UNDERGRADUATE GUIDE

The *Guide* contains information about the many academic programs that make the University of Wisconsin–Madison one of the world's foremost institutions of higher education.

The *Guide* is published online only. It is not available in printed format.

The information in the *Guide* applies to all undergraduate students at the university regardless of their classification (school/college affiliation). Information in the individual school/college sections applies specifically to students who intend to graduate from one of those schools or colleges.

It is important for students to be familiar with all the information that applies to them. Students are strongly encouraged to consult their advisors at least once each semester to be certain they are completing requirements that apply to their degree and major programs.

The *Guide* is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

For more information about admission expectations, academic preparation, the application process, and important dates and deadlines, contact:

Office of Admission and Recruitment (<https://www.admissions.wisc.edu>)
702 West Johnson Street, Suite 1101
Madison, WI 53715-1007
onwisconsin@admissions.wisc.edu
608-262-3961

Schedule a campus at VisitBucky (<https://www.admissions.wisc.edu/visitbucky>) or call 608-262-3318.

UW–Madison summer brochures and program information are available from the Division of Continuing Studies (<http://continuingstudies.wisc.edu>).

All entering students, to protect their interests, should become well acquainted with the regulations regarding student academic and nonacademic misconduct. Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at:

Office of the Registrar (<https://registrar.wisc.edu>)
333 East Campus Mall #10101
Madison, WI 53715-1384

ACCREDITATION

The University of Wisconsin–Madison is accredited by the Higher Learning Commission (<http://www.hlcommission.org>)

230 South LaSalle Street, Suite 7-500
Chicago, IL 60604
Telephone 1-800-621-7440

www.hlcommission.org (<http://www.hlcommission.org>)

UW–Madison, which was first accredited in 1913, was last accredited in 2009, and will go through a reaccreditation process again in 2018–19.

REGISTRATION WITH MINNESOTA OFFICE OF HIGHER EDUCATION

The University of Wisconsin-Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

AFFIRMATIVE ACTION AND COMPLIANCE STATEMENT

The University of Wisconsin–Madison is committed to providing equal opportunity and equal access and to complying with all applicable federal and state laws and regulations and University of Wisconsin System and university non-discrimination policies and procedures. For information on all covered bases, the names of the Title IX and Americans with Disabilities Act Coordinators, and the processes for how to file a complaint alleging discrimination, please contact the Office of Compliance (<https://compliance.wisc.edu>). The Office of Compliance is located at 361 Bascom Hall, 500 Lincoln Drive, Madison WI 53706 and can be reached at Voice: 608-265-6018 (relay calls accepted); Fax: 608-263-4725; Email: uwcomplianceoffice@wisc.edu.

The following are the nondiscrimination bases for covering students and applicants for admission to the university; university employees and applicants for employment at the university; and those wishing to take part in university programs and activities, including visitors to campus.

STUDENTS/EDUCATIONAL PROGRAMS

- age
- ancestry
- color
- creed
- disability
- ethnicity (specifically involving harassment by UW employees)
- gender identity or expression
- marital or parental status
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- or any other category protected by law, including physical condition or developmental disability as defined in Wisconsin Statutes§51.01(5).

EMPLOYEES/APPLICANTS

- age
- ancestry
- arrest record
- color
- conviction record

- creed
- disability
- ethnicity (specifically involving harassment by university employees)
- gender identity or expression
- genetic information including genetic testing
- honesty testing
- marital or parental status
- military service
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- use or nonuse of lawful products off the employer's premises during nonworking hours,
- veteran status
- declining to attend a meeting or participate in any communication about religious matters or political matters, or any other category protected by law

VISITORS AND PROGRAM PARTICIPANTS/UNIVERSITY ACTIVITIES

- age
- ancestry
- color
- creed
- disability
- national origin
- race
- retaliation for making a complaint of discrimination, or taking part in an investigation relating to discrimination, or opposing discrimination
- sex
- sexual orientation

Also covered is any other non-discrimination category that may be subsequently added, even if not included in the above list, as a result of federal or State of Wisconsin court, legislative, or regulatory action, or action taken by UWS or the University.

INFORMATION FOR STUDENTS WITH DISABILITIES

The McBurney Disability Resource Center provides disability-related services and accommodations to undergraduate, graduate, professional, Special, and guest students. The center works closely with students and faculty on the provision of reasonable accommodations to ensure access to the learning environment. Common accommodations include extended time and/or small group environment for exams, class notetakers, sign language interpreting, real time and media captioning, and conversion of printed materials to an accessible format. McBurney staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for disorders that fluctuate in severity over the course of enrollment. The

center makes referrals to other campus offices or community resources for nonclassroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the center upon admission to begin the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see How to Become a McBurney Client (<http://mcburney.wisc.edu/students/howto.php>).

McBurney Disability Resource Center

702 West Johnson Street, Suite 2104

Madison, WI 53706

608-263-2741 (voice)

608-225-7956 (text)

608-265-2998 (fax)

www.mcburney.wisc.edu (<http://www.mcburney.wisc.edu>)

The information, policies, and rules contained herein are subject to change. No part of this publication should be construed as a contract or offer to contract. The information in this catalog is current as of June 1, 2017. Later revisions are announced through department or program offices. Students are responsible for knowing current university regulations. University offices can provide current information about possible changes.

ADMISSION

OFFICE OF ADMISSIONS AND RECRUITMENT

Students seeking to earn a bachelor's degree from the University of Wisconsin–Madison will apply for admission through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>). Undergraduate admission is competitive and selective; professional admissions counselors review applications using a holistic process. We focus on academic excellence, reviewing high school and college coursework (when applicable), the courses students have chosen to take, the rigor and breadth of the curriculum, and how the student has performed in their coursework. We also consider written essays, letters of recommendation, and extracurricular involvement.

Our review process is designed to help us identify students who are not only academically stellar but also have qualities such as leadership, concern for humanity, and achievement in the arts, athletics, and other areas. We also seek diversity in personal background and experience for potential contribution to the University of Wisconsin–Madison community.

We invite and encourage all students considering the University of Wisconsin–Madison to join us on campus for a tour (<https://www.admissions.wisc.edu/visitbucky>). There are many options to explore and discover what UW–Madison has in store.

APPLY ([HTTPS://WWW.ADMISSIONS.WISC.EDU/APPLY](https://www.admissions.wisc.edu/apply))

To submit an application for admission review the application dates and deadlines as well as the required application materials listed on our website.

Dates and Deadlines (<https://www.admissions.wisc.edu/apply>)

Freshman Applicants (<https://www.admissions.wisc.edu/apply/freshman/materials.php>)

Transfer Applicants (<https://www.admissions.wisc.edu/apply/transfer/materials.php>)

Reentry Applicants (<https://www.admissions.wisc.edu/apply/reentry>)

FRESHMEN

Competitive freshman applicants have taken advantage of the rigor offered at their high schools, performed well in challenging courses, and have strong ACT or SAT scores. Beyond academic excellence we are looking for students who demonstrate leadership, community engagement, and passion.

Students are considered freshman applicants if they have not yet completed high school (secondary-level education); have not earned a GED/HSED (but will by the time they enroll at UW–Madison); or have not enrolled in a college or university in a degree-granting program since graduating high school or earning a GED/HSED. For more information about admission requirements and expectations of freshman applicants please see our website (<https://www.admissions.wisc.edu/apply/freshman/requirements.php>).

TRANSFER STUDENTS

Successful transfer applicants will have a consistently high or upward grade trend; a strong cumulative grade point average; and rigorous coursework in English composition, college-level math, science, social science, humanities, literature, and foreign language. Admission to the university does not guarantee acceptance to an intended major, which is a separate process from the undergraduate admission process.

Students are considered transfer applicants if they have enrolled in an accredited college or university in a degree-granting program after graduating from high school or earning a GED/HSED. Students must have 24 transferable credits earned at a college or university after high school graduation to be eligible for admission as a transfer applicant. For more information about admission requirements and expectations of transfer applicants please see our website (<https://www.admissions.wisc.edu/apply/transfer/requirements.php>).

Prospective transfer students can begin satisfying UW–Madison general education and degree requirements before transferring. For more information on selecting courses for the purpose of satisfying UW–Madison requirements, see Transfer Admissions (<https://www.admissions.wisc.edu/apply/transfer>). Transfer credit is generally given for college-level courses taken at a degree-granting institution accredited by a CHEA-recognized organization (<http://chea.org>). Courses must be similar in nature, level, and content to UW–Madison undergraduate courses and apply to a UW–Madison academic program. Students may wish to consult the UW–Madison Transfer Credit Policy (https://www.admissions.wisc.edu/apply/transfer/transfer_credit.php) for more details.

REENTERING STUDENTS

Students previously registered at UW–Madison in an undergraduate degree program who wish to resume undergraduate study after an absence of a semester or more are considered reentry students. Reentry students must file an application for readmission but are not subject to the application fee.

To guarantee an early enrollment appointment time, reentry students should submit the complete application by February 1 for the fall term or by October 1 for the spring term. In addition to submitting an application, reentry applicants must submit official transcripts for any

work completed elsewhere since last enrolled at UW–Madison, a list of courses in progress (if applicable), and an academic action from the dean's office if they are in "dropped" or "must obtain permission to continue" status.

NONDEGREE UNIVERSITY SPECIAL AND GUEST STUDENTS

Undergraduate students visiting from other universities or recent UW–Madison graduates may desire to enroll at UW–Madison as nondegree University Special and Guest students. Contact the Division of Continuing Studies, Adult Career and Special Student Services (<http://www.continuingstudies.wisc.edu/advising>).

PLACEMENT TESTS

Each student comes to UW–Madison with a unique set of skills and academic preparation. To assess where each student stands in beginning to meet their General Education Requirements (p. 17), placement tests provide academic advisors with the tools to help determine in which courses students should enroll. Placement tests are required of all incoming freshman and some transfer students depending on college course work. Other exams such as ACT, SAT, SAT II, TOEFL, Advanced Placement (AP), International Baccalaureate (IB), etc. do not satisfy the requirement of placement tests, however, scores on these exams may assist in appropriate course enrollment advising.

UW Placement tests are developed by faculty and instructional staff from various UW System campuses and led by Testing and Evaluation Services (<https://testing.wisc.edu>) (T&E). T&E conducts studies to support the development of these tests and effectively uses the results to place incoming students into appropriate levels of English, math, and foreign language.

Outlined below are the situations typical for requiring placement tests. The Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>) determines which placement tests are required. After students are admitted to the University of Wisconsin–Madison, they will receive an email from the Office of Admissions and Recruitment indicating which placement tests are required.

LANGUAGE PLACEMENT EXAMS

The UW System offers placement exams for French, German and Spanish that are available through the Regional Placement Testing Program. Students are encouraged to take a foreign language placement test if they plan to continue studying a foreign language they have already taken in high school or college. If no placement exam is taken, students may enroll in the first semester course. UW–Madison offers language instruction in more than 30 languages. For additional information about placement, see Languages at UW–Madison (<http://languages.wisc.edu/advising/placement>).

MATH PLACEMENT EXAMS

Students admitted to undergraduate degree granting programs who:

1. Are admitted as first year students
2. Are admitted as transfer students and

A. Have not previously completed the UW System math placement exam.

OR

B. Do not have credit for the UW-Madison direct equivalent of MATH 112, MATH 113, MATH 114, MATH 211, or any MATH course that is numbered higher than 211.

i. For students who have a course in progress at the time of admission, it is assumed they will complete the course, so they are not asked to take the placement test.

OR

C. Have completed the equivalent of MATH 95 or MATH 96 at a UW System institution.

Notes:

Satisfaction of QR-A from a math course that is transferred in does not automatically exempt students from the UW math placement test.

MATH 101 equivalents will be converted to MATH 96, and/or will be reviewed by the math department for possible MATH 96.

See also the Mathematics Placement Chart (<https://www.math.wisc.edu/undergraduate/math-placement-tech-algorithm-uw-madison>).

ENGLISH PLACEMENT EXAMS

Students admitted to undergraduate degree-granting programs who:

1. Are admitted as first year students and are not required to take the ESLAT

OR

2. Are admitted as transfer students and

A. Have not previously completed the UW System English Placement Exam.

OR

B. Do not have credit for the UW-Madison equivalent of a Communications Part A (p. 17) course.

ENGLISH PLACEMENT EXAMS FOR INTERNATIONAL STUDENTS

Students who have not studied in the United States all four years of high school are typically required to take the ESL Assessment Test (ESLAT) instead of the English Placement Exam, as it is a culture-neutral test of English.

RETROACTIVE LANGUAGE CREDIT

In some schools and colleges at UW-Madison, it is possible to earn retro credits for prior work completed in a foreign language. To earn these credits, students must take a course above the first-semester level in French, German, Hebrew, Italian, Latin, Portuguese, Spanish, or any other language in which they have some proficiency. The course must be designated appropriate for earning retro credits by the department and must be the first foreign language course taken by the student after enrolling in the university. Students who take a college-level language course while still in high school may still pursue retro credits at the university.

Students interested in earning retro credits should plan to take the foreign language placement test and consult with the foreign language advisor at SOAR (<http://soar.wisc.edu>). Students must enroll in the language course prior to earning 30 degree credits (including credits transferred from other colleges but not including AP, CLEP, IB or retro credits in another language) and earn a grade of B or better. UW-Madison honors retro credits earned at previous institutions as long as the student enrolled in the course prior to earning 30 credits and earned a grade of

B or better. Native speakers of a language are not eligible to earn retro credits in that language. For more information, see Retroactive Credits (p. 298) in the College of Letters & Science section of the *Guide*.

ADVANCED PLACEMENT (AP) AND INTERNATIONAL BACCALAUREATE (IB)

Both Advanced Placement (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) and International Baccalaureate (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) Higher Level examinations offer the possibility of receiving credits at UW-Madison. Many high schools offer courses through the College Board's Advanced Placement (AP) program or the International Baccalaureate (IB) program. UW-Madison offers degree credit based on a student's performance on the AP and IB exams administered in high schools. (AP and IB exams must be taken before entering UW-Madison.) Students who receive credit for a particular course through AP or IB and take the same course at UW-Madison will not receive degree credit twice; however, the grade in the UW-Madison course will be included in the overall grade point average.

GCE ADVANCED LEVEL (A-LEVEL)

In many cases, students may receive advanced-standing credit for some A-level (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) exams. After a student has been admitted, the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>) will perform an official evaluation of credit for A-Level exam results. In order to grant the credit, we require an official copy of the A-Level exam certificate from the examination board. Credits will not be posted from Results Slips or internal school transcripts. Review the chart (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) to see how A-Level credit will be awarded. Examinations not listed in this chart will be evaluated by the Office of Admissions and Recruitment for appropriate advanced standing credit.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) allows students who have gained college-level knowledge outside the classroom to take examinations for possible college credit. Each exam is 90 minutes long and is made up primarily of multiple-choice questions. Some exams include an essay; however, UW-Madison does not require the essay for any CLEP exam. Credit will be granted only to those students who have completed fewer than 16 semester hours of college credit when the examinations are taken. Students must earn a minimum score of 65 to receive credit. The scores for awarding credit at the University of Wisconsin-Madison do not necessarily match those recommended by the American Council on Education.

CREDIT BY DEPARTMENTAL EXAMINATION

Students may acquire knowledge, skills, and competencies through experiences that are academic in nature but may not necessarily correspond to a setting in which UW-Madison awards traditional credit. Credit by department examination is one opportunity for undergraduate students to demonstrate mastery of material that is equivalent to what would be learned in a specific UW-Madison course. The course credits granted through departmental examination are based on a student's

demonstration that they have mastered the learning outcomes equivalent to those for the specified course. Examples of circumstances that will lead students to seek credit by examination may be: they completed preparation for advanced placement exams in high school but were unable to take the AP test; they have placement test scores that place them in a course lower than what they think they are prepared for; they did not get transfer equivalency for a course but they judge that they have completed the material in a course at another university.

To learn more about obtaining credit by departmental examination including eligibility and fees, review the policy here (<https://kb.wisc.edu/page.php?id=49600>).

ADVISING

WHAT IS ADVISING?

At UW–Madison advising is a partnership between students and the network of advisors they build during their time here. It is one of the most essential resources available to students and can play a pivotal role in the college experience and beyond. Advisors can help students get the most out of their college years by helping them make well-informed decisions, sharing strategies for success, supporting them as they encounter challenges, connecting them to resources, and providing information about campus policies and procedures.

There are many reasons to see an advisor and advising is not limited to certain subjects or specific months of the year. Here are some of the many topics that advisors can help students with:

- Discovering and achieving academic, career, and life goals
- Connecting a major to a career
- Creating a graduation timeline plan
- Selecting courses and fulfilling degree requirements
- Connecting with tutors
- Getting involved with campus organizations
- Practicing for job interviews
- Choosing a study abroad program
- Finding an internship
- Researching volunteer opportunities
- Understanding university policies and deadlines
- Talking about graduate school
- Proofreading resumes and cover letters

To find contact information for advisors, including the assigned advisor, see this link (<http://www.advising.wisc.edu/content/find-an-advisor>).

CROSS-COLLEGE ADVISING SERVICE (CCAS)

The Cross-College Advising Service (CCAS) (<http://www.ccas.wisc.edu>) is a campuswide advising service for undergraduates who are undecided about a major and want to explore the many academic opportunities on campus. CCAS also assists students who are considering changing majors or who have not been admitted to limited-enrollment programs and need to explore other options. CCAS advisors are knowledgeable about all the programs and majors offered by the eight undergraduate schools and colleges on campus. Each year at SOAR (Student Orientation, Advising, and Registration) (<http://soar.wisc.edu>), approximately one-third of the students in the entering class self-identify as “undecided/exploring” and are assigned to CCAS advisors.

In addition to the main CCAS office in Ingraham Hall, CCAS has residence hall advising offices in Chadbourne Residential College, Sellery Hall, Witte Hall, Ogg Hall, and Dejope Hall. The Dejope office is available to all students in Lakeshore-area residence halls.

CAREER PLANNING

Career planning is a multi-year process that includes self-assessment and reflection, exploring academic and career options, gaining experience in areas of interest, and ultimately organizing and conducting a job or graduate school search.

Students work with professional career advisors to engage in a wide variety of career planning activities to prepare for life after earning a degree from UW–Madison: educational workshops, job shadowing, informational interviewing, mock interviews, internships, career fairs and more. Active engagement in these activities assists students in achieving career readiness, which is “the attainment and demonstration of competencies that prepare college graduates for a successful transition into the workplace.” (National Association of Colleges and Employers).

All students are encouraged to work with a career advisor. Each individual school or college offers career services, and the Career Exploration Center (CEC) works with students looking to explore their options. Links to each of the campus career services offices are available online at careers.wisc.edu (<http://careers.wisc.edu>).

CAREER EXPLORATION CENTER (CEC)

The Career Exploration Center (CEC) (<https://ccas.wisc.edu/careerexplorationcenter>) is an early-stage career counseling resource that focuses primarily on students who have not yet decided on an academic major and/or their intended career path. The CEC is the leading campus resource for UW–Madison undergraduates who desire integrated major and career exploration. CEC career advisors help students focus on their interests, values, strengths, and personality to give them the tools they need to make decisions about their careers and their futures.

The center offers individual career advising appointments, a robust career library, workshops on a variety of topics that engage students in major and career exploration, career assessments (often referred to as “career tests”), and the Majors Fair which provides students the opportunity to speak with representatives from more than 100 academic programs in one place.

PRE-PROFESSIONAL STUDY PRE-HEALTH ADVISING

Students interested in preparing for medicine, dentistry, pharmacy, veterinary medicine, nursing, occupational therapy, physical therapy, physician assistant or public health, chiropractic, or podiatric medicine should work with the Center for Pre-Health Advising (CPHA) (<http://prehealth.wisc.edu>).

CPHA supports students as they explore graduate and professional programs in healthcare. Its team of professional advisors helps students integrate the prerequisite coursework into their school/college and major requirements, discuss ways to get involved in research and clinical service opportunities on campus. CPHA advisors can help students prepare for professional exams and the application process, summer research programs, internships, and scholarship opportunities.

PRE-LAW

The best preparation for law school is a broad liberal arts background that includes courses that strengthen communication skills, the ability to think logically, and understanding human instructions and values. Pre-law is not an undergraduate major.

The Center for Pre-Law Advising provides advising and other resources to UW-Madison students and alumni at all stages in the process of considering, preparing for, and applying to law school. Unlike other pre-professional tracks in college, there is no prerequisite coursework that students must complete in order to either apply to or succeed in law school. There are, however, certain skills and broad areas of knowledge that could better prepare students for law school. Pre-Law Advising staff are available to assist with course selection, law school application development, and research on careers in the legal profession. For more information, students should contact a pre-law advisor (see Pre-Law Advising (<http://prelaw.wisc.edu>)).

GRADUATING IN FOUR YEARS OR FEWER

UW-Madison encourages, supports, and expects students to work with academic advisors to create, maintain, and plan a graduation timeline. Students should consult with their assigned academic advisor(s) before each enrollment period, and more as needed.

- Developing a strategic exploration plan to explore interests while making progress on degree requirements
- Creating a plan to set and achieve academic and career goals
- Discussing academic challenges and connecting to resources that support academic success
- Reviewing procedures and requirements for declaring a major
- Using the Degree Audit Reporting System (DARS) (<https://registrar.wisc.edu>) to check progress toward the degree
- Discussing any changes to a declared major, as well as alternative plans if applying to a competitive enrollment major
- Creating a strategic course schedule to stay on track for graduation

A reciprocal agreement for a four-year graduation plan is available for most degree programs to students entering UW-Madison as freshmen. Students interested in the agreement must attend SOAR (Student Orientation, Advising, and Registration). For more information see UW-Madison Four-Year Graduation Agreement (<http://provost.wisc.edu/4yearhome.htm>).

DEGREE AUDIT REPORTING SYSTEM (DARS)

A Degree Audit Reporting System (DARS) (https://registrar.wisc.edu/dars_student.htm) report is an automated summary of a student's degree progress. All schools and colleges at UW-Madison use DARS to audit the progress of *most* undergraduate degree programs and certificates.

DARS reports indicate which requirements are completed, which are complete with in-progress courses, and which remain unsatisfied. The report may specify courses that meet unsatisfied requirements. For most undergraduate programs, DARS is the tool used to determine completion of the program and/or eligibility to graduate.

Students can request and review their DARS in the Student Center via MyUW, and should contact their assigned advisor(s) for help reading and interpreting their DARS report.

STUDY ABROAD STUDENTS

Students considering participation in a study abroad program sponsored by a university other than UW-Madison should contact International Academic Programs (<https://www.studyabroad.wisc.edu>) (IAP) for more information.

For all students: UW-Madison students participating in a semester-long study abroad program sponsored by a university other than UW-Madison must apply for reentry admission to Wisconsin. (Students participating in a summer or winterim program do not need to apply for reentry admission.)

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The Wisconsin Experience is UW-Madison's vision for the total undergraduate student experience, which combines learning in and out of the classroom. Tied to the Wisconsin Idea and steeped in our long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

Through the Wisconsin Experience, our students will engage in the following areas of intellectual and personal growth.

Empathy and Humility

- Develop and demonstrate cultural understanding of self and others
- Engage locally, nationally, and globally in a respectful and civil manner
- Appreciate and celebrate one another's abilities, views, and accomplishments

Relentless Curiosity

- Actively learn with expert instructors, scholars, and peers
- Engage in creative inquiry, scholarship, and research
- Develop resilience, and foster courage in life and learning

Intellectual Confidence

- Develop competence, depth, and expertise in a field of study
- Integrate ideas and synthesize knowledge across multiple contexts
- Exercise critical thinking and effective communication

Purposeful Action

- Apply knowledge and skills to solve problems
- Engage in public service, partner with others, and contribute to community
- Lead for positive change

STUDENT LEARNING AT UW-MADISON

Student engagement and activism are deeply rooted in UW-Madison's rich history of academic and research excellence. Occasionally, students are expected to help the university better understand and improve student learning by participating in evaluative activities, which include undergraduate surveys, focus groups, and questionnaires, and by providing examples of their work through presentations, posters, demonstrations, and writing samples. We rely on the student perspective when assessing the effectiveness of academic and co-curricular programs. By participating, students help improve their own educational and related experiences and contribute to better educational experiences for future students.

ACADEMIC ENRICHMENT AND HONORS PROGRAMS

UW–Madison offers students many ways to enrich their academic program, regardless of the major field of study they choose to pursue. Engaging in research, studying abroad, being part of learning communities, participating in university honors, becoming a student leader, engaging in service learning—these are all vital components that enhance and strengthen classroom learning. This partnership between in- and out-of-classroom learning form the foundation of the *Wisconsin Experience*. The university encourages students to take advantage of opportunities to integrate their learning experiences.

Honors Programs

Honors programs, which vary slightly among the schools and colleges, are designed for students who wish to undertake work that is more intensive than regular course work. High grade point averages are required to maintain honors student standing. For more information, students should refer to the specific school or college (p. 13) section in this catalog, contact an honors advisor or consult Honors and Scholars Programs (http://provost.wisc.edu/honors_schools_colleges.htm).

Undergraduate Research Opportunities

One of the most exciting things in life is to discover something new. UW–Madison provides unique opportunities to learn from and work with some of the world's leading researchers and scholars. Options range from assisting with professors' ongoing research to designing and directing one's own projects. For many examples, see Undergraduate Research Opportunities (<http://provost.wisc.edu/undergradresearch.htm>). The Undergraduate Research Scholars Program (<http://urs.ls.wisc.edu>) is one opportunity available in the first or second year of study. Students may cap off their undergraduate degree with a senior thesis or senior honors thesis and are encouraged to present their work at the Undergraduate Symposium. For program descriptions, see Undergraduate Symposium (<https://ugradsymposium.wisc.edu>). For a sampling of the many grants and awards available to support and honor this work, visit the Undergraduate Academic Awards Office (<http://provost.wisc.edu/undergrad/scholarship.html>).

Service Learning

Undergraduates have access to more than 100 service-learning courses each year. These courses emphasize hands-on experiences that address real-world issues as a venue for educational growth. More information on service learning is available at the Morgridge Center for Public Service (<http://morgridge.wisc.edu>).

Learning Communities

UW–Madison's rich tradition of supporting learning communities (<http://www.housing.wisc.edu/residencehalls-lc.htm>) means that the traditional classroom is not the only place where students learn. Students may choose to participate in any of the many residential and nonresidential learning communities, where students, faculty, and staff work together as both learners and teachers to pursue their academic interests. For more information about residential options, see this link (<http://www.housing.wisc.edu/residencehalls-lc.htm>).

STUDY ABROAD PROGRAMS

Study abroad programs provide students with opportunities to gain the global competence vital in the twenty-first century. Each year UW–Madison sends more than 2,000 students on study abroad programs around the globe. Study abroad provides a unique learning environment that extends and enhances courses taken on the home campus.

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu>) serves as the primary study abroad office

on campus, offering over 200 programs in over 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service-learning, and programs with special themes. Students can visit the Study Abroad Resource Center, 301 Red Gym, to meet with returned study abroad students and professional study abroad advisors who can help students prepare and research study abroad options.

In addition to IAP, the College of Agricultural and Life Sciences (p. 36), College of Engineering (p. 201), and Wisconsin School of Business (p. 1182) also offer international programs. These programs serve specialized needs within these schools and colleges for their undergraduate students.

The Value of Study Abroad

Study abroad plays a crucial role in preparing students to broaden their international awareness and sharpen their skills for today's global job market. Regardless of their major, students will find that study abroad has much to offer. The availability of a variety of program sites and durations allows students to select programs based on their individual academic interests and personal goals and objectives. Students can choose from programs specifically designed to further their language skills or choose from programs featuring courses taught in English, and which require no previous foreign language training. Students can also find programs that incorporate internships for academic credit, service-learning opportunities, and independent field research.

Academic Credit and Eligibility

Credits earned through UW–Madison study abroad programs are considered "residence credits." Credits and grades will be posted on the UW–Madison transcript. In general, credits earned abroad can count toward fulfilling college and major requirements in any UW–Madison school or college. Seniors who complete their major and degree requirements while abroad on a UW–Madison program may graduate at the end of their study abroad program.

Each study program has its own eligibility requirements. Opportunities are available to students at all academic levels and for a range of program durations from one week to one year. Interested students benefit by talking with their academic advisor early in their academic career about how study abroad can fit into their academic plan and future career goals.

Costs and Affordability

All programs are developed as cost-effectively as possible, recognizing the financial concerns of students. Overall the cost of study abroad includes items that students would have to pay for whether they were at home or abroad: academic fees, room and board, health insurance, and everyday living expenses such as telephone, local transportation, books, and supplies.

Students who study abroad in UW–Madison-sponsored programs may be eligible to use federal financial aid toward the costs of the program. Students should meet with the UW–Madison Office of Student Financial Aid to discuss eligibility requirements. In addition, students can apply for scholarships (<https://www.studyabroad.wisc.edu/scholarships.html>) specifically designated for use with study abroad programs. These include UW–Madison, national, and international scholarship opportunities. Students can also use most campus and academic department scholarships for UW–Madison-sponsored study abroad programs.

UW–MADISON'S ESSENTIAL LEARNING OUTCOMES

UW–Madison's Essential Learning Outcomes (ELOs) are shared learning outcomes that serve as an overarching framework to guide the undergraduate experience. Complemented by the Wisconsin Experience, these broad categories encompass many of the goals and purposes shared by UW–Madison's academic degree programs and co-curricular experiences.

Knowledge of Human Cultures and the Physical and Natural World

Focused by engagement with big questions, both contemporary and enduring.

- Through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts

Intellectual and Practical Skills

Teamwork and problem solving. Practiced extensively across the curriculum in the context of progressively more challenging problems, projects, and standards for performance.

- Inquiry and analysis
- Critical and creative thinking
- Written and oral communication
- Quantitative literacy
- Information, media, and technology literacy

Personal and Social Responsibility

Anchored through active involvement with diverse communities and real-world challenges.

- Civic knowledge and engagement—local and global
- Intercultural knowledge and competence
- Ethical reasoning and action
- Foundations and skills for lifelong learning

Integrative Learning

Demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problem.

- Synthesis and advanced accomplishment across general and specialized studies

The ELOs were developed through an extensive project conducted by the Association of American Colleges and Universities (AAC&U) responding to the question: "What qualities and skills do you want in college graduates?" The ELOs represent the responses from employers, business leaders, faculty, staff, and alumni.

and colleges, and for specific programs. Students should learn about and understand the specific requirements for their program of study.

TOTAL DEGREE CREDITS

To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit). Requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. Undergraduate Majors (p. 11).

RESIDENCE CREDIT

Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats, as credits earned in UW–Madison Study Abroad/Study Away programs. Some schools and colleges may have additional requirements concerning courses taken in residence; students should refer to the specific school or college section of the *Guide* or consult with an advisor.

UNDERGRADUATE MAJOR DECLARATION

Undergraduate degrees at UW–Madison presume that students are completing a program of study that consists of a degree program that combines the requirements for the degree with focused study in a discipline, or that combines school or collegewide requirements with an undergraduate major in which they pursue focused study. All undergraduates are expected to have declared or to have been admitted to their focused area of study by the end of the semester in which they have accumulated 86 credits. Students who have not met this expectation may be prevented from enrolling in future terms until they meet with their advisor. Some schools and colleges have additional requirements governing when majors may be declared; students should refer to the specific school or college section of the *Guide* and consult with an advisor about declaring their major. For additional details, see Policy on Major Declaration for Schools/Colleges That Enroll Undergraduates (<https://kb.wisc.edu/vesta/page.php?id=58465>).

ACADEMIC PROBATION

Undergraduate students must maintain the minimum academic thresholds, including the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

GENERAL EDUCATION REQUIREMENTS

All undergraduate students at UW–Madison must complete the university-wide General Education Requirements, which are designed to convey the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. These requirements provide for breadth across the humanities and arts, social studies, and natural sciences; competence in communication, critical thinking, and analytical skills necessary for success in college and beyond; and investigation of the issues raised by living in a culturally diverse society. This core is intended to provide students with intellectual and practical skills, basic knowledge of human cultures and the physical world, strategies for understanding these topics, and tools intended to contribute to their sense of personal

REQUIREMENTS FOR UNDERGRADUATE DEGREES

REQUIREMENTS FOR UNDERGRADUATE DEGREES

The University of Wisconsin–Madison sets minimum standards that must be met by all students pursuing an undergraduate degree. The information in the following paragraphs provides general information about study at UW–Madison. Requirements may vary among the schools

and social responsibility. General Education complements the work students do in their majors and degrees. Together, these requirements help students learn what they need to know not just for making a living, but also for making a life.

Completing the General Education Requirements is an important part of achieving these competencies, and to do so, students choose from many courses in communication, ethnic studies, quantitative reasoning, and breadth of study across disciplines in the natural sciences, humanities, literature, and arts, and social and behavioral sciences.

Each school and college may choose to allow General Education courses to count toward other degree and/or major requirements. Students should always check with their advisors to discuss any additional degree requirements and determine if students are required to take specific General Education courses or to complete the requirements in a particular order. Students should review their Degree Audit (DARS) report to see how they are progressing toward fulfilling the General Education requirements. Please refer to this website (<https://gened.wisc.edu>) for more information about the requirements.

The university-wide General Education requirements are:

BREADTH, 13–15 CREDITS, DISTRIBUTED OVER THREE AREAS

All students must complete 13–15 credits of coursework intended to provide a **breadth** of experience across the major modes of academic inquiry. This requirement encourages students to adopt a broad intellectual perspective, to examine the world through investigative, critical, and creative strategies practiced in the natural (computational, biological, and physical) sciences, social and behavioral sciences, as well as in the arts and humanities.

Learning Outcomes: Students acquire critical and creative thinking skills as well as enhance their problem-solving skills through a breadth of study across the humanities and arts, social studies, computational, biological sciences and physical sciences.

In courses satisfying the Breadth requirement, students will:

- articulate examples of significant contributions to human understanding achieved through various “ways of knowing” found in the arts and humanities; social and behavioral sciences; and computational, biological, and physical sciences.
- recognize and articulate the ways in which different disciplines approach questions that call upon different tools of inquiry, understanding, and creative enterprise.
- identify ways in which multiple tools of inquiry and understanding can be used to achieve greater insight into resolving “big” questions (e.g., climate change, poverty, global health etc.), evaluating the strengths and weaknesses of those approaches, and understanding which complementary approaches will help achieve meaningful change.
- evaluate different modes of inquiry across the humanities and arts; social studies; computational, biological, and physical sciences, and identify strengths and weaknesses of those approaches across disciplines when approaching a question.

To achieve these outcomes, students are required to complete courses in the following areas.

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research, understand, communicate about, and interpret creatively the world around us. These “ways of knowing” intersect and overlap, and the ideas presented in one area will often inform and transform what students know and how they think about the others. Students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand their own and others’ experience, and to behave in socially responsible ways. (For more information about how this exposure to breadth of inquiry and expression enriches students’ undergraduate experience and complements intensive study in the major, please see the General Education Requirements (<https://gened.wisc.edu>) website.)

COMMUNICATION, 3 TO 5/6 CREDITS

The **Communication** requirement helps to ensure that all graduates of UW–Madison acquire essential communication and research-gathering skills necessary for success in university course work and beyond. Communication–A (**Comm A**) and Communication–B (**Comm B**) courses train students to gather and assess information from a variety of sources and to present different kinds of information, insight, and analysis to diverse audiences. These courses are essential for students’ career success and their preparation for public life in a rapidly changing world. While Comm–A courses focus exclusively on essential communication skills, Comm–B courses provide content instruction in a specific discipline and teach research, writing, and speaking skills in conjunction with the course content. Comm–B courses are offered by departments across campus and vary widely in topic, content, and format.

Learning Outcomes: Students develop skills that enable them to be effective speakers and writers in and out of the classroom.

In courses satisfying the Communication requirement, students will:

- make effective use of information retrieved, organized, and synthesized from appropriate sources.
- present ideas and information clearly and logically to achieve a specific purpose.
- make effective use of communicative forms appropriate to a specific discipline, and adapted to the intended audience.
- use appropriate style and conventions associated with particular communicative forms, genres, or disciplines.

To achieve these outcomes, students must complete the following Communication requirements:

- **Part A. Literacy Proficiency.** 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete coursework to fulfill this requirement, students may be exempted from Part A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year of undergraduate study.
- **Part B. Enhancing Literacy Proficiency.** 2–3 credits of more advanced coursework for students who have completed or been exempted from Part A. Students should consult with the appropriate undergraduate

advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

ETHNIC STUDIES, 3 CREDITS

The **Ethnic Studies** requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are expected to complete this requirement within the first 60 credits of undergraduate study

Learning Outcomes: Students draw connections between historical and present day circumstances, and consider perceptions and cultural assumptions when examining questions and making decisions.

In courses satisfying the Ethnic Studies requirement, students will:

- articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.
- recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.
- examine questions and make decisions with consideration for the cultural perspectives and worldviews of others.

Students complete this requirement by taking one course of at least 3 credits that is designated as an Ethnic Studies course.

QUANTITATIVE REASONING, 3 TO 6 CREDITS

Quantitative Reasoning is the process of forming conclusions, judgments or inferences from quantitative information. The Quantitative Reasoning requirement at UW–Madison has two parts: Part A and B. **Quantitative Reasoning A** courses provide students with skills in mathematics, computer science, statistics or formal logic that are needed for dealing with quantitative information. The acquired skills are broad-based in order to have a positive impact on the readiness of students to take a Quantitative Reasoning B course in a variety of disciplines. **Quantitative Reasoning B** courses allow students to enhance their Quantitative Reasoning Proficiency in a more advanced setting, where they make significant use of quantitative tools in the context of other course material.

Learning Outcomes: Students utilize mathematical models for scientific or real life problems to set up, analyze, interpret, make judgments, and draw appropriate conclusions based on quantitative analysis of data.

In courses satisfying the Quantitative Reasoning requirement, students will set up an abstract mathematical model or hypothesis for a given scientific or real life problem.

- interpret, handle and manipulate quantitative data sets for scientific or real life problems.
- quantitatively analyze data to obtain relevant insight about a given problem.
- make judgments and draw appropriate conclusions based on the quantitative analysis of data.

Students must complete the following to satisfy the Quantitative Reasoning Requirement:

- **Part A. Quantitative Reasoning Proficiency.** This requirement can be satisfied by:
 - approved college work while in high school, AP test scores, or placement testing; or
 - taking a 3 credit course at UW–Madison with a Quantitative Reasoning A designation.

To ensure timely completion of the undergraduate degree, students should complete Part A of the Quantitative Reasoning requirement by the end of their first year.

- **Part B. Enhancing Quantitative Reasoning Proficiency.** 3 credit course at UW–Madison with a Quantitative Reasoning B designation after satisfying the Part A requirement. Courses that satisfy this requirement are offered in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or other requirements of their intended field(s) of study.

IDENTIFYING COURSES THAT MEET GENERAL EDUCATION REQUIREMENTS

The university offers hundreds of courses that meet the requirements described above. Students should consider their own interests and check with their advisor when deciding which courses to complete. Please note that many undergraduate programs of study have breadth requirements that go beyond these basic university-wide requirements.

The following language is used in the UW–Madison course listings to indicate how courses count toward satisfying the communication, quantitative reasoning, and ethnic studies portions of the General Education Requirements. Courses that satisfy these requirements are also tagged with a mortarboard symbol. #

- Communication Part A
- Communication Part B
- Ethnic Studies
- Quantitative Reasoning Part A
- Quantitative Reasoning Part B

Note: Some Communication Part B courses carry Communication B credit only at the lecture or section level and/or only in certain semesters; these courses will be indicated in the Schedule of Classes.

Course descriptions also include information about whether courses meet General Education Humanities, Natural Science, or Social Studies Breadth Requirements. (Click on course numbers in the *Guide* to see this information.) Students should also be aware that each school and college may, at its own discretion, designate additional courses that satisfy these requirements. For this reason, students should consult their advisors to obtain information about how these requirements are implemented in the school or college in which they are enrolled.

GENERAL EDUCATION POLICIES

Exemption from General Education: All students are required to meet the fundamental degree requirements of the university, which include general education.

Disability-Based Waivers: The university has determined that waivers to the communication and quantitative reasoning portions of the general education component would fundamentally alter the nature of the University of Wisconsin–Madison degree. Students should not expect to

obtain disability-based waivers to the communication and quantitative reasoning portions of the General Education Requirements.

Pass/Fail: Effective fall 2012, all courses taken to meet the University General Education Requirements must be taken on a graded basis. These grades are included in students' GPA calculations according to school/college GPA rules.

GRADUATING

Declaration of Intent to Graduate. When students expect to graduate, they must indicate their intent by completing the graduation application available in the MyUW Student Center. It is the policy of UW–Madison that all work for the degree must be completed and all degree requirements satisfied before the degree can be conferred.

Conferral of Degrees. When students have been certified as having completed all university general education, degree, and major requirements, the degree will be awarded. When the degree is awarded, a diploma will be issued, listing the degree earned, and the transcript updated to reflect the degree, major, and any other approved academic programs completed. Students who have holds (<https://kb.wisc.edu/helpdesk/page.php?id=4139>) on their records will not receive their diplomas, or be able to order transcripts, until the holds are cleared.

Commencement. Students who wish to attend the spring or winter commencement ceremony must indicate their intent by completing the graduation application available via Student Center in My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e4s1>) by the posted deadline (<https://commencement.wisc.edu/information-for-graduates>). Students may participate in the commencement ceremony (<https://commencement.wisc.edu>), in which the chancellor and deans symbolically confer the degrees, even if all degree requirements have not been completed. Neither participation in the ceremony nor listing in the program conveys degree conferral. Students will not receive the diploma or transcript notation until all degree requirements are certified as complete by their respective school or college. Should a student's graduation plans change, updates to the intended term of graduation must be indicated via the graduation application in the MyUW Student Center.

ENROLLMENT AND RECORDS

The Office of the Registrar (<https://registrar.wisc.edu>) is responsible for maintaining the academic records of students who attend the University of Wisconsin–Madison and for many services associated with these records, including enrollment and grading. The office is located at:

333 East Campus Mall #10101
608-262-3811

Many student services are available online in the Student Center on My UW–Madison (My UW) (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e2s1>), including enrolling for courses, viewing grades, and updating address and emergency contact information. Students are responsible for the accuracy of the addresses provided in My UW and for the courses selected when they enroll. For more information about services available through the Student Center, see the Student Demos & Tutorials section of the Office of the Registrar website (<https://registrar.wisc.edu>).

My UW is available to eligible students, who gain access by using their Net ID and password. Access to My UW–Madison is available from

any computer with Internet access. For further information about My UW–Madison, see DoIT (Division of Information Technology) (<http://it.wisc.edu>).

ENROLLMENT

Students enroll for courses, obtain information about deadlines, view their class schedule, and more in the Student Center on My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e3s1>). Individuals who are not eligible to activate their Net ID to access the Student Center can view an up-to-date schedule of classes at the Office of the Registrar website (<https://registrar.wisc.edu>). Information about key deadlines and course enrollment, and online demonstrations of class search, course enrollment, and the Student Center are also available at the Office of the Registrar website (<https://registrar.wisc.edu>). Additional assistance with the course enrollment process is available by calling 608-262-0920 or sending an e-mail to webenroll@em.wisc.edu.

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits taken for which grades of A through F are received. Semester grades are reported by letter only; plus and minus signs are not authorized. The highest possible GPA is 4.0, representing A grades in every course; the lowest possible is 0.0. The following is the official scale of grades at UW–Madison.

GRADES WITH ASSOCIATED GRADE POINTS PER CREDIT

Grade		Grade Points Per Credit
A	Excellent	4
AB	Intermediate Grade	3.5
B	Good	3
BC	Intermediate Grade	2.5
C	Fair	2
D	Poor	1
F	Failure	0

Excluded from the grade point average are:

S or U (Satisfactory or Unsatisfactory) in courses taken on the pass/fail basis: S for grades A through C; U for grades D and F.

Cr or N (Credit or No Credit) in courses offered on a credit/no credit basis.

I (Incomplete), a temporary grade used when work is not completed during a term. The symbol IN will be used to indicate an incomplete in a Cr/N course.

Audited courses, denoted as AU in place of a number of credits on grade reports and transcripts, are graded either S (Satisfactory) or NR (No Report).

P (Progress), a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

DR (Dropped), recorded for any course officially dropped later than two days before the last day to add courses.

NW (No Work) is used to indicate that the student never attended and no work was submitted.

In those relatively few cases in which no authorized grade is reported for a student at the close of a term, NR (No Report) will be used to signify the fact for record purposes.

CREDIT/NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

PASS/FAIL

POLICY ON USE OF PASS/FAIL GRADING OPTION FOR UNDERGRADUATES

This policy concerns the use of the pass/fail grading option for degree-seeking undergraduate students. According to the UW–Madison grading scale, grades of S (satisfactory) and U (unsatisfactory) are the transcribed grades that are used for what is commonly known as pass/fail. It applies only to courses that use the default A–F grading scale and that also allow students to choose to take a course on a pass/fail (PF) basis.¹

The instructor enters the letter grade earned by students on the grade roster, and those letter grades are subsequently recorded as a pass (S) or fail (U) on the student record. A pass (S) will be recorded when a letter grade of A through C is earned. A fail (U) will be recorded when a letter grade of D or F is earned. In addition to the S or U notation, the student transcript includes the symbol # for courses that were taken on a pass/fail basis. Neither the S nor the U is used in computing the grade point average. Instructors are not informed that a student has elected to take the course pass/fail.

STUDENT ELIGIBILITY

Students must be in good academic standing according to their school/college in order to be eligible to request the pass/fail grading option.

Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergrad career. The summer sessions collectively count as a single term.

Required courses cannot be taken on a pass/fail basis. The student's school or college may review the request to take a course pass/fail and reject requests for nonelective work. It may be difficult for the school or college official to determine whether a course is an elective or being used to fulfill a requirement since a student's enrollment or the way a course is being used in the specific program of study may change. Ultimately it is the student's responsibility to be sure that the requested course is an elective. Students are strongly advised to consult with an academic advisor before taking a course pass/fail. Courses taken on a pass/fail basis will not count for nonelective requirements even if they would normally count toward such requirements.

Each school or college is responsible for clearly communicating to its students what the definition of "good academic standing" is and what a free elective is.

In each school or college, the office responsible for academic policy exceptions is authorized to make exceptions to the pass/fail policy.

PROCESS FOR REQUESTING THE PASS/FAIL GRADING OPTION

Students indicate that they would like to have a course they are enrolled in graded on a pass/fail basis by completing a course change request via their Student Center (see Grade Change Request (https://registrar.wisc.edu/course_change_request.htm) for detailed information). Students may submit pass/fail requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed).

The deadline for requesting the pass/fail grading option is posted on the Office of the Registrar website. These deadlines are based on the idea that the pass/fail option is intended to encourage students to explore educational opportunities that they might otherwise not be willing to attempt. Pass/fail is not intended as a way for students to avoid academic consequences.

Once the student has submitted the request to take a course on a pass/fail basis the request is routed via ISIS workflow to an academic dean in the school or college for approval or further communication with the student. The school/college official must approve the request before the grading option is changed to pass/fail by the Office of the Registrar.

Students can see whether a course is being graded on a pass/fail basis in their Student Center.

¹ For study abroad programs operated by the College of Engineering, courses taken abroad toward an engineering major will be posted as pass/fail. This occurs automatically and is not a student option; this practice is not covered or affected by this policy.

FAILURES

Every course grade of F counts as 0 grade points and remains permanently on the transcript. If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA.

INCOMPLETES

An Incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester. If a student is unable to take or complete the final examination because of illness or other circumstances beyond his or her control, the student may be granted an Incomplete. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of such proof the grade shall be F; even with such proof, if the instructor is convinced that the student cannot pass, the grade shall be F.

Undergraduate students enrolled in the College of Letters & Science must complete the course work for which they received the Incomplete by the end of the fourth week of classes of their next term of enrollment at UW-Madison (exclusive of summer sessions). Failure to do so will result in a lapse into a grade of F, unless the time limit has been formally extended. Letters & Science students should see the L&S section on Incompletes (p. 315) for important details.

Undergraduates enrolled in schools or colleges other than Letters & Science must complete the course work for which they received the Incomplete by the end of their next term of enrollment (exclusive of summer sessions). Incompletes incurred in the last term of enrollment may not be removed after five years of absence from the university without special advance permission of the student's associate or

assistant dean. Such Incompletes remain on the record but do not lapse into a grade of F.

AUDIT

Students may audit courses with instructor and advisor consent, and if no laboratory or performance skills are involved. Auditors may not recite or take examinations but are expected to attend classes regularly and do some assigned work. Although courses for which students enroll as an auditor are factored into tuition, such courses do not earn academic credit and do not count in determining full-time/part-time load for enrollment certification in an academic term. The deadline to change a course from credit to audit is the end of the fourth week of classes. School and college policies may vary from this description. Students are advised to consult with the instructor concerning specific course requirements that must be satisfied.

CLASS STANDING

Students are classified by year according to the number of credits and grade points they have earned:

Freshman: less than 24 credits
 Sophomore: at least 24 credits
 Junior: at least 54 credits
 Senior: at least 86 credits

TUITION AND FEES

The UW System Board of Regents sets tuition and fee rates annually. Rates are subject to change without notice.

The tuition and fee schedule is available on the Office of the Registrar website (https://registrar.wisc.edu/tuition_&_fees.htm). Students who enroll after the first Friday of the official first week of classes are assessed a late initial enrollment fee. Exception: Special and Guest students have until the Friday of the second week of classes to enroll.

For tuition rate questions, contact the Office of the Registrar Tuition Assessment Section.
tuition@em.wisc.edu
 608-262-4031
 333 East Campus Mall #10301
 Madison, WI 53715-1384

Enrolled students can view tuition charges/payments, financial aid (loans, grants, scholarships) received, and refunds on their My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e5s1>) Student Center, Tuition Account Summary); they can also access links to view and pay tuition eBills, set up Authorized Payers for tuition account access, and enroll for eRefund.

The Bursar's Office provides the tuition bill as an eBill which is published on the Tuition Account eBill/ePayment site. Students and their Authorized Payers receive an email alert when the eBill is available to view.

For tuition account activity and billing questions, contact the Bursar's Office.
tuition@bussvc.wisc.edu (include student ID and name)
 608-262-3611
 333 East Campus Mall #10501
 Madison, WI 53715-1383

PAYMENT OF TUITION AND FEES

The UW–Madison Bursar's Office does not accept debit or credit cards, nor offer an installment plan. Tuition payment options are: make an ePayment; mail a check to the Bursar's Office at the address above; pay in person with check or cash at the Bursar's Office; or put a check in the first-floor lobby or 10th-floor dropbox. For detailed payment information, see Tuition & Fee Payments (<http://www.bussvc.wisc.edu/bursar/tuitpay.html>) on the bursar's website.

If tuition is not paid by the due date, a late fee is assessed and a hold is placed on the student account to prevent future enrollment and release of official transcripts and diplomas, until the account is paid.

RESIDENCE FOR TUITION PURPOSES

Wisconsin Statutes, Section 36.27(2), governs resident status for tuition purposes at all University of Wisconsin System institutions. Students who do not qualify under one of the exceptions in the statute will be assessed nonresident tuition. In determining resident status for tuition purposes, standards are different from those used for voting, paying taxes, applying for various licenses, and the like. In general, a student must be a bona fide resident of Wisconsin for at least 12 months before enrollment for any term in order to be eligible for in-state tuition. However, a student who comes to Wisconsin primarily for educational reasons does not automatically qualify as a Wisconsin resident even after living in Wisconsin for a year or more.

For more information and the full text of Wisconsin Statutes, Section 36.27(2), see the Office of the Registrar website (<https://registrar.wisc.edu/residence.htm>) or contact a residence counselor at 608-262-1355; res4tuition@em.wisc.edu.

MINNESOTA RECIPROCITY FOR TUITION RATES

Minnesota residents who are certified by the Minnesota Office of Higher Education for the appropriate term to attend UW–Madison under the Minnesota–Wisconsin Tuition Reciprocity Agreement will be assessed the approved reciprocity tuition rate, plus the segregated fees assessed all UW–Madison students. Students under this program will be classified as nonresidents of Wisconsin.

It is the student's responsibility to inquire about application procedures, deadline dates, and reapplication procedures. Students may apply online on the Minnesota Office of Higher Education website (<http://www.ohe.state.mn.us>). Questions may be directed to the Minnesota Office of Higher Education:
 1450 Energy Park Drive, Suite 350
 St. Paul, MN 55108-5227
 651-642-0567 or 1-800-657-3866

They may also be directed to the UW–Madison Office of the Registrar (<https://registrar.wisc.edu>), Tuition Assessment Section:
 333 East Campus Mall #10301
 Madison, WI 53715-1384
tuition@em.wisc.edu
 608-262-4031

RULES, RIGHTS, AND RESPONSIBILITIES

STUDENT PRIVACY RIGHTS (FERPA)

Students have the right to inspect and review most education records maintained about them by the University of Wisconsin–Madison and, in many cases, decide if a third person can obtain information from them. Students may challenge information in their records which they believe to be inaccurate, misleading, or inappropriate.

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA). A copy of this statement may be obtained at the Office of the Registrar (<https://registrar.wisc.edu>), 333 East Campus Mall #10101. The university, in accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; e-mail addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full- or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e6s1>). Students with questions about the provisions of the act or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar:
333 East Campus Mall #10101
Madison, WI 53715-1384
reginfo@em.wisc.edu
608-262-3811

Students have the right to file complaints alleging university noncompliance with the act with the federal agency that enforces the act. The address is: The Family Educational Rights and Privacy Act (<http://www2.ed.gov/policy/gen/guid/fpco/ferpa>) Office, Department of Education, 330 Independence Avenue SW, Washington, DC 20201.

Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at: Office of the Registrar (<https://registrar.wisc.edu>)
333 East Campus Mall #10101
Madison, WI 53715-1384

AVAILABILITY OF ACADEMIC RECORD INFORMATION TO PARENTS OR GUARDIANS OR OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An authorization form is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (<https://registrar.wisc.edu>), 333 East Campus Mall #10101. The authorization form permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it will be assumed that the student does not wish to give a third party access to academic record information. This policy

is designed to give students specific control over the parties to whom academic record information may be released.

Grade reports will not be sent by the university to parents or guardians. Students are urged to keep their parents informed of their academic progress.

ACADEMIC INTEGRITY

UW–Madison students have the obligation to conduct their academic work in a manner consistent with high standards of academic integrity. They also have the right to expect that they and other students will be graded fairly, and they have the rights of due process should they be accused of academic misconduct. Therefore, it is important that students:

- become familiar with the rules of academic misconduct (UWS Ch. 14);
- ask their instructors if they are unsure whether something is acceptable (for example, how to use sources in a paper or whether to work with another student on an assignment);
- let instructors know if they think they see incidents of misconduct;
- be aware that helping someone else cheat is a violation of the rules; and

For complete discussion of the rules regarding academic integrity, see the Dean of Students website (<https://www.students.wisc.edu/doso>), or contact the assistant dean for academic integrity at 608-263-5700 or Room 70 Bascom Hall.

STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin–Madison community has the right to expect to conduct his or her academic and social life in an environment free from threats, danger, or harassment. Students also have the responsibility to conduct themselves in a manner compatible with membership in the university and local communities. UWS Chapters 17 and 18 of the Wisconsin Administrative Code list the university policies students are expected to uphold and describes the procedures used when students are accused of misconduct. Chapter 17 also lists the possible responses the university may apply when a student is found to violate policy. The process used to determine any violations and disciplinary actions is an important part of UWS 17. For the complete text of UWS Chapter 17, see this link (<https://students.wisc.edu/student-conduct/nonacademic-misconduct>), or contact the on-call dean in the Dean of Students Office, 608-263-5700, Room 70 Bascom Hall.

No student may be denied admission to, participation in or the benefits of, or discriminated against in any service, program, course or facility of the [UW] system or its institutions or centers because of the student's race, color, creed, religion, sex, national origin, disability, ancestry, age, sexual orientation, pregnancy, marital status or parental status.

STUDENT GRIEVANCE PROCEDURE

Any student at UW–Madison who feels that he or she has been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment.

Each school or college has a procedure to hear grievances. Generally the process involves an informal attempt to solve the problem, if appropriate. If not, more formal proceedings can be undertaken until

a resolution is reached. Advisors and school or college offices have detailed information. For assistance in determining options, students can contact the on-call dean in the Dean of Students Office, 608-263-5700, Room 70 Bascom Hall, Monday–Friday, 8:30 a.m.–4:30 p.m.

SEEKING ASSISTANCE

A student can seek help at many places on campus, for both personal and academic problems. For answers to general questions on many topics, a good place to start is Ask Bucky (<https://info.wisc.edu/ask-bucky>), which is an excellent general referral service.

For personal problems, Counseling Services, a unit of University Health Services (<http://www.uhs.wisc.edu>), offers a variety of individual, group and couple counseling services. Experienced counselors, psychologists, and psychiatrists are available to assist students in overcoming depression and managing anxiety, and in developing self-awareness and understanding, independence, and self-direction. The counseling staff is experienced and sensitive to students of diverse cultural and ethnic backgrounds. Counseling Services is located at 333 East Campus Mall; 608-265-5600. In addition, an on-call dean in Student Assistance and Judicial Affairs is usually available by telephone (608-263-5700) or on a walk-in basis (75 Bascom Hall) Monday–Friday, 8:30 a.m.–4:30 p.m.

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. If further assistance is needed, the student should contact one of the academic deans in the school or college.

ALCOHOLEDU ([HTTPS://WWW.UHS.WISC.EDU/PREVENTION/SUBSTANCE-ABUSE/ALCOHOLEDU](https://www.uhs.wisc.edu/prevention/substance-abuse/alcoholedu))

AlcoholEdu is an online course overseen by University Health Services that educates students about the impacts of alcohol and provides them with the information to make healthy decisions. All incoming degree seeking undergraduate students—including first-year and transfer students—must complete *AlcoholEdu*. The program consists of two parts, both of which must be completed.

STUDENT LIFE

Nine departments, one center, and a campuswide program—collaborating with many campus units—work with students during their time at UW–Madison. We know that the Wisconsin Experience has the potential to be transformative. We strive to develop world leaders, engaged citizens, and interesting people. We have high expectations of students.

To help them make the most of their experiences at Wisconsin, we urge students to get involved in something that matters, to consider themselves representatives of the university, to act with integrity in all they do, and show respect to everyone they encounter. Students should take pride in themselves as world citizens and as scholars, demonstrate a strong work ethic, and capitalize on their opportunities and challenges. In promoting this behavior, we encourage students to think not just about their future, but about their legacy.

That's what it means to be a student at Wisconsin. That's what it means to do things that matter and have purpose. Badgers make the world a better place.

ASSOCIATED STUDENTS OF MADISON (ASM)

4301 Student Activity Center
333 East Campus Mall
608-265-4276 (265-4ASM)

Web: [www.asm.wisc.edu](http://asm.wisc.edu) (<http://asm.wisc.edu>)

Twitter: @ASMstudentgovt (<https://twitter.com/search?q=%40ASMstudentgovt&src=typd>)

- Promotes student voice as it pertains to legislative, diversity, and university affairs
- Distributes funding for student activities, organizations, and events to maximize student involvement in shaping campus life
- Supports elected student representatives

CENTER FOR THE FIRST-YEAR EXPERIENCE

155 Middleton Building
1305 Linden Drive
608-263-0367

Email: newstudent@studentlife.wisc.edu

Web: newstudent.wisc.edu (<http://newstudent.wisc.edu>)

Facebook: UW First-Year Experience (<https://www.facebook.com/UWNewStudent>)

Twitter: @UWNewStudent (<https://twitter.com/search?q=%40UWNewStudent&src=typd>)

- Collaborates with campus partners to plan and implement Student Orientation, Advising, and Registration (SOAR) for incoming undergraduates and their families
- Oversees Transfer Transition Program, which provides pre-advising services to prospective students and support services to new transfer students on campus
- Assists incoming students with the academic and social transitions to the university through direct and indirect programming
- Offers seminar courses on the Wisconsin Experience and provides consultation and support to faculty and graduate students who work with first-year students

CENTER FOR LEADERSHIP AND INVOLVEMENT

Third Floor, Red Gym
716 Langdon Street
608-263-0365

Email: cflife@studentlife.wisc.edu

Web: cflife.wisc.edu (<http://cflife.wisc.edu>)

Twitter: @UWCFLI (<https://twitter.com/search?q=%40UWCFLI&src=typd>)

- Facilitates the registration and advising for more than 1,000 student organizations, including fraternities and sororities
- Hosts student organization fairs
- Supports the Adventure Learning Programs, Student Leadership Program, the Wisconsin Band, and the Wisconsin Singers
- Confers UW–Madison Leadership Certificate

DEAN OF STUDENTS OFFICE

70 Bascom Hall

500 Lincoln Drive
608-263-5700
Email: dean@studentlife.wisc.edu
Web: students.wisc.edu/doso (<http://students.wisc.edu/doso>)

- Provides walk-in or call-in assistance
- Provides crisis loans and referral services to campus and community resources
- Responsible for academic and non-academic misconduct process
- Promotes academic integrity
- Works to assess potential threats and promote campus safety
- Supports faculty and staff who have concerns about students they teach or employ

INTERNATIONAL STUDENT SERVICES

217 Red Gym
716 Langdon Street
608-262-2044
Email: iss@studentlife.wisc.edu
Web: iss.wisc.edu (<http://iss.wisc.edu>)
Twitter: @UW_ISS (https://twitter.com/UW_ISS)

- Provides advising for more than 6,000 international students and their dependents
- Issues nonimmigrant student visa documents and provides information on immigration regulations and procedures
- Provides orientation for new arrivals, as well as continuing support services and programs for cultural adjustment and integration to campus and community life

LESBIAN, GAY, BISEXUAL, TRANSGENDER CAMPUS CENTER

123 Red Gym
716 Langdon Street
Phone: 608-265-3344
Email: lgbt@studentlife.wisc.edu
Web: lgbt.wisc.edu (<http://lgbt.wisc.edu>)
Facebook: LGBT Campus Center (<https://www.facebook.com/lgbtcampuscenter>)

- Educates faculty, staff, and students about sexual orientation and gender identity via ally and topic-specific training
- Provides support to LGBTQ and ally communities as well as resource materials in the LGBTCC Library, online, and through discussion groups
- Organizes the Queer Emerging Leaders Program, the LGBTQ Leadership Institute, and a mentoring program
- Coordinates identity- and community- building events, including Out and About Month and Coming Out Month

MCBURNERY DISABILITY RESOURCE CENTER

702 West Johnson Street, Suite 2741
608-263-2741
Email: mcburney@studentlife.wisc.edu
Web: mcburney.wisc.edu (<http://mcburney.wisc.edu>)
Text: 608-225-7956

- Promotes accessible, open, and welcoming campus community for all people with disabilities
- Provides direct support services and classroom accommodations to students with disabilities
- Provides information and referral services on disability issues for students, faculty, and staff
- Offers peer education and campus programming around disability issues and inclusive practices

MULTICULTURAL STUDENT CENTER

249 Red Gym
716 Langdon Street
608-262-4503
Web: msc.wisc.edu (<http://msc.wisc.edu>)
Social Media: @UWMulticultural (<https://twitter.com/@UWMulticultural>)

- Ensures students of all racial and cultural backgrounds are successful and welcome
- Hosts workshops and guest speakers on topics such as race and identity, allyship, supporting LGBTQ students of color, and creating a more inclusive campus
- Organizes the Multicultural Orientation and Reception and the Way Up Student Organization Festival
- Provides opportunities for leadership, skill development, and recognition through programs like the Multicultural Leadership Summit and the Multicultural Leadership Awards and Graduation Celebration

OFFICE OF STUDENT CONDUCT AND COMMUNITY STANDARDS

70 Bascom Hall
500 Lincoln Drive
608-236-5700
Email: dean@studentlife.wisc.edu
Web: students.wisc.edu/student-conduct (<http://students.wisc.edu/student-conduct>)

- Upholds every student's right to learn in a community that is safe, and fosters integrity and accountability
- Provides leadership in reducing high-risk student drinking
- Partners with instructors to resolve academic misconduct incidents

VETERAN SERVICES AND MILITARY ASSISTANCE CENTER

333 East Campus Mall, Suite 10301
Madison, WI 53715
608-265-4628
Email: veterans@wisc.edu (veterans@em.wisc.edu)
Web: veterans.wisc.edu/ (<http://veterans.wisc.edu>)

- A collaborative operation between the Office of the Registrar and the Division of Student Life
- Assists U.S. military veterans, current service members, and their dependents regarding benefits, enrollment, and other activities pursuant to higher education
- Holds Veteran networking receptions and resume and interview workshop with local employers and students

- Advises the VETS student organization

OUR WISCONSIN

155 Middleton Building
1305 Linden Drive
608-262-9067

Email: ourwisc@studentlife.wisc.edu

Web: students.wisc.edu/ourwisconsin (<http://students.wisc.edu/ourwisconsin>)

Our Wisconsin is an inclusion program that was developed as an effort to build community among our diverse community. *Our Wisconsin's* aim is to improve the University of Wisconsin–Madison's campus climate, as it is one of our core beliefs that every student at UW–Madison, regardless of their background or how they may identify, should feel safe, valued, supported, and welcomed.

ACADEMIC CALENDAR

ACADEMIC CALENDAR

Establishment of the academic calendar (<https://www.secfac.wisc.edu/academic-calendar.htm>) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. Approximately every five years, the Faculty Senate approves a new academic calendar which spans a future five-year period.

The current calendar was adopted by the Faculty Senate in September 2016.

CHANGES TO THE 2017–18 GUIDE

Agronomy B.S.

October 20, 2017

Foundational Courses (p. 70)

- Removed **BSE 216** from the course list

Animal Sciences B.S.

June 27, 2017

Major Requirements (p. 76)

- Deleted footnote #2. Moved footnote #2 text to top of section under the heading Business Emphasis. *Text:* Up to two courses may be applied to Certificate in Business Mgmt. for Ag. & Life Sciences.

Four-Year Plan (p. 79)

- Added AN SCI/DY SCI 361 as a sequence course with AN SCI/DY SCI 363 in the junior spring semester.

Art History B.A. and B.S.

October 20, 2017

B.A. (p. 370) and B.S. (p. 378) Major Requirements

- Added ART HIST/RELIG ST 373 and ART HIST 479 to the Early Modern (Circa 1400–Circa 1800) course list under the Chronological Distribution header

- Added ART HIST 479 to the Modern (Circa 1800–Circa 1945) course list under the Chronological Distribution header
- Added ART HIST/RELIG ST 373 to the Cross-Cultural/Diaspora course list under the Geographic Distribution header
- Added ART HIST/RELIG ST 373 to the Africa/Middle East course list under the Geographic Distribution header
- Added ART HIST/RELIG ST 373 to the Asia course list under the Geographic Distribution header
- Asian Art Emphasis
 - Added ART HIST/RELIG ST 373 to the General subfield
 - Added ART HIST 205 and ART HIST/RELIG ST 373 to the India subfield
 - Added ART HIST 205 to the Introductory Course in Western Art section

Astronomy B.A. and B.S.

October 20, 2017

B.A. (p. 426) and B.S. (p. 429) Advising and Carrers

- Removed **COMP SCI 302** from the Computing section under the Recommended Additional Courses

Athletic Training B.S.

September 27, 2017

Major Requirements (p. 1473)

- Removed **PSYCH 201** and **PSYCH 285** from the Science core

Atmospheric & Oceanic Studies B.A. and B.S.

October 20, 2017

B.A. (p. 431) and B.S. (p. 434) Major Requirements

- Removed **COMP SCI 302** from the Computer Sciences section

B.A. (p. 430) and B.S. (p. 434) How to Get In

- Removed **COMP SCI 302** from the Computer Sciences section

Biochemistry B.A. (L&S), B.S. (L&S), and B.S. (ALS)

June 13, 2017

B.S. (ALS) Four-Year Plan (p. 108)

- Changed BIOCHEM 375 to BIOCHEM 100 in the freshman fall semester

September 27, 2017

B.A. (L&S) (p. 460), B.S. (L&S) (p. 468), B.S. (ALS) (p. 101)

- Removed **Anatomy 619** from Biology Option A Upper-Level Biology course list
- Added RADIOL/B M E/MED PHYS/PHMCOL-M/PHYSICS 619 to Biology Option A Upper-Level Biology course list
- Changed BMOLCHEM 504 from 2 credits to 3 credits in Biology Option A Upper-Level Biology course list

Biological Systems Engineering, B.S.

September 27, 2017

Four-Year Plan (p. 115)

- **General Program**

- Removed INTEREGR 170 or INTEREGR 110 and BSE 270 from Freshman Fall
- Added Biological Science Course and General Education Course in Freshman Fall
- Removed PHYSICS 202 and E M A 201 from Freshman Spring
- Added I SY E 313, COMP SCI 310, and 'INTEREGR 170 or INTEREGR 110' in Freshman Spring
- Removed COMP SCI 310, Biological Science Course, and '300 level or higher non-BSE engineering course' from Sophomore Fall
- Added E M A 201, BSE 270, and General Education Course in Sophomore Fall
- Removed STAT 224, M E 361, BSE 365 from Sophomore Spring
- Added MATH 320 and PHYSICS 202 in Sophomore Spring
- Removed MATH 320 and I SY E 313 from Junior Fall
- Added M E 361, STAT 224, and '300 level or higher non-BSE engineering course' in Junior Fall
- Added BSE 365 in Junior Spring
- Changed Technical Elective credits from 7 to 4 in Senior Fall
- Added '300 level or higher non-BSE engineering course' in Senior Fall
- Removed BSE 364 from Senior Spring
- Added BSE 464 and Technical Electives in Senior Spring
- Changed 300 level or higher non-BSE engineering course credits from 6 to 3
- Added to footnote 1, "and move I SY E 313 to the fall semester of year 2."

- **Food and Bioprocess Engineering Specialization (BioProcess Engineering Track)**

- Removed INTEREGR 170 or INTEREGR 110 and BSE 270 in Freshman Fall
- Added E P D 155 and General Education Course in Freshman Fall
- Removed E M A 201, PHYSICS 202, and E P D 155 from Freshman Spring
- Added INTEREGR 170 or INTEREGR 110, COMP SCI 310, and 'MICROBIO 101 & MICROBIO 102' in Freshman Spring
- Remove MICROBIO 101 & MICROBIO 102 from Sophomore Fall
- Added E M A 201 and BSE 270 in Freshman Fall
- Removed COMP SCI 310, BSE 365, and STAT 224 from Sophomore Spring
- Added E P D 397 and PHYSICS 202 in Sophomore Spring
- Removed E P D 397 and BSE 461 from Junior Fall

- Added STAT 224 and General Education Course in Junior Fall
- Removed BSE 460 from Junior Spring
- Changed General Education Courses credits from 3-6 to 3 in Junior Spring
- Added BSE 364 and BSE 365 in Junior Spring
- Removed BSE Breadth Requirement from Senior Fall
- Added BSE 461, and BSE 460 in Senior Fall
- Removed Technical Electives from Senior Spring
- Added BSE Breadth Requirement in Senior Spring
- Added to footnote 1, "and move MICROBIO 101/MICROBIO 102 to the first semester of year 2."

- **Food and Bioprocess Engineering Specialization (Food Engineering Track)**

- Removed INTEREGR 170 or INTEREGR 110 and BSE 270 in Freshman Fall
- Added E P D 155 and General Education Course in Freshman Fall
- Removed PHYSICS 202 and E P D 155 from Freshman Spring
- Added COMP SCI 310, I SY E 313, and INTEREGR 170 or INTEREGR 110 in Freshman Spring
- Removed General Education Course from Sophomore Fall
- Added BSE 270 and CHEM 341 in Sophomore Fall
- Removed BSE 365, COMP SCI 310, and STAT 224 from Sophomore Spring
- Added General Education and PHYSICS 202 in Sophomore Spring
- Removed BSE 461 from Junior Fall
- Added STAT 224 or STAT 324 in Junior Fall
- Removed General Education Course and I SY E 313 from Junior Spring
- Added BSE 365 and BSE 364 in Junior Spring
- Removed BSE Breadth Requirement from Senior Fall
- Added BSE 461 in Senior Fall
- Removed BSE/FOOD SCI/M E 441 from Senior Spring
- Added BSE Breadth Requirement in Senior Spring
- Added to footnote 1, "and move I SY E 313 to year 2."

- **Machinery Systems Engineering Specialization**

- Removed INTEREGR 170 or INTEREGR 110 from Freshman Fall
- Added General Education Course in Freshman Fall
- Removed E M A 201 from Freshman Spring
- Added INTEREGR 170 or INTEREGR 110 and COMP SCI 310 in Freshman Spring
- Removed COMP SCI 310 and E M A 202 from Sophomore Fall
- Added General Education Course and E M A 201 in Sophomore Fall
- Removed BSE 365 from Sophomore Spring
- Added E M A 202 in Sophomore Spring

- Removed General Education Course from Junior Spring
- Added BSE 365 in Junior Spring
- Changed Technical Elective from 4 credits to 5 in Senior Fall
- Removed General Education Course from Senior Fall
- Changed General Education Courses from 9 credits to 6 and Technical Electives credits from 6 to 9 in Senior Spring
- Added to footnote 1, "and move M E 231 to Fall semester of year 2. M E 342 can be taken without M E 331."

• **Natural Resources and Environment Specialization**

- Removed INTEREGR 170 or INTEREGR 110 and BSE 270 from Freshman Fall
- Added E P D 155 and General Education Course in Freshman Fall
- Removed PHYSICS 202, E M A 201, and E P D 155 from Freshman Spring
- Added SOIL SCI 301 or SOIL SCI/ENVIR ST/GEOG 230, COMP SCI 310, INTEREGR 170 or INTEREGR 110, and Biological Sciences Course in Freshman Spring
- Removed COMP SCI 310 and SOIL SCI 301 or SOIL SCI/ENVIR ST/GEOG 230 from Sophomore Fall
- Added E M A 201, BSE 270, and General Education Course in Sophomore Fall
- Removed BSE 365 and Biological Sciences Course from Sophomore Spring
- Added PHYSICS 202 in Sophomore Spring
- Added BSE 365 in Junior Spring
- Changed General Education Courses credits from 6 to 3
- Changed Technical Electives credits from 7 to 6
- Added to footnote 1, "and move Biological Science to the fall semester of year 2. SOIL SCI 301 is offered Fall semesters and is a 4 credit alternative to SOIL SCI/ ENVIR ST/GEOG 230. Plan BSE 473 for Fall term of year 3 or 4 as available in odd years."

• **Removed Structural Systems Engineering Specialization Four-Year Plan**

Biology B.A. (L&S), B.S. (L&S), and B.S. (ALS)

September 27, 2017

B.A. (L&S) (p. 911), B.S. (L&S) (p. 921), and B.S. (ALS) (p. 84)

Major Requirements

- Added NTP/MED PHYS 651 to the B. Systems Neurobiology course list under the Neurobiology Option header
- Added NTP/MED PHYS 651 to the E. Applied Biology, Agriculture and Natural Resources under the Intermediate/Advanced header

Botany B.A. and B.S.

September 27, 2017

B.A. (p. 480) and B.S. (p. 483) Major Requirements

- Removed the PHYSICS 104, PHYSICS 202, and PHYSICS 208 as part of a sequence
- Added PHYSICS 249 to the Physics section under the Math, Chemistry, and Physics header
- Added a footnote; "PHYSICS 115 is the best choice if one course is to be taken. It is recommended that two semesters of PHYSICS be taken (PHYSICS 103/PHYSICS 104 or PHYSICS 201/PHYSICS 202 or PHYSICS 207/PHYSICS 208). Please note PHYSICS 107 and PHYSICS 109 do not fulfill this requirement."

Chicana/o and Latina/o Studies Certificate

September 27, 2017

Requirements (p. 521)

- Added COUN PSY 230 and CURRIC 240 to the 100 or 200 level course section
- Added CHICLA/CURRIC 321, CHICLA/SPANISH 467, COUN PSY 300 (Immigrant Health and Well-Being; Working with Latinx Populations; Working with Refugee Families), POLI SCI 601 (Cuba U.S. Relations: Past & Present), LACIS 440 (US & Latin America from Colonial Era to Present; Labor in Americas The U.S. and Mexico in Comparative and Historical Perspective), SPANISH/CHICLA 469, and CURRIC 675 (Language and Culture in the Borderlands) to the advanced courses list

Classical Humanities B.A. and B.S.

October 20, 2017

B.A. (p. 524) and B.S. (p. 529) Major Requirements

- Added the sentence "A maximum 6 credits may come from courses outside of and that are not cross-listed in CLASSICS, GREEK and LATIN" to the Literature and Cultures header.

Communication Arts B.A. and B.S.

September 27, 2017

B.A. (p. 550) and B.S. (p. 555) Major Requirements

- Removed **Com Arts 353** from Theory-History-Criticism section of Radio-Television-Film Header

Communication Sciences & Disorders B.A. and B.S.

September 6, 2017

B.A. (p. 564) and B.S. (p. 567) Major Requirements, CS&D Courses

- Replaced CS&D 424 with CS&D 425.

September 27, 2017

B.A. (p. 564) and B.S. (p. 567) Major Requirements

- Added STAT 224 to the Statistics course list under Courses in Related Areas
- Added LINGUIS 101 and LINGUIS/ANTHRO 301 to the Linguistics course list under Courses in Related Areas
- Added PHYSICS 103 and PHYSICS 109 to the Biological Sciences course list under Courses in Related Areas
- Removed **PSYCH 201** and **PSYCH 281** from the Psychology course list

Computer Sciences B.A., B.S., and Certificate

September 27, 2017

B.A. (p. 579) and B.S. (p. 584) Major Requirements, Certificate (p. 588)

- Removed the Introductory Programming Prerequisite which included COMP SCI 200, COMP SCI 301, **Comp Sci 302**, COMP SCI 310, and E C E 203

Community & Environmental Sociology B.S.

October 20, 2017

Major Requirements (p. 119)

- Remove **C&E SOC 601** from the Community Course Set course list under the Elective Courses within the Major

Conservation Biology B.A. and B.S.

September 27, 2017

B.A. (p. 486) and B.S. (p. 491) Major Requirements

- Added LAND ARC/ENVIR ST 361 to the Species & Field Biology course list

Criminal Justice Certificate

September 27, 2017

Requirements (p. 496)

- Removed **Psych 586** from Group 2 - Theories of Crime and Deviant Behavior

Electrical Engineering B.S.

August 11, 2017

Requirements (p. 244), Electrical Engineering Advanced Electives, Computers & Computing

- Removed COMP SCI 400 from the list.

Engineering Mechanics B.S.

October 20, 2017

Requirements (p. 253)

- Changes to the Engineering Mechanics Curriculum
 - Added STAT 324 to the Mathematics and Statistics header
 - Added COMP SCI 300 to the footnote under the Engineering Science header
 - Added M E 563 and E M A 545 to the Engineering Mechanics Core header
 - Changed overall total credits from 121 to 128
- Changes to the Astronautics Option in Engineering Mechanics Curriculum
 - Added COMP SCI 300 to the footnote under the Engineering Science header

Four-Year Plan (p. 257), Astronautics Option

- Added STAT 324 in First Year Spring
- Added E M A 542 in Third Year Fall
- Removed E P D 397 from Third Year Fall
- Removed E M A 611, E M A/M E 540, E M A/M E 570, and E M A 522 from Third Year Spring
- Added E P D 397 in Third Year Spring

- Removed e m a 542 from Fourth Year Fall
- Added E M A 611, E M A/M E 540, E M A/M E 570, and E M A 522 in Fourth Year Fall
- Changed Liberal Studies Elective from 3 to 4 credits in Fourth Year Fall

Engineering Physics B.S.

October 20, 2017

Requirements (p. 259)

- Added CHEM 103 & CHEM 104, and PHYSICS 208 under the Science header
- Added COMP SCI 300 under the Computing Elective section under the Science header
- Added PHYSICS 201, PHYSICS 207, and E M A 202 under the Engineering Science header
- Changed required courses to say PHYSICS 551 OR E P/ E M A 615 under the Nanoengineering section under the Focus Area Electives
- Added PHYSICS 623 to Open Electives section under the Plasma Science and Engineering header

Four-Year Plan (p. 263)

- Removed M S & E 351 and CBE 440 from the Second Year Spring

Engineering Thermal Energy Systems Certificate

October 20, 2017

Requirements (p. 287)

- Added M E 460 under Mechanical Engineering

English Language Arts Minor

September 27, 2017

Requirements (p. 1331)

- Removed **Com Arts 353** from the Mass Communications course list under the Mass Communication header

Environmental Sciences B.A. (L&S), B.S. (L&S), and B.S. (ALS)

September 27, 2017

B.A. (L&S) (p. 437), B.S. (L&S) (p. 444), and B.S. (ALS) (p. 186) Major Requirements

- Add SOIL SCI/CIV ENGR/M&ENVTOX 631 to the Physical Environment course list under the Major Core header
- Add SOIL SCI/CIV ENGR/M&ENVTOX 631 to the Physical Environment course list in the Distributed Electives track under the Major Electives header
- Add SOIL SCI/CIV ENGR/M&ENVTOX 631 to the Physical Environment course list in the Area of Focus track under the Major Electives header
- Add A A E 246, HISTORY/ENVIR ST/GEOG 469, GEOG/URB R PL 305, and ENVIR ST 349 to the Environmental Policy & Social Perspectives course list under the Major Core header
- Add A A E 246, HISTORY/ENVIR ST/GEOG 469, GEOG/URB R PL 305, and ENVIR ST 349 to the Environmental Policy & Social Perspectives course list in the Area of Focus track under the Major Electives header

Gender & Women's Studies B.A. & B.S.

October 20, 2017

B.A. (p. 655) & B.S. (p. 662) Major Requirements

- Removed **GEN&WS 601** from the Social Science course list under the Approaches header

Gender & Women's Studies Certificate

October 20, 2017

Requirements (p. 669)

- Removed **GEN&WS 601** from the Social Science course list under the Course Lists header

Genetics B.S.

September 27, 2017

Requirements (p. 150)

- Changed **BMOLCHEM 504** from 2 credits to 3 credits in Capstone course list

Global Health Certificate

September 27, 2017

Requirements (p. 167)

- Removed **THER SCI 105** from Global Health Electives: Public Health Medicine course list
- Added **SOC WORK/NURSING/S&A PHM 105** to Global Health Electives: Public Health Medicine course list

International Studies B.A. and B.S.

September 27, 2017

B.A. (p. 793) and B.S. (p. 838) Options within the Major

- Add **AFRICAN 403** to the Culture Core course list under the Culture in the Age of Globalization header
- Add **ENVIR ST/POP HLTH 560** and **COM ARTS 573** to the Global Security Issues under the Global Security header
- Add **POLI SCI 321** and **POLI SCI 322** to the Politics and Policy Issues under the Politics and Policy in the Global Economy header

Journalism B.A. and B.S.

September 27, 2017

B.A. (p. 1106) and B.S. (p. 1110) Major Requirements

- Removed **Psych 201** and **Psych 281** from the Introductory Social Science section under the Introductory Requirements

Kinesiology B.S.

September 27, 2017

Major Requirements (p. 1481)

- Removed **PSYCH 201** and **PSYCH 285** from the Science core

Life Sciences Communication

October 20, 2017

Major Requirements (p. 163)

- Removed **LSC 616** from the Communication Strategy course list under the Concentrations Within The Major

Legal Studies B.A and B.S.

June 13, 2017

B.A. (<http://guide.wisc.edu/undergraduate/letters-science/legal-studies/legal-studies-ba/#requirementstext>) and B.S. (<http://guide.wisc.edu/undergraduate/letters-science/legal-studies/legal-studies-bs/#requirementstext>) Major Requirements

- Added course **INTL ST 601** to Theme Group 2: Process of Legal Order and Disorder
- Added course **ENVIR ST 402** to Theme Group 3: Law and Social Forces
- Added **GEOG/ENVIR ST 439** to Theme Group 3: Law and Social Forces

Materials Science and Engineering

September 27, 2017

B.S. (p. 282) Major Requirements

- Added **ZOOLOGY 153** to the Science Electives section under the Science Foundation header
- Removed **INTEGSCI 260** from the Engineering and Society Elective under the Engineering Foundation header
- Added **ENVIR ST/BOTANY/ZOOLOGY 260** and **ENVIR ST/GEOSCI 410** to the Engineering and Society Elective under the Engineering Foundation header
- Changed Free Electives credits from 5 to 4; updated footnote 3 to say "The above subject requirements can be met with **124** credits..."

Four-Year Plan (p. 284)

- Changed Engineering Foundations Elective credit count from 4 to 3 in the third year Spring
- Changed Free elective credits from 2 to 1 in the fourth year Spring

Mathematics B.A. and B.S.

June 20, 2017

B.A. (p. 975) and B.S. (p. 985) Major Requirements

- Added **COMP SCI 300** and **COMP SCI 400** to the Bio-Informatics Applied Concentration Area under Option II
- Added **COMP SCI 400** to the Computer Sciences Applied Concentration Area under Option II
- Added **COMP SCI 300** and **COMP SCI 400** to the Cryptography Applied Concentration Area under Option II
- Added **COMP SCI 300** to the Secondary Education Applied Concentration Area under Option II

September 27, 2017

B.A. (p. 975) and B.S. (p. 985) Major Requirements

- Renamed Economics, Version 1 to Economics, Advanced Micro/Macro under Option II
- Removed **ECON 101**, **ECON 102**, **ECON 111** **ECON 468**, **MATH/COMP SCI/ISY E/STAT 525**, and **MATH/ISY E/OTM/STAT 632** from the "Select two of the following" list in the Economics, Advanced Micro/Macro Applied Concentration Area under Option II
- Added **ECON/A A E 473**, **ECON 503**, and **ECON 525** to the "Select two of the following" list in the Economics, Advanced Micro/Macro Applied Concentration Area under Option II

- Renamed Economics, Version 2 to Economics, Intermediate Micro/Macro to the under Option II
- Removed ECON 468, MATH/COMP SCI/I SY E/STAT 525, and MATH/I SY E/OTM/STAT 632 from the "Select two of the following" list in the Economics, Intermediate Micro/Macro Applied Concentration Area under Option II
- Added ECON 475, ECON 503, and ECON 525 to the "Select two of the following" list in the Economics, Intermediate Micro/Macro Applied Concentration Area under Option II
- Added COMP SCI 300 to the Metallurgical Engineering or Materials Sciences & Engineering Applied Concentration Area under Option II
- Added GENETICS 468, GENETICS 564, GENETICS 566, GENETICS/CHEM 626, GENETICS 633, and MATH/B M I/BIOCHEM/BMOLCHEM 606 to the Genetics Applied Concentration Area under Option II
- Removed ZOOLOGY/BIOLOGY 101 and ZOOLOGY/BIOLOGY/BOTANY 151 from the Genetics Applied Concentration Area under Option II
- Removed STAT/B M I 541 from the Bio-Statistics Applied Concentration Area under Option II
- Changed required courses in Finance section to be ECON 310 OR ECON 410; Added FINANCE 330 to the course list
- Added PHYSICS 248 to the Chemistry course list
- Added "Any two 3-credit physics course above the 400 level (excluding labs)" to the Physics course list
- Changed the Astronomy requirements from ASTRON 310 and "three of the following" to Select two courses from the list.
- Added an Ecology, Forestry, Wildlife Ecology course list
- Removed GENETICS 468, GENETICS 566, GENETICS 633 and MATH/B M I/BIOCHEM/BMOLCHEM 606 from the Genetics course list
- Removed MATH 320, BIOCHEM 601, BIOCHEM/GENETICS/MD GENET 620, BIOCHEM/BOTANY 621, BIOCHEM 624, and BIOCHEM/PHMCOL-M/ZOOLOGY 630; Added MATH/B M I/BIOCHEM/BMOLCHEM 609 and "Any one BIOCHEM course numbered 600 and higher" to the Systems Biology course list
- Added a "Select one of the following" statements, and E M A/M S & E 541 to the Engineering Mechanics and Astronautics course list
- Added I SY E 323 and a "Select one of the following" statements; Removed I SY E 321 from the Industrial Engineering course list

October 20, 2017

B.A. (p. 975) and B.S. (p. 985) Major Requirements

- Option II
 - Added text to clarify that a Mathematics advisor must approve courses prior to major declaration.
 - Changed text in the Applied Concentration Area of Option II to say: **"Select four additional courses. These courses may be from any department and should be appropriate for the focused nature of the option 2 major. The following concentration areas have been pre-approved and may be useful for planning purposes, though any collection of four courses approved by a mathematics advisor can be used to fulfill this program requirement.** Note that math courses may fulfill the requirements in the concentration, but cannot also count for the core mathematics course requirements listed above." The text previously stated: "Select 4 courses from one of the concentrated areas. Note that math courses may fulfill the requirements in the concentration, but cannot count for the Intermediate Courses requirement listed above (p.). **Students are strongly urged to consult their major advisor to develop an area of applied focus that is intellectually coherent.**"
 - Changed Actuarial Mathematics to require the sequence of ACT SCI 650 & ACT SCI 652
 - Changed Business (Operations Research) section to Business
 - Removed GEN BUS 301; Added GEN BUS 306, GEN BUS 307 from the Business course list
 - Changed Economics, Advanced Micro/Macro section to Economics
 - Added ECON 301, ECON 302; Removed MATH/I SY E/OTM/STAT 632 from the Economics course list
 - Removed Economics, Intermediate Micro/Macro section
 - Changed required courses in Finance section to be ECON 310 OR ECON 410; Added FINANCE 330 to the course list
 - Added PHYSICS 248 to the Chemistry course list
 - Added "Any two 3-credit physics course above the 400 level (excluding labs)" to the Physics course list
 - Changed the Astronomy requirements from ASTRON 310 and "three of the following" to Select two courses from the list.
 - Added an Ecology, Forestry, Wildlife Ecology course list
 - Removed GENETICS 468, GENETICS 566, GENETICS 633 and MATH/B M I/BIOCHEM/BMOLCHEM 606 from the Genetics course list
 - Removed MATH 320, BIOCHEM 601, BIOCHEM/GENETICS/MD GENET 620, BIOCHEM/BOTANY 621, BIOCHEM 624, and BIOCHEM/PHMCOL-M/ZOOLOGY 630; Added MATH/B M I/BIOCHEM/BMOLCHEM 609 and "Any one BIOCHEM course numbered 600 and higher" to the Systems Biology course list
 - Added a "Select one of the following" statements, and E M A/M S & E 541 to the Engineering Mechanics and Astronautics course list
 - Added I SY E 323 and a "Select one of the following" statements; Removed I SY E 321 from the Industrial Engineering course list
 - Changed the Metallurgical Engineering or Materials Science & Engineering section to Materials Science
 - Added a "Select one of the following" statements, CBE 255, **Comp Sci 302**, COMP SCI 310, E C E 230, E C E 376, E M A 303, PHYSICS 321, and STAT/M E 424 to the Materials Science course list
 - Changed the Nuclear Engineering an Engineering Physics section to Nuclear Engineering
 - Added a "Select one of the following" statements, PHYSICS 321, PHYSICS 322, E C E 376, and B M E/H ONCOL/MED PHYS/PHYSICS 501 to the Nuclear Engineering course list
 - Changed the Computer Sciences section to Computer Sciences (Computational Methods)
 - Added "Select four of the following," COMP SCI 400, and COMP SCI/MATH 514; Removed COMP SCI 300, COMP SCI 520 COMP SCI/E C E/M E 532, COMP SCI 538, COMP SCI 547, COMP SCI/B M I 576, and COMP SCI 577 from the Computer Sciences (Computational Methods) course list
 - Changed the Cryptography section to Computer Sciences (Cryptography)
 - Added "select two of the following" statement, and E C E/COMP SCI 352; Removed E C E/COMP SCI/M E 532 from the Computer Sciences (Cryptography) course list
 - Added a Computer Sciences (Theory) section
 - Added a "Select two from the following" statement, added MATH 421, MATH/COMP SCI/STAT 475, MATH 561, MATH 567; Removed **Comp Sci 302**, COMP SCI 400, MATH/STAT 310, and PHYSICS 208 from the Secondary Education course list

- Changed the Statistics, Version 1 section to Statistics
- Added STAT/MATH 309, STAT/MATH 310, STAT 456, STAT/COMP SCI 471, STAT/COMP SCI/MATH 475, STAT 479, STAT 609, STAT 610, and STAT/I SY E/MATH/OTM 632; Removed STAT/B M I 641 from the Statistics course list
- Removed Statistics, Version 2

Mechanical Engineering B.S.

