critical business skills applicable to both service organizations and manufacturing firms. The OTM MBA is supported by the Erdman Center for Operations and Technology Management. See the program website (<http://beta.bus.wisc.edu/programs/mba-programs/full-time-mba/career-specializations/operations-and-technology-management>) for more information.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

MBA

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No credits of prior coursework are allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

No credits of prior coursework are allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits<sup>1</sup>

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a

faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

- Full-time MBA students may be allowed to enroll in up to 18 credits per term in the 2016–2017 academic year. Contact the Wisconsin School of Business for more information.

## ADMISSIONS

Admission consideration for the MBA program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores, and work experience, personal achievements, motivation, communication skills (written and oral), international exposure, and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case by case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS), or show the completion of an Interlink program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Apply foundational theories and knowledge from core management and engineering disciplines to make effective business decisions based on cross-functional thinking whether in general operations and technology management or in a chosen specialty area (such as healthcare operations or technology product management).
- Apply core operations principles about processes and technologies to the design, justification, operation, assessment, and improvement

of organizational and system performance from both financial and nonfinancial perspectives.

## PROFESSIONAL CONDUCT

- Effectively lead and manage organizational and technological change that supports and improves business processes and creates value for customers.
- Develop enduring networks and relationships with industry partners.

## PATHOLOGY

**Administrative Unit:** Pathology and Laboratory Medicine

**College/School:** School of Medicine and Public Health

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.S., Ph.D.

The graduate program in cellular and molecular pathology (CMP) is a joint venture of the UW–Madison Department of Pathology and the School of Medicine and Public Health (SMPH). This interdisciplinary training environment, embedded in an exciting and challenging basic and clinical translational research context, offers a high level of intellectual stimulation for predoctoral training. The CMP curriculum is novel at the university, providing integrated training in fundamental concepts of modern pathobiology with an emphasis on biochemical, cellular and molecular approaches, and providing rigorous in-depth bench-level research training in understanding the fundamental bases of diseases. Trainees and trainers participate in rigorous pathobiology courses and activities, and are offered in-depth research training in the pathobiology of cancer, nervous and immune system diseases, and signal transduction in basic disease mechanisms.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Cellular and Molecular Pathology, M.S. (p. 546)
- Cellular and Molecular Pathology, Ph.D. (p. 547)

## PEOPLE

**Faculty:** Ahmad, Alexander, Allen-Hoffmann, Andes, Arendt, Asimakopoulos, Attie, Atwood, Bendlin, Bresnick, Broman, Burger, Burkard, Burlingham, Bushman, Capitini, Carrithers, Chen, Cho, Coon, Currie, Deming, Denlinger, Diamali, Emborg, Engin, Evans, Fabry, Fleming, Friedrich, Ge, Gern, Golos, Greenspan, Gumperz, Guo, Halberg, Hematti, Huttenlocher, Jarjour, Jones, Kenney, Kent, Kimble, Kimple, Klein, Kuo, Lakkaraju, Lamming, Lee, Lewis, Liu, Lloyd, Loeb, Messing, Mezrich, Nett, Nickells, D. O'Connor, S. O'Connor, Otto, Pepperell, Peters, Puglielli, Rapraeger, Rey, Rui, Sandor, Sauer, Seroogy, Sheehan, Sheibani, Shelif, Slukvin, J. Smith, Sondel, Sridharan, Suresh, Suzuki, Svaren, Talaat, Thorne, Vermuganti, Wheeler, Xu, Yoshino, Su-chun Zang, Zhao, W. Zhong

## CELLULAR AND MOLECULAR PATHOLOGY, M.S.

The graduate program in cellular and molecular pathology (CMP) is a joint venture of the UW–Madison Department of Pathology and the School of Medicine and Public Health (SMPH). This interdisciplinary training environment, embedded in an exciting and challenging basic and clinical translational research context, offers a high level of intellectual stimulation for predoctoral training. The CMP curriculum is novel at the university, providing integrated training in fundamental concepts of modern pathobiology with an emphasis on biochemical, cellular and molecular approaches, and providing rigorous in-depth bench-level research training in understanding the fundamental bases of diseases. | PATH 990 | Research (every semester enrolled)                                                 | 1-8     |
| PATH 750 | Cellular and Molecular Biology/ Pathology (spring semester, first year in program) | 3       |
| PATH 802 | Histopathology for Translational Scientists (fall semester, first year in program) | 3       |
| PATH 803 | Pathogenesis of Major Human Diseases (fall semester, second year in program)       | 3       |
| PATH 809 | Molecular Mechanisms of Disease (spring semester, second year in program)          | 2       |

#### MASTERS BREADTH REQUIREMENTS

Statistics course (2–4 cr); ethics course (1–2 cr); elective (minimum of one, 2–3 cr); recommended electives—PATH 807 Immunopathology: The Immune System in Health and Disease (2 cr), PATH 751 Cell and Molecular Biology of Aging (3 cr)

#### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

#### OTHER GRADE REQUIREMENTS

Students must maintain a B average or better in all graduate courses.

#### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

#### ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30. Failure to do so will result in a hold being placed on the student's registration.

## ASSESSMENTS AND EXAMINATIONS

Students must complete all required courses including PATH 809. Students must write a master thesis and defend it in front of their Advisory Committee. The MS thesis does not need to be published.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 547)

## LEARNING OUTCOMES

## KNOWLEDGE AND SKILLS

- Students will gain a better understanding of the basic mechanisms of disease at the level of cell, organ, and body, as well as the morphologic expression patterns of selected common specific disease processes.
- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
- Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Demonstrates understanding of the primary field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates clearly in ways appropriate to the field of study.

## PROFESSIONAL CONDUCT

- Commit to increase professional growth and knowledge, to attend educational programs and to personally contribute expertise to meetings and journals.
- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Ahmad, Alexander, Allen-Hoffmann, Andes, Arendt, Asimakopoulos, Attie, Atwood, Bendlin, Bresnick, Broman, Burger, Burkard, Burlingham, Bushman, Capitini, Carrithers, Chen, Cho, Coon, Currie, Deming, Denlinger, Diamali, Emborg, Engin, Evans, Fabry, Fleming, Friedl, Friedrich, Ge, Gern, Golos, Greenspan, Gumperz, Guo, Halberg, Hematti, Huttenlocher, Jarjour, Jones, Kenney, Kent, Kimble, Kimple, Klein, Kuo, Lakkaraju, Lamming, Lee, Lewis, Liu, Lloyd, Loeb, Messing, Mezrich, Nett, Nickells, D. O'Connor, S. O'Connor, Otto, Pepperell, Peters, Puglielli,

Rapraeger, Rey, Rui, Sandor, Sauer, Seroogy, Sheehan, Sheibani, Shelef, Slukvin, J. Smith, Sondel, Sridharan, Suresh, Suzuki, Svaren, Talaat, Thorne, Vermuganti, Wheeler, Xu, Yoshino, Su-chun Zang, Zhao, W. Zhong

## CELLULAR AND MOLECULAR PATHOLOGY, PH.D.

The graduate program in cellular and molecular pathology (CMP) is a joint venture of the UW-Madison Department of Pathology and the School of Medicine and Public Health (SMPH). This interdisciplinary training environment, embedded in an exciting and challenging basic and clinical translational research context, offers a high level of intellectual stimulation for predoctoral training. The CMP curriculum is novel at the university, providing integrated training in fundamental concepts of modern pathobiology with an emphasis on biochemical, cellular and molecular approaches, and providing rigorous in-depth bench-level research training in understanding the fundamental bases of diseases. Trainees and trainers participate in rigorous pathobiology courses and activities, and are offered in-depth research training in the pathobiology of cancer, nervous and immune system diseases, and signal transduction in basic disease mechanisms.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

## DOCTORAL MINOR/BREADTH REQUIREMENTS

For interdisciplinary or minor requirements, see CMP (<http://www.cmp.wisc.edu/current/phd-interdisciplinary-minor>).

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

Students must maintain a B average or better in all graduate courses.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).

3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30. Failure to do so will result in a hold being placed on the student's registration.

## ASSESSMENTS AND EXAMINATIONS

Students must complete all required courses including PATH 809. They must pass their Prelim B exam after their second year of graduate school. Students must defend their PhD thesis within five years of completion of Preliminary exam B.

## TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The Graduate School sets minimum requirements for admissions (<https://grad.wisc.edu/admissions/requirements>). Academic program admission requirements are often more rigorous than those set by the Graduate School. Please check the program's website for details.

## LEARNING OUTCOMES

## KNOWLEDGE AND SKILLS

- Students will gain a better understanding of the basic mechanisms of disease at the level of cell, organ, and body, as well as the morphologic expression patterns of selected common specific disease processes.
- Articulates research problems, potentials, and limits with respect to theory, knowledge, and practice within the field of study.
- Formulates ideas, concepts, designs, and techniques beyond the current boundaries of knowledge within the chosen field of study.
- Creates research and scholarship that makes a substantive contribution.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.
- Communicates complex ideas in a clear and understandable manner.

## PROFESSIONAL CONDUCT

- Commit to increase professional growth and knowledge, to attend educational programs and to personally contribute expertise to meetings and journals.
- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Ahmad, Alexander, Allen-Hoffmann, Andes, Arendt, Asimakopoulos, Attie, Atwood, Bendlin, Bresnick, Broman, Burger, Burkard, Burlingham, Bushman, Capitini, Carrithers, Chen, Cho, Coon, Currie, Deming, Denlinger, Diamali, Emborg, Engin, Evans, Fabry, Fleming, Friedl, Friedrich, Ge, Gern, Golos, Greenspan, Gumperz, Guo, Halberg, Hematti, Huttenlocher, Jarjour, Jones, Kenney, Kent, Kimble, Kimple, Klein, Kuo, Lakkaraju, Lamming, Lee, Lewis, Liu, Lloyd, Loeb, Messing, Mezrich, Nett, Nickells, D. ## PHARMACOLOGY

### DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE PROFESSIONAL/CERTIFICATES

- Molecular and Cellular Pharmacology, Doctoral Minor (p. 549)
- Molecular and Cellular Pharmacology, M.S. (p. 549)

## MOLECULAR AND CELLULAR PHARMACOLOGY, DOCTORAL MINOR

The objective of the doctoral minor in molecular and cellular pharmacology is to equip students with an introduction to some of the skills required to conduct state-of-the-art biomolecular, biomedical, and pharmacological basic research. Advances in biomedical sciences are often based on the development of new drugs, which improve and save the lives of millions of patients. Drugs with specific biochemical actions are also powerful research tools. They provide pharmacologists and other biomedical scientists unique research opportunities which help to elucidate cellular signaling cascades.

### STUDENT LEARNING GOALS

#### Knowledge, Skills Learning Goals

1. Gain a basic understanding of the pharmacological principles that underlie all biological processes.
2. Become aware of the current limitations of the state of understanding of this discipline and the strategies that are required to advance the field of pharmacology.

#### Professional Conduct Learning Goals

3. Fosters ethical and professional conduct in the sciences, including but not limited to: exposition of the scientific method; ethical design of

## PEOPLE

**Faculty:** Professors Anderson, Auger, Beebe, Bement, Bresnick, Chapman, Cryns, Czajkowski, Denu, Greenspan, Hardin, Hayney, Huttenlocher, Jackson, Jefcoate, Johnson, Kalejta, Kamp, Keck, Keely, Kimble, Kolesar, Kwon, Li, Martin, Miyamoto, Mosher, Murphy, Raines, Rapraeger, Schuler, Sheibani, Svaren, Thomson, Tibbetts, Wassarman, Xu, Yang, Zhang, Zhao; Associate Professors Audhya (director), Balijepalli, Burkard, Buxton, Chanda, Chang, Ge, Hornberger, Jorgensen, Kuo, Kalejta, Lee, Masters, Pagliarini, Roopra, Striker, Tang, Weaver, Wheeler, Xing; Assistant Professors, Blum, Collier, Jiang, Johannsen, M. Kimple, R. Kimple, Kreeger, Lamming, Lou, Rui, Saha, Sherer, Sridharan

## MOLECULAR AND CELLULAR PHARMACOLOGY, M.S.

The molecular and cellular pharmacology (MCP) program, in cooperation with the Center for Training in Pharmacology and Drug Development (CTPDD), offers interdisciplinary graduate training in the field of molecular and cellular pharmacology. The primary emphasis is doctoral training in molecular biology, biochemistry, genetics, and cell biology with a focus on integrating these methodologies with modern pharmacology. Other related degree programs under the direction of program faculty are cellular and molecular biology, environmental toxicology, neuroscience, biomolecular chemistry, and genetics.

The MCP program emphasizes study of the basic molecular and cellular mechanisms involved in the regulation of cellular events and cellular signal transduction mechanisms and the interaction of hormones, drugs, and chemicals with living systems. The faculty provides expertise in such challenging areas as the molecular events related to neurotransmitter receptor G-protein effector signaling; molecular structure of neurotransmitter receptors; genetic approaches to mechanisms for elucidating synaptic transmission; molecular mechanisms of action drugs of abuse and neurotransmitter transporters; phosphoinositide-generated second messengers and their regulation of membrane protein function and cell growth; regulation of tissue-specific gene transcription; molecular mechanisms of erythropoiesis;

molecular mechanisms of leukemogenesis; regulation of hormone and neurotransmitter release; mechanism of action of polypeptide hormones; peptide–hormone receptors; control of steroid synthesis; induction of drug-metabolizing enzymes; chemical initiation and prevention of cancer; mechanisms and regulation of antibiotic action and resistance. Aside from providing insight into drug action, studies in pharmacology have led to important advances in our understanding of fundamental biological processes.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of the degree coursework (15 of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 7 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (<https://molpharm.wisc.edu/admissions-how-to-apply>)

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
- Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Demonstrates understanding of the primary field of study in a historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates clearly in ways appropriate to the field of study.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Anderson, Auger, Beebe, Bement, Bresnick, Chapman, Cryns, Czajkowski, Denu, Greenspan, Hardin, Hayney, Huttenlocher, Jackson, Jefcoate, Johnson, Kalejta, Kamp, Keck, Keely, Kimble, Kolesar, Kwon, Li, Martin, Miyamoto, Mosher, Murphy, Raines, Rapraeger, Schuler, Sheibani, Svaren, Thomson, Tibbetts, Wassarman, Xu, Yang, Zhang, Zhao; Associate Professors Audhya (director), Balijepalli, Burkard, Buxton, Chanda, Chang, Ge, Hornberger, Jorgensen, Kuo, Kalejta, Lee, Masters, Pagliarini, Roopra, Striker, Tang, Weaver, Wheeler, Xing; Assistant Professors, Blum, Collier, Jiang, Johannsen, M. Kimple, R. Kimple, Kreeger, Lamming, Lou, Rui, Saha, Sherer, Sridharan

## PHARMACY—SCHOOL-WIDE

**Administrative Unit:** School of Pharmacy

**College/School:** School of Pharmacy

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S. in Pharmaceutical Sciences; M.S. in Pharmacy; M.S. in Social and Administrative in Pharmacy; Ph.D. in Pharmaceutical Sciences; Ph.D. in Social and Administrative Sciences in Pharmacy

**Minors and Certificates:** Doctoral Minor in Pharmaceutical Sciences; Doctoral Minor in Social and Administrative Sciences in Pharmacy

### PHARMACEUTICAL SCIENCES

The pharmaceutical sciences division (<https://pharmacy.wisc.edu/psd>) at the School of Pharmacy offers the doctor of philosophy (Ph.D.) degree in pharmaceutical sciences (students are accepted only for the Ph.D. program; the master of science degree is awarded only under special circumstances). The program provides a rigorous background in a range of scientific disciplines that are critical to the success of modern pharmaceutical scientists. The program's interdisciplinary design combines pharmaceutically relevant aspects of classical disciplines such as chemistry, biology, and engineering. Students concentrate in one of three research cores: drug discovery, drug action, or drug delivery. Extensive communication and collaboration occur between these cores,

mirroring the importance of interdisciplinary research teams in the pharmaceutical field.

### PHARMACY

The pharmacy master's program is a two-year, combined pharmacy administrative residency (ASHP Accredited PGY1 and PGY2) and academic degree program, which culminates in a master of science degree, emphasizing health system pharmacy management and leadership. **Applicants to the pharmacy M.S. program must be eligible for licensure as a pharmacist in the State of Wisconsin.** The program is designed to provide the resident/student with a solid academic foundation and experience in the administration of exemplary pharmaceutical services across an integrated health system.

### SOCIAL AND ADMINISTRATIVE SCIENCES IN PHARMACY

The graduate program in social and administrative sciences in pharmacy (SAS) provides a rigorous background in a range of disciplines critical to preparing the next generation of health services researchers. The program focuses on scientific and humanistic bases for understanding and influencing interactions involving patients, medications, pharmacists, other caregivers, and health care systems. Further, it evaluates the need for pharmacists to fulfill various roles, such as clinical practitioner, drug consultant, and drug distribution system manager, in order to meet the needs of diverse patients, providers, and organizations that utilize pharmacy services.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Pharmaceutical Sciences, Doctoral Minor (p. 552)
- Pharmaceutical Sciences, M.S. (p. 552)
- Pharmaceutical Sciences, Ph.D. (p. 554)
- Pharmacy, M.S. (p. 556)
- Social and Administrative Sciences in Pharmacy, Doctoral Minor (p. 558)
- Social and Administrative Sciences in Pharmacy, M.S. (p. 558)
- Social and Administrative Sciences in Pharmacy, Ph.D. (p. 560)

## RESOURCES

### FACILITIES

The pharmaceutical sciences division is housed in Rennebohm Hall (<http://www.pharmacy.wisc.edu/about-school/rennebohm-hall>), a seven-story, state-of-the-art facility that opened in 2001 and offers 120,000 assignable square feet. The pharmaceutical sciences division comprises floors 4 to 7 of Rennebohm Hall and features 34 laboratories; affiliate Pharmaceutical Sciences graduate faculty are housed at other campus buildings. Located on the northwest edge of campus, Rennebohm Hall is in close proximity to the Health Sciences Learning Center (home of the UW School of Medicine and Public Health), UW Hospital and Clinics, the UW Institute for Clinical and Translational Research (ICTR), the Waisman Center, the Wisconsin Institutes for Medical Research (WIMR), the School of Veterinary Medicine, the School of Nursing, and Ebling Library for the Health Sciences. Many researchers affiliated with Wisconsin's Carbone Comprehensive Cancer Center work within these adjacent facilities.

Exceptional research facilities and equipment are highlighted by the school's Analytical Instrumentation Center (AIC) (<http://www.pharmacy.wisc.edu/aic>), comprising mass spectrometry, nuclear magnetic resonance, spectroscopy, and spectrophotometry facilities. The AIC's high-tech instrumentation expedites the isolation and full structural elucidation of small molecules. These chemical entities can be subsequently evaluated via high throughput screening toward lead generation, or specifically utilized to prove novel biological phenomenon toward in-depth mechanistic study. The division offers centralized facilities for computer-aided drug and catalyst design, real-time PCR, gene array detectors, gas chromatographs, high-pressure liquid chromatographs, cell culture, ultra-centrifuges, scintillation counters, and animal care for a variety of species.

The school's Lenor Zeeh Pharmaceutical Experiment Station (<http://www.pharmacy.wisc.edu/zstation>) is a not-for-profit, self-sustaining center of expertise serving faculty researchers across the UW–Madison campus as well as private-sector drug product development. The station provides laboratory services related to compound physical/chemical characterization and basic formulation development to support preclinical development of promising drug candidates and other unmet pharmaceutical-related needs. Pharmaceutical sciences graduate students are eligible to participate in summer internships at the station. Pharmaceutical sciences also houses the university's Medicinal Chemistry Center (<https://pharmacy.wisc.edu/mcc>) (MCC), whose mission is to provide drug discovery expertise to the UW medical community and drive translational research at UW–Madison through designing and synthesizing novel small molecule based therapeutics. Pharmaceutical sciences faculty direct the MCC.

## PHARMACEUTICAL SCIENCES, DOCTORAL MINOR

## PHARMACEUTICAL SCIENCES, M.S.

The pharmaceutical sciences division (<https://pharmacy.wisc.edu/psd>) at the School of Pharmacy offers the doctor of philosophy (Ph.D.) degree in pharmaceutical sciences (students are accepted only for the Ph.D. program; the master of science degree is awarded only under special circumstances). The program provides a rigorous background in a range of scientific disciplines that are critical to the success of modern pharmaceutical scientists. The program's interdisciplinary design combines pharmaceutically relevant aspects of classical disciplines such as chemistry, biology, and engineering. Students concentrate in one of three research cores: drug discovery, drug action, or drug delivery. Extensive communication and collaboration occur between these cores, mirroring the importance of interdisciplinary research teams in the pharmaceutical field.

To enhance a required core curriculum (<https://pharmacy.wisc.edu/programs/pharmsci/curriculum>), an individualized course of study is planned with a faculty advisor. A list of pharmaceutical sciences graduate faculty and their respective areas of research specialization is available from the division website (<https://pharmacy.wisc.edu/psd/faculty-research>) and related links. The pharmaceutical sciences graduate program has educated generations of scientists for challenging positions in industry, academia, and government.

Research in *drug discovery* (<https://pharmacy.wisc.edu/psd/drug-discovery-core>) focuses on areas related to medicinal chemistry, such as small molecule development, natural products isolation and characterization, organic synthesis, chemical biology, and rational drug design.

*Drug action* (<https://pharmacy.wisc.edu/psd/drug-action-core>) focuses on areas related to pharmacology, toxicology, cellular differentiation, development, and disease. Interests include the impact of drugs and toxins on biological systems, mechanisms of normal biology, and mechanisms of disease. These are studied at the cellular, genetic, molecular, and biochemical levels using diverse model systems.

*Drug delivery* (<https://pharmacy.wisc.edu/psd/drug-delivery-core>) (pharmaceutics) emphasizes principles in physical chemistry and drug transport, aiming for advances in formulation, drug targeting, and multimodal therapy. Delivery research includes the solid-state chemistry of drugs, nano-pharmacy, biocompatibility, molecular recognition, computational chemistry, pharmacokinetics, and molecular imaging.

## POSTGRADUATE INFORMATION

Recent program graduates have found employment in a variety of industrial, academic, and regulatory positions. These vary from research and development and other scientific roles for pharmaceutical, chemical, and biotechnology companies to academic research positions; some graduates eventually achieve faculty positions at small colleges or at larger research institutions. By partnering with other career services units on campus, the program has increased career services such that students can sharpen their professional and communication skills and reach a larger network of potential employers. The program graduated 37 Ph.D.s from 2011 to 2015; over 90 percent of these recent alumni were professionally placed within six months of graduation. For more information on first professional placement following graduation, see employers of recent pharmsci graduates on the program website (<https://pharmacy.wisc.edu/programs/pharmsci/student-outcomes>). Faculty and the school's graduate programs coordinator can be consulted for specific career information (both initial placement and longer-term employment information regarding Ph.D. alumni).

## FUNDING

Financial support is provided to all graduate students in pharmaceutical sciences through a combined mechanism of fellowships, teaching assistantships, research assistantships, and project assistantships. Funding packages for first-year students in the Ph.D. program are provided by the School of Pharmacy and consist of a mixture of fellowships and/or teaching assistant support. In addition, first-year students earn \$1500 in flexible funds to aid in the transition to Madison. After the first academic year, students are supported by their thesis advisor through research assistantship or teaching assistantship appointments. All students receive a stipend (the recommended minimum level for students in the division is \$24,000 for 2015–16), full tuition remission (waiver), and reasonably priced, comprehensive health insurance for the duration of their Ph.D. studies, if they retain good academic standing and a faculty advisor.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (15 credits out of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions (the student must have graduate student status on the other institution's transcript at the time the courses were taken). Coursework should be presented to the SoP graduate dean in the first semester of enrollment for consideration. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits of UW-Madison courses numbered 500 or above (earned as a UW-Madison undergraduate) toward the M.S. degree. Coursework should be presented to the SoP graduate dean in the first semester of enrollment for consideration. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 500 or above taken as a UW-Madison special student. Coursework should be presented to the SoP graduate dean in the first semester of enrollment for consideration. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits (fall and spring); 12 credits summer

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code                                                                                                                                                                 | Title                                                                                                             | Credits |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|---------|
| PHM SCI 780                                                                                                                                                          | Principles of Pharmaceutical Sciences                                                                             | 3       |
| Select at least two of the following core courses:                                                                                                                   |                                                                                                                   |         |
| PHM SCI 768                                                                                                                                                          | Pharmacokinetics                                                                                                  |         |
| PHM SCI 786                                                                                                                                                          | Natural Product Synthesis, Biosynthesis and Drug Discovery                                                        |         |
| BIOCHEM/<br>PHM COL-M/<br>ZOOLOGY 630                                                                                                                                | Cellular Signal Transduction Mechanisms                                                                           |         |
| Research ethics/responsible conduct of research course                                                                                                               |                                                                                                                   | 1       |
| At least one additional graduate course in pharmaceutical sciences or in a field related to one's research (field choice is at the discretion of the thesis advisor) |                                                                                                                   | 3       |
| Complete a Research course (PHM SCI 718-PHM SCI 990)                                                                                                                 |                                                                                                                   | 1-12    |
| PHM SCI 931                                                                                                                                                          | Pharmaceutical Sciences Seminar (required every fall term during enrollment as a graduate student in the program) | 1       |
| PHM SCI 932                                                                                                                                                          | Pharmaceutical Sciences Seminar (required every spring during enrollment as a graduate student in the program)    | 1       |
| Total Credits                                                                                                                                                        |                                                                                                                   | 10-21   |

Thesis advisors have the option to require additional courses beyond the minimum requirements listed above.

### OVERALL GRADUATE GPA REQUIREMENT

An overall minimum GPA of 3.0 in graduate level (300 level or higher, non-research) courses is required, unless conditions for probationary status require higher grades.

### OTHER GRADE REQUIREMENTS

Candidates will be dropped from the program if they receive more than 7 credits of grades at the BC level or lower. This applies to formal courses and research credits.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

### ADVISOR / COMMITTEE

Students are required to maintain a pharmaceutical sciences faculty member as an M.S. advisor through the duration of their studies. Typically a permanent advisor is found by the end of one's first semester.

An M.S. thesis committee in the Pharmaceutical Sciences Division (PSD) consists of at least three graduate faculty members of the PSD (one of whom is the student's thesis advisor).

## ASSESSMENTS AND EXAMINATIONS

The program expects the M.S. candidate to engage in a research project of a scope appropriate to the time devoted to earning the degree. The results of the research must be described in an M.S. thesis. The thesis must be both presented and defended before the student's M.S. thesis committee.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 554)

## LEARNING OUTCOMES

## KNOWLEDGE AND SKILLS

- Demonstrate critical knowledge and in-depth understanding of principles in the student's area of expertise.
- Identify important research questions, formulate testable hypotheses, and design experiments to test those hypotheses.
- Conduct original research that contributes to the student's field of study.
- Communicate scientific knowledge and research results effectively to a range of audiences.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.

## PROFESSIONAL CONDUCT

- Apply ethical principles in conducting scientific research.

## PHARMACEUTICAL SCIENCES, PH.D.

The pharmaceutical sciences division (<https://pharmacy.wisc.edu/psd>) at the School of Pharmacy offers the doctor of philosophy (Ph.D.) degree in pharmaceutical sciences (students are accepted only for the Ph.D. program; the master of science degree is awarded only under special circumstances). The program provides a rigorous background in a range of scientific disciplines that are critical to the success of modern pharmaceutical scientists. The program's interdisciplinary design combines pharmaceutically relevant aspects of classical disciplines such as chemistry, biology, and engineering. Students concentrate in one of three research cores: drug discovery, drug action, or drug delivery.

Extensive communication and collaboration occur between these cores, mirroring the importance of interdisciplinary research teams in the pharmaceutical field.

To enhance a required core curriculum (<https://pharmacy.wisc.edu/programs/pharmsci/curriculum>), an individualized course of study is planned with a faculty advisor. A list of pharmaceutical sciences graduate faculty and their respective areas of research specialization is available from the division website (<https://pharmacy.wisc.edu/psd/faculty-research>) and related links. The pharmaceutical sciences graduate program has educated generations of scientists for challenging positions in industry, academia, and government.

Research in *drug discovery* (<https://pharmacy.wisc.edu/psd/drug-discovery-core>) focuses on areas related to medicinal chemistry, such as small molecule development, natural products isolation and characterization, organic synthesis, chemical biology, and rational drug design.

*Drug action* (<https://pharmacy.wisc.edu/psd/drug-action-core>) focuses on areas related to pharmacology, toxicology, cellular differentiation, development, and disease. Interests include the impact of drugs and toxins on biological systems, mechanisms of normal biology, and mechanisms of disease. These are studied at the cellular, genetic, molecular, and biochemical levels using diverse model systems.

*Drug delivery* (<https://pharmacy.wisc.edu/psd/drug-delivery-core>) (pharmaceutics) emphasizes principles in physical chemistry and drug transport, aiming for advances in formulation, drug targeting, and multimodal therapy. Delivery research includes the solid-state chemistry of drugs, nano-pharmacy, biocompatibility, molecular recognition, computational chemistry, pharmacokinetics, and molecular imaging.

## POSTGRADUATE INFORMATION

Recent program graduates have found employment in a variety of industrial, academic, and regulatory positions. These vary from research and development and other scientific roles for pharmaceutical, chemical, and biotechnology companies to academic research positions; some graduates eventually achieve faculty positions at small colleges or at larger research institutions. By partnering with other career services units on campus, the program has increased career services such that students can sharpen their professional and communication skills and reach a larger network of potential employers. The program graduated 37 Ph.D.s from 2011 to 2015; over 90 percent of these recent alumni were professionally placed within six months of graduation. For more information on first professional placement following graduation, see employers of recent pharmsci graduates on the program website (<https://pharmacy.wisc.edu/programs/pharmsci/student-outcomes>). Faculty and the school's graduate programs coordinator can be consulted for specific career information (both initial placement and longer-term employment information regarding Ph.D. alumni).

## FUNDING

Financial support is provided to all graduate students in pharmaceutical sciences through a combined mechanism of fellowships, teaching assistantships, research assistantships, and project assistantships. Funding packages for first-year students in the Ph.D. program are provided by the School of Pharmacy and consist of a mixture of fellowships and/or teaching assistant support. In addition, first-year students earn \$1500 in flexible funds to aid in the transition to Madison. After the first academic year, students are supported by their thesis

advisor through research assistantship or teaching assistantship appointments. All students receive a stipend (the recommended minimum level for students in the division is \$24,000 for 2015–16), full tuition remission (waiver), and reasonably priced, comprehensive health insurance for the duration of their Ph.D. studies, if they retain good academic standing and a faculty advisor.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (26 credits out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 15 credits of graduate coursework from other institutions (the student must have graduate student status on the other institution's transcript at the time the courses were taken). Coursework should be presented to the SoP graduate dean in the first semester of enrollment for consideration. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With approval of the School of Pharmacy's graduate studies dean, students are allowed to count no more than 7 credits of UW–Madison courses numbered 500 or above (earned as a UW–Madison undergraduate) toward the Ph.D. degree. Coursework should be presented to the SoP graduate dean in the first semester of enrollment for consideration. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW–Madison special student. Coursework should be presented to the SoP graduate

dean in the first semester of enrollment for consideration. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

Non-dissertators may enroll in a maximum of 15 credits per fall/spring term and 12 credits in the summer; dissertators may enroll in a maximum of 3 credits each session (fall, spring, summer).

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code                                                                                                                                                                                                       | Title                                                                                                             | Credits |

| Select at least two of the following core courses:                                                                                                                                                         |                                                                                                                   |         |
| PHM SCI 768                                                                                                                                                                                                | Pharmacokinetics                                                                                                  |         |
| PHM SCI 786                                                                                                                                                                                                | Natural Product Synthesis, Biosynthesis and Drug Discovery                                                        |         |
| BIOCHEM/<br>PHM COL-M/<br>ZOOLOGY 630                                                                                                                                                                      | Cellular Signal Transduction Mechanisms                                                                           |         |
| Research ethics/responsible conduct of research course                                                                                                                                                     |                                                                                                                   | 1       |
| Three additional credits from the Drug Action, Drug Delivery, or Drug Discovery elective lists are required (courses meeting this requirement are listed in the Pharmaceutical Sciences Graduate Handbook) |                                                                                                                   | 3       |
| Complete a Research course (PHM SCI 718–PHM SCI 990)                                                                                                                                                       |                                                                                                                   | 1–12    |
| PHM SCI 931                                                                                                                                                                                                | Pharmaceutical Sciences Seminar (required every fall term during enrollment as a graduate student in the program) | 1       |
| PHM SCI 932                                                                                                                                                                                                | Pharmaceutical Sciences Seminar (required every spring during enrollment as a graduate student in the program)    | 1       |
| Total Credits                                                                                                                                                                                              |                                                                                                                   | 10–21   |

Faculty advisors have the option to require additional courses beyond the minimum requirements listed above.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

No doctoral minor is required.

### OVERALL GRADUATE GPA REQUIREMENT

An overall minimum GPA of 3.0 in graduate level (300 level or higher, non-research) courses is required, unless conditions for probationary status require higher grades.

### OTHER GRADE REQUIREMENTS

Candidates will be dropped from the program if they receive more than 7 credits of grades at the BC level or lower. This applies to formal courses and research credits.

### PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or

allowed to continue for one additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students in the Ph.D. program are required to have a major professor/advisor through the duration of their studies. Typically a permanent advisor is found by the end of one's first semester.

All students are required to conduct a progress report meeting with their thesis committee each year after passing the preliminary exam. The progress meeting must be scheduled by mid-May and completed by the end of August of each consecutive academic year. For details on the progress report, see the PSD Student Handbook (<https://pharmacy.wisc.edu/graduate-handbook-pharmaceutical-sciences/progress-report>). For details on the composition requirements of the Ph.D. thesis committee, see Thesis Committee (<https://pharmacy.wisc.edu/graduate-handbook-pharmaceutical-sciences/thesis-committee>) in the PSD Student Handbook.

## ASSESSMENTS AND EXAMINATIONS

The preliminary examination is expected to be completed before the beginning of the third year of graduate study. For specifics regarding the Preliminary Examination's structure and requirements, see Preliminary Examination (<https://pharmacy.wisc.edu/graduate-handbook-pharmaceutical-sciences/preliminary-examination>) in the PSD Student Handbook.

A final oral defense of the dissertation is required; for more on the dissertation defense, see Ph.D. Thesis Defense (<https://pharmacy.wisc.edu/graduate-handbook-pharmaceutical-sciences/phd-thesis-defense>) in the PSD Student Handbook.

## TIME CONSTRAINTS

It is expected that Ph.D. major course requirements will be completed by the end of year two in the program.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Accepted graduate students commonly have strong scientific backgrounds, a passion for research, and significant laboratory experience. Students with undergraduate degrees in the physical or biological sciences, engineering, pharmacy, and related fields are encouraged to apply.

Please see admissions (<https://pharmacy.wisc.edu/programs/pharmsci/admissions>) on the program website for the application deadline and required supplemental materials.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate critical knowledge and in-depth understanding of principles in the student's area of expertise.
- Identify important research questions, formulate testable hypotheses, and design experiments to test those hypotheses.
- Conduct original research that contributes to the student's field of study.
- Communicate scientific knowledge and research results effectively to a range of audiences.
- Demonstrates breadth within their learning experiences.
- Advances contributions of the field of study to society.

### PROFESSIONAL CONDUCT

- Apply ethical principles in conducting scientific research.

## PHARMACY, M.S.

The pharmacy master's program is a two-year, combined pharmacy administrative residency (ASHP Accredited PGY1 and PGY2) and academic degree program, which culminates in a master of science degree, emphasizing health system pharmacy management and leadership. **Applicants to the pharmacy M.S. program must be eligible for licensure as a pharmacist in the State of Wisconsin.** The program is designed to provide the resident/student with a solid academic foundation and experience in the administration of exemplary pharmaceutical services across an integrated health system.

The primary objective of the program is to develop health system pharmacy administrators who are trained and prepared to immediately assume administrative leadership positions within large, integrated health care delivery systems at the level of managers and assistant directors, and eventually as directors of pharmacy. These positions include oversight of pharmacy operations, clinical programs, medication safety, new business development, supply chain, and so on. Residents complete patient care and management rotations in the first year of the program, and advanced administrative and elective rotations in the second year (chosen from a variety of settings, as desired by the resident). The curriculum's flexibility allows for specialization in administrative areas that best complement the student's career goals. Resident activities are varied in scope, depending on each individual's background and areas of interest.

A detailed program overview (including a description of rotations; program strengths; resident competency objectives; projects; presentation and teaching opportunities) is available here ([http://www.uwhealth.org/files/uwhealth/docs/pdf6/Admin\\_Residency\\_Program\\_Summary.pdf](http://www.uwhealth.org/files/uwhealth/docs/pdf6/Admin_Residency_Program_Summary.pdf)).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

36 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

36 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (19 credits out of 36 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 3 credits of graduate or Pharm.D. coursework from other institutions (so long as the credits are earned post-baccalaureate) toward the M.S. in pharmacy. The coursework should be presented to program administrators in the first semester of enrollment for evaluation. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No coursework taken as a UW-Madison undergraduate may be used to fulfill course requirements in the M.S. degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

No coursework taken as a UW-Madison University Special student may be used to fulfill course requirements in the M.S. degree.

### CREDITS PER TERM ALLOWED

15 credits (fall and spring); 12 credits summer

### PROGRAM-SPECIFIC COURSES REQUIRED

Completion of a set of core courses is required. A Health System Pharmacy seminar is required each semester. Other required courses include Human Resources Management, Health System Pharmacy Data Analysis and Informatics, Healthcare Operations Management, Managing Technological and Organizational Change, Health Systems Management and Policy, Advanced Health-System Pharmacy Administration, and

Advanced Independent Study (Research). Contact the graduate programs coordinator for the current curriculum or consult the program website.

Further, pharmacy residency requirements are presented at this link (<http://www.uwhealth.org/health-professionals/internships/pharmacy-administrative-residency/rotations/31908>).

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

Candidates will be dropped from the program if they receive more than 7 credits of grades at the BC level or lower. This applies to formal courses, seminars, and research credits.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

The UWHC Department of Pharmacy also has a disciplinary procedure/policy for its residents; contact the graduate programs coordinator or the UWHC Department of Pharmacy for details.

### ADVISOR / COMMITTEE

Students/residents are regularly reviewed by the UW Health director of pharmacy and the program's other preceptors.

### ASSESSMENTS AND EXAMINATIONS

A master's research project is required. Contact the School of Pharmacy graduate programs coordinator or the program for more information.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Further, that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants should submit through the standard Pharmacy Online Residency Centralized Application Service (PhORCAS). For details on the requirements of this application process, including supplemental information required by PhORCAS, see the area regarding "pharmacy administrative residency-applying to the program" on the UW Health website (<http://www.uwhealth.org/health-professionals/internships/pharmacy-administrative-residency/applying/31924>). Included in these instructions are the procedures one must take to apply to the UW Graduate School. **Applications must be received by the end of the first Monday in January**; the residency historically begins the third full week of June and M.S. coursework begins in early September. Applications

are not reviewed at any other time during the year. **Applicants to the M.S. program must be eligible for licensure as a pharmacist in Wisconsin due to the program's pharmacy residency requirements.**

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Thorough understanding of the organization and the components of an integrated health care system as they relate to the continuum of pharmaceutical care across the health system including acute care, ambulatory care, home care, and other settings.
- Administration of pharmacy service networks as part of the integrated health system and the relationships of the components of the pharmacy regional health system (e.g.: inpatient care, retail and mail service pharmacy, managed care pharmacy programs, specialty pharmacy services, hospice care, home care and pharmacy consulting programs).
- Thorough understanding of how to design, implement, manage and improve a safe and effective medication use system. This includes an understanding of information technology and other automated systems required to support comprehensive pharmacy services across the integrated health system.
- Ability to perform technology assessment studies for new systems technology.
- Knowledge and expertise in managing drug policy including an understanding of the importance of such a program in supporting evidence-based care throughout an integrated health system.
- Role of pharmacy in conducting and supporting drug research as well as understanding principles of conducting research in administrative science and pharmacy practice.

### PROFESSIONAL CONDUCT

- Development of personal leadership qualities and business acumen essential to operate efficiently within a hospital and health system and advance the profession and practice of pharmacy.
- Development of business knowledge and skills in the following areas: communication techniques, problem identification and solving, project management, decision making, productivity management, quality methodologies, organizational design and behavior, cost/benefit analysis, technology assessment and strategic planning.

### ADDITIONAL LEARNING GOALS

- Administrative skills in the principles of supply chain management, human resource management, financial management, pharmaceutical reimbursement, revenue cycle management, narcotic control, labor relations and pharmacy regulations and law.
- Understanding the role of pharmacy in education and research as part of an academic medical center as well as the integration of education and research into practice. This involves the provision of evidence-based, patient centered medication therapy management with various members of the health care team in an interdisciplinary fashion and teaching of pharmacy students. In addition, residents will develop an understanding of the importance of public service and education in an academic medical center.
- Ability to create, promote, and market the pharmacy's role within integrated health care systems thorough understanding of

medication safety standards required to ensure a safe medication use system across the integrated health system.

## SOCIAL AND ADMINISTRATIVE SCIENCES IN PHARMACY, DOCTORAL MINOR

Admission is suspended for this doctoral minor. The minor is discontinued effective spring 2018.

## SOCIAL AND ADMINISTRATIVE SCIENCES IN PHARMACY, M.S.

The graduate program in social and administrative sciences in pharmacy (SAS) provides a rigorous background in a range of disciplines critical to preparing the next generation of health services researchers. The program focuses on scientific and humanistic bases for understanding and influencing interactions involving patients, medications, pharmacists, other caregivers, and health care systems. Further, it evaluates the need for pharmacists to fulfill various roles, such as clinical practitioner, drug consultant, and drug distribution system manager, in order to meet the needs of diverse patients, providers, and organizations that utilize pharmacy services.

The program's interdisciplinary approach integrates knowledge of pharmacy and pharmaceuticals with knowledge from disciplines such as economics, sociology, psychology, management sciences, communications, education, epidemiology, law, industrial/safety engineering, ethics and history. The overall objective of the program is to prepare students to carry out independent, theory-based research leading to new knowledge and understanding of medication use and safety, patient and provider communication and behaviors, health outcomes, health care systems, and the pharmacy profession. For additional SAS faculty information, see faculty research interests on the SAS website (<http://pharmacy.wisc.edu/faculty-research/social-administrative-sciences-division/faculty-research>).

The SAS graduate program has considerable curricular flexibility and can be tailored to the interests of individual students, allowing specialization in diverse areas of emphasis. Facilitating student support is a high priority; division faculty work to ensure that students have sufficient funding support to be successful. Incoming students are provided with computing and technology resources for their learning and research endeavors. Travel funding allows students to present their research findings at national meetings. The Sonderegger Research Center (<http://www.pharmacy.wisc.edu/src>) is housed within the division.

The program maintains uniform admission requirements, M.S. and Ph.D. course and credit requirements, and procedures for monitoring student progress and program quality. The SAS graduate student handbook (<http://pharmacy.wisc.edu/handbook-social-administrative-sciences-m-s-ph-d>) provides this information in detail. See also the program brochure (<http://pharmacy.wisc.edu/sites/default/files/content/education/social-administrative-sciences-pharmacy-ms-phd/sasgradprogram.pdf>).

A dual PharmD–M.S. degree program in SAS was recently approved. The dual degree program is an opportunity for professional pharmacy students to pursue an M.S. degree in SAS while completing requirements

for their professional pharmacy degree. See the School of Pharmacy's graduate programs coordinator (contact information below) for more information about this dual degree's specifics.

## POST-GRADUATE INFORMATION

Placement information for recent SAS alumni is updated yearly; see the program website (<http://pharmacy.wisc.edu/education/social-administrative-sciences-pharmacy-ms-phd/admissions/recent-grads>). SAS has a rich history of creating future pharmacy educators. Beyond academia, common career setting options are the pharmaceutical industry, managed care, contract research organizations, and consulting.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., dual Pharm.D./M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (at least 17 credits out of 32 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 16 credits of graduate coursework from other institutions (the student must have graduate student status on the other institution's transcript at the time the courses were taken). Such courses should be presented to SAS faculty prior to one's first graduate semester and require the review/approval of at least two SAS faculty members. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE/PROFESSIONAL

With program approval, students are allowed to count no more than 7 credits of UW-Madison courses numbered 700 or above (earned as a UW-Madison undergraduate or professional student) toward the M.S. Such courses should be presented to SAS faculty prior to one's first graduate semester and require the review/approval of at least two SAS

faculty members. Note: The above does not apply to students enrolled in the dual Pharm.D.-M.S. (SAS) program.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 7 credits of coursework numbered 700 or above taken as a UW-Madison Special student. Such courses should be presented to SAS faculty prior to one's first graduate semester and require the review/approval of at least two SAS faculty members. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits (fall and spring); 12 credits summer

### PROGRAM-SPECIFIC COURSES REQUIRED

Completion of a set of core courses is required. At least 8 credits in core courses, 9 credits in methods of research and analysis, and 11 credits in specialty/advanced courses are required. See this link (<https://pharmacy.wisc.edu/programs/sas/masters-degree>) for specific M.S. curriculum information.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required for graduate-level courses (numbered 300 and above, excluding research) to receive a degree.

### OTHER GRADE REQUIREMENTS

Candidates will be dropped from the program if they receive more than 7 credits of grades at the BC level or lower. This applies to formal courses, seminars, and research credits.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good Standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

### ADVISOR / COMMITTEE

Students are required to maintain a SAS faculty member as an M.S. advisor through the duration of their studies. Students should select a permanent major professor before the end of the second semester enrolled in the program. SAS graduate faculty monitor the progress of M.S. students annually.

Composition requirements of the SAS M.S. thesis committee are presented at this link (<https://pharmacy.wisc.edu/handbook-sas/ms-degree-requirements/ms-thesis-and-examination>).

### ASSESSMENTS AND EXAMINATIONS

A formal master's thesis based on original research is required and must be defended orally. For specific details, see this link (<https://pharmacy.wisc.edu/handbook-sas/ms-degree-requirements/ms-thesis-and-examination>).

## TIME CONSTRAINTS

The SAS M.S. is designed to be completed in two years.

Master's degree students who have been absent for five or more consecutive years lose all credits that were earned before their absence. Further, that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Only candidates with an emphasis in the history of pharmacy are required to attain competence in one foreign language. Contact the School's graduate programs coordinator for more information.

## ADMISSIONS

The online application and all supplemental materials (official transcripts, three letters of recommendation, Graduate Record Exam (GRE) scores, statement of purpose for attending graduate school, resume/CV, School of Pharmacy's financial aids statement) must be received by **January 1** for consideration for matriculation in the following fall semester.

**Applications are not reviewed at any other time during the year.**

A professional degree in pharmacy is helpful, but not required, for applicants to the SAS graduate program. Academic backgrounds in public health, sociology, industrial engineering, or economics, for example, are well suited for graduate study in SAS. Those with pharmacy-type work experience or a degree in a related field are invited to inquire about the compatibility of their background for admissions purposes.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate critical knowledge and in-depth understanding of principles in the core area of the program and the student's area of expertise.
- Identify important research questions, formulate testable hypotheses, and design experiments to test those hypotheses.
- Conduct original research that contributes to the student's field of study.
- Communicate, both orally and in writing, scientific knowledge and research results effectively to a range of audiences.
- Demonstrate ability to teach SAS concepts and principles to a range of audiences.

### PROFESSIONAL CONDUCT

- Apply ethical principles in conducting scientific research.

## SOCIAL AND ADMINISTRATIVE SCIENCES IN PHARMACY, PH.D.

The graduate program in social and administrative sciences in pharmacy (SAS) provides a rigorous background in a range of disciplines critical to preparing the next generation of health services researchers. The program focuses on scientific and humanistic bases for understanding and influencing interactions involving patients, medications, pharmacists, other caregivers, and health care systems. Further, it evaluates the need for pharmacists to fulfill various roles, such as clinical practitioner, drug

consultant, and drug distribution system manager, in order to meet the needs of diverse patients, providers, and organizations that utilize pharmacy services.

The program's interdisciplinary approach integrates knowledge of pharmacy and pharmaceuticals with knowledge from disciplines such as economics, sociology, psychology, management sciences, communications, education, epidemiology, law, industrial/safety engineering, ethics and history. The overall objective of the program is to prepare students to carry out independent, theory-based research leading to new knowledge and understanding of medication use and safety, patient and provider communication and behaviors, health outcomes, health care systems, and the pharmacy profession. For additional SAS faculty information, see faculty research interests on the SAS website (<http://pharmacy.wisc.edu/faculty-research/social-administrative-sciences-division/faculty-research>).

The SAS graduate program has considerable curricular flexibility and can be tailored to the interests of individual students, allowing specialization in diverse areas of emphasis. Facilitating student support is a high priority; division faculty work to ensure that students have sufficient funding support to be successful. Incoming students are provided with computing and technology resources for their learning and research endeavors. Travel funding allows students to present their research findings at national meetings. The Sonderegger Research Center (<http://www.pharmacy.wisc.edu/src>) is housed within the division.

The program maintains uniform admission requirements, M.S. and Ph.D. course and credit requirements, and procedures for monitoring student progress and program quality. The SAS graduate student handbook (<http://pharmacy.wisc.edu/handbook-social-administrative-sciences-m-s-ph-d>) provides this information in detail. See also the program brochure (<http://pharmacy.wisc.edu/sites/default/files/content/education/social-administrative-sciences-pharmacy-ms-phd/sasgradprogram.pdf>).

A dual PharmD–M.S. degree program in SAS was recently approved. The dual degree program is an opportunity for professional pharmacy students to pursue an M.S. degree in SAS while completing requirements for their professional pharmacy degree. See the School of Pharmacy's graduate programs coordinator (contact information below) for more information about this dual degree's specifics.

### POST-GRADUATE INFORMATION

Placement information for recent SAS alumni is updated yearly; see the program website (<http://pharmacy.wisc.edu/education/social-administrative-sciences-pharmacy-ms-phd/admissions/recent-grads>). SAS has a rich history of creating future pharmacy educators. Beyond academia, common career setting options are the pharmaceutical industry, managed care, contract research organizations, and consulting.

## FUNDING

Prospective students should see the program website (<https://pharmacy.wisc.edu/programs/sas/tuition-financial-support>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

56 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (at least 29 credits out of 56 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

If accepted into the SAS Ph.D. program with a master's degree equivalent to an M.S. (SAS) degree and with program approval, students are allowed to count no more than 24 credits of graduate coursework from other institutions (the student must have graduate student status on the other institution's transcript at the time the courses were taken) towards the Ph.D. at UW–Madison. Such courses should be presented to SAS faculty prior to one's first graduate semester and require the review/approval of at least two SAS faculty members. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits earned as a UW–Madison undergraduate may be used toward achieving the 24 credits beyond the M.S. that are required for the Ph.D. in SAS.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

No credits earned as a UW–Madison Special student may be used toward achieving the 24 credits beyond the M.S. that are required for the Ph.D. in SAS.

### CREDITS PER TERM ALLOWED

Non-dissertators may enroll in a maximum of 15 credits per fall/spring term and 12 credits in the summer; dissertators may enroll in a maximum of 3 credits each session (fall, spring, summer).

### PROGRAM-SPECIFIC COURSES REQUIRED

Completion of a set of courses is required. At least 16 credits in core courses (seminar, core principles, and core methods), 15 credits in research and analysis (additional research methods, analytic techniques), and 19 credits in specialty/advanced courses is required.

See this link (<https://pharmacy.wisc.edu/programs/sas/doctoral-degree>) for specific doctoral curriculum information.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a doctoral minor. Students can complete a concentrated (Option A) or distributed (Option B) minor. Students completing Option A minors follow the requirements of the minor department. Students completing option B minors must complete a minimum of 10 credits outside their major department, reflecting a cohesive and logical combination of courses for specialization emphasis. Courses for an option B minor follow the Graduate School requirements for type, level, GPA, and timing for the minor coursework. The doctoral minor is developed and finalized by the student and faculty advisor as a plan for specialization courses within the Ph.D. program requirements. In SAS, a faculty committee composed of members of the student's preliminary examination committee approves the minor plan. The minor plan should be approved before courses qualifying for the minor are completed. Some courses in the minor plan may be completed before the plan is submitted, but at least half of the minor coursework must be completed after the minor plan is submitted and approved by the student's committee. The minor represents the theoretical foundation for the PhD and should consist of a majority of courses that are theory focused (i.e., not methods or analytical techniques); such theoretical courses should comprise all or most of the minor plan.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required for graduate-level courses (numbered 300 and above, excluding research) to receive a degree.

### OTHER GRADE REQUIREMENTS

Candidates will be dropped from the program if they receive more than 7 credits of grades at the BC level or lower. This applies to formal courses, seminars, and research credits.

### PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full-time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

### ADVISOR / COMMITTEE

All students in the Ph.D. program are required to have a major professor/advisor through the duration of their studies. Students should select a permanent major professor before the end of the second semester enrolled in the program. SAS graduate faculty monitor the progress of Ph.D. students annually.

Composition requirements of the SAS Ph.D. oral preliminary examination committee are presented at this link (<https://pharmacy.wisc.edu/handbook-sas/phd-degree-requirements/preliminary-exams>); this same committee typically also serves as the dissertation final oral defense committee.

## ASSESSMENTS AND EXAMINATIONS

Doctoral students must pass both written and oral preliminary examinations to achieve dissertator status (see this link (<https://pharmacy.wisc.edu/handbook-sas/phd-degree-requirements/preliminary-exams>)). The written preliminary examination is evaluated on a pass/fail basis. The oral preliminary examination must be completed within six months after having passed the written preliminary examination.

A dissertation and final oral defense are required. See the this link (<https://pharmacy.wisc.edu/handbook-sas/phd-degree-requirements/dissertation-final-exams>) for details.

## TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral defense and deposit the dissertation within 5 years after passing the preliminary examinations may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Candidates with an emphasis in the history of pharmacy are required to achieve competence in two foreign languages (one in addition to the language acquired for the M.S. degree). Contact the School's graduate programs coordinator for more information.

## ADMISSIONS

The online application and all supplemental materials (official transcripts, three letters of recommendation, Graduate Record Exam (GRE) scores, statement of purpose for attending graduate school, resume/CV, School of Pharmacy's financial aids statement) must be received by **January 1** for consideration for matriculation in the following fall semester.

**Applications are not reviewed at any other time during the year.**

A professional degree in pharmacy is helpful, but not required, for applicants to the SAS graduate program. Academic backgrounds in public health, sociology, industrial engineering, or economics, for example, are well suited for graduate study in SAS. Those with pharmacy-type work experience or a degree in a related field are invited to inquire about the compatibility of their background for admissions purposes.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate critical knowledge and in-depth understanding of principles in the core area of the program and the student's area of expertise.
- Identify important research questions, formulate testable hypotheses, and design experiments to test those hypotheses.
- Conduct original research that contributes to the student's field of study.
- Communicate, both orally and in writing, scientific knowledge and research results effectively to a range of audiences.
- Demonstrate ability to teach SAS concepts and principles to a range of audiences.

### PROFESSIONAL CONDUCT

- Apply ethical principles in conducting scientific research.

## PHILOSOPHY

**Administrative Unit:** Philosophy

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., Ph.D.

**Degrees Offered:** M.A., Ph.D.

**Minors and Certificates:** Doctoral Minor

The Department of Philosophy offers work leading to the doctor of philosophy with a major in philosophy.

The M.A. is granted to Ph.D. program students when they pass their preliminary examinations and become a dissertator. When a student must leave the program early and is unable to complete a Ph.D., a terminal M.A. is granted upon satisfying the department's criteria for a master's degree.

The Ph.D. degree is awarded in recognition of a successfully completed program of advanced studies in philosophy, culminating in a dissertation which represents a contribution to philosophy or to philosophical scholarship.

The Ph.D. program falls into two major stages. The first consists of work that prepares the student for admission to candidacy for the Ph.D. degree. Studies during the first stage of the program are devoted to acquiring the philosophical skills and learning needed to do philosophy in the second stage when writing a successful dissertation.

The department offers five years of support to all incoming graduate students. Support begins with the first fall semester and continues for at least nine additional semesters, provided the student makes satisfactory academic progress and carries out duties acceptably as a graduate assistant.

The department assigns a faculty member as placement officer and devotes a significant portion of staff resources to help graduates find employment.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Philosophy, Doctoral Minor (p. 563)
- Philosophy, M.A. (p. 563)
- Philosophy, Ph.D. (p. 564)

## PEOPLE

**Faculty:** Professors Shafer-Landau (chair), Brighthouse, Card, Forster, Gottlieb, Hausman, Hunt, Nadler, Shapiro, Sidelle, Sober, Vranas; Associate Professor Streiffer; Assistant Professors Bengson, Mackay, Masrou, Paul, Schechtman, Titelbaum

## PHILOSOPHY, DOCTORAL MINOR

### REQUIREMENTS

Graduate students from other fields who wish to pursue a minor in philosophy should consult with the assistant to the chair of the department. Minor candidates are required to take a minimum of three courses in philosophy for a total of at least 9 credits. Normally, at least two of these courses, for at least 5 credits, must be taken in residence on campus.

Most courses numbered 400 and above are open to minor candidates, as are graduate courses and seminars numbered 700 and above. Minor candidates who wish to enroll for independent reading should consult with the assistant to the chair; a student may be enrolled for an independent reading course only with the explicit consent of the instructor.

### PEOPLE

**Faculty:** Professors Shafer-Landau (chair), Brighthouse, Card, Forster, Gottlieb, Hausman, Hunt, Nadler, Shapiro, Sidelle, Sober, Vranas; Associate Professor Streiffer; Assistant Professors Bengson, Mackay, Masrour, Paul, Schechtman, Titelbaum

## PHILOSOPHY, M.A.

The Department of Philosophy offers work leading to the doctor of philosophy with a major in philosophy.

The M.A. is granted to Ph.D. program students when they pass their preliminary examinations and become a dissertator. When a student must leave the program early and is unable to complete a Ph.D., a terminal M.A. is granted upon satisfying the department's criteria for a master's degree.

The Ph.D. degree is awarded in recognition of a successfully completed program of advanced studies in philosophy, culminating in a dissertation which represents a contribution to philosophy or to philosophical scholarship.

The Ph.D. program falls into two major stages. The first consists of work that prepares the student for admission to candidacy for the Ph.D. degree. Studies during the first stage of the program are devoted to acquiring the philosophical skills and learning needed to do philosophy in the second stage when writing a successful dissertation.

The department offers five years of support to all incoming graduate students. Support begins with the first fall semester and continues for at least nine additional semesters, provided the student makes satisfactory academic progress and carries out duties acceptably as a graduate assistant.

The department assigns a faculty member as placement officer and devotes a significant portion of staff resources to help graduates find employment.

### REQUIREMENTS

#### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

M.A.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

33 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

21 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

30 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 500 or above taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a master's is not allowed to satisfy requirements.

#### CREDITS PER TERM ALLOWED

12 credits

#### PROGRAM-SPECIFIC COURSES REQUIRED

At least 21 credits must be earned in philosophy courses numbered between 800 and 989. The remaining credits may be earned either by transferring credits from graduate-level work (with a maximum of 9 credits) or by taking courses at the 400-900 level.

No more than one course at the 400-600 level nor more than one course at the 700 level can count toward the credit-hour requirements for the M.A.

Typically, students take 10 seminars at the 800–900 level and one 700-level seminar to satisfy this requirement.

No more than one 701 course can count toward the 33-credit-hour requirement for the M.A.

Contact the program for information on any additional required courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

The Graduate School sets minimum requirements for admissions (<https://grad.wisc.edu/admissions/requirements>). Academic program admission requirements are often more rigorous than those set by the Graduate School. Please check the program website (<http://philosophy.wisc.edu/graduate/apply.php>) for details.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Expert ability to think critically about arguments.
- Expert ability to interpret complex texts accurately and analyze them logically.
- Ability to communicate very precisely and concisely in both writing and in speech.
- In-depth familiarity with the history of Western philosophy and the major debates within that tradition.

### PROFESSIONAL CONDUCT

- Interpretative charity, and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

## PEOPLE

**Faculty:** Professors Shafer-Landau (chair), Brighthouse, Card, Forster, Gottlieb, Hausman, Hunt, Nadler, Shapiro, Sidelle, Sober, Vranas; Associate Professor Streiffer; Assistant Professors Bengson, Mackay, Masrour, Paul, Schechtman, Titelbaum

## PHILOSOPHY, PH.D.

The Department of Philosophy offers work leading to the doctor of philosophy with a major in philosophy.

The M.A. is granted to Ph.D. program students when they pass their preliminary examinations and become a dissertator. When a student must leave the program early and is unable to complete a Ph.D., a terminal M.A. is granted upon satisfying the department's criteria for a master's degree.

The Ph.D. degree is awarded in recognition of a successfully completed program of advanced studies in philosophy, culminating in a dissertation which represents a contribution to philosophy or to philosophical scholarship.

The Ph.D. program falls into two major stages. The first consists of work that prepares the student for admission to candidacy for the Ph.D. degree. Studies during the first stage of the program are devoted to acquiring the philosophical skills and learning needed to do philosophy in the second stage when writing a successful dissertation.

The department offers five years of support to all incoming graduate students. Support begins with the first fall semester and continues for at least nine additional semesters, provided the student makes satisfactory academic progress and carries out duties acceptably as a graduate assistant.

The department assigns a faculty member as placement officer and devotes a significant portion of staff resources to help graduates find employment.

## FUNDING

Prospective students should see the program website ([http://philosophy.wisc.edu/graduate/financial\\_aid.php](http://philosophy.wisc.edu/graduate/financial_aid.php)) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

All 51 credits except for 3 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

- For students seeking a dual Ph.D./J.D., 42 of 51 credits must be in graduate-level coursework.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 9 credits of coursework numbered 500 or above taken as a UW-Madison Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

Pre-dissertator status: 12 credits

Dissertator status: 3 credits

Dual Ph.D./J.D. students: 15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

At least 21 credits must be earned in philosophy courses numbered between 800 and 989. The remaining credits may be earned either by transferring credits from previous graduate-level work or by taking courses at the 400–900 level.

No more than one course at the 400–600 level nor more than two courses at the 700 level can count toward the credit-hour requirements for the Ph.D.

Typically, students take 10 seminars at the 800–900 level, two 700-level seminars, and earn the remainder of the credits by taking directed research or thesis-prep courses (e.g., PHIL 990).

In other words, the course requirements for the Ph.D. involve (a) completing the requirements for the M.A., (b) taking additional courses to reach a minimum of 51 credit hours, and (c) taking an additional seminar (700–989) at some point between the M.A. and completing the Ph.D., as part of the 51 credits.

Seminar requirement: at least 12 courses at the 500 level or above; at least 10 of these must be at the 800 or 900 level, and an additional course must be at the 700–900 level courses must be passed with a grade of B or better, except for 701, which requires a grade of S.

Ordinarily, students take at least three graduate seminars (900 level) in the major area, two history seminars, the First Year Proseminar, and three seminars in other areas of philosophy. In addition, students typically take a reading seminar (701) before advancing to candidacy. At least 9 of the 12 courses must be taken in the UW-Madison program.

History of philosophy requirement: Two of the 12 required seminars must be advanced history of philosophy courses.

No more than two courses from a previous program can be applied toward the seminar requirement.

Reading seminars: Each seminar meets with a concurrently offered reading seminar (701). Students attend all the seminar meetings and do the readings, but have a substantially lighter workload, determined by the professor before the beginning of the semester. Students may take as many 701's as they like; however, only two 701's can count toward the seminar requirement for the Ph.D. No more than two 701's can be applied to the 51-credit-hour requirement for the Ph.D.

Contact the program for information on any additional required courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300

or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

For admission to the Ph.D. program with full graduate standing, a student must have completed the equivalent of a B.A. with a major in philosophy. Promising students who do not meet this requirement may be admitted with deficiencies provided that they have completed at least 12 credits in philosophy. Upon entering the program, a student must consult with the assistant to the chair for selection of a major professor. The department website (<http://philosophy.wisc.edu/graduate>) contains additional information on department rules, policies, and degree requirements.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Expert ability to think critically about arguments.
- Expert ability to interpret complex texts accurately and analyze them logically.
- Ability to design curriculum for undergraduate courses in their areas of expertise and competence.

- Ability to communicate very precisely and concisely in both writing and in speech.
- In-depth familiarity with the history of Western philosophy and the major debates within that tradition.
- Ability to write a book length manuscript which constitutes an original and valuable contribution to the field.

## PROFESSIONAL CONDUCT

- Interpretative charity, and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.
- Fosters ethical and professional conduct.

## ADDITIONAL LEARNING GOALS

- Ability to engage in high quality undergraduate instruction in their areas of expertise and competence.
- Well-equipped to pursue continuous professional development with respect to goals.

## PEOPLE

**Faculty:** Professors Shafer-Landau (chair), Brighthouse, Card, Forster, Gottlieb, Hausman, Hunt, Nadler, Shapiro, Sidelle, Sober, Vranas; Associate Professor Streiffer; Assistant Professors Bengson, Mackay, Masrour, Paul, Schechtman, Titelbaum

## PHYSICS

**Administrative Unit:** Physics

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., M.S., Ph.D.

**Degrees Offered:** M.A., M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The department offers the master of arts and master of science degrees in physics, and the doctor of philosophy degree with a major in physics.

