General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to being admitted to the professional program.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure,

students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

MAJOR REQUIREMENTS

Complete a minimum of 36 credits. Students must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.

Code	Title	Credits
Complete 16 credits of Elementary and Intermediate Italian, or demonstrate proficiency at the equivalent levels:		
ITALIAN 101	First Semester Italian	4
ITALIAN 102	Second Semester Italian	4
ITALIAN 203	Third Semester Italian	4
ITALIAN 204	Fourth Semester Italian	4
Select 20 hours beyond ITALIAN 204 to include:		
ITALIAN 311 & ITALIAN 312	Advanced Italian Language and Writing Workshop	6
ITALIAN 321 & ITALIAN 322	Introduction to Italian Literature and Introduction to Italian Literature	6
	Upper level Culture/Civilization course chosen in consultation with advisor	3
	Select two more courses in literature or culture/civilization (400 or 500 level)	6-8
Additional coursework, if necessary, to reach the minimum of 36 credits		

Students who expect to become teachers of Italian should elect courses in related fields, such as art history, history, other languages and literatures (especially English), music appreciation, and philosophy. Prospective teachers should take every opportunity to increase oral mastery of the language. The Italian Club at the university offers lectures and films about Italy, and opportunities to converse in Italian. Occasionally, modern and classical plays are presented for the public.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students admitted to the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student

teaching semester. Students who do not take and pass the exam will not be permitted to student teach. The WPT meets the Department of Public Instruction's content exam requirement, a requirement usually met by taking the appropriate Praxis II test.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education faculty program coordinator with questions about these requirements.

IMMERSION EXPERIENCE ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience as a prerequisite to being admitted to the professional program. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to being admitted to the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of admission to this program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the International Academic Programs (IAP) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the approval form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms>), meet with the faculty coordinator, and obtain authorization. Bring two copies of the form to

your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that most major and liberal studies coursework will be completed by the start of the professional sequence. The structure of the sequence allows very little time to pursue remaining coursework in these areas. Many students elect to finish their remaining requirements during the summer, or after the sequence has been completed. In addition, ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. The professional sequence is particularly taxing for students completing certification in two subject areas. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3

Other Courses

CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

¹ The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

² Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

³ Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

⁴ Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within

the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1374)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

ADVISING AND CAREERS

ITALIAN EDUCATION ADVISING

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Italian. Students may want to meet with an undergraduate advisor (https://frit.wisc.edu/undergraduate/french/academic_advising) in the French and Italian department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are

encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/

or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.

- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu>) and French and Italian (<http://frit.wisc.edu>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been

placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading

Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates (i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.*

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management.

Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. “Extenuating circumstances” have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student’s program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student’s progress in the program. Students who withdraw or receive an unsatisfactory grade (including a “D”) from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student’s withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student’s future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education’s PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education’s PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.
- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These

artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.
- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

ITALIAN, SED MINOR

HOW TO GET IN

This minor is available only to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Italian must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the

immersion experience required for certification must be completed in both languages.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1369) in this subject for an explanation of these requirements and the World Language Education professional sequence.

MINOR REQUIREMENTS

The Italian minor requires a minimum of 26 credits and a minimum cumulative grade point average of 2.75, based on all Italian minor coursework taken on the UW–Madison campus.

Code	Title	Credits
ITALIAN 101 & ITALIAN 102	First Semester Italian and Second Semester Italian ¹	8
18 credits above ITALIAN 102, to include at least 2 credits in composition and conversation		

¹ Or demonstrated proficiency at the equivalent levels.

ADVISING AND CAREERS

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Italian. Students may want to meet with an undergraduate advisor (https://frit.wisc.edu/undergraduate/french/academic_advising) in the French and Italian department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

JAPANESE, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CURRENTLY CHINESE, FRENCH, GERMAN, JAPANESE, LATIN, AND SPANISH MAJORS)

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly

committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from underrepresented groups to apply for admissions to the program. The director of the World Language Education program is Prof. François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the World Language Education program once a year, effective in the fall. Selection is made the previous spring.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply

for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1381)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional Placement Testing Program. Placement examinations for Chinese,

Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement>).

Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have submitted basic skills test scores, met minimum grade point averages, and earned minimum credits in their major. Admitted students will begin the sequence the following fall semester.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn 54 or more transferable semester credits (junior standing) by the end of the spring semester of the application year.
- complete all but six credits of the relevant World Language major.
- earn a minimum 2.75 grade point average on all major coursework completed.
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).
- have completed, or be in the process of completing, an approved Immersion Experience required for the World Language Education degree program.
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1239).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- Academic Qualifications: The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.

- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files, including immersion experiences and oral proficiency, are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to being admitted to the professional program.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education

program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent levels. Prerequisite courses do not count toward the credits required of the major.

Code	Title	Credits
E ASIAN 103	First Semester Japanese	6
E ASIAN 104	Second Semester Japanese	6

MAJOR REQUIREMENTS

Complete a minimum of 38 credits. Students must complete at least 15 credits of upper-level major coursework (numbered 220 and above) in residence on the UW–Madison campus.

Code	Title	Credits
E ASIAN 203	Third Semester Japanese	6
E ASIAN 204	Fourth Semester Japanese	6
E ASIAN 253	Introduction to Japanese Culture and Civilization	3
E ASIAN 303	Fifth Semester Japanese	4
E ASIAN 304	Sixth Semester Japanese	4

E ASIAN 335	Intermediate Japanese Conversation	3
E ASIAN 353	Survey of Japanese Literature	3
E ASIAN 354	Survey of Japanese Literature	3
E ASIAN 434	Introduction to Japanese Linguistics	3
HISTORY/ E A STDS 104	Introduction to East Asian History: Japan	3-4

If needed, select additional coursework to reach the minimum of 38 credits

Recommended courses:

E ASIAN 404	Eighth Semester Japanese	3
E ASIAN 323	First Year Classical Japanese	3

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students admitted to the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. The WPT meets the Department of Public Instruction's content exam requirement, a requirement usually met by taking the appropriate Praxis II test.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education faculty program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience as a prerequisite to being admitted to the professional program. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to being admitted to the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of admission to this program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the International Academic Programs (IAP) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the approval form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms>), meet with the faculty coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in

all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that most major and liberal studies coursework will be completed by the start of the professional sequence. The structure of the sequence allows very little time to pursue remaining coursework in these areas. Many students elect to finish their remaining requirements during the summer, or after the sequence has been completed. In addition, ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. The professional sequence is particularly taxing for students completing certification in two subject areas. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	
<i>Other Courses</i>		

CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1387)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

- ¹ The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.
- ² Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.
- ³ Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)
- ⁴ Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff

LEARNING OUTCOMES

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

ADVISING AND CAREERS

JAPANESE EDUCATION ADVISING

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Japanese. Students should also contact Professor Naomi Fujita Geyer, nfgeyer@wisc.edu, 1260 Van Hise Hall, 262-9221 or 262-2291, as soon as possible to discuss course sequencing, admission to the program, and other aspects of certification to teach Japanese.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and

at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu>) and Asian Languages and Cultures (<http://alc.wisc.edu>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Code	Title	Credits

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates*

(i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific

policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service

area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. "Extenuating circumstances" have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student's program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student's withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.

- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.
- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.
- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

LATIN, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CURRENTLY CHINESE, FRENCH, GERMAN, JAPANESE, LATIN, AND SPANISH MAJORS)

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program. The director of the World Language Education program is Prof. François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic

portfolios and implement research-based practices in their teaching;

- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the World Language Education program once a year, effective in the fall. Selection is made the previous spring.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1393)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly

advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System's Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have submitted basic skills test scores, met minimum grade point averages, and earned minimum credits in their major. Admitted students will begin the sequence the following fall semester.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program

resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn 54 or more transferable semester credits (junior standing) by the end of the spring semester of the application year.
- complete all but six credits of the relevant World Language major.
- earn a minimum 2.75 grade point average on all major coursework completed.
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).
- have completed, or be in the process of completing, an approved Immersion Experience required for the World Language Education degree program.
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1239).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files, including immersion experiences and oral proficiency, are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field

placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.

- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to being admitted to the professional program.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits. At least 15 credits of upper-level major coursework (numbered 301, 302, 500 and above) must be completed in residence at UW–Madison to meet the major residency requirement.

REQUIRED COURSES

Complete the following, 22 credits.

Code	Title	Credits
LATIN 103	Elementary Latin	4
LATIN 104	Elementary Latin	4
LATIN 203	Intermediate Latin	4
LATIN 204	Introduction to Latin Literature	4
LATIN 301	Latin Literature of the Roman Republic	3
LATIN 302	Latin Literature of the Roman Empire	3

READING COURSES

Select two Latin reading courses numbered 500 or above. Most courses require completion of Latin 302 or consent of instructor. Suggested courses include:

Code	Title	Credits
LATIN 505	Elementary Prose Composition	3
LATIN 515	Vergil	3
LATIN 519	Latin Poetry	3
LATIN 520	Roman Drama	3
LATIN 521	Roman Elegy	3
LATIN 522	Roman Lyric Poetry	3
LATIN 523	Roman Satire	3
LATIN 524	Roman Novel	3
LATIN 539	Latin Historical Writers	3
LATIN 549	Latin Philosophical Writers	3
LATIN 559	Latin Oratory	3
LATIN/ MEDIEVAL 563	Mediaeval Latin	3

THE CLASSICAL WORLD

Complete the following Classics courses:

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

Code	Title	Credits
CLASSICS 322	The Romans	3
CLASSICS 370	Classical Mythology	3

ELECTIVES

Complete additional upper-level Latin coursework (<http://guide.wisc.edu/courses/latin>) to reach the minimum of 40 credits.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students admitted to the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. The WPT meets the Department of Public Instruction's content exam requirement, a requirement usually met by taking the appropriate Praxis II test.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education faculty program coordinator with questions about these requirements.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed

sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that most major and liberal studies coursework will be completed by the start of the professional sequence. The structure of the sequence allows very little time to pursue remaining coursework in these areas. Many students elect to finish their remaining requirements during the summer, or after the sequence has been completed. In addition, ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. The professional sequence is particularly taxing for students completing certification in two subject areas. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	

Other Courses

CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	

Semester 4*Required Courses*

CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

¹ The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

² Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

³ Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

⁴ Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student

teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1399)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff

LEARNING OUTCOMES

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

ADVISING AND CAREERS

LATIN EDUCATION ADVISING

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Latin. Students may want to consult the undergraduate advisor (<https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjffEtg.html>) in the Department of Classical and Ancient Near Eastern Studies regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and

at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu>) and Classical and Ancient Near Eastern Studies (<http://canes.wisc.edu>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Code	Title	Credits

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates*

(i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific

policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service

area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. "Extenuating circumstances" have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student's program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student's withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.

- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.
- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.
- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

LATIN, SED MINOR

The Latin minor is currently under review. Please contact Education Academic Services, 139 Education Building, 608-262-1651, with any questions regarding the status of this program. A Latin major (p. 1392) is offered through the School of Education; interested students may want to investigate this option.

MATHEMATICS SPECIALIZED, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students may wish to consult with an advisor in Education Academic Services, 139 Education Building, 608-262-1651, to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 22 credits to include the requirements below. A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW–Madison campus.

Code	Title	Credits
Required Courses		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
STAT 224	Introductory Statistics for Engineers	3
or STAT 301	Introduction to Statistical Methods	
Additional credits chosen from the following:		
MATH 135	Algebraic Reasoning for Teaching Math	3
MATH 234	Calculus–Functions of Several Variables	4
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	3
MATH 340	Elementary Matrix and Linear Algebra	3
MATH 461	College Geometry I	3
MATH/HIST SCI 473	History of Mathematics	3

MATHEMATICS AND SCIENCE DUAL, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students may wish to consult with an advisor in Education Academic Services, 139 Education Building, 608-262-1651, to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

This minor is intended for Elementary Education majors wishing to enhance their content preparation in mathematics and science and is particularly suitable for Elementary Education majors who intend to teach mathematics and science in the middle school.

A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW–Madison campus.

MATHEMATICS COMPONENT

The mathematics sequence emphasizes problem solving, mathematical reasoning and justification, communicating, and building on students' mathematical ideas in areas such as algebraic thinking, calculus, and probability and statistics. The capstone course, MATH 138, is for students to build connections across core ideas in upper-level elementary and middle school mathematics and to understand how these evolve from and into elementary and higher level mathematics. This sequence is also intended to prepare students to take the Praxis examination for

middle school mathematics, thereby permitting certification and licensure in most other states that require more in-depth content preparation.

Complete the following courses. Students completing this minor will take MATH 135 instead of MATH 132 in the Elementary Education sequence.

Code	Title	Credits
MATH 135	Algebraic Reasoning for Teaching Math ¹	3
MATH 136	Pre-calculus and Calculus for Middle School Teachers ²	6
MATH 138	Mathematics for Teaching: Conjecture, Generalization, and Proof ³	3

¹ Offered each spring semester. For more detailed information about MATH 135, see this website (<http://www.math.wisc.edu/%7EElmppp/ed.html>).

² This is a 6-credit course based on the large lecture of MATH 171 Calculus with Algebra and Trigonometry I with a special discussion section for students completing this minor. Offered each fall semester. The following students will be exempt from this course requirement: students having taken MATH 213, MATH 217, MATH 221, MATH 222, MATH 234, MATH 275, MATH 276, or MATH 375 (or an exact transfer equivalent of any of these) with a grade of B or better; students having passed the AP Calculus AB test with a score of 5; and students having passed the AP Calculus BC test with a score of 4 or better.

³ This 3-credit capstone course is similar to MATH 132.

SCIENCE COMPONENT

The aim of the **science component** of this minor is for students to understand science as an intellectual activity. The goals of science and the diverse means by which scientific knowledge is generated and validated should be at the core of the science portion of this minor. Upon its completion, students should have had opportunities to understand some of the most powerful organizing ideas in the various scientific disciplines as well as how those ideas have been and are generated. Such an understanding should provide students with the fundamental tools and outlook necessary to teach the variety of science content typically taught in middle schools.

The committee that developed this science component has indicated that the primary purpose for the minor should be consistent with the goals of a liberal or general education, thus viewing the minor as an extension of the current liberal studies requirement. In addition to the 9 credits of science required for the liberal studies requirement, students completing this minor must also take 9 credits in science for the math–science dual minor. With these **18 credits** it is possible to provide a minimal level of breadth and depth of science coursework. This minor is also expected to provide Elementary Education program students with a background in the sciences that are most commonly taught at the middle school level.

Complete the following requirements:

- At least 18 credits from the courses listed below. Additional courses can be considered; please consult with an advisor in Education Academic Services.
- One course in each of three of the four science areas of biology, chemistry, physics, and earth and space science from the approved

list, below. Integrated Liberal Studies 153 does not count in any of the areas, but can count toward the 18 credit total.

- At least 6 credits of coursework from the courses listed below that are **not** marked with an asterisk (*). Courses with the asterisk are considered to be introductory level courses.

The following courses are approved for inclusion in the science component of the math/science minor:

Code	Title	Credits
ILS 153	Ways of Knowing in the Sciences [*]	4

Biology course options

Code	Title	Credits

GEOSCI/GEOG 524	Advanced Landform Geography	3
GEOSCI/GEOG 527	The Quaternary Period	3

All courses numbered 556 and above

MATHEMATICS, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. The Department of Mathematics is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in the department to discuss course selection and other issues related to this field of study. The current list of advisors and the schedule of the office hours can be found at the departmental advising page (<https://www.math.wisc.edu/undergraduate/advising>).

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 28 credits. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

Elementary Education students may also wish to consider the Specialized Mathematics minor, which exchanges some of the higher-level mathematics courses for a broader range of coursework in mathematics, computer sciences, and statistics. A mathematics/science dual minor option is also available.

The first 14 credits of the mathematics minor involves calculus-level coursework. Students may need to complete prerequisite coursework—e.g., MATH 112 Algebra, MATH 113 Trigonometry—to reach this proficiency level. These preparatory courses may be used to meet the liberal studies requirement, but may not be applied toward the credits required for the mathematics minor.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus—Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
STAT 301	Introduction to Statistical Methods	3
MATH 441	Introduction to Modern Algebra	3
MATH 461	College Geometry I	3
MATH 371	Basic Concepts of Math, or approved substitute	3

Because of prerequisites and scheduling issues, the sequencing of this coursework requires careful planning to be completed in a timely fashion. Students are encouraged to consult with an advisor regarding the appropriate sequencing of these courses.

PHYSICS, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. The Department of Physics is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in the physics department to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 22 credits. A minimum cumulative grade point average of 2.75 is required, based on all Physics minor coursework taken on the UW–Madison campus.

INTRODUCTORY REQUIREMENTS

Code	Title	Credits
Select one option of the following:		13-14
Option 1:		
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
Select one of the following:		
PHYSICS 205	Modern Physics for Engineers	
PHYSICS 241	Introduction to Modern Physics	
PHYSICS 244	Modern Physics (Primarily for ECE Majors)	
Option 2:		
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	
Select one of the following:		
PHYSICS 205	Modern Physics for Engineers	
PHYSICS 241	Introduction to Modern Physics	
PHYSICS 244	Modern Physics (Primarily for ECE Majors)	
Option 3:		
PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 248	A Modern Introduction to Physics	
PHYSICS 249	A Modern Introduction to Physics	

ADDITIONAL COURSE REQUIREMENTS

Code	Title	Credits
PHYSICS 307	Intermediate Laboratory-Mechanics and Modern Physics	2

PHYSICS 308	Intermediate Laboratory- Electromagnetic Fields and Optics	2
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4

Select physics electives, if necessary, to total 22 credits

POLITICAL SCIENCE, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. The Department of Political Science is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor (p. 1080) in the department to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all political science minor coursework taken on the UW–Madison campus.

REQUIRED COURSES

Code	Title	Credits
Complete any 100-level Political Science course (one course)		3-4
POLI SCI 205 or POLI SCI 405	Introduction to State Government State Government and Public Policy	3-4
Statistics		
Complete one of the following:		3-4
POLI SCI 374	Introduction to Statistical Inference for Political Research	
SOC/ C&E SOC 360	Statistics for Sociologists I	
SOC/ C&E SOC 361	Statistics for Sociologists II	
STAT 224	Introductory Statistics for Engineers	
STAT 301	Introduction to Statistical Methods	
GEN BUS 303	Business Statistics	
ECON 310	Statistics: Measurement in Economics	
GEOG 360	Quantitative Methods in Geographical Analysis	
PSYCH 210	Basic Statistics for Psychology	

DISTRIBUTION REQUIREMENTS

Complete at least one course from each of the four political science groups. Courses taken to meet the requirements above may be applied toward the course distribution.

POLITICAL THEORY

Political Theory course options

Code	Title	Credits

ELECTIVES

Complete additional coursework, if necessary, to reach the minimum of 24 credits.

PORTUGUESE, BSE

Student access to the Portuguese Education certification program is dependent upon available supervisory and cooperating teacher resources. For this reason, prospective Portuguese Education students must consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651. Students who do not have previous teaching experience or have not completed a teacher preparation program should expect to participate in the four-semester World Language Education program. Teacher candidates with extensive coursework or teaching experience may complete a modified program after consultation with faculty. Admission to the four-semester professional program entails meeting minimum admission requirements and adherence to strict application deadlines. See the WLE program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building, to determine the feasibility of completing certification in this language.

WORLD LANGUAGE EDUCATION PROGRAM (CURRENTLY CHINESE, FRENCH, GERMAN, JAPANESE, LATIN, AND SPANISH MAJORS)

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from underrepresented groups to apply for admissions to the program. The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the World Language Education program once a year, effective in the fall. Selection is made the previous spring.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW-MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1412)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective

applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW-Madison placement guide (<http://languages.wisc.edu/advising/placement>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have submitted basic skills test scores, met minimum grade point averages, and earned minimum credits in their major. Admitted students will begin the sequence the following fall semester.

Resources limit the number of students who can be served by the UW-Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn 54 or more transferable semester credits (junior standing) by the end of the spring semester of the application year.
- complete all but six credits of the relevant World Language major.
- earn a minimum 2.75 grade point average on all major coursework completed.
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test

(formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).

- have completed, or be in the process of completing, an approved Immersion Experience required for the World Language Education degree program.
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1239).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete

the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files, including immersion experiences and oral proficiency, are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to being admitted to the professional program.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits. At least 15 credits of upper-level major coursework (numbered 300 and above) must be taken in residence on the UW–Madison campus.

INTRODUCTORY-LEVEL COURSE REQUIREMENTS

Complete the following or demonstrate proficiency at the equivalent levels.

Code	Title	Credits
PORTUG 101	First Semester Portuguese	4
PORTUG 102	Second Semester Portuguese	4
PORTUG 201	Third Semester Portuguese	4
PORTUG 202	Fourth Semester Portuguese	4
PORTUG 221	Introduction to Luso-Brazilian Literatures	4
PORTUG 225	Third Year Conversation and Composition	3
PORTUG 226	Third Year Conversation and Composition	3

UPPER-LEVEL COURSE REQUIREMENTS

Select 16 credits from the following list; 4 must be in Composition and Conversation. Placement in advanced composition and conversation will be based upon proficiency. Additional courses may be substituted with the program advisor's permission.

Code	Title	Credits
PORTUG 311	Fourth Year Composition and Conversation	3
PORTUG 312	Fourth Year Composition and Conversation	3
PORTUG 361	Portuguese Civilization	3
PORTUG 362	Brazilian Civilization	3
PORTUG 411	Survey of Portuguese Literature before 1825	3
PORTUG 412	Survey of Brazilian Literature before 1890	3
PORTUG 467	Survey of Portuguese Literature since 1825	3
PORTUG 468	Survey of Brazilian Literature since 1890	3

Students expecting to become teachers of Portuguese should also elect courses in related fields, such as history, political science, or sociology. Consult the Latin American, Caribbean, and Iberian Studies Program (<http://www.lacis.wisc.edu>) for a complete listing of related courses. Students should also seek opportunities to work with children and young adults in positions of volunteer/leadership, such as camp counselor, day camp leader, teacher aid, tutor, etc. Prospective teachers should also take every opportunity to increase their oral mastery of the target language, Portuguese.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students admitted to the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. The WPT meets the Department of Public Instruction's content exam requirement, a requirement usually met by taking the appropriate Praxis II test.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education faculty program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience as a prerequisite to being admitted to the professional program. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to being admitted to the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of admission to this program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the International Academic Programs (IAP) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the approval form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms>), meet with the faculty coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that most major and liberal studies coursework will be completed by the start of the professional sequence. The structure of the sequence allows very little time to pursue remaining coursework in these areas. Many students elect to finish their remaining requirements during the summer, or after the sequence has been completed. In addition, ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with

the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. The professional sequence is particularly taxing for students completing certification in two subject areas. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

¹ The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW-Madison calendar. Placements are made within a 50-mile field

experiences service area and may not necessarily be in the city of Madison.

- ² Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.
- ³ Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)
- ⁴ Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (https://pubs.wisc.edu/ug/education_policy.htm#last60).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of

study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1418)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language

on the ACTFL OPI scale as measured by two independent external evaluators.

2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

ADVISING AND CAREERS

PORTUGUESE EDUCATION ADVISING

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Portuguese. Students may want to consult the undergraduate advisor (<http://spanport.wisc.edu/undergraduate/advising>) in the Spanish and Portuguese department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu>) and Spanish and Portuguese (<http://spanport.wisc.edu/home>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates (i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.*

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not

assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. “Extenuating circumstances” have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student's program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a “D”) from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without

written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student's withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.

- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.

- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.

- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

PORTUGUESE, SED MINOR

HOW TO GET IN

This minor is only available to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Portuguese must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1413) in this subject for an explanation of these requirements and the World Language Education professional sequence.

MINOR REQUIREMENTS

Complete a minimum of 30 credits. The Portuguese minor also requires a minimum cumulative grade point average of 2.75, based on all Portuguese minor coursework taken on the UW–Madison campus. Students may exempt from a course requirement based on demonstrated proficiency at that level.

Code	Title	Credits
PORTUG 101	First Semester Portuguese	4
PORTUG 102	Second Semester Portuguese	4
PORTUG 201	Third Semester Portuguese	4
PORTUG 202	Fourth Semester Portuguese	4
PORTUG 221	Introduction to Luso-Brazilian Literatures	4
PORTUG 225	Third Year Conversation and Composition	3
PORTUG 226	Third Year Conversation and Composition	3

ADVISING AND CAREERS

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Portuguese. Students may want to consult the undergraduate advisor (<http://spanport.wisc.edu/>

undergraduate/advising) in the Spanish and Portuguese department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

PSYCHOLOGY, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. The Department of Psychology is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor (p. 1090) in the department to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 26 credits. A minimum cumulative grade point average of 2.75 is required, based on all psychology minor coursework taken at UW–Madison. Students wishing to complete an additional major in psychology through the College of Letters & Science must also complete supporting coursework in introductory biology (e.g., BIOLOGY/ZOOLOGY 101 and BIOLOGY/ZOOLOGY 102).

Code	Title	Credits
PSYCH 202	Introduction to Psychology	3-4
PSYCH 210	Basic Statistics for Psychology	3
PSYCH 225	Research Methods	4
PSYCH 405	Abnormal Psychology	3-4
PSYCH/SOC 456	Introductory Social Psychology	3-4
PSYCH 403	Psychology of Personality	3
Select one of the following:		3
PSYCH 408	Psychology of Human Emotions	
PSYCH 414	Cognitive Psychology	
PSYCH 430	History of Psychology	
Select one of the following:		3-4
PSYCH 449	Animal Behavior	
PSYCH 450	Primates and Us: Insights into Human Biology and Behavior	
PSYCH 454 & PSYCH 455	Behavioral Neuroscience and Laboratory in Behavioral Neuroscience	

Select additional coursework, if necessary, to reach the minimum of 26 credits

¹ Note: Effective fall 2017, the course number of Abnormal Psychology changed from Psych 509 to Psych 405. The course number of Social Psychology changed from Psych 530 to Psych 456.

SCIENCE SPECIALIZED, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students may wish to consult with an advisor in Education Academic Services, 139 Education Building, 608-262-1651, to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 22 credits selected from one or more of the following areas. Courses must be taken from the departments indicated. A minimum 2.75 grade point average is required, based on all UW–Madison coursework included in this minor.

- **Biology:** Departments of Botany (<http://guide.wisc.edu/courses/botany>), Zoology (<http://guide.wisc.edu/courses/zoology>), and Bacteriology (<http://guide.wisc.edu/courses/microbio>) (Microbiology course listings)
- **Chemistry:** Departments of Chemistry (<http://guide.wisc.edu/courses/chem>) and Biochemistry (<http://guide.wisc.edu/courses/biochem>)
- **Physics:** Department of Physics (<http://guide.wisc.edu/courses/physics>)
- **Earth Science:** Departments of Astronomy (<http://guide.wisc.edu/courses/astron>), Geography (<http://guide.wisc.edu/courses/geog>) (Physical Geography courses designated as Physical Science only), Geoscience (<http://guide.wisc.edu/courses/geosci>), and Atmospheric and Oceanic Sciences (http://guide.wisc.edu/courses/atm_ocrn).

At least 10 of the 22 credits must be numbered 200 and above.

SOCIAL STUDIES, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students may wish to consult with an advisor in Education Academic Services, 139 Education Building, 608-262-1651, to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

The social studies minor is designed for students interested in becoming Middle Childhood through Early Adolescence (Grades 1–8) teachers with a specialty in social studies.

Complete 24 credits to include the requirements listed below. A minimum 2.75 grade point average is required, based on all UW–Madison course work included in the social studies minor. The courses listed here will meet this requirement, but additional courses may be considered. Confer with an advisor in Education Academic Services, 139 Education Building, 1000 Bascom Mall, 608-262-1651, for consideration of additional courses.

Some courses may be listed in multiple categories, but can count in only one.

HISTORY/CIVILIZATIONS UNITED STATES OR EUROPEAN HISTORY

Select one course from the following. Courses have been selected from the departments of Afro-American Studies, American Indian Studies, Asian American Studies, Chican@ and Latin@ Studies, and History.

HISTORY/LCA 265	An Introduction to Central Asia: From the Silk Route to Afghanistan	3

taken before statistics. This will provide a better entry point to the methods and materials of the field.

Code	Title	Credits
Option 1		
SOC/C&E SOC 360 & SOC/C&E SOC 357	Statistics for Sociologists I and Methods of Sociological Inquiry	7-8
Option 2		
SOC/C&E SOC 357	Methods of Sociological Inquiry	3-4
One of the following statistics courses:		3-4
ECON 310	Statistics: Measurement in Economics	
GEN BUS 303	Business Statistics	
GEOG 360	Quantitative Methods in Geographical Analysis	
MATH/STAT 310	Introduction to Probability and Mathematical Statistics II	
POLI SCI 374	Introduction to Statistical Inference for Political Research	
PSYCH 210	Basic Statistics for Psychology	
PSYCH 280	Honors Basic Statistics for Psychology	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

SOCIOLOGY, MINOR

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. The Department of Sociology is housed in the College of Letters & Science. Students may wish to consult with the undergraduate advisor (p. 1144) in the department to discuss course selection and other issues related to this field of study.

HOW TO GET IN

This minor may be completed only by students admitted to the Middle Childhood through Early Adolescence options of Elementary Education. Students admitted to the Content Focus option are asked to identify the minor of their choice when admitted to the program. Students admitted to the other Middle Childhood through Early Adolescence options should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all sociology minor coursework taken on the UW–Madison campus.

FOUNDATIONAL CORE COURSES

INTRODUCTION

Select one of the following:

Code	Title	Credits
SOC/C&E SOC 210	Survey of Sociology	3-4
SOC/C&E SOC 211	The Sociological Enterprise	3
SOC 181	Honors Introductory Seminar-The Sociological Enterprise	3-4

RESEARCH METHODS AND STATISTICS

Select one of the following combinations. Students may take methods and statistics in the same semester. If students take methods and statistics in different semesters, it is recommended that methods be

THEORY

Code	Title	Credits
SOC/C&E SOC 475	Classical Sociological Theory	3

DISTRIBUTION REQUIREMENTS

Select **at least one course from two of the following groups** of departmental offerings. Courses used to meet the requirements above may not be applied to this requirement. Courses that appear in more than one area may fulfill only one area requirement.

ADDITIONAL METHODS/STATISTICS

Additional Methods/Statistics course options

Code	Title	Credits
SOC/C&E SOC 361	Statistics for Sociologists II	3

SOC/C&E SOC 650	Sociology of Agriculture	3

ELECTIVES

Additional coursework, if needed, to reach the minimum of 24 credits.

SPANISH, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CURRENTLY CHINESE, FRENCH, GERMAN, JAPANESE, LATIN, AND SPANISH MAJORS)

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program. The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;

- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the World Language Education program once a year, effective in the fall. Selection is made the previous spring.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1434)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of

Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System's Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have submitted basic skills test scores, met minimum grade point averages, and earned minimum credits in their major. Admitted students will begin the sequence the following fall semester.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn 54 or more transferable semester credits (junior standing) by the end of the spring semester of the application year.
- complete all but six credits of the relevant World Language major.
- earn a minimum 2.75 grade point average on all major coursework completed.
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).
- have completed, or be in the process of completing, an approved Immersion Experience required for the World Language Education degree program.
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1239).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.

- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files, including immersion experiences and oral proficiency, are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to being admitted to the professional program.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods coursework and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education

program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent levels. Prerequisite courses do not count toward the credits required of the major.

Code	Title	Credits
SPANISH 101	First Semester Spanish	4
SPANISH 102	Second Semester Spanish	4
SPANISH 203	Third Semester Spanish	4
SPANISH 204	Fourth Semester Spanish	4
SPANISH 226	Intermediate Language Practice with Emphasis on Writing and Grammar	3
SPANISH 223	Introduction to Hispanic Cultures	3
SPANISH 224	Introduction to Hispanic Literatures	3

MAJOR REQUIREMENTS

Complete 27 credits of Spanish courses numbered 300 and above, to include the requirements below. At least 15 credits of upper-level major coursework (numbered 220 and above) must be completed in residence on the UW–Madison campus to meet the major residency requirement.

Code	Title	Credits
SPANISH 311	Advanced Language Practice	3
SPANISH 320	Spanish Phonetics	3
SPANISH 361	Spanish Civilization	3
or SPANISH 363	Spanish American Civilization	

Select one Spanish language practice course at or above the 300 level¹

Select one Spanish linguistics course at or above the 300 level²

Select 6 credits of Spanish department literature 300 level or above to include one survey course

Select 6 credits of electives in Spanish department coursework, 300 level or above

Select additional credits 300 level or above as necessary to total 27 additional credits

¹ SPANISH/INTL BUS 329 Spanish for Business and SPANISH 359 Spanish Business Area Studies are excluded.

² SPANISH 327 Introduction to Spanish Linguistics and SPANISH 331 Spanish Applied Linguistics are highly recommended.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students admitted to the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. The WPT meets the Department of Public Instruction's content exam requirement, a requirement usually met by taking the appropriate Praxis II test.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience

(second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education faculty program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience as a prerequisite to being admitted to the professional program. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to being admitted to the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of admission to this program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the International Academic Programs (IAP) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the approval form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms>), meet with the faculty coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that most major and liberal studies coursework will be completed by the start of the professional sequence. The structure of the sequence allows very little time to pursue remaining coursework in these areas. Many students elect to finish their remaining requirements during the summer, or after the sequence has been completed. In addition, ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. The professional sequence is particularly taxing for students completing certification in two subject areas. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSES

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		

ED PSYCH 331	Human Development From Childhood Through Adolescence	3
--------------	--	---

Semester 3

Required Courses

CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	

Other Courses

CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	

Semester 4

Required Courses

CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

- ¹ The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.
- ² Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.
- ³ Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)
- ⁴ Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework

- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1440)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

ADVISING AND CAREERS

SPANISH EDUCATION ADVISING

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Spanish. Students may want to consult the undergraduate advisor (<http://spanport.wisc.edu/undergraduate/advising>) in the Spanish and Portuguese department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners

to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu>) and Spanish and Portuguese (<http://spanport.wisc.edu/home>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal

background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates (i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.*

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter

part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching

experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. “Extenuating circumstances” have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student’s program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student’s progress in the program. Students who withdraw or receive an unsatisfactory grade (including a “D”) from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student’s withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student’s future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.

- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.
- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to

as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.
- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after

graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

SPANISH, SED MINOR

HOW TO GET IN

This minor is only available to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Spanish must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the

major requirements (p. 1434) in this subject for an explanation of these requirements and the World Language Education professional sequence.

PREREQUISITE COURSEWORK

Complete the following or demonstrate proficiency at the equivalent levels.

Code	Title	Credits
SPANISH 101	First Semester Spanish	4
SPANISH 102	Second Semester Spanish	4
SPANISH 203	Third Semester Spanish	4
SPANISH 204	Fourth Semester Spanish	4

MINOR REQUIREMENTS

Complete a minimum of 24 credits. The Spanish minor also requires a minimum cumulative grade point average of 2.75, based on all Spanish minor coursework taken on the UW–Madison campus.

Code	Title	Credits
SPANISH 226	Intermediate Language Practice with Emphasis on Writing and Grammar	3
SPANISH 223	Introduction to Hispanic Cultures	3
SPANISH 224	Introduction to Hispanic Literatures	3
One advanced (300 level or above) literature or culture course		
One advanced (300 level or above) language practice or linguistics course		
Elective credits in Spanish, 300 level or above, to total 24 credits.		

ADVISING AND CAREERS

Consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Spanish. Students may want to consult the undergraduate advisor (<http://spanport.wisc.edu/undergraduate/advising>) in the Spanish and Portuguese department regarding course sequencing and other aspects of this field of study.