October 20, 2017

Requirements (p. 290)

- Changed the Summary of Requirements; Basic Science from 17 to 13 credits, Mechanical Engineering Core from 45 to 49 credits, Technical Electives from 12 to 9 credits.
- Removed STAT 224 from Mathematics/Statistics; Added STAT 324
- Added CHEM 109 in Basic Science
- Removed M E 349 from the Mechanical Engineering Core
- Updated credit count from 3 to 6 for courses M E 351 & M E 352 under the Mechanical Engineering Core
- Added COMP SCI 300, BSE/ENVIR ST 367, CIV ENGR 392, COMP SCI/INFO SYS 371, E P 272, PHYSICS 205, and PHYSICS 241 under the Technical Electives header
- Updated credit count from 130 to 127 under the Additional Information header

Four-Year Plan (p. 293)

- Changed STAT 224 to STAT 324 in First Year Spring
- Removed M E 331 from Third Year Fall
- Added M E 313 in Third Year Fall
- Removed M E 313 from Third Year Spring
- Added M E 331 in Third Year Spring
- Removed " however, students must take additional free electives to meet the minimum number of credits required for the degree." from the footnote

Molecular Biology B.A. and B.S.

September 27, 2017

B.A. (p. 932) and B.S. (p. 936) Major Requirements

- Added BIOCHEM 508 as a sequence course (must take both BIOCHEM 507 AND BIOCHEM 508) to the Biochemistry section under the Biochemistry and Molecular Biology header

Neurobiology B.A. and B.S.

September 27, 2017

B.A. (p. 939) and B.S. (p. 945) Major Requirements

- Remove **Psych 481**, **Psych 486**, and **Psych 581** from the Distributed Neuroscience section under the Neurobiology header in 30 credits of Biology and Neurobiology header

Nuclear Engineering B.S.

October 20, 2017

Requirements (p. 267)

- Remove M E 307 from Engineering Science under the Nuclear Engineering Curriculum

- Remove M E 307 from Engineering Science under the Radiation Sciences Optional Curriculum
- Remove section on Early Acceptance into the Graduate Program

Nutritional Science B.A.

October 20, 2017

Major Requirements (p. 171)

- Added ANTHRO 365, BIOCHEM/M M & I 575, BIOCHEM/NUTR SCI 645, C&E SOC/SOC 533, DY SCI 305, GENETICS 545, HORT/AGRONOMY 338, HORT/AGRONOMY/BOTANY 339, HORT/AGRONOMY 360, KINES 337, KINES 338, MED HIST/PHILOS 515, MED HIST/PHILOS 558, M M & I/MICROBIO/PATH-BIO 528, M M & I/PATH-BIO 529, NUTR SCI 375, NUTR SCI/INTER-AG 421, NUTR SCI/BIOCHEM 619, NUTR SCI/POP HLTH 621, NUTR SCI/M&ENVTOX 623, NUTR SCI 625, NUTR SCI/AN SCI 626, NUTR SCI 627, ONCOLOGY 401, PATH 404, PHM SCI 401, POP HLTH 370, ZOOLOGY 470, and ZOOLOGY 570 to the Electives in the Major
- Removed NUTR SCI/AGRONOMY/ENTOM 203 from Electives in the Major

Pharmacology and Toxicology B.S.

September 27, 2017

Electives in the Major (p. 1565)

- Added HIST SCI/S&A PHM 401 History of Pharmacy to the History of Science course list under the Electives in the Major header
- Added KINES 337 Human Anatomy and KINES 338 Human Anatomy Laboratory to the Kinesiology course list under the Electives in the Major header
- Added PHARMACY 640 Substance Abuse and Chemical Dependence to the Pharmacy course list under the Electives in the Major header
- Added ZOOLOGY 555 Laboratory in Developmental Biology to the Zoology course list under the Electives in the Major header
- Removed **Anatomy 619** from Biology Option A Upper-Level Biology course list
- Added RADIOL/B M E/MED PHYS/PHMCOL-M/PHYSICS 619 to Biology Option A Upper-Level Biology course list
- Changed BMOLCHEM 504 from 2 credits to 3 credits in Biology Option A Upper-Level Biology course list

October 20, 2017

Electives in the Major (p. 1565)

- Removed **AN SCI 725** from the Animal Sciences course list

Physics B.A. and B.S.

June 30, 2017

B.A. (p. 1061) and B.S. (p. 1067) Major Requirements

- Deleted footnote #3 referenced to PHYSICS 249 and PHYSICS 307 and renumbered footnotes 4–7. *Deleted text:* Students registering for PHYSICS 249 A Modern Introduction to Physics are required to register

concurrently for PHYSICS 307 Intermediate Laboratory-Mechanics and Modern Physics.

Plant Pathology B.S.

October 20, 2017

Major Requirements

- Removed **BSE 216** from the Plant Health and Industry Track course list

Political Science B.A. and B.S.

September 27, 2017

B.A. (p. 1077) and B.S. (p. 1082) Major Requirements

- Removed **POLI SCI 478** from the footnote 1

B.A. (p. 1080) and B.S. (p. 1085) Advising and Careers

- Removed **POLI SCI 478**

Psychology B.A. and B.S.

September 27, 2017

B.A. (p. 1087) and B.S. (p. 1090) How to Get in

- Changed the primary introductory course from **Psych 201** to **PSYCH 202** Introduction to Psychology.
- Changed the equivalents footnote to include a score of 4 or 5 on the AP Psychology exam; Removed **Psych 201** and **Psych 281** from the footnote

B.A. (p. 1087) and B.S. (p. 1090) Major Requirements

- Removed **Psych 201** and **Psych 281** from the Introductory Psychology list under the Foundation header
- Add footnote to Introductory Psychology section; "A score of 4 or better on the IB Biology exam, or a score of 4 or 5 on the AP Biology exam will satisfy the Introductory Biology requirement."
- Updated footnote on the Introductory Biology section; "A score of 4 or better on the IB Biology exam, or a score of 4 or 5 on the AP Biology exam will satisfy the Introductory Biology requirement."
- Removed **Psych 285** from Research Methods list under the Foundation header
- Removed **Psych 581**, **Psych 582**, **Psych 583**, and **Psych 586** from the Depth header

Psychology Minor

September 27, 2017

Requirements (p. 1423)

- Removed **Psych 201**

Religious Studies B.A. and B.S.

October 20, 2017

B.A. (p. 1094) and B.S. (p. 1098) Major Requirements

- Added **RELIG ST/HISTORY 212** and **RELIG ST/ENVIR ST 270** to the Residence and Quality of Work header

School of Business

September 27, 2017

Pre-Business Requirements (p. 1189)

- Removed **PSYCH 201** and **PSYCH 285** from the Pre-Business Psychology select from course list

School of Education

September 7, 2017

Liberal Studies Requirements (p. 1246)

- Removed **History 249** from the History–United States History section under the Cultural and Historical Studies header
- Removed **HISTORY 306** and **HISTORY/E A STDS 363** from the History–European History section under the Cultural and Historical Studies header
- Removed duplicate **LCA/HISTORY/RELIG ST 205** from the Global Perspectives course list under the Cultural and Historical Studies header
- Remove footnote from **LITTRANS 374** from the Global Perspectives course list under the Cultural and Historical Studies header; the topic does not need to be approved

September 27, 2017

Liberal Studies Requirements (p. 1246)

- Added **ENVIR ST/HIST SCI/HISTORY 125** to the Environmental Studies section in the Humanities header
- Added **CHICLA/GEN&WS 425** to the Chicana/o and Latina/o Studies section under the Cultural and Historical Studies header
- Added **HISTORY 136 Sport, Recreation, & Society in the United States**, **HISTORY 136 Sport, Recreation, & Society in the United States**, **HISTORY 306**, and **HISTORY 391** to the History–United States History section under the Cultural and Historical Studies header
- Added **HISTORY/HIST SCI 324**, **HISTORY/LEGAL ST 426**, **HISTORY/LEGAL ST 476**, **HISTORY/JEWISH 518**, and **HISTORY/CLASSICS/FRENCH/ITALIAN/MEDIEVAL 550** to the History–European History section under the Cultural and Historical Studies header
- Added **FOLKLORE/THEATRE 326** to the Folklore section under the Global Perspectives header
- Added **GEOG 319** to the Geography section under the Global Perspectives header
- Added **HISTORY/LCA/RELIG ST 547** to the History section under the Global Perspectives header
- Added **LITTRANS 273** to the Literature in Translation section under the Global Perspectives header
- Added **POLI SCI 455** to the Political Science section under the Global Perspectives header
- Removed **Psych 201** and **Psych 281** from the Athletic Training and kinesiology–Exercise and Movement Science header under Social Studies (Social Science)

Social Welfare B.A. and B.S.

September 27, 2017

B.A. (p. 1114) and B.S. (p. 1120) Major Requirements

- Removed **PSYCH 488**, **PSYCH 581**, **PSYCH 582**, **PSYCH 583**, **PSYCH 586** from the Psychology course list

Social Welfare B.A and B.S.

October 20, 2017

B.A. (p. 1114) and B.S. (p. 1120) Major Requirements

- Removed **GEN&WS 601** from the Gender and Women's Studies course list
- Removed **SOC 601** from the Sociology course list

Social Work BSW

September 27, 2017

Major Requirements (p. 1127)

- Removed **PSYCH 488, PSYCH 581, PSYCH 582, PSYCH 583, PSYCH 586** from the Psychology course list

October 20, 2017

Major Requirements (p. 1127)

- Removed **GEN&WS 601** from the Gender and Women's Studies course list
- Removed **SOC 601** from the Sociology course list

Sociology Minor

September 27, 2017

Requirements (p. 1430)

- Remove **Soc 350** from the Social Psychology course options under the Social Psychology header

October 20, 2017

Requirements (p. 1430)

- Remove **SOC 601** from the Social Organization course list under the Social Organization header

Sociology B.A. and B.S.

October 20, 2017

B.A. (p. 1139) and B.S. (p. 1146) Major Requirements

- Remove **SOC 601** from the Social Organization course list under the Distribution Area header

Soil Science B.S.

June 13, 2017

Major Requirements (p. 193)

- Removed the duplicated F&W ECOL 550 from the Living Environment course list under the Environmental Soil Science Specialization

October 20, 2017

Major Requirements (p. 193)

- Removed **BSE 112** from the Specialized Sciences list under the Core Turf Grounds Sciences section under the Turf and Grounds header

Statistics B.A. and B.S.

June 30, 2017

B.A. (p. 1165) and B.S. (p. 1168) Major Requirements

- Under the heading Computer Programming, added footnote #2 after "Select one of the following" and renumbered footnotes 2–4. *Text of new footnote:* COMP SCI 300 is highly recommended because it will be particularly beneficial in most future careers. Students who have prior computing experience equivalent to COMP SCI 200 (such as AP computer science) are

recommended to take COMP SCI 300, and students who will pursue a second major in computer science must take COMP SCI 300 and COMP SCI 400 to satisfy the computer science major requirements. Removed **Comp Sci 302** from course list; added COMP SCI 200, COMP SCI 300, and COMP SCI 400 to the list.

Technical Communication Certificate

October 20, 2017

Requirements (p. 274)

- Remove **COMP SCI 302** from the Computer Science course list

World Languages / Professional Sequence Course Requirements

September 15, 2017

- Semester 2, Required Course Requirements. Changed credit total for CURRIC 442 and CURRIC 443 changed from 3 to 6.

ARTS INSTITUTE

A GATEWAY TO THE ARTS

The Arts Institute, a division on campus dedicated to the arts, advances the arts as an invaluable resource to a vital university, and promotes all forms of artistic expression, experience, and interpretation as fundamental paths to engaging and understanding our world. The institute supports and promotes a comprehensive variety of arts courses and programs offered on campus. More than 130 faculty and staff members affiliated with the Arts Institute lend a voice in developing curriculum and programs that will further advance cross-disciplinary arts at UW–Madison.

The various arts-related departments are located within three schools and colleges for undergraduate students: College of Letters & Science (Art History, Communication Arts–Film, English–Creative Writing, and Music), School of Education (Art, Art Education, Dance, and Theatre and Drama), and School of Human Ecology (Design Studies). Arts-related programs are also available at the graduate level.

All arts-related department offerings including degrees, certificates, and/or minors are listed at Academics (<https://artsinstitute.wisc.edu/academics.htm>) on the Arts Institute website. **For additional questions, please contact each department individually.**

The Arts Institute currently offers no certificates, majors, or degrees. The division offers a limited number of courses that support the Interdisciplinary Arts Residency Program (<https://artsinstitute.wisc.edu/iarp.htm>), The Studio: Creative Arts and Design Residential Learning Community (<http://www.housing.wisc.edu/residencehalls-lc-thestudio.htm>), and various interdisciplinary initiatives in the arts under the Integrated Arts (495) subject listing.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Agricultural and Life Sciences provides educational opportunities to students seeking a wide variety of occupations or careers. The men and women enrolled in the college come from diverse urban, farm, suburban, and rural nonfarm backgrounds, and they have an array of interests.

Students pursue careers in business or industry, biotechnology fields, technical services, teaching, communications, conservation and recreation, human nutrition, or public service, related to the agricultural, environmental, and biological sciences. Many students continue their education in graduate schools throughout the nation and world or enter professional schools in medicine or veterinary medicine.

EQUIPPING STUDENTS FOR 21ST-CENTURY CAREERS

The college's goal is to ensure that every student develops:

- specialized knowledge in at least one discipline, along with an education broad enough to meet the challenges of changing careers and opportunities
- the ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving
- the ability to communicate effectively through writing and speaking by observing, reading, listening, and using appropriate information technologies
- a global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society
- the ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy
- a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics

DEGREES/MAJORS/CERTIFICATES

The College of Agricultural and Life Sciences provides opportunities for study in a wide variety of department majors and interdisciplinary programs or specializations. In some instances, majors and degrees are offered cooperatively with other schools and colleges at UW–Madison. **Students are responsible for knowing academic requirements for graduation** and should consult with an advisor regularly.

Freshmen are encouraged to declare a degree and major so that an advisor can be assigned in their area of interest, but students are encouraged to change majors if academic or professional goals change. However, incoming first-year students unsure about which CALS major to declare may opt to remain undeclared while exploring their options. Interested students should contact CALS Transitional Advising and Outreach Services (<http://www.cals.wisc.edu/academics/undergraduate-programs/advising/transitional-advising-service>) for more information.

- Agricultural and Applied Economics, B.S. (p. 52)

- Agricultural Business Management, B.S. (p. 49)
- Agronomy, B.S. (p. 70)
- Animal Sciences, B.S. (p. 76)
- Biochemistry, B.S. (CALS) (p. 101)
- Biological Systems Engineering, B.S. (p. 110)
- Biology, B.S. (CALS) (p. 84)
- Business Management for Agricultural and Life Sciences, Certificate (p. 55)
- Community and Environmental Sociology, B.S. (p. 119)
- Dairy Science, B.S. (p. 122)
- Development Economics, Certificate (p. 57)
- Entomology, B.S. (p. 127)
- Environmental Sciences, B.S. (CALS) (p. 186)
- Food Science, B.S. (p. 132)
- Forest Science, B.S. (p. 137)
- Genetics, B.S. (p. 150)
- Global Health, Certificate (p. 166)
- Horticulture, B.S. (p. 156)
- Individual Major, B.S. (p. 58)
- Landscape Architecture, B.S. (p. 60)
- Landscape Architecture, BSLA (p. 64)
- Life Sciences Communication, B.S. (p. 163)
- Microbiology, B.S. (CALS) (p. 96)
- Nutritional Sciences, B.S. (p. 171)
- Nutritional Sciences, B.S. Dietetics (p. 176)
- Plant Pathology, B.S. (p. 180)
- Poultry Science, B.S. (p. 80)
- Science of Fermented Food and Beverages, Certificate (p. 136)
- Soil Science, B.S. (p. 193)
- Wildlife Ecology, B.S. (p. 144)

CERTIFICATE PROGRAMS

The College of Agricultural and Life Sciences offers three undergraduate certificates:

- Certificate in Business Management for Agricultural and Life Sciences (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/agricultural-applied-economics/business-management-for-agricultural-life-sciences-certificate>) (restricted to CALS students)
- Certificate in Development Economics (p. 57)
- Certificate in Global Health (p. 166)

Students may also elect to complete one or more certificate programs in addition to their major. See the Certificate Programs Offered—Official List (http://registrar.wisc.edu/documents/85_Official_Certificates.pdf) for a complete list.

PEOPLE

CALS DEAN AND DIRECTOR

Kathryn VandenBosch

Meet the Dean's staff (<http://www.cals.wisc.edu/departments/office-of-dean-and-director-2/dean>)

ACADEMIC DEAN'S OFFICE

CALS Office of Academic Affairs
116 Agricultural Hall
1450 Linden Drive
Madison, WI 53706

academicaffairs@cals.wisc.edu
608-262-3003

The Office of Academic Affairs is the academic dean's office for CALS undergraduate students. The office assists students with university and college policies and procedures such as changing a major, transferring into CALS, awarding dean's list, interpreting degree audit for graduation, student appeals, and more.

ACADEMIC AND CAREER ADVISING

Academic and career advising is supported in CALS departments by faculty and academic staff. CALS Academic Affairs offers the following resources for all CALS students:

TRANSITIONAL ADVISING AND OUTREACH SERVICES (TAOS)

CALS Transitional Advising and Outreach Services (TAOS) supports prospective, new, and continuing undergraduates to successfully transition into and within CALS through a variety of outreach, advising, and academic support initiatives. In addition to serving as the primary academic advising home for the CALS Undeclared Major (ALS 000), TAOS works with on- and off-campus students to explore academic opportunities in the college, oversees CALS transfer workshops, and coordinates CALS Student Orientation, Advising, and Registration (SOAR). In all of these efforts, TAOS supports CALS in creating a welcoming, inclusive learning environment for our diverse student body.

The undeclared major option (ALS 000) is primarily intended for first and second-year students who are unsure of which CALS major(s) they would like to pursue. CALS undeclared students must declare a major by their fourth semester on campus. Exceptions to these policies may be made when there are extenuating circumstances.

For more information on TAOS, transferring to CALS, or entering CALS as an undeclared first-year or continuing student, please contact the CALS Academic Affairs Office, 608-262-3003, academicaffairs@cals.wisc.edu.

DEAN ON CALL

Dean on Call is available Monday through Friday in 116 Agricultural Hall from 9:00 a.m. - 3:30 p.m. during the academic year and 11 a.m. - 2 p.m. during the summer. Students with emergency situations or questions regarding academic policies or procedures are welcome to utilize Dean on Call on a drop-in, first come, first served basis. Students typically consult with their advisor prior to meeting with a Dean on Call.

CAREER SERVICES

CALS Career Services provides resources and advising for students to explore career interests and develop skills as they seek employment or admission to graduate or professional programs. Advising appointment and programming information can be found on the Career Services website (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development>). Contact Career Services at career@cals.wisc.edu.

ENTERING THE COLLEGE

ADMISSION

Information on admission to the university as a freshman, transfer, or international student is available through the Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>).

Prospective students with questions about study in the College of Agricultural and Life Sciences may contact the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>) at 608-262-3003.

TRANSFER STUDENTS

Many students transfer into the College of Agricultural and Life Sciences from other schools and colleges at UW–Madison, from elsewhere in the UW System, or from other universities. The CALS Office of Academic Affairs can provide advice on transfer policies and degree requirements and help transfer students make plans to complete their education in the college. With some specialized majors in the college, (i.e., biological systems engineering or landscape architecture) an early transfer is advisable. Students should check with the CALS Office of Academic Affairs, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003; see also this website (<http://www.cals.wisc.edu/academics/admissions/transfer-resources>).

Some students transfer after their freshman year, some as late as junior year, although a minimum of 30 credits in residence is required for all students. Transfer credits are evaluated by the UW–Madison Office of Admissions after the student has been accepted to the university.

Students transferring to UW–Madison from other UW System campuses or from a Wisconsin Technical College can evaluate course transferability using the Transfer Information System (TIS) (<http://www.uwsa.edu/tis>).

ON-CAMPUS TRANSFER

Students will be considered for transfer to the College of Agricultural and Life Sciences from other schools and colleges at UW–Madison if they

1. are in good academic standing with the college or school in which they are enrolled,
2. meet any special requirements as specified by the intended major, and
3. have earned fewer than 86 credits, which is the threshold for senior status.

Students who have been dropped by another college or school must be readmitted to that college or school before being considered for transfer into the College of Agricultural and Life Sciences. However, being readmitted for transfer purposes by another school or college does not guarantee acceptance by CALS.

Ideally, the transfer should be initiated in advance of the semester in which enrollment is planned. Students may initiate the transfer process at any time during the semester. However, the registrar's office determines when transfers may be completed; this window generally is open from approximately the second through the twelfth week of classes. Students may transfer during the summer session only if they are enrolled in summer courses. Consult the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>) website or email (academicaffairs@cals.wisc.edu) for details.

SPECIAL STUDENTS

There are two basic categories of Special students at UW–Madison:

1. the College Special, who is allied with a college and must obtain an "Academic Action" from the dean to enroll each semester, and
2. the University Special, who is a nondegree student not allied with a particular college or school and is admitted through the Division of Continuing Studies (<http://guide.wisc.edu/nondegree>).

The College of Agricultural and Life Sciences Special student classification is currently on hiatus. Information about the University Special student classification is available from the Division of Continuing Studies (<http://continuingstudies.wisc.edu/advising/prospective.htm>).

POLICIES AND REGULATIONS

Additional policies may be found on the Office of Academic Affairs KnowledgeBase (<https://kb.wisc.edu/cals/academicaffairs>).

POLICY ON ADMISSION TO RESTRICTED-ENROLLMENT MAJORS

Enrollment is limited in certain major fields because more qualified students apply than staff and facilities in that field can accommodate. Students are cautioned to study the admission policy, criteria, and procedures for minimum admission requirements to certain majors such as landscape architecture, biological systems engineering, and dietetics. Please refer to the respective departments of instruction for details.

DEGREES

The college offers five undergraduate degrees: a general bachelor of science (B.S.) degree, under which most of our majors are offered, and four specialized B.S. degrees in:

- Agricultural Business Management
- Biological Systems Engineering
- Dietetics
- Landscape Architecture

REGISTRATION ISSUES

Study Load and Progress. Each full-time student is expected to take class and laboratory work totaling 12 to 18 credits per semester. Anyone desiring to take more than 18 credits must obtain permission in advance of registration from the advisor and the Office of Academic Affairs. Students registering for more than 18 credits will be subject to additional tuition and fees. See the Office of the Registrar's website (<http://www.registrar.wisc.edu>) for the definition of maximum credit load in the summer sessions.

At least 120 credits are required for graduation for all majors (more credits are required for some majors), and so generally a student should be enrolled for 15 or 16 credits per semester to complete degree requirements within eight semesters.

Course Numbers. Freshmen and sophomores are permitted to take courses for which they meet the prerequisites; courses numbered from 1 to 299 may be taken for credit by undergraduates only; those numbered from 300 to 699 are open for credit to both undergraduates and

graduates; those numbered from 700 to 999 are open to undergraduates only with permission of the instructor.

A middle digit 8 designates an honors course; a middle digit 9 designates an independent work course, a research course, or a thesis course. Freshmen, sophomores, and juniors may earn independent study credit (usually 299) with consent of an instructor and approval of their academic advisor. Seniors may earn credit for special problems work (course 699) with consent of instructor and approval of their academic advisor. There is no limit on the number of credits a student may receive for courses numbered 299 or 699.

Students may not receive more than 8 credits total for courses numbered 399 (internship). Students must have approval of a CALS advisor and complete a learning contract prior to registration for internship credits. Contact the Office of Academic Affairs, 116 Agricultural Hall, for more information.

Thesis. The undergraduate thesis, when required as part of the major requirements, consists of 4–8 credits (691/692). Students admitted to the Honors Program must complete a senior honors thesis for 4–8 credits (681/682).

Pass/Fail Privilege

- All undergraduate students are eligible to take a course on a pass/fail basis if they request the option prior to the deadline and are in good academic standing at the time they request pass/fail. When a course is taken on a pass/fail basis, the instructor reports a letter grade, which is converted by the registrar to an S (satisfactory) or U (unsatisfactory). The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U shall be recorded by the registrar in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. A student must earn at least a C to receive credit for the course. In addition to the S or U notation, the student transcript includes the symbol # for courses taken on a pass/fail basis.
- The following conditions apply to pass/fail courses:
 - Deadline to apply:** Students may submit pass/fail requests via their Student Center from the time that they register until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed). Students may not cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms. The deadline for requesting the pass/fail option is posted on the Office of the Registrar website (<https://registrar.wisc.edu>).
 - Pass/fail can only be chosen for elective courses:** Required courses cannot be taken on a pass/fail basis. CALS may reject pass/fail requests for non-elective work, but it is the student's responsibility to be sure that the requested course is an elective.
 - Pass/fail courses do not meet specific requirements:** Courses taken on a pass/fail basis will not count for non-elective requirements even if they would normally count toward such requirements.
 - Number of pass/fail courses:** Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergraduate career. The summer sessions collectively count as a single term.

- v **Exceptions:** CALS is authorized to make exceptions to the pass/fail policy.

Notification: Students can see whether a course is pass/fail in their student center. Instructors are not notified when a student elects the pass/fail option.

Repeating College Courses. Students thinking about repeating a course should talk with their advisor. Students must do all the work in the repeated course, including laboratory; attend regularly; participate in class discussions; and take examinations. Students will earn a final grade in the course. Such credits are indicated with an X on the transcript. Students should know that:

1. the original grade still counts in GPA and remains on the transcript;
2. credits in the repeated course do not count toward the degree, unless the course was failed the first time;
3. grade points in the repeated course do count toward calculation of cumulative GPA;
4. credits carried on courses being repeated count toward the maximum credits permitted in a semester.

Special note: Students cannot take more than one "Communications Part A" course for degree credit.

Transfer students must be particularly careful to avoid taking courses on the UW–Madison campus that duplicate courses taken at another school. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower-level course in a sequence if students have already received credit for a higher-level course in that sequence. Students should carefully check the Evaluation of Transfer Credits prepared by the UW–Madison Office of Admissions and Recruitment and should consult with their advisor. Duplicate courses may include transfer, Farm and Industry Short Course, and Advanced Placement credits coming in as course equivalents.

Physical Education–Elective Program. Students may earn 1 credit per semester in a physical education–elective course that can be applied toward graduation. No more than 8 such credits will count toward graduation. CALS encourages students to pursue these courses as one way in which to build and educate both mind and body.

Internships. The college's internship program gives undergraduates a chance to see how they can use what they have learned in an on-the-job setting. By enrolling under a special course number (Coordinative Internship 399) students can earn 1–8 credits per semester if approved by the advisor and field supervisor. A total of 8 internship credits may be applied toward graduation. A number of agencies and corporations conduct formal training programs or internships for students before or immediately following graduation. Students are allowed diverse experiences and at the end of the internship may become a permanent employee. Interested students should contact either the CALS Career Services Office by email (career@cals.wisc.edu) or their advisor.

Distance Education Courses. A course may be taken by correspondence (print or online) through Independent Learning (UW Extension) with special permission from a dean in the Office of Academic Affairs. See the CALS Policy on Concurrent Enrollment and Independent Learning (<https://kb.wisc.edu/cals/academicaffairs/page.php?id=59093>) for more information.

CREDIT THROUGH EXAMS AND SPECIAL PROGRAMS

Credit by Examination. A student may earn degree credits in the College of Agricultural and Life Sciences for courses completed by passing an examination specifically designed to cover the content area. See the list of courses (<https://kb.wisc.edu/vesta/page.php?id=53619>) approved for Credit by Departmental Exam.

Internal Examinations. Credit may be granted on the basis of satisfactory performance on an examination developed by the course instructor and approved by the department. Each department shall determine whether credit by examination will be available for a course taught within that department.

Retroactive Language Credit. Students in the College of Agricultural and Life Sciences may earn retroactive foreign language credit for foreign language skill developed in high school or elsewhere. For more information, please see Retroactive Credit Policy for Foreign Languages (<http://languages.wisc.edu/advising/retro>).

ATTENDANCE AND MID-SEMESTER ISSUES

Class Attendance. Every student is expected to be present at all classes.

Academic Integrity. The College of Agricultural and Life Sciences takes academic integrity very seriously. For full details on the UW–Madison Academic Misconduct Policies, please refer to the Dean of Students Office (<http://www.students.wisc.edu/doso>).

Registration Changes. The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor, or an academic dean in 116 Agricultural Hall, prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be granted for CALS students by an academic dean in 116 Agricultural Hall.

Final Exam Schedule. The final exam schedules are listed in the class schedule in the Student Center.

GRADUATION ISSUES

Degree Audit Reporting System (DARS). The Degree Audit Reporting System (DARS) (https://registrar.wisc.edu/dars_student.htm) provides a continuous record of progress toward fulfillment of degree requirements. **It is the student's responsibility to ensure that all requirements for graduation are fulfilled.** Requests for exceptions must begin with the student's academic advisor and be approved by the department (or equivalent) and by the academic dean. Students who believe their DARS report is in error should contact the Office of Academic Affairs in 116 Agricultural Hall directly.

Residency Requirement. CALS students must earn a minimum of 30 degree credits in residence at UW–Madison after they have earned 86 credits (i.e., senior standing) toward their undergraduate degree. Credits are considered "in residence" if they are earned for UW–Madison course work, including courses taken on a UW–Madison–administered study abroad program. Retroactive credits, AP credits, and credits granted by

examination are not considered “in residence.” Appeals of this policy may be considered in advance by the Office of Academic Affairs (for requests up to 6 credits) or the Scholastic Policies and Actions Committee (for requests of more than 6 credits).

Expecting to Graduate. Students who expect to graduate must apply to graduate in the Student Center. They may visit the University Book Store website for information about ordering caps and gowns and the Commencement website (<https://commencement.wisc.edu>) for information about the graduation ceremony. Also, their academic records will receive a final evaluation by staff in the Office of Academic Affairs. Students should also inform their advisors and report any change in graduation plans to the Office of Academic Affairs. If a student has received permission to complete final coursework while not in residence, the student must notify the Office of Academic Affairs so that records can be reviewed and certified for graduation.

Graduation. Students are graduated with a bachelor’s degree when they have met all the university, college, degree program, and major requirements; have earned 120 credits; and have a cumulative grade point average of 2.0 or higher on all courses carried for a grade at UW–Madison. Graduating students should know that the date they finish any outstanding incompletes (I) will determine their semester of graduation. Students with a biological systems engineering major should check with the department for additional graduation requirements.

ACADEMIC STANDING SCHOLASTIC ACTIONS

A student shall be considered in **good standing** if that student has:

- a GPA of 2.0 or above in the semester just completed, and
- a cumulative GPA of 2.0 or above.

A student must be in good standing in order to be eligible for graduation.

A student shall be placed on academic **probation** when, in the semester just completed, that student has:

- attained less than a 2.0 GPA, or
- earned two or more grades of F.

Once on probation, the student is **continued on probation** until either removed from probation or dropped.

A student shall be **removed from probation** when that student has:

- attained a cumulative GPA of at least 2.0, and
- earned a GPA of at least 2.0 in the semester just completed, and
- no outstanding Incompletes.

A student on academic probation shall be **dropped** (academically dismissed) for at least one semester at the end of any semester in which that student has earned a GPA of less than 2.0.

A student who has been placed in dropped status and who desires to be readmitted to the College of Agricultural and Life Sciences must present to the Office of Academic Affairs evidence that time between being dropped and applying for reentry has been used gainfully. Such activity must give evidence of serious desire to gain an education, careful thought about academic goals, and strategies that will improve academic performance. If the application is accepted, the student will be **readmitted on probation**.

A student who has been readmitted on probation and who fails to earn a semester GPA of 2.0 or above will be **dropped again** and **will not be permitted to re-enroll** for at least one year and then only upon appeal to the Scholastic Policies and Actions Committee with good evidence of changed circumstances that would indicate a reasonable probability of success.

A student dropped for a third time will not be readmitted.

APPEALS

On behalf of the Dean of the College of Agricultural and Life Sciences, the Office of Academic Affairs and the Scholastic Policies and Actions Committee may suspend or modify the operation of these regulations if their enforcement is judged to work an injustice to the student. Students should contact the Office of Academic Affairs in 116 Agricultural Hall, 608-262-3003, for appeal procedures.

Student Grievance Procedures. Students who believe they have been treated *unfairly*, in any academic or nonacademic matter, may contest the treatment. The complaint may involve any matter of perceived unfairness, including grading or classroom treatment, or sexual or racial harassment.

If the student cannot resolve the fairness question directly with the person at whom the complaint is directed, the student may pursue a series of steps to achieve a fair hearing and protect the rights of both parties involved.

These steps are spelled out in a statement titled “Achieving Fairness: Grievance Procedures for Students in the College of Agricultural and Life Sciences.” This statement is available from any department office, the Office of Academic Affairs, or the CALS website (<http://www.cals.wisc.edu/academics/curriculum-information/student-grievance-procedure>).

Matters of interpretation of academic requirements *not involving questions of fairness* should come via the student’s advisor to the college’s Scholastic Policies and Actions Committee.

REQUIREMENTS

All undergraduate students in CALS must satisfy a set of college and university requirements:

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
--------------	---

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
-----------	---

Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
-----------------	--

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I	
	or CHEM 108 Chemistry in Our World	
	or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

Students are advised to complete introductory and basic course requirements (i.e., biological and physical sciences, chemistry, mathematics, communications, etc.) early in their academic programs.

Students must also satisfy a minimum of 15 credits in the selected major (these 15 credits may not be double counted with CALS or General Education requirements) and a Capstone course that meets the stated criteria (and may be included in the 15 credits toward the major).

CALS FIRST-YEAR SEMINAR REQUIREMENT

Courses meeting the CALS first-year seminar requirement must meet most of the following criteria:

- The course is designed specifically for first-year undergraduate students, to support their academic and personal transition to UW–Madison. For example, the course may acquaint students with academic, campus and community resources to assist in their transition through presentations, discussion, projects, or papers. Because students took this course, their transition to UW–Madison is more rapid and well supported.
- Course enrolls fewer than 25 students or a significant portion of the course meets in groups of fewer than 25 students. A larger lecture course will be considered if students interact regularly in sustained and substantive small groups with a faculty member or well-prepared graduate student or peer. This interaction must go beyond review of material and question and answer and be an on-going relationship.
- Students receive frequent feedback from the instructor(s) on their academic performance and receive a grade in the course.
- Students are put in circumstances that essentially demand they interact with faculty and peers about substantive matters. As a result of taking this course, students have gotten to know their instructor(s) and peers through meaningful course-related dialogue.

- Students will experience diversity through meaningful dialogue with people who are different from themselves and/or engage with diversity through course content which addresses inclusivity, diversity and identity.
- Students experience an integration of experiential and classroom learning. For example, students might be asked to attend a student organization meeting, meet with a faculty or staff member, or participate in research or service.
- Students have opportunities to integrate, synthesize and apply knowledge while exploring big questions and big ideas.
- The learning objectives for the course are aligned with the UW–Madison Essential Learning Outcomes (<https://provost.wisc.edu/assessment/documents/welo2010C.pdf>).

- Updated course syllabus
- Statement of how the course meets the criteria
- Contact information for the course coordinator

CALS INTERNATIONAL STUDIES REQUIREMENT

Required of all CALS majors, the International Studies requirement is intended to: (1) increase students' understanding of contemporary global, socio-political, and scientific issues; (2) equip students to analyze these transnational issues critically and comparatively; and (3) inspire students to further engagement in international issues.

Courses that satisfy the 3-credit CALS International Studies requirement must meet at least two of the following criteria:

- include discussion of the role of the U.S. in world affairs;
- include comparative and/or multinational content;
- include substantial non-U.S. content (typically >50% of the content or assignments or grade in the course).

Students: to request permission to count a course not listed here, please complete a Request for DARS Exception form (<https://www.cals.wisc.edu/academics/forms>). Requests will only be considered if the course meets the criteria above and the student has an extenuating circumstance warranting a substitution.

CALS CAPSTONE LEARNING EXPERIENCE REQUIREMENT

A CALS Capstone is a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance with the intent of facilitating the transition to post-baccalaureate life.

A Capstone Experience should:

- Develop problem solving skills
- Expose student to multidisciplinary approach
- Develop teamwork and interpersonal skills, including the ability to communicate effectively to multiple audiences
- Develop skills in accessing and using information resources (e.g., electronic databases, library resources, national repositories)
- Address societal, economic, ethical, scientific, and professional issues
- Communicate and extend the capstone experience via written, oral, and/or multimedia reports by each student

The Capstone Experience will normally be completed during the student's final 2 or 3 semesters. The intent is to have the student utilize and integrate their undergraduate learning into a culminating, or capstone, experience. Students should consult with their departmental faculty advisors for specific information regarding this requirement. Where appropriate, students should submit a copy of the final project materials to the campus library (via Minds@UW (<http://uwdcc.library.wisc.edu/minds/index.shtml>) or similar).

DEGREES OFFERED

The College of Agricultural and Life Sciences offers five bachelor of science (B.S.) degree programs:

B.S. DEGREE

B.S.—AGRICULTURAL BUSINESS MANAGEMENT

(P. 49)

B.S.—BIOLOGICAL SYSTEMS ENGINEERING (P. 110)

B.S.—DIETETICS (P. 176)

B.S.—LANDSCAPE ARCHITECTURE ([HTTP://GUIDE.WISC.EDU/UNDERGRADUATE/AGRICULTURAL-LIFE-SCIENCES/LANDSCAPE-ARCHITECTURE/LANDSCAPE-ARCHITECTURE-BSLA](http://GUIDE.WISC.EDU/UNDERGRADUATE/AGRICULTURAL-LIFE-SCIENCES/LANDSCAPE-ARCHITECTURE/LANDSCAPE-ARCHITECTURE-BSLA))

The B.S. degree program provides a broad and general foundation for two dozen majors in the college: agricultural and applied economics, agronomy, animal science, biochemistry, biology, community and environmental sociology, dairy science, entomology, environmental sciences, food science, forest science, genetics, horticulture, landscape architecture, life sciences communication, microbiology, nutritional sciences, poultry science, plant pathology, soil science, and wildlife ecology.

MULTIPLE DEGREES OR MAJORS

Under certain circumstances it may be possible for a student to earn more than one undergraduate major or degree. It is expected that the programs be significantly different from each other and that approval be received prior to the student having earned 86 credits. More information is available below and via Academic Affairs in 116 Agricultural Hall.

SECOND BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Those with a bachelor of science (B.S.) or bachelor of arts (B.A.) degree from the University of Wisconsin–Madison or other accredited institutions may, if eligible, pursue a second bachelor's degree from the College of Agricultural and Life Sciences.

Those who have been out of school for one semester or more must apply for admission (or readmission) with the regular undergraduate application. Continuing UW–Madison students do not need to submit

this form. All candidates need a dean's permission from the Office of Academic Affairs to work toward a second bachelor's degree. A minimum of a 2.0 GPA is required. Several college majors require a higher GPA.

The following requirements for the second bachelor's degree must be met:

- Students must complete a minimum of **30 credits in residence**, of which 15 or more must be in the major field as specified by the major department. These credits are in **addition** to credits earned for the first degree.
- Candidates must **complete all university, college, major, and curricular degree program requirements**. Credits earned for the first degree will apply toward appropriate requirements for the second. However, students must take at least 30 additional credits, as noted above. Students with their first B.S. degree from the college must select a new major or degree program.

All second-degree candidates must be accepted by the department offering their program of interest and have their program approved by the college before beginning the program.

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

A student who wishes to earn **two undergraduate degrees simultaneously** (in contrast to earning two undergraduate **majors** simultaneously) should consult with the Office of Academic Affairs as early as possible in the academic career regarding feasibility.

If the two degrees to be earned are within the College of Agricultural and Life Sciences, at least 30 additional credits and all course and grade point requirements must be completed. Thus, a minimum of 150 credits (for most majors) would be required. Some courses may satisfy requirements for both degrees. **A student must have an advisor in both major fields.** To work on two degrees simultaneously within the college, a student should seek permission as *early* as possible to ensure that it is feasible to complete both degrees.

If the two degrees to be earned are from two different colleges (one degree in Agricultural and Life Sciences and one degree in another school or college on this campus), the undergraduate dean in both colleges must approve the student's plan. Note that not all colleges will allow dual degrees. Where allowed, the following academic policies shall be followed (additional policies may exist):

1. Admission into the other college or school shall be based on that particular college or school admission criteria.
2. A student may seek two baccalaureate degrees simultaneously (in contrast to two majors), each from a different college, provided that the two degree programs differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits and that the student's program is **approved by both colleges before the student has earned 86 credits**. The degrees from each college will be awarded simultaneously.

Special applications and additional information pertaining to the earning of two undergraduate degrees simultaneously are available from the Office of Academic Affairs, 116 Agricultural Hall.

EARNING TWO UNDERGRADUATE MAJORS SIMULTANEOUSLY

CALS permits undergraduates to pursue two CALS majors simultaneously. The following policies and procedures have been established for this program:

- a. The student must have approval in advance from their CALS major advisor, the advisor of their desired second major, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
- b. The student must satisfy all requirements of both majors. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.

The diploma awarded will be based on the certification of completion of the degree. The transcript of grades will note the completion of requirements for two or more majors.

EARNING A LETTERS AND SCIENCE MAJOR WHILE COMPLETING A DEGREE PROGRAM IN THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Letters & Science (L&S) permits undergraduates currently enrolled in the College of Agricultural and Life Sciences to complete an additional undergraduate major offered by L&S and have this fact noted on the transcript.

The following policies and procedures have been established for this program:

1. The student must have advance approval from their CALS major advisor, their L&S major advisor, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The L&S major is not to substitute for any major in CALS.
3. The student must satisfy all requirements of the L&S major, both the requirements established by the department (i.e., certain courses) and those established by L&S (e.g., 15 credits of advanced work in the major in residence at UW–Madison). The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.
4. Requests for substitutions or other modifications of the requirements of a given L&S major must be acted on by an L&S dean, in consultation with the Associate Dean for Academic Affairs in CALS, before enrollment in the course.

FARM AND INDUSTRY SHORT COURSE

The Farm and Industry Short Course (FISC) (<https://fisc.cals.wisc.edu>) is a non-degree course of instruction at the University of Wisconsin–Madison, intended to prepare students for careers in production agriculture and agribusiness. The 16-week session is comprised of two 8-week terms that begin in late fall and end in early spring to coincide with the non-growing season in Wisconsin.

Instructors consist of CALS professors and industry professionals who teach over 30 courses in the areas of soils, crops, dairy, meat animals, agricultural engineering, agribusiness, human relations, marketing, and communications. A complete list of courses is available online (<https://fisc.cals.wisc.edu/prospective-students/courses-and-certificates>).

All students earn a first-year certificate in Foundations of Farm Management and can return for an optional second year to earn one of five specialty certificates:

1. Crops and Soils Management
2. Dairy Farm Management
3. Farm and Equipment Operations
4. Meat Animal Farm Management
5. Diversified Agricultural Operations

More than 100 CALS scholarships are available to FISC students, with about \$150,000 awarded each academic year. The range of scholarship funds given per student is \$500–\$2,000. See the program's website (<https://fisc.cals.wisc.edu/prospective-students/funding-your-education>) for more information about funding a FISC education.

FISC graduates pursue a variety of agriculture-related careers. More information about employment opportunities can be found on the website (<https://fisc.cals.wisc.edu/jobs-careers>). CALS Career Services provides information about job opportunities to FISC students and alumni through BuckyNet, and a weekly email from the FISC staff highlights additional opportunities to current students.

For more information, contact the Farm & Industry Short Course at e-mail (fisc@cals.wisc.edu) or 608-263-3918.

SPECIAL SHORT COURSES

The College of Agricultural and Life Sciences, largely through University of Wisconsin–Extension, sponsors and conducts many special short courses for specific training or retraining in various phases of agriculture and agribusiness. There are institutes, conferences, and workshops that vary in length from one day to two weeks. Many are held on campus; others are held at various locations around the state.

The CALS Conference Services Office (<http://www.cals.wisc.edu/ccs>), 620 Babcock Drive, 608-263-1672, has information about many of these special sessions.

RESOURCES

STUDENT SERVICES

Staff in the Office of Academic Affairs provide a variety of services. They certify students for their respective degrees upon graduation, maintain student records, administer scholastic policies, administer college scholarships and loans, coordinate development of curricula, act on student withdrawals, counsel students about career and study opportunities, host interviews and career-related events and workshops, oversee two undergraduate housing units, operate the Farm and Industry Short Course, assist with degree audit reports, help departments plan and assess educational programs, and coordinate and maintain programs for students and staff. Special counseling is available for interested minority or disadvantaged students, students with disabilities, and students with unusual circumstances or needs.

STUDENT ADVISING

Every student enrolled in the college has an assigned advisor. Students are expected to consult their advisors before each registration period, and are encouraged to consult their advisors throughout the year. Faculty/department staff advisors help students plan their coursework to meet their educational objectives. When students enroll in the college

as beginning freshmen or as transfer students, they are assigned an advisor in their major field of study. Advisors will talk with students about educational and career objectives and counsel them about meeting degree requirements and planning their educational programs.

Once students have decided on an area of study, their advisors will guide them toward courses in that area and advise them on how to fulfill university and college requirements. Students can change their advisor if they change their major or if they find a different advisor with interests more similar to their own. The change is made through the department or through the Office of Academic Affairs.

Students are encouraged to seek advice from university faculty and staff, in addition to their assigned advisor. There are many people on campus who are willing and able to help students; however, it is the student's responsibility to seek advice.

CAREER SERVICES

The College of Agricultural and Life Sciences provides resources and advising for students to explore career interests and develop skills as they seek employment or admission to graduate or professional programs. CALS Career Services, located in 116 Agricultural Hall, assists students with the full time and internship search process by helping them learn how to articulate their skills and abilities to future employers and graduate/professional schools. The career services team manages the campus wide career and internship fairs held twice per year. They also arrange workshops and classroom visits on a variety of career development topics and host recruiters for networking events, on-campus interviews, and industry panel discussions. Many students secure internships and full time employment through connections with employers on campus. Students are encouraged to utilize CALS Career Services early in their undergraduate experience. See CALS Career Services (<http://www.cals.wisc.edu/students/careerservices>) for more information.

The Career Services Office is operated as a service to students. The college cannot guarantee job placement.

INTERNATIONAL ACADEMIC OPPORTUNITIES

Today's college graduates must be prepared for the international community in which they will live and work. Study and research abroad programs offer students unique experiences which cannot be replicated on the UW-Madison campus. The College of Agricultural and Life Sciences (CALS) offers 35+ short and long-term programs in more than 20 countries, the majority of which are open to students from across campus. All programs carry UW-Madison academic credit. International academic opportunities allow students to enrich their education by experiencing other cultures and broadening their understanding of agricultural and life sciences outside the United States. CALS programs address topics such as food security and sustainable food systems, agriculture and nutrition, health care, environmental health, and climate change, among others. Students may also receive academic credit for participating in study abroad programs administered by UW's International Academic Programs (IAP) office. To search CALS and IAP program opportunities, please visit their website (<https://www.studyabroad.wisc.edu>).

The CALS study abroad team is located in the Office of Academic Affairs, 116 Agricultural Hall. Students are welcome to stop by for more information or contact us via email at studyabroad@cals.wisc.edu.

FINANCIAL RESOURCES

In addition to university scholarships, grants, loans, and employment available at the Office of Student Financial Aid (<http://www.finaid.wisc.edu>) (333 East Campus Mall), scholarships and loans are available to qualified students in the College of Agricultural and Life Sciences.

AGRICULTURAL AND LIFE SCIENCES SCHOLARSHIPS

CALS has an extensive scholarship program. All CALS students must apply every year to be considered for a scholarship. One application allows consideration for any scholarships administered by the college. The application cycle runs from early November to early February every year. Selection of recipients is determined by the CALS Scholarships and Loans Committee.

The scholarship application is available through Scholarships@UW-Madison (<http://scholarships.wisc.edu/Scholarships>), which can be found through the Student Services tab in MyUW or through the Finances section of Student Center. Applicants must follow all prompts to ensure completion of the application process.

Scholarships with a financial need component require a current Free Application for Federal Student Aid (FAFSA (<http://www.fafsa.ed.gov>)) on file with the university.

AGRICULTURAL AND LIFE SCIENCES LOANS

Several short-term loan funds have been established for students in the college. Students may borrow money for up to six months at no interest, or very low interest, provided the money is repaid when due. Students must be able to provide a specific plan for loan repayment.

No prior authorizations are needed, and the loan amount is available from the Bursar's Office on the same day the application is approved.

Applications for these short-term loans are available in the Office of Academic Affairs.

STUDENT EMPLOYMENT

Many College of Agricultural and Life Sciences students gain valuable experience by working part-time in jobs related to their interests. Working in a laboratory is often the first step for students who are interested in conducting their own research.

Some students are hired directly by specific departments as a result of the students' interests and experience. Also, the university maintains a Student Job Center (<http://jobcenter.wisc.edu>) in the Office of Student Financial Aid, 333 East Campus Mall, to help students find part-time work.

AGRICULTURAL AND LIFE SCIENCES STUDENT ORGANIZATIONS

Agricultural and Life Sciences students will find many organizations and clubs to meet their professional interests. Student organizations provide a vehicle for students to gain leadership experience and develop professional skills. For more information see the Registered Student Organization (RSO) Directory (<https://win.wisc.edu/organizations>) and CALS Student Organizations and Clubs (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/student-organization>).

PREPARATION FOR PROFESSIONAL CAREERS IN VETERINARY MEDICINE AND MEDICINE

For information about preparation for professional careers in veterinary medicine and medicine, visit the Center for Pre-Health Advising (<http://www.prehealth.wisc.edu>).

FACILITIES

The College of Agricultural and Life Sciences has outstanding facilities for student housing, instruction, and research.

The college operates two residence halls, Jorns and Humphrey halls. Those interested in this housing option should call 608-262-2270 or visit FISC Housing (<http://fisc.cals.wisc.edu/housing>).

Staff and students also make extensive use of off-campus sites such as the University Arboretum and 13 Agricultural Research Stations located throughout the state. The college includes many specialized instructional and research facilities. On-campus animal research facilities include the Biotechnology, Microbial Sciences and Biochemistry buildings, a livestock laboratory, instructional greenhouses, and a number of instructional computer labs.

The Steenbock Memorial Library (<http://steenbock.library.wisc.edu>) serves the College of Agricultural and Life Sciences with a collection of more than 600,000 books, bound journals, and government publications, and a variety of seating and study rooms for individual and group use. The library operates a public-access computer facility with a wide range of hardware and software. The building is a memorial to biochemist Harry Steenbock for his outstanding contributions to Wisconsin and to the health of humanity. Steenbock Library has received awards for its design and for its service to students, faculty, and academic staff. Steenbock Library staff help students and faculty locate reference material for their research through workshops on using the library and through personal assistance with search strategies.

HONORS

DEAN'S LIST

Students who achieve at a high level academically are recognized by the dean. Selections to the Dean's List are announced at the close of each semester. The student's achievement for only the single semester is considered and is noted on the transcript. To be placed on the Dean's List, a student must have achieved at least a 3.5 GPA or above for *the semester's study load of not less than 12 credits, on a regular grade basis* (A, AB, B, BC, C, D, F), regardless of overall grade point average, and must not have received a grade of F or an Incomplete for any course, or a U (for a pass/fail course) or an N (for Credit/No Credit graded course that was not passed).

CRITERIA FOR "GRADUATED WITH DISTINCTION" AND "GRADUATED WITH HIGHEST DISTINCTION"

Students who have a cumulative GPA that places them in the top 20 percent of the graduating class in the college will graduate with "Distinction"; those in the upper 5 percent, with "Highest Distinction." These students must have at least 60 credits on the Madison campus.

The notations on the student's transcript will read "Graduated with Distinction" or "Graduated with Highest Distinction." The registrar determines which students meet these criteria.

DISTINCTIVE SCHOLASTIC ACHIEVEMENT

A *preliminary* list of those degree candidates who may be eligible for Graduation with Distinction is prepared by the registrar prior to commencement. These students are eligible to wear a cardinal stole with their caps and gowns at commencement. Inclusion on the Distinctive Scholastic Achievement list does not guarantee Graduation with Distinction, which is determined after final grades are awarded.

HONORS PROGRAM

Students in the College of Agricultural and Life Sciences who want a challenging and intellectually rewarding undergraduate experience should consider the Honors Program. The program has flexibility to meet the unique needs of each student, challenge the mind of the independent thinker, and stimulate the curiosity needed for continued learning. The program was established to provide challenging and relevant experiences for high-achieving students. The objective of the program is to help students develop critical thinking abilities through specialized courses and the challenges of designing, conducting and reporting research in collaboration with faculty from one of the world's leading research institutions. Students who complete the program successfully receive an Honors designation on their diploma and wear a white stole with cardinal bars with their caps and gowns at commencement.

The CALS Honors Program (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program>) offers two different ways to earn an Honors degree designation:

1. Honors in Research or
2. Honors in the Major

For complete information contact the Office of Academic Affairs, 116 Agricultural Hall, 608-262-3003.

AGRICULTURAL AND APPLIED ECONOMICS

The Department of Agricultural and Applied Economics (AAE) at the University of Wisconsin–Madison was founded in 1909 and was the first department of agricultural economics in the United States. The department offers two undergraduate programs—agricultural and applied economics (p. 52) and agricultural business management (p. 49). Both majors will give students a strong base in economics and how it is applied to real-world situations. The teaching and research in AAE focuses on the areas of development economics, environmental economics and managerial economics.

The department also offers two certificates to undergraduate students enrolled at the University of Wisconsin–Madison: the certificate in business management for agricultural and Life Sciences (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/agricultural-applied-economics/business-management-for-agricultural-life-sciences-certificate>) and the certificate in development economics (p. 57).

DEGREES/MAJORS/CERTIFICATES

- Agricultural Business Management, B.S. (p. 49)
- Agricultural and Applied Economics, B.S. (p. 52)
- Business Management for Agricultural and Life Sciences, Certificate (p. 55)
- Development Economics, Certificate (p. 57)

AGRICULTURAL BUSINESS MANAGEMENT, B.S.

Today's businesses and industries in the agricultural and food sectors of the economy are growing rapidly. Agribusiness industries, such as those that supply farm inputs or process and market agricultural products, need staff who are educated in both business and agriculture. Students in agricultural business management also find employment in companies specializing in biological systems engineering, landscape architecture,

biotechnology, food technology, food science, food marketing, and large-scale farm enterprises.

The bachelor of science degree program in agricultural business management enables students to obtain a strong foundation in economics to learn how businesses make decisions and minimize risk and how to use applied mathematics and statistics to analyze prices and markets. Agricultural and applied economics (AAE) courses constitute a substantial segment of the curriculum for the B.S. degree in agricultural business management. In addition to general college requirements, a major in ABM includes courses in economics, math, and statistics. ABM students will also take a minimum of 12 credits from the School of Business. (See Requirements tab for more information.)

Agricultural business management emphasizes coursework in the functional areas of the business school: accounting, finance, marketing, management, and human resources.

Code	Title	Credits
Students will learn:		
	Skills for running a business	
	Finance and economic decision analysis	
	Analytical and managerial tools	
	Organization of the food system	
	Commodity markets	
	Senior capstone project integrates learning from major coursework	

A degree in agricultural business management prepares students for a career in agribusiness or other fields of business. The Department of Agricultural and Applied Economics may be consulted for specific career information for the major.

Students completing the agricultural business management major are awarded the *Bachelor of Science—Agricultural Business Management* degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CAL S). For information about becoming a CAL S first-year or transfer student, see Entering the College (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic

values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I	
	or CHEM 108 Chemistry in Our World	
	or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3

ECON/FINANCE 300	Introduction to Finance	
GEN BUS 301	Business Law	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	
MARKETNG 300	Marketing Management	
M H R 300	Managing Organizations	
M H R 305	Human Resource Management	

ACCT I S 211	Introductory Managerial Accounting ¹	
Capstone		
A A E 500	Senior Capstone Experience	3
Total Credits		63-65

¹ ACCT I S 100 is a prerequisite for ACCT I S 211.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Use economic concepts to better understand real-world problems.
2. Use appropriate quantitative techniques to analyze economic problems.
3. Use computer systems to effectively analyze economic problems.
4. Communicate results effectively in writing.
5. Communicate results effectively orally.
6. Think critically about economic issues.
7. Contribute to public policy debates.

AGRICULTURAL AND APPLIED ECONOMICS, B.S.

Students develop and use economic data and models to analyze and understand a wide range of issues—including environmental problems, world hunger, energy and climate change, business economics and finance, economic development, globalization and trade, biotechnology, land-use management, and community development. Course subjects include economics, environmental economics, managerial economics, financial management, commodities and futures markets, the global economy, development in Latin America, Africa, and Asia, cooperatives, international trade, pollution, and regulation. Students acquire the necessary skills to pursue a rewarding career in consulting, government, business, or international organizations, or a graduate degree in economics, public policy, business or law.

Major requirements usually met in the freshman and sophomore years are: A A E 215, ECON 102, an elementary course in statistics, and one semester of calculus (MATH 211, MATH 217 or MATH 221).

Other major requirements are: ECON 301 and ECON 302, A A E 500 (a “capstone” course), and a minimum of 15 additional credits in AAE courses. Students may select an area of concentration within the major from four choices: Applied Economics, Development Economics, Environmental Economics or Managerial Economics. These 15 credits are selected by the student with the assistance of an advisor and must be at the 200 level or above (does not include A A E 215, A A E 299 or A A E 500).

Students completing the agricultural and applied economics major are awarded the bachelor of science degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

- Students must complete MATH 211 or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three semesters of coursework in mathematics.
- The communications requirement includes Communication Parts A & B. Completing this requirement early will help the students with written and oral assignments in future courses.
- Students should complete the basic courses in economics early in their programs so that they can have greater choice in courses in the major.
- Students should choose electives that satisfy one of the UW requirements (ethnic studies or social sciences or humanities) or the college requirements. See Requirements tab for details.

BUSINESS MANAGEMENT FOR AGRICULTURAL AND LIFE SCIENCES, CERTIFICATE

Basic business literacy can benefit all graduates, no matter what their field or intended career. When entering the professional world, CALS students are increasingly confronted with contexts that require an understanding of basic business and management concepts. The certificate in business management for agricultural and life sciences can provide students with the business skills that employers value.

The certificate offers students in the College of Agricultural and Life Sciences (CALS) the opportunity to gain business knowledge and have it recorded on their transcript. The certificate is designed specifically for

students intending to pursue careers in agriculture and life sciences, and enrollment is open only to undergraduates currently enrolled in CALS. This professional credential is offered by the Department of Agricultural and Applied Economics, the Department of Life Sciences Communication, and the Renk Agribusiness Institute, with the collaboration of the School of Business.

HOW TO GET IN

To declare this certificate, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37). Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

REQUIREMENTS

Code	Title	Credits
Completion of the certificate requires a total of 18 credits.		
<i>The following four courses are required:</i>		
A A E 215	Introduction to Agricultural and Applied Economics	3
LSC 270	Communication in Life Science Industries	3
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	3
<i>Select six credits from the following classes:</i>		6
A A E 319	The International Agricultural Economy	
A A E 320	Farming Systems Management	
A A E 322	Commodity Markets	
A A E 323	Cooperatives	
A A E 419	Agricultural Finance	
A A E/ECON 421	Economic Decision Analysis	
A A E/ECON 526	Quantitative Methods in Agricultural and Applied Economics	
A A E/M H R 540	Intellectual Property Rights, Innovation and Technology	
DY SCI 233	Dairy Herd Management I	
DY SCI 234	Dairy Herd Management II	
DY SCI 535	Dairy Farm Management Practicum	
LSC 250	Research Methods in the Communication Industry	
LSC 251	Science, Media and Society	
LSC 431	Advertising in the Life Sciences	
LSC 432	Social Media for the Life Sciences	
LSC 435	Theory and Practice of Integrated Marketing Communication	

No substitutions are allowed for the core courses. Students may count no more than two courses toward both their major requirements and these certificate requirements.

DEVELOPMENT ECONOMICS, CERTIFICATE

The certificate in development economics gives students a solid foundation of analytical skills that will enable them to better understand the challenges created by world poverty. They will learn how economics can be used to address the problems of poverty and the impact of globalization on growth and development. Students will focus on such issues as: the relationship between population growth and economic growth, the major debates about food self-sufficiency and food security, how child labor and gender discrimination limit economic development and what environmental problems are posed by economic development.

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison.

HOW TO GET IN

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison. In order to declare the certificate, the student must have successfully completed A A E 215 Introduction to Agricultural and Applied Economics, ECON 101 Principles of Microeconomics, or ECON 111 Principles of Economics-Accelerated Treatment or a comparable introductory economics course. Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

REQUIREMENTS

Code	Title	Credits
In order to declare the certificate, the student must have successfully completed one of the following:		
A A E 215	Introduction to Agricultural and Applied Economics	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	

Code	Title	Credits
The certificate requires five courses.		
<i>Complete two core courses:</i>		
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/INTL ST 373	Globalization, Poverty and Development	3
or A A E/ INTL ST 374	The Growth and Development of Nations in the Global Economy	
<i>Select one course from the following:</i>		
A A E 319	The International Agricultural Economy	3
A A E/ AGRONOMY/ INTER-AG/ NUTR SCI 350	World Hunger and Malnutrition	
A A E/ INTL ST 373	Globalization, Poverty and Development	

A A E/ INTL ST 374	The Growth and Development of Nations in the Global Economy	
A A E/ECON/ INTL BUS 462	Latin American Economic Development	
A A E/ECON 473	Economic Growth and Development in Southeast Asia	
A A E/ECON 477	Agricultural and Economic Development in Africa	
<i>Select one course from the following:</i>		3
C&E SOC/ POP HLTH/ SOC 380	Contemporary Population Problems for Honors	
C&E SOC/ ENVIR ST/ SOC 540	Sociology of International Development, Environment, and Sustainability	
C&E SOC/ SOC 630	Sociology of Developing Societies/Third World	
ECON 364	Survey of International Economics	
ECON 464	International Trade and Finance	
ECON 467	International Industrial Organizations	
ECON 475	Economics of Growth	
GEOG/ ENVIR ST 339	Environmental Conservation	
INTL BUS 200	International Business	
INTL BUS/ FINANCE 445	Multinational Business Finance	
INTL ST 402	Topics in Politics and Policy in the Global Economy	
POLI SCI 348	Analysis of International Relations	
POLI SCI 350	International Political Economy	
POLI SCI 351	Politics of the World Economy	
<i>Select one additional course from any of the courses listed above</i>		3
Total Credits		15

A student may combine this certificate with any other certificate and/or major. However, students with a major in agricultural and applied economics, a major in economics, or a major in the Politics and Policy in the Global Economy option in international studies may count no more than 6 credits toward both their major requirements and the requirements for the certificate in development economics.

AGRICULTURAL AND LIFE SCIENCES —COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- Individual Major, B.S. (p. 58)
- Landscape Architecture, B.S. (p. 60)
- Landscape Architecture, BSLA (p. 64)

INDIVIDUAL MAJOR, B.S.

The individual major is a flexible program for undergraduates in the College of Agricultural and Life Sciences who want to attain a specific academic goal that is not easily attained through a major in one or more departments. The major must involve courses from several departments,

must be at least as rigorous as a regular departmental major, and must be targeted at a special intellectual problem or academic need identified by the student. The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Approval is not guaranteed, so students should be prepared to pursue alternative options and are encouraged to discuss these with their advisor.

The individual major is available in the bachelor of science degree program. The transcript will indicate "Individual Major" until the degree is awarded. It will then show the exact name of the approved "individual major."

Students are strongly encouraged to consult with an assistant dean in the CALS Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

HOW TO GET IN

The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. The process to request to pursue an individual major is outlined below.

The student selects a three-person faculty committee from departments offering courses in the proposed major. The major advisor is from a CALS department that offers many of the courses in the proposed individual major. No more than two members of the committee can be from a single department. The student must submit a proposed plan of study to the committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The plan should include: the title of the proposed major; the rationale for the major; learning outcomes for the major and a brief assessment plan; the list of courses and the reasons for including each course in the major; and a semester plan for degree completion. The student is required to earn at least 30 credits after the term in which the proposal is approved. Thus, early planning is essential.

If the faculty committee approves the plan, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the Curriculum Committee to present the proposal. The Curriculum Committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the Curriculum Committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the Curriculum Committee.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)

INDIVIDUAL MAJOR REQUIREMENTS DEVELOPMENT OF THE INDIVIDUAL MAJOR

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. Development of the individual major is the responsibility of the student. The student should identify a faculty major advisor from the CALS department that offers many of the courses in the proposed individual major. In addition, the student should select two additional faculty from departments offering the courses in the proposed major to serve on the faculty committee. The student should consult with the faculty members and an assistant dean in Academic Affairs as a plan of study is developed. The plan of study must include the following:

- title of proposed major
- rationale for the major (what specific goal does the major achieve that cannot be achieved through one or more existing majors? what is the targeted intellectual problem? why is the major necessary for achieving the student's academic and career goals?)
- 3-5 learning outcomes for the major with a brief explanation of how learning will be assessed
- list of courses, including the reason for including each course in the major (how does each course contribute to the major learning outcomes?)
- semester plan for degree completion and estimated graduation term (if graduation exceeds four total years, include a justification for the extended time-to-degree; note that the student must earn at least 30 credits after the term in which the proposal is approved)

APPROVAL OF THE INDIVIDUAL MAJOR

Once the plan of study is developed, the student submits the plan to the faculty committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The faculty committee may require revisions prior to approval. Once approved, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the curriculum committee to present the proposal. The curriculum committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the curriculum committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the curriculum committee.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ADVISING AND CAREERS

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

Students are required to identify a faculty advisor as part of the process for requesting approval to pursue an individual major. The faculty advisor serves as the student’s academic advisor along with support from the other members of the student’s faculty committee. Additionally, students must work closely with an assistant dean in Academic Affairs throughout development and completion of the major.

LANDSCAPE ARCHITECTURE, B.S.

The bachelor of science program with a major in landscape architecture provides students with a solid foundation to pursue careers in landscape planning and conservation. It emphasizes problem-solving skills and critical thinking based on ecological principles, societal needs and cultural foundations. Landscape planning focuses on strategies to integrate human activities with landscape resources in order to achieve healthy living environments through sustainable and livable community development. Landscape conservation is concerned with achieving healthy ecosystems and in cultural and natural resource preservation.

The curriculum includes courses on theory and process and on techniques for data gathering and manipulation with an emphasis on geospatial information systems and interdisciplinary perspectives as well as on ensuring public participation in making planning and conservation decisions.

This major is of particular interest to students interested in ecological restoration and preservation and environmental planning. It prepares students for graduate work in such fields as restoration ecology, landscape architecture, urban and regional planning, architecture, law, environmental studies, and environmental design.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option

to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Integrate social, cultural, ecological and technological dimensions in solving novel problems concerning the conservation or management of sustainable natural and cultural landscapes.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
3. Demonstrate competence and critical judgment in applying the intellectual and technical skills necessary for site and landscape-scale natural and cultural resource conservation planning and management; in particular the skills of: site inventory and analysis, spatial and temporal analysis; geographic information systems; programming; synthesis; communication; implementation; and evaluation.
4. Understand, apply and evaluate the principles, theories and recent research findings underlying at least one of the following fields of landscape studies, in particular cultural and historic landscapes, environmental planning, and ecological restoration.
5. Demonstrate advanced communication skills, including visual, verbal, and written presentation skills.
6. Be able to perform as a member of a public or private natural or cultural resources conservation or preservation office or agency.

ADVISING AND CAREERS

Students are assigned to a faculty advisor once they declare the major. Prospective students should contact the academic coordinator, Debi Griffin (dagriffin@wisc.edu, 608-263-7301) for more information.

This major is of particular interest to students interested in ecological restoration and preservation and environmental planning. It prepares students for graduate work in such fields as restoration ecology, landscape architecture, urban and regional planning, architecture, law, environmental studies, and environmental design.

LANDSCAPE ARCHITECTURE, BSLA

Students who enjoy art, science, technology, problem-solving, and design should consider a career in landscape architecture. Graduates in landscape architecture influence the design and management of cities, parks, and open spaces. They often advise park managers, citizen groups, landowners, and state agencies. Landscape architects design public and private outdoor spaces, restore and help preserve natural areas, develop and implement regional planning and public policy, and revitalize urban neighborhoods. The Professional Landscape Architecture degree program focuses on form-giving design, design implementation, and professional practice. Emphasis is placed on principles of design theory and process; problem solving in relationship to human needs and aspirations, and environmental awareness and stewardship; and on the development of technical proficiencies required of professional practice. Students learn site analysis, graphic communication, design synthesis, construction technology, and planting design.

The Professional Landscape Architecture degree program provides professional education accredited by the American Society of Landscape Architects (ASLA). Completion of this program is the first step in becoming a licensed landscape architect. The program emphasizes the exploration and understanding of design processes and graphic and verbal communication skills. The program also develops a student's sensitivity to natural, physical, historical, and cultural contexts of landscape design.

Students completing the requirements for this program are granted a *Bachelor of Science–Landscape Architecture* degree.

HOW TO GET IN

All students interested in enrolling in the professional degree program are enrolled as pre-landscape architecture majors. Admission to the professional program is on a competitive basis.

- Admission to the Pre-Landscape Architecture Program.** Applicants must satisfy the admission policies for the college (apply to the UW–Madison Office of Admissions and Recruitment); entering freshmen follow the instructions on the admissions application and list landscape architecture as their intended major. During the first year the student enrolls as a pre-landscape architecture student (PLA-1 classification) and concentrates on the completion of the prerequisite courses and university/college degree requirements.
- Eligibility for Consideration into the Landscape Architecture Accredited Professional Program.** Eligibility for consideration into the Landscape Architecture Accredited Professional Program (landscape architecture degree program) depends on fulfillment of these requirements: students may apply for formal admission to the program during the spring semester of each academic year. Selections are made only once a year for the fall semester. The first round of selections takes place in early summer. All students will be notified of their status at least two weeks before the start of the fall semester. Students who plan to complete their prerequisite courses during the summer session must so indicate on their application. The department will admit up to a maximum of 22 students, as resources permit. Selection will be based on a letter of intent, written by the applicant, which addresses her or his reasons for wanting to enter the major, and on grades earned in the following six prerequisite courses:

Code	Title	Credits
LAND ARC 201	Introductory Landscape Architecture Studio (fall semester)	2
LAND ARC 250	Survey of Landscape Architecture Design (fall semester)	3
LAND ARC 262	Landscape Inventory and Evaluation Methods (spring semester)	4
LAND ARC 312	Graphics for Designers (spring semester)	3
M E 160	Architectural Graphics	3
Select one of the following:		3
ART 102	Two-Dimensional Design	
ART 112	Drawing I	
DS 120	Design: Fundamentals I	

AND the applicant must have completed at least 24 credit hours. Cumulative GPA will be considered.

Note: Application forms for consideration of admission to the Landscape Architecture professional program are available from the Department of Landscape Architecture, 1 Agricultural Hall, 1450 Linden Drive.

- Selection Policies.** On-campus selections for admission will be made as soon as possible after spring semester grades are received. Advanced-standing transfer students and second degree majors must have their final transcripts on file (in Room 116 Agricultural Hall) as soon as possible after the close of their spring term, but no later than June 15. The department must be notified immediately if a

grade report is incorrect, as selections must be made on the basis of information available at the time of selection.

4. **Notification of Status.** Applicants who have completed their prerequisite courses at the end of spring semester will be notified of their status between June 1 and July 1 of each year for fall semester admission. Decisions on those applicants completing prerequisites during summer session will be made as soon as grades are received. **Note:** Students not selected for admission may enroll for a second time with a pre-landscape architecture classification (PLA-2) and seek admission for the following fall by reapplying during the spring semester. If not selected after a second application, students will need to transfer to another program on the Madison campus or to another institution. Students will not be able to register in pre-landscape architecture for a third year.
5. **Appeal Procedures.** An appeal to the department's curriculum committee may be presented to clarify an error of fact or extenuating circumstances.
6. **Reentering Landscape Architecture Students. Note:** Those students who are accepted and enroll in LAND ARC 261 Principles of Landscape Architecture Design and Graphics and drop the course during the fall semester must reapply for admission by April 15 if they wish to be considered for the following fall.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major

requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

Courses may not double count within the degree (unless specifically noted otherwise), but courses counted toward the degree requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the degree that are not used elsewhere.

ART 328	The Computer in the Visual Arts	
ART 428	Digital Imaging Studio	
ART 608	Interdisciplinary Critique in the Visual Arts	
ART HIST 208	Western Architecture: Renaissance to Modern	
ART HIST 468	Frank Lloyd Wright	
DS 220	Design: Fundamentals II	
DS 320	Design: Sketching and Rendering	
DS 323	Computer Aided Design: Architecture and Interiors	

OPTION B: SECOND MAJOR OR CERTIFICATE IN A RELATED FIELD

A student who is pursuing a double major or a certificate in a related field (horticulture, art history, art business, etc.) has the option to use the completion of the second major or certificate to fulfill the landscape architecture breadth or depth requirement.

OPTION C: ADVISOR-APPROVED BREADTH OR DEPTH AREA

In special circumstances students may request a substitution for the additional breadth/depth course. The course may come from any department but must relate to some aspect of the profession. The course must be approved by the student's advisor and by the

Landscape Architecture Curriculum Committee. Students must provide an explanation of why they want to make the substitution.

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Integrate social, cultural, ecological and technological dimensions in solving novel design and planning problems concerning the betterment of rural and urban natural and cultural landscapes.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
3. Demonstrate competence, creativity, and critical judgment in applying the intellectual and technical skills necessary to the professional practice of landscape architecture; in particular the skills of problem-solving surrounding spatial, three-dimensional design of outdoor spaces, including, in particular: site inventory and analysis; community participation; programming; synthesis; communication; implementation; evaluation; and management.
4. Apply and evaluate the components of a professional curriculum as defined by the Landscape Architecture Accreditation Board, the accrediting organization for landscape architecture programs.
5. Understand, apply and evaluate the principles, theories and recent research findings in the field of landscape architecture.
6. Demonstrate advanced communication skills, including graphic, verbal, and written presentation skills.
7. Be able to perform as an entry-level landscape architect in a public or private office or agency setting.

AGRONOMY

Agronomy is plant biology striving to meet the world's expanding need for food, fiber, and fuel in an efficient, environmentally sound, and sustainable manner.

An undergraduate student majoring in agronomy earns a bachelor of science degree. The agronomy curriculum offers undergraduate and graduate studies in plant biotechnology, breeding, genetics, physiology, crop management and protection strategies, agroecology, and sustainable agriculture. Agronomy undergraduate students concentrate on plant science courses but also select related courses in soil science,

genetics, economics, business, engineering, entomology, and the animal sciences depending upon their interests.

The current demand for agronomy graduates exceeds supply, and we expect the demand to increase. Career possibilities include biotechnology, research, agri-business, resource conservation, and crop production and management. In addition to classroom learning, students gain practical experience in their area of interest and earn degree credit at the same time through internships and independent study. The agronomy major also serves as an excellent foundation for students interested in pursuing advanced studies in plant biotechnology, breeding, genetics, physiology, crop management, agroecology, or sustainable agriculture. Graduate programs are described in the *Graduate Guide*.

RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

AGRONOMY, B.S.

CREATING A HEALTHIER, MORE PRODUCTIVE, MORE RESILIENT AGRICULTURE FOR WISCONSIN AND THE WORLD.

That is the challenge taken up by the faculty, staff and students of the Department of Agronomy.

We generate and apply knowledge about the plants that feed and benefit humankind. Agronomic crops are typically grown for grain to feed people and livestock, or are processed into products. Feed crops are grown specifically to meet the nutritional needs of livestock. Forage crops are grown for their stems, leaves, and other edible plant parts.

We find and implement solutions to problems and opportunities concerning efficiency and sustainability of crop production and in safe and environmentally sound ways.

We generate knowledge on the genetics, genomics, biochemistry, and physiology of plants.

We study the interactions among cropping systems, climate, and the environment. We emphasize sustainable agriculture, whether precision, traditional or organic, in order to reduce the impact on the environment and the inhabitants of our planet.

We work to ensure that agricultural systems and products in Wisconsin and the world are able to meet rapidly-changing needs and those of future generations.

Undergraduates in the Department of Agronomy earn a bachelor of science degree to prepare them for everything from pursuit of a graduate degree to careers in science, education, agriculture, agribusiness, and environment and conservation.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to

the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
	CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)	

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		3
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I	5
MATH 211	Calculus	5
MATH 221	Calculus and Analytic Geometry 1	5
Select one of the following:		3
STAT 224	Introductory Statistics for Engineers	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT/B M I 541	Introduction to Biostatistics	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following:		4-5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1:		
BOTANY/ BIOLOGY 130	General Botany

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Students will be able to articulate the role of biological processes, management systems, environmental influences, and economic and social factors on world food, feed, and fiber production. Specific topics that all students should have knowledge of include: photosynthesis, nutrient cycling, genetic inheritance, and management and uses of primary U.S. crop species.
- Students will develop a global perspective and appreciate the interdependencies among individuals and their workplaces, communities, environments, and the planet; and an understanding of the role of science in society.
- Students will communicate effectively through writing and speaking, and will be able to identify and critically evaluate available sources of information.
- Students will demonstrate the ability to critically and creatively analyze problems and evaluate systems.

ADVISING AND CAREERS

ADVISING

The agronomy department is faculty-advised, meaning that faculty members take on the responsibility of guiding and advising undergraduates through graduation. Students and faculty are matched as closely as possible by interest. All new freshmen and transfer students are temporarily advised by the student services coordinator until the advising relationship between professor and student is established. If you would like to have a conversation about joining the agronomy department, please contact Joanna Schuth.

CAREERS

An agronomy degree is an open door to careers in many related fields such as biotechnology, plant genetics, crop management, agricultural financial management, farming, seed sales, crop consulting, Certified Crop Advising, Certified Professional Agronomy, agribusiness,

extension agronomy, agricultural education, government work, and international agronomy.

GENETICS

The fastest growing sector of agriculture is plant breeding, genetics, and genomics. Plant scientists are working at the field, plant, cellular, and molecular level to create cultivars that are hardier, disease resistant, nutritious, and affordable. The industry's growth is currently outstripping the rate of graduation; graduates can take their pick of interesting, fulfilling careers in the public and private sectors.

BIOFUELS

The biofuel industry is also experiencing rapid growth, with research and development being focused on sugar-based biofuels, cellulosic biofuels, and biodiesels, made from plants as varied as switchgrass, sugar cane, corn, and wood pulp. These energy crops are harvested and processed into alternatives to fossil fuels.

AGRIBUSINESS

In agribusiness agronomists take data and translate it into real world applications. They sell tools for crop production, provide agricultural loans, consult on crops, manage businesses, and much more. They are often responsible for translating technical research data into applications. Numerous agronomy graduates are also involved in the sale of agricultural products, which are vital to today's economy. Other successful agronomists serve as crop advisers, farm managers, consultants, bank loan specialists, managers, and much more.

RESEARCH/EDUCATION AND EXTENSION

Agronomic educators specialize in teaching and working with high school and college students. They also teach and advise students who chose advanced studies for a master's degree and/or Ph.D. They are extensively involved in research, publishing findings on a regular basis and making scientific advances.

Extension agronomists usually work for a state, local, or national government; they consult with farmers and others to help find answers to their specific problems and help farmers translate research results into usable management practices. Government-employed agronomists also work with farmers and ranchers to plan for soil and water conservation so crops and land can be managed efficiently and with minimal impact to the environment.

ANIMAL SCIENCES, B.S.

Animal science students focus on the biology of domesticated animals, including cattle, goats, horses, poultry, sheep, swine, as well as meat derived from the traditional meat animal species. Some attention is directed toward the companion animal species, including dogs and cats. The major emphasizes integration of biological principles from the gene to the organ to the herd or flock. Core courses in the major include animal breeding, veterinary genetics, animal physiology, reproductive physiology, comparative animal nutrition, animal health, and meat science. Additional courses include career orientation, animal handling, assessing animal welfare, biology of companion animals, composition of meat animals, human/animal symbiosis, ruminant nutrition, monogastric nutrition, sheep production, beef cattle production, swine production, equine business, livestock production in agricultural development, and laboratory techniques in mammalian gamete and embryo biology.

The major offers a science track which includes math, physics, organic chemistry and biochemistry for students with interests in postgraduate work in veterinary medicine, medicine, animal science or other graduate programs. The major also offers a business emphasis which includes economics, accounting, marketing, farm management, commodity markets, agricultural finance, and other courses from the School of Business.

Career opportunities exist in the meat, artificial insemination, feed, agribusiness, agri-marketing and biotechnology industries. Occasionally, students have found positions within zoos. All students receive individualized attention from their academic advisor. The Department

has several livestock- and meat-related scholarships. Internships and research experience are encouraged. Numerous graduates have completed double majors with Life Science Communication, Poultry Science, Genetics, and departments outside of CALS such as Spanish, according to the interests and aspirations of the student.

A student majoring in animal sciences is placed in the bachelor of science degree program. Completion of the degree program in four years is the norm.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

¹ A A E 215 Introduction to Agricultural and Applied Economics not accepted as a prerequisite for some advanced Business courses. A A E 215 carries only QR-B credit if taken fall 2011 or later.

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- 1. Knowledge and comprehension.** Our students develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Students demonstrate their knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.
- 2. Analytical processing.** Our students develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, they can develop hypotheses to test the cause of predicted relationships using the scientific method. Students demonstrate these skills through a senior capstone experience and through individualized research opportunities and instructional activities.

- 3. Integration for application.** When faced with real world problems which they have never confronted, our students are able to apply their knowledge to develop solutions. In addition, our students are capable of identifying problems yet to be investigated and in need of advanced study. The student's ability to integrate and apply their knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
- 4. Critical thinking.** Students find their sources of information using peer reviewed research articles. They learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. They have the capacity to synthesize scientific literature such that they can communicate a position backed with strong scientific support. These skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.
- 5. Effective communication.** Students graduate from our department with the ability to communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Their communications provide new insights into animal production, and are explained in a manner fitting with the audience. Our students' ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

ADVISING AND CAREERS

All students receive individualized advising from their academic advisors. The department has several livestock and meat-related scholarships. Internships and research experience are encouraged. Numerous graduates have completed double majors with Life Science Communication, Poultry Science, Genetics, and departments outside of CALS such as Spanish, according to the interests and aspirations of the student. Students are assigned a faculty advisor upon declaration of the major. Interested students should contact Kathy Monson (kamonson@wisc.edu) (608-263-5225) with questions.

Career opportunities exist in the meat, artificial insemination, feed, agribusiness, agri-marketing and biotechnology industries. Occasionally, students have found positions within zoos. Many students pursue graduate education in veterinary medicine, medicine, animal science, or other programs.

POULTRY SCIENCE, B.S.

Poultry science students focus on the biology of domestic birds, including chickens, turkeys, ducks and geese. Courses cover physiology, nutrition, and health, as well as husbandry and business management related to poultry. Processing of meat and eggs and their role as healthy foods are important aspects included in the major. The poultry science curriculum is useful for any student who wants to learn the basics of bird biology and/or poultry production.

Career opportunities for poultry science graduates exceed the number of graduates and may be found in production, marketing, sales, and technical services for the live bird industry or its food products (meat or eggs). The Department of Animal Sciences may be consulted for specific career information and information about courses required for the Bachelor of Science degree program.

Many courses for the poultry science major are offered only during summer, when students from around the Midwest travel to UW–Madison to take poultry science courses unavailable at their home schools. The course offerings reflect the role of the UW poultry science program and its collaboration with the Midwest Poultry Consortium. Faculty from many midwestern universities assist in teaching the summer courses.

The department has numerous poultry-related scholarships available, and internships with poultry companies are strongly suggested.

A student majoring in poultry science is placed in the bachelor of science degree program. This program is flexible enough to meet the individual needs and interests of the student.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as

needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 40)		1
International Studies (p. 40)		3

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Knowledge and comprehension.** Our students develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Students demonstrate their knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.
- Analytical processing.** Our students develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, they can develop hypotheses to test the cause of predicted relationships using the scientific method. Students demonstrate these skills

through a senior capstone experience and through individualized research opportunities and instructional activities.

- Integration for application.** When faced with real world problems which they have never confronted, our students are able to apply their knowledge to develop solutions. In addition, our students are capable of identifying problems yet to be investigated and in need of advanced study. The student's ability to integrate and apply their knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
- Critical thinking.** Students find their sources of information using peer reviewed research articles. They learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. They have the capacity to synthesize scientific literature such that they can communicate a position backed with strong scientific support. These skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.
- Effective communication.** Students graduate from our department with the ability to communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Their communications provide new insights into animal production, and are explained in a manner fitting with the audience. Our students' ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

ADVISING AND CAREERS

All students receive individualized advising from their academic advisors. Students are assigned a faculty advisor upon declaration of the major. Interested students should contact Kathy Monson (kamonson@wisc.edu, 608-263-5225) with questions.

Career opportunities for poultry science graduates exceed the number of graduates and may be found in production, marketing, sales, and technical services for the live bird industry or its food products (meat or eggs). Internships and research experience are encouraged.

BACTERIOLOGY

Contact Katy France, student services coordinator, 262-2975, kfrance@bact.wisc.edu, for information about the undergraduate program, declaring the microbiology major, career opportunities, and advisor assignments.

Microorganisms are the oldest life forms on earth and impact our lives and the well being of the planet in innumerable ways. The field of microbiology has become even more prominent in recent years because of increased concerns about bioterrorism, infectious disease, and environmental manipulation. The microbiology major offered by the Department of Bacteriology provides training in broad aspects of microbiology with emphasis on 21st-century laboratory skills.

Core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, microbial ecology, food microbiology, host-parasitic interactions, microbial pathogenesis, immunology, virology, fermentation, and microbial biotechnology. Instructional laboratory courses provide hands-on experience with modern techniques and equipment. Students have many opportunities for independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as molecular or cell biology.

Students who end their training with a bachelor's degree are well prepared for a wide variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process and training in microbiology itself allow microbiology graduates to enter fields as diverse as business, technical service, sales, or technical writing.

The department also serves as the administrative home for the Biology major in the College of Agricultural and Life Sciences.

BIOLOGY, B.S. (CALs)

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:

1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain pre-professional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists, and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Agricultural and Life Sciences and the College of Letters & Science.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

AGRONOMY/ HORT 338	Plant Breeding and Biotechnology
-----------------------	----------------------------------

GENETICS 466	Principles of Genetics
--------------	------------------------

GENETICS 468	General Genetics 2
--------------	--------------------

MICROBIO 470	Microbial Genetics & Molecular Machines
--------------	--

BIOCHEM 501	Introduction to Biochemistry
-------------	------------------------------

BIOCHEM 508	General Biochemistry II
-------------	-------------------------

¹ For AP Biology policy, as it applies to introductory biology in the biology major, see this link (<http://biologymajor.wisc.edu/advising/advisor-resources/ap-ib-biology-policy>).

² Does not count toward intermediate/advanced courses. Students completing the evolutionary biology option must complete either GENETICS 466 Principles of Genetics or GENETICS 468 General Genetics 2 to fulfill the Foundation requirement. Students completing the plant biology option are not allowed to take MICROBIO 470 Microbial Genetics & Molecular Machines to fulfill the Foundation requirement.

³ Students may use BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 Cellular Biology to contribute to introductory biology and satisfy foundation.

CAPSTONE

Code	Title	Credits
Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682's and 692's in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.		
BIOCORE 486	Organismal Biology Laboratory	2
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology (taken fall 2016 - summer 2018)	4
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	2
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab (taken fall 2016 - summer 2018)	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
MICROBIO/ BIOLOGY 525	Advanced Biological Laboratory Practices: A Research Experience (taken fall 2016 - summer 2018)	2
MICROBIO 551	Capstone Research Project in Microbiology	2
PHYSIOL 435	Fundamentals of Human Physiology	5
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3

OPTIONS IN THE MAJOR

In addition to the common requirements, students must complete one of the options below. A minimum of 13 intermediate/advanced credits from the lists provided are required, which must include **one approved lab course**. Approved lab courses are indicated by footnote.

- Biology Major–No Option (p. 87)
- Evolutionary Biology Option (p. 87)
- Neurobiology Option (p. 87)¹
- Plant Biology Option (p. 88)

¹ **Note: Admission to the biology major with a neurobiology option is suspended.** The College of Letters & Science now offers a *neurobiology major*. Students already declared for the biology major with a neurobiology option are allowed to continue in the program; they must complete the program no later than August 2019.

Students who have declared the biology major–neurobiology option may cancel the major and declare the new neurobiology major, provided it does not extend their time to degree. Students should consult with an advisor in the new neurobiology major to determine which program is best for them.

Students may not double-major in any biology major option and the neurobiology major.

BIOLOGY MAJOR—NO OPTION

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course**. Approved lab courses are indicated by footnote.

Select one course from categories A or B below.

Select one course from categories C or D below.

Select one course from category E or from an unused category above.

A. Cellular and Subcellular Biology (p. 90)

B. Organismal Biology (p. 91)

C. Ecology (p. 91)

D. Evolution and Systematics (p. 92)

E. Applied Biology, Agriculture and Natural Resources (p. 92)

EVOLUTIONARY BIOLOGY OPTION

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course**. Approved lab courses are indicated by footnote.

Students must take ANTHRO/BOTANY/ZOOLOGY 410 Evolutionary Biology. In addition, select one course from categories A or B below.

Select one course from category C. Select one course from category D.

Additional courses can be taken from "A-E" to satisfy the lab and/or 31 credit requirement.

A. Cellular and Subcellular Biology (p. 90)

B. Organismal Biology (p. 91)

C. Ecology (p. 91)

D. Evolution and Systematics (p. 92)

E. Applied Biology, Agriculture and Natural Resources (p. 92)

SEMINAR

Code	Title	Credits
	Undergraduate Evolution Seminar (1 cr minimum)	
BIOLOGY/ GENETICS 522	Evolution Seminar Series- Undergraduate	1

NEUROBIOLOGY OPTION

Note: Admission to the biology major with a neurobiology option is suspended. The College of Letters & Science now offers a *neurobiology major*. Students already declared for the biology major with a neurobiology option are allowed to continue in the program; they must complete the program no later than August 2019.

Students who have declared the biology major—neurobiology option may cancel the major and declare the new neurobiology major, provided it does not extend their time to degree. Students should consult with an advisor in the new neurobiology major to determine which program is best for them.

Students may not double-major in any biology major option and the neurobiology major.

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course**. Approved lab courses are indicated by footnote.

Students must complete 1. ZOOLOGY/PSYCH 523 Neurobiology and 2. either ZOOLOGY/NTP/PHYSIOL/PSYCH 524 Neurobiology II: An Introduction to the Brain and Behavior or PSYCH 454 Behavioral Neuroscience.

In addition, select one course from category A. Select one course from category B. Select one course from categories C or D below. Additional courses can be taken from "A-F" to satisfy the lab and/or 31 credit requirement.

A. Cellular and Molecular Neurobiology

Code	Title	Credits
ANATOMY/NTP/ PHYSIOL 625	Brain Cell Cultures and Imaging: A Lab Course ¹	4
NTP/PHMCOL-M/ PHYSIOL 610	Cellular and Molecular Neuroscience	4
NTP/NEURODPT/ PHYSIOL/ ZOOLOGY 616	Lab Course in Neurobiology and Behavior ¹	4
NTP/PHYSIOL 629	Molecular and Cellular Mechanisms of Memory	3
NTP 655	Modeling Neurodevelopmental Disease	3
NTP 675	Special Topics (Molecular Mechanisms of Brain Damage)	1-3
NTP 675	Special Topics (Reproductive Neuroendocrinology)	1-3
NTP/NEUROL 735	Neurobiology of Disease	2
PSYCH 601	Current Topics in Psychology (Epigenetics & the Brain)	3
PSYCH 601	Current Topics in Psychology (Neuropharmacology)	3
ZOOLOGY 400	Topics in Biology ²	1-3
ZOOLOGY 555	Laboratory in Developmental Biology ¹	3
ZOOLOGY 604	Computer-based Gene and Disease/ Disorder Research Lab ¹	2
ZOOLOGY 625	Development of the Nervous System	2

¹ Courses also approved for Lab credit

² Approved topic: General Molecular Biology, offered spring 2016 and spring 2017

B. Systems Neurobiology

Code	Title	Credits
ANATOMY/ NTP/PHMCOL- M/PHYSIOL/ PSYCH 611	Systems Neuroscience	4
ANATOMY/NTP/ PHYSIOL 630	Neuronal Mechanisms for Sensation and Memory in Cerebral Cortex	3
CS&D 210	Neural Basis of Communication	3
CS&D 503	Neural Mechanisms of Speech, Hearing and Language	3
ED PSYCH 326	Mind, Brain and Education	3
KINES 531	Neural Control of Movement	3
KINES 721	Neural Basis for Movement	3

NTP/ZOOLOGY 620	Neuroethology Seminar	2
NTP/MED PHYS 651	Methods for Neuroimaging Research ¹	3
NTP 675	Special Topics (Functional Brain Imaging of Cognitive Disorders)	1-3
NTP 675	Special Topics (Basic Sleep Mechanisms & Sleep Disorders)	1-3
PSYCH 406	Psychology of Perception	3-4
PSYCH 414	Cognitive Psychology	3
PSYCH 504	Affective Neuroscience	4
PSYCH 601	Current Topics in Psychology (Cognition & Emotion: Cognitive Affective Neuroscience)	3
PSYCH 601	Current Topics in Psychology (Neural Basis of Cognitive Control)	3
PSYCH 601	Current Topics in Psychology (Neuroeconomics)	3

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take BIOLOGY 681 Senior Honors Thesis and BIOLOGY 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Graduates will know and understand core concepts that unify the breadth of biological sciences:
 - a. Evolution - The diversity of life evolved over time by processes of mutation, selection, and genetic change.
 - b. Structure and Function - Basic units of structure define the function of all living things.
 - c. Information flow, exchange, and storage - The growth and behavior of organisms are activated through the expression of genetic information in context.
 - d. Pathways for transformations of energy and matter - Biological systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of thermodynamics.
 - e. Systems - Living systems are interconnected and interacting.

