TABLE OF CONTENTS

Graduate Guide .................................................. 10
Accounting and Information Systems ........................................ 18
  Business: Accounting, M.Acc ......................................... 19
  Business: Accounting: Tax, M.Acc ................................... 22
African Cultural Studies .............................................. 24
  African Cultural Studies, Doctoral Minor ............................. 24
  African Cultural Studies, M.A. ....................................... 25
  African Cultural Studies, Ph.D. ....................................... 30
Afro-American Studies .............................................. 35
  Afro-American Studies, Doctoral Minor ............................. 35
  Afro-American Studies, M.A. ....................................... 35
Agricultural and Applied Economics .................................... 38
  Agricultural and Applied Economics, Doctoral Minor .......... 38
  Agricultural and Applied Economics, M.S. .......................... 38
  Agricultural and Applied Economics: Agricultural and Applied Economics, M.S. ........................................... 41
  Agricultural and Applied Economics: Professional Option, M.S. ................................................................. 43
  Agricultural and Applied Economics: Resource and Energy Demand Analysis, M.S. ........................................... 45
  Agricultural and Applied Economics, Ph.D. ......................... 48
Agricultural and Life Sciences - College-Wide ......................... 51
  Agroecology, M.S. .................................................. 51
  Biometry, M.S. ...................................................... 55
  Development, Doctoral Minor ........................................... 57
  Development, Ph.D. .................................................. 58
  Plant Breeding and Plant Genetics, Doctoral Minor .............. 61
  Plant Breeding and Plant Genetics, M.S. ............................... 62
  Plant Breeding and Plant Genetics, Ph.D ................................ 66
Agronomy .......................................................... 70
  Agronomy, Doctoral Minor ............................................. 70
  Agronomy, M.S. ..................................................... 70
  Agronomy, Ph.D. ................................................... 74
Animal Sciences ................................................................ 78
  Animal Sciences, Doctoral Minor ..................................... 78
  Animal Sciences, M.S. ................................................ 78
  Animal Sciences, Ph.D. ................................................. 83
Anthropology .................................................................. 88
  Anthropology, Doctoral Minor ......................................... 89
  Anthropology, M.A. .................................................... 89
  Anthropology, M.S. .................................................... 89
  Anthropology, Ph.D. .................................................. 90
Art ............................................................................. 98
  Art Education, M.A. .................................................. 98
  Art, Doctoral Minor ................................................... 100
  Art, M.A. .............................................................. 100
  Art, MFA ............................................................... 106
Art History ..................................................................... 113
  Art History, Doctoral Minor ........................................... 113
  Art History, M.A. ..................................................... 113
  Art History, Ph.D. ..................................................... 116
  Art History, Architectural History, Ph.D. .......................... 119
  Material Culture Studies, Graduate/Professional Certificate ................................................................. 120
  Transdisciplinary Study of Visual Cultures, Doctoral Minor ................................................................. 122
  Transdisciplinary Study of Visual Cultures, Graduate/Professional Certificate ........................................ 123
Asian Languages and Cultures ............................................. 124
  Asian Languages and Cultures, Doctoral Minor ................. 125
  Asian Languages and Cultures, M.A. ................................. 126
  Asian Languages and Cultures, Ph.D. ................................ 133
  Chinese, Doctoral Minor ............................................... 139
  Chinese, M.A. ......................................................... 140
  Chinese, Ph.D. ........................................................ 144
  Japanese, Doctoral Minor ............................................... 148
  Japanese, M.A. ......................................................... 149
  Japanese, Ph.D. ........................................................ 153
Astronomy .................................................................. 157
  Astronomy, Doctoral Minor ............................................. 157
  Astronomy, M.S. ....................................................... 157
  Astronomy, Ph.D. ....................................................... 160
Atmospheric and Oceanic Sciences ...................................... 163
  Atmospheric and Oceanic Sciences, Doctoral Minor .......... 163
  Atmospheric and Oceanic Sciences, M.S. ......................... 163
  Atmospheric and Oceanic Sciences, Ph.D. ......................... 167
Bacteriology .................................................................. 170
  Bacteriology, M.S. ..................................................... 170
  Microbiology, Doctoral Minor .......................................... 174
  Microbiology, M.S. ..................................................... 174
  Microbiology, Ph.D. .................................................... 176
Biochemistry .................................................................. 179
  Biochemistry, Doctoral Minor ......................................... 180

GRADUATE GUIDE

The information in the Guide is current as of June 1, 2019. The Guide is an official document of record and is reviewed and updated every year. Archived editions from past years are available in the Guide and Catalog Archive (http://guide.wisc.edu/archive). Students are responsible for meeting the academic requirements that were in effect at the time that they matriculated, including satisfactory progress and degree requirements. In situations where academic requirements have changed during a student’s time of enrollment, the Graduate School and the academic program, together with the student, may elect to enforce requirements that are in the best interest of the student. University offices can provide current information about possible changes. The Guide is published only online; printed copies are not available.

ABOUT THE GRADUATE GUIDE

The Graduate Guide provides an overview of UW–Madison programs that offer graduate degrees, doctoral minors, graduate/professional certificates, and capstone certificates. Some major programs have identified sub-majors, known as named options. These official named options are approved by university governance, and appear on the transcript with degree conferral. Some programs also have unofficial specializations that do not appear on the transcript.

The Guide references program-specific policies, rules and regulations as well as Graduate School-level policies regarding admission, coursework, the awarding of degrees and certificates, and the general criteria governing satisfactory progress in a degree program.

UW–MADISON GRADUATE SCHOOL

The UW–Madison Graduate School confers the Master of Arts, Master of Science, Master of Accountancy, Master of Business Administration, Master of Music, Master of Engineering, Master of French Studies, Master of International Public Affairs, Master of Music, Master of Public Affairs, Master of Social Work, Master of Fine Arts, Doctor of Audiology, Doctor of Musical Arts, Doctor of Nursing Practice, Doctor of Occupational Therapy, and Doctor of Philosophy. Additionally, several programs that do not award graduate degrees may offer doctoral minors, specialist certificates, graduate/professional certificates, or capstone certificates.

The master’s degree is conferred only upon completion of a coherent and focused program of advanced study. The master of fine arts degree offers superior students advanced training and opportunities for creativity. The program is for the prospective professional artist and teacher in the fine arts at the college level and emphasizes creative work.

The doctor of philosophy, the doctor of nursing practice, the doctor of audiology, the doctor of occupational therapy, and the doctor of musical arts are the highest degrees conferred at UW–Madison. None are conferred solely as a result of any prescribed period of study, no matter how faithfully pursued. The Ph.D. degree is a research degree and is granted on evidence of general proficiency, distinctive attainment in a special field, and particularly on ability for independent investigation as demonstrated in a dissertation presenting original research or creative scholarship with a high degree of literary skill. The DMA degree is granted on evidence of a high degree of competence in performance, conducting, or composition. The DNP, OTD, and Au.D. degrees are clinical doctorates granted on evidence of clinical knowledge and expertise in their respective disciplinary areas.

The Ph.D., DNP, Au.D., OTD and DMA degree programs must be rationally unified, with courses that must contribute to an organized program of study and research. Courses must be selected from groups embracing one principal subject of concentration called the major (see Degrees), and if required, from one or more related fields called the doctoral minor. The major field is normally coextensive with the work of a single department or with one of the subjects under which certain programs have been formally arranged. A major may be permitted to extend beyond the above limits with the prior approval of the Dean of the Graduate School. The doctoral minor is designed to represent a coherent body of work, taken as a graduate student, and should not be simply an after-the-fact ratification of a number of courses taken outside the major department.

Graduate School minimum credits and other requirements necessary to earn these degrees are listed in the Graduate School Minimum Degree Requirements and Satisfactory Progress (p. 15) section; each program may set degree requirements and expectations more rigorous than the Graduate School.

OTHER GRADUATE SCHOOL PUBLICATIONS

The Graduate School’s Academic Policies and Procedures (http://grad.wisc.edu/acadpolicy) complements Graduate Student Life (https://grad.wisc.edu/newstudents) and provides information about Graduate School academic and administrative policies and procedures.

Graduate Student Life (http://grad.wisc.edu/newstudents), published by the Graduate School Office Communications Office, offers information about a wide range of topics related to the graduate experience, and advice about the university and community from a student’s perspective. It is distributed electronically to all new graduate students before they arrive on campus.

GRADUATE STUDENT PROFESSIONAL DEVELOPMENT

The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or “facets”) of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.
More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://kb.wisc.edu/gsadminkb/page.php?id=68207), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

USEFUL LINKS FOR STUDENTS

University websites useful to students are listed below. In addition, most program entries in this catalog provide links to program and department websites.

AFFIRMATIVE ACTION AND COMPLIANCE STATEMENT

The University of Wisconsin–Madison is committed to providing equal opportunity and equal access and to complying with all applicable federal and state laws and regulations and University of Wisconsin System and university non-discrimination policies and procedures. For information on all covered bases, the names of the Title IX and Americans with Disabilities Act Coordinators, and the processes for how to file a complaint alleging discrimination, please contact the Office of Compliance (https://compliance.wisc.edu). The Office of Compliance is located at 361 Bascom Hall, 500 Lincoln Drive, Madison WI 53706 and can be reached at Voice: 608-265-6018 (relay calls accepted); Fax: 608-263-4725; Email: uwcomplianceoffice@wisc.edu.

The following are the nondiscrimination bases for covering students and applicants for admission to the university; university employees and applicants for employment at the university; and those wishing to take part in university programs and activities, including visitors to campus.

STUDENTS/EDUCATIONAL PROGRAMS

- age
- ancestry
- color
- creed
- disability
- ethnicity (specifically involving harassment by UW employees)
- gender identity or expression
- marital or parental status
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- or any other category protected by law, including physical condition or developmental disability as defined in Wisconsin Statutes§51.01(5).

EMPLOYEES/APPLICANTS

- age
- ancestry
- arrest record
- color
- conviction record
- creed
- disability
- ethnicity (specifically involving harassment by university employees)
- gender identity or expression
- genetic information including genetic testing
- honesty testing
- marital or parental status
- military service
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- use or nonuse of lawful products off the employer's premises during nonworking hours,
- veteran status
- declining to attend a meeting or participate in any communication about religious matters or political matters, or any other category protected by law

VISITORS AND PROGRAM PARTICIPANTS/UNIVERSITY ACTIVITIES

- age
- ancestry
- color
- creed
- disability
• national origin
• race
• retaliation for making a complaint of discrimination, or taking part in an investigation relating to discrimination, or opposing discrimination
• sex
• sexual orientation

Also covered is any other non-discrimination category that may be subsequently added, even if not included in the above list, as a result of federal or State of Wisconsin court, legislative, or regulatory action, or action taken by UWS or the University.

INFORMATION FOR STUDENTS WITH DISABILITIES

The University of Wisconsin–Madison is committed to providing equal opportunity and equal access to people with disabilities who are members of the University community. The McBurney Disability Resource Center provides disability-related services and accommodations to undergraduate, graduate, professional, Special, and guest students. The center works closely with students and faculty on the provision of reasonable accommodations to ensure access to the learning environment. Common accommodations include extended time and/or small group environment for exams, class notetakers, sign language interpreting, real time and media captioning, and conversion of printed materials to an accessible format. McBurney staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for disorders that fluctuate in severity over the course of enrollment. The center makes referrals to other campus offices or community resources for nonclassroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the center upon admission to begin the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see How to Become a McBurney Client (http://mcburney.wisc.edu/students/howto.php).

McBurney Disability Resource Center
702 West Johnson Street, Suite 2104
Madison, WI 53706
608-263-2998 (fax)
mcburney@studentlife.wisc.edu
www.mcburney.wisc.edu (http://www.mcburney.wisc.edu)

ACCREDITATION

The University of Wisconsin–Madison is accredited by the:

Higher Learning Commission (http://www.hlcommission.org)
230 South Lasalle Street, Suite 7-500
Chicago, IL 60604
telephone 1-800-621-7440
www.hlcommission.org (http://www.hlcommission.org)

UW–Madison, which was first accredited in 1913, was last accredited in 2019, and will go through a reaccreditation process again in 2028–29.

See Mark of Affiliation (http://guide.wisc.edu/undergraduate).

Registration with the Minnesota Office of Higher Education: The University of Wisconsin–Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

The information, policies, and rules contained herein are subject to change.

DEGREES/MAJORS

SCHOOLS AND COLLEGES

College of Agricultural and Life Sciences
School of Business
Division of Continuing Studies
School of Education
College of Engineering
Gaylord Nelson for Environmental Studies
Graduate School
School of Human Ecology
Law School
College of Letters & Science
School of Medicine and Public Health
School of Nursing
School of Pharmacy
School of Veterinary Medicine

DISTANCE OR FLEXIBLE PROGRAMS

The university offers several degree and capstone certificate programs that are fully or partially available at a distance or that are flexible to working schedules with evening and/or weekend courses. To learn more about the graduate-level degrees and certificates offered in flexible and online formats, visit the Wisconsin Advance Your Career (https://advanceyourcareer.wisc.edu) portal.

OTHER PROFESSIONAL DEGREES

UW–Madison offers a number of post-baccalaureate professional degrees that are not administered by the Graduate School, but instead are solely supported by their home school.

Doctor of Juridical Science—SJD (https://law.wisc.edu)
Doctor of Law—J.D. (http://law.wisc.edu)
Doctor of Medicine—M.D. (http://www.med.wisc.edu/education/md-program/main/276)
Doctor of Physical Therapy—DPT (https://www.med.wisc.edu/education/physical-therapy-program)
Doctor of Veterinary Medicine—DVM (http://www.vetmed.wisc.edu/dvm-students)
Master of Genetic Counseling—MGC (http://www.med.wisc.edu/education/graduate-programs/genetic-counseling/main/26910)
Master of Laws—LLM (https://law.wisc.edu)
Master of Laws—Legal Institutions—LLM (https://law.wisc.edu)
Master of Physician Assistant Studies—PA. (http://www.fammed.wisc.edu/pa-program)
DOCTORAL MINORS

Breadth is a required component of doctoral training at UW-Madison. Given there are multiple paths to breadth, the Graduate School leaves the choice of whether students achieve breadth through a minor or other means up to the specific graduate program. Most programs require students complete either an Option A (external) minor or an Option B (distributed) minor; if a doctoral minor is not required, this is noted on the Requirements tab of the Guide degree page. See Minors (http://grad.wisc.edu/acadpolicy/#minors) in the Graduate School Academic Policies and Procedures for minimum course requirements for the minor.

GRADUATE/PROFESSIONAL CERTIFICATES

Graduate/professional certificates are available to all degree-seeking graduate and professional students (GRAD, LAW, MED, PHARM, VMED careers). Graduate/professional certificate programs coordinate teaching and research among scholars active in interrelated disciplines. Consult the certificate program regarding recognition of program completion. Certificate programs monitor their own course and satisfactory progress requirements.

The Specialist Certificate represents work beyond the master's level. For more information, contact the program.

CAPSTONE CERTIFICATES

Capstone certificates allow individuals with a bachelor’s degree to obtain additional professional skills and certification. Capstones do not lead to the conferral of a degree, but do appear on a student’s UW–Madison transcript.

Capstone certificate students are admitted as University Special students through Adult Career and Special Student Services (ACCSS). ACSSS as the academic dean is responsible for issues related to student enrollment and the student’s official record.

An ACSSS student services coordinator works with each department's capstone certificate coordinator on advising, admissions, enrollment eligibility, and program completion. Capstone certificates typically follow rules of the Graduate School (https://grad.wisc.edu/acadpolicy) (https://grad.wisc.edu/acadpolicy/#enrollmentrequirements) for tuition, credit limits, and grading.

- User Experience Design, Capstone Certificate (http://guide.wisc.edu/nondegree/capstone/user-experience-design-capstone-certificate)

ADMISSIONS

The University of Wisconsin–Madison has offered graduate study for more than a century. Its advanced instruction actively involves graduate students in research. The faculty of more than 2,000 distinguished
scholars and teachers, supported by an academic staff exceeding 6,000
confers graduate degrees in more than 160 fields of study.

As one of the nation’s major research institutions, the university
maintains extensive research facilities. More than 40 campus libraries,
three museums, and numerous research centers support nearly 7,500
active local, national, and international research projects.

The Graduate School website (http://grad.wisc.edu) offers links to
admission information, including program profiles and contacts, websites
and the online application, funding resources, diversity, graduate student
life and other resources.

Deadlines for applications, fellowships and other types of funding vary
among programs. Requirements also vary; therefore, it is important to
check program websites before applying. All transcripts are sent directly
to the program. If applying to more than one program transcripts should
be sent to each program. All transcripts become part of the university
files and will not be returned. The application fee is set by the legislature
and is nonrefundable.

When the Graduate School receives the application, the data are entered
into a campuswide student administration system. The program
performs the initial application review, and if desired, makes a positive
admission recommendation to the Graduate School. Admission is based
on demonstrated scholastic ability, letters of recommendation, the
statement of purpose/reasons for graduate study, and in most programs,
scores on standardized tests, such as the GRE, TOEFL or IELTS (for
international students) and GMAT for Business School applicants.
Program requirements may be more rigorous than Graduate School
requirements.

FINANCIAL SUPPORT

Financial support is available to many graduate students on campus
and comes in the form of Graduate Assistantships (e.g., Teaching,
Project, or Research Assistantships), Fellowships, and Traineeships.
The best source of information about these types of financial support
is the faculty and staff in academic programs. Decisions about most
graduate assistantships, fellowships, and traineeships are made at the
program level; however, some cross-campus graduate assistantships are
available to the most competitive students for these university-wide awards.

Teaching assistants who are awarded a minimum appointment of
33.33% receive full tuition remission and are eligible for comprehensive
health insurance benefits. They are, however, still responsible for paying
segregated fees.

For more information, visit Types of Funding Available (https://
grad.wisc.edu/funding) and reference Academic Policies and Procedures
(https://grad.wisc.edu/acadpolicy/

PROGRAM ASSISTANTS (PA)

A program assistant or project assistant (PA) is a graduate student
enrolled in the University of Wisconsin System who is assigned to
conduct research, training, administrative responsibilities, under the
supervision of a faculty or academic staff member, primarily for the
benefit of the university.

Program/project assistants are included in a labor agreement between
the state of Wisconsin and the Teaching Assistants Association.

Program/project assistants who are awarded a minimum appointment of
33.33% receive full tuition remission and are eligible for comprehensive
health insurance benefits. They are, however, still responsible for paying
segregated fees.

For more information, visit Types of Funding Available (https://
grad.wisc.edu/funding) and reference Academic Policies and Procedures
(https://grad.wisc.edu/acadpolicy/

RESEARCH ASSISTANTS (RA)

A research assistant (RA) must be a graduate student working toward a
master’s or Ph.D. degree. The main function of a research assistantship
is to further the education and training of the student, through the
individual’s course of study and research directly applicable to his/her
thesis or dissertation.

Research assistants who are awarded a minimum appointment of
33.33% receive full tuition remission and are eligible for comprehensive
health insurance benefits. They are, however, still responsible for paying
segregated fees.

For more information, visit Types of Funding Available (https://
grad.wisc.edu/funding) and reference Academic Policies and Procedures
(https://grad.wisc.edu/acadpolicy/

FELLOWSHIPS ADMINISTERED BY THE GRADUATE SCHOOL

The Graduate School administers a number of university-funded
fellowships for different purposes and in different disciplines. For
example, some fellowships are awarded by division, while others are
offered by school or college. Applicants do not apply directly to the
Graduate School for fellowship support. Academic programs nominate
their most competitive students for these university-wide awards.

Fellowships may be awarded for a semester, academic (nine-month), or
annual (12-month) tenure. Stipends vary according to the type of award.
In 2014-2015, fellowship awards ranged from $6,455 for summer support
up to $25,820 for 12 months. These awards provide for payment of tuition
and fees and include eligibility for comprehensive health insurance
benefits.

Federal or national fellowships currently administered by the Graduate
School include: Ford Foundation Predoctoral and Dissertation
Fellowships, National Physical Science Consortium (NPSC) Fellowships,
National Science Foundation (NSF) Graduate Fellowships, Charlotte Newcombe Fellowships, Spencer Dissertation Fellowships, CIC–Smithsonian Institution Fellowships, Soil Science Research Council (SSRC) Fellowships, Mellon-Council for European Studies (CES) Fellowships and ACLS/Mellon Dissertation Completion Fellowships. These programs require direct application by the student to the agency and generally have early fall deadlines.

**FELLOWSHIPS FOR INTERNATIONAL TRAVEL, RESEARCH, AND STUDY**

The International Fellowships Office, a unit of the International Institute, serves as a resource center and provides information and support to faculty, students, and staff interested in identifying international research grants, scholarships, and other funding opportunities. The International Fellowships Office also manages and coordinates a number of international fellowship competitions for UW–Madison faculty and students. Contact the International Institute at:

328 Ingraham Hall  
(608) 262 9632  
iris.wisc.edu/funding/ (http://iris.wisc.edu/funding)

**COLLEGE AND PROGRAM TRAINEESHIPS AND FELLOWSHIPS**

Many colleges and programs have fellowships, scholarships, and traineeship awards for students at all stages of graduate study. Awards are made available from federal training programs, research grants, gifts and trusts, and special program funds. Information on these awards is available from the program.

**OFFICE OF STUDENT FINANCIAL AID**

The Office of Student Financial Aid assists students (U.S. citizens and Permanent Residents) whose personal and family resources are not adequate to cover the expenses involved in attending UW–Madison. For more information about processing financial aid forms to determine eligibility, part-time employment or information about scholarships and more, see the Office of Student Financial Aid website (http://finaid.wisc.edu).

Effective July 1, 2012, graduate students are no longer eligible for Federal Direct Subsidized loans. For more information about changes to federal direct loans for graduate students check here.

Counseling is available to students who would like more information about financial assistance, debt management, or personal budgeting.

Office of Student Financial Aid  
333 East Campus Mall, #9701  
608/262-3060  
finaid@finaid.wisc.edu  
finaid.wisc.edu/ (https://finaid.wisc.edu)

**COUNCIL OF GRADUATE SCHOOLS POLICY RESOLUTION**

Acceptance of an offer of financial aid (such as graduate scholarship, fellowship, traineeship, or assistantship) for the next academic year by an actual or prospective graduate student completes an agreement (based on a Resolution of the Council of Graduate Schools) which both the student and graduate school expect to honor. In those instances in which the student accepts the offer before April 15 and subsequently desires to withdraw, the student may submit in writing a resignation of the appointment at any time through April 15.

However, an acceptance given or left in force after April 15 commits the student not to accept another offer without first obtaining a written release from the institution to which a commitment has been made. Similarly, an offer by an institution after April 15 is conditional on presentation by the student of the written release from any previously accepted offer. It is further agreed by the institutions and organizations subscribing to the above Resolution that a copy of this Resolution should accompany every scholarship, fellowship, traineeship, and assistantship offer.

**POLICIES AND REQUIREMENTS**

The Graduate School sets minimum standards that must be met by all graduate students in the university. Continuation in the Graduate School is at the discretion of the major program, the Graduate School, and the major professor. The table of Graduate School Minimum Degree Requirements and Satisfactory Progress includes the minimum credits required for each type of degree program.

The requirements of most programs exceed the Graduate School minimum criteria. These additional requirements, referred to as Minimum Degree Requirements and Satisfactory Progress, are described in each major program entry in this catalog. Students are responsible for obtaining specific degree requirements from the program. Many programs publish a graduate student handbook, which provides details about graduate study, admissions criteria, faculty interests, and the curriculum.

**GRADUATE SCHOOL MINIMUM DEGREE REQUIREMENTS AND SATISFACTORY PROGRESS**

Schools/colleges, departments and programs may set more rigorous expectations and requirements than the Graduate School.

**MASTER’S DEGREES**

M.A., M.S., M.Acc., MBA, M.M., M.Eng., MFS, MiPA, MPA, MSW

Minimum Graduate Degree Credit Requirement ¹  
30 credits

Minimum Graduate Residence Credit Requirement ¹  
16 credits

Minimum Graduate Coursework (50%) Requirement ¹  
At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle).

Prior Coursework Requirements: Graduate Work from Other Institutions ¹  
For well-prepared advanced students, a student’s program may decide to accept prior graduate coursework from other institutions. This coursework does not appear on a UW–Madison transcript nor count toward graduate career GPA. The Graduate School’s minimum graduate residence requirement can be satisfied only with courses taken as a
graduate student at UW–Madison. The only exception is graduate-level coursework taken as a CIC Traveling Scholar.

**Prior Coursework Requirements: UW–Madison Undergraduate**

For well-prepared advanced students, a student's program may decide to accept up to 7 credits numbered 300 or above of required or elective courses from the undergraduate work completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. However, this work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

The Graduate School's minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

**Prior Coursework Requirements: UW–Madison University Special**

After admission to a graduate program, the student's program may decide to accept up to fifteen University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**Credits per Term Allowed**

Up to 15 credits

**Overall Graduate GPA Requirement**

3.00

**Other Grade Requirements**

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**Probation Policy**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**Advisor / Committee**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**Assessment and Examinations**

Requirements determined by the program.

**Time Constraints**

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**Language Requirements**

Each program sets its own language requirements. Some programs require competence in one or more languages before students can take preliminary examinations.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

**MASTER OF FINE ARTS DEGREE OR SPECIALIST CERTIFICATE**

MFA, Specialist Certificate

**Minimum Graduate Degree Credit Requirement**

42 credits

**Minimum Graduate Residence Credit Requirement**

24 credits

**Minimum Graduate Coursework (50%) Requirement**

At least 50% of credits applied toward the graduate degree credit requirement must be in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (https://public.my.wisc.edu/portal/f/u12411/s4/p/CourseGuide-Browse-Courses.uj12411n31/ detached/render.up?pCm=view&nP_action=advancedSearch&nP_form-submit=true).

**Prior Coursework Requirements: Graduate Work from Other Institutions**

For well-prepared advanced students, a student's program may decide to accept prior graduate coursework from other institutions. This coursework does not appear on a UW–Madison transcript nor count toward graduate career GPA. The Graduate School's minimum graduate residence requirement can be satisfied only with courses taken as a graduate student at UW–Madison. The only exception is graduate-level coursework taken as a CIC Traveling Scholar.

**Prior Coursework Requirements: UW–Madison Undergraduate**

For well-prepared advanced students, a student's program may decide to accept up to 7 credits numbered 300 or above of required or elective courses from the undergraduate work completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. However, this work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.
will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

The Graduate School's minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

**Prior Coursework Requirements: UW–Madison University Special**

After admission to a graduate program, the student’s program may decide to accept up to fifteen University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Credits per Term Allowed

Up to 15 credits

Doctoral Minor/Breadth Requirements

The Graduate School requires doctoral programs to have a doctoral minor requirement to achieve breadth. Only those doctoral programs which have an accepted minor opt-out request on file may excuse their students from the doctoral minor requirement with alternate paths to breadth.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Overall Graduate GPA Requirement

3.00

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Probation Policy

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Advisor

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Assessment and Examinations

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all incomplete and

Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required. Additional requirements are determined by the program.3

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Time Constraints

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be require to take another preliminary examination and to be admitted to candidacy a second time.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

Language Requirements

Each program sets its own language requirements. Some programs require competence in one or more languages before students can take preliminary examinations.

For more information, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

1 Schools/colleges, departments, and programs may set more rigorous expectations and requirements than the Graduate School.

2 References to preliminary/oral examinations and dissertations to not apply to clinical doctorate degrees (such as Au.D., DNP). Consult the program for specific requirements.

ACADEMIC CALENDAR

ACADEMIC CALENDAR

Establishment of the academic calendar (https://www.secfac.wisc.edu/academic-calendar.htm) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. Approximately every five years, the Faculty Senate approves a new academic calendar which spans a future five-year period.

The current calendar was adopted by the Faculty Senate in September 2016.

ACCOUNTING AND INFORMATION SYSTEMS

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Business: Accounting, M.Acc. (p. 19)
Wisconsin–Madison. They are: equivalent of an undergraduate major in accounting. Advanced degree must have completed a 150-credit-hour program including at least the mandating that candidates who would like to earn their CPA license the state of Wisconsin and most other states have passed legislation graduation. For additional information see the program website government, industry, or nonprofit organizations are possible upon professional accountants in public accounting, financial institutions, accounting skills that qualify them to sit for the CPA exam. Careers as degree helps students develop strong technical and professional students enhance their studies in the second academic year with advanced courses in accounting and other business disciplines. The degree helps students develop strong technical and professional accounting skills that qualify them to sit for the CPA exam. Careers as professional accountants in public accounting, financial institutions, government, industry, or nonprofit organizations are possible upon graduation. For additional information see the program website (https://wbs.wisc.edu/programs-degrees/macc).

The state of Wisconsin and most other states have passed legislation mandating that candidates who would like to earn their CPA license must have completed a 150-credit-hour program including at least the equivalent of an undergraduate major in accounting. Advanced degree options for completing these requirements exist at the University of Wisconsin–Madison. They are:

1. The IMAcc program in accounting, which leads to a BBA (bachelor of business administration) degree with an accounting major and a master of accountancy degree. The BBA is 120 credits and the M.Acc. is 30 credits in this program. Students who are majoring in accounting apply for admission to this program during the junior year. Those who are admitted to the traditional IMAcc program must complete a required internship during the spring semester of the senior year (the program does offer some flexibility with the timing of the internship, as needed.) Students are encouraged to take the GMAT exam during the summer after their junior year.

2. Any undergraduate degree with an M.Acc. degree. The graduate-only master’s degree program (GMAcc) does not require an undergraduate major in accounting or in business. There are 54 credits in this program, completed over two years. Students admitted to this program can complete an internship during the summer between the first and second years. The GMAT exam is required for admission.

The admissions process begins during December each year for the following fall semester admission. The M.Acc. program does not require previous work experience. Students who are pursuing an undergraduate degree in accounting at the School of Business and wish to earn a master of accountancy degree should consider applying to the Integrated Master of Accountancy (IMAcc) program (https://wbs.wisc.edu/programs-degrees/macc/imacc-how-to-apply). Students who have already completed an undergraduate degree in something other than accounting, at any institution, may wish to consider applying to the Graduate Master of Accountancy (GMAcc) program (https://wbs.wisc.edu/programs-degrees/macc/gmacc-how-to-apply).

All applicants are required to have two recommendations completed via the online application system. In addition, applicants must submit a GMAT score to be considered for admission. The School of Business GMAT code is 79K2S-23. The school does not share minimum GMAT score requirements. GRE scores will not be accepted in lieu of GMAT scores.

A Test of English as a Foreign Language is required for applicants whose native language is not English or whose full undergraduate instruction was not in English. Applicants who completed three or more years in an institution where the primary mode of instruction was English do not need to complete this requirement and may request a waiver on the application.

Students should direct the Educational Testing Service to forward their test results, taken within two years of the intended start term, to the University of Wisconsin–Madison (institution code: 1846). A minimum TOEFL score of 104 is required for consideration of admission into the program. International Financial Statements are only required of students admitted to the program.

It is not necessary to send official transcripts if applicants are unable to scan and upload transcripts to the online system. Applicants later admitted to the program will be asked to send the official transcripts.

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed timeframe. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Contact the program for information on required language assessments and examinations.

REQUIRED COURSES

M.Acc. students seek advanced preparation for careers in various aspects of accounting. The degree stresses in-depth study of accounting theory, auditing, taxation, information systems, applications, policy, and decision making. The program can be undertaken by students possessing an undergraduate accounting degree from UW–Madison or an undergraduate degree in a non-accounting field from any school.

The first year of the M.Acc. program emphasizes accounting and core business knowledge necessary to work in the accounting profession.

Students are encouraged to complete a paid internship during the summer between the first and second year of the program. The second year of the program is designed to build on the internship experience through in-depth study of accounting issues. The second-year curriculum for students pursuing the standard M.Acc. plan is as follows (30 total credits).

The M.Acc. program requires a minimum of 54 credits over two years.

The second year also provides students with some flexibility to promote breadth of knowledge across a number of business disciplines.

View as listView as grid

• BUSINESS: ACCOUNTING: TAX, M.ACC. (P. 22)

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
No credits of graduate coursework from other institutions are allowed to satisfy requirements.

UW–Madison Undergraduate
Up to 6 credits from courses numbered 300 or above will be allowed to apply toward the minimum graduate degree credit requirement. Courses numbered 700 or above will be allowed to apply toward the minimum graduate coursework requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
No credits from the UW–Madison University Special student career are allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Department-sponsored funding is available on a competitive basis to all M.Acc. students. Students must have completed one year with the department before applying for an assistantship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Understand the conceptual and technical knowledge foundations of financial accounting, managerial accounting, taxation, business law, and auditing.
2. Apply Generally Accepted Accounting Principles (GAAP) (and relevant assumptions, principles, and constraints) to prepare financial statements.
3. Understand that management accounting and control systems, providing financial and nonfinancial performance information, are integral to the successful design and implementation of an organizational strategy.
4. Interpret and validate business events and transactions through the lens of business processes and systems.
5. Demonstrate technical competence in income taxation of individuals, partnerships, corporations, and international organizations.
6. Identify the legal implications of their choices and how the law impacts their interactions with others in a business setting.
7. Understand how earning trust and demonstrating integrity as successful accounting professionals impacts businesses, contracts, and capital markets, as well as society at large.
8. Understand that leadership in the field of accounting is the consistent display and communication of respect, trust, expertise and adaptability within various business relationships and contexts.
9. Explain how to complete an audit from beginning to end, applying auditing standards, assessing risk, and gathering evidence.

10. Engage in effective written communication practices by crafting professional memos and reports that integrate research and analysis skills, technical information, and expert writing proficiency.

11. Understand how accounting is a global practice requiring knowledge of national and international standards, the examination of sociocultural impacts within business contexts, and the ability to leverage the advantages that diversity brings to an organization.

### People

**Faculty:** Professors Warfield (chair), Covaleski, Johnstone, Linsmeier, Matsumura, Mayhew, Nair, Wild; Associate Professor Laplante; Assistant Professors Barr-Pulliam, Gaertner, Griffith, Lynch, Steele, Thomas

### Accreditation

AACSB International—The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

### Business: Accounting: Tax, M.Acc.

This is a named option in the Business: Accounting M.Acc. (p. 19)

The M.Acc. in Business: Accounting degree has an available named option in Tax, which is designed for students preparing for a career in tax. This option focuses on deep knowledge in a variety of tax topics, providing the qualifications for a career in the tax discipline in public accounting or industry.

For those pursuing a named option in Tax the second-year curriculum includes the following courses:

- Advanced Financial Reporting
- Corporate Taxation
- Research and Administrative Issues in Taxation
- Seminar in Current Taxation Topics
- Partnership Taxation
- Advanced Corporate Taxation
- International Taxation

### Admissions

The admissions process begins during December each year for the following fall semester admission. The M.Acc. program does not require previous work experience. Students who are pursuing an undergraduate degree in accounting at the School of Business and wish to earn a master of accountancy degree should consider applying to the Integrated Master of Accountancy (IMAcc) program (https://wsb.wisc.edu/programs-degrees/macc/imacc-how-to-apply). Students who have already completed an undergraduate degree in something other than accounting, at any institution, may wish to consider applying to the Graduate Master of Accountancy (GMacc) program (https://wsb.wisc.edu/programs-degrees/macc/gmacc-how-to-apply).

All applicants are required to have two recommendations completed via the online application system. In addition, applicants must submit a GMAT score to be considered for admission. The School of Business GMAT code is 79KZ2S23. The school does not share minimum GMAT score requirements. GRE scores will not be accepted in lieu of GMAT scores.

A Test of English as a Foreign Language is required for applicants whose native language is not English or whose full undergraduate instruction was not in English. Applicants who completed three or more years in an institution where the primary mode of instruction was English do not need to complete this requirement and may request a waiver on the application.

Students should direct the Educational Testing Service to forward their test results, taken within two years of the intended start term, to the University of Wisconsin–Madison (institution code: 1846). A minimum TOEFL score of 104 is required for consideration of admission into the program. International Financial Statements are only required of students admitted to the program.

It is not necessary to send official transcripts if applicants are unable to scan and upload transcripts to the online system. Applicants later admitted to the program will be asked to send the official transcripts.

REQUIRED COURSES

The Tax named option stresses in-depth study of tax law in a variety of areas, including business tax, individual and estate tax planning, multijurisdictional tax issues, and tax administration. The courses for the Tax named option are closely integrated with law school tax offerings and in some cases, are cross-listed with the law school. In addition, the Tax degree named option requires additional courses in auditing, financial reporting theory, or strategic cost management.

The second-year curriculum for students who wish to pursue a named option in Tax includes the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT I S 706</td>
<td>Advanced Financial Reporting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT I S 621</td>
<td>Corporate and Advanced Taxation</td>
<td>3</td>
</tr>
<tr>
<td>ACCT I S 724</td>
<td>Research and Administrative Issues in Taxation</td>
<td>3</td>
</tr>
</tbody>
</table>

Students pursuing the named option in Tax must also complete a minimum of two courses from the first year of the M.Acc. in Business: Accounting degree listed here (p. 19) along with one business elective course.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

No credits of graduate coursework from other institutions are allowed to satisfy requirements.

UW–Madison Undergraduate

Up to 6 credits from courses numbered 300 or above will be allowed to apply toward the minimum graduate degree credit requirement. Courses numbered 700 or above will be allowed to apply toward the minimum graduate coursework requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison University Special

No credits from the UW–Madison University Special student career are allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.
An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Department sponsored funding is available on a competitive basis to all M.Acc. students. Students must have completed one year with the department before applying for an assistantship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Faculty: Professors Warfield (chair), Covaleski, Johnstone, Matsumura, Mayhew, Nair, Wild; Associate Professor Laplante; Assistant Professors Allee, Barr-Pulliam, Gaertner, Griffith, Lynch, Steele, Thomas

African Cultural Studies, Doctoral Minor (p. 24)
African Cultural Studies, M.A. (p. 25)
African Cultural Studies, Ph.D. (p. 30)

FACULTY

AFRICAN CULTURAL STUDIES, M.A.

The mission of the Department of African Cultural Studies is to provide research and teaching in the languages and expressive cultures of Africa and Africans around the world.

The department is the only one of its kind in the United States. It offers curricula leading to both the master of arts degree and the doctor of philosophy degree. Its students come from all over the world, including many African countries.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>

PREREQUISITES

Admission to the graduate program requires a bachelor’s degree with substantial coursework related to the expressive cultures of Africa. Admitted students with an insufficient background in African cultural studies may be asked to complete additional coursework beyond the regular degree requirements. Applicants should have a minimum 3.0 GPA on a 4.0 grading scale or equivalent academic performance on other scales. The department will consider special cases, however, for probationary admission. If you have questions about your eligibility, please contact the graduate coordinator.

Admission into the Ph.D. program requires a master of arts in a closely related field (with the thesis or other substantive piece of graduate-level writing submitted as a writing sample).
APPLICATION REQUIREMENTS

All applicants to the program must apply online (https://grad.wisc.edu/apply) by 15 November. Please note, the $75 application fee is due at the time of application (an additional $6 will be charged to international students to cover processing). The department cannot review an applicant who has not met all Graduate School admissions requirements (https://grad.wisc.edu/admissions/requirements). Carefully review the instructions and other information the Graduate School provides; most of the admissions questions we receive relate to the Graduate School’s requirements and are answered in their documentation.

As part of the online application process, you will be asked supplemental questions regarding your language and teaching experience and expected to upload the information listed below:

- University Transcripts

You must upload transcripts or academic records from each institution attended. You may upload unofficial copies for department review. If you are offered admission to the program, the Graduate School will request that you provide official copies of transcripts or academic records from each institution you have attended. These must be issued directly by the institutions with all official seals, stamps, and signatures. International academic records must be in the original languages and records in languages other than English accompanied by an official English translation. An accepted student may not matriculate or enroll for courses until the Graduate School has documented official transcript(s) matching or updating the application transcript(s).

- TOEFL or IELTS Scores (international applicants)

If your undergraduate institution did not conduct courses in English, you must complete either the Test Of English as a Foreign Language (TOEFL) or the International English Language Testing System exam (IELTS). The online application allows you to self-report scores, but we cannot consider your application until the Graduate School receives your official score report directly from the examination organization. Students who do not meet Graduate School guidelines for English proficiency (https://grad.wisc.edu/admissions/requirements) may be considered for admission, but will be required to complete assigned English language courses during their first year of study.

- Purpose Statement

Your statement of purpose should make clear that you understand the kinds of courses we offer (https://african.wisc.edu/acs-courses) and the research interests of our faculty and substantiate how your own interests intersect with our faculty expertise (https://african.wisc.edu/people/faculty-and-staff). Give a detailed account of the reasons and circumstances that led to your decision to undertake graduate work in the Department of African Cultural Studies. Include references to your academic work, your short-term and long-term goals, your personal relationship to or interests in the fields we study, and your knowledge of any African languages. If your transcripts reflect any negative episodes in your academic career, e.g., a poor grade or a dropped course, you may explain them here. We look for evidence of your developing research interests and how they relate to the research interests of our faculty.

The department will make secondary use of your purpose statement to assess the quality of your writing. We recommend a length of 500-1000 words. The scope of your discussion and the level of detail that you choose to provide will be part of our assessment.

- CV or Résumé

Curriculum vitae or résumé listing language experience, awards, honors, or publications. For more information on CV or résumé writing, please consult:

UW-Madison Writing Center. CV Tips (https://writing.wisc.edu/handbook/assignments/cv)

- Letters of Recommendation (3)

We require three letters of recommendation, submitted directly by the referees. You must submit your requests to all three of your references as part of the online application. Recommenders will receive a notice via email and will submit their letters accordingly. We do accept letters by post and email (submit directly to the graduate coordinator). We do not accept letters sent by the candidate unless they are sealed and the seal is proofed in some form (e.g., with the letter writer’s signature over the seal).

Recommendation letters should discuss your overall scholarly ability. Please ask your referees to include specific examples of your academic achievements; your independent thinking, analytical and critical thinking skills; papers and presentations given in their courses; and your merits relative to other students. For international applicants, the letters should also address English proficiency. If recommenders submit their letters via the Graduate School’s online application system, they will be asked to compare you to other students with whom they have worked; if they do not submit their letters through this system, they should include this information in the letter itself.

Strong letters of recommendation will provide the department with evidence that you will succeed in the study of African languages and expressive cultures at the graduate level. While we will accept letters from faculty in any discipline, we will give greater weight to letters from faculty whose scholarship is related to the fields we study.

All letters must be received by the 15 November deadline in order for us to consider your application.

AFTER THE APPLICATION

Following your application, the Graduate School will provide you with a link and a UW–Madison NetID and account. Use the information to track the progress of your application. Please keep in mind that materials sent by post may take some time to appear on this progress report.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The department automatically considers all applicants for support through teaching assistantships and various UW–Madison fellowships. The process is very competitive, and we are unable to provide support for all students qualified to pursue degrees in our graduate program. However, the majority of our students do receive about five years of funding, mostly in the form of teaching assistantships. Our top
domestic minority students are typically nominated for, and often receive, Advanced Opportunity Fellowships (https://grad.wisc.edu/diversity/oeid). All domestic students are encouraged to apply for Foreign Language Area Studies (https://flas.wisc.edu) (FLAS) fellowships. Many of our graduate students also pursue outside funding as their career progresses. Details are listed below.