The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

DANCE

Dance is an art form, an integral part of education, an element of interdisciplinary experimentation and a part of daily life. Dance courses focus on the study and/or practice of various dance techniques (e.g., ballet, contemporary), dance repertory theater, improvisation, composition, movement analysis, anatomy, theory, history, and more. Courses stress personal creativity, individual growth, and strong technical training. An undergraduate major in dance is an excellent means of gaining in-depth knowledge of the art form and its related fields. Dance elective courses are open to all university students.

Two undergraduate options are offered in dance. The Bachelor of Fine Arts (p. 1451) (BFA) undergraduate degree program in dance

is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science–Dance (p. 1445) option was designed for students who wish to prepare for graduate work in theoretical areas of dance or who wish to combine their interest in dance with other fields of study. The BFA requires a minimum of 85 major credits, including public presentations of original work, while the B.S. degree requires a minimum of 57 major credits. These major requirements highlight the differences between the two options: B.S. students can pursue other interests with their remaining credits, while BFA students are able to spend more time in the studio.

Admission to the major in dance is by performance audition only. For more information on the audition schedule and process, contact the Dance department office, 139 Lathrop Hall, 1050 University Avenue, phone: 608-262-1691; www.education.wisc.edu/dance (<http://www.education.wisc.edu/dance>). Students enrolling in a dance major are expected to have had previous dance experience. Junior-level transfers should expect to spend three additional years in the program unless they have had previous experience.

The dance department also offers three certificate programs open to students across campus, the dance certificate program (p. 1456), a certificate in pilates (p. 1458), and one in introductory studies in dance/movement therapy (p. 1457).

DEGREES/MAJORS/CERTIFICATES

- Dance, B.S. (p. 1445)
- Dance, BFA (p. 1451)
- Dance, Certificate (p. 1456)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1457)
- Pilates, Certificate (p. 1458)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

DANCE, B.S.

The dance department offers a wide range of courses for majors and nonmajors to study the art and science of human movement. An undergraduate major in dance is an excellent means of gaining in-depth knowledge of the art form and its related fields. Dance degree graduates become well-prepared dance artists/educators who go on to pursue dance professionally, or have careers in related occupations such as administration, health care, or business. Recent graduates have taught in K–12 and higher education, started their own companies, have operated their own studios, and danced with major dance companies throughout the U.S., including Urban Bush Women, Pat Graney, and Nikolais/Louis.

A dance degree at UW–Madison offers opportunities to:

- Study with a world-class faculty with excellent teacher-student ratios
- Rehearse and perform in state-of-the-art facilities

- Experience an interdisciplinary, rigorous approach to dance studies. Courses draw on the biological, physical and social sciences as well as the humanities.
- Earn a scholarship. Departmental awards (<https://www.dance.wisc.edu/dance/admissions/scholarships-awards>) for summer or honors study are also available.
- Interact with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, and Tim Miller.
- Perform frequently
- Pursue a double-major in a second area of interest

The department offers two undergraduate degrees in dance. The Bachelor of Fine Arts (BFA) undergraduate degree program in dance is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science–Dance degree was designed for students who wish to prepare for graduate work in theoretical areas of dance or who wish to combine their interest in dance with other fields of study.

The BFA requires a minimum of 85 major credits, including public presentations of original work, while the B.S. degree requires a minimum of 57 major credits. The differences in the major requirements highlight the differences between the two options: B.S. students can pursue other interests with their remaining credits, while BFA students are able to spend more time in the studio. An audition to be a dance major is required and offered twice yearly, in November and February. Consult the department's website (<https://www.dance.wisc.edu>) for audition information.

The dance department also offers three certificates of study: a general dance (p. 1456) certificate, a certificate in introductory studies in dance/movement therapy (p. 1457), and a Pilates (p. 1458) certificate.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the dance department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) to Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School

of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor at Education Academic Services. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an School of Education advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

ADMISSION AND APPLICATION

CRITERIA FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next.

Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- Students who have transferred to and are currently enrolled in UW–Madison coursework must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Filing of all required paperwork, including the dance program application and any required transcripts.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative

GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The B.S. degree in dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
ANATOMY/ KINES 329	Human Anatomy-Kinesiology ¹	2
DANCE 560	Current Topics in Dance: Workshop (Anatomy for Dancers)	1-3

¹ Effective fall 2017, Anatomy/Kines 329 will be replaced by Kines 338.

MAJOR REQUIREMENTS

Complete a minimum of 57 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 3–5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures: Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 14 credits from the following; 6 credits must be numbered 211 or higher.

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 411	Contemporary Dance Technique and Theory VII	1-3
DANCE 412	Contemporary Dance Technique and Theory VIII	1-3

Ballet Technique

Select a minimum of 8 credits from the following; 4 credits must be numbered 225 or higher:

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2

DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2
DANCE 425	Ballet Technique IV	1-2

Additional Techniques

Select a minimum of 2 credits. Students may also select from Additional Techniques workshops listed under Dance 1 or Dance 560. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 1	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 1	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE/FOLKLORE/ THEATRE 421	Javanese Performance Repertory	2

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 140	Dance Production	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 162	First Year Workshop	1
DANCE 240	Dance Production Laboratory	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
DANCE 345	Video Design for the Performing and Visual Arts	3
or DANCE/ ART 341	Sound Design for the Performing and Visual Arts	
DANCE 355	Dance Composition II	2
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3
DANCE 462	Senior Seminar	3
DANCE 463	Senior Project	1-2
Select one of the following:		1-3
DANCE 451	Dance Repertory Theater	
DANCE 452	Dance Repertory Theater	

ELECTIVE COURSEWORK

Complete additional coursework, if necessary, to reach the minimum of 124 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements below are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 124 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ADVISING AND CAREERS

DANCE DEPARTMENT ADVISING

Each freshmen cohort is assigned a faculty advisor who works with the group until graduation. In their first year, all dance majors receive targeted advising from Karen McShane-Hellenbrand (<http://dance.wisc.edu/dance/people/instructional-staff/karen-mcshane-hellenbrand>). Faculty advisors assist students in choosing classes, evaluating their degree path, and assessing their artistic and academic progress. Students undergo a yearly review with a faculty panel to assess the student's progress in their degree program. Faculty advisors in the department include: Kate Corby (<http://dance.wisc.edu/dance/people/faculty/kate-corby>), Andrea Harris (<http://dance.wisc.edu/dance/people/faculty/andrea-harris>), Li Chiao-Ping (<http://dance.wisc.edu/dance/people/faculty/li-chiao-ping>), Marlene Skog (<http://dance.wisc.edu/dance/academics/bs-program>), Chris Walker (<https://www.dance.wisc.edu/dance/people/faculty/chris-walker>) and Jin-Wen Yu (<http://dance.wisc.edu/dance/people/faculty/jin-wen-yu>).

Advising in dance is handled through the dance department, 608-262-1691, 125 Lathrop Hall, 1050 University Avenue. Students also meet with Education Academic Services staff regarding other course requirements and concerns, see below.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school

regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials

- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

DANCE, BFA

The dance department offers a wide range of courses for majors and nonmajors to study the art and science of human movement. An undergraduate major in dance is an excellent means of gaining in-depth knowledge of the art form and its related fields. Dance degree graduates become well-prepared dance artists/educators who go on to pursue dance professionally, or have careers in related occupations such as administration, health care, or business. Recent graduates have taught in K–12 and higher education, started their own companies, have operated their own studios, and danced with major dance companies throughout the U.S., including Urban Bush Women, Pat Graney, and Nikolais/Louis.

A dance degree at UW–Madison offers opportunities to:

- Study with a world-class faculty with excellent teacher-student ratios
- Rehearse and perform in state-of-the-art facilities
- Experience an interdisciplinary, rigorous approach to dance studies. Courses draw on the biological, physical and social sciences as well as the humanities.
- Earn a scholarship. Departmental awards (<https://www.dance.wisc.edu/dance/admissions/scholarships-awards>) for summer or honors study are also available.
- Interact with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, and Tim Miller
- Perform frequently
- Pursue a double major in a second area of interest

The department offers two undergraduate degrees in dance. The Bachelor of Fine Arts (BFA) undergraduate degree program in dance is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science–Dance degree was designed for students who wish to prepare for graduate work in theoretical areas of dance or who wish to combine their interest in dance with other fields of study.

The BFA requires a minimum of 85 major credits, including public presentations of original work, while the B.S. degree requires a minimum of 57 major credits. The differences in the major requirements highlight the differences between the two options: B.S. students can pursue other interests with their remaining credits, while BFA students are able to spend more time in the studio. An audition to be a dance major is required and offered twice yearly, in November and February. Consult the department's website (<https://www.dance.wisc.edu>) for audition information,

The dance department also offers three certificates of study: a general dance (p. 1456) certificate, a certificate in introductory studies in dance/movement therapy (p. 1457), and a Pilates (p. 1458) certificate.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance

department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>), to Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor at Education Academic Services. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an School of Education advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

ADMISSION AND APPLICATION CRITERIA FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- On-campus transfer students must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Filing of all required paperwork, including the dance program application and any required transcripts.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The BFA degree in dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.
- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
ANATOMY/ KINES 329	Human Anatomy-Kinesiology ¹	2
DANCE 560	Current Topics in Dance: Workshop (Anatomy for Dancers)	1-3

¹ Effective fall 2017, Anatomy/Kines 329 will be replaced by Kines 338.

MAJOR REQUIREMENTS

Complete a minimum of 85 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 11 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures: Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 18 credits from the following; at least 9 credits must be from DANCE 311, DANCE 312, DANCE 411 or DANCE 412.

Note: 100- and 200-level technique classes must be taken for 3 credits; 300 and 400 level may be taken for 2 credits.

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	
DANCE 112	Contemporary Dance Technique and Theory II	
DANCE 211	Contemporary Dance Technique and Theory III	
DANCE 212	Contemporary Dance Technique and Theory IV	
DANCE 311	Contemporary Dance Technique and Theory V	
DANCE 312	Contemporary Dance Technique and Theory VI	
DANCE 411	Contemporary Dance Technique and Theory VII	
DANCE 412	Contemporary Dance Technique and Theory VIII	

Ballet Technique

Select a minimum of 14 credits from the following; 10 must be numbered 225 or higher.

Code	Title	Credits
DANCE 125	Ballet Technique I	
DANCE 126	Ballet Technique I-B	
DANCE 225	Ballet Technique II	
DANCE 226	Ballet Technique II-B	
DANCE 325	Ballet Technique III	
DANCE 326	Ballet Technique III-B	
DANCE 425	Ballet Technique IV	

Additional Techniques

Select a minimum of 6 credits of the following. Students may also select from Additional Techniques workshops listed under DANCE 1 or DANCE 560. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 1	Workshop in Dance Activity (Hip Hop)	1-2

DANCE 131	Somatic Theory and Practices	2
Select 4 credits of the following:		
DANCE 1	Workshop in Dance Activity (Yoga)	4
DANCE 132	Workshop in Body Studies and Practices	
DANCE 135	Pilates Mat I	
DANCE 235	Pilates Mat II	
DANCE 136	Pilates Equipment Lab I	
DANCE 236	Pilates Equipment II	
DANCE 336	Pilates Equipment Lab III	
DANCE 213	New Movement Techniques	

CRITICAL AND CREATIVE INVESTIGATIONS

Code	Title	Credits
MUSIC 111	Elements of Music	3
or MUSIC 151	Basic Concepts of Music Theory	
DANCE 140	Dance Production	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 162	First Year Workshop	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
DANCE 345	Video Design for the Performing and Visual Arts	3
or DANCE/ ART 341	Sound Design for the Performing and Visual Arts	
DANCE 355	Dance Composition II	2
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3

DANCE PEDAGOGY

Code	Title	Credits
Select one of the following:		
DANCE 371	Creative Dance for Children	3
DANCE 372	Teaching of Dance to Adults	
DANCE 374	Teaching Dance	

DANCE REPERTORY THEATER

Code	Title	Credits
DANCE 455	Dance Composition III	2
DANCE 462	Senior Seminar	3
DANCE 463	Senior Project	1-2
Select a minimum of 6 credits of the following:		
DANCE 451	Dance Repertory Theater	6
DANCE 452	Dance Repertory Theater	

PUBLIC PRESENTATIONS

BFA students must create one solo and one group piece (trio or larger) after the completion of DANCE 255. These works must be submitted for faculty approval and publicly presented in concert. Senior projects must be presented in an approved public forum.

ELECTIVE CREDITS

Complete additional coursework, if necessary, to reach the minimum of 125 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS**GRADUATION REQUIREMENTS**

Requirements are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 125 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ADVISING AND CAREERS

DANCE DEPARTMENT ADVISING

Each freshmen cohort is assigned a faculty advisor who works with the group until graduation. In their first year, all dance majors receive targeted advising from Karen McShane-Hellenbrand (<http://dance.wisc.edu/dance/people/instructional-staff/karen-mcshane-hellenbrand>). Faculty advisors assist students in choosing classes, evaluating their degree path, and assessing their artistic and academic progress. Students undergo a yearly review with a faculty panel to assess the student's progress in their degree program. Faculty advisors in the department include: Kate Corby (<http://dance.wisc.edu/dance/people/faculty/kate-corby>), Andrea Harris (<http://dance.wisc.edu/dance/people/faculty/andrea-harris>), Li Chiao-Ping (<http://dance.wisc.edu/dance/people/faculty/li-chiao-ping>), Marlene Skog (<http://dance.wisc.edu/dance/academics/bs-program>), Chris Walker (<https://www.dance.wisc.edu/dance/people/faculty/chris-walker>) and Jin-Wen Yu (<http://dance.wisc.edu/dance/people/faculty/jin-wen-yu>).

Advising in dance is handled through the dance department, 608-262-1691, 125 Lathrop Hall, 1050 University Avenue. Students also meet with Education Academic Services staff regarding other course requirements and concerns, see below.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755

<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

DANCE, CERTIFICATE

A dance certificate (19 credits) provides a general, core curriculum in dance that is available for students in other majors and fields. The courses intend to give the certificate student a solid foundation in contemporary dance practice and theory.

HOW TO GET IN

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, may declare this certificate. University Special students who have previously completed any bachelor's degree are also eligible and encouraged to pursue this program of study.

Students must meet with the dance certificate advisor, Joseph Koykkar (<http://dance.wisc.edu/dance/people/faculty/joseph-koykkar>), to discuss their intention to pursue the certificate. Interested students should contact Professor Koykkar for an advising appointment. Students will enroll in two semesters of dance technique and apply for admission to the dance certificate program at the end of the second semester. Complete a dance certificate application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) to declare the certificate.

REQUIREMENTS

COURSE REQUIREMENTS

The dance certificate requires the following course distribution for a minimum of 19 credits.

CONTEMPORARY DANCE TECHNIQUE AND THEORY

Select 6 credits from the following:

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 411	Contemporary Dance Technique and Theory VII	1-3

DANCE 412	Contemporary Dance Technique and Theory VIII	1-3
-----------	--	-----

have been completed and (2) posts this information on the student's transcript.

BALLET TECHNIQUE

Select 2 credits from the following:

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2
DANCE 425	Ballet Technique IV	1-2

ADDITIONAL TECHNIQUES

Select 2 credits from the following. Students may also select from Additional Techniques workshops listed under DANCE 1 or DANCE 560.

Code	Title	Credits
DANCE 1	Workshop in Dance Activity (Hip-Hop)	1-2
DANCE 1	Workshop in Dance Activity (Tai-Ji)	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE/FOLKLORE/ THEATRE 421	Javanese Performance Repertory	2

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131 or DANCE 157	Somatic Theory and Practices Introduction to Movement Analysis	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3

VERIFICATION OF CERTIFICATE COMPLETION

Submit the certificate completion form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-programs>) during the semester that all certificate requirements will be completed. This form starts the administrative process that (1) verifies that the requirements

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

INTRODUCTORY STUDIES IN DANCE/ MOVEMENT THERAPY, CERTIFICATE

Dance/movement therapy is a creative form of psychotherapy that uses movement, as well as words, to help people—those who are generally healthy as well as those dealing with emotional, mental, or physical problems—to regain a sense of wholeness by experiencing the fundamental unity of body, mind, and spirit. The dance therapy certificate introduces students to the fascinating nonverbal aspects of human communication and its applications to a wide range of other fields such as social work, teaching, occupational therapy, physical therapy, and communication disorders.

Students will also be introduced to the use of movement in the topical fields of violence prevention, behavior management and social skills development from a movement or body/mind perspective. Students leave prepared to either go to graduate school in the field of dance/movement therapy or to use embodied practices in related fields. In addition, students develop a repertoire of strategies to help cope with the stress and anxiety inherent in college life.

HOW TO GET IN

DECLARATION PROCESS

Prospective certificate students should enroll in the first- or second-semester dance/movement therapy course:

- DANCE 231 Introduction to Dance/Movement Therapy *or*
- DANCE 232 Introduction to Dynamics of Dance Therapy.

Interested students should meet with the dance/movement therapy certificate advisor, Rena Kornblum (<http://dance.wisc.edu/dance/people/instructional-staff/rena-kornblum>), to discuss their intentions to pursue the certificate. Complete a Dance/Movement Therapy certificate application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) to declare the certificate.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

The DMT certificate requires a minimum of 19 credits.

SUPPORTIVE DISCIPLINARY COURSEWORK

Choose a course (three credit minimum) from the following departments: Counseling Psychology (http://guide.wisc.edu/courses/coun_psy), Educational Psychology (http://guide.wisc.edu/courses/ed_psy), Psychology (<http://guide.wisc.edu/courses/psych>), Rehabilitation

Psychology and Special Education (http://guide.wisc.edu/courses/rp_se).

DANCE DEPARTMENT COURSEWORK

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 231	Introduction to Dance/Movement Therapy	2
DANCE 232	Introduction to Dynamics of Dance Therapy	2
DANCE 331	Dynamics of Dance Therapy	3
DANCE 431	Dance Therapy Practicum	3

VERIFICATION OF CERTIFICATE COMPLETION

Submit the certificate completion form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-programs>) during the semester that all certificate requirements will be completed. This form starts the administrative process that (1) verifies that the requirements have been completed and (2) posts this information on the student's transcript.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

PILATES, CERTIFICATE

The Pilates certificate includes coursework in Pilates mat and equipment exercises, teaching methods, and functional anatomy. The certificate prepares students to teach Pilates in a studio setting, and also creates a practical foundation for those who wish to pursue graduate work in movement-based fields.

Students commonly pair the certificate with dance, nutrition, and/or kinesiology majors, although it is open to all interested students. The curriculum spans 2.5 years, including two summer courses. Upon completion, students are encouraged to sit for the Pilates Method Alliance certification exam to earn their credentials as nationally certified Pilates teachers.

HOW TO GET IN

DECLARATION PROCESS

Students should meet with the Pilates certificate advisor, Collette Stewart (<http://dance.wisc.edu/dance/people/instructional-staff/collette-stewart>), to discuss their intention to pursue the certificate. Appointments may be arranged via email. Students must complete a Pilates certificate application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) to declare the certificate.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

The Pilates certificate requires a total of 20 credits. Collette Stewart is the advisor for the Pilates certificate, stewart1@wisc.edu; interested students should contact her for an advising appointment.

Code	Title	Credits
DANCE 135	Pilates Mat I	1
DANCE 136	Pilates Equipment Lab I	1
DANCE 235	Pilates Mat II	1
DANCE 236	Pilates Equipment II	1
DANCE 237	Pilates Studio I	3
DANCE 330	Functional Anatomy for Movement Practices	1
DANCE 336	Pilates Equipment Lab III	2
DANCE 337	Pilates Studio II	3
DANCE 375	Pilates Teaching Methods	1
DANCE 376	Pilates Teaching I	3
DANCE 476	Pilates Teaching II	3

VERIFICATION OF CERTIFICATE COMPLETION

Submit the certificate completion form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-programs>) during the semester that all certificate requirements will be completed. This form starts the administrative process that (1) verifies that the requirements have been completed and (2) posts this information on the student's transcript.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://www.dance.wisc.edu>)

EDUCATION - SCHOOL-WIDE

DEGREES/MAJORS/CERTIFICATES

- Individual Major, BSE (p. 1458)

INDIVIDUAL MAJOR, BSE

The individual major provides undergraduates with an opportunity to develop a unique course of study; one that is interdepartmental and not reflected in existing degree programs. Completion of the individual major does not lead to a professional license or certification, although graduates may be interested in pursuing alternative educational careers or graduate work. Graduates earn a B.S.—Education degree.

HOW TO GET IN

ADMISSION ELIGIBILITY REQUIREMENTS

To be eligible, applicants must:

- earn a 2.75 cumulative GPA on the UW–Madison campus.¹
- complete a minimum of 54 credits
- receive approval of major program proposal submitted by the applicant.

¹ For alternative calculation of cumulative GPA, see Last 60 Credits Rule.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to the program. GPAs will be calculated using

- all transferable college-level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

APPLICATION PROCEDURES

Once a committee of three persons has been chosen in accord with the guidelines and required courses have been selected, students should proceed as follows:

- Submit an Individual Major in Education proposal form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>).
- Submit the program plan and narrative with the transfer application for associate dean's approval. The three-member committee must sign the proposal in the spaces indicated. Failure to submit a program narrative will void the transfer. Obtain the program plan form from Education Academic Services.

Once an application form has been submitted, changes must be approved by both the chair of the committee and the associate dean. Changes must be recorded on the program plan. If more than two program changes are made, a new application form must be filed by the student.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world.

Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The bachelor of science (B.S.) degree program with an individual major has three components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major* requirements permit in-depth study of a unique area within the School of Education. Students create their own, interdepartmental major following the guidelines established by the school. When completed, the title of the individual major is listed on the student's transcript.
- *Elective* credits make it possible to pursue additional areas of interest and are necessary to reach the minimum of 120 credits required for the degree.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

REQUIREMENTS OF THE INDIVIDUAL MAJOR

DEVELOPMENT OF THE MAJOR

Students must have an area of interest that they wish to develop into a 36–42 credit formalized program of study, or major. Advisors in Education Academic Services, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss students' interests and help frame the written narrative required of the major. Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. A program title cannot duplicate the existing title of any program at UW–Madison.

SELECTION OF MAJOR COURSEWORK

Select courses that support the program narrative, in consultation with the major advisor; see below. **All courses in the major must be from School of Education course offerings.** All credits in the major must be completed after admission into the program (IME classification).

Additional requirements regarding the major are:

- To ensure depth and breadth of study, no more than two-thirds of the total credits in a major can be taken from any one department (i.e., if a major is 36 credits, no more than 24 credits can be in one department).

- A sequential development of courses must be planned in consultation with the major advisor and committee, and must be approved by the committee. The course sequence must include beginning through advanced levels of work as prescribed by the credit distribution.
- At least 20 of the IME credits must be at the intermediate or advanced levels (generally numbered 300 or above, but this varies in some departments).
- Courses in the School of Education completed prior to admission to the IME classification may not be used toward satisfaction of the 36–42 credits in the major without the faculty committee and associate dean's approval. The credits may count toward the 120 credits required for graduation.
- Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- An individual major which essentially parallels an existing departmental major will not be accepted.
- Directed study credits (e.g. 399, 699) are acceptable, but each course must be accompanied by a statement that includes a description of the focus of study, the requirements for successful completion of the credits, and a discussion of the applicability of content to the proposed individual major. Usually no more than 3 credits of Independent Study will be allowed. Approval of the associate dean is required in order to exceed three credits.
- Students must complete prerequisites for all courses and, in some departments, may be required to complete foundational courses.

SELECTING THE ADVISORY COMMITTEE AND MAJOR ADVISOR

The applicant must create a three-member committee to oversee his or her work. Only assistant, associate, and full professors may serve on the committee; individuals holding such titles as Lecturer or Instructor cannot serve in this capacity. One of the committee members will be selected by the student to be the major advisor. The major advisor must be from a department within the School of Education and from the department in which the majority of courses for the individual major will be taken, i.e., the core area of study. The second faculty member must be from the same department as the major advisor/committee chair. The third faculty member must be from another department in the School of Education in which courses will be taken for the individual major. The associate dean serves as ex officio to the three-member committee and gives final approval to all programs and any exceptions.

ELECTIVE CREDITS

Elective credits make it possible to pursue additional areas of interest. Many students, for example, use their elective credits to complete an additional major from the College of Letters & Science. Some use this second major to complement their individual major, while others select second majors that are completely unrelated to their first. Elective credits are necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework. Graduation GPA requirements may be modified by the Last 60 Credits Rule (p. 1239).

- 2.75 cumulative grade point average.

- 2.75 cumulative grade point average across all major coursework
- 2.75 cumulative grade point average across all upper-level (numbered 300 and above) major coursework
- Degree candidates must complete at least 120 total credits.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ADVISING AND CAREERS

ADVISING FOR THE INDIVIDUAL MAJOR

Students interested in the individual major should first consult with an advisor in Education Academic Services; call 608-262-1651 to schedule an appointment. Eventually, a committee to oversee the major will be formed and also provide advising in the major.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURL: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURL staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURL staff perform outreach, recruitment, and advising on behalf of the School. OURL staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURL works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURL staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's

applications. The *Prepare and Connect* section provides offers additional details.

- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

EDUCATIONAL POLICY STUDIES

The Department of Educational Policy Studies offers many courses for undergraduate students. Multidisciplinary courses in the history, sociology, and philosophy of education, comparative and international education, urban education, and educational anthropology are available to all students. Courses in policy analysis emphasize the social context and implications of policy decisions. The department has strong ties with institutions and scholars in other countries.

A new undergraduate degree program in education studies (p. 1463) was recently approved by the University of Wisconsin System Board of Regents. The bachelor of science in education studies is designed to meet the needs of a growing number of undergraduate students who are interested in becoming involved in the realm of education, but not as teachers in the classroom. Major course work offers the multidisciplinary training needed to answer questions regarding domestic and global education policy and practice.

The popular educational policy studies certificate (p. 1467) is also available to all undergraduate students. The completion of the EPS certificate formalizes a student's interest in the multiple dimensions of this discipline.

DEGREES/MAJORS/CERTIFICATES

- Education Studies, B.S. (p. 1463)
- Educational Policy Studies, Certificate (p. 1467)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu>)

EDUCATION STUDIES, B.S.

The education studies degree program addresses urgent questions related to domestic and global education policy and practice. Majors will become well-informed leaders who can engage critically, thoughtfully, and ethically in the educational policy debates in Wisconsin, the nation, and the world.

Undergraduates interested in issues of inequality and social justice will study these dimensions of educational reform. Courses explore the interconnections between education and other major social institutions, including the justice system, the healthcare system, family advocacy systems, economic development, and foreign affairs. Students study debates concerning education-related social disparities and the pursuit of equal educational opportunities for all.

The education studies major prepares students for work in educational and governmental agencies, non-governmental organizations (both domestic and international), think tanks, policy institutes, community organizations, and other out-of-school educational spaces. Graduates might serve as policy directors or in other positions of institutional leadership and will be well prepared to work in education-related businesses or to pursue advanced studies in educational policy at the graduate level.

Students will first be admitted to this new program for the fall semester of 2017. Graduates will receive a bachelor of science degree in education studies from the School of Education. This program does not lead to teacher certification.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

New freshmen and off-campus transfers are admitted directly to the Bachelor of Science–Education Studies degree program. Current UW–Madison students must meet with an advisor in Education Academic Services prior to applying for admission to the B.S.–Education Studies degree program. The program currently admits on-campus students to begin in the fall, spring, and summer.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

Incoming freshmen and transfer students enter directly into the Bachelor of Science–Education Studies degree program upon admission to UW–Madison. All other on-campus students should complete and submit an application following a meeting with an advisor in Education Academic Services at any time during the academic year.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School

of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

While new freshmen and off-campus transfers are admitted directly to the Bachelor of Science–Education Studies degree program, all other current UW–Madison students seeking to enter the B.S.–Education Studies degree program must apply for admission to the program. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult with an advisor in Education Academic Services prior to submitting an application. Students interested in applying to the program should call 608-262-1651 to schedule an appointment.

CRITERIA FOR ADMISSION

Eligibility for admission consideration to Bachelor of Science–Education Studies degree:

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Filing of all required paperwork and other application materials, including program application and transcripts.

Last 60 Credits Rule

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"

coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

REQUIREMENTS

PROGRAM STRUCTURE

The education studies program has three primary components:

- *Liberal studies and general education* courses that expose students to a broad range of academic disciplines.
- *Major* coursework in education studies, including core courses, depth, and breadth requirements. Students choose either a U.S. or Global concentration.
- *Elective* credits to pursue individual areas of interest. Education studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the education studies degree program makes it possible to complete an additional major and still graduate in four years.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

MAJOR REQUIREMENTS

The education studies major requires 30 credits, to include core courses (9 credits), depth requirements (12 credits) and breadth requirements (9 credits). Students will select either a U.S. concentration or Global Concentration to fulfill the depth requirement of the major.

CORE COURSES, 9 CREDITS

Complete the following:

Code	Title	Credits
ED POL 300	School and Society	3
ED POL 340	Comparative Education	3
ED POL/ HISTORY 412	History of American Education	3

DEPTH REQUIREMENTS, 12 CREDITS

Complete a minimum of four courses (12 credits) in either the United States or Global concentration to facilitate in-depth study of education policy and practice.

U.S. Concentration

Code	Title	Credits
ED POL 140	Introduction to Education	3
ED POL 150	Education and Public Policy	3
ED POL 200	Race, Ethnicity, and Inequality in American Education	3
ED POL 210	Youth, Education, and Society	3
ED POL 450	Rethinking "After-School" Education	3
ED POL 460	Immigration, Education, and Equity	3
ED POL/ HISTORY 478	Comparative History of Childhood and Adolescence	3
ED POL 500	Topics on Social Issues and Education	3
ED POL 505	Issues in Urban Education	3
ED POL 510	Urban School Policy	3
ED POL 518	Introduction to Debates in Higher Education Policy	3
ED POL/PHILOS 545	Philosophical Conceptions of Teaching and Learning	3
ED POL/PHILOS 550	Philosophy of Moral Education	3

ED POL/ GEN&WS 560	Gender and Education	3
ED POL/ AFROAMER 567	History of African American Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3
ED POL/ HISTORY 622	History of Radical and Experimental Education in the US and UK	3
ED POL/ HISTORY 665	History of the Federal Role in American Education	3
ED POL/SOC 648	Sociology of Education	3

Global Concentration

Code	Title	Credits
ED POL 140	Introduction to Education	3
ED POL/INTL ST 335	Globalization and Education	3
ED POL 460	Immigration, Education, and Equity	3
ED POL/ HISTORY 478	Comparative History of Childhood and Adolescence	3
ED POL/ GEN&WS 560	Gender and Education	3
ED POL 595	Language Politics, Ethnicity, and Education	3
ED POL/ HISTORY 622	History of Radical and Experimental Education in the US and UK	3
ED POL 675	Introduction to Comparative and International Education	3
ED POL/CURRIC 677	Education, Health and Sexuality: Global Perspective and Policies	3

BREADTH REQUIREMENTS, 9 CREDITS

Code	Title	Credits
Human Development		
Complete one of the following:		3
ED PSYCH 320	Human Development in Infancy and Childhood	
ED PSYCH 321	Human Development in Adolescence	
ED PSYCH 331	Human Development From Childhood Through Adolescence	
Additional Breadth Course Options		
Ed Psych 320, 321 and 331 may also count here, but not toward both requirements.		
CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	3
ED PSYCH 326	Mind, Brain and Education	3
ED PSYCH 506	Contemporary Issues in Educational Psychology	3
ED PSYCH 521	Adolescent Development in Educational Contexts	3
ED PSYCH 541	Applied Behavior Analysis in Classrooms	3
ELPA 640	Legal Rights and Responsibilities for Teachers	1-3

ELECTIVE CREDITS

Complete additional credits to complete the minimum of 120 required for the degree. Education studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the education studies degree program makes it possible to complete an additional major and still graduate in four years.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework (“upper-level” defined as numbered 300 and above).
- Major Residency: Students must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

At UW–Madison, a DARS report is used to document a student’s progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a “what if” DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651

www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

ADVISING AND CAREERS

EDUCATION STUDIES ADVISING

Students are advised by staff from Education Academic Services (Room 139 Education Building) at SOAR and during the regular academic year. Staff from the Office of Undergraduate Recruitment and Retention (Room 105 Education Building) provide additional support and assistance to under-represented students in the School of Education. See below. Admitted students are also assigned a departmental advisor.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCApt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

EDUCATIONAL POLICY STUDIES, CERTIFICATE

The educational policy studies undergraduate certificate program was designed specifically for undergraduate students from across the campus. The department offers multidisciplinary courses in the history,

sociology, and philosophy of education, comparative and international education, and in educational anthropology. Courses in policy analysis emphasize the social context and implications of policy decisions. The completion of the EPS certificate formalizes a student's interest in the multiple dimensions of this discipline.

Students interested in pursuing this certificate are encouraged to consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651.

HOW TO GET IN

DECLARATION PROCESS

Students must complete at least one Educational Policy Studies (ED POL) (http://guide.wisc.edu/courses/ed_pol) course with a grade of B or better prior to applying to the certificate program. Students intending to complete the educational policy studies certificate should visit the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page to complete the declaration form.

Students pursuing the education studies major are not eligible to complete the educational policy studies certificate.

REQUIREMENTS

COURSE REQUIREMENTS

- Complete a minimum of five courses from the Department of Educational Policy Studies (15 credits).
- At least two courses must be at the advanced level.
- Students must earn a grade of at least a B in each educational policy studies course in order to count toward the certificate requirements.
- No more than 3 credits of independent study may count toward the 15 credits.

VERIFICATION OF CERTIFICATE COMPLETION

Submit the certificate completion form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-programs>) during the semester that all certificate requirements will be completed. This form starts the administrative process that (1) verifies that the requirements have been completed and (2) posts this information on the student's transcript.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu>)

EDUCATIONAL PSYCHOLOGY

Although the department does not offer an undergraduate major, students from across the campus may take undergraduate courses in each of the major content areas: human development, learning sciences,

quantitative methods, and school psychology. The department also offers courses specific to teacher education programs.

Educational psychology is the academic home of the undergraduate certificate program in education and educational services (p. 1468). This certificate provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree. Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education.

DEGREES/MAJORS/CERTIFICATES

- Education and Educational Services, Certificate (p. 1468)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website. (<http://www.dance.wisc.edu>)

EDUCATION AND EDUCATIONAL SERVICES, CERTIFICATE

Education is a topic of widespread interest to UW–Madison students and is one of the hotly contested subjects in today's politics and society. The Education and Educational Services (EES) Certificate Program provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree.

Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education. The certificate also provides grounding and learning experiences that will increase access to careers in education. Students completing the certificate may be considering future plans to:

- Enter a post-baccalaureate teacher education program.
- Pursue a graduate program focused on educational services, including programs such as counseling psychology, school psychology, and rehabilitation psychology.
- Complete advanced work in educational psychology or educational administration.
- Begin a career in teaching and learning settings and practices outside the K–12 education system.

This 15-credit certificate program offers a variety of course options that can be customized to each student's area of interest.

HOW TO GET IN

DECLARATION PROCESS

Students intending to complete the education and educational services certificate may find the declaration form on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

The declaration for this certificate program can be submitted at any time during the calendar year.

Please note: Students completing a course of study designed to lead to teacher certification are not eligible to complete the EES certificate. This also includes School of Education degree students pursuing the education studies or communication sciences and disorders majors. Other students completing a major within the School of Education are limited to 6 credits of overlap between their major and the certificate; that is, no more than 6 credits of coursework used to satisfy requirements for a major within the School of Education may also be counted toward completion of the EES certificate.