The master of arts degree is a purely academic degree, requiring 30 credits of graduate work and passage of the qualifying examination at the master's level. It is designed to strengthen the student's physics background and enhance the opportunities for employment as a physicist or in physics education.

The master of science degree is a professional program that requires the completion of a directed master's project and thesis in the student's area of interest, 30 credits of graduate work, and passage of the qualifying examination at the master's level. It is designed to strengthen the student's background and experience in physics, and enhance the opportunities for employment as a physicist or in physics education.

The Ph.D. degree requires successful completion of advanced course work in physics, completion of a minor, and passage of the qualifying and preliminary examinations. However, the Ph.D. is primarily a research degree, awarded only upon completion of substantial original research in some subfield of physics. The program provides the background, experience, and credentials needed for employment as a professional physicist in research or education.

The research program in physics is unusually broad in scope with active experimental and theoretical research programs in astrophysics; atomic,

molecular, and optical physics; biophysics; condensed matter physics; elementary particle physics; nuclear physics; particle physics theory; phenomenology; and plasma physics. This broad range of research opportunities makes the department especially attractive to beginning students who have not yet chosen a field of specialization.

Research specialties include:

## THEORETICAL PHYSICS

Astrophysics; atomic, molecular, and optical physics; condensed matter physics; cosmology; elementary particle physics; nuclear physics; phenomenology; plasmas and fusion; quantum computing; statistical and thermal physics; string theory.

## EXPERIMENTAL PHYSICS

Astrophysics; atomic, molecular, and optical physics; biophysics; condensed matter physics; cosmology; elementary particle physics; neutrino physics; experimental studies of superconductors; medical physics; nuclear physics; plasma physics; quantum computing; spectroscopy.

The Department of Physics has a diverse group of graduate students who come from many countries around the world. There are typically 150–200 graduate students in the department. Virtually all students admitted receive financial support in the form of teaching or research assistantships and fellowships.

The information on courses and examinations provided in this catalog is only a brief summary of the procedures for graduate work in the department. Entering graduate candidates are supplied with additional details when they arrive. More complete information on the graduate program, the faculty, and research groups is available at the department website (<http://www.physics.wisc.edu>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Physics, Doctoral Minor (p. 567)
- Physics, M.A. (p. 567)
- Physics, M.S. (p. 569)
- Physics, Ph.D. (p. 571)

## PEOPLE

**Faculty:** Professors Karle (chair), D. Anderson, Balantekin, Barger, Boldyrev, Carlsmith, Chung, Coppersmith, Dasu, Eom, Eriksson, Everett, Forest, Gilbert, Halzen, Hanson, Hashimoto, Hegna, Heinz, Herndon, Joynt, Lagally, Lawler, Lazarian, Lin, McCammon, McDermott, Onellion, Rzchowski, Saffman, Sarff, Shiu, W. Smith, Sovinec, Terry, Timbie, Vavilov, Walker, Westerhoff, Winokur, Wu, Yavuz, Zweibel; Associate Professors Egedal, Pan; Assistant Professors Arnold, Bai, Levchenko, Palladino, Vandenbroucke

## PHYSICS, DOCTORAL MINOR

### REQUIREMENTS

The minor requirement in physics for nonphysics students is 12 credits numbered above 300, each passed with a grade of B or better. The program must be approved by the chair of the Physics Minor Committee before it is completed.

### PEOPLE

**Faculty:** Professors Karle (chair), D. Anderson, Balantekin, Barger, Boldyrev, Carlsmith, Chung, Coppersmith, Dasu, Eom, Eriksson, Everett, Forest, Gilbert, Halzen, Hanson, Hashimoto, Hegna, Heinz, Herndon, Joynt, Lagally, Lawler, Lazarian, Lin, McCammon, McDermott, Onellion, Rzchowski, Saffman, Sarff, Shiu, W. ## PHYSICS, M.A.

The department offers the master of arts and master of science degrees in physics, and the doctor of philosophy degree with a major in physics.

The master of arts degree is a purely academic degree, requiring 30 credits of graduate work and passage of the qualifying examination at the master's level. It is designed to strengthen the student's physics background and enhance the opportunities for employment as a physicist or in physics education.

The master of science degree is a professional program that requires the completion of a directed master's project and thesis in the student's area of interest, 30 credits of graduate work, and passage of the qualifying examination at the master's level. It is designed to strengthen the student's background and experience in physics, and enhance the opportunities for employment as a physicist or in physics education.

The Ph.D. degree requires successful completion of advanced course work in physics, completion of a minor, and passage of the qualifying and preliminary examinations. However, the Ph.D. is primarily a research degree, awarded only upon completion of substantial original research in some subfield of physics. The program provides the background, experience, and credentials needed for employment as a professional physicist in research or education.

The research program in physics is unusually broad in scope with active experimental and theoretical research programs in astrophysics; atomic, molecular, and optical physics; biophysics; condensed matter physics; elementary particle physics; nuclear physics; particle physics theory; phenomenology; and plasma physics. This broad range of research opportunities makes the department especially attractive to beginning students who have not yet chosen a field of specialization.

Research specialties include:

## THEORETICAL PHYSICS

Astrophysics; atomic, molecular, and optical physics; condensed matter physics; cosmology; elementary particle physics; nuclear physics; phenomenology; plasmas and fusion; quantum computing; statistical and thermal physics; string theory.

## EXPERIMENTAL PHYSICS

Astrophysics; atomic, molecular, and optical physics; biophysics; condensed matter physics; cosmology; elementary particle physics; neutrino physics; experimental studies of superconductors; medical physics; nuclear physics; plasma physics; quantum computing; spectroscopy.

The Department of Physics has a diverse group of graduate students who come from many countries around the world. There are typically 150–200 graduate students in the department. Virtually all students admitted receive financial support in the form of teaching or research assistantships and fellowships.

The information on courses and examinations provided in this catalog is only a brief summary of the procedures for graduate work in the department. Entering graduate candidates are supplied with additional details when they arrive. More complete information on the graduate program, the faculty, and research groups is available at the department website (<http://www.physics.wisc.edu>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 of total 30 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>). No 300-level courses will be counted toward the 30 credit minimum.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No coursework from other institution may count toward any graduate degree in physics.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Up to 7 credits in courses numbered 500 or above may be used to satisfy minimum degree requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of difference in tuition (between Special and graduate tuition), students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students

completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission is competitive. All applicants are reviewed and evaluated on the basis of previous academic record, three letters of recommendation, statement of purpose for graduate studies, resume, and Graduate Record Exam (GRE) general and subject scores. The physics subject GRE exam is required. For applicants whose native language is not English, the department requires a minimum score of 580 (paper-based), 237 (computer-based) or 92 (internet-based) on the Test of English as a Foreign Language (TOEFL) exam, or 7 on the International English Language Testing System (IELTS) exam. All eligible applicants with complete files are considered for teaching or research assistantships and fellowships. To be considered for admission, students must submit all application materials (including test scores) via the Graduate School electronic application site (<https://www.gradsch.wisc.edu/eapp/eapp.pl>) by December 15.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Mastery of the core physical concepts (classical mechanics, electricity and magnetism, quantum mechanics, and statistical mechanics).
- Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in physics.
- Identifies sources and assembles evidence pertaining to questions or challenges in physics.
- Demonstrates understanding of the physics in an historical, social, or global context.
- Selects and/or utilizes the most appropriate methodologies and practices.
- Evaluates or synthesizes information pertaining to questions or challenges in physics.
- Communicates clearly in ways appropriate to the field of physics.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Karle (chair), D. Anderson, Balantekin, Barger, Boldyrev, Carlsmith, Chung, Coppersmith, Dasu, Eom, Eriksson, Everett, Forest, Gilbert, Halzen, Hanson, Hashimoto, Hegna, Heinz, Herndon, Joynt, Lagally, Lawler, Lazarian, Lin, McCammon, McDermott, Onellion, Rzchowski, Saffman, Sarff, Shiu, W. ## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

## MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

51 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 of total 30 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>). No 300-level courses will be counted toward the 51 credit minimum.

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No coursework from other institution may count toward any graduate degree in physics.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Up to 7 credits in courses numbered 500 or above may be used to satisfy minimum degree requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval and payment of difference in tuition (between Special and graduate tuition), students are allowed to count no more than 15 credits of coursework numbered 500 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department

responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Admission is competitive. All applicants are reviewed and evaluated on the basis of previous academic record, three letters of recommendation, statement of purpose for graduate studies, resume, and Graduate Record Exam (GRE) general and subject scores. The physics subject GRE exam is required. For applicants whose native language is not English, the department requires a minimum score of 580 (paper-based), 237 (computer-based) or 92 (internet-based) on the Test of English as a Foreign Language (TOEFL) exam, or 7 on the International English Language Testing System (IELTS) exam. To be considered for admission, students must submit all application materials (including test scores) via the Graduate School electronic application site (<https://www.gradsch.wisc.edu/eapp/eapp.pl>) by December 15.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Formulates and plans original research.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of physics.
- Creates research, scholarship, or performance that makes a substantive contribution to the field of physics.

- Gains a broad awareness of the status of contemporary research beyond the student's area of specialization.
- Gains a deep awareness of the status of research in the student's area of specialization.
- Advances contributions in the field of physics to society.
- Learns to engage and communicate with other research professionals.

## PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Karle (chair), D. Anderson, Balantekin, Barger, Boldyrev, Carlsmith, Chung, Coppersmith, Dasu, Eom, Eriksson, Everett, Forest, Gilbert, Halzen, Hanson, Hashimoto, Hegna, Heinz, Herndon, Joynt, Lagally, Lawler, Lazarian, Lin, McCammon, McDermott, Onellion, Rzcowski, Saffman, Sarff, Shiu, W. Smith, Sovinec, Terry, Timbie, Vavilov, Walker, Westerhoff, Winokur, Wu, Yavuz, Zweibel; Associate Professors Egedal, Pan; Assistant Professors Arnold, Bai, Levchenko, Palladino, Vandenbroucke

## PLANNING AND LANDSCAPE ARCHITECTURE

**Administrative Unit:** Planning and Landscape Architecture

**College/School:** College of Letters & Science

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S. in Landscape Architecture; M.S. in Urban and Regional Planning; Ph.D. in Urban and Regional Planning

**Minors and Certificates:** Doctoral Minor in Landscape Architecture; Doctoral Minor in Urban and Regional Planning

## LANDSCAPE ARCHITECTURE

The graduate program in landscape architecture at UW–Madison provides intensive research training and experience in interdisciplinary approaches to the study of landscape and real-world applications. The department offers a master of science with an emphasis on conducting original research in the form of a thesis and a master of arts based on creating evidence-based design solutions to complex landscape problems. Within both programs students will contribute to developing a scholarly foundation for the discipline of landscape architecture and related fields, and contribute information to practitioners engaged in landscape decision-making and stewardship. The department does not offer a professional master's degree (MLA).

The graduate program provides an interdisciplinary education that uses the sciences, arts and humanities to respond to current issues in the realms of food and agriculture, natural resource and cultural and environmental stewardship, human health and well-being, and community development. Most students specialize in one of two areas that reflect the research interests of the faculty: restoration ecology and ecological design, and community and urban landscape studies.

The department has well-equipped computer facilities, including CAD, GIS, and graphics software packages.

## URBAN AND REGIONAL PLANNING

The primary degree is the master of science (M.S.) in urban and regional planning (URPL). This program normally requires two academic years of full-time work plus an internship. In addition to the M.S. program, the department offers a Ph.D. program. Some double-degree master's programs are offered, and provisions have been made, in all of the department's basic programs, to serve the specific needs of students from developing countries.

The M.S. program equips students with sufficient understanding of and training in the principal tools, methods, and techniques of planning to enable them to perform effectively as junior members of planning staffs from the start of their careers; in addition, UW–Madison's program in planning emphasizes concepts, perspectives, and practices that promise to be useful not only upon graduation, but even more so in later years for graduates who reach positions of major influence and responsibility.

Although the department stresses the development of general skills and mental attitudes that are common to all planning endeavors, students are required to specialize in an area of planning that is of interest to the student.

The department seeks students with high academic qualifications and the potential to become qualified professional planners. The department is especially interested in women and minority applicants. Since there are relatively few undergraduate planning programs in the country, students come into the field from a wide range of disciplines. In recent years, planning students have generally come from the social sciences, with geography, economics, political science, and sociology the most common undergraduate backgrounds. The range, however, runs from the arts to the sciences.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE PROFESSIONAL/CERTIFICATES

- Landscape Architecture, Doctoral Minor (p. 573)
- Landscape Architecture, M.S. (p. 574)
- Urban and Regional Planning, Doctoral Minor (p. 575)
- Urban and Regional Planning, M.S. (p. 575)
- Urban and Regional Planning, Ph.D. (p. 579)

## PEOPLE

### LANDSCAPE ARCHITECTURE

**Faculty:** Professors Harrington (chair), Howell, Silbernagel; Associate Professors Dennis, Gilmore; Assistant Professors Bart, Thorleifsdottir

### URBAN AND REGIONAL PLANNING

**Faculty:** Professors Jacobs, LaGro, Marcouiller, Ohm; Associate Professors Genskow (chair), Morales, Paulsen; Assistant Professor Gocmen

## LANDSCAPE ARCHITECTURE, DOCTORAL MINOR

## LANDSCAPE ARCHITECTURE, M.S.

The graduate program in landscape architecture at UW–Madison provides intensive research training and experience in interdisciplinary approaches to the study of landscape and real-world applications. The department offers a master of science with an emphasis on conducting original research in the form of a thesis and a master of arts based on creating evidence-based design solutions to complex landscape problems. Within both programs students will contribute to developing a scholarly foundation for the discipline of landscape architecture and related fields, and contribute information to practitioners engaged in landscape decision-making and stewardship. The department does not offer a professional master's degree (MLA).

The graduate program provides an interdisciplinary education that uses the sciences, arts and humanities to respond to current issues in the realms of food and agriculture, natural resource and cultural and environmental stewardship, human health and well-being, and community development. Most students specialize in one of two areas that reflect the research interests of the faculty: restoration ecology and ecological design, and community and urban landscape studies.

The department has well-equipped computer facilities, including CAD, GIS, and graphics software packages.

### FUNDING

Financial support for graduate students is available through research and teaching assistantships, and competitive Graduate School and departmental fellowships. Most teaching assistantships are awarded to students who already have professional landscape architectural design training and experience.

### REQUIREMENTS

#### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

M.A., M.S.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

36 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of the required credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS FROM: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

#### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the graduate degree.

#### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

#### CREDITS PER TERM ALLOWED

15 credits

#### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

#### OVERALL GRADUATE GPA REQUIREMENT

3.00

#### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

#### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

#### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure they are making satisfactory progress toward a degree, the Graduate School expects that students meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

#### ASSESSMENT AND EXAMINATIONS

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

A bachelor's degree is required of all prospective candidates. The department's Graduate Program Committee screens applicants on the basis of university transcripts for all previous work, three letters of recommendation, samples of creative work or writing, and a letter of intent describing how the student's graduate educational needs can be fulfilled by this program. Graduate Record Exam (GRE) scores are also required. Every applicant whose native language is not English, or whose undergraduate instruction was not in English, must provide official scores from the Test of English as a Foreign Language (TOEFL). Scores are also acceptable from the Michigan English Language Assessment Battery (MELAB) or the International English Language Testing System (IELTS).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Be able to engage critically with the scholarship and theory of landscape architecture. (M.S.)
- Be able to demonstrate advanced critical thinking and the ability to explore ideas in depth and synthesize information with a high degree of competence. (M.S.)
- Be able to demonstrate an advanced understanding of landscape spaces, functions, and dynamics, as well as interactions between people and the built and natural environment. (M.S.)
- Be able to demonstrate a deep understanding of and the ability to critically evaluate the principles, theories, technical skills and recent research findings specific to at least one of the program's focus areas: Restoration Ecology and Ecological Design and Community and Urban Studies. (M.S.)
- Be able to design and conduct original research, and communicate the results to scholars as well as to practitioners engaged in landscape decision-making and stewardship. (M.S.)

### PROFESSIONAL CONDUCT

- Be able to describe and apply principles of ethical and professional conduct. (M.S.)

## PEOPLE

**Faculty:** Professors Harrington (chair), Howell, Silbernagel; Associate Professors Dennis, Gilmore; Assistant Professors Bart, Thorleifsdottir

## URBAN AND REGIONAL PLANNING, DOCTORAL MINOR

### REQUIREMENTS

The minor in the urban and regional planning shall consist of 12 credits of coursework taken in the department.

Courses shall be taken with those faculty who have some percent of budgeted appointment in the department (so-called core faculty).

Courses taken shall be at the 600 level and above, excluding URB R PL 699 Directed Study, and no more than 3 credits of URB R PL 999 Independent Work.

The student, in consultation with the department's minor advisor (the Ph.D. Program Committee Chair unless otherwise designated), shall select the 12 credits. To the extent possible, the student shall select a set of courses which give the student a breadth of understanding of the theory and methods of the field of urban and regional planning, and which provide some depth in an area of urban and regional planning concentration. Students should consider consulting with a member of the faculty on the selection of these courses, and if possible should secure a note of endorsement from said faculty member for their course selection.

The student shall execute a minor agreement (on a form to be provided by the Ph.D. Program Committee) specifying the courses that the student will take. On completion of all the agreed-upon courses, the student's warrant will be signed by the chair of the Ph.D. Program Committee.

A 3.5 grade point average shall be required for minor certification. If a student does not achieve this GPA in the four courses the student identifies, the student may, in consultation with the minor advisor, select additional courses, so that the student completes four courses where the average GPA is 3.5.

The Ph.D. Program Committee shall review the merits of individual requests for the application of credits from other institutions toward a minor in the urban and regional planning. The total number of credits that may be accepted in this manner will not exceed 6.

## PEOPLE

**Faculty:** Professors Jacobs, LaGro, Marcouiller, Ohm; Associate Professors Genskow (chair), Morales, Paulsen; Assistant Professor Gocmen

## URBAN AND REGIONAL PLANNING, M.S.

The department's primary degree is the master of science (M.S.) in urban and regional planning (URPL). This program normally requires two academic years of full-time work plus an internship. In addition to the M.S. program, the department offers a Ph.D. program. Some double-degree master's programs are offered, and provisions have been made, in all of the department's basic programs, to serve the specific needs of students from developing countries. The master's degree in urban and regional planning is intended primarily to prepare graduates

for professional positions in government, nonprofit and community organizations and the private sector. We seek to train students with the knowledge, theories, skills and abilities to be leaders in shaping communities.

Master's degree coursework consists of 45 credits distributed among core planning skills and knowledge, an area of specialization, and elective courses. Students also gain practical experience in planning and problem solving through required internships.

The objectives of the professional masters of science degree are to:

1. Prepare students to engage in planning processes that recognize a complex, pluralistic democratic society. Students develop the capacity to work with diverse publics, across government agencies, and in private and nonprofit sectors. Planning processes include the identification of objectives, design of possible courses of action, and evaluation of alternatives.
2. Convey a set of planning literacies to enable students to perform effectively as planners in public, private or nonprofit sectors. These literacies include knowledge in the following areas:
  - Structure and function of cities and regions
  - History and theory of planning processes and practices
  - Administrative, legal and political aspects of plan-making
  - Public involvement and dispute resolution techniques
  - Research design and data analysis techniques
  - Written, oral and graphic communication skills
  - Ethics of professional practice
  - Collaborative approaches to problem solving
3. Prepare students with the substantive knowledge foundation and tools, methods and techniques of planning associated with an area of specialization.

Details on administrative requirements for the degree are available in the department's *Policies and Procedures*, available on the department website or by request.

The M.S. program equips students with sufficient understanding of and training in the principal tools, methods, and techniques of planning to enable them to perform effectively as junior members of planning staffs from the start of their careers; in addition, UW–Madison's program in planning emphasizes concepts, perspectives, and practices that promise to be useful not only upon graduation, but even more so in later years for graduates who reach positions of major influence and responsibility.

Although the department stresses the development of general skills and mental attitudes that are common to all planning endeavors, students are required to specialize in an area of planning that is of interest to the student.

The department seeks students with high academic qualifications and the potential to become qualified professional planners. The department is especially interested in women and minority applicants. Since there are relatively few undergraduate planning programs in the country, students come into the field from a wide range of disciplines. In recent years, planning students have generally come from the social sciences, with geography, economics, political science, and sociology the most common undergraduate backgrounds. The range, however, runs from the arts to the sciences.

## DOUBLE DEGREE PROGRAMS

It is possible for students to pursue two master's degrees simultaneously. No more than one-fourth of the credits being offered in the requirements of one degree can be used for the requirements of any other master's degree. Special arrangements have been developed for double degrees in the following areas: public affairs, water resources management, and landscape architecture. Interested students should consult with faculty in these program areas, as well as with the department.

## FUNDING

For information about financial aid, see Financial Aid (<http://urpl.wisc.edu/admissions/financialaid>) on the department website.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

45 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (23 out of 45 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

A maximum of 21 credits are allowed from Planning Accreditation Board–accredited coursework taken at other institutions. In all other fields, 25% of credits completed up to a maximum of 11 transfer credits are allowed. Special conditions for applying prior coursework may be found in the program's Policies and Procedures (<https://urpl.wisc.edu/academics/policies>).

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Any course taken as part of an undergraduate degree (whether required or optional) may not be applied.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

The Master's Program Committee (MPC) will not accept a more than 12 credits of prior coursework taken as a UW–Madison University Special

student. The MPC does not necessarily guarantee that all credits (up to 12) taken as a Special student may be applied. All courses accepted for must have a B or better. The decision as to what prior coursework may be applied will be made by the MPC on the recommendation of the student's advisor, and must be based on information indicating that the courses for which credit is given fit logically into the student's overall program.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

| Code                      | Title                                              | Credits |
|---------------------------|----------------------------------------------------|---------|
| URB R PL 741              | Introduction to Planning                           | 3       |
| URB R PL/<br>SOC WORK 721 | Methods of Planning Analysis                       | 3       |
| URB R PL 781              | Planning Thought and Practice                      | 3       |
| URB R PL 833              | Planning and the Legal System                      | 3       |
| URB R PL 590              | Contemporary Topics in Urban and Regional Planning | 1-3     |
| URB R PL 912              | Planning Workshop                                  | 3       |

Select one of the following:

|                                |                                                              |
|--------------------------------|--------------------------------------------------------------|
| URB R PL 601                   | Site Planning                                                |
| URB R PL 731                   | Introduction to Regional Planning                            |
| URB R PL/ECON/<br>PUB AFFR 734 | Regional Economic Problem Analysis                           |
| URB R PL 751                   | Introduction to Financial Planning                           |
| URB R PL 761                   | Central City Planning: Issues and Approaches                 |
| URB R PL/<br>CIV ENGR 839      | Land Use and Communication Systems Planning                  |
| URB R PL 841                   | Urban Functions, Spatial Organization and Environmental Form |
| URB R PL 844                   | Housing and Public Policy                                    |

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

In addition to Graduate School requirements, the Department of Urban and Regional Planning requires that all core courses and all courses in a student's area of specialization (other than research credits) be taken on a graded (i.e., not satisfactory/unsatisfactory basis.)

In all core courses and all courses in a student's area of specialization, a minimum grade of BC is considered satisfactory. Grades of C or below in core and specialization courses may not be counted toward degree requirements, but are still counted in the cumulative GPA. If a student receives a grade of C or below in a department required core course, the student must retake the course and achieve a satisfactory grade.

In elective courses, a grade of C or above is considered satisfactory.

Any course in which a student receives a grade of D or F may not be used to satisfy any department graduation requirements. However, these courses will still be counted in the cumulative GPA.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status. To the extent possible, students admitted on probation are encouraged to take core courses as a part of their first semester schedule. In all other matters, students admitted on probation are subject to the same standards and requirements as students admitted in full standing (e.g. residency requirements, satisfactory student performance, minimum grades in core courses [BC], and so forth).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

Student should meet regularly with the advisor to plan academic career. The advisor is required to approve and sign the plan of study form, which is then submitted to the graduate coordinator prior to the student being allowed to graduate.

## ASSESSMENTS AND EXAMINATIONS

To obtain a master of science degree in urban and regional planning, a student must be able to demonstrate a high level of competency in the theories, methods, applications, and ethics of planning. Students must demonstrate competency over the broad field of planning in general, as well as within an area of specialization as defined by the student, in consultation with a faculty advisor.

For information on competency requirement options, including details regarding a master's thesis or a professional project, see the program's Policies and Procedures (<https://urpl.wisc.edu/academics/policies>).

## TIME CONSTRAINTS

The master's program takes two full years of study.

## LANGUAGE REQUIREMENTS

Prospective students whose native language is not English must also provide evidence of English language proficiency. A TOEFL score of 600 (paper-based) or above typically indicates an ability to successfully meet the written and spoken communication requirements of graduate level courses.

## ADMISSIONS

Application for admission to the department consists of the following materials: the online application, official transcripts of all undergraduate and graduate work, statement of purpose (applicants should submit a thoughtful, reflective one- or two-page statement discussing reasons for going into planning; applicants with an interest in a particular concentration should discuss this; applicants with planning or planning-related experience should include this), and three references from people familiar with the applicant's academic and/or professional work. The Graduate Record Exam (GRE) is required for M.S. admission and Ph.D. admission.

Besides the general requirements for admission to the M.S. program, there are two additional requirements unique to the Ph.D. program. First,

applicants to the Ph.D. program are expected to have a master's degree in planning or a related field. Second, because planning is a practice-oriented field, applicants are expected to have completed at least one year of full-time experience as a professional planner. The Ph.D. program is flexible and is intended to appeal to individuals from diverse academic backgrounds. Therefore, it is possible to be admitted without having met the professional practice requirements. Deficiencies may be made up once a student is in the program.

A student must have an URPL academic sponsor in order to be admitted into the Ph.D. program. Before final admission decisions are made, student applications are circulated among the faculty. Only when a faculty member agrees to serve as an academic sponsor for an admissible candidate is a final admission decision made. The sponsor is the student's academic advisor, and it is expected that the sponsor will become the chair of the student's Ph.D. committee.

In reviewing applications, the department gives extra weight to planning-related work, such as Peace Corps or professional planning experience. The department also considers graduate coursework, even if it is in another field. If students have such experience, it should be stressed in the application.

The success of international students enrolled in the program depends heavily on a good working knowledge of English. Prospective applicants who do not feel comfortable using the English language are strongly urged to consider further language study before applying for admission.

All applicants are required to have an introductory-level course in statistics. This requirement may be met by taking an introductory course, for no graduate credit, during the student's first semester of study.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- **General Planning Knowledge:** comprehension, representation, and use of ideas and information in the planning field, including appropriate perspectives from history, social science, and the design professions.
- **Purpose and Meaning of Planning:** appreciation of why planning is undertaken by communities, cities, regions, and nations, and the impact planning is expected to have.
- **Planning Theory:** appreciation of the behaviors and structures available to bring about sound planning outcomes.
- **Planning Law:** appreciation of the legal and institutional contexts within which planning occurs.
- **Human Settlements and History of Planning:** understanding of the growth and development of places over time and across space.
- **The Future:** understanding of the relationships between past, present, and future in planning domains, as well as the potential for methods of design, analysis, and intervention to influence the future.
- **Global Dimensions of Planning:** appreciation of interactions, flows of people and materials, cultures, and differing approaches to planning across world regions.
- **Planning Skills:** use and application of knowledge to perform specific tasks required in the practice of planning.
- **Research:** tools for assembling and analyzing ideas and information from prior practice and scholarship, and from primary and secondary sources.

- **Written, Oral, and Graphic Communication:** ability to prepare clear, accurate and compelling text, graphics and maps for use in documents and presentations.
- **Quantitative and Qualitative Methods:** data collection, analysis and modeling tools for forecasting, policy analysis, and design of projects and plans.
- **Plan Creation and Implementation:** integrative tools useful for sound plan formulation, adoption, and implementation and enforcement.
- **Planning Process Methods:** tools for stakeholder involvement, community engagement, and working with diverse communities.
- **Leadership:** tools for attention, formation, strategic decision-making, team building, and organizational/community motivation.
- **Values and Ethics:** Values inform ethical and normative principles used to guide planning in a democratic society. The program shall appropriately incorporate issues of diversity and social justice into all required courses of the curriculum, including:
  - **Professional Ethics and Responsibility:** appreciation of key issues of planning ethics and related questions of the ethics of public decision-making, research, and client representation (including principles of the AICP Code of Ethics and other related principles, as appropriate).
  - **Governance and Participation:** appreciation of the roles of officials, stakeholders, and community members in planned change.
  - **Sustainability and Environmental Quality:** appreciation of natural resource and pollution control factors in planning, and understanding of how to create sustainable futures.
  - **Growth and Development:** appreciation of economic, social, and cultural factors in urban and regional growth and change.

## PROFESSIONAL CONDUCT

- **Values and Ethics:** Values inform ethical and normative principles used to guide planning in a democratic society. The program shall appropriately incorporate issues of diversity and social justice into all required courses of the curriculum, including:
  - **Professional Ethics and Responsibility:** appreciation of key issues of planning ethics and related questions of the ethics of public decision-making, research, and client representation (including principles of the AICP Code of Ethics and other related principles, as appropriate).
  - **Governance and Participation:** appreciation of the roles of officials, stakeholders, and community members in planned change.
  - **Sustainability and Environmental Quality:** appreciation of natural resource and pollution control factors in planning, and understanding of how to create sustainable futures.
  - **Growth and Development:** appreciation of economic, social, and cultural factors in urban and regional growth and change.

## PEOPLE

**Faculty:** Professors Jacobs, LaGro, Marcouiller, Ohm; Associate Professors Genskow (chair), Morales, Paulsen; Assistant Professor Gocmen

## URBAN AND REGIONAL PLANNING, PH.D.

The Ph.D. is open to a limited number of quality students who intend to teach, or do research in a university, in an independent research agency, or in large planning organizations.

Generally, students spend two years of full-time coursework before being advanced to candidacy, and an additional one to two years in preparation and defense of a dissertation. Details on administrative requirements for the degree are available in the department's *Policies and Procedures*, available on the department website or by request.

Although the department stresses the development of general skills and mental attitudes that are common to all planning endeavors, students are required to specialize in an area of planning that is of interest to the student.

The department seeks students with high academic qualifications and the potential to become qualified professional planners. The department is especially interested in women and minority applicants. Since there are relatively few undergraduate planning programs in the country, students come into the field from a wide range of disciplines. In recent years, planning students have generally come from the social sciences, with geography, economics, political science, and sociology the most common undergraduate backgrounds. The range, however, runs from the arts to the sciences.

### FUNDING

For information about financial aid, see Financial Aid (<http://urpl.wisc.edu/admissions/financialaid>) on the department website.

### REQUIREMENTS

#### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### DOCTORAL DEGREES

Ph.D.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework

attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

#### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Requests for prior coursework to be applied to credit requirements should be submitted to the PhD Committee for evaluation. The committee may approve up to a maximum of 18 credits of prior coursework toward program requirements. No graduate work taken at other institutions counts toward the Graduate School minimum graduate credit requirement.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from any undergraduate degree may be applied toward the Ph.D. program.

#### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

A maximum of 15 credits may be applied from the UW-Madison University Special career; requests for prior coursework to be applied to credit requirements should be submitted to the Ph.D. committee for evaluation.

#### CREDITS PER TERM ALLOWED

15 credits

#### PROGRAM-SPECIFIC COURSES REQUIRED

All doctoral students are required to complete three courses (9 credits) on the structure and processes of cities and regions. These courses shall cover the nature of urban and regional development processes over time and the impact of urban and regional development on the social, economic, environmental, institutional, and physical structure of cities and regions. They should also cover the response of federal, state and local governments to the issues and problems generated by such development and the planner's role in developing public policy and programs to deal with those problems and issues.

Courses satisfying the requirement for this component of doctoral studies must be approved by the student's Ph.D. advisor and then by the Ph.D. program committee, and shall be recorded on a form provided by the committee. Courses satisfying this requirement shall be drawn from a list provided by the Ph.D. program committee.

For more information please reference the program's Policies and Procedures (<http://urpl.wisc.edu/academics/URPL%20PHD%20POLICIES%20May%201%202013.pdf>).

#### DOCTORAL MINOR/BREADTH REQUIREMENTS

Because of the interdisciplinary nature of planning, the department requires all Ph.D. candidates to fulfill the requirements of a minor field. The purpose of the Minor field requirement is to supplement and support the student's program of study in the major field. There are two options that can be pursued for the minor. Option A requires a minimum of 10 credits in a single department/major field of study. Selection of this option requires the approval of the minor department under the guidelines of that department and on forms developed for that purpose by the selected department. Option B requires a minimum of 10 credits in one or more departments and can include coursework in URPL. Selection of this option requires the approval of the department's Ph.D. program

committee. Forms for the filing of Option B minors are available from the Ph.D. program committee.

Ph.D. students and their advisers are responsible for filing copies of executed minor agreements with the Ph.D. program committee. The minor field requirement must be satisfied prior to filing the warrant for the preliminary examination.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

The minimum average GPA in courses satisfying the Structure and Processes of Cities and Regions requirement shall be 3.5. If a student does not achieve this GPA in the three courses s/he identifies, they may continue to take courses (within the general departmental Ph.D. program policies of how long a student may be a pre-dissertator) from the list provided until they have three courses where their average GPA is 3.5.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their thesis committee after passing the preliminary examination.

## ASSESSMENTS AND EXAMINATIONS

The department administers three preliminary field examinations. The purpose of the preliminary examinations is to satisfy the department that the student is knowledgeable about the central theoretical and methodological perspectives common to the field of planning, and has sufficient knowledge about the design and conduct of research to undertake the dissertation.

For more information concerning the preliminary exams, see the program's Policies and Procedures (<http://urpl.wisc.edu/academics/URPL%20PHD%20POLICIES%20May%201%202013.pdf>).

## TIME CONSTRAINTS

All courses for the Structure and Processes of Cities and Regions requirement must be taken and successfully completed within the doctoral student's first five semesters (i.e., two and one-half academic years) in the Ph.D. program. This coursework requirement must be met before the student is advanced to candidacy (awarded dissertator, ABD status).

## LANGUAGE REQUIREMENTS

Prospective students whose native language is not English must also provide evidence of English language proficiency. A TOEFL score of 600 (paper-based) or above typically indicates an ability to successfully meet the written and spoken communication requirements of graduate level courses, the department's preliminary examinations, and the dissertation.

## ADMISSIONS

Application for admission to the department consists of the following materials: the online application, official transcripts of all undergraduate and graduate work, statement of purpose (applicants should submit a thoughtful, reflective one- or two-page statement discussing reasons for going into planning; applicants with an interest in a particular concentration should discuss this), and three references from people familiar with the applicant's academic and/or professional work. The Graduate Record Exam (GRE) is required for M.S. admission and Ph.D. admission.

Besides the general requirements for admission to the M.S. program, there are two additional requirements unique to the Ph.D. program. First, applicants to the Ph.D. program are expected to have a master's degree in planning or a related field. Second, because planning is a practice-oriented field, applicants are expected to have completed at least one year of full-time experience as a professional planner. The Ph.D. program is flexible and is intended to appeal to individuals from diverse academic backgrounds. Therefore, it is possible to be admitted without having met the professional practice requirements. Deficiencies may be made up once a student is in the program.

A student must have an URPL academic sponsor in order to be admitted into the Ph.D. program. Before final admission decisions are made, student applications are circulated among the faculty. Only when a faculty member agrees to serve as an academic sponsor for an admissible candidate is a final admission decision made. The sponsor is the student's academic advisor, and it is expected that the sponsor will become the chair of the student's Ph.D. committee.

In reviewing applications, the department gives extra weight to planning-related work, such as Peace Corps or professional planning experience. The department also considers graduate coursework, even if it is in another field. If students have such experience, it should be stressed in the application.

The success of international students enrolled in the program depends heavily on a good working knowledge of English. Prospective applicants who do not feel comfortable using the English language are strongly urged to consider further language study before applying for admission.

All applicants are required to have an introductory-level course in statistics. This requirement may be met by taking an introductory course, for no graduate credit, during the student's first semester of study.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### PROGRAM-SPECIFIC KNOWLEDGE LEARNING GOALS FOR THE PH.D. IN URBAN AND REGIONAL PLANNING

- Students will acquire and demonstrate knowledge about the professional field of planning, as exemplified in the accreditation guidelines for the master's program in urban and regional planning and the Planning Accreditation Board. These include knowledge about: the purpose and meaning of planning, planning history, planning theory, planning law, the structure and function of cities and regions, and global dimensions of planning. Students demonstrate this knowledge through entrance requirements (a master's degree

in planning or acceptable cognate field), through completion of coursework, and through completion of preliminary examinations in planning theory, planning methods, and planning specialization.

- Students will acquire and demonstrate knowledge about the role and use of planning theories in both practice and research, including the historical development of planning theory, major theoretical approaches within planning, and the application of theories from other disciplines as applied to planning. Students demonstrate this knowledge through coursework and completion of a planning theory preliminary examination.
- Students will acquire and demonstrate knowledge of social science research methods, including research design, data collection, and quantitative and qualitative methods used in planning research. Students demonstrate knowledge through completion of graduate coursework in research methods and through completion of a research design and methods preliminary examination.
- Students will acquire and demonstrate knowledge of a substantive research and practice field within planning. Students demonstrate specialized knowledge in one of the major fields within planning through completion of coursework and through a research-specialization preliminary examination.

## PROGRAM-SPECIFIC SKILLS LEARNING GOALS FOR THE PH.D. IN URBAN AND REGIONAL PLANNING

- Students will acquire and demonstrate skills in conducting academic research and scholarly inquiry in the field of urban and regional planning, including ability to summarize and critique extant research, ability to develop a research proposal, skills in seeking funding, skills in completion of research projects, and skills in written and oral presentation of research findings.
- Students will acquire and demonstrate specialized skills in research for their chosen major field within planning. This will include skills in particular research methods and data analysis specific to their chosen field within planning.
- Students will acquire and demonstrate general knowledge about planning suitable to teaching master's-level planning students in accredited programs. Students will acquire and demonstrate specific knowledge about their chosen field of specialization within planning.
- Students will acquire and/or demonstrate competence and experience in the professional practice of planning. Students demonstrate this skill through the requirement of previous professional work experience within the field of planning.

## PROFESSIONAL CONDUCT

### PROGRAM-SPECIFIC PROFESSIONAL CONDUCT LEARNING GOALS FOR THE PH.D. IN URBAN AND REGIONAL PLANNING

- Students will acquire and demonstrate knowledge of planning values and planning ethics, as exemplified in the accreditation guidelines for the master's program in urban and regional planning and the Planning Accreditation Board. This would also include awareness of rules of ethical professional conduct as exemplified in the Code of Ethics of the American Institute of Certified Planners.
- Students will demonstrate and be held to the highest standards of academic citation and attribution in all their coursework and published work.
- Students will demonstrate understanding of professional conduct through required professional work experience in planning.

- Students will be given opportunities for training and experience in classroom teaching, presentation of research at academic conferences, and development of research proposals for funding agencies.
- Students will demonstrate ethics and values consistent with the "Wisconsin brand" of urban and regional planning, which includes participation, transparency in governance, environmental protection and social justice.

## PEOPLE

**Faculty:** Professors Jacobs, LaGro, Marcouiller, Ohm; Associate Professors Genskow (chair), Morales, Paulsen; Assistant Professor Gocmen

## PLANT PATHOLOGY

**Administrative Unit:** Plant Pathology

**College/School:** College of Agricultural and Life Sciences

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The discipline of plant pathology is directed toward understanding and solving disease problems of plants. The field is broad and complex, integrating disciplines as varied as molecular biology, genetics, cell biology, organismal biology, population and community ecology, meteorology, statistics, computer science, chemistry, and physics. Plant pathology encompasses basic and applied research, employs both model systems and economically important plants, and requires both laboratory and field experimentation. Active research programs in the department encompass this full spectrum of questions and approaches, including research on biological control, virology, nematology, fungal genetics, tissue culture, soil microbiology and ecology, forest pathology, bacterial plant pathogens, molecular biology of parasite–host interactions, microbial ecology, epidemiology, and integrated disease management strategies.

The graduate program in plant pathology educates students in the science of plant pathology and prepares them for successful careers. Students develop the following skills required to meet diverse professional situations: excellence in research, breadth and depth in plant pathology, breadth in an allied field, strong critical and analytical thinking skills, and effective communication skills. Students become sufficiently knowledgeable in all aspects of plant pathology to identify key research questions, recognize significant discoveries, and think analytically about interpretation of data.

The level of proficiency in specific areas will vary with the student's research area and career goals, and will be appropriate to the student's degree program (M.S. or Ph.D.). Specific areas of proficiency addressed by the Ph.D. curriculum include etiology, diagnosis, and management of plant disease; ecology and epidemiology; genetics and physiology of plant–microbe interactions; and organismal biology. Ph.D. students may elect an optional professional development experience as part of their curriculum. Graduates of the program attain positions in teaching, research in academic positions, government services, industry, extension services, and private practice.

The program is comprised of about 100 faculty members, graduate students, and research and support staff. It is housed in an eight-story

wing of Russell Laboratories, a teaching and research facility on the UW–Madison campus, which is surrounded by other facilities that are also devoted to biological research. Russell Labs, together with the extensive research facilities available on the rest of the UW–Madison campus and at field research stations throughout Wisconsin, provide a rich and comprehensive environment for research and graduate studies in all branches of plant pathology.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Plant Pathology, Doctoral Minor (p. 582)
- Plant Pathology, M.S. (p. 582)
- Plant Pathology, Ph.D. (p. 584)

## PEOPLE

**Faculty:** Professors McManus (chair), Ahlquist, Allen, Bent, Charkowski, Clayton, Havey, Jiang, Kaepler, Keller, MacGuidwin, Rouse, Yu; Associate Professors Ane, Barak, Gevens, Groves, Jansky; Assistant Professors Kabbage, Koch, Lankau, Rakotondrafara, Silva, Smith

## PLANT PATHOLOGY, DOCTORAL MINOR

### REQUIREMENTS

Ph.D. candidates in other majors seeking a doctoral minor in plant pathology must complete a minimum of 9 graduate-level course credits in plant pathology at UW–Madison, while enrolled in a graduate program, and have a plant pathology faculty member serve as the minor professor on their research committees (oral preliminary exam committee and final exam committee). Contact the department for details.

## PEOPLE

**Faculty:** Professors McManus (chair), Ahlquist, Allen, Bent, Charkowski, Clayton, Havey, Jiang, Kaepler, Keller, MacGuidwin, Rouse, Yu; Associate Professors Ane, Barak, Gevens, Groves, Jansky; Assistant Professors Kabbage, Koch, Lankau, Rakotondrafara, Silva, Smith

## PLANT PATHOLOGY, M.S.

The discipline of plant pathology is directed toward understanding and solving disease problems of plants. The field is broad and complex, integrating disciplines as varied as molecular biology, genetics, cell biology, organismal biology, population and community ecology, meteorology, statistics, computer science, chemistry, and physics. Plant pathology encompasses basic and applied research, employs both model systems and economically important plants, and requires both laboratory and field experimentation. Active research programs in the department encompass this full spectrum of questions and approaches, including research on biological control, virology, nematology, fungal genetics, tissue culture, soil microbiology and ecology, forest pathology, bacterial plant pathogens, molecular biology of parasite–host interactions,

microbial ecology, epidemiology, and integrated disease management strategies.

The graduate program in plant pathology educates students in the science of plant pathology and prepares them for successful careers. Students develop the following skills required to meet diverse professional situations: excellence in research, breadth and depth in plant pathology, breadth in an allied field, strong critical and analytical thinking skills, and effective communication skills. Students become sufficiently knowledgeable in all aspects of plant pathology to identify key research questions, recognize significant discoveries, and think analytically about interpretation of data.

The level of proficiency in specific areas will vary with the student's research area and career goals, and will be appropriate to the student's degree program (M.S. or Ph.D.). Specific areas of proficiency addressed by the Ph.D. curriculum include etiology, diagnosis, and management of plant disease; ecology and epidemiology; genetics and physiology of plant–microbe interactions; and organismal biology. Ph.D. students may elect an optional professional development experience as part of their curriculum. Graduates of the program attain positions in teaching, research in academic positions, government services, industry, extension services, and private practice.

The program is comprised of about 100 faculty members, graduate students, and research and support staff. It is housed in an eight-story wing of Russell Laboratories, a teaching and research facility on the UW–Madison campus, which is surrounded by other facilities that are also devoted to biological research. Russell Labs, together with the extensive research facilities available on the rest of the UW–Madison campus and at field research stations throughout Wisconsin, provide a rich and comprehensive environment for research and graduate studies in all branches of plant pathology.

## FUNDING

The department offers stipends to the most highly qualified applicants, and in-course students are funded throughout their programs by research assistantships, fellowships, or traineeships. The department nominates outstanding students for external fellowships, and supports and assists students who apply for scholarships and other forms of financial support.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS : GRADUATE WORK FROM OTHER INSTITUTIONS

With M.S. committee approval and Academic Affairs Committee approval, students are allowed to count no more than 14 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

Students may count up to 7 credits of coursework numbered 300 level or above upon approval of the M.S. committee and the Academic Affairs Committee. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With M.S. committee approval and Academic Affairs Committee approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

9 credits of plant pathology must include PL PATH 300 Introduction to Plant Pathology (or equivalent), must include at least 1 credit of PL PATH 875 Special Topics, must include 1 credit of PL PATH 923 Seminar. The remaining 21 credits of electives can include up to 15 credits of PL PATH 990 Research.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Students who are admitted to the department must meet the Graduate School requirements, including completion of a bachelor's degree which typically consists of courses in biology, chemistry, physics, and math. If foundation course requirements have not been fulfilled before matriculation, they must be completed as early as possible in the course of study. Successful applicants typically exceed the minimum requirement of a 3.0 GPA (on a 4.0 scale); exceed the minimum required Test of English as a Foreign Language (iTOEFL) score of 92, or a 7 on the International English Language Testing System (IELTS) exam (international applicants); perform well on the Graduate Record Exam (GRE); and articulate a strong interest in the discipline in their application. Prior research experience is an asset for any applicant, and letters of recommendation from research advisors are viewed as one of the most useful means of evaluating applications.

The application deadline for the fall semester is the preceding January 2. Applications received after that date will be reviewed, but they are disadvantaged for admission and financial support.

## LEARNING OUTCOMES

## KNOWLEDGE AND SKILLS

- Demonstrate an understanding of the basic biology of microorganisms that are symbiotic with plants including fungi, bacteria, viruses, oomycetes, and nematodes.
- Demonstrate a basic understanding of: a. the basic processes of pathogenesis, plant defense, and defense circumvention at the molecular, genetic and physiological level for each of the major groups of plant pathogens and other plant associated microorganisms. b. the etiology, ecology, and epidemiology of

economically significant diseases caused by the major groups of plant pathogens and be able to apply the understanding from a. and/ or b. above in research.

- Conduct project related to the discipline of Plant Pathology that requires specifying a problem, designing and conducting experiments, analyzing the resulting data, and reporting results/ solutions.

## PROFESSIONAL CONDUCT

- Convey scientific knowledge to fellow scientists in a variety of formats

## PEOPLE

**Faculty:** Professors McManus (chair), Ahlquist, Allen, Bent, Charkowski, Clayton, Havey, Jiang, Kaeppler, Keller, MacGuidwin, Rouse, Yu; Associate Professors Ane, Barak, Gevens, Groves, Jansky; Assistant Professors Kabbage, Koch, Lankau, Rakotondrafara, Silva, Smith

## PLANT PATHOLOGY, PH.D.

The discipline of plant pathology is directed toward understanding and solving disease problems of plants. The field is broad and complex, integrating disciplines as varied as molecular biology, genetics, cell biology, organismal biology, population and community ecology, meteorology, statistics, computer science, chemistry, and physics. Plant pathology encompasses basic and applied research, employs both model systems and economically important plants, and requires both laboratory and field experimentation. Active research programs in the department encompass this full spectrum of questions and approaches, including research on biological control, virology, nematology, fungal genetics, tissue culture, soil microbiology and ecology, forest pathology, bacterial plant pathogens, molecular biology of parasite–host interactions, microbial ecology, epidemiology, and integrated disease management strategies.

The graduate program in plant pathology educates students in the science of plant pathology and prepares them for successful careers. Students develop the following skills required to meet diverse professional situations: excellence in research, breadth and depth in plant pathology, breadth in an allied field, strong critical and analytical thinking skills, and effective communication skills. Students become sufficiently knowledgeable in all aspects of plant pathology to identify key research questions, recognize significant discoveries, and think analytically about interpretation of data.

The level of proficiency in specific areas will vary with the student's research area and career goals, and will be appropriate to the student's degree program (M.S. or Ph.D.). Specific areas of proficiency addressed by the Ph.D. curriculum include etiology, diagnosis, and management of plant disease; ecology and epidemiology; genetics and physiology of plant–microbe interactions; and organismal biology. Ph.D. students may elect an optional professional development experience as part of their curriculum. Graduates of the program attain positions in teaching, research in academic positions, government services, industry, extension services, and private practice.

The program is comprised of about 100 faculty members, graduate students, and research and support staff. It is housed in an eight-story wing of Russell Laboratories, a teaching and research facility on the UW–

Madison campus, which is surrounded by other facilities that are also devoted to biological research. Russell Labs, together with the extensive research facilities available on the rest of the UW–Madison campus and at field research stations throughout Wisconsin, provide a rich and comprehensive environment for research and graduate studies in all branches of plant pathology.

## FUNDING

The department offers stipends to the most highly qualified applicants, and in-course students are funded throughout their programs by research assistantships, fellowships, or traineeships. The department nominates outstanding students for external fellowships, and supports and assists students who apply for scholarships and other forms of financial support.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

For well-prepared advanced students, the program may accept prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework

earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Students who are admitted to the department must meet the Graduate School requirements, including completion of a bachelor's degree which typically consists of courses in biology, chemistry, physics, and math. If foundation course requirements have not been fulfilled before matriculation, they must be completed as early as possible in the course of study. Successful applicants typically exceed the minimum requirement of a 3.0 GPA (on a 4.0 scale); exceed the minimum required Test of English as a Foreign Language (iTOEFL) score of 92, or a 7 on the International English Language Testing System (IELTS) exam (international applicants); perform well on the Graduate Record Exam (GRE); and articulate a strong interest in the discipline in their application. Prior research experience is an asset for any applicant, and letters of recommendation from research advisors are viewed as one of the most useful means of evaluating applications.

The application deadline for the fall semester is the preceding January 2. Applications received after that date will be reviewed, but they are disadvantaged for admission and financial support.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrate an understanding of the basic processes of pathogenesis, plant defense, and defense circumvention at the molecular, genetic and physiological level for each of the major groups of plant pathogens and other plant associated microorganisms.
- Demonstrate an understanding of the basic biology of microorganisms that are symbiotic with plants including fungi, bacteria, viruses, oomycetes, and nematodes.
- Demonstrate an understanding of the etiology, ecology, and epidemiology of economically significant diseases caused by the major groups of plant pathogens.
- Construct disease management strategies for the different groups of important plant pathogens.
- Demonstrate excellent problem solving skills and a deep conceptual understanding of the science of Plant Pathology.

### PROFESSIONAL CONDUCT

- Convey knowledge in a variety of formats to diverse audiences including the public, students, and fellow scientists.

## PEOPLE

**Faculty:** Professors McManus (chair), Ahlquist, Allen, Bent, Charkowski, Clayton, Havey, Jiang, Kaeppler, Keller, MacGuidwin, Rouse, Yu; Associate Professors Ane, Barak, Gevens, Groves, Jansky; Assistant Professors Kabbage, Koch, Lankau, Rakotondrafara, Silva, Smith

## POLITICAL SCIENCE

**Administrative Unit:** Political Science

**College/School:** College of Letters & Science

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.A., Ph.D.

**Minors and Certificates:** Doctoral Minor

The Department of Political Science offers graduate study leading to the doctor of philosophy in political science. The department accepts students only for the Ph.D. program, but a master's degree can be obtained en route to the Ph.D.

The Ph.D. is earned through a combination of coursework and dissertation. The program is designed to provide students with both a general training in political science and the opportunity to specialize in their areas of interest.

The subfields of political science found in the department are American politics (<http://polisci.wisc.edu/fields/american-politics>), comparative politics (<http://polisci.wisc.edu/fields/comparative>), political theory and philosophy (<http://polisci.wisc.edu/fields/political-theory>), international relations (<http://polisci.wisc.edu/fields/ir>), and political methodology (<http://polisci.wisc.edu/fields/political-methodology>). The department has a national and international reputation for the high quality of its faculty and for the diversity of their approaches and interests; the department has long been known for both collegiality and acceptance of varied approaches to the study of politics. Political science shares faculty with the Robert M. La Follette School of Public Affairs (<http://www.lafollette.wisc.edu>), the Law School (<http://www.law.wisc.edu>), and the Department of Gender and Women's Studies (<http://womenstudies.wisc.edu>). The presence of programs and centers such as the African Studies Program (<http://africa.wisc.edu>), the Center for European Studies (<http://ces.wisc.edu>), the Center for Jewish Studies (<http://jewishstudies.wisc.edu>), the Center for Russia, East Europe, and Central Asia (CREECA) (<http://www.creeca.wisc.edu>), Integrated Liberal Studies (<http://ils.wisc.edu>), the International Studies Major (<http://www.ismajor.wisc.edu>), Latin American, Caribbean and Iberian Studies (<http://www.lacis.wisc.edu>), and others is also beneficial to graduate students, providing opportunities for the advancement of interdisciplinary approaches in student research.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Political Science, Doctoral Minor (p. 586)
- Political Science, M.A. (p. 586)
- Political Science, Ph.D. (p. 588)

## PEOPLE

**Faculty:** Professors Burden, Canon (chair), Cramer, Ewig, Gehlbach, Hendley, Herrera, Kydd, Marquez, Martin, Mayer, Owens, Pevehouse, Schatzberg, Schweber, Shafer, Straus, Tripp, Weimer, Yackee, Zumbrunnen; Associate Professors Avramenko, Copelovitch, Kapust, Kinsella, Ringe, Shelef; Assistant Professors Bhavnani, Lindsay, Lupu, Powell, Renshon, Rousseliere, Schwarze, Simmons, Weeks, Tahk

## POLITICAL SCIENCE, DOCTORAL MINOR

## REQUIREMENTS

Students from other departments who choose an Option A doctoral minor in political must complete 9 credits of political science coursework resulting in a cohesive theme or area of study. At least one-half of the coursework for the minor program must be taken in graduate-level offerings (700–900) in which the student has achieved grades of B or better. A written agreement as to the designated field and courses must be approved by the associate chair no later than halfway into the minor program.

## PEOPLE

**Faculty:** Professors Burden, Canon (chair), Cramer, Ewig, Gehlbach, Hendley, Herrera, Kydd, Marquez, Martin, Mayer, Owens, Pevehouse, Schatzberg, Schweber, Shafer, Straus, Tripp, Weimer, Yackee, Zumbrunnen; Associate Professors Avramenko, Copelovitch, Kapust, Kinsella, Ringe, Shelef; Assistant Professors Bhavnani, Lindsay, Lupu, Powell, Renshon, Rousseliere, Schwarze, Simmons, Weeks, Tahk

## POLITICAL SCIENCE, M.A.

The Department of Political Science offers graduate study leading to the doctor of philosophy in political science. The department accepts students only for the Ph.D. program, but a master's degree can be obtained en route to the Ph.D.

The Ph.D. is earned through a combination of coursework and dissertation. The program is designed to provide students with both a general training in political science and the opportunity to specialize in their areas of interest.

The subfields of political science found in the department are American politics (<http://polisci.wisc.edu/fields/american-politics>), comparative politics (<http://polisci.wisc.edu/fields/comparative>), political theory and philosophy (<http://polisci.wisc.edu/fields/political-theory>), international relations (<http://polisci.wisc.edu/fields/ir>), and political methodology (<http://polisci.wisc.edu/fields/political-methodology>). The department has a national and international reputation for the high quality of its faculty and for the diversity of their approaches and interests; the department has long been known for both collegiality and acceptance of varied approaches to the study of politics. ## FUNDING

The department guarantees funding for all students making satisfactory progress for at least their first five years. Support may be in the form of fellowships, teaching assistantships, or as an assistant to a faculty research project.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 15 of the 30 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No credits from graduate work from other institutions may count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

No credits from a UW–Madison University Special student career may count toward the degree.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Complete 30 credits of coursework with at least a 3.0 average.

At least 18 of the 30 credits must be in political science. No more than three credits of POLI SCI 999 Independent Work can be counted toward the 18 credits.

Courses taken outside the department must be chosen in consultation with the student's advisor and must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the University's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

POLI SCI 800 Political Science as a Discipline and Profession is required.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

No other grade requirements.

### PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Off normal progress: (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

### ADVISOR / COMMITTEE

All students are required to meet with their advisor to discuss the first year review.

### ASSESSMENTS AND EXAMINATIONS

No formal examination required.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 588)

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Develop an appreciation of the diverse subfields of political science.
- Learn to articulate questions of importance to the field that can be answered using the methods of political science.
- Learn to select and utilize methods of political inquiry appropriate to particular research questions.
- Learn to constructively critique existing work in political science.
- Develop an understanding of political science from an historical context.

### PROFESSIONAL CONDUCT

- Recognize and apply principles of ethical and professional conduct in research, teaching, and service.

## PEOPLE

**Faculty:** Professors Burden, Canon (chair), Cramer, Ewig, Gehlbach, Hendley, Herrera, Kydd, Marquez, Martin, Mayer, Owens, Pevehouse, Schatzberg, Schweber, Shafer, Straus, Tripp, Weimer, Yackee, Zumbrunnen; Associate Professors Avramenko, Copelovitch, Kapust, Kinsella, Ringe, Shelef; Assistant Professors Bhavnani, Lindsay, Lupu, Powell, Renshon, Rousseliere, Schwarze, Simmons, Weeks, Tahk

## POLITICAL SCIENCE, PH.D.

The Department of Political Science offers graduate study leading to the doctor of philosophy in political science. The department accepts students only for the Ph.D. program, but a master's degree can be obtained en route to the Ph.D.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may be allowed to count 9 credits of graduate coursework from other institutions toward fulfillment of the minor requirement. While satisfying the minor requirement, these credits will not count toward meeting the minimum credit requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

No credits from a UW–Madison University Special student career may count toward the degree.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

POLI SCI 800 Political Science as a Discipline and Profession;  
POLI SCI 817 Empirical Methods of Political Inquiry; 3 additional credits of graduate-level statistical methodology

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Students are expected to consult with their advisors concerning minor/breadth requirements. At the time the student requests the preliminary exam warrant, a summary should be prepared of the effort in interdisciplinary coursework and training. There are two options for completing the minor requirements.

Option A (external): Requires a minimum of 9 credits in a minor program (single disciplinary or multi-disciplinary). Fulfillment of this option requires the approval of the minor program.

Option B (distributed): Requires a minimum of 9 credits in one or more programs forming a coherent topic, and can include coursework in the program. Fulfillment of this option requires the approval of the major program.

The Graduate School's minimum course requirements for the minor include: An average GPA of 3.00 on all minor coursework; coursework must be graduate level (the equivalent of UW–Madison courses 300 level or above; no audits or pass/fail); maximum 3 credits of independent study (e.g., 699, 799, 899, 999);

All Option B minors require the approval of the student's advisor and the associate chair.

With program approval, students may be allowed to count 9 credits of graduate coursework from other institutions toward fulfillment of the minor requirement.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Off normal progress: (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

All students are required to meet with their advisor to discuss the first year review.

## ASSESSMENTS AND EXAMINATIONS

Doctoral students must complete written exams in two subfields before the end of the sixth semester. A dissertation proposal must be defended prior to the start of the seventh semester in the program.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants to the Ph.D. program must apply online by December 15 for admission the following fall. The online application requires you to submit the Graduate School application, three references and completion of the Political Science supplemental application. A statement of reasons for graduate study, a scanned set of official transcripts, and a research paper with abstract must be uploaded as part of the supplemental application. GRE scores are required. Applicants from outside the United States may also need to submit TOEFL scores. It is the candidate's responsibility to ensure that all materials are delivered on time.

International applicants whose first language is not English will be admitted only if they have Test of English as a Foreign Language (TOEFL) of 100 (Internet-based).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- The doctoral-level learning goals of the Department of Political Science are inclusive of the master's-level learning goals.
- Master the state of existing research in two or more subfields of political science.
- Acquire expert knowledge of methods of political inquiry.
- Design, conduct, and complete original research of substantive value to the field of political science that makes and original contribution to knowledge.
- Master the communication of complex concepts to a range of audiences.

### PROFESSIONAL CONDUCT

- Demonstrate and foster ethical and professional conduct in research, teaching, and service.

## PEOPLE

**Faculty:** Professors Burden, Canon (chair), Cramer, Ewig, Gehlbach, Hendley, Herrera, Kydd, Marquez, Martin, Mayer, Owens, Pevehouse, Schatzberg, Schweber, Shafer, Straus, Tripp, Weimer, Yackee, Zumbunnen; Associate Professors Avramenko, Copelovitch, Kapust, Kinsella, Ringe, Shelef; Assistant Professors Bhavnani, Lindsay, Lupu, Powell, Renshon, Rousseliere, Schwarze, Simmons, Weeks, Tahk

## POPULATION HEALTH SCIENCES

**Administrative Unit:** Population Health Sciences

**College/School:** School of Medicine and Public Health

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S. in Epidemiology; M.S. in Population Health Sciences; Ph.D. in Epidemiology; Ph.D. in Population Health Sciences

**Minors and Certificates:** Doctoral Minor in Epidemiology Doctoral Minor in Population Health Sciences; Graduate Professional Certificate in Global Health

**Named Options:** Epidemiology (M.S./Ph.D.)

**Specializations:** Epidemiology, Health Services Research, Social and Behavioral Health Sciences, and Clinical Research.

The Department of Population Health Sciences, part of the School of Medicine and Public Health, strives to provide leadership in the emerging, integrative field of population health. Its mission is to create, integrate, disseminate, and apply knowledge promoting the most efficient, equitable, and effective possible use of resources to maintain and improve the health of populations.

The department offers two graduate degree programs: an M.S. and a Ph.D. in population health and an M.S. and Ph.D. in epidemiology. Concentrations are available in epidemiology, health services research, social and behavioral health sciences, and clinical research.

The research-oriented degree programs are designed to provide rigorous, interdisciplinary training to develop students' abilities to synthesize knowledge and skills needed to address today's health-related problems. Methodological and analytical training is grounded in biostatistics, epidemiology, and health services research, but also emphasizes methods employed in the social sciences and econometrics that contribute to the study of health in populations. While the program is based on a sequence of core courses, students, in consultation with their major professor, have the flexibility to design advanced study and research that best prepares them for their chosen area of interest.

Individuals choose this program because of its innovative approach, strong research focus, and personal attention to students. It is an ideal option for those considering a broad array of fields including epidemiology, public health, health policy, health economics, health services research, environmental health, industrial engineering, demography, and more. UW–Madison ranks as one of the most prolific research universities in the world, consistently placing in the top five among American public universities for research expenditures. The program's interdisciplinary focus allows students the flexibility to work with a wide array of research/faculty on campus. For instance, program faculty include members from a number of other departments such as business, family medicine, industrial engineering, law, medical history and bioethics, medicine, nursing, ophthalmology, public affairs, sociology, and veterinary medicine. The multidisciplinary faculty coupled with the

diverse backgrounds of the students provides a rich and stimulating training environment.

Faculty, staff, and students in the Department of Population Health Sciences engage in a wide variety of epidemiological and health services world-class research projects to understand determinants of health and health problems in populations, to analyze public and clinical health policies, and to improve the effectiveness and efficiency of healthcare. Research topics may include (but are not limited to) chronic, infectious, and environmental disease epidemiology; public health; studies of medical outcomes; health economics; the determinants and measurement of population health status; and health administration and policy. These multidisciplinary research programs may include (but are not limited to) the study the effects and interactions of genetic traits; biologic and metabolic processes; pathogens; pollutants; lifestyles; behaviors; economic social and physical environments; and public health and health care systems on the health of populations. Methods employed involve developing and maintaining long term cohort studies, disease registries, population surveys, and retrospective analyses of large observational databases. Researchers in the department also work to advance methodology in health economics, population health evaluation, and statistical analyses.

For more information, see the graduate program Academic Guide (<http://www.pophealth.wisc.edu/Current-Students/Policy-Procedures/Handbooks>).

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Epidemiology, M.S. (p. 590)
- Epidemiology, Ph.D. (p. 593)
- Global Health, Graduate/Professional Certificate (p. 595)
- Population Health, Doctoral Minor (p. 596)
- Population Health, M.S. (p. 596)
- Population Health, Ph.D. (p. 600)

## PEOPLE

**Faculty:** Professors Nieto (chair), Cruickshanks, Durkin, Kanarek, Mullahy, Oliver, Palta, Patz, Remington, M. Smith, Wolfe, Young; Associate Professors Astor, Bautista, Engelman, Gangnon, Jacobs, Martinez-Donate, Olson, Peppard, Sethi, Si, Timberlake, Trentham-Dietz, Vanness; Assistant Professors M. Burns, DuGoff, Malecki, Pillai; CHS Professor Brokopp

## EPIDEMIOLOGY, M.S.

Epidemiology is the scientific discipline primarily concerned with identifying the distribution and causes of disease in populations. It encompasses a rich methodology including observational and experimental study designs, statistical methods, an understanding of pathogens, environmental and behavioral risk factors, and human biology. Epidemiological methods have evolved to meet threats of global infectious diseases and the complex health challenges presented by an aging population, as well as to capitalize on the expanding understanding of human genetics. As the fundamental discipline of public health, epidemiology provides essential knowledge to design, implement, and

assess approaches to effectively prevent disease and improve quality of life in the population.