**TEACHING ASSISTANTSHIPS**

The department regularly funds teaching assistantships for both our language and literature/culture courses. Opportunities and assignments vary by semester. All continuing graduate students in good academic standing must apply by 15 November to be considered for positions for the following academic year. All new applicants are automatically considered. Teaching assistants earn tuition remission, a stipend, and benefits.

Please consult our website (https://african.wisc.edu/programs/teaching-assistantships) for the most up-to-date information regarding teaching assistantships.

**EBRAHIM HUSSEIN FELLOWSHIP**

The Ebrahim Hussein Endowment for research in African expressive cultures was established in the College of Letters & Science in 2003 thanks to the generosity of Robert M. Philipson, alumnus of the College of Letters & Science (Ph.D.1989). The college will award $7500 each year to one or more full-time graduate students in L&S to carry out research on African expressive cultures in Africa and/or archives outside of the United States. The research must lead to a Ph.D. dissertation, an M.A. thesis, or a publishable-quality paper. Doctoral students may receive up to $7500 each; M.A. level students may receive up to $3,750 each.

**Selection Criteria:**

- Excellence of research proposal
- Demonstrated commitment to researching African expressive cultures
- General academic record
- Strong recommendations from faculty
- Timing of the proposed research in relation to degree requirements

**OTHER FUNDING RESOURCES**

The Graduate School provides additional information helpful to graduate students in need of funding.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, students are allowed to count no more than 6 credits of coursework numbered 300 or above from a UW–Madison undergraduate degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 15 credits of coursework numbered 400 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

ADVISOR / COMMITTEE

Candidates are required to meet with the director of graduate studies every semester prior to enrolling for the next semester.
Failure to meet this requirement will result in a hold on the student’s enrollment.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Students who have not produced a “publishable” (passing) QP by the beginning of the fourth semester (e.g. the end of January) must write a brief request for an extension to the end of the fourth semester, to be presented by their advisor for approval by the faculty. No more than one such extension will be granted.

Students who have not produced a “publishable” (passing) QP by the end of their fourth semester will leave the program with a terminal MA. Those who produce a “publishable” QP by the end of their fourth semester will be considered for admission to the PhD program. A decision regarding admission to the Ph.D. will be taken at a faculty meeting, based on a recommendation by the QP readers and input from other faculty members.

**OTHER**

n/a

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Develop in-depth knowledge in a sub-field of specialization within African cultural studies.
3. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
4. (Content) Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through language, literatures, and cultures.
5. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
6. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
7. (Research Skills) Gain firm knowledge of existing research in their area of specialization and its gaps.
8. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
9. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
10. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
11. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
12. (Communication Skills) Demonstrate their ability to organize a larger project into logical smaller components.
13. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
14. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.
15. (Analytical Skills) Articulate the place of their own research in relation to existing research on related topics.

Applicants should have a minimum 3.0 GPA on a 4.0 grading scale or equivalent academic performance on other scales. The department will consider special cases, however, for probationary admission. If you have questions about your eligibility, contact the chair of the Admissions committee, Dr. Katrina Daly Thompson, at katrina.daly.thompson@wisc.edu

Admission into the Ph.D. program requires a master of arts in a closely related field (with the thesis or other substantive piece of graduate-level writing submitted as a writing sample).

APPLICATION REQUIREMENTS

All applicants to the program must apply online (https://grad.wisc.edu/apply) by 15 November. Please note, the $75 application fee is due at the time of application (an additional $6 will be charged to international students to cover processing). The department cannot review an applicant who has not met all Graduate School admissions requirements (https://grad.wisc.edu/admissions/requirements). Carefully review the instructions and other information the Graduate School provides; most of the admissions questions we receive relate to the Graduate School’s requirements and are answered in their documentation.

As part of the online application process, you will be asked supplemental questions regarding your language and teaching experience and expected to upload the information listed below:

- University Transcripts

You must upload transcripts or academic records from each institution attended. You may upload unofficial copies for department review. If you are offered admission to the program, the Graduate School will request that you provide official copies of transcripts or academic records from each institution you have attended. These must be issued directly by the institutions with all official seals, stamps, and signatures. International academic records must be in the original languages and records in languages other than English accompanied by an official English translation. An accepted student may not matriculate or enroll for courses until the Graduate School has documented official transcript(s) matching or updating the application transcript(s).

- TOEFL or IELTS Scores (international applicants)

If your undergraduate institution did not conduct courses in English, you must complete either the Test Of English as a Foreign Language (TOEFL) or the International English Language Testing System exam (IELTS). The online application allows you to self-report scores, but we cannot consider your application until the Graduate School receives your official score report directly from the examination organization. Students who do not meet Graduate School guidelines for English proficiency (https://grad.wisc.edu/admissions/requirements) may be considered for admission, but will be required to complete assigned English language courses during their first year of study.

- Purpose Statement

Your statement of purpose should make clear that you understand the kinds of courses we offer (https://african.wisc.edu/acs-courses) and the research interests of our faculty and substantiate how your own interests intersect with our faculty expertise (https://african.wisc.edu/people/faculty-and-staff). Give a detailed account of the reasons and circumstances that led to your decision to undertake graduate work in the Department of African Cultural Studies. Include references to your academic work, your short-term and long-term goals, your personal relationship to or interests in the fields we study, and your knowledge of any African languages. If your transcripts reflect any negative
episodes in your academic career, e.g., a poor grade or a dropped course, you may explain them here.

The department will make secondary use of your purpose statement to assess the style and substance of your writing. We recommend a length of 500-1000 words. The scope of your discussion and the level of detail that you choose to provide will be part of our assessment.

- **CV or Résumé**

  Curriculum vitae or résumé listing language experience, awards, honors, or publications. For more information on CV or résumé writing, please consult these resources:

  UW-Madison Writing Center: CV Tips ([https://writing.wisc.edu/handbook/assignments/cv](https://writing.wisc.edu/handbook/assignments/cv))

- **Letters of Recommendation (3)**

  We require three letters of recommendation, submitted directly by the referees. You must submit your request to all three of your references as part of the online application. Recommenders will receive a notice via email and will submit their letters accordingly. We do accept letters by post and email (see **Application Contacts** below). We do not accept letters sent by the candidate unless they are sealed and the seal is proofed in some form (e.g., with the letter writer's signature over the seal).

  Recommendation letters should discuss your overall scholarly ability. Please ask your referees to include specific examples of your academic achievements, your independent thinking, analytical and critical thinking skills; papers and presentations given in their courses; and your merits relative to other students. For international applicants, the letters should also address English proficiency. If recommenders submit their letters via the Graduate School’s online application system, they will be asked to provide class rank information; if they do not submit their letters through this system, they should include this information in the letter itself.

  Strong letters of recommendation will provide the department with evidence that you will succeed in the study of African languages and expressive cultures at the graduate level. While we will accept letters from faculty in any discipline, we will give greater weight to letters from faculty whose scholarship is related to the fields we study.

  *All letters must be received by the 15 November deadline in order for us to consider your application.*

- **AFTER THE APPLICATION**

  Following your application, the Graduate School will provide you with a link and a UW–Madison NetID and account. Use the information to track the progress of your application. Please keep in mind that materials sent by post may take some time to appear on this progress report.

- **FUNDING**

  **GRADUATE SCHOOL RESOURCES**

  Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information ([https://grad.wisc.edu/funding](https://grad.wisc.edu/funding)) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

  **PROGRAM RESOURCES**

  The department automatically considers all applicants for support through teaching assistantships and various UW–Madison fellowships. The process is very competitive, and we are unable to provide support for all students qualified to pursue degrees in our graduate program. However, the majority of our students do receive about five years of funding, mostly in the form of teaching assistantships. Our top domestic minority students are typically nominated for, and often receive, Advanced Opportunity Fellowships ([https://grad.wisc.edu/diversity/oeid](https://grad.wisc.edu/diversity/oeid)). All domestic students are encouraged to apply for Foreign Language Area Studies ([https://flas.wisc.edu](https://flas.wisc.edu)) fellowships. Many of our graduate students also pursue outside funding as their career progresses. Details are listed below.

  **TEACHING ASSISTANTSHIPS**

  The department regularly funds teaching assistantships for both our language and literature/culture courses. Opportunities and assignments vary by semester. All continuing graduate students in good academic standing must apply by 15 November to be considered for positions for the following academic year. All new applicants are automatically considered. Teaching assistants earn tuition remission, a stipend, and benefits.

  Please consult our website ([https://african.wisc.edu/programs/teaching-assistantships](https://african.wisc.edu/programs/teaching-assistantships)) for the most up-to-date information regarding teaching assistantships.

  **EBRAHIM HUSSEIN FELLOWSHIP**

  The Ebrahim Hussein Endowment for research in African expressive cultures was established in the College of Letters & Science in 2003 thanks to the generosity of Robert M. Philipson, alumnus of the College of Letters & Science (Ph.D. 1989). The college will award $7,500 each year to one or more full-time graduate students in L&S to carry out research on African expressive cultures in Africa and/or archives outside of the United States. The research must lead to a Ph.D. dissertation, an M.A. thesis, or a publishable-quality paper. Doctoral students may receive up to $7,500 each; M.A. level students may receive up to $3,750 each.

  **Selection Criteria:**

  - Excellence of research proposal
  - Demonstrated commitment to researching African expressive cultures
  - General academic record
  - Strong recommendations from faculty
  - Timing of the proposed research in relation to degree requirements

  **OTHER FUNDING RESOURCES**

  The Graduate School provides additional information helpful to graduate students in need of funding.

  Find information about:

  - Types of funding available ([https://grad.wisc.edu/studentfunding/types](https://grad.wisc.edu/studentfunding/types))
  - How to search for funding ([https://grad.wisc.edu/studentfunding/steps](https://grad.wisc.edu/studentfunding/steps))
  - Funding for international students ([https://iss.wisc.edu/students/new-students/funding-scholarships](https://iss.wisc.edu/students/new-students/funding-scholarships))

Other Grade Requirements: Ph.D. candidates should maintain a 3.5 GPA in all core curriculum courses and may not have any more than two Incompletes on their record at any one time.
MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
Up to 6 credits of prior coursework may be counted toward the Ph.D. with approval.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
No credits from a UW–Madison University Special student career are allowed to count toward the degree.

PROBATION

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

ADVISOR / COMMITTEE

All students are required to find a dissertation advisor by the beginning of the third semester in the program. The dissertation committee must consist of at least four members representing more than one graduate program, three of whom must be UW–Madison graduate faculty or former UW–Madison graduate faculty and their envisioned career path. The statement should be approved by the advisor, then submitted by the advisor at a faculty meeting for feedback.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A student may not hold an assistantship for more than five years.

For students who earned an M.A. elsewhere, coursework should be completed in six semesters. By the beginning of the sixth semester, the candidate proceeds to the preliminary examination. A student who has not attempted the written preliminary exam by the beginning of the their seventh semester, or passed it by the end of the seventh semester, will leave the program with a terminal M.A. (provided they have at least thirty credits).

For students who earned an M.A. at UW–Madison, coursework should be completed in four semesters. By the beginning of the fourth semester, the candidate proceeds to the preliminary examination. A student who has not attempted the written preliminary exam by the beginning of their fifth semester, or passed it by the end of the fifth semester, will leave the program.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Develop in-depth knowledge in a sub-field of specialization within African cultural studies.
3. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
4. (Content) Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
5. (Content) Develop knowledge of a secondary field of research from outside the Department of African Cultural Studies.
6. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
7. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
8. (Research Skills) Gain firm knowledge of existing research in their area of specialization and its gaps.
9. (Research Skills) Read material (primary and secondary) relevant to African cultural studies in a non-African language other than English.
10. (Research Skills) Have an understanding of professional and ethical responsibility with regard to producing original research and working with human subjects.
11. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
12. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
13. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
14. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
15. (Communication Skills) Demonstrate their ability to organize a book-length project into logical smaller components, so that it can be addressed in depth in a multi-chapter piece of writing.
17. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
18. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.
19. (Analytical Skills) Articulate the place of their own research in relation to existing research on related topics.

PEOPLE

FACULTY

To view full faculty profiles, visit our website (https://african.wisc.edu/people/faculty).

Matthew H. Brown: African screen media (particularly "Nollywood"), oral traditions, literature
Vlad Dima: French New Wave cinema, Francophone cinemas, film theory, television studies
Ainehi Edoro: Form, theory, and history of the African novel
Névine El Nossery: Francophone & Middle Eastern literature and culture, postcolonial studies
Samuel England: Classical Arabic poetry and prose, modern Arabic literature
Luis Madureira: Colonial and postcolonial studies, modernism, theater and performance
Tejumola Olaniyan: African, African American, and Caribbean literature and performance
Ronald Radano: Ethnomusicology, US Black music and its transnational circulation
Reginold Royston: Africana cultural studies, new media and sound studies, philosophy and history of information and communications technology, diaspora and transnationalism
Damon Sajnani: Africana cultural studies, social and political theory, HipHop studies
Katrina Daly Thompson: African discourse, ethnographic approaches to language use, language pedagogy, gender, sexuality, Islam

AFRO-AMERICAN STUDIES

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Afro-American Studies, Doctoral Minor (p. 35)
- Afro-American Studies, M.A. (p. 35)

PEOPLE

Faculty: Professors Greene (chair), Adell, Drewal, Plummer, Thornton, Werner, Whitmire; Associate Professor Clark-Pujara; Assistant Professors Almiron, Brown, Davis

AFRO-AMERICAN STUDIES, DOCTORAL MINOR

REQUIREMENTS

Candidates for the Ph.D. in other programs may obtain a doctoral minor in Afro-American studies by completing a minimum of 12 graduate credits in the department (http://guide.wisc.edu/courses/afroamer), of which only 3 may be directed-study credits. Three of the 12 credits must be a seminar course. Advance approval by the candidate’s major advisor is required for the doctoral minor.

PEOPLE

Faculty: Professors Greene (chair), Adell, Drewal, Plummer, Thornton, Werner, Whitmire; Associate Professor Clark-Pujara; Assistant Professors Almiron, Brown, Davis

AFRO-AMERICAN STUDIES, M.A.

The program in Afro-American studies at the University of Wisconsin–Madison is dedicated to carrying on the vision of the elders and ancestors who devoted themselves to the highest standards of intellectual rigor and to the realization of a vision of true equality and opportunity. Like W.E.B. Du Bois, Anna Julia Cooper, John Hope Franklin, Zora Neale Hurston and James Porter, the department is committed to bringing the fruits of academic research to the broadest possible audience, within and beyond the walls of the university. The deepest understanding of the complex reality of race in America requires an interdisciplinary approach, one that draws on history and literature, the social sciences, and the arts. Graduate studies are concentrated in three areas:

1. Afro-American Culture (literature, theater history, music and culture, art history and visual culture);
2. History and Society;
3. Black Women’s Studies

The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the “Bridge” programs which enable them to move directly into Ph.D. programs in English (http://www.english.wisc.edu/grad-afroam.htm) or history (https://history.wisc.edu/our-graduate-program/bridge-program). Program faculty are experts in their fields and work collaboratively to ensure that graduate students are well prepared to either take on further study at the Ph.D.-level or careers in teaching, public service, and the private, corporate sector. The program also offers doctoral minors for students in many graduate programs including African languages and literature, art history, communication arts, comparative literature, education, English, history, music, political science, social work, and sociology.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

The Graduate School (https://grad.wisc.edu) has an extensive website where you will find information regarding admissions and how to apply (https://www.gradsch.wisc.edu/eapp/eapp.pl) online. It is very important you read all information carefully.

All applicants to our program must meet the University of Wisconsin Graduate School's admission requirements (https://grad.wisc.edu/admissions/requirements)

Information regarding fellowships, tuition, housing, cost of living, etc. can be found at financial aid (https://financialaid.wisc.edu).

Read the application and corresponding instructions carefully. Only the online application and the $75 application fee are sent to the Graduate School. Other materials must be sent to the Department of Afro-American Studies.
To apply to the master’s program, please send the following to the Afro-American Studies Department, 4141 Helen C. White Hall, 600 N. Park St., Madison WI 53706:

- Official transcript(s) or academic records from each institution attended
  (International academic records must be in the original language accompanied by an official English translation. Documents must be issued by the school with the official seal/stamp and official signatures.)
- Reasons for Graduate Study if you did not include this with your online application to the Graduate School
- A writing sample
- Three (3) letters of recommendation (https://grad.wisc.edu/admissions/faq)
- If applying, please inform the department of any home/email address changes. This is very important.

The Department of Afro-American Studies does not currently require students to take the Graduate Record Examination (GRE), although we recommend that you do so. Students who do not take the GRE are ineligible for certain types of financial aid. Admission to the department is competitive: the minimum overall GPA required is 3.0 on a 4.0 scale. Students with a GPA above 3.3 are especially encouraged to apply. Priority will be given to students who have completed undergraduate courses in subjects related to Afro-American history, culture, or society or who have completed an undergraduate major in one of the following fields: Afro-American Studies; a related social science discipline; the humanities.

n/a

Detailed information about the accelerated nature of a specific program, contact the program.
REQUIRED COURSES
Students must take 24 credits of approved graduate coursework and 6 Research and Thesis credits. At least 12 of the course credits must be taken in the Department of Afro-American Studies.

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
For well-prepared advanced students, the program may accept 9 credits of prior graduate coursework from other institutions towards the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the program’s graduate degree requirements.

UW–Madison University Special
The program may decide to accept up to 9 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
12 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students with an interest in pursuing a Ph.D. in either English or history might be interested in applying to the in English Bridge Programs (http://www.english.wisc.edu/grad-afroam.htm) or History (https://history.wisc.edu/our-graduate-program/bridge-program), which allow a student who has completed an M.A. in Afro-American studies to move directly into one of those Ph.D. programs.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. To provide students with a thorough understanding of a range of disciplinary approaches to the study of the African American experience in the United States and the African diaspora.
2. To provide students with a foundation in their area of concentration that will enable them to pursue doctoral work in a relevant discipline, especially in the areas of English and history, where we have established Bridge programs with UW departments.
3. To familiarize students with the techniques of effective teaching in multiracial classrooms, including training in dealing with controversial issues and potential racial tensions.

PEOPLE
Faculty: Professors Greene (chair), Adell, Drewal, Plummer, Thornton, Werner, Whitmire; Associate Professor Clark-Pujara; Assistant Professors Almiron, Brown, Davis
AGRICULTURAL AND APPLIED ECONOMICS

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Agricultural and Applied Economics, Doctoral Minor (p. 38)
- Agricultural and Applied Economics, M.S. (p. 38)
- Agricultural and Applied Economics, Ph.D. (p. 48)

PEOPLE

Faculty: Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi; Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

AGRICULTURAL AND APPLIED ECONOMICS, DOCTORAL MINOR

Any student enrolled in a UW–Madison doctoral program may pursue a doctoral minor in agricultural and applied economics. Many students take the master’s core courses of A A E 635 Applied Microeconomic Theory, A A E 636 Applied Econometric Analysis I and A A E 637 Applied Econometric Analysis II to gain training in microeconomic theory and econometrics that are designed to develop a set of analytical skills applicable to a wide range of problems in many disciplines, especially the social sciences.

REQUIREMENTS

Graduate students who wish to pursue an Option A external minor in agricultural and applied economics should consult the A A E graduate coordinator or director of graduate studies. Courses should be chosen in consultation with the student’s departmental advisor and submitted for approval to A A E before they are taken. Students may earn a doctoral minor in A A E with 9 credits, if all 9 credits are in graduate-level courses preapproved by A A E. Students are expected to achieve a B or better in all courses used for the minor. Directed study courses do not count toward the minor.

The A A E director of graduate studies certifies the minor on the prelim warrant.

PEOPLE

Faculty: Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi; Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

AGRICULTURAL AND APPLIED ECONOMICS, M.S.

The Department of Agricultural and Applied Economics offers three graduate degree programs leading to the master of science and doctor of philosophy. Long recognized as one of the top programs in the nation, the department is an active center of research and graduate training in environmental and natural resource economics, the economic development of low-income countries, agricultural economics, community economics, and more recently, resource and energy demand analysis.

Department faculty are affiliated with a broad range of institutes and centers across the campus, including the Gaylord Nelson Institute for Environmental Studies, the Center for Integrated Agricultural Systems, the University Center for Cooperatives, the Renk Agribusiness Institute, Center for Community Economic Development, and the area studies programs. Each program has its own rich intellectual life of seminars and other activities.

The department provides office space, a lounge, and IT support for its approximately 60 graduate students. The Taylor–Hibbard Club, the department’s graduate student organization, serves as a link between graduate students and the faculty, elects student representatives to department committees, and promotes academic and social activities for its members.

There are three master’s degree programs in the Department of Agricultural and Applied Economics: the M.S. named option Agricultural and Applied Economics (A A E), the M.S. named option Resource and Energy Demand Analysis (REDA), and the M.S. named option Professional Option.

M.S. NAMED OPTION IN AGRICULTURAL AND APPLIED ECONOMICS (P. 41)

The AAE-MS program is a 30-credit master’s degree program intended for students with research and academic interests, especially students who might want to go on for a Ph.D. program in economics of development, agriculture, energy and natural resources, and community development. This program normally takes four semesters to complete. For more information please visit the AAE department website (https://aae.wisc.edu/programs/gradprogram).

M.S. NAMED OPTION IN RESOURCE AND ENERGY DEMAND ANALYSIS (REDA) (P. 45)

This one-year program is designed to prepare students for jobs in economics and data analytics for a sustainable future. Industry professionals deliver seminars about their research, supply data for classroom activities, and mentor students via research projects. Our small class size means students get plenty of individual attention from faculty and staff. The cohort nature of our program fosters peer-to-peer learning and a culture of intellectual curiosity. Completion of this fast track master’s program requires 31 credits and does not include a thesis. Learn more (p. 45).

M.S. NAMED OPTION IN PROFESSIONAL OPTION (P. 43)

This full time, 15-month, on-campus professional master’s program is designed to prepare students to fill the growing private sector demand for quantitatively-skilled analysts and managers. Students will learn skills in
economic reasoning, data management, empirical analysis, and technical communication in order to find analytical positions in governmental, or non-governmental sectors. The curriculum features three semesters and one summer term of core course offerings in econometrics, micro-economic theory, and professional development, along with a capstone practicum class leading to a final professional report. Students take electives to pursue specific interests in AAE’s focus areas of agricultural, development, and environmental and natural resource economics. Learn more. (https://aae.wisc.edu/grad/mspo)

ADMISSIONS

Students apply to the M.S. in Agricultural and Applied Economics through one of the named options:

• Agricultural and Applied Economics (p. 41)
• Professional Option (p. 43)
• Resource and Energy Demand Analysis (p. 45)

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

M.S. students in agricultural and applied economics can apply for graduate positions listed under students jobs (https://jobs.wisc.edu).

Students in the Resource and Energy Demand Analysis (REDA) and Professional Option named options are not permitted to accept assistantships or seek dual degrees.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

Note: The major is currently non-admitting. Students are admitted through one of the named options (sub-majors) below (p. 40).

### GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

### MAJOR-SPECIFIC POLICIES

#### GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook is the repository for all of the program’s policies and requirements. See the handbook for the named option in Agricultural and Applied Economics here (https://aae.wisc.edu/students/grad-handbook), and for the named option in Resource and Energy Demand Analysis here (http://reda.aae.wisc.edu/handbook.pdf). The handbook for the MS AAE Professional Option will be available in May 2019.

#### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

Up to 7 credits from a UW–Madison undergraduate degree numbered 300 or above are allowed to count toward the degree, with petition from student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison University Special**

See either the M.S. named option in Agricultural and Applied Economics (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-agricultural-applied-economics-agricultural-applied-economics-professional-option-ms/#policies), the named option in Professional Option (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-agricultural-applied-economics-resource-energy-demand-analysis-ms/#policies), or the named option in Professional Option (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-agricultural-applied-economics-professional-option-ms/#policies) for the policy information.

### PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

### ADVISOR / COMMITTEE

See either the M.S. named option in Agricultural and Applied Economics (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-agricultural-applied-economics-agricultural-applied-economics-professional-option-ms/#policies), the named option in Resource and Energy Demand Analysis (REDA) (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-resource-energy-demand-analysis-ms/#policies), or the named option in Professional Option (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-agricultural-applied-economics-professional-option-ms/#policies) for the information.

### LANGUAGE REQUIREMENTS

No language requirements.

### NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferred. Students pursuing the Master of Science in Agricultural and Applied Economics must select one of the following named options:

- **AGRICULTURAL AND APPLIED ECONOMICS: AGRICULTURAL AND APPLIED ECONOMICS, M.S.** (P. 41)
- **AGRICULTURAL AND APPLIED ECONOMICS: PROFESSIONAL OPTION, M.S.** (P. 43)
- **AGRICULTURAL AND APPLIED ECONOMICS: RESOURCE AND ENERGY DEMAND ANALYSIS, M.S.** (P. 45)

### POLICIES

#### REQUIRED COURSES

Select a named option (p. 40) for courses required.

#### NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferred. Students pursuing the Master of Science in Agricultural and Applied Economics must select one of the following named options:

- **AGRICULTURAL AND APPLIED ECONOMICS: AGRICULTURAL AND APPLIED ECONOMICS, M.S.** (P. 41)
- **AGRICULTURAL AND APPLIED ECONOMICS: PROFESSIONAL OPTION, M.S.** (P. 43)
- **AGRICULTURAL AND APPLIED ECONOMICS: RESOURCE AND ENERGY DEMAND ANALYSIS, M.S.** (P. 45)

Redacted text for privacy.
analysis-ms/#policiestext), or the named option in Professional Option (https://next-guide.wisc.edu/graduate/agricultural-applied-economics/agricultural-applied-economics-ms/agricultural-applied-economics-professional-option-ms/#policiestext) for the policy information.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Students in the Resource and Energy Demand Analysis (REDA) or the Professional Option named options are not permitted to accept assistantships or seek dual or double degrees.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Articulates and critiques theories and empirical methods for quantitative analysis relevant to agricultural, environmental, international development, or community economics.
2. Identifies data sources, applies appropriate econometric methodologies, and evaluates quantitative evidence relevant to questions in agricultural, environmental, international development, or community economics.
3. Clearly communicates applied economics issues, methods, and empirical analysis using both written and oral strategies.
4. Recognizes and applies principles of ethical, collegial and professional conduct.

**PEOPLE**

**Faculty:** Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi, Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

**Lecturers:** Beardmore, Glinsmann

**AGRICULTURAL AND APPLIED ECONOMICS: AGRICULTURAL AND APPLIED ECONOMICS, M.S.**

This is a named option within the Agricultural and Applied Economics M.S. (p. 38)

The master of science includes 30 credits of coursework. This program normally takes 4 semesters to complete, and is ideal for students interested in careers in data analysis, government agencies, nonprofit organizations, consulting and more. For more information please visit the AAE department website (https://aae.wisc.edu/programs/gradprogram).

**ADMISSIONS**

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION–SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://aae.wisc.edu/students/grad-handbook) is the repository for all of the program’s policies and requirements.
PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
Up to 7 credits from a UW–Madison undergraduate degree numbered 300 or above are allowed to count toward the degree, with petition from student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

The A A E Graduate Faculty Committee makes decisions regarding student progress.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A full-time student is expected to complete the M.S. in A A E in two years. The program can be completed part-time but must be completed in five years.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Faculty: Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi; Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

Lecturers: Beardmore, Glinsmann

AGRICULTURAL AND APPLIED ECONOMICS: PROFESSIONAL OPTION, M.S.

This is a named option in the Agricultural and Applied Economics M.S. (p. 38)

The Agricultural and Applied Economics Professional Option (MSPO) program is a full-time, 15-month, accelerated professional master’s program designed to meet the growing private sector demand for quantitatively-skilled analysts and managers. Please visit the AAE MS AAE Professional Option (https://aae.wisc.edu/grad/mspo) website for more information.

Other options are REDA (https://reda.aae.wisc.edu) and the AAE MS Traditional Option (https://aae.wisc.edu/grad/masters).

ADMISSIONS

The priority application deadline for the Professional Option is March 15 for fall enrollment. Admission decisions are made after that date on a rolling admission basis. If there is room in the program, applications will be taken after that date. For details on the MS AAE Professional Option (MSPO) please visit the APPLY (https://aae.wisc.edu/grad/apply) page.

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A full-time student is expected to complete the M.S. in Agricultural and Applied Economics in two years. The program can be completed part-time but must be completed in five years.

OTHER

Students in the Professional Option program are not permitted to accept assistantships or seek dual or double degrees.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

The MS AAE Professional Option courses are designed to prepare students to enter the professional workforce in both the US and abroad in data-intensive and quantitatively focused jobs in economic consulting, businesses, agribusinesses, non-profit organizations focused on development, and governmental sectors.

PEOPLE

Faculty: Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi; Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

AGRICULTURAL AND APPLIED ECONOMICS: RESOURCE AND ENERGY DEMAND ANALYSIS, M.S.

This is a named option within the Agricultural and Applied Economics M.S. (p. 38)

This one-year master’s program prepares students for challenging and rewarding careers in the fields of energy, resource, and environmental management. REDA provides graduate training for a smart green world. Our students learn economic theory and quantitative methods in data analysis, attend seminars on current issues in energy & natural resources delivered by industry professionals, and solve real-world research problems. Many REDA alumni are working with energy utilities and energy consulting firms.

Our small class size means students get plenty of individual attention from faculty and staff. The cohort nature of our program fosters peer-to-peer learning and a culture of intellectual curiosity. Completion of this fast track masters requires 31 credits and does not include a thesis. The program begins with a summer online course, continues with two semesters of on campus courses, and concludes with a research project the following summer. Learn more (http://reda.aae.wisc.edu).
Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online.

**Requirements**

**Fall Deadline**
This program does not admit in the fall.

**Spring Deadline**
The program does not admit in the spring.

**Summer Deadline**
March 31

**GRE (Graduate Record Examinations)**
Required.

**English Proficiency Test**
Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements.

**Other Test(s) (e.g., GMAT, MCAT)**
n/a

**Letters of Recommendation**
Required

Our priority application deadline is January 15th for enrollment the following summer. For details on the REDA Application Process, please go to this link:

To Apply (http://reda.aae.wisc.edu/apply)

**FUNDING**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Students in the Resource and Energy Demand Analysis program are not permitted to accept tuition-waiving assistantships or seek double or dual degrees.

REDA offers partial scholarships to exceptional applicants. Learn more (http://reda.aae.wisc.edu/apply).

**CURRICULAR REQUIREMENTS**

**Minimum Graduate School Requirements**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**Named Option Requirements**

**Mode of Instruction Definitions**

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Total Credits 30-32

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**NAMED OPTION-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (http://reda.aae.wisc.edu/handbook.pdf) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 6 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, students are allowed to count no more than 7 credits of undergraduate coursework numbered 300 or above from UW–Madison. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

**UW–Madison University Special**

No credits earned as a UW–Madison University Special student may be applied toward the program requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

The REDA program director and REDA program coordinator will serve as co-advisors for all REDA students.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Students in the Resource and Energy Demand Analysis program are not permitted to accept assistantships or seek double or dual degrees.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
REDA students receive personalized career advice to help them achieve their professional goals. This includes feedback on resumes and cover letters, panel presentations by REDA alumni, and opportunities to network with local and national professionals in the energy and natural resource fields. Employers recognize the high-quality training that our students receive and often directly recruit REDA students for their job openings.

**People**

**Faculty:** Professors Foltz (chair), Barham, Chavas, Coxhead, Deller, Gould, Mitchell, Phaneuf, Provencher, Rutherford, Stiegert; Associate Professors Alix-Garcia, Du, Grainger, Hueth, Schechter, Shi; Assistant Professors Conroy, Dower, Parker, Tjernström; Faculty Associate Dong

**Lecturers:** Beardmore, Glinsmann

**AGRICULTURAL AND APPLIED ECONOMICS, PH.D.**

Doctoral students are required to develop comprehensive proficiency in economic theory, mathematics, econometrics, and major and minor fields of concentration. In addition to the prerequisites for the master’s program, doctoral applicants should also have mathematical statistics and linear algebra. Candidates for the Ph.D. degree must complete the general requirements of the Graduate School, as well as further requirements which are detailed in the department’s application material and website (http://www.aae.wisc.edu).

The Department of Agricultural and Applied Economics offers graduate degree programs leading to the master of arts, master of science, and doctor of philosophy. Long recognized as one of the top programs in the nation, the department is an active center of research and graduate training in environmental and natural resource economics, the economic development of low-income countries, agricultural economics, community economics, and more recently, resource and energy demand analysis.

Graduate students select courses from among the department’s advanced offerings in these areas. Active department seminar and workshop series complement formal classroom instruction. In addition, nearly all students work as graduate research assistants on projects with individual faculty members. Faculty and students carry out research in virtually every region of the globe, with Latin America, Southeast Asia, and sub-Saharan Africa as the areas of strongest geographical concentration.

While members of the faculty define themselves professionally in terms of the areas of applied economics within which they work, the graduate programs are predicated on the notion that good applied economic analysis requires rigorous and thorough training in economic theory and econometrics. The Ph.D. curriculum is grounded in comprehensive training in economic theory and econometrics and relies on the doctoral core in theory and econometrics offered by Wisconsin’s outstanding economics program. When matched with the department’s applied courses, which teach students how to use advanced methods to conceptualize and answer contemporary economic problems, this strong core training prepares students for a variety of challenging careers. A A E graduates have taken positions (https://aae.wisc.edu/grad/placement) in academic research and teaching; economic consulting in the private sector; and economic staffing in public agencies and nongovernmental organizations at the local, state, national, or international level. A majority of the department’s Ph.D. graduates take faculty positions at universities and colleges.

Department faculty are affiliated with a broad range of institutes and centers across the campus, including the Gaylord Nelson Institute for Environmental Studies, the Center for Integrated Agricultural Systems, the University Center for Cooperatives, the Renk Agribusiness Institute, Center for Community Economic Development, and the international area studies programs. Each program has its own rich intellectual life of seminars and other activities.

The department provides student office space, a lounge, and IT support for its approximately 80 graduate students. The Taylor–Hibbard Club, the department’s graduate student organization, serves as a link between graduate students and the faculty, elects student representatives to department committees, and promotes academic and social activities for its members.

**Admissions**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The department offers a number of research assistantships, and students have competed well for university-wide fellowships. The department’s students have also received nationally competitive fellowships and research grants from the National Science Foundation, the Social Science Research Council, the Fulbright programs, and others. New students applying for the Ph.D. who wish to be reviewed for the university fellowship competition must complete their applications by December 15.

### POLICIES

#### GRADUATE SCHOOL POLICIES
The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

#### MAJOR-SPECIFIC POLICIES

#### GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://aae.wisc.edu/students/grad-handbook) is the repository for all of the program’s policies and requirements.

#### PRIOR COURSEWORK

**Graduate Work from Other Institutions**
With program approval, students are allowed to count no more than 18 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**
No credits from the UW–Madison undergraduate degree are allowed to count toward the degree.

**UW–Madison University Special**
With program approval students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PROFESSIONAL DEVELOPMENT

#### GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

#### PROGRAM RESOURCES
The Department of Agricultural and Applied Economics invites applied economists to participate in a seminar series. Students get various presentation opportunities to present their latest research in department and student seminars. All students are required to take a research colloquium which helps students develop their dissertation proposal and plan for their job search. Faculty provide mock interviews and detailed feedback on interviewing skills. A A E placement (https://aae.wisc.edu/graduate-student-placement-information) information is on the department website.
LEARNING OUTCOMES

1. Articulates and critiques theories and empirical methods to address research issues in agricultural, environmental, international development, or community economics.
2. Identifies data sources, applies appropriate econometric methodologies, and evaluates quantitative evidence relevant to questions in agricultural, environmental, international development, or community economics.
3. Creates scholarship that makes a substantive contribution to the chosen major field and/or to society.
4. Clearly communicates applied economics issues, methods, and empirical analysis using both written and oral strategies.
5. Recognizes and applies principles of ethical, collegial and professional conduct.

- Plant Breeding and Plant Genetics, Ph.D (p. 66)

AGROECOLOGY, M.S.

Created in 2007, the Agroecology M.S. program at UW–Madison trains students to research and analyze agricultural systems within a broader environmental and socioeconomic context. Key to this endeavor is interdisciplinary expertise, which the agroecology program achieves through working with affiliated faculty members from nearly 20 departments across campus.

A typical cohort consists of 8–12 incoming students with diverse backgrounds and undergraduate majors. Agroecology M.S. students work with faculty on focused projects across a wide range of the traditional departments of the academy. Our core curriculum brings together these students for a multidisciplinary, agroecological, analysis of agricultural systems in a broadened context.

The agroecology program is supported by the interdisciplinary agroecology cluster, which hired three faculty members in 2002: Michael Bell in community and environmental sociology, Claudio Gratton in entomology, and Randall Jackson in agronomy. These faculty, all still active in the program, were the catalyst for what is now a group of more than 50 faculty affiliates who advise agroecology students and participate in program governance.

The cluster concept is an innovation of the University of Wisconsin in which a core group of faculty is hired into an interdisciplinary area, but have tenure homes in traditional departments.

PROGRAM TRACKS

- The public practice track trains facilitators to enable broader discussion and negotiation at the interfaces of agriculture and other sectors of society. The goal of this "action-in-society" track is to train analysts to increase understanding about the roles of agricultural systems in multi-functional landscapes, and the public policy that shapes these roles.
- The research track addresses the need for continued research and scholarship in order that discussions and negotiations are well informed. Students will have the opportunity to obtain experience in the scholarship of original research, culminating in the writing of a thesis.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

ADMISSIONS AND FREQUENTLY ASKED QUESTIONS

The agroecology program accepts students from a wide range of undergraduate majors, not limited to the social and natural sciences. Because the admissions process is highly competitive, applicants should have a record of strong grades, agroecology-relevant interests and experience, and a commitment to learning in a multidisciplinary program.
The deadline for fall semester applications is December 15. Inquiries at other times may be considered.

The initial application process is outlined below. Prospective students should keep in mind, however, that this document-based application is only the first step in the admissions process. Students who are deemed admissible on the merits of these documents must then identify an academic advisor and a plan for funding to be fully admitted. The agroecology program will assist students in this endeavor. More information on the process of seeking out funding and an advisor is available in the program’s Student Handbook (https://agroecology.wisc.edu/documents/agroecology-handbook). Students who are interested in applying should contact the program administrator.

**SUBMIT THE FOLLOWING TO THE UW–MADISON GRADUATE SCHOOL:**

- Online application and application fee.
- International applicants whose native language is not English are required to take the TOEFL or IELTS. All test scores must be submitted electronically by the Educational Testing Service to UW–Madison (ETS code 1846). Copies or faxes cannot be accepted.
- Three letters of recommendation. When completing the online application, submit the names and email addresses of three people who will provide letters of recommendation. They will receive instructions on how to upload their letters.

**SUBMIT THE FOLLOWING TO THE AGROECOLOGY PROGRAM ADMINISTRATOR:**

- Electronically, a one-page Statement of Purpose. In the statement, students should describe their interests and goals and which UW–Madison faculty members they would like to work with. In addition, students should identify which program track they plan to pursue—Research or Public Practice—and state why they are interested in this option. Knowing students’ intentions will help the program better understand their academic and career goals. Finally, students should indicate if they intend to pursue a Ph.D. degree after completing the master’s in agroecology. Although funding isn’t guaranteed, some fellows require that students intend to continue at the Ph.D. level.
- Electronically, a curriculum vitae.
- Two official copies of transcripts for all undergraduate work (and graduate, if relevant). Many schools are able to send electronic versions of official transcripts directly to the program administrator. Electronic versions are preferred. Please do not send transcripts to the Graduate School.

Frequently asked questions regarding the graduate program are available on the agroecology website (https://agroecology.wisc.edu/apply).

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
Assessments: The research track requires a formal thesis and public defense; the public practice track requires a comprehensive report and public presentation.

Language Requirements: No language requirements.

**Cross Training Electives**: Students will select courses to fulfill their cross-training electives in the categories below. Per Graduate School requirements, at least 5 of the 12 cross training electives must be from UW-Madison at the 700 level or above OR from UW-Madison courses in the 300–699 range that have the “graduate attribute.” By time of graduation, the student will have taken courses in:

- **Ecology**: The following are examples of courses in this category:
  - BOTANY/ F&W ECOL/ ZOOLOGY 460 General Ecology
  - ENVIR ST 506 Modeling and Analysis of Environmental Systems
  - AGRONOMY/ BOTANY/ SOIL SCI 370 Grassland Ecology

- **Social Science**: The following are examples of courses in this category:
  - C&E SOC or A A E courses on food systems, agricultural technology, the agricultural environment, or agricultural policy

- **Data Analysis**: The following are examples of courses in this category:
  - Graduate-level GIS, statistics, or qualitative methods course

- **Agricultural Science**: The following are examples of courses in this category:
  - AGRONOMY 300 Cropping Systems
  - SOIL SCI 301 General Soil Science

  - AGRONOMY/ BOTANY/ SOIL SCI 370 Grassland Ecology

- **Social Science**: The following are examples of courses in this category:
  - C&E SOC or A A E courses on food systems, agricultural technology, the agricultural environment, or agricultural policy

- **Community Process**: The following are examples of courses in this category:
  - PUB AFFR/ POLI SCI/ URB R PL 874 Policy-Making Process
  - URB R PL/A A E/ REAL EST 520 Community Economic Analysis
  - URB R PL 814 Environmental and Alternative Dispute Resolution in Planning

- **Agricultural Science**: The following are examples of courses in this category:
  - AGRONOMY 300 Cropping Systems

---

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

2 Dr. Chris Kucharik offers AGROECOL/AGRONOMY/ENVIR ST 724 Agroecosystems and Global Change every other fall on odd-numbered years. Professor Kucharik's AGRONOMY/ATM OCN/ SOIL SCI 532 Environmental Biophysics, offered in even-numbered falls, may serve as a substitute for AGROECOL/AGRONOMY/ ENVIR ST 724 Agroecosystems and Global Change in the Agroecology core course requirements. Additional substitutes are possible at the discretion of the Agroecology Governance Committee but students must request permission through the program manager.

3 The Seminar in Agroecology is offered both fall and spring semester for 1 credit. Students are encouraged to enroll every semester, but must take at least 3 credits total.
SOIL SCI 301 General Soil Science

Project
AGROECOL 990 Research 6

Total Credits 34

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

2 Dr. Chris Kucharik offers AGROECOL/AGRONOMY/ENVIR ST 724 Agroecosystems and Global Change every other fall on odd-numbered years. Professor Kucharik’s AGRONOMY/ATM OCN/ SOIL SCI 532 Environmental Biophysics, offered in even-numbered falls, may serve as a substitute for AGRONOMY/AGROECOL/ ENVIR ST 724 Agroecosystems and Global Change in the Agroecology core course requirements. Additional substitutes are possible at the discretion of the Agroecology Governance Committee but students must request permission through the program manager.

3 The Seminar in Agroecology is offered both fall and spring semester for 1 credit. Students are encouraged to enroll every semester, but must take at least 3 credits total.

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://agroecology.wisc.edu/documents/agroecology-handbook) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, up to 7 credits from UW–Madison numbered 300 or above are allowed to count toward the degree. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION
The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
All students are required to submit a learning plan, signed by their advisor, by the end of their second semester. Note: there are separate learning plans for public practice and research tracks.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
All students must have full funding. Please contact the program administrator.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Analyze tradeoffs of different agricultural systems embedded within the greater complexity of socio-ecological systems.
2. Consider and synthesize concepts of systems, ecology, and public process.
3. Learn to engage in careful consideration of the social, economic, and environmental outcomes of different industrial and biological processes.
4. Understand the potential of inclusive participatory processes in research and analysis of agroecological systems.
5. Recognize and apply principles of ethical and professional conduct in their coursework, research, and communications in the field of agroecology.
**BIOMETRY, M.S.**

Biometry is the development and application of statistical methods to biological problems. At the University of Wisconsin, biometry refers to this application to problems from plant, animal and agricultural biology. (Biostatistics denotes this application to human biology.) The biometry program is an M.S. degree program in the field of biometry.