2. Graduates will be able to demonstrate practical skills of a professional biologist:
- Problem#solving by engaging the process of science
 - Developing hypotheses and aligning appropriate methodologies
 - Using biological knowledge/concepts to solve problems
 - Integrating disparate information
 - Written and verbal proficiency
 - Laboratory skills
 - Quantitative analysis skills
 - Teamwork skills
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

FOUR-YEAR PLAN

Four-year road maps for the biology major are designed to support biological science major exploration. The road map is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and the Course Guide/Schedule of Classes. Your specific program of study could, and probably will, look different. You should customize the road map to fit your unique path at UW–Madison. Consult with your advisor about the best path for you.

ADVISING AND CAREERS

ADVISING

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (<http://advising.wisc.edu/content/expectations-about-advising>).

In the biology major, students are assigned to an adviser according to last name. Please schedule an advising appointment here (<http://biology.wisc.edu/advising>).

CAREERS

The biology major encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the CALS Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for

the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

College of Agricultural and Life Sciences graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Schedule a Career Advising appointment (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-advising>)
- Connect with CALS Career Services (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/cals-career-development-on-facebook>)
- Explore CALS Career Services for Students (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development>)

MICROBIOLOGY, B.S. (CALs)

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics,

biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment (<https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html;jsessionid=89D5FEA38114F159C48E4959F05B91E1.primary>) with Katy France to discuss the microbiology major, appropriate coursework, how to declare, and so on.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3

Total Credits 104-137

* Students planning to pursue graduate studies in a biological science are encouraged to take MATH 221 Calculus and Analytic Geometry 1, MATH 222 Calculus and Analytic Geometry 2, PHYSICS 201 General Physics and PHYSICS 202 General Physics or PHYSICS 207 General Physics and PHYSICS 208 General Physics, and BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II (see Note 7). Also recommended: CHEM 565 Biophysical Chemistry and MICROBIO/BIOCHEM/GENETICS 612 Prokaryotic Molecular Biology.

¹ Choose 1 of 2 sequences: CHEM 103 General Chemistry I and CHEM 104 General Chemistry II or CHEM 109 Advanced General Chemistry. Students who take 109 and plan to attend medical or other professional schools are advised to take one additional inorganic course (CHEM 311 Chemistry Across the Periodic Table or CHEM 327 Fundamentals of Analytical Science).

² Math course determined by placement scores. Microbio majors must complete math through calculus (choose from MATH 171 Calculus with Algebra and Trigonometry I & MATH 217 Calculus with Algebra and Trigonometry II or MATH 211 Calculus or MATH 221 Calculus and Analytic Geometry 1), and statistics (choose from STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, or STAT/B M I 541 Introduction to Biostatistics).

³ Electives can be scheduled according to the student's preference. Consult your advisor and the Requirements tab.

⁴ The three choices are 1) ZOOLOGY/BIOLOGY/BOTANY 151 Introductory Biology and ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology; 2) ZOOLOGY/BIOLOGY 101 Animal Biology, ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory and BOTANY/BIOLOGY 130 General Botany; or 3) Biocore. Biocore is a 3 to 4 semester sequence. Students must complete the first three lectures and the first two labs. The Biocore courses are BIOCORE 381 Evolution, Ecology, and Genetics, BIOCORE 382 Evolution, Ecology, and Genetics Laboratory, BIOCORE 383 Cellular Biology, BIOCORE 384 Cellular Biology Laboratory, BIOCORE 485 Organismal Biology, BIOCORE 587 Biological Interactions.

⁵ Physics may be taken in year 1, 2, 3, or 4 depending on the student's schedule.

LEARNING OUTCOMES

- Students will develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology
- Students will apply the scientific method to questions. They will formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
- Students will demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving
- Students will be able to access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
- Students will learn about and demonstrate personal and professional ethics.

⁷ If BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II are taken, both semesters must be completed (take 507 in fall semester of year 3 and 508 in spring semester of year 3).

ADVISING AND CAREERS

Current UW–Madison students can schedule initial advising (<https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html>) in the microbiology major with Katy France.

Prospective/future UW–Madison students should email (katy.france@wisc.edu) Katy France to set up an appointment, which can be conducted in person or via phone call.

Read about and explore possible microbiology careers at the American Society for Microbiology (<https://www.asm.org/index.php/learn-about-careers>) website.

Learn more about health-related careers through the ExploreHealthCareers.org (<https://explorehealthcareers.org>) website.

PEOPLE

Associate Professor Jue "Jade" Wang

Assistant Professors Daniel Amador-Noguez, Briana Burton, Federico Rey, Garret Suen, and Kalin Vetsigian

BIOCHEMISTRY

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school

admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

BIOCHEMISTRY, B.S. (CAL S)

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

HOW TO GET IN

Students who have completed a semester or more on campus must have a 2.5 previous semester GPA in order to declare or transfer into the major. Students may declare the major via an appointment with the undergraduate advisor.

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CAL S) have the option to declare Biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies. The biochemistry major is offered through either CAL S or the College of Letters & Science (L&S). Students interested in the differences or transferring between CAL S and L&S should meet with the advisor to discuss this in more detail. Students in other schools/colleges (Business, Education, Engineering, etc.) may add biochemistry as an additional major with permission of their home school/college.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CAL S must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CAL S B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CAL S Capstone Learning Experience: included in the requirements for each CAL S major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

MATHEMATICS

Code	Title	Credits
Select one of the following options:		
MATH 221 & MATH 222	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2	9
MATH 171 & MATH 217 & MATH 222	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II and Calculus and Analytic Geometry 2	14
MATH 275 & MATH 276	Topics in Calculus I and Topics in Calculus II	10

CHEMISTRY

General Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Organic Chemistry

Code	Title	Credits
Select ALL of the following courses:		
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

Analytical Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 327	Fundamentals of Analytical Science	4
CHEM 329	Fundamentals of Analytical Science	4
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Physical Chemistry

Code	Title	Credits
Must complete 4 credits of physical chemistry. Select one of the following options:		
CHEM 565	Biophysical Chemistry (recommended)	4

CHEM 561 & CHEM 563	Physical Chemistry and Physical Chemistry Laboratory	4-5
------------------------	---	-----

BIOLOGY

Students must complete either Option A (introductory + upper level biology), or Option B (Biocore), for 16 total credits of biological science coursework.

Option A (Introductory + Upper Level Biology)

Option A Introductory Biology

Code	Title	Credits
Select one of the following introductory biology options:		
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	10
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	10

AND Option A Upper-Level Biology

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits; more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the courses in the course list below. To see courses sorted by subject, as well as a list of courses offered in specific upcoming semesters, please see the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/advanced-biology-courses-undergraduate-program).

Important: Biochemistry courses on this list can only count for "upper-level biology" if they are above and beyond what is needed to fulfill the "biochemistry" portion of the major. For example, if students have taken Biochemistry 501, they will need one upper-level biochemistry elective to fulfill the biochemistry requirement, and then any additional biochemistry courses taken can count for upper-level biology. A course may not double count in both the "upper-level biology" and the "biochemistry" requirements for the major.

Code	Title	Credits

Option B (Biocore)

Biocore is an honors-level, integrated sequence of lecture and lab courses that covers introductory and intermediate biology topics. Students must apply to and be accepted to the program to take

Biocore classes. For more information, see their website (<https://biocore.wisc.edu>).

Code	Title	Credits
Select ALL of the following lecture courses:		
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Organismal Biology	3
BIOCORE 587	Biological Interactions	3
AND, select two of the following lab classes:		
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	2
BIOCORE 384	Cellular Biology Laboratory	2
BIOCORE 486	Organismal Biology Laboratory	2

PHYSICS (CALCULUS-BASED)

Code	Title	Credits
Select one of the following options (students should consult with advisor if they have credit for PHYSICS 103 and/or 104 to discuss options):		
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	10
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10

BIOCHEMISTRY

One set of introductory coursework *and* the capstone course are required, for a total of *three* biochemistry courses.

Introductory Courses

Code	Title	Credits
Select one of the following options:		
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II (recommended)	6

OR

BIOCHEM 501	Introduction to Biochemistry	3
AND one of the following upper-level biochemistry electives:		
BIOCHEM/ NUTR SCI 510	Biochemical Principles of Human and Animal Nutrition	
BIOCHEM 550	Topics in Medical Biochemistry	
BIOCHEM/ M M & I 575	Biology of Viruses	
BIOCHEM 601	Protein and Enzyme Structure and Function	
BIOCHEM/B M I/ BMOLCHEM/ MATH 606	Mathematical Methods for Structural Biology	
BIOCHEM/B M I/ BMOLCHEM/ MATH 609	Mathematical Methods for Systems Biology	
BIOCHEM/ GENETICS/ MICROBIO 612	Prokaryotic Molecular Biology	

BIOCHEM/ GENETICS/ MD GENET 620	Eukaryotic Molecular Biology
BIOCHEM/ BOTANY 621	Plant Biochemistry
BIOCHEM 625	Mechanisms of Action of Vitamins and Minerals
BIOCHEM/ PHMCOL-M/ ZOOLOGY 630	Cellular Signal Transduction Mechanisms
BIOCHEM/ NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease

Capstone Course (required)

Code	Title	Credits
BIOCHEM 551	Biochemical Methods	4

RECOMMENDED COURSES

First year students interested in exploring the major can enroll in Biochemistry Freshman Seminar (BIOCHEM 100). Additional courses in math, biology, chemistry, biochemistry, statistics, and computer science are common elective courses, depending on student's areas of interest and future career goals.

HONORS IN THE MAJOR

Students may declare Honors in the Biochemistry Major in consultation with the Biochemistry Undergraduate Advisor. To be admitted to the Honors Program in Biochemistry, students must have declared a major in Biochemistry and achieved a 3.300 overall University GPA.

HONORS IN THE BIOCHEMISTRY MAJOR REQUIREMENTS

To earn Honors in the Major in Biochemistry students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 overall University GPA
- 3.300 GPA in courses designated as Biological, Physical or Natural science Breadth
- Complete two biological science courses for Honors chosen from the list of courses (below) that can fulfill the biological science requirements for the major (introductory biology, upper-level biology, or Biocore)
- Complete **BIOCHEM 507 General Biochemistry I** and **BIOCHEM 508 General Biochemistry II** for Honors. This is in addition to the biological and physical science Honors requirements above.
- Complete a two-semester Senior Honors Thesis in BIOCHEM 681 Senior Honors Thesis and BIOCHEM 682 Senior Honors Thesis , for a total of 6 credits. Students seeking to complete this requirement in a related department, such as Chemistry, must seek approval from the Undergraduate Biochemistry Advisor.
- Complete at least 20 credits, taken for Honors, from the following list:

Math

Code	Title	Credits
MATH 275	Topics in Calculus I	5
MATH 276	Topics in Calculus II	5
MATH 341	Linear Algebra	3

MATH 375	Topics in Multi-Variable Calculus and Linear Algebra	5
MATH 376	Topics in Multi-Variable Calculus and Differential Equations	5
MATH 521	Analysis I	3
MATH 522	Analysis II	3
MATH 541	Modern Algebra	3
MATH 542	Modern Algebra	3

Chemistry

Code	Title	Credits
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5
CHEM 116	Chemical Principles II	5
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 329	Fundamentals of Analytical Science	4
CHEM 547	Advanced Organic Chemistry	3
CHEM 561	Physical Chemistry	3
CHEM 565	Biophysical Chemistry	4
CHEM 563	Physical Chemistry Laboratory	1-2
CHEM 562	Physical Chemistry	3
CHEM 564	Physical Chemistry Laboratory	1

Physics

Code	Title	Credits
PHYSICS 201	General Physics	5
PHYSICS 202	General Physics	5
PHYSICS 207	General Physics	5
PHYSICS 208	General Physics	5
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 247	A Modern Introduction to Physics	5
PHYSICS 249	A Modern Introduction to Physics	4

Statistics

Code	Title	Credits
STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences	3

How to Apply

Apply to the Honors Program by filling out the application (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/getting-admitted>). Be sure to check the "Honors in the Major" box on your application. The undergraduate advisor must sign your application.

CALS students must deposit their thesis with the Honors Dean and submit an Honors checklist at the time of graduation in order to graduate with Honors in the Major. See the website (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

BIOCORE 381 & BIOCORE 382 (or ZOOLOGY 151)	5 CHEM 345	3
Humanities Course	3 BIOCORE 383 & BIOCORE 384 (or ZOOLOGY 152)	5
Social Science Course	3 Ethnic Studies Course	3
	14	13

	16-17	15

Total Credits 31-32

Senior

Fall	Credits Spring	Credits
CHEM 565 or BIOCHEM 551 ⁴	4 BIOCHEM 551 or CHEM 565 ⁴	4
BIOCHEM 691 or 681 ³	2-3 BIOCHEM 692 or 682	2-3
Electives or Remaining Requirements	6-10 Electives or Remaining Requirements	6-10
	12-17	12-17

Total Credits 24-34

- ¹ BIOCORE sequence requires four lecture courses plus two lab courses. Student may also take ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152 plus six credits of Upper-level Biology instead of BIOCORE.
- ² Students must either take: (1) both 507 and 508 or (2) 501 and two additional credits of Biochemistry from the 500/600 level electives.
- ³ Senior Thesis, independent study or work experience in laboratory are strongly recommended, but are not required. However, certain groups of honors students ARE required to do a senior honors thesis.
- ⁴ CHEM 565 Biophysical Chemistry is offered every fall and odd spring semesters.

ADVISING AND CAREERS

HOW TO SEEK ADVISING

- To schedule an appointment with the advisor, use the Scheduling Assistant.
- Email (undergradadvisor@biochem.wisc.edu) with brief questions.
- Drop-in advising hours for quick (10-15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/advising-information-undergraduate-program) each semester.

LEARNING OUTCOMES

- Identify the fundamental biochemical principles that underlie all biological processes.
- Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
- Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
- Demonstrate professional and ethical responsibility in scientific research.
- Design and conduct quantitative experiments and/or interpret data to address a scientific question.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE BIOCHEMISTRY FOUR YEAR PLAN

Freshman

Fall	Credits Spring	Credits
CHEM 103 or 109	4-5 CHEM 104 (if needed)	5

CAREER EXAMPLES

- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- The American Society for Biochemistry and Molecular Biology (ASBMB) UW-Madison Student Chapter (<https://win.wisc.edu/organization/ASBMB>) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (https://www.studyabroad.wisc.edu/map_biochem.asp) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistry-related departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program) and the advisor can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

BIOLOGICAL SYSTEMS ENGINEERING

The biological systems engineering program is a professional program leading to the degree of Bachelor of Science–Biological Systems Engineering jointly granted by the College of Engineering and the College of Agricultural and Life Sciences. A student may study in the General program, or specialize in food and bioprocess engineering, natural resources and environmental engineering, or machinery systems engineering. It is intended for students interested in engineering as applied to all aspects of food and fiber production and biologically related engineering applications. All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) (Accreditation Board for Engineering and Technology).

BIOLOGICAL SYSTEMS ENGINEERING, B.S.

Biological systems engineering (BSE) is the application of engineering principles to biological and agricultural systems which greatly impact our food, fiber and renewable energy resources. Since biological systems engineering programs focus heavily on the protection and conservation of natural resources, it is not uncommon for them to be described as sustainable engineering programs.

Within the BSE program a student must enroll in either the *General Program* area or in one of the following three specialization areas: *Machinery Systems Engineering, Natural Resources and Environmental Engineering, or Food and Bioprocess Engineering*. The specialization in Food and Bioprocess Engineering is split into a Food Engineering track and a Bioprocess Engineering track.

Students who complete all degree requirements are awarded a *Bachelor of Science—Biological Systems Engineering* degree. A student who completes one of the three program specializations will have the area of specialization identified on the official transcript. The BSE program, like all undergraduate engineering programs on the UW–Madison campus, is accredited by ABET (<http://www.abet.org>) (Accreditation Board for Engineering and Technology). Accreditation by ABET is an indication of program quality and has major benefits for individuals seeking registration as a licensed professional engineer. A UW–Madison BSE graduate may apply for licensure as a registered professional engineer once they have passed the Fundamentals of Engineering (FE) exam, obtained four years of qualifying engineering work experience, and have passed the Professional Engineering (PE) exam. To obtain a BSE degree from UW–Madison, a student must have taken (but is not required to have passed) the FE exam as part of their Senior Design sequence. Information about the FE exam can be found at Fundamentals of Engineering Exam (<http://ncees.org/exams/fe-exam>).

Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs involving the design, construction and management of:

bio-energy production facilities, greenhouses, food processing plants, soil management systems and erosion control structures, irrigation and drainage systems, wastewater and solid waste treatment/recycling operations, animal housing facilities, aquaculture enterprises, systems for improved air quality, and equipment for agricultural production, material handling, processing, and packaging. Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need for food, fiber and renewable energy, (2) the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

The UW–Madison BSE program is traditionally known for its emphasis on undergraduate education which is reflected in outstanding one-on-one advising and smaller class sizes.

The BSE program requires completion of a minimum of 125 credits to be eligible for graduation. Note that this is higher than the minimum for other CALS programs.

HOW TO GET IN

Entry to this professional program requires students to meet the five admission requirements detailed below. Students are admitted to the department as pre-Biological Systems Engineering until they meet the admission criteria. **Admission eligibility must be confirmed by the department.**

1. Must complete a minimum of 24 degree credits.
2. Must have completed a minimum of 17 credits of calculus, statistics, chemistry, computer science, statics, biology, and physics courses required for a BSE degree.
3. Must have a BSE math and science grade point average (M&SGPA) of at least 2.80 with a minimum grade of C in every course used to calculate the M&SGPA. The M&SGPA is based on: math courses numbered 217 and above; statistics courses numbered 224 and above; all chemistry courses; all biology courses (courses with biological science breadth); computer sciences courses numbered 302 and above; E M A 201 Statics; and physics courses numbered 201 and above. For any course that a student repeats, only the most recent grade will be used in the calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation. To calculate the M&SGPA, see Applications and Forms (http://bse.wisc.edu/Current-Undergraduate-Applications_and_Forms.htm) on the BSE website.
4. Must be in good academic standing—i.e., not on academic probation or dropped.
5. Must successfully complete introductory chemistry (CHEM 103 & CHEM 104, or CHEM 109, or equivalent) and math through MATH 222.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I	
	or CHEM 108 Chemistry in Our World	
	or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus—Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations	3
or MATH 320	Linear Algebra and Differential Equations	
STAT 224	Introductory Statistics for Engineers	3
or STAT 324	Introductory Applied Statistics for Engineers	
Chemistry		
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry (Recommended)	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II ¹	
Biology		
BSE 349	Quantitative Techniques for Biological Systems	3
One additional Biological Science breadth Course; the following courses are preferred choices: ²		2-5
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
BIOLOGY/BOTANY 130	General Botany	
BIOLOGY/ ZOOLOGY 101	Animal Biology	
MICROBIO 101	General Microbiology ³	
MICROBIO 303	Biology of Microorganisms ³	
Physics		
E M A 201	Statics ⁴	3
PHYSICS 202	General Physics	5
Foundation		
Select one of the following:		3
COMP SCI 310	Problem Solving Using Computers (Preferred)	
CBE 255	Introduction to Chemical Process Modeling	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	
Select one of the following:		3
I SY E 313	Engineering Economic Analysis (Preferred)	
M E 314	Manufacturing Fundamentals	
ACCT I S 300	Accounting Principles	
ECON/FINANCE 300	Introduction to Finance	

GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
BSE 270	Introduction to Computer Aided Design	3
Core		
BSE 249	Engineering Principles for Biological Systems ⁵	3
or CBE 250	Process Synthesis	
BSE 365	Measurements and Instrumentation for Biological Systems	3
BSE 308	Career Management for Engineers	1
Specialization within the Major ⁶		18-35
Select one of the following:		
General Program		
Food & Bioprocess Engineering Specialization		
Natural Resources and Environment Specialization		
Machinery Systems Engineering Specialization		
Technical Electives		
Select courses from one or more of the four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43		
Capstone		
BSE 508	Biological Systems Engineering Design Practicum I	2
BSE 509	Biological Systems Engineering Design Practicum II	3
Fundamentals of Engineering Exam Required ⁷		
Total Credits		76-100

¹ Taking the combination of CHEM 103 and CHEM 104 instead of CHEM 109 may increase the total minimum number of credits required for graduation.

² Any biological science course of 2 or more credits is accepted. Additional courses taken may be counted as Technical Electives.

³ MICROBIO 101 or MICROBIO 303 required for Food & Bioprocess Engineering specialization.

⁴ E M A 201 Statics is an acceptable prerequisite for PHYSICS 202 General Physics.

⁵ Students selecting the Food & Bioprocess Engineering option who plan to enroll in CBE 310 Chemical Process Thermodynamics and CBE/B M E 320 Introductory Transport Phenomena must take CBE 250 here as a prerequisite. Students selecting the Food & Bioprocess Engineering option who plan to enroll in M E 361 Thermodynamics and M E 363 Fluid Dynamics are recommended to take BSE 249 here.

⁶ See below for the breakdown of required courses for each specialization.

⁷ Grades for BSE 509 will not be posted until proof of examination is presented.

NAMED OPTIONS WITHIN THE MAJOR GENERAL PROGRAM

Code	Title	Credits
M E 361	Thermodynamics ¹	3

Code	Title	Credits
or CBE 310	Chemical Process Thermodynamics	
Select one of the following: ¹		3-4
M E 363	Fluid Dynamics	
CIV ENGR 310	Fluid Mechanics	
B M E/CBE 320	Introductory Transport Phenomena	
BSE 464	Heat and Mass Transfer in Biological Systems	3
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
Select a minimum of three of the following:		6-9
BSE 201	Land Surveying Fundamentals	
BSE/ENVR ST 367	Renewable Energy Systems	
BSE/CIV ENGR/SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	
BSE/FOOD SCI/M E 441	Rheology of Foods and Biomaterials	
BSE 460	Biorefining: Energy and Products from Renewable Resources	
BSE 461	Food and Bioprocessing Operations	
BSE 472	Sediment and Bio-Nutrient Engineering and Management	
BSE 473	Irrigation and Drainage Systems Design	
BSE/M E 475	Engineering Principles of Agricultural Machinery	
BSE/M E 476	Engineering Principles of Off-Road Vehicles	
BSE 571	Small Watershed Engineering	
BSE/FOOD SCI 642	Food and Pharmaceutical Separations	
Select a minimum of 9 credits of 300 level or above non-BSE engineering courses		9
Total Credits		27-31

¹ Take BSE 249 and M E 361 and M E 364, or take CBE 250 and CBE 310 and CBE/B M E 320.

FOOD & BIOPROCESS ENGINEERING SPECIALIZATION

This is a named option that will appear on the student's transcript upon completion.

Code	Title	Credits

TECHNICAL ELECTIVES

Select courses from one or more of the following four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43. See the BSE Undergraduate Student Handbook for a list of recommended technical electives for various areas of specialization.

A. INTRODUCTION TO ENGINEERING COURSES (FRESHMEN ONLY)

Code	Title	Credits
INTEREGR 101	Contemporary Issues in the Engineering Profession	2
INTEREGR 102	Introduction to Society's Engineering Grand Challenges	2
INTEREGR 111	Introduction to the Engineering Design Process and Profession	2
INTEREGR 160	Introduction to Engineering Design	3

B. INDEPENDENT STUDY/INSTRUCTION COURSES

CALS or CoE courses with a 001, 299, 399, or 699 course number. No more than 3 credits of coursework in this category can be used to meet technical elective requirements.

C. UPPER-LEVEL COURSES

Part 1. Upper-Level Engineering Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Any Engineering course numbered 300 or above		

E M A 202	Dynamics	3
or M E 240	Dynamics	

Part 2. Upper-Level Science Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Advanced biological, natural, and physical science courses (i.e., courses with a B, N, or P designation)		
CHEM 341	Elementary Organic Chemistry	3
CHEM 342	Elementary Organic Chemistry Laboratory	1
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
CHEM/M S & E 421	Polymeric Materials	3
AGRONOMY/ATM OCN/SOIL SCI 532	Environmental Biophysics	3

D. LOWER-LEVEL SCIENCE AND ENGINEERING COURSES, BREADTH COURSES

Elementary and intermediate biological, natural and physical science courses except elementary and intermediate math courses; College of Engineering courses with a 100 or 200 level designation; College of Agricultural and Life Sciences courses, Institute of Environmental Studies courses, and/or School of Business courses. Independent study/instruction courses cannot be counted in this category. No more than 12 credits of coursework in this category can be used to meet technical elective requirements.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- The ability to analyze systems, components and processes. This includes:
 - the ability to apply knowledge of mathematics, science, and engineering fundamentals.
 - the ability to use the techniques and tools of modern engineering practice.
 - the ability to identify, formulate, and solve engineering problems.
- The ability to create a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- The ability to formulate and conduct basic investigations such as laboratory experiments, prototype tests, field trials, computer simulations and market analyses.
- The ability to identify important resources, and to retrieve, interpret, analyze and critique information for use in solving engineering problems and conducting basic investigations.
- The ability to communicate effectively. This includes:
 - the ability to effectively orally communicate.
 - the ability to write in a clear, concise, grammatically correct and organized manner.
 - the ability to document work activities and properly archive information.
 - the ability to develop appropriate illustrations including hand sketches, computer generated drawings/graphs and pictures.
- An understanding of professional and ethical responsibility.
- The ability to function on multidisciplinary teams.
- The broad education necessary to understand and assess the impact of engineering solutions in a global, economic, environmental, and societal context.
- Recognition of the need, and the ability to engage in lifelong learning.
- Knowledge of contemporary issues.

- Need 125 credits to complete degree.

ADVISING AND CAREERS

Students are assigned a faculty advisor when they declare the major or become pre-biological systems engineering. Prospective students should contact the department at bse@wisc.edu or 608-262-3310 for more information.

Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs involving the design, construction and management of: bio-energy production facilities, greenhouses, food processing plants, soil management systems and erosion control structures, irrigation and drainage systems, wastewater and solid waste treatment/recycling operations, animal housing facilities, aquaculture enterprises, systems for improved air quality, and equipment for agricultural production, material handling, processing, and packaging. Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need for food, fiber and renewable energy, (2) the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Sociologists study human social behavior and how societies are organized. The Department of Community and Environmental Sociology's

focus is on the relationship between people and their natural environment and with the communities in which people live, work, and play.

A major in community and environmental sociology is good preparation for jobs that involve an understanding of social issues, require knowledge of the functioning and organization of communities and the relationship between people and the natural environment, and involve data collection or data analysis. Community and environmental sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in community and environmental sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

The Department of Community and Environmental Sociology offers a wide range of courses for both beginning and advanced students. The department's introductory course, C&E SOC/SOC 140 Introduction to Community and Environmental Sociology, is designed to explore the changing nature of rural development in the global economy. In addition, a set of 200-level courses offers students an introduction to sociological concepts through the exploration of particular subject areas such as gender and work, food, the environment, and population change.

UW–Madison community and environmental sociologists teach about a wide range of issues that are of critical importance to people and communities from Wisconsin to the low-income countries of the developing world. For example, students can study such matters as the growing controversies around energy, the implementation of environmental laws, sustainability, and the special problems and unique concerns of people in resource-dependent communities. Students can also focus on issues such as the effect of new agricultural technologies on family farms, the ways gender and race affect educational and occupational opportunities, and how community leaders and citizens address problems such as urban sprawl or rural poverty. In addition, students can examine issues such as population growth, the causes of world hunger, tropical rainforest destruction, and the prospects for achieving sustainable development in poor countries.

Many community and environmental sociology students build on their major by selecting one of the certificate programs available from the College of Agricultural and Life Sciences or from other UW–Madison schools or colleges. Certificate programs enable students to expand their skills and study particular topics or issues in more depth. Community and environmental sociology majors often choose certificate programs in the concentration in analysis and research, gender and women's studies, criminology, and environmental studies. Many students choose to pursue a double major, combining C&E sociology with fields such as Spanish, environmental studies, nutritional sciences, agronomy, forest science, wildlife ecology, or environmental science.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY, B.S.

Sociologists study human social behavior and how societies are organized. The Department of Community and Environmental Sociology's focus is on the relationship between people and their natural environment and with the communities in which people live, work, and play.

A major in community and environmental sociology is good preparation for jobs that involve an understanding of social issues, require knowledge of the functioning and organization of communities and the relationship between people and the natural environment, and involve data collection or data analysis. Community and environmental sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in community and environmental sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

The Department of Community and Environmental Sociology offers a wide range of courses for both beginning and advanced students. The department's introductory course, C&E SOC/SOC 140 Introduction to Community and Environmental Sociology, is designed to explore the changing nature of rural development in the global economy. In addition, a set of 200-level courses offers students an introduction to sociological concepts through the exploration of particular subject areas such as gender and work, food, the environment, and population change.

UW–Madison community and environmental sociologists teach about a wide range of issues that are of critical importance to people and communities from Wisconsin to the low-income countries of the developing world. For example, students can study such matters as the growing controversies around energy, the implementation of environmental laws, sustainability, and the special problems and unique concerns of people in resource-dependent communities. Students can also focus on issues such as the effect of new agricultural technologies on family farms, the ways gender and race affect educational and occupational opportunities, and how community leaders and citizens address problems such as urban sprawl or rural poverty. In addition, students can examine issues such as population growth, the causes of world hunger, tropical rainforest destruction, and the prospects for achieving sustainable development in poor countries.

Many community and environmental sociology students build on their major by selecting one of the certificate programs available from the

College of Agricultural and Life Sciences or from other UW–Madison schools or colleges. Certificate programs enable students to expand their skills and study particular topics or issues in more depth. Community and environmental sociology majors often choose certificate programs in the concentration in analysis and research, gender and women's studies, criminology, and environmental studies. Many students choose to pursue a double major, combining C&E sociology with fields such as Spanish, Environmental Studies, Nutritional Sciences, Agronomy, Forest Science, Wildlife Ecology, or Environmental Science.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see Entering the College (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and

other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5

CREDIT REQUIREMENT

Must complete a total of 30 credits of C&E Soc courses. Students may count up to 4 credits of Independent Study (C&E SOC 299 Independent Study, C&E SOC 699 Special Problems), Internship (C&E SOC 399 Coordinative Internship/Cooperative Education), or Thesis (C&E SOC 681 Senior Honors Thesis/C&E SOC 682 Senior Honors Thesis/C&E SOC 691 Senior Thesis/C&E SOC 692 Senior Thesis) here. SOC/C&E SOC 475 Classical Sociological Theory may count here.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand how social science arguments are constructed and evaluated.
2. Develop ability to assess data quality and understand whether particular data is appropriate to answer specific questions.
3. Learn general theories on basic social processes, especially those related to the relationships between society and the environment and the social organization of communities.
4. Learn communication skills in the social sciences.

¹ Electives should be chosen in order to satisfy UW and CALS requirements. See Requirements tab for details.

² C&E SOC electives include the Community course set and the Environmental course set. See Requirements tab for details.

The above plan assumes that a student enters with standard high school preparation (algebra, geometry, third-year math, two years' foreign language).

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students are welcome to contact Professors Leann Tigges (lmtigges@wisc.edu) or Gary Green (gpgreen@wisc.edu) for more information.

Community and environmental sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in community and environmental sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

DAIRY SCIENCE

Undergraduates in dairy science prepare for a variety of career opportunities that require a strong background in applied animal biology. Careers include: agribusiness, dairy farm management, technical service and consulting, research, and teaching. Students also enroll in the department to prepare for veterinary school, medical school, or graduate school. Coursework in the major includes animal genetics, lactation,

reproduction, nutrition and management. The department may be consulted for additional details and for specific career information.

The dairy science major can be earned under the bachelor of science degree program. The dairy science major may be combined with other majors such as agricultural and applied economics, biological systems engineering, genetics, life sciences communication, and agronomy. Multiple out-of-classroom learning opportunities are included in the curriculum and internships on farms or with agribusiness are required to provide the practical training needed for success in any 21st-century careers. Many students gain valuable experience through part-time employment in research labs or in the student-operated dairy cattle instruction and research center.

Discoveries from the research laboratories reach the classroom long before they appear in textbooks. Students benefit from integration of the instructional and research programs of the department. The co-curricular Badger Dairy Club (<http://badgerdairyclub.com>) involves students in dairy industry events that provide leadership and networking opportunities in a vibrant industry.

DAIRY SCIENCE, B.S.

Undergraduates in dairy science prepare for a variety of career opportunities that require a strong background in applied animal biology. Careers include: agribusiness, dairy farm management, technical service and consulting, research, and teaching. Students also enroll in the department to prepare for veterinary school, medical school, or graduate school. Coursework in the major includes animal genetics, lactation, reproduction, nutrition and management. The department may be consulted for additional details and for specific career information.

The dairy science major can be earned under the bachelor of science degree program. The dairy science major may be combined with other majors such as agricultural and applied economics, biological systems engineering, genetics, life sciences communication, and agronomy. Multiple out-of-classroom learning opportunities are included in the curriculum and internships on farms or with agribusiness are required to provide the practical training needed for success in any 21st-century careers. Many students gain valuable experience through part-time

employment in research labs or in the student-operated dairy cattle instruction and research center.

Discoveries from the research laboratories reach the classroom long before they appear in textbooks. Students benefit from integration of the instructional and research programs of the department. The co-curricular Badger Dairy Club (<http://badgerdairyclub.com>) involves students in dairy industry events that provide leadership and networking opportunities in a vibrant industry.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and

other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. To gain knowledge of current and emerging research based information in animal biology and management sciences to support dairy production.

The first learning outcome relates to the biological structure and function of the (ruminant) dairy cow and its particular aspects compared with other food-producing animals. Students are expected to become proficient in the fundamental and applied aspects of reproduction, genetic selection, milk secretion, and nutrition, as well as management practices that enhance the health and welfare of dairy cattle. In addition, students are expected to gain an understanding of the farm-level economic, environmental and social challenges facing dairy producers. Finally, students are expected to appreciate the place that dairy production and animal agriculture hold in state, regional, national and global food production and its contribution to nutritional needs and health of a growing population.

2. To gain intellectual, practical and attitudinal skills needed to identify and solve problems and challenges facing dairy producers and allied industries.

The second learning outcome relates to students' gain in intellectual and practical skills as well as personal attitude. We expect our students to practice and refine their soft skills. Soft skills are personal attributes that enable someone to interact effectively with other people including but not limited to strong work ethic, positive attitude, good communication skills, time management abilities, problem-solving skills, acting as a team player, self confidence, ability to accept and learn from criticism, flexibility/adaptability, and working well under pressure.

3. To gain in life-long learning skills to enable graduates to adapt to changing technological, economic and social circumstances throughout their professional career.

The third learning outcome relates to enabling students' leadership skills, continued growth and success in their professional career in a way that contribute also to the success of the dairy industry in Wisconsin, the nation and globally.

ENTOMOLOGY

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species—with estimates ranging as widely as from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans—sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant

reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology under the bachelor of science degree program.

Students interested in graduate work should consult the Graduate School Catalog (<http://guide.wisc.edu/graduate>).

See the department website (<http://www.entomology.wisc.edu>) for current course rotation information.

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology.
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.
4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

Total Credits 24-32

Junior

Summer	Credits
ENTOM 468 (Capstone, even #'d summers)	3
3	

Total Credits 3

Senior

Fall	Credits Spring	Credits
Biological or Physical Elective Course	3 Biological or Physical Elective	6
Breadth Course(s) in Core	3-6 Breadth Course in Core	3
Electives (to reach ~15 credits)	6-9 Electives	6
12-18		15

Total Credits 27-33

- ¹ When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)
- For additional Biological or Physical Science courses students may want to choose from the following depending on interest
- * Health/graduate school: CHEM 343/CHEM 344/CHEM 345, PHYSICS 104 or PHYSICS 207, GENETICS 466, MICROBIO 303/MICROBIO 304, BIOCHEM 501
 - * Ecology: F&W ECOL/ENVIR ST/ZOOLOGY 360, BOTANY/F&W ECOL/ZOOLOGY 460 General Ecology, F&W ECOL 550 Forest Ecology, ZOOLOGY/ANTHRO/BOTANY 410, BOTANY 400 or BOTANY 401
 - * Agriculture: PL PATH 300, AGRONOMY 300, SOIL SCI 301
- Students may reduce the number of required courses via:
- Testing out of Comm-A
 - Using ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology to satisfy Comm-B
 - Testing out of Quantitative Reasoning, Part A
 - Earning AP/IB credits
 - Using ENTOM/ZOOLOGY 371 Medical Entomology for International Course

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN ENTOMOLOGY

Undergraduate students are assigned to two advisors, the Entomology undergraduate faculty advisor Dr. Dan Young (<http://labs.russell.wisc.edu/ento/people/faculty/young>) and Sara Rodock (rodock@wisc.edu (p. 131); appointment scheduling link (<http://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)). However, since the vast majority of entomology B.S. students do independent research during their undergraduate career, it is

important to meet with other entomology faculty members (<http://labs.russell.wisc.edu/ento/people/faculty>) to learn about all of the research possibilities.

Undergraduates in entomology are strongly urged to meet with their advisor before they enroll for the upcoming term.

For more information about the entomology B.S. or the department in general, please contact Dr. Dan Young or the Student Services Coordinator, Sara Rodock (rodock@wisc.edu or 608-262-9926).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to entomology students, please visit our Internship & Job Resources (<http://labs.russell.wisc.edu/ento/graduate-study/internships-and-job-resources>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to entomology B.S. students, please visit the CALS “Building Your Career” (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development>) page. Students in the major are welcome to make an individual appointment with Sara Rodock (rodock@wisc.edu; appointment link for current UW–Madison students (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)) to discuss a number of career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

While entomology clearly is “big science,” our department prides itself on a “small campus” feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning

experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

Very nearly all our majors have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates 1–3 credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

Many of our undergraduate majors are also involved in service learning and teaching through our departmental “Insect Ambassadors” (<http://labs.russell.wisc.edu/insectambassadors>) outreach program to K/12, various clubs, and organizations. We are committed (<http://labs.russell.wisc.edu/ento/outreach>) to the UW System goal to provide Wisconsin’s citizens with opportunities to benefit from, and contribute to, the state’s growing “knowledge economy” through the land-grant university three-fold mission of teaching, research and public service. We also have an active Undergraduate Entomology Society for majors—or any UW–Madison students interested in entomology. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (<http://labs.russell.wisc.edu/wirc>) as well as possible participation in WIRC sponsored collecting expeditions in Wisconsin and around the United States.

FOOD SCIENCE

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin–Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a truly unique undergraduate and graduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science’s undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; varied club and extracurricular activities; research lab opportunities; access to a fully functional and award winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships, and nearly 100% job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

NUTR SCI/A A E/AGRONOMY/INTER-AG 350 World Hunger and Malnutrition is recommended to fulfill the CALS International Studies requirement.

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.		
Select one of the following:		5
MATH 217	Calculus with Algebra and Trigonometry II ¹	
MATH 221	Calculus and Analytic Geometry 1	
Select one of the following:		3
STAT 224	Introductory Statistics for Engineers	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Physics		
Select one of the following:		4-5
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Biology		
Select one of the following (see below):		16-18
Biochem/Botany/Microbio/Zoology (Path 1)		
Biocore (Path 2)		
Foundation		
<i>Econ or Ag & Applied Econ</i>		
Select one of the following:		3
A A E 215	Introduction to Agricultural and Applied Economics	
A A E 323	Cooperatives	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
Nutritional Science		
NUTR SCI/ BIOCHEM 510	Biochemical Principles of Human and Animal Nutrition	3
or NUTR SCI 332	Human Nutritional Needs	
Core		
FOOD SCI 301	Introduction to the Science and Technology of Food	3
AN SCI/FOOD SCI 321	Food Laws and Regulations	1

FOOD SCI/MICROBIO 324	Food Microbiology Laboratory	2
FOOD SCI/MICROBIO 325	Food Microbiology	3
FOOD SCI 410	Food Chemistry	3
FOOD SCI 412	Food Analysis	4
FOOD SCI 432	Principles of Food Preservation	3
FOOD SCI 440	Principles of Food Engineering	3
FOOD SCI 514	Integrated Food Functionality	4
FOOD SCI 532	Integrated Food Manufacturing	4
<i>Integrated Food Product Elective</i>		
Select one of the following (2 credits minimum):		2
FOOD SCI 511	Chemistry and Technology of Dairy Products	
FOOD SCI/ AN SCI 515	Commercial Meat Processing	
FOOD SCI 535	Confectionery Science and Technology	
FOOD SCI 550 & FOOD SCI 551	Fermented Foods and Beverages and Food Fermentation Laboratory ²	
<i>Science Elective</i>		
Any 400-level or above course with Physical Science designation		3
Capstone		
FOOD SCI 602	Senior Project	2
FOOD SCI 603	Senior Seminar	1
Total Credits		85-92

¹ MATH 217 Calculus with Algebra and Trigonometry II requires MATH 171 Calculus with Algebra and Trigonometry I as a prerequisite.

² Both FOOD SCI 550 and either FOOD SCI 551 or FOOD SCI 375 The Science of Wine must be taken.

BIOLOGY PATHS

BIOCHEM/BOTANY/MICROBIO/ZOOLOGY (PATH 1)

Code	Title	Credits
BIOLOGY/BOTANY/ZOOLOGY 151	Introductory Biology	5
Select one of the following:		3-5
Any 400-level or above course with Biological Science designation		
BIOLOGY/BOTANY/ZOOLOGY 152	Introductory Biology	
MICROBIO 101	General Microbiology	3
or MICROBIO 303	Biology of Microorganisms	
MICROBIO 102	General Microbiology Laboratory	2
or MICROBIO 304	Biology of Microorganisms Laboratory	
BIOCHEM 501	Introduction to Biochemistry	3
Total Credits		16-18

BIOCORE (PATH 2)

Code	Title	Credits
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Organismal Biology	3
BIOCORE 587	Biological Interactions	3
Select two of the following:		4
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Organismal Biology Laboratory	
Total Credits		16

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take FOOD SCI 681 Senior Honors Thesis and FOOD SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Graduates recognize the necessity of continued learning. Graduates will:
 - Understand that information, knowledge, and technology are always evolving.
 - Develop a sense of what they know and don't know (as individuals).
 - Be receptive to change in technical and professional settings.
- Graduates are effective communicators. Graduates will:
 - Write clear and concise technical reports and research articles.
 - Read for content and quality of literature in the field.
- Graduates have basic employability skills. Graduates will:
 - Understand the importance of responsibility, dependability, punctuality, appropriate behavior, and effort in the work place.
 - Demonstrate the ability to work independently, as well as the ability to work cooperatively in teams.
 - Recognize changes as part of growth.
 - Recognize, accept, and respect ethnic and cultural diversity and individual difference.
 - Commit to the highest standards of professional integrity and ethical value.
- Graduate have strong quantitative problem solving and critical thinking skills. Graduates will:
 - Develop ability to deftly apply the scientific method to food science problems: (1) scientific curiosity and observation to detect a problems; (2) define the problem statement; (3) search, explore, and gather evidence; (4) design and implement an experiment to challenge the hypothesis; (7) observe and analyze the results; and (8) reach a conclusion pertinent to the problem statement.
 - Develop ability to apply quantitative reasoning skills to food science data: (1) recognize and construct a mathematical model that represents quantitative information; (2) analyze and manipulate these models; draw conclusions, predictions, or inferences on the basis of the analysis; and (4) assess the reasonableness of these conclusions.
 - Develop ability to rigorously apply principles from general chemistry, physics, statistics, and mathematics to food science problems.
 - Be comfortable with ambiguity in scientific and technical fields.
 - Develop ability to critically examine technical literature and apply it in the workplace.
- Graduates are competent in the key aspects of the multidisciplinary nature of food science.
 - Goals of the program are to have graduates that are competent in the following areas:
 - Understand the physical, chemical and biological reactions that are important in maintaining food quality and safety, and how to evaluate these changes (analysis).
 - Understand the physical, chemical and biological processes involved in conversion of raw materials into finished food products and how to evaluate those changes.
 - Understand the relationship between food and health/wellness.
 - Knowledge in the laws and regulations which govern our food supply.
 - Graduate should be competent in the following core knowledge areas:
 - Food chemistry and analysis:
 - understand reactions in foods and its components.
 - compositions of key foods/products.

- knowledge of analysis methods.
- ii Food safety and microbiology:
 - knowledge of food pathogens.
 - microbiological aspects to making safe foods.
 - food preservation methods.
- iii Food processing and engineering:
 - processing and engineering principles related to foods and their manufacture/design.
- iv Food nutrition and health:
 - understand the relationships between foods and health/wellness.
- v Applied food science:
 - integration of disciplines in relation to food problems or processes.
 - knowledge of relevant laws and regulations for the food industry.
 - current issues/trends in the food industry.
- vi Technical and analytical skills:
 - able to apply food science and other disciplines to understand real world food industry problems.
 - to be able to critically evaluate reports/information relating to food quantitative (mathematical and statistical) analytical skills.

In addition to these departmental program learning outcomes, IFT requires documentation of how students meet a standardized set of Core Competencies.

¹ Students taking CHEM 109 do not take CHEM 104.

² MATH 221 will satisfy the Quantitative Reasoning B requirement.

³ Electives can be found on the Requirements tab.

⁴ Students must select at least one course from FOOD SCI 511 Chemistry and Technology of Dairy Products (spring semester), FOOD SCI/AN SCI 515 Commercial Meat Processing (fall semester), FOOD SCI 535 Confectionery Science and Technology (fall semester), or FOOD SCI 550 Fermented Foods and Beverages (spring semester) and either FOOD SCI 551 Food Fermentation Laboratory (spring semester) or FOOD SCI 375 Special Topics (fall semester).

⁵ Students must complete two science elective courses: (1) at least 3 credits of any 400-level or above biological science course or BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology (2) at least 3 credits of any 400-level or above physical science course.

⁶ Combination of FOOD SCI 602 Senior Project and FOOD SCI 603 Senior Seminar satisfy Comm B requirement.

Note: Students must complete a minimum of 120 credits. This may require taking 16 credits per semester for at least four semesters.

ADVISING AND CAREERS

Students are assigned a faculty or staff advisor once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience; and navigating internship and scholarship opportunities. Declared food science majors must meet with their assigned advisor prior to registration. Additional information can be found on the department's website (<https://foodsci.wisc.edu/advising.php>).

Prospective food science majors should contact the Department of Food Science at foodsci@wisc.edu or 608-262-3046 for more information.

SCIENCE OF FERMENTED FOOD AND BEVERAGES, CERTIFICATE

The purpose of this certificate program is to provide undergraduates at UW–Madison with an opportunity to gain unique knowledge and skill sets specific to the fermented food and beverage industries. Students that successfully complete this program will graduate with a competitive edge and leadership potential specific to career opportunities in this unique and growing field.

HOW TO GET IN

This certificate is open to all degree-seeking undergraduate students. Students must be over the age of 21 by the time they take the lab requirements (FOOD SCI 551). For more information, or to declare the certificate, contact Monica Theis (mltheis@wisc.edu (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/food-science/science-fermented-food-beverages-certificate/email:mltheis@wisc.edu>)). Students are strongly encouraged to declare the certificate early in their academic career to ensure timely completion of certificate requirements.

REQUIREMENTS

Code	Title	Credits
FOOD SCI 410	Food Chemistry	3
FOOD SCI 550	Fermented Foods and Beverages	2
FOOD SCI 551	Food Fermentation Laboratory	1

MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	2
MICROBIO 526	Physiology of Microorganisms	3

MARKETNG 300	Marketing Management	3
Total Credits		17

LEARNING OUTCOMES

1. Identify and describe how microbial and chemical features of ingredients and raw materials influence the quality and functionality of fermented foods and beverages.
2. Explain the compositional features of ingredients and raw materials specific to various fermented foods and beverages.
3. Identify and describe the operational units and transformational processes unique to the production of fermented foods and beverages.
4. Design and produce fermented foods and/or beverages that meet specified standards for styles or varieties.
5. Measure and interpret analytics to assess quality and correct defects.
6. Describe the concept of branding and its impact on marketing fermented foods and beverages.

FOREST AND WILDLIFE ECOLOGY

The Department of Forest and Wildlife Ecology provides science-based teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the rich traditions of Aldo Leopold (the Department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors—forest science and wildlife ecology—that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation for graduate training in forestry, wildlife, ecology, and related fields. The forest science program is accredited by the Society of American Foresters. The wildlife ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the M.S. and Ph.D. levels. See the Graduate Guide (<http://guide.wisc.edu/graduate>) for additional information.

FOREST SCIENCE, B.S.

Forest ecosystems cover one third of the world's land area and nearly half of Wisconsin. They provide a range of benefits to society including wood and fiber, wildlife habitat, biological diversity, clean water, carbon storage, recreation, beauty, and cultural values. The Department of Forest and Wildlife Ecology trains foresters to sustainably manage forests toward sustainable ecological, social, and economic outcomes. Forest science students also learn how to respond to forest disturbances from insects, diseases, fire, and other changes. Beyond a core of basic science and forestry coursework, students have flexibility to customize their learning experience within one of three tracks: forest conservation, forests and the environment, and forest management. All three tracks meet accreditation standards of the Society of American Foresters, a key credential that employers seek. Students are also well positioned to pursue graduate training in forestry, ecology, remote-sensing, natural resource policy, and related fields.

Students learn through a mix of classroom, laboratory, and field instruction that emphasizes independent thinking and problem-solving. Students make frequent visits to forests to develop and hone their skills, essential for future job opportunities. Students also engage professional and student-led trainings and networking that further build skills. Graduates go on to jobs in private, public, and non-governmental sectors or pursue graduate degrees.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College

of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

Code	Title	Credits
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
Select one of the following:		3
STAT 224	Introductory Statistics for Engineers	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	
Chemistry		
Select one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended introduction to biology sequence):		

BOTANY/ BIOLOGY 130 & ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory
--	---

Option 2:

BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology
--	--

Option 3:

BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory
--	---

Economics

A A E 215	Introduction to Agricultural and Applied Economics ¹	3-4
or ECON 101	Principles of Microeconomics	

Conservation

Select one of the following:² 2-4

ENVIR ST/ LAND ARC 361	Wetlands Ecology	
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species (recommended) ³	
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	
F&W ECOL/ BOTANY/ ENVIR ST/ ZOOLOGY 651	Conservation Biology (recommended)	
GEOG/ ENVIR ST 339	Environmental Conservation	

Core

Grade of C or better required in each core course		
SOIL SCI 301	General Soil Science	4
F&W ECOL 300	Forest Biometry	4
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	3-4
or F&W ECOL/ ENVIR ST/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing	
F&W ECOL/ HORT/LAND ARC/ PL PATH 309	Diseases of Trees and Shrubs	3
F&W ECOL 399	Coordinative Internship/Cooperative Education	1-8
BOTANY/F&W ECOL 402	Dendrology	2

F&W ECOL 410 & F&W ECOL 411	Principles of Silviculture and Practices of Silviculture	4
F&W ECOL 415	Tree Physiology	3
F&W ECOL/ ENTOM 500	Insects in Forest Ecosystem Function and Management	2
F&W ECOL 501	Forest Fire Behavior and Management	1
ENVIR ST/F&W ECOL 515	Natural Resources Policy	3
F&W ECOL 550 & F&W ECOL 551	Forest Ecology and Forest Ecology Lab	4
A A E/ENVIR ST/F&W ECOL 652	Decision Methods for Natural Resource Managers	4
F&W ECOL 658	Forest Resources Practicum	3
Electives		
Select one of the following tracks:		12
Forest Management Track		
Forest Conservation Track		
Forests & Environment Track		
Capstone		
Grade of C or better required in Capstone		
F&W ECOL 590	Integrated Resource Management	3
Total Credits		83-96

¹ A A E 215 only carries QR-B credit if taken fall 2011 or later.

² These courses may double count as track electives.

³ F&W ECOL/ENVIR ST/ZOOLOGY 360 Extinction of Species may also fulfill CALS International Studies requirement.

MINIMUM GRADE REQUIREMENT

Students who declare the major in fall 2012 or later will be required to receive a grade of C or higher on all of the Forest Science Core courses and the Capstone. Students who receive a grade of D or below will be required to retake the course for graduation.

TRACKS

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take F&W ECOL 681 Senior Honors Thesis and F&W ECOL 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist

(<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Competencies in Ecology:

1. Understanding of taxonomy and ability to identify forest and other tree species, their distribution, and associated vegetation and wildlife.
2. Understanding of soil properties and processes, hydrology, water quality, and watershed functions.
3. Understanding of ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
4. Ability to make ecosystem, forest, and stand assessments.
5. Understanding of tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.

Competencies in Forest Resources Measurement and Management:

1. Ability to identify and measure land areas and conduct spatial analysis.
2. Ability to design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
3. Ability to analyze inventory data and project future forest, stand, and tree conditions.
4. Ability to develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
5. Ability to analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.

6. Ability to develop management plans with specific multiple objectives and constraints.
7. Understanding of the valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human demands for timber-based and other consumable forest products into the availability of those products.
8. Understanding of the valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.
9. Understanding of the administration, ownership, and organization of forest management enterprises.

Competencies in Forest Resource Policy, Economics, and Administration:

1. Understanding of forest policy and the processes by which it is developed.
2. Understanding of how federal, state, and local laws and regulations govern the practice of forestry.
3. Ability to understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE FOREST SCIENCE FOUR-YEAR PLAN

Freshman

Fall	Credits Spring	Credits

Conservation Course (or spring)	2-4 Track Course	3
Track Course	3 Electives	6
Electives (to reach ~15 credits)	3	
	14-16	16
Total Credits 30-32		

¹ When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)

² BOTANY/BIOLOGY 130 + ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102 are strongly recommended to satisfy the introductory biology requirement for forest science, but students may use ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102.

³ F&W ECOL/ENVIR ST/G L E/GEOG/GEOSCI/LAND ARC 371 is available in fall semesters only.

⁴ Summer (following second or third year): F&W ECOL 658 (3 cr., even-numbered summers) and F&W ECOL 399 (1 cr.)—4 cr. total.

Students may reduce the number of required courses via: testing out of Comm-A; using ZOOLOGY/BIOLOGY/BOTANY 152 to satisfy Comm-B; testing out of Quantitative Reasoning, Part A; earning AP/IB credits; and/or using F&W ECOL/ENVIR ST/ZOOLOGY 360 to satisfy International Studies requirement.

ADVISING AND CAREERS**UNDERGRADUATE ADVISING IN FOREST SCIENCE**

All undergraduate students are assigned to an advisor when they declare the major. If you were not assigned an advisor, do not know who your advisor is, would like to talk to someone about switching advisors, or if your advisor is not available, please contact our Student Services Coordinator, Sara Rodock (rodock@wisc.edu, 608-262-9926 or appointment link for current UW–Madison students (<http://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)).

Undergraduates in Forest Science are required to meet with their advisor before they can enroll for the upcoming term. Please remember to bring a DARS report with you to any advising appointment. You can request a DARS through your student center in MyUW (<http://my.wisc.edu>). Although drop-ins and emergencies can be accommodated by someone in the department, the student is best served if they make an appointment with their assigned advisor.

For more information about the forest science B.S. or the department in general, please contact the student services coordinator, Sara Rodock (rodock@wisc.edu, 608-262-9926 or appointment link for current UW–Madison students (<http://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest science and wildlife ecology students, please visit our Internship & Job Resources (<http://fwe.wisc.edu/internship-job-resources>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to forest science B.S. students, please visit the CALS Career Services page (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices>).

The federal Bureau of Labor Statistics updated its Career Outlook: Careers in Forestry (<http://www.bls.gov/careeroutlook/2016/article/forestry-careers.htm>) page in August 2016 and it gives a great overview of the types of jobs related to forestry. This website is an excellent way to learn more about careers in forestry, upcoming trends, and related careers.

CERTIFICATION/LICENSURE

All tracks within the forest science major are accredited by the Society of American Foresters (<http://www.eforester.org>).

WILDLIFE ECOLOGY, B.S.

Wildlife ecologists apply science to manage and conserve wildlife populations and their habitats. The Department of Forest and Wildlife Ecology trains wildlife ecologists and managers to meet the complex needs of wildlife in a human-dominated world. Students receive training in species ecology, physiology and habitat management, techniques of monitoring species, and conservation, through a curriculum solidly grounded in the natural sciences. Beyond a core of basic science and wildlife coursework, students have flexibility to customize their learning experience within one of two tracks: natural sciences and natural resources. The natural sciences track includes coursework that will qualify a student for certification as a wildlife biologist by The Wildlife Society.

Students learn through a mix of classroom, laboratory, and field instruction that emphasize independent thinking and problem-solving. Students make frequent visits to the field to develop and hone their skills, essential for future jobs or graduate work. There is intense competition for career openings in the wildlife field. Most opportunities are with state and federal agencies, but options also exist with private conservation groups and educational institutions. To be most competitive for limited job opportunities, students should pursue a master's degree. The Graduate Guide (<http://guide.wisc.edu/graduate>) describes the department's graduate programs.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they

have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	

Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

First Year Seminar (p. 40) 1

International Studies (p. 40) 3

Physical Science Fundamentals 4-5

CHEM 103 General Chemistry I
or CHEM 108 Chemistry in Our World
or CHEM 109 Advanced General Chemistry

Biological Science 5

Additional Science (Biological, Physical, or Natural) 3

Science Breadth (Biological, Physical, Natural, or Social) 3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain basic principles in biological sciences and major concepts in wildlife ecology including, population ecology, organismal biology, plant ecology/taxonomy, and genetics/evolution.
2. Explain and discuss principles of wildlife management including natural resource legislation, policy, and applications.
3. Explain and apply the scientific methods including designing and conducting experiments and testing hypotheses.
4. Explain and demonstrate techniques for collection of data in laboratory and field settings, keep accurate records, and analyze data to address hypotheses.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form. Provide opportunity to develop these communication skills.

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN WILDLIFE ECOLOGY

All undergraduate students are assigned to an advisor when they declare the major. If you were not assigned an advisor, do not know who your advisor is, would like to talk to someone about switching advisors, or if your advisor is not available, please contact our Student Services Coordinator, Sara Rodock (rodock@wisc.edu, 608-262-9926 or appointment link for current UW–Madison students (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)).

Undergraduates in wildlife ecology are required to meet with their advisor before they can enroll for the upcoming term. Please remember to bring a DARS report with you to any advising appointment. You can request a DARS through your student center in MyUW (<http://my.wisc.edu>). Although drop-ins and emergencies can be accommodated by someone in the department, the student is best served if they make an appointment with their assigned advisor.

For more information about the Wildlife Ecology BS or the department in general, please contact the Student Services Coordinator, Sara Rodock (rodock@wisc.edu, 608-262-9926 or appointment link for current UW–Madison students (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest and wildlife ecology students please visit our Internship & Job Resources (<http://fwe.wisc.edu/internship-job-resources>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to Forest & Wildlife Ecology students, please visit the CALS "Building Your Career" (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development>) page. Students in the major are welcome to make an individual appointment with Sara Rodock (rodock@wisc.edu) (appointment link for current UW–Madison students (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>))) to discuss a number of career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

GENETICS

This department offers an undergraduate major under the bachelor of science degree program. The basic requirements of this curriculum include: two years of chemistry, one year of physics, one year of general biology and one of general genetics or two years of Biocore, one semester of calculus, and biostatistics. The major requirements include: introductory biochemistry, laboratory experience, and 12 credits of genetics and genetics-related courses chosen from an approved list.

Genetics is a bachelor's program for students seeking a broad knowledge of heredity in relation to human, animal, and plant breeding, and for students preparing for teaching and research in genetics. A B.S. degree with a major in genetics prepares students for many jobs in the growing biotechnology industry. Some of these jobs are in research and technical support, technical writing, quality control, assay development, and sales or marketing.

Many graduates continue their education by pursuing an advanced degree. Genetics students are competitive for admission to medical schools, veterinary schools, and graduate schools throughout the country. Graduate students may elect a Ph.D. program to prepare for careers in research, academia, and industry. Others may elect an M.S. program for a career in genetic counseling.

Because of the diversity and quantity of research activity on the Madison campus, the discipline of genetics provides an extraordinary number and range of opportunities for undergraduate majors to gain experience in research, a virtual prerequisite for admission to the top graduate programs in the biological sciences and for entry level positions in the biotechnology industry.

GENETICS, B.S.

Genetics is a bachelor's program for students seeking a broad knowledge of heredity in relation to human, animal, and plant breeding, and for students preparing for teaching and research in genetics. A B.S. degree with a major in genetics prepares students for many jobs in the growing biotechnology industry. Some of these jobs are in research and technical support, technical writing, quality control, assay development, and sales or marketing.

Many graduates continue their education by pursuing an advanced degree. Genetics students are competitive for admission to medical schools, veterinary schools, and graduate schools throughout the country. Graduate students may elect a Ph.D. program to prepare for careers in research, academia, and industry. Others may elect an M.S. program for a career in genetic counseling.

Because of the diversity and quantity of research activity on the Madison campus, the discipline of genetics provides an extraordinary number and range of opportunities for undergraduate majors to gain experience in research, a virtual prerequisite for admission to the top graduate programs in the biological sciences and for entry level positions in the biotechnology industry.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	

Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

First Year Seminar (p. 40)	1
International Studies (p. 40)	3
Physical Science Fundamentals	4-5
CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
Biological Science	5
Additional Science (Biological, Physical, or Natural)	3
Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)	

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
STAT 371	Introductory Applied Statistics for the Life Sciences	3
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Physics		
Select one of the following:		10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics (recommended)	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	
Biology		
Select one of the following options:		10
Option 1:		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	
Option 2:		
BOTANY/ BIOLOGY 130	General Botany	

ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory
---	--

Option 3:

BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology
Select two of the following labs:	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory
BIOCORE 384	Cellular Biology Laboratory
BIOCORE 486	Organismal Biology Laboratory

Core Biology Requirements

Select one of the following options: 6

Option 1:

GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 (recommended)
-----------------------------	---

Option 2:¹

GENETICS 466	Principles of Genetics additional 3 credit subset 1 course (see course list below)
--------------	--

Option 3:²

BIOCORE 485	Organismal Biology
BIOCORE 587	Biological Interactions
BIOCHEM 501 or BIOCHEM 507	Introduction to Biochemistry ³ or General Biochemistry I
	3

Select 2 credits from the following: 2

GENETICS 545	Genetics Laboratory
GENETICS 299	Independent Study ⁴
GENETICS 699	Special Problems ⁴
GENETICS 681	Senior Honors Thesis
GENETICS 682	Senior Honors Thesis
GENETICS 399	Coordinative Internship/Cooperative Education

Electives

Select 12 credits with 6 credits minimum from subset 1 (see course list below) 12

Capstone

Select one of the following: 3-9

Option 1:

GENETICS 566	Advanced Genetics (offered in spring semester)
--------------	--

Option 2:

GENETICS 564	Genomics and Proteomics (offered in spring semester) ⁵
--------------	---

Option 3 (must be taken concurrently):⁵

GENETICS 699	Special Problems (offered in fall semester)
GENETICS 567	Companion Research Seminar (offered in fall semester)

Option 4 (must be taken concurrently):

GENETICS 681	Senior Honors Thesis
GENETICS 682	Senior Honors Thesis

GENETICS 567 Companion Research Seminar
(offered in fall semester)

Total Credits 67-82

- ¹ Subset 1 course will not count toward 12 subset credits.
² If the Biocore sequence was taken to fulfill the Biology requirement (BIOCORE 381 and BIOCORE 382 and BIOCORE 383 and BIOCORE 384), then BIOCORE 485 and BIOCORE 587 must be taken.
³ If BIOCHEM 507 is taken, it must be taken as a part of BIOCHEM 507 General Biochemistry I & BIOCHEM 508 General Biochemistry II, which counts in Subset 2 of electives.
⁴ Consult with your advisor if genetics-related research will be performed in a department other than Genetics.
⁵ May count for Subset 1 or Capstone.

A biological science course as approved by advisor (must have significant genetics component)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate an understanding of genetic principles at the level of molecules, cells, systems, organisms, populations and ecosystems.
2. Use quantitative approaches to evaluate experimental design, critically interpret, and analyze data sets from primary research papers.
3. Integrate genetic data and apply the scientific method to formulate research questions.
4. Communicate genetic concepts to multiple audiences with written, oral and visual presentations.
5. Understand mechanisms of segregation and expression of genetic material during development and homeostasis.
6. Apply primary genetic approaches used to study biological processes, including the use of model organisms.
7. Describe how environmental influences may modify the inheritance and expression of the genetic material.
8. Apply the use of quantitative methods to implement genetic analysis, including the linkage of gene variants with traits.
9. Appreciate how the fields of genomics, proteomics and other data-driven approaches facilitate research and clinical assessment.
10. Understand the contribution of genetics analysis to elucidating population history and evolution.
11. Address the connection between genetics and trends in clinical practice, such as personalized medicine, cloning and regenerative biology.
12. Understand evolutionary processes, with current variation in human traits as its natural outcome.
13. Appreciate the contributions of genetic methods to sustainability, including food production, bio-energy generation and the preservation of ecosystems and biodiversity.

17-18		14-15

Total Credits 31-33

¹ Physics could be taken in year 2 (consult your advisor)

² If in CALS Honors in Research

- 120 total credits required for bachelor's degree—aim for 15 credits per semester.
- Students who have not maintained a GPA of at least 2.5 by the end of their first two years, or transfer students by the end of their first year in residence, need to evaluate their major and career options with an advisor.
- Freshmen may elect to take INTER-AG 155 Issues in Agriculture, Environment, and Life Sciences, 1-credit freshman seminar course offered in the fall, and/or GENETICS 155 Freshman Seminar in Genetics, 1-credit freshman seminar course offered in the spring. INTER-AG 155 fulfills the first year seminar requirement. GENETICS 155 is an elective course.
- Study Abroad is an enriching experience. Check with your advisor on how you can fulfill your curriculum and study abroad.
- UGA (Undergraduate Genetics Association): check out the club's website: [facebook.com/groups/UGA.UWMadison](https://www.facebook.com/groups/UGA.UWMadison) (<https://www.facebook.com/groups/UGA.UWMadison>)

ADVISING AND CAREERS

UNDERGRADUATE ADVISORS

Reck, Martha; Tilmann, Kit; Vermillion Kalmon, Katie.

Current students may use scheduling assistant (<https://calendar.wisc.edu/scheduling-assistant>) to schedule an appointment with an undergraduate advisor.

CAREERS

The biotechnology industry has exploded within the last decade, providing many diverse career opportunities for our graduates. A strong background in genetics will prepare you for careers in research technical support, technical writing, quality control, assay development, technical services, and sales or marketing.

Many of our graduates continue their education by pursuing an advanced degree. Our students are competitive for admission to medical schools, veterinary schools, and graduate schools throughout the country. Students may elect a Ph.D. in genetics to prepare them for careers in research, academia, and industry. Others may elect an M.S. program for a career in genetics counseling.

HORTICULTURE

The Department of Horticulture at the University of Wisconsin–Madison is one of the four original departments of the College of Agricultural and Life Sciences and was founded in 1889. The department provides programs that are focused on fundamental studies of plant biology, crop production, and utilization of horticultural crops. It also seeks to provide educational opportunities for the pursuit of careers in horticulture, strengthen the competitive position of Wisconsin's horticulture industry, and increase the use of plants for environmental improvement and as a source of personal enrichment. The work of department faculty, staff, and students has made substantial impacts in the state and nation for over 125 years and continues to do so.

The department prides itself on cutting edge research focusing on horticultural plants, solving problems for our horticultural industry partners and farmers, helping students gain key experiences in research and outreach during their degree programs, and serving both the State of Wisconsin and the broader scientific community through the generation of new knowledge, techniques, and discoveries that can benefit society.

The department maintains a vibrant undergraduate major. Instruction is offered in all of the primary areas of horticulture and additional coursework is available in a number of subjects including molecular biology and bioinformatics. Approximately \$25,000 in scholarship funds are available annually to undergraduate students in the department each year. The department's graduate program offers both M.S. and Ph.D. degrees in a variety of specialties. Many graduate students advised by horticulture faculty also pursue graduate degrees in programs such as plant breeding and plant genetics, cell and molecular biology, and agroecology. The department has also recently created a new M.S. program that has an emphasis in organic and sustainable production. The department offers some unique international opportunities in Costa Rica and other Central American countries that focus on tropical horticulture.

The Department of Horticulture is home to a number of successful outreach programs that serve the citizens, public sector, and businesses of the State of Wisconsin. These include the Nutrient and Pest Management Program, the Integrated Pest and Crop Management Program, the Crop Diagnostic Training program, the IR-4 program, the Wisconsin Institute for Sustainable Agriculture, the Master Gardener Program, and the Allen Centennial Gardens. In addition to these activities, faculty and staff are active in field days, Extension programs, courses, seminars, and webinars, and author newsletters and other media that are distributed statewide.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS@UW-MADISON

UW-Madison offers an extensive scholarship program called Scholarships@UW (<https://scholarships.wisc.edu/Scholarships>). In order to be considered for scholarships, students must fill out the online application. The following is a list of scholarships available to horticulture majors.

BURDEAN STRUCKMEYER SCHOLARSHIP

A Madison area native who obtained her Ph.D. in botany-horticulture, Burdean Struckmeyer spent her entire career in the UW Department of Horticulture. Her research was vital to interpreting the nature of tree diseases including Dutch Elm and Oak Wilt. This scholarship is to honor her career and research in horticulture.

Awarded to CALS undergraduate students enrolled in horticulture with demonstrated financial need.

DAVID CURWEN STUDENT ENHANCEMENT SCHOLARSHIP

Dr. David Curwen joined the UW Department of Horticulture in 1963 after earning his Ph.D. at Penn State. Some of his many accomplishments while on campus include developing and delivering effective wind erosion control, improved irrigation management, and reducing the need for pesticides for potatoes and other vegetables. This scholarship is set up in recognition of his career.

Awarded to undergraduate students enrolled in the Department of Horticulture. Preference is given to students who demonstrate leadership ability and have good academic standing. A minimum GPA of 3.0 is required.

GAVIN & MARY WEIS RESEARCH SCHOLARSHIP

This CALS scholarship is provided in honor of Gavin and Mary Weis.

Awarded to CALS undergraduate students majoring in horticulture or other plant sciences. Students must demonstrate leadership in their field and have a minimum GPA of 3.5. The Department of Horticulture nominates students for this award.

HELEN MACDONALD AWARD (LAKE GENEVA GARDEN CLUB) SCHOLARSHIP

This CALS scholarship is provided in honor of Helen MacDonald.

Awarded to junior students with satisfactory academic performance in CALS with order of preference given in the following areas of study: (1) conservation, (2) horticulture, (3) landscape architecture. Minimum GPA of 2.75. Career interest preferred: natural resource management/conservation.

HERBERT J. HOPEN SCHOLARSHIP

This CALS scholarship is provided by Herbert J. Hopen.

Awarded to undergraduate students in CALS majoring in horticulture. This scholarship is awarded based upon high academic achievement.

RHO CHAPTER OF PI ALPHA XI SCHOLARSHIP

This CALS scholarship is provided by Rho Chapter of Pi Alpha Xi.

Awarded to junior or senior students majoring in horticulture and in good academic standing. Minimum GPA of 3.0.

SOUTHEAST WISCONSIN MASTER GARDENERS, INC. SCHOLARSHIP

This CALS scholarship is provided by SouthEast Wisconsin Master Gardeners, Inc.

Awarded to sophomores, juniors, seniors or graduate students in CALS. Minimum GPA of 2.0. Preference given to students from Milwaukee and Waukesha counties.

WISCONSIN AGRI-BUSINESS ASSOCIATION SCHOLARSHIP FUND

This CALS scholarship is provided by the Wisconsin Agri-Business Association (WABA).

Recipients of this award are juniors or seniors majoring in either soil science, plant pathology, agronomy, entomology, or horticulture. Recipients must demonstrate an interest in soil fertility and plant nutrition or pest management. Each student may receive this scholarship only once and must be a U.S. citizen. Consideration is given to scholastic ability, and leadership activities.

WES HANSCHER MEMORIAL SCHOLARSHIP

The Wes Hansche Memorial Scholarship is a memorial to Wesley Hansche who was a distinguished Wisconsin horticulturist.

Awarded to full-time undergraduate students in CALS in the Department of Horticulture. Recipients must be Wisconsin residents with consideration given to extracurricular activities and academic standing. A minimum GPA of 2.0 is required.

WILLIAM F. CONNELL MEMORIAL SCHOLARSHIP

After having discovered a new variety of apple in 1949, William Connell grew his meager orchard into a 13,000 tree orchard—and the home to his namesake, the Connell Red Apple. In addition to running the Connell's Orchard, Mr. Connell also served as president of the Wisconsin Horticultural Society. This scholarship for horticulture students was established as a memorial of his achievements by friends and family.

Awarded to undergraduates in the Department of Horticulture in the College of Agricultural and Life Sciences. The recipient must be a

Wisconsin resident and have satisfactory academic standing. Minimum GPA of 2.75.

WISCONSIN STATE CRANBERRY GROWERS ASSOCIATION SCHOLARSHIP

This CALS scholarship is provided by Wisconsin State Cranberry Growers Association.

Awarded to junior or senior students in CALS that are in good academic standing, with preference given to students who show an interest in the cranberry-growing industry. The recipients are nominated by the departments of Plant Pathology, Soil Sciences, Horticulture and Entomology. Minimum GPA of 2.0.

HORTICULTURE, B.S.

Horticulturists work to enrich our lives by integrating and applying plant science, environmental science, molecular biology, biotechnology, genetics, physiology, and management. Specifically, horticultural science deals with the development, production, growth, distribution, and use of fruits, vegetables, greenhouse crops, ornamentals, turf, and specialty plant crops (used for flavoring and medicine). Horticultural science is one of the most diverse biological sciences one can study at a university. Not only are the biology and genetics of crop plants interesting, but the application of this knowledge is equally important in a myriad of situations. Undergraduate horticulture majors will obtain specialized training in greenhouse/field management and the production and use of fruits, vegetables, nuts, herbaceous/woody ornamentals, and turfgrass through the bachelor of science degree program.

In addition to obtaining a job with an undergraduate degree in horticulture, the major provides an excellent background for graduate study in the field of plant sciences. Areas of graduate study include plant breeding and plant genetics, horticulture, agronomy, plant pathology, or other related fields such as biology, environmental science, natural resource management, agroecology, and genetics.

Students with either undergraduate or graduate degrees in horticulture have a variety of career opportunities. Recent studies show that there are more jobs in agriculture in the US than there are students graduating with agricultural Bachelor of Science degrees to fill them. Estimates in 2015 showed that there were 57,900 job openings in agriculture and related fields and only 35,400 students graduating annually in those areas. As our world grapples with the need to contribute science-based solutions to feeding 9 billion people by 2050, students trained in the agricultural and horticultural sciences will be called on to contribute.

Horticulture graduates may find opportunities in working on developing higher yielding crops or crops that can withstand more stressful growing conditions. Others may find opportunities working on improving qualities such as flavor, appearance, texture, and postharvest shelf life for a wide range of horticultural commodities from fruits to vegetables to flowers. Sustainable production is a particular area of growth where horticultural expertise can make a contribution. Students may wish to read a recent report from the United States Department of Agriculture and Purdue University (<https://www.purdue.edu/usda/employment/wp-content/uploads/2015/04/2-Page-USDA-Employ.pdf>) on the subject of employment opportunities in this area.

The horticulture degree serves as excellent preparation for careers in food production, plant nurseries, community supported agriculture (CSA), public gardens, landscaping, greenhouse production, teaching,

public parks, vegetable fields, golf courses, urban agriculture, extension and community based educational work, work in research labs, and the health sciences. In addition, many horticultural science majors go on to work in public sector jobs including city and state positions with the Department of Natural Resources, the Wisconsin Department of Agriculture, and University of Wisconsin Extension. Students with degrees in horticulture also work in hospitals (horticultural therapy), aerospace (food and recycling in space labs), and zoos (managing environments for animals and visitors). Although the career opportunities are numerous, horticulture students have a common desire to work intensively with plants to improve our environment and our health.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following:		3-5

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take HORT 289 Honors Independent Study, HORT 681 Senior Honors Thesis and HORT 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist for Horticulture (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information. The Department of Horticulture also works collaboratively to strongly support students through the Honors in Research program.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire, integrate and apply knowledge of plant science to horticultural systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticultural systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve horticultural systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

ADVISING AND CAREERS

ADVISING

Undergraduate students in the Department of Horticulture are assigned to a minimum of two advisors: our staff advisor and a faculty mentor. Prospective students should meet with the staff advisor first; the advisor will help match students to a faculty mentor in the area of interest.

Current students can meet with either the staff advisor or their assigned faculty mentor. Students are required to meet with their advisor at least once each semester.

STAFF ADVISOR

Our staff advisor is available to help prospective and current students with major exploration, general degree requirements and policies, academic planning, campus resources, and so on.

Contact: Kathryn Jones, kjones26@wisc.edu; schedule an advising appointment here (<http://go.wisc.edu/h642e9>).

FACULTY MENTORS

Our faculty mentors are available to help current students with internships and careers, graduate school preparation, research opportunities, etc. Contact information for faculty mentors is available on the faculty profile page (<https://horticulture.wisc.edu/faculty-and-staff-2/faculty-and-staff>).

CAREERS

A degree in horticulture serves as excellent preparation for careers in: applied plant science, food crop production, plant breeding & plant genetics, urban agriculture, gardening, landscaping, community supported agriculture (CSA), extension and community based educational work, horticulture education, research, greenhouse production, horticultural therapy, etc. For sample career profiles in horticulture, see Career Opportunities (<https://horticulture.wisc.edu/academics/undergraduate-program/research-career-opportunities-3>) on the department website.

WISCONSIN EXPERIENCE

Students in the horticulture program have some unique opportunities for learning outside the classroom. Our introductory horticulture course, Horticulture 120, is known campus wide for its extensive engagement with service learning. Service learning projects in a variety of settings, where students gain hands-on experiences in community projects, are a core part of student engagement in the horticulture program. Many of our students participate in internships during the summer and even during academic semesters at locations that vary from seed companies to wineries to public gardens. Multiple internship opportunities for horticulture students exist on or near campus at facilities such as the Allen Centennial Garden (<https://allencentennialgarden.org>), the UW Arboretum (<https://arboretum.wisc.edu>), and the Agriculture Research Stations (<http://ars.wisc.edu>).

Horticulture students have a unique opportunity to study tropical horticulture during each fall semester and then travel to Costa Rica and other countries in Central America for a two week intensive field experience during winter break. Spring break opportunities also exist for tropical horticultural experiential learning.

The Department of Horticulture has a very active undergraduate club known as the Horticulture Society (<https://win.wisc.edu/organization/hortsociety>). The mission of the Horticulture Society is to interest and acquaint students in the College with career opportunities and requirements in the field of Horticulture and related fields. They aim to provide opportunities to further this interest through combined effort and achievement; to create awareness and interest in students entering the College with the field of horticulture; to be available to industrious students interested in expanding their knowledge of horticulture; and promote an exchange of ideas and mutual understanding. The Society is made up of undergraduates, some of whom are majoring in Horticulture. A faculty advisor works with the group, and the group meets bi-monthly. The Society travels to horticultural events and meetings, visits botanical gardens and arboreta around the country, has travelled internationally, and runs programming for children at elementary schools and gardens around Wisconsin. The Society runs a large and successful plant sale each fall on campus.

Embedded in the department is the Wisconsin Institute for Sustainable Agriculture (<http://wisa.cals.wisc.edu>), or WISA. WISA's long-term vision is to develop an Institute whose networking with client groups helps develop and share knowledge that promotes a diverse Wisconsin agricultural and food system that is environmentally sound, socially just,

and economically viable. The Institute promotes research, education and outreach programs that are trans-disciplinary and implement a systems approach to the study of food and agricultural production throughout the supply chain. These include development and enhancement of undergraduate and graduate student learning experiences.

LIFE SCIENCES COMMUNICATION

The Department of Life Sciences Communication (LSC) prepares students for careers as professional communicators in scientific and technical fields or for graduate school. Scientific areas of expertise include the environment and natural resources, health and nutrition, agriculture, new technologies such as biotechnology, and social sciences. LSC became the first department of what was then termed Agricultural Journalism in the world and has retained its leadership position in science communication ever since.

Graduates of the program are highly sought after by employers across scientific and communication industries. Key to the education that LSC students receive is a combination of theoretical grounding and state-of-the-art practical applications. Our instructors are a mix of world-class researchers and real-world practitioners of regional or national profiles.

Students receive instruction across multimedia channels such as print, audio, video and web. They learn to target and create communications for both news and marketing. Most important, they learn to plan strategically and implement the most effective communications for diverse audiences.

Students complete an undergraduate major in life sciences communication under the bachelor of science degree program. Students in this program have the flexibility to explore science, environmental and health communication, agricultural business, industry, social marketing, or the international context.

College regulations permit a student to major simultaneously in life sciences communication while pursuing another major in a different department. This provides a student with strong communication skills and solid grounding in another subject matter area. Nonmajors will also benefit from taking communication courses.

LIFE SCIENCES COMMUNICATION, B.S.

The Department of Life Sciences Communication (LSC) prepares students for careers as professional communicators in scientific and technical fields or for graduate school. Scientific areas of expertise include the environment and natural resources, health and nutrition, agriculture, new technologies such as biotechnology, and social sciences. In 1908, LSC became the first department of what was then termed Agricultural Journalism in the world and has retained its leadership position in science communication ever since.

Graduates of the program are highly sought after by employers across scientific and communication industries. Key to the education that LSC students receive is a combination of theoretical grounding and state-of-the-art practical applications. Our instructors are a mix of world-class researchers and real-world practitioners of regional or national profiles.

Students receive instruction across multimedia platforms such as print, audio, video and web. They are taught how to target and create communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Students complete an undergraduate major in life sciences communication under the Bachelor of Science degree program. Students in this program have the flexibility to explore science, environmental and health communication; agricultural business; industry; social marketing; or the international context.

College regulations permit a student to major simultaneously in life sciences communication while pursuing another major in a different department. This provides a student with strong communication skills and solid grounding in another subject matter area. Nonmajors will also benefit from taking communication skills courses.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic

values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. Students must have a minimum of 15 credits within the LSC major that do not double count with CALS or university "general education" requirements.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or placement exam recommended to fulfill the CALS Quantitative Reasoning Part A requirement):		3-5
MATH 112	Algebra	
or MATH 114	Algebra and Trigonometry

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Specialized knowledge in theoretical and applied communication of science and technology, along with an education broad enough to meet the challenges of changing careers and opportunities.
2. The ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving.
3. The ability to communicate effectively across media and a broad range of audiences.
4. A global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
5. The ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy.
6. A respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

ADVISING AND CAREERS

Current or prospective students should contact the advisor, Tera Holtz (tholtz@wisc.edu), with questions. Declared majors are required to meet with the advisor at least once per semester prior to registration.

Our graduates get jobs as reporters, editors, advertising and marketing professionals, technical writers, broadcast producers, and public information staff at universities, and in many other science- and agriculture-related industries. Some work for specialized publications. Others work for print, online or broadcast media reporting on science, health, agriculture, or the environment. Many have careers with advertising agencies and public relations firms handling accounts for food, biotechnology, or related industries. Still others work with companies, cooperatives, government agencies, and universities.

NUTRITIONAL SCIENCES

Nutritional sciences is an independent discipline rooted in biology and biochemistry. The major integrates the study of nutrition with studies of the role of diet in health and disease, and with studies of the biological, genetic, social, and economic factors influencing the diet and nutritional status of humans. Nutritional sciences combines the basic and applied sciences that address issues relevant to agriculture and medicine. The Department of Nutritional Sciences offers two areas of study, both of which require a core of courses that emphasize the chemistry and physiology of nutrition. Additional courses focus on the biochemical, clinical, business, or public health aspects of nutrition. Students who complete the nutritional sciences major in the dietetics degree program receive the bachelor of science–dietetics degree, and students who complete the nutritional sciences major in the bachelor of science degree program receive the bachelor of science degree.

Students who wish to gain practical experience are encouraged to participate in independent studies and coordinative internships, as well as laboratory and clinical research projects offered through the department, the Waisman Center and Interdepartmental Graduate Program in Nutritional Sciences. In addition to the financial support offered by these opportunities, the department annually awards a number of scholarships. All students are also encouraged to apply for scholarships awarded by the College of Agricultural and Life Sciences and UW–Madison.

The department also serves as the administrative home for the popular undergraduate certificate in global health. The certificate is open to all undergraduate UW–Madison students and complements a variety of majors.

GLOBAL HEALTH, CERTIFICATE

The undergraduate certificate in global health is a 15-credit program open to all undergraduate students at the University of Wisconsin–Madison.

All students, especially those who identify as pre-health, are familiar with the concept of health care, the idea of preventing and treating mental and physical health conditions in individuals. The certificate's coursework discusses medicine and particularly the need to improve access to care for all, but it also introduces students to the field of public health, a model for promoting health and well-being that seeks to identify and address the root causes of health problems for populations rather than for individuals.

Public health practitioners focus on preventive, population-level approaches to health promotion. For example, public health work related to substance abuse among UW–Madison students involves education and outreach to high-risk groups as well as facilitating access to treatment. Other public health researchers, government officials, nonprofit staff, and community leaders might work with entire rural communities in a developing country to improve access to clean water, or work on a global scale to try to reduce migration driven by climate change-related declines in food production.

Solutions to public health problems require expertise from many disciplines and the certificate welcomes both pre-health science students and diverse other students who are passionate about improving the well-being of humans, non-human animals, and the environment through changes in politics, economics, culture, and society in general.

Certificate students must complete credit-bearing field work but may or may not actually go abroad to do it—the "global" in "global health" refers both to our desire to achieve equity in health for all people worldwide and to the goal of studying and finding solutions to health issues that cross both geographic and socioeconomic boundaries. There are large differences or "disparities" in health and well-being between different populations in Madison and across the United States such that many students choose to study a health problem locally and make connections to the handling of the same problem in other populations and places.

The certificate is administered by the College of Agricultural and Life Sciences (CALs) and the Global Health Institute (GHI) in partnership with faculty and staff across campus.

Learn more about the program on its website (<http://ghi.wisc.edu/education/undergraduate-certificate>).

HOW TO GET IN

Undergraduate students from all majors on campus are encouraged to consider completing the certificate in global health.

Students may declare after completing any one of the program's three core courses. While the admission to the certificate is not competitive, students should be aware that enrollment in the core courses occurs on

a first-come, first-served basis. Information about declaring the certificate can be found on the program website (<http://ghi.wisc.edu/education/undergraduate-certificate/completing>).

There is no guarantee that all interested students will be able to complete the certificate, but completion is most likely for students who take the program's core courses as early as possible.

ENROLLMENT IN CERTIFICATE COURSES

While interested students would ideally take at least one of the certificate's core courses as freshmen or sophomores, many students do not get into these courses until their junior or senior years. This can make planning difficult—ideal and actual scheduling options are presented below. In theory, students can complete the program's requirements in any order, but there are two important things to keep in mind:

- Many field experience options have a core course as a prerequisite.
- Whenever students are finished with the requirements of the degree/major(s), they may not extend time on campus just to complete the certificate.

The ideal timing for the program's requirements is as follows:

- *NUTR SCI/AGRONOMY/ENTOM 203 Introduction to Global Health*—take fall of the freshman or sophomore year
- *POP HLTH 370 Introduction to Public Health: Local to Global Perspectives and/or MED HIST/ENVIR ST 213 Global Environmental Health: An Interdisciplinary Introduction*—take any spring from sophomore to senior year
- *two or three elective courses*—choose and complete these any time after taking one of the three core courses
- *1–3 credits of field experience*—summer between junior and senior years or six months on either side of that summer

A more common timing for the program's requirements is as follows:

- *NUTR SCI/AGRONOMY/ENTOM 203 Introduction to Global Health*—take fall of the junior or senior year or (when offered in a special section for juniors and seniors only) spring of one of those years
- *POP HLTH 370 Introduction to Public Health: Local to Global Perspectives and/or MED HIST/ENVIR ST 213 Global Environmental Health: An Interdisciplinary Introduction*—take spring of the junior or senior year
- *two or three elective courses*—complete at least one or two of these before getting into core courses, potentially choosing courses that meet your major and/or general education requirements.
- *1–3 credits of field experience*—summer between junior and senior years or six months on either side of that summer

REQUIREMENTS

Code	Title	Credits
Core Courses		
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
MED HIST/ ENVIR ST 213 or POP HLTH 370	Global Environmental Health: An Interdisciplinary Introduction ¹ Introduction to Public Health: Local to Global Perspectives	3

Field Experience

Field experiences range in length from one week to one year and typically carry from one to four credits. The field experience can be completed in the US or abroad but must be completed for credit and must be approved by certificate staff. Some experiences are "preapproved" while others such as internships must be submitted for approval. Volunteering that includes clinical work is strongly discouraged and is not accepted as field experience. See the program's field experience web page and handbook for more details.

Electives

Select from electives list (see below) to reach a minimum of 15 credits total for the certificate. ²

¹ Completing both of these courses is encouraged, and students who do so can count one as an elective.

² The certificate does not support tracks or specialties but students may choose to concentrate their electives in one or more functional areas (topics of study covered in graduate programs in public health and related fields). Note that many courses span multiple functional areas but are only listed once.

Some courses listed here are "special topics" courses. These are courses whose topic changes from semester to semester and even between sections in the same semester. Sections of these courses accepted by the certificate are shown in parentheses (like this). Use of approved sections to meet the certificate's electives requirement is fine but requires manual modification of a student's degree audit, typically during the student's last term on campus.