The research-oriented degree programs are designed to provide rigorous training to develop students' abilities to synthesize knowledge and skills needed to address today's health-related problems. Faculty, staff, and students in the Department of Population Health Sciences engage in a wide variety of epidemiological and health services world-class research projects. The interdisciplinary focus allows students the flexibility to work with a wide array of research/faculty on campus.

The department offers two graduate degree programs: an M.S. and a Ph.D. in epidemiology and an M.S. and Ph.D. in population health. While the program is based on a sequence of core courses, students, in consultation with their major professor, have some flexibility to design advanced study and research that best prepares them for their chosen area of interest.

## FUNDING

Students admitted to our degree programs are automatically considered for any available scholarships, traineeships, or graduate assistant positions in the department. The most common forms of funding support for our students are assistantships, traineeships, and fellowships.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

33 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

21 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

100% of all coursework taken as a graduate student in any of the four degrees the program offers must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count a maximum of 12 credits of graduate coursework taken from other institutions as a graduate student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 12 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code                                         | Title                                                 | Credits |
|----------------------------------------------|-------------------------------------------------------|---------|
| POP HLTH/B M I 451                           | Introduction to SAS Programming for Population Health | 2       |
| POP HLTH/B M I 551                           | Introduction to Biostatistics for Population Health   | 3       |
| POP HLTH/B M I 552                           | Regression Methods for Population Health              | 3       |
| POP HLTH/SOC 797                             | Introduction to Epidemiology                          | 3       |
| POP HLTH 798                                 | Epidemiologic Methods                                 | 3       |
| POP HLTH 805                                 | Epidemiologic Methods 4                               | 3       |
| or POP HLTH 806                              | Advanced Epidemiology: Practice of Epidemiology       |         |
| POP HLTH 820                                 | Graduate Research Seminar                             | 1       |
| Select minimum of 1 credit of medical ethics |                                                       |         |

### OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative GPA of at least 3.25 in all graduate work (including transfer credits) unless conditions for probationary status require higher grades. Students must also maintain a cumulative GPA of 3.25 or better in all coursework completed while enrolled in the population health graduate program. No grade of BC or lower in epidemiology required courses will be accepted for the degree.

### OTHER GRADE REQUIREMENTS

Maintain no more than 6 credits of Incomplete (I) grades during any semester.

### PROBATION POLICY

A student not meeting guidelines for satisfactory progress will be placed on probation for one semester and will be reviewed by the Steering Committee following the probationary semester. Students may be dropped or allowed to continue by the committee based on review of progress during the probationary semester.

### ADVISOR / COMMITTEE

All students will have a hold placed on their registration each semester. Students must meet with their advisor once each semester for academic advising to have the hold removed.

### ASSESSMENTS AND EXAMINATIONS

No formal examination required.

## TIME CONSTRAINTS

Thesis required. Approval of a written proposal for thesis research is required before beginning thesis. M.S. candidates must submit master's thesis to advisor within two years of completing all coursework.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applications are welcome from students with diverse academic backgrounds. Students with strong quantitative skills and academic preparation in the biological sciences are strongly encouraged to apply.

Minimum requirements are:

- Applicants must have an undergraduate degree with a grade point average of 3.0 (on a 4.0 scale), although successful applicants generally have GPAs above 3.0.
- GRE scores are required for admission. The scores must be no more than five years old at the time of application. For applicants who have completed a doctoral degree, GRE scores are preferred but the program will accept scores for the entrance exam required for the doctoral degree (e.g., MCAT, LSAT). Students should contact the graduate program coordinator to find out if their scores are competitive.
- Applicants whose native language or language of study is not English must submit official TOEFL scores. Scores must be no more than five years old at the start of the semester for which an applicant is applying. Further details are available on the Graduate School website (<http://grad.wisc.edu>). Note that the minimum test scores for the program are higher than those required by the Graduate School. For the Test of English as a Foreign Language, TOEFL (<http://www.toefl.org>), minimum scores of 580 (written), 237 (computer-based), or 92 (Internet-based) or above are required.
- Transcripts must show evidence of quantitative preparation, including at least one semester of calculus as well as a two-semester courses in college-level biology. A personal statement and three letters of recommendation are required. Applicants must meet both the above departmental admission requirements and the Graduate School admission requirements.
- Upon entry to the graduate program, students are matched with a faculty advisor. Faculty advisors help students hone their interests, assist with identifying research projects, provide support for career development, and link students to the greater campus community. Students have the benefit of regular dialogues with faculty members. Seminars and integrated discussion groups allow for increased interaction with core faculty and community lecturers. Finally, the work of students is valued as evidenced by their entries in the annual department poster session, participation in public health symposia, authorship of publications, and involvement in community/research projects.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Complete course work or equivalent in human physiology and pathophysiology, with special competence in the disease addressed in the student's dissertation.
- Produce the descriptive epidemiology of a given condition, including case definition, calculation of the primary measures of disease morbidity and mortality, and appropriate comparisons by person, place and time.
- List the strengths and limitations of descriptive studies.
- Identify data from existing national and international sources.
- Identify major chronic and infectious diseases, their general pathophysiology, descriptive epidemiology and risk factors.
- Identify leading causes of death.
- Understand the general history of the development of epidemiology, including the major epidemiological studies of selected diseases.
- Know the principles of screening and of surveillance systems, including understand the concepts of validity and reliability of screening tests and be able to calculate associated measures and know the types of surveillance systems and approaches used in disease surveillance.
- Understand the global, cultural, and social context of health problems and how these influence the conduct, interpretation, and dissemination of research and intervention studies.
- Search, review and critically evaluate the literature.
- Synthesize available information.
- Identify meaningful gaps in knowledge.
- Formulate an original and key hypothesis or statement of the research problem.
- Design a study using any of the main study designs (including clinical trials and community trials).
- Understand the advantages and limitations of each design for addressing specific problems, as well as practical aspects of their uses, including trade-offs.
- Calculate the requisite sample size.
- Identify and minimize sources of bias; describe both the direction and magnitude of the bias and the effect of potential biases on the measures of association.
- Use basic population sampling methods.
- Use methods of measurement design data collection forms assessing both exposures and outcomes; determine the validity of the instrument; identify the presence and magnitude of measurement error; adjust for measurement error when appropriate data are available.
- Monitor the conduct and progress of data collection; develop, implement and assess quality control measures.
- Create data files appropriate for analysis; carry out the steps needed to create new variables, clean the data sets, etc.
- Use statistical computer packages to calculate and display descriptive statistics, analyze categorical data, and perform multivariable regression, survival analysis, and longitudinal analysis.
- Examine data for the presence of confounding and interaction (effect modification), identify their presence, and manage them appropriately.

- Interpret the research results, make appropriate inferences based on results, and recognize the implications of the research results.
- Communicate research results orally and in writing to both scientists and non-scientists.
- Understand the concepts of human subjects protections and confidentiality, and awareness of particular issues relevant to the study of specific populations.
- Apply this understanding as evidenced in the design and conduct of their research.
- Demonstrate mastery of a substantive area, including knowledge and application of that knowledge in conducting original research related to a specific topic.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct as they apply to Epidemiology.

## PEOPLE

**Faculty:** Professors Nieto (chair), Cruickshanks, Durkin, Kanarek, Palta, Patz, Remington, Young; Associate Professors Astor, Bautista, Engleman, Gangnon, Martinez-Donate, Peppard, Sethi, Trentham-Dietz; Assistant Professor Malecki; CHS Professor Brokopp

## EPIDEMIOLOGY, PH.D.

Epidemiology is the scientific discipline primarily concerned with identifying the distribution and causes of disease in populations. It encompasses a rich methodology including observational and experimental study designs, statistical methods, an understanding of pathogens, environmental and behavioral risk factors, and human biology. Epidemiological methods have evolved to meet threats of global infectious diseases and the complex health challenges presented by an aging population, as well as to capitalize on the expanding understanding of human genetics. As the fundamental discipline of public health, epidemiology provides essential knowledge to design, implement, and assess approaches to effectively prevent disease and improve quality of life in the population.

The research-oriented degree programs are designed to provide rigorous training to develop students' abilities to synthesize knowledge and skills needed to address today's health-related problems. Faculty, staff, and students in the Department of Population Health Sciences engage in a wide variety of epidemiological and health services world-class research projects. The interdisciplinary focus allows students the flexibility to work with a wide array of research/faculty on campus.

The department offers two graduate degree programs: an M.S. and a Ph.D. in epidemiology and an M.S. and Ph.D. in population health. While the program is based on a sequence of core courses, students, in consultation with their major professor, have some flexibility to design advanced study and research that best prepares them for their chosen area of interest.

## FUNDING

Students admitted to our degree programs are automatically considered for any available scholarships, traineeships, or graduate assistant

positions in the department. The most common forms of funding support for our students are assistantships, traineeships, and fellowships.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

- Identify and minimize sources of bias; describe both the direction and magnitude of the bias and the effect of potential biases on the measures of association.
- Use basic population sampling methods.
- Use methods of measurement design data collection forms assessing both exposures and outcomes; determine the validity of the instrument; identify the presence and magnitude of measurement error; adjust for measurement error when appropriate data are available.
- Monitor the conduct and progress of data collection; develop, implement and assess quality control measures.
- Create data files appropriate for analysis; carry out the steps needed to create new variables, clean the data sets, etc.
- Use statistical computer packages to calculate and display descriptive statistics, analyze categorical data, and perform multivariable regression, survival analysis, and longitudinal analysis.
- Examine data for the presence of confounding and interaction (effect modification), identify their presence, and manage them appropriately.
- Interpret the research results, make appropriate inferences based on results, and recognize the implications of the research results.
- Communicate research results orally and in writing to both scientists and non-scientists.
- Present research data in both tabular and figure forms.
- Understand the concepts of human subjects protections and confidentiality, and awareness of particular issues relevant to the study of specific populations.
- Apply this understanding as evidenced in the design and conduct of their research.
- Demonstrate mastery of a substantive area, including knowledge and application of that knowledge in conducting original research related to a specific topic.
- Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues.
- Relative to # 6 above, have a more in-depth knowledge of study designs used in epidemiologic research (including cross-sectional studies, case-control studies, cohort studies, and randomized trials).
- Be able to identify meaningful gaps in knowledge.
- Formulate an original, key hypothesis or statement of a research problem.
- Design a study using any relevant study design (including clinical trial, community trial) OR one based on creative use of existing data. Understand the advantages and limitations of each design for addressing specific problems, as well as practical aspects of their uses, including trade-offs.
- In addition to item 9 above, be able to identify and minimize sources of bias in the chosen study design; describe both the direction and magnitude of the bias and the effect of potential biases on the measures of association.
- Understand the basics of population sampling methods.
- Assess validity of data collection tools for both exposures and outcomes; and the presence, magnitude and impact of measurement error.
- Interpret research results, and recognize their implications for future research needs and for population health and health policy.
- Communicate research results orally and in writing to both scientists and non-scientists.
- Demonstrate mastery of a substantive area, including knowledge and application of that knowledge in conducting original research related to a specific topic.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct as they apply to Epidemiology.

## PEOPLE

**Faculty:** Professors Nieto (chair), Cruickshanks, Durkin, Kanarek, Palta, Patz, Remington, Young; Associate Professors Astor, Bautista, Engleman, Gangnon, Martinez-Donate, Peppard, Sethi, Trentham-Dietz; Assistant Professor Malecki; CHS Professor Brokopp

## GLOBAL HEALTH, GRADUATE/ PROFESSIONAL CERTIFICATE

The global health certificate program is designed to assist traditional and nontraditional students with interests in global health.

- The graduate/professional certificate is available to graduate students and professional students in the health sciences.
- The capstone certificate is offered to University Special students who have earned a bachelor's degree and who have interest and/or experience in a global health-related field. Degree-seeking students may not enroll in the capstone certificate.

The program is based in the Department of Population Health Sciences in the School of Medicine and Public Health, and is administered by the campuswide Global Health Institute. The certificate curriculum focuses on global health topics and health issues that transcend national boundaries, emphasizing health and disease in developing countries.

Through a 9-credit program of preparatory coursework and culminating in a global-health field experience, students will be prepared to address health disparities in a context of cultural diversity. Certificate recipients may serve populations internationally or work among the increasingly diverse population of Wisconsin and the United States. Through core courses and electives, students may focus their studies on health promotion, detection and treatment of disease, prevention and management of outbreaks, health policy, environmental health, or other interdisciplinary topics.

### Educational Benchmarks for Certificate Program

- Expansion and discussion of knowledge of major themes and trends in global health
- Enhancement of communication skills for trans-cultural, interdisciplinary health practice
- Demonstration of effective collaboration with colleagues abroad
- Analysis of health system infrastructures at local and national levels
- Discussion of ethical standards for conduct of research in international settings
- Integration of one's discipline-specific role with other disciplines to promote effective interdisciplinary team practice
- Use of evidence-based principles in practice settings

Certificate program staff are identified on the program website (<http://ghi.wisc.edu/education/professional-graduate-and-capstone>).

## PEOPLE

**Faculty:** DiPrete Brown, Conway, Durkin, Kraus, Patz, Sladky, Solheim

## POPULATION HEALTH, DOCTORAL MINOR

Many, if not all, research endeavors have implications for health. The doctoral minor in population health provides the methodological foundations for understanding how health is evaluated, how to assess influences on health and how to critically evaluate health related research. In addition, students completing the minor enhance their general understanding of research design and statistical interpretation. The coursework encompasses the methodological cornerstones of population health and clinical research: epidemiology, health services research, and biostatistics. The electives allow students to emphasize epidemiology or health services research. The population health minor is open to students in any major field of graduate studies at the University of Wisconsin. Given the necessarily quantitative emphasis of the coursework, a prior one-semester course in biostatistics (such as POP HLTH/B M I 551 Introduction to Biostatistics for Population Health, B M I/STAT 541 Introduction to Biostatistics, STAT/F&W ECOL/HORT 571 Statistical Methods for Bioscience I or B M I/STAT 511 Introduction to Biostatistical Methods for Public Health) is required or can be taken simultaneously (prior to B M I/POP HLTH 552 Regression Methods for Population Health) with course work for the minor.

## REQUIREMENTS

| Code                                                                                                                                    | Title                                             | Credits |
|-----------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|---------|
| <b>Required courses:</b>                                                                                                                |                                                   |         |
| POP HLTH/SOC 797                                                                                                                        | Introduction to Epidemiology                      | 3       |
| POP HLTH 780                                                                                                                            | Public Health: Principles and Practice            | 3       |
| POP HLTH 796                                                                                                                            | Introduction to Health Services Research          | 3       |
| <i>Students are strongly encouraged to take one of the following as an elective. However, other POP HLTH courses can be considered:</i> |                                                   |         |
| POP HLTH/B M I 552                                                                                                                      | Regression Methods for Population Health          | 3       |
| POP HLTH/B M I 651                                                                                                                      | Advanced Regression Methods for Population Health | 3       |

A likely course sequence for the doctoral minor in population health would be as follows:

| Fall                | Credits Spring          | Credits |
|---------------------|-------------------------|---------|
| POP HLTH 795 or 780 | 1-3 POP HLTH 796 or 798 | 3       |
| POP HLTH/SOC 797    | 3 POP HLTH Elective     | 3       |
|                     | 4-6                     | 6       |

Total Credits 10-12

Students who request exemptions and/or substitutions for required minor courses must appeal to the director of the graduate program through the graduate program coordinator. In this case, the appeal must include a Proposed Minor Program Plan, which must be approved and signed by the graduate program director.

## ADMISSIONS

In order to have approval to pursue the population health minor, please send an email to the Population Health Sciences Graduate Program Coordinator, Quinn Fullenkamp ([quinn.fullenkamp@wisc.edu](mailto:quinn.fullenkamp@wisc.edu)), explaining the sequence of courses that you plan to take toward the doctoral minor requirement. Be sure to include course completion dates. Your plan will be approved via email. When you are ready to have your warrant signed, email Quinn Fullenkamp again to make arrangements to obtain a signature.

## POPULATION HEALTH, M.S.

The Department of Population Health Sciences, part of the School of Medicine and Public Health, strives to provide leadership in the emerging, integrative field of population health. Its mission is to create, integrate, disseminate, and apply knowledge promoting the most efficient, equitable, and effective possible use of resources to maintain and improve the health of populations.

The department offers two graduate degree programs: an M.S. and a Ph.D. in population health and an M.S. and Ph.D. in epidemiology. Concentrations are available in epidemiology, health services research, social and behavioral health sciences, and clinical research.

The research-oriented degree programs are designed to provide rigorous, interdisciplinary training to develop students' abilities to synthesize knowledge and skills needed to address today's health-related problems. Methodological and analytical training is grounded in biostatistics, epidemiology, and health services research, but also emphasizes methods employed in the social sciences and econometrics that contribute to the study of health in populations. While the program is based on a sequence of core courses, students, in consultation with their major professor, have the flexibility to design advanced study and research that best prepares them for their chosen area of interest.

Individuals choose this program because of its innovative approach, strong research focus, and personal attention to students. It is an ideal option for those considering a broad array of fields including epidemiology, public health, health policy, health economics, health services research, environmental health, industrial engineering, demography, and more. UW–Madison ranks as one of the most prolific research universities in the world, consistently placing in the top five among American public universities for research expenditures. The program's interdisciplinary focus allows students the flexibility to work with a wide array of research/faculty on campus. For instance, program faculty include members from a number of other departments such as business, family medicine, industrial engineering, law, medical history and bioethics, medicine, nursing, ophthalmology, public affairs, sociology, and veterinary medicine. The multidisciplinary faculty coupled with the diverse backgrounds of the students provides a rich and stimulating training environment.

Faculty, staff, and students in the Department of Population Health Sciences engage in a wide variety of epidemiological and health services world-class research projects to understand determinants of health and health problems in populations, to analyze public and clinical health policies, and to improve the effectiveness and efficiency of healthcare. Research topics may include (but are not limited to) chronic, infectious, and environmental disease epidemiology; public health; studies of medical outcomes; health economics; the determinants and measurement of population health status; and health administration and policy. These multidisciplinary research programs may include (but are not limited to) the study the effects and interactions of genetic traits; biologic and metabolic processes; pathogens; pollutants; lifestyles; behaviors; economic social and physical environments; and public health and health care systems on the health of populations. Methods employed involve developing and maintaining long term cohort studies, disease registries, population surveys, and retrospective analyses of large observational databases. Researchers in the department also work to advance methodology in health economics, population health evaluation, and statistical analyses.

For more information, see the graduate program Academic Guide (<http://www.pophealth.wisc.edu/Current-Students/Policy-Procedures/Handbooks>).

## FUNDING

Students admitted to our degree programs are automatically considered for any available scholarships, traineeships, or graduate assistant positions in the department. The most common forms of funding support for our students are assistantships, traineeships, and fellowships.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available named option in Epidemiology

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

33 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

21 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

100% of all coursework taken as a graduate student must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count a maximum of 12 credits of graduate coursework taken from other institutions as a graduate student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 12 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code               | Title                                                 | Credits |
|--------------------|-------------------------------------------------------|---------|
| POP HLTH/B M I 451 | Introduction to SAS Programming for Population Health | 2       |
| POP HLTH/B M I 551 | Introduction to Biostatistics for Population Health   | 3       |
| POP HLTH/B M I 552 | Regression Methods for Population Health              | 3       |

|                                                    |                                                    |     |
|----------------------------------------------------|----------------------------------------------------|-----|
| POP HLTH 795                                       | Principles of Population Health Sciences           | 1-3 |
| POP HLTH/SOC 797                                   | Introduction to Epidemiology                       | 3   |
| POP HLTH 820                                       | Graduate Research Seminar                          | 1   |
| Select two additional methods courses <sup>1</sup> |                                                    |     |
| Select a minimum of 1 credit of medical ethics     |                                                    |     |
| POP HLTH 794                                       | Biological Basis of Population Health <sup>2</sup> | 2   |

<sup>1</sup> One of which must be POP HLTH 796 Introduction to Health Services Research or POP HLTH 798 Epidemiologic Methods.

<sup>2</sup> Some students must also complete this course.

## OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative GPA of at least 3.25 in all graduate work (including transfer credits) unless conditions for probationary status require higher grades. Students must also maintain a cumulative GPA of 3.25 or better in all coursework completed while enrolled in the population health graduate program. No grade of BC or lower in epidemiology required courses will be accepted for the degree.

## OTHER GRADE REQUIREMENTS

Maintain no more than 6 credits of Incomplete (I) grades during any semester.

## PROBATION POLICY

A student not meeting guidelines for satisfactory progress will be placed on probation for one semester and will be reviewed by the steering committee following the probationary semester. Students may be dropped or allowed to continue by the committee based on review of progress during the probationary semester.

## ADVISOR / COMMITTEE

All students will have a hold placed on their registration each semester. Students must meet with their advisor once each semester for academic advising to have the hold removed.

## ASSESSMENTS AND EXAMINATIONS

No formal examination required.

## TIME CONSTRAINTS

Thesis required. Approval of a written proposal for thesis research is required before beginning thesis. M.S. candidates must submit Master's thesis to advisor within two years of completing all coursework.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applications are welcome from students with diverse academic backgrounds. Students with strong academic preparation in the biological/medical sciences, quantitative analysis, and/or population health related social sciences are strongly encouraged to apply. Historically, many applicants who have succeeded in our program

have come to the program with backgrounds in fields as diverse as microbiology, genetics, nutritional sciences, medicine, nursing, pharmacy, veterinary medicine, environmental sciences, political sciences, business, sociology, education, engineering, psychology, and economics.

Minimum requirements are:

1. Applicants must have an undergraduate degree with a grade point average of 3.0 (on a 4.0 scale), although successful applicants generally have GPAs above 3.0.
2. GRE are required for admission. The scores must be no more than five years old at the time of application. For applicants who have completed a doctoral degree, GRE scores are preferred but the program will accept scores for the entrance exam required for the doctoral degree (e.g., MCAT, LSAT). Students should contact the graduate program coordinator to find out if their scores are competitive.
3. Applicants whose native language or language of study is not English must submit official TOEFL scores. Scores must be no more than five years old at the start of the semester for which an applicant is applying. Further details are available on the Graduate School website (<http://grad.wisc.edu/admissions/requirements>). Note that the minimum test scores for the program are higher than those required by the Graduate School. For the Test of English as a Foreign Language, TOEFL (<http://www.toefl.org>), a minimum score of 580 (written), 237 (computer-based), or 92 (Internet-based) or above is absolutely required.
4. At least one semester of advanced quantitative preparation (calculus is strongly preferred) with a grade of B or better.
5. A personal statement and three letter of recommendation are required.
6. Applicants must meet both the above departmental admission requirements and the Graduate School admission requirements.

Upon entry to the graduate programs, students are matched with a faculty advisor. Faculty advisors helps students hone their interests, assists with identifying research projects, provide support for career development, and link students to the greater campus community. Students have the benefit of regular dialogues with faculty members. Seminars and integrated discussion groups allow for increased interaction with core faculty and community lecturers. Finally, the work of students is valued as evidenced by their entries in the annual department poster session, participation in public health symposia, authorship of publications, and involvement in community/research projects.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### HEALTH SERVICES RESEARCH

- Understand and apply principles of population health science in characterizing: (a) the multiple determinants of health; and (b) the allocation of resources across those determinants and its influence on health and health disparities.
- Understand and apply principles of microeconomic theory relating to human and institutional decisions in the allocation of scarce resources for the production of health at individual, system and population levels.

- Understand and apply the principles of health outcomes measurement and its role in the design of health services, policy, intervention and evaluation.
- Describe the historical and current organization, delivery and financing of health care services in the United States.
- Describe the historical and current role of government in the regulation, provision and financing of health care services in the United States.
- Describe the role of social institutions, culture and behavior on the production of health at individual, system and population levels.
- Apply economic principles to describe, predict and evaluate the impact of government policy on the production of health and health care.
- Understand advantages and disadvantages of experimental, quasi-experimental and observational study designs for the evaluation of interventions, policies and processes that affect utilization and cost of health services and/or the production of health.
- Have a working knowledge of the availability, use, advantages and limitations of various sources of publicly available and/or electronically captured data on health care utilization and outcomes, including but not limited to: major surveys of healthcare utilization, electronic medical records and administrative claims datasets.

## BIostatISTICS

- Be thoroughly familiar with how to organize and manipulate data and perform basic statistical analyses in at least one major statistical software package (SAS, Stata, or R, perhaps SPSS is sufficient for some).
- Be familiar with the basic concepts of probability, random variation and commonly used statistical probability distributions and their applications in health research.
- Understand the foundations of statistical inference such as parameters, estimators, hypothesis tests and confidence intervals.
- Be able to describe samples appropriately, using measures of central tendency and dispersion.
- Know and assess assumptions and types of data needed for different common approaches to compare samples and be able to conduct and interpret these comparisons.
- Fit and interpret the results from linear, logistic and Cox regression models (including logistic models with multiple outcome categories and those for case-control data).
- Understand and be able to assess the assumptions of linear, logistic and Cox models.
- Explain the results of the above statistical analyses in subject matter terms to researchers and health professionals.
- Understand how measures of association, risk and rate learned in epi courses relate to estimators arising from the above models.
- Apply the concepts of intermediate variables, confounding variables, and interacting variables in the process of variable selection and model building.

## EPIDEMIOLOGY

- Have basic knowledge of human physiology and pathophysiology, with special competence in the aspects of health addressed in the student's thesis or dissertation.
- Know the methods and measures of descriptive epidemiology, including case definition, calculation of the primary measures of

disease morbidity and mortality, and appropriate comparisons by person, place and time.

- Be familiar with major disease categories and leading causes of death, their general pathophysiology, descriptive epidemiology & risk factors, and with the multiple determinants of health, including social, behavioral and other influences on the health of individuals and populations.
- Understand the concepts and practical implications of random and systematic errors (i.e. sampling error and bias: information, selection and confounding bias) as they apply to causal inferences in observational studies.
- Understand the concepts and practical implications of interaction, effect modification, and mediation of causal effects in observational studies.
- Identify the basic study designs used in epidemiologic research and know the advantages and disadvantages of each (including cross-sectional, case-control, cohort, and randomized trials).
- Understand principles of causal inference in epidemiologic studies and be able to critique, use or discuss them in the context of evaluating evidence. This includes application of the counterfactual model in estimation of causal effects and the ability to explain assumptions needed for valid estimation of causal effects in epidemiologic studies.
- Be familiar with publicly available national and international data sources and resources, and know how to start accessing them.
- Read and critique studies with respect to most common biases (confounding, selection bias, and information bias), as well as role of random error, and interpretation of results.
- Synthesize available information by searching, review and critically evaluating the literature
- Have in depth knowledge of at least one health condition, disease or risk factor area.
- Have in depth understanding of at least one methodological issue that arises in epidemiologic research.
- Know the uses and principles of screening, including the concepts of validity and reliability of screening tests and be able to calculate and interpret associated measures.
- Know the uses and principles of public health surveillance and the types of surveillance systems and approaches used in disease surveillance.
- Understand the global, cultural, and social context of health problems and how these influence the conduct, interpretation, and dissemination of research.
- Understand and apply the concepts of human subjects protections and confidentiality, and awareness of particular issues relevant to the study of specific populations.
- Understand and adhere to the principles of communicating epidemiologic research methods and results honestly and with integrity.
- Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct as they apply to Population Health Sciences.

## PEOPLE

**Faculty:** Professors Nieto (chair), Cruickshanks, Durkin, Kanarek, Mullahy, Oliver, Palta, Patz, Remington, M. Smith, Wolfe, Young; Associate Professors Astor, Bautista, Engelman, Gangnon, Jacobs, Martinez-Donate, Olson, Peppard, Sethi, Si, Timberlake, Trentham-Dietz, Vanness; Assistant Professors M. ## FUNDING

Students admitted to our degree programs are automatically considered for any available scholarships, traineeships, or graduate assistant positions in the department. The most common forms of funding support for our students are assistantships, traineeships, and fellowships.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., with available named option in Epidemiology

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

39 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

100% of all coursework taken as a graduate student must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count a maximum of 12 credits of graduate coursework taken from other institutions as a graduate student. coursework earned five or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 12 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

| Code                                           | Title                                                 | Credits |
|------------------------------------------------|-------------------------------------------------------|---------|
| POP HLTH/B M I 451                             | Introduction to SAS Programming for Population Health | 2       |
| POP HLTH/B M I 551                             | Introduction to Biostatistics for Population Health   | 3       |
| POP HLTH/B M I 552                             | Regression Methods for Population Health              | 3       |
| POP HLTH/B M I 651                             | Advanced Regression Methods for Population Health     | 3       |
| POP HLTH 795                                   | Principles of Population Health Sciences              | 1-3     |
| POP HLTH 796                                   | Introduction to Health Services Research              | 3       |
| POP HLTH/SOC 797                               | Introduction to Epidemiology                          | 3       |
| POP HLTH 798                                   | Epidemiologic Methods                                 | 3       |
| POP HLTH 820                                   | Graduate Research Seminar                             | 1       |
| Select a minimum of 1 credit of medical ethics |                                                       |         |
| POP HLTH 794                                   | Biological Basis of Population Health <sup>1</sup>    | 2       |

<sup>1</sup> Some students must complete this course.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a 10-credit minor.

## OVERALL GRADUATE GPA REQUIREMENT

Students must maintain a cumulative GPA of at least 3.25 in all graduate work (including transfer credits) unless conditions for probationary status require higher grades. Students must also maintain a cumulative GPA of 3.25 or better in all coursework completed while enrolled in the population health graduate program. No grade of BC or lower in epidemiology required courses will be accepted for the degree.

## OTHER GRADE REQUIREMENTS

Maintain no more than 6 credits of Incomplete (I) grades during any semester.

## PROBATION POLICY

A student not meeting guidelines for satisfactory progress will be placed on probation for one semester and will be reviewed by the steering committee following the probationary semester. Students may be dropped or allowed to continue by the committee based on review of progress during the probationary semester.

## ADVISOR / COMMITTEE

All students will have a hold placed on their registration each semester. Students must meet with their advisor once each semester for academic advising to have the hold removed.

## ASSESSMENTS AND EXAMINATIONS

Full-time students have up until the end of their third year to pass the qualifying exam and their first sitting must occur no later than the end of their second year. Part-time students are expected to pass the exam before the end of their fourth year (regardless of whether the student is continuously enrolled) and their first sitting must occur no later than the end of their third year.

## TIME CONSTRAINTS

Dissertation required. Doctoral students have a maximum of five years from the date of passing the preliminary examination to take the final oral examination and deposit the dissertation.

Doctoral degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applications are welcome from students with diverse academic backgrounds. Students with strong academic preparation in the biological/medical sciences, quantitative analysis, and/or population health related social sciences are strongly encouraged to apply. Historically, many applicants who have succeeded in our program have come to the program with backgrounds in fields as diverse as microbiology, genetics, nutritional sciences, medicine, nursing, pharmacy, veterinary medicine, environmental sciences, political sciences, business, sociology, education, engineering, psychology, and economics.

Minimum requirements are:

1. Applicants must have an undergraduate degree with a grade point average of 3.0 (on a 4.0 scale), although successful applicants generally have GPAs above 3.0.
2. GRE are required for admission. The scores must be no more than five years old at the time of application. For applicants who have completed a doctoral degree, GRE scores are preferred but the program will accept scores for the entrance exam required for the doctoral degree (e.g., MCAT, LSAT). Students should contact the graduate program coordinator to find out if their scores are competitive.
3. Applicants whose native language or language of study is not English must submit official TOEFL scores. Scores must be no more than five years old at the start of the semester for which an applicant is applying. Further details are available on the Graduate School website (<http://grad.wisc.edu/admissions/requirements>). Note that the minimum test scores for the program are higher than those required by the Graduate School. For the Test of English as a Foreign Language, TOEFL (<http://www.toefl.org>), a minimum score of 580 (written), 237 (computer-based), or 92 (Internet-based) or above is absolutely required.

4. At least one semester of advanced quantitative preparation (calculus is strongly preferred) with a grade of B or better.
5. A personal statement and three letter of recommendation are required.
6. Applicants must meet both the above departmental admission requirements and the Graduate School admission requirements.

Upon entry to the graduate programs, students are matched with a faculty advisor. Faculty advisors help students hone their interests, assist with identifying research projects, provide support for career development, and link students to the greater campus community. Students have the benefit of regular dialogues with faculty members. Seminars and integrated discussion groups allow for increased interaction with core faculty and community lecturers. Finally, the work of students is valued as evidenced by their entries in the annual department poster session, participation in public health symposia, authorship of publications, and involvement in community/research projects.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### HEALTH SERVICES RESEARCH

- Understand and apply principles of population health science in characterizing: a) the multiple determinants of health; and b) the allocation of resources across those determinants and its influence on health and health disparities.
- Understand and apply principles of microeconomic theory relating to human and institutional decisions in the allocation of scarce resources for the production of health at individual, system and population levels.
- Understand and apply the principles of health outcomes measurement and its role in the design of health services, policy, intervention and evaluation.
- Understand and apply the methods of econometric analysis in relating models of economic behavior, processes and interventions to the utilization and cost of health services and/or the production of health.
- Describe the historical and current organization, delivery and financing of health care services in the United States.
- Describe the historical and current role of government in the regulation, provision and financing of health care services in the United States.
- Describe the role of social institutions, culture and behavior on the production of health at individual, system and population levels.
- Apply economic principles to describe, predict and evaluate the impact of government policy on the production of health and health care.
- Understand advantages and disadvantages of experimental, quasi-experimental and observational study designs for the evaluation of interventions, policies and processes that affect utilization and cost of health services and/or the production of health.
- Have a working knowledge of the availability, use, advantages and limitations of various sources of publicly available and/or electronically captured data on health care utilization and outcomes, including but not limited to: major surveys of healthcare utilization, electronic medical records and administrative claims datasets.

### BIostatISTICS

- Be thoroughly familiar with how to organize and manipulate data and perform basic statistical analyses in at least one major statistical software package (SAS, Stata, or R, perhaps SPSS is sufficient for some).
- Be familiar with the basic concepts of probability, random variation and commonly used statistical probability distributions and their applications in health research.
- Understand the foundations of statistical inference such as parameters, estimators, hypothesis tests and confidence intervals.
- Be able to describe samples appropriately, using measures of central tendency and dispersion.
- Know and assess assumptions and types of data needed for different common approaches to compare samples and be able to conduct and interpret these comparisons.
- Fit and interpret the results from linear, logistic and Cox regression models (including logistic models with multiple outcome categories and those for case-control data).
- Understand and be able to assess the assumptions of linear, logistic and Cox models.
- Explain the results of the above statistical analyses in subject matter terms to researchers and health professionals.
- Understand how measures of association, risk and rate learned in epi courses relate to estimators arising from the above models.
- Apply the concepts of intermediate variables, confounding variables, and interacting variables in the process of variable selection and model building.
- Possess a high level of comfort in analyzing real data.
- Possess a high level of facility in interpreting results from regression analysis.
- Understanding some of the theoretical underpinnings of statistics—especially as needed to read articles from statistical journals and software manuals and apply new methods.
- Know how to analyze longitudinal and other correlated (hierarchical) data as well as survival data, be able to interpret results and assess assumptions.
- Master at greater depth the aspects of above that apply to the dissertation.
- Master additional areas of statistics that apply to the dissertation.

### EPIDEMIOLOGY

- Have basic knowledge of human physiology and pathophysiology, with special competence in the aspects of health addressed in the student's thesis or dissertation.
- Know the methods and measures of descriptive epidemiology, including case definition, calculation of the primary measures of disease morbidity and mortality, and appropriate comparisons by person, place and time.
- Be familiar with major disease categories and leading causes of death, their general pathophysiology, descriptive epidemiology & risk factors, and with the multiple determinants of health, including social, behavioral and other influences on the health of individuals and populations.
- Understand the concepts and practical implications of random and systematic errors (i.e. sampling error and bias: information, selection and confounding bias) as they apply to causal inferences in observational studies.

- Understand the concepts and practical implications of interaction, effect modification, and mediation of causal effects in observational studies.
- Identify the basic study designs used in epidemiologic research and know the advantages and disadvantages of each (including cross-sectional, case-control, cohort, and randomized trials).
- Understand principles of causal inference in epidemiologic studies and be able to critique, use or discuss them in the context of evaluating evidence. This includes application of the counterfactual model in estimation of causal effects and the ability to explain assumptions needed for valid estimation of causal effects in epidemiologic studies.
- Be familiar with publicly available national and international data sources and resources, and know how to start accessing them.
- Read and critique studies with respect to most common biases (confounding, selection bias, and information bias), as well as role of random error, and interpretation of results.
- Synthesize available information by searching, review and critically evaluating the literature.
- Have in depth knowledge of at least one health condition, disease or risk factor area.
- Have in depth understanding of at least one methodological issue that arises in epidemiologic research.
- Know the uses and principles of screening, including the concepts of validity and reliability of screening tests and be able to calculate and interpret associated measures.
- Know the uses and principles of public health surveillance and the types of surveillance systems and approaches used in disease surveillance.
- Understand the global, cultural, and social context of health problems and how these influence the conduct, interpretation, and dissemination of research.
- Understand and apply the concepts of human subjects protections and confidentiality, and awareness of particular issues relevant to the study of specific populations.
- Understand and adhere to the principles of communicating epidemiologic research methods and results honestly and with integrity.
- Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues.
- Relative to #6 above, have a more in-depth knowledge of study designs used in epidemiologic research (including cross-sectional studies, case-control studies, cohort studies, and randomized trials).
- Be able to identify meaningful gaps in knowledge.
- Formulate an original, key hypothesis or statement of a research problem.
- Design a study using any relevant study design (including clinical trial, community trial) OR one based on creative use of existing data. Understand the advantages and limitations of each design for addressing specific problems, as well as practical aspects of their uses, including trade-offs.
- In addition to item 9 above, be able to identify and minimize sources of bias in the chosen study design; describe both the direction and magnitude of the bias and the effect of potential biases on the measures of association.
- Understand the basics of population sampling methods.

- Assess validity of data collection tools for both exposures and outcomes; and the presence, magnitude and impact of measurement error.
- Interpret research results, and recognize their implications for future research needs and for population health and health policy.
- Communicate research results orally and in writing to both scientists and non- scientists.
- Demonstrate mastery of a substantive area, including knowledge and application of that knowledge in conducting original research related to a specific topic.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct as they apply to Population Health Sciences.

## PEOPLE

**Faculty:** Professors Nieto (chair), Cruickshanks, Durkin, Kanarek, Mullahy, Oliver, Palta, Patz, Remington, M. Smith, Wolfe, Young; Associate Professors Astor, Bautista, Engelman, Gangnon, Jacobs, Martinez-Donate, Olson, Peppard, Sethi, Si, Timberlake, Trentham-Dietz, Vanness; Assistant Professors M. Burns, DuGoff, Malecki, Pillai; CHS Professor Brokopp

## PSYCHOLOGY

**Administrative Unit:** Psychology

**College/School:** College of Letters & Science

**Admitting Plans:** Ph.D.

**Degrees Offered:** M.A., M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The Department of Psychology has fostered excellence in research and scholarship for more than 100 years. The department provides graduate students with the best available training to prepare them for a variety of professional careers in academic, clinical, research, and other settings. Emphasis is on both extensive academic training in general psychology and intensive research training in the student's area of concentration.

The department expects students to become creative scientists and to exhibit an early and continuing commitment to research and scholarship. All students initiate a first-year research project and present the results to the entire department in the fall of the second year. Typically, students are admitted for graduate study in psychology only for the Ph.D. program; however, students admitted to psychology may obtain a master's degree after they have completed their first-year research project if they find it necessary to have a degree as formal evidence of progress toward the Ph.D.

Many students have several significant publications before receiving the Ph.D. degree. Additionally, many students also receive NSF or NIH predoctoral fellowships and other awards during their course of study within the program. To support professional development, small grants fund student research and travel to present work at national conferences. The department hosts two training grants from NIH, one focused on Emotion and one focused on Language, that each support several predoctoral students.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Psychology, Doctoral Minor (p. 604)
- Psychology, M.A. (p. 604)
- Psychology, M.S. (p. 606)
- Psychology, Ph.D. (p. 608)

## RESOURCES

### FACILITIES

The department has an extraordinary array of research facilities. Virtually all laboratories are fully computer controlled, and the department's general purpose computing facilities are freely available to all graduate students. The Brogden Building and the Harlow Primate Laboratory have special facilities for housing animals, as well as for behavioral, pharmacological, anatomical, immunological, and physiological studies. The department is well-equipped for studies of visual, auditory, and language perception and other areas of cognitive psychology. In addition, the Psychology Department Research and Training Clinic is housed in the Brogden Building. See Research Labs (<http://psych.wisc.edu/research-centers.htm>) for further information about individual faculty research labs and facilities. Connections with other departments and research institutes on campus (e.g., W.M. Keck Laboratory for Functional Brain Imaging and Behavior, and others) have been described above.

## PEOPLE

**Faculty:** Professors Goldsmith (chair), Abramson, Alibali, A. Auger, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Gooding, Harackiewicz, Hyde, Jenison, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Rosengren, Ryff, Saffran, Seidenberg; Associate Professors Bennett, Miyamoto, Shutts; Assistant Professors Green, Li, Lupyan, Rokers, Saalman, Simmering. Affiliated Faculty: Bakshi, Bolt, Dilworth-Bart, Edwards, Ellis-Weismer, Gammie, Hermann, Johnson, Kalin, Kalish, Koenigs, Litovsky, Lutfi, MacLean, Nathan, Nitschke, Piper, Populin, Ritters, Sanchez, Schneider

## PSYCHOLOGY, DOCTORAL MINOR

The Department of Psychology offers broad training aimed at better understanding human behavior, both typical and atypical. At the graduate level, the department provides training in five key areas in the field of psychological science: biological, clinical, cognitive, developmental, and social and personality. The primary goal is to develop critical thinking as it relates to interpretation of experimental observations. This includes an emphasis on quantitative tools used to analyze experimental data.

## REQUIREMENTS

Nine (9) credits of graduate-level coursework. Proseminars and research credits do not count toward the minor.

## ADMISSIONS

Please contact the graduate program coordinator at [gradinfo@psych.wisc.edu](mailto:gradinfo@psych.wisc.edu) or 608-262-2079.

## PEOPLE

**Faculty:** Professors Goldsmith (chair), Abramson, Alibali, A. Auger, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Gooding, Harackiewicz, Hyde, Jenison, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Rosengren, Ryff, Saffran, Seidenberg; Associate Professors Bennett, Miyamoto, Shutts; Assistant Professors Green, Li, Lupyan, Rokers, Saalman, Simmering. ## PSYCHOLOGY, M.A.

The Department of Psychology has fostered excellence in research and scholarship for more than 100 years. The department provides graduate students with the best available training to prepare them for a variety of professional careers in academic, clinical, research, and other settings. Emphasis is on both extensive academic training in general psychology and intensive research training in the student's area of concentration.

The department expects students to become creative scientists and to exhibit an early and continuing commitment to research and scholarship. All students initiate a first-year research project and present the results to the entire department in the fall of the second year. Typically, students are admitted for graduate study in psychology only for the Ph.D. program; however, students admitted to psychology may obtain a master's degree after they have completed their first-year research project if they find it necessary to have a degree as formal evidence of progress toward the Ph.D.

Faculty members and graduate students have many affiliations with other departments, institutes, and training programs: Institute on Aging, Waisman Center on Mental Retardation and Human Development, Wisconsin Regional Primate Research Center, Health Emotions Center, Neuroscience Training Program, Keck Neuroimaging Center, Hearing Training Program, Women's Studies Research Center, Institute for Research on Poverty, NSF National Consortium on Violence Research, Mass Communications Research Center, and Survey Research Laboratory. There are strong ties to the departments of Anatomy, Anthropology, Communicative Disorders, Educational Psychology, Entomology, Forest and Wildlife Ecology, Medical Microbiology and Immunology, Industrial Engineering, Ophthalmology, Psychiatry, Sociology, and Zoology.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned five or more years prior to admission to the program may not be used to satisfy master's degree requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned five or more years prior to admission to the program may not be used to satisfy master's degree requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned five or more years prior to admission to the program may not be used to satisfy master's degree requirements.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Must take PSYCH 610 Statistical Analysis of Psychological Experiments, PSYCH 710 Design and Analysis of Psychological Experiments, complete required First-Year Project and reach 30 credits to receive master's.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

An applicant is admitted into the program by an individual faculty member or by an area group (i.e., a group of faculty members associated with a major area of concentration) and not by the department as a whole, nor by an admissions committee. Because these programs tend to be small, they may not admit students in a particular year. Applicants interested in a particular program or working with a particular faculty member should reference graduate program (<http://psych.wisc.edu/>)

graduate-program.htm) on the psychology website or contact individual faculty members to determine if admissions are likely for that year.

Each faculty member and area group give preference to applicants who have a high potential for success in graduate school and who also share research interests with the prospective faculty sponsor. Applicants should consider carefully the description of faculty research interests, read several of their publications, and consult with faculty and advisors at the undergraduate institution before applying to the program. Whereas most applicants have majored in psychology, the department gives full consideration to applicants with undergraduate majors in other relevant areas.

Given its commitment to students, the Department of Psychology takes seriously its responsibility when admitting an applicant. Every piece of information is considered carefully. Students are selected on the basis of record of academic achievement, Graduate Record Exam (GRE) scores, references, evidence of motivation and ability to do research, and also the fit between faculty and student research interests.

Information regarding applications deadlines is on the program website (<http://psych.wisc.edu/graduate-admission-and-requirements.htm>).

Applicants should have a completed application in by the deadline to ensure full consideration. Most students admitted into the program are supported by either a research or project assistantship, teaching assistantship, or fellowship.

## ADMISSION SELECTION CRITERIA

Although individual faculty members and area groups decide who will be admitted, the psychology department sets certain minimum standards that must be met by those admitted to the graduate program. These are an undergraduate grade point average (GPA) of at least 3.0 on a 4.0 scale as well as verbal and quantitative scores on the GRE that sum to at least 310.

Consideration for admission is highly competitive. The department receives approximately 400 applications each year and less than 10 percent are admitted to the program. Applicants who fall below the minimum standards set by the department may still be admitted where there is clear justification (e.g., international students or minority group students whose GRE scores may not be an indicator of potential for graduate work, or students who are below the minimum requirement in one respect but well above it in other respects).

Undergraduate research experience is highly valued in applicants to the program and greatly enhances their chances of admission. Such research experience provides an opportunity to discover whether research is of interest and provides evidence of motivation and ability to do research.

Three references are required and are read very carefully. Good letters in favor of the applicant are essential and should be provided by faculty who know the applicant fairly well. The references should provide information that will evaluate potential for graduate work beyond that revealed by GPA and GRE scores. For example, a reference from a professor who writes about a student's unique skills, research abilities, and motivation is more influential than a reference that says the student received an "A" and was "very pleasant." Thus, references from faculty the applicant has worked with on a research project or senior thesis carry more weight in making a decision to admit.

In addition to references, grades, and Graduate Record Exam (GRE) scores, the faculty also consider carefully the personal statement.

Applicants should describe in the personal statement any prior research experience and their role in that research.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will develop a broad understanding of the field of psychology.
- Students will develop a proficiency in statistical analyses relevant to psychological research.
- Students will acquire basic understanding in experimental design.
- Students will develop literature research and critical thinking skills used in psychological research and teaching.

### PROFESSIONAL CONDUCT

- Students will develop skills for oral and written communication of experimental findings.
- Students will develop literature research and critical thinking skills used in psychological research and teaching.

## PEOPLE

**Faculty:** Professors Goldsmith (chair), Abramson, Alibali, A. Auger, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Gooding, Harackiewicz, Hyde, Jenison, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Rosengren, Ryff, Saffran, Seidenberg; Associate Professors Bennett, Miyamoto, Shutts; Assistant Professors Green, Li, Lupyan, Rokers, Saalman, Simmering. Affiliated Faculty: Bakshi, Bolt, Dilworth-Bart, Edwards, Ellis-Weismer, Gammie, Hermann, Johnson, Kalin, Kalish, Koenigs, Litovsky, Lutfi, MacLean, Nathan, Nitschke, Piper, Populin, Ritters, Sanchez, Schneider

## PSYCHOLOGY, M.S.

The Department of Psychology has fostered excellence in research and scholarship for more than 100 years. The department provides graduate students with the best available training to prepare them for a variety of professional careers in academic, clinical, research, and other settings. Emphasis is on both extensive academic training in general psychology and intensive research training in the student's area of concentration.

The department expects students to become creative scientists and to exhibit an early and continuing commitment to research and scholarship. All students initiate a first-year research project and present the results to the entire department in the fall of the second year. Typically, students are admitted for graduate study in psychology only for the Ph.D. program; however, students admitted to psychology may obtain a master's degree after they have completed their first-year research project if they find it necessary to have a degree as formal evidence of progress toward the Ph.D.

Faculty members and graduate students have many affiliations with other departments, institutes, and training programs: Institute on Aging, Waisman Center on Mental Retardation and Human Development, Wisconsin Regional Primate Research Center, Health Emotions Center, Neuroscience Training Program, Keck Neuroimaging Center, Hearing Training Program, Women's Studies Research Center, Institute for Research on Poverty, NSF National Consortium on Violence Research,

Mass Communications Research Center, and Survey Research Laboratory. There are strong ties to the departments of Anatomy, Anthropology, Communicative Disorders, Educational Psychology, Entomology, Forest and Wildlife Ecology, Medical Microbiology and Immunology, Industrial Engineering, Ophthalmology, Psychiatry, Sociology, and Zoology.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., M.S.

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned five or more years prior to admission to the program may not be used to satisfy master's degree requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison

undergraduate degree or from the UW–Madison University Special career. Coursework earned five or more years prior to admission to the program may not be used to satisfy master's degree requirements.

### CREDITS PER TERM ALLOWED

12 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Must take PSYCH 610 Statistical Analysis of Psychological Experiments, PSYCH 710 Design and Analysis of Psychological Experiments, complete required First-Year Project and reach 30 credits to receive master's.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

An applicant is admitted into the program by an individual faculty member or by an area group (i.e., a group of faculty members associated

with a major area of concentration) and not by the department as a whole, nor by an admissions committee. Because these programs tend to be small, they may not admit students in a particular year. Applicants interested in a particular program or working with a particular faculty member should reference graduate program (<http://psych.wisc.edu/graduate-program.htm>) on the psychology website or contact individual faculty members to determine if admissions are likely for that year.

Each faculty member and area group give preference to applicants who have a high potential for success in graduate school and who also share research interests with the prospective faculty sponsor. Applicants should consider carefully the description of faculty research interests, read several of their publications, and consult with faculty and advisors at the undergraduate institution before applying to the program. Whereas most applicants have majored in psychology, the department gives full consideration to applicants with undergraduate majors in other relevant areas.

Given its commitment to students, the Department of Psychology takes seriously its responsibility when admitting an applicant. Every piece of information is considered carefully. Students are selected on the basis of record of academic achievement, Graduate Record Exam (GRE) scores, references, evidence of motivation and ability to do research, and also the fit between faculty and student research interests.

Information regarding applications deadlines is on the program website (<http://psych.wisc.edu/graduate-admission-and-requirements.htm>).

Applicants should have a completed application in by the deadline to ensure full consideration. Most students admitted into the program are supported by either a research or project assistantship, teaching assistantship, or fellowship.

## ADMISSION SELECTION CRITERIA

Although individual faculty members and area groups decide who will be admitted, the psychology department sets certain minimum standards that must be met by those admitted to the graduate program. These are an undergraduate grade point average (GPA) of at least 3.0 on a 4.0 scale as well as verbal and quantitative scores on the GRE that sum to at least 310.

Consideration for admission is highly competitive. The department receives approximately 400 applications each year and less than 10 percent are admitted to the program. Applicants who fall below the minimum standards set by the department may still be admitted where there is clear justification (e.g., international students or minority group students whose GRE scores may not be an indicator of potential for graduate work, or students who are below the minimum requirement in one respect but well above it in other respects).

Undergraduate research experience is highly valued in applicants to the program and greatly enhances their chances of admission. Such research experience provides an opportunity to discover whether research is of interest and provides evidence of motivation and ability to do research.

Three references are required and are read very carefully. Good letters in favor of the applicant are essential and should be provided by faculty who know the applicant fairly well. The references should provide information that will evaluate potential for graduate work beyond that revealed by GPA and GRE scores. For example, a reference from a professor who writes about a student's unique skills, research abilities, and motivation is more influential than a reference that says the student received an "A" and was "very pleasant." Thus, references from faculty the applicant has

worked with on a research project or senior thesis carry more weight in making a decision to admit.

In addition to references, grades, and Graduate Record Exam (GRE) scores, the faculty also consider carefully the personal statement.

Applicants should describe in the personal statement any prior research experience and their role in that research.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will develop a broad understanding of the field of psychology.
- Students will develop a proficiency in statistical analyses relevant to psychological research.
- Students will acquire basic understanding in experimental design.
- Students will develop literature research and critical thinking skills used in psychological research and teaching.

### PROFESSIONAL CONDUCT

- Students will develop skills for oral and written communication of experimental findings.
- Students will develop literature research and critical thinking skills used in psychological research and teaching.

## PEOPLE

**Faculty:** Professors Goldsmith (chair), Abramson, Alibali, A. Auger, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Gooding, Harackiewicz, Hyde, Jenison, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Rosengren, Ryff, Saffran, Seidenberg; Associate Professors Bennett, Miyamoto, Shutts; Assistant Professors Green, Li, Lupyan, Rokers, Saalman, Simmering. Affiliated Faculty: Bakshi, Bolt, Dilworth-Bart, Edwards, Ellis-Weismer, Gammie, Hermann, Johnson, Kalin, Kalish, Koenigs, Litovsky, Lutfi, MacLean, Nathan, Nitschke, Piper, Populin, Ritters, Sanchez, Schneider

## PSYCHOLOGY, PH.D.

Psychology offers six areas of concentration (known as area groups): biological, clinical, cognitive and cognitive neuroscience, developmental, perception, and social and personality. Although there is a good deal of collaboration and interaction across groups, each area of concentration has its own requirements for graduate study and students are typically admitted into one of these areas of concentration.

Although most incoming graduate students' interests fall within these six areas of concentration, some do not. That some students' interests cut across disciplinary area groups and/or interface with other programs on campus is to be expected in a top-notch department because the boundaries of psychology itself are in flux. An innovative feature of the program is the Individualized Graduate Major designed for those graduate students who do not find a niche in the current area group structure and, instead, wish to cross area group lines and/or incorporate substantial training from other programs in their psychology graduate work. It is important to emphasize that the Individualized Graduate Major leads to a psychology Ph.D. and is not appropriate for students whose graduate study does not emphasize psychological science.

Such students are advised to pursue a Ph.D. in another program or a committee degree.

Faculty members and graduate students have many affiliations with other departments, institutes, and training programs: Institute on Aging, Waisman Center on Mental Retardation and Human Development, Wisconsin Regional Primate Research Center, Health Emotions Center, Neuroscience Training Program, Keck Neuroimaging Center, Hearing Training Program, Women's Studies Research Center, Institute for Research on Poverty, NSF National Consortium on Violence Research, Mass Communications Research Center, and Survey Research Laboratory. There are strong ties to the departments of Anatomy, Anthropology, Communicative Disorders, Educational Psychology, Entomology, Forest and Wildlife Ecology, Medical Microbiology and Immunology, Industrial Engineering, Ophthalmology, Psychiatry, Sociology, and Zoology.

## BIOLOGY OF BRAIN AND BEHAVIOR

The *biological psychology* area encompasses the subdisciplines of behavioral neuroscience and animal behavior. Students sponsored by faculty in this area are trained in theory and methods required for understanding the biological bases of behavior. The doctoral track in behavioral neuroscience provides research training in specific methods and techniques needed to assess brain and peripheral physiological mechanisms. Topic areas investigated by program faculty include psychoneuroimmunology, hormone-behavior relationships, neurobiology of stress and arousal, sensory processes, and the neural organization of the cerebral cortex. Age-related changes during development, and the impact of stress on health and behavior are also important foci. Students learn modern surgical, neuroanatomical, neurophysiological, neuroimaging (PET, MRI), immunohistochemical, pharmacological, and behavioral techniques. Training in hormone and immune assays, or cellular recording, are also provided when required for the student's research. Conceptual issues, such as experimental design, and the relevance to human clinical and social conditions are emphasized.

Students in the program can also pursue training in theories and methodologies involved in the study of animal behavior. Coursework and research provide a unique interdisciplinary experience with a strong emphasis on evolutionary/ecological principles and proximate mechanisms, including communication and the role of hormones and social relationships underlying the expression of behavior. The program goal is to train outstanding students with a special interest in integrating knowledge across traditional discipline lines.

Many facilities are available for graduate training, including the department's Harlow Primate Laboratory, internationally known for its studies of primate development and learning, and the Callitrichid Behavior Laboratory, renowned for research on communication, reproduction, and conservation. In addition, students benefit from the Wisconsin Regional Primate Research Center with its large rhesus monkey and marmoset colonies. Within the Brogden Psychology Building, research programs utilize many other small animal species. Well-equipped facilities are available, including surgical suites, histology, electrophysiology, endocrine, and immunology laboratories.

The program continues to grow and incorporate new perspectives. Students and faculty interact and collaborate with the departments of Anthropology, Comparative Biosciences, Forest and Wildlife Ecology, and Zoology, as well as the Neurosciences Training Program, Institute on Aging, and Center for Excellence in Women's Health Research. The

university provides a diverse and stimulating academic environment for training in biological psychology.

## CLINICAL PSYCHOLOGY

The training model for the UW-Madison doctoral program in clinical psychology is that of a scientist-practitioner. Based on the program's endorsement of a scientist-practitioner model, the educational plan focuses on two major and interrelated goals that integrate science and practice:

1. to produce graduates who have the requisite knowledge, skills, and experience to create and disseminate new knowledge about the processes and mechanisms underlying psychopathology; and
2. to produce graduates who have the requisite knowledge and skills for entry into the practice of professional clinical psychology and who understand and appreciate the importance of an empirical basis to clinical practice.

The program uses a mentor model for research training; applicants are admitted to the program based in part on how closely their research interests are aligned with that of current faculty. The close working relationship between the faculty mentor and the graduate student is one of the mechanisms that serves to integrate theory and research with the applied training. Coursework and practicum experiences comprise the other mechanisms that foster the integration of science and practice.

The interests of and methods utilized by faculty vary widely but all share the common goal of pursuing innovative, cutting edge analyses of major forms of psychopathology. The program also offers excellent clinical training and in the course of their tenure in the program, graduate students in clinical psychology develop expertise in both assessment and treatment of psychopathology. However the student who is not deeply committed to research and scholarship will, in all likelihood, not be satisfied with the Wisconsin Clinical Program.

During their stay, clinical graduate students complete courses in assessment, clinical research methods, and a sequence of clinical core courses covering the etiology and treatment of psychopathology, in addition to statistics/methodology courses and coursework in nonclinical areas both in and outside of the department. The required curriculum may take more than five years to complete. The clinical program is situated in a world-class department that includes area groups in biology of brain and behavior, cognitive and cognitive neuroscience, developmental, perception, and social and personality. In addition, an Emotion Training Program within the department cuts across all other area groups and is supported by an NIMH training grant. Many clinical students and faculty are involved in various aspects of the Emotion Training Program. Clinical students have access to an extensive range of opportunities through collaborations with other units on campus including the Waisman Center, an interdisciplinary research institute for developmental research; the Institute on Aging; the Waisman Laboratory for Brain Imaging and Behavior; the Department of Psychiatry; and other departments in the Medical School, College of Letters & Science, and the School of Education.

A major goal of the program is to integrate students' clinical and research activities. Students begin their clinical practicum in the Psychology Department Research and Training Clinic (<http://psych.wisc.edu/clinic-research-and-training.htm>) during their third year in the program and typically continue such practicum training throughout the remainder of their graduate careers. An important component of clinical training is the "Small Group Practicum" in which various clinical professors supervise

practicum activities on topics related to their own areas of interest. In the summer following the third academic year, the student is appointed to a clerkship in one of the several agencies that cooperate with the department in providing practicum training. Finally, all clinical students obtain at least one full year of full-time clinical experience in an approved internship facility. Whereas many students obtain internships at various of the better-known training centers around the country, other students complete their internships at one of the excellent local sites. Virtually all clinical graduate students have received financial support while in residence in the graduate program.

## COGNITIVE AND COGNITIVE NEUROSCIENCE (CCN)

The study of cognition and perception has undergone explosive growth during the past decade with exciting developments in psychology and related fields and with new techniques for studying mind and brain. The *cognitive and perceptual sciences* (CPS) area group provides a unique and stimulating graduate school experience for students interested in an interdisciplinary approach to cognition and perception. Faculty members combine expertise in cognition and perception with a broad arsenal of methods including experimental, developmental, computational, and biological approaches. This breadth in methodologies is paralleled by breadth across disciplines of communicative disorders, educational psychology, and neuroscience. Areas of exceptional strength in cognition include language development, speech perception, neural representation of language and memory, gesture, higher-level comprehension, music cognition, problem solving, and embodied cognition. Research in hearing and vision includes perceptual development, perception of complex sounds, perception of 3-D layout and auditory space, attention, and neural processing of auditory and visual objects and events. Laboratory facilities are comprehensive and fully state of the art, enhanced by unique opportunities for training in neuroimaging at the Keck Laboratory for Functional Brain Imaging and in developmental methods at the Waisman Center. The program is committed to maintaining a collegial environment in which students collaborate with faculty in developing their research programs. Graduates with a Ph.D. from the program maintain careers as university or college professors, or as researchers at public or corporate laboratories.

## DEVELOPMENTAL PSYCHOLOGY

Research in the *developmental* area group focuses on the interrelationships of biological, environmental, and behavioral processes throughout the life span, and on the mechanisms and processes of change. The program emphasizes interdisciplinary studies, and allows graduate students flexibility in designing a program of study consonant with their goals and interests. One central part of the developmental program is a weekly lunch meeting, in which students and faculty present ongoing research and discuss current topics in the field. Students in the program focus on cognitive, emotional, language, perceptual, personality, social development, or relations between these areas. Within these content domains, students and faculty conduct research on both typical and atypical development, and work with individuals representing a wide range of ages, including infants, preschool and school-age children, adolescents, adults, and the elderly. Specific faculty research interests include the development of mathematical reasoning and problem solving, development of visual perception and attention, developmental behavioral genetics, gender role development, developmental psychopathology, resiliency in adulthood and aging, and language acquisition.

Participants in research studies are drawn from an unusually wide variety of sources, including local preschools and day care centers; public, and private schools in the Madison area; the Dane County Division of Children, Youth, and Families; the Wisconsin Longitudinal Survey; University of Wisconsin Hospitals and Clinics; and the Institute on Aging. Many developmental faculty are affiliated with the Waisman Center on Human Development, which provides a database of typically developing infants and children with developmental disabilities.

## SOCIAL AND PERSONALITY PSYCHOLOGY

The program is designed to train students for research on the cutting edge of the fields of *social and personality psychology*. The curriculum consists of a series of courses and seminars designed to provide students with a thorough introduction to the fields of social and personality psychology. This coursework is complemented by courses that provide the methodological and statistical skills necessary for several kinds of research. The primary emphasis is on experimental laboratory research, but training is also provided in field research, longitudinal studies, observational methods, and archival research. There are also opportunities to pursue theoretical issues in various applied areas (e.g., education, health psychology). The goal is to train students for productive academic careers in university settings. Students are provided with the opportunity to work collaboratively with one or more faculty members on a variety of research topics including: acculturation, achievement behavior, attitudes, competition, culture and cognition, emotion, goals and self-regulation, interest and intrinsic motivation, social cognition, social perception, social neuroscience, and stereotypes, prejudice and intergroup relations. Students are also encouraged to develop their own independent lines of research.

Additional resources are available to students from outside the psychology department. The social psychology program in the sociology department shares faculty members and courses with the program in psychology and offers seminars that supplement those taught in psychology. In addition, resources are provided by the Mass Communications Research Center, the Institute for Research on Poverty, and the Survey Research Laboratory.

## FUNDING

Many students also receive NSF or NIH predoctoral fellowships and other awards during their course of study within the program. To support professional development, small grants fund student research and travel to present work at national conferences. The department hosts two training grants from NIH, one focused on Emotion and one focused on Language, that each support several predoctoral students.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

60 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

40 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

At least half of degree coursework (30 credits out of 60 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS**

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned ten or more years prior to admission to the program may not be used to satisfy doctoral degree requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE**

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned ten or more years prior to admission to the program may not be used to satisfy doctoral degree requirements.

**PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL**

Applying prior coursework toward the graduate degree is allowed only in exceptional circumstances. In total, only 6 credits maximum may be applied from prior coursework, including any prior coursework from graduate work from other institutions, from a UW–Madison undergraduate degree or from the UW–Madison University Special career. Coursework earned ten or more years prior to admission to the program may not be used to satisfy doctoral degree requirements.