The program is interdisciplinary, providing formal course work in statistics and biology, consulting experience, and supervised research combining the two areas. Students completing the program will understand biological processes and have the ability to apply and extend a broad range of statistical concepts and techniques to biological problems. This integration of statistics and biology is the distinguishing feature of the program. The biometry program is distinct from the M.S. statistics program in its interdisciplinary emphasis and corresponding reduced depth in statistics. (Students interested in training with statistical consulting as the primary focus should apply for the M.S. in statistics through the statistics department.)

The biometry program is intended for two groups of students:

1. students simultaneously working toward or intending to work toward a Ph.D. in a biological discipline and
2. non-Ph.D. students.

Students who complete the M.S. in Biometry and the Ph.D. in a biological science should be at the forefront of quantitative biological research. Students who stop with the M.S. in Biometry, possibly obtaining another M.S. in a biological science concurrently, will be well suited for positions with industry or government focused on quantitative biological research.

### ADEMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements/#admissions) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Deadline</td>
<td>March 15</td>
</tr>
<tr>
<td>Spring Deadline</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer Deadline</td>
<td>The program does not admit in the summer.</td>
</tr>
</tbody>
</table>

Greedy applicants may apply for admission to the biometry program without application to any other program. Prospective students may also apply simultaneously with application to another program or after admission into another program. It is anticipated that most students enrolled in the biometry program will be enrolled concurrently in another program.

Acceptance of a prospective student by a statistical and biological co-advisor, who should be identified at the time of application, is necessary for admission into the Program and input from prospective co-advisors will be sought in the admissions process. It is expected that most students will be supported through a biological department or program or with their own funds. Opportunity for financial support through the program is extremely limited.

Applicants to the M.S. program should have completed the following prerequisites:

1. undergraduate calculus (MATH 221 Calculus and Analytic Geometry 1, MATH 222 Calculus and Analytic Geometry 2, and MATH 234 Calculus–Functions of Several Variables or equivalent);
2. a course in statistics (HORT/ECON/STAT 571 Statistical Methods for Bioscience I and STAT/F&W/ECOL/HORT 572 Statistical Methods for Bioscience II or equivalent one year sequence);
3. background courses in biology (e.g., BOTANY/BIOLOGY 130 General Botany, ZOOLOGY/BIOLOGY 101 Animal Biology & ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory, BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology & BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology).

The background courses in biology are a bare minimum; it is anticipated that almost all successful applicants will have a strong background in some area of biological science. Under extenuating circumstances, students may appeal to the Biometry Executive Committee for exemptions to prerequisites or requirements.

### FUNDING

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

MAJOR REQUIREMENTS

MODE OF INSTRUCTION

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

Requirements Detail

Minimum Credit Requirement 30 credits

Minimum Residence Credit Requirement 16 credits

Minimum Graduate Coursework Requirement At least half of degree coursework (15 credits out of 30 total credits) must be completed in statistics courses numbered 600 or above (which the statistics department considers to be graduate courses).

Overall Graduate GPA Requirement 3.00 GPA required.

Other Grade Requirements A grade of B or better must be received in any course used to fulfill the required and elective course requirements.

Assessments and Examinations

Candidates must complete a project with an emphasis on the integration of statistics and science. A final oral examination is also required upon completion of the coursework and project.

Language Requirements

No language requirements.

REQUIRED COURSES

Or equivalent one-year sequence

Statistics 600+

Students choose graduate-level courses numbered above 600. 1

Statistics 500+

Students choose graduate-level courses numbered above 500. 2

Biological 3

Consulting Experience

STAT 699 Directed Study 4

Research 5

Total Credits 30

1 Excluding STAT/B M I 641 Statistical Methods for Clinical Trials, STAT 698 Directed Study, STAT 699 Directed Study, and STAT 990 Research.

2 Excluding STAT/F&W ECOL/HORT 571 Statistical Methods for Bioscience I, STAT/F&W ECOL/HORT 572 Statistical Methods for Bioscience II, STAT 698 Directed Study, and STAT 990 Research. Credits from suitable quantitative courses taught in other (non-biological) departments (e.g., mathematics) may be substituted.

3 Excluding introductory statistics courses and research. Other criteria are that at least six credits are taken in a single discipline or in closely related disciplines, at least six credits are taken at the 700 level and above or in courses specifically designated as graduate courses, and a maximum of three credits are obtained in statistically oriented courses (e.g., AGRONOMY/HORT 811 Biometrical Procedures in Plant Breeding).

4 Students must complete 3 credits of STAT 699 Directed Study by consulting in the CALS Statistical Consulting Service. (These credits cannot be used for meeting requirements in section C.) This consists of supervised consulting and will provide exposure to statistical issues surrounding a broad range of problems in biology, provide awareness of practical issues such as experiment management, data collection, data recording, etc., and provide experience assisting others in designing experiments and analyzing data. One credit is roughly equivalent to a single project that can be
completed in one semester, and involves about 20–30 hours of effort, including meetings with consulting clients, background research, data analyses, etc.

Each student must complete a project that represents an original contribution to biometry. Examples of such contributions may include a novel analysis of some interesting biological data, the creation and evaluation of a useful experimental design, or the development and/or comparison of statistical methods. The project results are to be presented in a manuscript with emphasis on the integration of statistics and science. The manuscript should be of a quality that can lead to a publication. This requirement will be formalized by enrolling in at least three credits of "Research" (e.g., HORT 990 Research) in the department of one of the co-advisors. (These credits cannot be used for meeting other requirements.) For a student seeking a double M.S., a joint thesis would satisfy this requirement.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (http://www.stat.wisc.edu/sites/default/files/2016-17%20Complete%20PDF%20Handbook.pdf) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions towards the graduate degree credit and graduate coursework (50%) requirements. Coursework earned five or more years prior to admission to the master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
No credits earned while a UW–Madison University Special student are allowed to count toward the degree.

PROBATION

Candidates who fail to meet satisfactory progress criteria in two consecutive reviews will be dropped from the program.

ADVISOR / COMMITTEE

Students are required to meet with their advisor near the beginning of each semester to discuss course selection and progress.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

If the student is enrolled in a concurrent Ph.D. degree, the student should make application for both the master’s and Ph.D. degrees during the semester in which they defend. In other words, the biometry degree should be completed by the semester in which the concurrent Ph.D. degree is completed. It is expected that all enrolled students will complete the program within three years.

OTHER

The biometry program is distinct from the M.S. statistics program in its interdisciplinary emphasis and corresponding reduced depth in statistics. (Students interested in training with statistical consulting as the primary focus should apply for the M.S. in statistics through the statistics department.) The program is intended for two groups of students: (1) students simultaneously working towards or intending to work towards a Ph.D. in some biological discipline, and (2) non-Ph.D. students.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Demonstrates understanding and critical evaluation of statistical methods selected for applications in scientific inquiries.
2. Identifies data sources and study design, and assembles appropriate statistical approaches to data analysis, in a particular scientific field of study.
3. Evaluates and synthesizes data information pertaining to questions in the field of study.
4. Communicates data concepts and analysis results clearly.
5. Recognizes and applies principles of ethical and professional conduct.

PEOPLE

Faculty: Professors Clayton (Statistics/Plant Pathology), Ané (Statistics/Botany), Yandell (Statistics/Horticulture), Zhu (Statistics/Entomology)

DEVELOPMENT, DOCTORAL MINOR

Any student enrolled in a UW–Madison doctoral program can pursue a doctoral minor in development. The doctoral minor offers systematic training in the field of development studies, and is designed to be tailored to students’ interests in interdisciplinary approaches to international development. A doctoral minor is an excellent way to gain training in the analysis of issues, approaches, and practices in international development, and to apply to students’ research and teaching interests. Courses for the development minor are drawn from over 15 units across
REQUIREMENTS

Graduate students who wish to pursue an Option A external minor in development should consult the chair of the program. Courses are chosen in conjunction with the chair, who serves as the minor advisor, and the student’s departmental advisor. A student may earn a doctoral minor in development with 9 credits, if all 9 credits are in development courses numbered 700 and above. Alternatively, a student may earn the minor with 12 credits if these are courses numbered 300 and above and identified as designed for graduate work. Students are expected to achieve a B or better in all courses used for the minor. Directed study courses do not count toward the minor. Students may not use colloquia or "brown bag" format courses toward requirements of the doctoral minor.

STAFF

Linda Davis, Program Coordinator, linda.davis@wisc.edu

Contact information for faculty affiliated with the Development Studies Program can be found on our website (http://devstudies.wisc.edu/people_faculty.html).

DEVELOPMENT, PH.D.

Admissions to the Development, Ph.D. have been suspended as of spring 2019. If you have any questions, please contact the department (academicaffairs@cals.wisc.edu).

The mission of the Ph.D. program in development studies is to prepare Ph.D. graduates for careers in social science research, policy, and education related to international development issues. The target audience includes people who wish to prepare for careers in international development as well as midcareer international development professionals who will return to their original employer or employment sector after earning a Ph.D. Applicants are expected to have experience working in developing countries. The program emphasizes interdisciplinary social science research and analysis designed to address the problems of developing and emerging economies.

Students from the United States and 40 countries have enrolled since the program was established in 1970. Over 125 alumni work in a wide range of capacities with various government agencies, nongovernment agencies, and universities in the United States and other countries. Most alumni from other countries have returned there to take up senior-level posts in government and other national institutions and in academia.

ADMISSION REQUIREMENTS

Students seeking admission to the program must already hold a master’s degree in a social science, preferably with a thesis requiring original research. Previous experience living and/or working in a developing country in some capacity (Peace Corps, non-government organizations, individual initiatives, etc.) is an important aspect of a successful applicant’s background. A student’s application is judged on the basis of previous academic records, letters of recommendation, a personal statement, and a research proposal. This proposal will form the cornerstone of the student’s program. It will provide the admissions committee with a clear explanation of the direction the student intends to take with the research. In their statement of purpose, students should clearly outline their reasons for choosing the Ph.D. in development.

The online application must contain the following:

- Personal statement
- The research proposal
- Official transcripts for all post-secondary institutions attended
- Three letters of recommendation
- A curriculum vitae

Test Scores. General Graduate Record Exam (GRE) scores for all applicants and TOEFL or IELTS scores for international applicants are required. Details on the requirements can be found on the program website (http://devstudies.wisc.edu/admission.html).
FACULTY ADVISOR

Applicants will not be admitted unless a member of the program faculty agrees to serve as advisor. If the Admissions Committee judges your application favorably, you will receive a provisional admission. You should identify one or more potential advisors from the list of faculty (http://devstudies.wisc.edu/people_faculty.html) and include that information in your Reason for Graduate Study. The Admissions Committee will contact potential advisors in order to obtain a match. Most students remain with their initial advisor; others find a more compatible match during the first semester.

DEADLINE

The Development Studies Program will only consider applications for fall semester admission. The deadline is January 15.

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Development Studies Program is unable to provide financial support to students, however many students are able to find funding through other means. Prospective students are encouraged to seek support through university departments, private scholarships, or government-sponsored funding. We will enter you in university-wide fellowship competitions for which you are eligible. Admitted students from developing countries may be eligible for one semester of MEO fellowship support. Most fellowship funds are awarded to students entering in the fall semester. We recommend that you:

1. Write to international organizations and investigate fellowships and grants available from private foundations.
2. Consider the possibility of obtaining support from your own university, your employer, or your government.
3. Contact university departments about the possibility of obtaining an assistantship.

Assessments and Examinations: Students must complete a written preliminary examination after the student’s program coursework has been completed. For more information, see the program’s website (http://devstudies.wisc.edu/about_prelim.html).

Language Requirements: Language requirements ranging from minimal competency to fluency in a non-native language will vary for each student depending on area of interest. Students are required to have or acquire language competency to complete their dissertation fieldwork.

Doctoral Minor/Breadth Requirements: Development doctoral students are not required to complete a doctoral minor.

**REQUIRED COURSES**

Students work with their advisors to design an individualized program of study. All students must complete the Program of Study form by the end of their second semester.

The minimum number of total required credits for the Ph.D. program is 51. Up to 12 credits may be transferred from the student’s master’s degree provided the committee determines that these credits meet program requirements. Ordinarily courses taken elsewhere may not be used to meet the development studies course requirement. Each program of study will differ, yet coursework should fit the following guidelines:

- **Interdisciplinary seminar**: minimum of 3 credits
- **Major discipline**: minimum of 24 credits that include:
  - a. 3 credits minimum of theory
  - b. 9 credits minimum of methods (must be from the department(s) of the major discipline or from course offerings in the Department of Statistics)
  - c. 12 credits minimum of other relevant courses in the major discipline (6 must be from development studies courses)
- **Secondary discipline**: minimum of 9 credits (must be from development studies courses)
- **Tertiary areas**: minimum of 9 credits
- **Dissertation research**: minimum of 6 credits

Both the major discipline and the secondary discipline are expected to be in the social sciences. In most instances, students will select from among sociology, economics, geography, anthropology, communication, political science, education, or urban and regional planning as their primary and secondary disciplines. Secondary disciplines may also include areas such as law, history, and public affairs.

At least one development studies course in the discipline of economics and one development studies course in the discipline of sociology must be completed by all students. Courses in the departments of Economics, Agricultural and Applied Economics, and Consumer Science, and economics courses in the School of Business fulfill the economics discipline, while courses in the departments of Sociology and Community and Environmental Sociology fulfill the sociology discipline. Development studies courses are social science graduate-level courses in which the majority of course content pertains specifically to international development. The Development Studies Instructional Committee will revise this list annually and make appropriate additions and deletions. All development studies courses must have been taken on an A–F basis at UW–Madison and be passed with a grade of B or higher.

“Topics” courses may be taken as development studies core courses by permission of the student’s committee and the Instructional Committee. Some examples of such topics courses are included below. Also, note that this list is highly provisional. In particular, there are likely to be some 400-, 500-, and 600-level courses with largely undergraduate clientele that would not be appropriate for development studies graduate students. There are also no doubt a number of courses unknown to us that should be added to the list. At this time we do not see a need to identify development studies core courses for the tertiary areas, or to require that one or more development studies courses be taken in the tertiary areas.

Courses in the tertiary areas may be in a social science discipline, a coherent set of area studies courses, or a coherent set of courses outside of the social sciences. Natural-sciences sections areas/disciplines (e.g., plant science, ecology, tropical agriculture) or interdisciplinary social science areas/disciplines (technology assessment, urban studies) are permitted and encouraged. Tertiary areas/disciplines that do not correspond to current Graduate School programs of study are permitted if they are coherent and well justified.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 12 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

**UW–Madison University Special**

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PROBATION**

If students fall below the satisfactory progress requirements, including the 3.2 GPA, the program will launch an assessment exercise analyzing the student’s fit in the program.
ADVISOR / COMMITTEE

All students must have an advisor. Admission into the development studies program is contingent on the Admissions Committee obtaining an advisor for the student. After the second semester the student will build a three-member faculty committee. At the time of defense, a five-member interdisciplinary committee must be established. At least 3 members of the dissertation committee must be readers.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

If you need financial support, indicate this on the application form. Prospective students are encouraged to seek support through university departments, private scholarships, or government-sponsored funding. We will enter you in university-wide fellowship competitions for which you are eligible. We will advise you about funding opportunities, when possible.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Articulates research questions reflecting an interdisciplinary perspective on development research, theory and practice.
2. Formulates ideas and/or techniques beyond the current boundaries of knowledge within development studies.
3. Creates scholarship that makes a substantive contribution to development studies.
4. Demonstrates interdisciplinary breadth within their learning experiences.
5. Communicates complex ideas in a clear and understandable manner, both orally and in written form.
6. Fosters ethical and professional conduct in their research, teaching, and policy work.

PEOPLE

FACULTY

Samer Alatout, Associate Professor, Community and Environmental Sociology

PLANT BREEDING AND PLANT GENETICS, DOCTORAL MINOR

REQUIREMENTS

Ph.D. candidates in other degree programs who wish to pursue a doctoral minor in plant breeding and plant genetics must complete 10 credits of work with at least 2 credits from the plant breeding area and 2 credits from another area of the core curriculum. Also required are 2 credits of seminar (HORT/AGRONOMY/GENETICS 957 Seminar-Plant Breeding ). Contact the program for more information concerning the minor.

PEOPLE

FACULTY

Agronomy
Jean-Michel Ane
The program leading to the Master of Science in Plant Breeding and Plant Genetics provides a broad exposure in the various disciplines involved with plant improvement. The program is truly interdisciplinary with faculty participants from agronomy, biochemistry, botany, entomology, genetics, horticulture, plant pathology, and statistics. Research areas include biochemical and molecular genetics, bioinformatics, biometry, cytogenetics and cytology, genecology, genetics, plant breeding, and quantitative genetics.

The Plant Breeding and Plant Genetics Program has been designated a UW System Center of Excellence. The 50–60 students majoring in the program come from throughout the United States and all over the world. Faculty have included members of the National Academy of Sciences, endowed chair professors, and recipients of the National Council of Plant Breeders "Genetic and Plant Breeding Award." The University of Wisconsin leads the nation in the diversity of plant breeding programs and number of graduate students trained. Graduates are found in responsible positions with academic institutions, research institutions, and private companies involved in molecular to cultivar development work.

### ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</table>

Satisfactory preparation for graduate study in plant breeding and plant genetics includes undergraduate coursework in mathematics through differential and integral calculus, general chemistry and organic chemistry, physics, and a comprehensive biology sequence that covers both plant and animal biology and includes labs. Some of this preparatory coursework may be completed during the first year of graduate study. Normally, applicants will have had undergraduate training in the biological or agricultural sciences. All applicants must fulfill the minimum entrance requirements of the Graduate School.

### Application Checklist

A complete application should include the following items:

1. **Graduate School Application**: We only accept applications submitted online through the Graduate School.
2. **Supplementary Application**: The supplementary application will appear as a part of the Graduate School's electronic application once the applicant selects plant breeding and plant genetics.
3. **Application Fee**: Instructions for paying the application fee are available through the Graduate School's online application form.
4. Statement of Purpose: Your essay should be a concise description of your reasons for choosing to study plant breeding and plant genetics at the University of Wisconsin. Please include your research interests and career goals as well as a description of your preparation for graduate study including relevant coursework, related employment, research experience, publications, presentations, awards, and honors. The essay may be submitted electronically through the Graduate School's online application.

5. Transcripts: We require all applicants to submit an unofficial transcript in PDF format to their online application. If an applicant is recommended for admission, then they will be required to submit their official transcript to the Graduate School. International academic records must be submitted in the original language and accompanied by an official English translation. Documents must be issued by the institution with an official seal/stamp and an official signature.

6. Three Letters of Recommendation
7. GRE Scores: Graduates of U.S. institutions must submit scores from the Graduate Record Exam (GRE). The GRE General Test is required and measures verbal reasoning, quantitative reasoning, critical thinking, and analytical writing skills. GRE Subject Tests are not required, but applicants are encouraged to take either the Biochemistry, Cell and Molecular Biology test or the Biology test. Students should contact the Educational Testing Service for the exact time and location of the examination and general information on this procedure. Results of the examination must be sent to the Graduate School. Our institution code is 1846. There is no department code. At the option of the major professor, graduates of foreign institutions may be required to submit GRE scores in order to qualify for graduate research assistantships. Any student interested in competing for fellowships or scholarships from UW-Madison or the PBPG program must submit GRE scores.

8. Proof of English Proficiency - Applicants, whose native language is not English, or whose undergraduate instruction was not in English, must follow the Graduate School's guidelines for proof of English proficiency.

**Application Process**

Applications for graduate study in plant breeding and plant genetics must be submitted using the Graduate School's online application. If you are applying to multiple programs at the University of Wisconsin, make sure you send application materials to each program.

At this time, the graduate program in plant breeding and plant genetics does not support lab rotations. Applicants are admitted directly into a specific research program with one major professor. Admissions decisions are contingent upon the acceptance of an applicant by a faculty mentor. Because we receive many more applications from qualified applicants than we are able to admit, we highly recommend that applicants directly contact any faculty members with whom they are interested in working.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Financial support may be available through research assistantships (RAs) or fellowships. Fellowships are granted to students with very outstanding academic records. We recommend that your application be complete by the application deadlines in order to be considered for funding. Research assistantships are awarded by individual professors through funds available to their research programs.

Please be advised that you do not need to make a separate application for financial support as your admission application will also serve as an application for assistantships and fellowships.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Minimum Residence Credit Requirement: 16 credits

Minimum Graduate Coursework Requirement: Half of degree coursework (15 credits out of 30 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (https://registrar.wisc.edu/course-guide/).

Overall Graduate GPA Requirement: 3.00 GPA required.
Other Grade Requirements: Students must earn a B or above in all core curriculum requirements coursework.
Assessments and Examinations: A formal M.S. thesis is required.
Language Requirements: No language requirements.

REQUIRED COURSES

The specific program of study toward a master’s degree is developed by the student and their major professor. Considerable flexibility in the selection of courses is permitted to meet the needs and interests of the candidate. Of the 30 credits required, students must complete a minimum of 12 credits of coursework (not research credit) and at least 9 credits must come from the Core Curriculum, including at least 2 credits in Section A, and 2 credits in Section B or C. Students must also complete 2 credits of Plant Breeding seminar (HORT/AGRONOMY/GENETICS 957 Seminar-Plant Breeding).

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (http://plantbreeding.wisc.edu/current-students/program-requirements) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

**ADVISOR / COMMITTEE**

Every graduate student must have a faculty advisor (Major Professor) who is a member of the PBPG faculty. The Major Professor advises the student about course work and supervises the student’s research. The major professor must approve the student’s coursework and research direction.

A Master’s Committee is composed of at least three current UW–Madison faculty members, including the major professor. The Master’s Committee is empowered by the Program to advise the student regarding coursework and thesis content, and conduct the final master’s oral examination. Prior to the end of the first year of graduate study the student, in consultation with their major professor, should select two members of the UW–Madison faculty to serve on their Master’s Committee. It is the student’s responsibility to seek and obtain (verbal) approval from the faculty selected to serve on this committee.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Financial support may be available through research assistantships (RAs) or fellowships. Fellowships are granted to students with very outstanding academic records. We recommend that your application be complete by the application deadlines in order to be considered for funding. Research assistantships are awarded by individual professors through funds available to their research programs.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PROGRAM RESOURCES**

Close working relationships between plant breeding and plant genetics (PBPG) students and faculty with companies, commodity groups, and NGOs allow for exposure to various work environments and potential employers. Opportunities exist for students to complete short-term internships with companies depending on research interests and progress towards the graduate degrees. The Plant Science Graduate Student Council (PSGSC) (http://psgsc.wisc.edu) fosters communication and social interactions among the graduate students in the plant sciences.

**LEARNING OUTCOMES**

1. Articulates the theories, research methods, and approaches to inquiry in the field of plant breeding and plant genetics.
2. Identifies sources and assembles evidence pertaining to questions in the field of plant breeding and plant genetics.
3. Demonstrates understanding of the primary field of study in a global context.
4. Selects and utilizes the most appropriate methodologies and practices.
5. Synthesizes information pertaining to questions in the field of plant breeding and plant genetics.
6. Communicates clearly in ways appropriate to the field of plant breeding and plant genetics.
7. Recognizes and applies principles of ethical and professional conduct.

### Major-Specific Policies

#### Graduate Program Handbook

The Graduate Program Handbook (http://plantbreeding.wisc.edu/current-students/program-requirements) is the repository for all of the program’s policies and requirements.

### Prior Coursework

#### Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

#### UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

#### UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

### Probation

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

### Advisor / Committee

Every graduate student must have a faculty advisor (Major Professor) who is a member of the PBPG faculty. The Major Professor advises the student about course work and supervises the student’s research. The major professor must approve the student’s coursework and research direction.

A PhD Committee is composed of at least 5 members, the major professor and four more who must be UW–Madison graduate faculty or former UW–Madison graduate faculty up to one year after resignation or retirement. The Graduate School requires that at least three committee members are designated as readers. Readers are committee members who commit themselves to closely reading and reviewing the entire dissertation. The committee is empowered by the Program to advise and evaluate the student with regards to certification, administer the preliminary examination, oversee progress meetings, approve thesis composition, and conduct the final PhD examination.

The student, in consultation with their Major Professor(s), should select four additional members of the UW-Madison faculty to serve on their PhD Committee prior to the end of the second semester of graduate study in order to convene a meeting to discuss the student’s coursework and plan for certification. Certification is the process by which the PhD Committee certifies that the student has completed the formal coursework requirements of the PhD. This coursework plan must be approved by the student’s PhD Committee, and for this reason it is important for the student to convene a meeting of their PhD committee prior to the end of
their second semester so that additional courses suggested by the committee may be taken during the student’s second year of graduate study. The Graduate School requires at least one member of the PhD Committee to be from outside the academic department of the major professor. Students choosing Minor Option A typically include their minor professor as a member of their PhD Committee. It is the student’s responsibility to seek and obtain (verbal) approval from the faculty members selected to serve on this committee.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may require to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Financial support may be available through research assistantships (RAs) or fellowships. Fellowships are granted to students with very outstanding academic records. We recommend that your application be complete by the application deadlines in order to be considered for funding. Research assistantships are awarded by individual professors through funds available to their research programs.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PROGRAM RESOURCES**

Close working relationships between plant breeding and plant genetics (PBPG) students and faculty with companies, commodity groups, and NGOs allow for exposure to various work environments and potential employers. Opportunities exist for students to complete short-term internships with companies depending on research interests and progress towards the graduate degrees. The Plant Science Graduate Student Council (PSGSC) (http://psgsc.wisc.edu) fosters communication and social interactions among the graduate students in the plant sciences.

**LEARNING OUTCOMES**

1. Articulates research problems, potentials, and limits with respect to knowledge within the field of plant breeding and plant genetics.

2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of plant breeding and plant genetics.

3. Creates research that makes a substantive contribution.

4. Demonstrates breadth within their learning experiences.

5. Advances contributions of the field of plant breeding and plant genetics to society.

6. Communicates complex ideas in a clear and understandable manner.

7. Fosters ethical and professional conduct.

AGRONOMY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Agronomy, Doctoral Minor (p. 70)
- Agronomy, M.S. (p. 70)
- Agronomy, Ph.D. (p. 74)

PEOPLE

Faculty: Professors Albrecht, Ane, Conley, Duke, Henson, Jackson, Jahn, S. Kaeppler, Kucharik (chair), Lauer, Stoltenberg, Tracy, Undersander; Associate Professors de Leon, H. Kaeppler, Renz; Assistant Professors Gutierrez, Picasso, Werle

AGRONOMY, DOCTORAL MINOR

Students enrolled in other Ph.D. programs may pursue a doctoral minor in agronomy. Students with interest in gaining training in crop production and management, weed science, agroecosystems, molecular biology, plant physiology and biochemistry or plant breeding to supplement their primary disciplinary program may consider an Option A minor in agronomy.

REQUIREMENTS

Graduate students who wish to pursue a doctoral minor in agronomy must have an agronomy faculty member serve as the minor professor on their research committees (oral preliminary exam committee and final exam committee).

Courses are chosen in conjunction with the minor professor and the committee to provide relevant breadth in the student’s training. A student may earn a doctoral minor in agronomy with 9 credits in exclusively graduate-level agronomy courses (courses numbered 700 and above, or between 300 and 699 marked with the graduate attribute in the Course Guide).

Alternatively, up to 3 graduate-level credits of plant, ecology, or environment-related coursework from other departments could be included in the 9-credit total.

At least 1 credit (and up to 2 credits) must be AGRONOMY 920 Seminar. The proposed course plan to satisfy Option A minor must be approved by the Department of Agronomy Graduate Studies Committee.

PROGRAM FACULTY AND THEIR AREAS OF STUDY

Ken Albrecht, Professor — Forages and Grazing Systems
Jean-Michel Ané, Professor — Plant–Microbe Symbioses
Shawn Conley, Professor — Soybean & Small Grain Production
Natalia De Leon, Professor — Plant Breeding and Plant Genetics
Stan Duke, Professor — Barley Malt Quality
Lucia Gutiérrez, Assistant Professor — Cereal Crops Breeding
Cynthia Henson — Supervisory Research Plant Physiologist
Randy Jackson, Professor — Grassland Ecosystems, Agroecology
Molly Jahn, Professor — Risk in Food Systems
Heidi Kaeppler, Associate Professor — Cereal Crops Genetics
Shawn Kaeppler, Professor — Plant Breeding and Plant Genetics
Chris Kucharik, Professor and Chair — Ecosystems, Land Management, Biogeochemical Cycling
Joe Lauer, Professor — Crop Management (Corn)
Mali Mahalingam — Research Geneticist
Valentin Picasso, Assistant Professor — Forages and Grazing Systems, Agroecology, Sustainable Agriculture
Mark Renz, Associate Professor — Weed Science
David Stoltenberg, Professor — Cropping Systems, Weed Science, Agroecology, Sustainable Agriculture
Bill Tracy, Professor — Plant Breeding and Plant Genetics (Sweet Corn)
Rodrigo Werle, Assistant Professor — Extension Cropping Systems - Weed Science

For full descriptions of faculty research interests, see their individual pages on the Agronomy website (http://www.agronomy.wisc.edu).

AGRONOMY, M.S.

The mission of the Department of Agronomy is to generate, integrate and apply knowledge about crop plants that are grown for food, feed, and the general benefit of humankind. We find and disseminate answers to problems and discover opportunities concerning efficiency and sustainability of production, improvements in quality, and methods for safe and environmentally sound practices.

An education in agronomy prepares graduates for professional careers in research, teaching, and extension at academic and government institutions, and for research and technical careers in industry in areas such as biotechnology, agroecology, cropping systems ecology and ecosystem modeling, crop management and protection, plant breeding, biochemistry, genetics, and genomics.

The UW–Madison Department of Agronomy is one of the most highly ranked and regarded departments in the nation. We are committed to integrated research, development, teaching, and outreach to address
issues of food scarcity, food quality and nutrition, environmental impact, and sustainability.

The department maintains or has access to excellent facilities for research, including fully equipped laboratories, growth chambers and greenhouses, and complete field facilities at nearby agricultural research stations and throughout the state. Students have access to highly controlled plant growth facilities at the university's Biotron and to special analytical services provided by the campus Biotechnology Center. The Wisconsin Crop Innovation Center opened in 2017 and houses a cutting edge transgenic plant laboratory and 26,000 square feet of highly controlled greenhouse space and other lab facilities.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Candidates for graduate study should have a bachelor’s degree in agriculture or in the biological, chemical, or physical sciences. Contact the department or visit the website (http://agronomy.wisc.edu/graduate-admissions/for-prospective-graduate-students) for details. Students considering graduate study in agronomy should make inquiries to the department several months before the desired enrollment date. In addition to the online application, the department requires a statement of purpose, GRE scores, transcripts, and three letters of recommendation.

Candidates for department research and teaching assistantships can be accepted twice a year, at summer/fall and spring admissions; however, candidates for university fellowships must apply by January 2 for fall enrollment.

Department deadlines are October 1 for spring admission and February 1 for summer/fall admission.

Agronomy admissions FAQs (https://agronomy.wisc.edu/graduate-admissions/for-prospective-graduate-students).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The vast majority of our graduate students are awarded research assistantships to fund their education. These RA appointments come with tuition remission, healthcare, and a monthly stipend for living expenses. These assistantships come directly from the mentoring faculty; as a result, space in our graduate program is extremely limited. We do not support lab rotations.

Teaching assistantship
Academic: $18,350

Research assistantship
Academic: $18,350
Annual: $22,427

PA grader/reader
Hourly rate: $21.57

Effective July 1, 2018, for annual and August 20, 2018 for academic-year appointments.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least
50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

**CURRICULAR REQUIREMENTS**

<table>
<thead>
<tr>
<th>Requirement Type</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Credit Requirement</td>
<td>30 credits</td>
</tr>
</tbody>
</table>

| Minimum Residence Credit Requirement | 16 credits |

| Minimum Graduate Coursework Requirement | The minimum graduate coursework (50%) requirement states that at least 50% of credits applied toward the program’s graduate degree credit requirement must be courses designed for graduate work (this includes but is not limited to online, thesis/research, independent study, and practicum/internship credits). For the agronomy department that is 15 credits. The official university documentation of “graduate level” coursework is identified with the graduate course attribute (G50%) in the university’s Course Guide and Class Search (https://public.my.wisc.edu/web/expanded). |

| Overall Graduate GPA Requirement | 3.00 GPA required. |

| Other Grade Requirements | The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester. |

| Assessments and Examinations | Students intending to terminate their graduate program at the UW with the M.S. degree are required to present an exit seminar, preferably prior to their M.S. oral exam. |

| Language Requirements | The agronomy department does not have any language requirements. |

| REQUIRED COURSES |
|------------------|----------------|
| Code             | Title                      | Credits |
| M.S. Requirements |                            |
| 1 year of general chemistry with labs | | |
| 1 semester of organic chemistry with labs | | |
| 4 semesters of biology distributed among three of the following four areas: | | |
| biochemistry | | |
| genetics | | |

plant morphology, anatomy, or physiology

taxonomy, evolution, or ecology.

Choose one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AGRONOMY 920</td>
<td>Seminar</td>
</tr>
<tr>
<td>AGRONOMY/GENETICS/</td>
<td>Seminar-Plant Breeding</td>
</tr>
<tr>
<td>HORT 957</td>
<td></td>
</tr>
</tbody>
</table>

Requests for deviations from these requirements can be made to the Graduate Studies Committee with permission and advice from your advisor.

Your undergraduate courses may be used towards this requirement, if the courses were rigorous and met the expectations of graduate work. Coursework earned five or more years prior to admission for your master’s cannot be counted. These undergraduate classes can only count towards this requirement; they cannot count towards the Minimum Graduate Credit Residence Requirement (16 credits). See Prior Coursework.

Teaching experience is not required but it is highly recommended.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (http://agronomy.wisc.edu/graduate-handbook) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

For well-prepared advanced students, the program may accept up to 9 credits of prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

**UW–Madison Undergraduate**

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

**UW–Madison University Special**

The program may decide to accept up to 9 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on
occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION
If students were admitted on probation and they satisfy the conditions outlined at the time of admission, probationary status will be removed automatically. Once their studies have begun, students are expected to make satisfactory progress toward their degree.

Students must be in good academic standing with the Graduate School, their program, and their advisor. The Graduate School regularly reviews the record of any student who received grades of BC, C, D, F, or I in courses numbered 300 or above, or grades of U in research and thesis. This review could result in academic probation with a hold on future enrollment, and the student may be suspended from graduate studies.

The Graduate School may also put students on probation for incompletes not cleared within one term. All incomplete grades must be resolved before a degree is granted.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the student is expected to meet with their advisor on a regular basis. The advisor is a faculty member, or sometimes two members, from agronomy responsible for providing advice regarding graduate studies.

Students are usually admitted to the agronomy department directly into the mentorship of a specific advisor, without completing any rotations.

You will choose your thesis committee together with your advisor. The committee consists of your advisor and at least two other faculty members. One faculty member may be from another department.

CREDITS PER TERM ALLOWED
The Graduate School considers full-time enrollment to be 8-15 graded credits taken at 300 or above, excluding pass/fail and audit, during the fall and spring semesters, and 4-12 credits during the summer term. If students elect not to enroll as full-time students as defined by the Graduate School, they are responsible for knowing about possible obligations that may require full-time status. Such obligations may include visa eligibility, fellowships, assistantships, financial aid, external funding agencies, and program satisfactory progress requirements.

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES
The agronomy department does not require but encourages all students to complete an Individual Development Plan (IDP). As you begin your Graduate School career, an Individual Development Plan (IDP) is an essential tool to help you:

1. Assess your current skills and strengths
2. Make a plan for developing skills that will help you meet your academic and professional goals
3. Communicate with your advisors and mentors about your evolving goals and related skills.

For graduate students in the natural sciences and engineering, the American Association for the Advancement of Science (AAAS) online tool provides a comprehensive set of materials and exercises that will guide you through the process of self-assessment, career exploration, goal-setting, and implementation of your plan. Set up a free account to create and monitor your IDP at myidp.sciencecareers.org (http://myidp.sciencecareers.org).

The UW–Madison IDP template (https://grad.wisc.edu/pd/idp), which includes instructions and examples, is flexible and appropriate for all disciplines.

LEARNING OUTCOMES
1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
2. Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
3. Demonstrates understanding of the primary field of study in a historical, social, or global context.
4. Selects and/or utilizes the most appropriate methodologies and practices.
5. Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
6. Communicates clearly in ways appropriate to the field of study.
7. Recognizes and applies principles of ethical and professional conduct.

Graduate School: Student Funding ([https://grad.wisc.edu/studentfunding/prospective](https://grad.wisc.edu/studentfunding/prospective))

The following are the Graduate School’s minimum stipend levels, for 50 percent appointments, beginning July 1, 2017 for annual appointments and August 21, 2017 for academic appointments:

- **Teaching assistantship**
  - Academic: $18,350
  - Annual: $22,427

- **Project assistantship**
  - Academic: $18,350
  - Annual: $22,427

- **Research assistantship**
  - Academic: $18,350
  - Annual: $22,427

- **PA grader/reader**
  - Hourly rate: $21.57

Effective July 1, 2018, for annual and August 20, 2018 for academic-year appointments.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MODE OF INSTRUCTION**

<table>
<thead>
<tr>
<th>Mode of Instruction Definitions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Evening/Weekend</strong>: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.</td>
</tr>
<tr>
<td><strong>Online</strong>: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.</td>
</tr>
<tr>
<td><strong>Hybrid</strong>: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.</td>
</tr>
<tr>
<td><strong>Accelerated</strong>: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.</td>
</tr>

<tr>
<td>Minimum Graduate Coursework Requirement</td>
<td>The minimum graduate coursework (50%) requirement states that at least 50% of credits applied toward the program's graduate degree credit requirement must be courses designed for graduate work (this includes but is not limited to online, thesis/research, independent study, and practicum/internship credits). For the agronomy department that is 26 credits.</td>
</tr>
</tbody>
</table>

The official University documentation of “graduate level” coursework is identified with the graduate course attribute (G50%) in the University’s Course Guide and Class Search ([https://public.my.wisc.edu/web/expanded](https://public.my.wisc.edu/web/expanded)).
Overall Graduate GPA Requirement

3.00 GPA required.

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and dissertation).

As a Ph.D. student you must take your final oral exam within five years of passing the prelim or you will be required to take another preliminary examination and be admitted to candidacy for a second time. All Ph.D. candidates are required to present an exit seminar. This often is most convenient just prior to the final examination, or you may present the seminar as part of the Agronomy Colloquium. The final examination ordinarily covers your dissertation and the general fields of your major and minor studies.

Deposit of the doctoral dissertation in the Graduate School is required.

Language Requirements

The agronomy department does not have any language requirements.

Doctoral Minor/Breadth Requirements

Students completing a Ph.D. in agronomy must also complete requirements for a minor in another department. The course work for completion of the minor requirement is decided at the time of certification, with approval of the minor advisor. The minor department sets the requirements for minor completion. In both options, one course cross-listed with the major may be used for the minor, so long as it is staffed by the minor department and is not applicable to any requirements of the major.

The type and completion of the minor is reported to the Graduate School on the preliminary examination warrant.

AGRONOMY/GENETICS/HORT 957

These classes can be taken in your undergraduate or master’s career. At the department’s discretion, you may be admitted with deficiencies. These deficiencies are expected to be completed within the first semester of study. The Agronomy Department requires two full-time semesters in residence for a Ph.D. Your certification committee can petition the Graduate Studies Committee for a deviation from the residence requirement under unique circumstances.

Teaching experience is not required, but is highly recommended by the department and the time for completion of this recommended experience should be included on the certification form.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (http://agronomy.wisc.edu/graduate-handbook) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions

For well-prepared advanced students, the program may accept up to 12 credits of prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

UW–Madison University Special

The program may decide to accept up to 12 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.
PROBATION

If students were admitted on probation and they satisfy the conditions outlined at the time of admission, probationary status will be removed automatically. Once their studies have begun, students are expected to make satisfactory progress toward their degree.

Students must be in good academic standing with the Graduate School, their program, and their advisor. The Graduate School regularly reviews the record of any student who received grades of BC, C, D, F, or I in courses numbered 300 or above, or grades of U in research and thesis. This review could result in academic probation with a hold on future enrollment, and the student may be suspended from graduate studies.

The Graduate School may also put students on probation for incompletes not cleared within one term. All incomplete grades must be resolved before a degree is granted.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the student is expected to meet with their advisor on a regular basis. The advisor is a faculty member, or sometimes two members, from Agronomy responsible for providing advice regarding graduate studies.

Students are usually admitted to the agronomy department directly into the mentorship of a specific advisor, without completing any rotations.

You are required to form, under the guidance of your advisor, a committee to oversee your Ph.D. degree progress. The four or five committee members are faculty of the agronomy department and related departments. The department requires that at least one of the four committee members comes from another department. While not strictly required, continuity in membership of the student’s Certification Committee, Preliminary Examination Committee, and Final Examination Committee is strongly encouraged. At least three committee members of all doctoral/final oral examination committees must be designated as readers.

CREDITS PER TERM ALLOWED

The Graduate School considers full-time enrollment to be 8–15 graded credits taken at 300 or above, excluding pass/fail and audit, during the fall and spring semesters, and 4–12 credits during the summer term. If students elect not to enroll as full-time students as defined by the Graduate School, they are responsible for knowing about possible obligations that may require full-time status. Such obligations may include visa eligibility, fellowships, assistantships, financial aid, external funding agencies, and program satisfactory progress requirements.

Dissertators take exactly 3 credits per semester.

TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may require to take another preliminary examination and to be admitted to candidacy a second time.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

The agronomy department does not require but encourages all students to complete an Individual Development Plan (IDP). As you begin your Graduate School career, an Individual Development Plan (IDP) is an essential tool to help you:

(1) Assess your current skills and strengths
(2) Make a plan for developing skills that will help you meet your academic and professional goals
(3) Communicate with your advisors and mentors about your evolving goals and related skills.

For graduate students in the natural sciences and engineering, the American Association for the Advancement of Science (AAAS) online tool provides a comprehensive set of materials and exercises that will guide you through the process of self-assessment, career exploration, goal-setting, and implementation of your plan. Set up a free account to create and monitor your IDP at myidp.sciencecareers.org (http://myidp.sciencecareers.org).

The UW–Madison IDP template (https://grad.wisc.edu/pd/idp), which includes instructions and examples, is flexible and appropriate for all disciplines.