- **Agronomy/Horticulture/Plant Breeding**—The management of crops, soils, fertilizers, water, and other agricultural inputs and the assessment of the degree to which different practices meet goals for productivity, efficiency, human and animal nutrition, and environmental impact.
- **Animal Science/Dairy Science**—Study of the management of domesticated animals, including assessment of the degree to which different practices meet goals for productivity, efficiency, humane treatment, and environmental impact
- **Biomedical Lab Sciences**—Focuses on laboratory techniques in areas such as microbiology, immunology, virology, molecular biology, as applied to research on public health issues.
- **Biostatistics**—Study of theories and techniques for collecting, analyzing, and interpreting quantitative data relevant to public health issues.
- **Chronic Disease**—Focuses on the etiology and prevention of chronic disease, while addressing interventions such as policy change, education, and various services to reduce chronic disease morbidity and mortality at the level of community and individual behavior.
- **Clinical Research**—Use of statistical methods in the design and execution of studies involving a person or group of persons and addressing public health problems.
- **Communication Sciences and Disorders**—Focuses on the practice of public health as applied to disorders of speech production/perception, hearing, and language organization.
- **Community Health**—Focuses on work with defined communities to identify and resolve public health problems and to promote well-being.
- **Dental Public Health**—The science of preventing dental diseases and promoting dental health on a community basis, including dental education of the public, applied dental research, and administration of group dental care programs.
- **Environmental Health/Environmental Science/Environmental Economics**—Study of assessment, control, prevention, and cost implications of factors in the environment that can adversely affect the health of present and future generations.
- **Epidemiology**—Application of the scientific method to the study of disease in populations for the purpose of prevention and control.
- **Exercise Science**—The theory-based, research-led study of the impact of physical exercise on the body and health.
- **Food Safety**—Focuses on identification and decreasing the risk to the public from foodborne illness by surveillance, monitoring occurrences of bacterial pathogens, and response to public complaints.
- **Genetics**—Explores the impact of genes on public health and disease prevention, including how genes and the environment interact to affect distribution of disease in human populations.
- **Health Administration**—Study of the skills, values, and conceptual abilities needed for management roles in health care, health policy, and public health.
- **Health Economics/Health Finance**—Study of the composition, use, and impact of finances that fund all components of the public health system. This includes the pricing, production, and distribution of health services.
- **Health Education/Behavioral Sciences**—Interdisciplinary study focusing on how health education can affect behavior and lifestyle decisions that have an impact on public health.
- **Health Law**—The impact of law on the furnishing and administration of health services, and study of legal structures that define government's authority in the interest of public health.
- **Health Promotion and Communications**—Organized response to promote health and prevent illness, injury, and disability using communication mediums.
- **Health Services Research**—Research on the cost, access, and quality of the health care system, and on policy issues affecting the organization, financing, and delivery of health care services.
- **Immunology**—The relationship between body systems, pathogens, and immunity, the development and function of immune cells, and the mechanisms of disease and immunology.
- **Infectious Diseases**—Study of illnesses resulting from the transmission of microbial agents through diverse pathogens, disease surveillance, outbreak investigation, and the prevention of infectious diseases.
- **Informatics**—Interdisciplinary science dealing with the structure, acquisition, and use of biomedical information, ranging from theoretical model contraction to building and evaluating applied systems.
- **Injury/Violence**—The study of the epidemiology, risk factors, and effective prevention strategies for unintentional and violence-related injury.
- **Management and Health Policy**—Study of legislative, administrative, and budget systems affecting health services, competencies associated with health care management, and the role of leadership in public health.
- **Maternal and Child Health**—Focuses on the improvement of public health delivery systems for women, children, and their families through advocacy, education, and research.
- **Mental Health**—Emphasizes early intervention, prevention of mental illness, and promotion of mental health through public health education.
- **Microenterprise and Microlending**—Focuses on the development of small businesses using small amounts of credit, often but not always in developing country settings. Explores the impact of small businesses on individual, family, and community health and well-being.
- **Minority Health and Health Disparities**—Addresses factors causing gaps in quality of health care across social, ethnic, sexual orientation, and socioeconomic groups.
- **Multicultural Studies**—Focuses on the impact of social identities in determining behavior during illness and decisions regarding care, and the importance of understanding basic attitudes of a cultural group for successful health promotion and prevention programs.
- **Neuroscience**—An interdisciplinary field which may include research in areas such as molecular neuroscience, neurophysiology, and computational modeling, with applications for vaccine development, response to bioterrorism attacks, and control or prevention of diseases such as Alzheimer's and Parkinson's.
- **Nutrition/Public Health Nutrition**—Focuses on the improvement of the nutritional health of the whole population and vulnerable subgroups within the population, and emphasizes health promotion and disease prevention.
- **Occupational Health/Industrial Hygiene**—Focuses on the anticipation, recognition, evaluation, communication, prevention, and control of environmental stressors in the workplace that may result in injury, illness or impairment, or affect the wellbeing of the community.
- **Parasitology**—Study of human parasites and of public health measures that contribute to the prevention and control of diseases caused by parasites.
- **Population and Reproductive Health**—Factors influencing human reproductive health and dynamics of population growth with the goal of avoiding disease and disability related to sexuality and reproduction.
- **Population Sciences**—Study of the science of demography and health implications of major population issues, including population size, composition, distribution, and change.
- **Poverty and Development**—Involves exploration of the relative availability of resources and services between different populations and geographic areas.
- **Preparedness Response and Recovery**—Focuses on the public health infrastructure needed to monitor the environment, assess needs of vulnerable populations, and allocate resources in times of community emergency.
- **Public Health Ethics**—Involves a systematic process to clarify, prioritize, and justify possible courses of public health action based on ethical principles, values and beliefs of stakeholders, and scientific and other information. Public ethics is a field of study that seeks to clarify principles guiding actions, and a field of practice that applies relevant principles and values to decision making.
- **Public Health Leadership**—Prepares public health practitioners with knowledge and skills needed to mobilize, coordinate, and direct broad collaborative actions within the complex public health system.
- **Public Health Medicine**—Protects and improves the health of the community through preventive medicine by providing public health training for clinicians such as doctors, dentists, and nurses.
- **Public Health Policy**—The collected laws, regulations, and approaches taken to making decisions and implementing policy to protect the health of communities and populations. Public health policy issues include a wide range of topics including health care reform, insurance reform, prevention of communicable diseases, food safety, and stem cell research.
- **Public Health Practice**—Application of knowledge and competencies in performance of essential public health services.
- **Risk Assessment**—Determination of the probability that a specific public health environmental or other threat will occur, with a focus on adverse health effects, risk perception, communication, and management.

- **Social Determinants of Health**—Study of the political, cultural, and societal systems that influence behaviors and lifestyle decisions that have an impact on health.
- **Substance Use/Harm Reduction**—Study of theory and methods for research on substance use and community-based prevention, control, and treatment.
- **Toxicology**—Study of the adverse effects of chemicals or other physical agents on human beings and other living organisms.
- **Tropical Medicine**—Deals with infectious and other diseases occurring or originating primarily in tropical and subtropical regions.
- **Veterinary Public Health**—Study of the prevention and control of zoonotic diseases—transmissible from animals to humans—in both animal and human populations.
- **Women's Health**—Etiology, prevention, and treatment of public health problems affecting women and other high-risk groups.

² This course is what UW calls a "special topics" course. These are courses whose topic changes from semester to semester and even between sections in the same semester. Sections of these courses accepted by the certificate in the past are shown in parentheses (like this). Use of approved sections to meet the certificate's electives requirement is fine, but they are not always seen automatically by the certificate's degree audit. Questions about these courses should be directed to certificate advising staff.

LEARNING OUTCOMES

Completing an Undergraduate Certificate in Global Health gives you tools to operate as a global citizen. Through classroom-based courses and a field experience, you will learn to:

- discuss the global burden of disease, threats to well-being in varied settings, and the root causes of these conditions;
- understand how practitioners from a variety of disciplines (health care, education, agriculture, engineering, nutrition, etc.) collaborate with local partners to improve health;
- reflect on your values, ethics and assumptions, so you can practice respectful and mutual engagement with other cultures, collaborators and organizations;
- communicate effectively with other public health professionals and with community representatives about measures being taken to address key health concerns in their communities both within and outside the United States; and
- use your domestic and international health experience to become informed citizens in an increasingly interconnected world.

ADVISING AND CAREERS

Details about advising for the certificate are available on the program's advising page (<http://ghi.wisc.edu/education/undergraduate-certificate/advising>).

The certificate maintains a handbook (<http://ghi.wisc.edu/education/undergraduate-certificate/handbook>) with lengthy sections about careers, including suggested global health-related work opportunities to pursue in students' first one to two years after college.

PEOPLE

Please see the Certificate in Global Health website (<http://ghi.wisc.edu/education/undergraduate-certificate/#Who>) for a list of certificate staff and ways to contact them.

NUTRITIONAL SCIENCES, B.S.

The bachelor of science with a major in nutritional science builds on a core set of nutrition courses with additional courses emphasizing the chemistry and biology of nutrients from the molecular to the systemic level. Students in this program often pursue graduate study in medicine, nutritional sciences, and other biological sciences. Graduates also find employment in agribusiness, the food industry, government agencies, health fields, and human services. Others may pursue advanced degrees in nutrition, the health and social sciences, and international studies. Students concerned with food and nutrition problems of developing countries can also enroll in courses that treat the agricultural, environmental, economic, and social context of such problems with the nutrition core.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW—Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following:		3-5
MATH 210	Topics in Finite Mathematics	
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II ¹	
MATH 221	Calculus and Analytic Geometry 1	
MATH 222	Calculus and Analytic Geometry 2	
STAT 224	Introductory Statistics for Engineers	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT/B M I 541	Introduction to Biostatistics	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Introductory Biology		
Select one of the following options:		10
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	

BIOCORE 384	Cellular Biology Laboratory	
Nutritional Sciences Biology		
Select one of the following options:		8-13
Option 1:		
PHYSIOL 335	Physiology	
GENETICS 466	Principles of Genetics	
And select one of the following: ²		
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory	
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	
Option 2: ³		
BIOCORE 485	Organismal Biology	
BIOCORE 486	Organismal Biology Laboratory	
BIOCORE 587	Biological Interactions	
Physics		
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	
Core		
NUTR SCI/AN SCI/ DY SCI 311	Comparative Animal Nutrition	3
or NUTR SCI 332	Human Nutritional Needs	
NUTR SCI 431	Nutrition in the Life Span	3
BIOCHEM/NUTR SCI 510	Biochemical Principles of Human and Animal Nutrition	3
Select one of the following:		3-7
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	
BMOLCHEM 503	Human Biochemistry	
Electives within the Major		
Select 6 credits from the following:		6
A A E/ AGRONOMY/ INTER-AG/NUTR SCI 350	World Hunger and Malnutrition	
ANTHRO 365	Medical Anthropology	
BIOCHEM 550	Topics in Medical Biochemistry	
BIOCHEM/ M M & I 575	Biology of Viruses ⁴	
BIOCHEM/ NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease ⁵	
BMOLCHEM 504	Human Biochemistry Laboratory	
C&E SOC/ SOC 533	Public Health in Rural & Urban Communities	
CHEM 311	Chemistry Across the Periodic Table	
CHEM 327	Fundamentals of Analytical Science	
CHEM 329	Fundamentals of Analytical Science	

DY SCI 305	Lactation Physiology	
FOOD SCI/ AN SCI 321	Food Laws and Regulations	
FOOD SCI/ MICROBIO 325	Food Microbiology	
GENETICS 545	Genetics Laboratory	
HORT/ AGRONOMY 338	Plant Breeding and Biotechnology	
HORT/ AGRONOMY/ BOTANY 339	Plant Biotechnology: Principles and Techniques I	
HORT/ AGRONOMY 360	Genetically Modified Crops: Science, Regulation & Controversy	
KINES 337	Human Anatomy	
KINES 338	Human Anatomy Laboratory	
MED HIST/ PHILOS 515	Public Health Ethics	
MED HIST/ PHILOS 558	Ethical Issues in Health Care	
M M & I/ MICROBIO/PATH- BIO 528	Immunology	
M M & I/PATH- BIO 529	Immunology Laboratory	
NUTR SCI 375	Special Topics	
NUTR SCI/INTER- AG 421	Global Health Field Experience	
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory	
NUTR SCI/ KINES 525	Nutrition in Physical Activity and Health	
NUTR SCI 540	Community Nutrition Programs and Policy Issues	
NUTR SCI/ BIOCHEM 619	Advanced Nutrition: Intermediary Metabolism of Macronutrients ⁴	
NUTR SCI/ POP HLTH 621	Introduction to Nutritional Epidemiology ⁴	
NUTR SCI/ M&ENVTOX 623	Advanced Nutrition: Minerals ⁴	
NUTR SCI 625	Advanced Nutrition: Obesity and Diabetes ⁴	
NUTR SCI/ AN SCI 626	Experimental Diet Design ⁴	
NUTR SCI 627	Advanced Nutrition: Vitamins ⁴	
NUTR SCI 631	Clinical Nutrition	
NUTR SCI/PHM PRAC 672	Herbals, Homeopathy, and Dietary Supplements	
NUTR SCI 681	Senior Honors Thesis ⁵	
NUTR SCI 682	Senior Honors Thesis ⁵	
NUTR SCI 691	Senior Thesis-Nutrition ⁵	
NUTR SCI 692	Senior Thesis ⁵	
NUTR SCI 699	Special Problems ⁶	
ONCOLOGY 401	Introduction to Experimental Oncology	
PATH 404	Pathophysiologic Principles of Human Diseases	

PHM SCI 401	Survey of Pharmacology	
PHYSIOL 533	Molecular Physiology	
POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	
ZOOLOGY 470	Introduction to Animal Development	
ZOOLOGY 570	Cell Biology	
Capstone		
Select one of the following:		1-8
NUTR SCI 499	Capstone in Nutrition	
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory	
NUTR SCI 681 & NUTR SCI 682	Senior Honors Thesis and Senior Honors Thesis	
NUTR SCI 691 & NUTR SCI 692	Senior Thesis-Nutrition and Senior Thesis	
NUTR SCI 699	Special Problems ⁷	
Total Credits		66-91

¹ If MATH 171 Calculus with Algebra and Trigonometry I is taken, students must take MATH 217 Calculus with Algebra and Trigonometry II.

² Consult advisor about combining MICROBIO 303 with MICROBIO 102.

³ If the Biocore sequence is taken to fulfill the first biology requirement, it must be taken to fulfill the second biology requirement.

⁴ These courses are taught primarily to graduate students. Permission to enroll from instructor may be required.

⁵ Note that for NUTR SCI 681/NUTR SCI 682 (Senior Honors Thesis) and NUTR SCI 691/NUTR SCI 692 (Senior Thesis), both courses in the sequence must be completed in order to earn a grade.

⁶ May count up to 3 credits of NUTR SCI 699 Special Problems towards the electives requirement

⁷ Consult advisor regarding the possibility of completing NUTR SCI 699 Special Problems for capstone.

RECOMMENDED NUTRITIONAL SCIENCE ELECTIVES

Code	Title	Credits
ANATOMY/ KINES 328	Human Anatomy	3

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take NUTR SCI 681 Senior Honors Thesis and NUTR SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.

- Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
- Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
- Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
- Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

NUTR SCI Elective ⁵	3 Electives ²	9
Electives ²	6	
	15	14-16

Total Credits 29-31

- CHEM 103/CHEM 104 or CHEM 109 is required.
- UW and CALS general education requirements are listed on the Requirements tab. Other recommended electives: Math (<http://guide.wisc.edu/courses/math>) through MATH 222 (second semester calculus), CHEM 561 Physical Chemistry, and foreign language.
- BIOCORE 381/BIOCORE 382, BIOCORE 383/BIOCORE 384, BIOCORE 485/BIOCORE 486, BIOCORE 587 also accepted.
- ANTHRO 104 fulfills both the Ethnic Studies and International Studies requirements.
- Select 3 credits from NUTR SCI/A A E/AGRONOMY/INTER-AG 350, NUTR SCI 540, NUTR SCI 631, NUTR SCI/PHM PRAC 672, NUTR SCI 681, NUTR SCI 682, NUTR SCI 691, NUTR SCI 692, NUTR SCI 699, FOOD SCI/MICROBIO 325, FOOD SCI 410, FOOD SCI 412 or FOOD SCI 514.
 - 120 credits required for graduation.

ADVISING AND CAREERS

Prospective and declared students should contact the student services coordinator with questions.

Students in this program often pursue graduate study in medicine, nutritional sciences, and other biological sciences. Graduates also find employment in agribusiness, the food industry, government agencies, health fields, and human services. Others may pursue advanced degrees in nutrition, the health and social sciences, and international studies.

**NUTRITIONAL SCIENCES, B.S.
DIETETICS**

The popular Didactic Program in Dietetics combines clinical and managerial courses with the nutrition core to prepare students to become registered dietitians (RD). Registered dietitians work in hospitals, outpatient clinics, schools, colleges, wellness programs and nursing homes as well as in public health agencies, the food industry, and research labs. Students fulfilling the requirements of the didactic program in dietetics are qualified to apply for a postgraduate dietetic internship. Upon completing the dietetic internship, a graduate is eligible to take the Academy of Nutrition and Dietetics registration examination leading to certification as a registered dietitian. The didactic program is currently granted accreditation status by the:

Commission on Accreditation for Dietetics Education (CADE)
of the Academy of Nutrition and Dietetics
120 South Riverside Plaza, Suite 2000
Chicago, IL 60606-6995
312-899-4876

Students who complete the nutritional sciences major in the dietetics degree program receive the *Bachelor of Science–Dietetics* degree.

HOW TO GET IN**ADMISSION TO DIETETICS DEGREE PROGRAM**

Students will have PDI classification until admission to the dietetics degree program (ADI classification). Departmental approval required.

To be admitted to the B.S. dietetics program, the following requirements must be met effective fall 2015:

1. A minimum overall cumulative GPA of 3.000. Cumulative GPA will be based on UW–Madison courses only.
2. Students **must** have completed one semester at UW–Madison before applying.
3. A minimum mean GPA of 3.000 in the following required¹ prerequisite courses:

Code	Title	Credits
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Select one of the following:		5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	

ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
NUTR SCI 332	Human Nutritional Needs	3
PHYSIOL 335	Physiology	5
Select one of the following:		3-4
PSYCH 202	Introduction to Psychology	
MICROBIO 101	General Microbiology	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
GEN BUS 300	Professional Communication	

¹ Any transfer course from another university that will be used to meet the above required courses **cannot** be included in the GPA calculation. If the same course is taken more than once, only the grade from the last time the course was taken will be used in the GPA calculation.

Note: Admission to the DPD program is competitive, as enrollment is limited by accreditation standards; students meeting the minimum criteria are not guaranteed admission.

REQUIREMENTS**UNIVERSITY GENERAL EDUCATION REQUIREMENTS**

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take NUTR SCI 681 Senior Honors Thesis and NUTR SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
- Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
- Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
- Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
- Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
- Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
- Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
- Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

PLANT PATHOLOGY

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition.

It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

For those interested in graduate studies, the Department of Plant Pathology offers a broad program leading to M.S. and Ph.D. degrees, which is described in the Graduate Guide (<http://guide.wisc.edu/graduate>).

PLANT PATHOLOGY, B.S.

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

This major is earned through the bachelor of science degree program.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
------	-------	---------

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.

Total Credits 36-37

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences including Plant Pathology.
2. Appropriately use biological instrumentation and laboratory techniques.
3. Explain and apply the scientific method including designing and conducting experiments and testing hypotheses.
4. Recognize the relationship between structure and function at all levels: molecular, cellular, organismal, and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physical sciences, and technology to answer biological questions using the scientific method.

Total Credits 3

¹ Gen-Ed requirements include communications, ethnic studies, humanities, social science, or international studies. See Requirements tab for more details.

² Students can take either PL PATH 558 in the odd spring or PL PATH 559 in the odd summer

Note: Possible places where students may cut down on courses: COMM-A placement test, COMM-B taken as ZOOLOGY 152, QR-A placement test, AP/IB credits (biology, social sciences, humanities, language, chemistry, physics, math, statistics)

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN PLANT PATHOLOGY

Students in plant pathology are assigned two advisors, the staff advisor (Sara Rodock, rodock@wisc.edu, appointment link (<http://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)) and one of our faculty advisors. Current faculty advisors include:

Dr. Caitilyn Allen
 Dr. Jeri Barak (lead faculty advisor)
 Dr. Brian Hudelson
 Dr. Amanda Gevens
 Dr. Mehdi Kabbage
 Dr. Paul Koch

Dr. Richard Lankau
Dr. Patty McManus

Undergraduates in plant pathology are required to meet with their advisor before they can enroll for the upcoming term. A hold will be placed on student records until they meet with their advisor.

For more information about the Plant Pathology major or the department in general, please contact either the lead undergraduate advisor, Dr. Jeri Barak, or the student services coordinator, Sara Rodock. Students with questions regarding lab positions (both paid and unpaid) in plant pathology should contact Dr. Jeri Barak.

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to plant pathology students please visit our Internship & Job Resources (<http://www.plantpath.wisc.edu/student-internships-jobs>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to plant pathology students, please visit the CALS "Building Your Career" (<http://www.cals.wisc.edu/academics/undergraduate-programs/careerservices/career-development>) page. Students in the major are welcome to make an individual appointment with Sara Rodock, rodock@wisc.edu (appointment link for current UW–Madison students (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/eBLVAOve.html>)) to discuss career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Undergraduates majoring in plant pathology at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with internationally prominent faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

Plant pathology offers paid research internships during summer term, as well as paid or credit-earning research opportunities year-round. Undergraduates get a firsthand view of how research is conducted and what it means to be a professional scientist.

By joining the Plant Pathology Undergraduate Club, majors get to know their fellow students outside the classroom. The department provides resources for students to meet experts who lead discussions on a range of topics including cutting-edge research and technology, career options, and how to apply and compete for jobs.

SOIL SCIENCE

The Department of Soil Science provides undergraduate and graduate education in agricultural, environmental, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion and tillage management; soil fertility and plant nutrition; soil physicochemical phenomena; fate of soil contaminants; waste management; water and contaminant transport; pedology; and land-use analysis. Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets of soils and soil science are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting and administrative positions in such areas as the environmental sciences, ecology and restoration, crop and timber production, soil survey, and informatics, conservation, environmental pollution control, turf and grounds management, and land-use planning. Contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

The department also serves as the administrative home for the environmental sciences major in the College of Agricultural and Life Sciences.

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph.D. degrees (see the *Graduate Guide*).

ENVIRONMENTAL SCIENCES, B.S. (CAL S)

The environmental sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in environmental sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences, and the College of Letters & Science.

The environmental sciences major can be earned in either the College of Agricultural and Life Sciences (CAL S) or the College of Letters & Science (L&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CAL S and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CAL S, the major is housed administratively in the Department of Soil Science.
- In L&S, the major is housed administratively in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including environmental studies, life

sciences communication, agronomy, soil science, landscape architecture, foreign language/culture, and a number of other disciplines.

Up-to-date information, curriculum, and requirements are posted at envirosoci.wisc.edu (<https://envirosoci.wisc.edu>).

HOW TO GET IN

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosoci.wisc.edu/advising>).

CAL S undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CAL S must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden

Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 40)		1
International Studies (p. 40)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)		

REQUIREMENTS FOR THE MAJOR

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of **15 credits** must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics & Statistics		8-13
Chemistry		8-12
Biology		8-10
Physics		8-10
Major Foundation		3-5
Major Core		12
Major Electives		12
Capstone		2-6
Total Credits		61-80

MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

Code	Title	Credits
Select one of the following:		5-10

MATH 221	Calculus and Analytic Geometry 1 (Recommended)	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 211	Calculus	
Select one of the following:		3
STAT 224	Introductory Statistics for Engineers	
STAT 302	Accelerated Introduction to Statistical Methods	
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-13

CHEMISTRY

Code	Title	Credits
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	5-9
or CHEM 109	Advanced General Chemistry	
Select one of the following:		3
CHEM 341	Elementary Organic Chemistry	
CHEM 343	Introductory Organic Chemistry	
CHEM 561	Physical Chemistry	
Total Credits		8-12

BIOLOGY

Code	Title	Credits
Select one of the following:		10
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
BOTANY/ BIOLOGY 130 & ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Total Credits		10

PHYSICS

Code	Title	Credits
Select one of the following:		8-10

PHYSICS 207 & PHYSICS 208	General Physics and General Physics (Recommended)	
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
Total Credits		8-10

MAJOR FOUNDATION

Code	Title	Credits
Select one of the following:

¹ Consult environmental sciences advisor regarding alternate ways to complete the major electives.

CAPSTONE ¹

Code	Title	Credits
AGRONOMY 500	Senior Capstone Experience	2

BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 651	Conservation Biology	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	3
F&W ECOL 590	Integrated Resource Management	3
F&W ECOL 599	Wildlife Research Capstone	3
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	3-4
LAND ARC 551	Senior Project in Landscape Architecture	4
LAND ARC 666	Restoration Ecology	3
SOIL SCI 499	Soil Management	3

¹ Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the Capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise,

greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.

4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

ADVISING AND CAREERS

ADVISING

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosci.wisc.edu/advising>).

CALS undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

CAREERS

A major in environmental sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, forest ranger, oceanographer, agricultural technician, engineering technician, forester, air and water quality manager, environmental analyst, park ranger, air pollution analyst, environmental consultant, environmental educator, geologist, project manager, environmental engineer, geophysicist, biologist, hazardous waste manager, hydrologist, environmental lawyer, chemical technician, soil conservation technician, chemist, management consultant, teacher, meteorologist, urban and regional planner, civil engineer, environmental planner, microbiologist/wastewater plant operator, natural resource specialist, wildlife manager, conservationist, or zoologist. For more info about careers, please visit our website (<http://envirosci.wisc.edu/careers-internships>).

PEOPLE

EXECUTIVE COMMITTEE

Balster, Nick, Associate Professor, Department of Soil Science
Martin, Jonathan, Professor, Department of Atmospheric and Oceanic Sciences

Thompson, Anita, Professor, Department of Biological Systems Engineering

PROGRAM COMMITTEE

Bertram, Timothy, Associate Professor, Department of Chemistry
Grainger, Corbett, Assistant Professor Department of Agricultural and Applied Economics
Harrington, John, Professor, Department of Landscape Architecture
Holloway, Tracey, Professor, Nelson Institute for Environmental Studies
Hotchkiss, Sara, Professor, Department of Botany
Kanarek, Marty, Professor, Department of Population Health Sciences
Schauer, James, Professor, Department of Civil and Environmental Engineering
Stoltenberg, David, Professor, Department of Agronomy

SOIL SCIENCE, B.S.

The Department of Soil Science provides undergraduate and graduate education in agricultural, environmental, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion and tillage management; soil fertility and plant nutrition; soil physicochemical phenomena; fate of soil contaminants; waste management; water and contaminant transport; pedology; and land use analysis. Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets of soils and soil science are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and administrative positions in such areas as the environmental sciences, ecology and restoration, crop and timber production, soil survey, and informatics, conservation, environmental pollution control, turf and grounds management, and land-use planning. Contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a Bachelor of Science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 37).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (<http://www.cals.wisc.edu/academics>), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 40)	1
	International Studies (p. 40)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3

Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 40)	

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following courses:		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following courses:		3-4
STAT 224	Introductory Statistics for Engineers	
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following options:		5-9
Option 1:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
Option 2:		
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended):		
BOTANY/ BIOLOGY 130	General Botany ²	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Core		

SOIL SCI 301	General Soil Science	4
SOIL SCI 325	Soils and Landscapes	3
Select one of the following courses:		3
SOIL SCI 321	Soils and Environmental Chemistry	
SOIL SCI 621	Soil Chemistry	
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management	
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants	
Select one of the following courses:		3
SOIL SCI 322	Physical Principles of Soil and Water Management	
SOIL SCI 622	Soil Physics	
Select one of the following courses:		3
SOIL SCI/ PL PATH 323	Soil Biology	
SOIL SCI/ MICROBIO 425	Environmental Microbiology	
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry	
Specialization		
Students must complete 1 of 3 specializations: 1. Environmental Soil Science 2. Soil and Food Systems 3. Turf and Grounds (see below)		28-51
Capstone ³		
Select one of the following courses:		3-4
SOIL SCI 499	Soil Management ⁴	
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	
Total Credits		68-99

¹ Note that MATH 171 & MATH 217 must be taken as a sequence.

² BOTANY/BIOLOGY 130 is required by the Turf and Grounds Track.

³ Consult advisor to request permission to substitute another course for the Capstone requirement. Course must meet CALS Capstone Characteristics described in the Undergraduate Catalog and be approved by advisor and 116 Ag Hall.

⁴ SOIL SCI 499 capstone required for Turf and Grounds Track.

SPECIALIZATIONS WITHIN THE MAJOR ENVIRONMENTAL SOIL SCIENCE

Code	Title	Credits
Mathematics		
Select one of the following courses:		5
MATH 211	Calculus	
MATH 221	Calculus and Analytic Geometry 1	
MATH 217	Calculus with Algebra and Trigonometry II	
Physics		
Select one of the following courses:		4-5
PHYSICS 103	General Physics (recommended)	

PHYSICS 104	General Physics	
PHYSICS 207	General Physics	
PHYSICS 208	General Physics	
Chemistry		
Select one of the following options:		4-8
Option 1:		
CHEM 311	Chemistry Across the Periodic Table	
CHEM 327 or CHEM 329	Fundamentals of Analytical Science Fundamentals of Analytical Science	
Option 2:		
CHEM 341 & CHEM 342	Elementary Organic Chemistry and Elementary Organic Chemistry Laboratory	
Option 3:		
CHEM 343 & CHEM 344 & CHEM 345	Introductory Organic Chemistry and Introductory Organic Chemistry Laboratory and Intermediate Organic Chemistry	
Physical Environment		
Select one course from the following:		6-8
ATM OCN 100	Weather and Climate	
ATM OCN 101	Weather and Climate	
ATM OCN/ SOIL SCI 132	Earth's Water: Natural Science and Human Use	
GEOG/ ENVIR ST 120	Introduction to the Earth System

A A E 215 or A A E/ ENVIR ST 244 or A A E 319 or A A E/ AGRONOMY/ INTER-AG/ NUTR SCI 350	Introduction to Agricultural and Applied Economics The Environment and the Global Economy The International Agricultural Economy World Hunger and Malnutrition	3
Total Credits		28-35

¹ Some courses may fulfill GEN ED requirements.

TURF AND GROUNDS

Code	Title	Credits
Physical Environment		
Select one of the following courses:		3
ATM OCN 100	Weather and Climate	
ATM OCN 101	Weather and Climate	
SOIL SCI/ ATM OCN 132	Earth's Water: Natural Science and Human Use	
GEOG/ ENVIR ST 120	Introduction to the Earth System	
GEOG/ ENVIR ST 127	Physical Systems of the Environment	
GEOSCI 100	General Geology	
GEOSCI/ ENVIR ST 106	Environmental Geology	
Core Turf and Grounds Sciences (complete all)		
ACCT I S 300	Accounting Principles	3
BOTANY/ BIOLOGY 130	General Botany ¹	5
HORT/PL PATH 261	Sustainable Turfgrass Use and Management	2
M H R 305	Human Resource Management	3
PL PATH 300	Introduction to Plant Pathology	4
HORT/SOIL SCI 332	Turfgrass Nutrient and Water Management	3
Specialized Sciences		7
Select 7 credits from the following courses:		
BOTANY/F&W ECOL 402	Dendrology	
HORT/ LAND ARC 263	Landscape Plants I	
BSE 201	Land Surveying Fundamentals	
BSE 243	Operating and Management Principles of Off-Road Vehicles	
ENTOM 351	Principles of Economic Entomology	
HORT 120	Survey of Horticulture	

HORT/ PL PATH 262	Turfgrass Management Laboratory
HORT 461	Advanced Turfgrass Management and Physiology

¹ Counts toward Soil Science Major Biology requirements, above.

HONORS IN THE MAJOR

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take SOIL SCI 681 Senior Honors Thesis and SOIL SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. To instill in our undergraduate majors the knowledge base required for them to intelligently discuss, debate and communicate those aspects of soil science pertinent to their degree, specialization and career goals.
2. To provide our undergraduates with the skills and experience needed to identify and solve problems and issues of the types they may encounter in their professions.
3. To ensure that our undergraduates possess an awareness of and an appreciation for the potential impacts of soil, water, crop and waste management practices, and land use on the quality of the environment.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students should contact the undergraduate coordinator, Julie Garvin (jgarvin2@wisc.edu, 608-262-2239), with questions.

Most of our graduates find employment in a diversity of private and commercial enterprises and governmental agencies. Recent examples of employment include laboratory technician, turf and grounds manager, agrichemical sales representative, environmental scientist, land use planner, land zoning administrator, project manager, soil surveyor, and

hydrogeologist. Approximately 12 percent of our undergraduates pursue advanced degrees.

PEOPLE

FACULTY

Assistant Professor Francisco Arriaga—farriaga@wisc.edu

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and non-inversion tillage for traditional cropping systems.

Associate Professor Nicholas Balster—njbalster@wisc.edu

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

Professor Phillip Barak—pwbarak@wisc.edu

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

Professor William Bleam—wfbleam@wisc.edu

Surface and Colloid Chemistry: Physical chemistry of soil colloids and sorption processes, chemistry of humic substances, factors controlling biological availability of contaminants to microorganisms, magnetic resonance and synchrotron studies of adsorption and precipitation.

Professor Alfred Hartemink—hartemink@wisc.edu

Pedology, Digital Soil Mapping: Application of fundamental soil science to real-world problems; digital soil mapping; history and philosophy of soil science; pedology, soil survey, and soil information systems.

Professor William Hickey—wjhickey@wisc.edu

Soil Microbiology and Biochemistry: Soil microbiology, biodegradation, environmental toxicants, molecular physiology, functional genomics, microbial nanostructure, biotechnology.

Professor Carrie Laboski—laboski@wisc.edu

Soil Fertility and Nutrient Management: Sustaining agricultural production and environmental quality; elucidate the biogeochemistry and subsequent best management practices for N, P, and K fertilizers and animal manures; soil fertility related to lime, secondary, and micronutrients; evaluation of soil and plant diagnostic tests; development of tools to assist producers, ag. professionals, and regulatory agencies to sustain economically sound production of grain and forage crops.

Professor Sharon Long—slong@wisc.edu

Applied Environmental and Public Health Microbiology: Microbial source tracking indicators in watershed management; improving detection and quantification, environmental ecology of indicator organisms and infectious diseases, microbial community structure and function in contaminated systems, microbial safety of wastewater sludge and biosolids, biotreatability assessment.

Professor Joel Pedersen—joelpedersen@wisc.edu

Environmental Chemistry/Biochemistry: Behavior of organic contaminants, macromolecules, and engineered nanoparticles in natural and engineered environments.

Professor J. Mark Powell—jmpowell2@wisc.edu

Agroecology/Soil Fertility/International Agriculture: Environmental impacts of ruminant livestock, nutrient cycling, effects of livestock manure on soil nitrogen, phosphorus and carbon cycling and crop productivity; integrated nutrient management on dairy farms.

Associate Professor Matthew Ruark—mruark@wisc.edu

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

Associate Professor Douglas Soldat—djsoldat@wisc.edu

Turfgrass and Urban Soils—Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

Professor Stephen Ventura—sventura@wisc.edu

Geographic Information Systems (Joint w/Nelson Institute for Environmental Studies): Geographic information systems (GIS), biofuels and production on marginal lands, public participation GIS, urban agriculture, land-scape process modeling, soil survey and soil information systems, land and resource tenure, GIS and land use planning.

Assistant Professor Thea Whitman—twhitman@wisc.edu

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph. D. degrees—see the Graduate Guide (<http://guide.wisc.edu/graduate>).

COLLEGE OF ENGINEERING

Engineers design products and develop solutions to society's national and global challenges. The variety of engineering projects requires engineers to have an understanding of people and their values. Engineers blend their knowledge and practical experience with their communication and teamwork skills to work as members of diverse, multidisciplinary teams. Engineers frequently make decisions affecting the development of society and the direction it will take.

The University of Wisconsin–Madison College of Engineering is one of the best places in the world for an engineering education. The outstanding curriculum and the world-class faculty focus on providing students with the technological tools, resources, and knowledge to develop solutions to problems in fields ranging from medicine to energy to manufacturing—and many more.

In the classroom and in the lab, students study and grow their skills, yet they also enrich their academic experience outside of the classroom through opportunities such as international study, field research, internships, laboratory experience, and entrepreneurial opportunities.

Learning isn't confined to the classroom. It can happen anywhere—in the Engineering Hall study lounge, in the state-of-the-art makerspace, or in casual conversation on Engineering Mall. As Badger engineers, students are surrounded by some of the smartest, most innovative people in the world. The faculty do more than teach. They immerse students in interdisciplinary activities and offer real design challenges—and students can actually design and build products that solve those challenges.

In a college internationally renowned for its research, there also are many opportunities for undergraduate students to work directly with faculty members to propose and conduct research, and to publish and patent their results.

The Wisconsin Experience is not limited to academics. Across the university, there are a host of ways to get involved in the campus community. From the UW Marching Band to student government, students can find a home at UW.

A College of Engineering education will not only offer students the time of their lives, it will also prepare them to change life as we know it.

DEGREES/MAJORS/CERTIFICATES

- Biology in Engineering for Engineering Majors, Certificate (p. 249)
- Biomedical Engineering, B.S. (p. 212)
- Chemical Engineering, B.S. (p. 219)
- Civil Engineering, B.S. (p. 225)
- Computer Engineering, B.S. (p. 239)
- Electrical Engineering, B.S. (p. 244)
- Engineering for Energy Sustainability, Certificate (p. 264)
- Engineering Mechanics, B.S. (p. 252)
- Engineering Physics, B.S. (p. 259)
- Engineering Thermal Energy Systems, Certificate (p. 286)
- Geological Engineering, B.S. (p. 232)
- Industrial Engineering, B.S. (p. 277)
- International Engineering, Certificate (p. 251)

- Manufacturing Engineering, Certificate (p. 287)
- Materials Science and Engineering, B.S. (p. 281)
- Mechanical Engineering, B.S. (p. 289)
- Naval Science, BNS (p. 251)
- Nuclear Engineering Materials, Certificate (p. 265)
- Nuclear Engineering, B.S. (p. 266)
- Technical Communication, Certificate (p. 273)
- Technical Japanese Studies for Undergraduates, Certificate (p. 276)

PEOPLE

"If you think of the challenges that we face—energy, transportation, clean air and water, building the next generation of computing and communications technologies as we use up our raw materials—those are problems engineers must address. I'd like our students and faculty to take the leadership role in solving those problems in their classrooms and research."

—Dean Ian Robertson

COLLEGE OF ENGINEERING LEADERSHIP ([HTTPS://WWW.ENGR.WISC.EDU/ABOUT/LEADERSHIP](https://www.engr.wisc.edu/about/leadership))

Dean: Ian M. Robertson

Executive Associate Dean: James P. Blanchard

Associate Dean and Chief Financial Officer: Barbara M. McPherson

Associate Dean for Undergraduate Affairs: Manuela Romero

Associate Dean for Advancement: Cathleen Walters

ENTERING THE COLLEGE

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

POLICIES AND REGULATIONS

REGULATIONS

Official regulations regarding enrollment, scholarship, and graduation for undergraduates in the College of Engineering.

Printer-friendly PDF (https://www.engr.wisc.edu/app/uploads/2016/01/CoE_Official_Regulations-2.pdf)

ADMISSIONS

1. Direct Admission

New students are admitted directly to the degree program (major) of their choice or to the College of Engineering as Engineering Undecided. Progression requirements must then be satisfied as described in Regulations 3–7.

2. Degree Programs (Majors)

Biomedical Engineering (BME)
 Chemical Engineering (CHE)
 Civil Engineering (CEE)
 Computer Engineering (CMPE)
 Electrical Engineering (EE)
 Engineering Mechanics (EM)
 Engineering Physics (EP)
 Geological Engineering (GLE)
 Industrial Engineering (IE)
 Materials Science and Engineering (MSE)
 Mechanical Engineering (ME)
 Nuclear Engineering (NE)

PROGRESSION

3. First Year Progression Requirements

To automatically progress in a College of Engineering (CoE) degree program (major) after direct admission or to switch between engineering degree programs, students must complete the following requirements after their first two semesters of residency at UW–Madison:

- A. 24 credits completed at UW–Madison. Special topics, independent study, seminar, pass/fail, and credit/no credit courses will not be included in the 24 credits except for required INTEREGR 110 Introduction to Engineering and English as a Second Language courses.
- B. General Education Communications Part A (Comm A) requirement. If Comm A is not completed as a graded course at UW–Madison (i.e., completed through placement test, AP/IB, or transfer credit), then a liberal studies course of at least 3 credits with a breadth designation of Humanities, Literature, or Social Sciences must be taken on a graded basis at UW–Madison.
- C. INTEREGR 110 Introduction to Engineering
- D. Math course sequence through MATH 222 Calculus and Analytic Geometry 2 or MATH 276 Topics in Calculus II
- E. Four core courses, required for engineering degree programs (majors), completed at UW–Madison, as defined below:

1. **Math:** A minimum of two math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above; or one math course 300 level or above. If the math requirement for the degree program (major) is complete or the student has completed the calculus sequence through MATH 234 Calculus–Functions of Several Variables, then additional math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above or additional courses from the science requirement in Regulation 3.E.2. can be taken to complete the four core course requirement. Excludes MATH 228 WES Calculus Supplement, MATH/HIST SCI 473 History of Mathematics, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

2. **Science:** A minimum of two science courses required for engineering degree programs (majors) as defined in the table below. If the math and science requirements for the degree program are complete, then departmental engineering courses 200 level and above can be taken to complete the four core course requirement. Excludes EPD, InterEGR, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

- For biomedical engineering and chemical engineering majors, the following science requirements apply:

- i One course must be CHEM 104 General Chemistry II or higher
- ii One course must be PHYSICS 201 General Physics/E M A 201 Statics or higher

If above two requirements are completed, select from additional science courses below.

- For majors in civil engineering, computer engineering, electrical engineering, engineering

mechanics, engineering physics, geological engineering, industrial engineering, materials science and engineering, mechanical engineering, and nuclear engineering, the following science requirements apply:

- i One course must be either CHEM 104 General Chemistry II or higher OR PHYSICS 201 General Physics/E M A 201 Statics or higher
- ii One other science course, from the following:
 - Chemistry, all classes
 - E M A 201 Statics, E M A 202 Dynamics, M E 240 Dynamics
 - PHYSICS 201 General Physics and above
 - Calculus-based STAT 224 Introductory Statistics for Engineers and above
 - E P 271 Engineering Problem Solving I
 - COMP SCI 301 Introduction to Data Programming and above, excluding COMP SCI 304 WES-CS Group Meeting
 - Excludes special topics, independent study, seminar, pass/fail, and credit/no credit courses

F. Core and Overall GPA requirements must be satisfied as defined by CoE departments for each engineering degree program (major) (<http://progression.engr.wisc.edu>). All graded UW–Madison courses referenced in E.1. and E.2. above and any departmental engineering courses level 200 or above will be counted in the Core GPA (excludes EPD, InterEGR, special topics, independent study, and seminar courses). All graded UW–Madison courses are counted in the Overall GPA. For one and only one of these core courses that a student has repeated, the more recent of the two grades will be used in the calculation of Core and Overall GPAs. Students may not be on academic probation for GPA reasons for automatic completion of first year progression requirements.

Students who do not meet the first year progression requirements to automatically progress in a degree program (major) can be considered for non-automatic progression (Regulation 4) or extension (Regulation 5).

4. Consideration for Non-Automatic Progression

Students who do not meet progression GPAs but meet all other progression requirements will be considered for progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends.

5. Extension for First Year Progression Requirements

- A. Students who will not meet progression requirements due to University of Wisconsin placement and/or assessment tests (math and ESL) will be granted a one semester extension up to their fourth semester if they are making satisfactory progress in a degree program (major).
- B. Students who do not meet the requirements in Regulation 3 may apply for a one semester extension but not beyond their fourth semester. Students granted extensions will be considered for non-automatic progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends. Extensions will be evaluated only in cases where it is

mathematically possible during the one semester extension to meet progression GPAs for intended program.

6. Diversity of Student Body

When the number of non-automatic considerations and/or applications for admission to a degree program (major) exceed the capacity of that program, progression and admission will be limited to capacity. In order to implement the University's goals of achieving a heterogeneous and diverse student body, selection of students under consideration or admission to a program operating at capacity will be based on demographic background, written statement, rigor of completed courses, and grade trends.

7. Progression Requirement Completion and Extension Application

Students are required to submit to the dean's office an application for progression for a degree program (major) or an application for an extension by the deadline. Deadlines will be posted on the College of Engineering website at Progression Requirements (<http://progression.engr.wisc.edu>) and emailed to students in the College of Engineering.

REGISTRATION

8. Definitions

- A. Full-time student: One carrying a minimum credit load of 12 credits. All students are expected to be full-time unless they have the permission of the dean to be part-time. A student carrying less than the minimum credit load without the dean's permission will be placed on probation at the end of the semester.
- B. Part-time student: One who has the dean's permission to carry less than the minimum credit load (Regulation 9.F.).
- C. Semester: A term of 15 weeks minimum duration.
- D. Session: A term of less than 15 weeks duration (e.g., summer session or intersession).
- E. Modular Course: A course that is offered during a semester, but which lasts fewer than 15 weeks.

9. Credit Load Constraints

- A. Maximum credit load: 20 enrolled credits per semester.
- B. Minimum credit load: 12 enrolled credits per semester or enrolled for one cooperative education program credit as an engineering co-op student during a co-op work period.
- C. For sessions there is no minimum credit load; the maximum credit load equals the number of weeks in the session.
- D. A student not on academic probation may freely choose to carry any number of credits between a minimum credit load and a maximum credit load.
- E. A student may carry more than a maximum credit load only with the recommendation of an advisor and with written approval of the dean.
- F. Part-time student: A student who wishes to carry less than a minimum credit load in a specific semester for definitive reasons—e.g., a verifiable disability, or a necessity of employment or other outside obligations exceeding 15 hours per week—must request written permission from the dean to become a part-time student. Part-time permissions must be renewed during the first two weeks of each semester. Part-time students must satisfy all regulations other than the minimum credit load. For any semester for which part-time permission is granted and the one following it, the academic status of the student is the responsibility of the student.

G. A student on academic probation is advised to carry not more than 14 credits per semester unless repeating a course. For every three credits being repeated, the student is advised to carry not more than one additional credit beyond 14, up to a maximum of 16 credits.

10. Student Responsibility for Scheduling

Each student is responsible for arranging a course list that will permit satisfactory progress towards degree requirements and a class schedule that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

11. Access to Courses

Departments may specify courses as not open to students who need to complete progression requirements, or as open only to students in a specific degree program (major).

12. Transfer of Degree Applicable Credits

A course taken anywhere other than UW–Madison, or by independent study or resident extension, is transferable to the College of Engineering, in credits only, if it is transferable to the UW–Madison. The course counts toward graduation only if it satisfies a graduation requirement of the curriculum to which it is to be applied and only if it was passed with a grade of C (2.0 on a 4.0 scale) or better.

13. Transfer of Grades

Grades for courses taken anywhere other than UW–Madison are not transferable, even if the credits for those courses are transferable.

14. Adding Courses

Within other limits of these regulations a student may add full-semester courses only during the first two weeks of classes. (Regulation 19).

15. Dropping Courses

Within other limits of these regulations, a student may drop full-semester courses only during the first nine weeks of classes. Courses dropped after two days before the last day to add courses are noted on the transcript as DR. (Regulations 14, 19 and 22.G.).

16. Course Substitutions

A student may substitute courses that deviate from the requirements of a published curriculum of the College of Engineering upon the recommendation of the student's degree-granting department and with the approval of the college governance committee.

17. Pass/Fail and Credit/No Credit Courses

Pass/fail is a student-option alternative way of being graded in a regularly graded course. Credit/no credit describes courses approved for two-level grading and is not a student option.

A student may change the grading option of a full-semester course to or from pass/fail only during the first four weeks of classes. (Regulation 19). These courses must be free electives. Only students in good standing may elect the pass/fail privilege.

The pass/fail agreement is between the student and the Registrar, and is not revealed to the person teaching the course. The person teaching the course submits the appropriate letter grade to the Registrar, who converts C or higher grades to S (Satisfactory), D and F grades to U (Unsatisfactory).

Courses designated as credit/no credit will not be counted in determining the number of pass/fail courses the student may elect.

18. Audited Courses

A student may audit a course only if the instructor consents. Auditors are expected to attend with a reasonable regularity and to participate in the class, as determined by the instructor. Audited courses carry no degree credit, do not count in determining the minimum number of credits permitted in each term, and are not included in the calculation of the GPA. The only valid grade for audited courses is a grade of S (Satisfactory) or NR (No Report). A student may change to or from credit to audit only during the first four weeks of classes (Regulation 19).

19. Courses Scheduled for Fewer Than 15 Weeks

Deadlines for sessions and modular courses are listed on the Office of the Registrar's website.

PERFORMANCE AND EVALUATION

20. Attendance

Each student is expected to attend all assigned classes during the regular meeting times, and take all of the examinations for those courses at the regularly scheduled times. In the case of course or examination absences excused for a reason acceptable to the course instructor, the student is expected to make up the work within a reasonable time, and may do so without a grade penalty.

21. Grading System

Course grades are reported by letter only; plus and minus grades are not authorized. The following grades are included in computing grade point average (GPA) and point-credit ratio (PCR).

Grade: A

Grade Points: Excellent

Per Credit: 4.0

Grade: AB

Grade Points: Intermediate

Per Credit: 3.5

Grade: B

Grade Points: Good

Per Credit: 3.0

Grade: BC

Grade Points: Intermediate

Per Credit: 2.5

Grade: C

Grade Points: Fair

Per Credit: 2.0

Grade: D

Grade Points: Poor

Per Credit: 1.0

Grade: F

Grade Points: Failure

Per Credit: 0.0

22. Special-Purpose Grades

The following ways of reporting course grades are also used and, except for NR, do not affect GPA or PCR

- A. S (Satisfactory) or U (Unsatisfactory) – used to report pass/fail courses (Regulation 17). S is also used in audited courses (Regulation 18).
- B. CR (Credit) or N (No Credit) – used to report credit/no credit courses (Regulation 17).
- C. NR (No Report) – signifying that no grade has been reported to the Registrar's Office – a temporary grade that must be replaced by an A-F grade; also used for a permanent grade in audited courses (Regulation 18).
- D. NW (No Work) – student enrolls in a course and then never attends. This means that instructor has no evidence that student ever attended.
- E. I (Incomplete) – a temporary grade (Regulation 27); EI is used for an extended incomplete (requires a dean's action); IN is used to indicate an incomplete in a credit/no credit course; PI is used for a permanent incomplete (Regulation 28).
- F. P (Progress) – a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.
- G. DR (Dropped) – indicates the course was dropped after the initial drop deadline noted on the Office of the Registrar's website.
- H. W (Withdraw) – indicates the student withdrew from the university after the initial drop deadline noted on the Office of the Registrar's website.

23. Course Grade Changes

The final course grade may be changed only by the professor in charge of the course section, and then only to correct a clerical error in the computation or reporting of the original grade.

24. Grade Point Average (GPA) and Point-Credit Ratio (PCR)

Grade point average (GPA) is computed by dividing the total number of grade points earned at UW–Madison by the total number of credits attempted (excluding pass/fail or credit/no credit courses) at UW–Madison. The point-credit ratio (PCR) differs from the grade point average in that it involves only those credits that count toward graduation and the related grade points. When a course is repeated, the credits and grade points earned only for the final attempt are included in the point-credit ratio.

25. Dean's Honor List

At the end of each semester the names of all full-time students in good standing with a 3.5 or higher semester GPA and cumulative GPA of at least 3.0 will be included on the Dean's Honor List. Students must have received no incompletes and no unreported grades. A notation of "Dean's Honor List" and date will be entered on the student's transcript.

26. Repeating Courses

Any course may be repeated at the student's option. In the case of a required course in which the student earned a grade of D and which is a prerequisite to another required course, the student is encouraged (or may be required by departmental regulation) to repeat the course. For courses taken more than once, all grades count in the grade point computations, but only the last grade for the course is applied to the student's point-credit ratio.

27. Incomplete

An incomplete may be reported for a student who has carried a subject with a passing grade, but because of illness or other unusual and substantiated cause beyond the student's control has been unable to complete the final examination or some limited amount of term work. A student who stays away from a final examination without proof of being prevented from attending as indicated above will receive a grade of F, N, or U (whichever is appropriate). Even with such proof, if the term work has convinced the instructor that the student cannot pass, the grade shall be F, N, or U (whichever is appropriate).

28. Resolution of an Incomplete

At the instructor's option, a course marked incomplete may be completed at any time no later than last day of class of the student's next semester of attendance at UW–Madison, or it will lapse into a fail. An incomplete may not be removed after five years of absence from UW–Madison without special permission of the dean. Such an incomplete remains on the record with a grade of PI and does not lapse into an F, N, or U.

29. Final Exam Rescheduling

A student may be permitted to take an examination at other than the regularly scheduled time only with permission of the instructor. Permission will be granted only for illness or other unusual and substantiated cause beyond the student's control. (Regulation 10).

30. Withdrawal

In order to withdraw from the University a student should consult an advisor and must obtain the dean's signature for the official withdrawal. Grades of W will be recorded for courses in progress if the student withdraws after 2 days before the last day to add classes (Regulations 14, 19 and 22.H.).

- A. After eight weeks of classes but prior to the last three weeks of scheduled classes, such withdrawal will be approved by the dean only for non-academic reasons or to transfer out of the College of Engineering.
- B. No official withdrawal will be granted in the last three weeks of scheduled classes. Grades of Incomplete, if justified (Regulation 27), or F, N, or U (instead of W) will be recorded for students who leave the University during this time.

31. Year Classification

The year classification of a student is determined by the number of credits passed and the number of grade points earned, applicable to the student's degree, as indicated by the following tabulation:

Freshman

Numerical Classification of Year: 1
 Minimum Credits Passed: 0
 Minimum Grade Points Earned: 0

Sophomore

Numerical Classification of Year: 2
 Minimum Credits Passed: 24
 Minimum Grade Points Earned: 48

Junior

Numerical Classification of Year: 3
 Minimum Credits Passed: 54
 Minimum Grade Points Earned: 108

Senior

Numerical Classification of Year: 4
 Minimum Credits Passed: 86
 Minimum Grade Points Earned: 172

For the purpose of year classification only, pass/fail and credit/no credit courses and courses transferred from another campus are assumed to have earned 2.0 grade points per credit.

32. Good Standing

A student is in good academic standing unless on academic probation or dropped.

33. Probation

A student is placed on academic probation when that student has, in the semester just completed,

- A. Attained less than a 2.0 GPA; or
- B. Passed fewer than 12 credits without part-time permission from the dean.

Once on probation, the student is continued on probation until either removed from probation or dropped (Regulations 8.A., 9.F., and 37).

34. Removal From Probation

All of the following requirements must be satisfied for the removal of a student from academic probation (Regulation 37):

- A. A cumulative GPA of at least 2.0;
- B. A GPA of at least 2.0 for the semester just completed;
- C. At least 12 credits passed in the semester just completed;
- D. A total of at least 24 degree credits passed in the two most recent semesters in residence.

35. Drop (Regulation 37)

- A. A student on academic probation will be dropped at the end of any semester for which that student has attained a GPA of less than 2.0, or passed fewer than 12 credits without part-time permission from the dean, or passed less than 3/4 of the credits attempted as a part-time student.
- B. A student not on academic probation will be dropped at the end of any semester for which that student has passed less than half of the credits attempted.

36. Readmission

A student who has been dropped for academic reasons may be readmitted by the dean only after the student has been out of the College of Engineering for at least one semester.

37. Session Actions

No academic actions (probation, drop, removed from probation) will be taken at the end of sessions (Regulation 8.D).

38. Graduation

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all the following graduation requirements have been met:

- A. Have fulfilled the published graduation requirements of that curriculum, with all substitutions formally approved, and have achieved a minimum 2.0 GPA overall.
- B. Have a PCR (Regulation 24) of at least 2.0 for those semesters and sessions containing the last 60 credits taken at UW–Madison or for all credits taken at UW–Madison if fewer than 60.
- C. A departmental PCR of at least 2.0 for all courses taken in the degree-granting department that count toward graduation.
- D. Have completed at least 30 credits in residence in the College of Engineering, including 15 credits of work in the degree-granting department.
- E. Have completed the last two semesters in residence in the College of Engineering as a full-time student.
- F. Have a GPA of at least 2.0 both for the last semester and also for the combined last two semesters.

39. Graduation with Distinction and Highest Distinction

Students who have earned at least 60 credits on the University of Wisconsin–Madison campus and whose total cumulative GPA is in the top 5 percent of the College graduating class will receive the designation "Graduated With Highest Distinction," or if in the next 15 percent, "Graduated with Distinction." The appropriate designation is entered as a permanent record on the student's transcript.

APPEAL**40. Appeal**

The Dean of the College of Engineering has the authority to suspend or modify the operation of these regulations if their enforcement is judged to work an injustice to the student.

POLICIES**ACCREDITATION**

The following engineering undergraduate degree programs described in this catalog are accredited by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org>):

Biological Systems Engineering (with College of Agricultural and Life Sciences)
 Biomedical Engineering
 Chemical Engineering
 Civil Engineering
 Computer Engineering
 Electrical Engineering
 Engineering Mechanics
 Geological Engineering
 Industrial Engineering
 Materials Science and Engineering
 Mechanical Engineering

Nuclear Engineering

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

ADDITIONAL MAJOR

Engineering students may earn an additional major in the College of Letters & Science and have the additional major noted on their transcript at the time of graduation. To qualify, the student must have approval in advance from both the department in the College of Letters & Science offering the major and the academic dean of the College of Engineering, and must satisfy all requirements for the Letters & Science major prior to or concurrently with the engineering degree. For further details, contact the College of Engineering Dean's Office, 2620 Engineering Hall.

Adding additional majors from colleges other than Letters & Science is not accepted. For example, majors such as art (School of Education) and forestry (College of Agricultural and Life Sciences) cannot be completed in conjunction with an engineering degree. Likewise, students cannot pursue more than one undergraduate engineering degree concurrently.

STUDENT GRIEVANCES

In compliance with Title IX regulations, the College of Engineering has a grievance procedure to handle student complaints. Students should follow these steps until a resolution is achieved:

1. Attempt to resolve the grievance directly with the individual involved.
2. If that approach seems unsatisfactory, and the grievance involves a teaching assistant (TA), consult the professor in charge of the course.
3. If necessary, discuss the grievance with the appropriate department chair.
4. The next level involves the academic dean. Students should contact Manuela Romero in 2620 Engineering Hall or at mromero@wisc.edu.
5. All students have the right to appeal to the dean of the college, Ian Robertson, 608-262-3482, if they feel their case has not been justly handled by another dean.
6. Only a few grievances are really serious and difficult to resolve. In these instances, the dean seeks a solution that, as best as can be determined, is appropriate, just, legal and in the best interests of all concerned.

AUTHORITY LIMITS ON GRADES

There are areas in which the dean does not have authority to override an instructor, such as determination of a student's grade. However, it has happened that the department chair has intervened, for example, by having a grade determined by committee rather than by the course instructor.

It has also occurred, by agreement between deans, department chairs and faculty, that a misgraded course was dropped from the student's record and credit given for the controversial course by having the student pass the next higher course.

GRIEVANCE EXAMPLES

The following is a list of student grievances (in no particular order of frequency or importance) that have occurred:

- Discrimination based on sex, religion or political views
- Course or exam grade disputes
- Required class or examination attendance at other than regularly scheduled (timetable) times
- Changes in course content contrary to catalog description or division approval
- Difficulty in obtaining space in a critical course
- Personality conflicts between student and instructor
- Difficulty obtaining an appointment with instructor
- Unwillingness of instructor to estimate a grade before the course drop deadline date
- Teaching above the level of the class, which includes the assumption of an unlisted course prerequisite
- Intelligibility of instructors, especially those for whom English is a second language
- Excessive instructor class absences
- Rescheduled final exams by majority approval or apparent unanimity, to possible disadvantage of the minority
- Sexual harassment (Contact Manuela Romero, 608-262-3484; Jason Jankoski, 608-890-0921; or the Division of Student Life, 75 Bascom Hall, 608-263-5700)

REQUIREMENTS**UNIVERSITY GENERAL EDUCATION REQUIREMENTS**

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING CURRICULA

The graduation requirements for each of the engineering degrees are presented in the form of four-year programs of study. These four-year schedules are available, but rarely followed without deviation. Some students can proceed more rapidly; many must proceed more slowly and take nine or more semesters to complete the degree. Flexibility in course selection is also present through elective categories within curricula.

All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org>). Among other criteria, ABET requires that students complete:

- One year of a combination of college-level mathematics and basic sciences (some with experimental experience) appropriate to the discipline.
- One and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student's field of study.
- A general education component that complements the technical content of the curriculum and is consistent with the program and institution objectives.
- In addition, students must be prepared for engineering practice through the curriculum, culminating in a major design experience based on the knowledge and skills acquired in earlier coursework and incorporating appropriate engineering standards and multiple realistic constraints.

Engineering curricula continuously evolve. The requirements that apply to a particular student are determined by the date (catalog year) that a student enters a degree-granting program. At that point, the curriculum becomes fixed throughout the period it takes for a student to complete the degree, although new changes that benefit a student can be adopted by a particular student if he or she so chooses.

The curricular descriptions below do not address how these requirements are satisfied; students seldom need to be concerned with these details. However, if deviations from a curriculum are requested, they must not violate any of the accreditation requirements.

DEVIATION FROM PRESCRIBED CURRICULA

Circumstances deemed acceptable for deviating from the outlined engineering curricula are included in each departmental description. The choice of courses to fulfill elective credit requirements provide students with considerable flexibility in their programs. In addition, some departments permit the substitution of elective courses for required ones

and also offer outstanding undergraduate students the opportunity to enroll in graduate courses. These options aid the student in tailoring a course of study to meet personal goals more closely.

DEFINITION OF ELECTIVES

There are general types of elective courses including technical electives, liberal studies and free electives.

Technical electives are limited to courses in engineering and closely related fields.

Liberal studies electives are those courses that are classified as either humanities, literature, social studies or as foreign language.

Free electives are courses completely free of any restrictions or requirements other than the course prerequisites.

Other specific elective requirements are established and described in department curricula.

To assist the student in gaining a better understanding of individuals and societies, and to reduce problems of transferring from one curriculum to another, engineering curricula require adherence to the Liberal Studies Guidelines (see below). Some require slight variations from those guidelines.

INDEPENDENT STUDY

Students who have high grade point averages may satisfy some elective credits by independent study of subjects or problems suitable for analytical investigative work. The student must identify a professor who is willing to supervise study of interest to the student. Together they must agree upon the work to be done, the credits earned (usually 1-3), and the course number (199, 299, 399, 499, 599, or 699) for which the student is to enroll before the beginning of a semester. Weekly meetings with the professor to discuss questions and report progress are customary.

LIBERAL STUDIES GUIDELINES

The College of Engineering requires one semester's worth of liberal elective courses in humanities, literature and social science for graduation. The college specifies that students should obtain both **breadth** (i.e., both social science *and* literature or humanities), and **depth** (i.e., more than one course in the same department).

The college has established general liberal elective guidelines that have been adopted by all departments, some of which have additional stipulations (see below).

FOR ALL ENGINEERING STUDENTS

As a graduation requirement, and to fulfill campus general education guidelines, all engineering undergraduate students must take 15 or 16 credits of liberal electives. These credits must fulfill the following subrequirements.

1. A minimum of two courses from the same department or program. At least one of these two courses must be above the elementary level. (i.e., must have I, A, or D level designator), as indicated in Course Guide.
2. A minimum of 6 credits designated as humanities or literature, and an additional minimum of 3 credits designated as social science. Foreign language courses count as humanities credits.¹

- At least one course of at least 3 credits designated as ethnic studies (lower case "e" in the Course Guide). These credits may help satisfy subrequirements 1 or 2 as well, but they count only once toward the total required credits.

¹ **Exception:** "Retrocredits," which are credits awarded by foreign language departments for successful completion of a higher level course, do not count toward this subrequirement, nor toward the total credits required (15 or 16). They are still helpful: If a student completes one foreign language course at the intermediate level and is awarded retrocredits, then subrequirement 1 above is satisfied because the student is judged to have achieved "depth" in liberal studies.

ADDITIONAL RESTRICTIONS/SUBREQUIREMENTS FOR SPECIFIC DEPARTMENTS

Civil and Environmental Engineering: An economics course (from an approved list) and an environmental studies course (with approved characteristics) are required.

Industrial Engineering: ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment is required.

RESOURCES

The solutions to challenges great and small lie not in the hands of one person, but emerge from the diverse ideas, perspectives and backgrounds of many people working together. Whether a prospective or current faculty member, staff member, or student, members of the College of Engineering create a welcoming community where they can be themselves and strive to become whatever they want to be. Here are some of the services and organizations that students can utilize along the way.

ENGINEERING SCHOLARSHIPS

The College of Engineering and its departments award several hundred thousand dollars of scholarships to students every year. Because engineering attracts many of the best students on campus, scholarships are quite competitive.

High school students applying for admission to UW–Madison in engineering are eligible to compete for merit-based scholarships set aside for new freshmen. Applications for these Engineering Freshman Academic Achievement Awards are available through My UW–Madison once students apply for admission to the university. Visit Scholarships@UW-Madison (<http://scholarships.wisc.edu/Scholarships>) for details.

Note that the application deadline indicated on the form is strictly enforced. Students should therefore not wait for notification that they have been admitted to UW–Madison before they apply for a freshman scholarship.

Once students enter an engineering department, they are typically eligible to apply for a variety of departmental merit-based scholarships. Since deadlines vary and new opportunities are continually announced, students should contact their department office for current information at least once a semester. A very few college-wide scholarships and awards are made each year. For the most part, these do not require an

application. Those that do are widely advertised by e-mail and by posters displayed on bulletin boards throughout engineering buildings.

ACADEMIC ADVISING

Each College of Engineering program has academic advisors (<https://www.engr.wisc.edu/academics/student-services/academic-advising>) dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor in their student center.

UNDERGRADUATE LEARNING CENTER

The Undergraduate Learning Center (<https://www.engr.wisc.edu/academics/student-services/ulc>) (ULC) in the College of Engineering provides tutoring and academic support programs for engineering undergraduates wanting to excel in their courses. The ULC is a place where students study, form study groups, and discuss engineering concepts and problem solving strategies with their peers and with the tutors and facilitators.

Drop-In-Tutoring Sessions

Sessions are offered for over 50 courses in mathematics, chemistry, physics, statistics, and engineering. The sessions provide help with homework problems and exam preparation. Drop-in tutoring sessions are offered each evening from Sunday to Thursday, resulting in approximately 10,000 student visits last year.

PrEPS (Practicing Engineering Problem Solving) Labs

Labs were developed to help students succeed in core courses that have traditionally proved challenging for students. The courses targeted are early in the engineering curricula and contain dense material content delivered at a fast pace. The labs reinforce concepts through practicing problem solving skills. Students commit to meeting twice every week for 60–75 minutes per meeting.

PrEPS Study Tables

Study tables support the same courses as the PrEPS Labs but with a less structured approach. PrEPS Study Tables allow small groups of students who are interested in extra study time to meet regularly to discuss homework and concepts from the course.

Tutoring by Request

Based on the Tutorial Services Room model developed at MIT, the College of Engineering offers Tutoring by Request (TBR) for students in critical need. Assistance is offered in a variety of courses, ranging from gateway courses, such as chemistry, math, physics courses, and other intermediate-level engineering courses.

Special Courses and Workshops

Special courses are targeted toward helping students learn topics that span multiple courses such as math concepts common to a variety of introductory engineering courses. Workshops are offered in topics such as MATLAB and vector review to help students be successful in their engineering courses.

INTERNATIONAL ENGINEERING STUDIES & PROGRAMS

In today's global marketplace, there is an increasing need for broadly educated engineering graduates with cross-cultural skills, international understanding and proficiency in more than one language. The College of Engineering is committed to providing and expanding international

opportunities that will assist engineering students in obtaining these important skills.

International Engineering Studies and Programs (<http://international.engr.wisc.edu>) (IESP) runs semester, year-long and summer study abroad programs at leading engineering schools in many countries around the world. These programs, selected specifically for engineering students, help ensure students have a meaningful experience abroad and continue to make progress toward degree requirements.

The college also offers a certificate in international engineering. Courses in language and culture taken abroad and in Madison can count toward this certificate, which demonstrates the student's knowledge of a specific country or region. This credential appears on the student's transcript, strengthens the resume, and testifies to their preparation for an international career.

For more information, contact the International Engineering Studies & Programs Office at international@engr.wisc.edu or 608-263-2191.

ENGINEERING CAREER SERVICES WITH COOPERATIVE EDUCATION

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website (<https://www.engr.wisc.edu/academics/student-services/career-services>) or call 608-262-3471.

DIVERSITY AFFAIRS OFFICE

The mission of the Diversity Affairs Office (<https://www.engr.wisc.edu/academics/student-services/diversity-programs>) is to recruit, retain and graduate underrepresented students of color, women, low-income students, and students who are educationally disadvantaged. The office has program initiatives in four primary areas:

Pre-college engagement in science and engineering fields, and recruiting qualified students to engineering

The DAO provides qualified students with scholarships through the Leaders in Engineering Excellence and Diversity (LEED) Scholars program. A minimum cumulative GPA of 2.8 is required for annual scholarship continuation.

Academic and social support

The DAO provides adjunct academic advising, study groups for challenging first-year courses, office study and gathering spaces, and referral services to promote student connections and academic excellence. Once a month, the DAO hosts a LEED Scholars meeting designed to promote community within the College of Engineering. LEED Scholars events are generally open to any student interested in a diverse learning community.

The DAO also supports the efforts of the following Registered Student Organizations: National Society of Black Engineers (NSBE-

WBESS), Society of Hispanic Professional Engineers (SHPE), and Society of Women Engineers.

Diversity and inclusion

In cooperation with other offices and departments, the DAO develops programs and provides services designed to promote a welcoming climate that celebrates diversity for everyone in the College of Engineering. The variety of events and projects include: Women in Engineering events, a biannual college climate survey, Diversity Discussions, Teaching Assistant Training, and student data analysis aimed at broadening participation in engineering.

COMPUTER-AIDED ENGINEERING CENTER

The Computer-Aided Engineering Center (CAE) (<http://www.cae.wisc.edu>) provides computing resources, facilities and services for students, faculty, and staff in the college. The broad range of services and resources include:

- Windows and Linux computer classrooms;
- open labs which have Windows and Linux workstations;
- industry-standard engineering software;
- software and services available on students' personal computers;
- reliable file storage for coursework;
- customer consulting and help-desk services.

The CAE walk-in help desk is located at 1410 Engineering Drive; helpdesk@cae.wisc.edu; ([helpdesk@cae.wisc.edu](tel:608-262-5349)) 608-262-5349. For more information, see the CAE website (<http://www.cae.wisc.edu>).

COUNSELING SERVICES

Confidential counseling services are available through University Health Services (<https://www.uhs.wisc.edu>) at no cost to engineering students. It is easier to concentrate on studies if one can deal effectively with personal, academic, and career concerns. Talking with someone who is objective and empathetic can help students sort through such concerns. Appointments can be made by phone or in person.

University Health Services
333 East Campus Mall
Madison, WI 53715-1384
608-265-5600

REGISTERED STUDENT ORGANIZATIONS

The College of Engineering offers so much more than just a first-class engineering education. Students have access to a wide variety of groups, opportunities, organizations and services that will help make their time on campus memorable and unique. There are more than 50 engineering affiliated student organizations (<https://www.engr.wisc.edu/academics/beyond-the-classroom/student-organizations>) on campus. Students can get involved in organizations that range from competitive—such as teams that build and race vehicles or concrete canoes—to service-oriented, honors societies, and student government. The College of Engineering also offers many discipline-related student chapters of professional organizations that will connect students with their peers and also help them make professional contacts.

HONORS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in

challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates—not just a few—excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

ENGINEERING HONORS IN RESEARCH

Select students in degree-granting departments may pursue the Honors in Research distinction in certain departments. It requires completion of a certain number of semesters of faculty-guided independent study work and completion of a written thesis. Honors in Research programs have been developed for majors in biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering mechanics, geological engineering, industrial engineering, materials science and engineering, mechanical engineering, and nuclear engineering. Interested students should contact their department for more information.

ENGINEERING HONORS IN THE LIBERAL ARTS (EHLA)

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 31 of their last year in high school. Fewer than 30 students are admitted each year. Interested students should contact Dr. Andrew Greenberg at greenberg2@wisc.edu for an application.

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "I" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

BIOMEDICAL ENGINEERING

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications

of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year M.S degree following the undergraduate program.

The cornerstone of the BME program is its **unique, seven-semester design curriculum**. Students take an advising/design project course the freshman year and every semester during the sophomore through senior years. A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their project, conduct discussions, and expose the students to various aspects of the BME field. Over the course of each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. **Bioinstrumentation** is the application of electronics, computer programming, and measurement principles to develop devices used in diagnosis and treatment of disease. Examples of devices and techniques that have emerged from this discipline include the electrocardiogram, the cardiac pacemaker, blood pressure measurement, brain-computer interface, implantable electrodes, sensors, tumor ablation and other medical devices. Also within the field of bioinstrumentation, micro-electromechanical systems (BioMEMS) can be used to engineer instruments and methods for research at the cellular scale, and neuroengineering applies these principles to study the function of neural systems and the development of implantable technology.
2. **Bioimaging** involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), bioimaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. **Biomechanics** applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the

mechanics of connective tissues (ligament tendon, cartilage and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling (pulmonary hypertension), muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering (quantifying, adapting and restoring function for those who lost abilities).

4. **Biomaterials/cellular/tissue engineering** involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure–function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, and apoptosis.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and **biomechanics** of human movement as well as the mechanical and material properties of the prosthetic device. The **material** choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the implant. In addition, **bioimaging** techniques are required to characterize the morphology of the diseased hip and the success of the procedure. Finally, **instrumentation** devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the B.S. degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the B.S. program are eligible to apply for the one-year M.S. degree.

BIOMEDICAL ENGINEERING, B.S.

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year M.S degree following the undergraduate program.

The cornerstone of the BME program is its **unique, seven-semester design curriculum**. Students take an advising/design project course the freshman year and every semester during the sophomore through senior years. A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their project, conduct discussions, and expose

the students to various aspects of the BME field. Over the course of each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. **Bioinstrumentation** is the application of electronics, computer programming, and measurement principles to develop devices used in diagnosis and treatment of disease. Examples of devices and techniques that have emerged from this discipline include the electrocardiogram, the cardiac pacemaker, blood pressure measurement, brain–computer interface, implantable electrodes, sensors, tumor ablation and other medical devices. Also within the field of bioinstrumentation, micro-electromechanical systems (BioMEMS) can be used to engineer instruments and methods for research at the cellular scale, and neuroengineering applies these principles to study the function of neural systems and the development of implantable technology.
2. **Bioimaging** involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), bioimaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. **Biomechanics** applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the mechanics of connective tissues (ligament tendon, cartilage and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling (pulmonary hypertension), muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering (quantifying, adapting and restoring function for those who lost abilities).
4. **Biomaterials/cellular/tissue engineering** involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure–function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, and apoptosis.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and **biomechanics** of human movement as well as the mechanical and material properties of the prosthetic device. The **material** choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the

implant. In addition, **bioimaging** techniques are required to characterize the morphology of the diseased hip and the success of the procedure. Finally, **instrumentation** devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the B.S. degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the B.S. program are eligible to apply for the one-year M.S. degree.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in

residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

MAJOR REQUIREMENTS

MATHEMATICS

Code	Title	Credits
MATH 221 & MATH 222 & MATH 234	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2 and Calculus—Functions of Several Variables	13

MATH 320	Linear Algebra and Differential Equations	3
or MATH 319	Techniques in Ordinary Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
or STAT 224	Introductory Statistics for Engineers	
or STAT/ MATH 431	Introduction to the Theory of Probability	

SCIENCE

Code	Title	Credits
COMP SCI 301	Introduction to Data Programming	3
or COMP SCI 200	Programming I	
or COMP SCI 300	Programming II	
or COMP SCI 310	Problem Solving Using Computers	
E M A 201	Statics (only statics counts for Engineering credits below)	3
or PHYSICS 201	General Physics	
or PHYSICS 207	General Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
CHEM 109	Advanced General Chemistry (or CHEM 103 & CHEM 104)	5
CHEM 343	Introductory Organic Chemistry	3
or CHEM 341	Elementary Organic Chemistry	
CHEM 345 & CHEM 344	Intermediate Organic Chemistry and Introductory Organic Chemistry Laboratory	5
or CHEM 327	Fundamentals of Analytical Science	
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory (or)	5
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology (or)	
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	
PHYSIOL 335	Physiology (or)	5
PHYSIOL 435	Fundamentals of Human Physiology (or)	
BIOCORE 485 & BIOCORE 486	Organismal Biology and Organismal Biology Laboratory	
ANATOMY/ KINES 328	Human Anatomy	3
or ZOOLOGY 430	Comparative Anatomy of Vertebrates	
or ZOOLOGY 470	Introduction to Animal Development	
or ZOOLOGY/ PSYCH 523	Neurobiology	
or ZOOLOGY 570	Cell Biology	
or ZOOLOGY 611	Comparative and Evolutionary Physiology	
or GENETICS 466	Principles of Genetics	
or BIOCORE 587	Biological Interactions	

GENERAL EDUCATION

Code	Title	Credits
<i>Communications A</i> 3		
LSC 100	Science and Storytelling	
or COM ARTS 101	Introduction to Speech Composition	
or ENGL 100	Introduction to College Composition	
or ESL 118	Academic Writing II	

Communications B

E P D 397	Technical Communication	3
or ZOOLOGY/ BIOLOGY/ BOTANY 152	Introductory Biology	
or BIOCORE 384	Cellular Biology Laboratory	

At least 15 credits of liberal studies following the College of Engineering guidelines 15

ENGINEERING COURSES

Code	Title	Credits
<i>Introduction to Engineering</i> 2		
INTEREGR 110 & INTEREGR 170	Introduction to Engineering and Design Practicum ¹	

Required engineering mechanics core courses 6

E M A 201	Statics	
E M A 303	Mechanics of Materials	
or M E 306	Mechanics of Materials	

Required BME core courses 18

B M E 200	Biomedical Engineering Design	
B M E 201	Biomedical Engineering Fundamentals and Design	
B M E 300	Biomedical Engineering Design	
B M E 301	Biomedical Engineering Design	
B M E 310	Bioinstrumentation	
B M E 315	Biomechanics	
B M E 400	Capstone Design Course in Biomedical Engineering	
B M E 402	Biomedical Engineering Design	
B M E/ PHM SCI 430	Biological Interactions with Materials	

Engineering area technical electives (see below) 15

One advanced BME technical elective from any area selected from an approved list of courses 3

Engineering technical elective: Any engineering course(s) from a degree-granting engineering program² 4

- ¹
- Both INTEREGR 110 Introduction to Engineering and INTEREGR 170 Design Practicum are required.
 - INTEREGR 170 counts toward the required 48 engineering credits.
 - INTEREGR 110 counts as a general degree credit, not as an engineering credit.

- ²
- EPD courses are not included in this category
 - InterEGR courses are not included in this category except INTEREGR 301 Engineering and Biology: Technological Symbiosis.
 - Only 3 credits of an engineering independent study may count (e.g., B M E 399 Independent Study, B M E 489 Honors in Research, CBE 699 Advanced Independent Studies, etc.).

- Special topics courses must have prior approval of the BME Curriculum Committee.

BIOMEDICAL ENGINEERING AREA TECHNICAL ELECTIVE REQUIREMENTS

Choose 15 credits of area technical electives in one of the following tracks and at least one advanced BME elective:

Bioinstrumentation:

Code	Title	Credits
Required Area Elective		
E C E 230	Circuit Analysis	4
Area Electives in Bioinstrumentation		11
Choose from any ECE course and from the advanced BME area electives in Bioinstrumentation		
Advance BME Area Technical Electives in Bioinstrumentation		
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/ MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3

Biolmaging:

Code	Title	Credits
Required Area Elective		
E C E 330	Signals and Systems	3
Area Electives in Biolmaging		12
Choose from the following and from the advanced BME area electives in Biolmaging		
E C E 203	Signals, Information, and Computation	3
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E/COMP SCI 533	Image Processing	3
B M E/H ONCOL/ MED PHYS/ PHYSICS 501	Radiological Physics and Dosimetry	3
B M E/ MED PHYS 566	Physics of Radiotherapy	4
B M E/ MED PHYS 567	The Physics of Diagnostic Radiology	4
B M E/ MED PHYS 573	Medical Image Science: Mathematical and Conceptual Foundations	3
B M E/ MED PHYS 574	Imagine in Medicine: Applications	3
N E 305	Fundamentals of Nuclear Engineering	3
N E 408	Ionizing Radiation	3
N E 427	Nuclear Instrumentation Laboratory	2

Advanced BME Area Technical Electives in Biolmaging

B M E/ MED PHYS 530	Medical Imaging Systems	3
B M E/ MED PHYS 578	Non-Ionizing Diagnostic Imaging	3
B M E/MED PHYS/ PHMCOL-M/ PHYSICS/ RADIOL 619	Microscopy of Life	3
B M E/CHEM/ MED PHYS 650	Biological Optical Microscopy	3

Biomechanics:

Code	Title	Credits
Required Area Elective		
E M A 202 or M E 240	Dynamics	3
Area Electives in Biomechanics		12
Choose from any ME or EMA course and from the advanced BME area electives in Biomechanics		
Advanced BME Area Technical Electives		
B M E 505	Biofluidics	3
B M E/I SY E 564	Occupational Ergonomics and Biomechanics	3
B M E/M E 603	Topics in Bio-Medical Engineering	1-3
B M E 615	Tissue Mechanics	3

Biomaterials/Cell/Tissue Engineering:

Code	Title	Credits
Required Area Elective		
B M E/CBE 330 or B M E/CBE 320	Engineering Principles of Molecules, Cells, and Tissues Introductory Transport Phenomena	3-4
Area Electives in Biomaterials/Cell/Tissue Engineering		12
Choose from any CBE or MS&E course, the courses below, and from the advanced BME area electives in Biomaterials/Cell/Tissue Engineering		
M E 417	Introduction to Polymer Processing	3
M E 418	Engineering Design with Polymers	3
B M E 511	Tissue Engineering Laboratory	1
Advanced BME Area Technical Electives in Biomaterials/Cell/Tissue Engineering		
B M E/CBE 510	Introduction to Tissue Engineering	3
B M E/CBE 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3
B M E/CBE 560	Biochemical Engineering	3
B M E 615	Tissue Mechanics	3
B M E/CHEM/ MED PHYS 650	Biological Optical Microscopy	3

TOTAL DEGREE CREDITS: AT LEAST 128**UNIVERSITY DEGREE REQUIREMENTS****Requirements Detail**

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

At the time of graduation, UW-Madison Biomedical Engineering students will have attained:

- an ability to apply knowledge of mathematics (including differential equations and statistics), science, and engineering to solve problems at the interface of engineering and biology.
- an ability to design and conduct experiments (including making measurements) on, as well as to analyze and interpret data from living systems; addressing the problems associated with the interaction between living and non-living materials and systems.
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- an ability to function on multidisciplinary and diverse teams and provide leadership.
- an ability to identify, formulate, and solve biomedical engineering problems.
- an understanding of professional and ethical responsibility.
- an ability to communicate effectively: by oral, written and graphic modes.
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- a recognition of the need for, and an ability to engage in life-long learning.
- a knowledge of contemporary issues.

(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

(l) and an understanding of biology, human physiology, and chemistry as related to biomedical engineering needs.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits Spring	Credits
INTEREGR 110 ¹	1 INTEREGR 170 ¹	2
MATH 221	5 MATH 222	4

	17	17

Total Credits 128

FOOTNOTES

Med—These courses are identified as requirements for most medical schools and are included within the 128 degree credits. Students not wishing to attend medical school may choose other listed options. Choosing other options (such as CHEM 103/CHEM 104 vs. CHEM 109 or E P D 397 vs. ZOOLOGY/BIOLOGY/BOTANY 152) will affect the total number of credits.

Medical schools have varying requirements. Liberal electives, free electives, and zoology electives can often be used to satisfy these.

Check requirements early. For example, to prepare for the MCAT it is recommended that students take psychology and sociology. In addition, UW—Madison and others require an intermediate humanities or social science with an intensive writing component (Comm B). All these can be fulfilled within the liberal studies requirements and thus early planning starting freshman year is important. A good resource is: <http://prehealth.wisc.edu/>.

¹ INTEREGR 110 Introduction to Engineering and INTEREGR 170 Design Practicum are both required. Only INTEREGR 170 counts toward the required 48 engineering credits. INTEREGR 110 is required only for students directly admitted to engineering programs as freshman.

² CHEM 103 General Chemistry I & CHEM 104 General Chemistry II may be substituted for CHEM 109 Advanced General Chemistry. For this choice, the excess 4 credits are counted as free electives. Most medical schools require one year of basic chemistry. UW—Madison's medical school (and others) accepts CHEM 109 as a full-year equivalent.

³ If PHYSICS 201 General Physics is chosen instead of E M A 201 Statics, another engineering course from a degree-granting engineering program must be substituted for E M A 201 Statics. The excess 5 credits from PHYSICS 201 General Physics are counted as free elective credits. PHYSICS 207 General

Physics–PHYSICS 208 General Physics may be used to substitute for PHYSICS 201–PHYSICS 202.

- 4 CHEM 341 Elementary Organic Chemistry may be substituted by those students who are not interested in satisfying premed requirements and who expect to take only one semester of organic chemistry (CHEM 341 is not permitted as a prerequisite for CHEM 344 Introductory Organic Chemistry Laboratory/CHEM 345 Intermediate Organic Chemistry).
Either CHEM 344/CHEM 345 or CHEM 327 Fundamentals of Analytical Science (or CHEM 329 Fundamentals of Analytical Science) is required.

Premeds or students interested in biomaterials/cellular/tissue engineering should choose to take CHEM 343, CHEM 344 and CHEM 345.

- 5 Students who are admitted late to the program and/or students who take part in another experience (such as co-op and/or study abroad) missing B M E 200 Biomedical Engineering Design, B M E 300, B M E 301, or B M E 402 may substitute for up to two of these course for the semester they are not in the program or at UW-Madison. Approved substitutions include: B M E 1 Cooperative Education Program 1 cr, engineering research credit, or any 200-level or above additional engineering technical elective lab experience. For more information on the unique design sequence see: <http://bmedesign.engr.wisc.edu/about/>.

- 6 Students very serious about medical school and learning about biology may select to apply for BIOCORE, a rigorous biology honors program:

- BIOCORE 381 Evolution, Ecology, and Genetics
- BIOCORE 382 Evolution, Ecology, and Genetics Laboratory
- BIOCORE 383 Cellular Biology
- BIOCORE 384 Cellular Biology Laboratory
- BIOCORE 485 Organismal Biology
- BIOCORE 486 Organismal Biology Laboratory

The BIOCORE courses have limited enrollment and students must be accepted into this program (applying as freshman). It is generally advisable to complete the entire sequence once it is started.

Only BIOCORE 382 Evolution, Ecology, and Genetics Laboratory is not required and is not necessary to fulfill premed requirements; however, it is recommended as it has been helpful in understanding the BIOCORE lab process. If all the other BIOCORE courses are taken (a total of 16 cr), this will replace the ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory, the Advanced Life Science Elective, PHYSIOL 335 Physiology, and E P D 397 Technical Communication.

- 7 The three core courses are all required: B M E 310 Bioinstrumentation, B M E 315 Biomechanics, B M E/PHM SCI 430 Biological Interactions with Materials, but they can be taken in any order. It is recommended that students take one in the track of interest first, or as early as possible.
- 8 ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology, which satisfies Communication Part B, may be substituted for E P D 397 Technical Communication. For the Biocore program, BIOCORE 384 Cellular Biology Laboratory substitutes for E P D 397 Technical Communication.

Students interested in going to medical school should use this space/credits for BIOCHEM 501 Introduction to Biochemistry which is required for the MCAT.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

CHEMICAL AND BIOLOGICAL ENGINEERING

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

CHEMICAL ENGINEERING, B.S.

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing,

making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by

stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students admitted to the chemical engineering degree program.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics		19
Physics		10
Chemistry		20
Life Science		6
Core Engineering Requirement		48
Professional Breadth		6
Communication Skills		2
Liberal Studies Requirement		16
Free Electives		6
Total Credits		133

MATHEMATICS REQUIREMENT

Transfer students must have equivalent math courses to meet the calculus requirement with a minimum of 12 credits to cover the three-course basic math sequence. Any deficiency in total math credits must be made up with electives in science or engineering.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
or MATH 319	Techniques in Ordinary Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

PHYSICS REQUIREMENT

Transfer students who receive fewer than 6 credits for the required courses must make up the credit shortage with another physics course.

Code	Title	Credits
PHYSICS 201	General Physics	5
or PHYSICS 207	General Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
Total Credits		10

CHEMISTRY REQUIREMENT

Credit shortages cause by transfer of freshman chemistry courses at fewer than 9 credits must be made up with chemistry, biochemistry, or chemical engineering courses.

Code	Title	Credits
<i>General Chemistry (choose one)</i>		5
CHEM 109	Advanced General Chemistry ((preferred))	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 329	Fundamentals of Analytical Science	4
CHEM 343 & CHEM 345 & CHEM 344	Introductory Organic Chemistry and Intermediate Organic Chemistry and Introductory Organic Chemistry Laboratory	8
CHEM 562	Physical Chemistry	3
Total Credits		20

LIFE SCIENCE

Students who meet the Introductory Biology requirement with an AP exam are encouraged to take two advanced biology electives.¹

Code	Title	Credits
<i>Introductory Biology requirement (choose one)</i>		3
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
<i>Advanced Biology requirement (choose one)</i>		3
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
ZOOLOGY 570	Cell Biology	
GENETICS 466	Principles of Genetics	
MICROBIO 303	Biology of Microorganisms	
Total Credits		6

¹ BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 Cellular Biology may be used to satisfy the Life Sciences Requirements.

CORE ENGINEERING REQUIREMENT

Code	Title	Credits
CBE 250	Process Synthesis	3
CBE 255	Introduction to Chemical Process Modeling	3
CBE 310	Chemical Process Thermodynamics	3
CBE 311	Thermodynamics of Mixtures	3
CBE/B M E 320	Introductory Transport Phenomena	4

CBE 324	Transport Phenomena Lab	3
CBE 326	Momentum and Heat Transfer Operations	3
CBE 424	Operations and Process Laboratory	5
CBE 426	Mass Transfer Operations	3
CBE 430	Chemical Kinetics and Reactor Design	3
<i>Select one of the following:</i>		3
CBE 440	Chemical Engineering Materials	
CBE 540	Polymer Science and Technology	
CBE/E C E/ M S & E 544	Processing of Electronic Materials	
CBE 547	Introduction to Colloid and Interface Science	
CBE 450	Process Design	3
CBE 470	Process Dynamics and Control	3
CBE Electives ²		6
Total Credits		48

² Chemical engineering electives may be chosen from any of the chemical engineering courses that are not required, with the exception of CBE/CHEM/E M A/M E 425 Undergraduate Rheology Seminar. A maximum of 2 credits of co-op work (CBE 1 Cooperative Education Program) may be applied to meet the CBE elective requirement. BSE/FOOD SCI 542 Food Engineering Operations and BSE/FOOD SCI 642 Food and Pharmaceutical Separations can be taken as CBE elective courses. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement. Engineering elective courses are to be selected from the College of Engineering (preferably outside chemical engineering). At least 1 of the 3 credits must be obtained from a list of approved courses in the *CBE Curriculum Guide* that carry engineering topics credits. A maximum of 6 credits of CBE 599 Special Problems and/or CBE 699 Advanced Independent Studies may be used to satisfy the 9-credit sequence of CBE and engineering elective courses.

PROFESSIONAL BREADTH

Select 6 credits

Code	Title	Credits
Professional Breadth Credits³		6
<i>Courses 300+ from the following College of Engineering departments and programs may be used:</i>		
	Biomedical Engineering	
	Civil and Environmental Engineering	
	Electrical and Computer Engineering	
	Engineering Mechanics and Astronautics	
	Engineering Professional Development (200 level and higher)	
	Geological Engineering	
	Industrial Engineering	
	Interdisciplinary Courses (200 level and higher)	
	Materials Science and Engineering ⁴	
	Mechanical Engineering	
	Nuclear Engineering	
	Engineering Physics	

Courses 300+ from the following departments in the College of Letters and Sciences may be used:

Chemistry		
Computer Sciences		
Math		
Physics		
<i>The following courses may also be used:</i>		
ACCT I S 300	Accounting Principles	
MICROBIO 303	Biology of Microorganisms	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 383	Cellular Biology	
BSE/ FOOD SCI 642	Food and Pharmaceutical Separations	
ECON/A A E/ ENVIR ST 343	Environmental Economics	
ENVIR ST/ PHILOS 441	Environmental Ethics	
FINANCE/ ECON 300	Introduction to Finance	
GENETICS 466	Principles of Genetics	
HIST SCI 337	History of Technology	
STAT/M E 424	Statistical Experimental Design	
ZOOLOGY 570	Cell Biology	
Total Credits	6	

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

³ The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

⁴ Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S & E 350 Introduction to Materials Science. In this case M S & E 350 will be awarded only 1 degree credit.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition ⁵	3
	or COM ARTS 100 Introduction to Speech Composition	
	or LSC 100 Science and Storytelling	
	or ESL 118 Academic Writing II	

⁵ For Part A of the General Education Communication Requirement (2 cr) students must select one course with an "a" designation in "g" of the "geBLC" information in the Course Guide. Some students will be

exempt from this requirement based on their placement test scores or advanced placement in English.

CBE 424 Operations and Process Laboratory satisfies Part B of the General Education Communication Skills Requirement.

LIBERAL STUDIES ELECTIVES

Students must complete 16 credits of liberal studies according to the College of Engineering requirements⁶.