REQUIREMENTS

Requirements of this 15-credit certificate program include both Foundation and Focus coursework. All coursework must be taken for a letter grade (not credit/no-credit or pass/fail) and students must earn at least a C grade in each course of the certificate. At least 12 credits of the certificate must be earned in residence at UW–Madison.

There is no formal prerequisite structure to the certificate, although students will generally be expected to take CURRIC 240 Critical Aspects of Teaching, Schooling, and Education first, followed by the two remaining Foundation courses and then the two Focus courses.

FOUNDATION COURSES, 9 CREDITS

Code	Title	Credits
Required Foundation Course		3
CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	
Social Context of Education		3

ED POL/ ANTHRO 570	Anthropology and Education	
ED POL 575	Education Policy and Practice	
ED POL/SOC 648	Sociology of Education	
ED PSYCH 506	Contemporary Issues in Educational Psychology	

ED PSYCH 540	Introduction to Professional School Psychology
ED PSYCH 541	Applied Behavior Analysis in Classrooms
ED PSYCH 542	The Biological Basis of Behavior
ED PSYCH 551	Quantitative Ethnography
ED PSYCH 563	Design of Educational Games and Simulations
ED PSYCH 570	Foundations of Educational Measurement
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations

¹ Students may also substitute up to 3 credits of independent study with faculty from the departments of Coun Psy, Curric, ELPA, Ed Pol, Ed Psych or RP&SE. Independent study work with faculty from other School of Education departments may be considered; contact an advisor in Education Academic Services.

VERIFICATION OF CERTIFICATE COMPLETION

Submit the certificate completion form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-programs>) during the semester that all certificate requirements will be completed. This form starts the administrative process that (1) verifies that the requirements have been completed and (2) posts this information on the student's transcript.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website. (<http://www.dance.wisc.edu>)

KINESIOLOGY

The study of movement, exercise, and occupation has the potential to dramatically impact health and quality of life. Department programs focus on the scientific study of exercise, movement, and human occupation, applying this study to health, physical education, and functional performance. The department's ultimate goal is to enhance human health, productivity, and quality of life.

The B.S. degree in athletic training (p. 1470) prepares students to become certified athletic trainers. The B.S. degree in kinesiology (p. 1478) prepares students for graduate or professional study, and the B.S. degree in physical education (p. 1485) prepares teacher education students to teach physical education in elementary and secondary schools.

The department also offers theory, activity, and leadership courses to improve understanding, appreciation, and use of the body in movement and sports. These classes are open to all university students.

DEGREES/MAJORS/CERTIFICATES

- Athletic Training, B.S. (p. 1470)

- Health Education, Minor (p. 1477)
- Kinesiology, B.S. (p. 1478)
- Physical Education, B.S. (p. 1485)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<http://www.education.wisc.edu/kinesiology>)

ATHLETIC TRAINING, B.S.

The Athletic Training Degree Program prepares students for healthcare careers as athletic trainers. Accredited by the Commission on Accreditation of Athletic Training Education (CAATE), the program provides students with an evidence-based theoretical and clinical foundation needed to succeed in a wide range of athletic training healthcare settings. Interested students should contact Andrew Winterstein, program director, at andrew.winterstein@wisc.edu (winterstein@education.wisc.edu).

This program places an emphasis on the basic sciences. In addition to introductory courses in athletic training, anatomy, and first aid, applicants must complete prerequisite coursework in biology, chemistry, and physics as part of the application process. Students must also complete a minimum of 20 hours of clinical observations (<https://kinesiology.education.wisc.edu/at/program>) prior to applying to the AT program.

The professional requirements include (1) athletic training courses that encompass the prevention, examination, diagnosis, treatment, and rehabilitation of emergent, acute or chronic injuries and medical conditions, (2) content area coursework in general medical issues with full-semester courses in nutrition and pharmacology, and (3) course credit for athletic training clinical and field work, including one experience taken in conjunction with a high school rotation.

The program is dedicated to maintaining a tradition of excellence (<https://kinesiology.education.wisc.edu/at/about/program-outcomes>) and outstanding program outcomes (<https://kinesiology.education.wisc.edu/at/outcomes>). Interested students may enjoy the AT program video (<https://www.youtube.com/watch?v=2Jckqk5FS5Q&feature=youtu.be>).

Note: In May of 2015 the AT Strategic Alliance released an official statement (<http://caate.net/wp-content/uploads/2015/05/Strategic-Alliance-CCATE-email-pdf.pdf>) recommending elevation of the professional degree for athletic training to **the master's level**. Current programs that plan to continue preparing AT professionals will no longer be able to enroll students in bachelor's degree AT programs after the fall term of 2022. The AT Program at UW–Madison is in the planning stages of the degree transition and campus proposal process.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Admission to the Athletic Training Degree Program is limited and competitive. Students must meet the minimum eligibility requirements outlined below to be considered for selection. Most students apply for admission during their sophomore year. Students are admitted

to the program only once a year, effective for the summer following admission. Once admitted, students usually take two-and-a-half years to complete the professional part of the AT degree program.

ENTERING THE SCHOOL OF EDUCATION NEW & CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in athletic training are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in the athletic training degree program or the exercise and movement science degree program within Kinesiology receive a classification of PKN. This classification indicates that a student is interested in one (or both) of these programs, but has not applied and been admitted to the professional part of the undergraduate program.

On-campus students wishing to be admitted to the School while working on eligibility requirements and application can apply for admission to the School of Education by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the School. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1472)). It is not necessary to be a “pre-professional” student before applying to a professional program. Admission as a “pre-professional” student does not guarantee admission to the professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from

the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

Prospective applicants must complete prerequisite coursework for eligibility and should make progress toward meeting the School of Education's Liberal Studies requirements. Students are admitted only once a year, effective for the summer following admission. Once admitted, students in Athletic Training typically spend two-and-a-half years completing remaining coursework.

Professional program applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education professional program. Thus, program admission is contingent upon admission to the campus. Admission to UW–Madison requires a separate application and admission process. See Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for application information.

ELIGIBILITY FOR ADMISSION TO THE PROFESSIONAL PROGRAM

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission, applicants must:

- complete at least 54 credits of college coursework by the end of the spring semester of the application year.
- complete the following coursework by the end of the spring semester of the application year:

Code	Title	Credits
Biology Sequence		
Complete one of the following Biology sequences:		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	5
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology ¹	10
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
Advanced Placement (AP) Biology exam score of 4 or 5 ²		
International Baccalaureate (IB) Biology exam score of 4 or 5 ³		
Chemistry Sequence		
Complete one of the following Chemistry sequences:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9

CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	10

Physics Course

Complete one of the following Physics courses:

PHYSICS 103	General Physics	4
PHYSICS 201	General Physics	5
PHYSICS 207	General Physics	5

Kinesiology Course

KINES 119	Introduction to Kinesiology	2
-----------	-----------------------------	---

- ¹ Students who take this course at UW–Madison or transfer it from another campus must complete both BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152 to be eligible for admission and to complete the degree requirements.
- ² Credit awarded for BIOLOGY/BOTANY/ZOOLOGY 151 via an AP Biology exam score of 4 or 5 fulfills the entire eligibility requirement for admission & the degree requirements.
- ³ Credit awarded for BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology via an IB Biology exam score of 4 or 5 fulfills the entire eligibility requirement for admission & the degree requirements.

- complete all but two of the prerequisite courses listed above by the end of the fall semester of the application year. **Exception:** Students enrolled in BIOLOGY/BOTANY/ZOOLOGY 152 during the spring semester of the application year may have this course **and** up to two additional prerequisites above in progress during the spring semester of the application year. For this purpose, CHEM 109 satisfies the full general chemistry requirement but constitutes **one** course. BIOLOGY/ZOOLOGY 101 and BIOLOGY/ZOOLOGY 102 are counted as **two** courses in determining eligibility for the program.
- complete these additional prerequisite courses by the end of the spring semester of the application year.

Code	Title	Credits
Athletic Training Sequence		
KINES 116	First Aid and Basic Life Support ⁴	2
KINES 127	Introduction to Athletic Training	2
KINES 197	Techniques in Athletic Training	1
KINES 227	Introduction to Clinical Anatomy of Human Movement	2

- ⁴ Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of KINES 116. First Aid certification may substitute for the first aid portion of Kines 116. Students possessing current certifications may submit documentation and request a waiver of KINES 116. Students must present both certifications (CPR/AED and first aid) to exempt from the class.

- Athletic Training Experience—Complete a minimum of twenty (20) total hours of volunteer or observation experiences in athletic training. Students must gain experience in at least two different locations. Each experience must be a minimum of (10) hours in length. Documentation of the experience (forms signed by certified athletic trainers) must be submitted along

with application materials by the application deadline. Students may seek observational experiences in any setting employing a certified athletic trainer where the athletic trainer is performing job duties consistent with the BOC Role Delineation domains of athletic training.

- earn a minimum 2.75 cumulative GPA or last 60 credits GPA by the end of the fall semester of the application year.⁵
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

⁵ A comprehensive cumulative GPA of all college-level, transferable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using:

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

APPLICATION REVIEW AND SELECTION

Applicants to the Athletic Training Degree Program will compete for an identified number of admission openings assigned to this program. Each application will be reviewed by at least two academic faculty or staff from the Admissions Committee. Each committee member will independently examine and rate applicants' files on a scale of 1 (do not accept) to 5 (definitely accept) based on the criteria above. Committee members will then share and discuss their ratings and select the final cohort for admission.

The Admissions Committee will review application files with four key areas in mind:

- **Academic Qualifications.** The athletic training program seeks students with strong academic credentials. This includes cumulative undergraduate grade point average (GPA), course selection and trend of college grades.
- **Goals.** The required personal statement provides an opportunity for students to express their reasons for studying kinesiology and can provide insight into the student's long-term goals.

- **Recommendation Letters.** Thoughtful letters from teachers or employers addressing the student's interest and experience are beneficial to the selection process. Recommendation letters should provide information about a student's intellect, imagination, or diligence that is not evident in other parts of the application.
- **Other Contributions.** The athletic training program seeks students whose diverse work experience, life experience, stated goals, and cultural background are assets to the learning environment in the program.

PROVISIONAL ADMISSION

Students will be provisionally accepted in April. The offer of admission will be revoked and the student withdrawn from fall Kinesiology courses (typically during July) if any of the following requirements are not met:

- All prerequisite courses completed by the end of the spring semester of the application year.
- Maintenance of a cumulative GPA or last 60-credit GPA of at least 2.75.

TECHNICAL STANDARDS

The Athletic Training Degree Program at the University of Wisconsin–Madison is a rigorous and intensive program that places specific requirements and demands on the students enrolled in the program. For this reason the program has established Technical Standards for program completion.

Students must document that they are in compliance with the program's Technical Standards as a condition of accepting program admission. Students who feel they are not in compliance with the above standards are encouraged to seek evaluation and assistance from the McBurney Disability Resource Center.

CRIMINAL BACKGROUND INVESTIGATION

Criminal background investigations will be conducted for all students admitted to this program. Detailed instructions on how to complete the required criminal background check will be included in offers of admission. This is not completed until after an applicant has been offered admission.

Results of criminal background checks may be shared with other agencies when required by state code, or with a cooperating school or other agency in which the student has been assigned to complete field experiences. Criminal background checks may also be run on students by school districts. Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. Field site administrators have the right to determine the appropriateness of a student placement.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

ADVISING AFTER ADMISSION

Included with the offer of admission is information about mandatory spring orientation sessions for new majors, led by a departmental advisor. Sequencing of coursework and enrollment in Kinesiology courses will be addressed at these meetings. Students will be authorized to enroll in Kinesiology courses after the orientation meetings are completed.

Upon formal admission to the program, advising about the major will be provided by the Department of Kinesiology. Majors are required to meet with the departmental advisor at least once per semester. All questions about School of Education and University requirements should be referred to an advisor in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The Athletic Training program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- *Advanced coursework in Athletic Training* that focuses on evidence-guided practice and patient-centered care in the prevention, management, and rehabilitation of injuries and illnesses.
- *Elective classes* that are generally related to the student's area of study.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

SCIENCE CORE

Code	Title	Credits
Select one of the following:		5-10

CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Select one of the following:		4-10
AP or IB Biology score of 4 or above		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	
Select one of the following:		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
MATH 221	Calculus and Analytic Geometry 1 (Meets General Education Quantitative Reasoning B requirement)	5
or MATH 211	Calculus	
STAT 371	Introductory Applied Statistics for the Life Sciences (STAT 371 is preferred)	3
or PSYCH 210	Basic Statistics for Psychology	
PHYSIOL 335	Physiology	5
ANATOMY/ KINES 328	Human Anatomy ¹	3
ANATOMY/ KINES 329	Human Anatomy-Kinesiology ¹	2
PSYCH 202	Introduction to Psychology	3

¹ Effective fall 2017, Anatomy/Kines 328 and 329 will be replaced by Kines 337 and 338.

KINESIOLOGY CORE

Code	Title	Credits
KINES 119	Introduction to Kinesiology ¹	2
KINES 227	Introduction to Clinical Anatomy of Human Movement	2
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 330	Research in Kinesiology	2
KINES 350	Introduction to Exercise Psychology ¹	3
KINES 361	Motor Learning and Performance	3
KINES 116	First Aid and Basic Life Support ^{1 2}	2

¹ KINES 116, KINES 119 and KINES 350 can be taken prior to program admission.

² Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of KINES 116. First Aid certification may substitute for the first aid portion of KINES 116. Students must present both certifications (CPR/AED and first aid) to exempt from KINES 116.

ATHLETIC TRAINING CORE

Students with an interest in Athletic Training should enroll in KINES 127, KINES 197 and KINES 227. First-year students are eligible and encouraged to take KINES 127 and KINES 197. Enrollment in KINES 227 requires completion of, or concurrent enrollment in Kines 127, or consent of the instructor. These three introductory courses are the only athletic training courses that may be taken prior to program admission.

KINES 301, KINES 317, KINES 357, KINES 358 and KINES 450 provide required clinical field experiences in athletic training settings.

Code	Title	Credits
KINES 127	Introduction to Athletic Training	2

KINES 400	Organization and Administration of Athletic Training Programs	3
KINES 417	Advanced Clinical Assessment Techniques in Athletic Training	2
KINES 450	Clinical Field Experience in Athletic Training (take twice for a total of 6 credits)	3
KINES 457	Medical Problems of Exercise and Sports	3
KINES 475	Seminar in Athletic Training	1
NUTR SCI 332	Human Nutritional Needs	3
or KINES/ NUTR SCI 525	Nutrition in Physical Activity and Health	
PHM SCI 401	Survey of Pharmacology	3

ADDITIONAL ELECTIVES

Select additional electives as necessary to bring credit total to 120

TECHNICAL STANDARDS—ATHLETIC TRAINING PROGRAM

The Athletic Training Program at the University of Wisconsin—Madison is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary

for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education).

Details of Required Technical Standards

Compliance with the program's technical standards does not guarantee a student's eligibility for the Board of Certification exam. A candidate for the Athletic Training Program at the University of Wisconsin-Madison must have abilities and skills in five categories: observation, communication, motor, intellectual, and behavioral/social. Reasonable accommodation for persons with documented disabilities will be considered on an individual basis, but a candidate must be able to perform in an independent manner. **The following skills are required, with or without accommodation.**

Observation: Candidates must have sufficient sensory capacity to observe in the lecture hall, the laboratory, the outpatient clinical setting, and in direct patient interaction. Sensory skills adequate to perform a physical examination are required. Functional vision, hearing and tactile sensation must be adequate to observe a patient's condition and to elicit information through procedures regularly required in a physical examination, such as inspection, palpation, and special tests.

Communication: Candidates must be able to communicate effectively in both academic and health care settings. Candidates must show evidence of effective written and verbal communication skills. Students for whom English is a second language must have a facility in English adequate for university work. Results of the ESL assessment test may require students to take one or more English courses in English as a second language.

Motor: The ability to participate in basic diagnostic and therapeutic maneuvers and procedures (e.g. palpation, auscultation) is required. Candidates must have sufficient motor function to execute movements reasonably required to provide care to patients. Candidates must be able to negotiate patient care environments and must be able to move between settings, such as classroom building and clinical setting. Physical stamina sufficient to complete the rigorous course of didactic and clinical study is required. Long periods of sitting, standing, or moving are required in classroom, laboratory, and clinical experiences.

Intellectual: Candidates must be able to measure, calculate, reason, analyze and synthesize. Problem solving, one of the critical skills demanded of athletic trainers, requires all of these intellectual abilities. In addition, candidates should be able to comprehend three-dimensional relationships and understand the spatial relationships of structures. Candidates must be able to read and understand allied health and medical literature. In order to complete the Athletic Training Program, candidates must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in problem-solving and patient care.

Behavioral and social attributes: Candidates must possess the emotional health required for full utilization of their intellectual abilities, the exercise of good judgment, and the prompt completion of all academic and patient care

responsibilities. The development of mature, sensitive and effective relationships with patients and other members of the health care team are essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are all required.

Students who feel they are in compliance with the above standards must fill out the Technical Standards Signature Form and submit it with their application materials.

Students who feel they are not in compliance with the above standards are encouraged to seek evaluation and assistance from the McBurney Disability Resource Center.

McBurney Disability Resource Center
702 West Johnson Street, Suite 2104
Madison, WI 53715
phone: 608-263-2741
text: 608-225-7956
mcburney@studentlife.wisc.edu

The UW-Madison Athletic Training Program complies with all federal and state laws and university policies including Affirmative Action and Equal Opportunity (<http://www.wisc.edu/policies/aaeo>).

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus coursework. Consult the School of Education's Academic Policies and Procedures (p. 1239) for additional information about the continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW-Madison coursework.

- Must earn a minimum 2.75 cumulative grade point average. Graduation GPA may be modified by the Last 60 Credits Rule (p. 1239).
- Major residency: Students must complete a minimum of 15 credits from the Department of Kinesiology while enrolled on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Must complete a minimum of 120 credits.

DEGREE AUDIT (DARS)

At UW-Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand the role of the athletic trainer within the broader health care system. Demonstrate appropriate oral and written communication skills.
2. Develop and apply strategies to prevent the incidence and/or severity of injury and illnesses.
3. Demonstrate the clinical skills needed to appropriately diagnose patients for treatment and referral.
4. Apply clinical and decision making skills to respond to acute injury and illness; including emergencies.
5. Assess patient status and develop treatment and rehabilitation that are consistent with contemporary disablement models.
6. Maintain the highest standards of evidence-guided clinical practice by formulating clinical questions, incorporating evidence into clinical

practice, and examining the quality of patient care through the use of patient outcomes.

ADVISING AND CAREERS

ATHLETIC TRAINING ADVISING

Students not yet admitted to athletic training (pre-professional classification of PKN) meet with their assigned advisor in Education Academic Services (EAS) and/or the Office of Undergraduate Recruitment and Retention (OURR), see below. Interested students should also contact Andrew Winterstein, program director, at andrew.winterstein@wisc.edu (winterstein@education.wisc.edu).

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are

encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/

or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.

- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<http://www.education.wisc.edu/kinesiology>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the School's Resources (p. 1259) page.

HEALTH EDUCATION, MINOR

The health minor may be completed by students in physical education or by teachers already licensed to teach at an appropriate level in Wisconsin.

This minor prepares teachers to (1) teach health as a separate course or as a planned integral part of other areas of instruction and (2) assist the school administration and teaching staff in developing a broad school health program.

Certification in a major area of interest must accompany the completion of this minor; students cannot be certified to only teach health.

HOW TO GET IN

Upon admission into their teacher education degree program in the School of Education, students should meet immediately with the health education program advisor, Bonnie Klassy (bjklassy@wisc.edu), to work out a schedule and to be authorized for the following required courses:

Code	Title	Credits
KINES/CURRIC/ ELPA 541	Organization and Administration of School Health Programs	3
KINES/CURRIC 542	Teacher Education About Alcohol and Other Drugs	3

KINES/CURRIC 561	Teacher Education in Human Sexuality	3
KINES/CURRIC 567	Issues, Materials and Methods in Health Education	3

Registration in this coursework is contingent upon this meeting.

To indicate their intent to complete the health education minor, students should fill out a minor declaration form available in Education Academic Services, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 30 credits to include all coursework below. A minimum 2.75 GPA is required, based on all UW–Madison coursework included in the minor requirements.

The program coordinator for the health minor is Bonnie Klassy, bjklassy@wisc.edu. Students may also wish to consult with advising staff at Education Academic Services (EAS), Room 139 Education Building, 1000 Bascom Mall, 608-262-1651.

Upon acceptance into a major program in the School of Education, students should meet immediately with the health education program advisor to work out a schedule and to be authorized for required Kines/Curric courses KINES/CURRIC/ELPA 541, KINES/CURRIC 542, KINES/CURRIC 561, and KINES/CURRIC 567. Registration in this coursework is contingent upon this meeting.

CORE REQUIREMENTS (22–24 CREDITS)

Code	Title	Credits
KINES 116	First Aid and Basic Life Support ¹	2
PHYSIOL 335	Physiology	5
KINES/CURRIC 501	Health Information for Teachers	3
KINES/CURRIC/ELPA 541	Organization and Administration of School Health Programs	3
KINES/CURRIC 542	Teacher Education About Alcohol and Other Drugs	3
KINES/CURRIC 561	Teacher Education in Human Sexuality	3
KINES/CURRIC 567	Issues, Materials and Methods in Health Education	3
CURRIC 457	Student Teaching in Health Education ²	2

¹ Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of KINES 116. First Aid certification may substitute for the first aid portion of KINES 116. Students must present both certifications (CPR/AED and first aid) to exempt from KINES 116. Documentation of current certification (either adult or child) must be presented to the health education program advisor. If the certification equivalent is used, the minor will require 30 credits.

² Eligibility for student teaching requires the completion of all courses required for the minor with a minimum GPA of 2.75. Students must take and pass a content exam (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A meeting with the health education advisor is required before submitting a student teaching application. Students should

bring a current transcript to this meeting. Special arrangements can be made for teachers seeking add-on certification in Health.

BREADTH REQUIREMENTS (8 CREDITS)

Choose from the following list. A wide variety of other relevant courses related to teaching about health are offered on campus. Substitution of another course (maximum of 3 credits) is possible, but must be approved in advance by the health program advisor.

Code	Title	Credits
CNSR SCI 478	Consumer Information	3
COM ARTS 325	Media and Human Behavior	3
FOOD SCI 120	Science of Food	3
NUTR SCI 132	Nutrition Today	3
NUTR SCI/A A E/AGRONOMY/INTER-AG 350	World Hunger and Malnutrition	3
KINES 100	Exercise, Nutrition, and Health	2
SOC/PSYCH 160	Human Sexuality: Social and Psychological Issues	3-4
SOC WORK/NURSING/S&A PHM 105	Health Care Systems: Interdisciplinary Approach	2
SOC WORK 453	Alcohol and Other Drug Abuse	2-4
ENVIR ST 112	Environmental Studies: The Social Perspective	3

KINESIOLOGY, B.S.

Exercise and movement science is one of three undergraduate majors offered in the Department of Kinesiology. The department's mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

Students in the exercise and movement science major take coursework grounded in the basic sciences (e.g., physiology, anatomy, physics) and in kinesiology. Core courses examine, for example, how the body responds to physical activity, the role of physiological and psychological factors in exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the lifespan.

The curriculum includes coursework, laboratory research opportunities, and hands-on learning experiences. In addition, at least 11 credits of electives in exercise and movement science are required, giving students some flexibility to tailor the program to their specific interests.

The exercise and movement science major is a pre-professional program. This means that our students are well prepared for subsequent graduate or professional training in different health-related disciplines such as physical therapy, occupational therapy, medicine, or biomedical research. In addition, the major prepares students for graduate training programs in kinesiology (e.g., exercise physiology, cardiac rehabilitation, biomechanics, physical activity epidemiology, exercise psychology, motor learning). Exercise and movement science graduates may also pursue entry-level careers in the fitness area.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Admission to the Kinesiology–Exercise and Movement Science degree program is limited and competitive. Students must meet the minimum eligibility requirements outlined below to be considered for selection. Students are admitted to the program only once a year, effective for the summer following selection. Once admitted, exercise and movement science students typically spend two years completing their remaining coursework.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in kinesiology are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in the exercise and movement science degree program within Kinesiology or the athletic training degree program receive a classification of PKN. This classification indicates that a student is interested in one (or both) of these programs, but has not applied and been admitted to the professional part of the undergraduate program.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the School of Education by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the School. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1480)). It is not necessary to be a “pre-professional” student before applying to a professional program. Admission as a “pre-professional” student does not guarantee admission to the professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with

advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

Prospective applicants must complete prerequisite coursework for eligibility and should make progress toward meeting the School of Education’s Liberal Studies requirements. Students typically apply for admission during the sophomore year. Students are admitted only once a year, effective for the summer following admission. Once admitted, exercise and movement science students typically spend two years completing remaining coursework.

Professional program applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education professional program. Thus, program admission is contingent upon admission to the campus. Admission to UW–Madison requires a separate application and admission process. Prospective applicants not already enrolled on the UW–Madison campus are strongly encouraged to contact an academic advisor in Education Academic Services for assistance with planning their applications to both the professional program and to the UW–Madison campus. See Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for application information.

ELIGIBILITY FOR ADMISSION TO THE PROFESSIONAL PROGRAM

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission, applicants must:

- complete at least 54 credits of college coursework by the end of the spring semester of the application year.
- complete the following prerequisite coursework by the end of the spring semester of the application year.

Code	Title	Credits
Biology Sequence		
Complete one of the following Biology sequences:		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	5

BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology ¹	10
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
Advanced Placement (AP) Biology exam score of 4 or 5 ²		
International Baccalaureate (IB) Biology exam score of 4 or 5 ³		
Chemistry Sequence		
Complete one of the following Chemistry sequences:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	10
Physics Course		
Complete one of the following Physics courses:		
PHYSICS 103	General Physics	4
PHYSICS 201	General Physics	5
PHYSICS 207	General Physics	5
Kinesiology Course		
KINES 119	Introduction to Kinesiology	2

¹ Students who take BIOLOGY/BOTANY/ZOOLOGY 151 at UW–Madison or transfer it from another campus must complete both BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152 to be eligible for admission and to complete the degree requirements.

² Credit awarded for BIOLOGY/BOTANY/ZOOLOGY 151 via an AP Biology exam score of 4 or 5 fulfills the entire eligibility requirement for admission & the degree requirements.

³ Credit awarded for BIOLOGY/BOTANY/ZOOLOGY 151 via an IB Biology exam score of 4 or 5 fulfills the entire eligibility requirement for admission & the degree requirements.

- complete all but two of the prerequisite courses listed above by the end of the fall semester of the application year. **Exception:** Students enrolled in BIOLOGY/BOTANY/ZOOLOGY 152 during the spring semester of the application year may have this course and up to two additional prerequisites above in progress during the spring semester of the application year. For this purpose, Advanced General Chemistry (CHEM 109) satisfies the full general chemistry requirement but constitutes one course. BIOLOGY/ZOOLOGY 101 Animal Biology and BIOLOGY/ZOOLOGY 102 Animal Biology Laboratory are counted as two courses in determining eligibility for the program.
- earn a minimum 2.75 cumulative GPA or last 60 credits GPA by the end of the fall semester of the application year (see "Last 60 Credits Rule," below).⁴
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

⁴ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

APPLICATION REVIEW AND SELECTION

Applicants to the Exercise and Movement Science Degree Program in Kinesiology will compete for an identified number of admission openings assigned to this program. Each application will be reviewed by at least two academic faculty or staff from the Admissions Committee. Each committee member will independently examine and rate applicants' files on a scale of 1 (do not accept) to 5 (definitely accept) based on the criteria above. Committee members will then share and discuss their ratings and select the final cohort for admission.

The Admissions Committee will review application files with four key areas in mind:

- **Academic Qualifications.** The kinesiology program seeks students with strong academic credentials. This includes cumulative undergraduate grade point average (GPA), course selection and trend of college grades.
- **Goals.** The required personal statement provides an opportunity for students to express their reasons for studying kinesiology and can provide insight into the student's long-term goals.
- **Recommendation Letters.** Thoughtful letters from teachers or employers addressing the student's interest and experience are beneficial to the selection process. Recommendation letters should provide information about a student's intellect, imagination, or diligence that is not evident in other parts of the application.
- **Other Contributions.** The kinesiology program seeks students whose diverse work experience, life experience, stated goals, and cultural background are assets to the learning environment in the kinesiology program.

PROVISIONAL ADMISSION

Students will be provisionally accepted in April. The offer of admission will be revoked and the student withdrawn from fall Kinesiology courses (typically during July) if any of the following requirements are not met:

- All prerequisite courses completed by the end of the spring semester of the application year.
- Maintenance of a cumulative GPA or last 60-credit GPA of at least 2.75.

CRIMINAL BACKGROUND INVESTIGATION

Criminal background investigations will be conducted for all students admitted to this program. Detailed instructions on how to complete the required criminal background check will be included in offers of admission. This is not completed until after an applicant has been offered admission.

Results of criminal background checks may be shared with other agencies when required by state code, or with a cooperating school or other agency in which the student has been assigned to complete field experiences. Criminal background checks may also be run on students by school districts. Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. Field site administrators have the right to determine the appropriateness of a student placement.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

ADVISING AFTER ADMISSION

Included with the offer of admission is information about mandatory spring orientation sessions for new majors, led by a departmental advisor. Sequencing of coursework and enrollment in Kinesiology courses will be addressed at these meetings. Students will be authorized to enroll in Kinesiology courses after the orientation meetings are completed. Upon formal admission to the program, advising about the major will be provided by the Department of Kinesiology. Majors are required to meet with the departmental advisor at least once per semester. All questions about School of Education and university requirements should be referred to an advisor in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The Exercise and Movement Science degree program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- *Advanced coursework in Exercise and Movement Science* requires at least 11 credits of Kinesiology electives, thus giving students some flexibility to tailor the program to their specific interests.
- *Elective* classes are generally related to the student's area of study and are taken to reach the minimum of 120 credits.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

SCIENCE CORE

Code	Title	Credits

KINES 300	Practicum in Kinesiology	3
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 330	Research in Kinesiology	2
KINES 350	Introduction to Exercise Psychology ¹	3
KINES 361	Motor Learning and Performance	3

¹ KINES 116, KINES 119 and KINES 350 may be taken prior to admission into the professional part of the undergraduate program.

² Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of KINES 116. First Aid certification may substitute for the first aid portion of KINES 116. Students must present both certifications (CPR/AED and first aid) to exempt from KINES 116.

EXERCISE AND MOVEMENT SCIENCE CORE

Select at least 11 credits from the following:

Code	Title	Credits
KINES 325	Group Development and Behavior Management	3
KINES 360	Lifespan Motor Development	3
KINES 390	Principles of Exercise Leadership	2
KINES 427	Fitness Testing and Exercise Prescription	3

KINES/CURRIC 501	Health Information for Teachers	3
KINES 508	Workshop in Kinesiology (Topic: Theories and Strategies for Behavioral Change)	3
KINES/MEDICINE/ NURSING 523	Clinical Exercise Testing & Training	3
KINES/ NUTR SCI 525	Nutrition in Physical Activity and Health	3
KINES 527	Principles of Strength and Conditioning	3
KINES 531	Neural Control of Movement	3
KINES 614	Biological Factors Influencing Exercise Performance	3
KINES 615	Laboratory Techniques in Exercise Physiology	2
KINES 618	Biomechanics	2-3

Select one of the following:

Code	Title	Credits
KINES 355	Socio-Cultural Aspects of Physical Activity	3
KINES 516	Physical Activity for Diverse Abilities	3
KINES 521	Physical Activity and Health	3
KINES 600	Advanced Exercise Psychology	3

ELECTIVE COURSEWORK

Select additional courses to reach the minimum of 120 credits.

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW–Madison campus coursework. Consult the School of Education’s Academic Policies and Procedures (p. 1239) for additional information about the Continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW-Madison coursework.

- Must earn a minimum 2.75 cumulative grade point average. Graduation GPA may be modified by the Last 60 Credits Rule (p. 1239).
- Major residency: Students must complete a minimum of 15 credits from the Department of Kinesiology while enrolled on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Must complete a minimum of 120 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student’s progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a “what if” DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. **Knowledge**
 - a. Students will be able to define and explain major concepts across the breadth of kinesiology.
2. **Application**
 - a. Students will be able to apply their knowledge related to movement and physical activity techniques and approaches in

clinical and applied settings to enhance human health and quality of life.

3. Critical Thinking

- a. Students will demonstrate competence in the scientific research process, which includes the ability to consume, analyze, interpret and critically review scientific literature.

4. Communication

- a. Students will develop appropriate styles of written and oral communication to use both within and outside of the scientific community.

ADVISING AND CAREERS

EXERCISE AND MOVEMENT SCIENCE ADVISING

Students not yet admitted to Kinesiology: Exercise and Movement Science meet with advising staff in Education Academic Services (EAS) and/or the Office of Undergraduate Recruitment and Retention (OURR), see below. Once admitted to the professional program, students are also advised in the Department of Kinesiology.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will

also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or
608-262-1651

www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for

career/major selection. It includes strategies for making the most of a student's academic and student experience.

- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<http://www.education.wisc.edu/kinesiology>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

PHYSICAL EDUCATION, B.S.

The bachelor of science degree in physical education prepares individuals for careers in a variety of areas. At the heart of the degree is the physical education teacher education program, which has been preparing excellent physical educators since 1911. The bachelor of science degree in physical education is the key to obtaining physical education teaching positions in Wisconsin, other states, and internationally.

A degree in physical education also readies individuals for teaching positions outside of school settings. Graduates of the program have pursued successful careers in many positions unrelated to teaching. Program alumni are well represented in the areas of coaching and officiating, recreation, fitness, healthcare, and sport management.

The careers of some of our physical education alumni are highlighted here. (<http://guide.wisc.edu/undergraduate/education/kinesiology/physical-education-bs/%20https://kinesiology.education.wisc.edu/pete/alumni>)

UW–Madison's PE program has recently been redesigned to address emerging trends in physical education pedagogy. Critical elements of the new curriculum include:

- A cutting-edge conceptual approach to teaching physical education
- “Hands-on” guided teaching
- An emphasis on urban, inclusive, and multicultural settings
- Community building and behavior management activities
- Completion of the degree in four years

Physical education students also benefit from:

- Nationally and state recognized faculty and staff members
- Certification options in Adapted Physical Education and Health Education
- Small class sizes and advising groups
- A strong science and technology based curriculum
- Instruction within the nationally ranked UW–Madison School of Education

Graduates are eligible to apply for a Wisconsin Physical Education license at the *Early Childhood through Adolescence* (Pre–K through 12) level.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Undergraduate physical education students generally apply to the professional part of the physical education degree program in their sophomore year. Currently, students are admitted to the program twice a year, effective for the fall or spring semester following selection. Once admitted, students typically spend five semesters completing their remaining coursework.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in physical education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in physical education receive a pre-classification of PED. This classification indicates that a student is interested in physical education, but has not applied and been admitted to the professional part of the undergraduate program.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the School of Education by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the School. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1486)). It is not necessary to be a “pre-professional” student before applying to a

professional program. To remain in good standing, students with a PED classification must maintain campus and semester GPAs of 2.75, as modified by the Last 60 Credits rule. Admission as a “pre-professional” student does not guarantee admission to the professional program.