LEARNING OUTCOMES

1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
3. Creates research, scholarship, or performance that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions of the field of study to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.
ANIMAL SCIENCES

DEGREES/MAJORS, DOCTORAL MINORS,
GRADUATE/PROFESSIONAL CERTIFICATES

- Animal Sciences, Doctoral Minor (p. 78)
- Animal Sciences, M.S. (p. 78)
- Animal Sciences, Ph.D. (p. 83)

PEOPLE

Faculty: Professors Crenshaw (chair), Albrecht, Claus, Khatib, Kirkpatrick, Parrish, Reed, Richards, Rosa, Schaefer; Associate Professor Sindelar; Assistant Professor Shanmuganayagam

ANIMAL SCIENCES, DOCTORAL MINOR

Any student enrolled in a UW–Madison doctoral program can pursue a doctoral minor in animal sciences. The doctoral minor offers substantial and systematic training in the field of animal sciences and can be tailored to a student's specific interests. A doctoral minor in animal sciences is an excellent way to gain training in research methods as well as in substantive topical areas related to animal sciences that can be applied to one’s research field and to one’s teaching.

REQUIREMENTS

Graduate students who wish to pursue an Option A external minor in animal sciences should consult the graduate coordinator or chair of the Graduate Committee of the department. Courses should be chosen in consultation with the student’s departmental advisor and submitted for approval to animal sciences before they are taken. A student may earn a doctoral minor in animal sciences with 9 credits, if all 9 credits are in graduate-level courses pre-approved by animal sciences. Students are expected to achieve a B or better in all courses used for the minor. Directed study courses do not count toward the minor nor do audits or pass/fail courses. The original approved copy of the course list must be submitted to the Graduate School office at the time of the request for the preliminary exam warrant.

PEOPLE

Faculty: Professors Crenshaw (chair), Albrecht, Claus, Khatib, Kirkpatrick, Parrish, Reed, Richards, Rosa, Schaefer; Associate Professor Sindelar; Assistant Professor Shanmuganayagam

ANIMAL SCIENCES, M.S.

The department emphasizes in vivo and in vitro studies that probe relationships at a fundamental mechanistic level as well as addressing current practical issues in animal agriculture. Studies may often employ the use of livestock or laboratory animals, or both, as subjects.
Development of an individual course of study is flexible in order to meet the needs of students with varied interests. Graduates find employment in academic teaching and research, in professional veterinary or medical degree programs, in industrial research in the food and feed industries, in laboratory research programs with governmental and international agencies, private corporations, and in industrial or institutional management positions requiring a high level of scientific training.

The department is based in the Animal Sciences Building, which contains facilities for teaching and research, including a Computing and Biometry Laboratory and the Biological and Biomaterials Preparation Imaging and Characterization Facility. Nearby are the Livestock Laboratory, a state-of-the-art facility, and the Muscle Biology Laboratory. Teaching, research, and project assistantships are available to qualified students. Fellowships, scholarships, and traineeship awards are available from federal training programs, research grants, gifts and trusts, and special program funds.

RESEARCH FOCUS AREAS

Students may choose to focus on the areas of: nutrition, rumen microbiology, aquaculture, reproductive physiology–endocrinology, genetics, animal breeding, muscle biology, meat science, cell biology, animal health, immunity, and toxicology, or international agriculture. Considerable opportunity for study exists in joint programs with bacteriology, toxicology, biochemistry, the interdepartmental graduate program in nutritional sciences, genetics, endocrinology, reproductive physiology training program, food science, physiology, agricultural and applied economics, biometry, cellular and molecular biology, pharmaceutical sciences, chemical and biological engineering, bioengineering, comparative biosciences and anatomy.

The area of nutrition involves a joint degree with the Department of Animal Sciences and either the Department of Nutritional Sciences or the Department of Biochemistry. Usually, students work with professors from both departments so fundamental concepts complement practical applications. Ruminant nutrition candidates often minor or have a joint major in the Department of Bacteriology. Nutritional research ranges from field studies to laboratory biochemical studies.

The endocrinology–reproductive physiology area ranges from hormonal studies with livestock, primates, and laboratory animals to biochemical studies at the cellular level including stem cell biology. These studies include mechanism of gene action, physiological genetics, in vitro maturation, fertilization, embryo development, cloning and gene transfer, neuroendocrinology, and the environmental and genetic control of puberty and postpartum anestrus.

The genetics–animal breeding focus includes a variety of areas from immunogenetics and molecular genetics to quantitative and population genetics. The animal breeding program seeks to develop, evaluate, and apply classical, quantitative, biochemical, and physiological genetics toward improving animal breeding techniques. Studies range from theoretical considerations of quantitative genetics to laboratory experimentation on genetic controls of growth and reproduction, gene transfer and cloning to field experimentation on producer herds and flocks. Candidates may minor in several areas including genetics, statistics, physiology, or biochemistry.

Meat science and muscle biology studies probe the relationship of muscle structure, composition, and metabolism to growth, the contractile function, and meat quality. Similar studies related to adipose tissue are included. This fundamental research is applied to muscle efficiency and improved retail meat quality and composition.

The area of cellular biology, animal health, immunity, and toxicology includes basic research which seeks to develop an understanding of cellular/subcellular structure and function, cell regulation, and cell–cell interactions. Cell function, as it relates to mechanisms of immunity and the effects of natural and synthetic compounds, forms the basis for investigations using in vitro and in vivo, whole animal, model systems. Results of fundamental studies are directly applicable and coordinated with ongoing applied research programs in animal and human health.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</tr>
</tbody>
</table>

| Other Test(s) (e.g., GMAT, MCAT) | n/a |
| Letters of Recommendation Required | 3 |

Students with satisfactory undergraduate training in any biological science including emphasis on basic science courses will have suitable backgrounds for graduate studies in animal science. Typically students admitted to the program have GPAs of 3.2 or higher; candidates with a lower GPA may be considered for admission under special circumstances. Admission decisions are based on academic record, GRE scores, three letters of recommendation, and Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS), if applicable.

Students are admitted to the department if a faculty member agrees to accept the candidate into his or her research group and to provide laboratory/desk space and research support, and upon the approval of the Animal Sciences Graduate Admissions Committee and the Graduate School. The faculty member also makes the decision of whether or not to offer a research assistantship to the candidate. International candidates in the master of science program rarely receive financial support.
FUNDING

GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES
Financial assistance may be available to qualified individuals in the form of research assistantships, teaching assistantships, or fellowships. Funding does not come from the department, but from the faculty member agreeing to advise the new student; therefore students join labs directly instead of doing rotations. Funding is awarded on a competitive basis and may be renewed annually pending satisfactory progress. Terms of these appointments are initially defined in the letter of offer to the student.

CURRICULAR REQUIREMENTS

| Requirements Detail |
|---|---|---|---|
| Minimum Credit Requirement | 30 credits |
| Minimum Residence Credit Requirement | 16 credits |
| Minimum Graduate Coursework Requirement | Half of degree coursework (15 credits out of 30 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (https://registrar.wisc.edu/course-guide/). Courses must be agreed upon by student's graduate committee members and approved by department certification committee. |
| Overall Graduate GPA Requirement | 3.00 GPA required. |
| Other Grade Requirements | The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester. |

REQUIRED COURSES

Students are admitted to this degree program by their major professor. Following matriculation, the student and major professor plan a graduate curriculum and research program. Within one year of matriculation, the student submits her/his planned curriculum to the departmental graduate program coordinator to obtain departmental approval. The student and major professor discuss membership for the thesis committee. The committee consists of a minimum of three faculty members, with two of these members from the animal sciences department. The thesis committee meets as needed but mainly serves to evaluate the M.S. thesis and relevant knowledge of the student in a final thesis defense exam. The final thesis exam involves an oral defense of the research topic and general knowledge of animal nutrition, endocrinology & reproductive physiology, genetics and animal breeding, or meat science and muscle biology. Consistent with Graduate School policies, the M.S. degree requires a minimum of 30 graduate-level credits, including seminar and research (990) credits.

Seminar Requirement
The Animal Sciences Graduate seminar features outside speakers, UW Faculty, and animal sciences graduate students presenting their research or defending their thesis. This course is held on Tuesday mornings during the fall semester from 11 a.m. to noon. Attendance is required at this seminar series by all animal sciences graduate students. Master's degree students are required to register for the AN SCI 875 Special Topics Animal Science Seminar for credit once. Although attendance
is required, registering for the seminar for credit is done the semester a student presents.

All degree candidates must complete a satisfactory thesis. Instructions on preparing a master’s thesis can be found on the UW Graduate School website, https://grad.wisc.edu/current-students/masters-guide/.

At the completion of the degree program, the candidate will take a final examination administered by the mentoring committee. The examination will be oral, and includes questions relating to the candidate’s graduate course program. The candidate will also be expected to defend the thesis.

2 Only one course from this group can be counted toward the credit load required in this section.
3 Required of Ph.D. candidates.
4 Required if an equivalent statistics course was not taken previously.

Policies

Graduate School Policies

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

Major-Specific Policies

Graduate Program Handbook

The Graduate Program Handbook (http://www.ansci.wisc.edu/docs/graduate/Animal%20Sciences%20Grad%20Handbook.docx) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions

For well-prepared advanced students, the program may accept prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

UW–Madison University Special

The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

Probation

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could
result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a yearly basis.

Your committee members advise and evaluate satisfactory progress, administer your final oral examination, evaluate your thesis, and sign your degree warrant. Your advisor chairs the committee. The final warrant request which includes committee membership must be submitted to the Graduate School at least three weeks before the examination date. A committee often accomplishes advising for the students in the early stages of their studies.

Master’s thesis committees must have at least 3 members, 2 of whom must be animal sciences graduate faculty or former graduate faculty up to one year after resignation or retirement and the third member from outside the department.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

RAs, the most common appointment in this department, are hired for 12-months with compensation set on a university-wide basis. The department has a few TAs who assist in instruction, preparing materials, directing labs, grading lab exercises and exams, etc. Special fellowships and scholarships are available for outstanding students. Application instructions may be obtained from the Graduate School website. A graduate student may be employed to assist professors not directly associated with their thesis.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources ([https://grad.wisc.edu/pd](https://grad.wisc.edu/pd)) to build skills, thrive academically, and launch your career.

**PROGRAM RESOURCES**

The Animal Sciences Graduate programs encourage students to develop Individual Development Plans ([https://grad.wisc.edu/pd/idp](https://grad.wisc.edu/pd/idp)) in collaboration with their major advisor to facilitate professional development. Besides the extensive opportunities offered across the campus at large, students in the animal sciences program also benefit from activities and programs provided by the Animal Science Graduate Student Association, a student-led organization for graduate students at UW–Madison who are interested in animal and dairy science.

**LEARNING OUTCOMES**

1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
2. Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
3. Demonstrates understanding of the primary field of study in a historical, social, and global context.
4. Selects and/or utilizes the most appropriate methodologies and practices.
5. Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
6. Communicates clearly in ways appropriate to the field of study.
7. Recognizes and applies principles of ethical and professional conduct.

**PEOPLE**

**Faculty:** Professors Crenshaw (chair), Albrecht, Claus, Khatib, Kirkpatrick, Parrish, Reed, Richards, Rosa, Schaefer; Associate Professor Sindelar; Assistant Professor Shanmuganayagam

**ANIMAL SCIENCES, PH.D.**

The department emphasizes in vivo and in vitro studies that probe relationships at a fundamental mechanistic level as well as addressing current practical issues in animal agriculture. Studies may often employ the use of livestock or laboratory animals, or both, as subjects. Development of an individual course of study is flexible in order to meet the needs of students with varied interests. Graduates find employment in academic teaching and research, in professional veterinary or medical degree programs, in industrial research in the food and feed industries, in laboratory research programs with governmental and international agencies, private corporations, and in industrial or institutional management positions requiring a high level of scientific training.

The department is based in the Animal Sciences Building, which contains facilities for teaching and research, including a Computing and Biometry Laboratory and the Biological and Biomaterials Preparation Imaging and Characterization Facility. Nearby are the Livestock Laboratory, a state-of-the-art facility, and the Muscle Biology Laboratory. Teaching, research, and project assistantships are available to qualified students. Fellowships, scholarships, and traineeship awards are available from federal training programs, research grants, gifts and trusts, and special program funds.

**RESEARCH FOCUS AREAS**

Students may choose to focus on the areas of: nutrition, rumen microbiology, aquaculture, reproductive physiology–endocrinology, genetics, animal breeding, muscle biology, meat science, cell biology, animal health, immunity and toxicology, or international agriculture. Considerable opportunity for study exists in joint programs with bacteriology, toxicology, biochemistry, the interdepartmental graduate program in nutritional sciences, genetics, endocrinology, reproductive
physiology training program, food science, physiology, agricultural and applied economics, biometry, cellular and molecular biology, pharmaceutical sciences, chemical and biological engineering, bioengineering, comparative biosciences and anatomy.

The area of nutrition involves a joint degree with the Department of Animal Sciences and either the Department of Nutritional Sciences or the Department of Biochemistry. Usually, students work with professors from both departments so fundamental concepts complement practical applications. Ruminant nutrition candidates often minor or have a joint major in the Department of Bacteriology. Nutritional research ranges from field studies to laboratory biochemical studies.

The endocrinology–reproductive physiology area ranges from hormonal studies with livestock, primates, and laboratory animals to biochemical studies at the cellular level including stem cell biology. These studies include mechanism of gene action, physiological genetics, in vitro maturation, fertilization, embryo development, cloning and gene transfer, neuroendocrinology, and the environmental and genetic control of puberty and postpartum anestrus.

The genetics–animal breeding focus includes a variety of areas from immunogenetics and molecular genetics to quantitative and population genetics. The animal breeding program seeks to develop, evaluate, and apply classical, quantitative, biochemical, and physiological genetics toward improving animal breeding techniques. Studies range from theoretical considerations of quantitative genetics to laboratory experimentation on genetic controls of growth and reproduction, gene transfer and cloning to field experimentation on producer herds and flocks. Candidates may minor in several areas including genetics, statistics, physiology, or biochemistry.

Meat science and muscle biology studies probe the relationship of muscle structure, composition, and metabolism to growth, the contractile function, and meat quality. Similar studies related to adipose tissue are included. This fundamental research is applied to muscle efficiency and improved retail meat quality and composition.

The area of cellular biology, animal health, immunity, and toxicology includes basic research which seeks to develop an understanding of cellular/subcellular structure and function, cell regulation, and cell–cell interactions. Cell function, as it relates to mechanisms of immunity and the effects of natural and synthetic compounds, forms the basis for investigations using in vitro and in vivo, whole animal, model systems. Results of fundamental studies are directly applicable and coordinated with ongoing applied research programs in animal and human health.

### ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</tr>
<tr>
<td>Spring Deadline</td>
<td>December 1</td>
</tr>
</tbody>
</table>

### FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

### PROGRAM RESOURCES

Financial assistance may be available to qualified individuals in the form of research assistantships, teaching assistantships, or fellowships. Funding does not come from the department, but from the faculty member agreeing to advise the new student; therefore students join labs directly instead of doing rotations. Funding is awarded on a competitive basis and may be renewed annually pending satisfactory progress. Terms of these appointments are initially defined in the letter of offer to the student.
MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>3.00 GPA required.</td>
</tr>
</tbody>
</table>

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

The original research conducted by the candidate must be summarized in a thesis. A final examination will be given after the completion of the thesis. The thesis must be submitted to the examining committee two weeks before the examination. The candidate is required to present an exit seminar on their dissertation research and to subsequently defend the thesis orally. The thesis must be acceptable from both scientific and literary standpoints. The mentoring committee administers the thesis defense. Deposit of the doctoral dissertation in the Graduate School is required.

Language Requirements

Language requirements are determined on an individual basis with the major professor and will depend on the area of concentration within the department.

Doctoral Minor/Breadth Requirements

The animal sciences department requires Ph.D. students to complete a minor.

REQUERED COURSES

All Animal Sciences Ph.D. students must meet with their research committee during their first year to complete their Certification Form (http://www.ansci.wisc.edu/cgstudentt.html). Once the committee has approved the certification paperwork the student must turn in the signed copy to the Graduate Coordinator so that it may be reviewed and approved by the graduate chair. The certification paperwork must be approved before a student can request their prelim warrant. Students should meet with their committee once per year. Any changes to the certification paperwork must be communicated to the graduate coordinator and approved by the graduate chair.

Students graduating with a Ph.D. in animal sciences are expected to have core education in the following areas:

- Physiology/endocrinology/reproduction
- Biochemistry/nutrition
- Genetics/breeding
- Biochemistry/meat science/food safety/microbiology
- STAT/F&W ECOL/HORT 571 Statistical Methods for Bioscience I, STAT/F&W ECOL/HORT 572 Statistical Methods for Bioscience II, or equivalent
- A course in ethics
- Teaching practicum, with Delta or MIU Workshop training.

Courses taken prior to entering the animal sciences program will be considered as a substitute.

Seminar Requirement

The Animal Sciences Graduate seminar features outside speakers, UW faculty, and animal sciences graduate students presenting their research or defending their thesis. This course is held on Tuesday mornings during the fall semester from 11 a.m. to noon. Attendance is required at this seminar series by all animal sciences graduate students. Ph.D. students are required to register for the AN SCI 875 Special Topics (Animal Science

University of Wisconsin-Madison 2019-2020 9/17/2019 85
Seminar) for credit twice. Although attendance is required, registering for the seminar for credit is done the semester a student presents.

**Teaching Requirement**

All students in the animal sciences Ph.D. program are required to complete a Teaching Practicum, usually AN SCI 799 Practicum in Animal Sciences Teaching. Each student is expected to work with the faculty advisor to identify an opportunity within the department for the student to engage in teaching. This requirement is broadly defined, and could include assisting an animal sciences faculty member with classroom teaching or TA'ing in a course outside of the animal sciences department.

**Enrollment Requirement**

The department requires all funded students to be enrolled full time. For M.S. students this means at least 8 credits in the fall and spring term and at least 2 credits in the summer term. Students funded by another department should check with the payroll and benefits coordinator of that department to learn their requirements for enrollment. Unfunded students should follow the Graduate School's rules on enrollment (https://grad.wisc.edu/documents/enrollment-requirements).

The remainder of the course requirements for the Ph.D. in Animal Sciences will be selected to meet the student's specific needs and to ensure breadth and depth as determined through consultation with his/her major professor and members of their committee.

3 Required of Ph.D. candidates.

4 Required if an equivalent statistics course was not taken previously.

GASTS POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (http://www.ansci.wisc.edu/docs/graduate/Animal%20Sciences%20Grad%20Handbook.docx) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions

For well-prepared advanced students, the program may accept prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

UW–Madison University Special

The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis).
UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their committee on a yearly basis.

Your committee members advise and evaluate satisfactory progress, administer your final oral examination, evaluate your thesis, and sign your degree warrant. Your advisor chairs the committee. Ph.D. thesis committees must have at least five members representing more than one graduate program. Your committee must include three faculty members from the animal sciences department, and no more than four, and at least one faculty member outside the department at arm’s length to the project.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER
RAs, the most common appointment in this department, are hired for 12 months with compensation set on a university-wide basis. The department has a few TAs who assist in instruction, preparing materials, directing labs, grading lab exercises and exams, etc. Special fellowships and scholarships are available for outstanding students. Application instructions may be obtained from the Graduate School website. A graduate student may be employed to assist professors not directly associated with their thesis.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES
The Animal Sciences Graduate programs encourage students to develop Individual Development Plans (https://grad.wisc.edu/pd/idp) in collaboration with their major advisor to facilitate professional development. Besides the extensive opportunities offered across the campus at large, students in the animal sciences program also benefit from activities and programs provided by the Animal Science Graduate Student Association, a student-led organization for graduate students at UW–Madison who are interested in animal and dairy science.

LEARNING OUTCOMES
1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
3. Creates research, scholarship, or performance that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions of the field of study to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.

PEOPLE

ANTHROPOLOGY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES
• Anthropology, Doctoral Minor (p. 89)
• Anthropology, M.A. (p. 89)
• Anthropology, M.S. (p. 91)
• Anthropology, Ph.D. (p. 94)

PEOPLE
Faculty: See Anthropology (http://anthropology.wisc.edu/people/#faculty).
Anthropology, Doctoral Minor

Requirements

Graduate students in other fields who desire to elect anthropology as a minor subject should contact the chair of the department. As a rule, prior preparation must equal 12 credits in social sciences, of which two should be in anthropology (http://guide.wisc.edu/courses/anthro) unless the area of concentration is to be a non-cultural field. Four courses must be taken, with the program of courses arranged to provide either

1. a general coverage of the field, or
2. concentration in biological anthropology, cultural anthropology, or archaeology.

Successful completion of the course program will satisfy the minor requirement.

People

Faculty: See Anthropology (http://anthropology.wisc.edu/people/#faculty).

Anthropology, M.A.

The primary focus of the anthropology graduate program is the doctoral degree. A master’s degree is awarded in the process of pursuing the Ph.D., but students are not admitted for the sole purpose of obtaining a master’s degree.

At the master’s level, it is expected that candidates will begin to gain professional competence in a specialized field and will have the opportunity to explore a wide spectrum of interests within that field.

Programs for the master’s degree in anthropology are intended to build professional competence in the field of concentration. Thorough undergraduate preparation is assumed. Basic training in archaeology, biological anthropology, and sociocultural anthropology, taken as an undergraduate major in anthropology, is recommended. Specific requirements vary for each concentration. Students are encouraged to consult Graduate Studies in Anthropology (https://www.anthropology.wisc.edu/graduate-study/anthropology-masters-phd) for details on requirements for each concentration.

Concentrations within the major are available in archaeology, social and cultural anthropology, biological anthropology, or an intersectional degree track (see description below).

All programs assume that candidates have had general undergraduate training in the discipline equivalent to that required of an undergraduate major at UW-Madison. See Anthropology (https://www.anthropology.wisc.edu).

Intersectional Degree Track

Occasionally students have special interests that can be pursued only through a combined program involving two or more of the sub disciplines within the program. Examples might include paleoanthropology, ethno archaeology, or biocultural anthropology. The department thus offers an intersectional degree track as an option for these special cases.

Interested students should write a carefully prepared statement of intent at the time of application to graduate school. This area of study may take longer to complete, and it is strongly suggested that students who are interested in an intersectional program begin in one of the three major sections prior to making this commitment. Admission to the intersectional program requires prior approval by faculty in each section, and students should contact appropriate faculty before writing their statement.

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D (https://www.anthropology.wisc.edu/graduate-study/admissions).

Admissions

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D (https://wisc-curr.courselove.com/graduate/anthropology/anthropology-phd/#admissionstext).

Funding

Graduate School Resources

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Requirements

Minimum Graduate School Requirements

REQUIRED COURSES

Students choose from one of four concentrations/tracks (also referred to as “sections”) in the department. Students in the Cultural concentration will earn a master of arts. Students in the Archaeology, Biological, or Intersectional concentrations will work their advisor and a department committee to determine if the coursework they take meets the requirements for a master of arts or a master of science.

Archaeology Concentration Track

Student must complete a total of 30 credits of graduate course work, including three seminars (ANTHRO 942 Seminar-Archaeological Problems) in archaeology. Substitutions for the required seminars in archaeology are not normally allowed. (Incoming M.A. students must take at least two seminars as a part of the Ph.D. requirements, and these courses may be taken before or after the qualifying examination.)

Biological Concentration Track

Student must complete a total of 30 credits of graduate course work. The following courses are strongly recommended in preparation for the general section of the qualifying examination:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

<td>3</td>
</tr>
</tbody>
</table>

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Cultural Concentration Track

Minimum 30 credits of graduate course work, 15 credits in cultural anthropology, including ANTHRO 860 and ANTHRO 900, and one additional 900-level seminar (not to include ANTHRO 909 if continuing in Ph.D. program).

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Intersectional Concentration Track

There are no specific courses required; students choose courses in consultation with their advisor.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.
**UW–Madison Undergraduate**

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

**UW–Madison University Special**

With program approval students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

Progress criteria may be waived in special circumstances which must be stated in writing and approved by the appropriate section and signed by the department chair. Candidates not making satisfactory progress will be dropped from the program.

**ADVISOR / COMMITTEE**

Every graduate student will be assigned an advisor and a co-advisor. To ensure they are making satisfactory progress toward a degree, the Graduate School expects that students meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Ph.D. qualifying examinations must be taken no later than the fourth semester and must be passed no later than the sixth semester.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence.

**OTHER**

We have a limited amount of graduate student support through teaching assistantships and fellowships. These are awarded competitively, and are only awarded to those applicants who have all their materials in by the December 1 deadline.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in either biological, archaeological, or cultural anthropology.
2. Identifies relevant data and assembles evidence pertaining to questions or challenges in one of the three subfields of anthropology taught in this department.
3. Demonstrates understanding of the primary field of study in historical, social, or global/transnational contexts as revealed in the qualifying exam.
4. Selects and/or utilizes the most appropriate methodologies and practices in the sub-discipline.
5. Evaluates or synthesizes information pertaining to questions or challenges in one of the three subfields of anthropology taught in this department.
6. Communicates clearly in ways appropriate to the field of study.
7. Follows ethical principles of the discipline including respect and sensitivity to host cultures and communities, inclusiveness and diversity, civility and collegiality, and zero tolerance for sexual harassment.

**PEOPLE**

**Faculty:** See Anthropology (http://anthropology.wisc.edu/people/#faculty).

**ANTHROPOLOGY, M.S.**

The primary focus of the anthropology graduate program is the doctoral degree. A master’s degree is awarded in the process of pursuing the Ph.D., but students are not admitted for the sole purpose of obtaining a master’s degree.

At the master’s level, it is expected that candidates will begin to gain professional competence in a specialized field and will have the opportunity to explore a wide spectrum of interests within that field.

Programs for the master’s degree in anthropology are intended to build professional competence in the field of concentration. Thorough undergraduate preparation is assumed. Basic training in archaeology, biological anthropology, and sociocultural anthropology, taken as an undergraduate major in anthropology, is recommended. Specific requirements vary for each concentration. Students are encouraged to consult Graduate Studies in Anthropology (https://www.anthropology.wisc.edu/graduate-study/anthropology-masters-phd) for details on requirements for each concentration.
Concentrations within the major are available in archaeology, social and cultural anthropology, biological anthropology, or an intersectional degree track (see description below).

All programs assume that candidates have had general undergraduate training in the discipline equivalent to that required of an undergraduate major at UW–Madison. See Anthropology (https://www.anthropology.wisc.edu).

INTERSECTIONAL DEGREE TRACK

Occasionally students have special interests that can be pursued only through a combined program involving two or more of the sub disciplines within the program. Examples might include paleoanthropology, ethnography, archaeology, or biocultural anthropology. The department thus offers an intersectional degree track as an option for these special cases. Interested students should write a carefully prepared statement of intent at the time of application to graduate school. This area of study may take longer to complete, and it is strongly suggested that students who are interested in an intersectional program begin in one of the three major sections prior to making this commitment. Admission to the intersectional program requires prior approval by faculty in each section, and students should contact appropriate faculty before writing their statement.

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D (https://www.anthropology.wisc.edu/graduate-study/admissions).

ADMISSIONS

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D (p. 95).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

7. Follows ethical principles of the discipline including respect and sensitivity to host cultures and communities, inclusiveness and diversity, civility and collegiality, and zero tolerance for sexual harassment.

PERSONAL DEVELOPMENT

PEOPLE

Faculty: See Anthropology (http://anthropology.wisc.edu/people/#faculty).

ANTHROPOLOGY, PH.D.

The Ph.D. program assumes previous broad anthropological training in the undergraduate major and competence in a special field at the master’s level (see Graduate Studies in Anthropology (http://www.anthropology.wisc.edu/study_grad.php)). Ph.D. programs are flexible in content and are constructed individually within the field of specialization by the candidate, in consultation with the appropriate faculty.

Students working toward the Ph.D. degree in anthropology who prefer to pursue a program leading to a specialization in, for example, linguistic anthropology, may elect to take a joint degree. The requirements for such candidates will be determined by the certification committee, which includes members of the participating departments, and must be approved by the Graduate School.

Within the doctoral program, students are expected to seek additional training in areas relating to the field of concentration; in most cases, such related subjects may be taken as the required minor program. The archaeologist, for example, should elect course work in surveying, geology, cartography, zoology, history, and so on, depending on special interests. The biological anthropologist is expected to take work in comparative anatomy, human anatomy, genetics, and other biological sciences. The cultural or social anthropologist are encouraged to take further work in area studies, geography, history, history of science, linguistics, political science, psychology, sociology, and related fields.

The university and vicinity provide many opportunities and facilities for training and research including specialized area and language programs, accessible American Indian reservations, significant archaeological sites, and important archaeological collections. Anthropological fieldwork is conducted in various parts of the world, and there is normally an archaeological field school every second summer. The department has major laboratories for biological anthropology and archaeology, and collaborates with the Center for Climatic Research. The archaeology laboratories maintain comparative collections; microscopes; a thin-section lab; a lab of archaeological chemistry; computerized drafting equipment; and modern drafting, computing, and analytical equipment for research and teaching. Facilities for training and research in biological anthropology include well-equipped laboratories for forensic anthropology, human and other primate osteology anatomy, plant chemistry, stable isotope analysis, and bone histomorphometry, in addition to two large teaching laboratories.

Concentrations within the major are available in archaeology, social and cultural anthropology, biological anthropology, or an intersectional degree track (see description below).

All programs assume that candidates have had general undergraduate training in the discipline equivalent to that required of an undergraduate major at UW–Madison. See Anthropology (http://guide.wisc.edu/undergraduate/letters-science/anthropology/anthropology-ba/#requirementstext).

INTERSECTIONAL DEGREE TRACK

Occasionally students have special interests that can be pursued only through a combined program involving two or more of the subdisciplines within the program. Examples might include paleoanthropology, ethnoarchaeology, or biocultural anthropology. The department thus offers an intersectional degree track as an option for these special cases. Interested students should write a carefully prepared statement of intent at the time of application to graduate school. This area of study may take longer to complete, and it is strongly suggested that students who are interested in an intersectional program begin in one of the three major sections prior to making this commitment. Admission to the intersectional program requires prior approval by faculty in each section, and students should contact appropriate faculty before writing their statement.
The primary focus of the Department of Anthropology is on the doctoral degree. A master's degree is awarded in the process of pursuing the

The department encourages students to take part in many other disciplines. This blurring of the borders between disciplines has created a cross-fertilization that is unprecedented in the history of Western academics. The department recognizes that the methods, perspectives, and theoretical orientations originating in anthropology have now invigorated cultural anthropology plus an intersectional degree (see below for more information on these programs).

The Department of Anthropology offers prospective graduate students the opportunity to pursue study within one of three major subfields of contemporary anthropology: archaeology, biological anthropology, and cultural anthropology. The anthropology department offers three major fields of study in contemporary anthropology: archaeology, biological anthropology, and cultural anthropology, or within the intersectional degree program.

The primary focus of the Department of Anthropology is the doctoral degree. A master's degree is awarded in the process of pursuing the Ph.D.; students are not admitted for the sole purpose of obtaining a master's degree.

Contact Anthropology Graduate Advisor Associate Professor Nam Kim at 608-262-2187 or nckim2@wisc.edu (tpickering@wisc.edu) for information on your specific interests in anthropology. Connect with current anthropology graduate students through the UW student organization AnthroCircle (https://anthrocircle.wordpress.com) to learn about their experience in our program.

APPLICATION FOR GRADUATE STUDY IN ANTHROPOLOGY

The application deadline is December 1 for the following fall semester. All documents and test scores must be complete and submitted by December 1 for your application to be deemed complete for review and consideration. Please keep in mind that December 1 is the deadline for all anthropology admissions. Although the Graduate School will process your application, the department has a December 1 deadline, and may not process your application without supporting documentation. Please contact the graduate coordinator prior to sending your application if after December 1.

WE DO NOT ACCEPT APPLICATIONS FOR SPRING OR SUMMER ADMISSIONS

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

A limited number of teaching, research, and project assistantships are available annually, with occasional special research work for qualified individuals in both laboratory and field situations. Students who are planning to study a language taught at the UW–Madison are encouraged to contact the relevant Area Studies Program to explore the possibilities for a (FLAS) Foreign Language Area Studies Fellowship.
More information can be found here (https://www.anthropology.wisc.edu/graduate-study/funding).

</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>A GPA of 3.50. No less than 3.0 during the first year; must have a GPA of 3.50 thereafter.</td>
</tr>
</tbody>
</table>

Other Grade Requirements

Candidates may not have a GPA lower than 3.0 during the first year and must maintain a 3.5 GPA every year thereafter. Candidates may not carry more than 4 credits of Incomplete at any one time; credits of Incomplete over this limit are counted as grades of F for purposes of the GPA until removed.

Assessments and Examinations

Ph.D. qualifying examinations must be taken no later than the fourth semester and must be passed no later than the sixth semester. Students must take preliminary examinations no later than the third semester after passage of the qualifying examinations, and pass no later than the fifth semester after qualifying examinations.

Language Requirements

Language requirements are determined on an individual basis with the major professor and will depend on the area concentration within the department.

**REQUIRED COURSES**

Students choose from one of four concentrations/tracks (also referred to as "sections") in the department. Students earn an M.A. (p. 89) or M.S. (p. 92) on the way to the Ph.D. and should refer to the requirements on those pages for information about specific courses required.

All concentrations (archaeology, biological, cultural, intersectional) require one 300-level or above course in one of the other concentrations.

**Archaeology Concentration Track** 1

21 additional credits to the master’s degree, including two seminars in anthropology/archaeology.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Biological Concentration Track** 1

21 additional credits to the master’s degree, including coursework relevant to field of specialization.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Cultural Concentration Track** 1

21 additional credits to the master’s degree, including at least one graduate seminar above the 900 level in addition to ANTHRO 860 and ANTHRO 900 in the Department of Anthropology. In addition, students must also take ANTHRO 909, which may be taken as a directed study when it is not offered as a course by the department, and it affects a student’s progress. Substitutions for 900 level courses can only be made by petition to the Cultural Section.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.
Intersectional Concentration Track

There are no specific courses required; students choose courses in consultation with their advisor.

These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW-Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

Progress criteria may be waived in special circumstances which must be stated in writing and approved by the appropriate section and signed by the department chair. Candidates not making satisfactory progress will be dropped from the program.

ADVISOR / COMMITTEE

Every graduate student will be assigned an advisor and a co-advisor. To ensure they are making satisfactory progress toward a degree, the Graduate School expects that students meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Approval of a dissertation topic no later than the semester following passage of preliminary examinations is required.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence.

OTHER

We have a limited amount of graduate student support through teaching assistantships and fellowships. These are awarded competitively, and are only awarded to those applicants who have all their materials in by the December 1 deadline.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within in either biological, archaeological or cultural anthropology in seminar papers and preliminary exam.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge in one of the three subfields above in the preliminary exam and dissertation.
3. Carry out original anthropological research and produce publishable work in the field including the writing of a dissertation; have a command of one or more foreign languages suited to their research when appropriate; actively compete for major intra- and extramural
research grants; and teach effectively as assistants to professors in the department.

4. Communicate complex ideas in a clear and understandable manner.
5. Follows ethical principles of the discipline including respect and sensitivity to host cultures and communities, inclusiveness and diversity, civility and collegiality, and zero tolerance for sexual harassment.

PEOPLE

Faculty: See Anthropology (http://anthropology.wisc.edu/people/#faculty).

PEOPLE

Art Faculty: Professors Rosenberg (chair), Buisch, Clark, Connors, Damer, Escalante, Georgiades, Gralnick, Hitchcock, Loeser, Miller, Mladenoff, Scheer, Simpson, Solien; Associate Professors Abdu’allah, Hilyard, Jones, Stonehouse; Assistant Professors Arthur, Bakkom, Barry, Clancy, Fitzsimons, Grimm, Lee, Mitchell, Smith

Art Education Faculty: Professors Loeser (chair), Buisch, Clark, Damer, Escalante, Feren, Georgiades, Gralnick, Hitchcock, Marschalek, Myers, Nelson, Scheer, Solien; Associate Professors Connors, Cridler, Hilyard, Marche, Miller, Mladenoff, Rosenberg, Sacaridiz, Simpson; Assistant Professors Bakkom, Fitzsimons, Hixson, Jones, McClure, Mitchell, Simpson, Smith, Stonehouse

ART EDUCATION, M.A.

Admissions to the Art Education M.A. have been suspended as of spring 2017 and will be discontinued as of fall 2019. If you have any questions, please contact the department (artfrontdesk@education.wisc.edu).

ADMISSIONS

Admissions to the Art Education M.A. have been suspended as of spring 2017 and will be discontinued as of fall 2019. If you have any questions, please contact the department (artfrontdesk@education.wisc.edu).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

MAJOR REQUIREMENTS

MODE OF INSTRUCTION

<table>
<thead>
<tr>
<th>Mode of Instruction Definitions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.</td>
</tr>
<tr>
<td>Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.</td>
</tr>
<tr>
<td>Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.</td>
</tr>
<tr>
<td>Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.</td>
</tr>

Minimum Graduate Coursework Requirement
Half of degree coursework (15 credits out of 30 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (https://registrar.wisc.edu/course-guide/).

Overall Graduate GPA Requirement
3.00 GPA required.

Other Grade Requirements
The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program if it is unsuspended in the future.

PRIOR COURSEWORK

Graduate Work from Other Institutions
For well-prepared advanced students, the program may accept prior graduate coursework from other institutions towards the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate
For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison towards fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

UW–Madison University Special
The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
LEARNING OUTCOMES

1. Demonstrate mastery in both the practice and broad understanding of major trends and the historical underpinnings, methodologies and techniques of contemporary visual art both orally and in writing.
2. Demonstrate and develop critical thinking skills through required coursework and additional self-selected courses within the department and across campus as well as through independent study with individual professors.
3. Examine and evaluate specific examples of artistic and academic production as it relates to their area of artistic research.
4. Gain exposure to wide set of professional resources and career opportunities.
5. Develop and complete original research that advances a field of study in at least one of the broad-based discipline areas represented in the Department of Art.
6. Evaluate and interpret professional writing from a variety of disciplines and use this information to develop a theoretical framework for their own artistic research.
7. Learn to develop a rigorous and sustainable studio practice.
8. Develop independent and self-directed artistic research.
9. Learn to develop the necessary materials to submit grant proposals to professional organizations.
10. Develop a critical position and broad understanding of the artistic field that they most closely align with through their artistic research.
11. Effectively communicate to diverse audiences in writing, through oral presentations and discussions.
12. Learn to write clear and concise statements articulating the direction and intention of their research for professional publications and exhibitions.
13. Learn to present their research both informatively and articulately to diverse audiences through public lectures and symposiums.
14. Learn to give and receive feedback orally and in writing.
15. Be provided with opportunities to engage in public outreach, exhibitions and education in the community, state and nationally.
16. Teach a variety of courses within the Department of Art Foundations program for undergraduate students.
17. Have the opportunity to apply for competitive positions as instructors of record for the following undergraduate courses in Drawing, Design, Digital Media and 20th century Art History and Contemporary Practices.
18. Be provided opportunities for mentorship in teaching methods.
19. Be provided opportunities for observation and shadowing full time teaching faculty in the Department of Art.
20. (Career Preparation) Be provided with diverse training that will prepare them for a range of flexible and sustainable careers (e.g., academia, industry, community engagement, museum and gallery support services, art commerce and outreach at all levels).
21. Develop broadly applicable skills in critical thinking and problem solving.
22. Be provided with opportunities for leadership, art project management, and teamwork through collaboration, communication skills, and collaborations with academic and non-academic partners.

ART, DOCTORAL MINOR

REQUIREMENTS

Doctoral students pursuing a minor in art must complete 9 credits of graduate-level coursework. Students must obtain faculty consent to enroll in intermediate- and advanced-level studio courses. Courses must be taken in the same media/discipline: painting and drawing, printmaking, book arts, paper making, 4-D, digital art—performance and video, ceramics, glass, sculpture, wood working, or metals. Approval by your major advisor must be obtained, and proposed courses must be approved by the art department graduate coordinator before coursework commences.

ART, M.A.

Note: The M.A in Studio Art is offered as part of the Art MFA (p. 106) in Studio Art program. The Art M.A. degree is awarded during the fourth semester of the MFA program as acknowledgement of the completion of
the MFA qualifying evaluation. Applicants who are interested in pursuing an M.A in Studio Art must apply to the Art MFA program.

The graduate program in art is currently comprised of approximately 70 graduate students and 27 full-time faculty. The faculty is a distinguished group of professional artists who are active in the research and exhibition of their work and are also devoted teachers. An important strength of the graduate program lies in the breadth and diversity of its faculty. The program continues to grow and provides a wealth of artistic experiences for its students.

AREAS OF STUDY

Relief Printing
The graduate relief printing area concentrates on all forms of relief printmaking and unique prints. Specialized courses are offered in woodcut, linocut, and other forms of raised surface printing. The interrelationship between relief printing, monotype/monoprints, hybrid print techniques, installation and those in typographic design and fine book reproduction is encouraged. The Relief lab is equipped with a Takach press, Vandercook letter press, Charles Brand Press, and Reliance Press.

Screen Printing
Graduate screen printing concentrates on formulating ideas and developing a personal visual language. The program utilizes the technical experience of the intro course (photo based, hand-cut and painted stencils, digital media) and develops the use of color, transparencies, and textural effects to realize print editions and unique prints that reflect creativity and technical competence. The use of the multiple in a contemporary context for installation-based artworks, multimedia, and dimensional prints is encouraged. The serigraphy lab is equipped with two large vacuum bases to print 4x5ft and 5x8ft, three medium size vacuum bases, two washout units, two light exposure tables, light tables, and a variety of screens.

Etching/Intaglio
The etching/intaglio classes present this traditional process by laying the groundwork of basic technique to further understanding of its experimental possibilities. Five presses of varying size offer the capacity to explore many techniques, from traditional engraving and etching with hard, soft and granular grounds, to photo etching processes. There is an emphasis on color and multiple plate printing as well as monoprint methods. Aside from methods, students do research into the history of the multiple and its current use in all areas of contemporary art. Enlargement of the medium into installation and use of nontraditional substrates and formats are expected. The use of digital technology such as digital camcorders, digital cameras and inkjet printing expand this medium’s contemporary currency.

Lithography
Lithography works are based in individual conceptual development while utilizing both stones and aluminum plates. Course work is geared to a high degree of craft and professionalism. All phases of lithography are stressed including direct, transfer and photo. The center of the program is a well-equipped workshop incorporating five presses, a very large graining sink, and more than 100 stones of varying sizes up to 30 inches by 40 inches.

Digital Printmaking
Courses in digital print-production techniques provide graphics students with the necessary skills to take original art or digital media to printed output. Courses also provide a thorough explanation of the various systems, software, and hardware fundamentals involved in the integration of digital forms with etching, lithography, screen printing, photography, book arts, and graphic design. Print Production Techniques (Digital Printmaking) is also designed as an introductory course to ART 636 Computer Augmented Printmaking. As part of their course work, students will learn to utilize campus computer facilities as well as the Design Center or MERIT Lab, Print Production Studio, and the Digital Printmaking Center.

Topics covered will include an introduction to image acquisition for high resolution output, color proofing, imaging for photo plates and screens, introductory digital color-management and theory, printmaking and computer art history, and a survey of emerging print technologies including an expanded notion of electronic image presentation and distribution for the web. Simulations in virtual classrooms will be included as part of the learning environment. Student evaluations will be based on work produced for three critiques during the semester and a final portfolio review.

Graphic Design and Typography
The courses in graphic design emphasize the process of visual communication of ideas and information, with attention to aesthetic considerations, techniques, and methods. Course work in letterpress and computer typesetting introduce historical and visual aspects of formal typography and serve to facilitate experimentation with the communicative properties of type. Practical study in this area involves the design and production of books, broadsides, brochures, and posters; the development and application of logotypes and design formats; and utilizing the facilities of letterpress, computer technologies, and graphic reproduction techniques. In addition, a focus on book structures and artists’ books is provided.