- ⁶ 1. Liberal studies elective courses must be classified as either Humanities, Social Studies, or Literature courses (identified by the letters H, S, L, or Z in "B" of the "geBLC" information in the Course Guide). At least 6 credits must have a breadth designation of Humanities (H, L, or Z), and at least 3 credits must have a designation of Social Studies (S or Z). Foreign language courses count as H credits.
2. A 3-credit ethnic studies course must be selected from the College of Letters & Science. Acceptable courses are identified by the letter "e" in the Course Guide. If appropriate, the ethnic studies course may be among those used to satisfy the concentration requirement.
3. Retroactive credits may be awarded for foreign-language work done in high school. The following conditions apply:
 - A university-level foreign language course must be taken before the student has earned 30 college credits in residence.
 - Retroactive Language Credit Request Form must be completed and submitted to the language instructor during the first two weeks of class.
 - The student must earn a B or better in this course.
 - Such credits do not count toward the 16 liberal-studies credits required. They may, however, be used to satisfy the concentration and depth requirements stated in item 2 above and count as degree credits.
4. English composition courses, English as a second language courses, and basic communications arts courses are not accepted as liberal studies electives.

FREE ELECTIVES

Students can choose any combination of courses totaling 6 credits⁷.

- ⁷ Students who satisfy the Communications Part A requirement by examination will have an additional 2 credits of free electives. Transfer students who receive fewer transfer credits for a required course than are given for the same course on the Madison campus must increase their free elective credits to meet the minimum 133 total credit requirement for the chemical engineering degree.

COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.
2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.
3. Restrictions on course substitutions are as follows:
 - a. Physics course may be replaced by science or engineering courses.
 - b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
 - c. Engineering courses must be replaced by engineering courses.

- d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
- e. English as a second language courses, and MATH 112, MATH 113 and MATH 114 may not be used for course substitutions.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

At the time of graduation, UW-Madison Chemical Engineering students will have attained:

- a. an ability to apply knowledge of mathematics, science, and engineering.
- b. an ability to design and conduct experiments, as well as to analyze and interpret data.
- c. an ability to design a system, component, or process to meet desired needs within realistic constraints.
- d. an ability to function on multi-disciplinary teams.
- e. an ability to identify, formulate, and solve engineering problems.
- f. an understanding of professional and ethical responsibility.
- g. an ability to communicate effectively.
- h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- i. a recognition of the need for, and an ability to engage in life-long learning.
- j. a knowledge of contemporary issues.
- k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- l. ability with engineering application of the basic sciences to the design, analysis, and control of chemical, physical, and biological processes, including the hazards associated with these processes.

CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering offers an ABET-accredited B.S. degree in civil engineering and M.S. and Ph.D. degrees in

civil and environmental engineering. The B.S. degree in civil engineering may be accompanied by an option in environmental engineering, fluid systems engineering, or in construction engineering and management.

Civil engineers have been and still are the builders of our world, involved in the planning of our cities, communities, and larger regional areas. They are responsible for the conception, design, and construction of public works such as highways, streets, bridges, drinking water distribution systems, wastewater collection systems, drinking water and wastewater treatment plants, stormwater management systems, dams, reservoirs, power production, navigation and recreation, as well as the buildings, theaters, stadiums, factories and airports in which we live, work, and play.

The environment has long been the province and concern of civil engineers. Thus, civil engineers are continuously responding to society's ecological and environmental problems by joining with other engineers, as well as with physical, biological, chemical, and social scientists, to protect our natural resources and to create a sustainable physical and social environment for all people. Civil engineers are aware of the complexities of these problems and that they cannot merely focus on building and construction; they must understand the impact of engineering designs on society and the environment, and be prepared to play a vital role on interdisciplinary environmental teams.

The Department of Civil and Environmental Engineering offers a curriculum that provides a balanced program of technical and nontechnical courses to meet the needs of students interested in studying civil and environmental engineering. The curriculum includes basic courses in mathematics, chemistry, physics, biology, earth sciences, engineering sciences, as well as the fundamentals of civil engineering in the areas of structural engineering, geotechnical engineering, construction engineering and management, transportation engineering, land information and surveying, water resources engineering and environmental engineering. Students may then choose elective courses in multiple areas or specialize in one or more areas of interest. Also, the department cooperates with interdisciplinary programs at both the undergraduate and graduate levels, including business, environmental studies, water resources management, oceanography and limnology, land resources, environmental monitoring, geological engineering, and environmental chemistry and technology.

In view of the increasing demands of modern technology, the traditional undergraduate curriculum can only offer the fundamentals of civil and environmental engineering to the student. Qualified undergraduates are encouraged to pursue the civil and environmental engineering master's degree program as a means of incorporating additional courses on engineering analysis, design, and synthesis into their academic studies. The undergraduate degree is also sufficiently broad to prepare students for advanced degrees in other fields such as law, medicine, public health, and business.

Students applying to UW–Madison (<https://www.admissions.wisc.edu/> apply) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements

are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students who were admitted to the civil engineering degree program (classification changed to CEE) in fall 2016 or later

Summary of Requirements

Code	Title	Credits
	Introduction to Engineering	3
	Mathematics and Statistics	19
	Basic Science	16
	Engineering Mechanics	10
	Civil Engineering Mechanics	6
	Civil Engineering Tools	6
	Civil Engineering Breadth	21
	Civil Engineering Design	10
	Civil Engineering Electives	12
	Communications	8
	Liberal Studies	16
	Free Electives	1
	Total Credits	128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 110	Introduction to Engineering	1
INTEREGR 170	Design Practicum	2
	Total Credits	3

MATHEMATICS AND STATISTICS REQUIREMENT

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
	<i>One of the following courses:</i>	3
STAT 324	Introductory Applied Statistics for Engineers	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I ¹	

One of the following advanced mathematics courses: 3

MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations	
	Total Credits	19

¹ For students who take STAT 311 Introduction to Theory and Methods of Mathematical Statistics I, which is 4 credits, the excess credit may be used in the Applied Engineering Requirement.

BASIC SCIENCE REQUIREMENT

Code	Title	Credits
	<i>One of the following:</i>	5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
	<i>One of the following:</i>	5
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
	<i>One of the following:</i>	3
GEOSCI 100	General Geology	
GEOSCI/ ENVIR ST 106	Environmental Geology	
	<i>One of the following:</i>	3
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BOTANY/ ENVIR ST 260	Introductory Ecology	
MICROBIO 101	General Microbiology	
	Total Credits	16

ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
E M A 201	Statics	3
E M A 202	Dynamics	3
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
E M A/M E 307	Mechanics of Materials Lab	1
	Total Credits	10

CIVIL ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
CIV ENGR 310	Fluid Mechanics	3
CIV ENGR/E M A 395	Materials for Constructed Facilities	3
	Total Credits	6

CIVIL ENGINEERING TOOLS REQUIREMENT

Code	Title	Credits
M E 170	Civil Engineering Graphics	2
or M E 231	Introductory Engineering Graphics	

CIV ENGR XXX: Engineering Spatial Measurements ¹	2
CIV ENGR XXX: Problem Solving Using Computer Tools ¹	2
Total Credits	6

¹ Course numbers to be determined.

CIVIL ENGINEERING BREADTH REQUIREMENT

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	4
CIV ENGR 340	Structural Analysis I	4
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 494	Civil and Environmental Engineering Decision Making	3
CIV ENGR 498	Construction Project Management	3
Total Credits		23

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4
	Every student must take at least one class in at least two of the following CEE disciplines, for a total of 6 credits. One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.	6

Water Resources

CIV ENGR 414	Hydrologic Design	
--------------	-------------------	--

Environmental

CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	

Structural

CIV ENGR 442	Wood Structures I	
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
CIV ENGR 641	Highway Bridges	

Geological

CIV ENGR/G L E 530	Seepage and Slopes	
CIV ENGR/G L E 531	Retaining Structures	
CIV ENGR/G L E 532	Foundations	

Transportation

CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).

Total Credits 10

ENGINEERING ELECTIVES REQUIREMENT

- Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.
- Students must take at least 3 credits of CEE coursework in addition to the civil engineering design requirement. **Note:** Students in the Construction Engineering Management or Environmental option programs must select from a set of CIV ENGR courses approved for those options. ^{1,2}
- Students must take at least 6 credits of coursework that meets at least one of the following ^{1,2}:
 - Any course offered by an engineering department, including but not limited to CIV ENGR.
 - Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities or Literature.
 - Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process

Total Credits: 12

¹ Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.

² Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.

COMMUNICATIONS

Code	Title	Credits
<i>Communications A (choose one)</i>		3
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	
<i>Speech-Related Course (choose one)</i>		2
E P D 275	Technical Presentations	
COM ARTS 105	Public Speaking	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Theory and Practice of Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
<i>Writing-Related Courses (choose one)</i>		3
E P D 397	Technical Communication	

ENGL 201	Intermediate Composition	
ENGL 315	English Phonology	
Total Credits		8

LIBERAL STUDIES REQUIREMENTS

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 207) ¹		16

Requirements specific to Civil Engineering:

An economics course must be selected from the following list:

ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	

A minimum of three credits of environmental studies course that meets the breadth designations of humanities, literature, and/or social science. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.

Total Credits		16
---------------	--	----

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.

Note: See a CEE advisor and/or the CEE Curriculum Guide (<https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/bs-civil-engineering>) for additional information.

ENVIRONMENTAL ENGINEERING OPTION

The Department of Civil and Environmental Engineering offers an undergraduate option in environmental engineering. Students taking the environmental engineering option will earn an ABET-accredited B.S. degree in civil engineering. The transcript and graduate certificate will indicate the environmental engineering option.

Students pursuing the environmental engineering option take the same core courses in mathematics, natural sciences, engineering, communications, and liberal studies as do the other civil engineering students. The applied engineering requirements within the environmental engineering curriculum differ from those of CEE in that students are required to complete several courses with an emphasis in water resources, environmental fluid mechanics, environmental chemistry and biotechnology, water and wastewater treatment, geoenvironmental and hazardous wastes engineering, air pollution control engineering, or occupational health engineering.

Total Credits: 22

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4

Every student must take at least one class in at least two of the following CEE disciplines, for a total of 6 credits.

One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.

Water Resources

CIV ENGR 414	Hydrologic Design	
--------------	-------------------	--

Environmental

CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	

Structural

CIV ENGR 442	Wood Structures I	
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
CIV ENGR 641	Highway Bridges	

Geological

CIV ENGR/ G L E 530	Seepage and Slopes	
CIV ENGR/ G L E 531	Retaining Structures	
CIV ENGR/ G L E 532	Foundations	

Transportation

CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).

Total Credits		10
---------------	--	----

ENGINEERING ELECTIVES REQUIREMENT

- Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.
- Select at least one of the following: CIV ENGR 322 Environmental Engineering Processes or CIV ENGR 410 Hydraulic Engineering.
- Students must take at least 6 credits of coursework that meets at least one of the following:
 - Any course offered by an engineering department, including but not limited to CEE
 - Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences, and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities, or Literature.
 - Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process.

Total Credits: 12

¹ Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.

² Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.

ENVIRONMENTAL ENGINEERING BREADTH REQUIREMENT

Courses selected to meet the design and electives requirement on the preceding page must also be selected in a manner that meets this requirement. At least one CEE course must be selected from at least three of the specialty groups in the table below.

Code	Title	Credits
<i>Water Resources</i>		
CIV ENGR 415	Hydrology	3
CIV ENGR 410	Hydraulic Engineering	3
CIV ENGR 412	Groundwater Hydraulics	3
CIV ENGR 414	Hydrologic Design	3
CIV ENGR 416	Water Resources Systems Analysis	3
CIV ENGR 619	Special Topics in Hydrology	1-3
<i>Environmental Fluid Mechanics</i>		
CIV ENGR 411	Open Channel Hydraulics	3
CIV ENGR 514	Coastal Engineering	2-3
CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics	1-3
<i>Environmental Chemistry & Biotechnology</i>		
CIV ENGR 500	Water Chemistry	3
CIV ENGR 501	Water Analysis-Intermediate	3
CIV ENGR/ SOIL SCI 623	Microbiology of Waterborne Pathogens and Indicator Organisms	3
CIV ENGR 629	Special Topics in Environmental Engineering	1-3
<i>Water & Wastewater Treatment</i>		
CIV ENGR 322	Environmental Engineering Processes	3
CIV ENGR/BSE/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	2
CIV ENGR 426	Design of Wastewater Treatment Plants	3
CIV ENGR 428	Water Treatment Plant Design	3
<i>Geoenvironmental and Hazardous Wastes</i>		
CIV ENGR 427	Solid and Hazardous Wastes Engineering	3
CIV ENGR 522	Hazardous Waste Management	3
CIV ENGR/G L E 633	Waste Geotechnics	3
CIV ENGR/G L E 635	Remediation Geotechnics	3
<i>Occupational & Public Health</i>		
CIV ENGR 422	Elements of Public Health Engineering	3
<i>Air Pollution Control</i>		
CIV ENGR 423	Air Pollution Effects, Measurement and Control	3
CIV ENGR 609	Special Topics in Water Chemistry	1-3

CONSTRUCTION ENGINEERING AND MANAGEMENT OPTION

The Department of Civil and Environmental Engineering offers an undergraduate option in construction engineering and management. Students taking the CEM Option will earn an ABET accredited BS degree in Civil Engineering. The transcript and graduate certificate will indicate the CEM option.

Students pursuing the CEM option take the same core courses in mathematics, natural sciences, engineering, communications, and liberal studies as do the other civil engineering students. The applied engineering requirements within the CEM curriculum differ from those of CEE in that students are required to complete courses in construction management and courses in the School of Business. Students must also complete two 1-credit co-op or internship experiences. The total number of credits required for the CEM option is 131 instead of 128.

NOTE: These requirements for applied engineering are not applicable to the general civil (CEE) or environmental engineering (EV).

Code	Title	Credits
Civil & Environmental Engineering Courses		21
Business Courses		6
Total Credits		27

REQUIREMENTS

Code	Title	Credits
CIV ENGR 445	Steel Structures I	3
CIV ENGR 447	Concrete Structures I	3
CIV ENGR 578	Senior Capstone Design ¹	4
Select one of the following:		3
CIV ENGR 392	Building Information Modeling (BIM) ²	
CIV ENGR 414	Hydrologic Design	
CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 442	Wood Structures I	
CIV ENGR 522	Hazardous Waste Management	
CIV ENGR/ G L E 530	Seepage and Slopes	
CIV ENGR/ G L E 531	Retaining Structures	
CIV ENGR/ G L E 532	Foundations	
CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	
CIV ENGR 641	Highway Bridges	
CIV ENGR/BSE 491	Legal Aspects of Engineering	3
CIV ENGR 492	Integrated Project Estimating and Scheduling	3

Students must take two 1-credit co-ops or internships. A summer internship equals one-credit; a co-op equals one-credit.

Select one of the following:

CIV ENGR 496	Electrical Systems for Construction
CIV ENGR 497	Mechanical Systems for Construction

Select two of the following:

ACCT I S 300	Accounting Principles
FINANCE/ ECON 300	Introduction to Finance
M H R 300	Managing Organizations
REAL EST/ A A E/ECON/ URB R PL 306	The Real Estate Process
REAL EST 611	Residential Property Development

Total Credits 27

- ¹ Must complete both CIV ENGR 445 and CIV ENGR 447 before taking.
- ² This course is only available for CM option students.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Vision

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

Mission of Bachelor of Science in Civil Engineering (BSCE) Program

Create, integrate, and transfer civil and environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

2 CEE Educational Objectives

Prepare BSCE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to meet determined needs using technical knowledge; computer tools; design principles; and communication, leadership and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation, and construction of natural and built systems.
4. Maintain analysis and design tools and experience through life-long learning and serve others through participation in professional and/or civic activities and responsibilities.

At the time of graduation, UW-Madison Bachelor of Science, Civil Engineering students will have attained:

- a. An ability to apply knowledge of mathematics, science, and engineering.
- b. An ability to design and conduct experiments, as well as to analyze and interpret data.
- c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- d. An ability to function on multidisciplinary teams.
- e. An ability to identify, formulate, and solve engineering problems.
- f. An understanding of professional and ethical responsibility.
- g. An ability to communicate effectively.
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
 - i. A recognition of the need for, and an ability to engage in life-long learning.
 - j. A knowledge of contemporary issues.
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
 - l. An ability to explain basic concepts in management, business, public policy, and leadership.
- m. An ability to explain the importance of professional licensure.
- n. An ability to understand common failure mechanisms of a component, process, or system and their causes and prevention.

Total Credits 130

¹ Civil Engineering course numbers to be determined. Until courses are established, CIV ENGR/G L E 291 Problem Solving Using Computer Tools meets both requirements.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops

and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

GEOLOGICAL ENGINEERING, B.S.

Geological engineering integrates two disciplines—geology and engineering. Geologists study the earth—its origins, its composition, and its evolution. Engineers apply scientific principles to practical ends, such as the design and construction of facilities for practical use by society. Geological engineering is interdisciplinary with faculty from the College of Engineering and the College of Letters & Science.

Geological engineers find the best way to use the earth's resources to solve technical problems while protecting the environment. They solve a variety of practical problems associated with rock and soils

using principles of sustainable engineering. They design and construct structures, transportation facilities, dams, tunnels, and power plants. They mitigate naturally occurring phenomena such as floods, landslides, and earthquakes, and develop safe and environmentally sound sources of energy and minerals. Geological engineers also manage groundwater and surface water resources to ensure the public has access to safe drinking water. They also design and construct subsurface repositories for waste disposal and remediate contaminated sites.

Students pursuing the B.S. degree are encouraged to obtain an additional major in geoscience. The B.S. program is set up so that students can obtain a degree in geological engineering and an additional major in geoscience in a single 125-credit program. No extra credits are required to obtain the additional major in geoscience. The B.S. degree in geological engineering is accredited by the Accreditation Board of Engineering and Technology (ABET), which is required to obtain a professional engineering license.

FACILITIES

The Geological Engineering Program utilizes laboratories that are shared with other departments. They include:

- Land Information and Surveying Laboratories
- Fluid Mechanics Laboratory
- Materials Testing Laboratory
- Geology and Hydrogeology Laboratories
- Rock Mechanics Laboratory
- Geotechnical and Geoenvironmental Laboratories
- The Halliburton Geoscience Visualization Center

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Students must complete the College of Engineering Liberal Studies Requirements (p. 207).

Students are encouraged to download a GLE Undergraduate Handbook from the Current Students/Undergraduate page on the department website (<http://www.engr.wisc.edu/interd/gep>). The handbook has detailed curriculum information as well as other practical information for undergraduate students to supplement the information provided here.

Students completing the geological engineering degree are also eligible to earn an additional major in geoscience with no additional coursework. Students are encouraged to declare an additional major in geoscience. Students must contact an advisor to complete the necessary paperwork to declare an additional major in geoscience.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics	13
	Engineering Principles and Professional Issues	11-14
	Physical Science, Engineering Science, and Geoscience	44
	Required Geological Engineering Courses	18
	Technical Electives	15
	Geological Engineering Design	
	Communication Skills	8
INTEREGR 110	Introduction to Engineering	1
	Liberal Studies Electives	16
	Fundamentals of Engineering Exam	
	Total Credits	126-129

	or M E 306 Mechanics of Materials	
CIV ENGR 310	Fluid Mechanics	3
GEOSCI 100	General Geology	3
	or GEOSCI/ ENVIR ST 106 Environmental Geology	
GEOSCI 202	Introduction to Geologic Structures	4
GEOSCI 204	Geologic Evolution of the Earth	4
GEOSCI/G L E 360	Principles of Mineralogy	3
GEOSCI/G L E 370	Elementary Petrology	3
GEOSCI/G L E 431	Sedimentary & Stratigraphy Lab	1
GEOSCI/G L E 455	Structural Geology	4
	Total Credits	44

REQUIRED GEOLOGICAL ENGINEERING COURSES

Code	Title	Credits
G L E 171	Introduction to Geological Engineering	1
G L E/CIV ENGR 330	Soil Mechanics	4
G L E/GEOSCI/ M S & E 474	Rock Mechanics	3
G L E 479	Geological Engineering Design	3

G L E/GEOSCI 594	Introduction to Applied Geophysics	3
G L E/GEOSCI 595	Field Methods in Applied and Engineering Geophysics	1
G L E/GEOSCI 627	Hydrogeology	4
Total Credits		19

TECHNICAL ELECTIVES

Students must take at least 15 credits in the Technical Electives category. All students must complete at least two designated design courses (noted as D in the GLE Undergraduate Handbook (<https://uwmadison.app.box.com/s/faxp2rkoknj2rt6qx2r2>)) as part of the technical electives. Students may take up to 6 credits of G L E 489 Honors in Research as technical electives. The technical electives are organized into five tracks, described below. Students may select courses within these tracks to focus coursework in a particular area. However, students may complete the technical electives requirement using courses listed in multiple tracks.

Suggested technical electives and associated credits (D indicates design course) for each track are included below.

Energy, Minerals & Mining

Geological engineers possess knowledge and a skill set that serve society's need to manage extraction of traditional energy and mineral resources in more sustainable and efficient ways, and to lead in new technologies to limit carbon emissions through geological sequestration or to develop geothermal energy in deeper reservoirs.

Within this track, the 16 credits of liberal studies can be framed to match those of the Energy Institute certificate in Energy Sustainability (http://www.energy.wisc.edu/?page_id=1077).

Code	Title	Credits
BSE/ENVIR ST 367	Renewable Energy Systems	3
E M A 405	Practicum in Finite Elements	3
GEOSCI/ ENVIR ST 410	Minerals as a Public Problem	3
GEOSCI/ ENVIR ST 411	Energy Resources	3
GEOSCI 457	Conducted Field Trip	2
GEOSCI 459	Field Geology	6
GEOSCI 515	Principles of Economic Geology	4
G L E 401	Special Topics in Geological Engineering (D)	1-3
G L E/GEOSCI/ M S & E 475	Rock Mechanics Applications to Environmental Problems	3
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 531	Retaining Structures (D)	3

Sustainability & Environment

Methods for quantifying the long-term effects of development, natural resource extraction, and environmental damage are often neglected or misapplied in cost-benefit life cycle analysis. This track intends to produce professionals capable of leading the field in sustainable design and construction. The Sustainability & Environment track focuses on quantification, design, and optimization in relation to the use of natural resources and construction materials/methods as well as minimizing the long-term impacts of these activities.

Code	Title	Credits
BSE/DS/ LAND ARC 356	Sustainable Residential Construction	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR 427	Solid and Hazardous Wastes Engineering	3
CIV ENGR 619	Special Topics in Hydrology	1-3
CIV ENGR 649	Special Topics in Structural Engineering (Sustainable Construction)	1-3
GEOSCI/ ENVIR ST 410	Minerals as a Public Problem	3
GEOSCI/ ENVIR ST 411	Energy Resources	3
GEOSCI/G L E 629	Contaminant Hydrogeology (D)	3
G L E 401	Special Topics in Geological Engineering (D)	1-3
G L E/CIV ENGR 633	Waste Geotechnics (D)	3
G L E/CIV ENGR 635	Remediation Geotechnics (D)	3
G L E/CIV ENGR 732	Unsaturated Soil Geoengineering	3
SOIL SCI 321	Soils and Environmental Chemistry	3
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality	3

Geohazards

The number of fatalities and amount of economic loss due to geohazards increases every year. These losses may result from various geohazards, such as volcanic eruptions, earthquakes, landslides, flooding and tsunamis. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

The number of fatalities and amount of economic loss due to geohazards increases every year. These losses may result from various geohazards, such as volcanic eruptions, earthquakes, landslides, flooding and tsunamis. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

G L E/CIV ENGR 735	Soil Dynamics (D)	3

Water

Water is an essential resource for humans and ecosystems. Water is also linked to mineral and energy resource production, waste management, and land reclamation. Population growth and climate change are creating increasing challenges to this resource. Development and sustainable

management of groundwater and surface water, including prevention and mitigation of water quality problems, require combined expertise in geoscience, hydrology, and water resources engineering offered through the Water track.

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 415	Hydrology	3
CIV ENGR 412	Groundwater Hydraulics	3

G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 732	Unsaturated Soil Geoen지니어ing	3

Infrastructure

There are many challenges that need to be overcome to address the ageing infrastructure of this country as well as develop cost effective solutions for new infrastructure in developing nations. The Infrastructure track is developed to provide students a background that enables them to perform engineering calculations to design, construct, assess the current condition (level of safety), and develop repair and retrofit solutions for civil engineering structures resting on, or constructed in, soil or rock.

Code	Title	Credits

E P D 397	Technical Communication	3
Total Credits		8

LIBERAL STUDIES

Students must complete the College of Engineering Liberal Studies Requirements (p. 207).

FUNDAMENTALS OF ENGINEERING EXAM

All students must take the Fundamentals of Engineering exam. The General Engineering or Civil Engineering sections are recommended for the afternoon portion of the exam, as there is no section specifically for Geological Engineering.

HONORS IN RESEARCH

Students in geological engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of **at least 3.5** may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in G L E 489 Honors in Research.

A senior thesis worth 3 credits of G L E 489 is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the geological engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Geological Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in G L E 489.
4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the GLE chair for more information. Applications to the program are to be submitted to the GLE chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the GLE chair.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

At the time of graduation, UW-Madison Geological Engineering students will have attained:

- an ability to apply knowledge and principles of mathematics, science, and engineering to geological engineering problems;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet required needs within realistic economic, environmental, social, political, ethical, health and safety, constructability, and sustainability goals;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate, and solve geological engineering problems in space and time;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for and the ability to engage in life-long learning;
- a knowledge of contemporary issues as related to geological engineering; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ELECTRICAL AND COMPUTER ENGINEERING

The Department of Electrical and Computer Engineering offers the B.S., M.S. and Ph.D. degrees in electrical engineering and the B.S. degree in computer engineering.

Electrical Engineers design and develop anything and everything that uses electricity: from the power systems that bring electricity to our homes and communications systems that allow us to keep in touch with family and friends, to the electronic devices, electrical appliances, computers, sensors, and medical equipment that shape our everyday lives. Typical careers may find an EE collaborating with medical doctors or astronauts in the space program, designing advanced automotive and transportation systems, and interacting with other engineers and professionals. Many EEs work as scientists, inventing new kinds of electronic technology, instrumentation, and devices to help people.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and

computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

The curricula in the Department of Electrical and Computer Engineering require a strong background in mathematics, physics, and computer sciences. In addition to basic course requirements in these areas, elective credits in the curriculum permit the student to pursue more advanced courses in these areas or in other fields, such as chemistry, biology, and mechanics. Additional electives in liberal studies broaden the programs to include such areas as economics, sociology, psychology, and history.

The electrical engineering and computer engineering programs share many courses in the sophomore year including digital systems, electrical circuits, and electromagnetic fields. Computer engineering students take additional courses in computer sciences to provide the software part of their background. In subsequent semesters, the electrical engineering and computer engineering programs share the study of solid state devices, and of signals and systems. In the junior year, the electrical engineering program focuses on areas such as electromagnetic fields and analog electronics whereas computer engineering deals with computer hardware design and combined hardware/software design concepts. Technical elective freedom in both curricula makes it possible for students to choose from approximately 50 more specialized courses at the junior and senior levels in electrical and computer engineering, as well as courses from other departments. In both curricula, a student can choose a broad program covering an introductory treatment of a variety of areas or focus in one or two specialized areas. An advising program, beginning in the freshman year, helps students plan their program.

To provide students with hands-on experience in electrical and computer engineering, specialized lab courses are offered at the senior level. For example, one involves the design and fabrication of integrated circuits and the other design and prototyping of a computer. Both classroom instruction and lab work are offered in the analysis and design of control systems and also in embedded systems, with microprocessors and personal computers incorporated into larger systems. Independent study and design projects are encouraged at the senior level and an honors research program is available which spans multiple years of the undergraduate program.

Although the B.S. in electrical engineering and B.S. in computer engineering programs are intended to prepare students for immediate entry into the profession of engineering, increasingly, students find an additional year or more of study leading to the M.S. degree very desirable. The Ph.D. degree is the most advanced degree and emphasizes training in research.

COMPUTER ENGINEERING, B.S.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on

software and digital hardware distinguishes the computer engineer from the electrical engineer.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems

Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students who were admitted to the computer engineering degree program (classification changed to CMPE) in fall 2013 or later.

College of Engineering Liberal Studies Requirements		
Complete requirements (p. 207) ¹		15
Total Credits		15

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. **Note:** See an ECE advisor and/or the EE Curriculum Guide (<https://www.engr.wisc.edu/departments/electrical-computer-engineering/academics/bachelor-of-science-computer-engineering>) for additional information.

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

At the time of graduation, UW-Madison Computer Engineering students will have attained:

- an ability to apply knowledge of mathematics, science, and engineering.
- an ability to design and conduct experiments, as well as to analyze and interpret data.
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- an ability to function on multidisciplinary teams.
- an ability to identify, formulate, and solve engineering problems.

- f. an understanding of professional and ethical responsibility.
- g. an ability to communicate effectively.
- h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- i. a recognition of the need for, and an ability to engage in life-long learning.
- j. a knowledge of contemporary issues.
- k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ELECTRICAL ENGINEERING, B.S.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/> apply) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general

college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students who were admitted to the electrical engineering degree program (classification changed to EE) in Fall 2012 or later.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics		16
Science		18
Electrical Engineering Core		31
Electrical Engineering Advanced Electives		24
Professional Electives		9
Introduction to Engineering		1
Communication Skills		6
Liberal Studies		15
Total Credits		120

MATHEMATICS

Code	Title	Credits
MATH 221 or MATH 217 or MATH 275	Calculus and Analytic Geometry 1 Calculus with Algebra and Trigonometry II Topics in Calculus I	5
MATH 222 or MATH 276	Calculus and Analytic Geometry 2 Topics in Calculus II	4
MATH 234	Calculus—Functions of Several Variables	4
Probability and Statistics Elective		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT/M E 424	Statistical Experimental Design	
MATH/STAT 431	Introduction to the Theory of Probability

E C E 370	Advanced Laboratory	2
Total Credits		31

ELECTRICAL ENGINEERING ADVANCED ELECTIVES

Students must take 22 credits in at least three of six areas and at least 2 credits in two laboratory courses.

- At least 9 credits must be in courses numbered 400 and above.
- At least one course must be a capstone design course.
- Students can count 1 credit of E C E 1 Cooperative Education Program toward advanced electives.
- Students can count up to 6 credits of E C E 399 Independent Study, E C E 489 Honors in Research or E C E 699 Advanced Independent Study towards advanced electives.
- Students can take E C E 379 Special Topics in Electrical and Computer Engineering and E C E 601 Special Topics in Electrical and Computer Engineering as advanced electives.

Laboratory

Code	Title	Credits
<i>Select at least one course from ECE 301 to ECE 317</i>		
<i>An additional laboratory course must be taken from the following list:</i>		
E C E 303	Introduction to Real-Time Digital Signal Processing	
E C E 304	Electric Machines Laboratory	
E C E 305	Semiconductor Properties Laboratory	
E C E 306	Linear Active Circuits Laboratory	

E C E 308	Nonlinear Electronic Circuits Laboratory	
E C E 313	Optoelectronics Lab

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ENGINEERING - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- Biology in Engineering for Engineering Majors, Certificate (p. 249)
- International Engineering, Certificate (p. 251)
- Naval Science, BNS (p. 251)

BIOLOGY IN ENGINEERING FOR ENGINEERING MAJORS, CERTIFICATE

The biology in engineering certificate (BEC) is designed for engineering students who want to strengthen their biology backgrounds. It is offered especially to encourage engineering students in traditional disciplines to prepare themselves to understand the special engineering problems in biology and medicine. A student successfully fulfilling the requirements will have the notation "Biology in Engineering Certificate" added to the transcript.

REQUIREMENTS

The 15-credit biology in engineering certificate was designed and will be administered by a Biology in Engineering Certificate Committee composed of faculty from multiple engineering disciplines. Students normally should begin the program during their sophomore or junior year, but seniors may also apply.

The certificate requires a minimum of 15 credits:

GENERAL BIOLOGY: 5 CREDITS

Code	Title	Credits
Choose one combination:		5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	5
ZOOLOGY/BIOLOGY/ BOTANY 151	Introductory Biology	5
ZOOLOGY/BIOLOGY/ BOTANY 152	Introductory Biology	5
ZOOLOGY 153 & BIOLOGY/ ZOOLOGY 102	Introductory Biology and Animal Biology Laboratory	5

ADVANCED BIOLOGY: 5-CREDIT MINIMUM

Code	Title	Credits
Advanced Biology (5 cr. minimum): Recommended to choose a lecture/lab combination		5
BIOCORE 485 & BIOCORE 486	Organismal Biology and Organismal Biology Laboratory	5
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 507	General Biochemistry I	3

BIOCHEM 508	General Biochemistry II	3-4	B M E/PHM SCI 430	Biological Interactions with Materials	3
BMOLCHEM 314	Introduction to Human Biochemistry	3	B M E/E C E 462	Medical Instrumentation	3
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	5	B M E 505	Biofluidics	3
MICROBIO/FOOD SCI 324 & MICROBIO/FOOD SCI 325	Food Microbiology Laboratory and Food Microbiology	5	B M E/CBE 510	Introduction to Tissue Engineering	3
MICROBIO 330	Host-Parasite Interactions	3	B M E/CBE 520	Stem Cell Bioengineering	3
M M & I 301 & M M & I 302	Pathogenic Bacteriology and Medical Microbiology Laboratory	5	B M E 545	Engineering Extracellular Matrices	3
M M & I 341	Immunology	3	B M E 550	Introduction to Biological and Medical Microsystems	3
M M & I/MICROBIO/PATH-BIO 528 & M M & I/PATH-BIO 529	Immunology and Immunology Laboratory	5	B M E/M E 603	Topics in Bio-Medical Engineering (Biomechanics of Movement or Orthopaedic Biomechanics)	1-3
PHYSIOL 335	Physiology	5	B M E 615	Tissue Mechanics	3
PHYSIOL 435	Fundamentals of Human Physiology	5	B M E/MED PHYS/PHMCOL-M/PHYSICS/RADIOL 619	Microscopy of Life	3
ZOOLOGY/ENVIR ST 315 & ZOOLOGY 316	Limnology-Conservation of Aquatic Resources and Laboratory for Limnology-Conservation of Aquatic Resources	4-5	BSE 249	Engineering Principles for Biological Systems	3

INTERNATIONAL ENGINEERING, CERTIFICATE

The certificate in international engineering provides recognition for a student's efforts to prepare for an international career by learning about one or more countries outside the United States. An undergraduate student in the College of Engineering or the Department of Biological Systems Engineering can earn the certificate by completing at least 16 credits in courses with a primary focus on the language, culture, history, geography, society, or institutions of a particular country or region of the world.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

LANGUAGE COURSES

Although not required, a maximum of 9 credits may be devoted to courses in a foreign language. Only foreign language courses beyond the initial 8 credits in that particular language may be used to satisfy this requirement. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

AREA STUDIES COURSES

A minimum of 6 credits must be devoted to courses with a major emphasis on the culture, history, geography, society, or institutions of one country or the countries in a geographically identifiable region of the world. These courses must be selected from at least two departments. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

INTERNATIONAL EXPERIENCE

A documented minimum stay of five weeks for study or work (including internship and co-op) in the designated country or region is required.

INTERNATIONAL ENGINEERING COURSE

After one's international experience, successful completion of the 1-credit course INTEREGR 413 Current Issues in International Engineering is required.

Each student must submit an application to the certificate advisor in his or her department for approval. Only students with a GPA of at least 2.75 who have met progression requirements may apply. The application and list of advisors are available on the Certificate in International Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-in-international-engineering>). Students may not elect the pass/fail option for any course that is used to satisfy the requirements for the certificate. However, courses taken on a study abroad program through International Engineering Studies and Programs (IESP) (<http://international.engr.wisc.edu>) are exempt from this grading requirement. Successful completion of certificate requirements will be noted on the student's official transcript. For additional information, contact International Engineering Studies and Programs (<http://>

international.engr.wisc.edu) (Room 170, 1410 Engineering Drive; international@engr.wisc.edu).

NAVAL SCIENCE, BNS

The College of Engineering recommends candidates for the bachelor of naval science degree.

Earning both the BNS degree and the B.S. degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

For additional information see the Officer Education (p. 1180) section of the *Guide*.

HOW TO GET IN

The naval science BNS is not a stand-alone degree. Students interested in pursuing this degree should consult with the Navy ROTC: 1610 University Ave, Madison, WI 53726 | 608-262-3794 | nrotc.admin@wisc.edu

REQUIREMENTS

The College of Engineering recommends candidates for the bachelor of naval science degree. Requirements for the degree are:

1. A total of 136 credits including no fewer than 100 credits of elected and required courses in one of the engineering curricula.
2. Completion of these additional requirements as approved by the Department of Naval Science: English, two semesters; American Military Affairs/National Security Policy, one semester

Earning both the BNS degree and the B.S. degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

LEARNING OUTCOMES

1. Understand and apply the fundamentals and principles of Naval Science.
2. Understand and apply Naval Science professional knowledge and core competencies.
3. Be prepared to perform successfully in the technical and critical reasoning requirements of their careers and pursue continuing education in a field of application within the Naval Service.
4. Understand and demonstrate a strong sense of personal integrity, honor, and individual responsibility and associated ethical leadership required of military officers.

ADVISING AND CAREERS

Naval science BNS students should meet with the Navy ROTC for advising:

1610 University Avenue Madison, WI 53726; 608-262-3794; nrotc.admin@wisc.edu

ENGINEERING PHYSICS

The Department of Engineering Physics offers the B.S. degree in engineering physics. The degree is designed for the ever-changing technologies in emerging technological areas to graduates who will become a source of qualified employees for high tech, start-up companies and traditional engineering firms, as well as be prepared for advanced graduate degrees.

Students specialize in a technological focus area such as: nanoengineering, plasma science and engineering, and scientific computing.

Distinguishing features of the engineering physics degree include: strong emphasis on math and physics, and engineering fundamentals; choice of a technical focus area beginning in the junior year; emphasis on research project, culminating in a senior thesis.

Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories

ENGINEERING MECHANICS, B.S.

The Department of Engineering Physics administers the B.S., M.S., and Ph.D. degrees in engineering mechanics. The B.S. degree in engineering mechanics may be accompanied by an option in astronautics.

Engineering mechanics is the scholarly term for the study of forces and the resulting deformations, accelerations, motions, vibrations and other action that they cause. As such, engineering mechanics forms the foundation of a degree in aerospace, mechanical or civil engineering and it is fundamental to important parts of biomedical engineering, chemical engineering, materials science, mechanical engineering and a few other engineering disciplines. Hence, a degree in engineering mechanics provides a broad basic scientific background which enables its graduates to tackle challenging problems in most fields of engineering. The curriculum emphasizes the basic sciences—mathematics, computer science, physics and the engineering sciences—fluid dynamics, thermodynamics, mechanics, materials science, and electrical engineering. Although the degree program is entitled engineering mechanics at UW–Madison, the program is most comparable to aerospace engineering and mechanical engineering programs at various universities across the United States. However, internationally, this field is more commonly known as “mechanics” rather than “mechanical engineering” or “aerospace engineering.” A few select universities in the United States offer programs that are similar to UW–Madison’s engineering mechanics program under titles such as “engineering science” or “theoretical and applied mechanics.”

The objective of the program is to provide the student with a broad background in the fundamental physical sciences and applied mathematics, coordinated with both theoretical and applied engineering methods and experimental techniques. This type of educational background will give the student the degree of versatility necessary for dealing with the variety and complexity of modern technological problems as well as the ability to adapt to the rapidly changing needs and interests of industry, government, and society.

An education in engineering mechanics provides many advantages. First, the foundation offered by a degree in mechanics allows our graduates to more easily interact with co-workers on interdisciplinary teams including chemists, physicists, and mathematicians. Second, many industrial organizations prefer engineers that have a broad, fundamental scientific background rather than a narrow view of just one discipline. Third, and probably most important, great changes have taken place in science and engineering during recent years. Among the most important of these have been the rapid diffusion of scientific knowledge and disciplines into engineering, the increasing use of analytical and computer methods for

the solution of practical problems, the need for a better understanding of the properties and behavior of materials, and the increasing need for engineers who can adapt known methods to new situations and develop new experimental and analytical methods. By focusing on core competency in physics and applied mathematics the engineering mechanics degree prepares students for these challenges.

The required courses taken early in the curriculum are intended to give the student a fundamental background in mathematics, science, and engineering. In addition to developing versatility through exposure to important concepts in various scientific fields, the required courses allow the students to identify areas of interest. With the relatively large number of elective credits available in the latter part of the program, the student may either continue to follow a general program or may prefer to concentrate elective courses in such areas as stress analysis and structural mechanics, dynamics and vibrations, aerodynamics and flight mechanics, experimental mechanics, applied mathematics, materials science, geological engineering, biomechanics, aerospace mechanics, mechanical systems analysis, etc.

Engineering mechanics graduates are sought by most industries and governmental agencies including in particular those participating in the newly developing areas of engineering such as space technology, performance of new structural materials, and so on. Their work often involves participation in design, research and development projects where the problems are sufficiently complex or unusual that their solutions require engineers with (1) a thorough understanding of the fundamentals of engineering, (2) advanced education in the established experimental and analytical methods, and (3) the ability to develop new experimental and analytical methods to attack problems for which standard methods, formulas, and materials have not yet been developed. The program also provides excellent preparation for graduate study in a variety of related disciplines.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/>

[student-services/academic-advising/cross-campus-students](https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students)) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students who entered the College of Engineering after fall 2016.

College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 207) ¹		16
Total Credits		16

¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 128

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<https://www.engr.wisc.edu/academics/student-services/academic-advising/undergraduate-engineering-students/rules-and-regulations>).

ASTRONAUTICS OPTION IN ENGINEERING MECHANICS

The astronautics option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and astronautics. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in astronautics and space-related areas. This is accomplished by providing in depth exposure to course sequences in astrodynamics, orbital mechanics, and flight dynamics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 127 credits; students

selecting this option must submit an option declaration form to the department office.

The following curriculum applies to students who entered the College of Engineering after Fall 2016.

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 207) ¹		16
Total Credits		16

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<https://www.engr.wisc.edu/academics/student-services/academic-advising/undergraduate-engineering-students/rules-and-regulations>).

HONORS OPTIONS

ENGINEERING MECHANICS SCHOLARS AND DISTINGUISHED SCHOLARS PROGRAM

Students who achieve at least a 3.0 GPA in their first semester, and maintain it throughout their career, may be designated Scholars. They also may be exempted from some formal requirements for the Bachelor of Science in Engineering Mechanics degree other than total credits. However, they must meet certain restrictions on the distribution of courses chosen. Students who achieve at least a 3.70 grade point average (GPA) for the first semester of the freshman year or a 3.5 GPA for the first four semesters, may be designated Distinguished Scholars. These students, with the approval of their advisor, may be exempted from most formal requirements for the Bachelor of Science in Engineering Mechanics degree other than the total credit hours, so long as they maintain a satisfactory performance record and the main thrust of their work is along the lines of engineering mechanics education. The general education and liberal studies requirements must be met by Scholars and Distinguished Scholars. Students transferring into the engineering mechanics degree program may be eligible to qualify for either of these scholars programs as late as the beginning of the seventh semester.

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn a Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- an ability to identify, formulate, and solve engineering problems. This includes:
 - a. an ability to apply knowledge of basic mathematics, science and engineering.
 - b. an ability to use advanced mathematical and computational techniques to analyze, model, and design physical systems consisting of solid and fluid components under steady state and transient conditions.
 - c. an ability to design a system, component or process to meet desired needs.
 - d. an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.
- an ability to design and conduct experiments, as well as to analyze and interpret data.
- an ability to function on multi#disciplinary teams.
- knowledge of professional and ethical standards.
- an ability to communicate effectively.
- the broad education necessary to understand the impact of engineering solutions in a global and societal context.
- a recognition of the need for, and ability to engage in life-long learning.
- a knowledge of contemporary issues.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of

Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ENGINEERING PHYSICS, B.S.

The Department of Engineering Physics offers the B.S. degree in engineering physics. The degree is designed to provide graduates with skills in emerging technological areas. These graduates are highly prepared to pursue advanced graduate degrees and will become a source of qualified employees for high-tech start-up companies and traditional engineering firms, as well as positions in academia, government, and national laboratories.

Students specialize in one of three technological focus areas: nanoengineering, plasma science and engineering, and scientific computing.

Distinguishing features of the engineering physics degree include a strong emphasis on math, physics, and engineering fundamentals; choice of a technical focus area; and emphasis on research as part of a campus research group or through individually mentored research with a faculty member, culminating in a senior thesis.

OBJECTIVES OF THE ENGINEERING PHYSICS PROGRAM

The objectives of the engineering physics program are to:

- Educate students to think and participate deeply, creatively, and analytically in emerging areas of engineering technology.
- Educate students in the basics of instrumentation, design of laboratory techniques, measurement, data acquisition, interpretation, and analysis.
- Educate students in the methodology of research.
- Provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum.
- Foster the development of effective oral and written communication skills.
- Expose students to environmental, ethical and contemporary issues.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/> apply) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general

college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to students who entered the program after fall 2016.

FOCUS AREA**Research and Development/Senior Thesis Expectations for Research Projects**

Completion of the engineering physics degree program requires satisfactory completion of the E P 468 Introduction to Engineering Research, E P 469 Research Proposal in Engineering Physics, E P 568 Research Practicum in Engineering Physics I, E P 569 Research Practicum in Engineering Physics II coursework sequence, which culminates in a senior research thesis. The research topic chosen by the student and agreed upon by the advisor should be on a topic connected

to the chosen Focus Area. The research conducted should be such that the student participates in the creation of new knowledge, experiences the excitement of the research process, and makes a contribution so that it would be appropriate to include the student's name on a scholarly publication if one results from the research.

Senior Thesis

A senior thesis, completed during enrollment in E P 569 Research Practicum in Engineering Physics II is required. The senior thesis is a written document reporting on a substantial piece of work. It should be written in the style of a graduate thesis. The faculty advisor, in consultation with a research mentor, determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the engineering physics department office.

On or before the Friday of finals week of the semester in which E P 569 Research Practicum in Engineering Physics II, the senior thesis must be presented orally by the student to a committee of three professors in a publicly announced seminar. Interested faculty and students will be invited to attend.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating

degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories

Superconductivity and Cryogenics Laboratories

ENGINEERING FOR ENERGY SUSTAINABILITY, CERTIFICATE

Equity and sustainability of energy resources in the face of increasing global population and economic development are key issues at the center of the public discourse today. The objective of this certificate program is to offer undergraduate students a suite of courses addressing energy sustainability. The courses span across the engineering curriculum, with firm roots in real-world design and engineering practices.

Students enrolled as degree-seeking undergraduates with a minimum GPA of 2.5 and a plan of study to fulfill the certificate requirements may enroll in the program. Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program; however, students may take courses that fulfill certificate requirements before submitting an application.

COURSE AUTHORIZATION

Some courses may require additional approval to appear in students' DARS reports as having fulfilled part of the certificate requirements. Students who are taking a course for the capstone requirement must fill out this DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4UogI) to receive the proper number of sustainability credits. For more information on obtaining credits for capstone courses, see Capstone Course Guidelines (<http://energy.wisc.edu/education/energy-certificate/capstone-guidelines>).

In addition, students who wish to receive sustainability credits for courses that are not currently on the preapproved list may also complete the DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4UogI) and explain why the course should receive sustainability credits.

Once a form is filled out, it will be sent to a body of Energy Institute faculty members for approval. To expedite the approval process, students should submit their DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4UogI) before or near the beginning of the semester in which they plan to take the course.

FINAL COURSE PLANS

During the term when they expect to meet the certificate requirements, students must fill out and submit this course plan (<https://energy.wisc.edu/sites/default/files/2016-12/CEES-Course-Plan.pdf>) to the supervising faculty member of their capstone courses in their major department. The faculty member will review the course plan and make the recommendation for a certificate to the respective department's professional advising staff.

The following faculty members have been designated as points of contact for each department:

Richard J. Straub (http://bse.wisc.edu/Richard_Straub.htm), Biological Systems Engineering
Robert G. Radwin (http://www.engr.wisc.edu/bme/faculty/radwin_robert.html), Biomedical Engineering

Thatcher Root (<https://energy.wisc.edu/about/energy-experts/thatcher-root>), Chemical and Biological Engineering
Dan Noguera (http://www.engr.wisc.edu/cee/faculty/noguera_daniel.html), Civil and Environmental Engineering
Giri Venkataramanan (http://www.engr.wisc.edu/ece/faculty/venkataramanan_giri.html), Electrical and Computer Engineering
Jim Tinjum (<http://gle.wisc.edu/james-tinjum>), Geological Engineering
Vicki Bier (http://www.engr.wisc.edu/ie/faculty/bier_vicki.html), Industrial and Systems Engineering
Dane Morgan (http://www.engr.wisc.edu/mse/faculty/morgan_dane.html), Materials Science and Engineering
Roxann L. Engelstad (http://www.engr.wisc.edu/me/faculty/engelstad_roxann.html), Mechanical Engineering
Michael L. Corradini (http://www.engr.wisc.edu/ep/faculty/corradini_michael.html), Nuclear Engineering and Engineering Physics

When the student and faculty member have filled out and signed the Declaration of Intent and Study Plan (<http://www.energy.wisc.edu/sites/default/files/education/dec-of-intent-1.pdf>), the student must hand them in to Room 905 Engineering Research Building, 1500 Engineering Drive. Once there, the student also needs to fill out and hand in a College of Engineering Certificate Declaration Form, copies of which are located in the drop box next to the Energy Institute office.

REQUIREMENTS

A student interested in completing the certificate program must contact a designated faculty member in his or her major department to apply. The student and faculty member must fill out the Declaration of Intent and Study Plan (<http://www.energy.wisc.edu/sites/default/files/education/dec-of-intent-1.pdf>) to enter the certificate program.

- Required: Declaration of Intent and Study Plan (<http://www.energy.wisc.edu/sites/default/files/education/dec-of-intent-1.pdf>)
- Sustainability Courses:
Students must select the 16 "sustainability credits" from a suite of available courses divided into the following categories:
 - Science/Liberal Studies, 3–6 cr
 - Engineering, 3–6 cr
 - Capstone, 3–6 cr
 - Seminar, 1 cr

Students are required to take a minimum of 3 sustainability credits and a maximum of 6 sustainability credits from these three categories: science/liberal Studies, engineering, and capstone. In addition, students must fulfill a 1-credit seminar requirement. Currently, this seminar requirement is fulfilled through the course CBE 555 Seminar-Chemical Engineering Connections, which is open to all engineering majors. In the near future, a crosslisted course will be developed for this purpose. Students may also take INTEREGR 601 Topics in Interdisciplinary Engineering for the seminar requirement.

Not all courses have the same number of sustainability credits as academic credits; some courses have fewer sustainability credits depending on how closely related they are to energy and sustainability. Students should review the list of preapproved courses and the sustainability credits associated with each course while filling out their study plan.

NUCLEAR ENGINEERING MATERIALS, CERTIFICATE

The goal of this certificate is to combine a comprehensive set of course curricula that will provide students with an understanding of the

challenges and remedial measures associated with materials in nuclear energy systems. It includes courses in radiation damage, nuclear fuel performance, corrosion, and joining/welding. A laboratory course will provide hands-on experimental analysis in the areas of corrosion, welding, radiation damage, and non-destructive evaluation.

Students learn the challenges and remedial measures associated with materials in nuclear energy system and conduct experimental analysis in corrosion, welding, radiation damage, and nondestructive evaluation.

REQUIREMENTS

Code	Title	Credits
Required courses (13 credits)		
N E/M S & E 423	Nuclear Engineering Materials ¹	3
N E 424	Nuclear Materials Laboratory	1
N E 541	Radiation Damage in Metals ¹	3
M S & E/N E 433	Principles of Corrosion	3
M S & E/M E 435	Joining of Materials: Structural, Electronic, Bio and Nano Materials	3
or M S & E/ M E 462	Welding Metallurgy	
Elective courses (minimum 3 cr.)		
CIV ENGR 445	Steel Structures I	3
CIV ENGR 447	Concrete Structures I	3
M S & E 330	Thermodynamics of Materials	4
M S & E 352	Materials Science-Transformation of Solids	3
M S & E 463	Materials for Elevated Temperature Service	3
M S & E 560	Fundamentals of Atomistic Modeling	3
M S & E 570	Properties of Solid Surfaces	3

¹ Because M S & E 350 Introduction to Materials Science or M S & E 351 Materials Science-Structure and Property Relations in Solids are prerequisites for N E/M S & E 423 Nuclear Engineering Materials and N E 541 Radiation Damage in Metals, students are expected to take one of the two of these courses as prerequisites for the certificate.

NUCLEAR ENGINEERING, B.S.

The Department of Engineering Physics offers the B.S. degree in nuclear engineering and M.S. and Ph.D. degrees in nuclear engineering and engineering physics.

Nuclear engineering is defined as the application of nuclear and radiation processes in technology. An important application is the generation of electricity using nuclear reactors. Another important application is in medicine, where radiation and radioisotopes are used to diagnose and treat illness. Nuclear engineering offers students an important opportunity to help meet the energy needs of our society and to contribute to the improvement of health through medical applications. Further, because the nuclear engineering curriculum is very rich in engineering physics, graduates are prepared to work in a number of technical activities outside the nuclear engineering field.

Nuclear energy, both from fission and fusion, offers a promising approach to meeting the nation's energy needs—an approach that may preserve jobs, raise the standard of living of Americans, and alleviate the depletion of natural resources including natural gas, petroleum, and coal. Even more important, nuclear energy offers the only practical, environmentally benign approach to generating electricity on a large scale because it releases no harmful SO₂, NO_x, CO₂, or particulate matter into the atmosphere. Nuclear energy has played, and continues to play, an important role in space exploration. Nuclear engineering has enabled the use of isotopic power supplies in deep space probes like the Cassini mission, and may eventually be used to design fission or fusion-based systems for more demanding missions.

Since the discovery of fission many years ago, electricity is being produced commercially in a several hundred billion-dollar industry. Applications of radioactive tracers have been made in medicine, science, and industry. Radiation from particle accelerators and materials made radioactive in nuclear reactors are used worldwide to treat cancer and other diseases, to provide power for satellite instrumentation, to preserve food, to sterilize medical supplies, to search for faults in welds and piping, and to polymerize chemicals. Low energy plasmas are used in the manufacture of microelectronics components and to improve the surface characteristics of materials. High energy plasmas offer the possibility of a new energy source using thermonuclear fusion.

Because the breadth and rate of change in this field requires that the nuclear engineer have a broad educational background, the curriculum consists of physics, math, materials science, electronics, thermodynamics, heat transfer, computers, courses in the humanities and social science areas, and numerous elective courses. Courses of a specific nuclear engineering content come primarily in the third and fourth years.

The curriculum prepares students for careers in the nuclear industry and government—with electric utility companies, in regulatory positions with the federal or state governments, or for major contractors on the design and testing of improved reactors for central station power generation or for propulsion of naval vessels.

The curriculum also prepares the graduate for work in many areas where a broad technical background is more important than specialization in a specific field. Thus, the graduate is also prepared to work in any area where a broad engineering background is helpful, such as management, technical sales, or law. The curriculum gives students excellent preparation for graduate study in the fission and fusion areas, medical and health physics, applied superconductivity, particle accelerator technology, and other areas of engineering science in addition to study in areas such as materials science, physics, mathematics, and medicine.

OBJECTIVES OF THE NUCLEAR ENGINEERING PROGRAM

- educate students in the fundamental subjects necessary for a career in nuclear engineering, and prepare students for advanced education in it and related fields;
- educate students in the basics of instrumentation, design of laboratory techniques, measurement, and data acquisition, interpretation and analysis;
- educate students in the methodology of design;
- provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum;

- foster the development of effective oral and written communication skills;
- expose students to environmental, ethical and contemporary issues.

adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning->

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

NUCLEAR ENGINEERING CURRICULUM

The nuclear engineering curriculum is divided into two options, one emphasizing nuclear power and one emphasizing medical and other nonpower applications of radiation sciences. The power option is more appropriate for students seeking careers in the nuclear power industry, while the radiation sciences option is better suited for students interested in medical and non-power applications.

POWER OPTION CURRICULUM

The following curriculum applies to students who entered the program after fall 2016.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	22
	Science	13

College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 207) ¹		16
Total Credits		16

¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<https://www.engr.wisc.edu/academics/student-services/academic-advising/undergraduate-engineering-students/rules-and-regulations>).

RADIATION SCIENCES OPTION CURRICULUM

The following curriculum applies to students who entered the program after fall 2016. Students selecting the radiation sciences option must submit an option declaration form to the department office.

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 207) ¹		16
Total Credits		16

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. *Note:* Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<https://www.engr.wisc.edu/academics/student-services/academic-advising/undergraduate-engineering-students/rules-and-regulations>).

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

NUCLEAR ENGINEERING SCHOLARS AND DISTINGUISHED SCHOLARS PROGRAM

Students who achieve at least a 3.0 GPA in their first semester, and maintain it throughout their career, may be designated Scholars. They also may be exempted from some formal requirements for the Bachelor of Science in Nuclear Engineering degree other than total credits. However, they must meet certain restrictions on the distribution of courses chosen. Students who achieve at least a 3.70 grade point average (GPA) for the first semester of the freshman year or a 3.5 GPA for the first four semesters, may be designated Distinguished Scholars. These students, with the approval of their advisor, may be exempted from most formal requirements for the Bachelor of Science in Nuclear Engineering degree other than the total credit hours, so long as they maintain a satisfactory performance record and the main thrust of their work is along the lines of nuclear engineering education. The general education and liberal studies requirements must be met by Scholars and Distinguished Scholars. Students transferring into the nuclear engineering department may be eligible to qualify for either of these programs as late as the beginning of the seventh semester.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- an ability to identify, formulate, and solve engineering problems. This includes:
 1. an ability to apply knowledge of basic mathematics, science and engineering.
 2. an ability to use advanced mathematical and computational techniques to analyze, model, and design physical systems consisting of solid and fluid components under steady state and transient conditions.
 3. an ability to design a system, component or process to meet desired needs.
 4. an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

- an ability to design and conduct experiments, as well as to analyze and interpret data.
- an ability to function on multi-disciplinary teams.
- knowledge of professional and ethical standards.
- an ability to communicate effectively.
- the broad education necessary to understand the impact of engineering solutions in a global and societal context.
- a recognition of the need for, and ability to engage in life-long learning.
- a knowledge of contemporary issues.

- PHYSICS 623 Electronic Aids to Measurement is recommended for students in the Radiation Sciences track.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

DEGREES/MAJORS/CERTIFICATES

- Technical Communication, Certificate (p. 273)
- Technical Japanese Studies for Undergraduates, Certificate (p. 276)

TECHNICAL COMMUNICATION, CERTIFICATE

The Technical Communication Certificate (TCC) has established itself as a program that meets industry and government agencies' demands for students with skills as communicators and for communication specialists. Because employers value well-developed communication skills, TCC courses will enhance success in co-op/intern positions and post-graduation careers. TCC graduates overwhelmingly confirm not only that the certificate gave them an edge over other candidates during the recruitment process, but also that the communication knowledge, skills, and attitudes they acquired while in the program helped them succeed in their jobs and helped prepare them for the diverse communication and management tasks in today's multifunctional team environments.

The Technical Communication Certificate, offered by the Department of Engineering Professional Development (EPD), complements all undergraduate degrees, but is especially designed to fit in well with an engineering degree. TCC students gain experience in career-applicable skills by

- Receiving education in principles and processes for communicating about technical subjects (including problem solving methods, audience analysis, rhetorical analysis, conventions of format, and usability testing).
- Gaining education in the fundamentals of written, oral, and visual communication (including organization, structure, style, mechanics, format, and delivery).
- Learning effective interpersonal communication and management skills (including teamwork, interviewing, leading and facilitating groups, project management, and international communication).
- Gaining opportunities to research and think analytically about contemporary issues and to consider ethical issues.
- Using current technology to encourage effective communication in a variety of environments (including use of the web, distance communication, electronic publishing, group software, and layout and presentation software).

While the certificate is designed especially for engineering students, students from other fields sometimes seek out the program to enhance their career options. Students who complete the certificate will have the notation "Technical Communication Certificate" added to their transcripts.

Aside from the relevant courses offered in the TCC, students especially value the close contact with faculty through advising and development of a TC Certificate Portfolio. Students in the program often take on leadership roles in other college or campus student organizations and projects, further developing their communication, team, and management skills.

HOW TO GET IN

Undergraduates who would like to enroll in the Technical Communication Certificate may download the TCC Application form (PDF) (<http://tc.engr.wisc.edu/wp-uploads/2012/05/TCCApplication2016.pdf>) or pick one up from Suite 2107 in the Mechanical Engineering Building. Please include a current transcript

or DARS report with the application form. Graduate students and non-degree-seeking students cannot enroll in the TCC.

PREREQUISITES FOR ADMISSION TO THE TCC PROGRAM

- A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 out of 5).
- Four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course.
- Three courses (9-credit minimum) in humanities, social sciences, and/or foreign language.
- Overall GPA of at least 2.5.

Applications are accepted throughout the semester, though students are encouraged to submit applications as early as possible so they have ample time to plan their coursework. Please drop completed applications off at Suite 2107, Mechanical Engineering, or email completed pdf applications to Dr. Laura Grossenbacher at lgrossenbac@wisc.edu. The program will notify all new admissions via email.

REQUIREMENTS

To graduate with the certificate in technical communication, students must complete at least 24 credits, with a minimum of 9 credits in technical proficiency courses and a minimum of 15 credits in both technical and non-technical communication courses.

In addition to course requirements, students must achieve at least a B in the required Technical Communication (E P D 397) and the Technical Communications Internship (E P D 398). All students must complete the program within five years from their application date. Students must meet regularly with their assigned certificate advisor and must compile and submit a portfolio of their work for the internship course. Students cannot count courses completed on a pass/fail basis toward the certificate.

Substitution of courses substantively equivalent to those listed will be considered by the Technical Communication Curriculum Committee. Students must submit requests for substitution with supporting material before beginning the course.

TECHNICAL JAPANESE STUDIES FOR UNDERGRADUATES, CERTIFICATE

Japanese has become an important language in engineering and in business. In all major industrial fields Japanese technology is regarded as world class. An increasing number of American companies are establishing technical operations in Japan. These companies need engineers who can read and communicate in both English and Japanese. To meet this need, the College of Engineering offers a sequence of courses leading to a Certificate in Technical Japanese Studies for Undergraduates. This option is recommended for students who seek a balance among comprehension of technical Japanese, the ability to use Japanese in daily life, and an understanding of Japanese culture.

REQUIREMENTS

In order to receive this certificate a student must complete a minimum of 27 credits. This certificate is available to **all** undergraduate students at UW–Madison, regardless of major. Students may not elect the pass/fail option for any course that is used to satisfy the requirements for this certificate. Students who receive this certificate develop conversational and written skills in colloquial Japanese, as well as reading and translation skills in technical Japanese. These skills are valued by employers when students apply for Japan-related jobs. The following courses are required:

Code	Title	Credits
Japanese Language Courses (12 credits)		
E ASIAN 104	Second Semester Japanese ¹	6

E ASIAN 203	Third Semester Japanese ²	6
Technical Japanese Courses (6 credits)		
E P D/E ASIAN 374	Intermediate Technical Japanese I	3
E P D/E ASIAN 375	Intermediate Technical Japanese II ³	3
Total Credits		18

¹ In order to enroll in E ASIAN 104 students must either:

- complete E ASIAN 103 (6 credits) or
- complete E ASIAN 123 and E ASIAN 124 or
- place out of E ASIAN 103 by passing a placement test.

² The combination of E ASIAN 104 and E ASIAN 203 will give students a strong foundation for interacting with Japanese counterparts. E ASIAN 123, E ASIAN 124 and E ASIAN 203 are frequently offered during the summer. This makes it possible for students with heavy credit loads to begin or continue their study of Japanese during the summer.

³ The combination of E P D/E ASIAN 374 and E P D/E ASIAN 375 will give students experience reading Japanese essays on a range of scientific and technical topics—including computer science, physics, chemistry, and various fields of engineering. Students read and translate essays from all of these fields into English. In the process, students develop a strong technical vocabulary in Japanese and learn expressions that frequently appear in Japanese journal articles and technical reports.

INDUSTRIAL AND SYSTEMS ENGINEERING

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best—the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office

to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in five main areas:

- Decision Science and Operations Research
- Health Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Production Systems
- Quality Engineering

Although there is no sub major within IE, it is possible to achieve a degree of specialization through a judicious choice of IE technical electives. Courses focusing on teams and design projects prepare students to succeed in the workplace.

INDUSTRIAL ENGINEERING, B.S.

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best—the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in five main areas:

- Decision Science and Operations Research
- Health Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Production Systems
- Quality Engineering

Although there is no sub major within IE, it is possible to achieve a degree of specialization through a judicious choice of IE technical electives. Courses focusing on teams and design projects prepare students to succeed in the workplace.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply>) need to indicate an engineering major (<https://www.engr.wisc.edu/>

academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

INDUSTRIAL ENGINEERING CURRICULUM (FALL 2016 AND BEYOND)

The following curriculum applies to students admitted to the industrial engineering degree program beginning in fall 2016 or later. Required courses are indicated. The *Industrial Engineering Undergraduate Curriculum Guide* (<https://www.engr.wisc.edu/department/industrial-systems-engineering/academics/bachelor-of-science-in-industrial-and-systems-engineering>) contains lists of courses that fulfill the requirements in the following categories: General Education Communication Elective, Mathematics, Science, Engineering and Science Electives, IE Required Courses, IE Technical Electives, Junior Design and Senior Design. For Liberal Studies Electives refer to the College of Engineering Liberal Studies Guidelines.

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus—Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3

STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
Total Credits		22

SCIENCE

Code	Title	Credits
PHYSICS 201 or E M A 201	General Physics ¹ Statics	5
PHYSICS 202	General Physics	5
CHEM 109	Advanced General Chemistry	5
COMP SCI 301 or COMP SCI 200 or COMP SCI 300	Introduction to Data Programming Programming I Programming II	3
Total Credits		18

¹ E M A 201 Statics alone does **not** meet the prerequisite for PHYSICS 202 General Physics. Students who take EMA 201 must take either E M A 202 Dynamics or M E 240 Dynamics in addition to meet the PHYSICS 202 prerequisites. E M A 202 and M E 240 will fulfill Engineering Science credit requirements.

ENGINEERING AND SCIENCE ELECTIVES

Code	Title	Credits
Engineering Science (non ISyE or EPD) ²		3
Statistics Elective		3
Math, Biology flexible electives		6
Computer Science Elective		3
Total Credits		15

² INTEREGR 170 Design Practicum (or other eligible INTEREGR departmental courses) will count toward the Engineering & Science elective credits.

MINIMUM REQUIRED CREDITS: 121

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

At the time of graduation, UW-Madison Industrial Engineering students will have attained:

1. Apply knowledge of math, science, economics, and engineering principles to solve ISYE, social or business problems.
2. Recognize, describe, predict and analyze systems behavior.
3. Apply experimental design or data analytics.
4. Demonstrate ability to design a system, component, or process to meet desired needs within realistic constraints such as

economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.

5. Design effective and efficient human and technical work systems.
6. Contribute to solving ISyE problems and cooperate with engineers to solve engineering and societal problems.
7. Identify, formulate, and solve engineering problems using appropriate information and approaches.
8. Understand physiological, cognitive, and sociotechnical aspects of humans as components in complex systems.
9. Identify opportunities and apply engineering solutions for evaluating productivity and quality improvement.
10. Demonstrate an understanding of professional and ethical responsibility.
11. Demonstrate an understanding of the impact of engineering solutions in a global, economic, environmental, and societal context.
12. Demonstrate knowledge of contemporary issues across various industries.
13. Show proficiency and effectiveness in technical communications.
14. Engage in continued learning and demonstrate an appreciation of the benefits of lifelong learning.
15. Apply the techniques, skills, and modern engineering tools necessary for engineering practice, such as quality engineering, optimization, simulation, and project management.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

MATERIALS SCIENCE AND ENGINEERING

The Department of Materials Science and Engineering offers a B.S. degree in materials science and engineering and M.S. and Ph.D. degrees in materials engineering.

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

LIBERAL STUDIES

Complete requirements (p. 207).²

² Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D).
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

FREE ELECTIVES

Select 4 elective credits³.

³ The above subject requirements can be met with 124 credits of UW courses. Students must complete 128 credits of coursework to earn the B.S. in materials science and engineering. The 5 elective credits may be earned by choosing elective courses that carry more credits than the requirement's minimum credit load or by taking any additional coursework of the student's choice.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- a. Students shall be able to apply knowledge of mathematics, chemistry, physics, and materials science and engineering principles to materials and materials systems.
- b. Students shall be able to design and conduct experiments to study the microstructure, properties, processing and performance of materials and to analyze and interpret the experimental results.
- c. Students shall be able to design materials and processes to produce them to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and/or sustainability.
- d. Students shall be able to work in multi-disciplinary teams and provide leadership on materials related problems that arise in multi-disciplinary work.
- e. Students shall be able to identify materials-related problems and formulate plans to solve such problems.
- f. Students shall have an understanding of professional and ethical responsibility.
- g. Students shall be able to communicate materials concepts effectively through written reports, oral presentations, and discussion.
- h. Students shall have the broad education necessary to understand the impact of materials science and engineering solutions in a global, economic, environmental, and societal context.
- i. Students shall have the materials science and engineering foundation needed to succeed in materials science and engineering graduate programs, to pursue other forms of continuing education in materials science and engineering, and to engage in life-long learning of materials science and engineering.
- j. Students shall have an awareness of contemporary and cultural issues.
- k. Students shall be able to use the techniques, skills, and modern materials science and engineering tools necessary to practice materials science and engineering as a professional.

ADVISING AND CAREERS**ADVISING**

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

MECHANICAL ENGINEERING

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or many other large and small industries. Their work may involve research and development of new products, design of equipment or systems,

supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems, and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

ENGINEERING THERMAL ENERGY SYSTEMS, CERTIFICATE

Efficient use of thermal energy is an increasingly popular area of interest for UW–Madison engineering students and employers. The objective of the Certificate in Engineering Thermal Energy Systems program is to provide students in the College of Engineering with an organized set of courses that will improve their capacity to analyze and design innovative thermal energy systems. These systems include, but are not limited to, energy conversion systems and their fuels, refrigeration, combustion, and solar energy. Thermal energy systems either employ thermal energy directly or convert thermal energy to other energy forms.

HOW TO GET IN

Second- and third-year students who wish to apply for admission into this certificate program will need to complete a major/certificate declaration form obtained from the student services office. The student should have a B or better average in the major to enter this program. Once approved by the student services office and the student's faculty advisor, the form will be forwarded to the registrar's office to be added to the student record. The student services office will, in conjunction with the student's advisor and curriculum committee chair, assist the student in selecting appropriate courses that fulfill certificate requirements. If a Special student does not have a home department in the College of Engineering, the Department of Mechanical Engineering will advise and sponsor the student in this program. To receive the certificate, the applicant must achieve a GPA of 3.0 or higher in the proposed courses listed on the completed form.

Submit the completed Declaration of Intent Form (<https://www.engr.wisc.edu/app/uploads/2016/02/certificate-in-engineering-thermal-energy-systems-declaration-of-intent.pdf>) to student services.

REQUIREMENTS

The certificate, geared toward UW–Madison undergraduate students, requires a total of 18 completed credits. Up to 9 of the credits can be thermal-energy-related courses that are required in the student's undergraduate major. The additional 9 credits must be selected from an assortment of approved elective courses in the College of Engineering.

COURSES

Courses not on this list must be specifically approved by the certificate curriculum committee.

MANUFACTURING ENGINEERING, CERTIFICATE

OVERVIEW

Are you a student interested in manufacturing? Do you like drawing on a variety of skills and knowledge to solve complex problems? If so, you may wish to consider this certificate.

Because manufacturing itself is complex and broad, manufacturing engineers apply many engineering principles and work in a multidisciplinary world. This certificate allows students to emphasize either manufacturing systems or manufacturing processes—or, they can choose to spread courses evenly across both. Through this certificate, students will gain an understanding of these two areas of manufacturing. Undergraduates in industrial and systems engineering or mechanical engineering can pursue this certificate without adding time to the degree.

HOW TO GET IN

ENROLLMENT

This undergraduate certificate is open to all undergraduate students at the University of Wisconsin–Madison. Mechanical Engineering and Industrial and Systems Engineering students can complete this certificate without adding time to degree.

ADMISSION

Admission into the undergraduate certificate in manufacturing engineering requires:

- Undergraduate standing at UW–Madison
- Cumulative GPA (at UW–Madison) greater than or equal to 3.0

- Green Shop Pass with CNC 1 upgrade (College of Engineering Student Shop)
- Completion of the admissions form
- Meeting with a faculty advisor

Students must complete an admissions form, obtain the required signatures, and bring the form to one of the student services coordinators for the Department of Mechanical Engineering. The form will be used to ensure that students have completed the Green Shop Pass and CNC 1 upgrade in the College of Engineering Student Shop, meet the GPA requirement for admission, meet the course grade requirement for courses already completed, and list courses that are planned in order to satisfy the certificate program. The form will contain fields for the following information:

- Study plan (courses that have been taken, are being taken, and plan to take)
 - Core courses
 - Elective courses
 - Grades for any courses that have already been taken
 - When future courses will be taken
- Cumulative GPA at time of admission
- Expected graduation date
- Major
- Signature from Student Shop indicating successful completion of the Green Shop Pass and CNC 1 upgrade
- Signature from a key program faculty member indicating that the student meets the admission requirements and has discussed the study plan with the faculty member

COMPLETION

In order to successfully complete the undergraduate certificate in manufacturing engineering, students must:

- Have been admitted to the certificate
- Maintain a cumulative GPA of 3.0 or greater for the courses taken for the certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.
- Have received a grade of BC or higher in all courses taken for the certificate. If a course is repeated, the highest grade received in the course is used for this criteria.

REQUIREMENTS

The core courses were chosen to include two manufacturing-process-focused courses as well as two manufacturing systems-focused courses. A manufacturing engineer must be multidisciplinary because of the complex and broad nature of manufacturing as an application of many engineering principles. The objective of the core course requirements is to provide students with basic understanding of manufacturing systems and basic understanding of manufacturing processes.

Code	Title	Credits
Three courses must be from the following Core Courses with a grade of BC or better:		
M E 313	Manufacturing Processes	9
M E 314	Manufacturing Fundamentals ¹	
I SY E 315	Production Planning and Control	

I SY E 415 Introduction to Manufacturing Systems, Design and Analysis ¹

An additional three courses must be from any of the following Elective Courses with a grade of BC or better, with at least one course from each of the two categories:

1. Mechanical and Materials Engineering Electives

M E 314	Manufacturing Fundamentals ¹
M E 417	Introduction to Polymer Processing
M E 418	Engineering Design with Polymers
M E 419	Fundamentals of Injection Molding
M E 420	Introduction to Polymer Composites Processing
M E 429	Metal Cutting
M E/E C E 439	Introduction to Robotics
M E 447	Computer Control of Machines and Processes
M E 449	Redesign and Prototype Fabrication
M E 514	Additive Manufacturing
M S & E/M E 435	Joining of Materials: Structural, Electronic, Bio and Nano Materials
M S & E 461	Advanced Metal Casting
M S & E/M E 462	Welding Metallurgy

2. Industrial & Systems Engineering Electives

I SY E 415	Introduction to Manufacturing Systems, Design and Analysis ¹
I SY E/M E 510	Facilities Planning
I SY E/M E 512	Inspection, Quality Control and Reliability
I SY E/B M E 564	Occupational Ergonomics and Biomechanics
I SY E 575	Introduction to Quality Engineering
I SY E 605	Computer Integrated Manufacturing
I SY E 615	Production Systems Control
I SY E/M E 641	Design and Analysis of Manufacturing Systems
I SY E/M E 643	Performance Analysis of Manufacturing Systems

¹ If M E 314 and/or I SY E 415 are taken as part of the Core Course Requirement, then they cannot also count as an elective.

No exceptions or substitutions to the core courses are allowed.

Elective courses not listed must be specifically approved by the curriculum committee of the department teaching the course. The request must include the course number, course name, name and contact information for the professor currently teaching or planning to teach the course; syllabus; and which category it should be listed under. Courses that are approved by the curriculum committee of the department teaching the course must be sent to the certificate program director. Only formal courses will be considered.

Only courses taken for a letter grade count toward this certificate. Only courses in which a grade of BC or better is received count toward this certificate. Courses taken at other institutions may be counted toward this certificate if they have been identified as equivalent through the

existing process. At least 50% of the courses (i.e., three courses) for this certificate must be earned in residence on the UW–Madison campus.

Students must maintain a cumulative GPA of 3.0 or better for the courses taken for this certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.

PEOPLE

KEY PROGRAM FACULTY (MAY SERVE AS ADVISORS FOR STUDENTS PURSUING THIS CERTIFICATE)

Department of Mechanical Engineering (ME)

MECHANICAL ENGINEERING, B.S.

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or many other large and small industries. Their work may involve research and development of new products, design of equipment or systems,

supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems, and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/> apply) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers

group information sessions (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Admissions and Advising Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The following curriculum applies to undergraduate students admitted to the Mechanical Engineering degree program in Fall 2016 or later. Check with the department for any recent changes. Students admitted before Fall 2016 can locate their curriculum at this link (<https://www.engr.wisc.edu/department/mechanical-engineering/academics/bachelor-of-science-in-mechanical-engineering>).

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	19
	Basic Science	13
	Non–Mechanical Engineering	13
	Mechanical Engineering Core	49
	Technical Electives	9
	Math/Science Electives	3
	Communication Skills	6
	Liberal Studies	15
	Total Credits	127

MATHEMATICS/STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus—Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
STAT 324	Introductory Applied Statistics for Engineers	3

All transfer students must have the equivalent of the above courses as equated by the College of Engineering Admissions Office. If the above requirement is fulfilled with fewer than 19 credits, the balance becomes free elective credits.

Transfer students may fulfill the statistics requirement with almost any statistics course having a calculus prerequisite and the approval of the mechanical engineering department via a Course Substitution Form.

BASIC SCIENCE

Code	Title	Credits
	Select one of the following:	5-10

CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
COMP SCI 301	Introduction to Data Programming	3
PHYSICS 202	General Physics ¹	5

¹ Students following the normal ME course sequence need not take PHYSICS 201 General Physics to satisfy the prerequisites for PHYSICS 202 General Physics.

NON-MECHANICAL ENGINEERING

Code	Title	Credits
INTEREGR 110	Introduction to Engineering	1
E M A 201	Statics	3
M S & E 350	Introduction to Materials Science	3
E C E 376	Electrical and Electronic Circuits	3

M E 368	Engineering Measurements and Instrumentation	4
M E 370	Energy Systems Laboratory	3

TECHNICAL ELECTIVES

The mechanical engineering curriculum requires a total of 9 credits of technical electives. A minimum of 3 of those 9 credits must be from formal M E courses numbered 400 and higher. A formal course is defined as a class that meets regularly in a lecture format to study a selected topic. The educational mission is assisted with homework and exams. Formal courses include online courses but do not include seminar, survey, independent study, research, or similar courses.

Technical electives include engineering, mathematics, physics, chemistry, statistics, and computer science courses numbered 400 and higher. INTEREGR and EPD courses are limited to those listed below. The following courses are also accepted as technical electives:		
BMOLCHEM 314	Introduction to Human Biochemistry	3
BSE 351	Structural Design for Agricultural Facilities	3
BSE 364	Engineering Properties of Food and Biological Materials	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE/B M E 320	Introductory Transport Phenomena	4
CBE 326	Momentum and Heat Transfer Operations	3
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CIV ENGR 311	Hydroscience	3
CIV ENGR 415	Hydrology	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	4
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 392	Building Information Modeling (BIM)	3
COMP SCI 300	Programming II	3
COMP SCI 367	Introduction to Data Structures	3
COMP SCI/E C E 354	Machine Organization and Programming	3
COMP SCI/ INFO SYS 371	Technology of Computer-Based Business Systems	3
E P 272	Engineering Problem Solving Using Maple	1
E C E 320	Electrodynamics II	3
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E 342	Electronic Circuits II	3

E C E 353	Introduction to Microprocessor Systems	3
E C E/COMP SCI 354	Machine Organization and Programming	3
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E P D/E ASIAN 374	Intermediate Technical Japanese I	3
E P D/E ASIAN 375	Intermediate Technical Japanese II	3
E P D 660	Core Competencies of Sustainability	3
INTEREGR 301	Engineering and Biology: Technological Symbiosis	1-4
I SY E 323	Operations Research-Deterministic Modeling	3
I SY E/PSYCH 349	Introduction to Human Factors	3

MATH 321	Applied Mathematical Analysis	3
MATH 322	Applied Mathematical Analysis	3
M E 273	Engineering Problem Solving with EES	1
M E 351	Interdisciplinary Experiential Design Projects I	3
M S & E 330	Thermodynamics of Materials	4
M S & E 332	Macroprocessing of Materials	3
M S & E 352	Materials Science-Transformation of Solids	3
N E 305	Fundamentals of Nuclear Engineering	3
PHYSICS 205	Modern Physics for Engineers	3
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4
PHYSICS 322	Electromagnetic Fields	3
PHYSICS 325	Wave Motion and Optics	3
PHYSIOL 335	Physiology	5
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3
STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
STAT 333	Applied Regression Analysis	3
STAT 349	Introduction to Time Series	3
STAT 351	Introductory Nonparametric Statistics	3

Up to 3 technical elective credits may be obtained for non-formal courses such as independent study courses (M E 489, M E 491, M E 492, and other engineering independent study courses numbered 399 and higher); Cooperative Education (M E 1); and E P D 690, "Wisconsin Engineer Magazine."

MATH/SCIENCE ELECTIVES

Code	Title	Credits
The mechanical engineering curriculum requires 3 credits of math/science electives. Any formal course listed as a biological science and numbered 100 or higher will satisfy this requirement. In addition, any formal course offered by an engineering department, or listed as a physical or natural science, and numbered 200 or higher, will also satisfy this requirement. INTEREGR and EPD courses will not satisfy the math/science elective requirement.		

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3

LIBERAL ELECTIVES

Code	Title	Credits
The Mechanical Engineering curriculum requires 15 credits of liberal elective courses. See College of Engineering Liberal Studies Requirements for details.		
Complete Requirements (p. 207)		15
Total Credits		15

ADDITIONAL INFORMATION

Students fulfilling all course requirements with fewer than 127 credits must comply with the credit minimum by taking additional free elective credits. Students in good standing may take free elective courses pass/fail (see the College of Engineering Official Regulations (<https://www.engr.wisc.edu/academics/student-services/academic-advising/undergraduate-engineering-students/rules-and-regulations>) for details). Pass/fail courses do not count toward specific degree requirements.

Independent Studies and projects courses:

Code	Title	Credits
M E 291	Ungergraduate Mechanical Engineering Projects	1-3
M E 299	Independent Study	1-3
M E 489	Honors in Research	1-3
M E 491	Mechanical Engineering Projects I	1-3
M E 492	Mechanical Engineering Projects II	1-3

Students must have a cumulative 2.5 GPA or a 3.0 GPA for their previous two semesters and file an Independent Studies Application with the Student Services Office before enrolling for the course.

For information on credit loads, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail	
Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

The Mechanical Engineering curriculum is designed so that, by the time of graduation, students will have developed the following attributes:

- an ability to apply knowledge of mathematics, science, and engineering.
- an ability to design and conduct experiments, as well as to analyze and interpret data.
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- an ability to function on multidisciplinary teams.
- an ability to identify, formulate, and solve engineering problems.
- an understanding of professional and ethical responsibility.
- an ability to communicate effectively.
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- a recognition of the need for, and an ability to engage in life-long learning.
- a knowledge of contemporary issues.
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Total Credits 131

¹ CHEM 109 Advanced General Chemistry may be taken in place of CHEM 103 General Chemistry I and CHEM 104 General Chemistry II

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

COLLEGE OF LETTERS & SCIENCE

WHY CHOOSE THE COLLEGE OF LETTERS & SCIENCE (L&S)?

What's so great about a liberal arts education from UW–Madison?

For one thing, it makes for a college experience that is rich in discovery, exploration, personal growth, and new ideas.

But while your courses may be fascinating, liberating, eye-opening and mind-blowing, a liberal arts degree from UW–Madison keeps working for you long after you have graduated.

By pursuing a degree in the liberal arts—a bachelor of arts or a bachelor of science—you are preparing for long-term satisfaction in work and in life. A liberal arts degree is a journey of self-discovery, as you explore new topics and discuss ideas with a wide range of people. You delve deeply into a broad range of subjects beyond just your major. When you graduate, you aren't narrowly prepared for one field. You've developed writing, presentation, and analytical skills. You've been exposed to the scientific method, as well as literary analysis. A chemistry major, for example, will also graduate with knowledge of a language, history, social science, the arts, and more.

WHY DOES THIS MATTER?

Because the more you know, the more curious you become. Curious people seek opportunities to enrich and expand their lives. Learning leads to conversation, dialogue, innovation, advancement. Employers value liberal arts majors because they are problem-solvers, out-of-the-box thinkers, and good communicators.

CAN A 4-YEAR DEGREE FROM L&S REALLY OPEN DOORS WITH EMPLOYERS?

Yes, it can. Based on a recent L&S alumni survey rigorously designed and administered by the university's nationally renowned survey center, our graduates' employment rates are on par with the School of Business and the College of Engineering, and out-perform the national average for university graduates. They work for an extremely wide range of fields, including technology, corporate management, education, and nonprofits.

L&S alumni also report high job satisfaction and believe that their academic preparation gave them an advantage compared to employees from other colleges and universities.

Then there's our L&S Career Initiative (<http://ls.wisc.edu/lsci>) (LSCI)—unique among large public universities. Funded by alumni and sponsored by key employers, the LSCI is designed to help each and every one of our students—not just the extra-motivated or well-connected few—define his or her path. We start where *you* are—and go from there. From the basics of resume-building, to connecting with alumni mentors, to landing an internship, the resources are at your fingertips.

BUT WE VALUE LEARNING FOR ITS OWN SAKE, HERE.

You will never regret your liberal arts degree from UW–Madison, because it gives you the opportunity to explore subjects that fascinate you, as well as prepare you for a successful career. You will connect with wonderful faculty from 125 departments, programs, centers and institutes, whose

mentoring and teaching will influence your goals and direction. And you will gain an appreciation for learning that will last a lifetime.

The University of Wisconsin–Madison is one of the great universities of the world, and the College of Letters & Science (<http://www.ls.wisc.edu>) is at its center. Students who earn a bachelor of arts or bachelor of science degree in the College of Letters & Science (L&S) complement their broad study in the liberal arts and sciences with in-depth study of one or more particular fields, or "majors." Majors range from African languages and literature to philosophy in the humanities, from astronomy to zoology in the natural sciences, and from Afro-American studies to sociology in the social sciences.

In addition to the bachelor of arts and bachelor of science degrees available in L&S, the college also offers a limited number of special degrees. These programs often have additional admission requirements and require completion of additional requirements in the major.

Finally, a wide array of certificate programs are also available for students who have special interests in such diverse topics as integrated liberal studies; international, global, and area studies; religious, ethnic, and gender studies; and more.

DEGREES/MAJORS/CERTIFICATES

All students pursuing their undergraduate studies in the College of Letters & Science **must** fulfill the following requirements:

- General Education Requirements (p. 17)
- Letters & Science Requirements (p. 321)
- Major Requirements (See below)

- African Languages and Literature, B.A. (p. 335)
- African Languages and Literature, B.S. (p. 340)
- African Studies, Certificate (p. 764)
- Afro-American Studies, B.A. (p. 344)
- Afro-American Studies, B.S. (p. 348)
- Afro-American Studies, Certificate (p. 352)
- American Indian Studies, Certificate (p. 354)
- Anthropology, B.A. (p. 357)
- Anthropology, B.S. (p. 362)
- Applied Mathematics, Engineering, and Physics, B.S. AMEP (p. 972)
- Archaeology, Certificate (p. 366)
- Art History, B.A. (p. 369)
- Art History, B.S. (p. 378)
- Asian American Studies, Certificate (p. 389)
- Asian Studies, B.A. (p. 768)
- Asian Studies, B.S. (p. 773)
- Astronomy–Physics, B.A. (p. 424)
- Astronomy–Physics, B.S. (p. 427)
- Atmospheric and Oceanic Sciences, B.A. (p. 430)
- Atmospheric and Oceanic Sciences, B.S. (p. 433)
- Biochemistry, B.A. (L&S) (p. 459)
- Biochemistry, B.S. (L&S) (p. 468)
- Biology Core Curriculum Honors, Certificate (p. 476)
- Biology, B.A. (L&S) (p. 911)
- Biology, B.S. (L&S) (p. 921)
- Botany, B.A. (p. 479)

- Botany, B.S. (p. 482)
- Cartography and Geographic Information Systems, B.A. (p. 673)
- Cartography and Geographic Information Systems, B.S. (p. 677)
- Celtic Studies, Certificate (p. 732)
- Chemistry, B.A. (p. 510)
- Chemistry, B.S. (p. 515)
- Chicana/o and Latina/o Studies, Certificate (p. 521)
- Chinese Professional Communications, Certificate (p. 391)
- Chinese, B.A. (p. 394)
- Chinese, B.S. (p. 398)
- Classical Humanities, B.A. (p. 524)
- Classical Humanities, B.S. (p. 529)
- Classical Studies, Certificate (p. 533)
- Classics, B.A. (p. 536)
- Classics, B.S. (p. 539)
- Communication Arts, B.A. (p. 549)
- Communication Arts, B.S. (p. 554)
- Communication Sciences and Disorders, B.A. (p. 564)
- Communication Sciences and Disorders, B.S. (p. 567)
- Comparative Literature and Folklore Studies, B.A. (p. 571)
- Comparative Literature and Folklore Studies, B.S. (p. 574)
- Computer Sciences, B.A. (p. 579)
- Computer Sciences, B.S. (p. 584)
- Computer Sciences, Certificate (p. 588)
- Conservation Biology, B.A. (p. 485)
- Conservation Biology, B.S. (p. 490)
- Criminal Justice, Certificate (p. 496)
- Digital Studies, Certificate (p. 560)
- East Asian Studies, Certificate (p. 778)
- East Central European Languages, Literatures, and Cultures, Certificate (p. 698)
- Economics, B.A. (p. 590)
- Economics, B.S. (p. 595)
- English, B.A. (p. 601)
- English, B.S. (p. 613)
- Environmental Sciences, B.A. (L&S) (p. 436)
- Environmental Sciences, B.S. (L&S) (p. 444)
- Environmental Studies Major (p. 627)
- European Studies, Certificate (p. 780)
- Folklore, Certificate (p. 577)
- French, B.A. (p. 634)
- French, B.S. (p. 639)
- French, Certificate (p. 644)
- Gender and Women's Studies, B.A. (p. 655)
- Gender and Women's Studies, B.S. (p. 662)
- Gender and Women's Studies, Certificate (p. 669)
- Geography, B.A. (p. 680)
- Geography, B.S. (p. 684)
- Geology and Geophysics, B.A. (p. 689)
- Geology and Geophysics, B.S. (p. 693)

- Statistics, B.S. (p. 1168)
- Teaching English to Speakers of Other Languages, Certificate (p. 626)
- Zoology, B.A. (p. 950)
- Zoology, B.S. (p. 954)

available through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply>).

Prospective students with questions about study in the College of Letters & Science may contact L&S Academic Advising Services (<http://advising.ls.wisc.edu>) at 608-262-5858 or Cross-College Advising Service (<https://ccas.wisc.edu>) at 608-265-5460. Students should also feel free to contact the major department (p. 295) directly if they have specific questions about a particular major.

TRANSFER STUDENTS

Transfer students interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through the Office of Admissions and Recruitment at UW–Madison. Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS report, which will explain how their transfer credits will apply toward L&S requirements. Students can request and review their DARS in the Student Center via My UW (<https://my.wisc.edu>). Students can also request DARS for programs, majors, or certificates that they have not declared but are interested in declaring. These reports are called “what-if” reports. (Please note that some programs may not be available in DARS. For information about requirements in a program not available in DARS, contact the advisor for the particular program.)

Please note that the DARS audit serves as the *document of record* (DOR) for students in the College of Letters & Science. The DOR is used to certify completion of degree requirements, and it is retained according to university record retention and archival policies.

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See Credit Limitations from Non-Degree-Granting Accredited Institutions (p. 297).

Transfer students who have more than 30 degree credits are ineligible to earn retroactive credits in a foreign language on the UW–Madison campus. See Credit by Department Examination (p. 297).