**CREDITS PER TERM ALLOWED**

12 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Must take PSYCH 610 Statistical Analysis of Psychological Experiments, PSYCH 710 Design and Analysis of Psychological Experiments, and complete required First-Year Project.

**DOCTORAL MINOR/BREADTH REQUIREMENTS**

Doctoral students must complete a doctoral minor.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

**ASSESSMENT AND EXAMINATIONS**

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**LANGUAGE REQUIREMENTS**

Contact the program for information on any language requirements.

**ADMISSIONS**

An applicant is admitted into the program by an individual faculty member or by an area group (i.e., a group of faculty members associated with a major area of concentration) and not by the department as a whole, nor by an admissions committee. Because these programs tend to be small, they may not admit students in a particular year. Applicants interested in a particular program or working with a particular faculty member should reference graduate program (<http://psych.wisc.edu/>)

graduate-program.htm) on the psychology website or contact individual faculty members to determine if admissions are likely for that year.

Each faculty member and area group give preference to applicants who have a high potential for success in graduate school and who also share research interests with the prospective faculty sponsor. Applicants should consider carefully the description of faculty research interests, read several of their publications, and consult with faculty and advisors at the undergraduate institution before applying to the program. Whereas most applicants have majored in psychology, the department gives full consideration to applicants with undergraduate majors in other relevant areas.

Given its commitment to students, the Department of Psychology takes seriously its responsibility when admitting an applicant. Every piece of information is considered carefully. Students are selected on the basis of record of academic achievement, Graduate Record Exam (GRE) scores, references, evidence of motivation and ability to do research, and also the fit between faculty and student research interests.

Information regarding applications deadlines is on the program website (<http://psych.wisc.edu/graduate-admission-and-requirements.htm>).

Applicants should have a completed application in by the deadline to ensure full consideration. Most students admitted into the program are supported by either a research or project assistantship, teaching assistantship, or fellowship.

## ADMISSION SELECTION CRITERIA

Although individual faculty members and area groups decide who will be admitted, the psychology department sets certain minimum standards that must be met by those admitted to the graduate program. These are an undergraduate grade point average (GPA) of at least 3.0 on a 4.0 scale as well as verbal and quantitative scores on the GRE that sum to at least 310.

Consideration for admission is highly competitive. The department receives approximately 400 applications each year and less than 10 percent are admitted to the program. Applicants who fall below the minimum standards set by the department may still be admitted where there is clear justification (e.g., international students or minority group students whose GRE scores may not be an indicator of potential for graduate work, or students who are below the minimum requirement in one respect but well above it in other respects).

Undergraduate research experience is highly valued in applicants to the program and greatly enhances their chances of admission. Such research experience provides an opportunity to discover whether research is of interest and provides evidence of motivation and ability to do research.

Three references are required and are read very carefully. Good letters in favor of the applicant are essential and should be provided by faculty who know the applicant fairly well. The references should provide information that will evaluate potential for graduate work beyond that revealed by GPA and GRE scores. For example, a reference from a professor who writes about a student's unique skills, research abilities, and motivation is more influential than a reference that says the student received an "A" and was "very pleasant." Thus, references from faculty the applicant has worked with on a research project or senior thesis carry more weight in making a decision to admit.

In addition to references, grades, and Graduate Record Exam (GRE) scores, the faculty also consider carefully the personal statement.

Applicants should describe in the personal statement any prior research experience and their role in that research.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will be prepared to make meaningful contributions to research and teaching in psychology.

### PROFESSIONAL CONDUCT

- Students will develop a broad understanding of the field of psychology.

### ADDITIONAL LEARNING GOALS

- Students will develop a deep understanding of the theory and empirical observations related to their area of expertise.
- Students will develop a proficiency in statistical analyses relevant to psychological research.
- Students will develop expertise in experimental design.
- Students will develop literature research and critical thinking skills necessary for psychological research and undergraduate and graduate teaching.
- Students will acquire expertise in the oral and written communication of experimental findings.
- Clinical students will receive broad training in the theory and practice of clinical psychology.

## PEOPLE

**Faculty:** Professors Goldsmith (chair), Abramson, Alibali, A. Auger, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Gooding, Harackiewicz, Hyde, Jenison, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Rosengren, Ryff, Saffran, Seidenberg; Associate Professors Bennett, Miyamoto, Shutts; Assistant Professors Green, Li, Lupyan, Rokers, Saalman, Simmering. **Affiliated Faculty:** Bakshi, Bolt, Dilworth-Bart, Edwards, Ellis-Weismer, Gammie, Hermann, Johnson, Kalin, Kalish, Koenigs, Litovsky, Lutfi, MacLean, Nathan, Nitschke, Piper, Populin, Ritters, Sanchez, Schneider

## REAL ESTATE

**Administrative Unit:** Real Estate

**College/School:** School of Business

**Admitting Plans:** MBA, M.S.

**Degrees Offered:** MBA, M.S.

**Named Options:** Global Real Estate (GREM) (M.S.)

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW-Madison School

of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Business: Real Estate and Urban Land Economics, M.S. (p. 613)
- Business: Real Estate and Urban Land Economics, MBA (p. 614)

## PEOPLE

**Faculty:** Professors Yavas (chair), Malpezzi, Ortalo-Magn'e, Riddiough; Associate Professors Ghent, Quintin; Assistant Professors Diop, Luque

## BUSINESS: REAL ESTATE AND URBAN LAND ECONOMICS, M.S.

The M.S. degree in the School of Business is currently designed for students who wish to pursue very specialized studies within one of two specific fields: global real estate (in the Business: Real Estate and Urban Land Economics M.S.) and finance (within the Business: Finance, Investment and Banking M.S.). With previous undergraduate exposure to the functional areas of business, students are able to gain a more extensive focus in one of these two specific areas of business.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## NAMED OPTION IN GLOBAL REAL ESTATE (GREM)

The global real estate master (GREM) program brings together students from top international business programs and the best in real estate education to provide the unique preparation needed to become a global leader. The GREM program is designed for those who would like to work anywhere in the real estate industry. Students will learn principles of real estate, finance, and development that apply universally and also be exposed to the variety of context and opportunities the global real estate industry offers. See the program website (<http://bus.wisc.edu/degrees-programs/msmacc/grem>) for more information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available named option Global Real Estate (GREM)

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

M.S.: Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

M.S.–named option Global Real Estate: All coursework must be completed in courses numbered 700 or higher.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

M.S.: With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

M.S.–named option Global Real Estate: With program approval, students are allowed to count no more than 14 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

M.S.: With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 700 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to the master's degree is not allowed to satisfy requirements.

M.S.–named option Global Real Estate: With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 14 credits of coursework numbered 700 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to the master's degree is not allowed to satisfy requirements.

**CREDITS PER TERM ALLOWED**

15 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Contact the program for information on any additional required courses.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**ASSESSMENT AND EXAMINATIONS**

Contact the program for information on required assessments and examinations.

**TIME CONSTRAINTS**

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**LANGUAGE REQUIREMENTS**

Contact the program for information on any language requirements.

**ADMISSIONS**

Admission consideration requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. Work experience is not required. Applicants should have an undergraduate minimum grade point average (GPA) of 3.0 or higher on a 4.0 scale. In addition to academic credentials, test scores, personal achievements, motivation, communication skills (written and oral) and recommendation

letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE), taken within five years of the starting term, is required of all applicants to the Ph.D. and M.S. Programs. Also, all domestic (including Puerto Rico) and international applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL). A recommended minimum TOEFL score of 106 (New iBT), obtained within two years of the intended starting term, is needed for admission consideration. International applicants who have completed a four-year bachelor's degree in a country where the official language is English may request a waiver of the TOEFL requirement. A master's degree from an English-speaking institution does not qualify for a waiver of the TOEFL. The school accepts IELTS and Pearson Test of English as substitutes for TOEFL.

**LEARNING OUTCOMES****KNOWLEDGE AND SKILLS**

- Graduate students will gather, process and analyze market, linkage and macroeconomic data for the purpose of forecasting real estate trends, communicating the big picture and making prudent investment decisions.
- Graduate students will understand how to optimally source capital to execute on growth and development opportunities, prepare for and manage the crises and contingencies that pervade real estate ventures, and improve efficiencies in the operation of revenue generating properties.
- Graduate students will apply appropriate structures, techniques, and processes to manage or lead a real estate group or enterprise.

**PROFESSIONAL CONDUCT**

- Graduate students will be able to recognize, measure, and create value in real estate in the strict respect of all ethical and legal norms and with full awareness of their responsibility to the communities, investors, public policy makers and users they aspire to serve as real estate professionals.
- Graduate students will develop a deeper network with local, regional and international professionals to gather market data, perspectives, investment ideas and employment leads.

**PEOPLE**

**Faculty:** Professors Yavas (chair), Malpezzi, Ortao-Magn'e, Riddiough; Associate Professors Ghent, Quintin; Assistant Professors Diop, Luque

**BUSINESS: REAL ESTATE AND URBAN LAND ECONOMICS, MBA**

Wisconsin's two-year MBA program in real estate and urban land economics offers the kind of in-depth real estate graduate education you won't get anywhere else. World class faculty in the classroom, hands-on projects and case studies, international travel, and the unique Applied Real Estate Investment Track (AREIT) program in real estate investment trust management. You'll interact with cutting edge real estate faculty and influential alumni and other leaders in the real estate industry on the

Graaskamp Center Board of Advisors. Together, they make up a powerful web that connects and complements your experience in the program and beyond. *U.S. News & World Report* ranks Wisconsin MBA real estate in the top three in the U.S. See the program website (<http://beta.bus.wisc.edu/programs/mba-programs/full-time-mba/career-specializations/real-estate>) for more information.

Graduates of the School of Business possess highly sought-after technical and specialized expertise in a functional area of business as well as general leadership, problem-solving, analytical, and decision-making skills. Utilizing these skills, many of the school's 30,000 alumni have achieved remarkable success in business, government, service, and academic arenas worldwide.

The high scholarly productivity and leadership of the school's 84 faculty are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated UW–Madison School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

MBA

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

Minimum Graduate Residence Credit Requirement

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 credits out of 30 total credits) must be completed in: courses numbered 700 or higher.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

No credits of prior coursework are allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW–MADISON UNIVERSITY SPECIAL

No credits of prior coursework are allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits<sup>1</sup>

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

### ASSESSMENT AND EXAMINATIONS

Contact the program for information on required assessments and examinations.

### TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

<sup>1</sup> Full-time MBA students may be allowed to enroll in up to 18 credits per term in the 2016–2017 academic year. Contact the Wisconsin School of Business for more information.

## ADMISSIONS

Admission consideration for the MBA program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores and work experience, personal achievements, motivation, communication skills (written and oral), international exposure and recommendation letters are considered in the admission process at both the master's and doctoral levels.

*Note:* The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case by case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS) or show the completion of an Interlink program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Graduate students will gather, process and analyze market, linkage and macroeconomic data for the purpose of forecasting real estate trends, communicating the big picture and making prudent investment decisions.
- Graduate students will understand how to optimally source capital to execute on growth and development opportunities, prepare for and manage the crises and contingencies that pervade real estate ventures, and improve efficiencies in the operation of revenue generating properties.
- Graduate students will apply appropriate structures, techniques, and processes to manage or lead a real estate group or enterprise.

### PROFESSIONAL CONDUCT

- Graduate students will be able to recognize, measure, and create value in real estate in the strict respect of all ethical and legal norms and with full awareness of their responsibility to the communities, investors, public policy makers and users they aspire to serve as real estate professionals.
- Graduate students will develop a deeper network with local, regional and international professionals to gather market data, perspectives, investment ideas and employment leads.

## PEOPLE

**Faculty:** Professors Yavas (chair), Malpezzi, Ortalo-Magn'e, Riddiough; Associate Professors Ghent, Quintin; Assistant Professors Diop, Luque

## REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION

**Administrative Unit:** Rehabilitation Psychology and Special Education  
**College/School:** School of Education

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S. in Rehabilitation Counselor Education; M.S. in Special Education; Ph.D. in Rehabilitation Psychology; Ph.D. in Special Education

**Minors and Certificates:** Doctoral Minor in Rehabilitation Counselor Education; Doctoral Minor in Special Education

### REHABILITATION PSYCHOLOGY

Rehabilitation psychology is one of the two academic areas in the Department of Rehabilitation Psychology and Special Education. Rehabilitation psychology addresses the needs of older youth, young adults, and adults by preparing rehabilitation counselors at the M.S. level and rehabilitation counselor educators at the Ph.D. level.

### SPECIAL EDUCATION

Special education is one of the two academic areas in the Department of Rehabilitation Psychology and Special Education. Special education addresses the needs of children, youth, and young adults through its teacher education, research and service programs. Rehabilitation psychology addresses the needs of older youth, young adults, and adults by preparing rehabilitation counselors at the M.S. level and rehabilitation counselor educators at the Ph.D. level.

Department faculty in both areas join resources to provide training and research programs that promote successful transition from school to the world of work, postsecondary, education and successful psychosocial adaptation for individuals with disabilities.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Rehabilitation Counselor Education, Doctoral Minor (p. 616)
- Rehabilitation Counselor Education, PhD (p. 617)
- Rehabilitation Psychology, M.S. (p. 619)
- Special Education, Doctoral Minor (p. 621)
- Special Education, M.S. (p. 621)
- Special Education, Ph.D. (p. 623)

## PEOPLE

**Faculty:** Professors Bal, Chan (department chair), Doren (Special Education area chair), Gonzalez, Hanley-Maxwell, Phillips, Rosenthal (Rehabilitation Area Chair), Ruppap, Smedema, Trainor, Tansey, Wilkerson

## REHABILITATION COUNSELOR EDUCATION, DOCTORAL MINOR

The doctoral minor in rehabilitation counselor education offers students the opportunity to bring a rehabilitation counselor education focus to

doctoral studies in other departments. The rehabilitation psychology area of the Department of Rehabilitation Psychology and Special Education provides academic instruction in the following areas: disability and human behavior, professional issues and leadership and advocacy in rehabilitation counselor education; assessment and intervention issues in rehabilitation counseling and counselor education. The rehabilitation psychology faculty welcomes students from other disciplines who wish to complete a doctoral minor in rehabilitation counselor education.

## REQUIREMENTS

The doctoral minor in rehabilitation counselor education consists of 9 credits of coursework from the rehabilitation psychology area of the Department of Rehabilitation Psychology and Special Education. These 9 credits must be at the 500 level or above, and chosen in consultation with a faculty advisor.

## ADMISSIONS

The student must request that a faculty member in rehabilitation counselor education serve as the doctoral minor advisor. Coursework must be selected in consultation with the faculty advisor. It is recommended that students meet with a faculty member to plan the minor courses and submit the minor declaration form (<https://uwmadison.box.com/s/xvi0dttta388w8dqsk62pjvdpjap28zu>) during the first year of doctoral study.

Contact information: RPSE Student Services Coordinator, [rpseinfo@education.wisc.edu](mailto:rpseinfo@education.wisc.edu)

## PEOPLE

**Faculty:** Professors Bal, Chan (Department Chair), Doren, Gonzalez, Hanley-Maxwell, Phillips, Rosenthal (Rehabilitation Area Chair), Ruppert, Smedema, Trainor, Tansey, Wilkerson

## REHABILITATION COUNSELOR EDUCATION, PHD

The Ph.D. program in rehabilitation psychology prepares rehabilitation counselor educators to serve as university professors in rehabilitation counseling and closely related academic programs. The program is a leader in preparing Ph.D. professionals who go on to serve in teaching, research, and program administration at universities throughout the U.S. and internationally, as evidenced by leadership positions within the profession and the research and scholarly contributions of program faculty and graduates. Faculty members work closely with graduate students on research projects including the PROMISE grant, the RRTC (Rehabilitation Research and Training Centers) grant, and research measuring the impact of evidence-based practices. In addition, faculty routinely involve students in a full array of professional activities. These may include reviewing papers for journals, preparing materials for litigation involving civil rights violations of persons with disabilities, preparing research and training grant applications, preparing training materials, and involvement in clinical cases.

Further evidence of the quality and recognition of the graduate program in rehabilitation psychology at the University of Wisconsin–Madison

is provided by the current No. 1 ranking of the program by *U.S. News & World Report* among all graduate programs in rehabilitation counseling nationwide.

The M.S. and Ph.D. programs serve students from across the nation and around the world. Financial support is available to qualified graduate students and may include scholarships, traineeships, teaching assistantships, and research/project assistantships. Employment opportunities following graduation include public and private educational, rehabilitation, and mental health agencies; colleges and universities; and research settings.

## FUNDING

Prospective students should see the program website (<http://rpse.education.wisc.edu/rpse/programs/funding-and-financial-aid>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

60 credits beyond the Master's degree

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits beyond the Master's degree

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

30 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students are allowed to count graduate coursework from other institutions. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits taken as an undergraduate are allowed to count toward the post-master's credits for the degree.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison

University Special student toward the minimum graduate degree credit requirement; those courses numbered 700 level or above taken as a UW–Madison University Special student may count toward the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Meet requirements of master's-level content in basic psychology, statistics and research design, rehabilitation psychology core, assessment, intervention, disability and human Behavior, and supervised experience.

60 post-master's graduate degree credits to include:

| Code                                                                                        | Title                                                               | Credits |

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students must complete a doctoral minor of 10–12 credits.

## OVERALL GRADUATE GPA REQUIREMENT

3.0

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Students are assigned a faculty mentor upon admission to the program and a permanent faculty advisor at the end of the first semester of graduate study.

## ASSESSMENTS AND EXAMINATIONS

Formal admission to doctoral study  
Preliminary examinations  
Dissertation final oral committee examination

## TIME CONSTRAINTS

A doctoral degree requires 32 graduate credits (300 level or above, no audits or pass/fail) taken as a graduate student at UW–Madison.

Doctoral students have five years from the date of passing the preliminary examination to take the final oral examination and deposit the dissertation. In some departments, if the professor(s) in charge is satisfied with the preparation, the preliminary examination may be construed as the final examination.

A candidate for a doctoral degree who fails to take the final oral examination within five years after passing the preliminary examination is required to take another preliminary examination and be admitted to

Rehabilitation psychology minimum degree requirements and satisfactory progress chart March 2014 candidacy a second time.

Deposit of the doctoral dissertation in the Graduate School is required.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Complete application information is available on the program website (<http://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/rehabilitation-psychology-graduate-program/application-admission-m-s-m-a->). Applicants are expected to meet general requirements for admission to the Graduate School. The following factors will be considered by the admissions committee: relevancy of prior undergraduate and graduate study, employment history, stated goals for graduate study, evidence of writing and research skill, and three references. In addition, rehabilitation psychology doctoral candidates are required to submit scores on the Graduate Record Exam (GRE).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### RESEARCH SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field.
- Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field.
- Creates research, scholarship, or performance that makes a substantive contribution to the field.
- Communicates complex ideas in a clear and understandable manner.

#### TEACHING/ADVISING SKILLS

- Demonstrates breadth within their learning experiences in the doctoral program in rehabilitation psychology.
- Shares knowledge and research in the field with students in a clear and engaging manner; effectively communicates with students within and outside of class; advances contributions of the field to society.

#### PROFESSIONAL SERVICE

- Participates in public and professional service.

### PROFESSIONAL CONDUCT

- Serve as a model of ethical and professional conduct. Promote the ethical and professional conduct of researchers, educators, and practitioners of rehabilitation psychology and rehabilitation counseling.

## PEOPLE

**Faculty:** Professors Bal, Chan (Department Chair), Doren, Gonzalez, Hanley-Maxwell, Phillips, Rosenthal (Rehabilitation Area Chair), Rupp, Smedema, Trainor, Tansey, Wilkerson

## REHABILITATION PSYCHOLOGY, M.S.

The M.S. degree program in rehabilitation psychology prepares rehabilitation counselors and closely related professionals at the master's degree level to serve adolescents and adults with disabilities in both private and public rehabilitation agencies and programs through counseling, assessment, job placement, case management, and advocacy. The range of disabilities served by graduates includes physical and psychiatric disabilities, alcohol and drug abuse, traumatic brain injury and other neurological impairments, learning and intellectual disabilities, sensory disabilities, and aging. The M.S. program is accredited by the Council on Rehabilitation Education (CORE) as a rehabilitation counseling program. Graduates meet the educational qualifications for the national Certified Rehabilitation Counselor (CRC) credential.

Program requirements are designed to accommodate Wisconsin licensure requirements for professional counselors (LPC) and to meet accreditation standards of the Council on Rehabilitation Education (CORE). The program is also designed to anticipate continued accreditation under the merged accreditation process of CORE and the Council on Accreditation of Counseling and Related Educational Programs (CACREP). Visit the program website (<http://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/rehabilitation-psychology-graduate-program>) for updates.

Further evidence of the quality and recognition of the graduate program in rehabilitation psychology at the University of Wisconsin–Madison is provided by the current No. 1 ranking of the program by *U.S. News & World Report* among all graduate programs in rehabilitation counseling nationwide.

The M.S. and Ph.D. programs serve students from across the nation and around the world. Financial support is available to qualified graduate students and may include scholarships, traineeships, teaching assistantships, and research/project assistantships. Employment opportunities following graduation include public and private educational, rehabilitation, and mental health agencies; colleges and universities; and research settings.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

M.S.

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

48 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

24 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students are allowed to count graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, students are allowed to count 7 credits of coursework numbered 300 level or above from a UW–Madison undergraduate degree toward the graduate degree. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

48 graduate degree credits to include:

Required Core Academic Coursework: rehabilitation psychology

Required Core Academic Coursework: other departments

Required Clinical Instruction: rehabilitation psychology

## OVERALL GRADUATE GPA REQUIREMENT

3.0

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

Students are assigned a faculty mentor upon admission to the program and a permanent faculty advisor at the end of the first semester of graduate study.

## ASSESSMENTS AND EXAMINATIONS

Master's comprehensive exam successful completion of the Certified Rehabilitation Counselor (CRC) national certification exam or a traditional written comprehensive exam.

## TIME CONSTRAINTS

Master's degree students who are absent for five or more years will not be given credit for prior work.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Complete application information is available on the program website (<http://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/rehabilitation-psychology-graduate-program/application-admission-m-s-m-a->). Applicants are expected to meet general requirements for admission to the Graduate School. The following factors will be considered by the admissions committee: relevancy of prior undergraduate and graduate study, employment history, stated goals for graduate study, evidence of writing and research skill, and three references. In addition, rehabilitation psychology doctoral candidates are required to submit scores on the Graduate Record Exam (GRE).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will demonstrate mastery of the knowledge domains of the rehabilitation counseling profession including understanding the theoretical and historical foundations of the field of rehabilitation counseling and the ability to identify current best practices and challenges in the field. Specific knowledge domains are outlined by the rehabilitation counseling professional accrediting body, CORE (the Council on Rehabilitation Education).
- Students will successfully apply the knowledge gained through course work to practical experiences in community rehabilitation settings.
- Students will be prepared to enter professional positions in fields related to rehabilitation counseling including vocational rehabilitation, mental health counseling, advocacy, and support of individuals with disabilities

### PROFESSIONAL CONDUCT

- Students will be able to recognize and apply principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Bal, Chan (Department Chair), Doren, Gonzalez, Hanley-Maxwell, Phillips, Rosenthal (Rehabilitation Area Chair), Ruppap, Smedema, Trainor, Tansey, Wilkerson

## SPECIAL EDUCATION, DOCTORAL MINOR

The doctoral minor in special education offers students the opportunity to bring a special education focus to doctoral studies in other departments. Special education faculty members prepare students to bring systemic change to educational and community settings in ways that improve access and equity for children and youth with disabilities and their families. Coursework addresses pressing issues in the field including increasing equity across diverse groups of students, improving post-school outcomes for individuals with disabilities, and enhancing teacher efficacy in secondary education methodologies with students with disabilities.

### REQUIREMENTS

The doctoral minor in special education consists of 9 credits to include:

1. RP & SE 871 Foundations of Special Education (usually offered in fall semesters)
2. Additional course work in the special education area of the RPSE department to reach a minimum of 9 credits, to be chosen in consultation with a faculty advisor.

### ADMISSIONS

The student must request that a special education area faculty member serve as the doctoral minor advisor. Coursework must be selected in consultation with the faculty advisor. The minor declaration form (<https://uwmadison.box.com/s/pozw6mppbcmcp45dcn08bs47efq63pq2>) must be completed and submitted to the student services coordinator in the RPSE department.

Contact information: RPSE student services coordinator, [rpseinfo@education.wisc.edu](mailto:rpseinfo@education.wisc.edu).

## SPECIAL EDUCATION, M.S.

The M.S. degree program in special education offers two master's tracks including a teacher certification track and a general track. The teacher certification and general master's tracks prepare students to serve as resources and advocates for students with disabilities and their families, and to work cooperatively with schools and community agencies to improve the quality of life for students with disabilities. Graduates of the master's program who are also certified to teach are eligible to apply for two Wisconsin Cross-Categorical Special Education licenses (Middle Childhood through Early Adolescence, ages 6–12/13, and Early Adolescence through Adolescence, ages 10–21).

Special education is one of the two academic areas in the Department of Rehabilitation Psychology and Special Education. The areas are joined by a common mission of preparing professional leadership personnel to address the educational and rehabilitation needs of individuals with disabilities across the life span. Both special education and rehabilitation psychology offer programs leading to Ph.D., M.S., and B.S. degrees. Special education addresses the needs of children, youth, and young adults through its teacher education, research and service programs. Rehabilitation psychology addresses the needs of older youth, young

adults, and adults by preparing rehabilitation counselors at the M.S. level and rehabilitation counselor educators at the Ph.D. level. Department faculty in both areas join resources to provide training and research programs that promote successful transition from school to the world of work, postsecondary, education and successful psychosocial adaptation for individuals with disabilities.

Faculty research interests focus, on research methods, reading, adolescence, transition, vocational education, and diversity and equity issues in the field of special education. The department is a national and international leader in preparing Ph.D. professionals to serve in leadership positions in university teaching, research, and program administration. This leadership is evidenced by the publication and research record of its faculty and graduates, and by the routine placement of Ph.D. graduates in major universities and colleges. The program develops researchers and leaders who contribute to creating, integrating and disseminating new knowledge related to the education of individuals with disabilities.

### REQUIREMENTS

## MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available general, and teacher certification tracks

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

M.S. general track: 30 credits

M.S. teacher certification track: 30 credits (this track incorporates a professional program; average number of credits taken by students exceeds 30 credits).

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

M.S. general track:

15 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

M.S. teacher certification track:

36 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students are allowed to count graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, students are allowed to count 7 credits of coursework numbered 300 level or above from a UW–Madison undergraduate degree toward the graduate degree. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

M.S. general track: 30 graduate degree credits to include:

- RP & SE 700 Seminar: Rehabilitation Psychology Research
- Additional coursework to be determined in consultation with faculty advisor
- Master's comprehensive exam
- Project and/or thesis (to be determined in consultation with faculty advisor)

M.S. teacher certification track: 30 graduate credits to include:

- Completion of the four-semester full time, sequenced Special Education teacher certification program (see attached).
- RP & SE 700 Seminar: Rehabilitation Psychology Research
- Completion of additional program related coursework before student teaching (may be met through prior coursework): RP & SE 300 Individuals with Disabilities, ED PSYCH 331 Human Development From Childhood Through Adolescence, or ED PSYCH 320 Human Development in Infancy and Childhood and ED PSYCH 321 Human Development in Adolescence, ED PSYCH 301 How People Learn, ED POL 300 School and Society, ED POL/HISTORY 412 History of American Education, or ED POL 500 Topics on Social Issues and Education
- Master's comprehensive exam (usually taken as RP & SE 690 Research or Thesis)
- Project and/or thesis (to be determined in consultation with faculty advisor)

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher

grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

Students are assigned a faculty mentor upon admission to the program.

## ASSESSMENTS AND EXAMINATIONS

Master's comprehensive exam  
Project and/or thesis

## TIME CONSTRAINTS

Master's degree students who are absent for five or more years will not be given credit for prior work.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Application information is available on the department website (<http://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/special-education-graduate-programs/application-requirements-and-deadlines>). Applicants are expected to meet general requirements for admission to the Graduate School. The admissions committee considers a variety of factors including academic preparation, letters of recommendation, personal statement, and professional experiences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- General Master's Program: Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
- Master's with Teacher Certification Program—Special Education Advocacy and Leadership: Students will be prepared to advocate for and provide leadership in the education of students with a wide array of learning, cognitive, social/emotional and behavioral disabilities in accordance with the standards established by the Council for Exceptional Children.
- General Master's Program: Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
- Master's with Teacher Certification Program—Learner & Learning Environment: Students will use knowledge of learners and human development to create responsive, inclusive, and respectful learning activities and environments that maximize learners' cognitive, linguistic, social, emotional, and physical development. Students will apply this knowledge to special education practices as outlined in the student teaching handbook.
- General Master's Program: Demonstrates understanding of the primary field of study in a historical, social, or global context.

- Master's with Teacher Certification—Learner & Learning Environment: Students will use knowledge of learners and human development to create responsive, inclusive, and respectful learning activities and environments that maximize learners' cognitive, linguistic, social, emotional, and physical development. Students will apply this knowledge to special education practices as outlined in the student teaching handbook.
- General Master's Program: Selects and/or utilizes the most appropriate methodologies and practices.
- Master's with Teacher Certification Program—Plan: Students will use knowledge of learners, contexts, disciplines, pedagogies and standards to plan and adjust developmentally appropriate and challenging learning activities and assessments. Students will apply planning knowledge and skills to special education practices as outlined in the student teaching handbook.
- General Master's Program: Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Master's with Teacher Certification Program—Engage and Instruct: Students will use knowledge of learners, contexts, disciplines, pedagogies and standards to implement planned and unplanned developmentally appropriate, challenging, and learner-responsive learning activities and maintain safe, inclusive, and respectful learning environments.
- General Master's Program: Communicates clearly in ways appropriate to the field of study.
- Master's with Teacher Certification Program—Assess: Students will create and implement meaningful assessments and use assessment results to inform instruction, communicate with parents and others, and provide feedback to learners to guide their future performance and learning. Students will use research to implement evidence-based practices in the field of special education. Students will apply assessment knowledge and skills to special education practices as outlined in the student teaching handbook.

## PROFESSIONAL CONDUCT

- General Master's Program: Students recognize and apply principles of ethical and professional conduct.
- Master's with Teacher Certification—Professionalism and Ethics: Students will exhibit professionalism and adhere to ethical practices as they continue their own development and collaborate with others to improve their profession, school communities, and outcomes for students and families. Students will apply principles of professionalism and ethics to special education contexts as outlined in the practices as outlined in the student teaching handbook.

## PEOPLE

**Faculty:** Professors Bal, Chan (department chair), Doren (Special Education area chair), Gonzalez, Hanley-Maxwell, Phillips, Rosenthal, Ruppap, Smedema, Trainor, Tansey, Wilkerson

## SPECIAL EDUCATION, PH.D.

The Ph.D. degree is a research-based program preparing leaders in the field of special education to bring systemic change to educational and community settings in ways that improve access and equity for children and youth with disabilities and their families. The program provides

research, teaching and service experiences that prepare graduates to address issues in the field including:

- Improving teacher preparation in special education
- Increasing equity across increasingly diverse groups of students
- Improving post-school outcomes for individuals with disabilities
- Enhancing teacher efficacy in secondary education methodologies with students with disabilities

Special education is one of the two academic areas in the Department of Rehabilitation Psychology and Special Education. The areas are joined by a common mission of preparing professional leadership personnel to address the educational and rehabilitation needs of individuals with disabilities across the life span. Both special education and rehabilitation psychology offer programs leading to Ph.D., M.S., and B.S. degrees. Special education addresses the needs of children, youth, and young adults through its teacher education, research and service programs. Rehabilitation psychology addresses the needs of older youth, young adults, and adults by preparing rehabilitation counselors at the M.S. level and rehabilitation counselor educators at the Ph.D. level. Department faculty in both areas join resources to provide training and research programs that promote successful transition from school to the world of work, postsecondary, education and successful psychosocial adaptation for individuals with disabilities.

Faculty research interests focus, on research methods, reading, adolescence, transition, vocational education, and diversity and equity issues in the field of special education. The department is a national and international leader in preparing Ph.D. professionals to serve in leadership positions in university teaching, research, and program administration. This leadership is evidenced by the publication and research record of its faculty and graduates, and by the routine placement of Ph.D. graduates in major universities and colleges. The program develops researchers and leaders who contribute to creating, integrating and disseminating new knowledge related to the education of individuals with disabilities.

## FUNDING

Financial support, although limited, is available to qualified graduate students and may include scholarships, traineeships, teaching assistantships, and research/project assistantships. Prospective students should see the program website (<http://rpse.education.wisc.edu/rpse/programs/funding-and-financial-aid>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

56 credits

## MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

28 credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Students are allowed to count graduate coursework from other institutions. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

No credits taken as an undergraduate are allowed to count toward the post-master's credits for the degree.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student toward the minimum graduate degree credit requirement; those courses numbered 700 level or above taken as a UW–Madison University Special student may count toward the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

- 20 credits of seminar to include: RP & SE 871 Foundations of Special Education, RP & SE 872 Seminar in Special Education Research, RP & SE 873 Professional Development for Future Special Education Researchers and Faculty in Higher Education, RP & SE 710 Multicultural Issues in Special Education and additional credits to reach 20 with courses identified in consultation with faculty advisor. (Choice courses are listed as RP & SE 660s, or special topics, and include issues in teacher education and diversity—focused and adolescence—focused courses).
- 6 credits Internships to include RP & SE 930 Rehabilitation Counseling Psychology-Practice Teaching and RP & SE 941 Internship: Research
- 9 credits academic minor to be chosen in consultation with faculty advisor.
- 15 credits of research design and statistics to include: ED PSYCH 760 Statistical Methods Applied to Education I, ED PSYCH 761 Statistical Methods Applied to Education II, CURRIC/COUN PSY/ED POL/ED PSYCH/ELPA/RP & SE 719 Introduction to Qualitative Research, and other research/statistics courses chosen in consultation with faculty advisor
- 6 credits RP & SE 990 Research or Thesis (dissertation)

- Exams (not directly linked to coursework to include qualifying, preliminary, and dissertation)

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

When a student is first admitted to the doctoral program a faculty member in the special education area will assume major advisor responsibilities on a temporary basis. In many instances, the doctoral student–major advisor relationship established at the time of admission will extend throughout the doctoral program. However, both the student and the major advisor have the prerogative to change the relationship should personal, academic, or other considerations make it necessary. If a change is desired, the matter should be discussed first by the major advisor and the student. If the student and/or the major advisor can arrange for another faculty member to assume major advisor responsibilities, the name of the new major advisor should be submitted in writing to the SEGSC. If the student and/or the major advisor cannot arrange for a new major advisor, a written request for one should be submitted to the SEGSC. The SEGSC will take reasonable actions designed to assist the student to arrange for a new major advisor.

## ASSESSMENTS AND EXAMINATIONS

Formal admission to doctoral study

Preliminary examination: Doctoral students are required to take a comprehensive preliminary examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis).

Dissertation Final Oral Committee Examination

## TIME CONSTRAINTS

Doctoral students have five years from the date of passing the preliminary examination to take the final oral examination and deposit the dissertation. In some departments, if the professor(s) in charge is satisfied with the preparation, the preliminary examination may be construed as the final examination.

A candidate for a doctoral degree who fails to take the final oral examination within five years after passing the preliminary examination

is required to take another preliminary examination and be admitted to candidacy a second time.

Deposit of the doctoral dissertation in the Graduate School is required.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Application information is available on the department website (<http://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/special-education-graduate-programs/application-requirements-and-deadlines>). Applicants are expected to meet general requirements for admission to the Graduate School. The admissions committee considers a variety of factors including academic preparation, letters of recommendation, personal statement, and professional experiences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- **Conceptual Knowledge:** Formulates ideas, concepts, designs, and/or techniques within and beyond the current boundaries of knowledge, or practice within the field of study; demonstrates breadth within their learning experiences.
- **Research Skills:** Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study; creates research, scholarship, or performance that makes a substantive contribution.
- **Teaching/Advising Skills:** Shares knowledge and research in the field with students in a clear and engaging manner; effectively communicates with students within and outside of class; advances contributions of the field of study to society.
- **Communication and Leadership Skills:** Communicates complex ideas in a clear and understandable manner to a variety of audiences.
- **Service:** Participates in public and professional service.

### PROFESSIONAL CONDUCT

- **Professionalism/Ethics:** Demonstrates the ability to work well with others, participates in professional organizations, adheres to ethical standards of research protocol and professional behavior.

## PEOPLE

**Faculty:** Professors Bal, Chan (department chair), Doren (Special Education area chair), Gonzalez, Hanley-Maxwell, Phillips, Rosenthal, Ruppap, Smedema, Trainor, Tansey, Wilkerson

## RELIGIOUS STUDIES

**Administrative Unit:** Religious Studies

**College/School:** College of Letters & Science

**Minors and Certificates:** Doctoral Minor

Religious studies has emerged as one of the most significant interdisciplinary programs on campus. It includes faculty from more than twenty departments and offers dozens of courses covering

all of the world's major and many of its minor religious traditions.

Chronologically, the program's offerings range from ancient to modern times; geographically, they span the globe; and methodologically, they range across the humanities and social studies, with special attention to the theories and methods which have developed in the field of religious studies itself. The program does not offer a graduate degree, but the religious studies program does award a minor to students enrolled for the Ph.D. in other departments. In exceptional circumstances, students admitted to a doctoral degree-granting department may be granted permission to pursue a special committee doctorate in religious studies; for information on such degrees, contact the Graduate School.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Religious Studies, Doctoral Minor (p. 625)

## PEOPLE

**Faculty:** See current faculty listing on program website (<http://religioustudies.lss.wisc.edu/?q=node/8>).

## RELIGIOUS STUDIES, DOCTORAL MINOR

### REQUIREMENTS

Students interested in a doctoral minor in religious studies select an advisor from faculty in their field of interest. Minors are expected to achieve a grade of B or better in four religious studies program courses totaling at least ten credits at the 300 level or above. One of these four courses must deal with approaches to religion; RELIG ST 600 Religion in Critical Perspective or an equivalent is strongly recommended. Students must register for crosslisted courses from within religious studies rather than from within any crosslisting department. The doctoral minor planning form and certification form, along with a list of courses satisfying the approaches requirement, are available in the program office and website.

## PEOPLE

**Faculty:** See current faculty listing on program website (<http://religioustudies.lss.wisc.edu/?q=node/8>).

## SOCIAL WORK

**Administrative Unit:** Social Work

**College/School:** College of Letters & Science

**Admitting Plans:** MSW, Ph.D.

**Degrees Offered:** MSW in Social Work; Ph.D. in Social Welfare

**Minors and Certificates:** Doctoral Minor in Social Welfare

**Named Options:** Part Time MSW, Eau Claire (MSW); Part Time MSW, Madison (MSW)

The School of Social Work at UW–Madison is consistently ranked among the best schools of social work in the country. Faculty prepare social work professionals at the bachelor's, master's, and doctoral levels. Through the preparation of social work practitioners, scholars and educators, faculty and students explore and seek to understand the nature of social problems, their impact on vulnerable populations, and ways to critically analyze and promote the achievement of a just, equitable, healthy, and productive society.

Social work faculty are noted for their scholarly work in developing a conceptual understanding of social work practice and policy, and in producing research in important social problem areas. For example, faculty took a leadership role in the development of the generalist model of practice now used by most social work programs. Faculty members have made valuable research contributions in the fields of aging, child welfare, developmental disabilities, and family and intergenerational caregiving, as well as in educational attainment and life-course decision-making, end-of-life care for older adults and palliative care, health disparities, homelessness, poverty, social policy, welfare reform, and child support. Drawing on strong faculty, excellent students, and the resources of a world-renowned university in a community rich with social and human service programs, there is much to offer prospective students: individualized, faculty-taught field education for master's students, nationally renowned faculty with a strong interdisciplinary focus, and hands-on research training in a highly individualized program of study for doctoral students.

The school offers unique opportunities for students to receive state-of-the-art professional training through its field education program. Student practice opportunities range from experiences in institutional and community-based settings to working with families and other significant care-givers, with individuals and groups, and in policy and service delivery issues.

**Mission.** The mission of the School of Social Work is to enhance human well-being and promote social and economic justice for people who are disadvantaged to achieve an equitable, healthy, and productive society. The school aims to:

- Create, advance, strengthen, and integrate interdisciplinary knowledge for students and the profession through research, scholarship, and practice.
- Educate students to become highly skilled, culturally competent and ethical practitioners who will provide leadership for the profession of social work within the state of Wisconsin and nationally.
- Promote change at levels ranging from the individual client to national, including empowering communities and populations that are disadvantaged and developing humane service delivery systems.
- Create and disseminate knowledge regarding the prevention and amelioration of social problems.

The School of Social Work is one of five professional schools in the College of Letters and Science. As part of the college, the school maintains relationships with the other social studies and professional schools within the university system through interchange of faculty and students and through joint research and publication endeavors.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Social Welfare, Doctoral Minor (p. 626)

- Social Welfare, Ph.D. (p. 626)
- Social Work, MSW (p. 628)

## PEOPLE

**Faculty:** Professors Robert (director), Berger, Brower, Cancian, Greenberg, Kramer, Magnuson, Mailick, Meyer, Shook Slack; Associate Professors Curtis, Haley-Lock, Moses, Schroepfer; Assistant Professors Bishop-Fitzpatrick (2017), Glass, Ros Pilarz, Walsh, Xiong. A complete list of all faculty and staff in the school is available here (<https://socwork.wisc.edu/facstaff-all>).

## SOCIAL WELFARE, DOCTORAL MINOR

### REQUIREMENTS

Doctoral students outside the school are invited to consider the minor in social welfare. The 9-credit minor requires three doctoral-level courses from the School of Social Work. One must be a Social Policy Seminar (SOC WORK 950 PhD Proseminar), one must be an Applied Theory Seminar (SOC WORK 951 PhD Proseminar), and the third can be a 3-credit social work doctoral course of the student's choosing (which could be another SOC WORK 950 PhD Proseminar or SOC WORK 951 PhD Proseminar seminar).

## SOCIAL WELFARE, PH.D.

### PH.D. DEGREE TRACKS

Students who enter the Ph.D. program with a master's degree in social work and follow the program's standard course sequencing should be able to complete their degree in four to five years. Students who enter the program without a master's degree must plan on an additional one to two years to complete the program and must select from among the following:

- *Track I:* Joint Ph.D./MSW program for students without a bachelor's degree in social work (students complete the equivalent of the two-year master's program while in the doctoral program)
- *Track II:* Joint Ph.D./MSW program for students with a bachelor's degree in social work (students complete the equivalent of the one-year master's program advanced generalist specialization in an area of focus; requires that students have a BSW from a CSWE accredited school of social work)
- *Track III:* Program for students who do not have a social work degree and who do not want an MSW (requires that students complete MSW generalist foundation courses and a 2-credit internship)

The doctoral program has four special features: an emphasis is given to interdisciplinary research and training that seeks to promote optimal functioning in individuals or families across the life course; it stresses that social welfare problems are best understood in individual, family, community, economic, and cultural context; it conceptualizes research as a catalyst for social action and change; and it emphasizes

methodological and statistical training and their applications to studying social problems and processes.

The first two years of the curriculum emphasize methodological, statistical, theoretical and substantive coursework. A variety of social welfare seminars are offered within the school. Students from several departments are invited to join these seminars creating a rich interdisciplinary training environment. Two foundation social welfare research methods seminars cover the fundamentals of research design and implementation relevant to the design and conduct of quantitative, qualitative, and mixed methods research. Application of research methods seminars provide practical experience and application of research knowledge and skills (e.g., proposal writing and data analysis). The social policy and applied theory seminars address specific substantive issues (e.g., poverty, child welfare, family policy), as well as core policy analytics and models of the application of social theory to social problems, respectively. The social welfare faculty research seminar (SOC WORK 946 Faculty Research Seminar, fall semester); and two student research seminars (SOC WORK 947 Student Research Seminar, spring semesters) provide opportunity for professional socialization to the field and development of research interests.

The curriculum is designed to require students to take some courses in departments throughout the campus, based on their individualized learning needs. Students take substantive and research courses focusing on topics related to their specialization. A wide selection of courses in world-renowned social and behavioral science departments is available. Students select an approved social science theory course; two statistics courses (SOC/C&E SOC 361 Statistics for Sociologists II–SOC 362 Statistics for Sociologists III or ED PSYCH 760 Statistical Methods Applied to Education I–ED PSYCH 761 Statistical Methods Applied to Education II); two substantive elective courses; two statistics/methodology elective courses. Years three and four (or five) are dedicated to the preparation and completion of preliminary examinations and dissertation research.

## FUNDING

Prospective students should see the program website (<https://socwork.wisc.edu/phdfunding>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

All degree coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

Doctoral students may apply credits obtained in other graduate programs toward the Ph.D. program minimum degree requirement and minimum graduate coursework (50%) requirement. Graduate credits from other institutions may not be used to fulfill the minimum graduate residence credit requirement. Coursework earned 10 or more years prior to admission to the Ph.D program may not be used to satisfy degree credit minimums.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

Doctoral students cannot use credits obtained as undergraduate students toward the Ph.D. program requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, doctoral students may apply up to 15 credits numbered 300 and above obtained as UW–Madison University Special students toward the Ph.D. program minimum graduate residence credit requirement and the minimum graduate degree credit requirement. That coursework may not be applied to the minimum graduate coursework (50%) requirement unless taken at the 700 level or above. Coursework earned 10 or more years prior to admission to the Ph.D program may not be used to satisfy degree credit minimums.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Contact the program for information on any additional required courses.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral Social Welfare students are not required to complete a minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

## ASSESSMENT AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

## TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

Contact the program for information on any language requirements.

## ADMISSIONS

Online applications are available through the Graduate School Electronic Application (<http://grad.wisc.edu/apply>). Admission to the Ph.D. program requires an undergraduate grade point average of at least 3.00 (on a 4.00 scale) on the equivalent of the last 60 semester credits. Applicants are required to have completed a statistics course; 30 semester credits of social science courses and Graduate Record Examination (GRE) scores taken within five years of application date; if appropriate, English proficiency exam (TOEFL) scores, taken within two years of application date. Applicants must also submit a statement of reasons for graduate study, three letters of recommendation, official transcripts, a writing sample, and a resume or CV.

Ph.D. program details are fully described on the School of Social Work website (<http://socwork.wisc.edu>).

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Acquire a breadth of knowledge of social welfare policies and programs and related bodies of theory.
- Improve social work and social welfare practices.

- Conceptualize, develop and analyze innovative approaches to ameliorating or reducing social problems.
- Identify the causes and consequences of significant individual, family and community outcomes.
- Apply advanced statistics, methodology, and data analysis for research purposes.
- Develop new approaches to the analysis of social programs and policies.

## PROFESSIONAL CONDUCT

- Develop and demonstrate ethical and professional skills necessary for a career as a social welfare scholar.

## ADDITIONAL LEARNING GOALS

- Teach courses in a program or school of social work.
- Translate research findings into policy and program practice.

## PEOPLE

**Faculty:** Professors Berger (program chair), Brower, Cancian, Greenberg, Kramer, Magnuson, Mailick, Meyer, Robert (school director), Slack; Associate Professors Curtis, Haley-Lock, Moses, Schroepfer; Assistant Professors Glass, Ros Pilarz, Walsh, Xiong

## SOCIAL WORK, MSW

The MSW program (full-time and part-time) is accredited by the Council on Social Work Education (CSWE). Full-time students attending on a full-time basis generally complete the program in two academic years; Part-time students complete it in four. Students from CSWE-accredited undergraduate social work programs may be granted up to one year of advanced standing in the full-time program or up to two years advanced standing in the part-time program for comparable coursework taken prior to enrollment.

### MSW PROGRAM GOALS

- To provide students with generalist practice content for entry-level practice that builds upon a liberal arts perspective, reinforces the mission of the school, and fosters the values, ethics, and purposes of the profession of social work.
- To provide students with advanced generalist practice knowledge, skills, and values in an area of focus to be autonomous social work practitioners prepared to confront the realities of a changing social and human services environment, and to be leaders in the development of new approaches for practice.
- To provide students with a generalist social work framework for practice; foster a commitment to social, economic and environmental justice; and prepare students with the requisite knowledge, skills, and values for culturally competent practice.

The school's curriculum is generalist social work practice in orientation. In their courses across the curriculum, faculty interweave: content about social work values and ethics; content that promotes understanding, affirmation, and respect for people from diverse backgrounds; content on populations-at-risk, including strategies to respond to and strategies to redress risk factors; and content on social, economic and environmental

justice grounded in an understanding of distributive justice, human and civil rights, and the global interconnections of oppression.

The generalist practice year curriculum emphasizes direct practice across system sizes (micro-to-macro). Students take courses in social welfare policies and services, human behavior and the social environment (including social work with ethnic and racial groups; and psychopathology for generalist practice), research methods, social work practice (including generalist practice with individuals, families, and groups; and generalist practice with organizations and communities), and a field course that includes a social work practice integrative seminar and social work field placement.

The advanced curriculum offers an advanced generalist specialization with areas of focus in: aging; child, youth, and family welfare; health; and mental health. The advanced generalist specialization requires that students complete an advanced practice course (e.g., advanced practice in health; aging and mental health; interventions with children, youth, and families; psychopathology for social work practice in mental health); a social policies and services course (e.g., child welfare services or child, youth and family policies and services; health, aging, and disability policy and services; mental health policies and services); an advanced macro practice course; and advanced generalist social work field course that includes a social work practice integrative seminar and a social work field placement specific to the student's area of focus.

Individualized subfocus areas are also available and are constructed with assistance from the academic advisors.

## SOCIAL WORK COMPETENCIES AND PRACTICE BEHAVIORS

At the conclusion the MSW program we expect students have achieved the core competencies outlined below through practice behaviors learned in classroom and field experiences. Graduates should be able to:

- Demonstrate ethical and professional behavior
- Engage diversity and difference in practice
- Advance human rights and social, economic and environmental justice
- Engage in practice-informed research and research-informed practice
- Engage in policy practice
- Engage with individuals, families, groups, organizations and communities
- Assess individuals, families, groups, organizations and communities
- Intervene with individuals, families, groups, organizations and communities
- Evaluate practice with individuals, families, groups, organizations and communities

At the end of the generalist practice curriculum sequence, students are expected to evidence the identified generalist practice behaviors for each competency. At the end of the advanced year, students are expected to have achieved the competencies through both generalist practice behaviors and advanced practice behaviors in the advanced generalist specialization with an area of focus learned in classroom and field experiences—all of which are derived from social work knowledge, values, and skills.

## SCHOOL SOCIAL WORK AND CLINICAL PRACTICE LICENSURE, CHILD WELFARE TRAINING

Students seeking preparation for licensure as a school social worker in the State of Wisconsin typically complete the child, youth, and family welfare focus area. Students seeking preparation for licensure as a clinical social worker in the State of Wisconsin or State of Minnesota typically complete the mental health focus area. Contact the full-time program social work academic advisors or part-time program advisors (see contact information on the program website (<https://socwork.wisc.edu/facstaff-advising>)) for a complete list of requirements necessary for these credentials. Information on social work certification and licensure is presented to students periodically during the academic year and is detailed in the Advanced Generalist Specialization Handbook (<http://socwork.wisc.edu/files/ConcentrationHandbook.pdf>) appendixes.

Federal Title IV-E funding is available to full- and part-time MSW students for training in public child welfare. After acceptance into the school, generalist year or advanced practice year students may apply to this special program designed to prepare advanced practitioners for practice in public child welfare. Students complete a specialized curriculum within the child, youth, and family welfare concentration. Students accepted into the training program receive tuition (in- or out-of-state), a book allowance, a mileage allowance, and a monthly stipend each year they are in the program. In return, after graduation, child welfare trainees agree to work in a public child welfare position in the State of Wisconsin for each year they received funding. For complete details, contact the Title IV-E program coordinator (contact information available on the program website (<https://socwork.wisc.edu/facstaff-all>)).

## PART-TIME MSW PROGRAM

The part-time MSW program is offered on two sites: the UW–Madison campus for those in the greater Madison area and on the UW–Eau Claire campus for those who live in the northwest part of the state. The part-time MSW program is designed to allow students who are not able to pursue full-time study to work toward an MSW degree on a structured, time-extended basis.

- Courses are offered on Saturdays at both sites.
- Fieldwork options may include place of employment.
- Traditional and advanced standing options are offered.
- Focus Areas in: aging, health or health and aging; child, youth and family welfare; or mental health are offered.

Applicants must meet the usual School of Social Work admission requirements to be accepted into the program.

## FIELD EDUCATION PROGRAM

Generalist practice year social work students complete two semesters (256 hours per semester) of field work (SOC WORK 400 Field Practice and Integrative Seminar I, SOC WORK 401 Field Practice and Integrative Seminar II) concurrent with their generalist practice coursework, starting in the fall semester. Advanced practice year students complete two semesters (320 hours per semester) of field work (SOC WORK 800 Field Practice and Integrative Seminar III, SOC WORK 801 Field Practice and Integrative Seminar IV) concurrent with their advanced practice concentration coursework, beginning in the fall semester.

The field units are organized around a social problem area, a field of practice, or a major intervention method. Each unit has a range of field placement agencies and settings appropriate to its theme. The emphasis for SW 400-level placements is on a generalist perspective and direct practice experience. The focus is on learning and applying analytic and

interventive skills within an ethically based, problem-focused approach.

SW 800-level field emphases are practice from an advanced generalist perspective with either a direct or indirect practice experience. The focus is on autonomous practice and advanced practice knowledge and skills in an area of concentration.

The following field units are available to generalist practice year and/or advance practice year MSW students in the full time program. These units represent more than 100 placements in agencies and organizations throughout Dane and its contiguous counties.

- Social work practice in community agencies
- Social work practice in community mental health agencies
- Social work practice in county human services
- Social work practice in intellectual and other disabilities
- Social work practice in educational settings
- Social work practice in health
- Social work practice in juvenile and criminal justice systems
- Social work practice in mental health
- Social work practice with older adults
- Social work practice in policy and administration
- Social work practice in public and private child welfare
- Social work practice in public child welfare

Field units offered in the part-time MSW program at both program sites are:

- Social work practice in community agencies
- Social work practice in child and family welfare: public, private and educational settings
- Social work practice in aging and/or health (depending on student demand)
- Social work practice in mental health

Social work applicants should be advised that state statutes require the Department of Justice to conduct background checks on all potential field students prior to the field experience. Information regarding this process is provided to students after they are accepted into the School of Social Work.

## FUNDING

Master's students are eligible for School of Social Work awards (Federal Training Grants when available, Veterans Administration stipends, Arthur Miles Scholarship, Beebe Memorial Scholarship, Katherine Benz Scholarship, Richard Schwert and Helen I. Clark Memorial Awards, Katherine Becker Norman Memorial Award, Lois Palmer Shimp Award, and several others). Graduate Opportunity Fellowships are designed to expand graduate education for U.S. minority group members. For complete details regarding qualifications and applications for these awards, see Scholarships, Awards and Fellowships (<http://socwork.wisc.edu/awards>) on the school's website.

Ph.D. students who meet specific criteria are eligible for university awards (e.g., Advanced Opportunity Fellowship and University Fellowship). Doctoral students are also eligible for travel awards for research abroad and, once a dissertator, for the Graduate Student Collaborative's Vilas Award for professional development. All students have access to federal loans and work study. In addition, Ph.D. students are considered for graduate assistantships (i.e., teaching, research, and

project assistantships) which typically cover tuition, health insurance, and provide a monthly stipend.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

MSW, with available named options Part Time MSW Eau Claire, and Part Time MSW Madison

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS FROM: GRADUATE WORK FROM OTHER INSTITUTIONS

Graduate credits in equivalent foundation/generalist courses completed with a grade of B or better taken at CSWE-accredited MSW programs may be used to fulfill the Minimum Degree Credit Requirement. In general, coursework earned five or more years prior to admission to the MSW Program may not be used to satisfy degree credit minimums. Graduate credits from other MSW programs/institutions may not be used to fulfill the Minimum Residence Credit Requirement.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW-MADISON UNDERGRADUATE

MSW students who have received BSWs from CSWE accredited programs may count 7 credits of their undergraduate coursework in the BSW program. UW-Madison BSWs may count only those courses numbered 300 or above toward their minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to the MSW program may not be used to satisfy credit requirements.

### PRIOR COURSEWORK REQUIREMENTS FROM: UW-MADISON UNIVERSITY SPECIAL

On a case-by-case basis Generalist/Foundation Social Work courses numbered 300 or above taken as a UW-Madison Special student may be used to fulfill degree requirements. No more than 15 credits generalist/foundation credits may be used for this purpose.

### CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

First-year MSW students complete generalist/foundation practice courses unless granted an exemption:

| Code         | Title                                                     | Credits |
|--------------|-----------------------------------------------------------|---------|
| SOC WORK 400 | Field Practice and Integrative Seminar I                  | 2-6     |
| SOC WORK 401 | Field Practice and Integrative Seminar II                 | 2-6     |
| SOC WORK 441 | Generalist Practice with Individuals, Families and Groups | 1-3     |
| SOC WORK 442 | Generalist Practice with Communities and Organizations    | 1-2     |
| SOC WORK 605 | The Field of Social Work                                  | 2       |
| SOC WORK 606 | Social Policy                                             | 2       |
| SOC WORK 640 | Social Work with Ethnic and Racial Groups                 | 2-3     |
| SOC WORK 650 | Methods of Social Work Research                           | 2-3     |
| SOC WORK 711 | Human Behavior and the Environment                        | 2       |
| SOC WORK 712 | Psychopathology for Social Work Practice in Mental Health | 3       |

In general, generalist practice/ foundation courses must be completed before beginning advanced practice courses.

Second-year MSW students: complete advanced courses as outlined in the MSW Program Concentration Handbook.

## OVERALL GRADUATE GPA REQUIREMENT

3.00

## OTHER GRADE REQUIREMENTS

Grades of C are accepted only if they are offset by an equal number of credits of A. Candidates who receive more than two grades of C (in courses that do not extend beyond one term) or a grade of D or F while in the program will be dropped from the MSW Program. Candidates who receive a grade of C in the Field and Integrative Seminar courses may continue only with permission of the faculty and may not offset the grade with a grade of A. (This policy does not apply to grades received for courses taken to meet the statistics prerequisite while in the program).

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

All masters candidates are assigned to the social work academic advisors.

## ASSESSMENT AND EXAMINATIONS

None

## TIME CONSTRAINTS

Full-Time Program students matriculating through the Full-Time MSW program on a part-time basis must enroll in a minimum of two courses each semester and complete one full-time semester of at least 8 credits.

Candidates who withdraw from the Full-Time Program without having completed at least 8 credits must reapply for admission to the program. Students who withdraw from the Part-Time MSW Program without having completed at least 6 credits must reapply for admission to the Part-Time Program.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

None

## ADMISSIONS

Online applications are available through the School of Social Work website (<http://socwork.wisc.edu>).

**Admission into the master's degree program** includes the Graduate School requirement that applicants hold a minimum undergraduate GPA of 3.0 (on a 4.0 scale) on the equivalent of the last 60 semester hours (approximately two years of work) from an accredited university or college.

Applicants apply online to through the Graduate School's application site: Graduate School Electronic Application (<https://grad.wisc.edu/apply>). A complete application includes both the Graduate School application and the School of Social Work's supplemental application forms.

In addition to their application forms prospective MSW students submit: reasons for graduate study essay, official transcripts from each university or college attended, the names and e-mail addresses of three persons who will submit letters of recommendation on the applicant's behalf, criminal background check information, and Test of English as a Foreign Language (TOEFL), or International English Language Testing System (IELTS) scores (if applicable). The Graduate Record Exam (GRE) is optional. A School of Social Work admissions committee acceptance recommendation to the Graduate School is required for unconditional admission. Prerequisites for entrance into the MSW program include:

1. completion of 30 semester credits of social science courses at the point the application is submitted; and
2. completion of an approved statistics course with a grade of C or better, taken within seven years prior to entrance into the program.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Engage diversity and difference in practice.
- Advance human rights and social, economic, and environmental justice.
- Engage in practice-informed research and research-informed practice.
- Engage in policy practice.
- Engage with individuals, families, groups, organizations, and communities.
- Assess individuals, families, groups, organizations, and communities.

## PROFESSIONAL CONDUCT

- Demonstrate ethical and professional behavior.

## ADDITIONAL LEARNING GOALS

- Intervene with individuals, families, groups, organizations, and communities.
- Evaluate practice with individuals, families, groups, organizations, and communities.

## PEOPLE

**Faculty:** Professors Robert (director), Berger, Brower, Cancian, Greenberg, Kramer, Magnuson, Mailick, Meyer, Shook Slack; Associate Professors Curtis, Haley-Lock, Moses, Schroeffer; Assistant Professors Bishop-Fitzpatrick (2017), Glass, Ros Pilarz, Walsh, Xiong. A complete list of all faculty and staff in the school is available here (<https://socwork.wisc.edu/facstaff-all>).

## SOCIOLOGY

**Administrative Unit:** Sociology

**College/School:** College of Agricultural and Life Sciences, College of Letters & Science

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor in Sociology; Doctoral Minor in Science and Technology Studies

The Department of Sociology and the Department of Community and Environmental Sociology conduct a combined graduate program in sociology designed to prepare students for scholarly research, teaching, or applied work. The program leads to the master of science degree with a major in sociology and the doctor of philosophy degree in sociology. It also offers a minor to students earning a doctoral degree in other departments. All major areas of sociological inquiry are represented in the curriculum. The program consistently ranks at or near the top in studies of U.S. doctoral programs.

Distinguished faculty, outstanding students who learn from and support each other, an increasingly multi-ethnic student body, a curriculum covering a broad spectrum of sociological interests, thriving research projects in many areas, and a stimulating campus environment make UW–Madison an excellent choice for students interested in sociology and/or community and environmental sociology.

Members of the departments also participate in a number of interdisciplinary programs. Faculty and students are involved with several research institutes, including the Center for Demography and Ecology, the Center for Demography of Health and Aging, the Center on Wisconsin Strategy, the Institute for Research on Poverty, the Institute on Aging, the Wisconsin Center for Education Research, the University of Wisconsin Survey Center, the Applied Population Laboratory, the Holtz Center for Science and Technology Studies, the Nelson Institute for Environmental Studies, and the Center for Integrated Agricultural Systems. Further information about faculty and areas of study is available on the department websites: Department of Sociology (<http://www.ssc.wisc.edu/soc>), and Department of Community and Environmental Sociology (<http://dces.wisc.edu>).

## DEGREES AND CAREER GOALS

The sociology graduate program admits students who intend to earn a Ph.D. Students complete a master of science degree on the way to the Ph.D. or receive a waiver of the program's master's requirements based on their having written a thesis and obtained a master's degree previously. A few students leave the program after completing the master's degree and pursue careers in the public and private sectors. Of those who graduate with the Ph.D., a majority obtain university teaching and/or research positions; others take research and/or administrative positions in government organizations or private firms.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Science and Technology Studies, Doctoral Minor (p. 632)
- Sociology, Doctoral Minor (p. 633)
- Sociology, M.S. (p. 633)
- Sociology, Ph.D. (p. 636)

## PEOPLE

**Faculty:** Professors Oliver (chair, Sociology), Green (chair, Community and Environmental Sociology), Bell, Borman (affiliated), Carlson, Collins, DeLamater, Emirbayer, Ermakoff, Ferree, Ford (affiliated), Friedland (affiliated), Fujimura, Gerber, Goldberg, Goldrick-Rab (affiliated), Herd, Kleinman, Logan, Massoglia, Maynard, Montgomery, Nordheim (affiliated), Raymo, Rogers (director, COWS), Schaeffer (director, UWSC), Schwartz, Seidman, Stoecker, Thornton (affiliated), Tigges, Wright; Associate Professors Alatout, Christens (affiliated), Curtis, Elwert, Feinstein, Fletcher, Freeland (director, Graduate Studies), Grodsky, Lim, Morales (affiliated), Nobles, Shoemaker (affiliated); Assistant Professors Conti, Engelman, Garoon, Goffman, Grant, Leachman (affiliated), Liu, Simmons (affiliated), Vargas, White, Xiong (affiliated)

## SCIENCE AND TECHNOLOGY STUDIES, DOCTORAL MINOR

Science and technology studies integrates knowledge about science, technology, and medicine with society, culture, and the economy. This interdisciplinary field of study incorporates a broad base of scholarship to provide a nuanced picture of science and technology as human enterprises, situated in wider historical, social, and cultural contexts.

The science and technology studies (STS) program offers a doctoral minor.

The doctoral minor in STS is offered to graduate students who are candidates for a Ph.D. degree in another department or program. The STS doctoral minor provides graduate students with an integrated program of interdisciplinary training in science and technology studies. The minor is open to students in all campus departments, including the humanities, social sciences, natural sciences, and engineering. The program is oriented toward helping students use insights from STS in their research and teaching.

## REQUIREMENTS

All graduate students who are interested in the doctoral minor in STS should consult as soon as possible with the director of the Holtz Center for Science and Technology Studies. Graduate students will work with the director to choose an adviser from the center's affiliated faculty members. The advisor will assist in planning the student's program of education.

Completion of the course requirements must be arranged in close consultation with the student's Holtz Center affiliated advisor and assistant director.