Photography
The photography area encourages students to pursue their advanced research in a multidisciplinary program. Students may work strictly in photography or in combination with other disciplines such as bookmaking, typography, printmaking, installation, video, or web-based work. There is a high teacher-to-student ratio in order to promote a supportive atmosphere for artist development. Students are given a studio with access to a private black & white darkroom and digital lab. The general photography labs include facilities for digital, black & white, and alternative processes.

Paper Making
The courses in paper making are concerned with understanding the inherent materials used in the paper making processes as applied to traditional sheet forming and as they relate to other contemporary concepts in book arts, sculpture and drawing. New paper-making facilities were opened in May 2009 in the Art Lofts building.

Drawing and Painting
Courses in painting emphasizes conceptual, formal, and material logic in the development of an individualized studio practice. This course of study promotes an understanding of contemporary and historical painting and drawing practice as well as the theoretical premises pertinent to furthering the student’s intellectual and creative development.

Within the multidisciplinary department, the student is encouraged to access the broad variety of available facilities, equipment, and faculty fundamental to their continued artistic growth and specialization. Graduate students are provided with a private studio space.

Sculpture
The sculpture area offers a balance between techniques and concepts. Various forms of expression from object making, installation, and time-
based media are encouraged. Issues of professional practice within the traditional art venues as well as in the larger public domain are addressed. Students are encouraged to develop their individual voice as artists, be part of a constructive community, and prepare to be creative citizens.

Facilities are available for most of the processes needed to produce sculpture: welding (including MIG and TIG), a foundry with a large alpine sculpture kiln for foundry molds and two gas melt furnaces, forging facilities, and shops for mixed media construction, casting and paint.

Woodworking and Furniture Design
The wood/furniture area explores the technical and conceptual possibilities of woodworking and furniture design. The curriculum is project-based and teaches a full range of skills from design development through drawing and model building, as well as hand and machine based construction skills. Graduate students receive a work space in one of two private bench rooms attached to the machine room and have 24-hour access to the studio facility. The graduate program stresses advanced visual research and is highly flexible. Graduate students produce both functional and nonfunctional work that represents a wide spectrum of aesthetic perspectives. The context of a very large and diverse research university allows for effective support and mentoring of varied and wide-ranging approaches to art making. Experimentation and collaboration with other areas of the Art Department and the larger university are actively encouraged.

The wood/furniture facilities offer a state-of-the-art laboratory for working with wood. However, the program promotes and endorses a far-reaching exploration of traditional and cutting edge materials as well as newer digitally driven approaches to design and fabrication. Graduate studio research includes extensive one-on-one interaction with faculty from all areas of the Art Department. Additional feedback is provided through group critiques by faculty, fellow students, guest critics, and visiting artists.

Ceramics
The ceramics area emphasizes a relationship between the field of ceramics and contemporary approaches to art making, theory, and criticism. The area offers a diverse approach to materials and processes, emphasizing work that is both technically proficient and conceptually diverse. Through advanced study, students will gain an understanding of the technical concerns involved in ceramic production such as clay and glaze calculation and mold making, while simultaneously developing the critical and historical skills necessary to apply those processes to finished works. The ceramics studio offers a wide assortment of equipment including a fully stocked supply of raw materials for clay and glaze mixing, digital scales and test kilns, electric wheels, extruders, slab rollers, an industrial spray booth, slip casting equipment, and a variety of both updraft gas and computer-controlled electric kilns. Graduate students receive private studio space, and are strongly encouraged to experiment and collaborate with other areas of the Art Department and university. Graduate-level research includes extensive one-on-one interaction with faculty from all areas of the department, with additional feedback provided through group critiques by faculty, fellow students, guest critics, and visiting artists.

Glass
Courses in glass stress proficiency in the basic manipulative processes inherent in the glass medium and encourage students to expand traditional boundaries to use old technologies along with new lighting technologies. The glass area has been one of the first tenants in the department's loft building. Facilities are available to accomplish most hot and cold working methods. Students, faculty, and lecturers often exhibit their work in public settings beyond the traditional gallery setting. The graduate studios are in the Art Lofts building, creating a lively environment for making and studying artwork.

Metals
The metals area at UW–Madison has a long and distinguished history. The area is designed to challenge students to learn about the making of art through the specific materials, techniques, history, and cultural significance of the metalsmithing and jewelry fields. Technical proficiency is encouraged in the service of deep socially significant investigation and research. Analytical and critical thinking, historical responsibility, and theoretical awareness are explored in a seminar setting with metals faculty. Visiting artists offer lectures, demonstrations, and individual critiques with grad students that round out this rigorous and comprehensive area.

The metals studios occupy six rooms on the seventh floor of the Mosse Humanities Building. With approximately 4,500 square feet of instructional and studio space, these well-equipped facilities include acetylene, ox/acetylene and propane torches, annealing booths, centrifugal and vacuum casting equipment, enameling kilns and enamels, flexible shafts machines at every work station, a large selection of anvils, hammers and stakes for raising, forming and forging, hydraulic die forming, a gas forge, electroforming, manual and electric rolling mills, sand blaster, band and jig saws, lathes, milling machines and drill presses, a dedicated polishing room, spray etchers, sheet metal working equipment, mold making equipment, and a full compliment of hand tools. The resource center includes a computer, digital projector, photo equipment, and metals library.

Non-Static Forms
Courses in non-static forms include video and performance art. Students have access to media facilities throughout the university and are encouraged to participate in classes in non-static forms and to experiment with new media. Courses stress methods of exhibition, documentation, and distribution that are unique to the non-static media. Both individual and collaborative projects are possible, and frequent opportunities are available for students to exhibit or perform.

Digital Media
The Digital Media area provides classes and faculty which allow graduate students to expand their use of digital media tools in the context of their own fine art practice. Classes offered cover a wide range of digital forms including digital imaging, web authoring, flash animation, video and audio manipulation and 3D modeling and animation using Rhino and Maya. All classes provide a balance of technical information on the relevant media and coverage of the historical and conceptual implications of their use in a fine art context. Students are encouraged to consider digital tools as part of an integrated art practice that is concept and content driven rather than media specific. As well as supporting students whose art work is presented in digital formats the Digital Media area provides opportunities for artists working in all media to incorporate new methodologies into their practice. In the department and wider campus both Mac and PC based facilities are available with specialized facilities provided for 3D animation, video editing, 3D printing (rapid prototyping) and large format 2D printing.

These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.
FUNDING THROUGH THE ART DEPARTMENT

Art Department Teaching Assistantships: Continuing students apply for teaching assistantship (TA) positions in November, through the Annual Funding Application. Incoming students will apply for TA positions within the department's Admissions Application. Because of the demanding responsibilities of these positions, the department prioritizes students moving into their second and third year of the program. All continuing students are offered an interview for TA positions. Students completing their third year of the program are not eligible to teach a fourth year. Qualified incoming applicants will be considered for an interview, as class sections become available. Students may hold a TA position for two years only. An appointment as a TA includes remission of all tuition (excluding segregated fees or extra course fees) and health insurance coverage for the duration of the appointment. Appointments usually require teaching two studio sections or three discussion sections per semester.

Art Department Project Assistantships and Teaching Assistant—Instructional Staff: Project assistantship (PA) and teaching assistant—instructional staff (TA–IS) positions are available within and outside of the department. These are limited-term appointments that pay a salary and provide benefits for studio, lab, or research work. TA–IS applications are included in the Annual Funding Application provided to continuing students in November. Incoming students will apply for TA–IS positions within the department's Admissions Application. An appointment as a TA–IS includes remission of all tuition (excluding segregated fees or extra course fees) and health insurance coverage for the duration of the appointment.

Your portfolio must be submitted through SlideRoom; mailed portfolios will not be reviewed. Applicants may upload images (jpg, gif, or png), video (mov, wmv, flv), or PDF documents. For all technical assistance with SlideRoom, contact support@slideroom.com slideRoom.com.
PA positions are offered to qualified students, both incoming and continuing students, by direct selection of faculty members. There is no separate PA application. Eligible incoming and continuing students who have submitted either their Admittance Application or the department’s Annual Funding Application will be considered for PA appointments. In past years, MFA students have been successful in locating PA, TA, and TA–IS positions in other departments, primarily in positions requiring experience in art, design, or writing backgrounds. PA appointments can range from one semester to the full calendar year and provide full tuition remission (excluding segregated fees and extra course fees) and health coverage for the duration of the appointment.

**Fellowships:** Fellowships are awards that enable graduate students to pursue their degrees full-time. The steering committee nominates students for fellowships. The Graduate School has general fellowship information on its website (https://grad.wisc.edu/funding). These fellowships are administered through the Graduate School.

**OTHER OPTIONS TO FUND YOUR EDUCATION**

Office of Student Financial Aid (https://financialaid.wisc.edu)
333 E. Campus Mall #9701
Financial aid information for graduate student grants, employment appeals, and general loans is available at Student Financial Services. Please note that the Art Department does not have anything to do with student financial aid awards.

**Work Study**

Work-study is awarded through student financial aid. Work-study positions are listed in the work-study office. Many professors in the Art Department hire work-study students to assist them in lab courses.

**Grants Information Collection**

Room 262 Memorial Library 608-262-6431

The Grants Information Collection (https://www.library.wisc.edu/memorial/collections/grants-%20information-collection) is one of a network of approximately 200 collections established by the Foundation Center, an independent national service organization in New York, to provide an authoritative source of information on foundation and corporate giving for nonprofit organizations. Resources on scholarships, fellowships, grants and other funding opportunities for individuals also constitute a large part of the collection’s holdings. In addition to publications from the Foundation Center, including its computerized database, FC Search, the Grants Information Collection also includes other sources of information in both print and electronic format on private and corporate foundations and federal funding agencies. Here, supplemented by other campus collections, users can also find books, periodicals and pamphlets and a sampling of videos on fund raising, proposal writing and philanthropy.

**The Albert Murray Fine Arts Educational Fund**

A number of Art Department graduate students have received support from this fund. Applications for graduate and undergraduate students are available in the Art Department office. You may also contact the Albert K. Murray Fine Arts Educational Fund, Post Office Box 367, Adamsville, OH 43802-0367.

**College Art Association**

The College Art Association has a Professional Development Fellowship program to help students of color make the transition from graduate school to a professional career. The fellowship is available to students who demonstrate financial need and will receive their MFA or Ph.D. in the upcoming academic year. Contact: College Art Association (http://www.collegeart.org), 275 Seventh Avenue, New York, NY 10001, phone: 212-691-1051 x209.

**Fulbright and Other Travel Programs**

Fulbright Fellowships provide round-trip international transportation, tuition (when applicable), health and accident insurance, and maintenance for one academic year. The Fulbright Office also administers other travel fellowships including the Lusk Memorial Fellowship and the Miguel Vinciguerra Fellowship. For applications contact the Fellowships Office, 327 Ingraham Hall, 1155 Observatory Drive, Madison, WI 53706, 608-265-2409.

Minimum Graduate Coursework Requirement

Half of degree coursework (16 credits out of 32 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (https://registrar.wisc.edu/course-guide/).

Overall GPA Requirement

3.00 GPA required.

Other Grade Requirements

No other specific grade requirements.

Assessments and Examinations

At the end of the fourth semester, M.A. candidates will have an oral and written review of their creative work conducted by a committee of three tenure-track professors and an optional fourth, nonsigning member.

Language Requirements

No language requirements.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their major professor. Committee is formed by the end of the student’s third semester for M.A. qualifiers in their fourth semester.

CREDITS PER TERM ALLOWED

12 credits per semester, 13 with petition

TIME CONSTRAINTS

The M.A. show of creative work must be completed by the fourth semester of the candidate’s studies.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

In the three-year program of study, students may receive both M.A. and MFA degrees.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
LEARNING OUTCOMES

1. Demonstrate mastery in both the practice and broad understanding of major trends and the historical underpinnings, methodologies and techniques of contemporary visual art both orally and in writing.
2. Demonstrate and develop critical thinking skills through required coursework and additional self selected courses within the department and across campus as well as through independent study with individual professors.
3. Examine and evaluate specific examples of artistic and academic production as it relates to their area of artistic research.
4. Gain exposure to wide set of professional resources and career opportunities.
5. Develop and complete original research that advances a field of study in at least one of the broad based discipline areas represented in the Department of Art.
6. Evaluate and interpret professional writing from a variety of disciplines and use this information to develop a theoretical framework for their own artistic research.
7. Learn to develop a rigorous and sustainable studio practice.
8. Develop independent and self directed artistic research.
9. Learn to develop the necessary materials to submit grant proposals to professional organizations.
10. Develop a critical position and broad understanding of the artistic field that they most closely align with through their artistic research.
11. (Communication) Effectively communicate to diverse audiences in writing, through oral presentations and discussions.
12. Learn to write clear and concise statements articulating the direction and intention of their research for professional publications and exhibitions.
13. Learn to present their research both informatively and artically to diverse audiences through public lectures and symposiums.
14. Learn to give and receive feedback orally and in writing.
15. Be provided with opportunities to engage in public outreach, exhibitions and education in the community, state and nationally.
16. (Teaching effectively) Teach a variety of courses within the Department of Art foundations program for undergraduate students.
17. Have the opportunity to apply for competitive positions as instructors of record for the following undergraduate courses in drawing, design, digital media and 20th-century art history and contemporary practices.
18. Be provided opportunities for mentorship in teaching methods.
19. Be provided opportunities for observation and shadowing full time teaching faculty in the Department of Art.
20. Be provided with diverse training that will prepare them for a range of flexible and sustainable careers (e.g., academia, industry, community engagement, museum and gallery support services, art commerce and outreach at all levels).
21. Develop broadly applicable skills in critical thinking and problem solving.
22. Be provided with opportunities for leadership, art project management, and teamwork through collaboration, communication skills, and collaborations with academic and nonacademic partners.

ACCREDITATION
National Association of Schools of Art and Design (https://nasad.accredit.org)

ART, MFA

The Art Department at the University of Wisconsin–Madison offers a wide selection of areas of study, and the MFA program encourages an inter-disciplinary approach to art making.

The graduate program in art is currently comprised of approximately 70 graduate students and 27 full-time faculty. The faculty is a distinguished group of professional artists who are active in the research and exhibition of their work and are also devoted teachers. An important strength of the graduate program lies in the breadth and diversity of its faculty. The
program continues to grow and provides a wealth of artistic experiences for its students.

**AREAS OF STUDY**

### Relief Printing

The graduate relief printing area concentrates on all forms of relief printmaking and unique prints. Specialized courses are offered in woodcut, linocut, and other forms of raised surface printing. The interrelationship between relief printing, monotype/monoprints, hybrid print techniques, installation and those in typographic design and fine book reproduction is encouraged. The Relief lab is equipped with a Takach press, Vantorcook letter press, Charles Brand Press, and Reliance Press.

### Screen Printing

Graduate screen printing concentrates on formulating ideas and developing a personal visual language. The program utilizes the technical experience of the intro course (photo based, hand-cut and painted stencils, digital media) and develops the use of color, transparencies, and textural effects to realize print editions and unique prints that reflect creativity and technical competence. The use of the multiple in a contemporary context for installation-based artworks, multimedia, and dimensional prints is encouraged. The serigraphy lab is equipped with two large vacuum bases to print 4x5ft and 5x8ft, three medium size vacuum bases, two washout units, two light exposure tables, light tables, and a variety of screens.

### Etching/Intaglio

The etching/intaglio classes present this traditional process by laying the groundwork of basic technique to further understanding of its experimental possibilities. Five presses of varying size offer the capacity to explore many techniques, from traditional engraving and etching with hard, soft and granular grounds, to photo etching processes. There is an emphasis on color and multiple plate printing as well as monoprint methods. Aside from methods, students do research into the history of the multiple and its current use in all areas of contemporary art. Enlargement of the medium into installation and use of nontraditional substrates and formats are expected. The use of digital technology such as digital camcorders, digital cameras and inkjet printing expand this medium’s contemporary currency.

### Lithography

Lithography works are based in individual conceptual development while utilizing both stones and aluminum plates. Course work is geared to a high degree of craft and professionalism. All phases of lithography are stressed including direct, transfer and photo. The center of the program is a well-equipped workshop incorporating five presses, a very large graining sink, and more than 100 stones of varying sizes up to 30 inches by 40 inches.

### Digital Printmaking

Courses in digital print-production techniques provide graphics students with the necessary skills to take original art or digital media to printed output. Courses also provide a thorough explanation of the various systems, software, and hardware fundamentals involved in the integration of digital forms with etching, lithography, screen printing, photography, book arts, and graphic design. Print Production Techniques (Digital Printmaking) is also designed as an introductory course to ART 636 Computer Augmented Printmaking. As part of their course work, students will learn to utilize campus computer facilities as well as the Design Center or MERIT Lab, Print Production Studio, and the Digital Printmaking Center.

Topics covered will include an introduction to image acquisition for high resolution output, color proofing, imaging for photo plates and screens, introductory digital color-management and theory, printmaking and computer art history, and a survey of emerging print technologies including an expanded notion of electronic image presentation and distribution for the web. Simulations in virtual classrooms will be included as part of the learning environment. Student evaluations will be based on work produced for three critiques during the semester and a final portfolio review.

### Graphic Design and Typography

The courses in graphic design emphasize the process of visual communication of ideas and information, with attention to aesthetic considerations, techniques, and methods. Course work in letterpress and computer typesetting introduce historical and visual aspects of formal typography and serve to facilitate experimentation with the communicative properties of type. Practical study in this area involves the design and production of books, broadsides, brochures, and posters; the development and application of logotypes and design formats; and utilizing the facilities of letterpress, computer technologies, and graphic reproduction techniques. In addition, a focus on book structures and artists’ books is provided.

### Photography

The photography area encourages students to pursue their advanced research in a multidisciplinary program. Students may work strictly in photography or in combination with other disciplines such as bookmaking, typography, printmaking, installation, video, or web-based work. There is a high teacher-to-student ratio in order to promote a supportive atmosphere for artist development. Students are given a studio with access to a private black & white darkroom and digital lab. The general photography labs include facilities for digital, black & white, and alternative processes.

### Paper Making

The courses in paper making are concerned with understanding the inherent materials used in the paper making processes as applied to traditional sheet forming and as they relate to other contemporary concepts in book arts, sculpture and drawing. New paper-making facilities were opened in May 2009 in the Art Lofts building.

### Drawing and Painting

Courses in painting emphasizes conceptual, formal, and material logic in the development of an individualized studio practice. This course of study promotes an understanding of contemporary and historical painting and drawing practice as well as the theoretical premises pertinent to furthering the student’s intellectual and creative development.

Within the multidisciplinary department, the student is encouraged to access the broad variety of available facilities, equipment, and faculty fundamental to their continued artistic growth and specialization. Graduate students are provided with a private studio space.

### Sculpture

The sculpture area offers a balance between techniques and concepts. Various forms of expression from object making, installation, and time-based media are encouraged. Issues of professional practice within the traditional art venues as well as in the larger public domain are addressed. Students are encouraged to develop their individual voice as artists, be part of a constructive community, and prepare to be creative citizens.

Facilities are available for most of the processes needed to produce sculpture: welding (including MIG and TIG), a foundry with a large alpine
sculpture kiln for foundry molds and two gas melt furnaces, forging facilities, and shops for mixed media construction, casting and paint.

**Woodworking and Furniture Design**

The wood/furniture area explores the technical and conceptual possibilities of woodworking and furniture design. The curriculum is project-based and teaches a full range of skills from design development through drawing and model building, as well as hand and machine based construction skills. Graduate students receive a work space in one of two private bench rooms attached to the machine room and have 24-hour access to the studio facility. The graduate program stresses advanced visual research and is highly flexible. Graduate students produce both functional and nonfunctional work that represents a wide spectrum of aesthetic perspectives. The context of a very large and diverse research university allows for effective support and mentoring of varied and wide-ranging approaches to art making. Experimentation and collaboration with other areas of the Art Department and the larger university are actively encouraged.

The wood/furniture facilities offer a state-of-the-art laboratory for working with wood. However, the program promotes and endorses a far-reaching exploration of traditional and cutting edge materials as well as newer digitally driven approaches to design and fabrication. Graduate studio research includes extensive one-on-one interaction with faculty from all areas of the Art Department. Additional feedback is provided through group critiques by faculty, fellow students, guest critics, and visiting artists.

**Ceramics**

The ceramics area emphasizes a relationship between the field of ceramics and contemporary approaches to art making, theory, and criticism. The area offers a diverse approach to materials and processes, emphasizing work that is both technically proficient and conceptually diverse. Through advanced study, students will gain an understanding of the technical concerns involved in ceramic production such as clay and glaze calculation and mold making, while simultaneously developing the critical and historical skills necessary to apply those processes to finished works. The ceramics studio offers a wide assortment of equipment including a fully stocked supply of raw materials for clay and glaze mixing, digital scales and test kilns, electric wheels, extruders, slab rollers, an industrial spray booth, slip casting equipment, and a variety of both updraft gas and computer-controlled electric kilns. Graduate students receive private studio space, and are strongly encouraged to experiment and collaborate with other areas of the Art Department and university. Graduate-level research includes extensive one-on-one interaction with faculty from all areas of the department, with additional feedback provided through group critiques by faculty, fellow students, guest critics, and visiting artists.

**Glass**

Courses in glass stress proficiency in the basic manipulative processes inherent in the glass medium and encourage students to expand traditional boundaries to use old technologies along with new lighting technologies. The glass area has been one of the first tenants in the department’s loft building. Facilities are available to accomplish most hot and cold working methods. Students, faculty, and lecturers often exhibit their work in public settings beyond the traditional gallery setting. The graduate studios are in the Art Lofts building, creating a lively environment for making and studying artwork.

**Metals**

The metals area at UW-Madison has a long and distinguished history. The area is designed to challenge students to learn about the making of art through the specific materials, techniques, history, and cultural significance of the metalsmithing and jewelry fields. Technical proficiency is encouraged in the service of deep socially significant investigation and research. Analytical and critical thinking, historical responsibility, and theoretical awareness are explored in a seminar setting with metals faculty. Visiting artists offer lectures, demonstrations, and individual critiques with grad students that round out this rigorous and comprehensive area.

The metals studios occupy six rooms on the seventh floor of the Mosse Humanities Building. With approximately 4,500 square feet of instructional and studio space, these well-equipped facilities include acetylene, ox/acetylene and propane torches, annealing booths, centrifugal and vacuum casting equipment, enameling kilns and enamels, flexible shafts machines at every work station, a large selection of anvils, hammers and stakes for raising, forming and forging, hydraulic die forming, a gas forge, electroforming, manual and electric rolling mills, sand blaster, band and jigs, saws, lathes, milling machines and drill presses, a dedicated polishing room, spray etchers, sheet metal working equipment, mold making equipment, and a full compliment of hand tools. The resource center includes a computer, digital projector, photo equipment, and metals library.

**Non-Static Forms**

Courses in non-static forms include video and performance art. Students have access to media facilities throughout the university and are encouraged to participate in classes in non-static forms and to experiment with new media. Courses stress methods of exhibition, documentation, and distribution that are unique to the non-static media. Both individual and collaborative projects are possible, and frequent opportunities are available for students to exhibit or perform.

**Digital Media**

The Digital Media area provides classes and faculty which allow graduate students to expand their use of digital media tools in the context of their own fine art practice. Classes offered cover a wide range of digital forms including digital imaging, web authoring, flash animation, video and audio manipulation and 3D modeling and animation using Rhino and Maya. All classes provide a balance of technical information on the relevant media and coverage of the historical and conceptual implications of their use in a fine art context. Students are encouraged to consider digital tools as part of an integrated art practice that is concept and content driven rather than media specific. As well as supporting students whose art work is presented in digital formats the Digital Media area provides opportunities for artists working in all media to incorporate new methodologies into their practice. In the department and wider campus both Mac and PC based facilities are available with specialized facilities provided for 3D animation, video editing, 3D printing (rapid prototyping) and large format 2D printing.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**ADMISSIONS**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applications must meet the minimum requirements (https://
Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

For up-to-date application instructions, see Graduate Application (https://art.wisc.edu/graduate/graduate-application) on the Art Department website.

To be admitted as a graduate student with full standing, an applicant must meet the minimum Graduate School requirements. The Graduate Record Exam (GRE) is not required for admission.

Submit an online application through the UW–Madison Graduate School and pay the application fee. The application can be found at the UW–Madison Graduate School Application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) portal.

It will take 24 hours for your Graduate School Electronic Application to process and appear in our system. Generally, the link to the SlideRoom application is sent the following day. Once you receive a confirmation e-mail, you will be able to register with SlideRoom, log in, and complete the Art Department's supplemental application. You will be sent an email with a link to the MFA admissions application page (SlideRoom). After you register your account you will apply to Program 1 –Admittance Application NEW MFA APPLICANTS.

The SlideRoom application will walk you through the process of uploading your portfolio, as well as applying for funding opportunities through the Art Department. The department offers a number of teaching assistantships, both classroom and support positions along with scholarships to qualified applicants. You will also be asked to upload a portfolio of 20 images of your recent art work.

Your portfolio must be submitted through SlideRoom, mailed portfolios will not be reviewed. Applicants may upload images (jpg, gif, or png), video (mov, wmv, flv), or PDF documents. For all technical assistance with SlideRoom, contact support@slideroom.com/slideroom.com.

---

---

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**FUNDING FOR MFA GRADUATES IN STUDIO ART**

The Art Department awards roughly $1.3 million annually to fund graduate student education. Funding comes in the form of teaching assistantships (TA & TA–IS), project assistantships (PA), fellowships, and scholarship funding packages. TA, PA, and fellowship awards provide full tuition remission, living stipends, and medical benefits. Scholarships range in awarded amounts and are used to offset annual tuition costs. Students apply every year for funding and are awarded comprehensive funding packages based on their continued success in the program. Funding is based on sustained academic and artistic progress and satisfactory performance toward the completion of the degree. For up-to-date application instructions, see Graduate Funding (https://art.wisc.edu/graduate/graduate-funding) on the art department website.

**FUNDING THROUGH THE ART DEPARTMENT**

**Art Department Teaching Assistantships:** Continuing students apply for teaching assistantship (TA) positions in November, through the Annual Funding Application. Incoming students will apply for TA positions within the department’s Admissions Application. Because of the demanding responsibilities of these positions, the department prioritizes students moving into their second and third year of the program. All continuing students are offered an interview for TA positions. Students completing their third year of the program are not eligible to teach a fourth year. Qualified incoming applicants will be considered for an interview, as class sections become available. Students may hold a TA position for two years only. An appointment as a TA includes remission of all tuition (excluding segregated fees or extra course fees) and health insurance coverage for the duration of the appointment. Appointments usually require teaching two studio sections or three discussion sections per semester.

**Art Department Project Assistantships and Teaching Assistant–Instructional Staff:** Project assistantship (PA) and teaching assistant–Instructional Staff (TA–IS) positions are available within and outside of the department. These are limited-term appointments that pay a salary and provide benefits for studio, lab, or research work. TA–IS applications are included in the Annual Funding Application provided to continuing students in November. Incoming students will apply for TA–IS positions within the department’s Admissions Application. An appointment as a TA–IS includes remission of all tuition (excluding segregated fees or extra course fees) and health insurance coverage for the duration of the appointment.

PA positions are offered to qualified students, both incoming and continuing students by direct selection of faculty members. There is no separate PA application. Eligible incoming and continuing students who have submitted either their Admittance Application or the department’s Annual Funding Application will be considered for PA appointments. In past years, MFA students have been successful in locating PA, TA, and
TA–IS positions in other departments, primarily in positions requiring experience in art, design or writing backgrounds. PA Appointments can range from one semester to the full calendar year and provide full tuition remission (excluding segregated fees and extra course fees) and health coverage for the duration of the appointment.

**Fellowships:** Fellowships are awards that enable graduate students to pursue their degrees full-time. The steering committee nominates students for fellowships. The Graduate School has a general fellowship information on its website (http://grad.wisc.edu/funding). These fellowships are administered through the Graduate School.

**OTHER OPTIONS TO FUND YOUR EDUCATION**

**Office of Student Financial Aid** (https://financialaid.wisc.edu)
333 East Campus Mall #9701
Financial Aid information for graduate student grants, employment appeals and general loans is available at Student Financial Services. Please note that the Art Department does not have anything to do with student financial aid awards.

**Work-Study**
Work-study is awarded through student financial aid. Work-study positions are listed in the work-study office. Many professors in the Art Department hire work study students to assist them in lab courses.

**Grants Information Collection**
Room 262 Memorial Library, 608-262-6431
The Grants Information Collection (https://www.library.wisc.edu/memorial/collections/grants-%20information-collection) is one of a network of approximately 200 collections established by the Foundation Center, an independent national service organization in New York, to provide an authoritative source of information on foundation and corporate giving for nonprofit organizations. Resources on scholarships, fellowships, grants and other funding opportunities for individuals also constitute a large part of the collection’s holdings. In addition to publications from the Foundation Center, including its computerized database, FC Search, the Grants Information Collection also includes other sources of information in both print and electronic format on private and corporate foundations and federal funding agencies. Here, supplemented by other campus collections, users can also find books, periodicals and pamphlets and a sampling of videos on fund raising, proposal writing and philanthropy.

**The Albert Murray Fine Arts Educational Fund**
A number of Art Department graduate students have received support from this fund. Applications for graduate and undergraduate students are available in the Art Department office. You may also contact the Albert K. Murray Fine Arts Educational Fund, Post Office Box 367, Adamsville, OH 43802-0367.

**College Art Association**
The College Art Association has a Professional Development Fellowship program to help students of color make the transition from graduate school to a professional career. The fellowship is available to students who demonstrate financial need and will receive their MFA or Ph.D in the upcoming academic year. Contact: College Art Association (http://collegeart.org), 275 Seventh Avenue, New York, NY 10001, phone: 212-691-1051 x209.

Fulbright and Other Travel Programs

Fulbright Fellowships provide round-trip international transportation, tuition (when applicable), health and accident insurance, and maintenance for one academic year. The Fellowships Office also administers other travel fellowships including the Lusk Memorial Fellowship and the Miguel Vinciguerra Fellowship. For applications contact the Fellowships Office, 327 Ingraham Hall, 1155 Observatory Drive, Madison, WI 53706, 608-265-2409.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**
Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MAJOR REQUIREMENTS**

**Mode of Instruction Definitions**

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

No other specific grade requirements.

Assessments and Examinations
MFA QUALIFIER
Students will host a solo exhibition of their work during the fourth semester of the program. This exhibition serves as an opportunity for the student to meet with their committee to discuss their research as it relates to contemporary studio practice and content, historical context and formal issues. The qualifier functions as a critique in which students can expect to defend the work and field specific questions asked by their committee. After the hour long meeting the committee will give the student a list of questions that the student will write responses to. Two weeks following the exhibition the student submits their written responses for evaluation. The committee will then approve the student to advance in the program.

FINAL MFA EXHIBITION
After the successful completion of the qualifier, students will host a solo exhibition of their work. This exhibition takes place during the sixth semester of the program. The students' committee will come together one time to discuss the candidates' masters body of work along with the decisions the student made in presenting both their work and research. At this meeting students should expect to defend not only their practice, but be able to articulate evidence of their academic research as it relates to the exhibited works. After the hour long meeting the committee will convene and make their recommendations for the conferring of the MFA degree.

Language Requirements
No language requirements.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.
MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://art.wisc.edu/wp-content/uploads/sites/3/2017/10/Amendment-Oct-24.pdf) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

Student progress will be reviewed through coursework or at yearly meetings. If the advisor and graduate committee find that at the yearly meeting or at any other time that a student has failed to achieve satisfactory progress with academic or conduct expectations the student may be dismissed from the program.

Students placed on probation will be placed on probation for one semester and will be reviewed by the program steering committee following the probationary semester. Students placed on probation may be dismissed or allowed to continue based upon review of progress during the probationary semester.

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with the chair and members of their committee. The committee will meet at the end of the student’s sixth semester to review work for the MFA degree.

CREDITS PER TERM ALLOWED

12 credits per semester, 13 with petition

TIME CONSTRAINTS

The MFA show of creative work must be completed by the sixth or seventh semester of the candidate’s studies.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

In the three-year program of study, students may receive both M.A. and MFA degrees.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. To facilitate a mastery in both the practice and understanding of major trends in contemporary visual culture.
2. To facilitate a broad and diverse understanding of the historical underpinnings, methodologies and techniques of contemporary visual art.
3. To facilitate the development of critical thinking through coursework within the department and across campus as well as through independent study with individual professors.
4. To facilitate exposure to a wide set of professional resources and career opportunities.
5. To develop and complete original research that advances a field of study in at least one of the broad based discipline areas offered by our program.
6. To attain the skill set necessary to evaluate and interpret professional writing from a variety of disciplines in order to develop a theoretical framework for their own artistic research.
7. To develop develop a rigorous and sustainable studio art practice both in and out of a studio context.
8. To develop professional practices that facilitates a sustainable career in the arts; that allows students to present their research to diverse audiences through public lectures, symposia and exhibitions.

ART HISTORY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Art History, Doctoral Minor (p. 113)
- Art History, M.A. (p. 113)
- Art History, Ph.D. (p. 116)
- Material Culture Studies, Graduate/Professional Certificate (p. 120)
- Transdisciplinary Study of Visual Cultures, Doctoral Minor (p. 122)
- Transdisciplinary Study of Visual Cultures, Graduate/Professional Certificate (p. 123)

ART HISTORY, DOCTORAL MINOR

The Doctoral Minor in Art History is intended for students outside of the department to gain familiarity with the discipline generally while also honing an area of specialization.

REQUIREMENTS

The minimum number of credits is 9, and may be more depending on the student’s focus and particular research path.

1. All students pursuing the minor are required to take Art Hist 701 (Note: With approval, a seminar in theory and method can be substituted for Art Hist 701)
2. Selection of the remaining two courses in Art History should be made with a particular emphasis in mind (Examples of an “emphasis” might include specialization in time period, geography, medium, or theory/methodology)
3. Coursework must be graded courses numbered 600 or above (if a student wants to take a 300- or 400-level course the student must work with the graduate coordinator and professor to set up a grad-level section for the course); no audits or pass/fail
4. Maximum 3 credits of independent study (e.g., 699, 799, 899, 999); research and thesis cannot be used to satisfy the minor (e.g., 790, 890, 990)
5. After the courses have been completed, bring the major department’s Minor Agreement Form (https://uwmadison.box.com/s/za9ifym1gzhztfvtejpl12v3v9h9c6ds) to the art history graduate coordinator, department chair, or graduate administrator and have it signed.
6. Return the Minor Agreement Form to the major department to prepare any requisite warrants. A copy will be kept in the art history department.

See the program website (https://arthistory.wisc.edu/academics/grad/programs/minors/mnrequirements) for more information.

ART HISTORY, M.A.

The Department of Art History offers programs leading to the master of arts and the doctor of philosophy in art history. Our faculty is comprised of specialists in, to name a few: African and African Diaspora art; American art and architecture; American material culture; contemporary art and theory; Chinese art; curatorial studies; early modern European art; Islamic art and architecture; Japanese art and culture; Medieval European and Byzantine art; print culture; photography; film, and video; vernacular architecture; Victorian art and material culture; and visual studies and critical theory. The department encourages the study of the global history of art, and material and visual culture while investigating works in all media from a wide range of periods and a variety of world cultures.

Students enjoy close interaction with their mentors and profit from superb resources for interdisciplinary research. Faculty members have international reputations in their specialties, regularly receive prestigious awards, lecture widely, and serve on major professional boards. Graduates of the department teach at the post-secondary level or pursue careers in museum and curatorial professions, private galleries and auction houses, library or archival work, architecture and historical preservation, and conservation.

The department is housed in the Conrad A. Elvehjem Building with the Chazen Museum of Art (http://www.chazen.wisc.edu), which has a broad historical collection with several areas of particular strength, an active acquisitions program, and facilities to host major traveling exhibitions and exhibition courses. Graduate students use these collections for
research and publishing projects. They may also have the opportunity to work on exhibitions in special classes or as project assistants. The building is also home to the Kohler Art Library, which contains an excellent collection of published materials and full range of periodicals. The department possesses a large image collection.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</tbody>
</table>

While students may pursue a stand-alone M.A., those who wish to pursue a Ph.D. should apply directly to that program. Admission to either program is offered to applicants who have an outstanding undergraduate record of academic achievement. The successful applicant typically presents both a compelling statement of purpose for graduate studies and an advanced research paper. To be considered for admission, applicants must have taken the GRE recently (within five years of their application deadline). To be competitive in some subfields, applicants should have training in at least one foreign language. Applicants are encouraged to contact prospective faculty advisors for more details. Non-native English speakers must present TOEFL or IELTS scores.

Admission to the Asian M.A. track (Chinese or Japanese art) is offered to applicants who have similar qualifications and training, but with an East Asian emphasis and demonstrated skills in the East Asian language appropriate to the intended field of specialization.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial aid is normally reserved for students in the Ph.D. program. The department awards a small number of fellowships for an academic year or a semester’s support at different stages in the graduate career. The department awards the Margaret Davison Shorger Fellowship for the study of Italian art, the Charles C. Killin Wisconsin Distinguished Graduate Fellowship in East Asian Art, and the Chipstone/James Watrous Wisconsin Distinguished Graduate Fellowship in American Material Culture. Research travel is also supported by the Shirley L and Dr. William Fritz Mueller Art History Graduate Student Fund and the Ray Reider Golden Art History Fund, and the Joan Mirviss Fund for Japanese art. The department awards travel grants for students delivering papers at major conferences and annually appoints five to six graduate students as teaching or project assistants. Individual faculty may also offer one- or two-semester project assistantships in connection with specific research projects. In addition, the department nominates candidates for fellowships administered outside the department and the university.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

M.A. students with a strong background in art history or the equivalent should take a minimum of seven art history courses, at least THREE of which must be seminars

Breadth

At least one course in three of the five following areas:

- Cross-Cultural/Diaspora
- Africa/Middle East
- Asia
- Europe
- The Americas

At least one course in three of the four following periods:

- Ancient to Medieval
- Early Modern (Circa 1400–Circa 1800)
- Modern (Circa 1800–Circa 1945)
- Contemporary (Post 1945)

Language

One foreign language.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to the master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

Allowed up to 7 credits numbered 700 or above, and graduate level courses ART HIST 601 Introduction to Museum Studies I, ART HIST 602 Introduction to Museum Studies II, and L I S/ART HIST/HISTORY/JOURN 650 History of Books and Print Culture in Europe and North America.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30. Failure to do so will result in a hold being placed on the student’s registration.

CREDITS PER TERM ALLOWED

12 credits

TIME CONSTRAINTS

The thesis, written in consultation with the major professor, must be completed no later than two semesters after thesis work begins.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements;
that coursework may not count toward Graduate School credit requirements.

**OTHER**

Priority for assistantship funding is given to Ph.D. students.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources [https://grad.wisc.edu/pd](https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Mastery of techniques for visual analysis (examining features such as materials, proportion, light, color, form and narrative structure) of single images and for comparative analysis of multiple images and objects.
2. Advanced proficiency in interpreting images/objects in ways that take into account the historical contexts in which they were produced and received.
3. In-depth knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Advanced ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Advanced knowledge and skills necessary to interpret images/objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique complex scholarly arguments and evaluate the strength of the visual and textual evidence presented.
7. Advanced skills in effective and impactful communication in both written and oral form in ways that acknowledge diverse audiences in an increasingly global society.
8. Skills in public engagement such that our students are able to effectively communicate complex ideas to a lay public in written, oral, and digital form in keeping with the Wisconsin Idea.

**PEOPLE**

Faculty: Professors Anna Andrzejewski, Nicholas D. Cahill, Jill H. Casid, Preeti Chopra, Thomas E. A. Dale, Henry J. Drewal, Nancy Rose Marshall, Ann Smart Martin, Quitman E. (Gene) Phillips; Associate Professors Michael Jay McClure, Kirstin Phillips-Court (cross-appointed with French and Italian); Assistant Professors: Yuhang Li, Jennifer Pruitt.

**ART HISTORY, PH.D.**

The Department of Art History offers programs leading to the master of arts and the doctor of philosophy in art history. Our faculty includes specialists in, to name a few: African and African Diaspora art; American art and architecture; American material culture; contemporary art and theory; Chinese art; curatorial studies; early modern European art; Islamic art and architecture; Japanese art; Medieval European and Byzantine art; print culture; photography; film, and video; vernacular architecture; Victorian art and material culture; and visual studies and critical theory.

The department encourages the study of the global history of art, and material and visual culture while investigating works in all media from a wide range of periods and a variety of world cultures.

Students enjoy close interaction with their mentors and profit from superb resources for interdisciplinary research. Faculty members have international reputations in their specialties, regularly receive prestigious awards, lecture widely, and serve on major professional boards. Graduates of the department teach at the postsecondary level or pursue careers in museum and curatorial professions, private galleries and auction houses, library or archival work, architecture and historical preservation, and conservation.

The department is housed in the Conrad A. Elvehjem Building with the Chazen Museum of Art [http://www.chazen.wisc.edu](http://www.chazen.wisc.edu), which has a broad historical collection with several areas of particular strength, an active acquisitions program, and facilities to host major traveling exhibitions and exhibition courses. Graduate students use these collections for research and publishing projects. They may also have the opportunity to work on exhibitions in special classes or as project assistants. The building is also home to the Kohler Art Library, which contains an excellent collection of published materials and full range of periodicals. The department possesses a large image collection.

**ADMISSIONS**

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements [https://grad.wisc.edu/apply](https://grad.wisc.edu/apply) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online [https://grad.wisc.edu/apply](https://grad.wisc.edu/apply).

10 art history classes, four of which may be lecture courses, but students are strongly encouraged to take as many seminars as possible. In special circumstances up to two independent studies (ART HIST ’799’) - one at the MA and one at the Ph.D. level—may be substituted for lecture courses.

**Breadth**

At least one course in two of the following five following areas:

- Cross-Cultural/Diaspora
- Africa/Middle East
- Asia
Europe

The Americas

At least one course in two of the following four following periods:

- Ancient to Medieval
- Early Modern (Circa 1400–Circa 1800)
- Modern (Circa 1800–Circa 1945)
- Contemporary (Post 1945)

Language

Two foreign languages. If you satisfied language requirements at the M.A. level within the past 5 years these languages count toward your two required languages.

NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 21 credits of graduate work from other institutions. Coursework earned ten years or more prior to admission to the doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

Allowed up to 7 credits numbered 700 or above, and graduate level courses ART HIST 601 Introduction to Museum Studies I, ART HIST 602 Introduction to Museum Studies II, and ART HIST/HISTORY/JOURN/L I S 650 History of Books and Print Culture in Europe and North America.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 600 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their thesis committee after passing the Preliminary Examination.

CREDITS PER TERM ALLOWED

12 credits

TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Priority for assistantship funding is given to Ph.D. students.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Shows professional-level mastery of the skills acquired at earlier stages (visual analysis, contextual interpretation, research methods, evaluation of arguments, application of varied theoretical perspectives).
2. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of art history (including visual culture and material culture).
3. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of art history/visual culture/material culture.
4. Conducts research and produces scholarship that makes a substantive contribution to the field and to interdisciplinary inquiry.
5. Demonstrates breadth within their learning experiences.
6. Shows advanced skills in effective and impactful communication in both written and oral form in ways that acknowledge diverse audiences in an increasingly global society.