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in Suite 155 Middleton Building, 1305 Linden Drive, and the Cross-College Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major. All L&S undergraduate students are expected to declare a major by the time they have 86 degree credits.

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007 are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (<http://guide.wisc.edu/archive>) for more information.)

Because some requirements in force before this edition of the Guide differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog in force at the time of their first matriculation to college. (See past catalogs (<http://guide.wisc.edu/archive>) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

ENTERING THE COLLEGE

ADMISSIONS

Any student interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through the Office of Admissions and Recruitment at UW–Madison. Information on applying to the university as a freshman, transfer, or international student is

ON-CAMPUS TRANSFER

Continuing UW–Madison students must have a minimum 2.0 cumulative grade point average **and** a UW–Madison grade point average of at least 2.000 in their most recent semester of work in order to transfer into the College of Letters & Science. First-semester and new transfer students without a UW–Madison grade point average may transfer into Letters & Science provided they meet university admission requirements (three units of math and two units of a single foreign language). Students admitted to the university with admission deficiencies must remove those deficiencies before they are eligible to transfer into L&S. **For more information on transferring into L&S or signing up for a Transfer Workshop, call 608-262-5858 or refer to request to transfer into L&S** (<http://advising.ls.wisc.edu/transfer.html>).

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per semester toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 321).)

UNIVERSITY SPECIAL STUDENTS

If you are not currently enrolled in a UW–Madison degree program but wish to take courses within the College of Letters & Science at UW–Madison for credit or as an auditor, it may be best to consider becoming a University Special student. Information about becoming a non degree-seeking student at UW–Madison can be found at University Special Students (<http://continuingstudies.wisc.edu/advising/univspec.htm>).

WISCONSIN EXPERIENCE

THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS & SCIENCE

The three elements of learning described below—tools, breadth, and depth—work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences comprise the Letters & Science approach to helping students obtain a distinctive *Wisconsin Experience*.

Additional information about the Wisconsin Experience can be found through the Office of Admissions and Recruitment/Why UW link (https://www.admissions.wisc.edu/why/wisconsin_experience.php).

POLICIES AND REGULATIONS

ACADEMIC STATUS

ACADEMIC PROBATION

Every student is expected to maintain at least a C average (2.000 grade point average) on all work carried, whether passed or not, in each term (fall, spring, and summer). Failure to earn this minimum grade point average will result in a status of **probation, strict probation, or dropped**, as shown below.

Every student can determine their academic status at the end of each term (fall, spring, or summer) based on the probationary status when the term began and the grade point average earned during that term.

1. If a student is not on probation and:
 - a. earns a grade point average in the fall term, spring term, or summer term between 1.000–1.999: placed on **probation**.
 - b. earns a grade point average in the fall term, spring term, or summer term less than 1.000: placed on **strict probation**.
2. If a student is on probation and:
 - a. earns a grade point average in the fall term, spring term, or summer term between 1.500–1.999: placed on **strict probation**.
 - b. earns a grade point average in the fall term, spring term, or summer term less than 1.500: **dropped for at least one year**.
3. If a student is on strict probation and the grade point average is less than 2.000: **dropped for at least one year**.

If a student is dropped for one year, the student must stay out of school for a minimum of twelve (12) months. For more information on Academic Probation and Drop, refer to Probation (<http://saa.ls.wisc.edu/probation-overview.htm>) and What exactly is the L&S Academic Probation System? (<https://kb.wisc.edu/ls/page.php?id=21180>)

ACADEMIC SUSPENSION (DROPPED FOR ONE YEAR)

An L&S undergraduate student on academic probation will be dropped (placed on academic suspension) for at least one year at the end of any term in which the student has had at least two terms below a 2.000 grade point average (GPA). The College of Letters & Science undergraduate probation system is as follows:

- If a student is not on probation and earns a term GPA of 1.000 - 1.999, the student is placed on **probation**.
- If a student is not on probation and earns a term GPA of less than 1.000, the student is placed on **strict probation**.

- If a student is on probation and earns a term GPA of 1.500 - 1.999, the student is placed on **strict probation**.
- If a student is on probation and earns a term GPA of less than 1.500, the student is **dropped for one (1) year**.
- If a student is on strict probation and earns a term GPA below 2.000, the student is **dropped on one (1) year**.

Students have the opportunity to appeal the “dropped for one year status” from the University of Wisconsin-Madison by participating in the Appeals Process (also known as Faculty Appeals). It is important to note that appealing one’s drop status **does not** guarantee a student will be readmitted to the University. For more information about appealing, see appeal dropped status (<http://saa.ls.wisc.edu/probation-appeals-process.htm>) or contact L&S Undergraduate Academic Deans’ Services (<http://saa.ls.wisc.edu/deans-services.htm>) for more assistance.

APPEALS

Exceptions for Students in Dropped Status

A student who has been dropped for academic reasons may appeal for readmission. More detailed information can be found at appeal dropped status (faculty appeals) (<http://saa.ls.wisc.edu/probation-appeals-process.htm>).

- Students dropped at the end of fall term who wish to continue in school in the spring term **must** appeal for readmission the week before spring term classes begin.
- Students dropped at the end of spring term who wish to continue in school for the summer or fall term must appeal for readmission the week before the beginning of the first three-week summer term begins for students who wish to take summer classes, **or** before the eight-week summer term begins for students who do not wish to take summer courses.
- Students dropped at the end of a summer term who wish to continue in school for the fall term **must** appeal for readmission the week before fall term classes begin.

Additional information concerning appeals is available at Appeal Dropped Status (<http://saa.ls.wisc.edu/probation-appeals-process.htm>).

Exceptions to Basic Degree Requirements

A student wishing to request an exception to a basic degree requirement must first confer with an academic dean (<http://saa.ls.wisc.edu/deans-services.htm>). Only in extremely rare and unusual circumstances will any exception be made.

Exceptions to Major Requirements

A student wishing to request an exception to a requirement in the major must first confer with the advisor or chair of the department. If the department supports the request, a DARS exception is submitted on behalf of the student to Academic Information Management (AIM) in L&S Student Academic Affairs.

Exceptions to College Rules

A student wishing to request an exception to college rules should consult an academic dean in L&S Undergraduate Academic Deans’ Services (<http://saa.ls.wisc.edu/deans-services.htm>). The dean will consider the request on an individual basis and make a decision to grant or to deny the request.

CLASS STANDING

Students are classified by year according to the number of credits and grade points they have earned:

Freshman: fewer than 24 credits

Sophomore: at least 24 credits and 48 grade points

Junior: at least 54 credits and 108 grade points

Senior: at least 86 credits and 172 grade points

These credits and grade points must be in courses that count toward a Letters & Science degree.

DEAN'S LIST

The College of Letters & Science Dean’s List is established at the end of each fall and spring terms. To be eligible for the Dean’s List in a given term, students **must**:

- complete a minimum of 12 graded credits in that term with a minimum GPA of 3.600 for students who are classified as freshmen (fewer than 24 credits) and sophomores (at least 24 credits), **or**
- complete a minimum of 12 graded credits in that term with a minimum GPA of 3.850 for students who are classified as juniors (at least 54 credits) and seniors (at least 86 credits).

An entry, “Dean’s List,” appears on the student’s grade report and on the transcript.

- Students who have P grades for their senior thesis (regardless of whether they have 12 other graded credits), as well as students with unresolved grades of NR, I, and Q **are not** eligible for the Dean’s List until they get these outstanding temporary grades resolved.
- Once a student has resolved any outstanding grade issues and believes he/she qualifies to be on the Dean’s List, the student should contact L&S Undergraduate Academic Deans’ Services (<http://saa.ls.wisc.edu/deans-services.htm>) for more assistance.
- **Please note that the College of Letters & Science does not “round up” for the purpose of tabulating the GPA for the Dean’s List.**

More information can be found at how do I qualify for the Dean’s List (<https://kb.wisc.edu/lis/page.php?id=21121>). For information about class standing, see how can I determine my classification or class standing (<https://kb.wisc.edu/lis/page.php?id=38197>).

DISTINCTION IN THE MAJOR

This award is granted at graduation, upon the recommendation of a department to the dean, to any student not earning the Honors Degree who has done superior work in

the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

ADMISSIONS AND TRANSFERS

ON-CAMPUS TRANSFERS

Continuing UW–Madison students must have a minimum 2.000 cumulative grade point average **and** a UW–Madison grade point average of at least 2.000 in their most recent semester of work in order to transfer into the College of Letters & Science. First-semester and new transfer students without a UW–Madison grade point average may transfer into Letters & Science provided they meet university admission requirements (three units of math and two units of a single foreign language). Students admitted to the university with admission deficiencies must remove those deficiencies before they are eligible to transfer into L&S. **For more information on transferring into L&S or signing up for a Transfer Workshop, call 608-262-5858 or refer to request to transfer into L&S** (<http://advising.ls.wisc.edu/transfer.html>).

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per semester toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 321).)

READMISSION

Students who have been required by the College of Letters & Science to take off time from their undergraduate studies at UW–Madison due to past academic performance (dropped/academic suspension) must apply for readmission with an academic dean in the College of Letters & Science in order to be eligible for reentry through the Office of Admissions and Recruitment. For more detailed information about apply for readmission, refer to readmission (<http://saa.ls.wisc.edu/readmission.htm>) through L&S Student Academic Affairs. More detailed information about the readmission process can be found by contact L&S Undergraduate Academic Deans Services (<http://saa.ls.wisc.edu/deans-services.htm>) (lsdeans@saa.ls.wisc.edu or 608-262-0617).

REENTRY

Students who previously attended the University of Wisconsin–Madison but have not been enrolled in courses for at least one term/semester (not including the summer term) are considered reentry students. The primary admission consideration for a reentry student would be his/her academic record while previously enrolled at UW–Madison. For more information about this process, refer to reentry admissions

(<https://www.admissions.wisc.edu/apply/reentry>) via the Office of Admissions and Recruitment website.

Note: Any L&S undergraduate student who has been dropped (put on academic suspension) for at least one year due to their academic performance must also apply for readmissions through the College of Letters & Science. For more information, please refer to readmission (<http://saa.ls.wisc.edu/readmission.htm>).

TRANSFER STUDENTS

Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS report, which will explain how their transfer credits will apply toward L&S requirements. DARS reports can be requested from the Degree Audit section of the registrar's office or accessed via My UW–Madison (<http://my.wisc.edu>).

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See Credit Limitations from Non-Degree-Granting Accredited Institutions (p. 297).

Transfer students who have more than 30 degree credits are ineligible to earn retroactive credits in a foreign language on the UW–Madison campus. See Credit by Department Examination (p. 297).

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in Suite 155 Middleton Building, 1305 Linden Drive, and the Cross-College Advising Center (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major.

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007, are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (<http://guide.wisc.edu/archive>) for more information.)

Because some requirements in force before this edition of the Guide differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog in force at the time of their first matriculation to college. (See past catalogs (<http://guide.wisc.edu/archive>) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

TRANSFER STUDENTS WITH AN ASSOCIATE DEGREE FROM A UW SYSTEM INSTITUTION OR WISCONSIN TECHNICAL COLLEGE SYSTEM SCHOOL

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS) schools that award a liberal arts associate's degree (i.e., Madison College, MATC–Milwaukee, Nicolet, Chippewa

Valley, Western) will have their University General Education Requirement (UGER) (p. 17) breadth requirements satisfied in all undergraduate schools/colleges on the UW–Madison campus. **L&S undergraduates should be aware that they may need to complete additional coursework to satisfy L&S breadth (p. 321) and other degree requirements.** Students should consult their DARS and speak with their undergraduate advisors if they have additional questions regarding satisfying L&S requirements.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by both WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following University General Education Breadth requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 17).

Please note:

- Students in the College of Letters & Science must meet the L&S breadth requirements (p. 321) with specific transfer courses or courses taken in residence.

COURSES AND ENROLLMENT

AUDIT

A student may enroll in a course (i.e., a lecture course) on an audit basis only with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. Courses with laboratory or performance skills may not be audited. Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester program load for purposes of determining fees and maximum credits carried. Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See what does it mean to audit a course (<https://kb.wisc.edu/lis/page.php?id=26734>) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (https://registrar.wisc.edu/course_change_request.htm)) to Suite 110 Ingraham Hall,

1155 Observatory Drive. (**Course Change Requests can be accessed through an individual's Student Center in My UW** (<https://my.wisc.edu>) **under: Course Enrollment/Term Information/Course Change Request.**) Students **will not** be able to submit or cancel a request to audit a course after the fourth week of the fall or spring term.

- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (<http://www.finaid.wisc.edu>) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the Veteran Services & Military Assistance Center (<http://veterans.wisc.edu>).

CERTIFICATE PROGRAMS

Students who intend to complete a certificate program in Letters & Science are encouraged to meet with the certificate advisor to determine eligibility requirements that may apply. Admission to a certificate program (<http://guide.wisc.edu/explore-majors>) requires meeting with the advisor to declare the specific certificate program. Students should use a degree audit (DARS) to monitor their progress in completing their certificate(s) since DARS is the official document used to certify completion of certificate programs. See DARS (https://registrar.wisc.edu/dars_student.htm) for more information.

Students who decide not to complete the program after being admitted must cancel the certificate declaration with the certificate advisor. Students are advised of the following details regarding certificate programs:

- **Some certificate programs may require or encourage students to take courses that are not designated as Liberal Arts and Science courses.** These courses **do not** count toward satisfaction of the requirement that students complete 108 credits in Liberal Arts and Sciences.
- Students may elect to count these credits among the allowed 12 free elective credits in the degree but should also be mindful of the fact that these courses **will not** count toward fulfilling breadth or level within L&S.
- An exception **will not** be made to count non Liberal Arts and Science courses for breadth and level if a student is using these credits to fulfill a certificate program and/or trying to fulfill other major/degree requirements.
- Completion of some certificate programs may require students to take more than 12 non–Liberal Arts and Sciences credits. **Students may not count more than 12 non–Liberal Arts and Sciences credits toward their L&S degree under any circumstances.**
- **Certificate programs are optional and are not required for graduation.** Because failure to complete a certificate program will not affect eligibility to

graduate, students should understand that, *unless the certificate program is allowed to grant awards to University Special students*, they **must** complete all certificate requirements before graduation or they will not be able to complete the certificate program at a later date.

- **Course work being taken to satisfy certificate requirements should not be taken on a pass/fail basis.** Students should consult the advisor for the particular certificate program for more information about taking classes to satisfy certificate requirements.

CLASS ATTENDANCE POLICY

It is expected that every student will be present at all classes. Students are required to be present at the opening of the term and to remain until the work of the term (which includes the final examination period) is completed. **Note that any excused or unexcused absences may have a negative impact on a student's final grade in a course.** See the faculty senate approved class attendance policy (https://www.secfac.wisc.edu/FacLeg100_299.htm#108) and what is the class attendance policy for students at UW–Madison (<https://kb.wisc.edu/lis/page.php?id=24628>) for more details.

CONCURRENT REGISTRATION AND ENROLLMENT AT UW–MADISON AND ANOTHER INSTITUTION

In some rare circumstances, and only with prior approval of an academic dean, students may enroll to earn degree credit concurrently at UW–Madison and any other accredited postsecondary school, including the UW–Extension.

Requests for approval should be made prior to the end of the second week of classes of the semester in which dual registration is desired (UW–Madison calendar). **Correspondence courses must be completed during the semester in which concurrent enrollment is allowed. To request permission for concurrent enrollment, see Concurrent Enrollment** (<http://saa.lis.wisc.edu/concurrent-enrollment.htm>).

COURSE LEVEL

Each L&S course and each approved non-L&S course that satisfies the L&S liberal arts and science (LAS) requirement have been evaluated for level:

- Elementary
- Intermediate
- Advanced

Course levels are indicated with each course listed in this Guide. **Only courses that indicate level after the course designation category for a course will count toward level in L&S for students.**

CREDIT AND NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. Credit/No Credit courses are designated in the Guide under Courses. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or N (meaning the student did not earn any credit

for the class). Students may not take such courses on any other basis.

CROSS-LISTED COURSES

Cross-listed courses are courses offered under more than one department heading. **Cross-listed courses (i.e., courses offered by more than one department) will be assigned the same number in each department in which it is offered (e.g., African 277 which is cross-listed with approximately five majors/departments).** The courses will carry identical L&S course attributes (breadth and level), will have the identical catalog descriptions in each listing, and will have identical course prerequisites. All cross-listed courses:

1. Must be approved by the University Curriculum Committee (**all** departments must submit a letter of support)
2. Must have the same Course Guide number (e.g., Biology 151, Botany 151, and Zoology 151)

Students completing two majors may count cross-listed courses (i.e., courses listed in both major departments) in partial satisfaction of the requirements for both majors. For more information, see [w \(<https://kb.wisc.edu/lis/page.php?id=21663>\)](https://kb.wisc.edu/lis/page.php?id=21663)hat is a cross-listed course? How is it different from a "meets-with" course? (<https://kb.wisc.edu/lis/page.php?id=21663>)

DIRECTED OR INDEPENDENT STUDY

Directed/Independent Study offers the student an opportunity to work with a faculty member on an individual study program. A student who is stimulated by a particular concept or problem encountered in a course can pursue and develop that interest in depth through a Directed Study project. Such individualized study can make a valuable contribution to a student's educational experience.

- Directed/Independent Study courses **cannot** be used to fulfill any UW–Madison General Education Requirements (GER) (<http://www.lis.wisc.edu/gened>) or L&S breadth requirements (p. 321) under any circumstances.
- **Directed/Independent Study courses may not be taken on a pass/fail or audit basis.**
- **L&S undergraduates are not permitted to take graduate level directed study (courses numbered 799, 899, and 999) under any circumstance.**

Directed Study courses are made available by departments on the basis of a student's preparation and motivation and a faculty member's willingness to accept the student in such an endeavor. See L&S Undergraduate Directed/Independent Study Course Guidelines (<https://kb.wisc.edu/lis/page.php?id=20133>) for more detailed information.

Departments may offer Directed Study at the elementary, intermediate, or advanced level under the following course numbers:

- **198 or 199.** Directed Study courses numbered 198 or 199 have a credit range of 1 to 3 credits, are considered elementary level, and are intended for freshmen and sophomores, though, in exceptional

cases, juniors and seniors may be appropriately admitted if the nature of the course so allows.

- **298 or 299.** Directed Study courses numbered 298 or 299, including supervised reading in foreign languages and in subjects related to students' major fields, have a credit range of 1 to 3 credits and are considered intermediate level.
- **698 or 699.** Directed Study courses numbered 698 or 699 (and other courses with numbers ending in 98/99, between 398 and 699) have a credit range of 1 to 6 credits, are considered advanced level, and are offered primarily for juniors and seniors. However, in unusual cases, freshmen and sophomores with exceptional preparation and motivation may be admitted. At this level, it is a prerequisite to have had previous or concurrent exposure to the subject on an intermediate level.

Directed Study courses with a number ending in 98 (e.g., 198, 698) are carried on a Credit/No Credit (Cr/N) basis. No grades are awarded for these courses. The student earns credit for the course if the instructor is satisfied with the work the student has performed. If not, there is no Failure; the student simply is not awarded any credit for the course. Not all departments offer Directed Study courses on a Cr/N basis. Courses ending in 99 are graded. (See Grades and GPA (https://registrar.wisc.edu/grades_and_gpa.htm) for more information)

Prior to registration and before the end of the second week of classes, students are responsible for making all arrangements with the faculty member who agrees to direct their work. The student and faculty member should prepare a study plan, determine the time and place for regular meetings, the number of credits to be earned, and how to enroll in the course.

Notes:

- Directed Study courses **do not** satisfy basic or breadth requirements. Thus, Directed Study courses **cannot** be used to fulfill any degree requirements such as B.A./B.S. Foreign Language, General Education Requirements (Comm A, Comm B, QR A, QR B, Ethnic Studies), or L&S Breadth (Humanities, Natural Science, Social Science).
- Directed Study courses may generally be repeated for credit if course content is not duplicated.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).**
- All Directed Study courses (graded or not) count toward the maximum number of credits that may be counted in the major if taken in the major department.
- Many majors strictly limit the number of Directed Study credits that can be earned in the major.
- Directed Study courses are not intended as placeholder credits for registration purposes, and students with special rules for full-time status should consult the undergraduate deans before

enrolling in Directed Study courses after the enrollment period.

Directed Study courses taken in non-L&S departments may be counted as Liberal Arts and Science (C) courses provided that they are offered at the 300-or-above level. Because these experiences are intended to provide intensive, one-on-one experiences with faculty, departments are not allowed to use Directed Study courses to teach group instruction courses.

DROP NOTATION

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see Deadlines at a Glance (http://www.registrar.wisc.edu/spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that L&S does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

The drop notation will only show that a student has dropped a course(s) before the official drop deadline. A "DR" on a student's academic record does not have any negative implications for students when they are applying to graduate schools or seeking employment. The "DR" was instituted as a means to document when a course was dropped after the first eight days in the fall and spring semesters (or the appropriate period during the summer session or module courses).

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the College Disabilities Curricular Accommodations Committee. (See foreign language substitution package (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>). For more information, contact L&S Undergraduate Academic Deans'

Services, 608-262-0617, or the McBurney Disability Resource Center, 608-263-2741, TEXT: 608-225-7956.)

In meeting the foreign language requirement, students may combine high school and college work as appropriate. This will allow a student to make full use of high school work in more than one foreign language, or will facilitate the study of a second foreign language that may not have been available in high school. Students who have learned a foreign language in a nonacademic setting may meet the foreign language requirement by successfully completing the appropriate level language course at the university or by successfully completing an appropriate attainment examination.

Foreign language requirements for the B.A. and B.S. degrees differ.

For the **B.S. degree**, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd semester of one college-level language (e.g., Scan 201, Slavic 207, Spanish 203, etc.)

For the **B.A. degree**, the foreign language requirement may be met in one of two ways: (1) completion of the fourth level (unit) in one language, **or** (2) completion of the third level (unit) in one language **and** completion of the second level (unit) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **or**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd semester/level of a second foreign language (e.g., Italian 203) at the college level, **or**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd semester/level of a second foreign language (e.g., German) at the college level

Students who intend to enroll in a foreign language in which they have had previous noncollege instruction must take the UW System placement test in that language.

Notes:

- Students proficient in an American Indian language may be able to use this language to satisfy the foreign language requirement. The American Indian Language Committee will make arrangements to test and/or certify a student's level of proficiency. Students should contact an L&S academic dean for further information.
- Students may take an examination to meet all, or part of, the college foreign language requirement in languages not taught on this campus only if

there is a current UW–Madison faculty member qualified to administer and evaluate an examination to determine a student's competence in the language and level of proficiency. **(The UW–Madison faculty member's department must also support and endorse the administering of this special examination.)** No degree credits are earned for this examination, but level of proficiency established will be accepted toward the foreign language requirement.

- Some languages (e.g., American Sign Language) are taught only through the second semester at UW–Madison. Students may, however, count UW–Madison approved transfer courses beyond this level toward the foreign language requirement and/or satisfy the foreign language requirement by examination in these languages. Substitutions to the foreign language requirement are available for L&S students with certain disabilities that make a course substitution appropriate. ***Extensive and very specific documentation is required from students and disability specialists if individuals wish to be considered for an L&S foreign language substitution package.***

GRADUATE COURSES

All courses numbered 700 and above are graduate courses and considered advanced (A). **Enrollment in these courses is strictly limited to *only* graduate-level students. L&S undergraduates who, on the rare occasion, are permitted to enroll in graduate level courses and receive passing grades in these classes will be awarded undergraduate degree credit.**

- L&S students who receive permission to enroll in L&S graduate courses may count those credits toward completion of their Liberal Arts and Sciences credit requirement. These credits may be used to satisfy the requirements related to mastery of intermediate/advanced level work, but since these courses do not carry breadth designations, they **do not** satisfy breadth requirements.
- Graduate-level courses **cannot** be used as required coursework for a student's undergraduate major or degree requirements.
- L&S students who enroll in **non-L&S** graduate courses may count those credits as part of their free electives in the degree. **These credits may not be used to satisfy breadth or level requirements.**
- Grades earned by undergraduates who complete graduate courses will be included in all relevant grade point average calculations (see Quality of Work Requirements (p. 320) for the list of areas in which these averages are calculated). Most graduate courses restrict enrollment to students who have graduate standing, or who have received the instructor's consent to enroll.
- Students can count up to seven (7) credits of graduate-level coursework earned as an undergraduate toward future graduate studies.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).**

Provided that an instructor wishes to allow undergraduates to enroll in a graduate course, students who wish to enroll in the courses should meet with the instructor, who can evaluate whether or not the student should be allowed to register. This decision is made at the instructor's discretion, based on such considerations as whether or not the student has met course prerequisites, is prepared to perform graduate-level work in the course, and is likely to successfully complete the course. Instructors are not obligated to accommodate undergraduate student requests to enroll in graduate-level courses. Furthermore, it should be noted that all students in graduate-level courses are expected to be held to a similar performance standard with respect to quality, quantity, and type of work performed.

HISTORICAL COURSE DESIGNATIONS AND BREADTH REQUIREMENTS

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities: 12 credits (of which 6 credits **must** be Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits

NOTE: Although all L&S undergraduates must complete a minimum of 12 natural science credits in order to graduate, there are differences between the B.A. and B.S. natural science breadth requirement.

Bachelor of Arts (B.A.) candidates must complete a minimum of **one (1)** 3-credit Biological Science course **and one (1)** 3-credit Physical Science course. The additional 6 credits can be any combination of natural, biological or physical science credits to bring the total to 12 credits.

Bachelor of Science (B.S.) candidates must complete a minimum of 6 credits of Physical Science **and** 6 credits of Biological Science.

Only those courses that have **both** a specific Breadth designation and "C" in the "L&S Credit Type" section of the former Course Guide (<http://public.my.wisc.edu>) under **Additional Info** or in the current Guide (<http://guide.wisc.edu/courses>) with breadth in the course designation section count toward the breadth requirement. The following types of courses **do not** count toward the breadth requirement:

- elementary-level courses in mathematics
- elementary- and intermediate-level courses in foreign language or courses in conversation and composition in a foreign language
- English composition
- directed study/independent study courses
- practical and skill courses such as elementary-level courses in journalism, public speaking, acting, and theater production; courses in art; and courses in music performance

• free elective coursework

The following types of courses are inappropriate for satisfying the breadth requirement, and so lack breadth designation:

- courses that are highly specialized or narrowly pre-professional in nature; and
- internships, practicums, directed study, tutorials, senior theses, and other courses whose content is negotiated between students and faculty on an individual basis.

Courses designated as Natural Science (N) partially satisfy the natural science requirement but not the specific physical or biological sciences course requirements. **If a course can meet more than one breadth designation, students may select the division in which they want that course to count for purposes of the breadth requirement; however, the course may be counted only once and in only one division.**

The following is a list of symbols located in the "geBLC" column of the former *Timetable*, the UW–Madison Transfer Equivalency Database (TED) (<http://www.admissions.wisc.edu/transfer/ted>), and the Transfer Information System (TIS) (<http://tis.uwsa.edu>). These symbols are still used to designate course attributes in L&S. The symbols are as follows:

Letters in the "g" column (or the Gen Ed designation in the "Gen-Ed" section of the *Course Guide* under **Additional Info**) identify a course which counts toward either the Communication requirement or the Quantitative Reasoning requirement for general education as follows:

- a—course counts toward the Communication Part A requirement.
- b—course counts toward the Communication Part B requirement.
- q—course counts toward the Quantitative Reasoning Part A requirement.
- r—course counts toward the Quantitative Reasoning Part B requirement.

The symbol "e" in the "e" column (or "yes" in the "Ethnic" section of the *Course Guide* under **Additional Info**) identifies a course that counts toward the L&S Ethnic Studies requirement.

Symbols in the "B" column (or the breadth designation in the "Breadth" section of the *Course Guide* under **Additional Info**) show how courses count in meeting the breadth requirement for the L&S B.A./B.S. degrees.

- B—Biological Science. Counts toward the Natural Science requirement.
- H—Humanities
- I—Interdivisional. Does not satisfy any breadth requirement
- L—Literature. Counts toward the Humanities requirement
- N—Natural Science. Satisfies the Natural Science requirement but not the Biological or Physical Science requirements
- P—Physical Science. Counts toward the Natural Science requirement

- S—Social Science
- W—Either Social Science or Natural Science
- X—Either Humanities or Natural Science
- Y—Either Biological Sciences or Social Science
- Z—Either Humanities or Social Science

Symbols in the "L" column (or the level designation in the "Level" section of the *Course Guide* under **Additional Info**) show course level. Sixty credits of advanced and intermediate level courses are required for the L&S B.A./B.S. degrees.

- E—Elementary
- I—Intermediate
- A—Advanced
- D—Intermediate or Advanced

Symbols in the "C" column are:

C—courses which count for degree credit in L&S and which count as part of the 100 credits in L&S for students under the 1971 degree requirements or for the 108 Liberal Arts and Science (LAS) credits for students under BABS07.

Course Level

Each L&S course and each approved non-L&S course have been evaluated for level:

- Elementary (E),
- Intermediate (I),
- Advanced (A), or
- Intermediate/Advanced (D).

Course levels are indicated with each course listed in the Guide (<http://guide.wisc.edu/courses>) that also count for L&S Liberal Arts and Science credit. **Only courses that are designated as counting as Liberal Arts and Science credit in the Guide are able to count toward level in L&S for students.**

INTERNATIONAL STUDENTS AND NON-NATIVE SPEAKERS OF ENGLISH TAKING ENGLISH AS A SECOND LANGUAGE COURSES (ESL)

English as a Second Language

Students for whom English is a second language must have a facility in English adequate for university work. Results of the ESL assessment test may require students to take one or more English as a Second Language courses.

An undergraduate non-native speaker of English tested and assigned to courses in English as a Second Language satisfies the General Education Communication Part A requirement through successful completion of ESL 118. Courses numbered ESL 110, 114, 115, 116, 117, and 343 do not carry degree credit in Letters & Science. Students may, however, be eligible to receive a total of 6 degree credits for English as a Second Language coursework only after successful completion of ESL 118.

Students transferring credit for English composition from another university are not eligible to receive any degree credit for English as a Second Language coursework carried after successful completion of ESL 118.

Degree Requirements

In general, international students must complete the same degree requirements as any other entering student. The College of Letters & Science makes some exceptions to this policy. For instance the College may waive the foreign language requirement for the B.A. and B.S. degrees for students who are native speakers of a foreign language.

For the purpose of exemption from the foreign language requirement, a "native speaker" is a student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L&S academic dean to determine how their language background may be applicable toward the foreign language requirement.

Students whose native language is not English may not receive degree credit for work in their native language through Credit by Examination except for literature credit.

Special Advisor

International students can receive advising information from their department advisors.

The Office of International Student Services (<http://iss.wisc.edu>) (716 Langdon Street, Room 217 Red Gym, 608-262-2044; iss@studentlife.wisc.edu) can also offer assistance and advising in non-curricular matters such as visa-related issues.

LIBERAL ARTS AND SCIENCE COURSES

Courses that have been approved as Liberal Arts and Science (LAS) classes are expected to encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters & Science. These include:

1. Skilled written and verbal communication, excelling in formulating and expressing a point of view, reflecting and questioning current knowledge through reading, research and consideration of the views of others.
2. The ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
3. Knowledge of our basic cultural heritage as a multifaceted and often contested history.

For more detailed information, refer to criteria for Liberal Arts and Science Courses (<https://kb.wisc.edu/lis/page.php?id=43819>).

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* courses. These courses are so designated within the Guide (<http://>

guide.wisc.edu/courses) and count toward the L&S degree requirements, including requirements related to breadth and level.

PASS/FAIL

Any L&S undergraduate student in good academic standing is eligible to take **one** course per term/semester on a pass/fail (S/U) basis. *For the College of Letters & Science, good academic standing means that a student does not have one of the following statuses:*

- probation
- strict probation
- continued probation
- continued strict probation
- dropped status

For information about probation, see academic probation and drop (p. 20).

- **Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.**
- First-semester freshmen and transfer students without an established UW–Madison GPA are eligible to take **one (1)** course for pass/fail in their first term at UW–Madison.
- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see What does it mean to take a course pass/fail? (<https://kb.wisc.edu/lis/page.php?id=21102>)

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (<https://login.wisc.edu/?appurl=my.wisc.edu/portal>) by the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.

- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to what does it mean to take a course pass/fail (<http://kb.wisc.edu/lis/page.php?id=21102>) and Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).
- **Students cannot cancel a pass/fail request after the deadline if they need the course to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not s/he can take a course on a pass/fail basis.**
- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW (<http://my.wisc.edu>) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm) on the Registrar's website.
- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
 - Breadth (humanities, literature, social science, natural science)
 - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
 - Math
 - Ethnic Studies
 - General Education Requirements (Comm A, Comm B, QR A, QR B)
 - Major requirements
- L&S undergraduates may take courses in their major or major department for pass/fail. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied.**
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic Deans' Services in Suite 110 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

PRE-PROFESSIONAL COURSES

Pre-Medicine is not a major

College of Letters & Science students who wish to prepare for a career in medicine should enroll in courses which lead to completion of degree requirements in any major and simultaneously fulfill the pre-medical requirements of the medical school of their choice. Students considering a pre-medical program should go to the Center for Pre-Health Advising where they will receive information and advice as needed. See Center for Pre-Health Advising (<http://www.prehealth.wisc.edu>) for more information.

See coursework (<https://prehealth.wisc.edu/coursework-medicine>) for information about courses that support the required and suggested coursework for medical school. Students should keep in mind that this is a general guideline and requirements differ among medical schools.

- *UW–Madison School of Medicine and Public Health (SMPH)*, prerequisites can be found at MD Program Admissions (<http://www.med.wisc.edu/education/md/admissions/premedical-requirements/110>).
- *For students planning to take the MCAT*, see frequently asked questions (FAQ) (<http://www.med.wisc.edu/education/md/admissions/frequently-asked-questions-faqs/108>) at MD Program Admissions for an academic planning guide.

Pre-Law

Pre-law is **not** a major at UW–Madison. For more information for students who are considering, preparing for, or applying to law school, please refer to the Center for Pre-Law Advising (<https://prelaw.wisc.edu>) for more information.

Pre-Veterinary Medicine

Pre-veterinary medicine is **not** a major at UW–Madison. Students interested in pursuing a career in veterinary medicine are encouraged to choose a major of interest that can be pursued simultaneously while completing the 60 credits of required coursework. Students may select an academic major in any school or college to be eligible for admission. One major does not have an advantage over another with respect to admission to veterinary school. For more information about pre-veterinary medicine and planning coursework, contact the Academic Affairs Office, School of Veterinary Medicine, Room 2268, 2015 Linden Drive, 263-2525, or the College of Agricultural and Life Sciences, Room 116 Agricultural Hall.

PREREQUISITE COURSEWORK BACKGROUND

The College of Letters & Science recognizes that some courses that meet general degree requirements (e.g., language, math, ESL) require prior knowledge in that

subject. For purposes of distinguishing between necessary prerequisites and electives, coursework that is regarded as prerequisite to courses meeting general degree requirements is considered "necessary" and not purely elective.

REGISTRATION CHANGES

Students may make changes in their registration (add and/or drop courses, change sections in a course, or change the number of credits in a course) via their Student Center in My UW according to the deadlines published by the Office of the Registrar (http://www.registrar.wisc.edu/schedule_of_classes.htm) each semester and summer session. For more specific information about this process, please refer to Course Change Request (http://registrar.wisc.edu/course_change_request.htm). **Students are strongly encouraged to check their current registration and verify they are properly enrolled in the correct courses using My UW** (<http://my.wisc.edu>). For general questions about this process, contact your undergraduate advisor or L&S Undergraduate Academic Deans' Services at 608-262-0617.

Students who enroll for a course must either complete the course or drop it by the deadline for dropping courses.

REPEAT OF COLLEGE COURSES NOT FOR CREDIT (RETAKING PASSED COLLEGE-LEVEL COURSES ON A REFRESHER BASIS)

Credit will not be granted for the same course twice. Students who wish to refresh their knowledge may repeat courses, but not for credit. All instances of that course will calculate in the semester GPA and in the university cumulative GPA. Repeated courses **do not** calculate in L&S requirements for quality of work (p. 320) (GPA minimums for Intermediate/Advanced work and GPA requirements in the major).

Credits carried on a refresher basis count toward the maximum credits permitted each term. Grades in refresher-basis courses count only in the university grade point average, which may be significant in determining a student's probationary status and eligibility to continue. **Repeating a course will not remove the prior grade(s) earned for that course from the student's record.** Please refer to is it possible to retake a course that I have already passed or received degree credit for (<https://kb.wisc.edu/lis/page.php?id=21934>).

Transfer students must be particularly careful to avoid taking courses on the Madison campus that duplicate courses taken at another institution. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower level course in a sequence if students have already received credit for a higher level course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). Students should carefully check the Evaluation of Transfer Credits prepared by the Office of Admissions and Recruitment and should consult an advisor or academic dean before enrolling.

First-year students (freshmen) should also be mindful of the fact that they will not receive credit again for any course(s) they have already received credit for via AP or college courses they took during high school and transferred to UW–Madison.

REPEAT OF HIGH SCHOOL OR COLLEGE COURSEWORK FOR CREDIT

Students who enter the College of Letters & Science with degree credit for academic work will not receive additional degree credit for repeating that course, for taking an equivalent course, or for taking a lower-level course in a sequence after completing a higher course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). See *i* (<https://kb.wisc.edu/lis/page.php?id=21934>) is it possible to retake a course that I have already passed or received degree credit (<https://kb.wisc.edu/lis/page.php?id=21934>) for more information.

WITHDRAWAL

Withdrawal from school means dropping all courses currently in progress for the term in which the withdrawal is processed. Before the first day of classes in a term, students may remove themselves from classes by dropping **all** of their courses via My UW–Madison. Detailed information about the withdrawal process for L&S undergraduates can be found at withdrawing from semester/term (<http://saa.ls.wisc.edu/policies-withdrawal.htm>).

After the first day of classes and through the withdrawal deadline published in the Deadlines at a Glance section on the registrar's website (Office of the Registrar (<http://registrar.wisc.edu>)), L&S undergraduate students may cancel their enrollment (withdraw from the term) by going to their Student Center in My UW and accessing the Term Withdrawal tab under Course Enrollment. For more detailed information, refer to canceling your enrollment -withdrawals (https://registrar.wisc.edu/canceling_your_enrollment_withdrawal_info.htm). Additional information about the withdrawal process can be found at what does it mean if I withdraw from the term (<https://kb.wisc.edu/lis/page.php?id=21703>).

Students who find it necessary may withdraw at any time during the first 12 weeks of a semester without needing special permission to return for a later term. Summer deadlines for withdrawal are published in the summer by the Office of the Registrar (<http://registrar.wisc.edu>). Students are encouraged to confer with a dean regarding the possible effects of withdrawal upon their academic work.

Students who have neglected their classes, or who have earned unsatisfactory grades, or who have a pattern of withdrawals may need permission of an academic dean to return at a later date.

Letters & Science undergraduate students wishing to withdraw **after** the deadline **must** obtain permission from an academic dean by setting up an individual appointment through L&S Undergraduate Academic Deans' Services (608-262-0617). Failure to obtain this permission results in the recording of Failures for all courses.

semester/term, with an ordinary range of 12 to 18 credits. *Please note that international students and athletes must be enrolled for a minimum of 12 credits in the fall and spring semesters/terms.* For more information, please contact International Student Services (<http://www.iss.wisc.edu>) (608-262-2044) or the Fetzer Student Athlete Academic Center (<http://www.uwbadgers.com/facilities/fetzer-center.html>)(608-262-1787).

- For students receiving financial aid, federal regulations require any student receiving financial assistance to maintain academic progress and be working toward a degree. See satisfactory academic progress (SAP) (<http://www.finaid.wisc.edu/259.htm>) for more details.

Light load (fewer than 12 credits). A program of fewer than 12 credits may be carried **without** the specific authorization of an academic dean. However, students are encouraged to consult their undergraduate advisor or an academic dean regarding the decision to carry a light load. A light load may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits), dependent health insurance, international student visa status, University Housing accommodations, or athletic eligibility. Several terms with a courseload of fewer than 12 credits will also have an impact on a student's graduation program.

Heavy load (19 or 20 credits). Students who have a cumulative GPA of 3.000 or better at the University of Wisconsin–Madison may enroll for 19 or 20 credits during the fall or spring term with permission from an academic dean in L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/credit-overload.htm>). *Additional fees per credit are assessed for all credits above 18. Under no circumstances may a student carry more than 20 credits in one semester.*

- See credit overload/heavy program (<https://kb.wisc.edu/lis/page.php?id=21177>) for more information.
- L&S students who wish to take an overload and qualify to take 19 or 20 credits should fill out the Credit Overload Request (<http://saa.ls.wisc.edu/credit-overload.htm>). For more assistance, please stop by 110 Ingraham Hall, or call 608-262-0617 during regular business hours.

Summer Sessions Credit Load (a maximum of 12 credits). In general a student may carry one (1) credit per week of instruction during the summer session. The overall limit for summer work is 12 credits (or 13 with special permission). The credit limit per summer session is the number of weeks of the session. Thus, a student can earn only 3 credits in a 3-week summer session. A student needs permission from an academic dean to carry one (1) additional credit per weeks in a session (e.g., four (4) credits in a 3-week session). An academic dean's permission usually requires a 3.000 cumulative GPA.

Students must carry courses for the number of credits assigned to the courses in the Guide (<http://guide.wisc.edu/courses>).

CREDITS

CREDIT LOAD

Full-time student status (12–18 credits). The usual study load of a student is about 15 credits per

For more information regarding credit load, see what is the common credit load for L&S undergraduate students during the semester (<https://kb.wisc.edu/lis/page.php?id=26734>).

CREDIT BY COURSE EXAMINATION/RETROACTIVE CREDITS (RETROCREDITS)

Note: Not all courses in language departments carry eligibility for retroactive credit (retrocredits). Students should contact the specific language department to verify which courses qualify for earning retrocredits.

The College of Letters & Science will award degree credit for foreign language work successfully completed in high school under certain circumstances **and** if an additional foreign language course is taken **at UW–Madison**. In no case can a student earn retroactive credits simply by taking a placement test or other exam. A student must take the appropriate UW–Madison language class at UW–Madison to earn retroactive credits.

Students who qualify for retrocredits after completing the appropriate language course on the UW–Madison campus will automatically receive retrocredits approximately two to three months after all grades have been posted for all students. This benefit is available to freshmen (first-year students), and can be exercised when the following conditions are met:

- **The course must be a student's first course at the college level in the language.** This does not include college-level coursework taken during high school, but does include courses transferred from another institution where a student was working towards an undergraduate degree.
- **The course must be designated appropriate for earning retroactive credits by the department.** Not all courses offered by a department of language and literature are eligible—please see below for details.
- **A student must take the course before he/she has earned 30 degree credits.** This **does not** include AP, CLEP, IB, or other college credit earned in high school, nor does it include retroactive credits earned in another language. It **does** include courses transferred from another institution where you were working toward a degree.
- **A student must earn a B or better in the class.**

If a student meets all of the conditions listed above, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester (e.g., if the language was completed in the fall term, the retroactive credits should appear on a student's record by the beginning of the spring term). If retroactive credits do not appear on a qualified student's records by the end of the **fourth** week of the following term, the student should fill out a Retroactive Language Request Form (<http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf>) and submit that form to the office of the academic dean at the student's particular school or college. For students earning an undergraduate degree in the College of Letters & Science, the form should be delivered to L&S Undergraduate Academic Deans' Services (<http://saa.lis.wisc.edu/deans-services.htm>). Non-L&S degree-seeking candidates should speak with the undergraduate

academic service unit in the school or college for more guidance.

- Retroactive credits (retrocredits) **will not** automatically be posted for students who have already earned retrocredits. If a student is still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), the student will need to fill out the Retroactive Language Request Form (<http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf>) and deliver it to the L&S Academic Deans' Services Office in 110 Ingraham Hall if the student is an L&S undergraduate. For further information, contact L&S Academic Deans' Services at 608-262-0617.

Please note:

- **Native speakers of a language are not eligible to earn retroactive credits in that language.**
- Students can earn retrocredits in more than one language as long as they are within the 29-credit limit and meet the other requirements listed above to earn retrocredits.
 - Retroactive credits (retrocredits) will not be posted automatically for students who have already earned retrocredits. If students are still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), they will need to fill out the Retroactive Language Credit Request Form (<http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf>) and deliver it to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall to be reviewed if they are an L&S undergraduate student.
- Retrocredits can only be earned for the first four semesters/terms of a language sequence. For example, a student who tests into Spanish 311 can earn a maximum of sixteen retrocredits (Spanish 101, 102, 203, and 204). The maximum number of credits earned will be impacted if the student already has AP credits for a particular course.
- The maximum number of credits a student can earn for retrocredits may vary based on the language sequence and the number of credits offered in that particular language sequence for the first four semesters. For example, a student who places into E Asian 204 (Fourth Semester Japanese) for 6 credits is eligible to earn 18 retrocredits (E Asian 103, 104, and 203) since each of these classes are worth 6 credits each.
- UW–Madison will honor retroactive credits earned at another institution provided that these credits were earned according to UW–Madison policy. Student will need to work with the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) at UW–Madison to make

sure the retrocredits from the other institution get posted to their official UW–Madison records.

For more information about retroactive credits, refer to Retroactive Credits (<http://languages.wisc.edu/advising/retro>) and is it possible for an L&S undergraduate to earn retrocredits (<https://kb.wisc.edu/lis/page.php?id=23736>).

CREDIT BY DEPARTMENTAL EXAMINATION

The College of Letters & Science allows degree credit, as well as placement credit, for the mastery of some L&S coursework as demonstrated by appropriate achievement tests. The intent of these examinations is to increase opportunities for obtaining degree credit for college-level work done in high school or elsewhere.

Credit may be earned on the basis of an examination given by a department when a student has demonstrated possession of knowledge equivalent to what would be learned in a specific course taught in that department. The credit given is for knowledge possessed by the student regardless of where they have gained that knowledge. Examinations for credit must be administered as soon as possible, but in any case before the end of the student's first semester in residence following the experience that provided the knowledge to be tested.

Any department wishing to do so may give degree credit by examination for any of its elementary- or intermediate-level courses other than Honors courses and Directed Study.

Students who wish to establish credit by department examination must take a separate examination for each course in which credit is sought.

Departments will indicate which, if any, of their courses covering work that may have been taken in high school may permit degree credit on the basis of appropriate national tests taken in high school. In addition, general degree and specific subject credit may be obtained by examination under the College Level Examination Program (CLEP). (See College-Level Examination Program (p. 8).)

In no case may students receive degree credit more than once for the same college-level work. If degree credit is obtained for a given course by taking an examination, the student may not enroll in the course for degree credit, and vice versa.

Credits earned by examination **do not** count toward the residence requirement. Students are encouraged to take departmental examinations for credit prior to earning 90 degree credits (including the semester in which the 90th credit is earned) in order to avoid complications with the residence requirement. It is possible for students to fulfill all or part of the college foreign language requirement without receiving credit.

The provision for credits by examination offers students an opportunity to complete the baccalaureate degree requirements in less than four years should they so desire. Students wishing to take examinations to earn credit should contact the department office.

FREE ELECTIVES

If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (<http://guide.wisc.edu/courses>), and are not designated as courses in the Liberal Arts and Sciences. Thus, these courses **do not** carry breadth or level in L&S.

Credit earned in these courses apply to the degree requirements in the following ways:

- Courses taken as free electives in the degree may be carried and will appear on the transcript showing credits, grade, and grade points.
- These credits will count as part of the semester load and will count toward satisfaction of the minimum progress requirements.
- These credits and grade points will be included in calculating a student's semester and cumulative grade point average.
- Free electives in the degree **cannot** be used to satisfy the L&S requirement that students complete a substantial portion of their degree credits in intermediate and advanced work.
- Courses that are taught in L&S departments but not designated as Liberal Arts and Science courses (e.g., Music and Music Performance courses numbered 099 and below) may be counted for credit as free electives in the degree. (For B.A./B.S. Music majors, Music and Music Performance courses numbered 099 and below that are not required for the major may be counted as free electives.) Students with questions regarding a particular course offered by a school or college outside L&S as it relates to the requirement to complete 108 Liberal Arts and Science credits should consult an academic dean before registration.

NON-DEGREE-GRANTING ACCREDITED INSTITUTIONS' TRANSFER CREDIT LIMITATION

Of the credits required for graduation, not more than 72 may be carried at non-degree-granting accredited institutions. However, of the last 60 credits earned before graduation, not more than 12 may be carried at these non-degree-granting accredited institutions.

NON-L&S COURSES AND L&S DEGREE CREDIT

Liberal Arts and Science Courses

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences (LAS)* courses. These courses are designated as such in the Guide (<http://guide.wisc.edu/courses>). LAS courses count toward the L&S degree

requirements, including requirements related to breadth and level.

Non-L&S Courses Cross-listed with L&S Departments

A course offered in the College of Letters & Science that carries the C designation and which is crosslisted with a department in another school or college is considered a Liberal Arts and Science course. Such courses are designated as counting for Liberal Arts and Science (LAS) credit in L&S within the Guide (<http://guide.wisc.edu/courses>). As LAS courses, they may be counted as part of the major and count as part of the 108 Liberal Arts and Science credits required for an L&S degree.

Non-L&S Courses Required for L&S Majors

Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* designated as Liberal Arts and Science courses in the Guide (<http://guide.wisc.edu/courses>), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 L&S credits required for a degree.

Free Electives in the Degree

If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (<http://guide.wisc.edu/courses>), and are not designated as courses in the Liberal Arts and Sciences. Also refer to free electives (<https://kb.wisc.edu/lis/page.php?id=23921>).

DEGREES

ASSOCIATE DEGREE POLICY

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS) schools that award a liberal arts associate's degree (i.e., Madison College, MATC–Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education (UGER) (p. 17) breadth requirements satisfied in all undergraduate schools/colleges on the UW–Madison campus. Students pursuing their undergraduate degrees in the College of Letters & Science *may* need to take additional coursework to fulfill the L&S breadth requirements (p. 321). Students should consult with their undergraduate advisor(s) if they have additional questions.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by **both** WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following **University General Education Breadth** requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 17).

Please note:

- Students in the College of Letters & Science must meet the L&S breadth requirements (p. 321) with specific transfer courses or courses taken in residence.

DEGREE AND DIPLOMA INFORMATION

The College of Letters & Science offers the following degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Music*
- Bachelor of Arts–Journalism*
- Bachelor of Science–Journalism*
- Bachelor of Social Work
- Bachelor of Science–Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 295).

A UW–Madison undergraduate diploma lists only the degree title. Diplomas *do not* list major(s) or certificate(s) students complete as undergraduates. Major and certificate information is located on a student's official UW–Madison transcript.

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts–Journalism**.

SECOND UNDERGRADUATE DEGREE

Students are not permitted to earn two undergraduate liberal arts degrees. Students interested in earning a second undergraduate degree must consult an academic dean in the College of Letters & Science Academic Deans' Services (608-262-0617; Suite 110 Ingraham Hall, 1155 Observatory Drive).

Please note that students who already have a Bachelor of Arts or Bachelor of Science degree in general are not able to earn another B.A. or B.S. since two-thirds of their coursework for the second degree will be the same. Thus, a student who has a liberal arts degree with a science major is usually not considered a likely candidate for a second degree in the College of Letters & Science if the student wants to come back to do a second liberal arts degree in another humanities, social science, or natural science major. Students who have earned a music degree (MUS), for example, might be able to earn a B.A. or B.S..

Students admitted as candidates for a second undergraduate degree are subject to the L&S Academic Probation and Drop system. Requirements for admission to candidacy for a second degree are:

1. An undergraduate degree earned at UW–Madison or elsewhere. **The second degree must be substantially different from the first degree.** In other words, a student who has a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree **would not** be able to earn another B.A. or B.S. degree. Thus a student who already has a liberal arts degree with a liberal arts major such as Chemistry or History is not considered a likely candidate for a second liberal arts degree in the College of Letters & Science (L&S) if the student wants to come back to do a second liberal arts degree with another major offered within L&S such as Computer Science, Economics, Mathematics, or Spanish. (Also, students who started an additional major but did not declare it prior to graduating **are not eligible** to return as a second-degree student to finish up coursework for the 2nd or additional major.)
2. Satisfaction of all basic admissions requirements to UW–Madison, including geometry.
3. Submission of transcripts from all schools attended (especially if the first degree was not earned a UW–Madison). One set of transcripts must be sent to the Office of Admissions and Recruitment at UW–Madison and a second set of transcripts must be brought to the meeting with the academic dean in L&S Undergraduate Academic Services.
4. Minimum of 3.000 GPA on first undergraduate degree program. Coursework at all colleges attended (including UW–Madison, if applicable) is used to calculate this GPA.
5. An L&S academic dean will check for math and foreign language deficiencies.
6. Admission to the proposed major (a letter of support from the department confirming a student has met all basic entrance requirements to the major and is eligible to declare if admitted for a second undergraduate degree). **Please note that obtaining an endorsement from the department does not guarantee acceptance for a second undergraduate degree if the student does not meet the other criteria listed above.** If a student is lacking admission to or recommendation from the major department, the student could register as a University Special

student but may not register in the College of Letters & Science.

7. Written permission from an L&S academic dean.

To earn a second undergraduate degree from UW–Madison, students must:

1. Satisfy all Letters & Science degree requirements.
2. Satisfy all Quality of Work requirements.
3. Complete at least 30 credits in Letters & Science at UW–Madison after the first degree has been awarded, regardless of whether or not the first degree was an L&S degree. **Note that the second degree must be significantly different from the first.**
4. Complete a minimum of 108 Liberal Arts and Science credits which may include courses completed during the student's first degree program.

SENIOR THESIS

Any senior who so desires may write a senior thesis. A thesis may not carry less than 4 or more than 8 credits and **must be carried over a two-semester period.** A senior thesis must represent treatment of some phase of the student's work in the major; the subject requires approval by the student's advisor and the faculty member in charge of the field of concentration (usually the department chair). Thesis students enroll for thesis course numbers 691 **and** 692 (students in the Honors Program enroll in 681 **and** 682 for a minimum of 6 credits and a maximum of 8 credits in total).

- Students **must** complete **both** 691 **and** 692 **or** 681 **and** 682 of the two-semester course sequence. A student **cannot** substitute one of the sequence courses with a directed study or other course.
- The two-semester course sequence must be in the same department (e.g., Anthro 691 and 692).
- Students **cannot** take the two-semester course sequence in one semester or term.

Students enrolled in a 691/692 or 681/682 senior thesis sequence will receive a grade of "P" (Progress) for the first half of the senior sequence (691 or 681) until they complete both semesters. This designation of "Progress" is a temporary grade used only for courses that span more than one semester/term (typically a senior thesis). When the course is completed, a final grade replaces the P for each term. The "P" does not count in any GPA computation. In addition, the "P" grade does not count for credit until it is replaced by a final grade.

EXAMS

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) enables those students who have attained college-level competency outside the classroom to take examinations for college credit or placement. The General Examinations measure undergraduate achievement in five basic areas of liberal arts education:

- English composition
- Humanities

- Mathematics
- Natural Sciences
- Social Sciences/History

The Subject Examinations measure achievement in undergraduate courses. Both sets of examinations are aimed at the public-at-large, returning service personnel, and entering freshmen. Credit will be granted for the General Examination according to the criteria established ONLY to freshmen before they have earned more than 15 degree credits in a residence program or elsewhere. Only a limited number of departments accept CLEP Subject Examination credits. A continuing student with no more than 15 completed degree credits may register for the General or Subject Examination(s) by contacting the Office of Testing and Evaluation Services, 608-262-5863. For further information, consult L&S Undergraduate Academic Deans' Services at 608-262-0617 or the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply/freshman/apib.php>), 608-262-3961.

EXAMINATIONS FOR PLACEMENT

English

All students must take English placement tests to determine level of competence unless competence has been successfully demonstrated prior to enrollment through coursework (including AP and IB credits). On the basis of their test scores, most students will be required to enroll in and successfully complete a Communication Part A course. This course should be completed within a student's first 30 credits after enrollment.

Non-native speakers of English assigned to courses in English as a Second Language on the basis of their English as a Second Language (ESL) assessment test should see International Students and Non-Native Speakers of English (p. 306).

Foreign Language

Students at UW–Madison who plan to resume the study of a foreign language begun in high school must take the UW System placement examination in that language and consult the foreign language department advisor for appropriate course placement.

Before enrolling in a level either higher or lower than the level of placement indicated by the examination, students should consult the foreign language department advisor. Without regard to any work taken in high school, students may enroll for degree credit in any course offered for degree credit by the college, provided they meet its prerequisites and provided they have not already received college credit for this course or an equivalent course or a higher level course in the same subject by course completion or examination.

This placement procedure permits students who are not confident about their high school foreign language work to retake that work in college before proceeding to more advanced study of that language. Students who feel they are ready to work at a higher level than that indicated by the placement test may do so. In no case may students

receive degree credit more than once for the same level college work.

Mathematics

Entering freshmen are required to complete the appropriate placement test in mathematics. This test determines minimum math competency and placement. Students who do not demonstrate minimum competency in math will be required to complete additional non-degree-credit math courses within the first 30 credits after enrollment.

The results of the placement test in mathematics are binding. Students continuing in mathematics must enroll in the level of mathematics course that is indicated by the examination. However, students who feel their placement examination results are not valid or appropriate may appeal the placement by conferring with the undergraduate advisor in the mathematics department. If the advisor agrees, the student may carry a course below or above the placement indicated for degree credit provided previous college credit has not been granted by course completion or examination.

FINAL EXAMINATIONS (ACADEMIC SUMMARY PERIOD)

Following the regularly scheduled instructional period each semester is an eight-day summary period. Usually the first day of the summary period is for individual study and review, and no classes or exams are to be scheduled during this designated period. The last seven days are prescheduled to include one two-hour summary block for each course of two or more credits. This two-hour block shall be used for an examination or for other instructional activities as deemed appropriate by the instructional unit offering the course. **During the two weeks preceding the summary period, examinations covering the content of the entire course cannot be given.** Take-home examinations are due at the scheduled two-hour block.

Faculty policy prohibits giving or taking final examinations earlier than the time assigned in the Course Guide. Students may arrange a make-up examination at a later date only if the professor is willing and if there is a valid reason for missing a final examination. (See the Guide entry "Incompletes (p. 315)" below.)

Students are required to attend all of their final exams. Leaving prior to the final examination period and not taking finals will have a negative impact on a student's final grade in a course or courses. See class attendance policy (<https://kb.wisc.edu/lis/page.php?id=24628>) for more information.

MID-TERM EXAM POLICY INFORMATION

Information about mid-term evening exam policy along with fall, spring, and summer term final exam policy can be found at mid-term and final exam policy information (https://registrar.wisc.edu/documents/exam_policy.pdf) on the Registrar's website. Additional information can also be located at midterm grades (https://registrar.wisc.edu/mid_term_grades.htm) and

upcoming final exam periods (https://registrar.wisc.edu/midterm_and_final_exam_information_faculty.htm).

- It is implicitly understood that no exams, papers, or assignments will be required during any break period (e.g., spring break) or major holiday.

GRADES AUDIT

A student may enroll in a course on an audit (AU) basis only with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. **Courses with laboratory or performance skills may not be audited.** Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester program load for purposes of determining fees and maximum credits carried.

Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See [w \(https://kb.wisc.edu/lis/page.php?id=26734\)](https://kb.wisc.edu/lis/page.php?id=26734) hat does it mean to audit a course (<https://kb.wisc.edu/lis/page.php?id=26734>) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (https://registrar.wisc.edu/course_change_request.htm)) to Suite 110 Ingraham Hall, 1155 Observatory Drive. (**Course Change Requests can be accessed through an individual's Student Center in My UW** (<https://my.wisc.edu>) **under: Course Enrollment/Term Information/Course Change Request.**) Students **will not** be able to submit or cancel a request to audit a course after the fourth week of the fall or spring term.

- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (<http://www.finaid.wisc.edu>) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the Veteran Services & Military Assistance Center (<http://veterans.wisc.edu>).

FAILURES

Students who have earned a grade of F may repeat the failed course in residence. **The original grade of F remains permanently on a student's record and is averaged into the**

semester and overall grade point average (GPA). The failure will be counted as zero grade points per credit in computing the GPA. If a student repeats the failed course, the course will appear on the student's transcript twice with the original grade of F recorded and the new grade also recorded. Both grades will be counted in determining all applicable quality of work requirements. **Multiple failures in the same course all count in the GPA and will appear on a student's permanent records.** See [can I retake a course that I have failed \(https://kb.wisc.edu/lis/page.php?id=21933\)](https://kb.wisc.edu/lis/page.php?id=21933) for more details.

A course failed in residence at UW–Madison may be repeated for credit at any other educational institution. However the new grade earned out of residence will not have an impact on the student's UW–Madison GPA.

GRADE CHANGE AND APPEAL

A change of grade is allowed only if there has been a clerical error. If an L&S undergraduate student believes a clerical error has been made in the awarding of the final grade for a course, the student should first meet with the instructor of the course to determine whether such an error has occurred. Requests for a change of grade must be signed by both the instructor of the course and the chair of the department. Students who believe they have been unfairly graded in a course should follow the appeal procedure established by the department in which the course grade was given.

The appeal procedure typically requires the student to first meet with the instructor of the course to discuss the issue, followed by a meeting with the department chair or department committee. If the issue is still unresolved after the department appeal procedure is completed, the student's last recourse would be to appeal to one of the Associate Deans in the College of Letters & Science based on the discipline of the course in question. Appeals of final grades must be initiated within the semester immediately following the term in which the course is taken. For more information, see [What is the process for appealing a grade for an L&S undergraduate student? \(https://kb.wisc.edu/lis/page.php?id=28334\)](https://kb.wisc.edu/lis/page.php?id=28334)

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits carried, whether passed or not. Semester/term grades are reported by letter only (A, AB, B, BC, C, D, F); plus and minus signs are not authorized. The highest possible GPA is 4.000, representing A grades in every course; the lowest possible is 0.000.

For more detailed information, see valid instructor assigned grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

For more information on the grading system, also see the section on undergraduate grades and grade point average (GPA) (http://registrar.wisc.edu/grades_and_gpa.htm) on the registrar's website.

INCOMPLETES

An Incomplete (I) may be reported for a student who has been enrolled in a course with a passing grade until near the end of the semester/term and then, due to illness or

some other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination (or to complete some limited amount of term work). An Incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof the grade reported will be an F. Even when a student can provide verifiable documentation, a student may still earn a grade of F if the quality of the student's work convinces the instructor that the student cannot successfully pass the course.

Any subject taken by an L&S undergraduate student marked Incomplete must be completed by the end of the fourth week of classes of the student's next semester in residence at the University (exclusive of summer sessions) or it will lapse into a Failure. If an instructor grants an extended incomplete (EI), a grade change will need to be filed by the instructor, approved by the chairperson of the department, and forwarded to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall. In such cases the grade of I is replaced with the grade of extended incomplete (EI).

NOTE: Extended Incompletes (EI) must be removed and replaced with the final grade by the last day of classes prior to the start of final exams or they will lapse into Failures.

Incompletes incurred in the last semester in residence at UW-Madison may not be removed after five years of absence from the University without special advance permission from L&S Undergraduate Academic Deans' Services. Such Incompletes must remain on the record with grades of permanent incomplete (PI) and do not lapse into failures.

If a student enrolls with an Incomplete grade from a previous semester and is dropped later in the term because the Incomplete has lapsed to an F or has been changed to a low grade, the student will be withdrawn with an effective date within the refund period closest to the time of the student's actual withdrawal if the student has not been granted permission to continue by an L&S academic dean.

For further information, see What does it mean if my instructor gives me a grade of incomplete? (<https://kb.wisc.edu/lis/page.php?id=21330>) on the L&S website and Incompletes (<http://registrar.wisc.edu/incompletes.htm>) on the registrar's website.

NO WORK GRADE

Students will receive a grade of No Work (NW) on their official records if they enrolled in a course and then never attended. Instructors may award this grade only when the instructor has no evidence that the student ever attended or submitted any work. Any student who does attend for part of the semester/term and then stops participating is not eligible to receive a grade of NW. The No Work notation does not have an impact on a student's semester/term or cumulative GPA. For more information, see Valid Instructor Assigned Grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

A course failed in residence at UW-Madison may be repeated for credit at any other educational institution; however the

new grade earned out of residence will not have an impact on the student's UW-Madison grade point average (GPA).

PASS/FAIL

Any L&S undergraduate student in good academic standing is eligible to take **one** course per term/semester on a pass/fail (S/U) basis. **For the College of Letters & Science, good academic standing means that a student does not have one of the following statuses:**

- probation
- strict probation
- continued probation
- continued strict probation
- dropped status

For information about probation, see academic probation and drop (p. 20).

- Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.
- First-semester freshmen and transfer students without an established UW-Madison GPA are eligible to take **one (1)** course for pass/fail in their first term at UW-Madison.
- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see What does it mean to take a course pass/fail? (<https://kb.wisc.edu/lis/page.php?id=21102>)

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (<https://my.wisc.edu>) by the end of the fourth (4th) week of fall and spring terms. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to what does it mean to take a course pass/fail (<http://>

kb.wisc.edu/ls/page.php?id=21102) and Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).

- **Students cannot cancel a Pass/Fail request after the deadline if s/he needs the course to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not s/he can take a course on a pass/fail basis.**
- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW–Madison (<http://my.wisc.edu>) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to the registrar's website (http://registrar.wisc.edu/pass_fail_option.htm).
- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
 - Breadth (humanities, literature, social science, natural science)
 - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
 - Math
 - Ethnic Studies
 - General Education Requirements (Comm A, Comm B, QR A, QR B)
 - Major requirements
- L&S undergraduates may take courses in their major or major department for pass/fail. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied.**
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic Deans' Services in Suite 110 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

Q GRADE

A "Q" grade is assigned by an instructor when there is a discrepancy between the work completed by a student and the student's official registration. The Office of the Registrar will

post the temporary Q grade/mark to a student's record until the discrepancy is resolved. A student will receive a Q in one of three situations:

1. a student registers for a variable-credit course and completes the work that is appropriate for a different number of credits;
2. a student registers for Honors credit and does not complete the Honors portion of the work; and
3. a student does not register for Honors but completes the Honors work appropriate for an Honors designation.

In each of the three cases listed above, students will need to work with the instructor to correct the situation before a grade can be reported. The correct grade will need to be forwarded by the instructor to L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>). For more information, see Valid Instructor Assigned Grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

GRADUATION

DIPLOMA AND DEGREE INFORMATION

A UW–Madison undergraduate diploma lists only the degree title. Diplomas **do not** list major(s) or certificate(s) students complete as undergraduates. Major and certificate information is located on a student's official UW–Madison transcript.

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts–Journalism**.

The College of Letters & Science offers the following degrees which will appear on an L&S undergraduate student's diploma:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Music*
- Bachelor of Arts–Journalism*
- Bachelor of Science–Journalism*
- Bachelor of Social Work
- Bachelor of Science–Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 295).

GENERAL EDUCATION REQUIREMENTS

The University of Wisconsin–Madison General Education Requirements (GER) (p. 17) are courses that provide for

breadth across the humanities and arts, social studies, and natural sciences. All students except those who matriculated at a college or university prior to May 20, 1996, must satisfy the university-wide General Education Requirements. The requirements consist of:

Breadth (University Breadth)

All students must complete 13–15 credits of course work intended to provide a breadth of experience across the major modes of intellectual inquiry. Breadth course work is intended to give students a broad intellectual perspective on their undergraduate education and their world by encouraging them to look at and understand subjects through the various modes of inquiry used in the natural, physical and social sciences, arts, and humanities.

Students are required to complete the following breadth requirements:

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research and explore, and ultimately understand, the world around us. These many "ways of knowing" are intended to enrich the undergraduate experience and complement intensive study in students' majors. Through these courses, many students discover subjects and ideas that will become lifetime interests, or that offer the creative stimulus to see their favorite subjects from new perspectives. **Note that the College of Letters & Science undergraduate breadth requirements exceed campus General Education requirements. Students who transfer to another UW–Madison school or college before completing the L&S breadth and ethnic studies may need to complete additional General Education requirements.** For more information, about L&S breadth, please refer to College of Letters & Science (<http://gened.wisc.edu/ReqAdditional/#LnS>).

The **natural sciences** (which include studies in the physical and biological sciences) involve knowing the world through scientific inquiry—assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. Laboratory components give students firsthand experience in methods of scientific research. These courses help students see both the explanatory and creative processes in science that are transforming our world.

The **humanities, literature, and the arts** examine the world through many different lenses that help students interpret and think critically about creative and cultural expressions of what it means to be human. Some courses focus on the production and analysis of artistic, literary, and scholarly works; others help students

learn about and compare religious and philosophical conceptions of humankind; still others study history and the peoples and regions of the world. All of these courses encourage students to analyze the range of creativity, cultural expressions, and ideas about and patterns in human existence—history, literature, art, culture, folklore—and to use that information to better understand humanity.

In the **social sciences**, students learn other ways to understand humanity. Courses in this area are found in a wide range of fields that share a common focus on the systematic study of personal interactions, and the interactions of society and institutions. These fields use quantitative and qualitative research strategies to look at the variety and scale of these interactions, and in these courses, students learn how to formulate research questions and determine what techniques are best used to answer those questions.

These "ways of knowing" the world around us intersect and overlap, and the ideas presented in one area will often inform and transform what we know or think about what we know about the others. Taken as a whole, the breadth requirement is intended to help UW–Madison graduates appreciate the many and complex ways to understand the world around us. By these means, students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand humanity, and to behave in socially responsible ways

Communication

Communication, 3 to 5/6 credits

Communication A (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommACriteria-2012.pdf>). Literacy Proficiency. 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete course work to fulfill this requirement, students may be exempted from Communication A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year.

Communication B (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommB%20Fall%202016%20Criteria.pdf>). Enhancing Literacy Proficiency. 2–3 credits of more advanced course work for students who have completed or been exempted from Communication A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Ethnic Studies

Ethnic Studies, 3 credits

All students must take one course of at least 3 credits which is designated as an Ethnic Studies course. The ethnic studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are encouraged to complete this requirement by the end of their second year. Please note that many ethnic studies courses may also fulfill breadth and other requirements.

Information about criteria and learning outcomes for ethnic studies courses (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/Criteria_and_Learning_Outcomes_2015.3.15.pdf) can be found on the General Education website (<http://gened.wisc.edu/CoursesNew>).

Quantitative Reasoning

Quantitative Reasoning, 3 to 6 credits

Quantitative Reasoning A (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf>). Quantitative Reasoning Proficiency. Three (3) credits of mathematics or formal logic. Students may be exempted from Quantitative Reasoning A by approved college work while in high school, AP test scores, or placement testing. Some students, however, may need to complete a prerequisite before enrolling in a Quantitative Reasoning A course. To ensure timely progress to completion of the undergraduate degree, students should complete this requirement by the end of their first year.

Quantitative Reasoning B (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf>). Enhancing Quantitative Reasoning Proficiency. Three (3) credits of more advanced course work for students who have completed or been exempted from Quantitative Reasoning A. (Students must satisfy Quantitative Reasoning A before they may go on to Quantitative Reasoning B.) Courses that satisfy this requirement are offered in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or other requirements of their intended field(s) of study.

For more information regarding the UW–Madison General Education Requirements, see General Education Requirements (p. 17).

GRADUATION AWARDS

Graduation with Distinction

The award of "Graduation with Distinction" will be noted on the transcript of students who have earned a grade point average that places them within the top 20% of the students graduating that term in their college/school provided 60 or more credits have been earned at UW–Madison. The Office of the Registrar performs a preliminary calculation for students declaring intent to

graduate and then makes a temporary posting that is included in the program for commencement. However, the final notation of Graduation with Distinction depends upon last term grades, as calculated by the registrar and relative to the performance of all students in that particular graduating class. For more detailed information, see how do I know if I qualify for graduation with distinction or distinction in the major (<https://kb.wisc.edu/lis/page.php?id=22260>).

Distinction in the Major

This award is granted at graduation, upon the recommendation of a department to the dean, to any student not earning the Honors Degree who has done superior work in the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

Thesis of Distinction

This award is granted at graduation, upon recommendation of a department to the dean, to any student not earning the Honors Degree who has written an exceptionally good or original thesis, without consideration of the student's record in other work. The chair of the department appoints a committee of at least two members, including the thesis advisor, to read the thesis and make an appropriate recommendation. These theses are retained in the department. The award is noted on the student's transcript.

LETTERS & SCIENCE BREADTH

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities : 12 credits (of which 6 credits **must be** Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits
 - **Bachelor of Arts (B.A.)** candidates must complete a minimum of **one (1)** 3-credit Biological Science course **and one (1)** 3-credit Physical Science course. The additional six (6) credits can be any combination of natural, biological or physical science credits to bring the total to twelve (12) credits.
 - **Bachelor of Science (B.S.)** candidates must complete a minimum of six (6) credits of Physical Science **and six (6)** credits of Biological Science.

LIBERAL ARTS AND SCIENCE CREDITS

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree (General Course) at least 108 credits must be in courses designated as Liberal Arts and Science Courses. These courses are designated in the Guide (<http://>

guide.wisc.edu/courses) as satisfying this particular requirement. Nearly every course taught in L&S is designated in this way.

QUALITY OF WORK REQUIREMENTS

A total of 120 degree credits is required for graduation, with a minimum 2.000 grade point average on all courses taken, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade point average on all courses carried at UW–Madison, whether passed or not, in these four areas:

1. All courses in the major (or majors);
2. All upper-level courses in the major, as designated by the major department for the 15-credit residence requirement;
3. All courses designated intermediate or advanced;
4. All courses carried for a grade at UW–Madison (cumulative grade point average, as reported by the Registrar Office). Courses carried on a refresher basis (see Repeat of College Courses Not for Credit (p. 308)) are excluded from the grade point average as determined for categories 1, 2, and 3 above. **Repeating a failed course will not remove the failure from the student's record or from GPA calculations.** This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

RESIDENCE REQUIREMENTS

L&S students must complete 30 degree credits in residence after their 90th degree credit to complete the L&S residence requirement. Credit is considered "in residence" if it is earned for UW–Madison coursework, including courses taken through a study abroad program administered by UW–Madison.

Courses that **do not** count as "in residence" include:

- UW–Extension and other transfer credit
- Courses completed at other UW system schools
- Courses taken abroad through another institution
- AP (Advanced Placement) credit
- Credit by examination
- Retroactive credit

To satisfy this requirement, degree candidates who have accumulated 90 credits must complete at least 30 more degree credits in residence before they may graduate.

Students must **also** complete at least 15 credits in upper-level courses in their major(s) **at UW–Madison**. Refer to major requirements for a specific major to get more information about major residence requirements.

Senior Residence Rule

Students who have accumulated 90 credits must complete at least 30 more degree credits in residence before they may graduate.

- Students who have earned all of their first 90 credits in residence are allowed to count up to (but never more than) two courses (for a maximum total of 8 credits) within the last 30 credits not in residence.
- Students whose first 90 credits are not earned entirely in residence must complete a minimum of 30 additional degree credits in residence. Students who are making satisfactory progress may seek a maximum 8-credit exception to the senior residence requirement. Refer to residence requirement (<http://saa.ls.wisc.edu/30-credit-rule.htm>) or contact L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>) for more information about a possible residence exception. Of the credits required for graduation, not more than 72 may be carried at non-degree-granting accredited institutions. Of the last 60 credits earned before graduation, not more than 12 may be carried at non-degree-granting institutions.

TOTAL DEGREE CREDITS

To receive an undergraduate degree, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit) for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree includes the University General Education Requirements, L&S Breadth, major requirements, and also elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest. The requirements for some programs may exceed 120 degree credits. Students should consult with their academic/major advisor and DARS for information on specific credit requirements.

MAJOR INFORMATION

ACCEPTANCE INTO A MAJOR

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school, as outlined in the degrees/majors/certificates (p. 295) section of this Guide. Students should consult the department advisor for information. Only the department can make an exception. Students not accepted in a major or special degree program must select a different major.

COMPLETING A MAJOR OUTSIDE L&S

L&S undergraduate students must complete at least one major in the College of Letters & Science. Students interested in completing an additional major outside the College of Letters & Science must first consult the dean's office for the other school or college. If the other school or college

approves the additional major, students must consult with an L&S academic dean to see if this is possible or if they will need to transfer to the other school/college to complete their degree. **Students in other schools/colleges on the UW–Madison campus (e.g., CALS, Education, etc.) are eligible to complete a major in L&S without having to complete L&S degree requirements if they receive permission from an academic dean in their home school/college.**

HOW TO DECLARE AND CANCEL A MAJOR

Students **must** declare a major through the department or unit administering that program. Students should speak with the advisor for the major/certificate/special degree program to determine their eligibility to declare and the process for declaring the major. If a student does not plan on completing the requirements for a declared major, the student must return to that department or unit office to cancel the major. **Currently L&S undergraduate students may have as many majors as they wish, but they must go to the academic department/unit administering the major in order to declare each major or cancel any major they do not plan to complete.** Additional information can be found at declaring a major (<https://advising.wisc.edu/content/declaring-major>).

MAJOR DECLARATION POLICY

All L&S undergraduate students **are required** to declare a major or be admitted into a program before or upon the completion of 86 degree credits (including credits from transfer, AP, test, study abroad, or retroactive credits).

Students who have not declared by the time they have reached 86 degree credits will have an enrollment hold placed on their records preventing them from registering for future terms. Students who are having difficulty declaring a major should speak with their assigned academic advisor as soon as possible to discuss options available to them.

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming courses, social events, student groups, speakers, opportunities, etc.).
- "Lock in" major requirements, so if those requirements change, students are held to the rules in place when they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make

the best use of both student and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

RESIDENCE REQUIREMENT IN THE MAJOR

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major or major department, in courses taken on the UW–Madison campus. These credits may not include retroactive credit or credit earned by department examination.

UPPER-LEVEL WORK IN THE MAJOR

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements (p. 321) for additional information about credits taken "in residence.") Furthermore, students must earn a minimum 2.000 grade point average on all upper-level work taken in the major, in residence.

REQUIREMENTS

Students pursuing an undergraduate degree in Letters & Science must complete the University General Education Requirements (GER) (p. 17) and the following L&S requirements:

Code	Title	Credits
	Foreign Language	
	Mathematics	
	Breadth	
	Depth	
	Major Study	
	Requirements that apply to all majors	
	Acceptance as a major	
	Mastery of intermediate/advanced work	
	Residence requirement in the major	
	Residence requirements	
	Quality of work requirements	

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency

by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the L&S Disabilities Curricular Accommodations Committee (DCAC) for review.

B.A. Degree

For the **B.A. degree**, the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language **and** completion of the second unit (level) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **OR**
- completed the 4th unit of a college language course (e.g., AFRICAN 334, GERMAN 204, SLAVIC 208, etc.), **OR**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd unit/semester of a second foreign language (e.g., GERMAN 213, ITALIAN 203, etc.) at the college level, **OR**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd unit/semester of a second foreign language (e.g., E ASIAN 106, GERMAN 102, SLAVIC 112, etc.) at the college level

B.S. Degree

For the **B.S. degree**, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd unit/semester of one college-level language (e.g., AFRICAN 333, FRENCH 203, SPANISH 203, etc.)

Foreign Language Substitution

The Foreign Language Substitution package (FLSP) is for degree-seeking candidates in the College of Letters & Science (L&S) only who are seeking to fulfill the L&S foreign language requirement and also have a documented disability in foreign language acquisition.

What is a Foreign Language Substitution?

The Foreign Language Substitution Package is designed to fulfill the College of Letters & Science faculty's intention in requiring foreign language as a part of the college curriculum. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language.

Courses used to meet the substitution must be approved by the designated academic dean in L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>) (110 Ingraham Hall ([\)](http://www.map.wisc.edu/?initObj=0056&wing=)). Classes used for the substitution package **cannot** be used to fulfill any of the following requirements:

- Major requirements
- Breadth (humanities, literature, social science, science)
- Ethnic studies
- General Education Requirements (Comm A, Comm B, QR-A, QR-B)

How do I qualify for a Foreign Language Substitution?

The Disabilities Curricular Accommodations Committee (DCAC) of the College of Letters & Science can approve a substitution to the foreign language requirement for students in Letters & Science only with certain disabilities that make a course substitution appropriate. Extensive and very specific documentation is required from students and disability specialists. Further information may be obtained from the L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>) (Room 110, Ingraham Hall, at 1155 Observatory Drive; 608-262-0617) or the McBurney Disability Resource Center (<https://mcburney.wisc.edu>)(702 West Johnson Street; 608-263-2741).

Note that an appointment at the McBurney Center is required before submitting the application. This appointment should be made no less than one semester prior to applying for the substitution package. McBurney Center staff will help you determine what documentation is necessary for the application, as well as assess whether additional testing is required.

After meeting with a McBurney Center staff member, a student should fill out and complete an application for the substitution package. The deadline to submit a completed copy is at the end of the fourth week of the fall and spring terms. Applications are not accepted during the summer term. All students who submitted a completed application by the deadline should hear back from the Disabilities Curricular Accommodations Committee (DCAC) regarding the status of their application within six to eight weeks after the deadline.

Please make sure you submit your original completed application and also four (4) additional copies of your completed application to Suite 110 Ingraham Hall at 1155 Observatory Drive before 4:00 p.m. on Friday of the deadline. (The deadline to submit a completed application for consideration is the end of the 4th week of the fall and spring terms.) A completed application must include five (5) copies of each of the five items below:

1. High school transcript and transcripts from other post-secondary institutions

you may have attended prior to UW–Madison (you will need to contact original high school or other institution of higher learning for these records if you do not have copies)

2. UW–Madison transcript
3. Copy of your most recent DARS (Please go to your My UW and access the Student Center to request a DARS.)
4. Student application form (see p. 7 of Foreign Language Substitution Package application located at Foreign Language Substitution Package (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>))
5. Copy of McBurney Center VISA (Verified Individual Services and Accommodations) plan if student has one
6. Other relevant and current disability documentation assembled in consultation with McBurney Center staff

What are the requirements for a Foreign Language Substitution?

1. General Language: If approved for an L&S foreign language substitution package, both **B.A.** and **B.S.** degree candidates must complete one (1) course having to do with language in general (selected from an approved list of classes). If a student's official UW–Madison records has at least one unit (year) of a high school foreign language, this requirement is fulfilled. If a student has not taken a foreign language in high school, please select **one (1)** course from either a, b, or c listed below:

- a. LINGUIS 101 (Linguistics)
- b. CS&D 240 (Communication Sciences & Disorders)
- c. ENGL 201, ENGL 207, ENGL 304, ENGL 307, ENGL 400, ENGL 407, ENGL 408, ENGL 409 (English)

2. Cultural Context:

B.A. students must complete the following:

Three (3) courses related to a country, region, or a group of countries sharing a common language in the following areas:

- a. Literature
- b. History or Culture
- c. General elective

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.A. degree. Students must then also take a Literature course and General elective in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a, b, and c above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S**

Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>).

B.S. students must complete the following: **Two (2)** courses related to a country, region, or a group of countries sharing a common language in the following areas:

- a. Literature
- b. History or Culture

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.S. degree. Students pursuing a B.S. must also take a Literature course in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a and b above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (<http://saa.ls.wisc.edu/deans-services.htm>).

What are my responsibilities as a student to complete the Foreign Language Substitution?

Students must submit five (5) copies of all required materials to the Disabilities Curricular Accommodations Committee in L&S Academic Deans' Services (Suite 110 Ingraham Hall, 1155 Observatory Drive, 608-262-0617) by the end of the fourth (4th) week of the semester (fall or spring semester) in which they would like to present their case for review. **Applications are not accepted or reviewed during the summer.**

Completed applications will be reviewed approximately six (6) weeks after the official deadline. Students will then be notified shortly after the Disabilities Curricular Accommodations Committee meets regarding the results. Students who are approved for a foreign language substitution package must make an appointment to speak with an academic dean in L&S Undergraduate Academic Deans' Services (110 Ingraham Hall; 608-262-0617) to talk about the next steps they will need to take in order to complete their substitution package. **Students will not be able to complete their approved foreign language substitution package until they have met with an academic dean to select the appropriate courses they need to fulfill this requirement.**

Students who have not been previously diagnosed as learning-disabled or hearing-impaired should plan three to four months to schedule required testing and to receive results and interpretation of the testing.

Contact the McBurney Disability Resource Center (<http://www.mcburney.wisc.edu>) for current information about the tests required. Results of the specified tests taken within the previous four years are acceptable; retesting is required if test results are not at least this current.

For persons with a hearing loss, certain criteria must be met to apply for a substitution to the foreign language

requirement. Contact the McBurney Disability Resource Center for details.

MATHEMATICS

Mathematics is a principal tool of knowledge. Algebra and geometry provide the minimum of mathematics skills that an educated person needs in today's world, and competence in these areas is required for admission to the university. Since mathematics underlies quantitative work in all sciences, and the level of mathematical background required has been steadily increasing in most areas of science, the L&S math requirements should be viewed as minimums. **Please note that some majors require additional work in mathematics.**

New freshmen (first-year students) who do not meet satisfactory minimal competencies in mathematics upon admission or whose mathematics placement test scores place them in MATH 96 must begin to take remedial course work in mathematics during their first or second semester and continue each semester thereafter, if necessary, until they have satisfactorily completed the mathematics proficiency requirement. Students who do not accomplish this will need to obtain permission to continue in the College of Letters & Science.

Both **B.A. and B.S. degrees** require that students satisfy *minimum math competency* by having completed the three units of math required for admission. A unit is one year of high school work or one semester of college work. This will ordinarily include one unit each of high school algebra, geometry, and an additional unit of mathematics. **High school courses in general mathematics or business mathematics will not satisfy the minimum math competency.**

B.A. Degree

For the **B.A. degree**, no additional math is required beyond completion of the university's General Education Quantitative Reasoning A and B requirements. However, certain L&S majors may require students to do additional math coursework even though students are pursuing a B.A. degree.

B.S. Degree

The **B.S. degree** requires an additional two units/courses at the intermediate level in mathematics, computer sciences, or statistics. If this work is taken on the college level, it **must** be at least a 3-credit course **and** must be taken in the departments of Mathematics (<http://guide.wisc.edu/courses/math>), Computer Sciences (http://guide.wisc.edu/courses/comp_sci), or Statistics (<http://guide.wisc.edu/courses/stat>) only. Courses in sociometrics (e.g., SOC/C&E SOC 360, SOC/C&E SOC 361, etc.), econometrics (e.g., ECON 310), psychometrics (PSYCH 210), etc. **do not** count toward the B.S. degree mathematics requirement. **At most, only one (1) course in Computer Science (COMP SCI) and Statistics (STAT) may be counted toward the BS mathematics requirement.**

BREADTH

Ways of Knowing

At the heart of any degree in the liberal arts and sciences is an active understanding of the variety and breadth of the many scholarly approaches to knowing the world. Every student in the College of Letters & Science experiences significant exposure to three principal fields of knowledge: the arts and humanities, the social sciences, and the natural sciences. These broad fields of knowledge are not the same as the areas of depth that we call

"majors." In fact, any particular major—or even a particular course within a major—might well involve more than one of these fields of knowledge. (For example, imagine a seminar on "people and the environment" that combines historical background, research on social patterns of energy use, and scientific understandings of climate.) Working together, each of these three fields of knowledge represents a particular "way of knowing" about the world around us.

Arts and Humanities

Courses in the **arts and humanities** involve knowing the world through the production and analysis of artistic, literary, and scholarly work. Some courses examine the fine and performing arts, or literature, presenting students with opportunities to interpret and think critically about these creative expressions of the human condition. Other courses help students to understand and compare religious and philosophical conceptions of humankind. Still other courses take on historical subjects, focusing on moments of change and periods of continuity for the peoples and regions of the world. These courses all encourage students to analyze the range of creative and cultural artifacts, expressions, and ideas of human existence—history, literature, art, culture, folklore—and to use that information to better understand humanity and to cultivate civic and social responsibility.

Social Sciences

Courses in the **social sciences** involve knowing the world through the systematic study of human society, interactions, and institutions. The social sciences explore these issues from a wide range of perspectives and research techniques, both quantitative and qualitative. Through these courses students learn how to formulate research questions and determine what techniques are best used to answer those questions—for example, exploring ideas and developing theories, conducting surveys and building models, or observing and participating in social life itself. Developing such analytical skills assists students as they approach complex problems and seek to solve them in both the workplace and the community.

Natural Sciences

Courses in the **natural sciences** involve knowing the world through scientific inquiry—assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. The natural sciences are often divided into the **physical sciences** (dealing with matter and energy, or the study of the earth, atmosphere, and oceans) and the **biological sciences** (dealing with life and living systems, like plants, animals, and environments). These courses often contain laboratory components that allow students to gain firsthand experience in scientific research methods. By completing this requirement, science and non-science majors alike will gain an appreciation for science as a way of systematically looking at the natural world, understanding how this process can be used to inform decision-making in a wide range of political, economic, and social contexts.

Together, these broad "ways of knowing" give students a complementary set of tools for seeing, imagining, and asking questions about the world—tools that enhance creative problem solving no matter what the field. And, because twenty-first-century knowledge is not neatly compartmentalized, it is worth noting that these areas of study intersect and overlap; courses in some areas draw upon strategies used in the others. Experiences in "breadth" courses can be life-changing: we frequently hear that a course taken to fulfill a breadth requirement introduced someone

to a subject that became a new major, a new way of looking at a current major, or a lifelong interest. For more information, visit the KnowledgeBase help document (<https://kb.wisc.edu/lis/page.php?id=27031>).

A liberal education involves not only the nature and kinds of knowledge but also the purpose for which knowledge should be used. These considerations are embodied in the breadth or distribution requirement and call for knowledge in several fields of learning. The purpose of this breadth requirement is to ensure that a degree candidate will obtain an understanding of approaches in the humanities, social sciences, biological sciences, and physical sciences adequate for use both as a citizen and as a specialist.

Breadth Requirements

The L&S breadth requirement is met with 36 credits in the three broad areas of knowledge: humanities, social sciences, and natural sciences. (This may include courses beyond the elementary level in mathematics, computer sciences, and statistics.)

Courses that carry L&S breadth credit are expected to broaden significantly a student's understanding of the world and a general disciplinary approach to problems studied, questions asked, modes of inquiry undertaken to answer those questions, analysis of research findings, communication about results, and implications for further study and/or action. Many courses in L&S carry a breadth designation; however, some types of courses may not convey breadth. (Note: Coursework taken to fulfill the university-wide General Education Requirements (p. 17) will also count toward fulfilling the 36 credits required for the L&S Breadth Requirement.)

B.A. Degree

Humanities: Students are required to complete **12 credits** in the humanities, 6 of which **MUST** be in literature. Look in the courses (<http://guide.wisc.edu/courses>) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete **12 credits** in social sciences. Look in the courses (<http://guide.wisc.edu/courses>) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete **12 credits** in natural sciences. Students **must** take at least one **3+ credit** course in **physical science AND** one **3+ credit** course in **biological science**. Look in the courses (<http://guide.wisc.edu/courses>) section of the Guide under Course Designation for course qualifications.

B.S. Degree

Humanities: Students are required to complete **12 credits** in the humanities, 6 of which **MUST** be in literature. Look in the courses (<http://guide.wisc.edu/courses>) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete **12 credits** in social sciences. Look in the courses (<http://guide.wisc.edu/courses>) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete **12 credits** in natural sciences. Students **must** complete **6 credits** in **physical science AND 6 credits** in **biological science**. Look in the courses (<http://>

guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

DEPTH: UNDERSTANDING A FIELD OF STUDY (MAJOR)

The process of declaring and completing a major—often, but not always, attached to a particular university department—provides students with an opportunity to concentrate on an in-depth investigation of at least one subject or issue, putting their tools for learning and ways of knowing to focused use. This intensive understanding of one topic helps students to appreciate the potential depth of the others. A student's work in the major reflects a continuing progression of skills, knowledge, and values, where advanced learning opportunities in upper-level coursework grow from and expand upon earlier experiences, helping students build additional depth in writing, speaking, information literacy, and critical thinking skills from the perspective of a particular discipline. In senior capstone or independent research projects, students are frequently asked to synthesize what they have learned and apply it in a variety of new situations. By the conclusion of their studies, students in the major are better able to understand themselves and their society, to develop their intellectual powers outside of a University setting, and to make productive contributions to the world around them. (See list of L&S majors (p. 295).)

MAJOR STUDY

Every candidate for an L&S baccalaureate degree **must** satisfy a depth requirement encompassing a specified and approved major field of study. Students may elect a department major, a major in a recognized interdisciplinary program, or may develop an individual major if approved by a faculty review committee. Students in Letters & Science may not complete the depth requirement with any department or program outside the college, except for the departments of Biochemistry, Environmental Sciences, and Microbiology. These departments are the only exceptions.