Students working on an STS minor are required to take one core graduate seminar, STS 901 Science, Technology and Medicine in Society, which introduces students to the perspectives on science, technology, and society that transcend any single discipline. In addition, students in the Ph.D. minor are required to complete a set of thematic courses (amounting to 6–9 credits) outside of the student's major field of study. The course of study must consist of classes from at least two different departments. These courses will serve to promote each student's interdisciplinary understanding of the relationship between science/technology and society/culture. Students are required to achieve a grade of B or better in each course. Students pursuing the minor are also expected to attend the biweekly STS brown bag seminar, as well as frequent the STS speaker series and other Holtz Center events.

Students may request the inclusion of courses not on the approved list. An example is a relevant topics course. The request must be in writing and must include a copy of the course syllabus. All requests should be sent to the center director.

## PEOPLE

**Faculty:** Please visit the program website (<http://sts.wisc.edu/members/faculty-infobios>) for a comprehensive list of participating faculty.

## SOCIOLOGY, DOCTORAL MINOR

Sociology involves the development and application of theoretical insights and empirical evidence regarding human behavior as social beings, focusing on how social life works, what causes social change, and why humans behave in the ways they do. The discipline focuses on social interactions and social processes at the individual, group, state, and global levels. The Department of Sociology trains Ph.D. students to become outstanding social scientists working in academia, government, the non-profit sector, and private industry. Students will demonstrate a broad understanding of major theories, methodologies, and research findings in the sociological literature. Ph.D. students will advance the contributions of sociological study to society by conducting research that explores complex ideas, analyzes quantitative and qualitative data, and disseminates new knowledge. In so doing, they will contribute to the vast body of scholarship and applied work that leads to the improvement of society.

## REQUIREMENTS

An Option A minor in Sociology is composed of 9 credits of graduate-level coursework in either the Department of Sociology or the Department

of Community and Environmental Sociology. The departments do not require students to take specific courses; instead, students are encouraged to meet with the sociology graduate advisor to discuss their interests and goals and to find out which courses may be useful to them and when they are likely to be offered. Students may enroll in any graduate-only courses (i.e., those numbered 700–999) with the exception of SOC 700 Introductory Proseminar for Graduate Students and SOC 990 Thesis. They may also enroll in any of the advanced graduate-undergraduate courses (i.e., those numbered 300–699) that are either specifically designed for graduate students or assess graduate students separately from undergrads. Such courses carry this designation in the Course Guide: **Graduate 50%: Y.**

## ADMISSIONS

For more information, contact: Charlotte Frasca, 8127 Social Science Building, 608-262-3805, [frascona@ssc.wisc.edu](mailto:frascona@ssc.wisc.edu).

## PEOPLE

**Faculty:** Professors Oliver (chair, Sociology), Green (chair, Community and Environmental Sociology), Bell, Borman (affiliated), Carlson, Collins, DeLamater, Emirbayer, Ermakoff, Ferree, Ford (affiliated), Friedland (affiliated), Fujimura, Gerber, Goldberg, Goldrick-Rab (affiliated), Herd, Kleinman, Logan, Massoglia, Maynard, Montgomery, Nordheim (affiliated), Raymo, Rogers (director, COWS), Schaeffer (director, UWSC), Schwartz, Seidman, Stoecker, Thornton (affiliated), Tigges, Wright; Associate Professors Alatout, Christens (affiliated), Curtis, Elwert, Feinstein, Fletcher, Freeland (director, Graduate Studies), Grodsky, Lim, Morales (affiliated), Nobles, Shoemaker (affiliated); Assistant Professors Conti, Engelman, Garoon, Goffman, Grant, Leachman (affiliated), Liu, Simmons (affiliated), Vargas, White, Xiong (affiliated)

## SOCIOLOGY, M.S.

The Department of Sociology and the Department of Community and Environmental Sociology conduct a combined graduate program in sociology designed to prepare students for scholarly research, teaching, or applied work. The program leads to the master of science degree with a major in sociology and the doctor of philosophy degree in sociology. It also offers a minor to students earning a doctoral degree in other departments. All major areas of sociological inquiry are represented in the curriculum. The program consistently ranks at or near the top in studies of U.S. doctoral programs.

Distinguished faculty, outstanding students who learn from and support each other, an increasingly multi-ethnic student body, a curriculum covering a broad spectrum of sociological interests, thriving research projects in many areas, and a stimulating campus environment make UW–Madison an excellent choice for students interested in sociology and/or community and environmental sociology.

Members of the departments also participate in a number of interdisciplinary programs. Faculty and students are involved with several research institutes, including the Center for Demography and Ecology, the Center for Demography of Health and Aging, the Center on Wisconsin Strategy, the Institute for Research on Poverty, the Institute on Aging, the Wisconsin Center for Education Research, the University of Wisconsin Survey Center, the Applied Population Laboratory, the Holtz Center for Science and Technology Studies, the

Nelson Institute for Environmental Studies, and the Center for Integrated Agricultural Systems. Further information about faculty and areas of study is available on the department websites: Department of Sociology (<http://www.ssc.wisc.edu/soc>), and Department of Community and Environmental Sociology (<http://dces.wisc.edu>).

## DEGREES AND CAREER GOALS

The sociology graduate program admits students who intend to earn a Ph.D. Students complete a master of science degree on the way to the Ph.D. or receive a waiver of the program's master's requirements based on their having written a thesis and obtained a master's degree previously. A few students leave the program after completing the master's degree and pursue careers in the public and private sectors. Of those who graduate with the Ph.D., a majority obtain university teaching and/or research positions; others take research and/or administrative positions in government organizations or private firms.

## FUNDING

The departments guarantee five continuous years of funding to all incoming students. Sources of funding include teaching assistantships, project assistantships, research assistantships, traineeships, and fellowships. In addition, some admitted students arrive with outside fellowships such as National Science Foundation or Fulbright awards.

International applicants admitted to the program must complete a financial statement that provides evidence of sufficient funds to support themselves for their first year and the intent for support to continue throughout the duration of study. Even though departmental funding is guaranteed, international students must often provide additional financial support documentation, showing they can cover the gap between the amount the departments provide and the amount the U.S. State Department requires. Additional information about international student expenses can be found here (<http://grad.wisc.edu/international>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of the coursework (i.e., 15 of the required 30 credits) must be in graduate-level coursework; courses with the Graduate Level

Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With Program approval, students may count up to 14 credits of graduate coursework from other institutions toward the minimum 30-credit master's degree requirement and the minimum 50% graduate coursework requirement. Coursework completed five or more years prior to admission to the master's program may not be used to satisfy either of these requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students may count up to 7 credits earned in an undergraduate degree program at UW-Madison toward the master's degree requirements. If the courses are numbered 300-699, the credits may count toward the minimum 30-credit degree requirement. If the courses are numbered 700-999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed five or more years prior to admission to the master's program may not be used to satisfy either of these requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students may count up to 15 credits taken as a Special Student toward the Master's degree requirements. If the courses are numbered 300-699, the credits may count toward the minimum 30-credit degree requirement. If the courses are numbered 700-999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed five or more years prior to admission to the master's program may not be used to satisfy either of these requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

| Code                         | Title                                           | Credits |
|------------------------------|-------------------------------------------------|---------|
| SOC 700                      | Introductory Proseminar for Graduate Students   | 1       |
| SOC/C&E SOC 361              | Statistics for Sociologists II                  | 3       |
| SOC 773                      | Intermediate Classical Theory                   | 3       |
| Select one of the following: |                                                 | 3       |
| SOC 735                      | Ethnomethodology & Conversation Analysis        |         |
| SOC/C&E SOC 750              | Research Methods in Sociology                   |         |
| SOC 751                      | Survey Methods for Social Research              |         |
| SOC 753                      | Comparative and Historical Methods in Sociology |         |
| SOC 754                      | Qualitative Research Methods in Sociology       |         |
| SOC 756                      | Demographic Techniques II                       |         |

### OVERALL GRADUATE GPA REQUIREMENT

3.25 GPA required (3.0 in the first semester)

## OTHER GRADE REQUIREMENTS

Students must earn a BC or above in all required courses. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; student must submit an advisor-approved plan outlining specific steps for removal of probationary status and deadlines for doing so).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll).

## ADVISOR / COMMITTEE

The director of graduate studies serves as an entering student's advisor until the student has arranged for a faculty member who has shared interests to serve as his/her advisor and thesis director. Students are expected to have ongoing contact with their faculty advisor. All students are required to submit a yearly progress report that is read and discussed by a committee of faculty at an annual review.

## ASSESSMENTS AND EXAMINATIONS

Master's students write a thesis under the supervision of their major professor. After completing the thesis, students take a comprehensive oral exam covering general sociology, graduate work to date, and the thesis.

Occasionally students decide not to pursue the Ph.D. and opt to complete the requirements for a non-thesis master's degree. In these rare cases, students complete course requirements and take the comprehensive oral exam.

## TIME CONSTRAINTS

Students are expected to complete the master's degree by the end of the summer after their third year in the program.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The program receives a large number of applications each fall from highly qualified individuals, requiring the admissions committee to be extremely selective. There is a very strong preference for students planning to pursue a Ph.D.; students whose goal is a master's are rarely accepted. A cohort of around 20 students is ideal, in terms of providing quality training and making financial support available to all admitted students. Total graduate enrollment in the program is approximately 140 students. An undergraduate major in sociology is not a prerequisite. The admissions committee looks for academic excellence as indicated by undergraduate GPA and Graduate Record Exam (GRE) scores, a writing sample, and references, plus interest in and motivation for graduate study in sociology as indicated by the statement of purpose. However, a weakness in one indicator can be balanced by evidence of strong abilities in the others. To apply, please submit an online application, all transcripts, statement of reasons for graduate study, writing sample,

recommendations, and tests scores. GRE scores (general test only) are required of all applicants; in addition, international applicants are required to submit English Proficiency test scores—either TOEFL, MELAB, or IELTS.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will demonstrate a broad understanding of major theories, methodologies, and research findings in the sociological literature. They will also develop critical thinking skills that empower them to analyze strengths and weaknesses in the existing literature, identify knowledge gaps, evaluate evidence, synthesize information, and form conclusions. They will thus attain the skills necessary to conduct research with intellectual and ethical rigor, care, and creativity.
- Students will complete an original research project in one of the subfields of sociology. In doing so, they will learn to formulate ideas and develop research questions, interpret and evaluate existing literature on the topic, design a feasible research project, use an appropriate methodology, analyze and interpret the resulting data, and consider avenues for future research. They will write a thesis describing their research project and defend it during a comprehensive oral exam.
- Students will develop an understanding of the field of sociology by participating in a required introductory proseminar as well as completing required courses in sociological theory, research methods, and statistics along with elective courses in their area of interest. They will demonstrate their understanding by working as teaching assistants, project assistants, research assistants, and trainees; by presenting work-in-progress at informal brownbag colloquia; by preparing and submitting manuscripts resulting from their research for publication in respected journals; and by submitting papers for presentation at professional conferences.
- Students will retrieve, interpret, and evaluate social science literature and use it, along with their own understanding of relevant methodologies, to employ the most appropriate methods and practices in their own research.
- Students will develop analytical thinking skills that enable them to evaluate information pertinent to their research questions. They will also develop the breadth of knowledge and experience that empowers them to synthesize disparate information and use the resulting synthesis to respond creatively to challenges in their field of study.
- Students will communicate in a clear, organized, engaging manner, using language, methods, and critical tools appropriate to the social sciences. They will learn to develop grant proposals; gather, manage, and analyze data; write a thesis that is thought-provoking, concise, and persuasive; present research informatively; listen with care and patience; and give and receive feedback orally and in writing.

### PROFESSIONAL CONDUCT

- Students will understand, recognize, and apply principles of ethical and professional conduct by developing effective relationships with faculty mentors, graduate student colleagues, and the undergraduate students whom they teach. In addition, they will design research, collect and analyze data, and interpret and report results with honesty and scientific rigor.

## PEOPLE

**Faculty:** Professors Oliver (chair, Sociology), Green (chair, Community and Environmental Sociology), Bell, Borman (affiliated), Carlson, Collins, DeLamater, Emirbayer, Ermakoff, Ferree, Ford (affiliated), Friedland (affiliated), Fujimura, Gerber, Goldberg, Goldrick-Rab (affiliated), Herd, Kleinman, Logan, Massoglia, Maynard, Montgomery, Nordheim (affiliated), Raymo, Rogers (director, COWS), Schaeffer (director, UWSC), Schwartz, Seidman, Stoecker, Thornton (affiliated), Tigges, Wright; Associate Professors Alatout, Christens (affiliated), Curtis, Elwert, Feinstein, Fletcher, Freeland (director, Graduate Studies), Grodsky, Lim, Morales (affiliated), Nobles, Shoemaker (affiliated); Assistant Professors Conti, Engelman, Garoon, Goffman, Grant, Leachman (affiliated), Liu, Simmons (affiliated), Vargas, White, Xiong (affiliated)

## SOCIOLOGY, PH.D.

The Department of Sociology and the Department of Community and Environmental Sociology conduct a combined graduate program in sociology designed to prepare students for scholarly research, teaching, or applied work. The program leads to the master of science degree with a major in sociology and the doctor of philosophy degree in sociology. It also offers a minor to students earning a doctoral degree in other departments. All major areas of sociological inquiry are represented in the curriculum. The program consistently ranks at or near the top in studies of U.S. doctoral programs.

Distinguished faculty, outstanding students who learn from and support each other, an increasingly multi-ethnic student body, a curriculum covering a broad spectrum of sociological interests, thriving research projects in many areas, and a stimulating campus environment make UW–Madison an excellent choice for students interested in sociology and/or community and environmental sociology.

Members of the departments also participate in a number of interdisciplinary programs. Faculty and students are involved with several research institutes, including the Center for Demography and Ecology, the Center for Demography of Health and Aging, the Center on Wisconsin Strategy, the Institute for Research on Poverty, the Institute on Aging, the Wisconsin Center for Education Research, the University of Wisconsin Survey Center, the Applied Population Laboratory, the Holtz Center for Science and Technology Studies, the Nelson Institute for Environmental Studies, and the Center for Integrated Agricultural Systems. Further information about faculty and areas of study is available on the department websites: Department of Sociology (<http://www.ssc.wisc.edu/soc>), and Department of Community and Environmental Sociology (<http://dces.wisc.edu>).

## DEGREES AND CAREER GOALS

The sociology graduate program admits students who intend to earn a Ph.D. Students complete a master of science degree on the way to the Ph.D. or receive a waiver of the program's master's requirements based on their having written a thesis and obtained a master's degree previously. A few students leave the program after completing the master's degree and pursue careers in the public and private sectors. Of those who graduate with the Ph.D., a majority obtain university teaching and/or research positions; others take research and/or administrative positions in government organizations or private firms.

## FUNDING

The departments guarantee five continuous years of funding to all incoming students. Sources of funding include teaching assistantships, project assistantships, research assistantships, traineeships, and fellowships. In addition, some admitted students arrive with outside fellowships such as National Science Foundation or Fulbright awards.

International applicants admitted to the program must complete a financial statement that provides evidence of sufficient funds to support themselves for their first year and the intent for support to continue throughout the duration of study. Even though departmental funding is guaranteed, international students must often provide additional financial support documentation, showing they can cover the gap between the amount the departments provide and the amount the U.S. State Department requires. Additional information about international student expenses can be found here (<http://grad.wisc.edu/international>).

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of the coursework (i.e., 26 of the required 51 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may count up to 19 credits of graduate coursework from other institutions toward the minimum 51-credit Ph.D. degree requirement and the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, students may count up to 7 credits earned in an undergraduate degree program at UW–Madison toward the Ph.D. degree requirements. If the courses are numbered 300–699, the credits may count toward the minimum 51-credit degree requirement. If the courses

are numbered 700–999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students may count up to 15 credits taken as a Special Student toward the Ph.D. degree requirements. If the courses are numbered 300–699, the credits may count toward the minimum 51-credit degree requirement. If the courses are numbered 700–999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

| Code            | Title                           | Credits |
|-----------------|---------------------------------|---------|
| SOC/C&E SOC 361 | Statistics for Sociologists II  | 3       |
| SOC 362         | Statistics for Sociologists III | 3       |
| SOC/C&E SOC 750 | Research Methods in Sociology   | 3       |
| SOC 773         | Intermediate Classical Theory   | 3       |

Select four seminars in Sociology or Community and Environmental Sociology

## DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor comprised of 9 credits in one department or 9 credits united by a common theme in two or more departments.

## OVERALL GRADUATE GPA REQUIREMENT

3.25 GPA required

## OTHER GRADE REQUIREMENTS

Students must earn a BC or above in all required courses. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; student must submit an advisor-approved plan outlining specific steps for removal of probationary status and deadlines for doing so).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll).

## ADVISOR / COMMITTEE

Students are expected to have ongoing contact with their faculty advisor. Dissertators who fail to confer with their advisor at least once each semester will not be allowed to register in the subsequent semester. All students are required to submit a yearly progress report that is read and discussed by a committee of faculty at an annual review.

## ASSESSMENTS AND EXAMINATIONS

Ph.D. students must pass two six-hour written preliminary exams in two different sociology subfields as well as an oral prelim. They then write a dissertation under the supervision of their major professor. After completing the dissertation, students take a final oral exam covering the dissertation and the general field of the major and minor studies.

## TIME CONSTRAINTS

Doctoral students must complete the Ph.D. within five years of passing the oral preliminary examination and attaining dissertator status.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The program receives a large number of applications each fall from highly qualified individuals, requiring the admissions committee to be extremely selective. There is a very strong preference for students planning to pursue a Ph.D.; students whose goal is a master's are rarely accepted. A cohort of around 20 students is ideal, in terms of providing quality training and making financial support available to all admitted students. Total graduate enrollment in the program is approximately 140 students. An undergraduate major in sociology is not a prerequisite. The admissions committee looks for academic excellence as indicated by undergraduate GPA and Graduate Record Exam (GRE) scores, a writing sample, and references, plus interest in and motivation for graduate study in sociology as indicated by the statement of purpose. However, a weakness in one indicator can be balanced by evidence of strong abilities in the others. To apply, please submit an online application, all transcripts, statement of reasons for graduate study, writing sample, recommendations, and tests scores. GRE scores (general test only) are required of all applicants; in addition, international applicants are required to submit English Proficiency test scores—either TOEFL, MELAB, or IELTS.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Students will demonstrate a broad understanding of major theories, methodologies, and research findings in the sociological literature. They will also develop critical thinking skills that empower them to analyze strengths and weaknesses in the existing literature, identify knowledge gaps, evaluate evidence, synthesize information, and form conclusions. They will thus attain the skills necessary to teach and conduct research with intellectual and ethical rigor, care, and creativity.
- Students will create individualized programs to suit their specific interests and goals. In doing so, they will learn to formulate ideas and develop research questions, design feasible research projects, use appropriate methodologies, analyze and interpret the resulting data, and identify avenues for further exploration. Their original research will expand the current boundaries of knowledge in the field.
- Doctoral students will write seminar papers and conduct dissertation research, prepare and submit manuscripts resulting from their research for publication in respected journals, and submit papers for presentation at professional conferences. Their independent research will contribute substantively to scholarship in the field.
- Students will demonstrate breadth within their learning experience by taking at least four seminars, completing a minor area of study,

and passing written preliminary exams in two different subfields. In addition, because our program emphasizes collective responsibility for training, students will be supervised and mentored by several faculty members with a range of expertise. They will also learn to mentor others.

- Ph.D. students will advance the contributions of sociological study to society by conducting research that explores complex ideas, analyzes quantitative and qualitative data, and disseminates new knowledge. In so doing, they will contribute to the vast body of scholarship and applied work that leads to the improvement of society. Students will also share theory, methodology, and the results of research with the undergraduate students whom they teach and thereby foster an understanding of how social life works, what causes social change, and why humans behave in the ways they do.

## PROFESSIONAL CONDUCT

- Students will communicate complex ideas in a clear, organized, engaging manner to diverse audiences. They will craft effective grant proposals; gather, manage, and analyze data; write papers that are thought-provoking, concise, and persuasive; present research informatively; listen with care and patience; and give and receive feedback orally and in writing.
- Students will foster ethical and professional conduct by demonstrating respect for and having positive interactions with faculty members and staff, graduate student colleagues, and undergraduate students. They will also foster such conduct by the scientific rigor and honesty with which they design research, collect and analyze data, and interpret and report results.

## ADDITIONAL LEARNING GOALS

- Career Preparation: Students will prepare for a range of sustainable careers in academia as well as government, private industry, and the nonprofit sector. They will develop flexibility, leadership, and broadly applicable skills in critical thinking, problem solving, project management, collaboration, and communication.

## PEOPLE

**Faculty:** Professors Oliver (chair, Sociology), Green (chair, Community and Environmental Sociology), Bell, Borman (affiliated), Carlson, Collins, DeLamater, Emirbayer, Ermakoff, Ferree, Ford (affiliated), Friedland (affiliated), Fujimura, Gerber, Goldberg, Goldrick-Rab (affiliated), Herd, Kleinman, Logan, Massoglia, Maynard, Montgomery, Nordheim (affiliated), Raymo, Rogers (director, COWS), Schaeffer (director, UWSC), Schwartz, Seidman, Stoecker, Thornton (affiliated), Tigges, Wright; Associate Professors Alatout, Christens (affiliated), Curtis, Elwert, Feinstein, Fletcher, Freeland (director, Graduate Studies), Grodsky, Lim, Morales (affiliated), Nobles, Shoemaker (affiliated); Assistant Professors Conti, Engelman, Garoon, Goffman, Grant, Leachman (affiliated), Liu, Simmons (affiliated), Vargas, White, Xiong (affiliated)

## SOIL SCIENCE

**Administrative Unit:** Soil Science

**College/School:** College of Agricultural and Life Sciences

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The UW–Madison Department of Soil Science is one of the oldest, largest, and most prominent soil science departments in the United States. It is globally renowned for its excellence in soil research and education. The department's mission is to provide instruction, research, and extension leadership in soil chemistry, physics, biology, and pedology to economic and sustainable land use. Programs are designed to improve basic understanding and practical management of soil resources in natural, agricultural, and urban ecosystems, and to serve local, state, national, and global interests. The department implements the Wisconsin Idea to the extended community and provides all generations with an appreciation of soil as a key natural resource and thorough understanding of the scientific basis of the environment and agriculture.

Soil science entails understanding soils and applying the principles of physics, chemistry, mathematics, and biology to the sustainable management of soil and the environment. Soil science deals with the effects of climate change and its interaction with the soil, with scarcity of water resources, and the increase of food production to feed 9 billion people. The link between soils and biodiversity as well as the effects of soils on biofuel production is widely researched in the Department of Soil Science.

The department is committed to integrated programs of instruction, research, extension, and outreach that address societal goals of responsible stewardship of soil and water resources.

The importance of soils in crop production, environmental issues, turf and grounds management, soil conservation, global climate change, carbon sequestration, rural and urban planning, and waste disposal are integrated into the department's course offerings and research programs. Graduate study in soil science provides the basic and applied scientific training needed for teaching, research, and other professional work in the agricultural, earth, and environmental sciences. The department office provides information concerning career placement and available vacancies.

Graduates from the department occupy leading positions in industry, government, education, and research in agriculture, natural resources and environmental science throughout the world. Of the more than 1,000 alumni of the department's graduate program, many are deans, directors, chairs, faculty, and staff at universities in the U.S. and other countries, or in leading positions in government, regulatory agencies, research institutions, agribusinesses, chemical industries, and recreational and conservation organizations.

The number of graduate students enrolled in the program over the past 10 years has averaged 20 per year, with about half pursuing master's degrees and half pursuing doctorates. International students generally comprise about 30% of the total. Department faculty also direct additional graduate students in multidisciplinary research in soils-related programs.

## FACULTY RESEARCH

Research in the department focuses on an improved understanding of the soil, as well as on interactions between soil and the people of Wisconsin. The faculty have extensive and long-term experience and knowledge about the soils of Wisconsin, their genesis, properties and management. The department has an exciting suite of research activities ranging from the molecular level to the global. Research focuses on topical themes like climate change and soil changes to land use effects of biofuel production to DNA fingerprinting of soil life.

Many field-research projects on soil and water problems are conducted in cooperation with state and federal agencies, agribusinesses, municipalities, and private farmers. The department cooperates closely with the Wisconsin Geological and Natural History Survey, Molecular and Environmental Toxicology Center, and the USDA Natural Resource Conservation Service in conducting soil surveys and addressing problems of groundwater shortages and contamination. Relationships between soils and forests are studied at tree nurseries and in state, private, and commercial forests throughout the state in cooperation with the Wisconsin Department of Natural Resources and the pulp and paper industry.

Through a long commitment of our staff to international agriculture, the department has assisted in the creation of agricultural colleges in several developing countries and has attracted outstanding international graduate students. Current research involvement includes Brazil, Chile, China, Trinidad-Tobago, Spain, Australia, Argentina, and Antarctica.

Many department faculty have been recognized nationally and globally for their contributions to soil science. Three of only four soil scientists appointed to the National Academy of Sciences are from the UW–Madison Department of Soil Science. Several faculty members have received local and national academic, professional-society, trade-association, and industrial prizes and awards for teaching, research, and extension education and serve on important state, national, and international committees. Many faculty members have been recognized for their contributions by election to honorary fellowship in the Soil Science Society of America, the American Society of Agronomy, and allied professional societies.

Our faculty are heavily involved in cooperative interdisciplinary research undertakings with scientists and organizations within and beyond the university, such as UW–Madison's Gaylord Nelson Institute for Environmental Studies, Molecular and Environmental Toxicology Center, Environmental Chemistry and Technology Program, and other science departments, state agencies, environmental consulting and service companies, agribusinesses, and trade organizations.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Soil Science, Doctoral Minor (p. 639)
- Soil Science, M.S. (p. 640)
- Soil Science, Ph.D. (p. 642)

## RESOURCES

### RESEARCH FACILITIES

Research in the department can be conducted in the field, in the laboratory, behind the desktop, but is commonly conducted in a combination. The department is equipped with all necessary laboratory, computing, and field facilities for graduate training and research. State-of-the-art scientific instrumentation includes soil moisture tension apparatus; flame-emission and atomic-absorption spectrophotometers and gamma-ray spectrometers; neutron activation analysis equipment; an inductively coupled plasma (ICP)-emission spectrometer and an ICP-mass spectrometer; thin-layer, high-performance liquid, gas, and ion chromatographs; low-mass isotope ratio mass spectrometer; micro-respirometers; micro-titer-plate counters; infrared and ultraviolet

spectrophotometers; phase-contrast, polarizing and epifluorescence microscopy and photomicrography equipment; eddy correlation systems for heat, moisture, and CO<sub>2</sub> fluxes; ground-penetrating radar; high-resolution digital imaging; dynamic light scattering and particle electrophoresis equipment; flow field flow fractionation; and accelerated solvent extractor. Field equipment includes a truck-mounted hydraulic soil probe with well-drilling capabilities; a plot-field harvest combine; various production field equipment (planters, tillage equipment, rainfall simulator); differential-global position system; and particle counter.

Excellent data-collection, datalogging, computing, and networking facilities are available for basic research and graduate training. In addition to computing facilities maintained by individual researchers for their students, the department makes available to its graduate students a computer graphics facility for the production of sophisticated graphic output.

Specialized facilities are available for research in molecular biology, modern environmental microbiology, in vitro toxicology and bioassays, and contaminated-site remediation. Soils graduate students and faculty have shared access to major advanced physicochemical, x-ray, and electron microscopy analytical equipment through the Materials Science Center, National Magnetic Resonance Facility at Madison, National Synchrotron Light Source at Brookhaven National Laboratories, and other UW–Madison science and engineering departments. Facilities, vehicles, machinery, and instrumentation are available for conducting field experiments at ten strategically located UW Agricultural Research Stations and the O.J. Noer Turfgrass Research and Education Facility. Fieldwork for agricultural production and environmental protection is supported by daily information from the CALS agricultural weather-station network as well as soils, crops, land-use, and natural resources analysis using land information systems and geographic information systems.

## PEOPLE

**Faculty:** Professors Hartemink (chair), Barak, Bland, Bleam, Hickey, Kung, Laboski, Long, Pedersen, Powell, Ventura; Associate Professors Balster, Ruark, Soldat; Assistant Professors Arriaga, Whitman

## SOIL SCIENCE, DOCTORAL MINOR

### REQUIREMENTS

A doctoral minor in soil science shall consist of a minimum of 10 credits in the Department of Soil Science. At least 5 of the 10 credits must be from courses numbered 500 or higher. One credit of SOIL SCI 728 Graduate Seminar may be applied towards the 10 credit minimum.

## PEOPLE

**Faculty:** Professors Hartemink (chair), Barak, Bland, Bleam, Hickey, Kung, Laboski, Long, Pedersen, Powell, Ventura; Associate Professors Balster, Ruark, Soldat; Assistant Professors Arriaga, Whitman

## SOIL SCIENCE, M.S.

The UW–Madison Department of Soil Science is one of the oldest, largest, and most prominent soil science departments in the United States. It is globally renowned for its excellence in soil research and education. The department's mission is to provide instruction, research, and extension leadership in soil chemistry, physics, biology, and pedology to economic and sustainable land use. Programs are designed to improve basic understanding and practical management of soil resources in natural, agricultural, and urban ecosystems, and to serve local, state, national, and global interests. The department implements the Wisconsin Idea to the extended community and provides all generations with an appreciation of soil as a key natural resource and thorough understanding of the scientific basis of the environment and agriculture.

Soil science entails understanding soils and applying the principles of physics, chemistry, mathematics, and biology to the sustainable management of soil and the environment. Soil science deals with the effects of climate change and its interaction with the soil, with scarcity of water resources, and the increase of food production to feed 9 billion people. The link between soils and biodiversity as well as the effects of soils on biofuel production is widely researched in the Department of Soil Science.

The department is committed to integrated programs of instruction, research, extension, and outreach that address societal goals of responsible stewardship of soil and water resources.

The importance of soils in crop production, environmental issues, turf and grounds management, soil conservation, global climate change, carbon sequestration, rural and urban planning, and waste disposal are integrated into the department's course offerings and research programs. Graduate study in soil science provides the basic and applied scientific training needed for teaching, research, and other professional work in the agricultural, earth, and environmental sciences. The department office provides information concerning career placement and available vacancies.

Graduates from the department occupy leading positions in industry, government, education, and research in agriculture, natural resources and environmental science throughout the world. Of the more than 1,000 alumni of the department's graduate program, many are deans, directors, chairs, faculty, and staff at universities in the U.S. and other countries, or in leading positions in government, regulatory agencies, research institutions, agribusinesses, chemical industries, and recreational and conservation organizations.

The number of graduate students enrolled in the program over the past 10 years has averaged 20 per year, with about half pursuing master's degrees and half pursuing doctorates. International students generally comprise about 30% of the total. Department faculty also direct additional graduate students in multidisciplinary research in soils-related programs.

## FACULTY RESEARCH

Research in the department focuses on an improved understanding of the soil, as well as on interactions between soil and the people of Wisconsin. The faculty have extensive and long-term experience and knowledge about the soils of Wisconsin, their genesis, properties and management. The department has an exciting suite of research activities ranging from the molecular level to the global. Research focuses on topical themes like

climate change and soil changes to land use effects of biofuel production to DNA fingerprinting of soil life.

Many field-research projects on soil and water problems are conducted in cooperation with state and federal agencies, agribusinesses, municipalities, and private farmers. The department cooperates closely with the Wisconsin Geological and Natural History Survey, Molecular and Environmental Toxicology Center, and the USDA Natural Resource Conservation Service in conducting soil surveys and addressing problems of groundwater shortages and contamination. Relationships between soils and forests are studied at tree nurseries and in state, private, and commercial forests throughout the state in cooperation with the Wisconsin Department of Natural Resources and the pulp and paper industry.

Through a long commitment of our staff to international agriculture, the department has assisted in the creation of agricultural colleges in several developing countries and has attracted outstanding international graduate students. Current research involvement includes Brazil, Chile, China, Trinidad-Tobago, Spain, Australia, Argentina, and Antarctica.

Many department faculty have been recognized nationally and globally for their contributions to soil science. Three of only four soil scientists appointed to the National Academy of Sciences are from the UW–Madison Department of Soil Science. Several faculty members have received local and national academic, professional-society, trade-association, and industrial prizes and awards for teaching, research, and extension education and serve on important state, national, and international committees. Many faculty members have been recognized for their contributions by election to honorary fellowship in the Soil Science Society of America, the American Society of Agronomy, and allied professional societies.

Our faculty are heavily involved in cooperative interdisciplinary research undertakings with scientists and organizations within and beyond the university, such as UW–Madison's Gaylord Nelson Institute for Environmental Studies, Molecular and Environmental Toxicology Center, Environmental Chemistry and Technology Program, and other science departments, state agencies, environmental consulting and service companies, agribusinesses, and trade organizations.

## FUNDING

Financial support is usually available to qualified students in the form of research assistantships, mostly funded from research grants; final decision for granting a research assistantship rests with the professor(s) supervising the research. Any assistantship for at least one-third time qualifies a student for remission of tuition (though students may be responsible for other administrative fees). The department does not offer teaching assistantships. A number of Graduate School fellowships are available to new students with outstanding records. The deadline for application for these competitive fellowships is early January of each year. The department selects the most qualified applicants and forwards their dossiers to a campus-wide selection committee. Support for graduate assistantships is available through two Wisconsin Distinguished Fellowships (the W.R. Kussow/Wisconsin Turfgrass Association and the Leo M. Walsh/Wisconsin Fertilizer and Chemical Association), the C.B. Tanner Agricultural Physics Award Fund, and the Charles and Alice Ream Soil and Water Protection Research Fund. In addition, there are two awards given annually to outstanding incoming

graduate students, the O.N. Allen Graduate Fellowship for Agriculture and the Kelling Soil Fertility Award.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Candidates for the M.S. degree must earn a minimum of 15 credits of graduate coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 12 credits of graduate coursework taken during graduate study at other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits of graduate coursework numbered 300 or above from a UW-Madison undergraduate degree. The coursework may also count toward the 50% graduate coursework requirement if the courses are numbered 700 or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. The coursework may also count toward the 50% graduate coursework requirement if the courses are numbered 700 or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Courses in basic sciences: Candidates for an M.S. in soil science are required to have completed the basic science courses outlined in the departmental M.S. requirements document.

Courses in soil science: M.S. candidates must meet the minimum departmental course requirements for soils graduate degrees outlined in the departmental M.S. requirements document. M.S. candidates must enroll in a minimum of 1 credit of research (SOIL SCI 990 Research) every semester.

Seminar: All M.S. candidates must present at least one soil science graduate seminar (SOIL SCI 728 Graduate Seminar) for letter grade (>B) during their M.S. program. Each candidate must enroll in a soil science seminar every fall and spring semester; exceptions require the approval of the department chair.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

### OTHER GRADE REQUIREMENTS

Required courses in soil science must be completed with a grade of B or better (BC and C may not be offset by AB and A). For all other courses, the requirement is an average record of B or better in all work taken as a graduate student.

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

The master's examination committee consists of at least three faculty members of defensible breadth, a minimum of two drawn from the soil science faculty. Defensible breadth shall be subject to certification committee approval. The third member of the committee must have a degree equivalent to that pursued by the student and be approved by the certification committee.

A proposed program for a M.S. candidate satisfying the minimum course requirements must be approved by the certification committee by the end of the first semester of M.S. graduate work. It is the responsibility of the student and the major professor to complete the departmental M.S. certification forms, arrange to be certified by the certification committee, and arrange for approval of revisions in the initial program if this becomes necessary.

### ASSESSMENTS AND EXAMINATIONS

Students are expected to present a written research plan to their committee no later than the end of the third semester of M.S. graduate work.

Candidates must present an open seminar on their M.S. thesis research, and pass a comprehensive examination (either oral, or an oral-written combination if requested by the candidate) on the graduate work offered in support of their candidacy.

Deposit of the master's thesis is required.

## TIME CONSTRAINTS

Students enrolled full time are expected to complete their degree requirements within two to three years.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

A foundation in the basic sciences is essential for graduate study in soil science. The program requires all students to have successfully completed one semester of calculus for the M.S. degree and two semesters of calculus (differential and integral) for the Ph.D., one course in statistics, nine credits of chemistry, and one year of physics. Admission with deficiencies is possible but is likely to delay completion of graduate studies.

The following materials must be submitted when applying to the program: an online application, official transcripts, Graduate Record Exam (GRE) scores, and three references. TOEFL scores are required for applicants whose native language is not English. Because graduate requirements presuppose extensive science coursework, continuing undergraduate students are encouraged to select undergraduate courses carefully if they are considering advanced degrees in soil science.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, and elaborates theories, research methods, and approaches in soil science.
- Identifies sources and assembles evidence addressing questions or challenges in soil science.
- Understands the field of soil science in historical, social, and global contexts.
- Selects and/or utilizes the appropriate methodologies and practices for soil science research.
- Evaluates or synthesizes information addressing research questions.
- Communicates clearly in oral and written forms.

### PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Hartemink (chair), Barak, Bland, Bleam, Hickey, Kung, Laboski, Long, Pedersen, Powell, Ventura; Associate Professors Balster, Ruark, Soldat; Assistant Professors Arriaga, Whitman

## SOIL SCIENCE, PH.D.

The UW–Madison Department of Soil Science is one of the oldest, largest, and most prominent soil science departments in the United States. It is globally renowned for its excellence in soil research and education. The department's mission is to provide instruction, research, and extension leadership in soil chemistry, physics, biology, and pedology

to economic and sustainable land use. Programs are designed to improve basic understanding and practical management of soil resources in natural, agricultural, and urban ecosystems, and to serve local, state, national, and global interests. The department implements the Wisconsin Idea to the extended community and provides all generations with an appreciation of soil as a key natural resource and thorough understanding of the scientific basis of the environment and agriculture.

Soil science entails understanding soils and applying the principles of physics, chemistry, mathematics, and biology to the sustainable management of soil and the environment. Soil science deals with the effects of climate change and its interaction with the soil, with scarcity of water resources, and the increase of food production to feed 9 billion people. The link between soils and biodiversity as well as the effects of soils on biofuel production is widely researched in the Department of Soil Science.

The department is committed to integrated programs of instruction, research, extension, and outreach that address societal goals of responsible stewardship of soil and water resources.

The importance of soils in crop production, environmental issues, turf and grounds management, soil conservation, global climate change, carbon sequestration, rural and urban planning, and waste disposal are integrated into the department's course offerings and research programs. Graduate study in soil science provides the basic and applied scientific training needed for teaching, research, and other professional work in the agricultural, earth, and environmental sciences. The department office provides information concerning career placement and available vacancies.

Graduates from the department occupy leading positions in industry, government, education, and research in agriculture, natural resources and environmental science throughout the world. Of the more than 1,000 alumni of the department's graduate program, many are deans, directors, chairs, faculty, and staff at universities in the U.S. and other countries, or in leading positions in government, regulatory agencies, research institutions, agribusinesses, chemical industries, and recreational and conservation organizations.

The number of graduate students enrolled in the program over the past 10 years has averaged 20 per year, with about half pursuing master's degrees and half pursuing doctorates. International students generally comprise about 30% of the total. Department faculty also direct additional graduate students in multidisciplinary research in soils-related programs.

## FACULTY RESEARCH

Research in the department focuses on an improved understanding of the soil, as well as on interactions between soil and the people of Wisconsin. The faculty have extensive and long-term experience and knowledge about the soils of Wisconsin, their genesis, properties and management. The department has an exciting suite of research activities ranging from the molecular level to the global. Research focuses on topical themes like climate change and soil changes to land use effects of biofuel production to DNA fingerprinting of soil life.

Many field-research projects on soil and water problems are conducted in cooperation with state and federal agencies, agribusinesses, municipalities, and private farmers. The department cooperates closely with the Wisconsin Geological and Natural History Survey, Molecular and Environmental Toxicology Center, and the USDA Natural Resource Conservation Service in conducting soil surveys and addressing problems

of groundwater shortages and contamination. Relationships between soils and forests are studied at tree nurseries and in state, private, and commercial forests throughout the state in cooperation with the Wisconsin Department of Natural Resources and the pulp and paper industry.

Through a long commitment of our staff to international agriculture, the department has assisted in the creation of agricultural colleges in several developing countries and has attracted outstanding international graduate students. Current research involvement includes Brazil, Chile, China, Trinidad-Tobago, Spain, Australia, Argentina, and Antarctica.

Many department faculty have been recognized nationally and globally for their contributions to soil science. Three of only four soil scientists appointed to the National Academy of Sciences are from the UW–Madison Department of Soil Science. Several faculty members have received local and national academic, professional-society, trade-association, and industrial prizes and awards for teaching, research, and extension education and serve on important state, national, and international committees. Many faculty members have been recognized for their contributions by election to honorary fellowship in the Soil Science Society of America, the American Society of Agronomy, and allied professional societies.

## FUNDING

Financial support is usually available to qualified students in the form of research assistantships, mostly funded from research grants; final decision for granting a research assistantship rests with the professor(s) supervising the research. Any assistantship for at least one-third time qualifies a student for remission of tuition (though students may be responsible for other administrative fees). The department does not offer teaching assistantships. A number of Graduate School fellowships are available to new students with outstanding records. The deadline for application for these competitive fellowships is early January of each year. The department selects the most qualified applicants and forwards their dossiers to a campus-wide selection committee. Support for graduate assistantships is available through two Wisconsin Distinguished Fellowships (the W.R. Kussow/Wisconsin Turfgrass Association and the Leo M. Walsh/Wisconsin Fertilizer and Chemical Association), the C.B. Tanner Agricultural Physics Award Fund, and the Charles and Alice Ream Soil and Water Protection Research Fund. In addition, there are two awards given annually to outstanding incoming graduate students, the O.N. Allen Graduate Fellowship for Agriculture and the Kelling Soil Fertility Award.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Candidates for the Ph.D. degree must earn a minimum of 26 credits of graduate coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 12 credits of graduate coursework taken during graduate study at other institutions. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, students are allowed to count no more than 7 credits of graduate coursework numbered 300 or above from a UW–Madison undergraduate degree. The coursework may also count toward the 50% graduate coursework requirement if the courses are numbered 700 or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. The coursework may also count toward the 50% graduate coursework requirement if the courses are numbered 700 or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

Courses in basic sciences: Candidates for a Ph.D. in soil science are required to have completed the basic science courses outlined in the departmental Ph.D. requirements document.

Courses in soil science: Ph.D. candidates must meet the minimum departmental course requirements for soils graduate degrees outlined in the departmental Ph.D. requirements document. Ph.D. candidates must enroll in a minimum of 1 credit of research (SOIL SCI 990 Research) every semester.

Seminar: All Ph.D. candidates must present at least two soil science graduate seminars (SOIL SCI 728 Graduate Seminar) for letter grade (>B) during their Ph.D. program. One of the seminars must be on the student's prospectus. Each candidate must enroll in a soil science seminar every fall and spring semester; exceptions require the approval of the department chair.

Teaching qualifications: All candidates for a Ph.D. in Soil Science shall complete a minimum of 1 degree credit of SOIL SCI 799 Practicum in Soil Science Teaching. A written plan for satisfying this requirement shall be prepared by the student in conjunction with the advisor and approved by the certification committee. The type and level of effort required to earn one or more degree credits in SOIL SCI 799 shall be in accordance with the guidelines and standards set forth by the CALS Curriculum Committee and approved by the UW–Madison Divisional Committees in the spring semester 1981.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Ph.D. candidates in soil science must supplement their major study with a minimum of 10 credits in graduate courses in another field. These courses must be selected according to a coherent plan under Option A or Option B as follows:

Option A—External: A student must offer at least 10 credits from a degree program outside the soil science major. Selection of this option requires approval of the minor department.

Option B—Distributed: A distributed minor for a student studying for a Ph.D. in soil science shall consist of a minimum of 10 credits of graduate level courses in one or more departments. Selection of this option requires approval of the certification committee.

A minor program must be approved by the minor department (Option A) or by the Department of Soil Science Certification Committee (Option B) no later than the end of the second semester of Ph.D. graduate work (not including summer sessions). A copy of the completed minor agreement form is needed to obtain the warrant for the preliminary exam.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

Required courses in soil science must be completed with a grade of B or better (BC and C may not be offset by AB and A). For all other courses, the requirement is an average record of B or better in all work taken as a graduate student.

## PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result

in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

## ADVISOR / COMMITTEE

The doctoral committee is a committee of five or more faculty members chosen by the major professor and the student, subject to approval by the certification committee. A minimum of three must be drawn from the soil science faculty. Representation of the minor department (see *graduate minor requirements*, below) is at the option of the minor department, but the Department of Soil Science recommends that the minor professor be on the committee.

It is the responsibility of the student and the major professor to form a doctoral committee and schedule a meeting before the end of the second semester (not including summer sessions) of Ph.D. graduate work. The doctoral committee will prepare a draft "degree clock" for the student specifying all significant Ph.D. milestones (certification of Ph.D. coursework, approval of minor, presentation of prospectus, preliminary examination, and final examination) during their initial meeting.

A student who does not meet deadline requirements in the departmental Ph.D. requirements document will not be allowed to register in the subsequent semester until a written plan for meeting the requirements has been approved by the major advisor and the department certification committee.

A proposed program for a Ph.D. candidate satisfying the minimum course requirements must be approved by the certification committee before the end of the first semester of Ph.D. graduate work.

## ASSESSMENTS AND EXAMINATIONS

Candidates must complete the Ph.D. prospectus, which consists of the prospectus seminar and the written prospectus.

Candidates are required to take a preliminary examination.

Candidates for the Ph.D. degree are subject to a final oral examination on their dissertation and the general fields of the major and minor studies. Candidates must present an open seminar on their Ph.D. research findings, followed by oral defense of the dissertation in front of the doctoral committee.

Deposit of the doctoral dissertation is required.

## TIME CONSTRAINTS

Prospectus: The written prospectus and the prospectus seminar must be completed by the end of the third semester (not including summer sessions).

Preliminary exam: Students who obtain their M.S. degree in the department and who continue in the department for their doctorate must take the preliminary examination by the end of the fourth semester (not including summer sessions) of Ph.D. graduate work. Candidates who are approved to retake a failed examination must have passed by the end of the fifth semester.

Candidates for the Ph.D. degree who obtained an M.S. or M.A. degree elsewhere, must take the Preliminary Examination by the end of the fourth semester (not including summer sessions) of Ph.D. graduate work. Candidates who are approved to retake a failed examination must have passed by the end of the fifth semester.

Candidates who do not adhere to this deadline must show justification for the delay to the department certification committee.

Final oral exam and deposit of dissertation: A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

A foundation in the basic sciences is essential for graduate study in soil science. The program requires all students to have successfully completed one semester of calculus for the M.S. degree and two semesters of calculus (differential and integral) for the Ph.D., one course in statistics, nine credits of chemistry, and one year of physics. Admission with deficiencies is possible but is likely to delay completion of graduate studies.

The following materials must be submitted when applying to the program: an online application, official transcripts, Graduate Record Exam (GRE) scores, and three references. TOEFL scores are required for applicants whose native language is not English. Because graduate requirements presuppose extensive science coursework, continuing undergraduate students are encouraged to select undergraduate courses carefully if they are considering advanced degrees in soil science.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory and practice in soil science.
- Formulates ideas, concepts, designs, and/or techniques beyond the boundaries of soil science knowledge.
- Articulates testable hypotheses and conducts research that makes a substantive contribution to soil science.
- Communicates clearly in ways appropriate to the field, in oral and written forms, for scholarly and general public audiences.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct, adhering to accepted standards such as that of the Soil Science Society of America.

## PEOPLE

**Faculty:** Professors Hartemink (chair), Barak, Bland, Bleam, Hickey, Kung, Laboski, Long, Pedersen, Powell, Ventura; Associate Professors Balster, Ruark, Soldat; Assistant Professors Arriaga, Whitman

## SPANISH AND PORTUGUESE

**Administrative Unit:** Spanish and Portuguese

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., Ph.D.

**Degrees Offered:** M.A. in Portuguese; M.A. in Spanish; Ph.D. in Portuguese; Ph.D. in Spanish

**Minors and Certificates:** Doctoral Minor in Portuguese; Doctoral Minor in Portuguese

## PORTUGUESE

The degrees offered are the master of arts in Portuguese and the doctor of philosophy with a major in Portuguese. In addition, the department offers a doctoral minor in Spanish or Portuguese, consisting of 12 credits of graduate study.

An integrated curriculum in Portuguese languages, literatures, and linguistics provides training at the master's and Ph.D. levels and assures that graduates are prepared to contribute as professionals in the fields of teaching and research. An active program of research contributes to new knowledge in Spanish and Portuguese. A comprehensive group of courses is offered in rotation during the academic year so that candidates may take courses in all fields. Classes are conducted in Portuguese.

The department's graduate program in Portuguese is consistently among the finest in the country. Twenty to twenty-five teaching assistantships are offered each year to graduate candidates in Spanish and Portuguese. A full complement of courses in Portuguese, Brazilian, and Luso-African literatures, culture, and linguistics is offered on a regular basis.

Fellowships, scholarships, teaching assistantships, and project assistantships are available to qualified graduate degree candidates.

Students pursuing advanced degrees in this department are advised to include in their training work in other languages and literatures, art, social sciences, linguistics, film studies, and philosophy. A knowledge of other languages is strongly recommended for advanced work in Hispanic and Luso-Brazilian fields.

## SPANISH

The degrees offered are the master of arts and doctor of philosophy in Spanish. In addition, the department offers a doctoral minor in Spanish or Portuguese, consisting of 12 credits of graduate study.

An integrated curriculum in Spanish language, literatures, cultures, and linguistics provides training at the master's and Ph.D. levels and assures that graduates are prepared to contribute as professionals in the fields of teaching and research. An active program of research contributes to new knowledge in Spanish. A comprehensive group of courses is offered in rotation during the academic year so that candidates may take courses in all fields. Classes are conducted in Spanish.

The department's graduate program in Spanish is consistently among the finest in the country. Teaching assistantships are offered each year to graduate candidates in Spanish and Portuguese. A full complement of courses in Spanish and Spanish American, literatures, cultures, and linguistics is offered on a regular basis.

Fellowships, scholarships, teaching assistantships, and project assistantships are available to qualified graduate degree candidates.

Students pursuing advanced degrees in this department are advised to include in their training work in other languages and literatures, art, social sciences, linguistics, film studies, and philosophy. Knowledge of other languages is required for advanced work in Hispanic and Luso-Brazilian fields.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Portuguese, Doctoral Minor (p. 646)
- Portuguese, M.A. (p. 646)
- Portuguese, Ph.D. (p. 648)
- Spanish, Doctoral Minor (p. 650)
- Spanish, M.A. (p. 650)
- Spanish, Ph.D. (p. 652)

## PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong (Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## PORTUGUESE, DOCTORAL MINOR

Candidates for a doctoral minor in Portuguese should have the equivalent of at least three years of undergraduate preparation in the Hispanic or Luso-Brazilian field, preferably including a year of introductory survey of literatures.

## PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong

(Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## PORTUGUESE, M.A.

The degrees offered are the master of arts in Portuguese and the doctor of philosophy with a major in Portuguese. In addition, the department offers a doctoral minor in Spanish or Portuguese, consisting of 12 credits of graduate study.

An integrated curriculum in Portuguese languages, literatures, and linguistics provides training at the master's and Ph.D. levels and assures that graduates are prepared to contribute as professionals in the fields of teaching and research. An active program of research contributes to new knowledge in Spanish and Portuguese. A comprehensive group of courses is offered in rotation during the academic year so that candidates may take courses in all fields. Classes are conducted in Portuguese.

The department's graduate program in Portuguese is consistently among the finest in the country. Twenty to twenty-five teaching assistantships are offered each year to graduate candidates in Spanish and Portuguese. A full complement of courses in Portuguese, Brazilian, and Luso-African literatures, culture, and linguistics is offered on a regular basis.

Fellowships, scholarships, teaching assistantships, and project assistantships are available to qualified graduate degree candidates.

Students pursuing advanced degrees in this department are advised to include in their training work in other languages and literatures, art, social sciences, linguistics, film studies, and philosophy. A knowledge of other languages is strongly recommended for advanced work in Hispanic and Luso-Brazilian fields.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

31 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

25 credits

## MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

It is rare for student not to take 100% of their credits in graduate coursework. At least half of the required coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from undergraduate courses from a UW-Madison undergraduate degree are allowed to count toward the degree, but students who have taken graduate level courses are allowed to petition with their advisor's consent up to a maximum of 7 credits.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

One-credit proseminar (PORTUG 707 Portuguese M.A. Proseminar); 15 credits in the form of five 3-credit core courses taken among the following:

| Code                   | Title                                       | Credits |
|------------------------|---------------------------------------------|---------|
| PORTUG 411             | Survey of Portuguese Literature before 1825 | 3       |
| PORTUG 412             | Survey of Brazilian Literature before 1890  | 3       |
| PORTUG 467             | Survey of Portuguese Literature since 1825  | 3       |
| PORTUG 468             | Survey of Brazilian Literature since 1890   | 3       |
| PORTUG/<br>AFRICAN 451 | Lusophone African Literature                | 3       |
| PORTUG 361             | Portuguese Civilization                     | 3       |
| PORTUG 362             | Brazilian Civilization                      | 3       |
| PORTUG 330             | History of the Portuguese Language          | 3       |

Fifteen credits of electives are required. Six of these elective credits must be taken as seminars. PORTUG 899 Independent Reading may only satisfy elective credits. Students are strongly advised not to take a seminar in an area in which they have no previous preparation. Exceptions by consent of instructor.

All graduate students who are candidates for an M.A. degree in this department must take a minimum of two graduate-level courses in Spanish and/or Portuguese for credit each semester, exclusive of Independent Reading courses and audited courses.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

Satisfactory progress depends on: maintaining a GPA of at least 3.0, adhering to the rule whereby students must take two courses within the department (or have the rule waived by petition), and fulfilling all academic requirements. Students who are not in good standing will not be given sections to teach as TAs, and those whose GPA goes below 3.0 are put on academic probation. If a semester of 3.0 is not attained during the subsequent semester, the student may be dismissed from the program.

## ADVISOR / COMMITTEE

All students have a substantial meeting with their advisers every semester to review their progress and work out the best strategies for future coursework and degree progress.

## ASSESSMENTS AND EXAMINATION

An M.A./Ph.D. examination is required.

## TIME CONSTRAINTS

The M.A./Ph.D. qualifying exam is taken in the fourth or fifth semester of the M.A. program, very rarely beyond that.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements beyond English and Portuguese.

## ADMISSIONS

Admission to candidacy for the master's degree presupposes an undergraduate major in Spanish or Portuguese at UW-Madison or its equivalent. Candidates entering with a B.A. in Spanish or Portuguese must have an undergraduate GPA of at least 3.0 (on a 4.0 scale), and a GPA in Spanish or Portuguese courses of at least 3.25.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates, critiques, and elaborates the theories, methods, terminology and approaches to inquiry in Luso-Brazilian literary studies.
- Identifies and pursues promising avenues of inquiry, finds and makes use of appropriate bibliography, analyzes literary or other cultural works, and develops speaking and writing skills.

- Demonstrates knowledge and understanding of Luso-Brazilian literatures in a historical, sociocultural and global context.
- Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
- Communicates fluently and clearly in Portuguese in ways appropriate to the field of study.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong (Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## PORTUGUESE, PH.D.

The degrees offered are the master of arts in Portuguese and the doctor of philosophy with a major in Portuguese. In addition, the department offers a doctoral minor in Spanish or Portuguese, consisting of 12 credits of graduate study.

An integrated curriculum in Portuguese languages, literatures, and linguistics provides training at the master's and Ph.D. levels and assures that graduates are prepared to contribute as professionals in the fields of teaching and research. An active program of research contributes to new knowledge in Spanish and Portuguese. A comprehensive group of courses is offered in rotation during the academic year so that candidates may take courses in all fields. Classes are conducted in Portuguese.

The department's graduate program in Portuguese is consistently among the finest in the country. Twenty to twenty-five teaching assistantships are offered each year to graduate candidates in Spanish and Portuguese. A full complement of courses in Portuguese, Brazilian, and Luso-African literatures, culture, and linguistics is offered on a regular basis.

Fellowships, scholarships, teaching assistantships, and project assistantships are available to qualified graduate degree candidates.

Students pursuing advanced degrees in this department are advised to include in their training work in other languages and literatures, art, social sciences, linguistics, film studies, and philosophy. A knowledge of other languages is strongly recommended for advanced work in Hispanic and Luso-Brazilian fields.

## FUNDING

Prospective students should see the program website for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

54 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

In practice all doctoral coursework (with the exception of some language requirements or some doctoral minors) is designed exclusively for graduate students. At least half of the required coursework must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from undergraduate courses from a UW-Madison undergraduate degree are allowed to count toward the degree, but students who have taken graduate level courses are allowed to petition with their advisor's consent up to a maximum of 7 credits.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW-Madison

University Special student. coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

The minimum requirements are: nine credits in the major and six in each of the two supporting fields. Course credits earned in the M.A. program, with the exception of PORTUG 311 Fourth Year Composition and Conversation—PORTUG 312 Fourth Year Composition and Conversation, PORTUG 330 History of the Portuguese Language, PORTUG 361 Portuguese Civilization—PORTUG 362 Brazilian Civilization, PORTUG 707 Portuguese M.A. Proseminar (the proseminar), and any transfer credits used to satisfy M.A. requirements, do satisfy the Ph.D. course requirements. A maximum of 3 credits of independent study (PORTUG 899 Independent Reading) in each of the areas of concentration may be used, with prior departmental approval, when corresponding courses are not offered in a timely fashion.

A minimum of six advanced courses (at least two must be seminars in the major) are required. At least four advanced courses are required beyond the M.A. One of these advanced courses may be taken outside the Portuguese program or transferred from another institution, with the adviser's consent. The proseminar is for M.A. students only and does not count for doctoral credit.

Three credits of graduate coursework is the minimum requirement in literary theory.

A minimum of 18 credits must be taken as graduate seminars.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

The doctoral candidate must present a minor in work done outside of Portuguese. The minor should be in an area related to the major field of interest. Requirements for the minor are established by the respective department. For a minor in Spanish, students should have a minimum of 12 credits at the 500 level or above. 3 of these credits must be taken as a seminar and 3, in consultation with the minor advisor, may also be taken as independent study.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

Satisfactory progress depends on: maintaining a GPA of at least 3.0, adhering to the rule whereby students must take two courses within the department (or have the rule waived by petition), and fulfilling all academic requirements. Students who are not in good standing will not be given sections to teach as TAs, and those whose GPA goes below 3.0 are put on academic probation. If a semester of 3.0 is not attained during the subsequent semester, the student may be dismissed from the program.

## ADVISOR / COMMITTEE

All students have a substantial meeting with their advisers every semester to review their progress and work out the best strategies for future coursework and degree progress.

## ASSESSMENTS AND EXAMINATIONS

All Ph.D. candidates are required to take written and oral Ph.D. preliminary examinations (four written exams, one oral).

## TIME CONSTRAINTS

Students are required to finish their doctoral dissertation within five years of the time they pass their Ph.D. preliminary examinations, unless they receive an extension.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

Ph.D. students are required to demonstrate advanced proficiency—via specified sequences of language courses or via exam—in two languages other than Portuguese and English. These languages are generally selected from among the other Romance languages, Latin, Arabic and German, but may also include such languages as Turkish, Catalan, Galician, Maya, Nahuatl, Quichua, etc. Advanced proficiency is defined as six college semesters with a grade of B or better.

## ADMISSIONS

Admission to candidacy for the master's degree presupposes an undergraduate major in Spanish or Portuguese at UW—Madison or its equivalent. Candidates entering with a B.A. in Spanish or Portuguese must have an undergraduate GPA of at least 3.0 (on a 4.0 scale), and a GPA in Spanish or Portuguese courses of at least 3.25.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of Luso-Brazilian literary/cultural studies, with a view to interdisciplinarity.
- Formulates ideas, concepts, and theoretical approaches beyond the current boundaries of knowledge and practice within Luso-Brazilian literary/cultural studies.
- Develops archival and/or bibliographic research skills or other evidence-gathering techniques with the aim of furthering historical and cultural knowledge of the specific field of inquiry.
- Produces scholarship that makes a substantive contribution to Luso-Brazilian literary/cultural studies.
- Demonstrates breadth within learning experiences.
- Advances contributions of the field of study to society.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

### ADDITIONAL LEARNING GOALS

- Communicates complex ideas in both Portuguese and English in a clear and understandable manner, and demonstrates reading knowledge of two other languages pertinent to the field of inquiry.

- Develops speaking and writing skills necessary for articulating cogent and original arguments that enter into conversation with new and existing critical paradigms in literary and cultural studies.

## PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong (Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## SPANISH, DOCTORAL MINOR

### REQUIREMENTS

Candidates for a doctoral minor in Spanish should have the equivalent of at least three years of undergraduate preparation in the Hispanic or Luso-Brazilian field, preferably including a year of introductory survey of literatures.

### PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong (Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## SPANISH, M.A.

The degrees offered are the master of arts and doctor of philosophy in Spanish. In addition, the department offers a doctoral minor in Spanish or Portuguese, consisting of 12 credits of graduate study.

An integrated curriculum in Spanish language, literatures, cultures, and linguistics provides training at the master's and Ph.D. levels and assures that graduates are prepared to contribute as professionals in the fields of teaching and research. An active program of research contributes to new knowledge in Spanish. A comprehensive group of courses is offered in rotation during the academic year so that candidates may take courses in all fields. Classes are conducted in Spanish.

The department's graduate program in Spanish is consistently among the finest in the country. Teaching assistantships are offered each year to graduate candidates in Spanish and Portuguese. A full complement of courses in Spanish and Spanish American, literatures, cultures, and linguistics is offered on a regular basis.

Fellowships, scholarships, teaching assistantships, and project assistantships are available to qualified graduate degree candidates.

Students pursuing advanced degrees in this department are advised to include in their training work in other languages and literatures, art, social sciences, linguistics, film studies, and philosophy. Knowledge of other languages is required for advanced work in Hispanic and Luso-Brazilian fields.

### REQUIREMENTS

#### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

#### MASTER'S DEGREES

M.A., with available tracks in literature, and linguistics

#### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

#### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

#### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Students are required to take a minimum of 18 credits of graduate coursework. In practice it is rare for students not to take 100% of their credits in graduate coursework. Courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

## PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

No credits from undergraduate courses from a UW-Madison undergraduate degree are allowed to count toward the degree, but students who have taken graduate level courses are allowed to petition with their advisor's consent up to a maximum of 7 credits.

## PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW-Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

15 credits

## PROGRAM-SPECIFIC COURSES REQUIRED

M.A. with concentration in literature: Candidates take one course in each of five of the seven areas; one of the five must be a linguistics course (either descriptive or applied). Students with a concentration in literature will be examined on the M.A.–Ph.D. qualifying exam in any area of literature in which they do not take a course. A further 15 credits are electives which may be taken in any of the areas—i.e., program-specific courses, with the advisor's consent. Advisor's consent is also required for taking any course that is not program-specific.

M.A. with concentration in linguistics: one course in descriptive linguistics, one course in applied linguistics, and two further courses in linguistics which may be descriptive or applied, or a combination. One course each must be taken from two of the five literary areas. With the advisor's consent, the remaining twelve credits may be taken in any area, or in literary theory; up to six of these fifteen credits may also be taken in the study of another language. Students intending to continue on to the Ph.D. program are encouraged to take courses that will fulfill Ph.D. requirements.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

Satisfactory progress depends on: maintaining a GPA of at least 3.0, adhering to the rule whereby students must take two courses within the department (or have the rule waived by petition), and fulfilling all academic requirements. Students who are not in good standing will not be given sections to teach as TAs, and those whose GPA goes below 3.0 are put on academic probation. If a semester of 3.0 is not attained during the subsequent semester, the student may be dismissed from the program.

## ADVISOR / COMMITTEE

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Yes. Doctoral candidates in both Hispanic literature must take 12 graduate credits in their major field (including 6 credits of seminars), 6 credits in each of two supporting fields, and 3 credits in each of the two remaining fields. They must also take a literary theory courses, which usually means one of the two offered in the program.

For the Ph.D. in Spanish linguistics, The minimum requirements are: 12 credits in the major and 6 in each supporting field. SPANISH/FRENCH/ITALIAN/PORTUG 817 Romance Philology or SPANISH/FRENCH/ITALIAN/PORTUG 429 Introduction to the Romance Languages may satisfy course requirements in any of the three areas of concentration. A maximum of 3 credits of SPANISH 899 Independent Reading in each of the areas of concentration may be used, with prior departmental approval, when corresponding courses are not offered in a timely fashion.

In addition, majors in Peninsular Spanish must take 6 credits in medieval literature and 3 in Golden Age literature; majors in American Spanish must take 6 credits in Colonial Spanish American literature and 3 in medieval literature; majors in applied Spanish linguistics must take 3 credits in Modern Peninsular literature, 3 in Modern Spanish American literature, and 3 in Peninsular or Spanish American literature. Course credits earned in the M.A. program, with the exception of SPANISH 545 College Teaching of Spanish, SPANISH 323 Advanced Language Practice with Emphasis on Expository Writing, and any transfer credits used to satisfy M.A. requirements, do satisfy the Ph.D. course requirements.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Doctoral students are required to complete a doctoral minor.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

No other grade requirements.