PEOPLE

Professors Andrzejewski, Cahill, Casid, Chopra, Dale, Drewal, Marshall, Martin, Phillips, Rosenblum (chair); Associate Professors Li, Phillips-Court; Assistant Professors Nelson, Pruitt

ART HISTORY: ARCHITECTURAL HISTORY, PH.D.

Admissions to the Art History: Architectural History Ph.D. have been suspended as of fall 2018. If you have any questions, please contact the department (arthistory@ls.wisc.edu).

This is a named option in the Art History Ph.D. (p. 116)

The Architectural History named option curriculum within the art history department is designed for students whose research is focused on historical study of architecture. The option offers training in specialized skill areas for students working in this area. It also takes advantage of a collaborative relationship between UW–Madison faculty and faculty in the School of Architecture & Urban Planning (http://www4.uwm.edu/sarup) at the University of Wisconsin–Milwaukee (UWM) that enables students to take courses at both campuses (known as the Buildings–Landscapes–Cultures (http://www.blc.wisc.edu) companion program). Many students involved in the option also participate in the Material Culture Program (http://www.materialculture.wisc.edu). The Architectural option was approved in June of 2008; the first class matriculated in 2009.

CURRICULAR REQUIREMENTS

Requirements Detail
Minimum Credit Requirement 51 credits
Minimum Residence Credit Requirement 32 credits
Minimum Graduate Coursework Requirement Half of degree coursework (26 credits out of 51 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide.
Overall Graduate GPA Requirement 3.00 GPA required.
Other Grade Requirements No other grade requirements.
Assessments and Examinations Doctoral students must submit a dissertation prospectus. Doctoral students must pass a written and an oral exam prior to becoming dissertators.
Language Requirements Reading competency in at least two languages (additional language requirements may pertain to some fields).
Doctoral Minor/Breadth Requirements All doctoral students are required to complete a minor.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.
REQUIRED COURSES

Art Hist 701, Art Hist 449 Architectural Field School.

The Ph.D. architectural option allows students flexibility in their coursework that enables them to meet requirements of the Ph.D. in art history while also taking specialized coursework necessary for them to work effectively in the specific study of architectural history. Core requirements include an advanced, specialized methods/historiography course in architectural history that also includes students from UWM (to be taken during the student’s second semester in residence) and a fieldschool class (usually taken in the summer). Because work in the field of architectural history requires training not only in art history but also in related fields (such as landscape history, design, material culture, and cultural geography), students also take some of their required coursework outside of art history.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
Designated courses taught by BLC-affiliated faculty at UW–Milwaukee.

UW–Madison Undergraduate
No prior coursework from UW–Madison undergraduate career may count toward requirements.

UW–Madison University Special
No prior coursework from UW–Madison Special student career may count toward requirements.

PROBATION

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their thesis committee after passing the preliminary examination.

MATERIAL CULTURE STUDIES, GRADUATE/PROFESSIONAL CERTIFICATE

Admissions to the Material Culture Studies Graduate/Professional Certificate have been suspended as of fall 2018 and will be discontinued as of fall 2020. If you have any questions, please contact the department (arthistory@ls.wisc.edu).

The primary focus of the certificate in material culture studies is to teach different methods and approaches for studying objects as evidence. Those in the program seek to understand how historical, cultural, behavioral, and social meanings can be revealed and studied through objects as well as how material things in turn shape human experience. Students learn ideas, methods, skills and practices that prepare them for careers in higher education, museums, historical societies, architecture and design, product design, advertising, historic preservation, and journalism. Another goal is to introduce a variety of professional career paths for those interested in the relationship between objects, history, and culture. Internships at local museums, historical societies, and other organizations as well as class field trips and activities allow students to bridge the academic and professional worlds.

ADMISSIONS

Admissions to the Material Culture Studies Graduate/Professional Certificate have been suspended as of fall 2018 and will be discontinued...
as of fall 2020. If you have any questions, please contact the department (arthistory@lists.wisc.edu).

1. Students may take only one course in any department. Choices should be clustered around a focus. For example, one strategy is to take a range of courses related to a specific geographic area, specialization or time period. Other students may choose to pursue a cluster of courses that emphasizes nationally emerging specializations within the field of material culture including courses related to museums/exhibitions, historic preservation, archival technology or product design. Students should work with a material culture faculty member to develop this focus. Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

2. Graduate students must complete a 1-3 credit internship/practicum/field experience. This is developed with a faculty member and an outside institution. Credits are determined by the scope of the internship. These credits count as elective credits. We have established internship opportunities with the State Historical Society of Wisconsin, Chipstone Foundation, and the John Michael Kohler Arts Center and are currently developing more opportunities with institutions such as the Pecatonica Foundation.

</table>
The Doctoral Minor in the Transdisciplinary Study of Visual Cultures is intended for Ph.D. students from across the university who desire training in the study of visual cultures. This transdisciplinary field analyzes the social construction of the visual as well as how the visual creates our social world. Visual culture studies differs from other related disciplines in two ways: first, its field of inquiry includes an expansive array of visual cultural artifacts and practices; and, second, its methodologies focus on the constitution of power relations through visual markers of race, gender, disability, and nationality. As the world continues to become increasingly understood through, and reliant on, the visual (the internet, films, television, scientific graphs, data visualization, video games, and advertisements), the need for people trained with the ability to critically interpret, create, and evaluate those mediums is essential.

**Requirements**

The Ph.D. minor in the transdisciplinary study of visual cultures is research-driven. Selection of courses should contribute to the development of your primary area of specialization. The minor is awarded upon successful completion of 9 graduate-level credits in a combination of required and elective coursework, with a GPA of 3.0 (4.0 basis). Required coursework consists of ART HIST/AFROAMER 801 Historiography, Theory and Methods in Visual Culture; ART HIST/AFROAMER 802 Visual Cultures: Topics in Visual Cultures, or equivalent. Elective coursework consists of one 3-credit course to be selected, in consultation with a program faculty advisor, from a wide range of crosslisted and "meets with" courses offered by program faculty in numerous programs and departments. A list of possible course options are available on the CVC website (https://cvc.wisc.edu/courses), although it is not exhaustive. Please, note that even if a course is listed on the website it is not a guarantee that it will receive program credit. Please consult with the director of the CVC to ensure that your selected courses meet criteria for credit.

TRANSDISCIPLINARY STUDY OF VISUAL CULTURES, GRADUATE/PROFESSIONAL CERTIFICATE

The Graduate/Professional Certificate in the Transdisciplinary Study of Visual Cultures is intended for master’s degree students (usually MFA and terminal M.A. candidates) from across the university who desire training in the study of visual cultures. This transdisciplinary field analyzes the social construction of the visual as well as how the visual creates our social world. Visual culture studies differs from other related disciplines in two ways: first, its field of inquiry includes an expansive array of visual cultural artifacts and practices; and, second, its methodologies focus on the constitution of power relations through visual markers of race, gender, disability, and nationality. As the world continues to become increasingly understood through, and reliant on, the visual (the internet, films, television, scientific graphs, data visualization, video games, and advertisements), the need for people trained with the ability to critically interpret, create, and evaluate those mediums is essential.

REQUIREMENTS

The Graduate/Professional Certificate in the Transdisciplinary Study of Visual Cultures is a research-driven certificate. Selection of courses should contribute to your professional development. The certificate is awarded upon successful completion of 9 graduate-level credits in a combination of required and elective coursework, with a GPA of 3.0 (4.0 basis). Required coursework consists of a 3-credit course to be selected, in consultation with a program faculty advisor, from a wide range of crosslisted and “meets with” courses offered by program faculty in numerous programs and departments. 1. This course can be substituted with any other graduate topics course in visual culture in consultation with the CVC Director.

**LEARNING OUTCOMES**

1. Understand the history, methodology, and potentials of Visual Culture as a field of study including cultural studies, art theory, and theoretical frameworks as they are practiced in the field of Visual Cultures.
2. Have ability to discuss concepts, ideas, and theoretical questions in a clear and understandable manner when engaging both specialized audiences and the wider community.
3. Develop theoretically informed critical methodologies for the analysis and interpretation of visual culture, literary texts, and cultural formations.
4. Develop archival research skills and other evidence—gathering techniques with the aim of furthering historical and cultural knowledge of specific fields.
5. Develop critical writing skills necessary for constructing cogent and original arguments following protocols consistent with existing scholarship in visual cultures.

- Sarah Ann Wells (Comparative Literature)
- Keith Woodward (Geography)
**Asian Languages and Cultures, Doctoral Minor**

**Requirements**

Students in other departments who wish to minor in Asian languages and cultures must complete 12 credits above the 300 level with a cumulative GPA of 3.0 in the department. Such students are required to take one course in literature and one course in religion or philosophy. Any other courses to fulfill the minor requirement are selected in prior consultation with the student’s faculty advisor, who is designated as such by the Department of Asian Languages and Cultures and is authorized to sign the doctoral minor agreement form.

Courses cross-listed in a student’s major department and in Asian Languages and Cultures do not count toward the minor requirement. Elementary and intermediate language courses or "directed study" courses are not accepted toward the fulfillment of the minor requirement in languages and cultures of Asia.

**People**

**Faculty**

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties range from traditional medicine in India, the Hinduist roots of yoga, to diversifying contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our faculty pages for more information on areas of expertise, current research, teaching and publications.

**Erin Barnard**  
esbarnard@wisc.edu  
Faculty Associate  
Fields of Study: Language Pedagogy, Materials Development; Second Language Acquisition

**Gudrun Bühnemann**  
gbuhnema@wisc.edu  
Professor  
Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantra and Yoga Studies

**Anthony Cerulli**  
acerulli@wisc.edu  
Associate Professor

---

**Language Instructors**

Language instructors are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

---

**Graduate Advisor**

Undergraduate Advisor:  
mx18092@wisc.edu  
1244 Van Hise Hall  
608-263-1738
Asian Languages and Cultures, M.A.

Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

Charo D’Etcheverry
cdetchvyer@wisc.edu
Associate Professor
Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

John D. Dunne
jddunne@wisc.edu
Professor
Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

Naomi Geyer
nfgeyer@wisc.edu
Associate Professor
Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

Tyrell Haberkorn
Associate Professor

Rania Huntington
huntington@wisc.edu
Professor
Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

Adam L. Kern
alkern@wisc.edu
Professor
Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyôshi, etc) and beyond.

Byung-jin Lim
byungjin.lim@wisc.edu
Associate Professor
Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

Junko Mori
jmori@wisc.edu
Professor
Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo
tnakakubo@wisc.edu
Faculty Associate
Fields of Study: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

William Nienhauser
whnienha@wisc.edu
Professor
Fields of Study: Early traditional fiction and history; early poetry (especially Du Fu and Tao Qian)

Steve Ridgely
steve.ridgely@wisc.edu
Associate Professor
Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang
hzhang6@wisc.edu
Professor
Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu
wzhu34@wisc.edu ( wzhu34@wisc.edu)
Assistant Professor
Fields of Study: Discourse Analysis, Pragmatics, Pedagogy and Second Language Acquisition

The Department of Asian Languages and Cultures and the Department of East Asian Languages and Literatures at UW–Madison offer graduate study in Asian Languages and Cultures, M.A., with a new interdisciplinary M.A. and Ph.D. program in Asian Languages and Cultures. Students may take advantage of the many opportunities within the department and on campus to do in-depth research on Asia from multiple disciplinary perspectives and across the traditional area studies divisions of East, South, and Southeast Asia. We welcome applications from students who are interested in working transregionally, transdisciplinarily, or both. This includes students with a traditional background in Asian Studies and related academic fields as well as those whose path to studying Asia has been through professional work.

The Department of Asian Languages and Cultures and the Department of East Asian Languages and Literatures has developed a lively intellectual community around Transasian Studies and is supporting student-led seminars, reading groups, workshops and other events. Prospective graduate students are encouraged to reach out to faculty members who share their academic and research interests.

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties range from traditional medicine in India, the history of yoga, contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, and anime to Japanese counterculture.

Asian Studies at UW–Madison has strong ties across departments, to research centers, area studies programs, extensive library connections, and alumni relations.

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://
Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Thank you for your interest in our programs. The Department of Asian Languages and Cultures (ALC) offers a graduate program in Asian Languages and Cultures (https://alc.wisc.edu/graduate-programs/asian-languages-and-cultures), Chinese (https://alc.wisc.edu/graduate-programs/chinese) and Japanese (https://alc.wisc.edu/graduate-programs/japanese).

Prior to submitting application and materials, applicants should carefully review the information regarding the program of interest and the faculty's expertise (https://alc.wisc.edu/about/faculty) to determine the fit between their interest and the program. To this extent, prospective applicants may contact a specific faculty to discuss their research interest prior to submitting applications.

Applicants should also review the Graduate School’s admission process (http://guide.wisc.edu/graduate/academic-forms) and program requirements and information prior to submitting the online application and fee. The application fee cannot be waived or refunded.

### DEADLINES

We accept applications for the fall term only.

In order to be considered for fellowships, project assistantships, and teaching assistantships (https://alc.wisc.edu/graduate-programs/costs), all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

### APPLICATION PROCESS

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) and select the Asian Languages and Cultures (major code 597) or Chinese (major code 171) or Japanese (major code 583) program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

- ALC Departmental Application form (https://alc.wisc.edu/sites/alc.wisc.edu/files/ALC%20Departmental%20Application INTERNAL.pdf)
- Grad School "Add/Change Program (https://grad.wisc.edu/documents/change-program)" form (click on link and look for form in the "Academic Forms" box)
- Letters of recommendation
- CV or Resume
- Statement of purpose

The applications from current UW–Madison graduate students will be reviewed every spring, together with new applications submitted.

### FUNDING

#### GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

#### GRADUATE STUDENT COSTS

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

#### PROGRAM RESOURCES

The Department of Asian Languages and Cultures offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). **Please make note of the deadline of January 10 for financial assistance consideration.** All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

### FELLOWSHIPS

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

- **Foreign Language & Area Studies (FLAS) Fellowships:** FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international
studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQS.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

- **Advanced Opportunity Fellowship (AOF):** This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/.

- **Project Assistantships.** Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members' research projects and/ or respond to some programmatic needs of the department and other campus units.

- **Teaching Assistantships.** Availability and types of TAship vary from one year to another, depending on the departmental faculty’s research needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

- **Other Forms of Financial Aid:** Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

- Please also refer to the Graduate School's Funding Information for New and Current Graduate Students (https://grad.wisc.edu/funding/) page for additional information.

- Students may also obtain information from the Grants Information Center (https://www.library.wisc.edu/memorial/collections/grants-information- (http://www.library.wisc.edu/memorial/collections/ grants-information-)) collection in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.

## REQUIREMENTS

### MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

### MAJOR REQUIREMENTS

**Mode of Instruction Definitions**

- **Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

- **Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

- **Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

- **Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

There are two possible exit requirements for the M.A. One of the following two options will be chosen in consultation with the advisors.

Students may select two substantially revised and/or expanded research papers completed during their graduate study to submit to their committee (the advisors and one additional faculty member). In addition to the written papers, an oral presentation of these papers to the committee is required.

Or

An approximately 50-page M.A. thesis. In addition to the written thesis, an oral presentation of the thesis to the committee is required. This option is usually appropriate for a student who wishes to continue in the Ph.D. program.

Six semesters of study of an Asian language or four semesters of study of two Asian languages, or the equivalent level of proficiency as established by examination by department faculty and staff. Additional language study may be required by the advisors.

**REQUIRED COURSES**

- At least 21 credits in Asia-related graduate courses in the department or elsewhere on campus.
- At most 9 credits of other graduate courses as approved by the advisors.
- Language study at the third-year level and beyond can count toward the total degree credits to a maximum of 12 credits.

Students may take courses and seminars drawn from offerings in other departments, or within Asian Languages and Cultures, as decided in collaboration between student and the co-advisors, such as:

</table>
the Center for Southeast Asian Studies, the Center for South Asia, and the Center for East Asian Studies, Religious Studies Program and Cultures as well as affiliates in other units on campus, including anthropology.

Approach, including history, literature, law, political science, art, and metaphors for justice are found in art, film, and literature? The M.A. and Ph.D. program in Transasian Studies particularly welcomes students interested in doing interdisciplinary research on the numerous religious traditions of East Asia, the Himalayan region, South Asia, and Southeast Asia. Students may focus on one or more traditions, including Buddhism, Hinduism, Islam, and Zoroastrianism. Study of such traditions, whether in their past or present forms, using a combination of approaches, such as philology, history, ethnography and philosophy, is generally conducted with faculty members in the Department of Asian Languages and Cultures as well as affiliates in other units on campus, including Religious Studies, Art History, History, Comparative Literature, the Center for Healthy Minds, and UW-Madison’s area studies centers.

Core Faculty: Buhnemann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchnemann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

• Asian Medical and Health Humanities Track

The M.A. and Ph.D. in Asian Languages and Cultures welcomes students interested to do interdisciplinary research that employs theories and methods in medicine and health humanities to probe questions in Asian societies and histories about healthcare, patienthood, embodiment, and psychology. Students may work in a transasian perspective and will be encouraged to work across multiple disciplines, including anthropology, history of science, literature, cognitive science and religious studies. Drawing on the resources in the Department of Asian Languages and Cultures and across the UW-Madison campus, students may examine such things as the imperial, cultural, and structural-economic matrices that impact human flourishing and suffering in Asian societies; the spread of biomedicine in Asia and Cold War politics; the appropriation of traditional modalities and contemplative practices such as mindfulness and yoga into contemporary medical contexts; links between western biomedicine and the politics of nation building under and after colonialism in Asia; and the entwined histories of religion, politics, and medicine in premodern Asian societies.

Core Faculty: Buhnemann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchnemann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

• Asian Rights Track

The M.A. and Ph.D. in Asian Languages and Cultures welcomes students interested to do interdisciplinary research that employs theories and methods in medicine and health humanities to probe questions in Asian societies and histories about healthcare, patienthood, embodiment, and psychology. Students may work in a transasian perspective and will be encouraged to work across multiple disciplines, including anthropology, history of science, literature, cognitive science and religious studies. Drawing on the resources in the Department of Asian Languages and Cultures and across the UW-Madison campus, students may examine such things as the imperial, cultural, and structural-economic matrices that impact human flourishing and suffering in Asian societies; the spread of biomedicine in Asia and Cold War politics; the appropriation of traditional modalities and contemplative practices such as mindfulness and yoga into contemporary medical contexts; links between western biomedicine and the politics of nation building under and after colonialism in Asia; and the entwined histories of religion, politics, and medicine in premodern Asian societies.

Core Faculty: Buhnemann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchnemann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

• Asian Rights, Violence and Law Track

How are rights, law and justice understood and experienced comparatively in and beyond Asia? How are rights violated and promoted by states and citizens? How does violence – regional, state, communal – and its memory reshape societies and nations? What are the manifestations of the rule of law and its opposites? What representations and metaphors for justice are found in art, film, and literature? The M.A. and Ph.D. program in Transasian Studies particularly welcomes students who would like to answer these and other questions comparatively, either across multiple countries, and/or drawing on more than one disciplinary approach, including history, literature, law, political science, art, and anthropology.

Core Faculty: Haberkorn (https://alc.wisc.edu/about/faculty/tyrell-haberkorn) Affiliate Faculty: McCoy (https://history.wisc.edu/faculty_am.htm)

Program Tracks

Students may choose to focus their studies in a thematic track, such as; Asian Religions, Asian Medical and Health Humanities, and Asian Rights, Violence, and Law. Initially working with two co-advisors, each student will craft a program of coursework that combines Asia-focused courses with disciplinary study in and beyond the Department of Asian Languages and Cultures. This may include linkages with other departments as well as UW-Madison’s rich array of centers and programs, including the Center for Healthy Minds (https://centerhealthy minds.org), Center for Visual Cultures (https://cvc.wisc.edu), Human Rights Program (http://law.wisc.edu/gls/human_rights.html), Religious Studies Program (http://religiousstudies.lss.wisc.edu), and the Center for East Asian Studies (https://eastasia.wisc.edu), the Center for South Asia (http://southasia.wisc.edu), and the Center for Southeast Asian Studies (http://seasia.wisc.edu).

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript or diploma.

- Asian Medical and Health Humanities Track

- Asian Rights Track

The M.A. and Ph.D. in Asian Languages and Cultures welcomes students interested to do interdisciplinary research that employs theories and methods in medicine and health humanities to probe questions in Asian societies and histories about healthcare, patienthood, embodiment, and psychology. Students may work in a transasian perspective and will be encouraged to work across multiple disciplines, including anthropology, history of science, literature, cognitive science and religious studies. Drawing on the resources in the Department of Asian Languages and Cultures and across the UW-Madison campus, students may examine such things as the imperial, cultural, and structural-economic matrices that impact human flourishing and suffering in Asian societies; the spread of biomedicine in Asia and Cold War politics; the appropriation of traditional modalities and contemplative practices such as mindfulness and yoga into contemporary medical contexts; links between western biomedicine and the politics of nation building under and after colonialism in Asia; and the entwined histories of religion, politics, and medicine in premodern Asian societies.

Core Faculty: Buhnemann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchnemann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

- Asian Rights, Violence and Law Track

How are rights, law and justice understood and experienced comparatively in and beyond Asia? How are rights violated and promoted by states and citizens? How does violence – regional, state, communal – and its memory reshape societies and nations? What are the manifestations of the rule of law and its opposites? What representations and metaphors for justice are found in art, film, and literature? The M.A. and Ph.D. program in Transasian Studies particularly welcomes students who would like to answer these and other questions comparatively, either across multiple countries, and/or drawing on more than one disciplinary approach, including history, literature, law, political science, art, and anthropology.

Core Faculty: Haberkorn (https://alc.wisc.edu/about/faculty/tyrell-haberkorn) Affiliate Faculty: McCoy (https://history.wisc.edu/faculty_am.htm)
POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program. The department has established Grievance Policy and Procedures (https://alc.wisc.edu/content/grievance-policy).

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree or earned ten years is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW–Madison undergraduate maybe counted to satisfy degree requirements. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

If a student’s average falls below 3.0 in a given semester, the department will decide whether the student may continue on probation. A specific plan will be arranged with dates and deadlines in place in regard to removal of probationary status.

ADVISOR / COMMITTEE

Starting Fall 2018, all students are required to have two co-advisors, identified at the time of admissions. During the course of study, students meet regularly with their advisors to ensure satisfactory progress.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

The maximum time for completing all M.A. requirements and passing the M.A. examination is three years.

Master’s degree students who are absent for five or more years will not be given credit for prior work.

n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or “facets”) of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

LEARNING OUTCOMES

1. Identify the primary field(s) of study in a historical, comparative, and global context.
2. Discuss the major theories, research methods, and approaches to inquiry in the selected area of the student’s focus.
3. Integrate theories into practice.
4. Articulate and communicate knowledge in specialized field(s).
5. Recognize and apply principles of professional and ethical conduct.
PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialities range from traditional medicine in India, the Hinduist roots of yoga, or diversifying contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our faculty pages (https://alc.wisc.edu/about/faculty) for more information on areas of expertise, current research, teaching and publications.

Erlin Barnard
esbarnard@wisc.edu
Faculty Associate
Fields of Study: Language Pedagogy; Materials Development; Second Language Acquisition

Gudrun Bühnemann
gbuhnema@wisc.edu
Professor
Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantrism and Yoga Studies

Anthony Cerulli
acerulli@wisc.edu
Associate Professor
Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

Charo D’Etcheverry
cdetcheverry@wisc.edu
Associate Professor
Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Anatoly Detwyler
detwyler@wisc.edu
Assistant Professor
Fields of Study: Modern Chinese literature and history, comparative new media, information studies

John D. Dunne
jddunne@wisc.edu
Professor
Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

Naomi Geyer
ngeyer@wisc.edu
Associate Professor
Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

Tyrell Haberkorn
tyrell.haberkorn@wisc.edu
Associate Professor

Rania Huntington
huntington@wisc.edu
Professor
Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

Adam L. Kern
alkern@wisc.edu
Professor
Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyōshi, etc) and beyond.

Hiyeon Kim
hiyeon.kim@wisc.edu
Assistant Professor
Fields of Study: Cinema; Media activism; Cultural Studies; History of Modern and Contemporary Korea

Byung-jin Lim
byungjin.lim@wisc.edu
Associate Professor
Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

Junko Mori
jmori@wisc.edu
Professor
Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo
tnakakubo@wisc.edu
Faculty Associate
Fields of Study: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

William Nienhauser
whnienha@wisc.edu
Professor
Fields of Study: Early traditional fiction and history; early poetry (especially Du Fu and Tao Qian)

Steve Ridgely
steve.ridgely@wisc.edu
Associate Professor
Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang
hzhang6@wisc.edu
Professor
Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu
wzhu34@wisc.edu (wzhu34@wisc.edu)
Assistant Professor
The Department of Asian Languages and Cultures offers a new interdisciplinary M.A. and Ph.D. program in Asian Languages and Cultures. Students may take advantage of the many opportunities within the department and on campus to do in-depth research on Asia from multiple disciplinary perspectives and across the traditional area studies divisions of East, South, and Southeast Asia. We welcome applications from students who are interested in working transregionally, transdisciplinary, or both. This includes students with a traditional background in Asian Studies and related academic fields as well as those whose path to studying Asia has been through professional work.

The Department of Asian Languages and Cultures has developed a lively intellectual community around Transasian Studies and is supporting student-led seminars, reading groups, workshops and other events. Prospective graduate students are encouraged to reach out to faculty members who share their academic and research interests.

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties range from traditional medicine in India, the history of yoga, contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, and anime to Japanese counterculture.

Asian Studies at UW—Madison has strong ties across departments, to research centers, area studies programs, extensive library connections, and alumni relations.

### ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

English Proficiency Test

Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency).

Other Test(s) (e.g., GMAT, MCAT)  n/a

Letters of Recommendation Required 3

Thank you for your interest in our programs. The Department of Asian Languages and Cultures (ALC) offers a graduate program in Asian Languages and Cultures (https://alc.wisc.edu/graduate-programs/asian-languages-and-cultures), Chinese (https://alc.wisc.edu/graduate-programs/chinese) and Japanese (https://alc.wisc.edu/graduate-programs/japanese).

Prior to submitting application and materials, applicants should carefully review the information regarding the program of interest and the faculty’s expertise (https://alc.wisc.edu/about/faculty) to determine the fit between their interest and the program. To this extent, prospective applicants may contact a specific faculty to discuss their research interest prior to submitting applications.

Applicants should also review the Graduate School’s admission process (http://guide.wisc.edu/graduate/asian-languages-cultures-phd/2019) and the Graduate School’s minimum requirements (http://grad.wisc.edu/admissions/requirements), and program requirements and information prior to submitting the online application and fee. The application fee cannot be waived or refunded.

### DEADLINES

We accept applications for the fall term only.

In order to be considered for fellowships, project assistantships, and teaching assistantships (https://alc.wisc.edu/graduate-programs/costs), all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

### APPLICATION PROCESS

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) and select the Asian Languages and Cultures (major code 597) or Chinese (major code 171) or Japanese (major code 583) program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

• Grad School "Add/Change Program (https://grad.wisc.edu/documents/change-program)" form (click on link and look for form in the "Academic Forms" box)
• Letters of recommendation
• CV or Resume
• Statement of purpose

The applications from current UW-Madison graduate students will be reviewed every spring, together with new applications submitted.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

GRADUATE STUDENT COSTS

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

PROGRAM RESOURCES

The Department of Asian Languages and Cultures offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). Please make note of the deadline of January 10 for financial assistance consideration. All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

FELLOWSHIPS

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

• Foreign Language & Area Studies (FLAS) Fellowships: FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

Applications must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQs.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

• Advanced Opportunity Fellowship (AOF): This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/.

• Project Assistantships. Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members’ research projects and/or respond to some programmatic needs of the department and other campus units.

• Teaching Assistantships. Availability and types of TAship vary from one year to another, depending on the department’s curricular needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

• Other Forms of Financial Aid: Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

• Please also refer to the Graduate School's Funding Information for New and Current Graduate Students (https://grad.wisc.edu/funding/) page for additional information.

• Students may also obtain information from the Grants Information Center (https://www.library.wisc.edu/memorial/collections/grants-information- (http://www.library.wisc.edu/memorial/collections/grants-information- ) collection) in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

<tr>
<td>Other Grade Requirements</td>
<td>No other specific grade requirements.</td>
</tr>
</tbody>
</table>

**Assessments and Examinations**

The preliminary exam must be taken within 1 semester after completing doctoral coursework. Comprehensive written preliminary exams will be based on reading lists developed with the committee. These exams have four parts: general competence in major field; secondary field; theory and method; and specialized area of dissertation focus. The preliminary examination will be evaluated by a committee of at least three members (the co-advisors and an additional faculty member).

Successful completion of the exam process will also require research language competence as demonstrated through examinations in one or more languages as determined by the advisors.

A dissertation proposal must be approved within 1 year after completing prelim exams. An oral defense of the proposal will be evaluated by the committee.

Language Additional language coursework beyond the M.A. Requirements requirements is not required in general, but students must gain sufficient competence to pass the research language exams required by the advisors.

Doctoral Minor A doctoral minor is not a requirement, but a student, in consultation with their advisors, may choose to complete a minor.

REQUIRED COURSES

- At least 15 credits in Asia-related graduate courses in the department or elsewhere on campus
- At most 6 credits of other courses as approved by the advisors
- Additional language coursework beyond the M.A. requirements is not required in general, but students must gain sufficient competence to pass the research language exams required by the advisors.

Language study at the third year level and beyond can count toward the total degree credits to a maximum of 6 credits past the M.A.

Students may take courses and seminars drawn from offerings in other departments or within Asian Languages and Cultures, as decided in collaboration between student and the co-advisors, such as:
Program Tracks

Students may choose to focus their studies in a thematic track, such as: Asian Religions, Asian Medical and Health Humanities, and Asian Rights, Violence, and Law. Initially working with two co-advisors, each student will craft a program of coursework that combines Asia-focused courses with disciplinary study in and beyond the Department of Asian Languages and Cultures. This may include linkages with other departments as well as UW-Madison’s rich array of centers and programs, including the Center for Healthy Minds (https://centerhealthyminds.org), Center for Visual Cultures (https://cvc.wisc.edu), Human Rights Program (http://law.wisc.edu/gls/human_rights.html), Religious Studies Program (http://religiousstudies.lss.wisc.edu), and the Center for Southeast Asian Studies (https://eastasia.wisc.edu), the Center for South Asia (http://southasia.wisc.edu), and the Center for Southeast Asian Studies (http://seasia.wisc.edu).

Asian Medical and Health Humanities Track

The M.A. and Ph.D. in Asian Languages and Cultures welcomes students interested to do interdisciplinary research that employs theories and methods in medicine and health humanities to probe questions in Asian societies and histories about healthcare, patienthood, embodiment, and psychology. Students may work in a transdisciplinary perspective and will be encouraged to work across multiple disciplines, including anthropology, history of science, literature, cognitive science and religious studies. Drawing on the resources in the Department of Asian Languages and Cultures and across the UW-Madison campus, students may examine such things as the imperial, cultural, and structural-economic matrixes that impact human flourishing and suffering in Asian societies; the spread of biomedicine in Asia and Cold War politics; the appropriation of traditional modalities and contemplative practices such as mindfulness and yoga into contemporary medical contexts; links between western biomedicine and the politics of nation building under and after colonialism in Asia; and the entwined histories of religion, politics, and medicine in premodern Asian societies.

Core Faculty: Buhnemann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchнемann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

Asian Religions Track

The M.A. and Ph.D. in Asian Languages and Cultures welcomes students interested to do interdisciplinary research on the numerous religious traditions of East Asia, the Himalayan region, South Asia, and Southeast Asia. Students may focus on one or more traditions, including Buddhism,
Hinduism, Islam, and Zoroastrianism. Study of such traditions, whether in their past or present forms, using a combination of approaches, such as philology, history, ethnography and philosophy, is generally conducted with faculty members in the Department of Asian Languages and Cultures as well as affiliates in other units on campus, including Religious Studies, Art History, History, Comparative Literature, the Center for Healthy Minds, and UW-Madison’s area studies centers.

Core Faculty: Buhnmann (https://alc.wisc.edu/about/faculty/gudrun-b%25c3%25bchnemann), Cerulli (https://alc.wisc.edu/about/faculty/anthony-cerulli), Dunne (https://alc.wisc.edu/about/faculty/john-d-dunne)

Asian Rights, Violence and Law Track
How are rights, law and justice understood and experienced comparatively in and beyond Asia? How are rights violated and promoted by states and citizens? How does violence – regional, state, communal – and its memory reshape societies and nations? What are the manifestations of the rule of law and its opposites? What representations and metaphors for justice are found in art, film, and literature? The M.A. and Ph.D. program in Transasian Studies particularly welcomes students who would like to answer these and other questions comparatively, either across multiple countries, and/or drawing on more than one disciplinary approach, including history, literature, law, political science, art, and anthropology.

Core Faculty: Haberkorn (https://alc.wisc.edu/about/faculty/tyrell-haberkorn) Affiliate Faculty: McCoy (https://history.wisc.edu/faculty_am.htm)

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program. The department has established Grievance Policy and Procedures (https://alc.wisc.edu/content/grievance-policy).

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW–Madison undergraduate maybe counted to satisfy degree requirements. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of graduate coursework (as defined above) taken as a UW–Madison special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION
A semester GPA below 3.0 will result in the student being placed on department probation. If a semester GPA of 3.0 is not attained during the subsequent semester of enrollment, the student may be dismissed from the program or allowed to continue for one additional semester based on advisor appeal to the Graduate School.

ADVISOR / COMMITTEE
Starting fall 2018, all students are required to be supervised by co-advisors. One of the co-advisors must be a member of the Asian Languages and Cultures program, but the other co-advisor can be identified from related fields outside of the department.

At the point of beginning work on the dissertation, a single dissertation advisor (most likely one of the co-advisors) may be chosen, or the co-advising arrangement may continue for the dissertation as well.

Dissertation committees must have at least four members representing more than one graduate program, three of whom must be UW–Madison graduate faculty or former UW–Madison graduate faculty up to one year after resignation or retirement. At least one of the four members must be from outside of the student’s major program or major field (often from the minor field).

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES
The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster
the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or “facets”) of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

**LEARNING OUTCOMES**

1. Demonstrate a thorough and in-depth understanding of research problems, potentials, and limits with respect to theory, knowledge, or practice in the selected area of the student’s focus.
2. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the specialized field(s).
3. Create scholarship and advance knowledge that makes a substantive contribution to the field(s).
4. Articulate and communicate complex ideas in a clear and understandable manner to both specialized and general audiences.
5. Recognize, apply, and foster ethical and professional conduct.

**PEOPLE**

**FACULTY**

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties range from traditional medicine in India, the Hinduist roots of yoga, or diversifying contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our faculty pages (https://alc.wisc.edu/about/faculty) for more information on areas of expertise, current research, teaching, and publications.

**Erin Barnard**
esbarnard@wisc.edu
Faculty Associate

**Gudrun Bühnemann**
gbuhnema@wisc.edu
Professor
Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantrism and Yoga Studies

**Anthony Cerulli**
acerulli@wisc.edu
Associate Professor
Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

**Charo D’Etcheverry**
cdetcheverry@wisc.edu
Associate Professor
Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

**John D. Dunne**
jjdunne@wisc.edu
Professor
Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

**Naomi Geyer**
ngeyer@wisc.edu
Associate Professor
Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

**Tyrell Haberkorn**
Associate Professor

**Rania Huntington**
huntington@wisc.edu
Professor
Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

**Adam L. Kern**
alkern@wisc.edu
Professor
Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyôshi, etc) and beyond.

**Byung-jin Lim**
byungjin.lim@wisc.edu
Associate Professor
Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

**Junko Mori**
jmori@wisc.edu
Professor
Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics
Takako Nakakubo  
tnakakubo@wisc.edu  
Faculty Associate  
Fields of Study: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

William Nienhauser  
whnienha@wisc.edu  
Professor  
Fields of Study: Early traditional fiction and history; early poetry (especially Du Fu and Tao Qian)

Steve Ridgely  
steve.ridgely@wisc.edu  
Associate Professor  
Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang  
hzhang6@wisc.edu  
Professor  
Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu  
wzhu34@wisc.edu (wzhu34@wisc.edu)  
Assistant Professor  
Fields of Study: Discourse Analysis, Pragmatics, Pedagogy and Second Language Acquisition

**CHINESE, DOCTORAL MINOR**

**REQUIREMENTS**

Students from other graduate programs intending to take a doctoral minor in Chinese should consult the director of graduate study. For the minor, at least 12 credits in graduate-level courses are required (400 level or above; certain 300-level courses are accepted with the prior consent of the program).

Area: Cultural anthropologist of China and East Asia; development; media politics; environment; drugs; ethnicity and tourism; cyberspace

CHINESE, M.A.

UW–Madison offers an M.A. and Ph.D. degree in Chinese, specializing either in linguistics or in literature and culture. The program provides broad foundations and focused training in these two specialties, assuring that our graduates are amply prepared to teach and conduct research.

The linguistics specialty excels in areas of historical linguistics, phonology, prosody, grammaticalization, interface study between syntax and phonology, dialectology, sociolinguistics, second language acquisition, pedagogy, and pragmatics.

The literature and culture specialty covers periods from the pre-Qin through the modern and contemporary, including study of fictional and historiographical narrative, poetry, drama, film, and new media.

The graduate program in Chinese is housed in the Department of Asian Languages and Cultures, along with the Japanese and the Asian Languages and Cultures Program. As such students will have opportunities to interact with all faculty, staff, and graduate students affiliated with the department to examine their area of specialty in broader regional and disciplinary contexts.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online.

<table>
<thead>
<tr>

<td>3 Required</td>
</tr>
</tbody>
</table>

Prior to submitting application and materials, applicants should carefully review the information regarding the program of interest and the faculty’s expertise to determine the fit between their interest and the program. To this extent, prospective applicants may contact a specific faculty to discuss their research interest prior to submitting applications.

Applicants should also review the Graduate School’s admission process and program requirements and information prior to submitting the online application and fee. The application fee cannot be waived or refunded.

DEADLINES

We accept applications for the fall term only.

In order to be considered for fellowships, project assistantships, and teaching assistantships, all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

APPLICATION PROCESS

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application and select the Asian Languages and Cultures (major code 596) or Chinese (major code 171) or Japanese (major code 583) program.

Students may apply either to the MA or PhD program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

- ALC Departmental Application form
- Grad School "Add/Change Program" (click on link and look for form in the "Academic Forms" box)
- Letters of recommendation
- CV or Resume
- Statement of purpose

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information is available from
the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**GRADUATE STUDENT COSTS**

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

**PROGRAM RESOURCES**

The Department of Asian Languages and Cultures offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). Please make note of the deadline of January 10 for financial assistance consideration. All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

**FELLOWSHIPS**

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

- **Foreign Language & Area Studies (FLAS) Fellowships:** FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

  Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

  Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

  Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQS.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

- **Advanced Opportunity Fellowship (AOF):** This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/.

- **Project Assistantships.** Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members’ research projects and/or respond to some programmatic needs of the department and other campus units.

- **Teaching Assistantships.** Availability and types of TAship vary from one year to another, depending on the department’s curricular needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

- **Other Forms of Financial Aid:** Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

  Please also refer to the Graduate School’s Funding Information for New and Current Graduate Students (https://grad.wisc.edu/funding/) page for additional information.

  Students may also obtain information from the Grants Information Center (https://www.library.wisc.edu/memorial/collections/grants-information- (http://www.library.wisc.edu/memorial/collections/grants-information- collection) in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MAJOR REQUIREMENTS**

**MODE OF INSTRUCTION**

<table>
<thead>
<tr>
<th>Face to Face</th>
<th>Evening/Weekend</th>

</tbody>
</table>

**Mode of Instruction Definitions**

- **Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

- **Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

- **Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://alc.wisc.edu/graduate-programs/chinese) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions.

UW-Madison Undergraduate

With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW-Madison undergraduate may be counted to satisfy degree requirements. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW-Madison University Special

With program approval, students are allowed to count no more than 9 credits of graduate coursework (as defined above) taken as a UW-Madison Special student. Coursework earned five or more years prior to admission to a Master’s degree is not allowed to satisfy requirements.

PROBATION

If a student’s average falls below 3.0 in a given semester, the department will decide whether the student may continue on probation. A specific plan will be arranged with dates and deadlines in place in regard to removal of probationary status.

ADVISOR / COMMITTEE

Starting Fall 2018, all students are required to have two co-advisors, identified at the time of admissions. During the course of study, students meet regularly with their advisors to ensure satisfactory progress. Choice of co-advisors can be changed with consent of new advisors.
CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
The maximum time for completing all M.A. requirements and passing the M.A. examination is three years.

Master’s degree students who are absent for five or more years will not be given credit for prior work.

OTHER
The program offers limited financial assistance in the form of fellowships and teaching assistantships to candidates who are highly qualified. Applicants should consult the program website for selection criteria and application materials for assistantships.

PROFESSIONAL DEVELOPMENT

DEPARTMENT RESOURCES
Throughout the academic year professional development trainings, workshops, and graduate student-organized activities take place. The Director of Graduate Studies is eager to hear from students about what interests they have for such events.

GRADUATE SCHOOL RESOURCES
The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or “facets”) of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

LEARNING OUTCOMES
1. Demonstrate understanding of the primary field(s) of study in a historical, comparative, and global context.

2. Demonstrate understanding of the major theories, research methods, and approaches to inquiry in one of the following areas of study: Chinese literature and culture, Chinese linguistics, and Transasian studies.

3. Demonstrate ability to integrate theories into practice.

4. Demonstrate ability to articulate and communicate knowledge in specialized field(s).

5. Recognize and apply principles of ethical and professional conduct.

CHINESE, PH.D.

UW-Madison offers an M.A. and Ph.D. degree in Chinese, specializing either in linguistics or in literature and culture. The program provides broad foundations and focused training in these two specialties, assuring that our graduates are amply prepared to teach and conduct research.

The linguistics specialty excels in areas of historical linguistics, phonology, prosody, grammaticalization, interface study between syntax and phonology, dialectology, sociolinguistics, second language acquisition, pedagogy, and pragmatics.

The literature and culture specialty covers periods from the pre-Qin through the modern and contemporary, including study of fictional and historiographical narrative, poetry, drama, film, and new media.

The graduate program in Chinese is housed in the Department of Asian Languages and Cultures, along with the Japanese and the Asian Languages and Cultures Program. As such students will have opportunities to interact with all faculty, staff, and graduate students affiliated with the department to examine their area of specialty in broader regional and disciplinary contexts.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Thank you for your interest in our programs. The Department of Asian Languages and Cultures (ALC) offers a graduate program in Asian Languages and Cultures (https://alc.wisc.edu/graduate-programs/asian-languages-and-cultures), Chinese (https://alc.wisc.edu/graduate-programs/chinese) and Japanese (https://alc.wisc.edu/graduate-programs/japanese).

Prior to submitting application and materials, applicants should carefully review the information regarding the program of interest and the faculty’s expertise (https://alc.wisc.edu/about/faculty) to determine the fit between their interest and the program. To this extent, prospective applicants may contact a specific faculty to discuss their research interest prior to submitting applications.

Applicants should also review the Graduate School’s admission process (http://guide.wisc.edu/graduate/asian-languages-cultures/chinese-phd/#20https://grad.wisc.edu/apply), Graduate School’s minimum requirements (http://grad.wisc.edu/admissions/requirements), and program requirements and information prior to submitting the online application and fee. The application fee cannot be waived or refunded.