All L&S undergraduate students are required to declare a major by the time they have earned 86 degree credits. Students who do not declare a major by the appropriate time will have an enrollment hold placed on their records so they cannot enroll in future terms.

¹ All L&S undergraduate students are required to declare a major or be admitted into an L&S special degree program upon the completion of 86 credits (including credits from transfer, AP, test, study abroad, or retroactive credits).

Students have three choices in meeting the depth requirement in the College of Letters & Science:

1. Single Major
2. Multiple Majors
3. Individual Major

Single Major

Students may fulfill the requirements of a single major as outlined in the descriptions of the various L&S majors (p. 295).

Multiple Majors

All students may satisfy the requirements for more than one major, either department and/or interdisciplinary major, and have this fact noted on the transcript and other university records.

Students may complete one or more established majors and one individual major if approved by a faculty review committee. **No**

student may earn more than one individual major. Students completing two or more majors may count courses crosslisted in each major department in partial satisfaction of the requirements for each major.

Individual Major (p. 959)

REQUIREMENTS THAT APPLY TO ALL MAJORS

Major Declaration Policy

All L&S undergraduate students are required to declare a major or be admitted into a program before or upon the completion of 86 credits (including credits from transfer, AP, test, study abroad, or retroactive credits).

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming courses, social events, student groups, speakers, opportunities, etc.).
- "Lock in" major requirements, so if those requirements change, students are held to the rules in place when they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make the best use of both student and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

How to Declare and Cancel a Major

Students must declare a major through the department administering that program. Students should request a Major/Certificate Declaration form from the academic department/unit administering the major. This form should be completed by the student and left at the department office administering the major. If a student decides to change his/her major later, the student should return to that department office and cancel his/her major. **Students may have as many majors as they wish, but they must complete the Major/Certificate Declaration form for each major and cancel any major they feel they cannot complete.**

Mastery of Upper-Level Work in the Major

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements below for additional information about credits taken "in residence.") Furthermore, students

must earn a minimum 2.0 grade point average on all upper-level work taken in the major, in residence.

Residence Requirement in the Major (also known as the "Study Abroad Stipulation")

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major or major department, in courses taken on the UW–Madison campus. These credits may not include retroactive credit or credit earned by department examination.

Advising

Questions about choosing a major can be discussed with department advisors and faculty, academic deans, members of L&S Undergraduate Academic Services and the L&S Honors Program office, and with the Cross-College Advising Service staff. For additional information about advising, see the description of L&S advising programs (p. 328).

Completing a Major Outside L&S

L&S students must complete at least one major in the College of Letters & Science to satisfy the depth requirement. Students interested in completing an additional major outside the College of Letters & Science must first consult the dean's office for the other school or college. If the other school or college approves the additional major, students must consult with an L&S academic dean to get permission to pursue a second major outside L&S.

Total Degree Credits: 120

A minimum of 120 degree credits is required for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree encompass the requirements detailed above, but also include elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest. The total credit requirement for some special programs is more than 120 degree credits. The college allows degree credit, as well as placement credit, for the mastery of some L&S course work as demonstrated by successfully completing appropriate tests. (See Credit by Departmental Examination (p. 8)).

Liberal Arts and Science Credits: 108

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree (General Course) at least 108 credits must be in courses designated as Liberal Arts and Science Courses. These courses appear in the Guide as L&S credit and can be identified by looking at the *course designation* section for a course in the Guide (<http://guide.wisc.edu/courses>). Nearly every course taught in L&S is designated in this way.

Non-L&S Courses and L&S Degree Credit

Liberal Arts and Science ("C") Courses. The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* (LAS) courses. These courses appear in the Guide as L&S credit and can be identified by looking at the *course designation* section for a course in the Guide

(<http://guide.wisc.edu/courses>). Courses designated as liberal arts and science courses count toward the L&S degree requirements, including requirements related to breadth and level.

Non-L&S Courses Crosslisted with L&S Departments. A course offered in the College of Letters & Science that counts as L&S credit and which is crosslisted with a department in another school or college is considered a Liberal Arts and Science course. These courses appear in the Guide as L&S credit and can be identified by looking at the **course designation** section for a course in the Guide (<http://guide.wisc.edu/courses>). As L&S credits, they may be counted as part of the major and count as part of the 108 Liberal Arts and Science credits required for an L&S degree.

Non-L&S Courses Required for L&S Majors. Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* carry the L&S credit designation in the Guide (<http://guide.wisc.edu/courses>), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 L&S credits required for a degree.

Free Electives in the Degree. If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (<http://guide.wisc.edu/courses>), and are not designated as courses in the Liberal Arts and Sciences, or L&S credit courses.

Credit earned in these courses apply to the degree requirements in the following ways:

- Courses taken as free electives in the degree may be carried and will appear on the transcript showing credits, grade, and grade points.
- These credits will count as part of the semester load and will count toward satisfaction of the minimum progress requirements.
- These credits and grade points will be included in calculating a student's semester and cumulative grade point average.
- Free electives in the degree cannot be used to satisfy the L&S requirement that students complete a substantial portion of their degree credits in intermediate and advanced work (see the section Mastery of Intermediate/Advanced Work below).
- Courses that are taught in L&S departments but not designated as Liberal Arts and Science courses (e.g., Music and Music Performance courses numbered 099 and below) may be counted for credit as free electives in the degree. (For B.A./B.S. Music majors, Music and Music Performance courses numbered 099 and below that are not required for the major may be counted as free electives.) Students with questions regarding a particular course offered by a school or college outside L&S as it relates to the requirement to complete 108 Liberal Arts and Science credits should consult an academic dean before registration.

ACCEPTANCE AS A MAJOR

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school as outlined under the L&S majors (p. 295) section of the Guide. Students should consult the department advisor or the school or college dean's office for information. Only the department or school can make an exception. Students not accepted in a major or school must select a different major.

MASTERY OF INTERMEDIATE/ADVANCED WORK

All L&S courses and those taught outside L&S and approved for L&S degree credit are designated by departments as elementary, intermediate, or advanced. A minimum of 60 credits must be earned in courses designated by the departments as intermediate or advanced, with a grade point average of 2.0 on all courses carried whether passed or not. The purpose of this requirement is to encourage students to undertake advanced work to the greatest possible extent and to insure that they will achieve greater sophistication and a deeper mastery of subject matter as they advance through the baccalaureate curriculum. **Credits earned in courses taken as free electives in the degree cannot be used to meet this requirement.**

RESIDENCE REQUIREMENT IN THE MAJOR

All L&S undergraduate students must complete 15 degree credits of upper-level work in their major in residence. Credits are considered **in residence** if earned in a UW–Madison degree credit course, including those taken on a UW–Madison study abroad program. Transfer credit, courses completed at other UW System schools, UW Extension courses, or courses taken abroad through a nonresidence program are not considered in residence. Upper-level courses are classes determined by the major program/department to be in-depth within the context of that particular major.

RESIDENCE REQUIREMENTS

The UW–Madison Experience. In order to receive a degree from the College of Letters & Science, all students must earn a minimum of degree credits (30) in residence at the University of Wisconsin–Madison as they near completion of their degrees. In other words, L&S students must complete 30 degree credits in residence after their 90th degree credit to complete the L&S residence requirement. Credit is considered "in residence" if it is earned for UW–Madison coursework, including courses taken through a study abroad program administered by UW–Madison. Courses that **do not** count as "in residence" include:

- UW–Extension and other transfer credit
- Courses completed at other UW system schools
- Courses taken abroad through another institution
- AP (Advanced Placement) credit
- Credit by examination
- Retroactive credit

Senior Residence Rule. Students who have accumulated 90 credits must complete at least 30 more degree credits in residence before they may graduate.

- Students who have earned all of their first 90 credits in residence are allowed to count up to (but never more than) two courses (for a maximum total of 8 credits) within the last 30 credits not in residence.
- Students whose first 90 credits are not earned entirely in residence must complete a minimum of 30 additional degree credits in residence. Students who are making satisfactory progress may obtain an L&S dean's permission to count for degree credit any course work not taken in residence. Contact an L&S academic dean for more information. Of the credits required for graduation, not more than 72 may be carried at non-degree-granting accredited institutions. Of the last 60 credits earned before graduation, not more than 12 may be carried at non-degree-granting institutions.

QUALITY OF WORK REQUIREMENTS

A total of 120 degree credits is required for graduation, with a **minimum** 2.000 grade point average on all courses taken, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade point average on all courses carried at UW–Madison, whether passed or not, in these four areas:

1. All courses in the major (or majors);
2. All upper-level courses in the major, as designated by the major department for the 15-credit residence requirement;
3. All courses designated intermediate (I) or advanced (A);
4. All courses carried for a grade at UW–Madison (cumulative grade point average, as reported by the registrar). Courses carried on a refresher basis (see [Is it possible to retake a course that I have already passed or received degree credit \(https://kb.wisc.edu/lis/page.php?id=21934\)](https://kb.wisc.edu/lis/page.php?id=21934)) are excluded from the grade point average as determined for categories 1, 2, and 3 above. Repeating a failed course **will not** remove the failure from the student's record or from GPA calculations. This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

FOUNDATIONS: TOOLS FOR LEARNING

For all UW–Madison undergraduates, these learning experiences begin with students satisfying the university's General Education Requirements—usually by taking courses taught within the College of Letters & Science. These common foundations cover key topics which are necessary for any undergraduate major and any prospective career: oral and written communication; mathematical and logical reasoning; and the diversity of cultures within global society.

In addition to these university-wide requirements, all L&S students must attain knowledge of a foreign language, in work that combines training in both communication and culture, so students may better understand and

participate in the global community of the twenty-first century. Together, these "tools for learning" may be acquired through many different courses taught by many different departments. The key is that they are never taught in isolation, but always considered together with broad exposure to various "ways of knowing" from the arts and humanities, the natural sciences, and the social sciences. (For more on the General Education Requirements, see Requirements for Undergraduate Study (p. 17); (<http://www.ls.wisc.edu/gened>) for more on the L&S requirements, see Letters & Science Degrees (p. 321).)

LETTERS & SCIENCE DEGREES

The College of Letters & Science offers two basic degrees for students in the General Course and five other degrees for students in special programs. Students in the General Course, regardless of major, may earn either a Bachelor of Arts or a Bachelor of Science degree. The special degrees are: Bachelor of Science–Applied Mathematics, Engineering, and Physics (AMEP); Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Music; and Bachelor of Social Work. (For details, see sections for AMEP (p. 972), Journalism (p. 1104), Music (p. 994), and Social Work (p. 1113) in the L&S section of this catalog.) **Students who have multiple majors in L&S earn only one undergraduate degree.**

Honors degrees may be earned in all of the above upon completion of the L&S Honors Program. See L&S Honors Program (p. 331) for more information. Majors completed in the General Course and for the Bachelor of Music degree will be posted on the transcript.

RESOURCES

ADVISING IN LETTERS & SCIENCE

Academic advising is an essential component of undergraduate education, and the college's commitment to providing quality advising for undergraduates is reflected in the many advising programs it offers. Students who have not yet declared a major are assigned an advisor in L&S Academic Advising Services or the Cross-College Advising Service (see below). Students who have declared a major are assigned an advisor in their department or program.

All of the advising programs share the goal of assisting students in making responsible, informed decisions as they develop educational plans compatible with their potential, their interests, and their career and life ambitions. Advisors provide much more than information about course selection and academic programs; they encourage students to ask questions about the nature and direction of their learning, and they work with students to find meaningful answers to those questions. Advising involves a process in which students learn to think critically about the variety of options available to them and develop decision-making skills that will enable them to choose wisely. As adults, students themselves, however, must assume primary responsibility for choosing their academic program and making progress toward their degree.

ACADEMIC ADVISING SERVICES (AAS)

Letters & Science Academic Advising Services provides advising to pre-declared Letters & Science (L&S) undergraduate students who intend to complete a specific L&S degree and major.

We assist and support students in exploring their educational goals, learning about academic requirements, navigating the university structure, and progressing toward degree completion.

CROSS-COLLEGE ADVISING SERVICES (CCAS)

Advisors at the Cross-College Advising Service (CCAS) provide personalized advising to help you develop a plan for choosing your major and exploring careers. We are here to help you make decisions about what to major in and also answer your general questions about academics and life on campus.

We'll meet you at SOAR, and after that help you plan your future courses, talk about your academic interests and options, and refer you to other helpful campus resources. We're also here to encourage you when things are going well, as well as support you when times are difficult.

CENTER FOR ACADEMIC EXCELLENCE (CAE)

The College of Letters & Science Center for Academic Excellence (CAE) provides an enriching, inclusive community and academic support for L&S students who have been historically underrepresented in higher education, including first-generation and low-income students, and students of color. CAE offers a variety of engagement opportunities, including high-touch advising, tutoring programs, health and wellness events, social events, graduate school preparation, and connections with High Impact Practices (<http://cae.ls.wisc.edu/high-impact-practices.htm>). CAE also assists in campus-wide efforts to fully integrate diverse voices into the university community to facilitate a welcoming, responsive, and validating campus climate for our students.

HONORS

The L&S Honors Program attracts some of UW–Madison's most talented undergraduates who challenge and learn from each other while working closely with faculty members. By bringing students and professors closer together in small classes and individual research settings, the Honors Program fosters a feeling of community even as students push themselves to explore the very frontiers of knowledge. In addition to traditional course work, most Honors students pursue research projects of their own, and many find this experience so exciting that they go on to earn advanced degrees in the nation's best graduate and professional schools.

Contact information

L&S Honors Program (p. 331)

MAJOR ADVISING

Students who are eligible to declare their major should do so as soon as possible. All L&S undergraduate students are expected to declare their major(s) by the time they have earned 86 degree credits. All declared students will be advised by the advisor connect with their particular major/program. For more information about advising in the major, refer to the advising and careers tab for each major/special degree program under the L&S Degrees/Majors/Certificates (p. 295) section of the Guide.

OTHER ACADEMIC RESOURCES**L&S UNDERGRADUATE ACADEMIC DEANS' SERVICES**

Academic deans provide up-to-date information on college policies, procedures, and deadlines; campus resources; and degree requirements. Academic deans also offer limited academic advising and make decisions regarding exceptions to college policy. They work closely with advising staff in L&S Academic Advising Services, department advisors, and other student service personnel on the UW–Madison campus. In an institution as diverse as the University of Wisconsin–Madison, students have a wide range of values, interests, and skills.

Moreover, as they progress through an academic program, their questions and concerns often change. Therefore, students are encouraged to seek the help of several different types of academic advisors during their years on campus. The university provides a system of staff and faculty advisors to address these ongoing and changing concerns.

ADVISING IN THE MAJOR

Juniors, seniors, and any other students who are preparing for, or have declared, a major or are contemplating a major in the College of Letters and Science, are encouraged to meet with an advisor in that major department. Each department has a faculty or staff member who serves as a department advisor. This person knows about prerequisites to courses, program planning for students majoring in the department, major requirements, and in some cases, general career information related to the field. A department advisor can help students make satisfactory progress toward completing requirements in the major, and can suggest courses that address students' interests and help them achieve their goals.

Juniors and seniors are encouraged to seek advice from these department advisors as soon as possible. **Please note that the assignment of a departmental advisor and declaring a major in a**

particular department(s) are not automatic. Students must go to the department office to declare their major and to be assigned a departmental advisor for the major. Students are also advised to meet with departmental advisors early in their academic career since some majors require students to fulfill prerequisite classes and earn a minimum GPA in the designated coursework before they are eligible to declare the specific major. It is very important that students contact the major department(s) as early as possible so they are aware of any prerequisites.

Transfer students often come to the campus knowing their intended major. These students may go directly to the department advisors for any help they need in pursuing/declaring the major.

Students classified in any of the special degree programs (Applied Mathematics, Engineering and Physics, Journalism, Music, Social Work) may refer to the specific special degree under Degree/Majors/Certificate (p. 295) tab within this Guide for names of professors associated with the various programs, then consult with the appropriate advisor.

Students pursuing Honors in the Major (HM) are encouraged to work closely with the honors coordinator in their major department regarding course and research opportunities within the department or field of interest. Special departmental advisors are available to help any students, primarily sophomores, juniors, and seniors, who have decided on their major. These advisors are located in department offices throughout the campus. Office hours vary among departments. Consult a staff telephone directory for a list of department offices and locations, or see the department descriptions in this catalog.

SUCCESSWORKS

SuccessWorks (<https://careers.ls.wisc.edu>), 711 State Street, Suite 300, 608-262-3921.

At the College of Letters & Science (L&S) SuccessWorks advisors work with students from the time they are interested in exploring career options through preparing and conducting a successful job search or graduate school application—in other words, from freshman year through one year after graduation. Don't hesitate to get started early! We help students reflect and capitalize on their academic skills, explore and try out occupations, participate in internships, and network with professionals in the field. In addition to traditional resume and interview services, SuccessWorks offers one-on-one advising, career and internship courses, occupation-specific advising and resources, the L&S Badger Internship Program, internship scholarships, a mentoring program, and much more. Together we can develop a plan and the tools you need to achieve your goals!

INTERNATIONAL INTERNSHIP PROGRAM (IIP)

The International Internship Program (IIP) (<http://internships.international.wisc.edu>) at UW–Madison is a resource for undergraduate students from all disciplines seeking to gain hands-on international experience. IIP's mission is to identify, cultivate and promote high quality internships that advance the professional training of UW–Madison undergraduate students; foster global competency; and reinforce academic learning through practical application.

IIP cultivates internship opportunities around the world specifically for Badgers. IIP also identifies and promotes existing international internship and research opportunities offered by other campus offices or international organizations. Both types of opportunities can be found via the IIP database and other search resources are also listed on the

website. IIP offers advising for any undergraduates who are exploring internships abroad whether they are just getting started, applying to an IIP-cultivated position, or finding their own. IIP can help with questions related to the many questions that come up with international internships including visas, agreements, academic credit, and scholarships.

The Worldwide Internship Program (WIP), a partnership with International Academic Programs (IAP), is a program for students interning outside their home countries to earn academic credit through an online course via which they engage with other UW–Madison students interning around the world. WIP offers students interning abroad structure through academic reflection, insurance and emergency support and may help with eligibility for visas or scholarships. IIP works with students doing internships for credit or not and offers advising, pre-departure and re-entry programming for any student interning abroad.

An international internship is often located outside the United States, but IIP also promotes internship opportunities to apply international skills and interests domestically. There are many variables in international internships (compensation, duration, location, fees, credit and more) that IIP can help navigate.

For more information on interning abroad visit International Internship Program (IIP) (<http://internships.international.wisc.edu>) or call or e-mail (internships@international.wisc.edu) to discuss how IIP can support departments or students.

PRE-PROFESSIONAL STUDY

General information about Pre-Law and Pre-Health is located at pre-professional (p. 17) study.

SCHOLARSHIPS

The College of Letters & Science welcomes incoming and continuing students to apply for scholarship opportunities created by the support of our donor friends. The undergraduate scholarships program provides support to students who intend to receive a degree from the College of Letters & Science. With over 63 majors and special degree programs which include journalism, music, social work, and applied mathematics, engineering, and physics (p. 295), the College of Letters & Science (L&S) strongly supports the role of a broad and deeply educated citizenry. Letters & Science graduates use this strong foundation to flourish in their chosen careers (<http://ls.wisc.edu/about/lsci?p=careerinitiative.html>). For more information, see overview of scholarships (<http://scholarships.ls.wisc.edu>).

STUDY ABROAD

About 25% of undergraduates make study abroad an integral part of their UW–Madison experience.

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu>) at UW–Madison offers over 200 study

abroad options in about 60 countries on 6 continents. In addition to taking the opportunity to learn new languages, understand new cultures and see the world, UW–Madison students study abroad to complement their on-campus academic goals, strengthen their professional potential and enrich their personal lives.

Students of all academic levels and majors study abroad. While many programs include language training—from the basics to full language immersion—most IAP programs have no language requirement and include courses taught in English.

All courses taken abroad through IAP count as “in-residence” credit, just like taking courses on campus at UW–Madison, so students advance towards their degrees while abroad. And study abroad isn’t limited to classroom experience. Many students also complete internships, do research, fieldwork and service learning.

In addition to resources on health, safety, academic planning and other aspects, UW–Madison students receive the information and guidance

they need to plan a study abroad experiences that fits their budgets. Many study abroad programs cost about the same or less than studying on campus, and student financial aid can be applied in most cases.

While IAP offers programs to students of all majors, including to students in the College of Agricultural and Life Sciences in collaboration with the CALS International Programs office, the College of Engineering and the School of Business also offer programs tailored specifically to the needs of their students. All of these program options are listed here (<https://www.studyabroad.wisc.edu/programs>).

For more information on study abroad at UW–Madison (p. 298), see Study Abroad (<http://studyabroad.wisc.edu>) or call 608-265-6329.

UNDERGRADUATE RESEARCH SCHOLARS PROGRAM

The Undergraduate Research Scholars program (URS) is dedicated to enhancing the academic experience of UW–Madison students by providing first and second year undergraduates with opportunities to earn credit for participating in the research and creative work with UW–Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities. Please refer to Undergraduate Research Scholars (<http://urs.ls.wisc.edu>) for more information.

HONORS

L&S HONORS PROGRAM

The College of Letters & Science Honors Program seeks to provide students with a small, liberal arts college experience within this large university. The Honors Program is home to more than 1,200 motivated, curious and high-achieving students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors—the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, course descriptions for the upcoming semester and much more can be found on the L&S Honors Program website (<http://honors.ls.wisc.edu>). We welcome inquiries via phone at-608)262-2984. The L&S Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

HOW TO GET IN

Students may apply to enter the L&S Honors Program in any semester of their undergraduate careers. Any UW–Madison Honors credits earned before admission to the Honors Program may be applied toward Honors degree requirements. Eligibility criteria and admissions procedures differ for the different Honors degrees.

ADMISSION TO HONORS IN THE LIBERAL ARTS (HLA)

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L&S Honors Program. Students may apply at any point in their undergraduate careers provided they meet the eligibility requirements described below.

All students admitted to the university and to the College of Letters & Science are invited to apply to be considered for admission to the Honors Program to pursue the Honors in the Liberal Arts degree. Interested students can apply via an online application form. Students receive an invitation message by email that contains the URL to the online application. The application deadline will be 30 days from the student's initial login to the application system. Admission to the program is competitive, and space is limited.

Continuing and transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW–Madison or who are transferring to UW–Madison from another college or university may apply to the L&S Honors Program at any time. Applications are available from the Honors Program website (<http://honors.ls.wisc.edu>) and admission decisions are usually made within three weeks of submission of the completed application and supporting materials. While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to participate in the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider Honors in the Major (HM) as an option (see below), since they may find it difficult to complete the HLA degree requirements if beginning that program in the junior or senior year.

ADMISSION TO HONORS IN THE MAJOR (HM)

Students interested in pursuing an Honors in the Major degree are encouraged to consult the department listings (p. 295) in this Guide and speak with the department's academic advisors, who will be able to explain admissions procedures and requirements for the degree. After officially declaring the major and receiving authorization from the department to declare Honors in the Major, students must submit a completed Honors in the Major Declaration Form to the Honors Program office. These forms may be obtained from either the departmental advisor or the Honors Program office.

REQUIREMENTS

Honors may be earned in any L&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science–Applied Mathematics, Engineering, and Physics; Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for example, B.A. with Honors in the Liberal Arts or B.S. with Honors in the Major).

HONORS IN THE LIBERAL ARTS (HLA)

Honors in the Liberal Arts is often the primary focus for most first- and second-year Honors students. It requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Students who complete this curriculum develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:

1. completion of the L&S general degree requirements;
2. a cumulative grade point average of at least 3.300;
3. completion of at least 24 credits in Honors courses with grades of B or better;
4. of the 24 Honors credits, at least 6 must be in the humanities, 6 in the social sciences, and 6 in the natural sciences; and
5. of the 24 Honors credits, at least 15 must be "automatic Honors" credits—that is, in courses that carry the "Honors Only" or

"Accelerated Honors" designations in the Course Guide (<http://public.my.wisc.edu>).

HONORS IN THE MAJOR (HM)

After formally declaring a major in the College of Letters & Science, students may opt to pursue Honors in that major. Honors in the Major requirements can be completed independently from Honors in the Liberal Arts; they may also be completed in conjunction with Honors in the Liberal Arts (which would result in a Comprehensive Honors degree). Each academic department and program in the college, with approval of the Faculty Honors Committee, establishes its own requirements for the Honors in the Major degree. Honors in the Major is intended for students who are interested in original research and who wish to graduate with the best possible undergraduate training in the discipline. Honors in the Major is especially appropriate for students who are considering graduate work, or who want a particularly rigorous training in research, reasoning, and writing skills useful to a wide range of career choices.

Although many of the specific requirements for HM vary by department, all students pursuing Honors in the Major must:

1. complete the L&S general degree requirements;
2. complete the regular major requirements;
3. obtain an overall cumulative grade point average of at least 3.300;
4. earn a grade of B or better in all courses counting towards Honors in the Major requirements; and
5. successfully complete a capstone experience during their senior year, typically a Senior Honors Thesis (see below for more information).

In addition to these collegewide requirements, Honors in the Major students may be required to complete additional upper-level, honors coursework; participate in department research colloquia; and meet a minimum grade point average in all classes in the major (typically between 3.300 and 3.500).

As mentioned above, most departments require a Senior Honors Thesis as the culmination of their Honors in the Major curriculum. In departments for which a research thesis is not the most appropriate capstone, an alternative such as a performance, a professional practicum, or a major piece of creative writing may be required instead. The two-semester Honors thesis or capstone project is often the most challenging part of the Honors in the Major experience, and for most students it also proves to be the most rewarding. The Senior Honors Thesis is a two-semester (or summer and semester) effort; students first enroll in Senior Honors Thesis 681, followed the next term by Senior Honors Thesis 682 (some departments may use different numeric designations for Senior Honors Thesis options). These two courses may not be taken concurrently. The final grade for the entire thesis is assigned after 682 has been completed.

Students who intend to complete Honors in the Major and write a Senior Honors Thesis should consult with department advisors as early as possible. They are also strongly encouraged to begin working with a faculty advisor no later than the beginning of the junior year in order to formulate a research topic, which will enhance the student's potential for success in research grant funding cycles for their senior year. Some departments offer special courses designed to facilitate the organization, planning, and execution of Honors thesis projects. Other departments encourage (and some require) students to take a directed study or tutorial course with the thesis advisor sometime during the junior year. Students who receive funding from the L&S Honors Program for their thesis

research should submit an unbound copy of their thesis to the Honors Program Office.

Students pursuing Honors in the Major in two majors may apply for Dual Thesis Authorization, which will allow them to write one interdisciplinary thesis to satisfy both major capstone requirements. Please see the Honors Program Associate Director for Academic Services to learn more about the application process prior to enrolling in the 681 course.

Prior authorization is needed when students intend to complete either 681 or 682 while away from UW-Madison. Consult with the associate director for academic services if this is your intention.

COMPREHENSIVE HONORS

Students who complete the requirements for both Honors in the Liberal Arts and Honors in the Major in at least one department or program earn Comprehensive Honors, the highest undergraduate degree awarded by the College.

HOW TO EARN HONORS CREDIT

There are three unique Honors course designations, each described here:

- "Honors Only" courses are reserved for Honors candidates. They are generally small classes, led by a faculty member and designed for substantive engagement, or discussion sections or labs reserved for Honors students in larger non-Honors lecture courses. The enrollment system will automatically assign Honors credit to all enrolled students. These "Honors Only" courses are sometimes denoted with the symbol "H".
- "Accelerated Honors" are open to all students. Honors credit is awarded in recognition of the rigor and pace of the course. These Honors courses are often conducted at a faster pace than the non-Honors course counterparts or are upper-level capstone courses in a major that require significant engagement with the course material. As with "Honors Only" designated courses, the enrollment system will automatically assign Honors credit to all enrolled students. These "Accelerated Honors" courses are sometimes denoted with the symbol "!".
- "Honors Optional" designates courses for which Honors is available through an optional Honors component of the course curriculum. These courses are open to all students for enrollment. Opting into the Honors component of the course is done through Student Center. Students enrolled in an "Honors Optional" course are advised to consult with the instructor during the first weeks of the term to determine the Honors curriculum if it is not outlined on the syllabus. Instructors either have designated Honors curricula or students may be encouraged to develop a project idea of their own. These "Honors Optional" courses are sometimes denoted with the symbol "%".

When the Schedule of Classes is published for the upcoming term, students can use Course Guide to identify which courses are being offered for Honors and with which designation. A course being offered for Honors in a past term in no way guarantees that it will be offered for Honors in a future term.

Honors candidates may also earn Honors credit through the following methods:

- Designing and successfully completing an additional Honors project for a course not carrying any of the Honors designations above in the given term. This option requires consent of the instructor and approval of the L&S Honors Program. To request permission from

the Honors Program, students must submit a completed Green Sheet Agreement form and all supporting documentation to the Honors Program office no later than the eighth week of a regular semester, or the fourth week of an eight-week summer term. Green Sheets are available on the Honors Program website (<http://honors.ls.wisc.edu>). Supporting documentation includes a formal proposal outlining the additional Honors project in up to 500 words, and a completed Course Change Request Form. Additional information is available from Honors advisors and on the Honors Program website.

- Students who study abroad on a non-Honors study abroad program may petition to receive up to 4 Honors credits per semester (one course). Upon returning from abroad, students are asked to write a petition in which they are required to reflect on the nature of the course taken abroad and explain why that the course meet the desired criteria for general Honors credit, Honors breadth credit and/or automatic Honors credit. For more details about the petition process, please consult the Honors Program website (<http://honors.ls.wisc.edu>).
- Studying abroad in an Honors Study Abroad Program. (Currently programs are available in Ecuador and Utrecht, Netherlands.) Students may earn up to 16 honors credits. Students receive Honors credit in these cases through the study abroad equivalency process upon their return from abroad.

In all cases, to receive Honors credit in a course, students must earn a final grade of B or higher in that course. If a grade of BC or lower is earned in an Honors course, the Honors notation remains on the student's record, but the course does not count toward Honors degree requirements. If the course is retaken for Honors, regardless of the grade earned during this second attempt, the course cannot satisfy an Honors degree requirement.

Students may not receive Honors credit in courses carried on a pass/fail basis.

ADVISING AND CAREERS

The University of Wisconsin-Madison can seem overwhelming because of its size and the complexity of its policies and procedures. Academic advisors help students get (and maintain) their bearings on campus. The L&S Honors Program has a team of specially trained academic and peer advisors who accompany and support Honors candidates as they pursue diverse educational and co-curricular experiences compatible with their long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours and email. Additional information is available on the Honors Program website (<http://honors.ls.wisc.edu>).

The L&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S Career Services office to help students leverage the academic skills learned in your major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, regardless of major or career goals.

PEOPLE

Faculty Director: Dr. Sabine Gross, Chair of L&S Faculty Honors Committee and Professor of German

Associate Director for Administration: Dr. Matt Kohlstedt

Associate Director for Academic Services: Jacqui Guthrie

Program Administrator: Erin Warner

POLICIES

CRITERIA FOR REMAINING IN GOOD STANDING IN HLA

Students must obtain a grade point average of 3.300 or higher to be eligible to graduate with an Honors in the Liberal Arts degree. As such, we encourage students to strive for at least this GPA each academic term. The Honors Program advising team will work with students on an improvement plan should their GPA drop below 3.300. Students must also make satisfactory progress toward degree requirements, meaning:

1. successfully complete (grade of B or higher) at least one Honors course (any designation) by the end of the third semester on campus and
2. successfully complete (grade of B or higher) at least two automatic Honors courses by the end of the fifth semester on campus.

Students may withdraw from HLA at any time by completing an Honors in the Liberal Arts Withdrawal Form, available from the Honors Program office, and submitting it to the Honors Program.

CRITERIA FOR REMAINING IN GOOD STANDING IN HM

Because each department sets its own criteria for the HM degree program, students are encouraged to work closely with departmental advisors to stay on track towards successful completion. In addition to the criteria established by individual departments, all students must obtain a cumulative grade point average of 3.300 or higher in UW–Madison coursework to be eligible to graduate with the Honors in the Major degree. Students may withdraw from HM at any time by submitting a completed Honors in the Major Withdrawal Form, available from either the department advisor or the Honors Program Office.

HONORS IN THE INDIVIDUAL MAJOR

To complete the Individual Major with Honors, the student must earn Honors credit in at least 20 of the 36 or more credits comprising the Individual Major and must complete a Senior Honors Thesis of 6–8 credits. Students wishing to complete an Honors in the Major degree with an Individual Major should append to their Individual Major proposal a specific outline of how the Honors in the Major requirements would be met, including appropriate Honors-caliber courses, upper-level seminars, and a two-semester capstone project, typically a Senior Honors Thesis. The proposal for Honors in the Individual Major will be reviewed by the Honors Program Associate Director for Academic Services. This individual is authorized to determine whether requests for exceptions to the approved HM requirements will be approved.

HONORS TRANSFER CREDIT

Honors credit earned at other institutions is not currently accepted towards L&S Honors Program degree requirements.

GRANTS AND AWARDS

The L&S Honors Program strives to support Honors students as they pursue original research, study abroad, attend academic conferences, and pursue other endeavors that complement their learning and growth. The following funding opportunities are regularly offered. Please see the L&S Honors Program website (<http://honors.ls.wisc.edu>) for additional opportunities, specific deadlines and additional information about the applications process.

WELTON SOPHOMORE SUMMER HONORS RESEARCH APPRENTICESHIPS

These competitively awarded grants provide funding for honors students who learn more about the research process by working as research apprentices with UW–Madison faculty. Students may not earn course credit for this work. For past students, these apprenticeships often evolved into paid research positions and/or Senior Honors Thesis projects. Applications for the Welton are submitted and considered early in the spring term.

TREWARTHA UNDERGRADUATE THESIS RESEARCH AWARD

This grant enables Honors students to undertake more demanding and extensive Honors Senior Thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients receive funds (up to \$1500) to cover travel expenses and other costs needed to complete the research. These resources may enable students to travel to archives or research sites, or to initiate other research activities that require special funding. Each year 12–16 Trewartha awards are awarded. Applications for the Trewartha are submitted and considered during the fall term.

MARK MENSINK HONORS RESEARCH GRANT

The Mark Mensink Honors Research Grant is the L&S Honors Program's most prestigious grant, awarded in recognition of an exceptional thesis proposal. The purpose of the grant is to enable its recipient to undertake more demanding and extensive Honors senior thesis research than might otherwise be possible due to limited resources or time. Students do not apply specifically for the Mensink award. The Mensink is awarded to a particularly promising Trewartha applicant.

HONORS SUMMER SENIOR THESIS RESEARCH GRANT

These grants enable students to undertake more demanding and extensive senior thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients are awarded a cash stipend of up to \$3000 to cover research-related expenses. Such resources may enable students to travel to archives or research sites, arrange participant interviews or initiate other research activities that require special funding. Applications for summer research grants are submitted and considered during the spring term.

LEADERSHIP TRUST AWARD

The Leadership Trust Award supports students as they plan, develop and implement projects designed to improve UW–Madison, the community and/or the university student body. Each year, up to two (2) students receive awards equal to two (2) semesters of resident, full-time tuition plus project funds up to \$3000 as justified in the submitted project budget. Past award recipients have established mentoring programs for underrepresented students; collaborated with local organizations to improve community access to fresh, healthy and local produce; and founded an academic journal, the Madison Journal of Literary

Criticism, to increase students' opportunities to see their work published. Applicants are asked to identify a UW-Madison faculty member who will serve in an advisory/resource capacity and award winners are expected to submit progress reports to the L&S Faculty Honors Committee. Applications for the Leadership Trust Award are submitted and considered during the spring term for the following academic year.

STUDY ABROAD AWARDS

Up to four \$1,500 travel awards will be awarded to eligible L&S Honors Program students who plan to study abroad. Students studying for either a semester or a year abroad are eligible, however preference will be given to students participating in a year-long program. Applications for this funding opportunity are available in the spring term.

BROMLEY RESEARCH CONFERENCE TRAVEL GRANT

These awards are meant to support students who present at and/or attend regional or national professional conferences. Priority is given to those who plan to present. The award amount is up to \$500. The application process is competitive and; students with the most promising proposals are selected.

AFRICAN CULTURAL STUDIES

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department—Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues. Students also have the opportunity to study less commonly taught African languages through the self-study methodology program, which enables independent learning of a language through supportive, peer-to-peer and instructor-led coursework.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW—Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu>) department or the advisor (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjFjFEtq.html>) at any time.

AFRICAN LANGUAGES AND LITERATURE, B.A.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department—Arabic, Hausa, Swahili, Wolof, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues. Students also have the opportunity to study less commonly taught African languages through the self-study methodology program, which enables independent learning of a language through supportive, peer-to-peer and instructor-led coursework.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu>) department or the advisor (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjFjFEtG.html>) at any time.

HOW TO GET IN

Declaring the major in African languages and literature is as easy as meeting with the advisor. Make an appointment today (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjFjFEtG.html>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree

requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> Complete the fourth unit of a foreign language; OR Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework	108 credits
-------------------------------------	-------------

Depth of Intermediate/Advanced work	60 intermediate or advanced credits
-------------------------------------	-------------------------------------

Major	Declare and complete at least one (1) major
-------	---

Total Credits	120 credits
---------------	-------------

UW-Madison Experience	30 credits in residence, overall
	30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison
	2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

Principal African languages taught by the department are Arabic, Swahili, Yoruba, and Zulu. The program supports the study of various other African languages, through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and eight courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN/ LCA LANG 324	Fourth Semester Arabic	
AFRICAN 334	Fourth Semester Swahili	

AFRICAN 338	Fourth Semester-A Language of Southern Africa
AFRICAN 354	Fourth Semester Xhosa
AFRICAN 374	Fourth Semester Yoruba
AFRICAN 394	Fourth Semester-A Language of West Africa

Total Credits 4

CULTURE STUDIES

Code	Title	Credits
AFRICAN 100	Introduction to African Cultural Expression	3

One 200-level course: 3-4

AFRICAN 201	Introduction to African Literature
AFRICAN/ FOLKLORE 210	The African Storyteller
AFRICAN 211	The African Autobiography
AFRICAN 212	Introduction to African Popular Culture
AFRICAN/ AFROAMER 220	HipHop, Youth Culture, and Politics in Senegal

AFRICAN 496	Sixth Semester, A Language of Northern Africa
AFRICAN 498	Sixth Semester, A Language of West Africa
Total Credits	18-21

ELECTIVES

Credits in any AFRICAN Language or Culture Studies course (listed above) or any of the following courses to achieve 30 credits and eight courses in the major:

Code	Title	Credits
AFRICAN/ LCA LANG 323	Third Semester Arabic	4
AFRICAN 333	Third Semester Swahili	4
AFRICAN 337	Third Semester-A Language of Southern Africa	4
AFRICAN 353	Third Semester Xhosa	4
AFRICAN 373	Third Semester Yoruba	4
AFRICAN 475	Fifth Semester Yoruba	3
AFRICAN 491	Fifth Semester, A Language of Central Africa	3
AFRICAN 493	Fifth Semester, A Language of Southern Africa	3
AFRICAN 495	Fifth Semester, A Language of Northern Africa	3
AFRICAN 497	Fifth Semester, A Language of West Africa	3

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all AFRICAN and major courses

2.000 GPA on 15 upper-level major credits, taken in residence ¹

15 credits in AFRICAN, taken on the UW–Madison campus

¹ Courses with intermediate or advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Students may declare Honors in the African Languages and Literature Major in consultation with the African Languages and Literature undergraduate advisor. To be admitted to the Honors Program in African Languages and Literature, students must have achieved a 3.300

university GPA and a 3.300 GPA in all AFRICAN courses as well as all courses accepted in the major.

Honors in the African Languages and Literature Major Requirements

To earn a B.A. or B.S. with Honors in the Major in African Languages and Literature students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN courses, and all courses accepted in the major
3. Complete a minimum of 15 credits in the major for Honors while in residence at UW–Madison from the following:
 - a. 9 credits in courses no lower than 200 level
 - b. A two-semester Senior Honors Thesis in AFRICAN 681 Senior Honors Thesis and AFRICAN 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- (Content) Students will be able to identify canonical authors and texts, historical forms, genres, and structures, as well as aesthetic and cultural concerns in Africa and its diasporas.
- (Content) Students will demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
- (Content) Students will develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
- (Research Skills) Students will understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
- (Research Skills) Students will effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.

- (Communication Skills) Students will develop or improve speaking, listening, writing, and reading skills in an African language, and integrate these skills to communicate effectively.
- (Communication Skills) Students will communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
- (Communication Skills) Students show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
- (Communication Skills) Students will write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
- (Analytic Skills) Students will discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
- (Analytic Skills) Students will demonstrate command of the terminology and methodologies of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

ADVISING AND CAREERS

ADVISING

How does the major in African languages and literature fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school

- Proofreading resumes and cover letters

Ready to meet with the ACS advisor? Make an appointment today (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjffEtg.html>).

CAREERS

While many students have a difficult time believing it, a humanities major such as ours, enables students who complete it to consider just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

Think about what you learn in a classroom setting as well as what you do each day to be a successful student; the skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- proper research design and methodology
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- broader knowledge of career and graduate-study options

One of the more significant skills majors develop is **language acquisition**. Your study of African languages sets you apart and demonstrates your willingness to explore and expand your understanding of history and culture. In addition, the study of these less commonly taught languages shows discipline and perseverance, since they can be difficult languages to learn.

Overall, you will have a wide variety of skills and talents to start you on the path to a rewarding career!

Visit our website (<http://african.wisc.edu/programs/undergraduate/careers-skill-development>) for more information.

RESOURCES AND SCHOLARSHIPS

RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW–Madison (<http://www.languages.wisc.edu>).

Learn more about scholarships (<http://www.languages.wisc.edu/beyond/scholarships>) and other opportunities for funded language study.

AFRICAN LANGUAGES AND LITERATURE, B.S.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department—Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues. Students also have the opportunity to study less commonly taught African languages through the self-study methodology program, which enables independent learning of a language through supportive, peer-to-peer and instructor-led coursework.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://>

african.wisc.edu) department or the advisor (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjffFEtg.html>) at any time.

HOW TO GET IN

Declaring the major in African languages and literature is as easy as meeting with the advisor. Make an appointment today (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjffFEtg.html>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT
	Limit one each: COMP SCI, STAT

Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall
Minimum GPAs	2.000 in all coursework at UW-Madison 2.000 in intermediate/advanced coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

Principal African languages taught by the department are Arabic, Swahili, Yoruba, and Zulu. The program supports the study of various other African languages, through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and eight courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN/ LCA LANG 324	Fourth Semester Arabic	
AFRICAN 334	Fourth Semester Swahili	
AFRICAN 338	Fourth Semester-A Language of Southern Africa	
AFRICAN 354	Fourth Semester Xhosa	
AFRICAN 374	Fourth Semester Yoruba	
AFRICAN 394	Fourth Semester-A Language of West Africa	
Total Credits		4

CULTURE STUDIES

Code	Title	Credits
AFRICAN 100	Introduction to African Cultural Expression	3
One 200-level course:		3-4

AFRICAN 201	Introduction to African Literature	
AFRICAN/ FOLKLORE 210	The African Storyteller

AFRICAN 496	Sixth Semester, A Language of Northern Africa

AFRICAN 498	Sixth Semester, A Language of West Africa
Total Credits	18-21

ELECTIVES

Credits in any AFRICAN Language or Culture Studies course (listed above) or any of the following courses to achieve 30 credits and eight courses in the major.

Code	Title	Credits
AFRICAN/ LCA LANG 323	Third Semester Arabic	4
AFRICAN 333	Third Semester Swahili	4
AFRICAN 337	Third Semester-A Language of Southern Africa	4
AFRICAN 353	Third Semester Xhosa	4
AFRICAN 373	Third Semester Yoruba	4
AFRICAN 475	Fifth Semester Yoruba	3
AFRICAN 491	Fifth Semester, A Language of Central Africa	3
AFRICAN 493	Fifth Semester, A Language of Southern Africa	3
AFRICAN 495	Fifth Semester, A Language of Northern Africa	3
AFRICAN 497	Fifth Semester, A Language of West Africa	3

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all AFRICAN and major courses

2.000 GPA on 15 upper-level major credits, taken in residence ¹

15 credits in AFRICAN, taken on the UW–Madison campus

¹ Courses with intermediate or advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Students may declare Honors in the African Languages and Literature Major in consultation with the African Languages and Literature undergraduate advisor. To be admitted to the Honors Program in African Languages and Literature, students must have achieved a 3.300 university GPA and a 3.300 GPA in all AFRICAN courses as well as all courses accepted in the major.

Honors in the African Languages and Literature Major Requirements

To earn a B.A. or B.S. with Honors in the Major in African Languages and Literature students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN courses, and all courses accepted in the major
3. Complete a minimum of 15 credits in the major for Honors while in residence at UW–Madison from the following:
 - a. 9 credits in courses no lower than 200 level

b. A two-semester Senior Honors Thesis in AFRICAN 681 Senior Honors Thesis and AFRICAN 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- (Content) Students will be able to identify canonical authors and texts, historical forms, genres, and structures, as well as aesthetic and cultural concerns in Africa and its diasporas.
- (Content) Students will demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
- (Content) Students will develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
- (Research Skills) Students will understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
- (Research Skills) Students will effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
- (Communication Skills) Students will develop or improve speaking, listening, writing, and reading skills in an African language, and integrate these skills to communicate effectively.
- (Communication Skills) Students will communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
- (Communication Skills) Students show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
- (Communication Skills) Students will write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.

- (Analytic Skills) Students will discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
- (Analytic Skills) Students will demonstrate command of the terminology and methodologies of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

ADVISING AND CAREERS

ADVISING

How does the major in African languages and literature fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading resumes and cover letters

AFRO-AMERICAN STUDIES

The Department of Afro-American Studies at the University of Wisconsin–Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct Afro-American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the Afro-American experience.

The department offers undergraduate majors in five areas: literature and culture; theater, music and the visual arts; history; Black Women's studies; and inter-group relations. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the "Bridge" programs which enable them to move directly into Ph.D. programs in English and history. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and various support activities for the National Voting Rights Museum in Selma, Alabama. The department prides itself on positive working relationships with our colleagues in traditional disciplines as well as the Women's Studies Program and the Department of African Cultural Studies. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to the deeper understanding of race in America and the world.

HOW TO GET IN

Students should inform the Department of Afro-American Studies Office of their intention to major and be assigned an advisor within the department.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Requirements Detail

Mathematics Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.

Foreign Language

- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language

Note: A unit is one year of high school work or one semester/term of college work.

L&S Breadth

- Humanities, 12 credits: 6 of the 12 credits must be in literature
- Social Sciences, 12 credits
- Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs 2.000 in all coursework at UW–Madison

2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

REQUIREMENTS FOR THE MAJOR

The major in Afro-American studies requires a **minimum of 30 credits** and one area of concentration, plus electives as follows:¹

¹ Electives may be taken from any concentration area. A maximum 9 credits in Directed Study (AFROAMER 199, AFROAMER 699) may apply.

RESIDENCE & QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses

2.000 GPA on at least 15 credits of upper-level work in the major, in residence²

15 credits in AFROAMER, taken on the UW-Madison campus

² Upper-level in the major includes AFROAMER courses numbered 300 and above.

DISTINCTION

Distinction in the Major

Afro-American studies majors not enrolled for Honors in the Major may receive the "Distinction in the Major" notation on the transcript by earning a 3.750 grade point average in major courses and successfully completing the AFROAMER 691 – AFROAMER 692 Senior Thesis project.

Thesis of Distinction

The award Thesis of Distinction is granted for an exceptionally good or original thesis, without consideration of the student's record in other work. A committee of at least two faculty members will evaluate the thesis and recommend to the dean the granting of this award when appropriate.

HONORS IN THE MAJOR

Students may declare Honors in the Afro-American Studies Major in consultation with the Afro-American Studies undergraduate advisor(s).

HONORS IN THE AFRO-AMERICAN STUDIES MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Afro-American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3

AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4

AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4
AFROAMER/ ASIAN AM 443	Mutual Perceptions of Racial Minorities	3

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. To familiarize students with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. To prepare students to interact effectively in a multicultural world.
3. To prepare students to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. To prepare students for careers working in institutions that address the needs of multicultural communities.
5. To develop an understanding of the connection between different disciplinary approaches to the study of race.

ADVISING AND CAREERS

ADVISING

The Department of Afro-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

PEOPLE

Professors Adell, Drewal, Greene, Plummer, Thornton, Werner

Associate Professor Clark-Pujara

Assistant Professors Almiron, Davis

AFRO-AMERICAN STUDIES, B.S.

The Department of Afro-American Studies at the University of Wisconsin–Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct Afro-American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the Afro-American experience.

The department offers undergraduate majors in five areas: literature and culture; theater, music and the visual arts; history; Black Women's studies; and inter-group relations. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the "Bridge" programs which enable them to move directly into Ph.D. programs in English and history. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and various support activities for the National Voting Rights Museum in Selma, Alabama. The department prides itself on positive working relationships with our colleagues in traditional disciplines as well as the Women's Studies Program and the Department of African Cultural Studies. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to the deeper understanding of race in America and the world.

HOW TO GET IN

Students should inform the Department of Afro-American Studies Office of their intention to major and be assigned an advisor within the department.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	<ul style="list-style-type: none"> • Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

Associate Professor Clark-Pujara

Assistant Professors Almiron, Davis

AFRO-AMERICAN STUDIES, CERTIFICATE

The cohesiveness of the certificate program will be selected from concentration areas and other core courses in the curriculum of the department. For example, students may select courses in the areas of history, literature, black women's studies, music and cultural history, art history and visual culture, among others to meet their specific interests. All students, however, must take one course in Afro-American History

for 3 credits. No more than two of the other courses may be taken at the 100 or 200 level. One course must be a 500–600-level course or seminar. Collectively, the 15 selected credits will come from models and core courses that majors and graduate students take to fulfill requirements.

HOW TO GET IN

Students should inform the Department of Afro-American Studies of their intention to pursue a certificate and be assigned an advisor within the department.

To pursue a certificate in Afro-American studies, students must be enrolled in an undergraduate degree program in any college or school at the University of Wisconsin–Madison, or as a Special student. Only Special students who began the certificate program as undergraduates are allowed to complete the program. Rules regarding transfer credits, up to 50 percent, which apply to undergraduates, also apply to Special students. Finally, all certificate students must declare their interest in the program and plan with the advisor a cohesive program consisting of 15 credits and earn a GPA of 2.50.

REQUIREMENTS

The cohesiveness of the certificate program will be selected from concentration areas and other core courses in the curriculum of the Department. For example, students may select courses in the areas of history, literature, black women's studies, music and cultural history, art history and visual culture, among others to meet their specific interests. **All students, however, must take one course in Afro-American history for 3 credits.** No more than two of the other courses may be taken at the 100 or 200 level. One course must be a 500–600-level course or seminar. Collectively, the 15 selected credits will come from models and core courses that majors and graduate students take to fulfill requirements.

All certificate students must notify the Afro-American Studies advisor while they are completing their final course in order to get approval of completion and be awarded the certificate. The certificate is not awarded automatically based on DARS. If there are questions about a DARS report, please contact the certificate advisor.

CERTIFICATE PROGRAM REQUIREMENTS

Required coursework for a certificate consists of 15 credits. It must demonstrate cohesiveness and range from elementary to advanced levels.

- Approved certificate courses must be graded. Credit/no credit and pass/–fail do not qualify.
- GPA of 2.5 in certificate courses. This certificate is only for undergraduate and special students who began the certificate program as undergraduates.
- At least 50 percent of credits applied toward the certificate must be taken in residence at UW-Madison. The study abroad program is considered resident credit; however, the study abroad must qualify as Afro-American studies credit.
- A student may not be awarded a major and certificate in the same subject area.
- Substitutions for courses in a certificate program are not permitted, unless the courses are in the Afro-American Studies curriculum. The certificate program advisor can recommend an exception to the

student's dean. For example, an equivalent substitute transfer course or a directed study constitutes an individual exception.

- Only one course of independent study is permitted; no more than 3 credits.

ADVISING AND CAREERS

Professor Sandra Adell, Certificate Advisor

saadell@wisc.edu
608-262-0425
4115 Helen C. White Hall

DARS is the document of record for the Afro-American studies certificate. Students should contact the certificate advisor to make sure they are on track to completing the program and to get confirmation of completion of the certificate.

AMERICAN INDIAN STUDIES PROGRAM

The American Indian Studies Program seeks to provide and maintain the highest levels of education, scholarship, leadership, and support to all students, staff, and faculty at the university. As an integral part of the university, the program maintains a special focus on assisting and supporting American Indians in their educational endeavors. In addition to the commitment to the university community, the program provides consultation and services to numerous local, state, and national organizations.

It is the mission of the American Indian Studies Program to provide leadership to other university departments and programs in the pursuit of American Indian course development and scholarship. In addition, the program serves as a resource center and support for individuals who are interested in American Indian culture, history, research, and contemporary life.

AMERICAN INDIAN STUDIES, CERTIFICATE

CERTIFICATE IN AMERICAN INDIAN STUDIES

A certificate in American Indian studies is a way of giving recognition to students who have made a significant effort to learn about American Indian culture and the place of American Indians in American society. Students receiving a certificate will have the achievement officially recorded via transcript notation.

WHAT CAN I DO WITH A CERTIFICATE IN AMERICAN INDIAN STUDIES?

Students of American Indian studies go on to successful careers in administration, advising, academics, advocacy, the arts, business, community outreach, consulting, education, government, health or health education, journalism, library science, literacy programming, lobbying, management, politics, publishing, school counseling, social work, research, and many more.

HOW TO GET IN

Students are required to declare the American Indian studies (AIS) certificate. To begin the certificate declaration process, students must fill out the Certificate Program Application form and bring it to room 316 Ingraham Hall. Students should contact the AIS certificate advisor to obtain the form and to obtain more details about the program. The certificate is open to Special students and undergraduate students regardless of the college of enrollment.

To learn more about the AIS certificate, contact Denise Wiyaka at denise.wiyaka@wisc.edu or request information by sending an email to ais@lets.wisc.edu. Students can also visit the AIS office at 316 Ingraham Hall.

REQUIREMENTS

Certificate advisor: Denise Wiyaka (denise.wiyaka@wisc.edu)

To receive a certificate in American Indian studies, a student must contact the American Indian studies advisor to fill out the necessary forms. Students are required to complete a total of 15 credits.

Code	Title	Credits
<i>Introduction to American Indian Studies:</i>		
AMER IND 100	Introduction to American Indian Studies	
<i>FOUR courses from AT LEAST TWO of the following disciplines:</i>		
History		
AMER IND/HISTORY 490	American Indian History	
Literature and Media		
AMER IND/ENGL 275	American Indian Oral Literatures	
AMER IND 325	American Indians in Film	
AMER IND/LSC 444	Native American Environmental Issues and the Media	

Anthropology

AMER IND/ ANTHRO 314	Indians of North America

AMER IND/ C&E SOC/ SOC 578	Poverty and Place

Additional credits to meet the minimum number of credits and courses required for the Certificate

RESIDENCE AND QUALITY OF WORK

2.000 GPA must be earned on all coursework eligible to meet the certificate requirements.

6 credits may be taken as pass/fail. All other credits must be taken for a letter grade.

8 credits of the certificate coursework must be completed in residence.

ADVISING AND CAREERS

Students are required to declare the American Indian studies (AIS) certificate. For academic advising regarding the certificate, students should contact the AIS certificate advisor to obtain more details about the certificate program and general academic advising. Contact Denise Wiyaka at denise.wiyaka@wisc.edu or request information by sending an email to ais@letsoci.wisc.edu. Students can also visit the AIS office at 316 Ingraham Hall.

ANTHROPOLOGY

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

ANTHROPOLOGY, B.A.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS**Requirements Detail**

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> Complete the fourth unit of a foreign language; OR Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
ANTHRO 490	Undergraduate Seminar ¹	3
Select two of the following:		6
ANTHRO 212	Principles of Archaeology ²	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
Additional credits in ANTHRO to reach 30 credit minimum for the major. ¹		15
Total Credits		30

¹By arrangement with a supervising professor, certain students may substitute a thesis for 4 of the required credits, to be written in biological anthropology, archaeology, or sociocultural anthropology.

Residence and Quality of Work

2.000 GPA in all ANTHRO and major courses

2.000 GPA in 15 upper-level major credits in residence²

15 credits in ANTHRO, taken on campus

²Courses 300 level and higher are counted as upper level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361 Elementary Quechua, ANTHRO/LACIS 362 Elementary Quechua, ANTHRO/LACIS 363 Intermediate Quechua, ANTHRO/LACIS 364 Advanced Quechua, ANTHRO/LACIS 376 First Semester Yucatec Maya, ANTHRO/LACIS 377 Second Semester Yucatec Maya).

Students planning to go on to graduate-level study should talk to their advisor about foreign languages, field experience, or other training needed for advanced anthropological research. Additional courses in related fields should be discussed with an advisor in the department.

DISTINCTION IN THE MAJOR

Undergraduate students who are not enrolled in the honors program are eligible to be recommended by their advisor to the department to receive Distinction in the Major if they have maintained a 3.500 GPA in their major and have written an exceptional senior thesis or an exceptional paper in an undergraduate seminar or independent study.

HONORS IN THE MAJOR

Students may declare Honors in the Major in Anthropology in consultation with the Anthropology advisor(s).

HONORS IN THE ANTHROPOLOGY MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Anthropology students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all ANTHRO courses, and all courses accepted in the major
- Complete the following coursework:
 - ANTHRO 490 Undergraduate Seminar or one seminar at the 600 level; choose from:

Code	Title	Credits
ANTHRO 601	Proseminar in Biological Anthropology	3
ANTHRO 603	Seminar in Evolutionary Theory	3
ANTHRO 604	Seminar: Topics in Physical Anthropology of the Living	3
ANTHRO 606	Ethnicity, Nations, and Nationalism	3-4
ANTHRO 690	Problems in Anthropology	3-4

- A two-semester Senior Honors Thesis in ANTHRO 681 Senior Honors Thesis and ANTHRO 682 Senior Honors Thesis, for a total of 6 credits.
- 9 or more credits, taken for Honors, with 3 credits in each section of Anthropology (biological, archaeological, and cultural) and a B or better earned in each course

BIOLOGICAL

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Students will acquire specialized training in anthropological research.
2. Students will obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Students will gain an awareness of ethnographic, archaeological and bioanthropological ethics practice and research.

4. Students will be able to distinguish between empirical and speculative narratives and claims about human diversity past and present.

ADVISING AND CAREERS

ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising.

CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

CAREER RESOURCES

- Why the liberal arts? (<http://ls.wisc.edu/about/why-liberal-arts>)
- Set up a career advising appointment (<http://careers.ls.wisc.edu/Undergraduate-Advising.htm>)

Archaeology, North America, Wisconsin

ANTHROPOLOGY, B.S.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	<ul style="list-style-type: none"> • Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
ANTHRO 490	Undergraduate Seminar ¹	3
Select two of the following:		6
ANTHRO 212	Principles of Archaeology ²	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
Additional credits in ANTHRO to reach 30 credit minimum for the major. ¹		15
Total Credits		30

¹By arrangement with a supervising professor, certain students may substitute a thesis for 4 of the required credits, to be written in biological anthropology, archaeology, or sociocultural anthropology.

Residence and Quality of Work

2.000 GPA in all ANTHRO and major courses

2.000 GPA in 15 upper-level major credits in residence²

15 credits in ANTHRO, taken on campus

²Courses 300 level and higher are counted as upper level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361 Elementary Quechua, ANTHRO/LACIS 362 Elementary Quechua, ANTHRO/LACIS 363 Intermediate Quechua, ANTHRO/LACIS 364 Advanced Quechua, ANTHRO/LACIS 376 First Semester Yucatec Maya, ANTHRO/LACIS 377 Second Semester Yucatec Maya).

Students planning to go on to graduate-level study should talk to their advisor about foreign languages, field experience, or other training needed for advanced anthropological research. Additional courses in related fields should be discussed with an advisor in the department.

DISTINCTION IN THE MAJOR

Undergraduate students who are not enrolled in the honors program are eligible to be recommended by their advisor to the department to receive Distinction in the Major if they have maintained a 3.500 GPA in their major and have written an exceptional senior thesis or an exceptional paper in an undergraduate seminar or independent study.

HONORS IN THE MAJOR

Students may declare Honors in the Major in Anthropology in consultation with the Anthropology advisor(s).

HONORS IN THE ANTHROPOLOGY MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Anthropology students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all ANTHRO courses, and all courses accepted in the major
- Complete the following coursework:
 - ANTHRO 490 Undergraduate Seminar or one seminar at the 600 level; choose from:

Code	Title	Credits
ANTHRO 601	Proseminar in Biological Anthropology	3
ANTHRO 603	Seminar in Evolutionary Theory	3
ANTHRO 604	Seminar: Topics in Physical Anthropology of the Living	3
ANTHRO 606	Ethnicity, Nations, and Nationalism	3-4
ANTHRO 690	Problems in Anthropology	3-4

- A two-semester Senior Honors Thesis in ANTHRO 681 Senior Honors Thesis and ANTHRO 682 Senior Honors Thesis, for a total of 6 credits.
- 9 or more credits, taken for Honors, with 3 credits in each section of Anthropology (biological, archaeological, and cultural) and a B or better earned in each course

BIOLOGICAL

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 302	Hominoid Evolution	3
ANTHRO 303	Human Skeletal Anatomy	4
ANTHRO 304	Heredity, Environment and Human Populations	3
ANTHRO/BOTANY/ ZOOLOGY 410	Evolutionary Biology	3
ANTHRO 411	The Evolution of the Genus, Homo	3
ANTHRO 454	Study Abroad: Topics in Biological Anthropology	1-6
ANTHRO 458	Primate Behavioral Ecology	3
ANTHRO 601	Proseminar in Biological Anthropology	3
ANTHRO 603	Seminar in Evolutionary Theory	3
ANTHRO 604	Seminar: Topics in Physical Anthropology of the Living	3
ANTHRO 605	Seminar-Current Problems in Paleoanthropology	3
ANTHRO/ NTP/PSYCH/ ZOOLOGY 619	Biology of Mind	3
ANTHRO 641	The Evolution of Human Diet	3-4
ANTHRO 658	Ecological Models of Behavior	3

CULTURAL

Code	Title	Credits

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Students will acquire specialized training in anthropological research.
2. Students will obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Students will gain an awareness of ethnographic, archaeological and bioanthropological ethics practice and research.

4. Students will be able to distinguish between empirical and speculative narratives and claims about human diversity past and present.

ADVISING AND CAREERS

ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising.

CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

ARCHAEOLOGY, CERTIFICATE

Ancient history is a puzzle made up of innumerable fragments—pieces of bone, pottery, stone, and metal; remnants of architecture and monuments; residues of food; and traces of other things. Archaeology is the field of study that provides the tools to discover these fragments and piece them together to reconstruct a picture of the ancient world and to illuminate the stories of past peoples. An accurate understanding of the past is critical for developing a better present and future.

The archaeology certificate is designed to help students obtain a global and interdisciplinary perspective on archaeology and human culture and to gain many of the skills needed to analyze archaeological materials and conduct archaeological field investigations. Through their participation in the archaeology certificate program, students acquire an understanding of how past societies in different regions of the world have successfully or, in many cases, unsuccessfully dealt with adaptation to their environment and interaction with other communities. Students also gain a better appreciation of the diversity of human culture and increased respect for the differences that have resulted from millennia of social, economic, political and ideological developments. Students are able to explore the origins of subsistence strategies, trade, technology, belief systems, and conflict that are still relevant to our modern world, as well as ever changing global economic and political situations.

The archaeology certificate provides an interdisciplinary linkage among courses in several departments and stimulates students to think about similar topics from different academic and theoretical perspectives. Through the curriculum, students get training specific to archaeology. In addition to providing students with a mechanism for developing an understanding of archaeology in its broadest sense, the certificate provides a strong intellectual foundation and skills for future careers and graduate study in archaeology and related fields. Students who successfully complete the certificate, along with a B.A. or B.S. degree from UW–Madison, improve their competitiveness in graduate school applications and, more importantly, have documentation that they are qualified for entry-level employment opportunities in archaeology.

For further information on the archaeology certificate, including a list of core faculty, please see the Department of Anthropology website (<http://www.anthropology.wisc.edu/for-undergraduates/the-certificate-in-archaeology>).

HOW TO GET IN

Students wishing to declare an archaeology certificate should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building. The telephone number for the department is 608-262-2866.

REQUIREMENTS

7 COURSES AND 21 CREDITS

Credits must be distributed in at least three SUBJECTs, and must meet these requirements:

Introductory course

Code	Title	Credits
Complete one:		3
ANTHRO 102	Archaeology and the Prehistoric World	
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 212	Principles of Archaeology	
Total Credits		3

Area courses

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 309	Prehistoric Europe	
ANTHRO 310	Topics in Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 333	Prehistory of Africa	
ANTHRO/ AMER IND 354	Archaeology of Wisconsin	
ANTHRO/ AMER IND 355	Archaeology of Eastern North America	
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 390	Pre-Columbian Art	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 600	Special Topics in Art History ¹	
CLASSICS/ JEWISH 241	Introduction to Biblical Archaeology	
CLASSICS 320	The Greeks	
CLASSICS 322	The Romans	
CLASSICS 379	Eureka! Technology and Practice in the Ancient World	
CLASSICS 602	The Ancient Mediterranean City	
HEBR-BIB/ JEWISH 452	Biblical Archaeology	
HISTORY 303	A History of Greek Civilization	
HISTORY 307	A History of Rome	
HISTORY/ MEDIÉVAL 313	Introduction to Byzantine History and Civilization	
HISTORY 377	History of Africa, 1500 to 1870	

¹ Must be an archaeology topic.

GEOSCI/G L E 594	Introduction to Applied Geophysics	
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology	
Total Credits		6

Field course

Code	Title	Credits
ANTHRO 370	Field Course in Archaeology	3-6
Total Credits		3-6

Capstone

Code	Title	Credits
Choose from:		
ANTHRO 352	Ancient Technology and Invention ²	3-4
ANTHRO 490	Undergraduate Seminar ³	
Total Credits		3-4

² ANTHRO 352 can count either for a methods course or for the capstone course, but not both.

³ ANTHRO 490 is a Topics course. In order to meet the capstone requirement, it must be on an archaeology topic.

RESIDENCE & QUALITY OF WORK ⁴

2.000 GPA on all certificate-approved courses 11 credits in the certificate, in residence

⁴ Pass/fail courses do not apply to the certificate.

ADVISING AND CAREERS

Students wishing to receive advising for the archaeology certificate should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building. The telephone number for the department is 608-262-2866.

ART HISTORY

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions, in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged.

DEGREES/MAJORS/CERTIFICATES

- Art History, B.A. (p. 369)
- Art History, B.S. (p. 378)
- Material Culture Studies, Certificate (p. 386)

PEOPLE

Professors Andrzejewski, Cahill, Casid, Chopra, Dale, Drewal, Marshall, Martin, Phillips (Chair)

Associate Professors McClure, Phillips-Court

Assistant Professors Brisman, Li, Pruitt

Adjunct Lecturers Fuller, Panczenko

Affiliate Professors Aylward, Clark, Kern, Nadler

Affiliate Associate Professor Abdu'Allah

Affiliate UW–Milwaukee Associate Professor Sen

Affiliate UW–Milwaukee Assistant Professors Benyamin, Moon

ART HISTORY, B.A.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated

readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non-UW study abroad programs, the Office of Admissions and Recruitment (<http://www.admissions.wisc.edu/equivalencies>). For more information, see the Study Abroad website (<http://www.studyabroad.wisc.edu>).

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (<http://arthistory.wisc.edu/declaring-the-art-history-major.htm>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> • Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> • Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum	2.000 in all coursework at UW–Madison
GPA	2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS IN THE MAJOR

FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

1. Complete the fourth unit of a foreign language; *or*
2. Complete the third unit of a foreign language *and* the second unit of an additional foreign language

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 203	Survey of Asian Art

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

THEORY AND METHOD DISTRIBUTION

Of the nine required ART HIST courses, at least one course from:

Code	Title	Credits
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 355	History of Photography	
ART HIST 430	Topics in Visual Culture	
ART HIST 431	Topics in Theory	
ART HIST 432	Multiculturalism and the New Museology	
ART HIST 449	Topics in Architectural History	
ART HIST 463	Topics in American Material Culture	
ART HIST/DS/ HISTORY 464	Dimensions of Material Culture	
ART HIST 469	Interdisciplinary Studies in the Arts	
ART HIST 601	Introduction to Museum Studies I	
ART HIST 602	Introduction to Museum Studies II	
ART HIST 603	Curatorial Studies Colloquium	
ART HIST/ LCA 621	Mapping, Making, and Representing Colonial Spaces	
ART HIST/ HISTORY/JOURN/ L I S 650	History of Books and Print Culture in Europe and North America	

RESIDENCE AND QUALITY OF WORK IN THE MAJOR

2.000 GPA in ART HIST and major courses

2.000 GPA on 15 upper-level major credits in residence²

15 credits in ART HIST taken on the UW–Madison campus

² ART HIST courses numbered 300–699 are considered upper level in the major.

EMPHASIS IN ASIAN ART HISTORY

Students with an interest in Asian art history may complete the art history major by completing the following requirements and the Residence & Quality of Work Requirements above.

ASIAN ART TRACK REQUIREMENTS

Code	Title	Credits
<i>Foreign Language</i>		
Select one of the following:		
4 semesters of Asian Language		
3 semesters of one Asian language AND 2 semesters of additional language		
<i>Asian Studies Courses</i>		
Select two courses in East Asian, South Asian, Southeast Asian, or Central Asian Studies (no language or Art History courses)		
<i>Asian Subfields</i>		
Select three courses in at least two subfields:		
General		
ART HIST 203	Survey of Asian Art	
ART HIST/ RELIG ST 373	Great Cities of Islam	
India		
ART HIST 411	Topics in Asian Art	
ART HIST 205	Global Arts	
ART HIST/ RELIG ST 373	Great Cities of Islam	
China		
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present	
ART HIST 371	Chinese Painting	
ART HIST 411	Topics in Asian Art	
Japan		
ART HIST 411	Topics in Asian Art	
ART HIST 372	Arts of Japan	
ART HIST 375	Later Japanese Painting and Woodblock Prints	
<i>Proseminar in Asian Art</i>		
Select one of the following:		
ART HIST 575	Proseminar in Japanese Art	
ART HIST 576	Proseminar in Chinese Art	
<i>Non-Asian Art Courses (any level)</i>		
Select two courses		
<i>Introductory Course in Western Art</i>		
Select one of the following:		
ART HIST 101	The Study of Art, Present and Past	
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	

ART HIST 202 History of Western Art II: From Renaissance to Contemporary

ART HIST 205 Global Arts

HONORS IN THE MAJOR

Students may declare Honors in the Art History Major in consultation with the Art History undergraduate advisor.

HONORS IN THE ART HISTORY MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Art History students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 GPA in all ART HIST courses
- Plan and complete a concentration in a specific area or period, earning 6–8 additional intermediate- or advanced-level credits in ART HIST courses or related departments (e.g., history, literature) beyond the usual major or Asian option.
- Take the required 500-level proseminar (above) before beginning the Senior Honors Thesis
- Complete a two-semester Senior Honors Thesis in ART HIST 681 Senior Honors Thesis and ART HIST 682 Senior Honors Thesis, for a total of 6 credits, in the chosen area or concentration
- Present an oral report on work in an undergraduate Honors colloquium during the senior year.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

We prepare our graduates to become effective and powerful communicators, in both written and oral form, in ways that acknowledge diverse audiences in an increasingly global society. Art History provides:

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such

as form, color, light, proportion, viewpoint, material, and narrative structure.

2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

ADVISING AND CAREERS

ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with the L&S Career Services office to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well as from L&S Advising—about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art history AP credits with a score of 4 or higher and 100-level art history courses count only toward the nine course minimum but do not count toward distribution requirements.
- Courses at the 200-level count only toward the nine course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following

requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)

- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements. The following courses may satisfy distribution requirements even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one are of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

- Art history's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

697 Undergraduate Curatorial Studies Internship (Directed Study). This directed study may serve as an elective for the new undergraduate certificate in Curatorial Studies, as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a

3-credit internship, the student must average approximately 12 hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of 1 hour each month. Requires permission to work with faculty member to receive credit for internship project. 1–3 cr.

ART HISTORY, B.S.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of

other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non–UW study abroad programs, the Office of Admissions (<http://www.admissions.wisc.edu/equivalencies>). For more information, see the Study Abroad website (<http://www.studyabroad.wisc.edu>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.

- L&S Breadth
- Humanities, 12 credits: 6 of the 12 credits must be in literature
 - Social Sciences, 12 credits
 - Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit
Minimum GPAs	2.000 in all coursework at UW-Madison 2.000 in intermediate/advanced coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS IN THE MAJOR

FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

1. Complete the fourth unit of a foreign language; *or*
2. Complete the third unit of a foreign language *and* the second unit of an additional foreign language

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary

ART HIST 440	Art and Power in the Arab World ¹	
ART HIST 469	Interdisciplinary Studies in the Arts	

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

GEOGRAPHIC DISTRIBUTION

Of the nine required ART HIST courses, at least one course from **three** of these **five** areas:

Cross-Cultural/Diaspora

Code	Title	Credits
ART HIST/ AFROAMER 242	Introduction to Afro-American Art	
ART HIST 305	History of Islamic Art and Architecture ¹	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present ¹	
ART HIST/ RELIG ST 373	Great Cities of Islam	
ART HIST/ LCA 379	Cities of Asia ¹	
ART HIST 412	Topics in African and African Diaspora Art History ¹	
ART HIST 413	Art and Architecture in the Age of the Caliphs ¹	
ART HIST 440	Art and Power in the Arab World ¹	
ART HIST/ AFROAMER 643	Selected Topics in African Diaspora Art History	

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

Africa/Middle East

Code	Title	Credits
ART HIST 305	History of Islamic Art and Architecture ¹	
ART HIST 338	Study Abroad in African/Asian Art	
ART HIST/ RELIG ST 373	Great Cities of Islam	
ART HIST 412	Topics in African and African Diaspora Art History ¹	
ART HIST 413	Art and Architecture in the Age of the Caliphs ¹	
ART HIST 440	Art and Power in the Arab World ¹	
ART HIST 479	Art and History in Africa	

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

Asia

Code	Title	Credits
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present	
ART HIST 338	Study Abroad in African/Asian Art	
ART HIST 371	Chinese Painting	
ART HIST 372	Arts of Japan	

ART HIST/ RELIG ST 373	Great Cities of Islam
ART HIST 375	Later Japanese Painting and Woodblock Prints
ART HIST/ LCA 379	Cities of Asia ¹
ART HIST 411	Topics in Asian Art
ART HIST/ LCA 428	Visual Cultures of South Asia
ART HIST 475	Japanese Ceramics and Allied Arts
ART HIST/ RELIG ST 478	Art and Religious Practice in Medieval Japan

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

Europe		
Code	Title	Credits
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 310	Early Christian and Byzantine Art	
ART HIST 318	Romanesque and Gothic Art and Architecture	
ART HIST 320	Italian Renaissance Art	
ART HIST 321	Italian Art: 1250-1400	
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	
ART HIST 330	The Painting & Graphic Arts of Germany 1350-1530	
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel	
ART HIST 332	Northern Painting and Graphics from Bosch and Holbein to Bruegel	
ART HIST 333	Netherlandish Painting of the 17th Century	
ART HIST 334	Prints and Master Printmakers of the Western World	
ART HIST 341	Italian Baroque Art	
ART HIST 346	British Art and Society from the Eighteenth Century to the Present	
ART HIST 350	19th Century Painting in Europe	
ART HIST 351	20th Century Art in Europe	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present ¹	
ART HIST 355	History of Photography ¹	
ART HIST 357	European Architecture: The Nineteenth Century	

ART HIST 358	European Architecture: The Modern Movements
ART HIST 360	Early Modern Art of Northern Europe: Renaissances and Reformations
ART HIST 405	Cities and Sanctuaries of Ancient Greece
ART HIST 407	Topics in Nineteenth Century Art
ART HIST 408	Topics in Twentieth-Century Art
ART HIST/ MEDIEVAL 415	Topics in Medieval Art
ART HIST 420	Topics in Italian Renaissance Art
ART HIST 425	Race and Gender in Italian Early Modern Art
ART HIST 454	Art in Germany, 1900-1945

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

The Americas		
Code	Title	Credits
ART HIST 355	History of Photography ¹	
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues	
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840	
ART HIST 364	History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present	
ART HIST 365	The Concept of Contemporary Art	
ART HIST 367	American Architecture: Colonial and Federal	
ART HIST 368	American Architecture: The 19th Century	
ART HIST 390	Pre-Columbian Art	
ART HIST 433	Sign, Symbol, Stereotype: Native Icons Revealed	
ART HIST 457	History of American Vernacular Architecture and Landscapes	
ART HIST 463	Topics in American Material Culture	
ART HIST 468	Frank Lloyd Wright	

¹ Course is eligible fulfill more than one Chronological or Geographical area, but that course may only satisfy one Chronological and one Geographical area. See Advising and Careers section for more information.

THEORY AND METHOD DISTRIBUTION

Of the nine required ART HIST courses, at least one course from:

Code	Title	Credits
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 355	History of Photography	
ART HIST 430	Topics in Visual Culture	
ART HIST 431	Topics in Theory	

ART HIST 432	Multiculturalism and the New Museology
ART HIST 449	Topics in Architectural History
ART HIST 463	Topics in American Material Culture
ART HIST/DS/ HISTORY 464	Dimensions of Material Culture
ART HIST 469	Interdisciplinary Studies in the Arts
ART HIST 601	Introduction to Museum Studies I
ART HIST 602	Introduction to Museum Studies II
ART HIST 603	Curatorial Studies Colloquium
ART HIST/ LCA 621	Mapping, Making, and Representing Colonial Spaces
ART HIST/ HISTORY/JOURN/ L I S 650	History of Books and Print Culture in Europe and North America

RESIDENCE AND QUALITY OF WORK IN THE MAJOR

2.000 GPA in ART HIST and major courses

2.000 GPA on 15 upper-level major credits in residence²

15 credits in ART HIST taken on the UW–Madison campus

² ART HIST courses numbered 300–699 are considered upper level in the major.

EMPHASIS IN ASIAN ART HISTORY

Students with an interest in Asian art history may complete the art history major by completing the following requirements and the Residence & Quality of Work Requirements above.

ASIAN ART TRACK REQUIREMENTS

Code	Title	Credits
<i>Foreign Language</i>		
Select one of the following:		
4 semesters of Asian Language		
3 semesters of one Asian language AND 2 semesters of additional language		
<i>Asian Studies Courses</i>		
Select two courses in East Asian, South Asian, Southeast Asian, or Central Asian Studies (no language or Art History courses)		
<i>Asian Subfields</i>		
Select three courses in at least two subfields:		
General		
ART HIST 203	Survey of Asian Art	
ART HIST/ RELIG ST 373	Great Cities of Islam	
India		
ART HIST 411	Topics in Asian Art	
ART HIST 205	Global Arts	
ART HIST/ RELIG ST 373	Great Cities of Islam	
China		
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	

ART HIST 308	Later Chinese Art: From the Tenth Century to the Present
ART HIST 371	Chinese Painting
ART HIST 411	Topics in Asian Art
Japan	
ART HIST 411	Topics in Asian Art
ART HIST 372	Arts of Japan
ART HIST 375	Later Japanese Painting and Woodblock Prints

Proseminar in Asian Art

Select one of the following:

ART HIST 575 Proseminar in Japanese Art

ART HIST 576 Proseminar in Chinese Art

Non-Asian Art Courses (any level)

Select two courses

Introductory Course in Western Art

Select one of the following:

ART HIST 101 The Study of Art, Present and Past

ART HIST 201 History of Western Art I: From Pyramids to Cathedrals

ART HIST 202 History of Western Art II: From Renaissance to Contemporary

ART HIST 205 Global Arts

HONORS IN THE MAJOR

Students may declare Honors in the Art History Major in consultation with the Art History undergraduate advisor.

HONORS IN THE ART HISTORY MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Art History students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 GPA in all ART HIST courses
- Plan and complete a concentration in a specific area or period, earning 6–8 additional intermediate- or advanced-level credits in ART HIST courses or related departments (e.g., history, literature) beyond the usual major or Asian option.
- Take the required 500-level proseminar (above) before beginning the Senior Honors Thesis
- Complete a two-semester Senior Honors Thesis in ART HIST 681 Senior Honors Thesis and ART HIST 682 Senior Honors Thesis, for a total of 6 credits, in the chosen area or concentration
- Present an oral report on work in an undergraduate Honors colloquium during the senior year.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

as from L&S Advising—about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art history AP credits with a score of 4 or higher and 100-level art history courses count only toward the nine course minimum but do not count toward distribution requirements.
- Courses at the 200-level count only toward the nine course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements. The following courses may satisfy distribution requirements even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one are of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

Career Resources:

- Why the liberal arts? (<http://ls.wisc.edu/about/why-liberal-arts>)
- Set up a Career Advising Appointment (<http://careers.ls.wisc.edu/Undergraduate-Advising.htm>)
- L&S Career Services (<http://careers.ls.wisc.edu/students.htm>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/about/lsci?p=careerinitiative.html>)

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (<http://arthistory.wisc.edu/declaring-the-art-history-major.htm>).

LEARNING OUTCOMES

1. Ability to employ techniques for visual analysis (examining features such as materials, proportion, light, color, form and narrative structure) of single images and for comparative analysis of multiple images and objects.
2. Proficiency in interpreting images/objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills necessary to interpret images/objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.
7. Skills that prepare our graduates to become effective and impactful communicators in both written and oral form in ways that acknowledge diverse audiences in an increasingly global society.

ADVISING AND CAREERS

ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with the L&S Career Services office to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well

Art History Department Resources

- Art history career advising webpage (<http://arthistory.wisc.edu/resources-advising.htm>)
- What to do with an art history degree? (<http://arthistory.wisc.edu/why-major-in-art-history.htm>)
- Art history majors discuss the value of the degree (<http://arthistory.wisc.edu/testimonials.htm>)
- Art history's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

697 Undergraduate Curatorial Studies Internship (Directed Study). This directed study may serve as an elective for the new undergraduate certificate in Curatorial Studies, as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3-credit internship, the student must average approximately 12 hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of 1 hour each month. Requires permission to work with faculty member to receive credit for internship project. 1–3 cr.

Affiliate Professors Aylward, Clark, Kern, Nadler

Affiliate Associate Professor Abdu'Allah

Affiliate UW–Milwaukee Associate Professor Sen

Affiliate UW–Milwaukee Assistant Professors Benjamin, Moon

MATERIAL CULTURE STUDIES, CERTIFICATE

The certificate in material culture studies has two interrelated goals. First, students will become acquainted with the field of material culture studies and its methodologies. They will learn what kinds of objects are considered in the study of material culture (from small, intimate artifacts of daily life to large cultural landscapes) and how scholars and professionals from different fields and in different contexts enlist material culture in their research and activities. They will gain an appreciation for the information artifacts can provide. They will learn the kinds of questions that can be asked of objects and the kind of information that artifacts can show us. They will become familiar with (and able to distinguish between) descriptive and interpretive components of material culture study, and gain an awareness of the variety of methods. Second, students will gain an appreciation for the ways that “things” help us to connect to the world and see it in a new way, and the ways “things” give meaning to our lives and the lives of those around us.

HOW TO GET IN

Students are required to declare the material culture studies certificate with the program's certificate faculty director, Professor Ann Smart Martin. Students are strongly urged to meet with the faculty director at their earliest convenience to declare the certificate. Professor Smart Martin can be reached at asmartin@wisc.edu or by phone at 608-263-5684 to set up an appointment.

REQUIREMENTS

The Material Culture Studies Certificate Program requires that students complete **13 credits** which includes the two core courses and two elective courses from the list below. An internship/practicum experience is recommended.

Code	Title	Credits
Core Courses (select two):		
ART HIST/ANTHRO/DS/HISTORY/LAND ARC 264	Dimensions of Material Culture ¹	4
ART HIST 563	Proseminar in Material Culture ²	3
Electives:		
Select at least two courses to reach 13 credit minimum: ³		6
ANTHRO 212	Principles of Archaeology	3
ANTHRO/AMER IND 354	Archaeology of Wisconsin	3
ANTHRO/AMER IND 355	Archaeology of Eastern North America	3
ANTHRO 370	Field Course in Archaeology	3-6
ANTHRO 391	Bones for the Archaeologist	3

ANTHRO 696	Archaeological Methods of Curation	1-3	FOLKLORE/ ANTHRO 639	Field School: Ethnography of Wisconsin Festivals	6-8
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	3-4	FOLKLORE/DS 655	Comparative World Dress	3
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	3-4	GEOG/URB R PL 305	Introduction to the City	3-4
ART HIST 305	History of Islamic Art and Architecture	3	GEOG 342	Geography of Wisconsin	3
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	3	GEOG 508	Landscape and Settlement in the North American Past	3
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present	3	HIST SCI 222	Technology and Social Change in History	3
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840	3-4	HIST SCI 337	History of Technology	3
ART HIST 364	History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present	3-4	JOURN/ HISTORY 560	History of Mass Communication	4
ART HIST 413	Art and Architecture in the Age of the Caliphs	3	LAND ARC 260	History of Landscape Architecture	3
ART HIST/LCA 428	Visual Cultures of South Asia	3	LAND ARC 677	Cultural Resource Preservation and Landscape History	3
ART HIST 457	History of American Vernacular Architecture and Landscapes	3	SCAND ST 284	The "Scandinavian Modern" Phenomenon in Arts and Literature	3
ART HIST 463	Topics in American Material Culture	3-4	SCAND ST 296	The Scandinavian Heritage in America	3
ART HIST 468	Frank Lloyd Wright	3-4	SCAND ST/ FOLKLORE 440	Scandinavian American Folklore	3
ART HIST 475	Japanese Ceramics and Allied Arts	3	THEATRE 327	History of Costume for the Stage	3
ART HIST/ RELIG ST 478	Art and Religious Practice in Medieval Japan	3			
ART HIST 506	Curatorial Studies Exhibition Practice (Both 601 & 602)	3			
ART HIST 601	Introduction to Museum Studies I (Must complete both 601 & 602)	3			
ART HIST 602	Introduction to Museum Studies II (Must complete both 601 & 602)	3			
ART HIST/HISTORY/ JOURN/L I S 650	History of Books and Print Culture in Europe and North America	3			
DS 355	History of Fashion, 1400-Present	3			
DS 360	Global Perspectives on Design and Culture	3			
DS 420	Twentieth Century Design	3			
DS 421	History of Architecture and Interiors I: Antiquity through 18th Century	3			
DS 422	History of Architecture & Interiors II: 19th and 20th Centuries	3			
DS 430	History of Textiles	3			
DS 642	Taste	3			
DS/FOLKLORE 655	Comparative World Dress	3			
FOLKLORE 320	Folklore of Wisconsin	3			
FOLKLORE 439	Foodways	3			
FOLKLORE/L I S 490	Field Methods and the Public Presentation of Folklore	3			
FOLKLORE/ MUSIC 535	American Folk and Vernacular Music	3			
FOLKLORE/ ANTHRO/MUSIC/ THEATRE 539	The Folklore of Festivals and Celebrations	3			
FOLKLORE 540	Local Culture and Identity in the Upper Midwest	3			

¹ Prerequisite: course at the 300 level or above in either art history or design studies. Course is rotated among teams of two faculty members from the core material culture staff. The course explores the field of material culture, introducing the range of approaches and topics within it. Faculty, staff, and professionals from different disciplines and fields are invited to discuss their work and perspective, and discuss current literature. Students are encouraged to take a course from the list to satisfy the prerequisite.

² The intent of this requirement is to teach the methods that material culture studies uses, a set of tools for analysis and how they can be used.

³ Choices should be clustered around a focus. For example, one strategy is to take a range of courses related to a specific geographic area, specialization, or time period. Other students may choose to pursue a cluster of courses that emphasizes nationally emerging specializations within the field of material culture including courses related to museums/exhibitions, historic preservation, archival technology, or product design. Students should work with a material culture faculty member to develop this focus. Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

RESIDENCE AND QUALITY OF WORK

A cumulative 2.000 GPA for all certificate coursework.

7 credits, counting for the certificate, taken in residence.

LEARNING OUTCOMES

WHAT MAKES MATERIAL CULTURE DISTINCT FROM OTHER APPROACHES TO STUDYING OBJECTS?

- Material culture emphasizes methods and approaches from a *variety of disciplines*
- The extent of *what students study* in material culture classes is much more extensive in scope than the fine arts that are the domain of disciplines such as art history
- Material culture courses – especially the core courses (Dimensions and Methods) emphasize *hands-on study* to a much greater degree than other approaches within the humanities

LIST OF LEARNING GOALS

- Acquisition of skills to describe and analyze objects of multiple types, scales and media that constitute the material world across time and space
- Understanding of the complex and multiple ways that objects and people relate in the past and in the present using trans-disciplinary perspectives
- Ability to interpret and otherwise make meaning from objects using methods and theories from multiple disciplines including but not limited to art history, archaeology, anthropology, design, folklore/folklife studies, geography, history, literary studies, and landscape history and science studies
- Discernment of the importance of materiality and making in the production and shaping of culture
- Fluency in using research resources and tools across appropriate for specific kinds of objects
- Gaining particular skills of object-based research projects and online and in-person exhibitions using objects and collections to prepare students for careers in museums, archives, and other professional contexts
- Coherent presentation of ideas in multiple media (oral, visual, digital, and written).

ADVISING AND CAREERS

All students should meet with the certificate's faculty director (Professor Ann Smart Martin, 205 Conrad A. Elvehjem Building) at or near the beginning of work on the certificate. At that meeting, students work with the director to outline their course of study, and match a course plan with their interests. After a plan is in place, students are encouraged to stay in regular contact with the undergraduate program advisor (Teddy Kaul, 222 Conrad A. Elvehjem Building; ejkaul@wisc.edu; 608-263-2373) as they continue through the program. Each term the program's director or advisor will contact all certificate students, asking those nearing completion of their certificate coursework to send a notification. For more information about the certificate, current course offerings, and contact information for the advisor, see the program website (<http://materialculture.wisc.edu>).

Associates Holtzman (McNair/SROP Programs), Inoway-Ronnie (Academic Affairs), Tong (Institute for Cross-College Biology Education)

ASIAN AMERICAN STUDIES PROGRAM

The Program in Asian American Studies is an interdisciplinary research, arts and teaching program that focuses on Asian Americans and Asian immigrants in the U.S., Southeast Asians and Asians in the Americas, and Pacific Islanders, both historically and in contemporary society. The certificate program provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American history, Asian American literature, Asian American women writers, Asian Americans in the Midwest, Hmong American studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in U.S. schools, Asian American Dance, Asian Americans & Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community based research and service learning courses.

Many program courses fulfill the ethnic studies requirement and breadth requirements in the appropriate divisions.

DEGREES/MAJORS/CERTIFICATES

The Program in Asian American Studies is an interdisciplinary research, arts and teaching program that focuses on Asian Americans and Asian immigrants in the U.S., Southeast Asians and Asians in the Americas, and Pacific Islanders, both historically and in contemporary society. The certificate program provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American history, Asian American literature, Asian American women writers, Asian Americans in the Midwest, Hmong American Studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in U.S. Schools, Asian American Dance, Asian Americans and Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community-based research and service-learning courses.

Many program courses fulfill the ethnic studies requirement and breadth requirements in the appropriate divisions.

HOW TO GET IN

Please stop by our main office (303 Ingraham Hall) or schedule an appointment with the director to declare the Asian American studies certificate.

REQUIREMENTS

Students gain knowledge about specific ethnic groups, socioeconomic political histories, cultures, and contemporary issues through an Asian American lens.