## PROBATION POLICY

Satisfactory progress depends on: maintaining a GPA of at least 3.0, adhering to the rule whereby students must take two courses within the department (or have the rule waived by petition), and fulfilling all academic requirements. ## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- [Literature] Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of Hispanic literary/cultural studies, with a view to interdisciplinarity.
- [Linguistics] Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of Spanish linguistics, with a view to interdisciplinarity.
- [Literature] Formulates ideas, concepts, and theoretical approaches beyond the current boundaries of knowledge and practice within Hispanic literary/cultural studies.
- [Linguistics] Formulates ideas, concepts, and theoretical approaches beyond the current boundaries of knowledge and practice within Spanish linguistics.
- [Literature] Develops archival and/or bibliographic research skills or other evidence-gathering techniques with the aim of furthering historical and cultural knowledge of the specific field of inquiry.
- [Linguistics] Develops archival and/or bibliographic research skills or other evidence-gathering techniques with the aim of furthering knowledge of the specific field of inquiry.
- [Literature] Produces scholarship that makes a substantive contribution to Hispanic literary/cultural studies.
- [Linguistics] Produces scholarship that makes a substantive contribution to Spanish linguistics.
- [Literature] Demonstrates breadth within learning experiences.
- [Linguistics] Demonstrates breadth within learning experiences.
- [Literature] Advances contributions of the field of study to society.
- [Linguistics] Advances contributions of the field of study to society.

### PROFESSIONAL CONDUCT

- [Literature and Linguistics] Fosters ethical and professional conduct.

### ADDITIONAL LEARNING GOALS

- [Literature] Communicates complex ideas in both Spanish and English in a clear and understandable manner, and demonstrates reading knowledge of two other languages pertinent to the field of inquiry.
- [Linguistics] Communicates complex ideas in both Spanish and English in a clear and understandable manner, and demonstrates reading knowledge of two other languages pertinent to the field of inquiry.
- [Literature] Develops speaking and writing skills necessary for articulating cogent and original arguments that enter into conversation with new and existing critical paradigms in literary and cultural studies.

- [Linguistics] Develops speaking and writing skills necessary for articulating cogent and original arguments that enter into conversation with new and existing critical paradigms in linguistics.

## PEOPLE

**Spanish Faculty:** Professors Beilin (modern Spanish literature), Bilbija (modern Spanish American literature), Close (modern Spanish American/trans-Atlantic literature), Corfis (medieval Spanish literature), De Ferrari (modern Spanish American literature), Egea (modern Spanish literature), Frantzen (second language acquisition and linguistics), Hildner (Golden Age literature), Hutchinson (Golden Age literature), Medina (modern Spanish American literature), Podestá (colonial Spanish American literature); Associate Professors Alcalá-Galán (Golden Age literature), Ancos-García (medieval Spanish literature), Goldgel-Carballo (colonial Spanish American literature), Hernández (modern Spanish American literature), Pellegrini (modern Spanish American literature), Rao (Spanish linguistics), Stafford (second language acquisition and linguistics), Tejedo-Herrero (Spanish linguistics); Assistant Professors Armstrong (Spanish linguistics), Cerezo Paredes (modern Spanish literature), Comparone (modern Spanish literature)

**Portuguese Faculty:** Professors Albuquerque (Brazilian literature and culture), Madureira (Portuguese, Brazilian, and Luso-African literature and culture), Sapega (Portuguese and Luso-African literature and culture); and Sanchez (Portuguese and Brazilian literature and culture)

## STATISTICS

**Administrative Unit:** Statistics

**College/School:** College of Letters & Science

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Named Options:** Data Science (M.S.); Biostatistics (M.S./Ph.D.)

The Department of Statistics offers a rich variety of courses and seminars in almost all branches of statistical theory and applications. The department offers the master of science (M.S.) and the doctor of philosophy in statistics (Ph.D), and M.S. and Ph.D. degrees in statistics with a named option in biostatistics. An M.S. in statistics with a named option in data science is also available to students meeting the criteria (see the data science (<http://www.stat.wisc.edu/ms-degree-data-science-option-ms-ds>) page for more details). In addition, the department is closely involved with the biometry program, and with the School of Medicine and Public Health's Department of Biostatistics and Medical Informatics, both listed separately in this catalog.

The statistics department provides extensive computing facilities, both hardware and software, to support instruction and research. Several computers and advanced graphic workstations are available for use in advanced courses enabling students to pursue the latest research directions in statistical computing and graphics. Common statistical packages and libraries are available on a variety of machines.

The department may be consulted for specific career information. A number of assistantships are available each year; see the department website (<http://www.stat.wisc.edu>) for application materials and deadlines. The master's degree programs are described below.

Additional information about the master's and Ph.D. programs, including time limits, can also be obtained from the department.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Statistics, Doctoral Minor (p. 654)
- Statistics, M.S. (p. 656)
- Statistics, Ph.D. (p. 658)

## PEOPLE

**Faculty:** Professors Y. Wang (chair), Chappell, Clayton, Keles, Larget, Loh, Newton, Nordheim, Qian, Shao, Tsui, Wahba, Yandell, Yuan, C. Zhang, Z. Zhang, J. Zhu; Associate Professors Ane, S. Wang; Assistant Professors Hanlon, Raskutti, Rohe, A. Zhang

## STATISTICS, DOCTORAL MINOR

### REQUIREMENTS

### GENERAL REQUIREMENTS FOR AN OPTION-A MINOR IN STATISTICS FOR GRADUATES:

Please carefully read the requirements below. Requests for further information should be addressed to the faculty member acting as minor program advisor in the Department of Statistics. **Note:** Candidates for an Option A Minor in statistics must be aware of the Graduate School "Minors" policy (<https://grad.wisc.edu/acadpolicy/#minors>).

### STATISTICS MINOR OPTION FOR GRADUATES

For admission for an Option A Minor in statistics, the candidate must have had at least one year of calculus, and an introductory knowledge of statistics that is satisfactory to the department. Any of the following (or an equivalent course) is sufficient for this purpose:

| Code                       | Title                                                 | Credits |
|----------------------------|-------------------------------------------------------|---------|
| STAT 224                   | Introductory Statistics for Engineers                 | 3       |
| STAT 301                   | Introduction to Statistical Methods                   | 3       |
| STAT 302                   | Accelerated Introduction to Statistical Methods       | 3       |
| STAT 324                   | Introductory Applied Statistics for Engineers         | 3       |
| STAT 371                   | Introductory Applied Statistics for the Life Sciences | 3       |
| STAT/F&W ECOL/<br>HORT 571 | Statistical Methods for Bioscience I                  | 4       |

Students must take at least four courses acceptable for the minor totaling at least 12 credits. Courses acceptable for the minor are:

| Code                             | Title                                                                                                                    | Credits |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------|---------|
| STAT/MATH 309<br>& STAT/MATH 310 | Introduction to Probability and Mathematical Statistics I and Introduction to Probability and Mathematical Statistics II | 6       |

|                         |                                                                                                                                      |     |                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                      |                |

The objective of the M.S. degree in statistics with a named option in biostatistics is to train the candidate to contribute substantially to the statistical analysis of biomedical problems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                           |     |
| STAT 679                      | Special Topics in Statistics                                                                                                         | 1-3 | The Department of Statistics offers a rich variety of courses and seminars in almost all branches of statistical theory and applications. The department offers the master of science (M.S.) and the doctor of philosophy in statistics (Ph.D.), and M.S. and Ph.D. degrees in statistics with a named option in biostatistics. An M.S. in statistics with a named option in data science is also available to students meeting the criteria (see the data science ( <a href="http://www.stat.wisc.edu/ms-degree-data-science-option-ms-ds">http://www.stat.wisc.edu/ms-degree-data-science-option-ms-ds</a> ) page for more details). In addition, the department is closely involved with the biometry program, and with the School of Medicine and Public Health's Department of Biostatistics and Medical Informatics, both listed separately in this catalog. |                                           |     |
| STAT 701                      | Applied Time Series Analysis, Forecasting and Control I                                                                              | 3   | The statistics department provides extensive computing facilities, both hardware and software, to support instruction and research. Several computers and advanced graphic workstations are available for use in advanced courses enabling students to pursue the latest research directions in statistical computing and graphics. Common statistical packages and libraries are available on a variety of machines.                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                           |     |
| STAT/MATH 709 & STAT/MATH 710 | Mathematical Statistics and Mathematical Statistics (Ph.D. level)                                                                    | 8   | The department may be consulted for specific career information. A number of assistantships are available each year; see the department website ( <a href="http://www.stat.wisc.edu">http://www.stat.wisc.edu</a> ) for application materials and deadlines. The master's degree programs are described below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                           |     |

Additional information about the master's and Ph.D. programs, including time limits, can also be obtained from the department.

## FUNDING

Prospective students should see the program website (<http://www.stat.wisc.edu/financial-aid>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available named options in Biostatistics, and Data Science

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of the degree coursework (15 of 30 credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions toward the graduate degree credit and graduate coursework (50%) requirements. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, up to 6 statistics credits from a UW-Madison undergraduate degree at the 600 level or above are allowed to count toward minimum graduate degree credits. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, up to 15 statistics credits completed at UW-Madison while a University Special student at the 300 level or above are allowed to count toward minimum graduate degree and graduate residence credit requirements. Of these credits, those at the 700 level or above may also count toward the minimum graduate coursework (50%)

requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Yes—see program website ([http://www.stat.wisc.edu/phd-masters/MS\\_Degree\\_Regulations](http://www.stat.wisc.edu/phd-masters/MS_Degree_Regulations)) for a list of required courses.

### OVERALL GRADUATE GPA REQUIREMENT

Minimum 3.00 GPA required.

### OTHER GRADE REQUIREMENTS

A grade of B or better must be received in any course used to fulfill the required and elective course requirements.

### PROBATION POLICY

Three consecutive reviews in which a student fails to meet the minimum criteria for satisfactory progress will result in the student being dropped from the program. Contact the program for more information.

### ADVISOR / COMMITTEE

Students are required to meet with their advisor near the beginning of each semester to discuss course selection and progress.

### ASSESSMENT AND EXAMINATIONS

Students must pass a competency test containing both a written and an oral component, demonstrating that they have the potential to be a practicing statistician.

### TIME CONSTRAINTS

The competency test must be passed within six semesters after entering the department.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Students holding a bachelor's degree with a natural science, social science, or engineering major and strong mathematical background are encouraged to apply for admission to the graduate program in statistics. Students are advised to undertake graduate work in statistics only if their undergraduate grades in mathematics were uniformly high. Students cannot get credit for more than one of STAT 301 Introduction to Statistical Methods, STAT 324 Introductory Applied Statistics for Engineers, or STAT 371 Introductory Applied Statistics for the Life Sciences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Demonstrates understanding of statistical theories, methodologies, and applications as tools in scientific inquiries.
- Selects and utilizes the most appropriate statistical methodologies and practices.
- Synthesizes information pertaining to questions in empirical studies.

- Communicates data concepts and analysis results clearly.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Y. Wang (chair), Chappell, Clayton, Keles, Larget, Loh, Newton, Nordheim, Qian, Shao, Tsui, Wahba, Yandell, Yuan, C. Zhang, Z. Zhang, J. Zhu; Associate Professors Ane, S. Wang; Assistant Professors Hanlon, Raskutti, Rohe, A. Zhang

## STATISTICS, PH.D.

The Department of Statistics offers a rich variety of courses and seminars in almost all branches of statistical theory and applications. The department offers the master of science (M.S.) and the doctor of philosophy in statistics (Ph.D), and M.S. and Ph.D. degrees in statistics with a named option in biostatistics. An M.S. in statistics with a named option in data science is also available to students meeting the criteria (see the data science (<http://www.stat.wisc.edu/ms-degree-data-science-option-ms-ds>) page for more details). In addition, the department is closely involved with the biometry program, and with the School of Medicine and Public Health's Department of Biostatistics and Medical Informatics, both listed separately in this catalog.

The statistics department provides extensive computing facilities, both hardware and software, to support instruction and research. Several computers and advanced graphic workstations are available for use in advanced courses enabling students to pursue the latest research directions in statistical computing and graphics. Common statistical packages and libraries are available on a variety of machines.

The department may be consulted for specific career information. A number of assistantships are available each year; see the department website (<http://www.stat.wisc.edu>) for application materials and deadlines. The master's degree programs are described below.

Additional information about the master's and Ph.D. programs, including time limits, can also be obtained from the department.

## FUNDING

Prospective students should see the program website (<http://www.stat.wisc.edu/financial-aid>) for funding information.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., with available named option in Biostatistics

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least half of degree coursework (26 credits out of 51 total credits) must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions toward the graduate degree credit and graduate coursework (50%) requirements. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, up to 6 statistics credits from a UW-Madison undergraduate degree at the 600 level or above are allowed to count toward minimum graduate degree credits. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, up to 15 statistics credits completed at UW-Madison while a University Special student at the 300 level or above are allowed to count toward minimum graduate degree and graduate residence credit requirements. Of these credits, those at the 700 level or above may also count toward the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Yes—see program website ([http://www.stat.wisc.edu/phd-masters/PhD\\_Degree\\_Regulations](http://www.stat.wisc.edu/phd-masters/PhD_Degree_Regulations)) for a list of required courses.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

Students are required to complete either an Option A or Option B minor (at least 9 credits), or they may instead opt to complete a Breadth Option (called "Option C" in the statistics department) option consisting of at least two of the following three: participatory seminar experience, collaborative research experience, and/or a breadth course. See the program website ([http://www.stat.wisc.edu/phd-masters/PhD\\_Degree\\_Regulations](http://www.stat.wisc.edu/phd-masters/PhD_Degree_Regulations)) for more details.

## OVERALL GRADUATE GPA REQUIREMENT

Minimum 3.00 GPA required.

## OTHER GRADE REQUIREMENTS

A grade of B or better must be received in any course used to fulfill the required and elective course requirements.

## PROBATION POLICY

Three consecutive reviews in which a student fails to meet the minimum criteria for satisfactory progress will result in the student being dropped from the program. Contact the program for more information.

## ADVISOR

Students are required to meet with their advisor near the beginning of each semester to discuss course selection and progress.

## ASSESSMENT AND EXAMINATIONS

Students must pass the Ph.D. qualifying examination, an oral preliminary examination on a topic selected with the approval of the student's advisor, and a thesis defense.

## TIME CONSTRAINTS

Students must pass the Ph.D. qualifying examination within six semesters from the first fall semester of registration as a graduate student in the department. Students who complete a master's in the department and then are admitted to the Ph.D. program must pass the Ph.D. qualifying examination within four semesters after entering the Ph.D. program.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Students holding a bachelor's degree with a natural science, social science, or engineering major and strong mathematical background are encouraged to apply for admission to the graduate program in statistics. Students are advised to undertake graduate work in statistics only if their undergraduate grades in mathematics were uniformly high. Students cannot get credit for more than one of STAT 301 Introduction to Statistical Methods, STAT 324 Introductory Applied Statistics for Engineers, or STAT 371 Introductory Applied Statistics for the Life Sciences.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulates research problems, potentials, and limits with respect to the theories, methodologies, and/or applications of statistics.
- Formulates ideas, concepts, designs, and methods beyond the current boundaries of knowledge within statistics.
- Creates research that makes a substantive contribution to theoretical and/or applied statistics.
- Demonstrates breadth in the theories, methodologies, and applications of statistics.
- Advances contributions of statistics to society.
- Communicates complex ideas in a clear and understandable manner.

### PROFESSIONAL CONDUCT

- Fosters ethical and professional conduct.

## PEOPLE

**Faculty:** Professors Y. Wang (chair), Chappell, Clayton, Keles, Larget, Loh, Newton, Nordheim, Qian, Shao, Tsui, Wahba, Yandell, Yuan, C. Zhang, Z. Zhang, J. Zhu; Associate Professors Ane, S. Wang; Assistant Professors Hanlon, Raskutti, Rohe, A. Zhang

## THEATRE AND DRAMA

**Administrative Unit:** Theatre and Drama

**College/School:** School of Education

**Admitting Plans:** MFA

**Degrees Offered:** MFA

**Minors and Certificates:** Doctoral Minor

The department offers the MFA advanced degree. The master of fine arts degree in theatre and drama offers specializations in acting, costume design, lighting design, scene design, and theatre technology.

The faculty in theatre and drama are leaders in their field. Together, they have many credits in all facets of the profession, working within their field of theatre research and practice both nationally and abroad. They are recognized for their critically acclaimed publications and production work and have won major awards and fellowships for scholarship, creative work, and teaching.

Graduate students at UW–Madison come from around the country and the world. Many have been working theatre professionals returning for advanced degrees. Some graduates go on to teach in the academy; others work in the profession as actors, directors, designers, and technologists.

Coursework and specializations are organized around two areas: acting and design and technology. Students in all specializations are encouraged to complement their major area of study by taking courses from other areas in the department.

University Theatre, the producing arm of the Department of Theatre and Drama, provides students with opportunities to complement work begun in the studios and classrooms. At UW–Madison, the stage is our laboratory. Coursework and discussions regularly connect theatre

practice and study with larger issues of cultural and intercultural representation.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Theatre and Drama, Doctoral Minor (p. 660)
- Theatre and Drama, MFA (p. 660)

## PEOPLE

**Faculty:** Professors Archbold (chair), Boyette, Furumoto, Saldivar, Sims; Associate Professors Brassard, Peterson; Assistant Professors Fan, Lisowski

## THEATRE AND DRAMA, DOCTORAL MINOR

Admission is suspended for this doctoral minor. The minor is discontinued effective spring 2018.

## THEATRE AND DRAMA, MFA

The MFA offers specialized preparation for careers in professional theatre. The foundation of MFA acting area courses offer a strong base in voice, speech, movement, and acting styles. The core of this specialization focuses on classical text-based acting and Stanislavski/Michael Chekhov techniques balanced with emerging theories and methodologies of actor training. Curricular interests in Asian stage discipline, multicultural theatre, theatre for youth provide additional opportunities for students to enhance their performance study. In addition to required core classes, electives provide students the ability to explore individual areas of interest in theatre and performance. Directing courses emphasizes an advanced understanding of the elements of play analysis, composition, and conceptualization. By combining studio work, production, observation, and classroom studies, the acting specialization encourages the development of an individual artistic voice in both acting and directing.

The MFA specialization in scene design, costume design, lighting design, or theatre technology strives for a balance of professional training and the practical application of skills through numerous collaborative experiences, both onstage and in the classroom. Students in all four disciplines are encouraged to be creative problem solvers through both an appreciation of the history of their craft and a curiosity about the contemporary world of theatre, design and the application of new technologies. Numerous opportunities for realized work, studio collaborations and individualized mentoring affords the MFA student the opportunity to grow and develop as an articulate and collaborative theatre artist.

## FUNDING

Funding opportunities for graduate work vary, but tend to be highly competitive. Please contact the department for more information on student financial support.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER OF FINE ARTS DEGREE

MFA

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

75 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

33 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may count no more than 18 credits of graduate coursework from other institutions.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students may count up to 7 credits numbered 300 or above.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students may count up to 15 credits numbered 700 or above.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Required courses vary by subdiscipline.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

## OTHER GRADE REQUIREMENTS

No other specific grade requirements.

## PROBATION POLICY

Each of the MFA Specializations in Acting, Costume Design, Lighting Design, Scene Design, and Theatre Technology conducts separate reviews of students each semester by portfolio and/or oral examination. Students may be placed on probation if program faculty determines that they are not meeting the expectations of their specific degree requirements.

## ADVISOR / COMMITTEE

A thesis or final creative project must be prepared under the direction and guidance of a major professor.

Committee consists of four members—advisor and three other committee members.

## ASSESSMENTS AND EXAMINATIONS

Design and Technology students must pass two candidacy portfolio examinations in the first year of residency. They must pass two comprehensive-progress, portfolio examinations in both the second and third years of residency.

Acting candidates are required to pass an oral review of their work and study at the end of each semester.

A research or creative thesis is required for Design and Technology candidates.

Acting candidates must complete a final creative/research project.

## TIME CONSTRAINTS

The MFA Specialization in Acting follows a three-year cycle with a sequential curriculum. Only in exceptional circumstances the A/D faculty may approve a variance in this time frame.

The MFA Specializations in Costume Design, Lighting Design, Scene Design, and Theatre Technology generally follow a three-year timeline and variations from this must be approved by the degree program head.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

The department requires a clear statement of purpose outlining plans for graduate study. The MFA program requires evidence of creative accomplishment; applicants must request detailed application instructions from the department.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Exhibit exceptional skill and professional competence in theatre practice exemplified by a knowledge and achievement signified by a large body of work.
- Applies advanced analytical levels of inquiry and investigation in the creation, performance, production, or communication of theatre practice.

- Possesses a broad knowledge of theatre literature as well as visual and cultural history and applies that knowledge to the production process.
- Demonstrates the requisite artistic and technical skills to meet professional standards.
- Formulates ideas, concepts, designs, performances and/or techniques that advance the field.
- Articulates complex ideas in a clear and understandable manner.

## PROFESSIONAL CONDUCT

- Recognizes and applies principles of ethical and professional conduct.
- Collaborates effectively, creatively, and generously through respect for the contributions of others.

## PEOPLE

**Faculty:** Professors Archbold (chair), Boyette, Furumoto, Saldivar, Sims; Associate Professors Brassard, Peterson; Assistant Professors Fan, Lisowski

## VETERINARY MEDICINE—SCHOOL-WIDE

**Administrative Unit:** School of Veterinary Medicine

**College/School:** School of Veterinary Medicine

**Admitting Plans:** M.S., Ph.D.

**Degrees Offered:** M.S., Ph.D.

**Minors and Certificates:** Doctoral Minor

The comparative biomedical sciences (CBMS) graduate program emphasizes an integrated approach to contemporary biology that combines molecular and cellular techniques with the analysis of complex whole animal systems. Faculty provide exceptional graduate and undergraduate interdisciplinary research training opportunities in core areas of animal and human health including immunology, molecular and cellular biology, physiology, neuroscience, genomics, oncology, virology, medical technology, infectious diseases and toxicology and pharmacology. They also contribute extensive public services, both nationally and internationally, within related faculty disciplines.

The graduate program serves as a focal point for graduate research training in the School of Veterinary Medicine (SVM) and is administered by the Department of Pathobiological Sciences. Trainers in CBMS have their tenure homes in all four departments of the School of Veterinary Medicine as well as in the College of Agricultural and Life Sciences (CALS), the School of Medicine and Public Health, the College of Engineering, and the College of Letters & Science. Faculty in the CBMS program also serve in or interface with other campus training programs including bacteriology, biocore, cellular and molecular biology, endocrinology and reproductive physiology, medical microbiology and immunology, molecular and environmental toxicology, and the Primate Center.

Currently, there are approximately 85 faculty trainers in the comparative biomedical sciences program. Affiliate faculty outside the School of Veterinary Medicine have their tenure homes in the Departments of Anatomy, Animal Sciences, Biochemistry, Dermatology, Entomology, Human Oncology, Medical Microbiology and Immunology, Medicine,

Neurosurgery, Ophthalmology and Visual Sciences, Pathology and Laboratory Medicine, Population Health Sciences, Radiology, and Surgery. The program is currently comprised of approximately 50 graduate students, most of whom are pursuing the Ph.D. degree. The program is recognized as a premier research and graduate training program for students with or without a degree in veterinary medicine.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Comparative Biomedical Sciences, M.S. (p. 662)
- Comparative Biomedical Sciences, Ph.D. (p. 665)

## PEOPLE

**Faculty:** See Comparative Biomedical Sciences (<http://www.vetmed.wisc.edu/ms-phd/current-students/faculty-trainers>) faculty list.

## COMPARATIVE BIOMEDICAL SCIENCES, M.S.

The comparative biomedical sciences (CBMS) graduate program emphasizes an integrated approach to contemporary biology that combines molecular and cellular techniques with the analysis of complex whole animal systems. Faculty provide exceptional graduate and undergraduate interdisciplinary research training opportunities in core areas of animal and human health including immunology, molecular and cellular biology, physiology, neuroscience, genomics, oncology, virology, medical technology, infectious diseases and toxicology and pharmacology. They also contribute extensive public services, both nationally and internationally, within related faculty disciplines.

The graduate program serves as a focal point for graduate research training in the School of Veterinary Medicine (SVM) and is administered by the Department of Pathobiological Sciences. Trainers in CBMS have their tenure homes in all four departments of the School of Veterinary Medicine as well as in the College of Agricultural and Life Sciences (CALS), the School of Medicine and Public Health, the College of Engineering, and the College of Letters & Science. Faculty in the CBMS program also serve in or interface with other campus training programs including bacteriology, biocore, cellular and molecular biology, endocrinology and reproductive physiology, medical microbiology and immunology, molecular and environmental toxicology, and the Primate Center.

Currently, there are approximately 85 faculty trainers in the comparative biomedical sciences program. Affiliate faculty outside the School of Veterinary Medicine have their tenure homes in the Departments of Anatomy, Animal Sciences, Biochemistry, Dermatology, Entomology, Human Oncology, Medical Microbiology and Immunology, Medicine, Neurosurgery, Ophthalmology and Visual Sciences, Pathology and Laboratory Medicine, Population Health Sciences, Radiology, and Surgery. The program is currently comprised of approximately 50 graduate students, most of whom are pursuing the Ph.D. degree. The program is recognized as a premier research and graduate training program for students with or without a degree in veterinary medicine.

## FUNDING

Most graduate students receive financial support through fellowships, research assistantships through their major professor, and/or National Research Service Awards. Faculty in the program are PIs for four Training Grants (Parasitology and Vector Biology Training Program, Comparative Biomedical Sciences Research Training for Veterinarians, and Research Training for Veterinary Medical Students) for which students with the appropriate background and credentials may compete.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., M.S./DVM dual degree

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may transfer no more than 6 credits of advanced graduate coursework from other institutions. These courses may not be used toward the Graduate School's Minimum Graduate Residence Credit. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students may count up to 6 credits of advanced undergraduate coursework from UW-Madison in lieu of or in combination with credits transferred from another institution. These courses must meet the Graduate School's criteria as graduate coursework and may not be used toward the 50% graduate coursework requirement unless taken at the 700 level or above.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students may count up to 6 credits of coursework numbered 400 or above taken as a UW-Madison Special student in lieu

of or in combination with credits transferred from another institution or as a UW–Madison undergraduate. Coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

8 to 15 credits maximum for fall and spring; 2 credits required in summer if student is supported as RA, TA, or PA. International students supported by government scholarships need not register for summer.

## PROGRAM-SPECIFIC COURSES REQUIRED

Two semesters of Pathobiological Sciences Student Seminar (PATH-BIO 930).

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all major coursework.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full or part-time enrollment the student may be dismissed from the program or allowed to continue based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students must have an advisor prior to final admission. A thesis committee consisting of three members, the advisor plus one program trainer and one outside member, must be chosen by the end of the first semester. The third member may be a scientist, industry expert or faculty from another institution.

## ASSESSMENTS AND EXAMINATIONS

After the committee is chosen, the student must submit certification paperwork that details the intended coursework plan, the committee members' names and signatures, a short explanation of why they were chosen and an appended research plan. Certification plans will be reviewed and approved by the program academic committee.

Students are expected to meet with their committee at least once per year until degree completion.

Candidates are required to author a thesis based on original work, or, at the option of the major professor and with the approval of the thesis committee, the equivalent in the form of a substantial paper suitable for publication. The thesis or paper must be approved by the student's committee at least two weeks prior to the final examination. A final public presentation, followed by an oral exam in front of their committee and official deposit of the thesis with the Graduate School is not required.

## TIME CONSTRAINTS

Certification should be completed by the end of the first semester of enrollment.

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements,

but that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## COURSES

### REQUIRED COURSES

PATH-BIO 930 Advanced Seminar

Master's students must register for two semesters of PATH-BIO 930 Advanced Seminar and present once during their second semester.

They must take the course pass/fail if not presenting and must attend a minimum of 75 percent of the seminars led by students.

Ph.D. students must register for four semesters of PATH-BIO 930

Advanced Seminar and present twice after their first two semesters.

PhD students will take the course pass/fail unless they are presenting.

Both presentations must be completed prior to passing to dissertator status. Students must attend a minimum of 75 percent of the student-led seminars.

### APPROVED AND RECOMMENDED COURSES

The following is a list of core courses taken by many students and recommended courses that are appropriate to specific research areas. These courses are suggestions only; the student and their committee ultimately decide the best coursework plan for each student's specific program, with final approval from the program's academic committee. Students are responsible for determining that the coursework chosen meets the Graduate School's criteria for graduate work.

| PATH-BIO 517                                                   | Veterinary Bacteriology and<br>Mycology                                              | 4 | Admission is competitive. Applicants must hold a B.S., DVM., M.S., M.A.<br>or M.D. from an approved institution and have a strong background<br>in biology and chemistry. Applications are judged on the basis of<br>previous academic record, graduate record exam (GRE) scores, letters of<br>recommendation, and the personal statement. Before admission, most<br>students must be accepted by an eligible program faculty member who<br>agrees to serve as the major professor. A limited number of students may<br>be offered rotations.                                                                                                                                                                                                                                                   |                                                            |     |

## PEOPLE

**Faculty:** See Comparative Biomedical Sciences (<http://www.vetmed.wisc.edu/ms-phd/current-students/faculty-trainers>) faculty list.

## COMPARATIVE BIOMEDICAL SCIENCES, PH.D.

The comparative biomedical sciences (CBMS) graduate program emphasizes an integrated approach to contemporary biology that combines molecular and cellular techniques with the analysis of complex whole animal systems. Faculty provide exceptional graduate and undergraduate interdisciplinary research training opportunities in core areas of animal and human health including immunology, molecular and cellular biology, physiology, neuroscience, genomics, oncology, virology, medical technology, infectious diseases and toxicology and pharmacology. They also contribute extensive public services, both nationally and internationally, within related faculty disciplines.

The graduate program serves as a focal point for graduate research training in the School of Veterinary Medicine (SVM) and is administered by the Department of Pathobiological Sciences. Trainers in CBMS have their tenure homes in all four departments of the School of Veterinary Medicine as well as in the College of Agricultural and Life Sciences (CALS), the School of Medicine and Public Health, the College of Engineering, and the College of Letters & Science. Faculty in the CBMS program also serve in or interface with other campus training programs including bacteriology, biocore, cellular and molecular biology, endocrinology and reproductive physiology, medical microbiology and immunology, molecular and environmental toxicology, and the Primate Center.

Currently, there are approximately 85 faculty trainers in the comparative biomedical sciences program. Affiliate faculty outside the School of Veterinary Medicine have their tenure homes in the Departments of Anatomy, Animal Sciences, Biochemistry, Dermatology, Entomology, Human Oncology, Medical Microbiology and Immunology, Medicine, Neurosurgery, Ophthalmology and Visual Sciences, Pathology and Laboratory Medicine, Population Health Sciences, Radiology, and Surgery. The program is currently comprised of approximately 50 graduate students, most of whom are pursuing the Ph.D. degree. The program is recognized as a premier research and graduate training program for students with or without a degree in veterinary medicine.

## FUNDING

Most graduate students receive financial support through fellowships, research assistantships through their major professor, and/or National Research Service Awards. Faculty in the program are PIs for four Training Grants (Parasitology and Vector Biology Training Program, Comparative

Biomedical Sciences Research Training for Veterinarians, and Research Training for Veterinary Medical Students) for which students with the appropriate background and credentials may compete.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D., Ph.D./DVM dual degree

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

At least 50% of credits applied toward the graduate degree credit requirement must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may transfer no more than 9 credits of advanced graduate coursework from other institutions. These courses may not be used toward the Graduate School's Minimum Graduate Residence Credit. Coursework earned ten or more years prior to admission to the doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With program approval, students may count up to 7 credits of advanced undergraduate coursework taken at UW-Madison in lieu of or in combination with credits transferred from another institution. These courses must meet the Graduate School's criteria as graduate coursework and may not be used toward the 50% graduate coursework requirement unless taken at the 700 level or above.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With program approval, students may count up to 9 credits of coursework numbered 400 or above taken as a UW-Madison special student in lieu of or in combination with credits transferred from another institution or as a UW-Madison undergraduate. Coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to the doctoral degree is not allowed to satisfy requirements.

## CREDITS PER TERM ALLOWED

8 to 15 credits maximum for fall and spring; 2 credits required in summer if student is supported as RA, TA, or PA. Dissertators must register for 3 credits in all semesters. International students supported by government scholarships need not register for summer.

## PROGRAM-SPECIFIC COURSES REQUIRED

Four semesters of Pathobiological Sciences Student Seminar (PATH-BIO 930) prior to dissertator status.

## DOCTORAL MINOR/BREADTH REQUIREMENTS

No minor required.

## OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all major coursework.

## PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full or part-time enrollment the student may be dismissed from the program or allowed to continue based on advisor appeal to the Graduate School.

## ADVISOR / COMMITTEE

All students must have an advisor prior to final admission unless offered a rotation. A dissertation committee consisting of five members, the advisor plus two program trainers and two outside members, must be chosen by the end of the first year. The fifth member may be a scientist, industry expert or faculty from another institution.

## ASSESSMENTS AND EXAMINATIONS

After the committee is chosen, the student must submit certification paperwork that details the intended coursework plan, the committee members' names and signatures, a short explanation of why they were chosen and an appended research plan. Certification plans will be reviewed and approved by the program academic committee.

Students are expected to meet with their committee at least once per year until degree completion.

There are two preliminary examinations. The first (A) consists of a take-home exam of questions authored by the student's dissertation committee, followed by an oral exam. The student may retake the exam once if they fail on the first attempt.

The second preliminary examination (B) requires that the student write their research plan in the form of a major grant application and defend it orally before the committee.

Candidates must present broad-based evidence of general proficiency in research and the ability to conduct independent investigation as demonstrated in a written dissertation presenting original research.

A final public presentation, followed by an oral exam in front of their committee and official deposit of the dissertation with the Graduate School is required.

## TIME CONSTRAINTS

Certification should be completed by the end of the first year of enrollment.

Preliminary examination A should be taken by the end of the second year.

Preliminary examination B should be taken by the end of the third year.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing preliminary examination B may be required to take another preliminary examination to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements, but that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## COURSES

### REQUIRED COURSES

PATH-BIO 930 Advanced Seminar

Master's students must register for two semesters of PATH-BIO 930 Advanced Seminar and present once during their second semester.

They must take the course pass/fail if not presenting and must attend a minimum of 75 percent of the seminars led by students.

Ph.D. students must register for four semesters of PATH-BIO 930 Advanced Seminar and present twice after their first two semesters. PhD students will take the course pass/fail unless they are presenting. Both presentations must be completed prior to passing to dissertator status. Students must attend a minimum of 75 percent of the student-led seminars.

### APPROVED AND RECOMMENDED COURSES

The following is a list of core courses taken by many students and recommended courses that are appropriate to specific research areas. These courses are suggestions only; the student and their committee ultimately decide the best coursework plan for each student's specific program, with final approval from the program's academic committee. Students are responsible for determining that the coursework chosen meets the Graduate School's criteria for graduate work.

| Admission is competitive. Applicants must hold a B.S., DVM., M.S., M.A. or M.D. from an approved institution and have a strong background in biology and chemistry. Applications are judged on the basis of previous academic record, graduate record exam (GRE) scores, letters of recommendation, and the personal statement. Before admission, most students must be accepted by an eligible program faculty member who agrees to serve as the major professor. A limited number of students may be offered rotations. |                                                                                      |     |                                                                                                                                                                                                            |                                                               |     |

- Engages diverse cultural, historical or personal perspectives and articulates how these perspectives contribute to a project, paper or performance.

## SKILLS

- Creates research, scholarship or performance that makes a substantive contribution to the field of study.
- Demonstrates breadth within their learning experiences.
- Implements methodologies and/or practices and illustrates their relationships to allied fields.
- Develops new concepts and methodologies and/or identifies new research opportunities.
- Communicates complex and/or ambiguous ideas clearly.
- Evaluates the implications of one's own scholarship/research/ performance to broader social concerns.

## PROFESSIONAL CONDUCT

- Recognizes and applies ethical conduct and professional guidelines.

## PEOPLE

**Faculty:** See Comparative Biomedical Sciences (<http://www.vetmed.wisc.edu/ms-phd/current-students/faculty-trainers>) faculty list.

## ZOOLOGY

**Administrative Unit:** Zoology

**College/School:** College of Letters & Science

**Admitting Plans:** M.A., M.S., Ph.D.

**Degrees Offered:** M.A. in Zoology; M.S. in Freshwater and Marine Sciences; M.S. in Zoology; Ph.D. in Freshwater and Marine Sciences; Ph.D. in Zoology

**Minors and Certificates:** Doctoral Minor in Freshwater and Marine Sciences; Doctoral Minor in Zoology

The Department of Zoology offers graduate work leading to the master of arts or the master of science and the doctor of philosophy in zoology, and the master of science or doctor of philosophy in freshwater and marine sciences. Facilities and staff are available for advanced study in a wide variety of zoological fields including aquatic and terrestrial ecology, conservation biology, cell/molecular/developmental and neurobiology, endocrinology, ethology, genetics, evolution and systematics, comparative physiology, and physiological ecology.

In addition to a broad range of well-equipped laboratories, research facilities include advanced microscopy facilities (<http://www.microscopy.wisc.edu>), limnological laboratories on campus (Lake Mendota) and in northern Wisconsin (Trout Lake), the University Arboretum, the Zoological Museum and a Molecular Systematics Laboratory.

## DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Freshwater and Marine Science, Doctoral Minor (p. 668)
- Freshwater and Marine Science, M.S. (p. 669)

- Freshwater and Marine Science, Ph.D. (p. 670)
- Zoology, Doctoral Minor (p. 672)
- Zoology, M.A. (p. 672)
- Zoology, M.S. (p. 674)
- Zoology, Ph.D. (p. 676)

## PEOPLE

**Faculty:** Professors: Hardin (chair), Bement, Blair, Carpenter, Engels, Epstein, Fernandez, Gammie, Goldberg, Halloran, Ives, Karasov, Lee, Lindroth, Marler, Porter, Ritters, Stanley, Stretton, Strier, Turner, Vander Zanden; Associate Professors: Amann, Auger, Bleiweiss, Brunet, Currie, Damschen, Gratton, Grinblat, Hawks, Lee, Orrock; Assistant Professors: Coen, McIntyre, Payseur, Peery, Pool, Sharma, Wolman

## FRESHWATER AND MARINE SCIENCE, DOCTORAL MINOR

## REQUIREMENTS

Students working toward a Ph.D. degree with a major in another department may elect to minor in freshwater and marine sciences. A minor program of at least 12 credits, developed individually for each student, should strike a reasonable balance of physical and biological courses and include at least one semester of the limnology and marine sciences seminar. The proposed minor must be approved by the limnology and marine sciences graduate committee.

## ADMISSIONS

Applicants to the program typically have at least one year of college-level biology, chemistry, physics, and calculus. In addition, applicants should highlight their substantive experiences and career goals in freshwater and marine sciences. Prospective students make direct contact with potential faculty advisors. Admission depends upon finding a match between the skills and interests of the applicant and the needs of a suitable faculty mentor.

## PEOPLE

**Faculty:** Stanley (chair) (Zoology), Bahr (Geoscience), Block (Civil and Environmental Engineering), Cardiff (Geoscience), Carpenter (Zoology), Desai (Atmospheric and Oceanic Sciences), Fratta (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Goldberg (Pathobiological Sciences), Graham (Botany), Gratton (Entomology), Hotchkiss (Botany), Hurley (Civil and Environmental Engineering), Krysan (Horticulture), Kucharik (Agronomy), Lee (Zoology), Liu (Atmospheric and Oceanic Sciences), Loheide (Civil and Environmental Engineering), McIntyre (Zoology), McKinley (Atmospheric and Oceanic Sciences), McMahon (Civil and Environmental Engineering), Noguera (Civil and Environmental Engineering), Potter (Civil and Environmental Engineering), Remucal (Civil and Environmental Engineering), Vander Zanden (Zoology), Wu (Civil and Environmental Engineering)

## FRESHWATER AND MARINE SCIENCE, M.S.

The program offers curricula leading to the master of science and doctor of philosophy degrees or a doctoral minor in freshwater and marine sciences. Interdisciplinary in nature, each individualized program of study provides graduate training in aquatic sciences and integrates related sciences. Students enrolled in the program are advised by faculty in several departments in the College of Letters & Science, the College of Engineering, the College of Agricultural and Life Sciences, and the School of Veterinary Medicine.

UW–Madison is recognized worldwide as a leader in the field of limnology and aquatic ecology. The limnology and marine sciences program began in 1962 as the oceanography and limnology program. The program combines research and teaching from several fields and departments to develop a greater understanding of aquatic systems—their origins, inhabitants, phenomena, and impact on human life.

This graduate program emphasizes limnological studies and is based on the premise that limnology and marine sciences are integrated fields requiring a broad base in the fundamental disciplines. Students may specialize in limnology or in marine sciences, or they may focus on processes common to both environments.

Facilities for freshwater and marine research and instruction in the biological, chemical, and physical areas of limnology and marine sciences are available at UW–Madison through the Center for Limnology, the Water Science & Engineering Laboratory, and the departments of faculty participating in the program. The Center for Limnology also maintains a year-round laboratory at Trout Lake. This facility is a well-equipped biological field station in the Northern Highlands lake district of Wisconsin. Several research vessels are available for research on the Great Lakes. Ships belonging to other institutions are used for oceanographic field research.

Study plans are individually tailored for each student by a guidance and evaluation committee composed of at least three faculty members including the major professor, another professor from the major field of interest, and a third from another discipline. At least two must be from the limnology and marine sciences faculty, one from the biological sciences, and one from the physical sciences. The committee guides the student in developing study plans, research, and career goals.

## FUNDING

Various types of financial-assistance programs are available to qualified students in the form of research assistantships, teaching assistantships, fellowships, and special grants. Decisions regarding financial support are based on letters of recommendation, grades, Graduate Record Exam (GRE) scores, and, for research assistantships, the matching of interests or experience of the applicant to the research program. For research assistantships, the applicant's interests and experience must match the needs of the funding project. Students are encouraged to seek outside funding.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.S., with available thesis, and report tracks

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

30 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

16 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (15 out of 30 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may be allowed to count credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, 7 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, 15 credits taken as a UW–Madison Special Student are allowed toward minimum coursework requirements. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Students are required to develop a plan of courses with their advisor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required.

## OTHER GRADE REQUIREMENTS

Students must earn a B or above in all courses counting toward degree requirements.

## PROBATION POLICY

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

## ADVISOR / COMMITTEE

All incoming students are assigned an advisor. Students are expected to meet with their advisor on a regular basis.

## ASSESSMENTS AND EXAMINATIONS

The thesis track requires a formal thesis; the report track requires a comprehensive report.

## TIME CONSTRAINTS

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants to the program typically have at least one year of college-level biology, chemistry, physics, and calculus. In addition, applicants should highlight their substantive experiences and career goals in freshwater and marine sciences. Prospective students make direct contact with potential faculty advisors. Admission depends upon finding a match between the skills and interests of the applicant and the needs of a suitable faculty mentor.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Articulate, critique, or elaborate the theories, research methods, and approaches to inquiry or practice in the relevant area of freshwater and/or marine sciences.
- Identify sources and assembles evidence pertaining to questions or challenges in the relevant research field(s).
- Understand the historical or global context of freshwater and/or marine sciences.
- Select and/or use appropriate methodologies and practices.
- Evaluate or synthesize information pertaining to questions or challenges in the students' area of specialization within the freshwater and marine sciences.

- Communicate clearly in ways appropriate to the field of study.

## PROFESSIONAL CONDUCT

- Recognize and applies principles of ethical conduct.

## PEOPLE

**Faculty:** Stanley (chair) (Zoology), Bahr (Geoscience), Block (Civil and Environmental Engineering), Cardiff (Geoscience), Carpenter (Zoology), Desai (Atmospheric and Oceanic Sciences), Fratta (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Goldberg (Pathobiological Sciences), Graham (Botany), Gratton (Entomology), Hotchkiss (Botany), Hurley (Civil and Environmental Engineering), Krysan (Horticulture), Kucharik (Agronomy), Lee (Zoology), Liu (Atmospheric and Oceanic Sciences), Loheide (Civil and Environmental Engineering), McIntyre (Zoology), McKinley (Atmospheric and Oceanic Sciences), McMahon (Civil and Environmental Engineering), Noguera (Civil and Environmental Engineering), Potter (Civil and Environmental Engineering), Remucal (Civil and Environmental Engineering), Vander Zanden (Zoology), Wu (Civil and Environmental Engineering)

## FRESHWATER AND MARINE SCIENCE, PH.D.

The program offers curricula leading to the master of science and doctor of philosophy degrees or a doctoral minor in freshwater and marine sciences. Interdisciplinary in nature, each individualized program of study provides graduate training in aquatic sciences and integrates related sciences. Students enrolled in the program are advised by faculty in several departments in the College of Letters & Science, the College of Engineering, the College of Agricultural and Life Sciences, and the School of Veterinary Medicine.

UW–Madison is recognized worldwide as a leader in the field of limnology and aquatic ecology. The limnology and marine sciences program began in 1962 as the oceanography and limnology program. The program combines research and teaching from several fields and departments to develop a greater understanding of aquatic systems—their origins, inhabitants, phenomena, and impact on human life.

This graduate program emphasizes limnological studies and is based on the premise that limnology and marine sciences are integrated fields requiring a broad base in the fundamental disciplines. Students may specialize in limnology or in marine sciences, or they may focus on processes common to both environments.

Facilities for freshwater and marine research and instruction in the biological, chemical, and physical areas of limnology and marine sciences are available at UW–Madison through the Center for Limnology, the Water Science & Engineering Laboratory, and the departments of faculty participating in the program. The Center for Limnology also maintains a year-round laboratory at Trout Lake. This facility is a well-equipped biological field station in the Northern Highlands lake district of Wisconsin. Several research vessels are available for research on the Great Lakes. Ships belonging to other institutions are used for oceanographic field research.

Study plans are individually tailored for each student by a guidance and evaluation committee composed of at least three faculty members

including the major professor, another professor from the major field of interest, and a third from another discipline. At least two must be from the limnology and marine sciences faculty, one from the biological sciences, and one from the physical sciences. The committee guides the student in developing study plans, research, and career goals.

All Ph.D. candidates are expected to obtain a broad background in aquatic sciences and depth in their research area. The background may include biology, chemistry, data science, geology, physics, or other related fields. The major, by nature of the program, includes advanced courses in several subdisciplines in freshwater and marine sciences. The minor may be used to obtain tools of research, focus in greater depth on a single discipline within freshwater and marine sciences, or open additional areas related to the field, such as the social sciences.

## FUNDING

Various types of financial-assistance programs are available to qualified students in the form of research assistantships, teaching assistantships, fellowships, and special grants. Decisions regarding financial support are based on letters of recommendation, grades, Graduate Record Exam (GRE) scores, and, for research assistantships, the matching of interests or experience of the applicant to the research program. For research assistantships, the applicant's interests and experience must match the needs of the funding project. Students are encouraged to seek outside funding.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

Half of degree coursework (26 out of 51 total credits) must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS

With program approval, students may be to count credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNDERGRADUATE

With program approval, 7 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PRIOR COURSEWORK REQUIREMENTS: UW–MADISON UNIVERSITY SPECIAL

With program approval, 15 credits taken as a UW–Madison Special Student are allowed toward minimum coursework requirements. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Students are required to develop a plan of courses with their advisor.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete a minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00 GPA required

### OTHER GRADE REQUIREMENTS

Students must earn a B or above in all courses counting toward degree requirements.

### PROBATION POLICY

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of enrollment the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

### ADVISOR / COMMITTEE

All incoming students are assigned an advisor. Students are expected to meet with their advisor on a regular basis.

### ASSESSMENTS AND EXAMINATIONS

Doctoral students are required to take a comprehensive preliminary exam by the end of their fifth semester of study in the Ph.D. program. A final oral exam of the doctoral dissertation is required. Deposit of the doctoral dissertation in the Graduate School is required.

### TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

### LANGUAGE REQUIREMENTS

No language requirements.

## ADMISSIONS

Applicants to the program typically have at least one year of college-level biology, chemistry, physics, and calculus. In addition, applicants should highlight their substantive experiences and career goals in freshwater and marine sciences. Prospective students make direct contact with potential faculty advisors. Admission depends upon finding a match between the skills and interests of the applicant and the needs of a suitable faculty mentor.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

- Regardless of whether an individual is awarded a master's degree, the doctoral level learning goals are inclusive of the master's level learning goals.
- Articulate challenges, frontiers, and limits with respect to theory, knowledge or practice within relevant areas of freshwater and marine sciences.
- Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the students' relevant research field(s).
- Conduct research that makes a substantive contribution.
- Demonstrate breadth within freshwater and marine sciences.
- Communicate complex or ambiguous ideas in a clear and understandable manner.
- Consider the implications of the discipline to broader societal concerns.

### PROFESSIONAL CONDUCT

- Foster ethical conduct and professional guidelines.

## PEOPLE

**Faculty:** Stanley (chair) (Zoology), Bahr (Geoscience), Block (Civil and Environmental Engineering), Cardiff (Geoscience), Carpenter (Zoology), Desai (Atmospheric and Oceanic Sciences), Fratta (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Goldberg (Pathobiological Sciences), Graham (Botany), Gratton (Entomology), Hotchkiss (Botany), Hurley (Civil and Environmental Engineering), Krysan (Horticulture), Kucharik (Agronomy), Lee (Zoology), Liu (Atmospheric and Oceanic Sciences), Loheide (Civil and Environmental Engineering), McIntyre (Zoology), McKinley (Atmospheric and Oceanic Sciences), McMahon (Civil and Environmental Engineering), Noguera (Civil and Environmental Engineering), Potter (Civil and Environmental Engineering), Remucal (Civil and Environmental Engineering), Vander Zanden (Zoology), Wu (Civil and Environmental Engineering)

## ZOOLOGY, DOCTORAL MINOR

### REQUIREMENTS

Graduate candidates who elect zoology as a minor subject must fulfill the course requirements specified by the minor professor or the graduate advisory committee.

### PEOPLE

**Faculty:** Professors: Hardin (chair), Bement, Blair, Carpenter, Engels, Epstein, Fernandez, Gammie, Goldberg, Halloran, Ives, Karasov, Lee, Lindroth, Marler, Porter, Ritters, Stanley, Stretton, Strier, Turner, Vander Zanden; Associate Professors: Amann, Auger, Bleiweiss, Brunet, Currie, Damschen, Gratton, Grinblat, Hawks, Lee, Orrock; Assistant Professors: Coen, McIntyre, Payseur, Peery, Pool, Sharma, Wolman

## ZOOLOGY, M.A.

The Department of Zoology offers graduate work leading to the master of arts or the master of science and the doctor of philosophy in zoology. Facilities and staff are available for advanced study in a wide variety of zoological fields including aquatic and terrestrial ecology, conservation biology, cell/molecular/developmental and neurobiology, endocrinology, ethology, genetics, evolution and systematics, comparative physiology, and physiological ecology.

In addition to a broad range of well-equipped laboratories, research facilities include advanced microscopy facilities (<http://www.microscopy.wisc.edu>), limnological laboratories on campus (Lake Mendota) and in northern Wisconsin (Trout Lake), the University Arboretum, the Zoological Museum and a Molecular Systematics Laboratory.

### FUNDING

Financial support may be provided through a limited number of teaching and research assistantships and by federal, industrial, and privately sponsored fellowships and traineeships. Graduate student support is available to all accepted graduate students and will be determined before arrival on campus.

### REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., M.S.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

30 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

16 credits

**MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT**

16 credits

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle>).

**PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS:**

With committee approval, students are allowed to count no more than 14 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements. Typically committees will choose to cap coursework from another institution at a lower level than 14 credits, but this is a committee decision to be made on a case by case basis.

**PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE**

With committee approval, students are allowed up to 7 credits numbered 300 or above from their UW-Madison undergraduate career to fulfill graduate requirements. Typically committees will choose to cap coursework allowed from undergraduate careers at a lower level than the 7 allowed, but this is a committee decision to be made on a case by case basis.

**PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL**

With committee approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements. Typically committee members will choose to cap the number of coursework taken as a University Special student at a lower level, but this is a committee decision to be made on a case-by-case basis.

**CREDITS PER TERM ALLOWED**

15 credits

**PROGRAM-SPECIFIC COURSES REQUIRED**

Required coursework is determined for each student individually by the student's advisory committee.

**OVERALL GRADUATE GPA REQUIREMENT**

3.00

**OTHER GRADE REQUIREMENTS**

An average record of B or better in all work taken as a Graduate Student is required by the Department of Zoology (grades of P and S are for this

purpose considered to be satisfactory at the B level; grades of Incomplete are considered for this purpose to be unsatisfactory if they are not removed during the following semester of residence).

**PROBATION POLICY**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

At the department level, the chair, in consultation with the major professor and advisory committee, may determine that the student's progress is unsatisfactory and so report to the faculty in closed session. If, after faculty review, the chair's determination is considered justified, the student will be notified that tenure in the department is to be terminated at the end of the semester. If the student disagrees with the judgment of the faculty, it shall be the student's responsibility to show cause as to why the faculty's opinion is not justified. Any student who is judged wanting in sufficient progress will be granted one additional probationary semester, at the end of which continuation in Graduate School will be denied unless by extraordinary initiative and application the student is able to persuade the faculty to reverse their decision.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor and a committee. To ensure that students are making satisfactory progress toward a degree, every student is required to meet with the advisor and committee annually to review progress. If a progress report has not been filed by May 1, a hold will be placed on student course registration.

**ASSESSMENTS AND EXAMINATIONS**

In the second semester of the first year, students must complete the Certification of Candidate for a Master's Degree.

Typically the defense of the master's degree occurs no later than the end of the student's sixth semester. A master's degree warrant must be requested from the department prior to the defense.

**TIME CONSTRAINTS**

It is up to the student's committee to determine whether or not a student who has been absent for five or more consecutive years will lose the credits earned before the absence; that coursework may not count toward Graduate School credit requirements.

**LANGUAGE REQUIREMENTS**

To be determined by the advisory committee.

**ADMISSIONS**

The department will accept applicants who have an adequate background for advanced work in one or more of the subdisciplines listed above and for whom a faculty member is willing to serve as major professor. In addition to the Graduate School application, all applicants must submit GRE scores, at least 3 letters of recommendation, a personal statement including areas of research interest and the names of prospective faculty advisors, a CV/resume, official transcripts from all undergraduate and graduate schools attended, and a calculation of the undergraduate GPA for the last 60 hours of undergraduate work. See the admissions page on the zoology website for more specific instructions regarding application

requirements. The annual admission application deadline is December 1st.

The department faculty strongly believes that graduate education should be distinguished from undergraduate education in recognition of individuality and emphasis on responsibility in graduate students. This philosophy requires flexibility and is not well served by the imposition of many formal requirements to be met by all students. Rather, more emphasis is placed on the role of advisory committees in devising programs of breadth and depth appropriate for individual students with due regard to areas outside of biology which are important for the student's effectiveness in the chosen field.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### KNOWLEDGE

- Master fundamental skills in at least one of the broad subject areas represented in the Department of Zoology.
- Students will demonstrate understanding of major current and past theories, research findings, and methodologies and techniques in their area of concentration.
- Students will develop critical thinking skills. They will retrieve and examine scientific literature, evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions.

#### RESEARCH

- Students will complete an original research project in one of the broad subject areas represented in the Department of Zoology.
- Students will retrieve, evaluate, and interpret professional scientific literature and use this information to select and/or use the most appropriate methods for their own research project.
- Students will conduct research, analyze, and interpret resulting data. Students will prepare a thesis or research report describing their research project.

#### COMMUNICATION

- Effectively communicate in writing and orally.
- Students will write a clear and concise research report.
- Students will present research articulately and informatively. Students will have opportunities to engage in public outreach and education.

### PROFESSIONAL CONDUCT

#### ETHICAL CONDUCT

- Students will have an understanding of professional and ethical responsibility.
- Students will be trained to use scientific rigor when designing experiments, collecting and analyzing data, interpreting and reporting results.
- Students will be trained in the ethics of publishing.
- Students will know and adhere to laws, regulations, needed permits and licenses, occupational health and safety standards.

### CAREER PREPARATION

- Students will be provided with diverse training that will prepare them for a range of flexible and sustainable careers (e.g., academia, industry, government, science policy and administration, science commerce, science writing, law, and science education and outreach at all levels).
- Students will develop broadly applicable skills in critical thinking and problem solving.
- Students will have opportunities for teamwork, communication skills, and collaborations.

## PEOPLE

**Faculty:** Professors: Hardin (chair), Bement, Blair, Carpenter, Engels, Epstein, Fernandez, Gammie, Goldberg, Halloran, Ives, Karasov, Lee, Lindroth, Marler, Porter, Ritters, Stanley, Stretton, Strier, Turner, Vander Zanden; Associate Professors: Amann, Auger, Bleiweiss, Brunet, Currie, Damschen, Gratton, Grinblat, Hawks, Lee, Orrick; Assistant Professors: Coen, McIntyre, Payseur, Peery, Pool, Sharma, Wolman

## ZOOLOGY, M.S.

The Department of Zoology offers graduate work leading to the master of arts or the master of science and the doctor of philosophy in zoology. Facilities and staff are available for advanced study in a wide variety of zoological fields including aquatic and terrestrial ecology, conservation biology, cell/molecular/developmental and neurobiology, endocrinology, ethology, genetics, evolution and systematics, comparative physiology, and physiological ecology.

In addition to a broad range of well-equipped laboratories, research facilities include advanced microscopy facilities (<http://www.microscopy.wisc.edu>), limnological laboratories on campus (Lake Mendota) and in northern Wisconsin (Trout Lake), the University Arboretum, the Zoological Museum and a Molecular Systematics Laboratory.

## FUNDING

Financial support may be provided through a limited number of teaching and research assistantships and by federal, industrial, and privately sponsored fellowships and traineeships. Graduate student support is available to all accepted graduate students and will be determined before arrival on campus.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### MASTER'S DEGREES

M.A., M.S.

**MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT**

30 credits

**MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT**

16 credits

- Students will have opportunities for teamwork, communication skills, and collaborations.

## PEOPLE

**Faculty:** Professors: Hardin (chair), Bement, Blair, Carpenter, Engels, Epstein, Fernandez, Gammie, Goldberg, Halloran, Ives, Karasov, Lee, Lindroth, Marler, Porter, Ritters, Stanley, Stretton, Strier, Turner, Vander Zanden; Associate Professors: Amann, Auger, Bleiweiss, Brunet, Currie, Damschen, Gratton, Grinblat, Hawks, Lee, Orrick; Assistant Professors: Coen, McIntyre, Payseur, Peery, Pool, Sharma, Wolman

## ZOOLOGY, PH.D.

The Department of Zoology offers graduate work leading to the master of arts or the master of science and the doctor of philosophy in zoology. Facilities and staff are available for advanced study in a wide variety of zoological fields including aquatic and terrestrial ecology, conservation biology, cell/molecular/developmental and neurobiology, endocrinology, ethology, genetics, evolution and systematics, comparative physiology, and physiological ecology.

In addition to a broad range of well-equipped laboratories, research facilities include advanced microscopy facilities (<http://www.microscopy.wisc.edu>), limnological laboratories on campus (Lake Mendota) and in northern Wisconsin (Trout Lake), the University Arboretum, the Zoological Museum and a Molecular Systematics Laboratory.

### JOINT DEGREE

Doctoral students may elect a joint degree (two programs) which combines zoology with another biological program. The requirements for such candidates will be determined by the certification committee (which includes members of both programs) in accordance with regulations established by the Graduate School.

## FUNDING

Financial support may be provided through a limited number of teaching and research assistantships and by federal, industrial, and privately sponsored fellowships and traineeships. Graduate student support is available to all accepted graduate students and will be determined before arrival on campus.

## REQUIREMENTS

### MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS

To make progress toward a graduate degree, students must meet the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 16) in addition to the requirements of the program.

### DOCTORAL DEGREES

Ph.D.

### MINIMUM GRADUATE DEGREE CREDIT REQUIREMENT

51 credits

### MINIMUM GRADUATE RESIDENCE CREDIT REQUIREMENT

32 credits

### MINIMUM GRADUATE COURSEWORK (50%) REQUIREMENT

26 credits

At least 50% of credits applied toward the graduate degree credit requirement.

### PRIOR COURSEWORK REQUIREMENTS: GRADUATE WORK FROM OTHER INSTITUTIONS:

With committee approval, students are allowed to count no more than 19 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements. Typically committees will choose to cap coursework from another institution at a lower level than 19 credits, but this is a committee decision to be made on a case-by-case basis.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNDERGRADUATE

With committee approval, students are allowed up to 7 credits numbered 300 or above from their UW-Madison undergraduate career to fulfill graduate requirements. Typically committees will choose to cap coursework allowed from undergraduate careers at a lower level than the 7 allowed, but this is a committee decision to be made on a case-by-case basis.

### PRIOR COURSEWORK REQUIREMENTS: UW-MADISON UNIVERSITY SPECIAL

With committee approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements. Typically committee members will choose to cap the number of coursework taken as a University Special student at a lower level, but this is a committee decision to be made on a case-by-case basis.

### CREDITS PER TERM ALLOWED

15 credits

### PROGRAM-SPECIFIC COURSES REQUIRED

Required coursework is determined for each student individually by the student's advisory committee.

All students are required to serve as a teaching assistant for a minimum of one semester. All students must hold a departmental seminar in which to present their graduate research.

### DOCTORAL MINOR/BREADTH REQUIREMENTS

All students must either have a declared and named minor or a distributed minor.

### OVERALL GRADUATE GPA REQUIREMENT

3.00

### OTHER GRADE REQUIREMENTS

An average record of B or better in all work taken as a Graduate Student is required by the Department of Zoology (grades of P and S are for this purpose considered to be satisfactory at the B level; grades of Incomplete are considered for this purpose to be unsatisfactory if they are not removed during the following semester of residence).

### PROBATION POLICY

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

At the department level, the chair, in consultation with the major professor and advisory committee, may determine that a student's progress is unsatisfactory and so report to the faculty in closed session. If, after faculty review, the chair's determination is considered justified, the student will be notified that tenure in the department is to be terminated at the end of the semester. If the student disagrees with the judgment of the faculty, it shall be the student's responsibility to show cause as to why the faculty's opinion is not justified. Any student who is judged wanting in sufficient progress will be granted one additional probationary semester, at the end of which continuation in Graduate School will be denied unless by extraordinary initiative and application the student is able to persuade the faculty to reverse their decision.

### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor and a committee. To ensure that students are making satisfactory progress toward a degree, every student is required to meet with the advisor and committee annually to review progress. If a progress report has not been filed by May 1, a hold will be placed on student course registration.

### ASSESSMENTS AND EXAMINATIONS

In the second semester of the first year, students must complete the Certification of Candidate for a Ph.D. Degree.

By the end of the fourth semester, students must complete the qualifying examination and return the signed qualifying examination form to the department.

The preliminary examination (defense of research project) should be completed and the prelim warrant submitted by the end of the sixth semester. Note that in addition to passing the prelim exam, students must have completed 32 credits, clear all Incomplete or Progress grades in nonresearch courses, complete all minor requirements and earn at

least a cumulative 3.0 GPA in order to be granted dissertator status. The preliminary defense warrant must be requested from the department.

Defense of the Ph.D. usually occurs after the tenth semester. A final defense warrant must be requested from the department.

## TIME CONSTRAINTS

It is up to the student's committee to determine whether or not a student who has been absent for five or more consecutive years will lose the credit earned before the absence; that coursework may not count toward Graduate School credit requirements.

## LANGUAGE REQUIREMENTS

To be determined by the advisory committee.

## ADMISSIONS

The department will accept applicants who have an adequate background for advanced work in one or more of the subdisciplines listed above and for whom a faculty member is willing to serve as major professor. In addition to the Graduate School application, all applicants must submit GRE scores, at least 3 letters of recommendation, a personal statement including areas of research interest and the names of prospective faculty advisors, a CV/resume, official transcripts from all undergraduate and graduate schools attended, and a calculation of the undergraduate GPA for the last 60 hours of undergraduate work. See the admissions page on the zoology website for more specific instructions regarding application requirements. The annual admission application deadline is December 1st.

The department faculty strongly believes that graduate education should be distinguished from undergraduate education in recognition of individuality and emphasis on responsibility in graduate students. This philosophy requires flexibility and is not well served by the imposition of many formal requirements to be met by all students. Rather, more emphasis is placed on the role of advisory committees in devising programs of breadth and depth appropriate for individual students with due regard to areas outside of biology which are important for the student's effectiveness in the chosen field.

## LEARNING OUTCOMES

### KNOWLEDGE AND SKILLS

#### KNOWLEDGE

- Demonstrate academic mastery in at least one of the broad subject areas represented in the Department of Zoology.
- Students will demonstrate a broad understanding of major current and past theories, research findings, and methodologies and techniques in their area of concentration both orally and in writing.
- Students will develop critical thinking skills. They will retrieve and examine scientific literature, evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions.

#### RESEARCH

- Students will develop and complete original research that advances a specific field of study within one of the broad subject areas represented in the Department of Zoology.