It is strongly recommended that students interested in physical education consult with an advisor in the Kinesiology department. It would also be helpful to speak with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

Certification to teach physical education requires that a student be admitted into the professional part of the degree program. The School of Education admits students into the physical education program twice a year, effective for the fall or spring semester following selection. Resources limit the number of students who can be served by the UW–Madison Physical Education Teacher Education Program. In recent years the physical education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to physical education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education’s Apply to a Program ([\[www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission\]\(http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission\)\) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.](http://</p>
</div>
<div data-bbox=)

To be considered for admission to the professional program, students must meet the following criteria:

- Total Credits/Prerequisite Coursework: Earn 40 or more credits by the end of the semester in which the application is submitted, including the following prerequisite courses:
 - KINES 116 First Aid and Basic Life Support (2 cr), or exemption. Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of Kines 116. First Aid certification may substitute for the first aid portion of Kines 116. Students possessing current certifications may submit documentation and request a waiver of KINES 116. Students must present both certifications (CPR/AED and first aid) to exempt from the class.
 - KINES 119 Introduction to Kinesiology (2 cr)
- Cumulative Grade Point Average: Earn a minimum 2.75 (on a 4.00 scale) cumulative GPA on all college coursework attempted or a 2.75 cumulative GPA based on the Last 60 Credits Rule (detailed below (p. 1486)) by the end of summer of the application year.¹ This 2.75 GPA must be maintained through the semester during which the application is submitted to remain eligible for admission.
- Complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin’s basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).
- Submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant’s eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student’s last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates’ eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) Currently, retention and graduation GPAs are based on all credits attempted at UW–Madison as an undergraduate student. If each semester's GPA after admission to the program meets the required GPA for retention, the student will be allowed to continue and complete the program. More information on this rule is available here (p. 1239).

ADMISSION CRITERIA

The Admissions Committee will review application files with three key areas in mind:

- **Academic Qualifications:** The Department of Kinesiology and the Physical Education Teacher Education Program seek students with strong academic credentials. This includes cumulative undergraduate grade point average (GPA), course selection, and trend of college grades.
- **Goals:** The required personal statement provides an opportunity for students to express their reasons for pursuing a career in physical education and what has shaped their desire to do so. The admissions committee expects applicants to have a foundational understanding of physical education and to have a sense of some of the issues that physical educators face. Observing or volunteering in physical education settings can help applicants demonstrate an understanding of the field.
- **Other Contributions:** The Department of Kinesiology and the Physical Education Teacher Education Program seek students whose diverse work experiences, life experience, stated goals, and cultural background are assets to the learning environment in both the department and the professional program.

APPLICATION REVIEW AND SELECTION

Applicants to the Physical Education Teacher Education Program will compete for a specific number of openings in the program. Each application will be reviewed by at least two academic faculty or staff from the Admissions Committee. Each committee member will independently examine and rate applicants' files on a scale of 1 (do not accept) to 5 (definitely accept) using a holistic view based on the criteria above. The committee members will then share and discuss their ratings and select the final cohort for admission.

Students will be provisionally accepted in December or May. The offer of admission will be revoked and the student withdrawn from subsequent Kinesiology courses (typically during January or August) if any of the following requirements are not met:

- All prerequisite courses completed by the end of the semester in which the application is submitted.
- Maintenance of a cumulative GPA of last 60-credit GPA of at least 2.75.

If there are more eligible applicants than spaces available, eligible applicants will be rank-ordered for admission based on

1. cumulative GPA or 60-credit GPA and

2. nonacademic factors.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The Physical Education program has six components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science Core* coursework offers in-depth study of the basic sciences and mathematics.

- *Kinesiology Core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- The *Physical Education requirements* focus on advanced study in Physical Education pedagogy, including teaching methods coursework and field experiences in the schools.
- *Education* coursework includes an examination of the school's relationship to our society and also of the processes by which students grow and learn.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

While not required, teaching certifications in Adapted Physical Education (<http://kinesiology.education.wisc.edu/kinesiology/academics/undergraduate-programs/adapted-physical-activity>) and Health Education (p. 1477) are also offered.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

SCIENCE AND KINESIOLOGY CORE COURSES

With the exception of Kines 116, 119 and 121, Kinesiology coursework must be taken after admission into the professional part of the undergraduate program.

Code	Title	Credits
MATH 112	Algebra	3
CHEM 103 or CHEM 108	General Chemistry I Chemistry in Our World	4-5
ANATOMY/ KINES 328 & ANATOMY/ KINES 329	Human Anatomy and Human Anatomy-Kinesiology ¹	5
PHYSIOL 335	Physiology	5
KINES 116	First Aid and Basic Life Support ²	2
KINES 119	Introduction to Kinesiology	2
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 350	Introduction to Exercise Psychology	3
KINES 361	Motor Learning and Performance	3

¹ Effective fall 2017, Anatomy/Kines 328 and 329 will be replaced by Kines 337 and 338.

² Basic Life Support for Healthcare Providers certification or CPR/AED for Professional Rescuers certification may substitute for the CPR/AED portion of Kines 116. First Aid certification may substitute for the first aid portion of Kines 116. Students must present both certifications (CPR/AED and first aid) to exempt from Kines 116.

PHYSICAL EDUCATION COURSES

Code	Title	Credits
DANCE 2	Ballroom Dance I	1
DANCE 205	Dance	1
KINES 104	Aquatics	1
KINES 121	Foundations of Physical Education	2
KINES 315	Assessment and Research in Physical Activity Pedagogy	3
KINES 316	Adapted Physical Activity	3
KINES 325	Group Development and Behavior Management	3
KINES 327	Current Topics in Outdoor Pursuits	1

KINES 353	Health and Physical Education in a Multicultural Society	2
KINES 355	Socio-Cultural Aspects of Physical Activity	3
KINES 360	Lifespan Motor Development	3
KINES 370	Planning, Teaching and Assessment in Physical Education	3
KINES 371	Methods of Teaching PK-12 Dance and Gymnastics	3
KINES 372	Methods of Teaching PK-12 Educational Games and Fitness	3
KINES 373	Methods of Teaching Secondary Sport Concepts and Skills	3
KINES 375	Practicum in Physical Education	3
KINES 412	Organization and Administration of Physical Education	2
KINES/CURRIC 478	Elementary School Physical Education Student Teaching	6
KINES/CURRIC 479	Middle School or High School Physical Education Student Teaching	6

PROFESSIONAL EDUCATION COURSES

Code	Title	Credits
Learning (Minimum of 3 credits)		
ED PSYCH 301	How People Learn	3
Foundations of the Profession: (Minimum of 3 credits)		
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	
Literacy, Including Reading:		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts (also meets Communication Part B requirement)	3

ADDITIONAL CERTIFICATION OPTIONS

Physical Education students are encouraged to increase their content knowledge and teaching capabilities through additional training. Although not required, teaching certifications are available in health education and adapted physical education. Students may pursue more than one additional certification.

HEALTH EDUCATION MINOR, 30 CREDITS.

Contact Bonnie Klassy, bjklassy@wisc.edu, (bjklassy@wisc.edu) 608-558-0227, for additional information about the Health Education minor (p. 1477).

ADAPTED PHYSICAL EDUCATION, 15 CREDITS.

Contact Tim Gattenby, gattenby@education.wisc.edu, 608-262-9562, for additional information regarding Adapted Physical Education (<https://kinesiology.education.wisc.edu/home/adapted-fitness-personal-training>) at UW-Madison.

Certification in Adapted Physical Education requires:

Code	Title	Credits
Required Courses		
KINES 316	Adapted Physical Activity (required of all PE majors)	3
KINES 300	Practicum in Kinesiology (Adapted Sport and Fitness:Adults)	1-3
KINES 364	Assessment and Programming in Adapted Physical Education	3
KINES 365	Practicum: Adapted Physical Education (Children)	2
RP & SE 300	Individuals with Disabilities	3
Select one elective. Requires advisor approval.		
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 450	Collaborating with Families of Individuals with Disabilities	3
RP & SE 470	Individuals with Learning and Behavioral Disabilities	3
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	3
RP & SE/ CURRIC 506	Strategies for Inclusive Schooling	3
CS&D 110	Introduction to Communicative Disorders	3
CS&D 240	Language Development in Children and Adolescents	3
CS&D 424	Sign Language I	2
PSYCH 405	Abnormal Psychology ¹	3-4
PSYCH 512	Behavior Pathology-Psychoses	3

¹ Effective fall 2017, the course number of Abnormal Psychology changed from Psych 509 to 405.

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW–Madison campus course work. Consult the School of Education's Academic Policies and Procedures (p.) for additional information about the continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- A minimum of 120 credits.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework

(numbered 300–699) in residence on the UW–Madison campus.

- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1492).

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Standard 1: Incorporates Understanding of Human Learning and Development. Teachers design learning environments and pedagogical practices for students that are grounded in concepts and interpretive frameworks provided by disciplines that study human development and learning.
2. Standard 2: Understands Social Context of Schooling. Teachers understand how local, state, national, and global social and political contexts differentially affect schooling and its outcomes for students.
3. Standard 3: Demonstrates Sophisticated Curricular Knowledge. Teachers understand the central concepts, assumptions, tools of inquiry, ways of reasoning, uncertainties, and controversies of exercise science and physical educations.
4. Standard 4: Demonstrates Pedagogical Knowledge in Specific Domains. Teachers are knowledgeable about the problems, challenges, and opportunities that commonly arise as students develop understanding or competence in physical education.
5. Standard 5: Explains and Justifies Educational Choices. Teachers can articulate and defend their curricular and instructional choices with sound ethical and pedagogical justifications.
6. Standard 6: Connects School and Community. Teachers use the knowledge and abilities necessary for collaboration with individuals, groups, and agencies within the school and community. They base instruction of students on an understanding of curricular goals, subject matter, and the community, and help the students make connections between community-based knowledge and school knowledge.
7. Standard 7: Understands and Adapts to Multiple Forms of Communication. Teachers understand and adapt to students' multiple forms of expressing and receiving experiences, ideas, and feelings.
8. Standard 8: Employs Varied Assessment Processes. Teachers understand and thoughtfully use formal and informal evaluation strategies to assess students' achievements, strengths, challenges, and learning styles for continuous development.
9. Standard 9: Manages Learning Environment. Teachers establish and maintain an environment that engages students in learning while providing for their physical and socio-emotional well-being.
10. Standard 10: Employs Varied Instructional Strategies. Teachers understand and use a variety of instructional strategies to enhance students' learning.

11. Standard 11: Uses Technologies. Teachers appropriately incorporate new and proven technologies into instructional practice. They understand the major social, cultural, and economic issues surrounding their implementation.
12. Standard 12: Accommodates for All Students. Teachers design educational environments and use instructional practices that accommodate students' achievements, strengths, challenges, interests, and learning styles.
13. Standard 13: Is a Reflective Practitioner. Teachers are reflective practitioners who evaluate the effects of their assumptions, choices, and actions on others (students, parents, and other professionals in the learning community) and who actively seek out opportunities to grow professionally. They examine assumptions enmeshed in ways of thinking and in familial, institutional, and cultural lore, and practices.
14. Standard 14: Relates Well with Students, Families, and Communities. Teachers relate to students, families, and community members in a fair, respectful, and sensitive manner. They show an appreciation for the cultural diversity of our society.
15. Standard 15: Understands Legal Rights and Responsibilities. Teachers understand the legal rights and responsibilities of professional educators and the law as it applies to their specific domains of teaching.

around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

ADVISING AND CAREERS

ADVISING

PHYSICAL EDUCATION ADVISING

Prospective off-campus and on-campus physical education students will meet with Dan Timm in the kinesiology department. Students considering physical education should schedule an appointment with Dr. Timm as soon as possible; call 608-262-0259. Pre-admission advising is conducted by the kinesiology department and staff at Education Academic Services (EAS), see below.

Students with either a pre-certification (PED) or certification (BSPE) classification are required to meet with their department advisor at least once per semester. Mandatory advising meetings are conducted every semester, just before enrollment begins for the following semester.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651

www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do

- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<http://www.education.wisc.edu/kinesiology>)

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in

course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test

requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates (i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.*

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre–student teaching practica. Students should check for other

possible course requirements in their specific area of study.

- Passing a content examination in the certification area(s).
- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. “Extenuating circumstances” have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student's program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a “D”) from a field experience may not repeat such experiences without approval from the program coordinator and Associate

Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student's withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps

to demonstrate students' achievement of these knowledge and performance standards.

- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence level*. The Special Education/Elementary Education dual major option

certifies students only at the *Middle Childhood through Early Adolescence* level.

- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION

The Department of Rehabilitation Psychology and Special Education prepares personnel, through professional education, research, and service, for the education and/or rehabilitation of people of all ages with disabilities. Instruction and research emphasize educational and behavioral assessment and treatment of children, as well as counseling, assessment, case management, advocacy, and job placement with adults to facilitate improved personal, social, and vocational adjustment.

Targeted populations encompassed by the program include adults and children with physical disabilities, emotional disabilities, intellectual disabilities, learning disabilities, traumatic brain injuries, alcohol and other drug abuse, and persons involved with the criminal justice system.

Special education and rehabilitation psychology are intrinsically related, both in basic objectives and in professional education and research. The instructional program includes core study areas, practica, and research experiences relevant to the development of various professional roles.

Three undergraduate programs are available to undergraduate students:

- A cross-categorical teacher certification program in Special Education. (p. 1503)
- A pre-professional undergraduate program in Rehabilitation Psychology (p. 1497).
- A Special Education/Elementary Education dual major (<http://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-bse/#requirementstext>) is also being offered jointly with the Department of Curriculum and Instruction.

DEGREES/MAJORS/CERTIFICATES

- Rehabilitation Psychology, B.S. (p. 1497)
- Special Education, BSE (p. 1503)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website. (<http://rpse.education.wisc.edu>)

REHABILITATION PSYCHOLOGY, B.S.

Rehabilitation Psychology is the academic home to many students interested in the health or helping professions. Rehab Psych students enjoy working with people with disabilities. They gravitate toward psychology and other coursework in the social sciences.

In this major, students learn how to promote and support the independence and full inclusion of people with disabilities in employment and the community. Various types of disabilities examined in the major include physical, mental, intellectual, emotional, and developmental disabilities. Graduates are prepared to provide quality entry-level general services in a variety of community settings, including advocacy, behavioral support, independent living, and supported employment.

Many students go on to complete graduate programs in rehabilitation counseling, mental health counseling, occupational therapy, physical therapy, nursing, special education, social work, and other human services and health professions.

The rehabilitation psychology program emphasizes course work in the following areas:

- Psychology and educational psychology
- Sociology and social work
- Rehabilitation services and community supports for individuals with disabilities
- Biological, psycho-social, and vocational aspects of working with individuals with disabilities
- Positive psychology and health promotion for individuals with disabilities
- Working collaboratively with community agencies advocating and supporting individuals with disabilities

The culminating experience in the degree program is the community-based internship. Students complete six credits of internship working with agencies that serve individuals with disabilities. Graduates receive a bachelor of science degree with a major in rehabilitation psychology.

Visit the departmental website for more information about the undergraduate program (<http://rpse.education.wisc.edu/rpse/programs/undergraduate-programs/rehabilitation-psychology-undergraduate-program>), the field of rehabilitation psychology (<https://rpse.education.wisc.edu/rpse/programs/graduate-degree-programs/rehabilitation-psychology-graduate-program/the-profession-of-rehabilitation-counseling>), and what current students have to say (<http://youtu.be/Zu0u1MOjvB4?list=PL9F9013685146C73A>) about the program.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the rehabilitation psychology undergraduate program twice a year, for the fall and spring semesters. Students usually apply for admission to the rehabilitation psychology program during their sophomore year. Selection to the program will be made at the end of the fall and spring semesters, after the previous semester grades are reported.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW-MADISON STUDENTS

New freshmen and transfer students interested in rehabilitation psychology are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the School, but has not applied and been admitted to the professional program. Students interested in rehabilitation psychology receive the "pre-professional" classification of PSR.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the School of Education by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified

by the Last 60 Credits rule (detailed below (p. 1498)). It is not necessary to be a "pre-professional" student before applying to a professional program. Admission as a "pre-professional" student does not guarantee admission to the professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an School of Education advisor in advance of their application. Consultations with advisors are available in person and via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

ELIGIBILITY FOR ADMISSION TO THE PROFESSIONAL PROGRAM

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission, applicants must:

- complete at least 54 credits of transferable college-level coursework by the end of the semester the application is filed.
- complete RP & SE 300 Individuals with Disabilities by the end of the program-application semester.

- earn a cumulative grade point average of 2.5 (on a 4.0 scale) based on all transferable college-level coursework attempted.¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to the program. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

APPLICATION REVIEW AND SELECTION

Selection to the program will be made at the end of the fall and spring semesters, after the previous semester grades are reported. The number of applicants admitted each semester will be determined by the faculty according to available resources. While all eligible applicants have been admitted to the professional program in recent years, this may not always be the case; see stipulations below. Admission is not final until all acceptance related materials are received by EAS and criminal background investigation results are reviewed.

If the applicant pool exceeds the resources available for any admission period, admission will become limited and competitive. Selection will be based upon cumulative grade point average. Remaining students will be placed on a waiting list based on ranked order of cumulative grade point average.

CRIMINAL BACKGROUND INVESTIGATION

Criminal background investigations will be conducted for all students admitted to this program. Detailed instructions on how to complete the required criminal background check will be included in offers of admission. This is not completed until after an applicant has been offered admission.

Results of criminal background checks may be shared with other agencies when required by state code, or with a cooperating school or other agency in which the student has been assigned to complete field

experiences. Criminal background checks may also be run on students by school districts. Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. Field site administrators have the right to determine the appropriateness of a student placement.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The bachelor of science (B.S.) degree program in rehabilitation has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Related coursework* comes from departments related to Rehabilitation Psychology—Psychology, Educational Psychology, Sociology, Social Work, and Educational Policy Studies.
- *Rehabilitation Psychology* coursework offers an in-depth study of rehabilitation psychology, including multiple opportunities for supervised field work. In addition, at least 6 credits of electives in rehabilitation psychology are required, giving students some flexibility to tailor the program to their specific interests.

- *Elective* coursework is taken to meet the minimum of 120 credits required for the degree.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

RELATED COURSE REQUIREMENTS

PSYCHOLOGY/EDUCATIONAL PSYCHOLOGY

Complete 18 credits selected from Educational Psychology (http://guide.wisc.edu/courses/ed_psych) and/or Psychology (<http://guide.wisc.edu/courses/psych>) to include PSYCH 405 Abnormal Psychology

Note: Effective fall 2017, the course number of Abnormal Psychology changed from Psych 509 to PSYCH 405.

SOCIOLOGY/SOCIAL WORK

Complete 9 credits selected from Sociology (<http://guide.wisc.edu/courses/soc>) and/or Social Work (http://guide.wisc.edu/courses/soc_work). Recommended areas include social disorganization, deviant behavior, alcohol and other drug abuse, community development, and issues in social welfare.

EDUCATIONAL POLICY STUDIES

Complete a 3-credit course from Educational Policy Studies (http://guide.wisc.edu/courses/ed_pol).

Code	Title	Credits
Recommended Courses		
ED POL 300	School and Society	3
ED POL 460	Immigration, Education, and Equity	3
ED POL 500	Topics on Social Issues and Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3

REHABILITATION PSYCHOLOGY COURSE REQUIREMENTS

These requirements are first effective for summer 2017 program admission.

DIDACTIC CORE

Complete the following 18 credits:

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations	3
RP & SE 501	Rehabilitation-Counseling Psychology: Applications	3
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	3
COUN PSY 650	Theory and Practice in Interviewing	3
RP & SE 660	Special Topics (Health Promotion for Disability and Chronic Illness)	3

SUPERVISED FIELD EXPERIENCE

Students are required to take 6 credits of RP & SE 630 Internship in Rehabilitation or Special Education; once in conjunction with RP & SE 501. The remaining 3 credits may be completed in another semester.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION ELECTIVES

Complete 6 credits from the following:

Code	Title	Credits
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 401	Augmentative and Alternative Communication and Assistive Technology for Students with Disabilities	1
RP & SE 402	Methods in Teaching Functional Skills	1
RP & SE 405	Current Topics in Special Education	1
RP & SE 660	Special Topics (Positive Psychology, Substance Abuse topics only)	3

The course options listed below can also be applied toward this requirement, but only if taken **summer 2017 or earlier**.

Any courses from the departments of Rehabilitation Psychology and Special Education (http://guide.wisc.edu/courses/rp_se), Counseling Psychology (http://guide.wisc.edu/courses/coun_psy), Psychology (<http://guide.wisc.edu/courses/psych>), Educational Psychology (http://guide.wisc.edu/courses/ed_psych), Sociology (<http://guide.wisc.edu/courses/soc>), Social Work (http://guide.wisc.edu/courses/soc_work), and the following:

Code	Title	Credits
KINES/CURRIC 501	Health Information for Teachers	3
KINES/CURRIC/ ELPA 541	Organization and Administration of School Health Programs	3
KINES/CURRIC 561	Teacher Education in Human Sexuality	3
KINES/CURRIC 567	Issues, Materials and Methods in Health Education	3
KINES 508	Workshop in Kinesiology ¹	1-3
GEN&WS 371	Disability and Gender in Film	3

¹ The only topic accepted to meet the requirement is Adaptation of Physical Education Programs.

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.50 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.50 cumulative grade point average in all major coursework. This GPA includes all coursework from the RP & SE department and Coun Psy 650.
- Major Residency. The rehabilitation psychology program requires that students complete 15 credits of the Didactic

Core and Supervised Field Experience coursework while in residence on the UW–Madison campus.

- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits. A minimum of 120 degree credits are required for graduation.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Students will be able to analyze complex social issues using skills gained through the study of communication, quantitative reasoning, humanities, social sciences, natural sciences, ethnic studies, history and global issues.
2. Students will understand the concept of disability in American society and demonstrate basic knowledge of issues that affect education, rehabilitation, and healthcare services for individuals with chronic illnesses and disabilities.
3. Students will identify basic theories in the field of psychology and recognize the importance of theoretical foundations in psychology for the study of rehabilitation, disability, and health.
4. Students will successfully engage with the healthcare and rehabilitation services professional community to develop knowledge of the health and human services delivery systems, and pre-professional skills in communication, teamwork, problem solving, and ethical issues.
5. Students will be prepared for graduate study in a variety of health and human service fields related to disability and rehabilitation, or for entry-level positions in a variety of disability and related human services agencies.

ADVISING AND CAREERS

REHABILITATION PSYCHOLOGY ADVISING

Students not yet admitted to rehabilitation psychology meet with their assigned advisor in Education Academic Services (EAS) and/or the Office of Undergraduate Recruitment and Retention (OURR), see below. Students are assigned an additional departmental advisor when admitted to the professional component of their degree program.. For general information about the program and degree requirements, contact Virginia Waddick, RP & SE Student Services Coordinator, vwaddick@education.wisc.edu, 608-263-4608.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school

regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651
www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials

- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

ADDITIONAL RESOURCES

Students interested in occupational and physical therapy may also want to consult the following resources about graduate programs:

- Center for Pre-Health Advising (<https://prehealth.wisc.edu>)
- Occupational Therapy at UW–Madison: Advising Video and Program Information (<https://www.youtube.com/watch?v=TldmMjPKWRI&feature=youtu.be>)
- Physical Therapy at UW–Madison (<http://www.med.wisc.edu/physical-therapy-program/main/48437>)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website. (<http://rpse.education.wisc.edu>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

SPECIAL EDUCATION, BSE

The special education program is the academic home to many students who enjoy working with children, and especially children with disabilities. Special education graduates enter a high-need field with an almost 100% job placement rate after graduation. Employment opportunities are available all across the country.

The special education teacher certification program prepares educators to serve as resources and advocates for persons with disabilities and their families. This includes being a leader, collaborating with others, and working creatively within and outside the schools to create inclusive educational experiences to improve the quality of life for individuals with disabilities and their families.

The special education program prepares students to work effectively across disability categories including intellectual and developmental disabilities, learning disabilities, and emotional/behavioral disabilities. The program emphasizes course work and experiences in elementary, middle, and high schools with students who have a wide range of abilities, including students with severe disabilities.

Graduates receive a Bachelor of Science degree with a major in Special Education and are eligible to apply for a Wisconsin cross-categorical Special Education license at the Middle Childhood through Early Adolescence level (ages 6-12/13), and also at the Early Adolescence through Adolescence level (ages 10-21).

The Special Education program emphasizes coursework in areas including:

- Assessing learning needs in all core academic areas
- Creating individualized education plans
- Implementing instructional strategies for helping students with a variety of abilities succeed
- Using assistive technology
- Understanding behavior and intervention strategies for social and academic success
- Diversity issues in special education
- Working collaboratively with teachers and other school professionals to create successful inclusive learning environments

Students learn about these topics through a four-semester sequence of coursework, practicum experiences, and student teaching experiences in elementary, middle, and high schools.

Visit the departmental website for more information about the undergraduate program options (<http://rpse.education.wisc.edu/rpse/programs/undergraduate-special-education-program>) in Special Education.

ELEMENTARY EDUCATION AND SPECIAL EDUCATION DUAL MAJOR CERTIFICATION PROGRAM

Students interested in Special Education may want to consider another program option that certifies students in both Elementary Education and Special Education. The job placement rate for students graduating from this program is almost 100%. Employment opportunities are available all across the country.

The Elementary-Special Education teacher certification program prepares educators who foster high academic achievement in all children - particularly learners from diverse racial, cultural, linguistic, socioeconomic backgrounds and abilities. The program helps students become leaders who collaborate and work creatively within and outside schools to foster inclusive educational experiences for all pupils, including those with disabilities. Program graduates understand the important role that families play in supporting students' development and achievement.

This program emphasizes collaboration, with training in both Elementary and Special Education methodologies. It focuses on inclusion and gaining a strong background in working with students across disability categories, including learning disabilities, emotional/behavioral disabilities, and other high incidence disabilities.

Graduates receive a Bachelor of Science degree and are eligible to apply for both a Wisconsin Elementary Education license at the Middle Childhood through Early Adolescence level (ages 6-12/13), and a cross-categorical Special Education license at the Middle Childhood through Early Adolescence level.

The Elementary Education-Special Education program emphasizes course work in areas including:

- Recognizing how our backgrounds and experiences shape thinking and actions; reflecting and adapting to best serve students
- Assessing learning needs in all core academic areas
- Creating individualized education plans
- Understanding behavior and intervention strategies for social and academic success
- Diversity and social justice in education
- Working collaboratively with teachers and other school professionals to create successful inclusive learning environments

Students learn about these topics through a four-semester sequence of course work, practicum experiences and student teaching experiences in elementary and middle schools. The sequence begins in the fall after program admission.

Information about requirements and application procedures for the Elementary-Special Education dual teacher certification program is available in the Elementary Education (<http://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-bse/#requirementstext>) section of the Guide. The RP & SE departmental website can also provide for more information about the two undergraduate program options (<http://rpse.education.wisc.edu/rpse/programs/undergraduate-special-education-program>) in Special Education.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Undergraduate students generally apply to the professional part of the special education degree program in their sophomore year. Selection is made during the spring semester. Currently, students are admitted to the program once a year, effective for the summer following selection. Once admitted, students typically spend four semesters completing their remaining coursework.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in special education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in special education receive the “pre-professional” classification of PSR.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p.)). It is not necessary to be a “pre-professional” student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic

Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

APPLICATION AND ADMISSION

Certification to teach special education requires that a student be admitted into the professional part of the degree program. The School of Education admits students into the special education program one a year, effective for summer following selection. Resources limit the number of students who can be served by the UW–Madison Special Education Teacher Education Program. In recent years the program has been able to accommodate all qualified applicants; however, if the number of qualified applicants exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission to the professional program, applicants must:

- complete at least 40 transferable college-level credits by the end of the fall semester before application.
- successfully complete RP & SE 300 Individuals with Disabilities (3 cr) by the end of the summer semester of the application year.
- earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted.¹
- complete the Basic Skills Requirement. All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin’s basic skills test requirement for prospective teachers. For more information see the document Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>).

- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility for program consideration. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

PROGRAM SELECTION CRITERIA

The special education faculty will review all completed applications that meet eligibility criteria. When reviewing an application, special education faculty want to learn as much about the applicant as possible and will make every effort to take into account the whole person. Applicants are encouraged to provide, in writing, whatever they would want to share in a face-to-face interview.

The selection committee members will consider several factors when selecting students for the program. Grade point average (GPA) and basic skills test scores will be a part of the evaluation process. Although these numerical scores are considered important indicators of success, they are not the only basis on which applicants will be selected for admission. Trends in the applicant's grades, difficulty of course load, and outside work load will be considered (see factors 1, 2, and 3 below). The basic skills test was designed primarily to assess mastery of basic skills in reading, writing and mathematics. High or low basic skills test scores may be considered in marginal situations.

In addition to GPA and basic skills test scores, faculty will consider the following factors:

- **College grading and course selection pattern.** Transcripts will be examined individually. Account will be taken whether an applicant has clearly followed an unusually easy or difficult pattern of courses or if the GPA reflects a poor grade in an exceptionally difficult subject area.
- **Trends of college grades.** An applicant who started very poorly or showed a decline in their early phases of college, but performed strongly in later college years, may be judged more

favorably than another with the same GPA but level or declining record.

- **Diversity of experience or background.** Work/life experience, college activity, political activity, and other experiences or background that adds a diverse perspective to the special education student body may work in the applicant's favor. Volunteer or paid work with people with disabilities will be taken into account in the selection process. Volunteer or paid work with people from a background different than the applicant's may also be taken into account in the selection process.
- **Writing sample (Statement of Purpose).** Application materials must include an essay in which the applicant gives reasons for becoming a special education teacher. Writing is so important in the professional life of teachers and in the teacher education program that the quality of the applicant's writing will be taken into account in making admissions decisions.
- **Letters of recommendation.** Recommendation letters will play an important role in helping the selection committee judge the applicant's prospects for academic success in the program. Careful, thoughtful letters from mentors, teachers, or employers will provide information about the applicant's intellect, imagination, or prospects for becoming a successful teacher. Working with people with disabilities will be taken into account in the selection process. Working with people from a background different than the applicant's may also be taken into account in the selection process.
- **Other factors.** The program's quest for diversity leads the selection committee to take into account fully qualified applicants from under-represented groups. Race, ethnicity, cultural, geographic background, and economic disadvantage are among the factors that will be considered, taking into account the needs of the schools. A full-time or extra heavy part-time work load will be considered a factor in close cases.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The Special Education program has four primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn.
- *Core Requirements* offer an in-depth study of Special Education, including a four-semester *professional sequence* of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- *Elective* coursework is taken to reach the required minimum of 120 credits.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education

program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

PROFESSIONAL EDUCATION REQUIREMENTS

Individuals with Disabilities

This course is a prerequisite for admission to the Special Education program. It must be completed by the end of the summer of the application year.

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3

Development (Minimum of 3 credits)

Code	Title	Credits
------	-------	---------

Select one of the following options:

Option 1	3
ED PSYCH 331	Human Development From Childhood Through Adolescence (Recommended for all certification levels)
Option 2	5-6
ED PSYCH 320	Human Development in Infancy and Childhood ¹
or PSYCH 460	Child Development

ED PSYCH 321	Human Development in Adolescence	
--------------	----------------------------------	--

¹ Effective fall 2017, the course number of Child Psychology changed from Psych 560 to 460.

Learning (Minimum of 3 credits)

Code	Title	Credits
ED PSYCH 301	How People Learn	3

Foundations of the Profession (Minimum of 3 credits)

Code	Title	Credits
Select one of the following:		
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	

CORE REQUIREMENTS (INCLUDES PROFESSIONAL SEQUENCE)

RP & SE 300 Individuals with Disabilities is a prerequisite for admission to the Special Education program. This course must be completed by the end of the summer of the application year and is calculated into the major gpa required for graduation.

SPECIAL EDUCATION PROFESSIONAL SEQUENCE

Students complete a four-semester sequence of professional courses after admission to the program. The professional methods courses and clinical (field) experiences must be followed sequentially and taken in consecutive semesters. Class schedules for the professional sequence courses are determined in advance.

Code	Title	Credits
Semester 1		
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities (may be taken prior to admission to the Special Education program)	3
RP & SE 466	Diversity in Special Education (may be taken prior to admission to the Special Education program)	3
RP & SE/CURRIC 506	Strategies for Inclusive Schooling	3
RP & SE 464	Diagnosis, Assessment, and Instructional Planning in Special Education	4
RP & SE 402	Methods in Teaching Functional Skills (recommended this semester)	1
Semester 2		
RP & SE 465	Language and Reading Instruction for Students with Disabilities (Meets Communication B requirement)	4
RP & SE/CURRIC 365	Teaching Mathematics in Inclusive Settings	4
CURRIC 374	General Educ Practicum & Instructional Planning for Diverse Learners	2-5
RP & SE 473	Management: Students with Learning and Behavioral Disabilities	3

RP & SE 401	Augmentative and Alternative Communication and Assistive Technology for Students with Disabilities (recommended this semester)	1
-------------	--	---

Semester 3

RP & SE 477	Special Education Student Teaching: Middle Childhood - Early Adolescence (Full-day student teaching following the school district calendar)	6-12
-------------	---	------

RP & SE 467	Elementary Student Teaching Seminar	2
-------------	-------------------------------------	---

RP & SE 403	Promoting Adolescent Literacy for Students with Disabilities (recommended this semester)	1
-------------	--	---

Semester 4

RP & SE 478	Special Education Student Teaching: Early Adolescence - Adolescence (Full-day student teaching following the school district calendar))	10
-------------	---	----

RP & SE 472	Methods in Transition and Vocational Education	3
-------------	--	---

RP & SE 468	Secondary Student Teaching Seminar	2
-------------	------------------------------------	---

RP & SE 404	Methods in Teaching Science & Social Studies for Students with Disabilities (recommended this semester)	1
-------------	---	---

RP&SE MODULES

Students are required to complete all four of the following one-credit modules after admission to the program. Most students complete one or two modules during each semester of the professional program and a suggested sequence is listed above. Consult with the program advisor for information on when each of the modules will be offered. At least one will be offered each semester.

Code	Title	Credits
RP & SE 401	Augmentative and Alternative Communication and Assistive Technology for Students with Disabilities	1
RP & SE 402	Methods in Teaching Functional Skills	1
RP & SE 403	Promoting Adolescent Literacy for Students with Disabilities	1
RP & SE 404	Methods in Teaching Science & Social Studies for Students with Disabilities	1

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty advisor(s) to receive certification through UW–Madison. The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1239).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- Minimum 120 credits (degree candidates only). Most students will need more than the minimum to complete all requirements.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and

certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available on the department's website (<http://rpse.education.wisc.edu/rpse/programs/undergraduate-programs/special-education>) and under Certification/Licensure. (p. 1510)

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- Professionalism: The teacher candidate will adhere to professional ethical standards and conduct her or himself in a courteous and professional manner.
- Collaboration and Communication: The teacher candidate will collaborate and effectively communicate with students their families, other educators, related service providers and members of the community to address the needs of students with disabilities.
- Assessment: The teacher candidate will collect information on student backgrounds, learning characteristics and achievement that can be used to determine students' present level of performance and guide instruction.
- Special Education Evaluation and Individualized Educational Planning: To the maximum possible the teacher candidate will participate in the Educational Evaluation and Individualized Educational Planning process.
- Instructional Planning: The teacher candidate will plan instruction that meets the needs of students, is consistent with State and local standards and provides access to the general education curriculum.