15 CREDITS ARE REQUIRED, TO INCLUDE:

Code	Title	Credits
ASIAN AM 101	Introduction to Asian American Studies	3
Core - 9 credits from:		9
ASIAN AM/ DANCE 121	Asian American Movement	

ASIAN AM/ ENGL 150	Literature & Culture of Asian America
ASIAN AM/ HISTORY 160	Asian American History: Movement and Dislocation
ASIAN AM/ HISTORY 161	Asian American History: Settlement and National Belonging
ASIAN AM 240	Topics in Asian American Studies
ASIAN AM 260	Topics in Asian American Culture
ASIAN AM/ ENGL 270	A Survey of Asian American Literature
ASIAN AM/ COM ARTS 420	Asian Americans and Media
ASIAN AM/ ENGL 462	Topic in Asian American Literature
ASIAN AM/ENGL/ GEN&WS 463	Race and Sexuality in American Literature
ASIAN AM/ENGL/ GEN&WS 464	Asian American Women Writers
ASIAN AM/ ENGL 465	Asian American Poetry
ASIAN AM 540	Special Topics
ASIAN AM 560	Humanities Topics
Comparative course - 3 credits from:	
ASIAN AM/ CHICLA/ FOLKLORE 102	Introduction to Comparative Ethnic Studies
ASIAN AM/ SOC 220	Ethnic Movements in the United States
ASIAN AM/ HISTORY/ LCA 246	Southeast Asian Refugees of the "Cold" War
ASIAN AM/ E A STDS/ HISTORY 276	Chinese Migrations since 1500
ASIAN AM/ AFROAMER 443	Mutual Perceptions of Racial Minorities
ASIAN AM/ JOURN 662	Mass Media and Minorities

Total Credits 15

RESIDENCE & QUALITY OF WORK

2.750 GPA on all certificate approved courses

8 credits in the certificate, in residence

ADVISING AND CAREERS

Please contact the director of Asian American studies to set up an advising appointment.

PEOPLE

Professors Bow (English/Asian American Studies), Fujimura (Sociology), Gloria (Counseling Psychology), Lee (Educational Policy Studies), Macken (Linguistics), Matsumura (Business), Oliver (Sociology), Shah (Journalism and Mass Communication), Thornton (Afro-American Studies), Uttal (Counseling Psychology) Young (English), Yu (English/Asian American

Studies); Associate Professors Baird (Geography), Cheng (History/Asian American Studies), Choy (Dance/Asian American Studies) Lopez (Communication Arts); Lecturers Cullinane (Center for Southeast Asian Studies), Jew (Asian American Studies), Miyasaki (Asian American Studies); Associates Holtzman (McNair/SROP Programs), Inoway-Ronnie (Academic Affairs), Tong (Institute for Cross College Biology Education)

ASIAN LANGUAGES AND CULTURES

The Department of Asian Languages and Cultures (ALC) at UW-Madison was established on July 1, 2016 merging the preexisting departments of East Asian Languages & Literature (EALL) and Languages & Cultures of Asia (LCA).

ALC is student-centered and driven by research that is integrated into the classroom. With thematic foci in Asian languages, linguistics and literature, Asian cultural studies, religions of Asia, and critical issues in contemporary Asia, we aim to teach students how to recognize and critically analyze the realities of past and present "Asia" as a region that is crucial to the global flows of people, materials, and ideas through its own rich complexity with deep interconnection across multiple domains. At the same time, within this context of connections across Asia, we also seek to promote deep learning and knowledge of particular languages, time periods, and places, since in order to understand transasian regional and global networks, our students also need to acquire specific cultural and linguistic competencies.

We encourage students to study Asia in a regional and comparative frame while cultivating scholarly capacities in particular aspects of Asian culture. To that end, we offer multiple degree options at the B.A. level, reflecting departmental research strengths that allow students to approach the study of Asian cultures, languages, media, religions, and critical social issues from a variety of perspectives. We seek to enhance both teaching and research through collaborations within the department and beyond, with particular emphasis on the development of robust connections with scholars at our peer institutions throughout Asia.

PEOPLE

FACULTY

Professors Bühnemann, Dunne, Huang, Huntington, Kern, McGloin, Mori (chair), Nienhauser, Zhang; Associate Professors Cerulli, D'Etchevery, Geyer, Lim, Meulenbeld, Ridgely; Assistant Professors Yang, Zhu (Diversity Liaison); Faculty Associate Barnard, Nakakubo.

EAST ASIA

Charo D'Etchevery (<http://alc.wisc.edu/about/faculty/charo-detchevery>) (Associate Professor). Area: Classical Japanese Literature

Naomi Geyer (<http://alc.wisc.edu/about/faculty/naomi-geyer>) (Associate Professor). Area: Japanese Language

Nicole Huang (<http://alc.wisc.edu/about/faculty/nicole-huang>) (Professor). Area: Transcultural East Asia; 20th century Chinese and Taiwanese Literature

Rania Huntington (<http://alc.wisc.edu/about/faculty/rania-huntington>) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (<http://alc.wisc.edu/about/faculty/adam-l-kern>) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan.

Byung-jin Lim (<http://alc.wisc.edu/about/faculty/byung-jin-lim>) (Associate Professor). Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Naomi McGloin (<http://alc.wisc.edu/about/faculty/naomi-mcgloin>) (Professor). Area: Japanese Language and Linguistics

Mark Meulenbeld (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Associate Professor). Area: Daoism, Chinese Religion and Literature

Junko Mori (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (<http://alc.wisc.edu/about/faculty/takako-nakakubo>) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

William Nienhauser (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Professor). Area: Early Traditional Chinese Fiction and History; early poetry (Du Fu and Tao Qian)

Steve Ridgely (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Bei Yang (<http://alc.wisc.edu/about/faculty/bei-yang>) (Assistant Professor). Area: Second Language Acquisition, Chinese Languages and Linguistics

Hongming Zhang (<http://alc.wisc.edu/about/faculty/hongming-zhang>) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Weihua Zhu (<http://alc.wisc.edu/about/faculty/weihua-zhu>) (Assistant Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (<http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann>) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (<http://alc.wisc.edu/about/faculty/anthony-cerulli>) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language.

John D. Dunne (<http://alc.wisc.edu/about/faculty/john-d-dunne>) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

SOUTHEAST ASIA

Erlin Barnard (<http://alc.wisc.edu/about/faculty/erlin-barnard>) (Faculty Associate) Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

LANGUAGE INSTRUCTORS

Language instructors (<http://alc.wisc.edu/about/language-instructors>) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

CHINESE PROFESSIONAL COMMUNICATIONS, CERTIFICATE

The certificate in Chinese professional communication provides students with the opportunity to develop proficiency in Chinese while pursuing majors in other subjects across the university. It emphasizes the development of communication skills that are applicable to various professional contexts that students may encounter in their future careers.

The certificate is open to all undergraduate students (except for those majoring in Chinese). It is available to Special students only in circumstances where they have completed more than half of the 12-credit

requirements discussed below as UW–Madison undergraduates in the semesters preceding their Special student enrollment.

For more information about the Department of Asian Languages and Cultures see the department overview (p. 390).

HOW TO GET IN

DECLARING THE CERTIFICATE

If you would like to declare the certificate in Chinese professional communication, please meet with the undergraduate advisor, rweiss@wisc.edu, to review the requirements, discuss courses, and to submit the declaration request.

REQUIRED PREREQUISITE LANGUAGE COURSES

Code	Title	Credits
For non-heritage speakers:		
E ASIAN 101	First Semester Chinese	
E ASIAN 102	Second Semester Chinese	
E ASIAN 201	Third Semester Chinese	
E ASIAN 202	Fourth Semester Chinese	
For heritage Chinese speaking students:		
E ASIAN 213	First Semester Heritage Chinese	6
E ASIAN 214	Second Semester Heritage Chinese	6

Students may test for competency, and be awarded credit by examination, if they have prior knowledge in Chinese language. Contact the program office with questions about the credit by examination process.

PLACEMENT TESTS

Students who are new to the program must take a placement test before enrolling in a language course beyond the first unit. More information here (<http://alc.wisc.edu/languages/placement-tests>).

RESIDENCE & QUALITY OF WORK

2.000 GPA on all certificate-approved courses

6 credits in the certificate, in residence

LEARNING OUTCOMES

1. Understand the content and cultural context of written texts and audiovisual materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
2. Spontaneously exchange ideas about various topics with relative ease.
3. State and support one's own opinion while acknowledging others' viewpoints.
4. Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
5. Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
6. Synthesize and critically evaluate source materials in both English and the target language.
7. Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
8. Demonstrate cultural awareness across historical epochs.
9. Produce effective academic writing in English.

ADVISING AND CAREERS

CHINESE, B.A.

The Chinese program offers students a range of courses and activities which impart an understanding of the culture and civilization of China. With the completion of three basic years of the language, students will be prepared to handle various types of colloquial Chinese. Most majors pursue advanced studies in Chinese linguistics or literature, while others combine an interest in China with a degree in business, education, engineering or journalism.

For more information about the Department of Asian Languages and Cultures visit the department overview (p. 390).

STUDY ABROAD IN CHINA

Students may receive residence credit for study abroad through a variety of different programs sponsored by the department. Please contact International Academic Programs (<https://www.studyabroad.wisc.edu>) for details.

Students may also receive credit, or gain experience, through various internship opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu>) for details.

STARTING COURSEWORK TOWARDS THE MAJOR

Before declaring the major, students are urged to begin coursework early, ideally in the freshman or sophomore year. If, however, this is not possible, summer courses at UW–Madison or elsewhere are available which speed the student's progress. Those who have Chinese credits from high school or summer sessions may enter advanced courses on the basis of placement tests.

The following courses may be taken with no previous knowledge of Chinese or Japanese:

Code	Title	Credits
E ASIAN 101	First Semester Chinese	6
E ASIAN 103	First Semester Japanese	6
E ASIAN 121	Elementary Chinese	3
E ASIAN 123	Elementary Japanese	3
E ASIAN 253	Introduction to Japanese Culture and Civilization	3
E ASIAN 341 & E ASIAN 342	Classical Chinese for Non-Majors and Classical Chinese for Non-Majors	8
E ASIAN/RELIG ST 350	Introduction to Taoism	3-4
E ASIAN/RELIG ST 363	Introduction to Confucianism	3
E ASIAN 367	Japanese Poetic Tradition	3-4
E ASIAN 371	Topics in Chinese Literature	2-3
E ASIAN 434	Introduction to Japanese Linguistics	3

LITTRANS 261 & LITTRANS 262	Survey of Chinese Literature in Translation and Survey of Chinese Literature in Translation	6
LITTRANS 263 & LITTRANS 264	Survey of Japanese Literature in Translation and Survey of Japanese Literature in Translation	6
LITTRANS 368	Modern Japanese Fiction	3
LITTRANS 372	Classical Japanese Prose in Translation	3
LITTRANS 373	Topics in Japanese Literature	3

HOW TO GET IN

ENROLLMENT INFORMATION

The department requires that students who are new to the program take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (<http://alc.wisc.edu/languages/placement-tests>). To register for a placement test, please contact Rachel Weiss (rweiss@wisc.edu).

DECLARATION

If you would like to declare the major, please meet with the undergraduate advisor (rweiss@wisc.edu) to review the requirements, discuss courses, and to submit the declaration request.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS**Requirements Detail**

Mathematics Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.

Foreign Language

- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language

Note: A unit is one year of high school work or one semester/term of college work.

L&S Breadth

- Humanities, 12 credits: 6 of the 12 credits must be in literature
- Social Sciences, 12 credits
- Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

HONORS IN THE MAJOR

Students may declare Honors in the Chinese Major in consultation with the Chinese undergraduate advisor.

HONORS IN THE CHINESE MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Chinese students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 for all E ASIAN courses, and all courses accepted in the major
- Complete the following coursework:
 - E ASIAN 699 Directed Study or other appropriate course of 3–4 credits with the major professor, under whose guidance a student intends to write a thesis. This course must be taken before E ASIAN 681 Senior Honors Thesis

- A two-semester Senior Honors Thesis in E ASIAN 681 Senior Honors Thesis and E ASIAN 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand the content and cultural context of written texts and audiovisual materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
2. Spontaneously exchange ideas about various topics with relative ease.
3. State and support one's own opinion while acknowledging others' viewpoints.
4. Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
5. Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
6. Synthesize and critically evaluate source materials in both English and the target language.
7. Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
8. Demonstrate cultural awareness across historical epochs.
9. Produce effective academic writing in English.

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss
1244 Van Hise Hall
608-890-0138
rweiss@wisc.edu

Schedule an advising appointment (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html>)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages & Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

L&S Career Initiative & Career Services (<http://careers.ls.wisc.edu>)
1305 Linden Drive, Suite 205
careers@saa.ls.wisc.edu

The Career Initiative and Career Services have joined together to prepare undergraduates for satisfying and rewarding careers. Check out the L&S Career Initiative (<http://www.ls.wisc.edu/careerinitiative.html>) website to view progress and hear from notable L&S Alumni via the Vignettes page (<http://www.ls.wisc.edu/careerinitiative-vignettes.html>).

Language & International Directions Advising

Michael Kruse, International Directions Advisor
mkruse@wisc.edu

International Directions Advisor Michael Kruse provides academic and career advising to undergraduate students who are interested in languages and international area studies. Michael is available to meet with students from across campus to help connect them with academic programs and campus resources that fit their interests, as well as to discuss professional opportunities that draw on their language-learning and international experiences.

PEOPLE

FACULTY

Professors Bühnemann, Dunne, Huang, Huntington, Kern, McGloin, Mori (chair), Nienhauser, Zhang; Associate Professors Cerulli, D'Etcheverry, Geyer, Lim, Meulenbeld, Ridgely; Assistant Professors Yang, Zhu (Diversity Liaison); Faculty Associate Barnard, Nakakubo.

EAST ASIA

Charo D'Etcheverry (<http://alc.wisc.edu/about/faculty/charo-detcheverry>) (Associate Professor). Area: Classical Japanese Literature

Naomi Geyer (<http://alc.wisc.edu/about/faculty/naomi-geyer>) (Associate Professor). Area: Japanese Language

Nicole Huang (<http://alc.wisc.edu/about/faculty/nicole-huang>) (Professor). Area: Transcultural East Asia; 20th century Chinese and Taiwanese Literature

Rania Huntington (<http://alc.wisc.edu/about/faculty/rania-huntington>) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (<http://alc.wisc.edu/about/faculty/adam-l-kern>) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan.

Byung-jin Lim (<http://alc.wisc.edu/about/faculty/byung-jin-lim>) (Associate Professor). Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Naomi McGloin (<http://alc.wisc.edu/about/faculty/naomi-mcgloin>) (Professor). Area: Japanese Language and Linguistics

Mark Meulenbeld (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Associate Professor). Area: Daoism, Chinese Religion and Literature

Junko Mori (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (<http://alc.wisc.edu/about/faculty/takako-nakakubo>) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

William Nienhauser (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Professor). Area: Early Traditional Chinese Fiction and History; early poetry (Du Fu and Tao Qian)

Steve Ridgely (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Bei Yang (<http://alc.wisc.edu/about/faculty/bei-yang>) (Assistant Professor). Area: Second Language Acquisition, Chinese Languages and Linguistics

Hongming Zhang (<http://alc.wisc.edu/about/faculty/hongming-zhang>) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Weihua Zhu (<http://alc.wisc.edu/about/faculty/weihua-zhu>) (Assistant Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (<http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann>) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (<http://alc.wisc.edu/about/faculty/anthony-cerulli>) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language.

John D. Dunne (<http://alc.wisc.edu/about/faculty/john-d-dunne>) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

SOUTHEAST ASIA

Erlin Barnard (<http://alc.wisc.edu/about/faculty/erlin-barnard>) (Faculty Associate) Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

LANGUAGE INSTRUCTORS

Language instructors (<http://alc.wisc.edu/about/language-instructors>) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

CHINESE, B.S.

The Chinese program offers students a range of courses and activities which impart an understanding of the culture and civilization of China. With the completion of three basic years of the language, students will be prepared to handle various types of colloquial Chinese. Most majors pursue advanced studies in Chinese linguistics or literature, while others combine an interest in China with a degree in business, education, engineering or journalism.

For more information about the Department of Asian Languages and Cultures visit the department overview (p. 390).

STUDY ABROAD IN CHINA

Students may receive residence credit for study abroad through a variety of different programs sponsored by the department. Please contact International Academic Programs (<https://www.studyabroad.wisc.edu>) for details.

Students may also receive credit, or gain experience, through various internship opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu>) for details.

STARTING COURSEWORK TOWARDS THE MAJOR

Before declaring the major, students are urged to begin coursework early, ideally in the freshman or sophomore year. If, however, this is not possible, summer courses at UW–Madison or elsewhere are available which speed the student's progress. Those who have Chinese credits from high school or summer sessions may enter advanced courses on the basis of placement tests.

The following courses may be taken with no previous knowledge of Chinese or Japanese:

Code	Title	Credits
E ASIAN 101	First Semester Chinese	6
E ASIAN 103	First Semester Japanese	6
E ASIAN 121	Elementary Chinese	3
E ASIAN 123	Elementary Japanese	3
E ASIAN 253	Introduction to Japanese Culture and Civilization	3

E ASIAN 341 & E ASIAN 342	Classical Chinese for Non-Majors and Classical Chinese for Non- Majors	8
E ASIAN/ RELIG ST 350	Introduction to Taoism	3-4
E ASIAN/ RELIG ST 363	Introduction to Confucianism	3
E ASIAN 367	Japanese Poetic Tradition	3-4
E ASIAN 371	Topics in Chinese Literature	2-3
E ASIAN 434	Introduction to Japanese Linguistics	3
LITTRANS 261 & LITTRANS 262	Survey of Chinese Literature in Translation and Survey of Chinese Literature in Translation	6
LITTRANS 263 & LITTRANS 264	Survey of Japanese Literature in Translation and Survey of Japanese Literature in Translation	6
LITTRANS 368	Modern Japanese Fiction	3
LITTRANS 372	Classical Japanese Prose in Translation	3
LITTRANS 373	Topics in Japanese Literature	3

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

Liberal Arts and Science Coursework	108 credits
-------------------------------------	-------------

Depth of Intermediate/Advanced work	60 intermediate or advanced credits
-------------------------------------	-------------------------------------

Major	Declare and complete at least one (1) major
-------	---

Total Credits	120 credits
---------------	-------------

UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit
-----------------------	---

Minimum GPAs	2.000 in all coursework at UW-Madison 2.000 in intermediate/advanced coursework at UW-Madison
--------------	--

HOW TO GET IN

ENROLLMENT INFORMATION

The department requires that students who are new to the program take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (<http://alc.wisc.edu/languages/placement-tests>). To register for a placement test, please contact Rachel Weiss (rweiss@wisc.edu).

DECLARATION

If you would like to declare the major, please meet with the undergraduate advisor (rweiss@wisc.edu) to review the requirements, discuss courses, and to submit the declaration request.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

JAPANESE PROFESSIONAL COMMUNICATION, CERTIFICATE

The certificate in Japanese professional communication provides students with the opportunity to develop proficiency in Japanese while pursuing majors in other subjects across the university. It emphasizes the development of communication skills that are applicable to various professional contexts that students may encounter in their future careers.

The certificate is open to all undergraduate students (except for those majoring in Japanese). It is available to Special students only in circumstances where they have completed more than half of the 12-credit requirements discussed below as UW–Madison undergraduates in the semesters preceding their Special student enrollment.

HOW TO GET IN

DECLARING THE CERTIFICATE

To declare the certificate in Japanese professional communication, students should meet with the undergraduate advisor, rweiss@wisc.edu, to review the requirements, discuss courses, and to submit the declaration request.

REQUIREMENTS

PREREQUISITES

The prerequisites for language courses required for the proposed certificates are four semesters of Japanese language courses:

Code	Title	Credits
E ASIAN 103	First Semester Japanese	6
E ASIAN 104	Second Semester Japanese	6
E ASIAN 203	Third Semester Japanese	6
E ASIAN 204	Fourth Semester Japanese	6

Students may test out of these prerequisites if they have prior experience in Japanese.

PLACEMENT TESTS

The department requires that students who are new to our program take a placement test before enrolling in a language course beyond the first semester level. More information here. (<http://alc.wisc.edu/undergraduate-majors/japanese/placement>)

REQUIREMENTS

The certificate requires 12 credits of course work beyond the prerequisites. The 12-credit requirement consists of the following components:

Code	Title	Credits
<i>Foundation in Professional Communication</i>		3
E ASIAN/ E P D 377	Business Japanese Communication	
<i>Select six credits of the following elective language courses:</i>		6

RESIDENCE AND QUALITY OF WORK

6 credits counting toward the certificate, taken in residence

A cumulative 2.000 GPA for courses counting toward the certificate

LEARNING OUTCOMES

1. Understand the content and cultural context of written texts and audiovisual materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
2. Spontaneously exchange ideas about various topics with relative ease.

3. State and support one's own opinion while acknowledging others' viewpoints.
4. Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
5. Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
6. Synthesize and critically evaluate source materials in both English and the target language.
7. Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
8. Demonstrate cultural awareness across historical epochs.
9. Produce effective academic writing in English.

ADVISING AND CAREERS

ADVISING

Undergraduate Advisor

Rachel Weiss

1244 Van Hise Hall
608-890-0138
rweiss@wisc.edu

Schedule an advising appointment (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html>)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages & Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

CAREERS

L&S Career Initiative & Career Services (<http://careers.ls.wisc.edu>)

1305 Linden Drive, Suite 205
careers@saa.ls.wisc.edu

The Career Initiative and Career Services have joined together to prepare undergraduates for satisfying and rewarding careers. See the L&S Career Initiative website (<http://www.ls.wisc.edu/careerinitiative.html>) to view progress, and hear from notable L&S Alumni via the vignettes page (<http://www.ls.wisc.edu/careerinitiative-vignettes.html>).

Language & International Directions Advising

Michael Kruse, International Directions Advisor
mkruse@wisc.edu

International Directions advisor Michael Kruse provides academic and career advising to undergraduate students who are interested in languages and international area studies. Michael is available to meet with students from across campus to help connect them with academic programs and campus resources that fit their interests, as well as to discuss professional opportunities that draw on their language-learning and international experiences

PEOPLE

FACULTY

Professors Bühnemann, Dunne, Huang, Huntington, Kern, McGloin, Mori (chair), Nienhauser, Zhang; Associate Professors Cerulli, D'Etcheverry, Geyer, Lim, Meulenbeld, Ridgely; Assistant Professors Yang, Zhu (Diversity Liaison); Faculty Associate Barnard, Nakakubo.

EAST ASIA

Charo D'Etcheverry (<http://alc.wisc.edu/about/faculty/charo-detcheverry>) (Associate Professor). Area: Classical Japanese Literature

Naomi Geyer (<http://alc.wisc.edu/about/faculty/naomi-geyer>) (Associate Professor). Area: Japanese Language

Nicole Huang (<http://alc.wisc.edu/about/faculty/nicole-huang>) (Professor). Area: Transcultural East Asia; 20th century Chinese and Taiwanese Literature

Rania Huntington (<http://alc.wisc.edu/about/faculty/rania-huntington>) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (<http://alc.wisc.edu/about/faculty/adam-l-kern>) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan.

Byung-jin Lim (<http://alc.wisc.edu/about/faculty/byung-jin-lim>) (Associate Professor). Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Naomi McGloin (<http://alc.wisc.edu/about/faculty/naomi-mcgloin>) (Professor). Area: Japanese Language and Linguistics

Mark Meulenbeld (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Associate Professor). Area: Daoism, Chinese Religion and Literature

Junko Mori (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (<http://alc.wisc.edu/about/faculty/takako-nakakubo>) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

William Nienhauser (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Professor). Area: Early Traditional Chinese Fiction and History; early poetry (Du Fu and Tao Qian)

Steve Ridgely (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Bei Yang (<http://alc.wisc.edu/about/faculty/bei-yang>) (Assistant Professor). Area: Second Language Acquisition, Chinese Languages and Linguistics

Hongming Zhang (<http://alc.wisc.edu/about/faculty/hongming-zhang>) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Weihua Zhu (<http://alc.wisc.edu/about/faculty/weihua-zhu>) (Assistant Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (<http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann>) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (<http://alc.wisc.edu/about/faculty/anthony-cerulli>) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language.

John D. Dunne (<http://alc.wisc.edu/about/faculty/john-d-dunne>) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

SOUTHEAST ASIA

Erlin Barnard (<http://alc.wisc.edu/about/faculty/erlin-barnard>) (Faculty Associate) Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

LANGUAGE INSTRUCTORS

Language instructors (<http://alc.wisc.edu/about/language-instructors>) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

JAPANESE, B.A.

The Japanese program offers students a range of courses and activities which impart an understanding of the culture and civilization of Japan. With the completion of the four basic years of the language, students will be prepared to handle various types of colloquial Japanese. Most of our majors pursue advanced studies in Japanese linguistics or literature, while others combine an interest in Japan with a degree in business, engineering, history, or international studies.

Majors are urged to begin coursework early, ideally in the freshman or sophomore year. If, however, this is not possible, summer courses at UW–Madison or elsewhere are available which speed the student’s progress. Those who have Japanese credits from high school or summer sessions

may enter advanced courses on the basis of placement tests (<http://alc.wisc.edu/undergraduate-majors/japanese/placement>).

For more information about the Department of Asian Languages and Cultures visit the department overview (p. 390).

STUDY ABROAD IN JAPAN

Students may receive residence credit for **study abroad** through a variety of different programs sponsored by the department. Please contact International Academic Programs (<https://www.studyabroad.wisc.edu>) for details.

Students may also receive credit, or gain experience, through various **internship** opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu>) for details.

HOW TO GET IN

PLACEMENT TESTS

The department requires that students who are new to our program take a placement test before enrolling in a language course beyond the first semester level. More information here. (<http://alc.wisc.edu/undergraduate-majors/japanese/placement>)

DECLARING THE MAJOR

Students may declare the major at any time during their undergraduate career and their study of Japanese. You are urged to meet with the undergraduate advisor (rweiss@wisc.edu) in advance of declaring the major to discuss the requirements

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> Complete the fourth unit of a foreign language; OR Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
First and Second Year Language		
First Year Japanese, select one of the following options:

LITTRANS 373	Topics in Japanese Literature	3

DISTINCTION IN THE MAJOR

Students majoring in Japanese who are not enrolled in the honors program may earn distinction in the major by completing:

1. the L&S general degree requirements, and
2. the junior–senior honors curriculum.

Fifteen honors credits are required in courses at the 300 level or higher, including a Senior Honors Thesis of 6 credits, E ASIAN 681 Senior Honors Thesis–E ASIAN 682 Senior Honors Thesis.

HONORS IN THE MAJOR

Students may declare Honors in the Japanese Major in consultation with the Japanese undergraduate advisor.

HONORS IN THE JAPANESE MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Japanese students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all E ASIAN courses, and all courses accepted in the major
- Complete the following courses:
 - Either E ASIAN 699 Directed Study or other appropriate course of 3–4 credits with the major professor, under whose guidance a student intends to write a thesis. This course must be taken before taking the Senior Honors Thesis
 - Complete a two-semester Senior Honors Thesis in E ASIAN 681 Senior Honors Thesis and E ASIAN 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand the content and cultural context of written texts and video materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
2. Spontaneously exchange ideas about various topics with relative ease.
3. State and support one's own opinion while acknowledging others' viewpoints.
4. Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
5. Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
6. Synthesize and critically evaluate source materials in both English and the target language.
7. Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
8. Demonstrate cultural awareness across historical epochs.
9. Produce effective academic writing in English.

JAPANESE, B.S.

The Japanese program offers students a range of courses and activities which impart an understanding of the culture and civilization of Japan. With the completion of the four basic years of the language, students will be prepared to handle various types of colloquial Japanese. Most of our majors pursue advanced studies in Japanese linguistics or literature, while others combine an interest in Japan with a degree in business, engineering, history, or international studies.

Majors are urged to begin coursework early, ideally in the freshman or sophomore year. If, however, this is not possible, summer courses at UW-Madison or elsewhere are available which speed the student's progress. Those who have Japanese credits from high school or summer sessions

may enter advanced courses on the basis of placement tests (<http://alc.wisc.edu/undergraduate-majors/japanese/placement>).

For more information about the Department of Asian Languages and Cultures visit the department overview (p. 390).

STUDY ABROAD IN JAPAN

Students may receive residence credit for **study abroad** through a variety of different programs sponsored by the department. Please contact International Academic Programs (<https://www.studyabroad.wisc.edu>) for details.

Students may also receive credit, or gain experience, through various **internship** opportunities abroad. Please contact International Internship Programs (<http://internships.international.wisc.edu>) for details.

HOW TO GET IN

PLACEMENT TESTS

The department requires that students who are new to our program take a placement test before enrolling in a language course beyond the first semester level. More information here. (<http://alc.wisc.edu/undergraduate-majors/japanese/placement>)

DECLARING THE MAJOR

Students may declare the major at any time during their undergraduate career and their study of Japanese. You are urged to meet with the undergraduate advisor (rweiss@wisc.edu) in advance of declaring the major to discuss the requirements

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	<ul style="list-style-type: none"> • Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

E ASIAN 573	Readings in Classical Japanese Literature	3
E ASIAN 574	Readings in Classical Japanese Literature	3
E ASIAN 681	Senior Honors Thesis	3
E ASIAN 682	Senior Honors Thesis	3
E ASIAN 691	Senior Thesis	3
E ASIAN 692	Senior Thesis	3

E ASIAN 699	Directed Study	2-3
HISTORY/ E A STDS 454	Samurai: History and Image	3-4
LITTRANS 368	Modern Japanese Fiction	3
LITTRANS 372	Classical Japanese Prose in Translation	3
LITTRANS 373	Topics in Japanese Literature	3

DISTINCTION IN THE MAJOR

Students majoring in Japanese who are not enrolled in the honors program may earn distinction in the major by completing:

1. the L&S general degree requirements, and
2. the junior–senior honors curriculum.

Fifteen honors credits are required in courses at the 300 level or higher, including a Senior Honors Thesis of 6 credits, E ASIAN 681 Senior Honors Thesis–E ASIAN 682 Senior Honors Thesis.

HONORS IN THE MAJOR

Students may declare Honors in the Japanese Major in consultation with the Japanese undergraduate advisor.

HONORS IN THE JAPANESE MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Japanese students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all E ASIAN courses, and all courses accepted in the major
- Complete the following courses:
 - Either E ASIAN 699 Directed Study or other appropriate course of 3–4 credits with the major professor, under whose guidance a student intends to write a thesis. This course must be taken before taking the Senior Honors Thesis
 - Complete a two-semester Senior Honors Thesis in E ASIAN 681 Senior Honors Thesis and E ASIAN 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand the content and cultural context of written texts and video materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
2. Spontaneously exchange ideas about various topics with relative ease.
3. State and support one's own opinion while acknowledging others' viewpoints.
4. Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
5. Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
6. Synthesize and critically evaluate source materials in both English and the target language.
7. Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
8. Demonstrate cultural awareness across historical epochs.
9. Produce effective academic writing in English.

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss

1244 Van Hise Hall

608-890-0138

rweiss@wisc.edu

Schedule an advising appointment (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html>)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages & Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

L&S Career Initiative & Career Services (<http://careers.ls.wisc.edu>)

1305 Linden Drive, Suite 205

careers@saa.ls.wisc.edu

The Career Initiative and Career Services have joined together to prepare undergraduates for satisfying and rewarding careers. Check out the L&S Career Initiative (<http://www.ls.wisc.edu/careerinitiative.html>) website to view progress and hear from notable L&S Alumni via the Vignettes page (<http://www.ls.wisc.edu/careerinitiative-vignettes.html>)

Language & International Directions Advising

Michael Kruse, International Directions Advisor
mkruse@wisc.edu

International Directions Advisor Michael Kruse provides academic and career advising to undergraduate students who are interested in languages and international area studies. Michael is available to meet with students from across campus to help connect them with academic programs and campus resources that fit their interests, as well as to discuss professional opportunities that draw on their language-learning and international experiences

Majors are urged to begin coursework early, ideally in the freshman or sophomore year. If, however, this is not possible, summer courses at UW–Madison or elsewhere are available which speed the student's progress. Those who have Chinese or Japanese credits from high school or summer sessions may enter advanced courses on the basis of placement tests.

THE FOLLOWING COURSES MAY BE TAKEN WITH NO PREVIOUS KNOWLEDGE OF CHINESE OR JAPANESE:

Code	Title	Credits
E ASIAN 101	First Semester Chinese	6
E ASIAN 103	First Semester Japanese	6
E ASIAN 121	Elementary Chinese	3
E ASIAN 123	Elementary Japanese	3
E ASIAN 253	Introduction to Japanese Culture and Civilization	3
E ASIAN 341 & E ASIAN 342	Classical Chinese for Non-Majors and Classical Chinese for Non-Majors	8
E ASIAN/RELIG ST 350	Introduction to Taoism	3-4
E ASIAN/RELIG ST 363	Introduction to Confucianism	3
E ASIAN 367	Japanese Poetic Tradition	3-4
E ASIAN 371	Topics in Chinese Literature	2-3
E ASIAN 434	Introduction to Japanese Linguistics	3
LITTRANS 261 & LITTRANS 262	Survey of Chinese Literature in Translation and Survey of Chinese Literature in Translation	6
LITTRANS 263 & LITTRANS 264	Survey of Japanese Literature in Translation and Survey of Japanese Literature in Translation	6
LITTRANS 368	Modern Japanese Fiction	3
LITTRANS 372	Classical Japanese Prose in Translation	3
LITTRANS 373	Topics in Japanese Literature	3

PEOPLE

FACULTY

Professors Bühnemann, Dunne, Huang, Huntington, Kern, McGloin, Mori (chair), Nienhauser, Zhang; Associate Professors Cerulli, D'Etcheverry, Geyer, Lim, Meulenbeld, Ridgely; Assistant Professors Yang, Zhu (Diversity Liaison); Faculty Associate Barnard, Nakakubo.

EAST ASIA

Charo D'Etcheverry (<http://alc.wisc.edu/about/faculty/charo-detcheverry>) (Associate Professor). Area: Classical Japanese Literature

Naomi Geyer (<http://alc.wisc.edu/about/faculty/naomi-geyer>) (Associate Professor). Area: Japanese Language

Nicole Huang (<http://alc.wisc.edu/about/faculty/nicole-huang>) (Professor). Area: Transcultural East Asia; 20th century Chinese and Taiwanese Literature

Rania Huntington (<http://alc.wisc.edu/about/faculty/rania-huntington>) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (<http://alc.wisc.edu/about/faculty/adam-l-kern>) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan.

Byung-jin Lim (<http://alc.wisc.edu/about/faculty/byung-jin-lim>) (Associate Professor). Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Naomi McGloin (<http://alc.wisc.edu/about/faculty/naomi-mcgloin>) (Professor). Area: Japanese Language and Linguistics

Mark Meulenbeld (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Associate Professor). Area: Daoism, Chinese Religion and Literature

Junko Mori (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (<http://alc.wisc.edu/about/faculty/takako-nakakubo>) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

William Nienhauser (<http://alc.wisc.edu/about/faculty/william-nienhauser>) (Professor). Area: Early Traditional Chinese Fiction and History; early poetry (Du Fu and Tao Qian)

Steve Ridgely (<http://alc.wisc.edu/about/faculty/steve-ridgely>) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Bei Yang (<http://alc.wisc.edu/about/faculty/bei-yang>) (Assistant Professor). Area: Second Language Acquisition, Chinese Languages and Linguistics

Hongming Zhang (<http://alc.wisc.edu/about/faculty/hongming-zhang>) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Weihua Zhu (<http://alc.wisc.edu/about/faculty/weihua-zhu>) (Assistant Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (<http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann>) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (<http://alc.wisc.edu/about/faculty/anthony-cerulli>) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language.

John D. Dunne (<http://alc.wisc.edu/about/faculty/john-d-dunne>) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

SOUTHEAST ASIA

Erlin Barnard (<http://alc.wisc.edu/about/faculty/erlin-barnard>) (Faculty Associate) Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

LANGUAGE INSTRUCTORS

Language instructors (<http://alc.wisc.edu/about/language-instructors>) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

LANGUAGES AND CULTURES OF ASIA, B.A.

Effective fall 2014, admission to the Languages and Cultures of Asia (LCA) major has been suspended.

A new undergraduate program (<http://alc.wisc.edu/undergraduate-majors/asian-languages-and-cultures>) in Asian Languages and Cultures is under development. The plan includes multiple options, such as Southeast Asian studies, South Asian studies, and East Asian studies as well as a non-region-specific option. ALC aims to launch these new programs in fall 2018.

The Department of Asian Languages and Cultures (ALC) at UW–Madison was established on July 1, 2016 merging the preexisting departments of East Asian Languages and Literature (EALL) and Languages and Cultures of Asia (LCA).

ALC is student-centered and driven by research that is integrated into the classroom. With thematic foci in Asian languages, linguistics and literature, Asian cultural studies, religions of Asia, and critical issues in contemporary Asia, we aim to teach students how to recognize and critically analyze the realities of past and present "Asia" as a region that is crucial to the global flows of people, materials, and ideas through its own rich complexity with deep interconnection across multiple domains. At the same time, within this context of connections across Asia, we also seek to promote deep learning and knowledge of particular languages, time periods, and places, since in order to understand transasian regional and global networks, our students also need to acquire specific cultural and linguistic competencies.

We encourage students to study Asia in a regional and comparative frame while cultivating scholarly capacities in particular aspects of Asian culture. To that end, we offer multiple degree options at the BA levels, reflecting departmental research strengths that allow students to approach the study of Asian cultures, languages, media, religions, and critical social issues from a variety of perspectives. We seek to enhance both teaching and research through collaborations within the department and beyond, with particular emphasis on the development of robust connections with scholars at our peer institutions throughout Asia.

HOW TO GET IN

A new undergraduate program in Asian Languages and Cultures is under development. The plan includes multiple options, such as Southeast Asian studies, South Asian studies, and East Asian studies as well as a non-region-specific option. ALC aims to launch these new programs in fall 2018.

Contact Rachel Weiss (rweiss@wisc.edu) for more information.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS**Requirements Detail**

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> Complete the fourth unit of a foreign language; OR Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

REQUIREMENTS FOR THE MAJOR

Note: Effective fall 2014, admission to the languages and cultures of Asia (LCA) major has been suspended. Students should communicate with the undergraduate advisor for Asian languages and cultures for additional assistance.

A new undergraduate program in Asian Languages and Cultures (ALC) is under development. The plan includes multiple options, such as Southeast Asian studies, South Asian studies, and East Asian studies, as well as a non-region-specific option. ALC aims to launch these new programs in fall 2018.

Previously the B.A. in languages and cultures of Asia offered two major tracks:

- Asian languages
- Asian humanities

Students must fulfill the requirements totaling 30 credits in consultation with the undergraduate advisor.

Code	Title	Credits
Select one of the following tracks:		30
Asian Languages Track		
Asian Humanities Track		
Total Credits		30

ASIAN LANGUAGES TRACK

Code	Title	Credits
Select one of the following Introductory Courses:		
LCA 100	Introduction to Cultures of Asia	
LCA 101	Introduction to Literatures of Asia	
Select four courses in one LCA-Lang language ¹		
LCA 600	Capstone Seminar in Asian Humanities	3
Select electives in LCA and/or LCA-Lang courses numbered 300 or above to bring credits for the major to 30		
Total Credits		3

¹ All students with prior knowledge of the language are required to undertake an evaluation procedure to place them at the appropriate level. Prior knowledge cannot be used to fulfill this requirement.

ASIAN HUMANITIES TRACK

Code	Title	Credits
Select one of the following Introductory Courses:		
LCA 100	Introduction to Cultures of Asia	
LCA 101	Introduction to Literatures of Asia

DISTINCTION IN THE MAJOR

The department will recommend that Distinction in the Major be awarded to any student who completes the major requirements and earns a 3.500 GPA within the LCA major.

All students are required to fulfill the L&S requirement of at least **15 credits of upper-level work in the major** completed in residence. LCA courses 300–699 (with the exception of first- and second-semester language courses) count toward this requirement.

HONORS IN THE MAJOR

Students may declare Honors in the Languages and Cultures of Asia Major in consultation with the departmental undergraduate advisor.

HONORS IN THE LANGUAGES AND CULTURES OF ASIA MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Languages and Cultures of Asia students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 for all LCA courses, and all courses accepted in the major
- Complete an additional 6 credits of intermediate- or advanced-level coursework beyond the major requirements in LCA, bringing the total credits to 36
- Complete LCA 600 Capstone Seminar in Asian Humanities before or concurrently with the first semester of LCA 681 Senior Honors Thesis
- Complete a two-semester Senior Honors Thesis in LCA 681 Senior Honors Thesis and LCA 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Understand the content and cultural context of written texts and audiovisual materials with a large degree of independence, adapting style and speed of comprehension to different texts and purposes, and using appropriate reference sources selectively.
- Spontaneously exchange ideas about various topics with relative ease.
- State and support one's own opinion while acknowledging others' viewpoints.
- Demonstrate an awareness of the importance of pragmatic, sociolinguistic, and rhetorical features of the target language.
- Conduct library and/or internet-based research on topics relating to their particular interests and special fields of expertise, collecting and selecting relevant information using English and target language source materials.
- Synthesize and critically evaluate source materials in both English and the target language.
- Present (orally or in written language) their experiences and their introspection on these experiences in a coherent and effective manner.
- Demonstrate cultural awareness across historical epochs.
- Produce effective academic writing in English.

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss

1244 Van Hise Hall

608-890-0138

rweiss@wisc.edu

Schedule an advising appointment (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html>)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

L&S Career Initiative & Career Services (<http://careers.ls.wisc.edu>)

1305 Linden Drive, Suite 205

careers@saa.ls.wisc.edu

The Career Initiative and Career Services have joined together to prepare undergraduates for satisfying and rewarding careers. Check out the L&S Career Initiative (<http://www.ls.wisc.edu/careerinitiative.html>) website to view progress and hear from notable L&S Alumni via the Vignettes page (<http://www.ls.wisc.edu/careerinitiative-vignettes.html>).

Language & International Directions Advising

Michael Kruse, International Directions Advisor

mkruse@wisc.edu

International Directions Advisor Michael Kruse provides academic and career advising to undergraduate students who are interested in languages and international area studies. Michael is available to meet with students from across campus to help connect them with academic programs and campus resources that fit their interests, as well as to discuss professional opportunities that draw on their language-learning and international experiences.

PEOPLE

LANGUAGES AND CULTURES OF ASIA, B.S.

Note: Effective fall 2014, admission to the Languages and Cultures of Asia (LCA) major has been suspended.

The department focuses on research and teaching in the Asian humanities, with particular emphasis on culture, literature, religion, and language. The mission is to engage in wide-ranging humanistic scholarship that transcends the boundaries of language, geographic region, nation, and religious identity and to impart the significance of a humanistic study of Asia to students, as well as to other members of the university and beyond. This mission promotes Asian humanities as something not merely to learn *about* but also, and more important, to learn *from*.

The department offers a wide range of courses covering Central and Southwest, South, and Southeast Asia. Languages currently offered during the academic year include Arabic, Filipino, Hindi, Hmong, Indonesian, Persian, Sanskrit, Thai, Tibetan, Turkish, Urdu, Uzbek, and Vietnamese. Languages currently offered during the summer session include Bengali, Gujarati, Hindi, Malayalam, Marathi, Nepali, Sanskrit, Tamil, Telugu, Tibetan, Urdu, Burmese, Filipino, Hmong, Indonesian, Javanese, Khmer, Lao, Thai, and Vietnamese.

HOW TO GET IN

There are no prerequisites for declaring the major, but students must declare in time to take LCA 600 Capstone Seminar in Asian Humanities in the senior year.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS**Requirements Detail**

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
-------------	--

Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
------------------	---

L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

-------------------------------------	-------------------------------------

Major	Declare and complete at least one (1) major
-------	---

Total Credits	120 credits
---------------	-------------

UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit
-----------------------	---

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Note: Effective fall 2014, admission to the languages and cultures of Asia (LCA) major has been suspended. Students should communicate with the undergraduate advisor for Asian languages and cultures for additional assistance.

A new undergraduate program in Asian Languages and Cultures (ALC) is under development. The plan includes multiple options, such as Southeast Asian studies, South Asian studies, and East Asian studies, as well as a non-region-specific option. ALC aims to launch these new programs in fall 2018.

Previously the B.A. in languages and cultures of Asia offered two major tracks:

- Asian languages
- Asian humanities

Students must fulfill the requirements totaling 30 credits in consultation with the undergraduate advisor.

Code	Title	Credits
Select one of the following tracks:		30
	Asian Languages Track	
	Asian Humanities Track	
Total Credits		30

ASIAN LANGUAGES TRACK

Code	Title	Credits
Select one of the following Introductory Courses:		
LCA 100	Introduction to Cultures of Asia	
LCA 101	Introduction to Literatures of Asia	
Select four courses in one LCA-Lang language ¹		
LCA 600	Capstone Seminar in Asian Humanities	3
Select electives in LCA and/or LCA-Lang courses numbered 300 or above to bring credits for the major to 30		
Total Credits		3

¹ All students with prior knowledge of the language are required to undertake an evaluation procedure to place them at the appropriate level. Prior knowledge cannot be used to fulfill this requirement.

ASIAN HUMANITIES TRACK

Code	Title	Credits
Select one of the following Introductory Courses:		
LCA 100	Introduction to Cultures of Asia	
LCA 101	Introduction to Literatures of Asia	
Select one of the following options:		
Option 1 - Select two courses from two Field Categories:		
	Religion	
	Literature	

Culture		
Option 2 - Select two courses from two Area Categories:		
Central and Southwest Asia		
South Asia		
Southeast Asia		
LCA 600	Capstone Seminar in Asian Humanities	3
Select electives in LCA and/or LCA-Lang courses numbered 300 or above to bring credits for the major to 30		
Total Credits		3

DISTINCTION IN THE MAJOR

The department will recommend that Distinction in the Major be awarded to any student who completes the major requirements and earns a 3.500 GPA within the LCA major.

All students are required to fulfill the L&S requirement of at least **15 credits of upper-level work in the major** completed in residence. LCA courses 300–699 (with the exception of first- and second-semester language courses) count toward this requirement.

HONORS IN THE MAJOR

Students may declare Honors in the Languages and Cultures of Asia Major in consultation with the departmental undergraduate advisor.

HONORS IN THE LANGUAGES AND CULTURES OF ASIA MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Languages and Cultures of Asia students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 for all LCA courses, and all courses accepted in the major
- Complete an additional 6 credits of intermediate- or advanced-level coursework beyond the major requirements in LCA, bringing the total credits to 36
- Complete LCA 600 Capstone Seminar in Asian Humanities before or concurrently with the first semester of LCA 681 Senior Honors Thesis
- Complete a two-semester Senior Honors Thesis in LCA 681 Senior Honors Thesis and LCA 682 Senior Honors Thesis, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ASTRONOMY

Astronomy, the oldest of the sciences, for the last several decades has been one of the most exciting fields of modern scientific research. New discoveries concerning the solar system, stars, galaxies, and the origin of the universe continue to be made by both ground and space telescopes. To understand and pursue modern astronomy, one must have a solid background in physics and mathematics as well as in astronomy.

The astronomy–physics major, administered by the Department of Astronomy, provides undergraduates the opportunity to appreciate our current understanding of the astronomical universe, while developing the necessary physics and math background. Students who intend to continue astronomy in a graduate program are strongly encouraged to do a Senior Thesis (ASTRON 681 Senior Honors Thesis/ASTRON 682 Senior Honors Thesis (honors) or ASTRON 691 Senior Thesis/ASTRON 692 Senior Thesis). The experiences of actual research and of writing a major paper develop both technical and writing skills.

DEGREES/MAJORS/CERTIFICATES

-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS**Requirements Detail**

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	<ul style="list-style-type: none"> Complete the fourth unit of a foreign language; OR Complete the third unit of a foreign language and the second unit of an additional foreign language <p>Note: A unit is one year of high school work or one semester/term of college work.</p>
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework

Depth of Intermediate/Advanced work

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall

30 credits in residence after the 90th credit

Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison
--------------	--

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.

REQUIREMENTS FOR THE MAJOR

The major requires a minimum of 34 credits in the field of specialization, with at least 6 of these credits in ASTRON and at least 28 credits in PHYSICS.

COURSE REQUIREMENTS FOR THE MAJOR ARE:

Code	Title	Credits
Astronomy ¹		
Select at least two of the following:		6
ASTRON 310	Stellar Astrophysics ²	
ASTRON 320	The Interstellar Medium	
ASTRON 330	Galaxies ²	
ASTRON 335	Cosmology ²	
ASTRON 340	Solar System Astrophysics	
ASTRON 500	Techniques of Modern Observational Astrophysics ²	
Physics		
Select one of the following sequences for Introductory Physics: ³		28
Option 1 (Recommended Sequence):		
PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 248	A Modern Introduction to Physics	
PHYSICS 249	A Modern Introduction to Physics	
Option 2:		
PHYSICS 201	General Physics	
PHYSICS 202	General Physics	
PHYSICS 205	Modern Physics for Engineers	
Option 3:		
PHYSICS 207	General Physics	
PHYSICS 208	General Physics	
PHYSICS 241	Introduction to Modern Physics	
Additional PHYSICS to reach minimum of 34 credits, to include the following:		
PHYSICS 311	Mechanics	
PHYSICS 322	Electromagnetic Fields	
PHYSICS 415	Thermal Physics	
PHYSICS 448 & PHYSICS 449	Atomic and Quantum Physics and Atomic and Quantum Physics	
or PHYSICS 531 Introduction to Quantum Mechanics		
Select a 300-level or higher laboratory course:		
ASTRON 510	Radio Astronomy Laboratory	
PHYSICS 308	Intermediate Laboratory-Electromagnetic Fields and Optics	

PHYSICS 321	Electric Circuits and Electronics	
Total Credits		34
¹	ASTRON 103 The Evolving Universe: Stars, Galaxies, and Cosmology and ASTRON 104 Our Exploration of the Solar System are not required for majors.	
²	ASTRON 310 Stellar Astrophysics is a prerequisite for ASTRON 330 Galaxies, ASTRON 335 Cosmology, and ASTRON 500 Techniques of Modern Observational Astrophysics.	
³	E M A 201 Statics, E M A 202 Dynamics and M E 240 Dynamics count toward the 28 credits of PHYSICS requirement.	

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all ASTRON, PHYSICS and major courses

2.000 GPA on 15 upper-level major credits in residence: ASTRON 300 through 699 and PHYSICS 300 through 699

15 credits in the ASTRON and PHYSICS, taken on campus

HONORS IN THE MAJOR

Students may declare Honors in the Astronomy–Physics Major in consultation with the Astronomy–Physics undergraduate advisor(s).

HONORS IN THE ASTRONOMY-PHYSICS MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Astronomy–Physics, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.500 GPA for all ASTRON courses, and all courses accepted in the major, at the 300 level or higher
- Complete the following coursework:
 - Four 300-level or higher ASTRON courses
 - A two-semester Senior Honors Thesis in ASTRON 681 Senior Honors Thesis and ASTRON 682 Senior Honors Thesis, with a grade of AB or better, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Learn how astronomical observations are made and how astronomical data are analyzed. Become acquainted with basic principles of astronomical imaging and spectroscopy, detectors, and interferometry. Apply simple statistical concepts learned previously in required laboratory courses to astronomical data. Use simple scientific computing methods to plan astronomical observations and analyze astronomical data.
2. Become familiar with current astrophysical theories and observations of basic systems such as planets, stars, interstellar gas, galaxies, and structure of the Universe (cosmology). Learn to apply physical principles and mathematical techniques learned previously in required courses to understand the natural laws governing these systems. Use simple scientific computing methods to analyze and physically interpret numerical models of astronomical systems.
3. Learn how to read and critically evaluate scientific literature. Students should be able to grasp the main points, scientific goals, and research methods used in an article and should be able to discern whether the article supports or conflicts with material presented elsewhere.
4. Learn the basics of oral and written scientific communication. Written coursework will be assessed on the basis of clear writing, appropriate level of detail in reporting calculations, and computations and appropriate bibliographic references and citations as well as on scientific accuracy. Learn to give clear and accurate short oral presentations with appropriate supporting materials.
5. Be trained in principles and standards of professional and ethical conduct. Learn when and how to cite references and when it is appropriate to credit the contributions of others or claim credit for one's own work. Learn what constitutes a professional or unprofessional demeanor and how to apply principles of equality in an educational or workplace setting. Learn how to address a breakdown of professional ethics and standards if experienced or observed.
6. Develop the skills to carry out a small independent research project. Learn to define the scope of the project, how to conduct an effective literature search, and perform computations, analyze data, and report on the literature as appropriate. Learn the basics of presenting the results of the project, whether as a paper, poster, talk, or some combination. The project may involve group work, or teamwork, depending on logistics and the nature of the project. *Note: Not all Astronomy majors engage in independent research; this learning goal applies only to majors who have a formal research advisor to perform the assessment.*

ADVISING AND CAREERS

ADVISING

For pre-major advising, or to declare the astronomy–physics major, students should contact Professor Townsend at townsend@astro.wisc.edu. Additional information and handouts on the

major are available in the office of the undergraduate coordinator at 2554 Sterling Hall.

Please contact Professor Richard Townsend, townsend@astro.wisc.edu, 4550 Sterling Hall or Prof. Snezana Stanimirovic, sstanimi@astro.wisc.edu, 4514 Sterling Hall to schedule an appointment to declare the major; or contact department office for an advisor.

RECOMMENDED ADDITIONAL COURSES

Math: Mathematics courses other than those required as prerequisites for PHYSICS courses are not required for the major, but the following courses are recommended: MATH 319 Techniques in Ordinary Differential Equations, MATH 321 Applied Mathematical Analysis and MATH 322 Applied Mathematical Analysis. If a student plans to work toward the Ph.D degree the student should also take MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra. Additional mathematics (or statistics) courses should be chosen after consultation with the undergraduate advisor.

Computing: Computers are fundamental to astronomical research. An introduction Computer Science course or short courses run by the computing center should be considered.

Chemistry: A college course in physical or organic chemistry is useful for astronomy students. Physical chemistry is particularly valuable for those interested in the interstellar medium, comets, and planets.

Statistics: A background in statistics is valuable, particularly for students interested in observational astronomy. STAT 301 Introduction to Statistical Methods, or STAT/MATH 309 Introduction to Probability and Mathematical Statistics I/STAT/MATH 310 Introduction to Probability and Mathematical Statistics II for a more solid foundation, are suggested.

Languages: French, German, Russian, and especially Spanish are the most useful foreign languages for astronomy students, but are not required.

PEOPLE

Professors Barger, Bershad, Gallagher, Heinz, Lazarian, Mathieu, Stanimirovic, Wilcots, Zweibel

Associate Professors Townsend, Tremonti

Assistant Professor D'Onghia

ASTRONOMY–PHYSICS, B.S.

Astronomy, the oldest of the sciences, for the last several decades has been one of the most exciting fields of modern scientific research. New discoveries concerning the solar system, stars, galaxies, and the origin of the universe continue to be made by both ground and space telescopes. To understand and pursue modern astronomy, one must have a solid background in physics and mathematics as well as in astronomy.

The astronomy–physics major, administered by the Department of Astronomy, provides undergraduates the opportunity to appreciate our current understanding of the astronomical universe, while developing the necessary physics and math background. Students who intend to continue astronomy in a graduate program are strongly encouraged to do a Senior Thesis (ASTRON 681 Senior Honors Thesis/ASTRON 682 Senior

Honors Thesis (honors) or ASTRON 691 Senior Thesis/ASTRON 692 Senior Thesis). The experiences of actual research and of writing a major paper develop both technical and writing skills.

HOW TO GET IN

Students are encouraged to declare their major as early as possible. Before declaring the major, students must complete the first two of the three classes in the Introductory PHYSICS sequence.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. ATMOSPHERIC AND OCEANIC SCIENCES

The study of atmospheric and oceanic sciences includes all aspects of the atmosphere and physical oceanography, their mutual interaction, and their interaction with space and the rest of the earth system. Although a primary goal is to understand the atmosphere and ocean for the purpose of predicting the weather, atmospheric and oceanic sciences embraces much more: motions at large, medium, and small scales; past, present, and future climates; air chemistry and quality; clouds and precipitation; and solar and terrestrial radiation. In many areas, new remote-sensing technology including satellites is used to provide circulation patterns at both global and local scales.

Many undergraduates take an elementary atmospheric and oceanic sciences course to meet part of their natural or physical science breadth requirements. Other students, who have had sufficient mathematics and physics preparation, take higher-level atmospheric and oceanic sciences courses to complement their major work in other fields of natural science. An atmospheric and oceanic sciences major receives a thorough introduction to the basic concepts and tools in the core courses, which cover the physics and dynamics of the atmosphere and ocean. An array of elective courses are offered in the senior year, with tracks in the areas of weather systems, earth/environmental science, and general and applied atmospheric and oceanic sciences. Elective groups are tailored individually. Some students will want preparation for careers in areas such as operational forecasting, environmental consulting, and broadcasting. Others will seek preparation for graduate work leading to a broader range of careers.

DEGREES/MAJORS/CERTIFICATES

- Atmospheric and Oceanic Sciences, B.A. (p. 430)
- Atmospheric and Oceanic Sciences, B.S. (p. 433)
- Environmental Sciences, B.A. (L&S) (p. 436)

ATMOSPHERIC AND OCEANIC SCIENCES, B.A.

The study of atmospheric and oceanic sciences includes all aspects of the atmosphere and physical oceanography, their mutual interaction, and their interaction with space and the rest of the earth system. Although a primary goal is to understand the atmosphere and ocean for the purpose of predicting the weather, atmospheric and oceanic sciences embraces much more: motions at large, medium, and small scales; past, present, and future climates; air chemistry and quality; clouds and precipitation; and solar and terrestrial radiation. In many areas, new remote-sensing technology including satellites is used to provide circulation patterns at both global and local scales.

Many undergraduates take an elementary atmospheric and oceanic sciences course to meet part of their natural or physical science breadth requirements. Other students, who have had sufficient mathematics and physics preparation, take higher-level atmospheric and oceanic sciences courses to complement their major work in other fields of natural science. An atmospheric and oceanic sciences major receives a thorough introduction to the basic concepts and tools in the core courses, which cover the physics and dynamics of the atmosphere and ocean. An array of elective courses are offered in the senior year, with tracks in the areas of weather systems, earth/environmental science, and general and applied atmospheric and oceanic sciences. Elective groups are tailored individually. Some students will want preparation for careers in areas such as operational forecasting, environmental consulting, and broadcasting. Others will seek preparation for graduate work leading to a broader range of careers.

HOW TO GET IN

Because the atmospheric and oceanic sciences involve applying the principles and techniques of physical science to the fluid atmosphere and ocean, a strong background in mathematics, physics, and chemistry is necessary. Admission to the atmospheric and oceanic sciences major requires a combined grade point average of 2.250 or better in the following courses:

Code	Title	Credits
Calculus		
Select three semesters equivalent to the following:		
MATH 221	Calculus and Analytic Geometry 1

ATM OCN Electives, to include:		12
ATM OCN 405	AOS Senior Capstone Seminar ²	
ATM OCN Courses Numbered 400 and higher to reach 12 credits ³		
Total Credits		25

¹ Note that core sequence begins in the fall semester only.

² The 12 credits of ATM OCN electives, number 400 or higher, shall include at least 1 credit in ATM OCN 405, or an independent study research project, or a senior thesis.

³ No more than 2 of the 12 credits may be earned with internships or directed-study credits.

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all ATM OCN and major courses

2.000 GPA on 15 upper-level credits in the major, taken in residence: ATM OCN 300 through ATM OCN 699

15 credits in ATM OCN, taken on campus

HONORS IN THE MAJOR

Students may declare Honors in the Atmospheric and Oceanic Sciences Major in consultation with the Atmospheric and Oceanic Sciences undergraduate advisor.

HONORS IN THE ATMOSPHERIC AND OCEANIC SCIENCES MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Atmospheric and Oceanic Sciences students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.400 GPA for all ATM OCN courses, and all courses accepted in the major
- Complete the following additional coursework:
 - ATM OCN 601 Challenging Problems of Atmospheric and Oceanic Sciences or ATM OCN 611 Geophysical Fluid Dynamics II and
 - A two-semester Senior Honors Thesis in ATM OCN 681 Senior Honors Thesis and ATM OCN 682 Senior Honors Thesis, for a total of 6 credits

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Graduates of the Department of Atmospheric and Oceanic Sciences will be able to:

1. recognize and describe the fundamental principles and processes associated with the dynamics and thermodynamics of geophysical fluid flows, the basic physics of clouds, aerosols, and precipitation;

2. recognize and describe the fundamental principles and processes associated with radiation and atmospheric and oceanic radiative transfer;
3. demonstrate critical thinking skills by identifying a problem, identifying the required information to solve that problem; and formulating and interpreting solutions to that problem using appropriate analytical and/or computational techniques;
4. apply diagnostic tools to analyses and numerical model output to diagnose, describe, and interpret the fundamental dynamical and thermodynamical processes at work in synoptic-scale, mesoscale, and large-scale weather systems and climate circulations;
5. apply fundamental radiative transfer theory to interpret remotely-sensed observations of atmospheric and oceanic phenomena;
6. design and conduct experiments and/or analyze data to test hypotheses in an area of atmospheric or climate sciences; and
7. demonstrate effective scientific communication skills through development and delivery of oral presentations (including poster presentations) and written reports and case studies.

ADVISING AND CAREERS

GENERAL ADVISING

Any student interested in the atmospheric and oceanic sciences major must complete prerequisite coursework and then declare the major. A Major Declaration Form must be completed by the student and authorized by the departmental undergraduate advisor. Students should make an appointment to meet with Professor Michael Morgan to complete the major declaration process. Professor Morgan can be reached at 608-265-8159 or mcmorgan@wisc.edu (mcmorgan@wisc.edu). Students should bring a current DARS report to their individual student appointment.

HONORS IN THE MAJOR IN ATMOSPHERIC AND OCEANIC SCIENCES

The honors degree track is meant to provide additional training for an undergraduate wishing to pursue graduate work in atmospheric and oceanic sciences. The honors student should select an advisor in the department for guidance in their work in Honors in the Major.

CAREER ADVISING

The Department of Atmospheric and Oceanic Sciences encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S Career Services office to help you leverage the academic skills learned in the major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Why the liberal arts? (<http://ls.wisc.edu/about/why-liberal-arts>)
- Set up a Career Advising Appointment (<http://careers.ls.wisc.edu/Undergraduate-Advising.htm>)

- L&S Career Services (<http://careers.ls.wisc.edu/students.htm>): We launch our students higher, sooner
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/about/lsci?p=careerinitiative.html>)

PEOPLE

EXECUTIVE COMMITTEE

Balster, Nick, Associate Professor, Department of Soil Science

Martin, Jonathan, Professor, Department of Atmospheric and Oceanic Sciences

Thompson, Anita, Professor, Department of Biological Systems Engineering

PROGRAM COMMITTEE

Grainger, Corbett, Assistant Professor Department of Agricultural and Applied Economics

Harrington, John, Professor, Department of Landscape Architecture

Holloway, Tracey, Professor, Nelson Institute for Environmental Studies

Hotchkiss, Sara, Professor, Department of Botany

Kanarek, Marty, Professor, Department of Population Health Sciences

Schauer, James, Professor, Department of Civil and Environmental Engineering

Stoltenberg, David, Professor, Department of Agronomy

ATMOSPHERIC AND OCEANIC SCIENCES, B.S.

The study of atmospheric and oceanic sciences includes all aspects of the atmosphere and physical oceanography, their mutual interaction, and their interaction with space and the rest of the earth system. Although a primary goal is to understand the atmosphere and ocean for the purpose of predicting the weather, atmospheric and oceanic sciences embraces much more: motions at large, medium, and small scales; past, present, and future climates; air chemistry and quality; clouds and precipitation; and solar and terrestrial radiation. In many areas, new remote-sensing technology including satellites is used to provide circulation patterns at both global and local scales.

Many undergraduates take an elementary atmospheric and oceanic sciences course to meet part of their natural or physical science breadth requirements. Other students, who have had sufficient mathematics and physics preparation, take higher-level atmospheric and oceanic sciences courses to complement their major work in other fields of natural science. An atmospheric and oceanic sciences major receives a thorough introduction to the basic concepts and tools in the core courses, which cover the physics and dynamics of the atmosphere and ocean. An array of elective courses are offered in the senior year, with tracks in the areas of weather systems, earth/environmental science, and

general and applied atmospheric and oceanic sciences. Elective groups are tailored individually. Some students will want preparation for careers in areas such as operational forecasting, environmental consulting, and broadcasting. Others will seek preparation for graduate work leading to a broader range of careers.

HOW TO GET IN

Because the atmospheric and oceanic sciences involve applying the principles and techniques of physical science to the fluid atmosphere and ocean, a strong background in mathematics, physics, and chemistry is necessary. Admission to the atmospheric and oceanic sciences major requires a combined grade point average of 2.250 or better in the following courses:

Code	Title	Credits
Calculus		
Select three semesters equivalent to the following:		
MATH 221	Calculus and Analytic Geometry 1	
MATH 222	Calculus and Analytic Geometry 2	
MATH 234	Calculus—Functions of Several Variables	
Two semesters, calculus-based physics;		
First semester Physics, one from:		
PHYSICS 207	General Physics	
PHYSICS 201	General Physics	
PHYSICS 247	A Modern Introduction to Physics	
Second semester Physics, one from:		
PHYSICS 208	General Physics	
PHYSICS 202	General Physics	
PHYSICS 248	A Modern Introduction to Physics	
Chemistry		
Select any one semester course in subject CHEM		
Computer Sciences		
Select one COMP SCI course in programming such as C+, Fortran, Python, Matlab or another approved language (or working programming knowledge in one of these languages).		
COMP SCI 301	Introduction to Data Programming	3
COMP SCI 310	Problem Solving Using Computers	3

A Declaration of Major form must be completed by the student and authorized by the department undergraduate advisor. The undergraduate advisor will require a transcript or DARS report at this time.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to

the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science

Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit

Minimum	2.000 in all coursework at UW–Madison
GPA	2.000 in intermediate/advanced coursework at UW–Madison

ATM OCN Courses Numbered 400 and higher to reach 12 credits³

Total Credits	25
---------------	----

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
------	-------	---------

Background Requirements

Calculus

Select three semesters equivalent to the following:

MATH 221	Calculus and Analytic Geometry 1
MATH 222	Calculus and Analytic Geometry 2
MATH 234	Calculus–Functions of Several Variables

Two semesters, calculus-based physics;

First semester Physics, one from:	
PHYSICS 207	General Physics
PHYSICS 201	General Physics
PHYSICS 247	A Modern Introduction to Physics

Second semester Physics, one from:

PHYSICS 208	General Physics
PHYSICS 202	General Physics
PHYSICS 248	A Modern Introduction to Physics

Chemistry

Select any one semester course in subject CHEM

Computer Sciences

Select one COMP SCI course in programming such as C+, Fortran, Python, Matlab or another approved language (or working programming knowledge in one of these languages).

COMP SCI 301	Introduction to Data Programming
COMP SCI 310	Problem Solving Using Computers

Code	Title	Credits
------	-------	---------

Core Sequence

Complete ten credits in core sequence: ¹	10
---	----

ATM OCN 310	Dynamics of the Atmosphere and Ocean I
ATM OCN 311	Dynamics of the Atmosphere and Ocean II
ATM OCN 330	Physics of the Atmosphere and Ocean I
ATM OCN 340	Physics of the Atmosphere and Ocean II

Quantitative Analysis	3
------------------------------	---

Select at least one course in MATH (MATH/STAT 309 to 632), COMP SCI (COMP SCI 412, 475, 514, 525), or STAT (STAT/MATH 309 to 690)

ATM OCN Electives, to include:	12
---------------------------------------	----

ATM OCN 405	AOS Senior Capstone Seminar ²
-------------	--

¹ Note that core sequence begins in the fall semester only.

² The 12 credits of ATM OCN electives, number 400 or higher, shall include at least 1 credit in ATM OCN 405, or an independent study research project, or a senior thesis.

³ No more than 2 of the 12 credits may be earned with internships or directed-study credits.

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all ATM OCN and major courses

2.000 GPA on 15 upper-level credits in the major, taken in residence: ATM OCN 300 through ATM OCN 699

15 credits in ATM OCN, taken on campus

HONORS IN THE MAJOR

Students may declare Honors in the Atmospheric and Oceanic Sciences Major in consultation with the Atmospheric and Oceanic Sciences undergraduate advisor.

HONORS IN THE ATMOSPHERIC AND OCEANIC SCIENCES MAJOR REQUIREMENTS

To earn a B.A. or B.S. with Honors in the Major in Atmospheric and Oceanic Sciences students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.400 GPA for all ATM OCN courses, and all courses accepted in the major
- Complete the following additional coursework:
 - ATM OCN 601 Challenging Problems of Atmospheric and Oceanic Sciences or ATM OCN 611 Geophysical Fluid Dynamics II and
 - A two-semester Senior Honors Thesis in ATM OCN 681 Senior Honors Thesis and ATM OCN 682 Senior Honors Thesis, for a total of 6 credits

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
--------------	---

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
-----------	---

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Graduates of the Department of Atmospheric and Oceanic Sciences will be able to:

1. recognize and describe the fundamental principles and processes associated with the dynamics and thermodynamics of geophysical fluid flows, the basic physics of clouds, aerosols, and precipitation;
2. recognize and describe the fundamental principles and processes associated with radiation and atmospheric and oceanic radiative transfer;
3. demonstrate critical thinking skills by identifying a problem, identifying the required information to solve that problem; and formulating and interpreting solutions to that problem using appropriate analytical and/or computational techniques;
4. apply diagnostic tools to analyses and numerical model output to diagnose, describe, and interpret the fundamental dynamical and thermodynamical processes at work in synoptic-scale, mesoscale, and large-scale weather systems and climate circulations;
5. apply fundamental radiative transfer theory to interpret remotely-sensed observations of atmospheric and oceanic phenomena;
6. design and conduct experiments and/or analyze data to test hypotheses in an area of atmospheric or climate sciences; and
7. demonstrate effective scientific communication skills through development and delivery of oral presentations (including poster presentations) and written reports and case studies.

ADVISING AND CAREERS

GENERAL ADVISING

Any student interested in the atmospheric and oceanic sciences major must complete prerequisite coursework and then declare the major. A Major Declaration Form must be completed by the student and authorized by the departmental undergraduate advisor. Students should make an appointment to meet with Professor Michael Morgan to complete the major declaration process. Professor Morgan can be reached at 608-265-8159 or mcmorgan@wisc.edu (mcmorgan@wisc.edu). Students should bring a current DARS report to their individual student appointment.

HONORS IN THE MAJOR IN ATMOSPHERIC AND OCEANIC SCIENCES

The honors degree track is meant to provide additional training for an undergraduate wishing to pursue graduate work in atmospheric and oceanic sciences. The honors student should select an advisor in the department for guidance in their work in Honors in the Major.

CAREER ADVISING

The Department of Atmospheric and Oceanic Sciences encourages majors to begin working on their career exploration and preparation

soon after arriving on campus. We partner with the L&S Career Services office to help you leverage the academic skills learned in the major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

PEOPLE

EXECUTIVE COMMITTEE

Balster, Nick, Associate Professor, Department of Soil Science

Martin, Jonathan, Professor, Department of Atmospheric and Oceanic Sciences

Thompson, Anita, Professor, Department of Biological Systems Engineering

PROGRAM COMMITTEE

Bertram, Timothy, Associate Professor, Department of Chemistry

Grainger, Corbett, Assistant Professor Department of Agricultural and Applied Economics

Harrington, John, Professor, Department of Landscape Architecture

Holloway, Tracey, Professor, Nelson Institute for Environmental Studies

Hotchkiss, Sara, Professor, Department of Botany

Kanarek, Marty, Professor, Department of Population Health Sciences

Schauer, James, Professor, Department of Civil and Environmental Engineering

Stoltenberg, David, Professor, Department of Agronomy

ENVIRONMENTAL SCIENCES, B.A. (L&S)

The environmental sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private

sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in environmental sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences, and the College of Letters & Science.

The environmental sciences major can be earned in either the College of Agricultural and Life Sciences (CALS) or the College of Letters & Science (L&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CALS and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALS, the major is housed administratively in the Department of Soil Science.
- In L&S, the major is housed administratively in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including environmental studies, life sciences communication, agronomy, soil science, landscape architecture, foreign language/culture, and a number of other disciplines.

Up-to-date information, curriculum, and requirements are posted at envirosoci.wisc.edu (<https://envirosoci.wisc.edu>).

HOW TO GET IN

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosoci.wisc.edu/advising>).

CALS undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as

needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

MAJOR ELECTIVES

Select one of two tracks:

Distributed Electives

Students choosing the Distributed Electives path must complete a total of **12 credits** of Environmental Sciences Electives from the categories below, including **at least one course** from **each** category.

Ecology

Code	Title	Credits
AGRONOMY 300	Cropping Systems	3
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
ENTOM 450	Basic and Applied Insect Ecology	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory	1

ENVIR ST/ ZOOLOGY 510	Ecology of Fishes	3
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3
F&W ECOL 550	Forest Ecology	3
F&W ECOL 551	Forest Ecology Lab	1
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	2
F&W ECOL/ ZOOLOGY 660	Climate Change Ecology	3
HORT 334	Greenhouse Cultivation	2
HORT 335	Greenhouse Cultivation Lab	1
LAND ARC/ ENVIR ST 361	Wetlands Ecology	3
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources	2
ZOOLOGY 316	Laboratory for Limnology- Conservation of Aquatic Resources	2-3

Physical Environment

Code	Title	Credits
ATM OCN 310	Dynamics of the Atmosphere and Ocean I	3

GEOSCI/ ENVIR ST 410	Minerals as a Public Problem	3
GEOSCI/ ENVIR ST 411	Energy Resources	3
HISTORY/ENVIR ST/ GEOG 469	The Making of the American Landscape	4
POLI SCI 510	Politics of Government Regulation	3-4
URB R PL/ECON/ ENVIR ST/ POLI SCI 449	Government and Natural Resources	3-4

¹ Consult environmental sciences advisor regarding alternate ways to complete the major electives.

CAPSTONE ¹

Code	Title	Credits
AGRONOMY 500	Senior Capstone Experience	2
BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 651	Conservation Biology	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	3
F&W ECOL 590	Integrated Resource Management	3
F&W ECOL 599	Wildlife Research Capstone	3
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	3-4
LAND ARC 551	Senior Project in Landscape Architecture	4
LAND ARC 666	Restoration Ecology	3
SOIL SCI 499	Soil Management	3

¹ Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the Capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

RESIDENCE & QUALITY OF WORK

2.000 GPA in all major courses

2.000 GPA and 15 credits of upper-level major courses (those numbered 300 and higher), taken in residence ¹

15 credits in the major taken on the UW–Madison campus

¹ Courses with intermediate or advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Honors in the Major is not available in Environmental Sciences.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.

6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

ADVISING AND CAREERS

ADVISING

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosci.wisc.edu/advising>).

CALS undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

CAREERS

A major in environmental sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, forest ranger, oceanographer, agricultural technician, engineering technician, forester, air and water quality manager, environmental analyst, park ranger, air pollution analyst, environmental consultant, environmental educator, geologist, project manager, environmental engineer, geophysicist, biologist, hazardous waste manager, hydrologist, environmental lawyer, chemical technician, soil conservation technician, chemist, management consultant, teacher, meteorologist, urban and regional planner, civil engineer, environmental planner, microbiologist/wastewater plant operator, natural resource specialist, wildlife manager, conservationist, or zoologist. For more info about careers, please visit our website (<http://envirosci.wisc.edu/careers-internships>).

PEOPLE

EXECUTIVE COMMITTEE

Balster, Nick, Associate Professor, Department of Soil Science

Martin, Jonathan, Professor, Department of Atmospheric and Oceanic Sciences

Thompson, Anita, Professor, Department of Biological Systems Engineering

PROGRAM COMMITTEE

Bertram, Timothy, Associate Professor, Department of Chemistry

Grainger, Corbett, Assistant Professor Department of Agricultural and Applied Economics

Harrington, John, Professor, Department of Landscape Architecture

Holloway, Tracey, Professor, Nelson Institute for Environmental Studies

Hotchkiss, Sara, Professor, Department of Botany

Kanarek, Marty, Professor, Department of Population Health Sciences

Schauer, James, Professor, Department of Civil and Environmental Engineering

Stoltenberg, David, Professor, Department of Agronomy

ENVIRONMENTAL SCIENCES, B.S. (L&S)

The environmental sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in environmental sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences, and the College of Letters & Science.

The environmental sciences major can be earned in either the College of Agricultural and Life Sciences (CALs) or the College of Letters & Science (L&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CALs and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALs, the major is housed administratively in the Department of Soil Science.
- In L&S, the major is housed administratively in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including environmental studies, life sciences communication, agronomy, soil science, landscape architecture, foreign language/culture, and a number of other disciplines.

Up-to-date information, curriculum, and requirements are posted at envirosoci.wisc.edu (<https://envirosoci.wisc.edu>).

HOW TO GET IN

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosoci.wisc.edu/advising>).

CALs undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.

L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
-------------	--

Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall
Minimum GPAs	30 credits in residence after the 90th credit
	2.000 in all coursework at UW-Madison
	2.000 in intermediate/advanced coursework at UW-Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
Mathematics & Statistics		8-13
Chemistry		8-12
Biology		8-10
Physics		8-10
Major Foundation		3-5
Major Core		12
Major Electives		12
Capstone		2-6
Total Credits		61-80

MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

Code	Title	Credits
Select one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1 (Recommended)	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 211	Calculus	
Select one of the following:		3
STAT 224	Introductory Statistics for Engineers	

STAT 302	Accelerated Introduction to Statistical Methods	
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-13

CHEMISTRY

Code	Title	Credits
CHEM 103 & CHEM 104 or CHEM 109	General Chemistry I and General Chemistry II Advanced General Chemistry	5-9
Select one of the following:		3
CHEM 341	Elementary Organic Chemistry	
CHEM 343	Introductory Organic Chemistry	
CHEM 561	Physical Chemistry	
Total Credits		8-12

BIOLOGY

Code	Title	Credits
Select one of the following:		10
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
BOTANY/ BIOLOGY 130 & ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Total Credits		10

PHYSICS

Code	Title	Credits
Select one of the following:		8-10
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (Recommended)	
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
Total Credits		8-10

MAJOR FOUNDATION

Code	Title	Credits
Select one of the following:		
ENVIR ST/ILS 126	Principles of Environmental Science	3-5
ENVIR ST/ GEOG 127	Physical Systems of the Environment	
GEOG/ ENVIR ST 120	Introduction to the Earth System	
GEOSCI/ ENVIR ST 106	Environmental Geology	
SOIL SCI/ ENVIR ST/ GEOG 230	Soil: Ecosystem and Resource	
Total Credits		3-5

MAJOR CORE

Select at least 3 credits from each of the following subsets:

Ecology		
Code	Title	Credits
AGRONOMY 300	Cropping Systems	3
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology (Recommended)	4
ENTOM 450	Basic and Applied Insect Ecology	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory	1
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
ENVIR ST/ ZOOLOGY 510	Ecology of Fishes	3
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3
F&W ECOL 550	Forest Ecology	3
F&W ECOL 551	Forest Ecology Lab	1
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	2
HORT 334	Greenhouse Cultivation	2
HORT 335	Greenhouse Cultivation Lab	1
LAND ARC/ ENVIR ST 361	Wetlands Ecology	3
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources	2

MAJOR ELECTIVES

Select one of two tracks:

Distributed Electives

Students choosing the Distributed Electives path must complete a total of **12 credits** of Environmental Sciences Electives from the categories below, including **at least one course** from **each** category.

Ecology

Code	Title	Credits
AGRONOMY 300	Cropping Systems	3
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
ENTOM 450	Basic and Applied Insect Ecology	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory	1
ENVIR ST/ ZOOLOGY 510	Ecology of Fishes	3
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3
F&W ECOL 550	Forest Ecology	3
F&W ECOL 551	Forest Ecology Lab	1
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	2
F&W ECOL/ ZOOLOGY 660	Climate Change Ecology	3
HORT 334	Greenhouse Cultivation	2
HORT 335	Greenhouse Cultivation Lab	1
LAND ARC/ ENVIR ST 361	Wetlands Ecology	3
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources	2
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources	2-3

Physical Environment

Code	Title	Credits
ATM OCN 310	Dynamics of the Atmosphere and Ocean I	3

¹ Consult environmental sciences advisor regarding alternate ways to complete the major electives.

CAPSTONE ¹

Code	Title	Credits
AGRONOMY 500	Senior Capstone Experience	2

BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 651	Conservation Biology	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	3
F&W ECOL 590	Integrated Resource Management	3
F&W ECOL 599	Wildlife Research Capstone	3
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	3-4
LAND ARC 551	Senior Project in Landscape Architecture	4
LAND ARC 666	Restoration Ecology	3
SOIL SCI 499	Soil Management	3

¹ Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the Capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all major courses

2.000 GPA and 15 credits of upper-level major courses (those numbered 300 and higher), taken in residence ¹

15 credits in the major taken on the UW–Madison campus

¹ Courses with intermediate or advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Honors in the Major is not available in environmental sciences.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

ADVISING AND CAREERS

ADVISING

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosci.wisc.edu/advising>).

CALS undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

CAREERS

A major in environmental sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, forest ranger, oceanographer, agricultural technician, engineering technician, forester, air and water quality manager, environmental analyst, park ranger, air pollution analyst, environmental consultant, environmental educator, geologist, project manager, environmental engineer, geophysicist, biologist, hazardous waste manager, hydrologist, environmental lawyer, chemical technician, soil conservation technician, chemist, management consultant, teacher, meteorologist, urban and regional planner, civil engineer, environmental planner, microbiologist/wastewater plant operator, natural resource specialist, wildlife manager, conservationist, or zoologist. For more info about careers, please visit our website (<http://envirosoci.wisc.edu/careers-internships>).

PEOPLE

EXECUTIVE COMMITTEE

Balster, Nick, Associate Professor, Department of Soil Science

Martin, Jonathan, Professor, Department of Atmospheric and Oceanic Sciences

Thompson, Anita, Professor, Department of Biological Systems Engineering

PROGRAM COMMITTEE

Bertram, Timothy, Associate Professor, Department of Chemistry

Grainger, Corbett, Assistant Professor Department of Agricultural and Applied Economics

Harrington, John, Professor, Department of Landscape Architecture

Holloway, Tracey, Professor, Nelson Institute for Environmental Studies

Hotchkiss, Sara, Professor, Department of Botany

Kanarek, Marty, Professor, Department of Population Health Sciences

Schauer, James, Professor, Department of Civil and Environmental Engineering

Stoltenberg, David, Professor, Department of Agronomy

BACTERIOLOGY

For more than a century, the University of Wisconsin–Madison Department of Bacteriology has been known for outstanding research and teaching, and we are committed to a future in which this excellence will continue. Because we engage people with widely differing backgrounds, talents, perspectives, and styles, we achieve excellence through diversity.

In brief, we produce discoveries that contribute to basic knowledge, we develop practical applications that affect lives, and we provide superior training for the next generation of microbiologists. With our training, undergraduate and graduate students begin careers that contribute to the world in many ways—in research, teaching, industry, entrepreneurship, scientific writing and editing, and government service. Our faculty, staff, and students have created a vibrant place to learn, teach, and conduct

research; a place rich in opportunity, ideas, creativity, and resources; and a place where people can flourish and discover their own potential.

DEGREES/MAJORS/CERTIFICATES

- Microbiology, B.A. (L&S) (p. 451)
- Microbiology, B.S. (L&S) (p. 455)

PEOPLE

Professors Charles Kaspar (chair), Jean-Michel Ané, Cameron Currie, Timothy Donohue, Marcin Filutowicz, Katrina Forest, Richard Gourse, Eric Johnson, John Mansfield, Katherine "Trina" McMahon, Michael Thomas, Karen Wassarman, and Jae-Hyuk Yu

Associate Professor Jue "Jade" Wang

Assistant Professors Daniel Amador-Noguez, Briana Burton, Federico Rey, Garret Suen, and Kalin Vetsigian

MICROBIOLOGY, B.A. (L&S)

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology

graduates to enter fields as diverse as business, technical service, sales, and technical writing.

HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment (<https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html?jsessionid=89D5FEA38114F159C48E4959F05B91E1.primary>) with Katy France to discuss the microbiology major, appropriate coursework, how to declare, and so on.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Requirements Detail

Mathematics Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.

Foreign Language

- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language

Note: A unit is one year of high school work or one semester/term of college work.

L&S Breadth

- Humanities, 12 credits: 6 of the 12 credits must be in literature
- Social Sciences, 12 credits
- Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences

Liberal Arts and Science Coursework 108 credits

Depth of Intermediate/Advanced work 60 intermediate or advanced credits

Major Declare and complete at least one (1) major

Total Credits 120 credits

UW-Madison Experience 30 credits in residence, overall
30 credits in residence after the 90th credit

Minimum GPAs 2.000 in all coursework at UW–Madison
2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
Mathematics		
Select one of the following:		
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	10
MATH 211	Calculus	5
MATH 221	Calculus and Analytic Geometry 1	5
Statistics		
Select one of the following:		
STAT 301	Introduction to Statistical Methods	3

STAT 371	Introductory Applied Statistics for the Life Sciences	3
STAT/B M I 541	Introduction to Biostatistics	3

Code	Title	Credits
------	-------	---------

General Chemistry

Select one of the following:

CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5

Code	Title	Credits
------	-------	---------

Organic Chemistry

Select ALL of the following:

CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3

Code	Title	Credits
------	-------	---------

Biology Foundation

Select one of the following:

BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology ¹	10
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384 & BIOCORE 485	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory and Organismal Biology ¹	13
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BIOLOGY/ BOTANY 130	Animal Biology and Animal Biology Laboratory and General Botany	10

¹ BIOLOGY/BOTANY/ZOOLOGY 151/BIOLOGY/BOTANY/ZOOLOGY 152 or BIOCORE 381/BIOCORE 382/BIOCORE 383/BIOCORE 384/BIOCORE 485 are recommended.

Code	Title	Credits
------	-------	---------

Physics

Select one of the following:

PHYSICS 103 & PHYSICS 104	General Physics and General Physics	8
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	10
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10

Code	Title	Credits
------	-------	---------

Biochemistry

Select one of the following:

BIOCHEM 501	Introduction to Biochemistry	3
-------------	------------------------------	---

BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	6
---------------------------	--	---

Code	Title	Credits
------	-------	---------

Microbiology Courses*Microbiology Core (all required):*

Except where noted, all Microbiology Core courses are offered every fall and spring semester.

MICROBIO 303	Biology of Microorganisms	3
MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO 305	Critical Analyses in Microbiology	1
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	2
MICROBIO 470	Microbial Genetics & Molecular Machines	3
MICROBIO 526	Physiology of Microorganisms	3
MICROBIO 527	Advanced Laboratory Techniques in Microbiology (Note: fall only)	2

Microbiology Capstone (required):

MICROBIO 551	Capstone Research Project in Microbiology (Note: spring only)	2
--------------	---	---

Microbiology Electives:

Select at least 6 credits; at least 3 credits must come from Set A. Note that not all elective courses are offered every semester.

Set A:

MICROBIO/ FOOD SCI 324	Food Microbiology Laboratory	2
MICROBIO/ FOOD SCI 325	Food Microbiology	3
MICROBIO 330	Host-Parasite Interactions	3
MICROBIO 375	Special Topics (topics and pre-requisites vary by semester)	1-4
MICROBIO/ SOIL SCI 425	Environmental Microbiology	3
MICROBIO/ SOIL SCI 523	Soil Microbiology and Biochemistry	3
MICROBIO/ ONCOLOGY 545	Topics in Biotechnology (topics vary by semester)	1
MICROBIO/ GENETICS 607	Advanced Microbial Genetics	3
MICROBIO/ BIOCHEM/ GENETICS 612	Prokaryotic Molecular Biology	3
MICROBIO 632	Industrial Microbiology/ Biotechnology	2
MICROBIO/ ONCOLOGY/ PL PATH 640	General Virology-Multiplication of Viruses	3
MICROBIO/BOTANY/ GENETICS/M M & I/ PL PATH 655	Biology and Genetics of Filamentous Fungi	3

Set B:

BIOCHEM/ M M & I 575	Biology of Viruses	2
-------------------------	--------------------	---

BIOCHEM 601	Protein and Enzyme Structure and Function	2
BOTANY 330	Algae	3
BOTANY/ PL PATH 332	Fungi	4
BOTANY/ENTOM/ PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3
CHEM 565	Biophysical Chemistry	4
COMP SCI/B M I 576	Introduction to Bioinformatics	3
F&W ECOL/ SURG SCI 548	Diseases of Wildlife	3
M M & I 301	Pathogenic Bacteriology	2
M M & I 341	Immunology	3
M M & I/ENTOM/ PATH-BIO/ ZOOLOGY 350	Parasitology	3
M M & I 410	Medical Mycology	2
M M & I 554	Emerging Infectious Diseases and Bioterrorism	2
M M & I/ BIOCHEM 575	Biology of Viruses	2
M M & I/ POP HLTH 603	Clinical and Public Health Microbiology	5
MICROBIO/M M & I/ PATH-BIO 528	Immunology	3

L&S RESIDENCE AND QUALITY OF WORK

2.000 GPA in all MICROBIO courses and courses counting toward the major

2.000 GPA on 15 upper-level major credits, in residence¹

15 credits of MICROBIO or courses counting toward the major, taken on campus

¹ MICROBIO 300 through 699 count as upper level in the major, excluding MICROBIO 303 and MICROBIO 304. Intermediate- and advanced-level courses outside of MICROBIO that count for the major are also considered upper level.

HONORS IN THE MAJOR

Students may declare Honors in the Microbiology Major in consultation with the Microbiology undergraduate advisor.

HONORS IN THE MICROBIOLOGY MAJOR REQUIREMENTS

To earn the B.A. or B.S. with Honors in the Major in Microbiology students must satisfy both the requirements for the major (above) and the following requirements:

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all MICROBIO courses, and all courses accepted in the major
- Complete 15 credits, taken for Honors, with individual grades of B or better. 6 credits must come from a two-semester Senior Honors Thesis in MICROBIO 681 Senior Honors Thesis and MICROBIO 682 Senior Honors Thesis. Select remaining courses from the following list:

Code	Title	Credits
MICROBIO 303	Biology of Microorganisms	3
MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO 330	Host-Parasite Interactions	3
MICROBIO/ SOIL SCI 425	Environmental Microbiology	3
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	2
MICROBIO 470	Microbial Genetics & Molecular Machines	3
MICROBIO 526	Physiology of Microorganisms	3
MICROBIO/M M & I/ PATH-BIO 528	Immunology	3
MICROBIO/ GENETICS 607	Advanced Microbial Genetics	3
MICROBIO/ BIOCHEM/ GENETICS 612	Prokaryotic Molecular Biology	3
MICROBIO/ PL PATH 622	Plant-Bacterial Interactions	2-3
MICROBIO 632	Industrial Microbiology/ Biotechnology	2
MICROBIO/ ONCOLOGY/ PL PATH 640	General Virology-Multiplication of Viruses	3
MICROBIO/ FOOD SCI 650	Advanced Microbiology of Foodborne Pathogens	3
MICROBIO/ BMOLCHEM 668	Microbiology at Atomic Resolution	3

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Students will develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology.
2. Students will apply the scientific method to questions. They will formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Students will demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving.
4. Students will be able to access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Students will learn about and demonstrate personal and professional ethics.

ADVISING AND CAREERS

Current UW–Madison students can schedule initial advising (<https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html>) in the microbiology major with Katy France.

Prospective/future UW–Madison students should email (katy.france@wisc.edu) Katy France to set up an appointment, which can be conducted in person or via phone call.

Read about and explore possible microbiology careers at the American Society for Microbiology (<https://www.asm.org/index.php/learn-about-careers>) website.

Learn more about health-related careers through the ExploreHealthCareers.org (<https://explorehealthcareers.org>) website.

PEOPLE

Professors Charles Kaspar (chair), Jean-Michel Ané, Cameron Currie, Timothy Donohue, Marcin Filutowicz, Katrina Forest, Richard Gourse, Eric Johnson, John Mansfield, Katherine "Trina" McMahon, Michael Thomas, Karen Wassarman, and Jae-Hyuk Yu

Associate Professor Jue "Jade" Wang

Assistant Professors Daniel Amador-Noguez, Briana Burton, Federico Rey, Garret Suen, and Kalin Vetsigian

MICROBIOLOGY, B.S. (L&S)

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment (<https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html?jsessionid=89D5FEA38114F159C48E4959F05B91E1.primary>) with Katy France to discuss the microbiology major, appropriate coursework, how to declare, and so on.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (<https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf>)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Requirements Detail

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	<ul style="list-style-type: none"> Humanities, 12 credits: 6 of the 12 credits must be in literature Social Sciences, 12 credits Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 90th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements and do not need to complete the L&S breadth and degree requirements above.*

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
Mathematics		
Select one of the following:		
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	10
MATH 211	Calculus	5
MATH 221	Calculus and Analytic Geometry 1	5
Statistics		
Select one of the following:		
STAT 301	Introduction to Statistical Methods	3