- Students will retrieve, evaluate, and interpret professional scientific literature and use this information to develop theoretical frameworks, testable hypotheses, and predictions for their own research projects.
- Students will design realistic and feasible research projects and prepare necessary protocols.
- Students will conduct independent research and analyze and interpret resulting data.
- Students will prepare and submit manuscripts resulting from their independent research for publication in professional, peer-reviewed journals.

## COMMUNICATION

- Effectively communicate to diverse audiences in writing, through oral presentations, and discussions.
- Students will write clear and concise research articles for publication in professional, peer-reviewed journals.
- Students will present at scientific conferences and/or in formal and informal seminars.
- Students will learn methods of communication needed to interact with professional colleagues and to request grant support.
- Students will present research articulately and informatively to diverse audiences.
- Students will give and receive feedback orally and in writing.
- Students will have with opportunities to engage in public outreach and education.

## TEACHING

- Effectively teach topics or research methods in cellular and molecular biology; developmental biology; neuroscience; physiology; ecology; evolution; or animal behavior.
- Students will receive training and serve as teaching assistants for at least one semester.
- Students will have with opportunities to mentor others in a laboratory or research setting.

## PROFESSIONAL CONDUCT

### ETHICAL CONDUCT

- Students will have an understanding of professional and ethical responsibility.
- Students will be trained to use scientific rigor when designing experiments, collecting and analyzing data, interpreting and reporting results.
- Students will be trained in the ethics of publishing.
- Students will know and adhere to laws, regulations, needed permits and licenses, occupational health and safety standards.

## CAREER PREPARATION

- Students will be provided with diverse training that will prepare them for a range of flexible and sustainable careers (e.g., academia, industry, government, science policy and administration, science commerce, science writing, law, and science education and outreach at all levels).
- Students will develop broadly applicable skills in critical thinking and problem solving.
- Students will have opportunities to develop skills in leadership, project management, teamwork, and communication and to develop collaborations with nonacademic partners.

## PEOPLE

**Faculty:** Professors: Hardin (chair), Bement, Blair, Carpenter, Engels, Epstein, Fernandez, Gammie, Goldberg, Halloran, Ives, Karasov, Lee, Lindroth, Marler, Porter, Ritters, Stanley, Stretton, Strier, Turner, Vander Zanden; Associate Professors: Amann, Auger, Bleiweiss, Brunet, Currie, Damschen, Gratton, Grinblat, Hawks, Lee, Orrock; Assistant Professors: Coen, McIntyre, Payseur, Peery, Pool, Sharma, Wolman

# NONDEGREE/VISITING STUDENT GUIDE

Individuals who wish to enroll in UW–Madison credit courses but are not in degree status at this university may apply for admission as a University Special student. There are 15 categories of University Special students, ranging from high school students and visiting undergraduate and graduate students, to adults seeking further credits after earning a baccalaureate degree. Each category has a distinct educational goal, admission criteria, enrollment policy, and tuition/fees rate. All University Special students establish an official UW–Madison student record and are responsible for adhering to the university’s academic policies and procedures, and to the student code of conduct. The office of admissions, advising assistance, and the academic dean for University Special students is Adult Career and Special Student Services (<http://continuingstudies.wisc.edu/advising>) (ACSSS).

## TYPES OF STUDY

- Capstones (p. 683)
- Guest Auditor (p. 710)
- High School Students (p. 711)
- Other (p. 712)
- Post-Baccalaureate Course (p. 713)
- Short Course (p. 714)
- Visiting International (p. 716)
- Visiting University Students (p. 717)

## HOW TO GET IN

There are two steps to become a University Special student: (1) university admission and (2) course enrollment.

## ADMISSIONS

Admission as a University Special student is available for all terms: fall, spring, and summer. Applying at least one month before the start of the term is recommended as it can take one to three weeks to review, approve, and process an application. Timely admission is important in order to take advantage of an earliest enrollment date. Capstone certificates, programs with preselected or international students, and high school classifications will have earlier application deadlines, as an admission decision depends on input from departments or other units. Frequently asked questions about University Special student admission are posted at ACSSS (<http://continuingstudies.wisc.edu/advising/faq.htm#applying>).

The application has two options as listed below. However, first-time University Special students should read the details and more specific application information provided for each student type at Types of Study (p. 680) to prepare for the required steps.

- Applying via the University Special Student application (<http://continuingstudies.wisc.edu/advising/apply.htm>) or

- Applying as a reentry student if previously enrolled at UW–Madison. Access the application through My UW using your NetID (<https://my.wisc.edu>).

## ENROLLMENT

Once admitted, students enroll following the same basic policies and online procedures as UW–Madison degree students. ACSSS provides enrollment instructions (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>) that highlight issues and specific steps for University Special students, as well as provides Enrollment FAQs and Tips (<http://continuingstudies.wisc.edu/advising/faq.htm#enrolling>). Also, it is important to review the section of policies and regulations (p. 680) pertaining to University Special students.

## SUMMER TERM

Each summer, more than 13,000 undergraduate students enroll in summer courses offered on campus or online. They may choose from more than 1,000 credit classes in sessions lasting from one to 13 weeks. UW–Madison undergraduates enroll for summer courses the same way as for fall and spring courses. An Earliest Appointment Time in late March can be viewed through the MyUW Student Center module. Students not in degree status at UW–Madison should apply for University Special student admission in the appropriate classification by early spring in order to be eligible to enroll in April. For more information on course offerings, sessions, and summer term, see Summer Term (<http://summer.wisc.edu>).

## POLICIES AND REGULATIONS

### POLICIES AND REGULATIONS

#### ENROLLMENT POLICIES

Degree status students have priority enrollment status and times. The time assigned to a University Special student depends on the classification. For fall and spring term, it ranges from the first day of class to four weeks before the term begins. For summer term, a date in April or May is assigned.

Most courses have prerequisites which are listed in the courses section (<http://guide.wisc.edu/courses>) of the *Guide*. In order to enroll in a course, it is necessary that students—including University Special Students—meet these prerequisites and requirements. University Special students may have taken courses at other colleges and universities which will not be part of the UW–Madison record. Thus, it may be necessary for such students to confer with a department or course instructor to confirm a prerequisite has been met at another institution in order for enrollment to be allowed.

ACSSS provides enrollment instructions (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>) that highlight issues for University Special students, as well as provides Enrollment FAQs and Tips (<http://continuingstudies.wisc.edu/advising/faq.htm#enrolling>).

#### CREDIT LOAD

University Special students are permitted to carry up to 18 credits in the fall and spring terms unless other limitations have been specified by their classification, advisors, or program. For most students during summer sessions, course loads are limited to a number of credits equal to the number of weeks of the session. Thus, in a three-week session, 3 credits

is the maximum load; in a four-week session, 4 credits is the maximum load. One exception is that a 9-credit limit is allowed during the eight-week general session.

## GRADING

Grades for each course are reported on the official UW–Madison transcript. The GPA is posted on a term-by-term basis and affects academic eligibility to continue in another term. While in University Special student status, a cumulative GPA is not calculated or displayed on the official UW–Madison student record. However, if a student becomes an undergraduate degree student earning a first UW–Madison undergraduate degree, then any grades and credits earned as a University Special student will transfer in and will be calculated in the final UW–Madison undergraduate degree GPA. (This is a common situation for high school students and visiting undergraduates taking courses prior to entry into a degree program at UW–Madison.) Also, grades earned as a Special student will not change a previous cumulative undergraduate or graduate degree GPA earned at UW–Madison, including if a course is repeated.

A 2.0 minimum grade point average is required of University Special students in order to continue in future terms. (Capstone Certificate Program students have a higher GPA requirement.) Any University Special student who does not achieve the minimum grade point requirement will automatically receive a "must obtain permission to continue" action on the student record and will be prevented from enrolling in future terms. Such students should contact an ACSSS advisor or the academic dean (<http://continuingstudies.wisc.edu/advising/contact.htm>) regarding the policy and eligibility to continue in the future.

## INCOMPLETES

Under limited circumstances a grade of Incomplete (I) (<https://registrar.wisc.edu/incompletes.htm>) may be reported for a student. As for all students, an incomplete is used only when a student due to an illness or other substantial cause is unable to take the final examination or complete some portion of course requirements. A University Special student who receives an Incomplete (I) has until the end of the next semester in which enrolled (excluding summer term) to complete the work and receive a final grade. Otherwise, the Incomplete will automatically lapse to an F.

## PASS/FAIL OPTION

University Special students (excluding Capstone Certificate Program students) may elect to take courses under the pass/fail option following university procedure. A grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, C; the grade of U shall be recorded by the registrar in place of instructors' grades of D or F. The deadline and process for requesting pass/fail grading is posted on the registrar's website ([https://registrar.wisc.edu/enrollment\\_information.htm](https://registrar.wisc.edu/enrollment_information.htm)).

## AUDITING COURSES

There are two ways to audit a course within the University Special student status.

One—follows the process available to degree students whereby a student enrolls in a course for credit and then uses the Course Change Request in the enrollment system to change to audit. The student confirms with the instructor the attendance and required work to earn a grade of S (Satisfactory). The tuition assessment is at the credit level.

Two—available only to University Special students who are admitted in one of two classifications: Guest Auditor or Senior Guest Auditor if age

60 or older. Per policy of the UW Board of Regents, Guest auditors may enroll in courses on an audit-only basis and pay reduced or no tuition. Permission from the instructor is required prior to enrolling in a course. Audit credit is *automatically assigned* based on the student classification. Guest auditors do not pay student segregated fees and have access limited to libraries and nonseg. fee activities of the Student Union. See ACSSS for further detail (<http://continuingstudies.wisc.edu/advising/guests.htm>).

## TUITION AND FEES

The tuition rate and any fee assessment varies with (1) the number of credits for which enrolled, (2) the classification of University Special students, and (3) residency status (Wisconsin, Nonresident, Minnesota, or International). Many classifications pay at the undergraduate student rate, which may be viewed at the Office of the Registrar fee table ([https://registrar.wisc.edu/tuition\\_&\\_fees.htm](https://registrar.wisc.edu/tuition_&_fees.htm)). The Capstone Certificate programs have tuition rates similar to the graduate student rate. Consult with the program coordinator for current tuition numbers.

Most University Special students pay the student segregated fees which provide full access to all university services including campus libraries, computer labs, Metro bus pass, recreational facilities, and University Health Service. Students enrolled in at least five credit may purchase the Student Health Insurance Plan (SHIP). If a student is in a classification or program that does not assess student segregated fees, then access is limited to the libraries and computer labs. This includes Guest auditors, Senior Guest auditors, some distance delivered Capstone Certificate programs, and off-campus classes.

Financial aid is available on a limited basis to nondegree students. Returning adults who will enter degree programs may find a match with the scholarship and grant program administered by ACSSS and scholarship information. More information is available at Resources (p. 682).

## STUDENT PRIVACY RIGHTS

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA) which is available at the Office of the Registrar (<https://registrar.wisc.edu>), 333 East Campus Mall #10101. The university, in accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; e-mail addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full-or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e6s1>). Students with questions about the provisions of the act or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar.

## AVAILABILITY OF ACADEMIC RECORD INFORMATION TO OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An

authorization form is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (<https://registrar.wisc.edu>), 333 East Campus Mall #10101. It permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it is assumed that the student does not give a third party access to academic record information. This policy is designed to give students specific control over the parties to whom academic record information may be released. Grade reports will not be sent by the university to parents or guardians.

## ACADEMIC INTEGRITY

UW–Madison students have the obligation to conduct their academic work in a manner consistent with high standards of academic integrity. They also have the right to expect that all students will be graded fairly, and they have the rights of due process should they be accused of academic misconduct. Students become familiar with the rules of academic misconduct (UWS Ch. 14) and consult with their instructors if they have concerns about possibly observing misconduct or whether something is acceptable. For complete discussion of the rules regarding academic integrity, see the Dean of Students website (<https://www.students.wisc.edu/doso>), or contact the assistant dean for academic integrity at 608-263-5700 or Room 70 Bascom Hall.

## STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin–Madison community has the right to expect to conduct his or her academic and social life in an environment free from threats, danger, or harassment. Students also have the responsibility to conduct themselves in a manner compatible with membership in the university and local communities. UWS Chapters 17 and 18 of the Wisconsin Administrative Code list the university policies students are expected to uphold and describes the procedures used when students are accused of misconduct. For the complete text of UWS Chapter 17, see this link ([https://docs.legis.wisconsin.gov/code/admin\\_code/uws/17.pdf](https://docs.legis.wisconsin.gov/code/admin_code/uws/17.pdf)), or contact the on-call dean in the Dean of Students Office, 608-263-5700, Room 70 Bascom Hall.

No student may be denied admission to, participation in or the benefits of, or discriminated against in any service, program, course or facility of the [UW] system or its institutions or centers because of the student's race, color, creed, religion, sex, national origin, disability, ancestry, age, sexual orientation, pregnancy, marital status or parental status.

## STUDENT GRIEVANCE PROCEDURE

Any student at UW–Madison who feels that he or she has been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment. For assistance in determining options, students can contact the on-call dean in the Dean of Students Office, 608-263-5700, Room 70 Bascom Hall, Monday–Friday, 8:30 a.m.–4:30 p.m.

## RESOURCES

### ACADEMIC ADVISING AND CAREER COUNSELING

Advising, educational planning, and career counseling (<http://continuingstudies.wisc.edu/advising>) are all available to community adults and university staff, as well as to University Special students and returning adult degree students. One does not need to be enrolled or a graduate of the University of Wisconsin to use these services. The goal is to help adults make a decision regarding further education, returning to complete a degree, or envisioning a path to a more satisfying

or meaningful career. ACSSS provides one-on-one appointments, workshops, and informational programs in the community. ACSSS also maintains a list serve and a Facebook page for returning adult students at UW–Madison to connect.

## OTHER ASSISTANCE FOR STUDENTS

For personal concerns, students find the Counseling Services, a unit of University Health Services (<http://www.uhs.wisc.edu>) (UHS), offers a variety of individual, group and couple counseling services. UHS services are available to University Special students in credit status and paying student segregated fees. It is located at 333 East Campus Mall; 608-265-5600.

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. Tutoring programs, the Writing Center, and other resources assist all students. If further assistance is needed, University Special students should contact their academic dean in the Adult Career and Special Student Services office. (<http://continuingstudies.wisc.edu/advising>)

## FINANCIAL INFORMATION

Many forms of financial aid, including federal financial aid, require a student to be in degree status. Therefore, such aid is not available to University Special student with the exception of those taking prerequisites for graduate or professional school admission (UNRS classification). Students should contact the Office of Student Financial Aid (<https://finaid.wisc.edu/general-faq.htm>) to determine specific qualifications.

The Adult Career and Special Student Services office administers a scholarship and grant program specifically for returning adult students and single parent students, mostly in degree status. Grants are awarded three times each year, and scholarships on an annual basis. Details are provided at the ACSSS website Financial Assistance (<http://continuingstudies.wisc.edu/advising/finance.htm>).

## OTHER CAMPUS RESOURCES FOR NONDEGREE AND ADULT STUDENTS

University Special students enrolled for credit and paying student segregated fees have access to the services and programs on the same terms as degree students. This includes University Health Services, Student Health Insurance Plan, McBurney Disability Resource Center, Office of Child Care and Family Resources, the Metro Bus Pass, Division of Information Technology (DoIT), UW Recreational Sports, Veterans Services and Military Assistance Center, and many more. Consult the online listing at Adult Career and Special Student Services (<http://continuingstudies.wisc.edu/advising/campus-resources.htm>) for more information.

## NONCREDIT CLASSES AND CERTIFICATES

### NONCREDIT CLASSES, UW–MADISON CONTINUING STUDIES

Students interested in supplementing their university credit courses with noncredit classes, certificates, and programs will find hundreds of opportunities through the Division of Continuing Studies Department of Liberal Arts and Applied Studies. The *Continuing Studies Catalog* is published three times a year and may be viewed online or requested from

the Division of Continuing Studies, 21 North Park Street, Madison, WI 3715-1218; 608-262-1156; fax 608-265-4555.

## ACADEMIC CALENDAR

### ACADEMIC CALENDAR

Establishment of the academic calendar (<https://www.secfac.wisc.edu/academic-calendar.htm>) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. Approximately every five years, the Faculty Senate approves a new academic calendar which spans a future five-year period.

The current calendar was adopted by the Faculty Senate in September 2016.

## CAPSTONES

Capstone certificates allow students with a bachelor's degree to obtain additional professional skills and certification. Designed for nontraditional students and working professionals, capstone certificates reflect a focused collection of graduate-level courses approved by the Graduate School. Capstone certificate programs do not lead to the conferral of a degree, but do appear on a student's UW–Madison transcript. Programs offering capstone certificates monitor all application, academic, and satisfactory progress requirements.

Capstone certificate students fall under the campus category of University Special students as these students are not in degree status. Adult Career and Special Student Services (ACSSS) is the admitting and academic dean's office for all University Special students. The academic dean is responsible for issues related to student enrollment and the student's official record, including credit limits, eligibility to continue, disciplinary holds, and withdrawal approval.

The ACSSS dean and student services coordinator work closely with each department's capstone certificate coordinator at each step of the process: advising, admissions, enrollment eligibility, and program completion. Eligibility rules for University Special students apply, including a minimum 2.0 GPA and good academic standing. Each specific capstone certificate has additional criteria for program eligibility, final admission, and progress. Capstone certificates typically follow rules of the Graduate School (<https://grad.wisc.edu/acadpolicy>) (<https://grad.wisc.edu/acadpolicy/#enrollmentrequirements>) for tuition, credit limits, and grading (including no Pass/Fail option).

Once admitted, candidates will receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with enrollment instructions and information about tuition and deadlines. The capstone certificate coordinator will send specific information pertaining to enrollment in and completion of the capstone program.

- Actuarial Science, Capstone Certificate (p. 683)
- Bioinformatics, Capstone Certificate (p. 685)
- Clinical Nurse Specialist – Adult/Gerontology (p. 685)
- Clinical Nutrition, Capstone Certificate (p. 686)
- Clinical Nutrition-Dietetic Internship, Capstone Certificate (p. 687)
- Clinical and Community Outcomes, Capstone Certificate (p. 688)

- Communication Sciences and Disorders, Capstone Certificate (p. 690)
- Computer Sciences for Professionals, Capstone Certificate (p. 691)
- Consumer Health Advocacy, Capstone Certificate (p. 694)
- Foundations of Professional Development, Capstone Certificate (p. 695)
- French Studies at the Graduate Level, Capstone Certificate (p. 696)
- Fundamentals of Clinical Research, Capstone Certificate (p. 697)
- Geodesign, Capstone Certificate (p. 698)
- Geographic Information Systems, Capstone Certificate (p. 698)
- Global Health, Capstone Certificate (p. 700)
- Infant, Early Childhood and Family Mental Health, Capstone Certificate (p. 701)
- International Politics and Practice, Capstone Certificate (p. 703)
- Leadership for Population Health Improvement, Capstone Certificate (p. 704)
- Nurse Educator, Capstone Certificate (p. 705)
- Post-Graduate Psychiatric Nursing, Capstone Certificate (p. 706)
- Power Conversion and Control, Capstone Certificate (p. 707)
- User Experience Design, Capstone Certificate (p. 709)

## HOW TO GET IN

Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

There are two steps to apply for admission to a capstone certificate program:

1. Complete the online University Special student application (<http://continuingstudies.wisc.edu/advising/apply.htm>) This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. Complete all application materials required by the specific capstone certificate program.

Once admitted, candidates will receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with enrollment instructions and information about tuition and deadlines. The capstone certificate coordinator also will send specific information pertaining to enrollment in and completion of the capstone program.

## ACTUARIAL SCIENCE, CAPSTONE CERTIFICATE

The Capstone Certificate in Actuarial Science at the School of Business is a tailored program designed to prepare students for their career as an actuary. The capstone is not a degree program. It is a high-quality certificate program designed to quickly and effectively prepare students to successfully pass the professional credentialing exams required by the Casualty Actuarial Society (CAS) or the Society of Actuaries (SOA). A key strength of the capstone program is its flexibility and relatively short time to completion. Students can choose either a full-time or part-time learning track. When taking classes full-time, students can expect to complete the program and have their certificate in nine months. Students

enrolled part-time must take a minimum of one class each semester, and can take up to three years to complete the program with exceptions being made for special cases.

Students accepted into the capstone certificate program have a strong mathematics background and are interested in applying that strength to the actuarial science profession. Capstone students will take classes in actuarial mathematics, predictive modeling, and loss models, and have the option to take other classes with consent from faculty. Students will receive a transcript from the University of Wisconsin–Madison and will gain access to key resources (<http://bus.wisc.edu/knowledge-expertise/students>) offered to School of Business students. Further detail is provided at the School of Business website (<http://bus.wisc.edu/degrees-programs/certificates/capstone/actuarial-science>).

## HOW TO GET IN

### ADMISSION

Applicants must possess a baccalaureate degree. Applications are accepted for both fall and spring semesters. Admitted students will have the opportunity to take prerequisite math courses in their semester before starting the program. All application materials must be received by the deadline (<http://bus.wisc.edu/degrees-programs/certificates/capstone/actuarial-science>) posted on the program website.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Actuarial Science
2. Application materials mailed to the School of Business, 975 University Avenue, Room 5252A, Madison, WI 53706—to include:
  - 3 letters of reference
  - Transcripts from all universities attended
  - Statement of purpose describing the applicant's interest and goals in actuarial science and how a certificate in actuarial science will help reach those goals
  - Resume or CV
  - TOEFL scores, if applicable (<http://bus.wisc.edu/degrees-programs/certificates/capstone/actuarial-science>)

### ENROLLMENT

Once admitted, candidates will receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with enrollment instructions and information about tuition and deadlines. The capstone certificate coordinator also will send specific information pertaining to enrollment in and completion of the capstone program.

Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

- Must have a minimum GPA of 2.000

| Code                          | Title                                    | Credits |
|-------------------------------|------------------------------------------|---------|
| <b>Actuarial Science Core</b> |                                          |         |
| ACT SCI 650                   | Actuarial Mathematics I                  | 3       |
| ACT SCI 651                   | Actuarial Mathematics II                 | 3       |
| ACT SCI 652                   | Loss Models I                            | 3       |
| ACT SCI 653                   | Loss Models II                           | 3       |
| <b>Specialization Core</b>    |                                          |         |

| STAT 312                                                    | Introduction to Theory and Methods of Mathematical Statistics II | 3       |
| ECON 101                                                    | Principles of Microeconomics                                     | 4       |
| ECON 102                                                    | Principles of Macroeconomics                                     | 3-4     |
| ECON 111                                                    | Principles of Economics-Accelerated Treatment                    | 4       |
| FINANCE/ECON 300                                            | Introduction to Finance                                          | 3       |
| FINANCE/ECON 320                                            | Investment Theory                                                | 3       |
| Review courses for actuarial examinations:                  |                                                                  |         |
| ACT SCI 300                                                 | Actuarial Science Methods I                                      | 1       |
| ACT SCI 301                                                 | Actuarial Science Methods II                                     | 1       |

## LEARNING OUTCOMES

The program teaches the actuarial concepts that will equip students to pass the preliminary professional actuarial exams accepted by the Society of Actuaries and the Casualty Actuarial Society. Students also learn the practical application of these concepts, experiencing real-world learning opportunities through contact with professionals currently working in actuarial science, risk management, and insurance.

Specifically, student learn to

- Solve problems using mathematics, statistics, risk management, finance, and economics
- Quantify risk for insurance companies, consulting firms, government agencies, or other organizations

## BIOINFORMATICS, CAPSTONE CERTIFICATE

### HOW TO GET IN

Admission to bioinformatics is currently suspended.

### REQUIREMENTS

- Must have a minimum GPA of 2.000
- Courses must have a grade of B or better to be accepted

| Code                                                | Title                                                                 | Credits |
|-----------------------------------------------------|-----------------------------------------------------------------------|---------|

## CLINICAL NURSE SPECIALIST – ADULT/GERONTOLOGY

The School of Nursing is launching the Clinical Nurse Specialist–Adult/Gerontology Capstone Certificate in fall 2017. Clinical Nurse Specialists

(CNSs) improve the health and well-being of patients, enhance the practice of nurses and nursing units, and improve the quality of health organizations and systems of care. The program will allow Clinical Nurse Specialists to pursue the formal education and certification necessary to support their title and role. Completion of the certification provides the academic credentials required for nurses to sit for national certification as a Clinical Nurse Specialist.

The 15 credits of required courses will be completed over three terms, fall, spring, and summer.

### HOW TO GET IN

#### Applicant requirements

- Master's degree from an accredited nursing program
- Current RN licensure in Wisconsin (or eligibility)
- Completion of prerequisite courses (3 credits each) in physiology, physical assessment, and pharmacology with a grade of B or better. Physiology and physical assessment must be within the previous 5 years and pharmacology must be within 3 years.

#### Admission

A complete application includes the following:

1. An online application for admission ([https://portal.sispub.wisc.edu:7042/psc/dcsapp/EMPLOYEE/HRMS/c/CTF\\_MENU.CTF\\_C\\_SIGNON.GBL?Page=CTF\\_C\\_SIGNON&Action=UCTF\\_ID=UW\\_DCS\\_IAPPLYTargetFrameName=UNCS%20Capstone%20Certificate&Action=UCTF\\_ID=UW\\_DCS\\_IAPPLYTargetFrameName=UNCS%20Capstone%20Certificate](https://portal.sispub.wisc.edu:7042/psc/dcsapp/EMPLOYEE/HRMS/c/CTF_MENU.CTF_C_SIGNON.GBL?Page=CTF_C_SIGNON&Action=UCTF_ID=UW_DCS_IAPPLYTargetFrameName=UNCS%20Capstone%20Certificate&Action=UCTF_ID=UW_DCS_IAPPLYTargetFrameName=UNCS%20Capstone%20Certificate)) as a University Special student, selecting UNCS Capstone Certificate and the program: Clinical Nurse Specialist–Adult/Gerontology. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. Additional steps as required by the School of Nursing.

#### Enrollment

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The School of Nursing will send an email to admitted students with specific information pertaining to enrollment in and completion of the capstone program.

### REQUIREMENTS

| Code        | Title                                                          | Credits |
|-------------|----------------------------------------------------------------|---------|
| NURSING 726 | Foundations for APN Clinical Practice I                        | 3       |
| NURSING 727 | Foundations for APN Clinical Practice II                       | 3       |
| NURSING 728 | Advanced Practice Clinical Application and Role Development I  | 3       |
| NURSING 729 | Advanced Practice Clinical Application and Role Development II | 3       |

|               |                                                                   |    |
|---------------|-------------------------------------------------------------------|----|
| NURSING 702   | Health Promotion and Disease<br>Prevention in Diverse Communities | 3  |
| Total Credits |                                                                   | 15 |

- General chemistry
- 2 courses in biological sciences
- 1 course in each of the following: organic chemistry, biochemistry, physiology, statistics
- 2 courses in nutrition (human nutrition, clinical nutrition)

## LEARNING OUTCOMES

### Student learning goals

After successful completion of the CNS Capstone Certificate Program the graduate will be eligible to sit for national certification as a clinical nurse specialist in adult-gerontology. Eligibility will be verified through completion of 500 clinical practicum hours and achievement of the following learning goals:

1. Integrate nursing science with knowledge from the biophysical, psychosocial, analytical, and organizational sciences as the basis for advanced nursing practice in the CNS role.
2. Demonstrate advanced nursing knowledge of assessment and disease management in the adult-gerontological patient populations.
3. Demonstrate advanced levels of clinical judgment, systems thinking, and professional accountability in designing, delivering, and evaluating evidence-based care to support positive patient outcomes and systems of care.
4. Strategically practice and demonstrate effectiveness within the three spheres of influence that comprise CNS practice.
5. Guide, mentor, and support other nurses to achieve excellence in clinical nursing practice.

## CLINICAL NUTRITION, CAPSTONE CERTIFICATE

The UW–Madison Department of Nutritional Sciences offers a 12-credit online certificate program for professionals to build on knowledge and skills obtained in undergraduate studies and working experiences. It is designed to expand knowledge and give new experiences in areas such as critical care, nutrition support, complex nutritional assessment, nutrition counseling, advanced pediatrics, and clinical nutrition research. The 12-credit program can be completed in one year and consists of four 3-credit courses. Applicants must possess a bachelor's degree and may be admitted any term—fall, spring, or summer.

Further detail, including tuition and costs, is provided at the program's website (<http://nutrisci.wisc.edu/graduate/online-capstone-certificate-in-clinical-nutrition>).

## HOW TO GET IN

### ADMISSION

Applications are accepted all terms—fall, spring, and summer. Applicants must possess the following:

- Earned bachelor's degree or equivalent
- Minimum cumulative GPA  $\geq 3.0$  (on 4.0 scale)
- Completed Didactic Program in Dietetics **or** the following prerequisite courses:

**Note:** Applicants who do not have the prerequisites may apply to UW–Madison as a University Special student (p. 713) to complete them, prior to applying for capstone certificate admission.

### Application steps

Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the Department of Nutritional Sciences makes the final admission decision upon review of all applicant materials.

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Clinical Nutrition. This application is received and processed by ACSSS with final decision held for approval from the Clinical Nutrition Capstone Certificate coordinator.
2. Submit the following materials to the director of the Clinical Nutrition Capstone Program (<http://nutrisci.wisc.edu/graduate/online-capstone-certificate-in-clinical-nutrition>):
  - Official transcripts from all colleges/ universities attended
  - Brief essay describing your reasons for applying and your career goals
  - Resume or curriculum vitae

**Lynette M. Karls, MS, RD, CD**

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The director of the Capstone Certificate in Clinical Nutrition, Department of Nutritional Sciences, will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

- Must have a minimum GPA of 2.000
- Courses must have a grade of C or better to be accepted

| Code                    | Title | Credits |
|-------------------------|-------|---------|
| <b>Required Courses</b> |       |         |

|               |                                                                  |    |
|---------------|------------------------------------------------------------------|----|
| NUTR SCI 650  | Advanced Clinical Nutrition: Critical Care and Nutrition Support | 3  |
| NUTR SCI 651  | Advanced Clinical Nutrition - Pediatrics                         | 3  |
| NUTR SCI 652  | Advanced Nutrition Counseling and Education                      | 3  |
| NUTR SCI 653  | Clinical Nutrition Research                                      | 3  |
| Total Credits |                                                                  | 12 |

take the Registration exam administered by the Commission on Dietetic Registration (<http://cdrnet.org>) of the Academy of Nutrition and Dietetics (<http://www.eatright.org>).

Further detail about the program, including tuition and costs, is available at the Clinical Nutrition: Dietetic Internship (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship/main/31875>) website.

## HOW TO GET IN

### ADMISSION

The program accepts 12 interns each year, who start in the summer term. For details regarding the selection process, the program website should be consulted: UW-Madison Capstone Program in Clinical Nutrition-Dietetic Internship. (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship/applying/31880>) The following are the basic requirements:

- Have a bachelor's degree from an accredited college or university or its equivalent and a minimum grade point average of 2.80 on a 4.00 scale, as well as ACEND-accredited coursework requirements
- Have taken the GRE
- Have paid work experience in clinical nutrition and/or food service
- Thoroughly review the Dietetic Internship Application Process (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship/applying/31880>)
- Be either a citizen of the United States or able to maintain work authorization throughout the internship; UW Hospital and Clinics does not offer visa sponsorship to candidates for the Dietetic Internship Certificate program
- All applicants are advised to determine whether this program meets requirements for licensure in the state where they live. See the Commission on Dietetic Registration (<https://www.cdrnet.org/state-licensure>) website for contact information for state licensing boards.

Application steps:

Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students, including capstone certificate student. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

Step 1: Complete an online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Clinical Nutrition-Dietetic Internship. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

Step 2: Apply to DICAS, the Dietetic Internship Computerized Application System (<https://portal.dicas.org>), by the posted deadline. Additional application materials include two academic letters of reference (ideally from professors in food or nutrition, food service management, or science), one professional letter of reference from a supervisor who can comment on relevant work experience, a complete set of official transcripts for all institutions attended, a statement of reasons for post-baccalaureate studies, and a résumé or curriculum vitae.

Step 3: Register and participate in computer matching to D&D Digital Systems (<http://www.dnddigital.com>). Please note that D&D charges

## LEARNING OUTCOMES

Students will work directly with the same faculty who teach clinical nutrition on the UW-Madison campus. The instructors have many years of clinical nutrition teaching experience and are registered dietitians with the Academy of Nutrition and Dietetics. Many are practicing dietitians who understand the challenges professionals face in the workplace and the knowledge needed to succeed in the clinical nutrition profession.

Through the coursework, students will:

- Apply concepts of advanced-level nutrition skills to provide patient care and counseling
- Synthesize the latest research in clinical nutrition
- Demonstrate an capability to complete graduate-level work

## CLINICAL NUTRITION-DIETETIC INTERNSHIP, CAPSTONE CERTIFICATE

Developed through a partnership among the UW-Madison, UW Medical Foundation, UW Hospitals and Clinics (UWHC), and the UW School of Medicine and Public Health, the Dietetic Internship Certificate Program (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship/main/31875>) incorporates online advanced graduate-level courses in nutrition with supervised practice at our teaching hospital.

The UW Health Dietetic Internship Program is a 39-week supervised practice experience consisting of clinical supervised practice and advanced nutrition learning. The dietetic internship program has a medical nutrition therapy concentration. The program accepts 12 interns.

The internship includes one week of orientation with emphasis on health system informatics, 18 weeks of Clinical Nutrition-Medical Nutrition Therapy, three weeks of Clinical Nutrition-Pediatrics, four weeks of Clinical Nutrition-Ambulatory Medical Nutrition Therapy, one week of Clinical Nutrition-Research Theory, six weeks of Community Nutrition: Public Health and School Nutrition, and six weeks of Food Systems Administration. A minimum of 32 hours per week are spent in supervised practice during the fall and spring semesters. Extra time may be required to complete curriculum projects.

The internship is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). ACEND is recognized by the Council for Higher Education Accreditation (CHEA) and the United States Department of Education (USDE). Upon successful completion of the Capstone Certificate in Clinical Nutrition-Dietetic Internship, graduates receive a Certificate of Program Completion and a Verification Statement of Dietetic Internship Completion, and are then eligible to

a fee for the computer matching process. If the match is with the UW Hospital and Clinics Dietetic Internship, an invitation will be sent to submit a formal online employment application.

For assistance with steps 2 or 3 of the application process, contact the UW-Madison Capstone Program in Clinical Nutrition–Dietetic Internship. (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship/applying/31880>) Notification timeline (<http://www.uwhealth.org/health-professionals/internships/dietetic-internship-program-timeline/47218>) is provided on the website.

## ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The Dietetic Internship Program will send an email to admitted students with specific information pertaining to enrollment in and completion of the capstone program.

Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

- Must have a minimum GPA of 2.000
- Courses must have a grade of C or better to be accepted

| Code                     | Title                                                            | Credits |
|--------------------------|------------------------------------------------------------------|---------|
| <b>Core Courses</b>      |                                                                  |         |
| NUTR SCI 650             | Advanced Clinical Nutrition: Critical Care and Nutrition Support | 3       |
| NUTR SCI 651             | Advanced Clinical Nutrition - Pediatrics                         | 3       |
| NUTR SCI 652             | Advanced Nutrition Counseling and Education                      | 3       |
| NUTR SCI 653             | Clinical Nutrition Research                                      | 3       |
| <b>Practicum Courses</b> |                                                                  |         |
| NUTR SCI 670             | Nutrition and Dietetics Practicum I                              | 3       |
| NUTR SCI 671             | Nutrition and Dietetics Practicum II                             | 3       |
| Total Credits            |                                                                  | 18      |

## LEARNING OUTCOMES

Students will learn the following:

- Apply the study of metabolic demands of critical illness and how these alterations influence the nutritional needs of critical care patients
- Develop techniques for counseling and education for in-patient and out-patient care
- Assess research articles and solve clinical nutrition problems using research and analysis

Upon completion of the Dietetic Internship, students are eligible for the Registered Dietician exam and for employment and may continue on to graduate school.

## CLINICAL AND COMMUNITY OUTCOMES, CAPSTONE CERTIFICATE

The UW–Madison Certificate in Clinical and Community Outcomes Research (<https://ictr.wisc.edu/T2TRCertificate>) was designed to accommodate the training needs of researchers from a variety of disciplines at early stages of their careers. A certificate objective is to encourage innovative approaches to solving community health problems by involving faculty and students of diverse backgrounds and by providing course options from a range of disciplines. Participants have come from business, education, engineering, kinesiology, medicine, nursing, pharmacy, and population health. The certificate coursework covers a range of research methods and practical knowledge for use in finding solutions to real-world health problems facing our communities and clinics.

The certificate in clinical and community outcomes research curriculum consists of five courses and one project for a total of 13 to 15 credit hours. Depending on a student's course load, requirements are completed in two to three years. The certificate requirements are flexible in that you may propose qualifying courses to be considered as elective credit. All courses are face-to-face and taught on the UW–Madison campus during weekdays.

Further detail, including tuition and costs, is available at the Clinical & Community Outcomes website ([https://ictr.wisc.edu/certificate-research-programs/?\\_ga=1.132168526.1391686154.1484336426](https://ictr.wisc.edu/certificate-research-programs/?_ga=1.132168526.1391686154.1484336426)) or by contacting the institute which hosts the program:

Institute for Clinical and Translational Research  
University of Wisconsin–Madison  
4240 Health Sciences Learning Center  
750 Highland Avenue Madison, WI 53705

## HOW TO GET IN

### ADMISSION

Applicants must possess a baccalaureate degree and not be currently enrolled in a graduate or professional degree program. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

**Note:** This capstone certificate is not a full-time program and therefore cannot admit international students needing an F–1 or J–1 visa.

### APPLICATION STEPS

A complete application includes the following:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Clinical and Community Outcomes. This application

is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

2. Submission of materials to the capstone certificate program coordinator (<https://sites.google.com/a/wisc.edu/t2trcertificate/handbook/application-and-admission-information/capstone-certificate-application-guidelines>) : Sharon Schumacher, 701 Highland Ave., University of Wisconsin, Madison, WI 53705, [scschumache2@wisc.edu](mailto:scschumache2@wisc.edu):

- The fillable downloadable program application form (<https://docs.google.com/viewer?a=v&pid=sites&srcid=d2lzYy5lZHV8dDJ0cmNlcnRpZmljYXRlGd40>).
- A photocopy of official transcripts from each college attended,
- ACV/resume
- If English is not the native language or whose undergraduate instruction was not in English, official scores from the Test of English as a Foreign Language (TOEFL) or the Michigan English Language Assessment Battery (MELAB). An admitted Capstone applicant must have a TOEFL (paper-based) test score above 580; TOEFL computer-based test (CBT) score above 237; or MELAB score above 82.

#### Notification of admission to the capstone certificate program:

- Within three weeks after receiving a complete application, the applicant receives notice of the admission decision. Questions regarding the status of the application should be directed to the certificate program coordinator: Sharon Schumacher at [scschumache2@wisc.edu](mailto:scschumache2@wisc.edu) ([scschumache2@wisc.edu](mailto:scschumache2@wisc.edu)).

#### ENROLLMENT

Upon admission, the Certificate Faculty Advisory Committee reviews the student's stated research interests and recommends an adviser. At a meeting with the advisor, the program curriculum will be developed in relation to the student's learning and career objectives.

**The Adult Career and Special Student Services (ACSSS)** ACSSS will assist with enrollment questions (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>), connecting with other departments and offices on campus, and University policies and procedures (e.g., add, drop, and withdrawal process).

## REQUIREMENTS

- Must have a minimum GPA of 3.000

| Code                                            | Title                                                         | Credits |

| SOC/C&E SOC 750         | Research Methods in Sociology                                   | 3       |
| GEN&WS 900              | Approaches to Research in Women's Studies/Gender Studies        | 3       |
| MED PHYS/<br>I SY E 559 | Patient Safety and Error Reduction in Healthcare                | 2       |
| POP HLTH/<br>I SY E 875 | Assessment of Medical Technologies                              | 3       |

## LEARNING OUTCOMES

Students will learn to:

- Frame research questions, design research studies, and implement research methods that provide direct benefits to communities or organizations

- Formulate quasi-experimental and experimental field research designs
- Devise data gathering methods that are cognizant of organizational culture, values, staffing, and work flows

## COMMUNICATION SCIENCES AND DISORDERS, CAPSTONE CERTIFICATE

The UW–Madison Certificate in Communication Sciences and Disorders (<https://csd.wisc.edu/post-bac-certificate.htm>) is offered to students who have completed an undergraduate degree in a field other than communication sciences and disorders, and who wish to prepare themselves for admission to a graduate training program in communication sciences and disorders. The certificate is designed primarily for students who wish to pursue a clinical graduate degree (M.S. in speech–language pathology, or Au.D. in audiology), but is also appropriate for students from other fields who wish to pursue a research graduate degree in communication sciences and disorders.

The certificate is earned upon completion of the nine courses, to be completed in one academic year. Most capstone certificate students will take all nine courses (24 credits total), but in some cases one or two courses may be waived depending on coursework taken previously, during the undergraduate degree. The minimum number of credits required for the certificate is 18.

Further detail, including current tuition and costs, is provided on the program's website (<https://csd.wisc.edu/post-bac-certificate.htm>) or by contacting:

Post-baccalaureate Capstone Certificate Program  
Department of Communication Sciences and Disorders

608-262-6464

## HOW TO GET IN

### ADMISSION

Applicants must possess a baccalaureate degree with a minimum GPA of 3.0 on a 4.0 scale. Applications are accepted for the fall semester, with a priority deadline of May 1. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the Capstone Certificate program makes the final admission decision upon review of all applicant materials.

### APPLICATION STEPS

A complete application includes the following:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Communication Sciences and Disorders. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

2. Send to the Department of Communication Sciences and Disorders Graduate Studies Coordinator ([graduate@csd.wisc.edu](mailto:graduate@csd.wisc.edu)? Subject=Post-Bac Certificate Inquiry) via [graduate@csd.wisc.edu](mailto:graduate@csd.wisc.edu) or the address below:

- an official college transcript confirming completion of an undergraduate degree with a minimum GPA of 3.0 on a 4.0 scale, or proof that an undergraduate degree will be completed prior to beginning the capstone certificate program.
- an English proficiency test score if your native language is not English or if your undergraduate instruction was not in English

Post-Bac Capstone Certificate Program  
Department of Communication Sciences and Disorders  
University of Wisconsin-Madison  
1975 Willow Drive, Room 318  
Madison, WI 53706-1103

**Notification of acceptance to the program will be sent within four weeks of receiving an application.**

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The Department of Communication Sciences and Disorders will send specific information pertaining to enrollment in courses for fall and completion of the capstone program.

## REQUIREMENTS

- Must have a minimum GPA of 3.000
- Certificate requires 18 credits

| Code                                            | Title                                            | Credits |

| CS&D 699                     | Directed Study                                        | 3       |
| or CS&D 318                  | Voice, Craniofacial and Fluency Disorders             |         |
| Total Credits                |                                                       | 18      |

## LEARNING OUTCOMES

The certificate is designed primarily for students who wish to pursue a clinical graduate degree (M.S. in Speech-language Pathology, or Au.D. in Audiology), but is also appropriate for students from other fields who wish to pursue a research graduate degree in Communication Sciences and Disorders. Students will:

- Obtain knowledge of speech, language, voice, and hearing, as well as approaches to correcting disorders
- Observe testing, assessment, and treatment in real-world clinical settings

## COMPUTER SCIENCES FOR PROFESSIONALS, CAPSTONE CERTIFICATE

The Professional Capstone Certificate Program offered by UW–Madison Department of Computer Sciences is designed to prepare students for a career as a qualified software developer. Students must possess a bachelor's degree from a range of fields. Depending on background, the program can be completed in four to six semesters. Those totally new to computer sciences will begin with two introductory courses, COMP SCI 302 Introduction to Programming and COMP SCI 367 Introduction to Data Structures, followed by four additional courses to complete the program. Those with a basic background to computer sciences will skip the introductory courses. Designed for the working professional, many courses are offered in the evening. There is also an option to continue (part-time or full-time) in our Professional Master's Program to obtain an M.S. degree in computer sciences in another one to one-and-a-half years.

Further detail, including tuition and other cost, is available at the program website (<http://www.cs.wisc.edu/academics/graduate-programs/pcp>) or by contacting the department:

## HOW TO GET IN

### ADMISSION

Applicants must possess a baccalaureate degree. Applications are accepted on a rolling basis for each term. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the Department of Computer Sciences (<http://www.cs.wisc.edu/academics/graduate-programs>) makes the final admission decision upon review of all applicant materials. Please contact [pcp-admissions@cs.wisc.edu](mailto:pcp-admissions@cs.wisc.edu) ([pcp-admissions@cs.wisc.edu](mailto:pcp-admissions@cs.wisc.edu)? subject=PCP application question) for assistance with applying.

### Application steps

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Computer Science for Professionals.

2. The Professional Capstone Certificate Program Supplement form required by the department. It is provided on the program website or from [pcp-admissions@cs.wisc.edu](mailto:pcp-admissions@cs.wisc.edu). ([pcp-admissions@cs.wisc.edu?subject=PCP application question](mailto:pcp-admissions@cs.wisc.edu?subject=PCP%20application%20question))

## ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The Department of Computer Sciences will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

Additional detail about the enrollment process is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

- Must have a minimum GPA of 2.000
- Courses must have a grade of C or better to be accepted

## INTRODUCTORY COURSES

Prerequisite courses.

| Code         | Title                           | Credits |
|--------------|---------------------------------|---------|
| COMP SCI 302 | Introduction to Programming     | 3       |
| COMP SCI 367 | Introduction to Data Structures | 3       |

## FUNDAMENTAL COURSES

Take **four** from the following list:

| Code                    | Title                                                  | Credits |
|-------------------------|--------------------------------------------------------|---------|
| COMP SCI/E C E 354      | Machine Organization and Programming                   | 3       |
| COMP SCI/E C E 506      | Software Engineering                                   | 3       |
| COMP SCI/E C E/ M E 532 | Theory and Applications of Pattern Recognition         | 3       |
| COMP SCI 536            | Introduction to Programming Languages and Compilers    | 3       |
| COMP SCI 537            | Introduction to Operating Systems                      | 4       |
| COMP SCI 540            | Introduction to Artificial Intelligence                | 3       |
| COMP SCI/E C E 552      | Introduction to Computer Architecture                  | 3       |
| COMP SCI 564            | Database Management Systems: Design and Implementation | 4       |
| COMP SCI 570            | Introduction to Human-Computer Interaction             | 4       |
| COMP SCI 559            | Computer Graphics                                      | 3       |
| COMP SCI 577            | Introduction to Algorithms                             | 4       |
| COMP SCI 640            | Introduction to Computer Networks                      | 3       |

## 400 LEVEL COURSE REQUIREMENT

Select at least **two** from the following list:

| Code                           | Title                                                          | Credits |
|--------------------------------|----------------------------------------------------------------|---------|
| COMP SCI 402                   | Introducing Computer Science to K-12 Students                  | 2       |
| COMP SCI 407                   | Foundations of Mobile Systems and Applications                 | 3       |
| COMP SCI 412                   | Introduction to Numerical Methods                              | 3       |
| COMP SCI/I SY E/ MATH 425      | Introduction to Combinatorial Optimization                     | 3       |
| COMP SCI/E C E/ MATH 435       | Introduction to Cryptography                                   | 3       |
| COMP SCI/STAT 471              | Introduction to Computational Statistics                       | 3       |
| COMP SCI/MATH/ STAT 475        | Introduction to Combinatorics                                  | 3       |
| COMP SCI/E C E 506             | Software Engineering                                           | 3       |
| COMP SCI/ MATH 513             | Numerical Linear Algebra                                       | 3       |
| COMP SCI/ MATH 514             | Numerical Analysis                                             | 3       |
| COMP SCI 520                   | Introduction to Theory of Computing                            | 3       |
| COMP SCI/E C E/ I SY E 524     | Introduction to Optimization                                   | 3       |
| COMP SCI/I SY E/ MATH/STAT 525 | Linear Programming Methods                                     | 3       |
| COMP SCI/ I SY E 526           | Advanced Linear Programming                                    | 3-4     |
| COMP SCI/E C E/ M E 532        | Theory and Applications of Pattern Recognition                 | 3       |
| COMP SCI/E C E 533             | Image Processing                                               | 3       |
| COMP SCI 534                   | Computational Photography                                      | 3       |
| COMP SCI 536                   | Introduction to Programming Languages and Compilers            | 3       |
| COMP SCI 537                   | Introduction to Operating Systems                              | 4       |
| COMP SCI 538                   | Introduction to the Theory and Design of Programming Languages | 3       |
| COMP SCI/E C E/ M E 539        | Introduction to Artificial Neural Network and Fuzzy Systems    | 3       |
| COMP SCI 540                   | Introduction to Artificial Intelligence                        | 3       |
| COMP SCI 545                   | Natural Language and Computing                                 | 3       |
| COMP SCI 547                   | Computer Systems Modeling Fundamentals                         | 3       |
| COMP SCI/E C E 552             | Introduction to Computer Architecture                          | 3       |
| COMP SCI/I SY E/ M E 558       | Introduction to Computational Geometry                         | 3       |
| COMP SCI 559                   | Computer Graphics                                              | 3       |
| COMP SCI 564                   | Database Management Systems: Design and Implementation         | 4       |
| COMP SCI/B M I 567             | Medical Image Analysis                                         | 3       |
| COMP SCI 570                   | Introduction to Human-Computer Interaction                     | 4       |
| COMP SCI/B M I 576             | Introduction to Bioinformatics                                 | 3       |

## LEARNING OUTCOMES

Students will build a skill set in software development, analysis, and testing.

## CONSUMER HEALTH ADVOCACY, CAPSTONE CERTIFICATE

The UW–Madison Center for Patient Partnerships (CPP) (<http://www.patientpartnerships.org>) provides the online Consumer Health Advocacy Capstone Certificate (<https://www.patientpartnerships.org/education/adult-and-returning-students>) to educate learners interested in advocacy on behalf of anyone facing barriers to their health care. It is ideal for people who want to help their families get the care they need, change careers, or deepen existing professional practice. It is also for those that want to gain valuable direct patient service before enrolling in graduate or professional school, become professional health care advocates, or explore next steps without a clear view of what's on the horizon.

Within the certificate program the center offers two tracks (<https://www.patientpartnerships.org/education/courses>) focused on either individual-level patient advocacy or system/policy level health advocacy. Its educational approach (<http://www.patientpartnerships.org/education/our-educational-approach>) encourages hands-on learning by advocating for patients directly through the nation's only certificate program with an experiential Patient Advocacy Clinic. Students can complete the entire program from a distance (except a two-day, in-person orientation) or in a blended (in-person + online) format.

Students complete four 3-credit courses, for 12 graduate-level credits. On average, students take 12–18 months to complete the certificate program.

Further detail, including current tuition and costs, is available at the program's website (<https://www.patientpartnerships.org/education/adult-and-returning-students>) or contact below:

### HOW TO GET IN

Applicants must possess a baccalaureate degree. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials. All application materials must be received by the deadline posted on the program website.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Consumer Health Advocacy. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

2. An application and materials required by the Center for Patient Partnerships, with their certificate's online application provided on the program's website here (<https://www.patientpartnerships.org/education/apply>).

Materials required include:

- a personal statement,
- résumé,
- two references,
- one letter of recommendation,
- transcripts for any current program or coursework and all prior degrees,
- and a \$75 non-refundable application fee
- the Center for Patient Partnerships (CPP) application (<https://www.patientpartnerships.org/education/apply>)

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The coordinator for the capstone certificate will send an email to admitted students with specific information pertaining to enrollment in and completion of the capstone program.

### REQUIREMENTS

- Must have a minimum GPA of 3.000

| Optional Externship          |                                                             |           |
| <b>Total Credits</b>         |                                                             | <b>12</b> |

### LEARNING OUTCOMES

Students will

- Gain critical knowledge to successfully navigate medical, legal, insurance, and regulatory systems so you can ensure the best care for yourself or for others
- Access and apply information to solve problems and communicate effectively with doctors, lawyers, social workers, and insurance companies
- Develop analytical skills to assist with searches for clinical trials, decisions on medical care, and assessments of ethics and values that impact patient care

## FOUNDATIONS OF PROFESSIONAL DEVELOPMENT, CAPSTONE CERTIFICATE

This 9-credit certificate in professional leadership is fully online. Offered by the UW–Madison College of Engineering, it is completely multidisciplinary—with instructors from across the UW–Madison campus to provide critical insights on topics such as marketing, finance, project management, legal concepts, and information management. The certificate is built from a selection of 14 one-credit courses in areas such as information and project management, communication, marketing, negotiations, and legal studies. Each course is eight weeks. Throughout these course sprints, the student is immersed in projects alongside other professionals who share similar challenges and passions. Designed for working professionals, students may start the certificate program at the beginning of any 8-week session year round. Students work at their own pace, but may complete the certificate in as little as 10 month or as long as five years.

Further information, including tuition and costs, is available at the website of the Department of Engineering Professional Development (<https://epd.wisc.edu/online-degree/foundations-of-professional-development-certificate>).

### HOW TO GET IN

#### ADMISSION

Applicants must possess a baccalaureate degree. Applications are accepted on a rolling schedule. Students may begin the program at the start of any term (fall, spring, or summer). Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students, including capstone certificate students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

**Admission requirements for the Capstone Certificate Foundations of Professional Development program are:**

1. Hold bachelor's degree or equivalent credential from an accredited college or university.
2. A minimum undergraduate grade-point average (GPA) of 3.00 on the equivalent of the last 60 semester hours (approximately two years of work) or a master's degree with a minimum cumulative GPA of 3.00. Applicants from an international institution must have a strong academic performance comparable to a 3.00 for an undergraduate or master's degree.
3. Applicants whose native language is not English must provide scores from the Test of English as a Foreign Language (TOEFL). The minimum acceptable score on the TOEFL is 580 on the written version, 243 on the computer version, or 92 on the Internet version.

*Exceptions to standard admission requirements are considered by the admissions committee on an individual basis.*

#### Application steps

1. Communicate *Intent to Apply* to the program: Email the Chair of the Admissions Committee ([shainah.greene@wisc.edu](mailto:shainah.greene@wisc.edu)) and state an intent

to apply to the certificate. Attach an unofficial transcript that shows cumulative GPA and bachelor's degree received.

2. Submit an online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Foundations of Professional Development. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

3. Arrange to have transcripts of all previous educational institutions and a letter of recommendation sent directly to the Chair of the Admissions Committee (<https://epd.wisc.edu/online-degree/foundations-of-professional-development-certificate/#/apply>) for the capstone certificate program: Attn: Shainah Greene, 432 North Lake Street, Room 701, Madison, WI 53706

**Note:** Transcripts should be sent directly by the educational institution to the program.

The letter of recommendation should be from an employer or colleague. Use the Download Recommendation Form, ([http://epdfiles.engr.wisc.edu/pdf\\_web\\_files/distancedegrees/Letter\\_of\\_Rec\\_Form-CapstoneCert.pdf](http://epdfiles.engr.wisc.edu/pdf_web_files/distancedegrees/Letter_of_Rec_Form-CapstoneCert.pdf)) which should be e-mailed directly by your recommender to the Chair of the Admissions Committee ([shainah.greene@wisc.edu](mailto:shainah.greene@wisc.edu)).

4. After all of application materials have been received, the admissions committee chair contacts applicants for a phone interview. After the interview, the complete application will be presented to the Admissions Committee for evaluation at its next scheduled meeting.

#### Final admissions decision

Admission decisions are made in the order completed applications are received. The committee will make one of the following decisions:

- Recommend admission
- Defer consideration until the regular consideration review meeting.
- Decline further consideration of your application.

After a decision is made, the admissions committee chair will contact applicants by email to inform them of the decision and to schedule a time to discuss the decision and any next steps. The ACSSS is also notified of the final admission decision and completes the formal process for UW–Madison admissions.

#### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The Foundations in Professional Development program will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## LEARNING OUTCOMES

Our multidisciplinary approach includes instructors from various campus divisions to enhance your technical expertise with critical leadership skills. Learn how to:

- Deliver dynamic presentations
- Spot and analyze industry trends
- Lead teams
- Manage projects and change
- Negotiate effectively to get what you want
- Understand legal, financial and marketing concepts.
- Strategically manage complex information and projects in a digital environment
- Select and successfully apply effective communication strategies

- Employ proven methods to effectively and ethically work across disciplinary and organizational boundaries
- Recognize and analyze trends within your discipline and workplace

## FRENCH STUDIES AT THE GRADUATE LEVEL, CAPSTONE CERTIFICATE

### HOW TO GET IN

Admission to French studies at the graduate level is currently suspended.

### REQUIREMENTS

- Certificate requires 20 credits
- Must have a minimum GPA of 2.000 in concentration area

| Code                 | Title | Credits   |
|----------------------|-------|-----------|
| Required Courses     |       | 9         |

## FUNDAMENTALS OF CLINICAL RESEARCH, CAPSTONE CERTIFICATE

The Capstone Certificate in the Fundamentals of Clinical Research (<https://ictr.wisc.edu/CertificatePrograms>) is offered through the UW Madison Institute for Clinical and Translational Research (UW ICTR) (<https://ictr.wisc.edu>), part of a national consortium of patient care and research institutes funded by the National Institutes of Health (NIH) Clinical and Translational Science Awards (<https://ncats.nih.gov/ctsa/about>). The certificate allows students to understand and practice evidence-based research to help tackle the world's complex research questions—such as those in therapeutics, diagnostics, and preventative health care—and bring solutions to patients. Courses are taught by UW–Madison faculty in population health sciences, biostatistics, veterinary surgical sciences, oncology, and medical history and bioethics.

The fundamentals of clinical research certificate provides formal training and a practicum in research design and statistical analysis for professionals in health care, biotechnology, and the pharmaceutical industry. The certificate program requires at least 13 credits, which are completed on average in just under two years. Designed for the working professional, courses are offered after 4 p.m.

Further detail, including current tuition and cost, is available at the program website ([https://ictr.wisc.edu/certificate-research-programs/?\\_ga=1.90419418.1391686154.1484336426](https://ictr.wisc.edu/certificate-research-programs/?_ga=1.90419418.1391686154.1484336426)) or contact below:

[rec-education@hslc.wisc.edu](mailto:rec-education@hslc.wisc.edu) (Rec-Education@hslc.wisc.edu)

## HOW TO GET IN

Applicants must possess a baccalaureate degree. Applications are accepted for both fall and spring semesters. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials. All application materials must be received by the deadline posted on the program website.

**APPLICATION STEPS**

A complete application includes the following:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: **Actuarial Science**. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. Submit an application (<https://advanceyourcareer.wisc.edu/wordpress/wp-content/uploads/2016/01/CapstoneAppFN-15-9-21.docx>) to the capstone certificate program, which requires a copy of your biosketch, résumé, or curriculum vitae; a copy of official transcripts from each institution attended post-high school; a one-page statement of purpose; and a brief letter of recommendation stating interest and experience in clinical research, self-initiative, quality of work, record of publications and presentations, and financial or other support from a current department if applicable. This application form is posted on the Clinical Research Capstone Certificate website (<https://ictr.wisc.edu/documents/clinical-research-capstone-certificate-program-application>).

**ENROLLMENT**

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The program coordinator for the fundamentals of clinical research certificate program will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

## REQUIREMENTS

- Must have a minimum GPA of 3.000

| Code                                               | Title                                                                         | Credits |

| <b>Ethical Conduct of Research Requirement</b>     |                                                                               |         |
| Select one of the following:                       |                                                                               | 1-3     |
| SURG SCI 812                                       | Research Ethics and Career Development                                        |         |
| MED HIST 545                                       | Ethical and Regulatory Issues in Clinical Investigation                       |         |
| NURSING 802                                        | Ethics and the Responsible Conduct of Research                                |         |
| ONCOLOGY 675                                       | Advanced or Special Topics in Cancer Research (Approp Conduct in Sci )        |         |
| PHARMACY 800                                       | Research Ethics: Scientific Integrity and the Responsible Conduct of Research |         |
| OBS&GYN 955                                        | Responsible Conduct of Research for Biomedical Graduate Students              |         |
| Total Credits                                      |                                                                               | 13-15   |

## LEARNING OUTCOMES

Students will learn to

- Conduct better evidence-based research in your patient-centered clinical job
- Better analyze outcomes, behaviors, diagnoses, managed care, clinical trials, or other data

## GEODESIGN, CAPSTONE CERTIFICATE

### HOW TO GET IN

Admission to geodesign is currently suspended.

## REQUIREMENTS

- Must have a minimum GPA of 2.000

| Code                    | Title                 | Credits |
|-------------------------|-----------------------|---------|
| <b>Required Courses</b> |                       |         |
| LAND ARC 630            | Geodesign Foundations | 3       |
| LAND ARC 631            | Geodesign Methods     | 3       |

|               |                                                      |    |
|---------------|------------------------------------------------------|----|
| LAND ARC 633  | Geospatial Approaches to Conservation and Adaptation | 2  |
| LAND ARC 634  | Geodesign Capstone Project                           | 3  |
| LAND ARC 671  | Geodesign for Sustainability and Resiliency          | 3  |
| Total Credits |                                                      | 14 |

## GEOGRAPHIC INFORMATION SYSTEMS, CAPSTONE CERTIFICATE

The Department of Geography offers a one-year GIS certificate program intended to provide a mix of GIS theory and practical experience for many possible applications and fields such as: agriculture, archaeology, conservation, demography, economics, emergency management, law enforcement, earketing, natural resource management, public health, transportation, urban planning, wildlife ecology, and more.

Geographic information systems (GIS) is a discipline devoted to the acquisition, storage, management, analysis, and visualization of spatial data. GIS provides the ability to integrate and analyze spatial and non-spatial information for mapping, planning and decision-making.

The primary goal of the capstone certificate program is to ensure that students become sufficiently grounded in theoretical underpinnings of GIS to make informed use of existing GIS applications and gain skills needed to construct new applications in the physical or social realms. The full range of GIS capabilities is covered, including data capture, analysis, modeling and cartographic representation. Through hands-on exposure in the form of lab exercises, course projects, and an internship or independent project, experience will be acquired with major GIS software packages, including ArcGIS. By teaching concepts and hands-on use, the program differs from a typical short course designed for GIS training in a particular software package.

The program is intended to serve:

- recent graduates who wish to acquire technical expertise to support the topical knowledge gained in their undergraduate major
- returning students who wish to acquire specialized training to meet current (or future) job requirements calling for GIS knowledge

This program consists of **4 core courses**, a minimum of **1 elective** and an **independent capstone project**. Students must complete a minimum of 16 credits while in the program. It may be possible to transfer in 4 credits of required coursework taken previously (approval needed if taken at another institution).

The **2-credit capstone project** is tailored to individual backgrounds and interests. The program welcomes work-related projects by students who are presently employed. The capstone project can be taken any semester but should be taken in conjunction with or after taking G578 (Applications of GIS).

**Please note:** Students entering in spring semesters may need three semesters to complete coursework since the Geog 578 is not offered in the fall and requires Geog 377 as a prerequisite.

No certificate courses are offered in the summer.

Further detail, including tuition and costs, is provided at the GIS Certificate Program (<https://geography.wisc.edu/gis/giscertificateprogram/application-information>) website.

## HOW TO GET IN

### ADMISSION

Applicants must possess a baccalaureate degree. Applications are accepted for both fall and spring semesters. Deadlines for submitting applications to the GIS certificate program are April 15 for fall admission and October 15 for spring in order to be guaranteed full consideration. Applications received after these dates may be considered if space allows. There are no summer admissions. (Students may not be enrolled in another undergraduate or graduate program while enrolled in this capstone certificate program.)

**Admission is competitive.** The minimum requirements are:

- a bachelor's degree (preferably in a physical or social science)
- a minimum undergraduate grade point average (GPA) of 3.00 on a 4.00 scale; Graduate Record Examination (GRE) scores are not required.
- completion of an introductory course in statistical methods, or take an intro statistics course prior to taking the Advanced Quantitative Methods class (GEOG 560)
- submission of official student transcripts, a one-page statement of interest, and three letters of recommendation
- non-native English speakers must also submit a Test of English as a Foreign Language (TOEFL) score

Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials. Consult the GIS Program website (<https://geography.wisc.edu/gis/giscertificateprogram>) for further detail and assistance.

#### Application steps

1. Submit an online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Geographic Information Systems. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. Submit required materials to the GIS Certificate Program. Fill out their online supplemental application ([https://uwmadison.co1.qualtrics.com/jfe/form/SV\\_3ICoVdXcZHPThVr](https://uwmadison.co1.qualtrics.com/jfe/form/SV_3ICoVdXcZHPThVr)). This includes submission of the names and email addresses of two people who will write you letters of recommendation and upload a letter of interest (one-page essay). The GIS program will contact referees for their recommendation letters, but applicants should ensure they will write you a letter prior to submitting their names. Referees will be asked to submit letters of recommendation electronically.
3. Take steps to have official transcripts of all previous college work sent to: GIS Certificate Program, Department of Geography, 550 North Park Street, Science Hall, Madison, WI 53706
4. International students from non-English speaking countries must also submit TOEFL scores.
5. Deadlines for submitting applications to the GIS certificate program are April 15 for fall admission and October 15 for spring in order to be

guaranteed full consideration. Applications received after these dates may be considered if space allows.