- **Instructional Presentations:** The teacher candidate will present lessons and units of instruction that gain and maintain student attention and are consistent with students' interests and IEP goals.
- **Classroom Management:** The teacher candidate will create and maintain a safe, positive and supportive learning environment that is conducive to learning and the mental health of the students.

ADVISING AND CAREERS

SPECIAL EDUCATION PROGRAM ADVISING

Students not yet admitted to special education meet with their assigned advisor in Education Academic Services (EAS) and/or the Office of Undergraduate Recruitment and Retention (OURR), see below. Students are assigned an additional departmental advisor when admitted to the professional component of their degree program. For general information about the program and degree requirements, contact Virginia Waddick, RP & SE Student Services Coordinator, vwaddick@education.wisc.edu, 608-263-4608.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651
www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students

with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651

www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.

- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

ADDITIONAL RESOURCES

Students interested in special education may also want to consult the following resources:

- Read about the work of Special Educators: *What is Special Education?*
- Read about the *relationship between Special Education and regular education programs*.
- *Watch a Video* describing the work of Special Educators.
- Read about why current students and alumni chose this major at UW–Madison: *Teacher Tuesday*
- *Learn About Related Careers*

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website. (<http://rpse.education.wisc.edu>)

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Basic Skills Requirement, the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification must complete the following requirements. See the school's website (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Criminal Background Investigation Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Criminal Background Investigation (CBI)

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work.

Students should be aware that criminal background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

Environmental Education

This licensing requirement is mandatory for all Elementary Education, Secondary Science, Secondary Social Studies, and Agri-Science Education certification students. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Student Testing and Assessment

Students in teacher education programs are required to complete a number of tests and a significant performance assessment prior to certification and eventual licensure. Detailed information related to these requirements, along with fee and registration information can be found on the School of Education website under Academic Tests for Prospective Teachers (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/student-testing-and-assessment>). A brief description of these tests and assessments is provided below.

Basic Skills Requirement

All prospective teacher education students must submit test scores to the School of Education to be eligible for professional program admission. Students may use their ACT, SAT, or GRE scores, or they may take the Praxis Core Academic Skills for Educators Test (formerly the Praxis I/PPST). These tests meet Wisconsin's basic skills test requirement for prospective teachers. All sections of the chosen basic skills test must be taken by program applicants to be eligible for program admission.

Content Test

Students completing professional education programs must take and pass an approved examination in their content area prior to their final student teaching semester. Most students complete the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS). World Language Education students must meet an ACTFL Oral Proficiency Interview requirement and must take and pass the ACTFL Writing Proficiency Test (WPT). No candidates may be waived from taking the required test(s) for their license area.

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations Reading Foundations Test. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test. This test is in addition to all other required tests and assessments for certification and licensure. For instance, students must still take and pass the Praxis II content exam to be eligible to student teach.

Teacher Performance Assessment (edTPA)

The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics. *After August 31, 2015, initial license candidates (i.e., students completing certification programs) must complete the edTPA as part of their student teaching and after August 31, 2016, initial license candidates will be required to pass the edTPA before they can be recommended for licensure.*

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. In fact, the student teaching experience is frequently cited in teacher education literature as the single component of a teacher education program with the highest impact on future teaching behaviors of teacher candidates. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not

assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience. For this reason, active student engagement in the practicum experience is necessary and expected.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events. Daily attendance at school, barring emergencies, is required.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Find detailed policies and regulations regarding student teaching in the Teacher Education Field Experience Policies (November, 2014) (http://www.education.wisc.edu/docs/WebDispenser/soe-documents/fe_policies.pdf?sfvrsn=4). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

General Eligibility Requirements for Student Teaching

Minimum eligibility requirements apply to all students. Several subject areas require a specific grade point average unique to a particular program, or additional course work as a prerequisite to student teaching. Students are urged to check with their Education Academic Services and faculty advisors to be certain that all eligibility requirements have been met. Students should check these items well in advance to preclude last-minute schedule conflicts in preparation for the student teaching semester. Minimum requirements are:

- Admission to a School of Education certification program.
- Completion of all course prerequisites, such as the teaching methods course(s) and pre-student teaching practica. Students should check for other possible course requirements in their specific area of study.
- Passing a content examination in the certification area(s).

- For world languages, an immersion experience and the appropriate score on the oral and written proficiency examinations.

Student Teaching Application Procedures

Information related to student teaching (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/field-work-student-teaching>) and the application process is available on the School of Education website. Please be aware that some program areas require students to file an application far in advance of the student teaching semester.

Alternative Placement Options for Student Teaching

Alternative placement options include placements with the Institute for Urban Education, and teacher internships under the auspices of the Wisconsin Improvement Program:

- The UW System Institute for Urban Education (<https://uwm.edu/education/community/partnerships/institute-urban-edu>) helps pre-service teachers pursue their desire to become urban educators and to provide professional development opportunities for currently practicing teachers. Not all teacher education programs participate in the institute. Students should consult with their program coordinator for more information.
- The teacher internship is a licensed, full-semester assignment that replaces the student teaching experience. Interns are under contract with a school district and paid a modest salary. Internships are rarely available; students are notified by the program coordinator when they are offered by a district and are available to our students.

Special Placements

The School of Education is committed to placing its students in classrooms with teachers we know, in schools led by principals we know. Thus, student teaching placements are made within the University of Wisconsin–Madison service area. In general the service area is 50 miles from Madison, but individual programs may (and do) reduce the size of their service area. Occasionally, students with extenuating circumstances are allowed special placements beyond this area. “Extenuating circumstances” have included spousal/partner relocation, family emergency, or a highly specialized placement. All special placements must be approved by the student's program coordinator and Associate Dean Jeffrey Hamm. Students permitted special placements are usually liable for the cost of supervision (at least \$500). Special placements are not permitted due to financial need or to enhance employment opportunities.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a “D”) from a field experience may not repeat such experiences without approval from the program coordinator and Associate Dean Jeffrey Hamm. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without

written permission from the program coordinator and after consultation with Associate Dean Hamm.

Permission to repeat field experiences is not automatically granted. A confirmed field placement is considered an informal contractual agreement between the university and the school in which the student is located. Under this agreement, university faculty, cooperating teachers, and students assume certain responsibilities and obligations to one another. A student's withdrawal from an assignment is considered to be an exception to the agreement and should occur only under the most unusual circumstances. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator and Associate Dean Hamm to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations. For more detailed information about how required courses address Minority Group Relations for each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.

- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work. For more detailed information about how conflict resolution is addressed in each program area, see the School of Education's PI 34 site (<http://www.education.wisc.edu/pi34>). Choose Certification Programs, select the program of interest, and click on Rules & Statutes.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies (and Agri-Science) Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator, Professor Alan Lockwood (lockwood@education.wisc.edu), regarding its completion.

Portfolios

Students in certification programs are required to demonstrate their knowledge and professional development through the creation and maintenance of a portfolio. A portfolio has several purposes:

- To serve as a tool for teacher learning, growth, and development. Portfolios are intended to support students' efforts to become thoughtful and effective teachers.
- To provide documentation and/or evidence that students have satisfactorily met all teacher education standards required for initial teacher certification in Wisconsin. The portfolio helps to demonstrate students' achievement of these knowledge and performance standards.

- To provide a repository for student artifacts.
- To enhance students' technical literacy through the portfolio creation.
- To support the job preparation and interview process.

Portfolios consist of a variety of artifacts which students have chosen from their educational experiences to best represent their growth and development as teachers. Artifacts can include lesson plans, classroom observations, analyses of student learning, student work samples, photographs, video clips of instruction and reflective commentaries.

The student portfolio provides a foundation for the Teacher Performance Assessment (edTPA), a standardized evaluation required by Wisconsin for teacher licensure. The edTPA process also requires students to submit artifacts. These artifacts are scored by trained evaluators using a standardized set of edTPA rubrics.

For more information about the use of the portfolio in a specific teacher education program, please contact the program coordinator.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program. The current standards of the University of Wisconsin–Madison School of Education can be found on the school's website (<http://careers.education.wisc.edu/pi34/docs/Standards.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following licensing options are offered at UW–Madison.

- The Elementary Education program currently offers two licensing levels: *Early Childhood* and also *Middle Childhood through Early Adolescence*.
- The Special Education program certifies students at both the *Middle Childhood through Early Adolescence* level and also at the *Early Adolescence through Adolescence* level. The Special Education/Elementary Education dual major option certifies students only at the *Middle Childhood through Early Adolescence* level.

- Secondary Education programs certify students to teach their subject area at the *Early Adolescence through Adolescence* level.
- Students completing Language Education programs will be licensed at the *Early Childhood through Adolescence* level.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Early Childhood through Adolescence* level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo>). A Criminal Background Investigation (CBI) will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that (1) all certification requirements are met; (2) student teaching (following the school district calendar) is completed; (3) final grades are posted and reviewed; (4) the degree is "posted" by the registrar's office (four to five weeks after graduation); and (5) a recommendation for certification is received from the program faculty. The Wisconsin Department of Public Instruction may require an additional 6 to 12 weeks for license processing. See Educator Licensing (<http://www.education.wisc.edu/soe/pk-12-education/pathways-to-licensure/educator-licensing>) for additional information about the licensing process.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website that provides links (<http://2b.education.uky.edu/certification-requirements-by-state>) to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to Education Academic Services at 139 Education Building, 1000 Bascom Mall, or by email (mlpatton@wisc.edu) to be completed. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must be completed before sending the form to EAS.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

THEATRE AND DRAMA

A degree in theatre and drama from the University of Wisconsin–Madison can open doors to a wide range of careers. Our alumni are successful in theatre, film, television, gaming, production management, development, design, education, and all aspects of the entertainment industry. Our faculty are active theatre professionals who bring current and practical knowledge into the classrooms and productions. Our department is well known for the individual attention, mentorship, and commitment we give our students.

Through mainstage, open-stage, and student produced works, the Department of Theatre and Drama provides students with excellent opportunities to apply skills and techniques learned in the classroom in fully staged productions.

New theatre and drama majors will complete a bachelor of science degree in theatre and drama (p. 1516) through the School of Education. Theatre and drama majors may informally select areas of emphasis such as design, stage management, directing, acting, or theatre technology.

Students whose primary interest is acting may pursue the Acting Specialist option. An audition is required prior to acceptance to the option, and is held each spring semester. Students should see the department advisor for more information on the Acting Specialist option.

Nonmajors who wish to extend their familiarity with theatre in theory and practice are encouraged to enroll in department courses and participate in productions. The department has hosted students from many disciplines—such as law, business, medicine, art, dance, science and social work—who wish to develop effective communication skills, enhance problem-solving abilities, and cultivate visual acumen.

DEGREES/MAJORS/CERTIFICATES

- Theatre and Drama, B.S. (p. 1515)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website. (<http://theatre.wisc.edu>)

THEATRE AND DRAMA, B.S.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

New freshmen and off-campus transfers are admitted directly to the B.S.–Theatre and Drama degree program. The program currently admits on-campus students to begin in the fall, spring, and summer.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

Incoming freshmen and transfer students enter directly into the B.S.–Theatre and Drama program upon admission to UW–Madison. All other on-campus students should complete and submit an application, as well as transcripts from all other colleges or universities attended, to Education Academic Services, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. Applications cannot be processed without a complete academic record. (A transfer credit evaluation cannot be accepted in place of a transcript.) The program application must be signed by the Department of Theatre and Drama academic advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1239).

coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1239).

APPLICATION AND ADMISSION

While new freshmen and off-campus transfers are admitted directly to the B.S.–Theatre and Drama degree program, all other current UW–Madison students seeking to enter the B.S.–Theatre and Drama program must apply for admission to the program. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission>) page for updates to eligibility requirements prior to submitting an application.

CRITERIA FOR ADMISSION

Eligibility for admission consideration to B.S.–Theatre and Drama:

- Cumulative grade-point average on all transferable college-level coursework of at least a 2.50 (on a 4.00 scale).¹
- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Filing of all required paperwork and other application materials, including program application and transcripts. Application must be signed by the Department of Theatre and Drama academic advisor.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

PROGRAM STRUCTURE

The bachelor of science (B.S.) degree program in theatre and drama has three primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major requirements* permit in-depth studies of theatre and drama.
- *Additional electives* to reach the minimum of 120 degree credits. These credits allow students to pursue individual areas of interest, such as a second major or additional theatre and drama credits. Many B.S.–Theatre and Drama students complete an additional major from the College of Letters & Science. Some use this major to complement their theatre preparation, while others select majors that reflect interests completely unrelated to theatre.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1246) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an

opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1246) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs, Athletic Training, and Kinesiology; Exercise and Movement Science have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1246) to total 40 Credits.

MAJOR REQUIREMENTS

Complete at least 40 major credits, distributed as indicated below. At least 15 credits of upper-level major coursework (courses designated intermediate or advanced) must be taken in residence with a minimum 2.5 grade point average.

Acting, 3 credits

Code	Title	Credits
THEATRE 150	Introduction to Acting	3

Theatre History, 12 credits

Code	Title	Credits
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature ¹	3-4
THEATRE 224	History of Theatrical Production	3
THEATRE 324	Traditions in Dramatic Literature	3
THEATRE 424	Contemporary World Theatre and Dramatic Literature	3

¹ The 4-credit option of ENGL/THEATRE 120 satisfies the General Education Communication Part B requirement.

Production, 8 credits

Code	Title	Credits
THEATRE 160	Introduction to Stage Production	3
THEATRE 161	Backstage Laboratory I	2
THEATRE 162	Theatre Production Laboratory	1
Select one of the following:		2-6
THEATRE 361 & THEATRE 561	Backstage Laboratory II and Backstage Laboratory III	
THEATRE/CURRIC 462	Theatre for Young Audiences: Production	

Design, Directing, and Drama in Education, 3 credits

Code	Title	Credits
Select one of the following: ¹		
THEATRE 363	Principles and Practice of Stage Costume Design	3-4
THEATRE/ART 366	Stage Lighting I	3-4
THEATRE/ART 372	Set Design I	3
THEATRE 368	Fundamentals of Directing	3
THEATRE/CURRIC/SLAVIC 362	Drama for Teaching and Learning	3

¹ Additional courses from this list may be used as elective credits.

Electives

Select any Theatre and Drama (<http://guide.wisc.edu/courses/theatre>) department courses, to total 40 credits. Majors are urged to consult the department academic advisor in selecting courses, especially when building an emphasis in any one area.

REQUIREMENTS FOR THE ACTING SPECIALIST OPTION

Theatre and drama majors with a primary interest in acting may audition for the Acting Specialist option. This is a highly structured program of study, best begun as early as possible in the student's career. Specific courses are required in acting, voice, movement, directing, technical production, and dramatic literature and theatre history. Admission is by audition only; auditions are held at the midpoint of each spring semester prior to enrollment for fall classes. Students must be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before admission to the program. Students who qualify for the Acting Specialist option are expected to audition for University Theatre productions.

Production, 7 credits

Code	Title	Credits
THEATRE 160	Introduction to Stage Production	3

THEATRE 161	Backstage Laboratory I	2
THEATRE 162	Theatre Production Laboratory	1
Select one of the following:		1-6
THEATRE 361	Backstage Laboratory II	
THEATRE 561	Backstage Laboratory III	
THEATRE/ CURRIC 462	Theatre for Young Audiences: Production	

Theatre History, 12 credits

Code	Title	Credits
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature ¹	3-4
THEATRE 224	History of Theatrical Production	3
THEATRE 324	Traditions in Dramatic Literature	3
THEATRE 424	Contemporary World Theatre and Dramatic Literature	3

¹ The 4-credit option of THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature satisfies the General Education Communication Part B requirement.

Voice, Movement and Acting, 18 credits

Code	Title	Credits
THEATRE 140	Voice Training	3
THEATRE 240	Intermediate Voice Training	3

THEATRE/ CURRIC/ SLAVIC 362	Drama for Teaching and Learning	
THEATRE 368	Fundamentals of Directing	
THEATRE 379	Introduction to Stage Management	

HONORS IN THE MAJOR

Students may earn *Honors in Theatre and Drama* by satisfying both the requirements for the major and these additional requirements:

- Maintain a minimum GPA of 3.5 in major courses numbered 300 and above, and an overall GPA of at least 3.3 in all courses taken at UW–Madison at the time of graduation.
- Complete elective credits in the theatre and drama major, distributed as follows: 3 credits of 300 level or above, 6 credits of 400 level or above, and 6 credits of 500 level or above.
- In addition, complete a two-semester senior honors thesis, THEATRE 681 Senior Honors Thesis (3 credits) and THEATRE 682 Senior Honors Thesis (3 credits), for a total of 6 credits.
- Complete 3 credits from the Integrated Liberal Studies (ILS) Program.

Students should be aware that course offerings are influenced by a number of factors, (e.g., current staffing, number of majors), and some courses are not offered on a regular basis. Students should consult with the department's academic advisor regarding course selection and other ways to maximize the Honors in the Major experience.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework ("upper-level" is defined as all "intermediate" and "advanced" coursework).
- Major Residency: Students must complete at least 15 credits of upper-level (intermediate and advanced) major coursework in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation in the B.S.–Theatre and Drama degree program.

DEGREE AUDIT REPORTING SYSTEM (DARS)

At UW–Madison, a DARS report is used to document a student's progress toward the completion of their degree. This degree audit identifies the requirements that have already been completed, and also those that remain unsatisfied. A DARS report can offer suggestions about appropriate courses that may be taken to meet specific requirements and can assist in the academic planning process.

Students can access DARS reports through their Student Center in *My UW–Madison*. Go to the Academics tab and find DARS on the dropdown menu.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program or major on campus. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) should request a "what if" DARS report of their professional program of interest.

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course

options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is the document of record, i.e., certifying document of degree completion, for program areas in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate the ability to evaluate the art and craft of theatre both critically and conceptually.
2. Demonstrate the ability to analyze a script for the basic elements of plot, character, theme, language, rhythm, mood and elements of production.
3. Demonstrate through research and practice, knowledge of theatrical history and literature from ancient Greek to present.
4. Demonstrate competency in one or more areas of theatre specialization.
5. Demonstrate the practical knowledge and the professional skills required to pursue entry-level professional work and/or advanced studies in theatre.
6. Demonstrate the ability to creatively and generously collaborate as theatre artists.

ADVISING AND CAREERS

THEATRE AND DRAMA DEPARTMENTAL ADVISING

Prospective off-campus and on-campus B.S.–Theatre and Drama students will meet with department academic advisor Jim Stauffer, Department of Theatre and Drama, 6004 Vilas Communications Hall, 821 University Ave. (main office) 608-263-2329, jbstauffer@wisc.edu. Students are also strongly encouraged to confer with an Education Academic Services advisor on a regular basis, see below.

GENERAL SCHOOL OF EDUCATION ADVISING

All undergraduate students in the School of Education are served by three offices devoted to academic and/or career advising. Each student in the School of Education is assigned at least one advisor and is encouraged to meet with the advisor on a regular basis. Students will also be assigned a faculty or staff advisor when admitted to the professional component of their degree program. Departmental advisors provide more in-depth knowledge of the major and of courses offered by the department.

UNDERGRADUATE ADVISING AND ACADEMIC DEAN'S OFFICE—EDUCATION ACADEMIC SERVICES (EAS)

139 Education Building, 1000 Bascom Mall; 608-262-1651

www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-advising>)

Education Academic Services (EAS) is the undergraduate dean's office for students in the School of Education. Staff members interpret school regulations, policies, and program requirements; take exceptions around requirements and deadlines; advise current and prospective students; monitor students having academic difficulties; coordinate field placements; facilitate the program admissions process; and maintain the official files of students in the school.

Students should meet with an advisor during their first semester on campus (if not before) and are encouraged to meet with an advisor at least once a semester. This is particularly important during the freshman and sophomore years. Appointments may be arranged by calling or visiting the office.

EAS advisors answer questions and provide guidance to current and prospective students. They consult with and refer students to faculty members and departmental advisors. Once a student is admitted to a professional program within the School of Education, he or she will also be assigned a faculty or staff advisor. Advising then becomes a partnership, with EAS and OURR advisors continuing to help students with course selection, degree progress monitoring, academic difficulties, and interpretation of policies and procedures.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department, and, in the case of certification programs, follow the students' progress through their professional courses. These divisions are flexible, and students are encouraged to consult with all advisors who can help with a situation or answer a question.

OURR: OFFICE OF UNDERGRADUATE RECRUITMENT AND RETENTION (STUDENT DIVERSITY PROGRAMS)

105 Education Building, 1000 Bascom Mall, 608-262-8427 or 608-262-1651

www.education.wisc.edu/sdp (<http://www.education.wisc.edu/sdp>)

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. OURR staff work collaboratively with Education Academic Services and campus and community partners to support underrepresented students interested in majors in the School of Education.

OURR staff perform outreach, recruitment, and advising on behalf of the School. OURR staff also support current students with their personal and professional growth, their transition from high school to college, financial aid, and career exploration.

OURR works to build a network of students and graduates who may strengthen, transform, and lead their communities through education, service, and other contributions. Students are invited to visit OURR staff at 105 Education Building—stop in, or call one of the numbers listed above to set up an appointment.

SCHOOL OF EDUCATION CAREER CENTER

L107 Education Building, 1000 Bascom Mall, 608-262-1755
<http://careercenter.education.wisc.edu/>

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that incorporates individual passions, interests, and values that will help one reach specific career goals
- Researching graduate schools and preparing application materials
- Beginning a job search and learning where to start and what to do
- Seeking assistance with developing a résumé, a cover letter, or interviewing skills
- Networking and connecting with potential employers

The Career Center provides resources and individual consultations to assist students in reaching their career goals. A plethora of resources can be found on the Career Center website (<http://careercenter.education.wisc.edu/>):

- Explore career possibilities for specific majors in *Investigate Career Options*. This section of the website provides tools for clarifying a student's personal criteria for success, linking specific career options to majors, and identifying steps for career/major selection. It includes strategies for making the most of a student's academic and student experience.
- Confirm major and career decisions. Gain hands-on experience in the career field of study. Assess the perceptions of selected career and major options for accuracy. Develop professional and soft skills. The *Test Drive and Confirm Career Choice* section provides strategies for acquiring real-world experience.
- Preparation is critical for entering one's next career phase. Learn about graduate school requirements and the application process. Develop promotional materials for employers and/or graduate schools and obtain feedback and suggestions for enhancing them. Acquire materials that support one's applications. The *Prepare and Connect* section provides offers additional details.
- *Implement* helps students plan for the future. Attend recruiting events. Apply for graduate school or for job opportunities. Practice interviewing skills. Interview. Negotiate job and graduate school offers.

Personalized career assistance is available through individual appointments with consultants in the Career Center. To schedule an appointment visit, <http://bit.ly/CCAppt>.

Informational workshops and career-related events are conducted each semester. The schedule of these events can be found on the center's website (<http://careercenter.education.wisc.edu/workshops>).

The Career Center coordinates teacher recruitment fairs each fall and spring semester and collaborates with career centers across campus to provide campus-wide career fairs at the beginning of each semester.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website. (<http://theatre.wisc.edu>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1259) page.

SCHOOL OF HUMAN ECOLOGY

The School of Human Ecology (SoHE) at UW–Madison is a place where faculty and advisors work closely with students to prepare them for careers that improve the quality of people’s lives. Our majors are: Community and Nonprofit Leadership, Human Development and Family Studies, Interior Architecture, Personal Finance, Retailing and Consumer Behavior, and Textiles and Fashion Design. Each program provides a solid curriculum of practical skills that lead students to exciting professions, a better understanding of people and our world, and a bachelor of science undergraduate degree.

SoHE is located in Nancy Nicholas Hall, a beautiful and newly renovated building that provides first-class, cutting-edge classrooms and studio spaces. Within these walls we connect students to their passions, helping them discover exciting careers and opportunities to make a meaningful impact on individuals, families, and communities. Faculty, students, and staff are dedicated to providing students with solid and meaningful education through coursework, internships, travel, student organizations, community involvement, research, and scholarship.

Learn more about SoHE and its majors at sohe.wisc.edu (<http://www.sohe.wisc.edu>).

- Textiles and Fashion Design, B.S. (p. 1537)

PEOPLE

Visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

ENTERING THE SCHOOL

APPLYING TO UW-MADISON

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Students who indicate interest in a SoHE major on their UW–Madison application will be admitted to the SoHE program or pre-program of choice upon admittance to the university. In addition, students may indicate interest in a SoHE major when registering for Student Orientation, Advising, and Registration (SOAR).

VISITING CAMPUS AND SOHE

SoHE holds monthly visit events for prospective students and their families and guests.

View and register (<https://www.admissions.wisc.edu/visitbucky/events.php?etypeid=22>) for an upcoming visit event.

If you are unable to attend one of these dates, please contact the SoHE Student Academic Affairs and Career Development Office at 608-262-2608 or advising@sohe.wisc.edu to schedule an appointment.

CURRENT UW–MADISON STUDENTS

First-year students in good academic standing and first-semester transfer students may declare SoHE majors upon request. All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by attending a Becoming a SoHE Student Workshop (<https://sohe.wisc.edu/prospective-students/prospective-students/becoming-sohe-student-workshops>).

Visit On-campus Student Application (<https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology>) for application information and deadlines.

REENTERING STUDENTS

Students previously enrolled at the university who have not attended for a semester or more must complete a reentry application as outlined by the UW–Madison Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>). Students who were enrolled in a School of Human Ecology program before their absence from UW–Madison will be readmitted to that program, provided they were in good academic standing when they left (i.e., not on probation, strict probation, or dropped by the university). Reentry applicants who were dropped by the university are asked to submit supplemental application materials. Instructions for the supplemental application are sent after the student has submitted the online reentry application.

Students who were previously enrolled in another UW–Madison school or college will not be admitted directly to a School of Human Ecology program. They must apply for reentry to the university with another school or college—usually the school or college in which they were previously enrolled. Once readmitted to the university, students may apply to the desired SoHE program through the application process for that program. For information about the school’s programs and application processes, see *Applying to Human Ecology as an On-Campus Student* (<https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology>).

It is recommended that students who have been readmitted to a School of Human Ecology program schedule an appointment with an academic advisor in the Student Academic Affairs & Career Development Office.

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore

careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

As a SoHE major, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a three-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Student Academic Affairs & Career Development Office (<https://sohe.wisc.edu/prospective-students/contact-us>).

For more information, visit SoHE Internships (<https://sohe.wisc.edu/prospective-students/career-preparation/internships>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- American Society of Interior Designers - Student Chapter (IDO)
- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals—UW—Madison Chapter
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Students for Families and Children (SFC)
- Student Retail Association (SRA)

POLICIES AND REGULATIONS

SCHOLASTIC ACTIONS

FAILURES AND INCOMPLETES

Failures. Every course grade of F counts as 0 grade points, and as any other grade, remains permanently on the transcript. A student who fails a required course must repeat the course and secure a passing grade as soon as possible. The failure may not be addressed by repeating the course at another college or university.

Incompletes. An Incomplete may be granted when a documented illness or other substantiated hardship causes the student to be unable to take final examination or complete a limited portion of the course assignments. Under these conditions, a student who has carried a passing grade until near the end of the semester may request a grade of Incomplete. It is up to the instructor to decide whether an Incomplete is warranted. If granted a grade of Incomplete (I), the work must be completed and graded no later than the close of the next semester of residence at UW—Madison (exclusive of summer term). If not completed and graded by the last class day, the grade will lapse into a Failure (F). Instructors have the authority to set an earlier deadline for finishing up an incomplete. With documentation of extenuating circumstances, the student may seek permission to extend an Incomplete beyond the semester in which the course was scheduled to be completed. An extended Incomplete must be removed within the next semester in residence or the grade will lapse into Failure (F). Incompletes incurred during the summer session must also be completed no later than the close of the next semester in residence under the same rules. **Students are ineligible for the dean's list for the semester in which a grade of Incomplete is submitted.**

PROBATION AND DROPPED STATUS

Failure to earn at least a 2.0 GPA will result in the status of *Probation, Continued Probation, Strict Probation, Continued Strict Probation, or Dropped* from the university. Such actions are based on

1. the status of the student as a result of any previous academic action,
2. the cumulative GPA including the current semester, and
3. the GPA for the semester just completed.

Academic Actions will appear on the memoranda section of a student's transcript (https://registrar.wisc.edu/student_record.htm).

DEFINITIONS OF SCHOLASTIC ACTIONS

Probation. A student with no previous action who earns a semester or summer term GPA less than 2.0 but 1.0 or more will be placed on probation.

Continued Probation. A student on probation whose cumulative GPA remains below 2.0 and whose semester or summer term GPA is 2.0 or above will be placed on continued probation. A student on continued probation whose cumulative GPA remains below 2.0 and whose semester or summer term GPA is 2.0 or above will be placed again on continued probation.

Strict Probation. A student with no previous action but with a current semester or summer term GPA below 1.0 will be placed on strict probation. A student on probation whose semester or summer term GPA is less than 2.0 but 1.5 or above will be placed on strict probation.

Continued Strict Probation. A student on strict probation or continued strict probation who earns a semester or summer term GPA of 2.0 or above but whose cumulative GPA remains below 2.0 will be placed on continued strict probation.

Dropped from the University. A student on probation whose semester or summer term GPA is less than 1.5 will be dropped for one year.

A student on strict probation whose semester or summer term GPA is less than 2.0 will be dropped for at least one year.

Removal from Probation. Students on probation or strict probation will be automatically removed from probation when their cumulative GPA reaches 2.0 or more.

READMISSION AFTER DROPPED STATUS

Students who were dropped from the university based on academic performance are eligible for readmission consideration after one full calendar year. Students dropped for a third time will not be readmitted.

In order to reenter the university after one full year, a student must apply for readmission to the School of Human Ecology *and* for reentry to the university. **(Please note that a student is never guaranteed readmission after being dropped. Readmission is most likely if the student has addressed the issues that contributed to being dropped from the university and has been proactive in preparing for a successful return.)**

To apply for readmission to SoHE and the University of Wisconsin—Madison after being dropped, a student must:

1. Complete the SoHE Readmission Request Form (https://uwmadison.qualtrics.com/SE/?SID=SV_5hhKaOxEeI9ATxb).

To ensure readmission consideration, follow these deadlines:
Summer or Fall Term—Apply by February 1

Spring Term—Apply by October 1

2. Complete the university reentry application (<http://www.admissions.wisc.edu/reentry.php>).
3. Schedule an appointment with a SoHE academic advisor by calling 608-262-2608.
 - Bring a copy of the completed SoHE Readmission Request Form and other supporting documentation (e.g. transcripts from other universities, other documents which support personal, academic, or health progress made during the time away) to the appointment.
 - Use this advising appointment to: (re)establish a relationship with your academic advisor, review your enrollment plan for the term you intend to return, and review your degree completion plan.
4. The SoHE academic advisor will forward the Readmission Form, supporting documentation, and enrollment plan to the Assistant Dean for Academic Affairs for review. The dean may choose to consult with the student's previous academic department, Undergraduate Program Council and/or the student to make a decision. When a readmission decision has been made, the assistant dean will contact the student in writing. Students who are granted permission for re-entry will be readmitted on strict academic probation to the School of Human Ecology.

DECLARING ADDITIONAL MAJORS

School of Human Ecology undergraduates can declare an additional undergraduate major in the College of Letters & Science. This is not a second degree. The additional major is noted on the student's transcript if all requirements of the Letters & Science major are completed.

School of Human Ecology students must plan to finish all additional academic programs concurrently with their SoHE degree. The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all SoHE degree requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program(s), specialization(s), study abroad, or honors program(s).

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

School of Human Ecology students interested in completing two degrees simultaneously (as opposed to two majors) should consult with their academic advisor early in their academic career to discuss the feasibility of completing requirements for both degrees. Degree combinations may come from two Human Ecology programs or from a Human Ecology program and a degree program in another school or college. Students must complete all of the requirements for both degrees, which include general education requirements, major coursework, and related disciplinary work.

It is the student's responsibility to be aware of any rules or regulations that could potentially impose additional financial responsibilities as a result of attempting to complete two degrees simultaneously. Please note that some campus schools and colleges do not permit dual degrees for their students, thus preventing Human Ecology degree combinations with degrees in these schools and colleges. Students wishing to earn two undergraduate degrees must follow these academic policies:

If the two degrees to be earned are within the School of Human Ecology, at least 30 additional credits and all course and grade point requirements must be completed for the second degree. Thus, a minimum of 150 credits would be required. The two degree programs must differ sufficiently to permit the total credits to be accumulated (for instance, personal finance and retailing & consumer behavior do not differ to the extent that it would take an additional 30 credits to complete the second degree; therefore, earning both degrees simultaneously will not be allowed). Before the start of the senior year in residence, students must meet the criteria for admission to both programs, must be certified to enroll in both programs, and must obtain academic dean's approval. The two degrees must be completed simultaneously. Some courses may satisfy requirements for both degrees, but course substitutions or curriculum exceptions between programs will be prohibited.

If the two degrees to be earned are from two different schools/colleges at UW–Madison, the two degree programs must differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits. Admission into the other school/college shall be based on the admission criteria for that particular school/college. The student must be certified to enroll in both programs/schools/colleges and written permission to complete the two degrees must be obtained from academic deans in both schools/colleges before the start of the student's senior year in residence. The two degrees must be completed simultaneously. Some courses may satisfy requirements for both degrees, but course substitutions or curriculum exceptions between programs will be prohibited for the Human Ecology program.

RESIDENCY REQUIREMENT

The university requires that the last 30 credits be earned in residence at UW–Madison for students to be recommended for a degree, unless the student's major program requires completion of the degree at a cooperative institution. Permission of the assistant dean of academic affairs must be secured *in advance* to take any portion of the senior year at another institution or by correspondence. Students should initiate permission through their SoHE academic advisor.

CREDIT OVERLOAD

A full-time student carries a minimum of 12 credits to a maximum of 18 credits, with the usual or average credit load being 15–16 credits per semester. A student requesting more than 18 credits in a semester needs a signed request with approval from the School of Human Ecology academic dean. Students should initiate permission through their SoHE academic advisor. Students requesting this credit load must have earned a grade point average of at least 3.0 during the preceding semester on a program of at least 12 graded credits. "Graded credit" does **not** include courses taken on the Pass/Fail basis or Incompletes. Requests will be considered on an individual basis.

PASS/FAIL

The privilege of electing courses on a pass/fail basis is extended to undergraduate students in the school. Students who are in good standing academically (not on probation) may elect one course on the pass/fail basis per term. The summer sessions collectively count as one term.

A course taken pass/fail must be an elective. A student may **not** take a required course or a prerequisite to a required course under this privilege. A maximum of 16 pass/fail credits may be counted toward a B.S. degree from the School of Human Ecology. **Courses taken pass/fail will count toward degree credits but will be excluded in the computation of grade point average and honors.**

Requests to take a course under the pass/fail privilege are initiated through the Course Change Request in the MyUW (<http://my.wisc.edu>) Student Center. Instructions for making a course change request can be found on the Registrar's website (<http://registrar.wisc.edu>). After making the request in MyUW, the request is routed to the Student Academic Affairs & Career Development Office for approval or further communication.

The registrar will convert final grades submitted by the instructor, who is not informed of the student's pass/fail status, to an S (pass) for grades A, AB, B, BC or C, and to a U (fail) for a grade of D or F. The grade is excluded from the GPA.

APPEALS

APPEAL OF A SOHE GRADE

This appeal process is for a student who is dissatisfied with a grade received in a SoHE course.