DEADLINES

We accept applications for the fall term only.

In order to be considered for fellowships, project assistantships, and teaching assistantships (https://alc.wisc.edu/graduate-programs/costs), all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

APPLICATION PROCESS

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) and select
the Asian Languages and Cultures (major code 596) or Chinese (major code 171) or Japanese (major code 583) program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

- Grad School “Add/Change Program (https://grad.wisc.edu/documents/change-program)” form (click on link and look for form in the “Academic Forms” box)
- Letters of recommendation
- CV or Resume
- Statement of purpose

The applications from current UW-Madison graduate students will be reviewed every spring, together with new applications submitted.

### FUNDING

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**GRADUATE STUDENT COSTS**

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

**PROGRAM RESOURCES**

The Department of Asian Languages and Culture offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). Please make note of the deadline of January 10 for financial assistance consideration. All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

**FELLOWSHIPS**

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

- **Foreign Language & Area Studies (FLAS) Fellowships**: FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

Academic Year and Summer FLAS awards are **two separate competitions** requiring **two separate and complete applications**.

Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQs.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

- **Advanced Opportunity Fellowship (AOF)**: This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/

- **Project Assistantships**: Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members’ research projects and/or respond to some programmatic needs of the department and other campus units.

- **Teaching Assistantships**: Availability and types of TAship vary from one year to another, depending on the department’s curricular needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

- **Other Forms of Financial Aid**: Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

- Please also refer to the **Graduate School’s Funding Information for New and Current Graduate Students** (https://grad.wisc.edu/funding/) page for additional information.

- Students may also obtain information from the **Grants Information Center** (https://www.library.wisc.edu/memorial/collections/grants-information- (http://www.library.wisc.edu/memorial/collections/grants-information- )collection) in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.
REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

MAJOR REQUIREMENTS

MODE OF INSTRUCTION

<table>
<thead>
<tr>
<th>Mode of Instruction Definitions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Face to Face</strong></td>
</tr>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

Mode of Instruction Definitions

- **Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

<tr>
<td>Other Grade Requirements</td>
<td>Ph.D. candidates should maintain a 3.5 GPA in all coursework and may not have any more than two Incompletes on their record at any one time.</td>
</tr>
</tbody>
</table>

Assessments and Examinations

- All students must take a comprehensive written preliminary examination, covering fields defined in consultation with the advisor and other committee members.
- A dissertation proposal must be presented to the members of the Ph.D. committee and accepted within one semester of passing the preliminary examination.

Language Requirements

- Advanced proficiency in modern Chinese is required.
- Students must demonstrate reading proficiency in classical Chinese and one additional research language.

The Ph.D. language requirements are designed to increase the student's scholarly efficiency and capabilities and should be completed as early as possible. In addition to competence in English and modern and classical Chinese, the student must qualify in one language related to his or her research. Usually this will be Japanese, French, or German. This requirement may be satisfied either by showing evidence of two years of successful study of the language or by passing an examination.

REQUIRED COURSES

12 credits of seminars coursework are required. These include China-related courses 800 and above. ASIAN 932 Seminar in Chinese Linguistics and ASIAN 951 Seminar in Chinese Literature are offered approximately every year, and may be repeated.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://alc.wisc.edu/graduate-programs/chinese) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW–Madison undergraduate may be counted to satisfy degree requirements. Coursework earned ten years or more prior
to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of graduate coursework (as defined above) taken as a UW–Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

A semester GPA below 3.5 will result in the student being placed on academic probation. If a semester GPA of 3.5 is not attained during the subsequent semester of full time enrollment, the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School. A student on probation may not take the preliminary examination.

ADVISOR / COMMITTEE

Starting Fall 2018, all students are required to be supervised by co-advisors. One of the co-advisors must be a member of the Japanese Program, but the other co-advisor can be identified from related fields outside of the Japanese Program.

At the point of beginning work on the dissertation, a single dissertation advisor (most likely one of the co-advisors) may be chosen, or the co-advising arrangement may continue for the dissertation as well.

Dissertation committees must have at least 4 members representing more than one graduate program, 3 of whom must be UW-Madison graduate faculty or former UW-Madison graduate faculty up to one year after resignation or retirement. At least one of the 4 members must be from outside of the student’s major program or major field (often from the minor field).

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER

The program offers limited financial assistance in the form of fellowships and teaching assistantships to candidates who are highly qualified. Applicants should consult the program website for selection criteria and application materials for assistantships.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more.

OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals.

DiscoverPD introduces nine areas (or “facets”) of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

LEARNING OUTCOMES

1. Demonstrate a thorough and in-depth understanding of research problems, potentials, and limits with respect to theory, knowledge, or practice in at least one of the following areas of study: Chinese literature and culture, Chinese linguistics, and Transasian studies.

2. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the specialized field(s).

3. Create scholarship and advance knowledge that makes a substantive contribution to the field(s).

4. Articulate and communicate complex ideas in a clear and understandable manner to both specialized and general audience.

5. Recognize, apply, and foster ethical and professional conduct.

PEOPLE

FACULTY

Anatoly Detwyler, Assistant Professor
Website: https://alc.wisc.edu/about/faculty/anatoly-detwyler

Area: Modern China and Xinjiang; environmental history, borderlands; material-centered history; political economy

Weijia Li, Assistant Professor in German, Nordic, and Slavic
Website: https://elpa.education.wisc.edu/elpa/people/faculty-and-staff-directory/weijia-li
Area: German-Chinese cultural exchange in the 20th c.

Yafei Li, Professor of Language Sciences
Website: https://langsci.wisc.edu/people/facstaff/li
Area: Syntax and morphology of Chinese

Yuhang Li, Assistant Professor of Art History
Website: https://arthistory.wisc.edu/people/faculty/li
Area: Chinese art, gender, and material practices in late imperial china; Buddhism and art; textile and costume history; Qing court art

Viren Murthy, Associate Professor of History
Website: https://history.wisc.edu/people/murthy-viren/
Area: East Asian intellectual history; Marxism, Buddhism

Zhongdang Pan, Professor of Communication Science
Website: https://comsmarts.wisc.edu/people/zhongdangpan
Area: Media and social changes in the PRC; comparative journalism in PRC, Taiwan, and HK; civic values in Chinese cities

Dianna Xu, East Asian Studies Librarian
Website: https://www.library.wisc.edu/subjects/east-asia/

Yongming Zhou, Professor of Anthropology
Website: https://www.anthropology.wisc.edu/staff/zhou-yongming/
Area: Cultural anthropologist of China and East Asia; development; media politics; environment; drugs; ethnicity and tourism; cyberspace

REQUIREMENTS

Students from other graduate programs intending to take a doctoral minor in Japanese should consult the director of graduate studies. For the minor, at least 12 credits in graduate-level courses are required (400 level or above; certain 300-level courses are accepted with the prior consent of the program).

PEOPLE

FACULTY

Charo D’Etcheverry, Associate Professor
website: https://alc.wisc.edu/about/faculty/charo-detcheverry
e-mail: cdetcheverry@wisc.edu
Areas of Expertise: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Naomi Geyer, Associate Professor
website: https://alc.wisc.edu/about/faculty/naomi-geyer
e-mail: nfgeyer@wisc.edu
Areas of Expertise: Japanese Language, Language Pedagogy, Pragmatics

Adam L. Kern, Professor
website: https://alc.wisc.edu/about/faculty/adam-l-kern
e-mail: al kern@wisc.edu
Areas of Expertise: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyōshi, etc) and beyond.

Junko Mori, Professor
website: https://alc.wisc.edu/about/faculty/junko-mori
e-mail: jmori@wisc.edu
Areas of Expertise: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo, Faculty Associate
website: https://alc.wisc.edu/about/faculty/takako-nakakubo
e-mail: tnakakubo@wisc.edu
Areas of Expertise: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies
Steve Ridgely, Associate Professor

website: https://alc.wisc.edu/about/faculty/steve-ridgely
email: steve.ridgely@wisc.edu

Areas of Expertise: modern Japanese literature, cultural theory, transasian studies

JAPANESE, M.A.

UW–Madison offers an M.A. and Ph.D. degree in Japanese, specializing either in linguistics or in literature and culture. The program provides broad foundations and focused training in these two specialties, assuring that our graduates are amply prepared to teach and conduct research.

The linguistics specialty excels in areas such as functional linguistics, pragmatics, discourse/conversation analysis, sociolinguistics, applied linguistics, and language pedagogy.

The literature and culture specialty covers the Heian through Heisei periods, offering a wide range of courses on fiction, poetry, drama, popular culture, visual culture, cinema, acoustic culture, and cutting-edge cross-media and avant-garde topics, particularly manga and anime.

The Japanese Program is housed in the Department of Asian Languages and Cultures (ALC), along with the Chinese Program and the Asian Languages and Cultures Program. As such students will have opportunities to interact with all faculty, staff, and graduate students affiliated with the department to examine their area of specialty in broader regional and disciplinary contexts.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply/admissions).

DEADLINES

We accept applications for the fall term only.

In order to be considered for fellowships, project assistantships, and teaching assistantships (https://alc.wisc.edu/graduate-programs/costs), all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

APPLICATION PROCESS

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) and select the Asian Languages and Cultures (major code 596) or Chinese (major code 171) or Japanese (major code 583) program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

- Grad School “Add/Change Program” form (click on link and look for form in the “Academic Forms” box)
- Letters of recommendation
- CV or Resume
- Statement of purpose

The applications from current UW–Madison graduate students will be reviewed every spring, together with new applications submitted.
**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding/) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**GRADUATE STUDENT COSTS**

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

**PROGRAM RESOURCES**

The Department of Asian Languages and Cultures offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). Please make note of the deadline of January 10 for financial assistance consideration. All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

**FELLOWSHIPS**

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

- **Foreign Language & Area Studies (FLAS) Fellowships:** FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

  Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

  Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

  Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQS.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

- **Advanced Opportunity Fellowship (AOF):** This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/.

  - **Project Assistantships:** Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members’ research projects and/or respond to some programmatic needs of the department and other campus units.

  - **Teaching Assistantships:** Availability and types of TAship vary from one year to another, depending on the department’s curricular needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

  - **Other Forms of Financial Aid:** Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

  - Please also refer to the Graduate School’s Funding Information for New and Current Graduate Students (https://grad.wisc.edu/funding/) page for additional information.

  - Students may also obtain information from the Grants Information Center (https://www.library.wisc.edu/memorial/collections/grants-information- (http://www.library.wisc.edu/memorial/collections/grants-information-) collection) in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.

<td>3</td>
</tr>
</tbody>
</table>

- 18 credits out of the 30 credits need to be taken from the department. The required courses above must be part of these. You may consider taking courses on Japanese literature/culture to satisfy this portion of requirements.

- If you do not have sufficient linguistics background, you are encouraged to take LINGUIS/ANTHRO 301 Introduction to Linguistics: Descriptive and Theoretical during your first semester.

- If you had not satisfied the prerequisites for the M.A. program (the equivalent of our undergraduate major degree ([http://guide.wisc.edu/undergraduate/letters-science/asian-languages-cultures/japanese-ba/#requirementstext](http://guide.wisc.edu/undergraduate/letters-science/asian-languages-cultures/japanese-ba/#requirementstext)) prior to your enrollment, you need to satisfy this requirement by taking appropriate level of language courses.

- You may consider taking courses on linguistics, applied linguistics, language acquisition or language education offered in Linguistics, English (Language and Linguistics), Curriculum and Instruction, French and Italian, German, Spanish and Portuguese, and so on to fulfill the requirements.

- Consult the co-advisors every semester regarding the registration of courses in the following semester.

- Most students take four semesters to complete the course work necessary for the MA degree, and officially earn the degree in the following summer (an exception to this schedule may be considered on a case-by-case basis).

These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

#### Japanese Track

Japanese literature/culture students must take three graduate-level courses (500 level or above) in literature/culture, including at least one course at the 700 level or higher.

<table>
<thead>
<tr>

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures ([https://grad.wisc.edu/acadpolicy](https://grad.wisc.edu/acadpolicy)) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.
MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://alc.wisc.edu/graduate-programs/japanese) is the repository for all of the program's policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW–Madison undergraduate may be counted to satisfy degree requirements. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of graduate coursework (as defined above) taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

PROBATION

If a student's average falls below 3.0 in a given semester, the department will decide whether the student may continue on probation. A specific plan will be arranged with dates and deadlines in place in regard to removal of probationary status.

ADVISOR / COMMITTEE

Starting fall 2018, all students are required to have two co-advisors, identified at the time of admissions. During the course of study, students meet regularly with their advisors to ensure satisfactory progress.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

The maximum time for completing all M.A. requirements and passing the M.A. examination is three years.

Master's degree students who are absent for five or more years will not be given credit for prior work.

OTHER

The program offers limited financial assistance in the form of fellowships and teaching assistantships to candidates who are highly qualified. Applicants should consult the program website for selection criteria and application materials for assistantships.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

The office developed and maintains DiscoverPD (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or "facets") of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

LEARNING OUTCOMES

1. Demonstrate understanding of the primary field(s) of study in a historical, comparative, and global context.
2. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the specialized field(s).
3. Create scholarship and advance knowledge that makes a substantive contribution to the field(s).
4. Articulate and communicate complex ideas in a clear and understandable manner to both specialized and general audience.
5. Recognize, apply, and foster ethical and professional conduct.

PEOPLE

FACULTY
Charo D’Etchevery, Associate Professor
website: https://alc.wisc.edu/about/faculty/charo-detchevery
email: cdetchevery@wisc.edu
Areas of Expertise: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Naomi Geyer, Associate Professor
website: https://alc.wisc.edu/about/faculty/naomi-geyer
e-mail: nfgeyer@wisc.edu
Areas of Expertise: Japanese Language, Language Pedagogy, Pragmatics

Adam L. Kern, Professor
website: https://alc.wisc.edu/about/faculty/adam-l-kern
email: alkern@wisc.edu
Areas of Expertise: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, *kibyōshi*, etc) and beyond.

Junko Mori, Professor
website: https://alc.wisc.edu/about/faculty/junko-mori
email: jmori@wisc.edu
Areas of Expertise: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo, Faculty Associate
website: https://alc.wisc.edu/about/faculty/takako-nakakubo
e-mail: tnakakubo@wisc.edu
Areas of Expertise: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

Steve Ridgely, Associate Professor
website: https://alc.wisc.edu/about/faculty/steve-ridgely
email: steve.ridgely@wisc.edu
Areas of Expertise: modern Japanese literature, cultural theory, transasian studies

### JAPANESE, PH.D.

UW–Madison offers an M.A. and Ph.D. degree in Japanese, specializing either in linguistics or in literature and culture. The program provides broad foundations and focused training in these two specialties, assuring that our graduates are amply prepared to teach and conduct research.

The linguistics specialty excels in areas such as functional linguistics, pragmatics, discourse/conversation analysis, sociolinguistics, applied linguistics, and language pedagogy.

The literature and culture specialty covers the Heian through Heisei periods, offering a wide range of courses on fiction, poetry, drama, popular culture, visual culture, cinema, acoustic culture, and cutting-edge cross-media and avant-garde topics, particularly manga and anime.

The Japanese Program is housed in the Department of Asian Languages and Cultures (ALC), along with the Chinese Program and the Asian Languages and Cultures Program. As such students will have opportunities to interact with all faculty, staff, and graduate students affiliated with the department to examine their area of specialty in broader regional and disciplinary contexts.

### ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Thank you for your interest in our programs. The Department of Asian Languages and Cultures (ALC) offers a graduate program in Asian Languages and Cultures (https://alc.wisc.edu/graduate-programs/asian-languages-and-cultures), Chinese (https://alc.wisc.edu/graduate-programs/chinese) and Japanese (https://alc.wisc.edu/graduate-programs/japanese).

Prior to submitting application and materials, applicants should carefully review the information regarding the program of interest and the faculty's expertise (https://alc.wisc.edu/about/faculty) to determine the fit between their interest and the program. To this extent, prospective applicants may contact a specific faculty to discuss their research interest prior to submitting applications.

Applicants should also review the Graduate School's admission process (http://guide.wisc.edu/graduate/asian-languages-cultures/japanese-phd/%20https://grad.wisc.edu/apply), Graduate School's minimum requirements (http://grad.wisc.edu/admissions/requirements), and program requirements and information prior to submitting the online application and fee. The application fee cannot be waived or refunded.

### DEADLINES

We accept applications for the fall term only.
In order to be considered for fellowships, project assistantships, and teaching assistantships (https://alc.wisc.edu/graduate-programs/costs), all application materials must be in by January 10.

If you do not need any funding support, you may submit applications by April 15.

**APPLICATION PROCESS**

New applicants to UW-Madison apply to programs through the Graduate School application process. Complete the online Graduate application (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) and select the Asian Languages and Cultures (major code 596) or Chinese (major code 171) or Japanese (major code 583) program.

If you are a currently enrolled UW-Madison graduate student and would like to add or change your current graduate program to Asian Languages and Cultures, Chinese, or Japanese, you do not need to fill out the online application. You will need to submit the following to the ALC Graduate Program Coordinator (1244 Van Hise):

- Grad School "Add/Change Program (https://grad.wisc.edu/documents/change-program)* form (click on link and look for form in the "Academic Forms" box)
- Letters of recommendation
- CV or Resume
- Statement of purpose

The applications from current UW–Madison graduate students will be reviewed every spring, together with new applications submitted.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**GRADUATE STUDENT COSTS**

For tuition and living costs, please view the Cost of Attendance page (https://financialaid.wisc.edu/cost-of-attendance/). International applicants recommended for admission to the Graduate School are required to show sufficient funds to attend the University during the course of studies (tuition, food and housing, incidentals and health insurance) to be officially accepted by the Graduate School.

**PROGRAM RESOURCES**

The Department of Asian Languages and Cultures offers financial assistance in the forms of fellowships, teaching assistantships (TAships), and project assistantships (PAships). Please make note of the deadline of January 10 for financial assistance consideration. All necessary materials including test scores must be submitted by the deadline.

If you are an international applicant and receive a fellowship, PAship or TAship, please make note that you will likely be required to show additional financial documentation to meet the minimum required for your official acceptance to the Graduate School.

**FELLOWSHIPS**

Most fellowships are handled through the department. However, some are available through sources outside of the department and have different application procedures. Some examples are as follows:

- **Foreign Language & Area Studies (FLAS) Fellowships**: FLAS fellowships are funded by the U.S. Department of Education and administered by the UW’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding.

  Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training.

  Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

  Complete details about FLAS at UW-Madison are available on the FLAS FAQs (https://flas.wisc.edu/FAQS.html) (your first stop) and the FLAS Languages & Coordinators (https://flas.wisc.edu/Languages.html) pages (should you have additional questions).

- **Advanced Opportunity Fellowship (AOF)**: This fellowship is awarded to highly qualified underrepresented students. To be considered for AOF funding, prospective students must be new to the Graduate School and be admissible to a graduate program at the University of Wisconsin-Madison. For further information: https://grad.wisc.edu/diversity/.

- **Project Assistantships**: Availability of PAship vary from one year to another, depending on the types of projects the departmental faculty are engaged in. PAs assist faculty members’ research projects and/or respond to some programmatic needs of the department. For further information: https://grad.wisc.edu/funding/.

- **Teaching Assistantships**: Availability and types of TAship vary from one year to another, depending on the department’s curricular needs and the student enrollment. TAs will support a number of our language and culture courses, typically team-teaching with faculty members. If you are interested in being a teaching assistant in our language programs, you must submit the TA application and necessary materials (1-2 page written autobiography that refers to your prior teaching experience, letter of recommendation that speaks to your teaching experience, video recording of your teaching, if available) through the Graduate School application system by January 10.

- **Other Forms of Financial Aid**: Loans and some on-campus job openings are handled through the Student Financial Services Office (https://financialaid.wisc.edu/). Please contact them to obtain more information.

- Please also refer to the Graduate School’s Funding Information for New and Current Graduate Students (https://grad.wisc.edu/funding/) page for additional information.
Students may also obtain information from the Grants Information Center (https://www.library.wisc.edu/memorial/collections/grants-information) in the Memorial Library, Room 262, 728 State Street, Madison, WI 53706. Phone 608-262-3242.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>3.50 GPA required.</td>
</tr>
</tbody>
</table>

Other Grade Requirements

Ph.D. candidates should maintain a 3.5 GPA in all coursework and may not have any more than two incompletes on their record at any one time.

Assessments and Examinations

Japanese linguistics students need to take-home preliminary exams that cover the following three areas: Japanese applied linguistics / Japanese language education; research methods and data analysis; analysis of an issue that reflects the student's specific research interests.

Japanese literature/culture students are required to take a comprehensive preliminary examination.

All students present a dissertation proposal to the members of the Dissertation Committee and accepted within one semester of passing the preliminary examination.

Language Requirements

Japanese linguistic students are required to demonstrate basic knowledge of the structure of one Asian language other than Japanese. The language requirements must be completed by time when students finish taking the preliminary exams.

Japanese literature students must demonstrate reading proficiency in classical Japanese and one research language.

Doctoral Minor/Breadth Requirements

All doctoral students are required to complete a minor.

**REQUIRED COURSES**

**Linguistics Track**

After completing the M.A. (p. 150), Japanese Linguistics students must take at least three additional courses in Japanese linguistics (http://guide.wisc.edu/courses/e_asian) or related fields at the 700 level or higher. It is recommended that students take a research method course.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Literature Track**

Beyond the M.A. requirements (p. 150), students must take three additional courses in Japanese literature/culture (http://guide.wisc.edu/courses/e_asian) at the 700 level or higher.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the
degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, no more than 7 credits of graduate coursework (as defined above) completed while a UW–Madison undergraduate may be counted to satisfy degree requirements. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval, students are allowed to count no more than 9 credits of graduate coursework (as defined above) taken as a UW–Madison special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PROBATION**

A semester GPA below 3.5 will result in the student being placed on academic probation. If a semester GPA of 3.5 is not attained during the subsequent semester of full time enrollment, the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School. A student on probation may not take the preliminary examination.

**ADVISOR / COMMITTEE**

Starting fall 2018, all students are required to be supervised by co-advisors. One of the co-advisors must be a member of the Japanese Program, but the other co-advisor can be identified from related fields outside of the Japanese Program.

At the point of beginning work on the dissertation, a single dissertation advisor (most likely one of the co-advisors) may be chosen, or the co-advising arrangement may continue for the dissertation as well.

Dissertation committees must have at least four members representing more than one graduate program, three of whom must be UW–Madison graduate faculty or former UW–Madison graduate faculty up to one year after resignation or retirement. At least one of the four members must be from outside of the student’s major program or major field (often from the minor field).

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**OTHER**

n/a

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

The Graduate School Office of Professional Development (OPD) coordinates, develops, and promotes learning opportunities to foster the academic, professional, and life skills of graduate students and postdoctoral researchers and scholars.

Professional development topics include Individual Development Plans (https://grad.wisc.edu/pd/idp), communication, mentoring, grant writing, dissertation writing, career exploration, job search strategies, and more. OPD collaborates with the Writing Center, Libraries, DoIT Software Training for Students, Delta, career centers, and others to provide a wealth of resources and events tailored to the needs of UW–Madison graduate students.

More information on campus resources for student professional development is available at Graduate Student Professional Development (https://my.grad.wisc.edu/DiscoverPD), an innovative tool for UW-Madison graduate students to advance their academic and professional goals. DiscoverPD introduces nine areas (or "facets") of professional development, includes a self-assessment, and provides a customized report of areas of strength and weakness. The report comes with recommendations to help graduate students strengthen their ability within each area.

More information on campus resources for student professional development is available at Graduate Student Professional Development (http://grad.wisc.edu/pd). Students may keep up-to-date by reading GradConnections (https://grad.wisc.edu/new-students), the weekly newsletter for graduate students, and bookmarking the Events Calendar (https://grad.wisc.edu/events) to keep tabs on upcoming workshops of interest.

**LEARNING OUTCOMES**

1. Demonstrate a thorough and in-depth understanding of research problems, potentials, and limits with respect to theory, knowledge, or practice in at least one of the following areas of study. Japanese literature and culture, Japanese linguistics, and Transasian studies.
2. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the specialized field(s).
3. Create scholarship and advance knowledge that makes a substantive contribution to the field(s).
4. Articulate and communicate complex ideas in a clear and understandable manner to both specialized and general audience.
5. Recognize, apply, and foster ethical and professional conduct.

ASTRONOMY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

• Astronomy, Doctoral Minor (p. 157)
• Astronomy, M.S. (p. 157)
• Astronomy, Ph.D. (p. 160)

PEOPLE

Faculty: Professors Heinz (chair), Barger, Bershady, Heinz, Lazarian, Mathieu, Stanimirovic, Wilcots, Zweibel; Associate Professor Townsend, Tremonti, D’Onghia.

ASTRONOMY, DOCTORAL MINOR

REQUIREMENTS

Graduate students from other programs who wish to minor in astronomy should ask the department to assign them a minor professor. The minimum requirement for a minor is 10 credits from courses at or above the 500 level offered by the Department of Astronomy, to include both ASTRON 500 Techniques of Modern Observational Astrophysics and ASTRON 700 Basic Astrophysics I.

PEOPLE

Faculty: Professors Heinz (chair), Barger, Bershady, Heinz, Lazarian, Mathieu, Stanimirovic, Wilcots, Zweibel; Associate Professor Townsend, Tremonti, D’Onghia.

ASTRONOMY, M.S.

The Department of Astronomy offers the doctor of philosophy in astronomy. Although a master’s degree is offered, students are not admitted for a terminal master’s degree.

The department has a long-standing reputation as one of the finest graduate astronomy and astrophysics programs in the United States. The program provides each student with a broad knowledge of modern observational and theoretical astrophysics, while emphasizing the development of independent research skills. Beginning with the first year in the program, graduate students play an active role in the department’s research programs and have access to all research facilities. As teaching assistants, they also acquire experience as astronomy educators.

The faculty are engaged in a broad range of observational and theoretical research. Topics of study include dynamical phenomena of massive stars; binary star evolution; dynamics of star clusters and star forming regions; compact objects; the interstellar and intergalactic medium; star formation; plasma astrophysics; computational fluid mechanics; magnetic fields; turbulence; the structure, kinematics, and stellar populations of nearby galaxies; active galactic nuclei; galactic winds
and chemical evolution; galaxy clusters; galaxy formation and evolution; the star formation and black hole accretion history of the universe; and the development of innovative astronomical instrumentation. More information is available on the department website.

RESEARCH FACILITIES
Astronomical observations at UW–Madison trace their origin to the 15-inch refractor of Washburn Observatory, founded on the campus in 1878, and still open for public viewing. Wisconsin subsequently pioneered a multi-wavelength approach to astronomical observation. Faculty, research staff, and students are frequent observers on X-ray, ultraviolet, optical, infrared, radio, and submillimeter telescopes around the globe and in space. The department currently participates in the operation of a number of research-class observing facilities and is actively engaged in the development of cutting-edge instrumentation.

The university is a major partner in the WIYN telescope, an advanced technology 3.5m telescope at Kitt Peak, Arizona, optimized for wide-field imaging and spectroscopy, and in the 11m Southern African Large Telescope (SALT), the largest single aperture optical telescope in the Southern Hemisphere. The university is also a partner in the Sloan Digital Sky Survey IV, a massive spectroscopic survey of the distant Universe, nearby galaxies, and stars in the Milky Way. The department is actively involved in ASKAP and MEERKAT, precursor experiments for an array of radio telescopes one square kilometer in size.

The department has a long history of developing astronomical instrumentation for both ground and space-based facilities. Current efforts center on the development of a near-infrared arm for the Robert Stobie Spectrograph on SALT, and the design and testing of fiber bundle arrays for the Sloan Digital Sky Survey. UW scientists are also continuing to develop and operate an innovative and highly successful Star Tracker for sounding rocket and balloon-borne experiments. Technical support is provided by in-house electronics and machine shops.

The theory group maintains a variety of facilities to support numerical simulations. The main workhorse is a 72-node, 576-core cluster optimized for tightly coupled problems, such as hydrodynamics and magneto-hydrodynamics. A number of smaller clusters are used for development, analysis and three-dimensional visualization.

ADMISSIONS
This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D (p. 160).

FUNDING
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Breadth Requirement
All M.S. students are required to complete 12 credits of coursework in relevant departments outside of astronomy. The coursework will normal be at the 400 level and above although special exceptions may be made in the case where 300-level courses are needed to satisfy prerequisites. At least two courses must be at the 600 level and above. Courses in departments other than physics should be approved by the student’s mentoring committee (or the graduate advisor if the mentoring committee has not yet been formed.)

Policies

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES
GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (http://www.astro.wisc.edu/grad-students/phd-program) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK
Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 17 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

 UW–Madison Undergraduate
Up to 7 credits numbered 700 or above taken as a UW–Madison undergraduate degree are allowed to count toward the degree.

 UW–Madison University Special
With program approval, students are allowed to count no more than 15 credits of coursework numbered 400 or above as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's is not allowed to satisfy requirements.

PROBATION
A grade of C or lower in a core course will result in the student being placed on academic probation. This is removed after the next grade of B or better in a core course. Grades of C or lower in two or more core courses will result in dismissal.

A semester GPA below 3.0 will result in the student being placed on academic probation. This will be removed if the student attains a GPA of 3.0 or above in the subsequent semester.

ADVISOR / COMMITTEE
All students will be assigned a mentoring committee consisting of the student’s advisor and two other faculty members. Students are strongly encouraged (but not required) to meet with their mentoring committees twice a year.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years will be dismissed from the program.

OTHER
University fellowships or departmental assistantships are offered, contingent on satisfactory progress. The length of guaranteed student support is four continuous years for those with no prior graduate work. Three continuous years of funding are guaranteed for those with one year or more of prior graduate work. It is almost always the case that students remain fully funded through their thesis defense.

PROFESSIONAL DEVELOPMENT
GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Demonstrate a broad understanding of core astrophysical topics including gravitational dynamics; radiative processes; the interstellar medium; the formation, structure, and evolution of stars and galaxies; cosmology; and observational and numerical techniques.
The department currently participates in the operation of a number of research-class observing facilities and is actively engaged in the development of cutting-edge instrumentation.

The university is a major partner in the WIYN telescope, an advanced technology 3.5m telescope at Kitt Peak, Arizona, optimized for wide-field imaging and spectroscopy, and in the 11m Southern African Large Telescope (SALT), the largest single aperture optical telescope in the Southern Hemisphere. The university is also a partner in the Sloan Digital Sky Survey IV, a massive spectroscopic survey of the distant Universe, nearby galaxies, and stars in the Milky Way. The department is actively involved in ASKAP and MEERKAT, precursor experiments for an array of radio telescopes one square kilometer in size.

The department has a long history of developing astronomical instrumentation for both ground and space-based facilities. Current efforts center on the development of a near-infrared spectrograph on SALT, and the design and testing of fiber bundle arrays for the Sloan Digital Sky Survey. UW scientists are also continuing to develop and operate an innovative and highly successful Star Tracker for sounding rocket and balloon-borne experiments. Technical support is provided by in-house electronics and machine shops.

The theory group maintains a variety of facilities to support numerical simulations. The main workhorse is a 72-node, 576-core cluster optimized for tightly coupled problems, such as hydrodynamics and magneto-hydrodynamics. A number of smaller clusters are used for development, analysis and three-dimensional visualization.

RESEARCH FACILITIES

Astronomical observations at UW–Madison trace their origin to the 15-inch refractor of Washburn Observatory, founded on the campus in 1878, and still open for public viewing. Wisconsin subsequently pioneered a multi-wavelength approach to astronomical observation. Faculty, research staff, and students are frequent observers on X-ray, ultraviolet, optical, infrared, radio, and submillimeter telescopes around the globe and in space. The department currently participates in the operation of a
mathematics through differential equations. Applicants are judged on the basis of previous academic record, letters of recommendation, personal statement, research experience, and Graduate Record Exam (GRE) scores. Admission is competitive and is for the fall only.

Applicants for admission must submit the following via the Graduate School online application:

• Transcripts of all undergraduate work
• Statement on reasons for graduate study in astronomy
• Three letters of recommendation from people well acquainted with past academic work
• Graduate Record Exam (GRE) scores (general test)
• International students must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS)

Financial support is provided through university fellowships (incoming graduate students only) or department assistantships. To compete for fellowships awarded by the university, students must submit all application materials (including the GRE scores) via the online Graduate School Application by December 31.

## Funding

The Graduate School offers a range of financial support options to help students afford their education. This includes university fellowships, departmental assistantships, and external scholarships. Be sure to check with individual programs for specific funding opportunities.

## Program Resources

The Graduate School provides comprehensive resources to support students through their graduate studies. These resources include access to various academic programs, campus facilities, and learning support services. For more information, visit the Graduate School website or contact the Program Office.

## Requirements

### Minimum Graduate School Requirements

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

### Major Requirements

#### Mode of Instruction

<table>

<tbody>
<tr>
<td>Yes</td>
<td>No</td>
<td>No</td>
<td>No</td>
<td>No</td>
</tr>
</tbody>
</table>

**Mode of Instruction Definitions**

*Evening/Weekend*: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

### CURRICULAR REQUIREMENTS

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Credit Requirement</td>
<td>51 credits</td>
</tr>
<tr>
<td>Minimum Residence Credit Requirement</td>
<td>32 credits</td>
</tr>
<tr>
<td>Minimum Graduate Coursework Requirement</td>
<td>Half of degree coursework (26 credits out of 51 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (<a href="https://registrar.wisc.edu/course-guide/">https://registrar.wisc.edu/course-guide/</a>).</td>
</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>3.00 GPA required.</td>
</tr>
<tr>
<td>Other Grade Requirements</td>
<td>A GPA of at least 3.0 is required in the core (required) courses and a student may have no more than 3 credits of a C or below. A grade of S must be received in ASTRON 990 Research and Thesis before the preliminary examination can be taken.</td>
</tr>
</tbody>
</table>

**Assessments and Examinations**

Students take a preliminary examination after completing their second academic year. Possible scores are "high pass," "low pass," and "fail." Students attaining a high pass are eligible to continue toward their Ph.D. Students obtaining a low pass may retake the exam or portions of the exam pending approval by the faculty. If this approval is not granted or students do not wish to retake the exam, they may complete the requirements for a terminal masters. Students who fail the exam will be dismissed from the program.

Doctoral candidates must submit a written dissertation proposal and make an oral presentation to the faculty by the end of their third academic year. A written dissertation must be submitted and successfully defended before a faculty committee.
All doctoral students are required to complete a minor. They may either meet the minor requirements set by an external department (typically physics), or they may choose a distributed minor. In the latter case 12 credits must be taken from two or more relevant departments outside of astronomy. The coursework will normally be at the 400 level and above although special exceptions may be made in the case where 300-level courses are needed to satisfy prerequisites. At least two courses must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide. Courses for the distributed minor or for minors outside of physics should be approved by the student's mentoring committee (or the graduate advisor if the mentoring committee has not yet been formed.)

## POLICIES

### GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

### MAJOR-SPECIFIC POLICIES

#### GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (http://www.astro.wisc.edu/gradstudents/phd-program) is the repository for all of the program's policies and requirements.

### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 34 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### UW–Madison Undergraduate

Up to 7 credits numbered 700 or above from a UW–Madison undergraduate degree are allowed to count toward the degree.

### UW–Madison University Special

With program approval, students are allowed to count no more than 15 credits of coursework numbered 400 or above taken as a UW–Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PROBATION

A grade of C or lower in a core course will result in the student being placed on academic probation. This is removed after the next grade of B or better in a core course. Grades of C or lower in two or more core courses will result in dismissal.

A semester GPA below 3.0 will result in the student being placed on academic probation. This will be removed if the student attains a GPA of 3.0 or above in the subsequent semester.

### ADVISOR / COMMITTEE

All students will be assigned a mentoring committee consisting of the student's advisor and two other faculty members. Students are strongly encouraged (but not required) to meet with their mentoring committees twice a year in the first two years and annually thereafter.

### CREDITS PER TERM ALLOWED

15 credits

### TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

### OTHER

University fellowships or departmental assistantships are offered, contingent on satisfactory progress. The length of guaranteed student support is four continuous years for those with no prior graduate work. Three continuous years of funding are guaranteed for those with one year or more of prior graduate work. It is almost always the case that students remain fully funded through their thesis defense.

### PROFESSIONAL DEVELOPMENT

#### GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

### LEARNING OUTCOMES

1. Demonstrate a broad understanding of core astrophysical topics including gravitational dynamics; radiative processes; the interstellar medium; the formation, structure, and evolution of stars and galaxies; cosmology; and observational and numerical techniques.
2. Demonstrate academic mastery in their area of concentration, including a deep understanding of current theories, recent findings, and their broader implications.
3. Evaluate scientific literature and use it to construct theoretical frameworks and testable predictions for their own research projects.
4. Foster ethical and professional conduct.
5. Develop and complete original research that substantively advances a specific field of study. In so doing, they will cultivate their critical thinking skills, creativity, and independence.
6. Utilize modern instrumental, observational, or theoretical research techniques in their analysis.
7. Formulate ideas, designs, or techniques that advance the boundaries of knowledge within their field.
8. Critically evaluate the robustness and limits of conclusions drawn from their research and the potential for future studies.
9. Write clear and concise research articles for publication in refereed journals.
10. Critically evaluate the robustness and limits of conclusions drawn from their research and the potential for future studies.
11. Write clear and concise research articles for publication in refereed journals.
12. Deliver articulate oral presentations on their research to diverse audiences ranging from academic departments to the general public.
13. Serve as teaching assistants for at least one semester. Communicate scientific ideas in a clear and understandable manner, employ techniques that enhance student engagement, and develop and carry out assessments of student progress.

PEOPLE

Faculty: Professors Heinz (chair), Barger, Bershady, Heinz, Lazarian, Mathieu, Stanimirovic, Wilcots, Zweibel; Associate Professor Townsend, Tremonti, D’Onghia.

ATMOSPHERIC AND OCEANIC SCIENCES, DOCTORAL MINOR

REQUIREMENTS

The graduate chair or any other professor in the Department of Atmospheric and Oceanic Sciences may serve as a minor professor on a Ph.D. committee. The graduate chair will certify that the minor course requirements have been met.

The minor requirement is 10 or more credits of any ATM OCN course at or above the 400 level. Overall GPA for the minor must be at least 3.0.

ATM OCN courses assume a prerequisite background in college physics (two semesters), calculus (three semesters), and chemistry (one semester).

ATMOSPHERIC AND OCEANIC SCIENCES, M.S.

The majority of our graduate students get an M.S. degree, which can be earned as part of the path toward a Ph.D. degree or earned as a terminal degree opening significant opportunities within the public and private sectors.

The department currently has 11 faculty members, approximately 60 graduate students, and many staff members involved in large and energetic research programs. Particular strengths include climate/earth system science, geophysical fluid dynamics, remote sensing, planetary boundary layer, atmospheric chemistry, weather systems and prediction, and oceanography. Course concentrations within the existing degree program are offered in the areas of weather prediction, earth system science, remote sensing, and oceanography.

The department has close ties with the Center for Climatic Research, the Nelson Institute for Environmental Studies, Center for Sustainability and the Global Environment, Space Science and Engineering Center,

Job opportunities have been strong within the United States for people with graduate degrees in atmospheric and oceanic sciences. The government hires a large number of meteorologists with advanced degrees, as do many private forecasting companies and air quality consulting firms. In addition, there are openings for experts at various government and university research labs.

ADMISSIONS

ADMISSION REQUIREMENTS

Graduate Record Exam (GRE)

The general test is required. This includes verbal, quantitative and analytical parts.

Admitted students generally have quantitative scores of at least 151 (650 prior scale, 56% percentile), verbal reasoning scores of 152 (490 prior scale, 56% percentile) and analytical scores of 4.0 (48% percentile). Scores should not be older than five years.

Prerequisites for Graduate Work

Math—three semesters college calculus sequence for science/engineering majors plus differential equations

Physics—two semesters calculus-based general college physics

Chemistry—one semester general chemistry

A minimum undergraduate GPA of 3.0 is required for admission. The Graduate School computes the GPA based on approximately the last 60 semester hours (two years) of undergraduate work.

International students must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Prior work in atmospheric or oceanic sciences is not required, but it is beneficial. Knowledge of computer programming is recommended.

Applications are also judged on academic record, letters of recommendation, prior research experience, and the statement of purpose.

Please see the ATM OCN website (http://aoswebsite.aos.wisc.edu/academics/graduate/admission) for additional information on admission requirements and the application process.

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

### REQUIRED COURSES

For both the thesis and non-thesis tracks\(^1\) there is a set of six core courses which are highly recommended as a good foundation for graduate degrees in the Department of Atmospheric and Oceanic Sciences. A GPA of 3.0 must be maintained for both options.

The following is a listing of the core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATM OCN 610</td>
<td>Geophysical Fluid Dynamics I</td>

</tr>
<tr>
<td>ATM OCN 650</td>
<td>Analysis of Atmospheric Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

In consultation with their advisor, every student seeking a M.S. degree, will design a curriculum that must be approved by their advisor.

#### M.S.–Thesis track\(^1\):

- 12 of the credits must be taken in the department as lecture courses numbered 400 or above. Seminars, research, independent study or directed reading courses do not satisfy this requirement. A grade of B or greater is required for these 12 credits.
- An additional 12 (at least) credits may be taken in or out of the department. These credits can include seminars, core courses, and other courses taken as a graduate student. Research credits do not count toward this requirement.
- Up to 6 research credits in the department can be counted (but are not required) toward the 30 credit requirement.

#### M.S.–Non-thesis track\(^1\):

- At least 18 credits must be from courses numbered 400 or above in the department. Seminars, research, independent study or directed reading courses do not satisfy this requirement.
- An additional 6 (at least) credits must be from courses outside of the department. Seminars and research credits do not satisfy this requirement.
- A total of 30 credits must be taken from non-seminar courses. Research credits do not contribute to this requirement.
- Up to 6 credits can be from seminar courses in any department, from research in the atmospheric and oceanic sciences department only if approved by the student’s advisor, or from independent study or directed reading in any department. Up to 2 of these 6 credits may be awarded for prior professional experience, or by an internship conducted as part of the M.S. program.

\(^1\) These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

---

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

#### MAJOR-SPECIFIC POLICIES

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (http://aoswebsite.aos.wisc.edu/academics/graduate/handbook) is the repository for all of the program's policies and requirements.

**Prior Coursework**
Graduate Work from Other Institutions

M.S.–Thesis track 1: With program approval, students are allowed to count no more than 14 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

M.S.–Non-thesis track 1: With program approval, students are allowed to count no more than 17 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, students are allowed to count no more than 7 credits of graduate coursework taken as an undergraduate at UW-Madison, as long as those credits were not applied toward an undergraduate degree. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master’s is not allowed to satisfy requirements.

PROBATION

A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

Probation is based on student status. The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 31 and completed by April 30. Failure to do so will result in a hold being placed on the student’s registration.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

The M.S. degree should be completed within three years. For additional time constraints, please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

OTHER

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

AOS Resources for Professional Development

Please go to the AOS handbook (http://aoswebsite.aos.wisc.edu/academics/graduate/handbook/career) to see the professional development resources available to our graduate students.