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The Department of Geography–GIS Capstone Certificate Program will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

| GEOG 575                                                    | Interactive Cartography & Geovisualization        |         |
| <b>Internship/Capstone Course</b>                           |                                                   |         |
| GEOG 602                                                    | Internship                                        | 2       |
| Total Credits                                               |                                                   | 20-21   |

## LEARNING OUTCOMES

Students will

- Become grounded in the conceptual underpinnings of GIS technology in order to make informed use of current GIS applications
- Acquire the technological skills needed to construct new GIS applications in a wide variety of disciplines
- Use common GIS techniques to collect, analyze, process, and display geographic data
- Apply GIS to solve real-world problems
- Gain experience with common commercial and open-source GIS software

## GLOBAL HEALTH, CAPSTONE CERTIFICATE

The Global Health Capstone Certificate Program is based in the Department of Population Health Sciences at the School of Medicine and Public Health and is administered by the campuswide Global Health Institute.

The certificate curriculum focuses on global health topics and health issues that transcend national boundaries, emphasizing health and disease in developing countries. Through a **9-credit program** of preparatory course work and culminating in a global health field experience, students will be prepared to address health disparities in a context of cultural diversity. Certificate recipients may serve populations internationally or work among the increasingly diverse population of Wisconsin and the United States. Through core courses and electives, students may focus their studies on health promotion, detection and treatment of disease, prevention and management of outbreaks, health policy, environmental health, or other interdisciplinary topics.

To accommodate working professionals, the courses are offered in the evening.

Further detail, including current tuition and cost, is provided on the program's website. (<http://ghi.wisc.edu/education/professional-graduate-and-capstone>)

### HOW TO GET IN

#### ADMISSION

Applicants must possess a baccalaureate degree. Applications are accepted for fall semester with a deadline in late spring. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

#### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: [Global Health](#). This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. An application and materials submitted directly to the program, which includes:
  - an online application (<http://ghi.wisc.edu/education/professional-graduate-and-capstone/apply>) directly to the program. The application includes a personal statement (maximum 350 words) which require a description of global health interest and previous experience, career goals, and how the skills obtained in the certificate program will improve the health status of underserved populations
  - a resume and official transcripts for current programs and prior degrees sent to: Betsy Teigland ([teigland@wisc.edu](mailto:teigland@wisc.edu)) of the Global Health Institute located at 4270B Health

Sciences Learning Center, 750 Highland Avenue, Madison, WI 53705-2221.

#### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The Global Health Institute will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

### REQUIREMENTS

- Must have a minimum GPA of 3.000
- This certificate requires a total of 9 credits

#### CORE COURSES

| Code                 | Title                                                       | Credits  |
|----------------------|-------------------------------------------------------------|----------|
| POP HLTH 640         | Foundations in Global Health Practice                       | 1        |
| POP HLTH 718         | Principles of Global Health Care Systems                    | 2        |

## LEARNING OUTCOMES

Students will learn to

- Analyze health system infrastructures at local and national levels
- Create a health status profile for a defined population
- Develop a letter of inquiry seeking funding for a global health project
- Plan, conduct, and evaluate a global health experience

## INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH, CAPSTONE CERTIFICATE

The Capstone Certificate in Infant, Early Childhood, and Family Mental Health from UW–Madison (<http://infantmentalhealth.psychiatry.wisc.edu>) is an intensive, interdisciplinary, one or two year academic program for practicing professionals who work with families in the prenatal and postpartum periods and with children ages birth through five years. Following a cohort model, enrolled participants will be provided with two or three days of class instruction each month as well as small group and individualized opportunities to reflect upon and integrate program content into their professional work experiences. These experiences will contribute to an increased knowledge base and skills in providing appropriate screening, assessment, diagnostic and therapeutic intervention services to support the mental health of infants, young children and their families.

This program is designed for:

- Licensed mental health and health care professionals\* in clinical, counseling or school psychology, social work, marriage and family therapy, nursing, psychiatry, pediatrics or family medicine.
- Professionals from the fields of early childhood education, child development, family studies, occupational therapy, physical therapy, social work, or speech and language therapy. This includes those who provide direct services to young children and their families in Home Visiting, Birth to 3, Early Childhood Special Education, Early Head Start, Head Start, Childcare, and Child Protective Services programs who have a minimum of a bachelor's degree.

In addition to the certificate, students also acquire the knowledge and competencies to pursue Endorsement as an Infant Family Specialist, Infant Mental Health Specialist, or Infant Mental Health Mentor through the Wisconsin Alliance for Infant Mental Health (WI-AIMH) (<http://wiaimh.org>).

Courses for the capstone certificate program meet three days a month ([http://infantfamilymentalhealth.psychiatry.wisc.edu/?page\\_id=14/#typicalmonthlyschedule](http://infantfamilymentalhealth.psychiatry.wisc.edu/?page_id=14/#typicalmonthlyschedule)) during the academic year. All monthly sessions will be held face-to-face in Madison.

## HOW TO GET IN

### ADMISSION

All applicants must have a bachelor's degree from an accredited college or university or its equivalent and a minimum grade point average of 3.00 on a 4.00 scale. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials. All application materials must be received by the deadline posted on the program website.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Infant, Early Childhood and Family Mental Health. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. The certificate program application posted on the certificate program's application page ([http://infantfamilymentalhealth.psychiatry.wisc.edu/?page\\_id=40](http://infantfamilymentalhealth.psychiatry.wisc.edu/?page_id=40)) and additional materials to include:
  - an application packet which includes a current résumé or curriculum vitae
  - for licensed professionals, copies of your current licenses and/or credentials
  - two letters of reference:
    - One letter should be from a supervisor who is acquainted with applicant's applied experiences
    - Both letters should speak to professional qualifications of the applicant
  - transcripts for all college/university programs (undergraduate and graduate)

Send completed application and supporting materials for review by email or mail to:

Email:

Lynn Sankey, program coordinator, [lcsankey@wisc.edu](mailto:lcsankey@wisc.edu)

Subject: UW Infant, Early Childhood and Family Mental Health Capstone Certificate Program Application

Mail:

UW Infant, Early Childhood and Family Mental Health Capstone Certificate Program

WisPIC/Department of Psychiatry

6001 Research Park Boulevard

Madison, WI 53719

Fax: 608-263-0625—Attention: UW Infant, Early Childhood and Family Mental Health Capstone Certificate Program

## ADMISSION NOTIFICATION

Those who complete the application process and meet the capstone certificate program requirements will be offered an interview with the faculty program director or co-director. This will ensure that applicants have the appropriate background, prerequisites and that this capstone certificate program is a good fit for the applicant. This includes discussing applicant's access to work with young children ages birth to 5 years and their families in order to complete assignments and participate in case-based discussions.

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The Infant, Early Childhood and Family Mental Health Capstone Certificate Program will send an email to admitted students with specific information pertaining to enrollment in the courses and completion of the capstone program.

## REQUIREMENTS

- Must have a minimum GPA of 2.000

## HOW TO GET IN

### ADMISSION

Applicant requirements:

- Bachelor's degree. A baccalaureate degree from an accredited college or university.
- Undergraduate GPA of 3.0 or greater. This requirement may be waived under the following conditions:
  - a. For applicants holding a master's degree (original transcript required) or graduate certificate credential from an accredited college or university, or
  - b. For applicants able to demonstrate an ability to handle advanced coursework by completing graduate-level courses (transcript required) with a grade of B or higher, and/or
  - c. For applicants able to demonstrate substantial prior professional experience in the international field.

Students enroll in the summer terms. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the Department of Political Science makes the final admission decision upon review of all applicant materials.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: International Politics & Practice. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.
2. Submit to the capstone certificate program coordinator at the address below:
  - Official transcript(s) from all institutions attended.
  - A personal statement of approximately 500 words indicating your intellectual and practical interest in international affairs. How might you utilize an enhanced knowledge of international relations? The statement should also include a brief description of any life experiences in the international arena, including the dates, duration, and locations involved. What specific personal experiences best demonstrate your involvement in international affairs? What insights did you acquire from your experiences?
  - Note: The term "international affairs" is broadly understood to encompass diplomatic, military, business, administrative, non-

## LEARNING OUTCOMES

Those who complete this Capstone Certificate Program will have gained knowledge and competencies to assist them in pursuing endorsement as an Infant Family Specialist, Infant Mental Health Specialist or Infant Mental Health Mentor through the Wisconsin Infant Mental Health Endorsement, Wisconsin Alliance for Infant Mental Health (WI-AIMH).

Students will learn to

- Apply concepts of parent, infant, and early childhood mental health informed by developmental, neuroscience, and attachment research to support the social and emotional development and well-being of young children in the context of their family or caregiver relationships
- With a focus on parent-child early relationships, provide appropriate screening, assessment, diagnostic, and referral services for infants, young children, and families
- Provide therapeutic interventions and mental health consultation to families and professionals to reduce the impact of early-life trauma, loss, and disturbances before they become more serious disorders
- Use reflective practice and mindfulness strategies to support you and those you support in your work

## INTERNATIONAL POLITICS AND PRACTICE, CAPSTONE CERTIFICATE

The Department of Political Science designed the International Politics and Practice Capstone Certificate ([https://ippcc.polisci.wisc.edu/?\\_ga=1.56129003.1391686154.1484336426](https://ippcc.polisci.wisc.edu/?_ga=1.56129003.1391686154.1484336426)) (IPPCC) to educate learners who lead and serve professionally in the international arena. The program appeals especially to experienced, mid-career professionals in the fields of education, business, government, military, and non-governmental organizations. The IPPCC curriculum is entirely online and completed during the summer terms only.

The IPPCC curriculum builds advanced mastery in the core competencies of international relations: foreign policy, international political economy, international law and organizations, and international security. In each course, students take part in discussions with UW–Madison's international relations faculty and participate in assignments designed to hone their analytical skills.

Key strengths of the capstone program are its moderate time demands and relatively short time to completion. The IPPCC is a five-course, 13-

government organizations, education (teaching), and similar experiences.

- Indicate your ability in languages other than English, including an assessment of your level of competency in each language.
- A résumé or curriculum vitae highlighting relevant education and experience.

Submit all information to:

Eunsook Jung, Program Coordinator  
Department of Political Science  
University of Wisconsin–Madison  
305 North Hall  
1050 Bascom Mall  
Madison, WI 53706  
esjung@wisc.edu

## ENROLLMENT

Admitted students receive a formal letter of admission to UW-Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The Department of Political Science, International Politics and Practice Capstone Certificate coordinator will send an email to admitted students with specific information pertaining to enrollment in courses and completion of the capstone program.

## REQUIREMENTS

- Must have a minimum GPA of 3.000

## LEARNING OUTCOMES

Student will

- Acquire foundational knowledge of domestic and international policies that affect both national economic policymaking and developments in the world economy
- Identify the role of international financial institutions, trade and development, financial crisis, and the relationship between globalization and inequality
- Recognize and distinguish patterns of global governance and their impact over time
- Develop an understanding of the relationship between national and international security
- Apply important connections to real-world experiences

## LEADERSHIP FOR POPULATION HEALTH IMPROVEMENT, CAPSTONE CERTIFICATE

The Certificate in Leadership for Population Health Improvement ([https://mph.wisc.edu/leadershipcertificate?\\_ga=1.165698686.1391686154.1484336426](https://mph.wisc.edu/leadershipcertificate?_ga=1.165698686.1391686154.1484336426)) from UW–Madison's Department of Population Health Sciences (<https://mph.wisc.edu/leadershipcertificate>) engages participants to build upon their professional training and experience by providing new knowledge, skills, and cutting-edge strategies for population health improvement. Upon completion of this certificate program, participants will be prepared to identify opportunities for policy and system change and exercise stronger leadership skills, including planning, communication, collaboration, and negotiation.

The capstone certificate in leadership for population health improvement is designed for students who are interested in strengthening their capacity to contribute to population health improvement. The program is online and consists of four 3-credit courses. It is designed to be taken over a one-year period (summer-fall-spring), but can be extended to two years or more. The certificate is well-suited for participants with academic backgrounds in medicine, nursing, law, allied health, social work, pharmacy, business, public affairs and health systems engineering, specifically exposing leaders in other sectors to public health. Returning post-master's and post-doctoral students seeking professional development to complement their existing degrees may also consider this certificate. The certificate program is also an ideal introduction to population health during a "gap" year.

Further details, including tuition and costs, is provided on the certificate program website ([https://mph.wisc.edu/leadershipcertificate?\\_ga=1.165698686.1391686154.1484336426](https://mph.wisc.edu/leadershipcertificate?_ga=1.165698686.1391686154.1484336426)).

## HOW TO GET IN

### ADMISSION

Applicant requirements:

- Hold a baccalaureate degree (B.A. or B.S.) from a regionally accredited U.S. institution or equivalent.
- Provide evidence of strong academic performance comparable to a "B" grade point average or above in undergraduate or graduate course work.
- Some professional experience is preferred but not required.

Applications are accepted on a rolling basis. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the

program: Leadership for Population Health Improvement. This application is received and processed by ACSSS with final decision held for approval from the specific Capstone Certificate coordinator.

2. Submit the following materials to the MPH Program in the Department of Population Health Sciences ([mph@mailplus.wisc.edu](mailto:mph@mailplus.wisc.edu)) (email ([mph@mailplus.wisc.edu](mailto:mph@mailplus.wisc.edu))):

- Resume' or CV
- Official transcripts
- A personal statement that provides information about how the certificate will enhance the student's professional capacity and activities

For application or program information, contact:

| POP HLTH 785            | Health Systems, Management, and Policy       | 3       |
| POP HLTH 879            | Politics of Health Policy                    | 2-3     |
| POP HLTH 714            | Leadership for Population Health Improvement | 3       |
| Total Credits           |                                              | 11-12   |

## LEARNING OUTCOMES

Students will

- Identify opportunities to make effective policy and system changes
- Show strong leadership, communication, collaboration, and negotiation skills
- Apply concepts to improve the health of human populations

## NURSE EDUCATOR, CAPSTONE CERTIFICATE

The Nurse Educator Capstone Certificate Program (<https://nursing.wisc.edu/certificates/nurse-educator>) is for working, master's-prepared nurses who are currently teaching and would like to improve their skills, or for those who'd like to begin their teaching careers. The University of Wisconsin–Madison School of Nursing is internationally recognized for its evidence-based nursing education. Rather than simply offering a track within the curriculum, it trains nurse educators with a highly respected certificate program that you can complete in 3 semesters.

Designed for working professionals, the 9-credit Nurse Educator Capstone Certificate Program is offered online. There are also periodic face-to-face sessions on the UW–Madison campus and a teaching practicum that students can arrange close to home. Some complete the certificate within a calendar year, while others take two years or more, depending on their needs.

Students who complete the certificate are eligible to sit for the National League for Nursing (NLN) Certified Nurse Educator Examination. NLN recognizes the nurse educator role as a specialty area of practice.

Further detail, including tuition and costs, is available on the program website. (<https://nursing.wisc.edu/certificates/nurse-educator>)

UW–Madison School of Nursing  
 Signe Skott Cooper Hall  
 701 Highland Avenue  
 Madison, WI 53705  
 Phone: 608-263-5200

## HOW TO GET IN

### ADMISSIONS

Applicant minimal requirements:

- Master's degree from an accredited nursing program or currently enrolled in a DNP or Ph.D. in nursing program
- RN license
- MS GPA of 3.0

Students are admitted to begin in the spring term only, with an application deadline of November 1 and admission notification in December. A holistic review of all application materials occurs. Regardless of experience level, ideal candidates possess a desire to expand their knowledge and understanding of the science of nursing education. The program seeks candidates who are committed to providing evidence-based nursing education and who understand the demands of the program. Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the School of Nursing makes the final admission decision upon review of all applicant materials.

### APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University

Special student, selecting UNCS Capstone Certificate and the program: Nurse Educator. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

2. Submit required materials to the School of Nursing at the address below. To include in one envelope:

- Application Form (<https://nursing.wisc.edu/wp-content/uploads/2017/02/necp-application-form.pdf>) (download from the Nurse Educator certificate website)
- Nurse Educator Transcript Instruction Shee (<https://nursing.wisc.edu/wp-content/uploads/2017/02/transcript-instructions-necp.pdf>) (download from the program page (<https://nursing.wisc.edu/certificates/nurse-educator>))
- Postgraduate Education Statement (1,000 words or less)
- Curriculum vitae or resume
- Photocopy of nursing license from your current state of residence

In addition, three letters of recommendation sent directly to the address below.

Submit All Materials To:

NECP Coordinator/Graduate Admissions  
UW–Madison School of Nursing  
Suite 1100 Cooper Hall  
701 Highland Avenue  
Madison WI 53705

Applicants will receive admissions decision in December.

## ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information.

The School of Nursing will send an email to admitted students with specific information pertaining to enrollment in courses for spring and completion of the capstone program.

## REQUIREMENTS

- Must have a minimum GPA of 2.000
- Certificate requires 9 credits

| Code                    | Title                                                                     | Credits |
|-------------------------|---------------------------------------------------------------------------|---------|
| <b>Required Courses</b> |                                                                           |         |
| NURSING 785             | Foundations of Curriculum Development and Evaluation in Nursing Education | 3       |
| NURSING 786             | Foundations of Teaching and Learning in Nursing                           | 3       |
| NURSING 787             | Nursing Education Practicum                                               | 3       |
| Total Credits           |                                                                           | 9       |

## LEARNING OUTCOMES

Student will learn to

- Write and assess curriculum

- Learn to teach in the classroom, the lab, and in clinical and simulation settings

Students who complete the certificate are eligible to sit for the National League for Nursing (NLN) Certified Nurse Educator Examination. NLN recognizes the nurse educator role as a specialty area of practice.

## POST-GRADUATE PSYCHIATRIC NURSING, CAPSTONE CERTIFICATE

The UW–Madison School of Nursing offers this online/hybrid Post-Graduate Psychiatric Nursing (<https://nursing.wisc.edu/certificates/psych-nursing>) Capstone Certificate. It provides the opportunity for nurses who already hold a masters or doctoral degree to gain skills and knowledge to be an expert mental health practitioner.

The certificate program requires a minimum of 18 credits. It begins in summer and takes a year and a half to complete. Students spend the first summer taking a three credit psychopharmacology course. During the fall/spring/fall semesters, students take one foundation course and one application course, which brings together classroom and online learning with clinical experiences. Students spend a full day on campus every other week for class meetings and spend two to three days per week in clinical placements. This blended approach provides access to courses even for those who live outside of Madison, with readings and discussions online.

Students work two full days per week in clinical practice. Faculty will actively seek to secure a clinical placement that provides a balance of skills and breadth of professional experience across the full lifespan of patients, while doing their best to accommodate the student's family and professional responsibilities.

The Post-Graduate Psychiatric Nursing Capstone Certificate will be completed in just 16 months.

Further detail, including current tuition and costs, is available at the program's website (<https://nursing.wisc.edu/certificates/psych-nursing>) or by contacting the School of Nursing.

UW–Madison School of Nursing  
Signe Skott Cooper Hall  
701 Highland Avenue

## HOW TO GET IN

Applicant requirements

- Bachelor's degree from an accredited nursing program
- Master's degree from an accredited nursing program
- RN license
- Certification as an advanced practice nurse or eligible to apply for certification as an advanced practice nurse
- Completion of prerequisite courses in advanced assessment across the lifespan, pathophysiology, and pharmacotherapeutics prior to starting the certificat

The School of Nursing conducts a holistic review of all application materials. Regardless of experience level, ideal candidates possess

a desire to improve their ability to deliver complex care and expand their knowledge and understanding of the specialty. The program seeks candidates who are committed to providing care to underserved populations in need of services. Since the program requires a significant time expenditure for clinical training and coursework, candidates must understand these demands and indicate they are prepared to make time in their schedules accordingly.

Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the School of Nursing which offers the capstone certificate program makes the final admission decision upon review of all applicant materials.

## APPLICATION STEPS

A complete application includes the following information:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Post Graduate Psychiatric Nursing. This application is received and processed by ACSSS with final decision held for approval from the specific Capstone Certificate coordinator. Seek three (3) letters of recommendation
2. An application and required materials to the School of Nursing at the address below:
  - Application Checklist (<https://nursing.wisc.edu/wp-content/uploads/2017/02/application-checklist-psych-nursing.pdf>) (download at program website (<https://nursing.wisc.edu/certificates/psych-nursing>))
  - Psychiatric Nursing Transcript Instruction Sheet (<https://nursing.wisc.edu/wp-content/uploads/2017/02/transcript-instructions-psych-nursing.pdf>) (download at program website (<https://nursing.wisc.edu/certificates/psych-nursing>))
  - Official transcripts
  - Postgraduate Education Statement
  - Curriculum vitae or resume
  - Photocopy of nursing license from your current state of residence
  - Photocopy of advanced practice certification (if you are an APN)

### Submit All Materials to:

PMHC Coordinator/Graduate Admissions  
UW–Madison School of Nursing  
Suite 1100 Cooper Hall  
701 Highland Avenue  
Madison WI 53705

### ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The Psychiatric Nursing Certificate Program will send an email to admitted students with specific information pertaining to enrollment in and completion of the capstone program.

| <b>Clinical Practicum Experience</b> |                                                                |         |
| Select 6 credits from the following: |                                                                | 6       |
| NURSING 728                          | Advanced Practice Clinical Application and Role Development I  |         |
| NURSING 729                          | Advanced Practice Clinical Application and Role Development II |         |
| NURSING 828                          | Clinical Leadership III                                        |         |
| Total Credits                        |                                                                | 18      |

## LEARNING OUTCOMES

Students learn to

- Apply concepts of psychopharmacology to assess, monitor, evaluate, and educate patients across their lifespan
- Make clinical decisions that connect concepts of health promotion, illness prevention, and common health conditions, with a population focus; includes complex and chronic health conditions and coordination of complex care across systems and settings
- Apply advanced mental health assessment skills
- Collaborate with faculty and a clinical preceptor to build clinical leadership skills

## POWER CONVERSION AND CONTROL, CAPSTONE CERTIFICATE

The Power Conversion and Control Capstone Certificate ([https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?\\_ga=1.169457889.1391686154.1484336426/#/courseanddegreeplan](https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?_ga=1.169457889.1391686154.1484336426/#/courseanddegreeplan)) addresses the learning goals of practicing engineers by providing further study with senior, highly respected faculty in the UW-Madison College of Engineering. It provides engineers with an opportunity for gaining more specialized expertise, including more technical knowledge of power electronics, drives, and controls. The certificate also provides a “stepping stone” for students wishing to apply for admission the university’s online Master of Science: Electrical Engineering (Power Engineering) or Master of Science: Mechanical Engineering (Controls) degree programs.

The certificate was developed in response to needs identified by more than 80 corporate sponsors of the renowned Wisconsin Electric

Machines and Power Electronics Consortium (WEMPEC) (<http://www.wempec.wisc.edu>).

The format of the Power Conversion and Controls Capstone Certificate is completely online to accommodate working professionals. The 9-credit capstone certificate was designed for completion in three consecutive terms of 3 credits per term. Or, students may complete it in two terms by taking two courses in a semester. (Basic courses in electro-mechanical energy conversion E C E 355 Electromechanical Energy Conversion) and electronic switching circuits or demonstrated knowledge in these areas are recommended as prerequisites.)

Further details, including current tuition and costs, is provided on the program's website ([https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?\\_ga=1.169457889.1391686154.1484336426/#/courseanddegreeplan](https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?_ga=1.169457889.1391686154.1484336426/#/courseanddegreeplan)) or by contacting the department:

## DEPARTMENT OF ENGINEERING PROFESSIONAL DEVELOPMENT

432 North Lake Street  
Madison, WI 53706  
800-462-9876

## HOW TO GET IN

### APPLICANT REQUIREMENTS

*Exceptions to standard admission requirements are considered by the admissions committee on an individual basis.*

- **A B.S. degree** from a program accredited by the Accreditation Board for Engineering and Technology (ABET) or the equivalent.\*
- **A minimum undergraduate grade-point average (GPA) of 3.00** on the equivalent of the last 60 semester hours (approximately two years of work) or a master's degree with a minimum cumulative GPA of 3.00. Applicants from an international institution must have a strong academic performance comparable to a 3.00 for an undergraduate or master's degree. All GPAs are based on a 4.00 scale.
- **Applicants whose native language is not English** must provide scores from the Test of English as a Foreign Language (TOEFL). The minimum acceptable score on the TOEFL is 580 on the written version, 243 on the computer version, or 92 on the Internet version.

\*Equivalency to an ABET accredited program: Applicants who do not have bachelor's degree from an ABET accredited program may also qualify for admission to the program. Such applicants must have a B.S. in science, technology, or a related field with sufficient coursework and professional experience to demonstrate proficiency in engineering practice. Registration as a professional engineer by examination, if achieved, should be documented to support your application.

### ADMISSION

**Applications are accepted for admission for all three terms (fall, spring, and summer) - but have admission deadlines that must be met.** The admissions process has been designed to conduct a holistic review of likely success in the program. Decisions are based on academic and professional background. **See the program's website for current dates and information regarding selection of students.** ([https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?\\_ga=1.90871258.1391686154.1484336426/#/admission](https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?_ga=1.90871258.1391686154.1484336426/#/admission))

Note: Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the Capstone Certificate program makes the final admission decision upon review of all applicant materials.

### APPLICATION STEPS

1. Email the Chair of the Admissions Committee ([daryl.haessig@wisc.edu](mailto:daryl.haessig@wisc.edu)) in the department to state an intent to apply to the power conversion program. Indicate if you intend to apply to a degree program upon successful completion of the capstone certificate. Attach a current resume or CV to the Intent to Apply email. Current chair: [daryl.haessig@wisc.edu](mailto:daryl.haessig@wisc.edu)

Your resume/CV should include at least:

- Educational history (including GPA, awards and honors received).
- Professional work experience (including specific details on your engineering experience, technical training, and responsibilities).
- Listing of professional association memberships, advanced training (such as a PE license) and other noteworthy, engineering-related details.

2. Submit an online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: Power Conversion and Control. This application is received and processed by ACSSS with final decision held for approval from the specific capstone certificate coordinator.

3. Following steps outlined by the program ([https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?\\_ga=1.90871258.1391686154.1484336426/#/apply](https://epd.wisc.edu/online-degree/power-conversion-and-power-controls-certificate/?_ga=1.90871258.1391686154.1484336426/#/apply)), request transcripts of all previous college work and two letters of recommendations are sent to the department as follows:

College of Engineering Online Admissions Office  
Attention: Daryl Haessig  
432 North Lake Street, Room 8715  
Madison, WI 53706

For pdf's, use the following email address: [daryl.haessig@wisc.edu](mailto:daryl.haessig@wisc.edu)

For the two (2) letters of recommendation, use the Download Recommendation Form. The recommenders should send the statement directly to the program coordinator. At least one letter should be from your current or previous direct supervisor. Academic references are acceptable for applicants who have been out of school less than five years.

4. Complete a phone interview.

The admissions committee chair will schedule a phone interview with candidates after all application materials are received. Once completed, the application will be presented to the Admissions Committee for evaluation at the next scheduled meeting.

5. Notification of admissions decision

Admission decisions are made on applications in the order received.

The committee will make one of the following decisions:

- Recommend admission
- Defer consideration until the regular consideration review meeting.
- Request additional information before evaluating further.
- Decline further consideration of your application.

## ENROLLMENT

After a decision has been made, the admissions committee chair contacts applicants by email to inform of the decision and to schedule a time to discuss the decision and next steps.

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

## REQUIREMENTS

- Must have a minimum GPA of 2.000

| Code                       | Title                               | Credits |
|----------------------------|-------------------------------------|---------|
| <b>Prerequisite Course</b> |                                     |         |
| E C E 355                  | Electromechanical Energy Conversion | 3       |

| Code                    | Title                                  | Credits |
|-------------------------|----------------------------------------|---------|
| <b>Required Courses</b> |                                        |         |
| E C E 411               | Introduction to Electric Drive Systems | 3       |
| E C E 412               | Power Electronic Circuits              | 3       |
| M E 446                 | Automatic Controls                     | 3       |
| Total Credits           |                                        | 9       |

## LEARNING OUTCOMES

Students will

- Apply concepts of the latest innovations in power electronics, electric machines, electric drives, and automatic controls
- Articulate the key performance objectives of a controlled electric drive system
- Analyze the performance metrics of an electric machine-driven or power-driven system
- Complete the preliminary designs of automatic controlled systems using power electronic circuits

## USER EXPERIENCE DESIGN, CAPSTONE CERTIFICATE

User experience design is the process of making information systems more people-friendly. The University of Wisconsin–Madison User Experience Design Capstone Certificate, (<http://hci.wisc.edu/madux>) or “Mad UX,” teaches what is needed to know to develop as a UX professional. Mad UX combines expertise from two highly ranked UW–

Madison academic departments: the Department of Computer Sciences and its HCI Lab and the UW–Madison iSchool.

The Mad UX certificate will accommodate both existing computing professionals whose expanding job responsibilities require a deeper understanding of user experience design, and people new to the technology workforce seeking introductory skills in user experience design.

The courses are completely online and taught by experienced and engaged instructors from UW–Madison’s computer sciences and iSchool programs, combining knowledge and networks from both the computing and information fields. Students are part of a cohort of learners who complete project-based activities and learn to work effectively as part of a virtual team. Students must successfully complete each course in succession to earn your certificate. The certificate takes one calendar year (fall, spring, summer) to complete the 10 credits.

Further detail, including tuition and costs, is available on the program’s website (<http://hci.wisc.edu/madux>).

## HOW TO GET IN

### ADMISSIONS

All applicants must:

- Have completed a bachelor’s degree (any subject area is relevant)
- Have a minimum undergraduate grade point average (GPA) of 3.00 on a 4.00 scale in the last 60 credits of that degree; Graduate Record Examination (GRE) scores are not required
- Not be enrolled in another University of Wisconsin undergraduate or graduate program while completing our UX certificate program
- Non-native English speakers submit a Test of English as a Foreign Language (TOEFL) score of 92 (Internet version) or better
- No prior computer programming experience required, however general experience with web, mobile, and other interactive technologies is useful and prior experience with Web content management systems or HTML/CSS is helpful.

Applications are accepted for only the fall term, with a deadline of May 1. (Applications received after these dates may be considered if space allows.) Adult Career and Special Student Services (ACSSS) is the admitting office for all University Special students. However, the department offering the capstone certificate program makes the final admission decision upon review of all applicant materials. The contact for capstone certificate questions via email: [userexperience@slis.wisc.edu](mailto:userexperience@slis.wisc.edu).

### APPLICATION STEPS

A complete application includes the following:

1. An online application for admission (<http://continuingstudies.wisc.edu/advising/apply.htm>) as a University Special student, selecting UNCS Capstone Certificate and the program: User Experience Design. This application is received and processed by ACSSS with the final admissions decision held for approval from the specific capstone certificate coordinator.
- In the application’s academic plan statement field, provide your statement of interest, answering the question: Why are you interested in Mad UX and what do you aim to get out of the program?

2. Have your official transcripts of previous college work sent to:

UX Certificate Program  
4217 HC White Hall  
600 North Park Street  
Madison, WI 53706  
c/o Certificate Coordinator Ms. Jenny Greiber

Further detail is provided at the UX Certificate Program Admissions page (<http://hci.wisc.edu/madux/admissions>).

## ENROLLMENT

Admitted students receive a formal letter of admission to UW–Madison from Adult Career and Special Student Services along with general enrollment information. Additional detail is provided on the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

The UX certificate program coordinator will send an email to admitted students with specific information pertaining to enrollment in and completion of the capstone program.

## REQUIREMENTS

| Code                                   | Title                           | Credits |
|----------------------------------------|---------------------------------|---------|
| <b>User Experience Design Core</b>     |                                 |         |
| L I S/COMP SCI 611                     | User Experience Design 1        | 3       |
| L I S/COMP SCI 612                     | User Experience Design 2        | 3       |
| L I S/COMP SCI 613                     | User Experience Design 3        | 3       |
| <b>User Experience Design Capstone</b> |                                 |         |
| L I S/COMP SCI 614                     | User Experience Design Capstone | 1       |
| Total Credits                          |                                 | 10      |

## LEARNING OUTCOMES

Students earning the MadUX certificate, will:

- learn theories, techniques and tools of digital design
- practice assessing user satisfaction with digital media
- practice different prototyping techniques
- collect and analyze data about users, user needs and use environments
- work to improve the usability, accessibility, and pleasure with which people interact with digital spaces over periods of time.

## GUEST AUDITOR

If you do not have interest in or need to earn college credit, but want to attend a university class on campus, guest auditing may be for you. The opportunity is only for lecture courses with the instructor's approval and if space is available. Established by Wisconsin law and Board of Regents policy, the tuition is reduced or waived depending on the type of guest auditor. There are two types:

1. Senior Guest Auditors are Wisconsin residents age 60 and older. Tuition is waived. (UGSR is the designation on the admissions application and course roster.)

2. A Guest Auditor is any student who is not currently enrolled in a degree program or does not plan to pursue a degree. Tuition for Guest auditors ([http://registrar.wisc.edu/tuition\\_&\\_fees.htm](http://registrar.wisc.edu/tuition_&_fees.htm)) is set at approximately 30% of the University Special/Undergraduate student tuition rate (and approximately 50% for non-Wisconsin residents). (UGST is the designation on the admissions application and course roster.)

- Disabled persons receiving SSI and SSDI may qualify for a tuition waiver under UW Board of Regents policy. At the time of admission, a Social Security Benefit letter and a Social Security release of information form must be provided to ACSSS. See more detail at How to Get In (p. 710).

Guest auditors have access to campus libraries and computer labs, but do not pay segregated fees so do not have access to the free Metro bus pass, University Health Services, or recreational facilities. It is possible to pay a Recreational Membership Fee (<http://recsports.wisc.edu/membership-details.htm#guest-audit-student>) to use campus recreational facilities.

## COURSE SELECTION

Auditing is defined as sitting in on a lecture course and not actively participating. Auditors may not recite, perform, or take examinations, although regular attendance is expected. Courses that by their nature require active participation or performance are **not** available on a Guest Auditor basis, but may be taken as a University Special in a credit-earning classification (<http://continuingstudies.wisc.edu/advising/univspec.htm>).

Classes typically **not** available to audit are:

- physical education activity classes
- conversational languages
- studio and performing arts
- writing, math, computer, and lab courses
- Independent Study, Directed Study, and other courses ending from -90 to -99
- seminar, research, and colloquium courses
- online courses

## GRADING FOR AUDITORS

Audited courses are listed on a student's official UW-Madison transcript with "AU" in place of number of credits and either "S" (satisfactory) or "NR" (no report) listed for the "grade." Prior to enrolling, Guest auditors discuss with the instructor the standard for earning an "S" in the particular course.

## HOW TO GET IN

How to Get in

There are two steps to become a student: (1) university admission and (2) course enrollment.

## ADMISSION

### SENIOR GUEST AUDITOR

If you are a Wisconsin resident, 60 years or older, and wish to qualify for tuition-free status, apply using the University Special student online application (<http://continuingstudies.wisc.edu/advising/audit60.htm>) at

least three weeks before the start of the term. UGSR is the designation on the admissions application and course roster.

An email confirmation email is sent from the Adult Career and Special Student Services with additional information. The process requires verification of Wisconsin Resident status (<http://registrar.wisc.edu/residence.htm>) and age. If ACSSS or the Residency Office needs further information to determine if these requirements are met, an email is sent to the applicant.

Returning auditors who have did not enroll in the most recent fall or spring term, the reentry application process (<http://continuingstudies.wisc.edu/cmsdocuments/reentry%20application%20process%20for%20ugsr.pdf>) provided in the MyUW/Student Center may be used.

Upon admission, a letter is mailed with additional information and enrollment instructions.

## GUEST AUDITOR

At least three weeks before the start of the term, apply using the University Special student online application (<http://continuingstudies.wisc.edu/advising/guests.htm>). UGST is the designation on the admissions application and course roster.

An email confirmation is sent from Adult Career and Special Student Services with additional information. Upon admission, a letter is mailed with enrollment instructions.

**Disabled persons receiving SSI and SSDI:** Wisconsin residents receiving SSI or SSDI and intending to enroll as a Guest Auditor may qualify for a tuition waiver under UW Board of Regents policy. To do so, a Social Security Benefit letter must be submitted to ACSSS at the time of applying for admission. In addition, a Social Security release of information form must be provided which authorizes release of information in order to become a cost-free auditor at UW–Madison. The form is available online here (<http://www.ssa.gov/online/ssa-3288.pdf>) or from a local Social Security office with addresses here (<http://www.ssa.gov>). After you successfully enroll in your course(s) as an auditor, email [advising@dcs.wisc.edu](mailto:advising@dcs.wisc.edu) to confirm all documents have been received and your tuition will be waived. *If you do not contact ACSSS immediately after your enrollment, you may receive a tuition bill and possible late fees.* If you require accommodations for a disability, see Reasonable Accommodations and Guest Auditor/Senior Guest Auditor Students ([http://continuingstudies.wisc.edu/cmsdocuments/Reasonable\\_Accommodations\\_and\\_Guest\\_AuditorFINAL.pdf](http://continuingstudies.wisc.edu/cmsdocuments/Reasonable_Accommodations_and_Guest_AuditorFINAL.pdf)) (pdf).

## ENROLLMENT PROCESS

Prior to enrollment, the student must be officially admitted to the university by ACSSS or in continuing student status as a Guest Auditor.

Guest Auditors and Senior Guest Auditors will use the same online enrollment tool used by all students. There are two major differences in the process:

1. Guest auditors/senior guest auditors may not enroll until the first day of class to allow the instructor to assess the availability of space. (For summer, the earliest enrollment day is in late May.)
2. Guest auditors/senior guest auditors must obtain instructor permission to enroll in the course. The instructor's permission must be entered in the enrollment system by a departmental staff member. Then the guest auditor will be able to enroll in the course.

ACSSS assists students with following these extra steps. Instructions are included with the letter of admission and provided online, including a video and tips at Enrollment Instructions for Guest Auditors (<http://continuingstudies.wisc.edu/advising/enroll-guest.htm>).

## HIGH SCHOOL STUDENTS

Qualified high school juniors or seniors may apply for admission to become eligible to enroll in a course at UW–Madison. A minimum high school GPA of 3.000 overall and in the most recent semester is required. Additional requirements include recommendations from high school personnel and academic qualification for the course(s) of interest. Students participating in an early college-credit program authorized by the Wisconsin Legislature and Department of Public Instruction must meet eligibility rules, deadlines, and procedural requirements of that program.

Enrollment in a course is contingent on satisfaction of course prerequisites and the availability of space after the needs of all degree-seeking students is fully satisfied. This is determined at the start of the semester.

Details regarding the options for high school students are provided on the ACSSS website (<http://continuingstudies.wisc.edu/advising/high-school.htm>).

## HOW TO GET IN

There are two steps to become a student: (1) university admission and (2) course enrollment.

## APPLICATION FOR ADMISSION

Before applying, the prospective student must (1) read the *admissions eligibility requirements* and *course selection guidelines* posted on the ACSSS website (<http://continuingstudies.wisc.edu/advising/high-school.htm>) and (2) meet with the high school guidance counselor to confirm that taking a UW–Madison course is a good fit. Students who intend to participate in an early college-credit program must review and complete the additional required steps by the deadline.

To seek admission, new students must submit the University Special student application (<http://continuingstudies.wisc.edu/advising/apply.htm>) by July 15 for fall, December 1 for spring, and six weeks before the start of summer term. *Note:* Continuing students from the previous term do **not** need to submit a new University Special student application for admission. Continuing students must inform the University Special student advisor of the desire to continue to the next term and submit all other required documents.

### On the application:

- Select "High School student" (UNHS) as the Special student type
- Respond to all items to avoid delays in processing your application
- UW–Madison Enrollment Plan Form ([http://continuingstudies.wisc.edu/cmsdocuments/Enrollment%20Plan%20for%20High%20School%20Students\\_3\\_2017.pdf](http://continuingstudies.wisc.edu/cmsdocuments/Enrollment%20Plan%20for%20High%20School%20Students_3_2017.pdf))—required each term, complete the form in its entirety for your application to be considered as a new student and to get approval from UW–Madison to enroll as a continuing student.
- Provide a recent high school transcript with a minimum cumulative grade point average (GPA) of 3.000 (B). Continuing students

must maintain a GPA of 3.000 at their high school in addition to a GPA of 2.000 at UW–Madison.

- AP B/C Calculus exam score (unofficial copy is fine) if planning to take Math 234. A score of 4 or higher is necessary to place into Math 234.
- Letter of recommendation from high school counselor or principal each term you wish to enroll.

Wait for notification of admission decision. If admitted, a letter of admission is sent from ACSSS and an enrollment invitation with earliest enrollment time via email from the Office of the Registrar.

## ENROLLMENT

The ACSSS advisor and admissions officer (<http://continuingstudies.wisc.edu/advising/high-school.htm>) for high school students will inform admitted students of their eligibility for requested courses and/or any space limitations.

To finalize eligibility to enroll, all new high school students must attend an orientation. More information about the orientation is included with the letter of admission. Orientation is held in late August for fall and early January for spring.

With an approved course selection, at the earliest enrollment time students are eligible to access the enrollment system via the MyUW Student Center following instructions provided by the advisor and viewed here (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

Being admitted does not guarantee enrollment. University Special students admitted in the high school classification (UNHS) enroll only when all other students have enrolled and have been accommodated on wait lists. Therefore, final enrollment may not be determined until after the first week of classes in some cases.

## OTHER

### Overview

Individuals who wish to enroll in a credit course, are not currently in a degree program at UW–Madison, and do not fit the other types of University Special students may have unique needs to qualify for one of the classifications below.

### PRESELECTED BY A DEPARTMENT OR PROGRAM

Students in this classification have been selected to participate by a department in a specific course, seminar, institute, or workshop for credit. Admission requirements are established by the program or department, which makes the final admissions decision. These students are assessed tuition at the undergraduate student rate (Wisconsin resident or nonresident) unless a course has a nonstandard tuition rate.

Enrollment is for one term only for the specific course or program.

Students who wish to be considered for enrollment in a subsequent term must contact the Adult Career and Special Student Services office to request a change of classification based on their academic plans or goals.

### OTHERS/ONE TERM ONLY

University Special students typically require one of the following: (1) hold a baccalaureate degree, (2) are currently a degree student in good standing at another college, (3) are selected for a course, program,

institute, or Capstone Certificate, or (4) are a high school student in the early college credit program. There may be unique needs or circumstances that allow a student to qualify for admission without satisfying any of these requirements. For consideration, a conversation with an advisor who approves admission is necessary. **Note:** Individuals who have been denied admission or missed the deadline to apply by undergraduate admissions are not eligible for admission as a University Special student.

## FULL-TIME ESL PROGRAM

The Intensive English Program (IEP) (<https://english.wisc.edu/esl/intensive-english-program.htm>) at UW-Madison provides quality academic instruction to adults who wish to improve their proficiency in English. IEP offers full-time, 15-week programs in the Fall and Spring semesters and an 8-week Summer program. The classes range from lower-intermediate (A2) to advanced level (C1). Beginning-level instruction (A1) is not offered. When you join IEP you are a UW–Madison student in University Special student status, with full access to all UW-Madison student facilities.

As a student in IEP you will learn to:

- Speak accurately and fluently
- Express your ideas in writing
- Understand lectures and informal speech
- Read efficiently and quickly
- Become confident in your English

Part-time enrollment is available to adults who already in Madison to live, work, or study.

## HOW TO GET IN

### How to Get in

**There are two steps to become a University Special student: (1) university admission and (2) course enrollment.**

### PRESELECTED BY A DEPARTMENT OR PROGRAM

Admission requirements are established by the department and program, which screens prospective students and provides information regarding the steps to complete an application for admission. The steps will include completion of a University Special student application (<http://continuingstudies.wisc.edu/advising/apply.htm>), in addition to any specific program or department requirements. UNPS is the designation on the admissions application and course roster.

Once admitted to the university, enrollment instructions which are customized for the department or program with specific course numbers are provided to the student.

### OTHERS/ONE TERM ONLY

Prospective students who have consulted with an advisor and received support for admission in this classification, apply using the University Special students application - indicating their academic goal and name of the advisor. Applying at least one month before the start of the term (early August for fall; early December for spring) is recommended as it takes 1-2 weeks to review and process an application. Enrollment for summer term usually begins in early April, so applying by early March is

recommended. UNOS is the designation on the admissions application and course roster.

There are two options for submitting a University Special Student application:

1. First-time students use Applying via the University Special Student application (<http://continuingstudies.wisc.edu/advising/apply.htm>)
2. Returning students may use the application above or apply as a reentry student via the Reentry application in the Student Center/My UW (<https://my.wisc.edu>) using a NetID.

Admitted students receive enrollment information. University Special students enroll via MyUW/Student Center at an earliest enrollment time - which is assigned at a date after degree students have enrolled.

For students in this classification, enrollment is typically 2-3 days before the beginning of a term, except in April for summer term. More detailed instruction is provided at the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>). The most common enrollment questions and issues facing University Special students are addressed on the ACSSS FAQ page (<http://continuingstudies.wisc.edu/advising/faq.htm#applying>).

## FULL-TIME ESL PROGRAM

IEP (<https://english.wisc.edu/esl/intensive-english-program.htm>) considers applicants for admission each term: fall, spring, or summer. By the application deadline, applicants must:

- be at least 18 years old and a high school graduate, and
- have a minimum of low-intermediate English speaking competency (A1). (Levels A1–C2 refer to the Common European Framework of Reference ([http://www.coe.int/t/dg4/linguistic/cadre1\\_en.asp](http://www.coe.int/t/dg4/linguistic/cadre1_en.asp)) for languages (CEFR).)
- provide official documentation of the source of funds for tuition and living expenses (such as a letter from the applicant's bank, scholarship board, or funding agency).
- provide a scan of the photo page of a valid passport.

Applicants must view the IEP website (<https://english.wisc.edu/esl/intensive-english-fees.htm>) for the current amount of tuition and living expenses, health insurance requirements, and application deadlines.

Applicants use the University Special student admissions form (<http://continuingstudies.wisc.edu/advising/apply.htm>), selecting UNES for the Full-time Study of English as a Second Language program.

After evaluating the application and documents, IES notifies the applicant of program acceptance and issues the Form I-20 which is required to request the student visa.

Admitted students receive detailed enrollment instructions from IEP.

## POST-BACCALAUREATE COURSE

Individuals who wish to enroll in a credit course, have at least a baccalaureate degree, and are not currently in a degree program at UW–Madison are eligible for admission as a University Special student in one of the two classifications listed below. These students are assessed tuition at the undergraduate student rate (Wisconsin resident or nonresident) unless a course has a nonstandard tuition rate. *Note:* Grades earned as a University Special student will not change a previous

cumulative undergraduate or graduate degree GPA earned at UW–Madison, including if a course is repeated.

## PROFESSIONAL OR PERSONAL ENRICHMENT (UNDS IS THE DESIGNATION ON THE ADMISSIONS APPLICATION AND COURSE ROSTER)—THIS INCLUDES:

- teachers, social workers, and others seeking enrollment for professional development
- graduate students from other US colleges and universities
- individuals seeking personal enrichment
- individuals wishing to explore an interest for further study
- students graduating and who wish to enroll in a course in the next term

## PREPARATION FOR ADMISSION TO GRADUATE OR PROFESSIONAL SCHOOL (UNRS)—THIS INCLUDES:

- individuals needing to complete required courses prior to applying to a graduate or professional school
- individuals who have been advised by the graduate program to being their studies as a University Special student. (Consult with the graduate coordinator regarding the policy on whether the credits earned may apply eventually toward a graduate degree.)

Applications for admission will be accepted up to the beginning of a term, although it is highly recommended that submission is at least three weeks in advance in order to take advantage of earliest enrollment times.

## HOW TO GET IN

How to Get in

There are two steps to become a student: (1) university admission and (2) course enrollment.

## ADMISSION

There is no application fee. Applying at least one month before the start of the term (early August for fall; early December for spring) is recommended as it can take 1-2 weeks to review and process an application. Enrollment for summer term usually begins in early April so applying by early March is recommended. With the listing of the degree completed, the institution, and the date, an official transcript is typically not needed. An email confirmation of the application is sent by ACSSS.

There are two options for submitting a University Special Student application:

1. First-time students use Applying via the University Special Student application (<http://continuingstudies.wisc.edu/advising/apply.htm>)
2. Returning students may use the application above or apply as a reentry student via the Reentry application in the Student Center/My UW (<https://my.wisc.edu>) using a NetID.

Once admitted, an admission letter from ACSSS is sent - typically within two weeks of providing all required information to ACSSS and the Office of the Registrar, Residence for Tuition Purposes (<http://registrar.wisc.edu/residence.htm>). The letter includes information regarding next steps and deadlines.

## ENROLLMENT

University Special students enroll via MyUW/Student Center at an earliest enrollment time - which is assigned at a date after most degree students have enrolled. This typically is three weeks before the beginning of a term, except in April for summer term. Admitted students receive enrollment information and find detailed instructions at the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>). The most common enrollment questions and issues facing University Special students are addressed on the ACSSS FAQ page (<http://continuingstudies.wisc.edu/advising/faq.htm#applying>).

As a University Special student you are eligible to enroll in any course for which you are qualified or receive instructor permission if there is space available. This includes both undergraduate and graduate level courses. Undergraduate courses at UW-Madison are numbered 100 to 699. Graduate level courses number 300 to 999.

## SHORT COURSE

The Farm & Industry Short Course (FISC) (<http://fisc.cals.wisc.edu>) is a 16-week, hands-on education for people who want to develop or expand the skills needed to work in production agriculture. The University of Wisconsin-Madison has offered the program for over a century and provided opportunities for generations of farmers to expand their career options. The credits earned are eligible for transfer to many four-year universities.

Classes begin in late fall and end in early spring—timed to coordinate with the nongrowing season in the Midwest. Courses are offered in the areas of soils, crops, dairy, meat animals, agricultural engineering, farm business planning, agribusiness, human relations, and communications. Students in their first year will earn a Certificate in Foundations of Farm Management (p. 715). (<https://fisc.cals.wisc.edu/prospective-students/courses-and-certificates>) This certificate serves as a prerequisite to returning for a second year to earn a certificate in one of the more specialized areas (<https://fisc.cals.wisc.edu/current-students/courses-and-certificates>) listed below.

Participants are UW-Madison students in University Special student status. They live on campus, enjoy all the benefits of being a UW-Madison student, and are encouraged to participate in campus groups, committees, and clubs—as well as athletic, social, and alumni events. A scholarship program is available. Current tuition, housing, and other fees are listed on the FISC webpage. (<https://fisc.cals.wisc.edu/prospective-students/tuition-housing-other-fees>)

- Dairy Farm Management, Certificate (p. 715)
- Diversified Agricultural Operations, Certificate (p. 715)
- Farm and Equipment Operations, Certificate (p. 715)
- Foundations of Farm Management, Certificate (p. 715)
- Management of Crops and Soils, Certificate (p. 716)
- Meat Animal Farm Management, Certificate (p. 716)

## HOW TO GET IN

How to Get in

## ADMISSION ELIGIBILITY CRITERIA

Admission decisions are made using a holistic approach with consideration of, but not limited to: an applicant's cumulative GPA, class rank, activities, leadership roles, academic progress as reflected on an official transcript, etc. Below are eligibility criteria and considerations:

### Domestic Applicants:

- High School Diploma or GED required
- Involvement in agriculture-related activities
- Academic record
- Personal and professional goals
- Rank in the upper 80% of graduating class\*

There is no foreign language requirement.

Returning adult students will receive special consideration.

\*Students ranking in the lower 20 percent of their high school class may be considered for admission on probationary status. These applications require additional documents and will be reviewed by the Director and handled on a case-by-case basis.

### International Applicants\*\*:

*(The following requirements are set forth by the guidelines for the J-1 VISA as well as by the FISC office and UW campus).*

- Degree or professional certificate from a foreign, post-secondary academic institution AND one year minimum of prior, ag-related work experience acquired outside of the United States, OR five years minimum of prior, ag-related work experience acquired outside of the United States
- Minimum of a 2.0 cumulative GPA on a 4.0 scale
- Proficiency in the English language, as demonstrated by a TOEFL score of 550 or higher, or IELTS score of 7 or higher, OR proof that your most recent four years of education were taught primarily in the English language
- Completed Certification of Financial Support form.

## APPLICATION PROCESS

Applications are available October 1 and close August 1 for domestic students for the upcoming academic year, and close June 1 for International applications. Applicants must mail an official high school or post-secondary transcript, depending upon the most recent school of attendance. (If a post-secondary transcript has fewer than 2 years of classwork reported, an applicant also must submit a high school transcript in addition to the post-secondary one.) International applicants must submit additional documents in order for their application to be considered complete as listed on the FISC International Students (<https://fisc.cals.wisc.edu/prospective-students/international-students>) application page.

The online FISC application is hosted by the Adult Career and Special Student Services (ACSSS), Division of Continuing Studies, which admits all University Special students (which includes FISC). Applicants will submit an application following the process below. A committee in FISC reviews the application and makes the final admissions decisions.

3-step process:

Step 1: Create an account and apply via the University Special student application (<https://fisc.cals.wisc.edu/prospective-students/apply-now>). Select "Farm and Industry Short Course" as the student classification.

Step 2: Mail all transcripts and additional application materials to:

Farm & Industry Short Course  
University of Wisconsin – Madison  
116 Agricultural Hall  
1450 Linden Drive  
Madison, WI 53706

Step 3: Optional but recommended: Apply for FISC Scholarships (<https://scholarships.wisc.edu/Scholarships/org?orgId=1310>) before April 1 to receive priority consideration.

## DAIRY FARM MANAGEMENT, CERTIFICATE

### REQUIREMENTS

- 12 credits required for completion.
- Requires a GPA of 2.0 on all coursework.
- At least 50% of the credits must be taken in residence, graded, and for credit.

| Code                 | Title                                 | Credits   |
|----------------------|---------------------------------------|-----------|
| FISC 134             | Reproduction of Farm Animals          | 2         |
| FISC 105             | Dairy Cattle Selection and Evaluation | 2         |
| FISC 63              | Dairy Herd Management                 | 2         |
| FISC 114             | Ruminant Nutrition                    | 2         |
| FISC 133             | Soil and Crop Nutrient Management     | 2         |
| FISC 61              | Dairy Herd Health                     | 1         |
| FISC 121             | Agricultural Commodities Marketing    | 2         |
| <b>Total Credits</b> |                                       | <b>13</b> |

## DIVERSIFIED AGRICULTURAL OPERATIONS, CERTIFICATE

### REQUIREMENTS

- 12 credits required for completion.
- Requires a GPA of 2.0 on all coursework.
- At least 50% of the credits must be taken in residence, graded, and for credit.

| Code                                              | Title                                            | Credits |
|---------------------------------------------------|--------------------------------------------------|---------|
| FISC 140                                          | Farm Machinery                                   | 2       |
| FISC 134                                          | Reproduction of Farm Animals                     | 2       |
| FISC 120                                          | Meat Animal Evaluation & Marketing               | 2       |
| FISC 142                                          | Identification and Management of Agronomic Pests | 3       |
| Select at least three credits from the following: |                                                  | 3       |
| FISC 114                                          | Ruminant Nutrition                               |         |
| FISC 101                                          | Meat Animal Production I                         |         |

|                      |                                   |           |
|----------------------|-----------------------------------|-----------|
| FISC 133             | Soil and Crop Nutrient Management |           |
| FISC 143             | Farm Power                        |           |
| <b>Total Credits</b> |                                   | <b>12</b> |

## FARM AND EQUIPMENT OPERATIONS, CERTIFICATE

### REQUIREMENTS

- 12 credits required for completion.
- Requires a GPA of 2.0 on all coursework.
- At least 50% of the credits must be taken in residence, graded, and for credit.

| Code                 | Title                               | Credits   |
|----------------------|-------------------------------------|-----------|
| FISC 140             | Farm Machinery                      | 2         |

| Total Credits | 12                                |

## VISITING INTERNATIONAL

UW–Madison welcomes international students, undergraduates, graduate, and post-graduate, to study at UW–Madison for one or more terms as a University Special student. University Special students take regularly scheduled courses for credit which are displayed on an official student record, but are not currently earning a degree from UW–Madison. There are four main categories with different learning goals and admissions pathways.

### FORMAL EXCHANGE PROGRAM

The program is available to students attending a university abroad which has a formal exchange agreement with UW–Madison. Students work directly with their home university's exchange/study abroad office for the admissions and enrollment procedures. The four exchange offices at UW–Madison are:

- Business Exchange (<http://bus.wisc.edu/degrees-programs/international-programs/exchange-students>)
- Engineering Exchange (<http://international.engr.wisc.edu/incoming/applying.php>)
- International Academic Programs (<http://www.studyabroad.wisc.edu/incoming.html>)
- Law Exchange (<http://www.law.wisc.edu/academics/international/foreignex.htm>)

All formal exchange students except those pursuing law studies are admitted by the Adult Career and Special Student Services office, which also serves as the academic dean's office.

### VISITING INTERNATIONAL STUDENT PROGRAM (VISP)–NOT IN FORMAL EXCHANGE PROGRAM

The program is available to international students who wish to study at UW–Madison for one or more semesters or a summer term—and are not part of a formal exchange program. The Visiting International Student Program (VISP) participants are official UW–Madison students who take courses from distinguished, world-class faculty. VISP provides personalized advising as well as a variety of cultural and social events. The students are admitted by ACSSS. Detail about the program, admissions criteria, and student experience is provided at the VISP webpage (<http://www.visp.wisc.edu>).

### CAPSTONE CERTIFICATE PROGRAM

Capstone certificates allow students with a bachelor's degree to obtain additional professional skills and certification. Designed for nontraditional students and working professionals, capstone certificates reflect a focused collection of graduate-level courses approved by the Graduate School. Capstone certificate programs do not lead to the conferral of a degree, but do appear as an official program on a student's UW–Madison transcript. The availability of a capstone certificate program to an international student varies as follows:

- The 100% online programs are available to international students who remain abroad.
- Students already in the U.S. on another visa type (e.g. J-1 scholar, J-2 dependent, H1B) may be eligible for admission to any of the capstone certificate programs.
- Full-time programs on the university campus require international students to hold an F-1 or J-1 visa to study legally in the United States. The programs approved by the U.S. government for F-1 or J-1 visas include Actuarial Science (p. 683), Communication Sciences & Disorders (p. 690), Computer Sciences (p. 691), and Geographic Information Studies (p. 698).

A comprehensive list with details about program content, admissions criteria, and the application process is available at the Types of Study (p. 683) page.

## ENGLISH AS A SECOND LANGUAGE

The Intensive English Program (IEP) (<https://english.wisc.edu/esl/intensive-english-program.htm>) is available to adults who wish to study English as a second language full-time at UW–Madison to improve their proficiency in English. While in the program, participants are UW–Madison students. If selected for admission, the student is issued a Form I-20 which allows the participant to request the student visa. The program offers full-time, 15-week programs in the fall and spring terms and an 8-week program in summer. The classes range from lower-intermediate (A2) to advanced level (C1). Beginning-level instruction is not offered. Part-time enrollment is available to adults who already in Madison to live, work, or study. Further details about the program content, admissions criteria, and the application process is available at the Types of Study (p. 712) page and the IEP website (<https://english.wisc.edu/esl/intensive-english-program.htm>).

## HOW TO GET IN

How to Get in

The application for admission as a visiting international student varies depending on the program.

## FORMAL EXCHANGE PROGRAM

Students who wish to come to UW–Madison on a formal exchange program must work directly with their home school's exchange/study abroad office to review application deadlines and admissions requirements (including TOEFL score). The exchange coordinator will provide participating students with a direct link to the application which is appropriate for the UW–Madison program. Students seeking admission in the three programs listed here will be admitted as a University Special student with the designation of UNIS on the application and the class roster.

- International Academic Programs (<http://www.studyabroad.wisc.edu/incoming.html>)
- International Programs at the School of Business (<https://bus.wisc.edu/degrees-programs/international-programs/exchange-students>)
- International Engineering Studies & Programs (<http://international.engr.wisc.edu/incoming/applying.php>)

## VISITING INTERNATIONAL STUDENT PROGRAM (VISP)

Any international student who has completed at least one semester of college/university study and meets language proficiency requirements

(<http://www.visp.wisc.edu/eligibility.htm>) may apply. Applicants do not need to be currently enrolled in an educational institution. Students should apply at least three months before the intended start date at UW–Madison in order to complete the entire admission process and visa application (which may require many months to complete). Also, there is a limited number of spots available in VISP each semester, so early application provides the best consideration.

Students are admitted in one of three levels which determines the minimum credit load requirements:

**Undergraduate level students:** completed at least one semester of college/university study and will not have completed their degree before arriving in Madison. Students must be in good academic standing with a minimum grade point average (GPA) equivalent at home university of a 3.0 on a 4.0 scale, as indicated on this international grade conversion guide (<http://www.wes.org/gradeconversionguide>). *UIUL* is the designation on the admissions application and course roster.

**Graduate level students:** completed an undergraduate degree and may or may not have started a graduate program. *UIGL* is the designation on the admissions application and course roster.

**Dissertator-level students:** completed all graduate coursework and are currently working on a dissertation, or have completed a Ph.D. No additional requirements apply for students in these classifications. *UIDL* is the designation on the admissions application and course roster.

**To apply:** Students must review eligibility requirements and then follow the application process outlined at the VISP website (<http://www.visp.wisc.edu/apply.htm>). VISP coordinators will assist with each step of the process. The coordinators will send an email to confirm the application has been received and to provide details on next steps.

## VISITING UNIVERSITY STUDENTS

Students who are undergraduates in good standing at another U.S. college or university are eligible for admission as a University Special student. They are admitted with the understanding that they will either return to their primary institution or attend another university after one term at UW–Madison. Students must have a minimum 2.0 gpa overall and in the previous term. The applicant must submit a transcript from the most recent institution attended before an admissions decision is finalized. Visiting undergraduates are assessed tuition at the undergraduate student rate (Wisconsin resident or nonresident) unless a course has a nonstandard tuition rate.

Visiting undergraduates are admitted for one term only. Those with extenuating circumstances or particular academic needs may appeal to attend UW–Madison for consecutive terms. The appeal must include a statement of support from a dean at the home institution.

It is the visiting student's responsibility to work out a credit transfer plan with the advisor at the college or university which will confer their undergraduate degree. There is no guarantee that credits earned at UW–Madison will apply toward fulfilling degree requirements at another university. Upon completion of a course and verifying that grades are posted in MyUW/Student Center, the student must submit an online order of an official transcript (<https://ordertranscript.wisc.edu>) via the Office of the Registrar in order to transfer credits.

**Recent high school graduates or graduating seniors** who have been admitted and will enroll at another college or university as an

undergraduate may apply for visiting undergraduate status for the summer term or semester following high school graduation. It is the student's responsibility to make sure this is permitted by the college to be entered in the next term. To be admitted as a Visiting student without a college record, students must have a minimum 3.0 cumulative GPA in high school. Graduating high school seniors who will enroll as undergraduates at UW–Madison in the fall term and wish to begin their studies in the summer term must contact the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>) to change their admission term from fall to summer.

## HOW TO GET IN

### How to Get in

There are two steps to become a student: (1) university admission and (2) course enrollment.

### ADMISSION

There is no application fee. Applying at least one month before the start of the term (early August for fall; early December for spring) is recommended as it can take two to three weeks to review and process an application. Enrollment for summer term usually begins in early April, so applying by early March is recommended. As a visiting undergraduate, a transcript from the home college or university is required to confirm the admissions criteria of good standing and 2.0 minimum GPA are met. The transcript may be sent via email to [advising@dcs.wisc.edu](mailto:advising@dcs.wisc.edu) or faxed to 608-265-2901. ACSSS will send an email confirming receipt of the application and a reminder regarding transcript submission. (Recent high school graduates without a college record must submit a high school transcript.)

There are two options for submitting a University Special Student application:

1. First-time students use Applying via the University Special Student application (<http://continuingstudies.wisc.edu/advising/apply.htm>)
2. Returning students may use the application above or apply as a reentry student via the Reentry application in the Student Center/My UW (<https://my.wisc.edu>) using a NetID.

By selecting UNVS, the designation for Visiting Undergraduate students, the applicant is directed to provide the required information and documents. Once admitted, an admission letter from ACSSS is sent—typically within two weeks of providing all required information to ACSSS and anything required by the Office of the Registrar, Residence for Tuition Purposes (<http://registrar.wisc.edu/residence.htm>). The letter includes information regarding next steps and deadlines.

### ENROLLMENT

University Special students enroll via MyUW/Student Center at an earliest enrollment time—which is a date after most degree students have enrolled. For visiting undergraduates this is typically several days before the beginning of a term, except in April for summer term. Admitted students receive enrollment information and find detailed instructions at the ACSSS enrollment page (<http://continuingstudies.wisc.edu/advising/enroll-special.htm>).

Most courses have prerequisites which are listed in the courses section (<http://guide.wisc.edu/courses>) of the *Guide*. In order to enroll in a course, students—including University Special Students—must meet these prerequisites and requirements. Visiting undergraduates may have

taken prerequisite courses at other colleges and universities which will not be part of the UW–Madison record and recognized by the enrollment system. Thus, it may be necessary for such students to confer with a department or course instructor to confirm a prerequisite has been met at another institution in order for enrollment to be allowed.

ACSSS highlight such issues for University Special students on its enrollment page, as well as provides Enrollment FAQs and Tips (<http://continuingstudies.wisc.edu/advising/faq.htm#enrolling>).

## INDEX