1. The student will first discuss the grade appeal with the instructor of the course.
2. If the student and instructor cannot come to an agreement, the student will provide a formal written grade appeal to the assistant dean in SoHE. The written appeal must include: the class, instructor, grade received, date and conclusion of meeting with instructor, the specific reason(s) for appealing the grade and email address and telephone number where they can be reached for follow-up. Send to saadean@mail.soh.wisc.edu.
3. The assistant dean will forward the appeal to the appropriate department chair. The department chair will perform the due diligence necessary (including, but not limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the assistant dean.
4. The assistant dean will communicate the decision to both the student and instructor in writing.
5. Should the student wish to appeal the decision further, the assistant dean will forward the appeal to the SoHE Undergraduate Program Council. The committee will perform the due diligence necessary (which may include, but not limited to, meeting with the instructor and department chair and/or student) to assess the merits of the appeal request and will provide a decision in writing to the assistant dean.
6. The assistant dean will communicate the decision to the student, the instructor, and the department chair in writing.

APPEAL OF DENIAL OF ADMISSION TO A SOHE UNDERGRADUATE PROGRAM

This appeal process is for a student who was denied admission to a SoHE undergraduate program.

Students who feel they have a compelling reason to appeal their admissions decision may do so in writing by the deadline indicated in the admission letter. Appeals must satisfy one of the following factors in order to be considered:

- The student believes a factual error was self-reported on the application or made by the admissions committee during review of the application.
- There is new information regarding academic or non-academic extenuating circumstances.

While admission appeals satisfying the above conditions will be reviewed by the admissions committee, it is important to understand that simply meeting these criteria in no way guarantees acceptance into the program.

Filing an Appeal

1. The student will file a letter of program admission appeal to the assistant dean in SoHE at saadean@mail.soh.wisc.edu, stating the facts of the situation based on one or both of the conditions listed above and the student's email address and telephone number where they can be reached for follow-up. Any additional documentation or supporting evidence should be titled and attached to the letter of appeal. The deadline by which a student must file an appeal will be written in the denial letter for the undergraduate program in question. For a situation where grades/credits were not posted to a student's record prior to applying to the program, the student record must be complete with grades and credits on the official UW–Madison record by the time the appeal is filed in order to be considered.
2. The assistant dean will forward the appeal to the appropriate departmental admissions committee. The admissions committee will perform the due diligence necessary to assess the merits of the new information for the appeal and will provide a decision in writing to the assistant dean.
3. The assistant dean will communicate the decision to both the student and departmental admissions committee in writing.
4. Should the student wish to appeal the decision further in the case of extenuating circumstances, the assistant dean will forward the appeal to the SoHE Undergraduate Program Council (UPC). The UPC will perform the due diligence necessary (which may include, but not limited to, meeting with the admissions committee, department chair, and/or student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
5. The assistant dean will communicate the decision to the student and the admissions committee in writing.

APPEAL OF BEING DROPPED BY UW–MADISON FOR ONE YEAR

SoHE students who are dropped from the university based on academic performance are permitted to appeal for readmission consideration immediately after being dropped. Students with documentation of special circumstances outside their control, evidence that these circumstances have changed, and realistic strategies in place to improve their academic performance have the greatest likelihood of a successful appeal.

Filing An Appeal

1. Students wishing to appeal their dropped status must do so prior to the deadline outlined in their dropped status notification. Students who do not appeal before the deadline must wait at least one full calendar year before being eligible for readmission consideration. The appeals process is initiated when students complete the online Dropped Status Appeal Form (https://uwmadison.qualtrics.com/SE/?SID=SV_6Lv7QPa3P6Ay7mR).
2. The Assistant Dean for Student Academic Affairs will submit the appeal information to the SoHE Undergraduate Program Council (UPC) for review. UPC will make a decision regarding the appeal before the beginning of the next term.
3. The assistant dean will communicate the appeal decision to the student in writing. If the appeal is granted, the student will be readmitted to the university on strict probation. If the appeal is not granted, the dropped status is sustained and the student is

eligible for readmission consideration **one full calendar year after** the dropped date.

LATE DROP PETITION

SoHE requires that students follow drop deadlines outlined by the Office of the Registrar (<https://registrar.wisc.edu>). Under certain special situations students may request an exception to drop one or more courses after the drop deadline through a petition.

Late Drop Petitions are only considered when students face significant, unforeseeable circumstances outside of their control that negatively impact their ability to successfully complete a course(s).

Students who believe they meet the requirements to petition must meet with their SoHE academic advisor and complete the online petition form (https://uwmadison.co1.qualtrics.com/SE/?SID=SV_2lBtoSD5GxRhPBb).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SOHE GENERAL EDUCATION REQUIREMENTS

Seven undergraduate majors are available in the school. There are common general education requirements for all SoHE majors, but these are reflected differently in each program. Please review each major requirement page for the specific general education courses needed for the degree.

Code	Title	Credits
Literature		3
	Select 3 credits designated Literature breadth	

Humanities ¹	6
Social Science	9
Select 9 credits designated Social Science breadth	
Physical, Biological, and Natural Science	9
Select 9 credits designated Physical, Biological, and/or Natural Science breadth	
Human Ecology Breadth	
Select 3 credits in the School of Human Ecology taken outside the major	
Major Requirements and Electives	
Minimum total for graduation: 120 credits with no fewer than 25 credits taken within the School of Human Ecology.	

¹ SoHE will accept as humanities credit courses from designated humanities breadth courses as well as the following areas or departments: art, art history, classics, English, foreign languages (including beginning languages), cultural history, history of science, integrated liberal studies, literature (including comparative literature), music (including applied music), philosophy, communication arts, studies of cultures—e.g., African studies, East Asian studies, Hebrew and Semitic studies, South Asian studies, Scandinavian studies.

REQUIREMENTS FOR GRADUATION

The bachelor of science (B.S.) degrees granted by the School of Human Ecology require a minimum total of 120 credits, with a minimum of 25 credits in the school. To remain in good academic standing, students must maintain a minimum GPA of 2.0. A 2.0 cumulative GPA must be earned by the end of the senior year in order to be recommended for a B.S. degree.

The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all SoHE major requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program (s), specialization(s), study abroad, or honors program(s). It is the student's responsibility to prepare for graduation and to ensure that all graduation requirements have been met. Students expecting to graduate and/or participate in commencement exercises should declare their intent through the My UW Student Center in accordance with campus deadlines.

RESOURCES

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

The Student Academic Affairs & Career Development Office (SAA) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education we support students as they navigate the college experience - from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Student Academic Affairs & Career Development Office. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their

educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (<https://sohe.wisc.edu/prospective-students/advising>).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a life-long learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Internship and Career Preparation (<https://sohe.wisc.edu/prospective-students/career-preparation>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Student Academic Affairs & Career Development Office. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<http://www.finaid.wisc.edu>) (333 East Campus Mall; 608-262-3060).

HONORS

DEAN'S HONOR LIST

At the end of each semester the names of all students with a grade point average of 3.25 or higher in at least 12 graded credits for that semester will be included on the Dean's Honor List. Students earning a grade point average of 3.75 or higher will be given the recognition of Dean's High Honors. A notation of "Dean's Honor List" or "Dean's High Honors" will be entered on the student's transcript.

GRADUATION WITH DISTINCTION

"Graduation with Distinction" will appear on the transcripts of students who have earned a cumulative grade point average that places them *within the top 20 percent* of students graduating that term in their school or college with 60 credits or more at the University of Wisconsin—Madison.

Students *in the top 5 percent* will receive the designation "Graduation with Highest Distinction." The Office of the Registrar determines whether students have met these criteria. Notations citing graduation distinction will be made on the transcript.

HONORS PROGRAM

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open

to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campuswide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a SoHE honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

For additional information about the Honors Program including admission, requirements, credits, and honors thesis, contact the Student Academic Affairs & Career Development Office.

CIVIL SOCIETY AND COMMUNITY STUDIES

The Department of Civil Society and Community Studies offers a bachelor of science degree in community and nonprofit leadership and a Ph.D. in human ecology: civil society and community research. The community and nonprofit leadership major prepares its graduates for careers in community and nonprofit settings, graduate school, and post-baccalaureate service-oriented programs. Academic requirements include specialized emphases in human ecology; general studies in humanities, social sciences and natural sciences; and coursework focused on community impact and social change processes. Students may also engage in complementary coursework, undergraduate certificates, or additional undergraduate majors.

DEGREES/MAJORS/CERTIFICATES

- Community and Nonprofit Leadership, B.S. (p. 1526)

PEOPLE

Professors Flanagan, Jasper; Associate Professors Bakken, Christens; Assistant Professors Alexander, Gaddis, Horowitz, Sarmiento, Sparks; Faculty Associate Maguire

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

COMMUNITY AND NONPROFIT LEADERSHIP, B.S.

Through academic study, community engagement, and applied research, Community and Nonprofit Leadership (CNPL) undergraduate students develop into competent, caring professionals interested in community-based change and the expanding nonprofit sector. In smaller, inclusive, project-based courses, CNPL students collaborate with each other and community partners, gaining practical experience and making a difference through their coursework. The CNPL bachelor of science degree prepares its graduates for careers in community and nonprofit settings, graduate school (in law, policy, community health, etc.), and post-baccalaureate service-oriented programs (such as Peace Corps, AmeriCorps, City Year, etc.), enabling them to create, lead, and support innovative community-based initiatives that change lives and make the

world a better place. Their work and advanced study address human, family, and civil society issues such as: food and environmental justice, homelessness and rights to housing, health equity, gender equality, racial justice, community and leadership development, community organizing, advocacy, and more.

CNPL majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Students who indicate interest in the community and nonprofit leadership (CNPL) major on their UW–Madison application will be admitted to the CNPL major upon admittance to the university. In addition, students may indicate interest in CNPL when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

First-year students in good academic standing and first-semester transfer students may declare the CNPL major upon request. All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by attending a Becoming a SoHE Student Workshop (<https://sohe.wisc.edu/prospective-students/prospective-students/becoming-sohe-student-workshops>).

Visit On-campus Student Application (<https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology>) for application information and the October and February deadlines.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Ecological perspectives on community and society.** Articulate and apply an ecological perspective at discrete levels of analysis (individual, group, community, and society).
- Civic literacy and the public sphere.** Assess the major trends in civil society recognizing the influence and interconnectedness across the major sectors of society and exhibit strong capacity for sustained, high impact participation in civic life.
- Identity, diversity, and social justice.** Recognize well-being and social justice as relational and position, applying these principles in community organizing and empowerment.
- Organizational management and professional development.** Demonstrate entry-level knowledge and skills relevant to nonprofit and community organizations and exhibit the practices of a lifelong learner.

- Research, analysis, and communication.** Vet and/or generate high quality data, perform relevant analyses, and share results with target audiences using oral, written, and visual communication techniques.
- Leadership, ethics, and well-being.** Recognize the value of being a reflective, ethical leader who cultivates others' strengths and leadership capabilities, while exhibiting self-care and care for others.

ADVISING AND CAREERS

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

The Student Academic Affairs & Career Development Office (SAA) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Student Academic Affairs & Career Development Office. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (<https://sohe.wisc.edu/prospective-students/advising>).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a life-long learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

PEOPLE

Professors Flanagan, Jasper; Associate Professors Bakken, Christens; Assistant Professors Alexander, Gaddis, Horowitz, Sarmiento, Sparks; Faculty Associate Maguire

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

CONSUMER SCIENCE

The Department of Consumer Science studies interactions among consumers, business, and government in order to advance the well-being of consumers, families, and communities. The department is multi-disciplinary, including study in economics, finance, sociology, psychology, marketing, and public affairs. The Department of Consumer Science offers two undergraduate degree programs: personal finance,

and retailing and consumer behavior. Both courses of study focus broadly on the economic well-being of consumers and society. The department also offers M.S. and Ph.D. degrees in human ecology: consumer behavior and family economics.

DEGREES/MAJORS/CERTIFICATES

- Personal Finance, B.S. (p. 1529)
- Retailing and Consumer Behavior, B.S. (p. 1532)

PEOPLE

Professors Bartfeld, Shim, Wong, Zepeda; Associate Professor Collins, Robb; Assistant Professors Addo, Ashton, Warmath; Faculty Associates Lepe, Murray, O'Brien, Olive, Whelan

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

PERSONAL FINANCE, B.S.

Personal finance looks at economics from a people perspective, developing financial experts who can help individuals and families live more secure lives. This bachelor of science program is registered with the Certified Financial Planner® Board of Standards. The coursework is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. Within the personal finance program, students may complete one of two options: financial planning or consumer finance.

The financial planning option is the more traditional personal finance program leading to careers in counseling, coaching, and wealth management. Graduates of the financial planning option leave fully prepared to sit for the prestigious Certified Financial Planner® exam, which SoHE students pass well above the national average.

Graduates of the consumer finance option are prepared to work in financial product development, financial technology, and consumer behavior.

Personal finance majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Students who indicate interest in the personal finance major on their UW–Madison application will be admitted to the personal finance major upon admittance to the university. In addition, students may indicate interest in personal finance when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

First-year students in good academic standing and first-semester transfer students may declare the personal finance major upon request. All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by attending a Becoming a SoHE Student Workshop (<https://sohe.wisc.edu/prospective-students/prospective-students/becoming-sohe-student-workshops>).

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Students will invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Students will demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Students will acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Students will demonstrate an understanding of consumer financial behavior and the role of income, savings, credit, planning and benefits.

ADVISING AND CAREERS

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

The Student Academic Affairs & Career Development Office (SAA) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Student Academic Affairs & Career Development Office. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their

educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (<https://sohe.wisc.edu/prospective-students/advising>).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a life-long learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Internship and Career Preparation (<https://sohe.wisc.edu/prospective-students/career-preparation>).

PEOPLE

Professors Bartfeld, Shim, Wong, Zepeda; Associate Professor Collins, Robb; Assistant Professors Addo, Ashton, Warmath; Faculty Associates Lepe, Murray, O'Brien, Olive, Whelan

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

RETAILING AND CONSUMER BEHAVIOR, B.S.

Retailing and consumer behavior (RCB) leverages technology and research to understand and improve the global customer experience. This bachelor of science degree blends business and analytics with creativity, trend tracking, and technology. Students develop the skills to work in an industry that powers economies and offers ample employment opportunities, including online retailing and social commerce professions. Our experienced faculty guide RCB students through an inspiring and flexible curriculum that prepares them for careers in a dynamic and globally-focused industry.

Explore the world of commerce and technology from a people-first perspective. As a RCB major you'll learn to research, improve, and better understand the global customer experience with the support and guidance of SoHE faculty, a team of industry experts and researchers. Coursework integrates analytics and statistics with retailing, consumer science, and business courses.

SoHE's RCB graduates work for diverse and rapidly growing retailing companies around the globe. Technology and management jobs have been in high demand for several years and are only expected to continue their rapid growth.

RCB majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Students who indicate interest in the retailing and consumer behavior major on their UW–Madison application will be admitted to the retailing and consumer behavior major upon admittance to the university. In addition, students may indicate interest in retailing and consumer behavior when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

First-year students in good academic standing and first-semester transfer students may declare the retailing and consumer behavior major upon request. All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by attending a Becoming a SoHE Student Workshop (<https://sohe.wisc.edu/prospective-students/prospective-students/becoming-sohe-student-workshops>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

RETAILING & CONSUMER BEHAVIOR REQUIREMENTS

A complete list of requirements is below. Students should follow the curriculum requirements in place at the time they entered the major. Curriculum check sheets from previous academic years are available online (<https://sohe.wisc.edu/prospective-students/advising/curriculum-checksheets>). This requirement list should be used in combination with a DARS report.

Code	Title	Credits
School of Human Ecology Requirements		
<i>Math</i>		
MATH 112	Algebra	3
	Or higher (not MATH 130 or 141) unless exempt through placement exam	
<i>Statistics</i> 3-4		
Select one of the following:		
STAT 301	Introduction to Statistical Methods	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
PSYCH 210	Basic Statistics for Psychology	
ECON 310	Statistics: Measurement in Economics	
GEOG 360	Quantitative Methods in Geographical Analysis	
<i>Arts and Humanities</i>		
Literature		3
Humanities		6
<i>Social Science</i>		
ECON 101	Principles of Microeconomics	4
Select 6 credits designated Social Science breadth		6
<i>Physical, Biological and Natural Science</i>		9
<i>Human Ecology Breadth</i>		3
Select one Human Ecology course from CSCS, DS, HDFS, or INTER-HE.		
Consumer Science Courses		
CNSR SCI 250	Retail Leadership Symposium ¹	1
CNSR SCI 257	Introduction to Retailing	2

CNSR SCI 201	Consumer Research & Analysis	3
CNSR SCI 275	Consumer Finance	3
CNSR SCI 657	Consumer Behavior	3
CNSR SCI 564	Retail Financial Analysis	3
CNSR SCI 555	Consumer Strategy & Evaluation	3

Accounting Course

Select one course from the following:		3
ACCT I S 300	Accounting Principles	
ACCT I S 100	Introductory Financial Accounting	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	

Retailing and Consumer Behavior Depth

Select one course from the following:		3
CNSR SCI 561	Retail Channel Strategy & Omni-Channel Retailing	
CNSR SCI 562	The Global Consumer	
CNSR SCI 567	Product Development Strategies in Retailing	

Consumer Science Depth

Select 6 credits from TWO different Consumer Science Depth Option Areas (Not also used above in the Retailing and Consumer Behavior Depth category):		6
--	--	---

I. Multidisciplinary-Applied Research

CNSR SCI 301	Advanced Consumer Analytics	
CNSR SCI 527	Consumer Spending and Saving Over the Lifecycle	
CNSR SCI 579	Consumer Policy Analysis	

II. Promoting Well-Being

CNSR SCI/ RELIG ST 173	Consuming Happiness	
CNSR SCI 273	Finances & Families	
CNSR SCI 340	Building Financial Assets and Capability for Vulnerable Families	
CNSR SCI 355	Financial Coaching	

III. Ethics, Leadership, and Policy

CNSR SCI 255	Consumer Financial Services Innovation	
CNSR SCI 360	Sustainable and Socially Just Consumption	
CNSR SCI/ HDFS 465	Families & Poverty	
CNSR SCI 477	The Consumer and the Market	
CNSR SCI 562	The Global Consumer	
CNSR SCI 567	Product Development Strategies in Retailing	
CNSR SCI 575	Family Economics and Public Policy	

High Impact Practice

CNSR SCI 603	Retailing Internship	3
--------------	----------------------	---

Total Credits	70-71
---------------	-------

¹ CNSR SCI 250 Retail Leadership Symposium may be repeated for up to three credits. Credits in addition to the one required credit will be counted as elective credits.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Students will invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Students will demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Students will acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Students will demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

ADVISING AND CAREERS

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

The Student Academic Affairs & Career Development Office (SAA) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Student Academic Affairs & Career Development Office. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (<https://sohe.wisc.edu/prospective-students/advising>).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a life-long learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Internship and Career Preparation (<https://sohe.wisc.edu/prospective-students/career-preparation>).

PEOPLE

Professors Bartfeld, Shim, Wong, Zepeda; Associate Professor Collins, Robb; Assistant Professors Addo, Ashton, Warmath; Faculty Associates Lepe, Murray, O'Brien, Olive, Whelan

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

DESIGN STUDIES

Design Studies offers multidisciplinary education in design and research of interior design environments and textiles and apparel design, through participation in formal classroom instruction and ongoing research and scholarly endeavors. Students benefit from a broad-based program and faculty specializing in areas such as design visualization, environment and behavior studies, history of interiors and textiles, interior architecture, material culture, textile and apparel design, and textile science.

Two undergraduate degree majors are offered: interior architecture, and textiles and fashion design. There is also a human ecology: design studies graduate program, offering M.S., MFA, and Ph.D. degrees.

Student internships in both undergraduate majors augment campus course offerings, providing students with unique learning opportunities in their chosen fields. Design studies majors have access to design resources: studios, a computer laboratory equipped to support design work; textile laboratories including a testing room; an interior architecture resource room, the Design Gallery, the Helen Louise Allen Textile Collection, and the Ruth Ketterer Harris Library. In addition, a strong collaborative environment exists for students and faculty interaction with other departments, institutes, and museums on the campus and other design programs within the state and country.

DEGREES/MAJORS/CERTIFICATES

- Interior Architecture, B.S. (p. 1535)
- Textiles and Fashion Design, B.S. (p. 1537)

PEOPLE

Professors Angus, Dong, Nelson, Rengel, Sarmadi; Associate Professors Hark, Kallenborn, Shin; Assistant Professors Fairbanks, Penick, Ponto, Thorleifsdottir; Faculty Associates Kurutz, Sager

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

INTERIOR ARCHITECTURE, B.S.

The undergraduate major in interior architecture is a four-year professional program accredited by the Council for Interior Design Accreditation (CIDA) and leading to the Bachelor of Science degree in Interior Architecture. The program develops students' creativity in the design and planning of interior spaces by emphasizing the process and communication of design. Students learn to integrate the art of design with the social sciences concerning the interaction of people and their environment, the history of design, and the physical sciences relating to the effects of materials on the physical health and comfort of inhabitants. Insight into professional practice is enhanced through internship experiences.

Faculty maintain scholarly programs of study in design and research that form the basis of the graduate program and enrich the undergraduate program through course work, design review, and student mentoring.

Course content helps students develop verbal and visual communication skills with exposure to both residential and commercial interiors. In addition, courses in art history, history of interiors, engineering, and art are required. A final portfolio is required before graduation. Studio spaces for student use, a resource center containing catalogs and samples, plus a lighting demonstration area and computer laboratory provide physical support for the interior architecture curriculum.

HOW TO GET IN

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Freshmen should declare their intention to pursue the interior architecture (IA) major when they apply for admission to UW-Madison. In addition, students may indicate interest in the IA major when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW-MADISON STUDENTS

PHASE I

Students interested in entering Phase I must have a minimum cumulative GPA of 2.75. Students who meet this requirement should meet with an advisor to declare the major as early in their academic career as possible.

Transfer students may take longer to complete their degree than students entering the program as freshmen, as they too must complete both Phase I and Phase II, which contain specialized courses that must be taken sequentially.

PHASE II

Advancement into Phase II is competitive and involves an application process that occurs each spring semester. Admission is based upon evaluation of a student's performance in Phase I of the curriculum. This includes the Design Core: DS 120, DS 220, DS 130, Art 112, and M E 160 and a minimum of 12 general studies credits selected from the following: Math 112 or Math 114; Communication A; Literature; Econ 101 or AAE 215; Psych 202; Anthropology or Sociology; Physical Science; and Biological Science.

After completing Phase I of the program and upon acceptance into Phase II, all IA students must purchase a laptop computer based on minimum hardware specification and software licenses determined by the department and updated regularly. Students also have the option, but are not required, to purchase a laptop computer before completion of Phase I of the program.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Interior architecture students will have grounding in the history and theory relevant to the built environment and human behavior.

2. Interior architecture students will have intellectual skills for inquiry, creative thinking, and critical analysis.
3. Interior architecture students will have professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Interior architecture students will be able to apply the design process to identify and explore complex problems and generate creative solutions that optimize the human experience within the interior environment. This includes the ability to apply research and the principles and theories of Design to their solutions.
5. Interior architecture students will be able to apply their knowledge of building materials and systems, building construction, and industry specific codes, standards and guidelines in order to enhance the health, safety, welfare and performance of building occupants.

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

TEXTILES AND FASHION DESIGN, B.S.

Textiles and Fashion Design (TFD) is a unique hybrid program that combines a deep understanding of materials and techniques with an academic base of history, science, and contemporary design. The heart of the major lies in the hands-on studio courses where students learn to weave, dye, print, construct, pattern, illustrate, design and innovate. Going beyond technique, TFD faculty encourage students to intuitively make, analyze and revise, leading to discovery and creative problem solving. Special topics focus on environmental, economic, and cultural sustainability as well as technology and non-traditional entrepreneurship.

Coursework in the TFD program is enhanced by visiting lecturers, special projects with industry partners, and the on-site Helen Louise Allen Textile Collection. Upper-level students in the major are given the opportunity to professionally show their work to a public audience in the fall annual student showcase and the spring fashion show.

Our award-winning students are both highly creative and superb craftspeople engaged in addressing real world problems and offering sustainable solutions.

TFD

Our bachelor of science degree (B.S.) in textiles and fashion design (TFD) highlights craft technique as a pathway to creative practice and prepares students for an exciting creative career in design. Studies can focus primarily in textiles or in fashion, but students are encouraged to experiment in both areas. The program emphasizes interdisciplinary partnerships and encourages learning by doing in studios, outreach projects, and sustainable practices.

Through capstone and thesis experiences in the final year, students are given time and mentoring to create and present their own unique body of work.

TFD-FIT

For those leaning toward an industry career, our program gives students the option to apply to spend their senior year at Fashion Institute of Technology (<http://www.fitnyc.edu>) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Accessory Design, or Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a bachelor of science (B.S.) degree from the University of Wisconsin-Madison in textiles and fashion design and an associate of applied science (A.A.S) degree from FIT. Students attending FIT who are considered Wisconsin nonresidents continue to pay out-of-state tuition, even if they reside in the state of New York.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Freshmen should declare their intention to pursue the Textiles and Fashion Design (TFD) major when they apply for admission to UW–Madison. In addition, students may indicate interest in the TFD major when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

The program is designed to be completed in four academic years.

On-campus transfer students must have a 2.75 grade point average in order to enter the program. For transfer students, sequential courses and courses taught only once a year should be taken into account when calculating time toward completion of the degree, as graduation time may be extended.

Students intending to complete their final year of study at FIT must complete an additional application. Only students with a 3.0 or higher GPA in December of their third year in the program are eligible to apply for admission to FIT.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. School of Human Ecology students will have grounding in the history and theory relevant to the human ecological perspective.
2. School of Human Ecology students will have intellectual skills for inquiry, creative thinking, and critical analysis.
3. School of Human Ecology students will have professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Textiles and Fashion Design students will have the ability to move beyond technique, taking creative risks to develop conceptually cohesive work through advanced knowledge of materials, processes, and an understanding of design principles.
5. Textiles and Fashion Design students will have the ability to participate in professional discussions and critique that are informed by foundational knowledge of fashion and/or textile history, theory, and science.

ADVISING AND CAREERS

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

HUMAN DEVELOPMENT AND FAMILY STUDIES

The Department of Human Development and Family Studies (HDFS) serves undergraduate and graduate students by offering a bachelor of science in human development and family studies and a Ph.D. in human ecology: human development and family studies. Students and faculty in HDFS are dedicated to improving the quality of life for children, adolescents, and adults by discovering, integrating, applying and disseminating knowledge about lifespan human development, relationships, families, and communities, all in their larger social contexts. The application of human ecological and interdisciplinary

perspectives to solve societal problems and strengthen the well-being of children, adults, and families is a distinctive feature of the department.

DEGREES/MAJORS/CERTIFICATES

- Human Development and Family Studies, B.S. (p. 1540)

PEOPLE

Professors Poehlmann-Tynan, Raison, Roberts, Small; Associate Professors Dilworth-Bart, Duncan, Halpern-Meekin, Hartley, Kirkorian, Nix, Papp; Assistant Professor Litzelman; Faculty Associates Burkholder, Levchenko

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

HUMAN DEVELOPMENT AND FAMILY STUDIES, B.S.

The undergraduate major in human development and family studies (HDFS) offers specialized courses in human development from infancy through old age, couples and family relationships, research methods, policymaking, parent-child relations, family health and well-being, parent education and support, and ethnic and cultural diversity in families. In addition to coursework, all students engage in a 150-hour, semester-long internship or high-impact learning experience in a professional setting related to their major and career goals. These settings include community mental health programs, early childhood education, legislative offices, health care agencies, research labs, criminal justice systems, child and family life education, and community-based social justice programs.

The major prepares students for careers in human and family service organizations and for graduate or professional school in a variety of fields including health care, education, family law, counseling, occupational therapy, program evaluation, physical therapy, case management, and the child life profession.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

Students who indicate interest in the human development and family studies (HDFS) major on their UW–Madison application will be admitted to the HDFS major upon admittance to the university. In addition, students may indicate interest in HDFS when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

First-year students in good academic standing and first-semester transfer students may declare the HDFS major upon request. All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by attending a Becoming a SoHE Student Workshop

(<https://sohe.wisc.edu/prospective-students/prospective-students/becoming-sohe-student-workshops>).

Visit On-campus Student Application (<https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology>) for application information and the October and February deadlines.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

HUMAN DEVELOPMENT AND FAMILY STUDIES REQUIREMENTS

A complete list of requirements is below. Students should follow the curriculum requirements in place at the time they entered the major. Curriculum check sheets from previous academic years are available online (<https://sohe.wisc.edu/prospective-students/advising/curriculum-checksheets>). This requirement list should be used in combination with a DARS report.

Code	Title	Credits
School of Human Ecology Requirements		
<i>Arts and Humanities</i>		
	Literature	3
	Humanities	6
<i>Social Science</i>		
PSYCH 202	Introduction to Psychology	3-4
	Select 6 credits designated Social Science breadth	6
<i>Physical, Biological and Natural Science</i>		
	Human Ecology Breadth	3

Select a Human Ecology course from CNSR SCI, CSCS, DS, or INTER-HE

Human Development and Family Studies Major Requirements

Learning Outcome 1: Lifespan Human Development

Earlier Lifespan

Select one of the following:	3
HDFS 362	Development of the Young Child
ED PSYCH 320	Human Development in Infancy and Childhood
PSYCH 460	Child Development

Later Lifespan

HDFS 363	Development from Adolescence to Old Age	3
----------	---	---

Learning Outcome 2: Family and Community Diversity

Select one of the following:	3
HDFS/ CNSR SCI 465	Families & Poverty
HDFS 474	Racial Ethnic Families in the U.S.
HDFS/ AFROAMER/ SOC WORK 521	African American Families

Learning Outcome 3: Internal Family Processes

Select one of the following:	3
HDFS 471	Parent - Child Relations
HDFS 516	Stress and Resilience in Families Across the Lifespan
HDFS 517	Couple Relationships

Learning Outcome 4: Social Institution Influences

Select one of the following:	3
HDFS 469	Family and Community Influences on the Young Child
HDFS 535	A Family Perspective in Policymaking
HDFS/COM ARTS/ JOURN 616	Mass Media and Youth

Learning Outcome 5: Assessment, Prevention, Intervention, and Outreach

Select one of the following:	3
HDFS/INTER- HE 650	Parent Education and Support Programs
HDFS 663	Developmental and Family Assessment

Learning Outcome 6: Understanding Social Science Research

Statistics

Select one of the following:	3-4
SOC/ C&E SOC 360	Statistics for Sociologists I
STAT 301	Introduction to Statistical Methods
STAT 371	Introductory Applied Statistics for the Life Sciences
PSYCH 210	Basic Statistics for Psychology

Research Methods

Select one of the following:

HDFS 425	Research Methods in Human Development and Family Studies	3
PSYCH 225	Research Methods	
SOC/ C&E SOC 357	Methods of Sociological Inquiry	
Professional Development		
INTER-HE 202	SoHE Career & Leadership Development	1
HDFS 501	Special Topics (Select Special Topic: HDFS Leadership Symposium)	1
HDFS 601	Internship	3
Additional high-impact practice course to be approved by the student's SoHE academic advisor ¹		3
Electives		
Select courses to bring degree credit total to 120		
Total Credits		62-64

¹ Examples include service learning course, second internship or research experience, study abroad experience, select upper-level HDFS courses, or undergraduate teaching assistantship experience.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Knowledge of lifespan human development (including cognitive, social, and emotional development and individual differences) in social and ecological contexts.
2. Knowledge of family and community diversity.
3. Knowledge of internal family processes, including parenting and parent-child relations, couples, and family relationships across generations and family health and wellbeing.
4. Ability to consider and evaluate how children, adults, and individual families affect and are affected by policies, media, or other social institutions.

5. Knowledge about the effective and ethical practice of assessment, prevention, intervention, or outreach for individuals and families.
6. Ability to understand, evaluate, and ethically conduct social science research.
7. Ability to demonstrate relevant professional skills.

ADVISING AND CAREERS

STUDENT ACADEMIC AFFAIRS & CAREER DEVELOPMENT

The Student Academic Affairs & Career Development Office (SAA) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Student Academic Affairs & Career Development Office. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (<https://sohe.wisc.edu/prospective-students/advising>).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a life-long learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Internship and Career Preparation (<https://sohe.wisc.edu/prospective-students/career-preparation>).

PEOPLE

Professors Poehlmann-Tynan, Raison, Roberts, Small; Associate Professors Dilworth-Bart, Duncan, Halpern-Meekin, Hartley, Kirkorian, Nix, Papp; Assistant Professor Litzelman; Faculty Associates Burkholder, Levchenko

For more information, visit the School of Human Ecology faculty and staff directory (<https://sohe.wisc.edu/connect/faculty-staff>).

HUMAN ECOLOGY - SCHOOL-WIDE

DEGREES/MAJORS/CERTIFICATES

- Individual Major, B.S. (p. 1543)

INDIVIDUAL MAJOR, B.S.

The individual major is a program for undergraduate students who want to fulfill a specific academic goal that is not easily attained through a major in one or more departments. The major must meet a course of study that involves at least two departments and be targeted at a specific problem or academic interest identified by the student. A student proposal must be submitted and approved by the SoHE Undergraduate Program Council. Students are encouraged to begin working with faculty and advisors in the Student Academic Affairs & Career Development Office by the end of the sophomore year. Thirty credits must be earned in residence after the term in which the proposal is approved. The major will be guided by a committee of at least three faculty members (with no more than two faculty members from one department).

Individual majors are intended to create a unique program of study that otherwise does not exist on this campus individually or in a combination of majors and certificate programs. Students should carefully explore all University of Wisconsin–Madison majors, certificates, and dual-degree opportunities before pursuing an individual major. A proposal that essentially parallels an existing SoHE or campus major will not be approved.

Graduates of the Individual Major earn a bachelor of science in human ecology. The major will match the approved proposal title, which must have a human ecology focus.

HOW TO GET IN

ELIGIBILITY

Students must be in good academic standing and have a minimum cumulative GPA of 3.5 to be considered for an Individual Major. Any interested student should have completed at least two semesters (a minimum of 24 credits) in residence before submitting an application. Ideally, proposals will be made by the end of sophomore year or the beginning of junior year.

PROPOSING AN INDIVIDUAL MAJOR

After discussing their proposed plan with a SoHE advisor and ensuring they meet the application qualifications, students will begin building a faculty committee and developing a proposal. An Individual Major must be comprised of at least two different SoHE academic departments. If a third department is selected, it may be from in or outside of SoHE. Students should develop a one-page abstract to share with faculty as they work to build their committee. Once the committee is formed, the student will select one committee member as the major advisor. The major advisor must be from the SoHE department in which the majority of courses for the program will be taken. The student will work with the faculty committee to develop the proposal and select all required courses for the Individual Major, the majority of which must be completed in SoHE. The student will then submit a formal proposal to the SoHE Student Academic Affairs & Career Development Office to be forwarded for action to the SoHE Undergraduate Program Council, which meets throughout the academic year.

Please contact the SoHE Student Academic Affairs & Career Development Office for the complete Individual Major proposal instructions.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

INDIVIDUAL MAJOR REQUIREMENTS

The student will work with the faculty committee to develop the individual major proposal and select all required courses, the majority of which must be completed in SoHE. If the Individual Major is approved by the SoHE Undergraduate Program Council, the student will complete all required courses as outlined with the faculty committee.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ADVISING AND CAREERS

Students interested in pursuing an individual major should first meet with a SoHE academic advisor to ensure program eligibility and to discuss their area of interest and rationale. Appointments should be made by contacting the SoHE Student Academic Affairs & Career Development Office at 608-262-2608.

SCHOOL OF NURSING

The School of Nursing (<https://nursing.wisc.edu>), established in 1924, is the leading nursing research institution in Wisconsin and a crucial part of the state's health care system.

The school offers a full array of degree programs enrolling more than 1,000 students—the bachelor of science in nursing (BSN), the doctor of nursing practice (DNP), and the doctor of philosophy in nursing (Ph.D.), along with several graduate-level certificate programs.

At the undergraduate level, degree options include the Traditional BSN, a four-year degree program; the Accelerated BSN, a 12-month program for second-degree candidates; and the RN to BSN (BSN@Home) program, for registered nurses who hold an associate's degree in nursing and wish to earn the baccalaureate degree. Options exist for honors study in the major, as well as joint programs whereby students can earn the master of public health along with the BSN or transition directly to the Ph.D. program via the Early Entry Ph.D. Option.

Student life pairs the educational and social resources of a large, world-class university with a supportive environment at the school. Students receive comprehensive support services related to advising, program planning, clinical placements, career services, financial aid, and post-graduation credentialing.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; nursing homes; day-care centers; and public health agencies. The university's location in Wisconsin's capital offers additional opportunities in state government and policy making.

On campus, Signe Skott Cooper Hall, the School of Nursing's new facility, has state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff and the communities and populations we serve.

The school's mission is to develop leaders for the profession and society—we make discoveries, enhance systems, and improve health through research, education, and practice.

ENTERING THE SCHOOL

ADMISSION TO UW–MADISON

All prospective UW–Madison nursing students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu>).

PRE-NURSING FRESHMEN

Students who indicate interest in the nursing major on their UW–Madison application will be admitted to the School of Nursing as pre-nursing (PRN) students. In addition, students may indicate interest in the nursing major when registering for Student Orientation, Advising, and Registration (SOAR). The School of Nursing is the academic home for pre-nursing students, providing orientation, academic advising, academic support, etc., while students complete nursing prerequisite courses and general education requirements in preparation to apply to the nursing major. Most pre-nursing students apply to the nursing major midway through their sophomore year to enter the two-year Upper Division nursing program as juniors.

PRE-NURSING TRANSFERS

Students may transfer into UW–Madison as pre-nursing students. As with pre-nursing freshmen, transfer students have an academic home in the School of Nursing as they work to complete prerequisites and general education requirements in preparation to apply to the Upper Division Traditional BSN program.

SECOND-DEGREE CANDIDATES

Students seeking to earn a second degree in nursing can apply directly to either the Traditional BSN program or the Accelerated BSN program upon completing necessary admission requirements (see details below). Second-degree candidates must be admitted directly into the nursing program; they cannot enter UW–Madison as pre-nursing students.

ADMISSION TO THE NURSING PROGRAM TRADITIONAL BSN

As students complete the requirements to be eligible to apply to the nursing program, they apply to the Upper Division Traditional BSN program. To be eligible to apply, students must complete the necessary prerequisite courses and have the minimum 2.75 cumulative and prerequisite GPAs; complete details on the Upper Division Traditional BSN admission requirements and application process can be found on the Traditional BSN admission page (p. 1550) of this *Guide*.

ACCELERATED BSN FOR SECOND-DEGREE CANDIDATES

Second-degree candidates can apply for the Accelerated BSN program. This is a 12-month intensive baccalaureate program that offers the quickest route to licensure as a registered nurse (RN) for students who have already completed a bachelor's degree or graduate degree in a non-nursing discipline. Students must complete nursing prerequisite courses and the university General Education Requirements, and have the minimum GPAs, to be eligible to apply. Complete details on the accelerated BSN admission requirements and application process can be found on the Accelerated BSN admission page (p. 1554) of this *Guide*.

RN TO BSN (BSN@HOME)

Registered nurses who have an associate's degree or diploma in nursing can apply to enter the BSN@Home program to earn their bachelor's degree in nursing (BSN). There are GPA minimums and course requirements necessary for admission eligibility. These details are included on the BSN@Home admission page (p. 1557) of this *Guide*.

CURRENT UW–MADISON STUDENTS

Students with at least a 2.75 cumulative and nursing prerequisite GPA may transfer into the School of Nursing as pre-nursing (PRN) students. Students who are not in the School of Nursing may also apply for the Upper Division Traditional BSN program without being pre-nursing students. Transfer requests (i.e., classification changes) must be made before the twelfth week of the semester in order to be applied to that semester. Requests made after the twelfth week will take effect at the start of the following semester. For more information and to request a classification change to PRN, students should contact the nursing Office of Academic Affairs at 608-263-5202.

POLICIES AND REGULATIONS

The students, faculty, administration, and staff of the School of Nursing are part of the University of Wisconsin–Madison's academic community, and as such, are subject to the policies, rules, and regulations of the university. In addition, the school and its respective programs may, as deemed necessary, develop their own policies and procedures to augment those of the university. Following are the specific School of Nursing policies and regulations that expand upon or differ from the policies of the university as a whole.

ACADEMIC STATUS

Academic Actions (Warning, Probation, Drop)

Every student (pre-nursing and nursing) is expected to maintain at least a 2.5 GPA on all work carried, whether passed or not, in each semester or summer session. Students who maintain this average are considered in **good standing**. Failure to earn this minimum GPA will result in the academic action of **warning, probation, or dropped** (academically dismissed). Students must be in good academic standing in order to be eligible for graduation.

If not on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = warning
2. Earns a GPA in a semester or summer session of less than 1.75 = probation

If on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = probation
2. Earns a GPA in a semester or summer session of less than 1.75 = dropped from the program

If on probation and:

1. Earns a GPA in a semester or summer session of 2.5 or above but cumulative GPA remains under 2.5 = continued probation
2. Earns a GPA in a semester or summer session of less than 2.5 or a nursing cumulative GPA below 2.5 = dropped from the program

In addition to the academic actions detailed above, nursing (NUR) students are placed on probation if they:

1. Earn a grade of F or NC in any nursing course, and/or
2. Earn a nursing cumulative GPA below 2.5

Any student on academic action will automatically be cleared of action status when the semester GPA is 2.5 or above and the cumulative GPA is 2.5 or above; and if NUR or NCP (i.e., BSN@Home) classification, the nursing cumulative GPA is at least 2.5 or above.

Dean's Honor List

The purpose of the Dean's Honor List is to recognize superior academic achievement of undergraduate students. Students must achieve a minimum GPA of 3.75 on a semester load of not fewer than 12 credits in order to be placed on the Dean's Honor List. A notation of *Dean's Honor List* will appear on the student's grade report and transcript. Students who earn a semester GPA of 3.25–3.74 on 12 or more credits will receive a congratulatory statement on their end-of-semester grade report form.

English as a Second Language

All nursing students must be proficient in English to provide safe patient care and to be successful academically. Students facing challenges in these areas may be referred by self-identification, a faculty member, or advisor to support services. Although limited English proficiency in itself is not a reason for dismissal, it can interfere with a student's ability to complete course requirements, leading to failure to progress or meet program requirements.

Good Standing

To be in good standing, students must maintain:

- a cumulative GPA of 2.5 or above, and
- a cumulative GPA of 2.5 or above on all nursing courses completed, and
- a GPA of 2.5 or above in the semester just completed

Graduating with Distinction

Graduation with Distinction will be noted on the transcript of students who earned 60 or more credits at UW–Madison and a GPA that places them in the top 20 percent of those graduating from the School of Nursing that term.

Satisfactory Academic Progress

The time required to complete the program depends on the sequence of courses, plan of study, and placement availability in nursing courses. Students may complete the program in four years; however, additional semesters or summer sessions may be needed to fulfill requirements. If requirements for the degree have not been completed within five years after admission to the nursing major, the student's academic record will be reviewed by the Office of Academic Affairs to establish additional requirements, if appropriate.

APPEALS, GRIEVANCES, AND PETITIONS

Appeals

Appeals are limited to requests to continue in the nursing program after being dropped from the program for academic reasons. A written appeal must be filed with the assistant dean for academic affairs within 10 working days of the date of the letter notifying the student of the decision to discontinue the student in the program. Details on the appeal process can be found in the Student Appeals and Grievance Procedures (http://academic.son.wisc.edu/studentnet/docs/appeals_grievances.pdf).

Grievances

Any student who believes that he or she has been treated inequitably is encouraged to resolve the matter informally. The student should first talk with the person or group at whom the grievance is directed in an effort to resolve the issue informally. A grievance procedure is available to resolve student concerns regarding inequitable treatment that have not been satisfactorily resolved through the informal resolution process or where the student believes that informal resolution would not be productive. Details on the appeal process can be found in the Student Appeals and Grievance Procedures (http://academic.son.wisc.edu/studentnet/docs/appeals_grievances.pdf).

Petition for Special Consideration

Nursing students may use the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>) to request an alternative or exception to an academic rule, regulation, procedure, or requirement.

CLINICAL/EXPERIENTIAL LEARNING COURSES

All nursing students are required to complete credit hours in the clinical setting under the supervision of a nursing professional. In the School of Nursing, the term *experiential learning* is used to describe the clinical course experience. These clinical experiences support the mission of the School of Nursing, integrating practice and coursework, to provide a comprehensive nursing education. There are some policies specific to experiential learning courses:

Compliance Requirements

The School of Nursing is committed to ensuring all nursing students are compliant with national and state guidelines for personnel providing nursing care, as well as additional/specific requirements mandated by the school's clinical affiliates as set forth in the clinical affiliation agreements. Therefore all nursing students are required to be in full adherence to the school's compliance program while enrolled in the nursing program. The school's compliance program includes immunizations, trainings, and a background check. Students will be held accountable for complying with the clinical eligibility requirements prior to entering the program and throughout their program of study. All students are required to keep their compliance documents up to date as an essential part of their professional responsibility for patient safety. Review the Nursing Student Compliance Program (<http://academic.son.wisc.edu/studentnet/compliance>) for complete details.

Clinical Placements

Students are assigned to clinical placement sites based on the faculty's selection of clinical sites specific to the learning objectives of the course, site characteristics, and availability. Students need to be prepared to travel up to 90 miles from the School of Nursing and have varied schedules including evenings, nights and weekends. Clinical shifts may be 4-12 hours long. The School of Nursing secures clinical placements for all students who are eligible. Students are not asked to nor allowed to arrange their own clinical placements.

Transportation

The School of Nursing recognizes that students need educational experiences beyond those available in hospitals in Madison, Wisconsin. In answer to this educational need, and in order to secure enough clinical sites for all students, the school places its students in a variety of venues in and beyond Madison. This includes ambulatory sites, clinics, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, etc. This gives our students comprehensive exposure to a broad range of patients, illness, and care. Nursing students are responsible for arranging their own transportation to and from their

clinical sites. First-year clinicals are accessible by public transportation from Signe Skott Cooper Hall and other points in Madison. Second-year clinicals require travel to and from an agency, as well as to and from homes, schools, and other sites. Locales may be up to 90 miles from Madison. Therefore, second-year nursing students are required to have (1) a valid driver's license, and (2) individual access to a car. Students are responsible for all transportation costs incurred, including gas and parking fees. Students with extenuating circumstances that have an impact on their clinical transportation options (e.g., driving/medical restrictions) should use the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>) to request an accommodation or exception to the transportation policy. The petition must be submitted on/by March 1 for clinical placements during the next fall term and on/by November 1 for the next spring term placements. These deadlines are firm, as a petition must be reviewed in advance of clinical assignments. There is no guarantee the school will be able to honor such requests/conditions, and exceptions are granted in very rare circumstances.

Uniforms

Nursing students are required to purchase the approved School of Nursing uniform. The uniform consists of a white top and navy pants. The white top, embroidered with the School of Nursing logo, is available in two styles and the pants will be available in three styles. Lab coats embroidered with the school logo are also required and are worn when students are on their clinical units doing clinical preparation and during most community clinical experiences. In addition to the uniform requirements, there are also professional appearance guidelines (http://academic.son.wisc.edu/studentnet/undergrad/course_info/prof_appearance.php) for students.

COURSES AND ENROLLMENT

Attendance

In order to meet course and/or clinical objectives, students are expected to be present and engaged in both the classroom and/or clinical learning environment. Excessive absences impede a student's ability to meet course objectives resulting in an unsuccessful completion of a course. Students are expected to attend and participate in all classes and clinical rotations unless excused by the course faculty prior to being absent. Faculty may request documentation regarding the nature of the absence (health provider note, proof of emergency, etc.), particularly if absences become excessive. For clinical courses, students who miss more than 12 supervised hours will be dropped from the course.

Credit/No Credit Courses

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or N (meaning the student did not earn any credit for the class). Students may not take such courses on any other basis.

Concurrent Registration and Enrollment

In some rare circumstances, and only with prior approval of the academic dean, students may enroll to earn degree credit concurrently at UW–Madison and any other accredited postsecondary school, including the UW–Extension. Requests for approval should be made prior to the end of the second week of classes of the semester in which dual registration is desired. Courses must be completed during the semester in which concurrent enrollment is allowed. To request permission for concurrent enrollment, submit the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Drop Notation

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see *Deadlines at a Glance* (http://www.registrar.wisc.edu/spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that the School of Nursing does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

Dropping a Nursing Course

A student who drops a nursing (N#) course may reenroll in the course when space is available. A student who drops a nursing course a second time is not eligible for the course a third time.

Independent Study

Students are responsible for identifying their area of interest or question, establishing objectives for their learning experience, and developing a learning contract with the faculty member. All independent study requires the consent of the instructor. Approval forms are available on the Forms Page (<http://academic.son.wisc.edu/studentnet/forms/enroll>) within the School of Nursing StudentNet.

Registration Changes

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Reentry

Any student who leaves the School of Nursing and wishes to return after an absence of one semester or more must file a reentry application with the UW–Madison Office of Admissions and Recruitment. Permission to reenter is dependent on program capacity, previous academic standing, and length of absence. Immediate placement in required nursing courses is not assured. Students seeking reentry to the baccalaureate program who have left on academic action must be reviewed by the Office of Academic Affairs. If readmission is granted, academic requirements may be specified to insure currency in nursing knowledge and skills prior to enrolling in clinical nursing courses. These requirements may include remediation and/or repetition of courses, depending on academic standing or length of time since leaving the program. The remaining program will be planned as considered best for the student and according to the current curriculum.

Retaking Courses

Each individual required nursing course may be repeated only once with a maximum of two repeated courses in the curriculum. Students who do not successfully complete a course after two attempts or who must repeat more than two different courses will be dis-enrolled from the nursing program. A course for which a student earned a grade below C (or NC in a clinical course) must be repeated within the next two semesters in residence. All grades earned will be used in calculating the student's cumulative and nursing grade point averages, but credits will be counted only once toward the minimum nursing and degree credit requirements.

Didactic/Theory Courses: Undergraduate students may repeat any required didactic/theory course once without special permission from the Assistant Dean for Academic Affairs.

Clinical Courses: To repeat a clinical course, an appeal must be made to the Assistant Dean for Academic Affairs who will determine if the appeal merits approval. Upon a successful appeal, a student may repeat a clinical course based upon course schedule and program capacity.

Withdrawal

A nursing student who finds it necessary to withdraw during a semester or summer session must talk with an academic advisor and complete the withdrawal process. Failure to do so may result in a recording of failure for all courses. Any student may withdraw from the program without grades being recorded during the first 12 weeks of a semester. After the 12th week, a student may withdraw only with the permission of the Office of Academic Affairs.

CREDITS

30-Credit residence requirement

Students must complete at least 30 credits at UW–Madison. Baccalaureate students must complete at least 15 credits in nursing courses from the School of Nursing, including one required clinical nursing course at the 400 level or above.

Credit Load

A full-time program is 12 to 18 credits for a semester. Students who wish to carry more than 18 credits per semester must obtain permission from the Office of Academic Affairs. Students will be assessed additional tuition per credit on all credits carried over 18.

Retrocredits

The School of Nursing grants retroactive foreign language credit to students for foreign language skill developed in high school or elsewhere. To earn retroactive credits for language, students must enroll in a higher level language course at UW–Madison before the end of the first two semesters in residence. Transfer students must enroll in the course on the UW–Madison campus before they earn 30 degree credits (including credits transferred from other campuses but not including AP, CLEP, IB, or retro credits in another language). Students must earn a grade of B or better. If these conditions are met, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester. Students will receive credit for the UW course completed and for all lower level courses in that language up to 16 retroactive credits maximum. These retroactive language credits may be used to meet degree requirements of the college or department, but may not be used to meet humanities requirements. They will be counted as electives only.

DEGREES

Second Undergraduate Degree

Second undergraduate degree candidates are considered for admission to both the pre-nursing and nursing classifications. Students who apply as second undergraduate program candidates must meet the admission and transfer grade point requirements of the university in place at the time they apply for admission. If admitted, an action is taken granting permission to pursue a second degree.

Second Major

Students may request permission to pursue a second major along with the nursing degree. Students must complete the nursing school's Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>) to make the request.

GRADES

Grading Scale

The school has a standard grading scale in nursing courses that are graded A-F, as noted below. Some clinical courses are graded Credit/No Credit.

A: 94–100
 AB: 88–93.99
 B: 82–87.99
 BC: 76–81.99
 C: 70–75.99
 D: 65–69.99
 F: <65

Incompletes

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond the student's control, is unable to take or complete the final examination or is unable to complete some limited amount of term work. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of substantiated cause, the grade shall be F. Even with such proof, if the student's work has convinced the instructor that s/he cannot pass the course, the grade shall be F. Any Incomplete taken by a School of Nursing student must be completed by the end of the student's next semester of residence (specifically, by the last day of classes), excluding summer sessions. If the work is not completed by this deadline, the Incomplete will lapse into a Failure unless the time limit has been extended in writing by the Office of Academic Affairs.

Minimum Grade Requirement

Students must earn a grade of C (2.0) or higher in each required nursing (N#) course, including didactic/theory and clinical courses. Students must receive credit (CR) in any clinical course that is offered on a Credit/No Credit basis. Any student who earns a grade below C or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program in accordance with subsequent course prerequisites.

Pass/Fail

The total number of ungraded credits (i.e., pass/fail) applied to graduation requirements may not exceed 24. Students who plan graduate study are advised to consult with graduate studies departments to determine acceptance of credits taken under the pass/fail option. Students eligible for the pass/fail privilege are continuing students with NUR, NCP (BSN@Home), or PRN classifications who have a minimum 2.5 cumulative GPA on all courses completed and have no end-of-semester academic actions on their current record. Newly admitted students in these classifications are also eligible for the pass/fail privilege. Only one course can be carried on pass/fail basis during each semester or summer session; or 3 or 4 credits of 1-credit modular courses. No required courses may be carried under the pass/fail option. The registrar's office will convert final letter grades reported by the student's instructor to an S (pass) grade if the letter grade is C or higher or to a U (fail) if the final letter grade is below C. Course credits in which a student obtains a U grade cannot be counted toward the minimum of 124 credits required for graduation. Students interested in the pass/fail option must contact their nursing academic advisor to determine eligibility.

RESOURCES

SIGNE SKOTT COOPER HALL

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \$53.3 million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes and greater satisfaction with care.

ADVISING AND STUDENT SERVICES

OFFICE OF ACADEMIC AFFAIRS

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

ACADEMIC ADVISING

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (http://academic.son.wisc.edu/studentnet/undergrad/advising/advisors_ug.php). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

CAREER ADVISING

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

ACADEMIC SUPPORT SERVICES

The Nursing Learning Center (http://academic.son.wisc.edu/studentnet/resources/learning_support_serv.php) in Cooper Hall is a place where students can gather with other like-minded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

STUDENT ORGANIZATIONS

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student

Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Scholarships@UW–Madison system (<http://www.scholarships.wisc.edu>).

HONORS

HONORS PROGRAM

The School of Nursing offers an Honors Program for those high-ability students seeking early research involvement with a faculty mentor. Students who successfully complete the Honors Program graduate with distinguished academic performance and receive a Bachelor of Science in Nursing (BSN) with Honors. In addition, students of the Honors Program acquire an enriched view of nursing science.

Each student in the Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Qualified students with a cumulative undergraduate GPA at or above 3.5 are invited to apply for admission to the Honors Program when they are admitted to the nursing program. Admission to the Honors Program is judged on past academic work, a short essay, and a letter of reference.

Review the Honors Program (http://academic.son.wisc.edu/studentnet/undergrad/degree/honors_req.php) page of the StudentNet for complete details.

SCHOOL OF NURSING

DEGREES/MAJORS/CERTIFICATES

- Nursing, BSN (p. 1550)
- Nursing, BSN (Accelerated Program) (p. 1554)
- Nursing, BSN (Collaborative Program) (p. 1557)

NURSING, BSN

The bachelor of science in nursing (BSN) degree program prepares individuals for careers in professional nursing in hospitals and other health care agencies. This Traditional BSN program provides a foundation for progressing to positions of increased responsibility, leadership, and continued education in graduate programs. Upon successful completion

of the program, students receive a bachelor of science in nursing degree from the UW–Madison School of Nursing.

The curriculum includes courses in nursing as well as in liberal arts and sciences. Most students enter UW–Madison as pre-nursing students and spend their first two years completing nursing prerequisite and general education courses. Students then apply midway through their sophomore year to enter the nursing program as juniors. From there, the two-year nursing component includes lectures, laboratory, and clinical courses. Nursing courses emphasize clinical decision-making and the application of theoretical knowledge. Clinical experiences are offered in hospital settings and in community health settings. Elective courses in general education and in nursing permit students to pursue individual interests.

HOW TO GET IN

Admission to the nursing major is competitive and determined by a comprehensive review of each student's academic preparation and performance, leadership, extracurricular activities and service, health care experience and background, diversity in experience and background, and the quality of application statements/essays.

Upper Division admission is the standard route into the Traditional BSN nursing program. In this model, students enter UW–Madison as pre-nursing students (PRN), they spend the first two years completing general education requirements and nursing prerequisites, and then apply for admission to the nursing program for the final two years on campus. Students may also apply to transfer directly into the Traditional BSN campus from another institution, upon completing the admission requirements.

Admission is highly competitive and based on factors including academic performance, pattern and trend of grades, courses taken, leadership roles, extracurricular activities, experiences related to health care, and experiences or background in diverse cultural, social, and geographic settings. Approximately half the students who apply for admission are admitted. The application deadline is February 1 to enter the nursing program the following fall.

To be considered for Upper Division Admission, students must, at the time of application:

1. be in progress to complete at least 54 degree credits of college-level course work by the end of the spring semester;
2. have a minimum cumulative college GPA of 2.75 (based on a 4.0 scale) at the end of the fall semester and again at the end of the spring semester;
3. have completed or have in progress four of the following seven prerequisite courses by the end of the fall semester, and be enrolled to complete all seven by the end of the spring semester; and
4. have a minimum prerequisite GPA of 2.75 on all prerequisites completed to date and complete all seven with at least a 2.75 GPA.

The seven prerequisite courses are:

1. Chemistry w/ Lab
2. Microbiology
3. Human Anatomy
4. Human Physiology

5. Psychology (introductory)
6. Sociology (introductory)
7. Human Growth and Development

Students transferring to the University of Wisconsin–Madison, as well as students who already have a bachelor's degree and wish to earn a second degree in nursing, also apply via the Upper Division Admission option. More information on the admission process and requirements for transfer students and second-degree students is available on the School of Nursing website (<https://nursing.wisc.edu/undergraduate/bsn>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF NURSING REQUIREMENTS

The bachelor of science in nursing (BSN) degree is a 124-credit curriculum comprised of the core nursing curriculum, as well as general education requirements, nursing prerequisite coursework, and elective courses. The required courses for graduation are listed below. In addition to completing this coursework, students must:

1. Earn a cumulative and nursing GPA of at least 2.5, and
2. Complete at least 30 credits in residence on the UW–Madison campus, and
3. Earn at least 75 of the required 124 degree credits at the intermediate or advanced level

TRADITIONAL BSN MAJOR REQUIREMENTS

SCIENCE

Code	Title	Credits
Science		
<i>Chemistry</i>		
Select one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

ADVISING AND CAREERS

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and nursing years. As one of the smaller schools on campus, the school is able to offer a great deal of personal attention and individualized academic and career advising.

ACADEMIC ADVISING

All pre-nursing and nursing students are assigned an academic advisor based on the students last name. Generally speaking, freshmen receive advising in small-group sessions. Once students enter their sophomore year, they move to one-on-one advising appointments with their assigned advisor. Detailed information on the school's academic advising system and staff (http://academic.son.wisc.edu/studentnet/undergrad/advising/advisors_ug.php) are available on the school's student intranet, called the StudentNet (<http://academic.son.wisc.edu/studentnet>). Questions about advising can also be directed to the Office of Academic Affairs at 608-263-5202.

CAREER ADVISING

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. In addition, the school offers a 1-credit seminar N590 Introduction to Career Development in Nursing.

CERTIFICATION/LICENSURE

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health

and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

RESOURCES AND SCHOLARSHIPS

SIGNE SKOTT COOPER HALL

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \$53.3 million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes and greater satisfaction with care.

ADVISING AND STUDENT SERVICES

OFFICE OF ACADEMIC AFFAIRS

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

ACADEMIC ADVISING

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (http://academic.son.wisc.edu/studentnet/undergrad/advising/advisors_ug.php). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

CAREER ADVISING

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

ACADEMIC SUPPORT SERVICES

The Nursing Learning Center (http://academic.son.wisc.edu/studentnet/resources/learning_support_serv.php) in Cooper Hall is a place where students can gather with other like-minded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology,

and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

STUDENT ORGANIZATIONS

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Scholarships@UW–Madison system (<http://www.scholarships.wisc.edu>).

NURSING, BSN (ACCELERATED PROGRAM)

Students who already have a bachelor's degree or higher and are interested in making a career change to nursing can apply to enter this fast-track professional program to earn the bachelor of science in nursing (BSN) in just 12 months.

The Accelerated BSN program is new to UW–Madison. Admission for the first class will open fall 2017 and instruction will begin May 2018.

The program will be intense with students completing approximately 1 credit a week, for a total of 48–50 credits over 12 months. This equates to at least 45 hours of work each week.

Tuition will be a flat rate of \$45,000 for Wisconsin residents, \$60,000 for nonresidents.

HOW TO GET IN

SCHOOL OF NURSING REQUIREMENTS

Following are the requirements to be eligible to apply for the Accelerated BSN program:

- Bachelor's degree in a non-nursing field from an accredited institution, completed by the program start date. Students anticipating spring graduation can apply the prior fall; proof of timely progress is required.
- Admission to UW–Madison as a post-undergraduate degree-seeking student (separate application required)
- Minimum college-level cumulative GPA of 2.75

- Completion of the prerequisites listed below with a grade of C or better in each course and a minimum combined GPA of 2.75. The first four prerequisites (science courses) must be completed by the application deadline and within seven years of the program start date. All prerequisites must be complete before the program start date. Prerequisite equivalency information is available on the BSN Prerequisite Course Equivalencies (<https://nursing.wisc.edu/undergraduate/course-equivalencies>) page.
 - a. Chemistry w/Lab
 - b. Microbiology
 - c. Human Anatomy
 - d. Human Physiology
 - e. Psychology (introductory)
 - f. Sociology (introductory)
 - g. Human Growth and Development

Note: *Anatomy and physiology may be satisfied by one semester of anatomy and one semester of physiology or by A&P I and II. With the latter option, students must complete both courses at the same institution.*

UW-MADISON GENERAL EDUCATION REQUIREMENTS

Applicants must also complete the following university-wide General Education Requirements (<http://gened.wisc.edu/Req.htm>). At least two must be completed by the application deadline, and all prerequisites must be completed before the program start date.

1. Communications Part A: Literacy Proficiency
2. Quantitative Reasoning Part A: QR Proficiency
3. Quantitative Reasoning Part B: Enhanced QR Proficiency
4. Ethnic Studies

Note: *There is also a Communications Part B requirement; however, it will be satisfied with coursework in the program, so prior completion is not necessary.*

APPLICATION DATES AND DEADLINES

The program requires two applications: one to UW-Madison, plus a supplemental application to the School of Nursing for the Accelerated BSN program. Both applications open for viewing on August 1. Submission can begin September 1 and the deadline is October 1. Admission decisions will be released in December and students must submit their intent to enroll by March 1.

TRANSFER CREDIT EVALUATION AND PROOF OF ENROLLMENT

An unofficial transfer credit evaluation to check for completion of the nursing prerequisite courses and the university's General Education Requirements will be completed by the School of Nursing prior to the decision release date. Admission is contingent upon official verification by the UW-Madison Office of Admissions and Recruitment.

Applicants will be required to submit proof of enrollment at the time of application for any prerequisites not yet completed. If enrollment has not opened for a particular course, students will be asked to submit a statement of intent to register that lists the course, institution, dates of instruction, and enrollment date.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF NURSING REQUIREMENTS

The bachelor of science in nursing (BSN) degree is a 124-credit curriculum comprised of the core nursing curriculum, as well as general education requirements, nursing prerequisite coursework, and elective courses. The required courses for graduation are listed below. In addition to completing this coursework, students must:

1. Earn a cumulative and nursing GPA of at least 2.5, and
2. Complete at least 30 credits in residence on the UW-Madison campus, and
3. Earn at least 75 of the required 124 degree credits at the intermediate or advanced level

MAJOR REQUIREMENTS

The new Accelerated BSN program will launch May 2018. The degree requirements, curriculum, and program plan are being finalized by the School of Nursing faculty at this time. Details will be posted to the Accelerated BSN (<https://nursing.wisc.edu/accelerated-bsn>) page of the School of Nursing (<https://nursing.wisc.edu>) website as available.

Following is information on the requirements and curriculum as established thus far:

- Students will complete seven nursing prerequisites prior to entry into the program, namely:
 1. Chemistry with Lab
 2. Microbiology

3. Human Anatomy
4. Human Physiology
5. Psychology (introductory)
6. Sociology (introductory)
7. Human Growth and Development

- Students will also complete the university-wide General Education Requirements (GER) of Communications Part A, Quantitative Reasoning Part A, Quantitative Reasoning Part B, and Ethnic Studies prior to entry into the program. The fifth GER of Communications Part B will be completed within the Accelerated BSN curriculum.
- During the 12-months in the Accelerated BSN program, students will complete 48-50 credits of required nursing coursework, including classroom-based active learning courses and experiential learning courses in the clinical environment. This nursing coursework will include Pathology and Pharmacology.

UNIVERSITY DEGREE REQUIREMENTS

Requirements Detail

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.

8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

ADVISING AND CAREERS

ACADEMIC ADVISING

The Office of Academic Affairs provides comprehensive academic advising services to students in the Accelerated BSN program. Darby Sugar advises all Accelerated BSN students and can be reached at darby.sugar@wisc.edu (darby.sugar@wisc.edu).

CAREER ADVISING

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. Visit the Career Services (http://academic.son.wisc.edu/studentnet/cs_g/career_services) page of the StudentNet for more information.

ADMISSIONS AND RECRUITMENT

Vacant

Director of Admissions and Recruitment

Brent Fisher

Undergraduate Admissions and Recruitment Coordinator
bjfisher@wisc.edu (bjfisher@wisc.edu)

CERTIFICATION/LICENSURE

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

RESOURCES/SCHOLARSHIPS**SIGNE SKOTT COOPER HALL**

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \$53.3 million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes and greater satisfaction with care.

ADVISING AND STUDENT SERVICES**OFFICE OF ACADEMIC AFFAIRS**

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

ACADEMIC ADVISING

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (http://academic.son.wisc.edu/studentnet/undergrad/advising/advisors_ug.php). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

CAREER ADVISING

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career

in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

ACADEMIC SUPPORT SERVICES

The Nursing Learning Center (http://academic.son.wisc.edu/studentnet/resources/learning_support_serv.php) in Cooper Hall is a place where students can gather with other like-minded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

STUDENT ORGANIZATIONS

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Scholarships@UW-Madison system (<http://www.scholarships.wisc.edu>).

NURSING, BSN (COLLABORATIVE PROGRAM)**BSN@HOME**

The RN to BSN program, called the BSN@Home (<http://bsnathome.com>) program, is for Registered Nurses who already have an associate's degree or diploma in nursing and wish to earn the bachelor of science in nursing degree.

The curriculum is designed for working adults. Almost all required coursework is completed online. Students can complete the program in as little as a year and a half.

The BSN@Home program is cooperatively administered by six campuses in the University of Wisconsin System: UW-Madison, UW-Eau Claire, UW-Green Bay, UW-Milwaukee, UW-Oshkosh and UW-Stevens Point. Students typically select their home institution based on proximity. All BSN@Home students are required to complete the same core nursing

curriculum, but specific admission and degree requirements vary among campuses.

HOW TO GET IN

ELIGIBILITY REQUIREMENTS

- Associate's degree in nursing (ADN) or diploma in nursing from an accredited nursing program. Students with an ADN (or equivalent degree) through an international institution are eligible for admission consideration if they have completed the following required coursework. International Nurse Admission Requirements can be downloaded from this page.
- Overall GPA of 2.5 on 4.0 scale
- RN license
- Resident of Wisconsin, upper peninsula of Michigan, and/or contiguous counties in Illinois, Iowa or Minnesota
- Meets university transfer admission requirements (<https://www.admissions.wisc.edu/apply/transfer/requirements.php>) at UW–Madison. Factors considered in admission decisions include:
 - **Cumulative grade point average (GPA):** While the average GPA of admitted transfers is a 3.4, UW–Madison will consider prospective BSN@Home if they have a cumulative GPA of at least 2.5 with steady grade trends and patterns. GPA calculations will include all grades received for repeated courses; the initial grade, as well as grades received in second and subsequent attempts will be included in the GPA calculation.
 - **College-Level Course Preparation:** Students must have completed at least 24 transferable (https://www.admissions.wisc.edu/apply/transfer/transfer_credit.php) (college-level) non-nursing credits in addition to the nursing classes they completed in their ADN or nursing diploma program.
 - **High School Record:** Regardless of the number of college credits earned, the high school transcript is required and must show proof of graduation.
 - **Required Courses:** Students must have completed one year each of high school algebra, plane geometry, and college-preparatory math, and two high school years or two college semesters of a single foreign language. Requirements may vary if students graduated high school 1991 or prior. Contact the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/contact.php>) with specific questions about academic background.

TO APPLY

ADMISSIONS TIMELINE

Students can begin the program in either spring or fall.

- **Fall term application opens:** August 1
- **Spring term application opens:** February 1.
- **Deadlines:** The application is due by 11:59 p.m. Pacific time on the noted deadline dates (<https://www.admissions.wisc.edu/apply/freshman/deadlines.php>).

REVIEW OF APPLICATIONS

Applications are reviewed by the UW–Madison Office of Admissions and Recruitment. Students will be evaluated on both high school and college records. Admission to the program is selective.

TO APPLY

Complete the UW System Application for Admission (<https://apply.wisconsin.edu>):

- Intended campus: UW–Madison
- Intended major: BSN@Home/Nursing Collaborative Program

For this program, there is no supplemental application submitted to the School of Nursing.

UW–MADISON REENTRY ADMISSION

Students who have previously attended UW–Madison as degree-seeking students are eligible to apply to the BSN@Home program by submitting a Reentry Application (<https://www.admissions.wisc.edu/apply/reentry>). Second-degree candidate should select BSN@Home/Nursing Collaborative Program as the intended major. Students who have not previously earned an undergraduate degree through UW–Madison will be readmitted to their previous classification (e.g., Letters & Science). If readmitted to the previous classification, students should email (bsnadm@son.wisc.edu) the School of Nursing to request consideration for admission to the BSN@Home program.

Reentry applications will be evaluated by the UW–Madison Office of Admissions and Recruitment. While the Reentry Admissions (<https://www.admissions.wisc.edu/apply/reentry>) site lists university-wide application deadlines, students should submit the application by the following dates to ensure access to open nursing courses:

- **Summer term:** February 1
- **Fall semester:** March 1
- **Spring semester:** October 1

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. SCHOOL OF PHARMACY

Established by the Wisconsin Legislature in 1883, the "Department of Pharmacy" was the second pharmacy school in the United States associated with a state university. The start was a modest one—a single laboratory and a student body of 28. From the beginning, under the leadership of its first director, Dr. Frederick B. Power, the school became a prominent force in the development of pharmacy as a profession in the state and the country.

The UW–Madison School of Pharmacy was the first in the country to establish a four-year curriculum (optional) leading to the B.S.–Pharmacy degree (1892); in 1960, this became a five-year program. In fall 1997, the four-year, professional-level Doctor of Pharmacy (Pharm.D.) program replaced the B.S.–Pharmacy program. Also offered is the four-year B.S.–Pharmacology & Toxicology program. In fall 1997, the school began to offer the nontraditional Doctor of Pharmacy (Pharm.D.) program, an opportunity for U.S.-licensed pharmacists who are graduates of B.S.–Pharmacy programs accredited by the American Council on Pharmaceutical Education to further their professional education. The school was the first to offer graduate work leading to the master of science and doctor of philosophy degrees in pharmacy; pioneered in pharmaceuticals, history of pharmacy, social studies of pharmacy, and pharmacy administration; and was one of the first to offer a master of science degree with a major in hospital pharmacy.

With an enrollment of more than 500 undergraduate and professional students, the School of Pharmacy is part of the Center for Health Sciences, which includes the School of Medicine and Public Health, the School of Nursing, University Hospital and Clinics, and the State Laboratory of Hygiene. Students have opportunities to interact with other students and professional personnel in related fields as they prepare to meet the health care needs of society.

Recognizing the importance of good communication between pharmacists, patients, and other health care professionals, the school designed the Pharm.D. program to provide pharmacy students with opportunities to develop and improve written and oral communication skills and to understand the sociological and psychological aspects of illness and drug therapy.

Believing that its role in pharmacy education extends beyond the boundaries of the campus, the school has an active continuing education and extension program. Several on-campus educational programs are conducted annually for state pharmacists. Other educational programs are taken directly to pharmacists to help them keep up with the changes occurring in the profession.

PROFESSIONAL PHARMACY

Pharm.D. graduates are presented with opportunity and challenge: the opportunity to participate in the exciting field of health care and the challenge of expanding the role of the pharmacy professional within this changing system. Pharmacists are important members of the comprehensive health care team; the expertise of pharmacists is vital to the success of the health care team as it designs, implements, and monitors drug therapy for the benefit of patients. Pharmacists use their expertise to keep pace with the rapid changes taking place in the health care system and the growing complexities of providing optimal pharmaceutical care to patients. This care requires that pharmacists be effective health educators. The ultimate success of drug therapy

can depend upon how well patients understand and follow their drug regimens. Therefore, opportunities for the development and improvement of communication skills, both written and oral, are essential components of the Pharm.D. professional curriculum; required and elective courses throughout the curriculum provide valuable practical experience in effective interaction with patients and other health practitioners.

Pharmacy offers many career opportunities. Graduates traditionally have pursued careers in community, hospital, and long-term care pharmacy, the pharmaceutical industry, pharmacy education, and government agencies. Pharmacists serve also in other roles, including managed care, home care, and primary care, to increase the availability and quality of pharmaceutical care.

Community pharmacy. Many pharmacists are employed in community pharmacies; these can be independent pharmacies, chain store pharmacies, or health maintenance organization (HMO) pharmacies. Community pharmacy practice usually is general in nature and involves a large ambulatory patient population. Community pharmacists are the most accessible health professionals. They prepare and dispense prescriptions, develop pharmaceutical care plans, counsel patients on the appropriate use of prescription and nonprescription drugs, and maintain patient medication records and profiles. In addition, community pharmacists consult with other members of the health care team and serve as important sources of information for the public. Other opportunities include involvement in business management, marketing strategies, inventory control, and personnel. Pharmacists supervise the activities of pharmacy technicians.

Hospital pharmacy practice includes active involvement with inpatient care in hospitals and outpatient care in ambulatory clinics. Hospital pharmacists participate with other health care professionals in the care of patients, obtain medication histories from newly admitted patients, develop pharmaceutical care plans, perform pharmacokinetic drug consultations, monitor drug therapies, educate patients about their drug therapy, administer medications, operate medication distribution systems, and prepare intravenous solutions and other dosage forms.

Hospital pharmacists supervise the activities of pharmacy technicians in purchasing, storing, and distributing drugs to patients. Hospital pharmacists also carry out clinical research and practice in specialized areas of pharmacy, such as nuclear pharmacy, the provision of drug and poison information to other members of the health care team and to the public, infusion therapy, oncological pharmacy, pediatric pharmacy, and psychiatric pharmacy.

Home care, assisted-living, extended care, and long-term care pharmacy. Residents in assisted-living, extended care, or long-term care facilities may require pharmaceutical care similar to that found in acute care hospitals, while patients residing at home may require a wide range of pharmaceutical care services.

Other career opportunities. Pharmacists are prepared to assume positions in the **pharmaceutical industry**, in areas such as research and discovery, clinical investigation, product formulation, quality control, marketing, and sales. Some pharmacists practice in government agencies, such as the U. S. Public Health Service, the Veterans Administration, the Armed Forces, and the Food and Drug Administration, and in other federal and state agencies. Opportunities for **research and teaching** are available at many colleges and universities, in the pharmaceutical industry, and in some government agencies. Pharmacists with graduate or advanced professional education teach in schools of pharmacy. **Specialization** in nuclear pharmacy, veterinary pharmacy,

technical writing for scientific and professional journals, or administration of state and national professional pharmacy organizations are additional areas that graduates may consider.

Graduate study. Well-qualified graduates who wish to prepare themselves for a variety of careers, including university teaching and research, industrial research, and pharmacy administration, will find outstanding opportunities for specialized study and research. The University of Wisconsin–Madison School of Pharmacy provides extensive research facilities and graduate courses in a wide variety of pharmacy-related areas. The M.S. and Ph.D. degrees are conferred upon candidates who have met the requirements of their respective fields of study. Postdoctoral training is available with faculty for those holding the Ph.D. degree, and in the form of residencies and fellowships for those holding the Pharm.D. degree.

REGISTRATION AS A PHARMACIST

The practice of pharmacy, recognized as a public health profession, is regulated by law. In Wisconsin, as in all states, pharmacy practice is limited to those who are professionally competent and are licensed by the state.

Educational requirements. To be eligible for licensure in Wisconsin, a candidate must be a graduate of an accredited school of pharmacy in the United States, or must meet the requirements established by the Wisconsin Pharmacy Examining Board for graduates of pharmacy schools in other countries.

Internship. Wisconsin requires the completion of 1,740 hours of internship to qualify for licensure. With proper planning, the Pharm.D. degree at the University of Wisconsin–Madison School of Pharmacy, completed with required clerkships under the supervision of qualified preceptors, can fulfill the internship requirement.

Internship requirements vary from state to state, although credit for internship generally is transferable. A person who plans to intern and/or become licensed in another state should contact the pharmacy examining board of that prospective state for information about the internship and/or licensure requirements of that state.

Licensing examination. Following completion of the internship requirement, prospective pharmacists must pass the national examinations (NAPLEX, MPJE) and an examination administered by the Wisconsin Pharmacy Examining Board. The board then issues a registration certificate entitling the holder to practice pharmacy in Wisconsin.

ACCREDITATION

The Accreditation Council for Pharmaceutical Education (ACPE) (<http://www.acpe-accredit.org>) accredits professional pharmacy degree programs; ACPE membership comes from the American Pharmacists Association (APhA) (<http://www.pharmacist.com>), the National Association of Boards of Pharmacy (NABP) (<http://www.nabp.net>), and the American Association of Colleges of Pharmacy (AACP) (<http://www.aacp.org/Pages/Default.aspx>). The purposes of ACPE are to advance the standard of pharmaceutical education and to accredit schools and colleges of pharmacy.

The School of Pharmacy Pharm.D. program is accredited by:

ACPE (<http://www.acpe-accredit.org>)
20 North Clark Street, Suite 2500
Chicago, IL 60602

312-664-3575; fax 312-664-4652
info@acpe-accredit.org (info@acpe-accredit.org)

PHARMACOLOGY & TOXICOLOGY

The B.S.–Pharmacology & Toxicology program focuses on the biomedical sciences. **Pharmacology** is concerned with the properties, effects, and mechanisms of action of drugs, and with the interactions between chemical agents and biological systems. **Toxicology**, the science of poisons, combines the elements of biology and chemistry with those of many other disciplines to help us understand the harmful effects of chemicals on living organisms.

A major challenge for the **pharmacologist** is to determine how drugs act. This can be carried out at the subcellular and molecular level, the cellular level, the tissue level, the organ level, or the whole-animal level. Pharmacologists also are concerned with the development of new drugs that produce fewer side effects while curing disease, and provide more effective and/or more rapid treatment of disease in humans or animals.

Some pharmacologists are concerned with screening newly discovered drugs or synthesized compounds for potentially useful therapeutic activity, then characterizing that activity. Others conduct research by using drugs (as tools) to probe biological systems. The challenges of this research are to achieve a better understanding of normal bodily functions and to better understand the biological basis of disease.

Toxicologists find scientifically sound answers to questions about chemicals that may potentially threaten our health, about pesticides in the food we eat, pollutants in the air we breath, chemicals in the water we drink, and toxic waste sites near our homes. Some toxicologists are concerned with determining the cellular mechanisms by which drugs and chemicals produce toxic effects. Many are involved in subspecialty areas in toxicology research, such as reproductive and developmental toxicology, neurotoxicology, immunotoxicology, and inhalation toxicology. Researchers in these areas utilize both laboratory animals and in vitro systems to examine the cellular, biochemical, and molecular processes underlying toxic responses.

Other researchers are involved in research to define safe exposure limits for new chemicals before they reach the market, or to identify and determine the relative risks to humans of occupational and/or environmental exposure to chemicals. For example, toxicologists in this area are concerned with the adverse effects on humans and animals of long-term exposure to air and water pollutants, food additives, drugs, and agricultural and industrial chemicals. The development of new poisons that are more selective and effective against insects and pests is yet another challenge for the toxicologist; so, too, is the development of new antidotes for the more rapid and effective treatment of poisons by drugs and chemicals.

The B.S.–Pharmacology & Toxicology program receives its accreditation through UW–Madison accreditation by the North Central Association of Colleges and Schools.

DEGREES/MAJORS/CERTIFICATES

- Pharmaceutical Sciences, B.S. (p. 1564)
- Pharmacology and Toxicology, B.S. (p. 1564)

ENTERING THE SCHOOL

ACADEMIC AND ADMISSION POLICIES

School of Pharmacy academic policies (regarding such matters as academic and professional conduct, academic progress, honor roll, pass/fail registration, and independent study coursework) for the Pharm-Tox Program, can be found at Pharm-Tox Po (<https://pharmacy.wisc.edu/student-resources/pharm-tox-handbook>) on the school website. It is essential that students enrolled in the School of Pharmacy become familiar with the policies.

ADMISSION POLICIES AND PROCEDURES

Pharm.D. and B.S.-Pharmacology & Toxicology Admission

Admission to both programs is selective and competitive.

An overall cumulative GPA of at least 3.00 (or 3.20 over the most recent 60 semester credits) is required for admission to the Pharm.D. program.

Completion of the required School of Pharmacy course requirements does not guarantee admission. Each applicant's admission credentials are considered not only on their own merit, but also in comparison with the credentials of other applicants.

Information about the required elements of the applications can be found on the School of Pharmacy website (<https://pharmacy.wisc.edu/programs/pharm-tox>).

RESOURCES

FINANCIAL AID

Students who seek financial assistance should contact the UW–Madison Office of Student Financial Aid (<http://www.finaid.wisc.edu>) for financial aid applications and information about scholarships, loans, grants (not available to Pharm.D. students), work-study programs, and student employment.

LOANS

The School of Pharmacy administers limited short-term loan funds available to students enrolled in the school. The maximum amount of outstanding short-term loans is \$2000, with repayment expected as soon as possible, usually within one year of the date of the loan. Short-term loans are meant to assist students until funds from major sources arrive.

SCHOOL OF PHARMACY SCHOLARSHIPS

About 120 School of Pharmacy students are awarded scholarships each year, in varying amounts. Only students who have been admitted to the Pharm.D. program or the B.S.–Pharmacology & Toxicology program may apply for scholarships. Applications are available from the School of Pharmacy Student Services Office during the spring semester, and must be submitted by a specified date. The School of Pharmacy Scholarships Committee evaluates scholarship applicants on the bases of academic achievements, personal and professional accomplishments, and a written essay. Applicants are notified of the committee's decisions during the summer, and scholarships are presented at the annual Scholarships and Awards Ceremony each September.

GRADUATION AWARDS

Annual awards to students graduating from the School of Pharmacy recognize scholastic achievement, leadership qualities, involvement in student organizations, professional potential, and general achievements. The awards program is supported by professional organizations, School of Pharmacy alumni, and the pharmaceutical industry. Some awards carry financial remuneration. Awards are presented at the Hooding Ceremony (Pharm.D. graduates) and at the graduation reception (B.S.–Pharmacology & Toxicology graduates) each May.

Contact the School of Pharmacy Student and Academic Affairs Office for information about the scholarships and awards administered by the school.

MINORITY AFFAIRS

The primary goals of the Multicultural Affairs Program in Pharmacy (MAPP) are to identify, recruit, admit, retain, and graduate students of color who are interested in the pharmaceutical professions, and to encourage the full participation of students of color in pre-professional and professional life.

MAPP focuses on the early identification and continuous development of School of Pharmacy and School of Pharmacy students. To accomplish these goals, MAPP and the diversity coordinator collaborate to serve as the bridge between pre–School of Pharmacy and School of Pharmacy admission and retention activities, by providing and disseminating information, by promoting activities that are designed to enlighten students about university resources, and by encouraging leadership development and academic success. Advanced Opportunity Program (AOP) scholarships, based upon need, are available to students in the School of Pharmacy.

The School of Pharmacy is committed to admitting a diverse student body, to help students prepare to become productive and involved members of an increasingly complex and diverse society. Applicants are encouraged to share information about their own unique backgrounds and experiences with the admissions committee (e.g. gender, racial/ethnic/cultural heritage, socioeconomic class, age, first-generation college student, geography, historical underrepresentation, multicultural and/or international experience, sexual identity/orientation).

ROTC

The university offers courses for men and women leading to officer commissions in the U.S. Armed Forces. Details may be obtained from the Navy, Air Force, and Army campus ROTC programs. See Military Training Programs (p. 1180) in this catalog.

STUDENT ORGANIZATIONS

Pharmacy students will find many organizations open to them, both in the school and across the UW–Madison campus. For more information about Pharmacy student groups, see this link (<https://pharmacy.wisc.edu/student-organizations>).

FACILITIES

The School of Pharmacy is located in Rennebohm Hall, the state-of-the-art pharmacy building. Rennebohm Hall is located on the west side of campus, near University Hospital and Clinics and Health Sciences Learning Center. The School of Pharmacy provides students and faculty

with the finest possible physical environment for professional pharmacy and for research in pharmaceutical fields of study.

The combination of small-enrollment courses and the availability of modern apparatus, equipment, computers, and laboratories creates optimal educational opportunities. School of Pharmacy students may take advantage of the resources not only of the school, but also of other schools and colleges on campus.

For Pharm.D. students, community and hospital pharmacies serve as clinical sites for the required and elective clerkships in the professional curriculum. Through these experiences, students become acquainted with actual pharmacy practice as they work under the supervision of registered pharmacists, who serve as preceptors. Throughout the Pharm.D. curriculum, students participate in an active program that is focused on the patient and the development of pharmacist-patient communication.

LIBRARIES

The Ebling Library (<http://ebling.library.wisc.edu>) is located in Health Sciences Learning Center (HSLC), 750 Highland Avenue, directly across the street from Rennebohm Hall. A skywalk connects Rennebohm Hall to the HSLC. Ebling Library opened in June 2004 and combines the collections of the three former Health Sciences Libraries on the UW–Madison campus: the former F. B. Power Pharmaceutical Library; the former F. L. Weston Clinical Sciences Center Library; and the former William S. Middleton Health Sciences Library. The library's collection includes journals, books, and other materials related to pharmacy (including pharmacy, pharmacology, toxicology, herbals, and the history of pharmacy), nursing, medicine and allied health. Many journals and books of interest to pharmacy students are available full-text online through the campus computer network. Most materials in the library can be checked out with a valid UW–Madison student identification card.

Library staff members are available to help students locate information, assist with the development of research strategies, provide instruction for database searching, and help with the evaluation of materials. Through electronic reserves, library staff post course exams, lecture notes and handouts, journal articles, book chapters, and audio files, as requested by instructors.

The Ebling Library maintains a selection of brochures and handouts pertaining to residency and career opportunities. The library's website (<http://ebling.library.wisc.edu/pharmacy>) includes links to job openings, sample resumes and cover letters, and educational opportunities.

RESEARCH FACILITIES AND EQUIPMENT

The School of Pharmacy provides graduate students and other students enrolled in independent study projects laboratory space, instruments, and supplies necessary to conduct scientific research. Among the instruments available to students are two nuclear magnetic resonance spectrometers, recording ultraviolet and infrared spectrophotometers, spectrophoto-fluorometers, several modern mass spectrometers, gas chromatographs and high-pressure liquid chromatographs, liquid scintillation spectrometers, gamma counters, a scanning laser densitometer, ultracentrifuges, and microscopes. Also available are a peptide synthesizer, an oligonucleotide synthesizer, equipment for small-scale fermentation, numerous tissue culture laboratories, and other pieces of specialized equipment necessary to conduct research. Animal care facilities are available for a variety of terrestrial and aquatic species. Additional facilities and resources within the School of Pharmacy include cold rooms, an electronics shop, and a well-provisioned stockroom.

Computer specialists are available to offer individualized tutoring and group classes. Other campus resources, such as the Biotron, a system of controlled environmental facilities, and core instrumentation, microscopic, and biotechnology facilities, also are available to students.

SCHOOL OF PHARMACY

DEGREES/MAJORS/CERTIFICATES

- Pharmaceutical Sciences, B.S. (p. 1564)
- Pharmacology and Toxicology, B.S. (p. 1564)

PHARMACEUTICAL SCIENCES, B.S.

The B.S. in pharmaceutical sciences **is not a major**, but rather is an internal degree granted to current doctor of pharmacy (Pharm.D.) students after they complete their second year of the Pharm.D. program. In order to qualify for the B.S. in pharmaceutical sciences, students must have attended UW–Madison prior to attending pharmacy school at Wisconsin, and must meet all degree requirements. More detailed information about this degree may be found on the school website (<https://pharmacy.wisc.edu/programs/pharmd/curriculum/bs-ps>).

Students interested in pursuing an **undergraduate** degree option offered by the School of Pharmacy may want to investigate the B.S. Pharmacology/Toxicology (p. 1564) Program. This interdisciplinary major in the biomedical sciences can serve as a foundation for graduate study, for health professional school (e.g., medical; pharmacy; dental; veterinary, and so on), or for entry-level scientific employment.

PHARMACOLOGY AND TOXICOLOGY, B.S.

Pharmacology and toxicology is an undergraduate major offered through the School of Pharmacy; successful completion of program requirements leads to the Bachelor of Science–Pharmacology and Toxicology degree.

Pre–pharmacology/toxicology studies involve the completion of at least 60 credits and the fulfillment of all prerequisite coursework. This typically takes two academic years (i.e., freshman and sophomore years) to complete. Prerequisite coursework can be done at UW–Madison or at most accredited colleges and universities. The School of Pharmacy website (<http://www.pharmacy.wisc.edu>) provides information regarding which courses at various colleges and universities fulfill Wisconsin's pre–pharmacology/toxicology course requirements. Questions about the transferability of courses from any college or university to UW–Madison can be addressed to the School of Pharmacy Undergraduate Admissions Office (admissions@pharmacy.wisc.edu) or, for students at UW–Madison, to the pre–School of Pharmacy advisor. At UW–Madison, pre–pharmacology/toxicology students usually enroll in the College of Letters & Science; however, their advisor is the pre-School of Pharmacy advisor whose office is located at the School of Pharmacy. It is important to plan a sound program and to stay up-to-date with admission requirements and program changes.

HOW TO GET IN

See the School of Pharmacy Academic and Admission Policies (p. 1563).

APPLICATION

Application to the B.S. Pharmacology/Toxicology is required as the program's size is limited. Students (both at UW–Madison and at other institutions) typically apply to the program in February of their sophomore year for subsequent fall semester admission; students are not admitted at any other time of the year. (*Note that potential transfer students must also apply to UW–Madison itself* (<https://www.admissions.wisc.edu/apply/transfer/deadlines.php>)). Students are notified by the end of March regarding their admission status.

To strengthen applications for admission to the B.S. Pharmacology/Toxicology program and demonstrate their preparedness for this rigorous academic major, applicants are encouraged to enroll in course loads of 14-16 credits per semester during pre-Pharmacology/Toxicology studies.

To be eligible to apply, students must complete the following courses by the end of the summer semester prior to entering the program. Potential transfer students from a wide variety of regional institutions can find course equivalents (from their current university/college) on this School of Pharmacy webpage (<https://pharmacy.wisc.edu/programs/pharm-tox/admissions/transfers/equivalencies>).

BIOLOGY

Code	Title	Credits
Select one of the following options: 10-13		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Total Credits		10-13

CHEMISTRY

Code	Title	Credits
Select one of the following: 5-9		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115	Chemical Principles I	
Additional Requirements:		
CHEM 343	Introductory Organic Chemistry	3

CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-17

MATH

Code	Title	Credits
Select one of the following options: ¹		
A minimum score of 4 on the AP Calculus AB exam		
A minimum score of 4 on the AP Calculus BC exam ²		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	10

¹ MATH 211 Calculus does not fulfill this Math requirement.

² This option provides credit for both MATH 221 Calculus and Analytic Geometry 1 & MATH 222 Calculus and Analytic Geometry 2.

PHYSICS

Code	Title	Credits
Select one of the following: 4-5		
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Total Credits		4-5

COMMUNICATION

The UW–Madison Communication "A" requirement must be fulfilled.

SOCIAL SCIENCE

Any course that qualifies as social science (S) credit, 3–6 credits, required.

OTHER COLLEGE COURSES

Sixty (60) credits must be completed before the first semester in the program/degree.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 17) section of the *Guide*.

Requirements Detail

General	• Breadth—Humanities/Literature/Arts: 6 credits
Education	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF PHARMACY REQUIREMENTS

The School of Pharmacy offers one undergraduate degree, the bachelor of science in pharmacology and toxicology. Prerequisite coursework (<https://pharmacy.wisc.edu/programs/pharm-tox/admissions/prerequisites>) for admission to the B.S. "PharmTox" major includes a set of math and science courses and a set non-math/science courses and the achievement of at least 60 undergraduate credits by the end of the summer prior to fall entrance into the program. Once admitted to the program, students complete the **Pharmacology and Toxicology curriculum** (<https://pharmacy.wisc.edu/programs/pharm-tox/curriculum>) as well as second-semester introductory physics (via PHYSICS 104 General Physics, PHYSICS 202 General Physics, or PHYSICS 208 General Physics). The latter requirement is a School of Pharmacy requirement for the degree but is not considered coursework in the major.

B.S.—PHARMACOLOGY & TOXICOLOGY CURRICULUM

Students in the pharmacology and toxicology program largely have a semester-by-semester map to follow to complete their requirements in the major. However the major's required statistics course may be taken at any point in time. The laboratory-based Advanced Independent Study may be taken in semester 1, 2, or 3 of the four-semester curriculum. See the following course list for details.

COURSES THAT CAN BE TAKEN AT ANY TIME

Code	Title	Credits
Statistics (listed in order of popularity) Select one of the following:		
STAT 371	Introductory Applied Statistics for the Life Sciences	3-4
STAT 301	Introduction to Statistical Methods	
BOTANY 575	Special Topics (Introduction to Modern Statistical Methods for Biologists)	1
STAT/B M I 541	Introduction to Biostatistics	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	2
Independent Study		

Must be completed in semester 1, 2, or 3 of the PharmTox curricular sequence. Must have prior approval to meet PharmTox major curriculum requirements. A wet-lab basic science experience available in a variety of academic departments can fulfill the requirement.

MAJOR REQUIREMENTS

Code	Title	Credits
Junior Fall Semester		
BIOCHEM 507	General Biochemistry I	3
PHM SCI 558	Laboratory Techniques in Pharmacology and Toxicology	2
Select one of the following options:		5
PHYSIOL 335	Physiology (Most common selection)	5
BIOCORE 485 & BIOCORE 486	Organismal Biology and Organismal Biology Laboratory	
Electives		5
Total Credits		15

Code	Title	Credits
Junior Spring Semester		
BIOCHEM 508	General Biochemistry II	3
PATH 404	Pathophysiologic Principles of Human Diseases	3
PHM SCI 679	Pharmacology and Toxicology Seminar ¹	1
Select one of the following:		3-10
GENETICS 466	Principles of Genetics	3
GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 ²	
BIOCORE option (includes the following 4 courses) ³		3-4
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383 & BIOCORE 384	Cellular Biology and Cellular Biology Laboratory	
Suggested to take Statistics course this semester		3-4
Total Credits		13-21

¹ Students need to take PHM SCI 679 in both the junior and senior year; the course is repeatable for credit.

² If students choose GENETICS 467 & GENETICS 468, 3 credits will count towards electives in the PharmTox Major.

³ Students choosing the BIOCORE option (for the Genetics requirement) will typically have already completed this requirement in their Sophomore year.

Code	Title	Credits
Senior Fall Semester		
PHM SCI/PHMCOL-M 521	Pharmacology I	3
BIOCHEM/PHMCOL-M/ZOOLOGY 630 or PHM SCI 623	Cellular Signal Transduction Mechanisms Pharmacology III	3

PHM SCI/ M&ENVTOX/ MEDICINE/ ONCOLOGY/PATH/ PHMCOL-M/ POP HLTH 625	Toxicology I	3
Suggested to take 699 (Advanced Independent Study) by this semester at the latest; earlier 699 enrollment is strongly encouraged		2
Electives		4
Total Credits		15

Code	Title	Credits
Senior Spring Semester		
PHM SCI/PHMCOL-M 522	Pharmacology II	3-4
PHM SCI/ M&ENVTOX/ MEDICINE/PATH/ PHMCOL-M/ POP HLTH 626	Toxicology II	3
PHM SCI 679	Pharmacology and Toxicology Seminar ¹	1
Electives		8
Total Credits		15-16

¹ Students need to take PHM SCI 679 in both the junior and senior year; the course is repeatable for credit.

ELECTIVES IN THE MAJOR

Students must complete at least 5 elective credits in the pharmacology/toxicology major. Electives in the pharmacology/toxicology major are available within the School of Pharmacy and in many departments (**the currently approved elective courses are found in the list below**). It is suggested that students select electives in consultation with their advisor. Another option for fulfilling a portion or all of these 5 credits are additional laboratory-based independent study (i.e., 699) credits; as with the required 2 credit 699 in the pharmacology/toxicology major, additional 699 credits must be approved by the PharmTox program (unless they are done within the same laboratory that was originally approved).

Pharmaceutical Sciences and Pharmacy Course List

Code	Title	Credits
PHM SCI 420	Introduction to Drug Action and Drug Delivery I	4
PHM SCI 421	Introduction to Biopharmaceutics and Pharmacokinetics	3
PHM SCI/B M E 430	Biological Interactions with Materials	3
PHM SCI 531	Medicinal Chemistry I	2
PHM SCI 532	Medicinal Chemistry II	2

GRADUATION REQUIREMENTS

1. Completion of a minimum of 120 degree credits.
2. Completion of pre-pharmacology/toxicology course requirements.¹
3. Completion of courses required in the pharmacology and toxicology major curriculum (including at least 2 credits of approved laboratory-based biomedical research) and 5 credits of electives in the major.
4. Completion of nonmajor curriculum graduation course requirements.¹
5. Fulfillment of the grade point average requirements as stated in the School of Pharmacy academic policies.
6. Enrollment at UW-Madison for a minimum of 30 credits, with a cumulative GPA of 2.0. The last 30 credits for the degree must be completed while enrolled in the UW-Madison School of Pharmacy.

- ¹ Any course that meets B.S.-Pharmacology & Toxicology course requirements must be taken for a letter grade, unless the course is, by definition, a credit/no credit course. No course that meets any B.S.-Pharmacology & Toxicology course requirement may be taken pass/fail. "Any course requirement" means:
1. any pre-pharmacology/toxicology course requirement,
 2. any B.S.-Pharmacology & Toxicology major curriculum course requirement,
 3. any B.S.-Pharmacology & Toxicology non-major curriculum graduation course requirement, and
 4. the B.S.-Pharmacology & Toxicology electives in the major requirement.

UNIVERSITY DEGREE REQUIREMENTS**Requirements Detail**

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate a knowledge and understanding of the supportive biomedical fields of Biochemistry, Genetics, Physiology, Pathophysiology and Statistics.
2. Demonstrate a knowledge and understanding of the major fields of Pharmacology and Toxicology and show an ability to evaluate, interpret, critique and discuss published scientific findings.
3. Perform laboratory techniques and procedures, interpret the results and present in a written form suitable for submission for publication.
4. Formulate a research question, design experimental procedures and provide evidence-based support in a written grant application that contributes to the knowledge in a selected field.
5. Conduct laboratory-based research for an independent project, formulate an oral scientific presentation and deliver the presentation to peers.
6. Apply statistical methods in preparing and interpreting scientific findings.
7. Apply ethical principles in conducting scientific research.
8. Demonstrate an ability to collaborate with peers in scientific endeavors.

ADVISING AND CAREERS

ADVISING

PROSPECTIVE STUDENTS

The School of Pharmacy's **Student & Academic Affairs (SAA) Office** provides advising to undergraduates and high school students interested in learning more about the B.S. Pharmacology & Toxicology ("PharmTox") Program; appointments may be made by calling 608-262-6234. Advising, available at SOAR for entering UW–Madison freshmen as well, typically includes curriculum planning, career exploration, and, when the time arises, supports students in creating high quality applications to the program. SAA can connect prospective undergraduate students with juniors and seniors in the program, and, as appropriate, with PharmTox alumni. **Advising resources for prospective students** considering the PharmTox major may be found at this website (<https://pharmacy.wisc.edu/student-academic-affairs/advising/prospective-students>).

CURRENTLY ENROLLED B.S.–PHARMACOLOGY & TOXICOLOGY STUDENTS

Once admitted to the major, students receive advising from the PharmTox faculty director or from School of Pharmacy (SoP) staff who work with students in the program. Reasons to see an advisor, what to do to maximize an advising appointment, and SoP advising contacts may be explored at this website (<https://pharmacy.wisc.edu/student-academic-affairs/advising/current-students>). An August new student orientation (typically consisting of two half-days of programming) is led by the PharmTox faculty director, staff, and seniors in the program. Juniors are connected to seniors for peer mentoring and tutoring. Students in the major are often commonly connected to PharmTox alumni who can help them explore educational and career paths.

CAREERS

The PharmTox program can provide a launching point for a wide variety of graduate work, careers and work environments (<https://pharmacy.wisc.edu/programs/pharm-tox/careers-in-pharm-tox>). Statistical information about *immediate* post-degree work or advanced degree placement for alumni in the last decade may be found on the School website (<https://pharmacy.wisc.edu/programs/pharm-tox/student-outcomes>). Due in part to its small size, the program has strong connections with its 300+ alumni who are located across the country and across the globe. These alumni can be influential in connecting with current students, allowing current students access to conversations with those in the fields to which they aspire. More detailed career information (including *current* placement of PharmTox alumni, 1986–present) may be found by contacting the PharmTox faculty director and/or SoP staff who help administer the program.

PEOPLE

FACULTY DIRECTOR FOR THE PHARMACOLOGY-TOXICOLOGY PROGRAM; SCHOOL OF PHARMACY ASSOCIATE DEANS

Oakes, Steven (Director)

de Villiers, Melgardt (Associate Dean for Academic Affairs)

Kopacek, Karen (Associate Dean for Student Affairs)

The Pharmacology-Toxicology program is interdisciplinary and involves coursework from multiple departments. The listing below only provides School of Pharmacy faculty and staff who are involved in the program.

PROFESSORS

Clagett-Dame, Margaret

Heideman, Warren

Johnson, Jeffrey

Li, Lingjun

Marker, Paul

Trepanier, Lauren

ASSOCIATE PROFESSORS

Bashirullah, Arash

Collier, Lara

Vežina, Chad

ASSISTANT PROFESSORS

Lakkaraju, Aparna

**ACADEMIC STAFF INVOLVED IN ADVISING OR TEACHING
IN THE PROGRAM**

Niemeyer, Ken

Rosen, Elizabeth

Schneider, Melanie (pre-Pharmacology/Toxicology advisor)

Zwaska, Amy (pre-Pharmacology/Toxicology advisor)

WISCIENCE

SUPPORT FOR SCIENCE UNDERGRADUATES

UW–Madison offers a wealth of opportunities in the natural sciences for undergraduate students. WISCIENCE undergraduate courses and programs are designed to enhance and complement natural science academic programs. WISCIENCE offers first-year courses such as *Exploring Biology*, *Exploring Service in Science*, and *Secrets of Science*, which support a larger understanding of the principles of science and of the opportunities available at UW–Madison. Courses for more experienced science students promote deeper engagement beyond the classroom. The *Entering Research* course series supports undergraduate research experiences, and the *Engage Children in Science* service learning course trains students to lead afterschool science clubs in the community.

The breadth of opportunities for undergraduates at UW–Madison is particularly rich in the biological sciences, with more than thirty biology-related undergraduate majors offered across six different schools/colleges on campus. WISCIENCE supports students as they navigate and take advantage of this breadth, providing programs such as the BioHouse (<https://www.housing.wisc.edu/biohouse>) residential learning community, STEM Immersion Bootcamp, and the BioCommons (a community and learning space at Steenbock Library and online at [biology.wisc.edu](http://www.biology.wisc.edu) (<http://www.biology.wisc.edu>)).

ADVANCING HIGHER EDUCATION IN THE NATURAL SCIENCES

WISCIENCE promotes cross-college collaboration among university educators around issues in science education, including teaching for diversity. WISCIENCE offers events, learning communities, consulting and other teaching and learning resources for faculty/staff, educators in the natural sciences, as well as a Teaching Fellows training program for graduate students and postdoctoral scholars. WISCIENCE also provides mentor training using the Entering Mentoring curriculum and coordinates UW–Madison mentor/mentee training efforts with the National Research Mentoring Network. A resource center for university educators is located at 445 Henry Mall, Room 118.

SCIENCE OUTREACH AND COMMUNITY ENGAGEMENT

WISCIENCE initiates and supports outreach efforts to improve K–12 science education, prepare future science undergraduates, and encourage general public engagement with the natural sciences. Outreach programming ranges from research experiences for pre-college students from underrepresented groups to professional development courses and experiences for K-12 science teachers. Through the Adult Role Models in Science program, WISCIENCE collaborates with local afterschool programs and schools to implement science clubs and family science events. WISCIENCE also facilitates cross-campus collaboration and helps provide support for the Science Alliance (<http://www.science.wisc.edu>).