LEARNING OUTCOMES

1. Acquisition of a broad foundation of knowledge contained in our graduate-level core courses: ATM OCN 610 Geophysical Fluid Dynamics I, ATM OCN 611 Geophysical Fluid Dynamics II, ATM OCN 630 Introduction to Atmospheric and Oceanic Physics, ATM OCN 640 Radiation in the Atmosphere and Ocean, and ATM OCN 660 Introduction to Physical Oceanography.
2. Have learned the historical origin and significance of certain issues central to the field by taking a special seminar course (ATM OCN 900 Seminar-Meteorology).
3. Have developed a good problem-solving skill that prepares them to become efficient supporting scientists for research institutions or effective career atmospheric professionals in operational units of government or commercial institutions.
4. Articulate, critique, or elaborate the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
5. Recognize and apply principles of ethical and professional conduct.

ATMOSPHERIC AND OCEANIC SCIENCES, PH.D.

A doctor of philosophy degree is offered with a major in atmospheric and oceanic sciences. Candidates may enter with a master’s degree or, for more qualified students, directly after earning a bachelor’s degree.

In atmospheric and oceanic sciences, classical physics is applied to describe the behavior of the fluids that compose the atmosphere/ocean/earth system. Influences of solar and terrestrial radiation, clouds and storms, natural and anthropogenic pollution, dynamical forces and turbulence can affect both the weather and longer climatic variations. The department uses computer simulations, passive and active remote sensing, in situ weather instruments, and laboratory experiments to study atmospheric phenomena.

The department has 11 faculty members, approximately 60 graduate students, and many staff members involved in large and energetic research programs. Particular strengths include climate/earth system science, geophysical fluid dynamics, remote sensing, planetary boundary layer, atmospheric chemistry, weather systems and prediction, and oceanography. Course concentrations within the existing degree program are offered in the areas of weather prediction, earth system science, remote sensing, and oceanography.

Course and research emphasis of the department’s oceanographic component is in physical oceanography, ocean-atmosphere climate dynamics, and marine geochemical cycles. A concentration of courses in oceanography can be used to satisfy the atmospheric and oceanic sciences doctoral minor.

The department has close ties with the Center for Climatic Research, the Nelson Institute for Environmental Studies, Center for Sustainability and the Global Environment, Space Science and Engineering Center, Cooperative Institute for Meteorological Satellite Studies, National Weather Service, and the State Climatologist Office.

Financial assistance is available to qualified students. The typical sources of funding are research and teaching assistantships. All applicants are considered for any available assistantships. Financial aid is handled separately from admission in the department. Students generally hear about their admission status well before any decision about financial aid is made.

Job opportunities have been strong within the United States for people with graduate degrees in atmospheric and oceanic sciences. The government hires a large number of meteorologists with advanced degrees, as do many private forecasting companies and air quality consulting firms. In addition, there are openings for experts at various government and university research labs.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School: Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

ADMISSION REQUIREMENTS

Graduate Record Exam (GRE)

The general test is required. This includes verbal, quantitative and analytical parts.

Admitted students generally have quantitative scores of at least 151 (650 prior scale, 56% percentile), verbal reasoning scores of 152 (490 prior scale, 56% percentile) and analytical scores of 4.0 (48% percentile). Scores should not be older than five years.

Prerequisites for Graduate Work

Math—three semesters college calculus sequence for science/engineering majors plus differential equations

Physics—two semesters calculus-based general college physics

Chemistry—one semester general chemistry

A minimum undergraduate GPA of 3.0 is required for admission.

International students must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Prior work in atmospheric or oceanic sciences is not required, but it is beneficial. Knowledge of computer programming is recommended.

Applications are also judged on academic record, letters of recommendation, prior research experience, and the statement of
purpose. PhD students must have an advisor identified before they can be recommended for admission.

For additional information on apply for admission, please go to the AOS website. ([http://aoswebsite.aos.wisc.edu/academics/graduate/admission](http://aoswebsite.aos.wisc.edu/academics/graduate/admission))

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information ([https://grad.wisc.edu/funding](https://grad.wisc.edu/funding)) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Financial assistance is available to qualified students. The typical sources of funding are research and teaching assistantships. All applicants are considered for any available assistantships. Financial aid is handled separately from admission in the department. Students generally hear about their admission status well before any decision about financial aid is made.

Prospective students should see the ATM OCN website ([http://aoswebsite.aos.wisc.edu/academics/graduate/stipends-fees](http://aoswebsite.aos.wisc.edu/academics/graduate/stipends-fees)) for additional funding information.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

<td>3.00 GPA required.</td>
</tr>
<tr>
<td>Other Grade Requirements</td>
<td>All grades must be C or better to count towards the degree.</td>
</tr>
</tbody>
</table>

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades.

Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

**Assessments and Examinations**

Students wishing to pursue a Ph.D. are required to take a qualifying examination prior to forming a Ph.D. committee (see above regarding the formation of a Ph.D. committee). For more information about the qualifying examination, please consult the department’s Qualifying Exam FAQs ([http://www.aos.wisc.edu/education/Qual_ExamFAQ.html](http://www.aos.wisc.edu/education/Qual_ExamFAQ.html)).

Ph.D. students are required to complete a preliminary examination by the Ph.D. committee prior to becoming a Ph.D. candidate. Prior to the preliminary examination the student works with the major professor to define an appropriate research topic. This topic is written into a several page research proposal that is given to the Ph.D. committee members a few weeks prior to the preliminary examination.

**Language Requirements**

No language requirements.
DOCTORAL MINOR/BREADTH REQUIREMENTS

All doctoral students are required to complete two broadening requirements: a minor, and a supplemental requirement.

Minor requirement:
A minor program consists of Option A (external) 10 or more course credits in one discipline or Option B (distributed) 10 or more credits in one or more departments and can include coursework in the major department. Selection of Option A requires approval of the minor department. Selection of Option B requires approval of the major department. The department monitors minor requirements.

Supplemental requirement:
The supplemental requirement is specified by the Ph.D. committee during the first Ph.D. committee meeting. Examples include (but are not limited to): an augmented minor, substantial foreign language skill, significant professional or field experience, or interdisciplinary coursework.

REQUIRED COURSES
At least 15 credits are from lecture courses numbered 600 or above in the department. Seminars, research credits, and audited courses are not included.

An additional 10 (at least) credits are taken to satisfy the minor requirement (see below). These credits may be from the department, but cannot be used to satisfy the first requirement (15 credits from lecture courses numbered 600 or above in the department).

Students are required to take ATM OCN 900 Seminar-Meteorology.

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (http://aoswebsite.aos.wisc.edu/academics/graduate/handbook) is the repository for all of the program’s policies and requirements.

Prior Coursework
Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 19 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, students are allowed to count no more than 7 credits of graduate coursework taken as an undergraduate at UW–Madison, as long as those credits were not applied toward an undergraduate degree. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION
A semester GPA below 3.0 will result in the student being placed on academic probation. If a semester GPA of 3.0 is not attained during the subsequent semester of full time enrollment (or 12 credits of enrollment if enrolled part-time) the student may be dismissed from the program or allowed to continue for 1 additional semester based on advisor appeal to the Graduate School.

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

Probation is based on student status. The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
A Ph.D. committee is required in order to become a Ph.D. student. The student, under the guidance of the major professor, must form a committee of five professors consisting of the major professor, three other professors from our department, and one professor from outside the department (often from the minor department). Additional members may be added, if appropriate. Adjunct faculty can be included among the five committee members. If the committee dissolves for any reason, the candidate cannot continue in the Ph.D. program unless a new committee is formed.

The first meeting of the Ph.D. committee should normally occur after the student completes the qualifying examination, but within the same semester as the qualifying examination. Potential committee members, in deciding whether to form a Ph.D. committee, use results from the qualifying examination as well as additional information about a student’s suitability for pursuing a Ph.D.
All students are required to conduct a yearly progress report meeting with their thesis committee after passing the preliminary examination.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
The Ph.D. degree should be completed within five years after establishing a Ph.D. committee. For additional time constraints please consult the Graduate School Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy).

OTHER
n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Have an in-depth knowledge of the fields that are relevant to their research areas by taking appropriate courses not only in atmospheric and oceanic sciences, but also in related disciplines including mathematics, statistics, physics, and engineering.
2. Ask the right scientific questions: What are the important scientific problems in this field? Can a problem be solved by the available resources in a reasonable time? How to design a scientific approach to tackle the problem?
3. Read original papers of their research field to understand how previous investigators approach the problem and how they can improve on previous results.
4. Articulate research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
5. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
6. Fosters ethical and professional conduct.

BACTERIOLOGY, M.S.
The primary goal of the master of science (M.S.) degree program is to give students a solid understanding of the scientific process and to provide the opportunity to obtain advanced training in microbiology. The master's degree is the terminal degree in this program, and completion of this degree does not allow automatic admission to a Ph.D. program.

This program provides the opportunity to tailor a curriculum of advanced coursework and research to fit the needs of each student, with two different tracks (coursework or research tracks, see below). Students may acquire a general overview of microbiology or may focus on a specialized subject area in microbiology such as bacterial physiology, molecular microbiology, food microbiology, environmental microbiology, biotechnology or medical microbiology. The self-tailored program must meet the requirements of the Department of Bacteriology and the Graduate School for the M.S. degree. Full-time students can expect to complete the M.S. degree in about two years. The M.S. program also can accommodate part-time students with consequent increased time to degree.

The coursework track serves students who want to acquire knowledge about current topics in microbiology primarily in a classwork setting. Examples of students who benefit from this track are those currently employed in research, clinical, or biotechnology labs seeking an advanced degree; lawyers and law students who wish to specialize in biotechnology or environmental law; and students preparing for health professions.

The research track serves students who seek to improve scientific research skills. This track is chosen by laboratory technicians who want advanced technical training; students seeking laboratory skills for employment; and students who desire laboratory experience and advanced coursework before applying to Ph.D. programs.

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES
- Bacteriology, M.S. (p. 170)
- Microbiology, Doctoral Minor (p. 174)
- Microbiology, M.S. (p. 174)

PEOPLE

Faculty: Professors Charles Kaspar (chair), Jean-Michel Ané, Cameron Currie, Timothy Donohue, Marcin Filutowicz, Katrina Forest, Richard Gourse, Eric Johnson, Katherine McMahon, Richard Thomas, Jae-Jue Wang, Karen Wassarman, Jae-Hyuk Yu; Associate Professor Garret Suen; Assistant Professors Daniel Amador-Noguez, Karthik Anantharaman, Briana Burton, Federico Rey, Kalin Vetsigian. In addition, many faculty members from other departments supervise training of graduate students.

ASSOCIATE PROFESSORS
Back, Larissa
A admissions

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

APPLICATION DEADLINES

- To begin fall semester:
  - Early deadline: March 1 (notification by April 1)
  - Regular deadline: June 1 (notification by July 1)
- To begin spring semester:
  - Deadline: October 15 (notification by November 15)

Although students may apply to begin the program in any semester, summer application is not encouraged. Students pursuing the research option who have found a lab in which to carry out their research may apply for summer admission. Students who plan to pursue the coursework option will be considered for summer admission only if they need to take a prerequisite or general requirement course that is offered in the summer.

MINIMUM COURSEWORK FOR ADMISSIONS

Students applying to the program should have taken some or all of these courses prior to admission to the program for either coursework or research tracks. Students may correct deficiencies (up to 6 credits) after admission, but these credits do not apply toward the credits of coursework required for the degree, and all deficiencies must be absorbed before completion of the master's degree.

- Biology: two semesters
- Chemistry: four semesters of chemistry including two organic with a lab component
- Math: one course in math beyond algebra/trigonometry such as calculus, statistics, or computer science
- Physics: two semesters; exceptions will be considered.

The Graduate Record Examination (GRE) is not required for admission to the M.S. program, but scores may be submitted. International students whose undergraduate instruction was not in English must provide evidence of English proficiency by taking the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial aid for students in the M.S. program is not available from the department. Some M.S. students in the research track are supported through their research advisor, but such support is available on a very limited basis.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

There are two tracks for the M.S. degree: one involving primarily formal coursework with no research requirement (coursework option (https://bact.wisc.edu/pro_ms.php?i=ms3)), and the other requiring significant laboratory research with a formal written component describing and analyzing the work performed (research option (https://bact.wisc.edu/pro_ms.php?i=ms4)).

Coursework Track
- At least nine credits of formal coursework must be at the 600 level or above.
- Research (990), special problems (699, 999), and coordinative internship (999) credits may constitute up to nine credits of the 30 required, but cannot be used to satisfy the requirement for nine credits of formal coursework at the 600 or above level.
- General coursework requirements (see above), can be counted towards the 30 credits if taken after entering the program.
- Seminar credits and one-credit courses graded solely on attendance / participation will NOT count toward the 30 credits.
- Students may request to have up to eight graduate microbiology or biochemistry course credits taken prior to entering the MS program apply toward the 30-credit minimum. The student must provide verification that those credits were not used to satisfy any degree, major, or University requirements from any prior degree they have earned. Decisions are made by the M.S. program advisor.

Research Track
- At least ten credits of independent research is required, although more are strongly encouraged.
- Seminar credits and one-credit courses graded solely on attendance / participation will NOT count toward the 30 credits.
- Students may request to have up to three graduate microbiology or biochemistry course credits taken prior to entering the MS program apply toward the 10-credit minimum. The student must provide verification that those credits were not used to satisfy any degree, major, or University requirements from any prior degree they have earned. Decisions are made by the M.S. program advisor.

Note: These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

#### MAJOR-SPECIFIC POLICIES

##### GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

#### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With permission of the program advisor, up to 8 graduate course credits from another university may be applied toward the credit requirements.

**UW–Madison Undergraduate**

No credits from the UW–Madison undergraduate degree may count toward the credit requirements.

**UW–Madison University Special**

No credits from the UW–Madison University Special student career may count toward the credit requirements.

#### PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

#### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects students to meet with their advisor on a regular basis.

### CREDITS PER TERM ALLOWED

15 credits (recommended: only 8–10 credits per semester, or 4–5 credits per summer term)

### TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

### OTHER

The M.S. in Bacteriology program does not provide funding for any student in the program and financial support for master’s students is limited. Because the program is flexible, students are able to work part or full-time at jobs on or off campus while enrolled. Students in the research option may be paid as research assistants by their research mentor if funds are available.

### PROFESSIONAL DEVELOPMENT

#### GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

#### LEARNING OUTCOMES

1. The department’s goal is to ensure that every student demonstrates understanding of the central principles of microbiology and the necessary skills for a professional career in microbiology.
2. The department’s goal is to ensure that every student demonstrates the ability to articulate and critique the approaches and findings in the microbiology literature.
3. The department’s goal is to ensure that every student demonstrates capability to identify sources, generate, and assemble data or evidence pertaining to questions in microbiology.
4. The department’s goal is to ensure that every student demonstrates effective writing and speaking skills.
5. The department’s goal is to ensure that every student demonstrates personal and professional ethics.

### PEOPLE

**Faculty:** Professors Charles Kaspar (chair), Jean-Michel Ané, Cameron Currie, Timothy Donohue, Marcin Filutowicz, Katrina Forest, Richard Gourse, Eric Johnson, Katherine McMahon, Michael Thomas, Jade (Jue) Wang, Karen Wassarman, Jae-Hyuk Yu; Associate Professor Garret Suen; Assistant Professors Daniel Amador-Noguez, Karthik Anantharaman, Briana Burton, Federico Rey, Kalin Vetsigian. In addition, many faculty members from other departments supervise training of graduate students.
Microbiology, Doctoral Minor

Requirements

The minor in microbiology requires 10 credits of courses at the 300 level or above offered by the departments of Medical Microbiology and Immunology (M M & I courses [http://guide.wisc.edu/courses/m_m_i]) or Bacteriology (MICROBIO courses [http://guide.wisc.edu/courses/microbio]). At least half of the credits must come from the Microbiology Doctoral Training Program (MDTP) course list (p. 177). At least one member of the student's thesis committee must be faculty in either the bacteriology or medical microbiology and immunology departments, and will serve as the student's minor advisor.

People

Faculty: Professors Nancy Keller (program director, Medical Microbiology and Immunology), and Garret Suen (vice-director, Bacteriology) lead the current MDTP Steering Committee. For a list of more than 90 participating faculty, see the program website (http://www.microbiology.wisc.edu) or contact the program office.

Microbiology, M.S.

This award is a non-admitting, terminal degree for Ph.D. students in Microbiology (p. 176) who have completed appropriate coursework but leave the program prior to completion of the doctorate degree requirements.

Admissions

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (p. 176).

Funding

Graduate School Resources

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Requirements

Minimum Graduate School Requirements

Assessments and Examinations

Contact the program for information on required assessments and examinations.

Language

Contact the program for information on any language requirements.
REQUIRED COURSES
Students can only earn the M.S. in Microbiology on the path to the Ph.D. Please refer to the course requirements for the Ph.D. (p. 177)

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://microbiology.wisc.edu/students_current.php) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
For well-prepared advanced students, the program may accept prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison. Coursework earned more than five years prior to admission to the master’s degree may not be used to satisfy requirements.

UW–Madison Undergraduate
For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned more than five years prior to admission to the master’s degree may not be used to satisfy requirements.

UW–Madison University Special
The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned more than five years prior to admission to the master’s degree may not be used to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
We offer funding to all students in the program through fellowships, trainees and research assistantships.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Demonstrate a scientific understanding of the field of microbiology and/or immunology.
2. Identify and utilize scientific methodologies and practices appropriate to the field of study.
3. Articulate scientific theories, methodologies and research approaches in microbiology and/or immunology.
4. Identify sources and assemble evidence pertaining to questions or challenges in the field of microbiology and/or immunology.
5. Evaluate and synthesize information pertaining to questions or challenges in the field of microbiology and/or immunology.
6. Communicate clearly in ways appropriate to the field of scientific study.
7. Recognize, understand and apply principles of ethical and professional conduct appropriate to the field of study.
8. Understand and apply principles of laboratory safety in the field of study.
Faculty: Professors Garret Suen (program director, Bacteriology), and JD Sauer (vice-director, Medical Microbiology and Immunology) lead the current MDTP Steering Committee. For a list of more than 90 participating faculty, see the program website (http://www.microbiology.wisc.edu) or contact the program office.

Microbiology, Ph.D.

The Department of Bacteriology in the College of Agricultural and Life Sciences and the Department of Medical Microbiology and Immunology in the School of Medicine and Public Health (see separate course listings) administer the interdepartmental microbiology doctoral training program (MDTP). Incoming students have the opportunity to do laboratory rotations with any of the primary faculty, affiliate faculty, and trainers from multiple departments. This group includes more than 90 faculty members in numerous departments and programs involved in microbiology research and graduate training. In addition to this breadth of opportunities in microbiology research training, the program also encompasses graduate courses offered by both departments.

The Department of Bacteriology and the Department of Medical Microbiology and Immunology offer Ph.D. degrees through the microbiology doctoral training program. The Department of Bacteriology in the College of Agricultural and Life Sciences and the Department of Medical Microbiology and Immunology in the School of Medicine and Public Health serve as lead departments for the joint cross-campus microbiology doctoral training program.

Incoming students have the opportunity to do laboratory rotations with any of the primary faculty, affiliate faculty, or trainers from multiple departments. This group includes more than 90 faculty members in numerous departments and programs involved in microbiology research and graduate training. In addition to this breadth of opportunities in microbiology research training, the program also encompasses graduate courses offered by both departments. Please refer to the separate Microbiology listing in this catalog for more detailed information, or visit the program website.

The Ph.D. program prepares graduates for research and teaching positions in universities and colleges, for industry or government, and for clinical microbiology.

Research emphasis includes, but is not limited to, prokaryotic (bacteria and archaea), viral and lower eukaryotic systems (fungi, oomycetes, and parasites); antibiotics and antibiotic resistance, biofilm formation; bioinformatics and computational biology; biotechnology and industrial microbiology, including biofuels; cell–cell signaling; cell motility and chemotaxis; DNA, including nucleic acid synthesis, DNA replication and recombination; food microbiology; fungal development, pathogenesis, and metabolism; gene expression and its regulation; immunology; microbial physiology and metabolism; macrophage activation and other cell immune systems; mechanisms of microbial persistence; mechanisms of pathogenesis; microbial cell division; microbial ecology; microbial microbiota and metagenomics; nitrogen fixation; quorum sensing; RNA, including molecular structure–function relationships of transfer RNA, small RNAs, RNA polymerase, and other components of transcription and translation; secondary metabolism; structural microbiology; symbioses, including host–microbe symbioses, plant–microbial interactions, animal–microbial interactions, microbe–microbe interactions; and virology, including host–virus interactions. Dissertation research emphasizes creative and innovative problem-solving using basic knowledge acquired through scientific interactions and collaborations in addition to a thorough understanding of the scientific literature.

In order to better train MDTP students for microbiology-related professions, students need a chance to gain knowledge and experience not just in academic research, but also in other fields where their microbiology education may be put to good use.

The professional development options encompass many professional development opportunities for MDTP students beyond academic research and teaching. Opportunities for professional development can consist of course work, an internship, a summer workshop, outreach experiences, or a second teaching-practicum experience.

Double Degree

Students may complete a double Ph.D. degree in MDTP and another program on campus under the following conditions. The student must apply for admission to MDTP by the program’s yearly deadline and be admitted using the same criteria applied to other applicants. The student must complete all requirements of the MDTP program in addition to the requirements for the other program sponsoring the double degree. The student must pass a different preliminary examination in each program. The student’s dissertation committee and preliminary examination must adhere to MDTP guidelines. The Ph.D. advisor must be a trainer in the MDTP. A significant portion of the student’s dissertation research must be completed in the laboratory of the Ph.D. advisor. The student’s program, including any deviations, must be approved by the steering committee.

Admissions

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions are a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements). of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>

<tr>
<td>GRE (Graduate Record Examinations)</td>
<td>Not required.</td>
</tr>
<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/#english-proficiency">https://grad.wisc.edu/apply/requirements/#english-proficiency</a>).</td>
</tr>
<tr>
<td>Other Test(s) (e.g., GMAT, MCAT)</td>
<td>n/a</td>
</tr>
</tbody>
</table>
Admission to MDTP is highly competitive. To qualify for admission to the microbiology program, an applicant should have a bachelor’s degree from an accredited institution with a GPA of at least 3.0 (on a 4.0 scale) that includes two semesters of biology (can include microbiology); one semester of genetics; four semesters of chemistry, including two semesters of organic chemistry with lab component; one semester of biochemistry; two semesters of physics; and two semesters of calculus or one semester of calculus and one semester of statistics. Deficiencies in excess of 6 semester credits should be removed before enrollment. An online application must be accompanied by a thoughtful essay, strong letters of recommendation from three persons who are familiar with the applicant’s academic ability and who can assess the applicant’s potential for a research career, transcripts from all undergraduate and graduate institutions attended, and an academic resume or CV. Previous research experience is strongly recommended. Students whose undergraduate degree was obtained in an institution in which English was not the primary language of instruction must provide evidence of English proficiency by taking the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam.

UIW–Madison Undergraduate

For well-prepared advanced students, the program may decide to accept up to 6 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

UIW–Madison University Special

The program may decide to accept up to 9 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis. A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may by require to take another preliminary examination and to be admitted to candidacy a second time.

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://microbiology.wisc.edu/students_current.php) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, up to 9 credits of coursework may be accepted from other graduate institutions. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.
OTHER

We offer funding to all students in the program through fellowships, trainees and research assistantships.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

Purpose: To prepare MDTP students for microbiology related careers.

Background. In order to better train MDTP students for microbiology-related professions, the Students need a chance to gain knowledge and experience not just in academic research, but also in other fields where their microbiology education may be put to good use.

The Delta Program in teaching has been a great asset to MDTP students interested in teaching as a career, allowing students to take classes and gain experience in teaching. Successful students are granted a certificate from the Delta Program, and this achievement and experience likely make the students more attractive for teaching positions.

Professional Development Options. With this plan we are expanding professional development opportunities for MDTP students beyond academic research and teaching. Opportunities for professional development can consist of coursework, an internship, a summer workshop, outreach experiences, or a second teaching practicum experience.

Courses. The Graduate School has agreed to allow MDTP dissertator students to enroll in courses from a limited list of classes appropriate for professional development of MDTP students. Students would take one or two courses in an area of interest after they become dissertators. Additional courses may be added to this list if they are appropriate for MDTP students and are approved for this purpose by the Graduate School.

Teaching practicum. A second semester of teaching practicum may be the most appropriate training for students that seek a career in academic research and teaching. If students do not arrange for other professional development activities, the default professional development training would be a second semester of teaching in a teaching practicum.

Summer courses or workshops. For students most interested in continuing in academic research, one or more summer courses or workshops may be the most appropriate training. Examples of such courses are those that cover research areas or methods or scientific writing or grant preparation.

Internship. As an alternative to class work or a second semester of teaching practicum, MDTP students could participate in an internship with a business or other organization. Students doing internships would have to arrange to be paid through the organization, and they would not be paid by their advisors while away from their research.

Requirement. In order to ensure that MDTP students are allowed to participate in the Professional Development opportunities, their participation will be required. Students will be required to perform a second semester of teaching practicum, carry out an internship for as long as one semester, take at least 2 credits of coursework from the list of approved classes or through the Delta Program, or perform other professional development activities equivalent to 2 semester hours of coursework as judged by the thesis committee. The thesis committee must give approval for the student to participate in the chosen professional development activity. Thesis committees will also determine if each student has met the requirement. Students should complete the professional development requirement by the end of the fourth year. This requirement will go into effect with the MDTP class entering in fall 2011.

LEARNING OUTCOMES

1. Gain a broad understanding of the microbiology principles that underlie all biological processes.
2. Articulate, discuss and define limits to the theory and knowledge in microbiology.
3. Think critically to address research challenges using a broad range of the theories, research methods, and approaches to scientific inquiry.
4. Communicates complex ideas in a clear and understandable matter.
5. Collaborate with investigators within the program, university, and beyond to advance the science of microbiology.
6. Foster professional and ethical conduct in the sciences.
7. Ethical design of experimental protocols.
8. Reproducibility of experimental results.
9. Professional behavior in industrial, government and academic settings.
10. Develop communication skills that enable the articulation of research to fellow scientists and non-scientists.
11. Develop teaching and mentoring skills in both lecture and laboratory settings.
12. Explore career development opportunities in industry, government, academia and private industry to realize professional goals.

PEOPLE

Faculty: Professors Garret Suen (program director, Bacteriology), and JD Sauer (vice-director, Medical Microbiology and Immunology) lead the current MDTP Steering Committee. For a list of more than 90 participating faculty, see the program website (http://www.microbiology.wisc.edu) or contact the program office.

BIOCHEMISTRY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

• Biochemistry, Doctoral Minor (p. 180)
• Biochemistry, M.S. (p. 180)
• Biochemistry, Ph.D. (p. 182)

PEOPLE

Faculty: Professors B. Fox (Chair, Department of Biochemistry), Kiley (Chair, Department of Biomolecular Chemistry), Amasino, Ansari, Attie, Audhya, Bednarek, Brow, Buehler, Butcher, Cantor, Chanda, Clagett-Dame,
Biochemistry, Doctoral Minor

Biochemistry is the study of biological molecules, their roles in the cell, and the chemistry of their reactions in living systems. The Integrated Program in Biochemistry (IPiB) is the merged graduate program between the Department of Biochemistry (in the College of Agricultural and Life Sciences) and the Department of Biomolecular Chemistry (in the School of Medicine and Public Health). The program trains the next generation of biochemists and prepares them for 21st century challenges in science.

Admissions

Candidates should have an undergraduate degree in biochemistry, chemistry, physics, or one of the biological or medical sciences. A minimum GPA of 3.0 (on a 4.0 scale) is required. In addition to meeting the general requirements of the Graduate School, coursework in biochemistry, physics, organic chemistry, and physical chemistry is required. The student can make up any course deficiencies during the first two years of graduate study.

A student must identify a member of the IPiB faculty to serve as the minor advisor. The minor advisor will advise the student on his or her minor program, and serve as a member of the student’s thesis committee.

Requirements

For a minor in biochemistry, a Ph.D. candidate must complete a required course series and earn a total of 16 graduate-level credits in advanced biochemistry courses (600 level or above).

1 Students with good preparation in chemistry will preferably select courses from Series 2 to meet this General Biochemistry Course Requirement.

Biochemistry, M.S.

Biochemistry is the study of biological molecules, their roles in the cell, and the chemistry of their reactions in living systems. The Integrated Program in Biochemistry (IPiB) is the merged graduate program between the Department of Biochemistry (in the College of Agricultural and Life Sciences) and the Department of Biomolecular Chemistry (in the School of Medicine and Public Health). The program trains the next generation of biochemists and prepares them for 21st century challenges in science.

IPiB offers a Ph.D. degree with a major in biochemistry. Although an M.S. degree is officially offered, students are not admitted for a terminal master’s degree.

From atoms and cells to plants and animals, biochemistry research in IPiB is at the forefront of modern science. We are home to around 100 graduate students and 54 world-class faculty pursuing cutting-edge research in all areas of biochemistry, including: cell and developmental biology, chemical biology, endocrinology, enzymology, immunology, metabolism, molecular genetics, molecular medicine, physical biochemistry and biophysics, quantitative biology, structural biology, systems and synthetic biology, and virology. The Program teaches critical thinking skills, applicable to a wide range of professional fields that students pursue after graduation.

The size and breadth of IPiB provide unique opportunities for graduate students who want to pursue a degree in one of the top biochemistry graduate programs in the nation. Our modern facilities are filled with labs carrying out groundbreaking research in a collaborative, friendly, and inspirational atmosphere. Welcome to IPiB and we hope that you can share our enthusiasm for the biochemical sciences!

Dual Degrees

The program participates with the School of Medicine and Public Health in offering a joint program for students wishing to complete both the M.D. and Ph.D. degrees. The basic prerequisites and degree requirements for the Ph.D. in the M.D./Ph.D. program are identical to those for the major in biochemistry; however, the minor may be taken in medical sciences. For the prerequisites and degree requirements for the M.D. degree, as well as the online application form, see Medical Scientist Training Program (http://mstp.med.wisc.edu).

Admissions

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the...
admissions information for the Ph.D (https://wisc-curr.courseleaf.com/graduate/biochemistry/biochemistry-phd).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Minimum Graduate Coursework Requirement

All coursework must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (https://registrar.wisc.edu/course-guide/).

Overall Graduate GPA Requirement

3.00 GPA required.

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

Upon completion of the Graduate School’s and IPiB’s minimum requirements for a master’s degree, whether to confer the degree is up to the student’s thesis advisor.

Seminars

After the first semester of work, M.S. candidates must maintain continuous seminar enrollment each semester in one of the approved advanced (900-level) seminars.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://ipib.wisc.edu/c_students_handbook.php) is the repository for all of the program’s policies and requirements.

Prior Coursework
Graduate Work from Other Institutions
For well-prepared advanced students, the Program may accept up to 6 credits of prior graduate coursework from other institutions towards the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the graduate degree.

UW–Madison University Special
No credits taken as a University Special student are allowed to count toward the graduate degree.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student must have an IPiB faculty thesis advisor. The thesis advisor advises the student about coursework, supervises the student’s research, and acts as a mentor to the student through the student’s graduate career. The thesis advisor must approve the student’s coursework before registration for a given semester and must also approve any subsequent changes to it.

A Ph.D. thesis committee is composed of at least four graduate university faculty members, including the thesis advisor. The thesis committee is empowered by the program to advise the student about certification, administer the preliminary examination, oversee annual progress reports, approve thesis composition, and conduct the final Ph.D. examination.

CREDITS PER TERM ALLOWED
12 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Students may matriculate only in the fall semester, and a master’s degree is not offered as a terminal degree.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Gain a broad understanding of the biochemical principles that underlie all biological processes.
2. Become aware of the current limitations of the state of understanding of this discipline and the strategies that are required to advance the field.
3. Formulate and design new approaches that extend and apply biochemical principles beyond their current boundaries.
4. Explore career development opportunities in industry, government and academia to realize professional goals and paths.
5. Develop teaching and mentoring skills in both lecture and laboratory settings.
6. Foster professional and ethical conduct in the sciences, including but not limited to: exposition of the scientific method; ethical design of experimental protocols; reproducibility in science; professional behavior in industrial, government, and academic settings; documentation of scientific results; communication to other scientists and the public; peer review; and confidentiality.

PEOPLE

Faculty: Professors B. Fox (Chair, Department of Biochemistry), Kiley (Chair, Department of Biomolecular Chemistry), Amasino, Ansari, Attie, Audhya, Bednarek, Brow, Buller, Butcher, Cantor, Chanda, Clagett-Dame, Coon, Cox, Craciun, Craig, Denu, Dvinge, Engin, C. Fox, Friesen, Gellman, Harrison, Hayes, Henzl-Wildman, Holden, Hoskins, Hull, Keck, Kimble, Landick, Lewis, Markley, Martin, Merrins, Mitchell, Mosher, Ntambi, Pagliarini, Palmenberg, Pike, Ralph, Raman, Raymond, Record, Romero, Senes, Sheets, Sussman, Venturelli, Wickens, Wildonger, Wright

BIOCHEMISTRY, PH.D.
Biochemistry is the study of biological molecules, their roles in the cell, and the chemistry of their reactions in living systems. The Integrated Program in Biochemistry (IPiB) is the merged graduate program between the Department of Biochemistry (in the College of Agricultural and Life Sciences) and the Department of Biomolecular Chemistry (in the School of Medicine and Public Health). The program trains the next generation of biochemists and prepares them for 21st Century challenges in science. IPiB offers a Ph.D. degree with a major in biochemistry. Although an M.S. degree is officially offered, students are not admitted for a terminal master’s degree.

From atoms and cells to plants and animals, biochemistry research in IPiB is at the forefront of modern science. We are home to around 100 graduate students and 54 world-class faculty pursuing cutting-edge research in all areas of biochemistry, including: cell and developmental biology, chemical biology, endocrinology, enzymology, immunology,
metabolism, molecular genetics, molecular medicine, physical biochemistry and biophysics, quantitative biology, structural biology, systems and synthetic biology, and virology. The program teaches critical thinking skills, applicable to a wide range of professional fields that students pursue after graduation.

The size and breadth of IPiB provide unique opportunities for graduate students who want to pursue a degree in one of the top biochemistry graduate programs in the nation. Our modern facilities are filled with labs carrying out groundbreaking research in a collaborative, friendly, and inspirational atmosphere. Welcome to IPiB and we hope that you can share our enthusiasm for the biochemical sciences!

**DUAL DEGREES**

The program participates with the School of Medicine and Public Health in offering a joint program for students wishing to complete both the M.D. and Ph.D. degrees. The basic prerequisites and degree requirements for the Ph.D. in the M.D./Ph.D. program are identical to those for the major in biochemistry; however, the minor may be taken in medical sciences. For the prerequisites and degree requirements for the M.D. degree, as well as the online application form, see Medical Scientist Training Program (http://mstp.med.wisc.edu).

**ADMISSIONS**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online at grad.wisc.edu/apply.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

IPiB students receive a full stipend ($28,000 for 2018-19), as well as tuition remission and comprehensive health insurance. The stipends take the form of traineeships, research assistantships, or fellowships, and are guaranteed for all IPiB Ph.D. candidates in good academic standing. IPiB also assists its graduate students with outstanding academic records in competing for University or national awards.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MAJOR REQUIREMENTS**

**Mode of Instruction Definitions**

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the
advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://ipib.wisc.edu/c_students_handbook.php) is the repository for all of the program's policies and requirements.

Prior Coursework

Graduate Work from Other Institutions

For well-prepared advanced students, the Program may accept up to 6 credits of prior graduate coursework from other institutions towards the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the graduate degree.

UW–Madison University Special

No credits taken as a University Special student are allowed to count toward the graduate degree.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student must have an IPiB faculty thesis advisor. The thesis advisor advises the student about coursework, supervises the student’s research, and acts as a mentor to the student through the student's graduate career. The thesis advisor must approve the student's coursework before registration for a given semester and must also approve any subsequent changes to it.

A Ph.D. thesis committee is composed of at least four graduate University faculty members, including the thesis advisor. The thesis committee is empowered by the Program to advise the student about certification, administer the preliminary examination, oversee annual progress reports, approve thesis composition, and conduct the final Ph.D. examination.

CREDITS PER TERM ALLOWED

12 credits in Fall and Spring semesters and 2 credits in Summer semesters for non-dissertators; 3 credits in Fall, Spring, and Summer semesters for dissertators

TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER

All students, both US and international, receive an annual stipend and tuition remission for the duration of their studies, provided satisfactory progress is made toward their degree. Comprehensive medical coverage is also offered. In addition, some of our students are supported on fellowships or training grants. Students are chosen based on criteria specified by the different training grants.

Students may matriculate only in the fall semester, and a master’s degree is not offered as a terminal degree.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Gain a broad understanding of the biochemical principles that underlie all biological processes.
2. Become aware of the current limitations of the state of understanding of this discipline and the strategies that are required to advance the field.
3. Formulate and design new approaches that extend and apply biochemical principles beyond their current boundaries.
5. Think critically to address research challenges using a broad range of the theories, research methods, and approaches to scientific inquiry.
6. Collaborate with investigators within the program, university, and beyond since current and future advances in the biomolecular sciences demand interdisciplinary skills.
7. Foster professional and ethical conduct in the sciences, including but not limited to: exposition of the scientific method; ethical
design of experimental protocols; reproducibility in science; professional behavior in industrial, government, and academic settings; documentation of scientific results; communication to other scientists and the public; peer review; and confidentiality.

8. Develop communications skills that enable the articulation of research to fellow scientists and non-scientists.

9. Explore career development opportunities in industry, government and academia to realize professional goals and paths.

10. Develop teaching and mentoring skills in both lecture and laboratory settings.

The department offers students an opportunity to undertake research and advanced study in different specialization areas such as biological systems, environmental quality and natural resource engineering, waste management, food and bioprocess engineering and food safety, machinery systems, bioresources and biorefining, and agricultural safety and health.

Graduate research assistantships, project assistantships, and fellowships are available on a highly competitive basis.

### ADEMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Deadline</td>

<td>3</td>
</tr>
</tbody>
</table>

The department requires that students have a strong engineering background for admission to its graduate program. Most applicants have a bachelor of science degree from an ABET/EAC–accredited engineering program or an engineering undergraduate degree from an international institution. Applicants who do not have a bachelor of science degree from an ABET/EAC–accredited engineering program may be admitted with a stipulation that they complete supplemental work. Contact the department for details concerning additional requirements. Applicants are evaluated based on their academic record and educational objectives and letters of reference.

### FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from
the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

</table>

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

2 Not including course credits taken to satisfy admission requirements.

3 At least six credits must be from coursework at the 500-level and above in science/engineering classes; can include up to six credits of science/engineering classes taken at 400-level and above as UW-Madison undergraduate.

4 For the two required graduate seminar credits, students typically take BSE 900 Seminar and BSE 901 Graduate Research Seminar.
Other Requirements
Both thesis and non-thesis option students should select a committee of three faculty members in consultation with their major professors. For thesis option students, at least one of the committee members should be from another department. All students must present their research results at an oral final examination to the committee. All BSE graduate students are required to take BSE 901 Graduate Research Seminar within the last two full semesters (offered spring semester only). All BSE graduate students are required and should take BSE 901 Graduate Research Seminar within the first three semesters (offered fall semester only). All BSE graduate students must present their research results at an oral final examination to the committee. All BSE graduate students are required to take BSE 900 Seminar within the first three semesters (offered fall semester only). All BSE graduate students are required and should take BSE 901 Graduate Research Seminar within the first three semesters (offered fall semester only). If the student’s progress is satisfactory, the student will receive a grade of P (progress) for each semester of BSE 990 until the final semester. At that time all of these credits will be given an S (satisfactory) grade by the major professor.

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://bse.wisc.edu/graduate-studies/graduate-student-resources) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions
With approval of the Graduate Research and Instructions Committee, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
Students may count up to 6 credits of coursework 400-level and above from a UW–Madison undergraduate degree toward the degree. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With approval of the Graduate Research and Instructions Committee, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
12 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Funding decisions are made by faculty supervisors of the admitted students based on the funding availability and project need.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
2. Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
3. Demonstrates understanding of the primary field of study in a historical, social, or global context.
4. Selects and/or utilizes the most appropriate methodologies and practices.
5. Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
6. Recognizes and applies principles of ethical and professional conduct.
PEOPLE
Faculty:
Professors Reinemann, Anex, Bohnhoff (emeritus), Etzel, Gunasekaran, Hanna, Hartel, Holmes, Kammel, Karthikeyan, Kung, O’Leary, Pan, Ralph, Shinners, Straub, A. Thompson, Walsh; Associate Professor Larson, Runge (chair); Assistant Professors Digman, Luck, Zhang

BIOLOGICAL SYSTEMS ENGINEERING, PH.D.
Graduate work in the Department of Biological Systems Engineering (BSE) leads to the master of science and doctor of philosophy degrees. Graduates of the program help fill the need for highly educated engineers in industry, consulting firms, government agencies, and educational institutions.

Students who undertake graduate studies in BSE normally have as their goal a better understanding of the current theories, principles, issues, and problems in biological systems. They desire a better understanding of how knowledge is generated, how it is critically evaluated, and how solutions to problems are generated. Graduate studies improve the ability of students to think critically and creatively, and to synthesize, analyze, and integrate ideas for decision making and problem solving.

The department offers students an opportunity to undertake research and advanced study in different specialization areas such as biological systems, environmental quality and natural resource engineering, waste management, food and bioprocess engineering and food safety, machinery systems, bioresources and biorefining, and agricultural safety and health.

Graduate research assistantships, project assistantships, and fellowships are available on a highly competitive basis.

ADMISSIONS
Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

The department requires that students have a strong engineering background for admission to its graduate program. Most applicants have a bachelor of science degree from an ABET/EAC–accredited engineering program or an engineering undergraduate degree from an international institution. Applicants who do not have a bachelor of science degree from an ABET/EAC–accredited engineering program may be admitted with a stipulation that they complete supplemental work. Contact the department for details concerning additional requirements. Applicants are evaluated based on their academic record and educational objectives and letters of reference.

FUNDING
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

REQUIREMENTS
MINIMUM GRADUATE SCHOOL REQUIREMENTS
Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

</tbody>
</table>

Students may choose from the following or select another course in consultation with their advisor:

- E P D 654 Teaching in Science and Engineering

**Footnotes**

1. At least 36 of the course credits must be taken in physical sciences. At least 9 credits must be from the 600 to 800 level classes from an engineering department and/or comparable technical area. All course credits need to be taken as a letter grade unless course is only offered for credit/no credit. Credit/no credit courses must get prior approval from advisor. Only 1 credit/no credit of the 9 credits can be used to fulfill your credits from 600- to 800-level classes.

2. All graduate students are required to register for one credit of BSE 900 Seminar (only offered fall semesters) within the first three semesters as a graduate student in BSE. However, if you completed your master's degree in BSE, you do not have to repeat the 1-credit seminar.

3. As a part of the seminar, all students are required to make an oral presentation reporting their research results, typically during the last semester of their graduate program. If you took this course as an M.S. student, you will need to repeat the course as a Ph.D. student to reflect your current research.

4. Graduate students should register for an appropriate number of credits of BSE 990 Research (Thesis Research). If the student's progress is satisfactory, the student will receive a grade of P (progress) for each semester of BSE 990 Research until the final semester. At that time all of these credits will be given an S (satisfactory) grade by the major professor.

5. The teaching course credits shall not be used to fulfill 9 credits of 600 to 800 level classes from an engineering department and/or comparable technical area. Teaching preparatory courses and seminar courses will NOT count toward the required 24 (42) course credits.

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://bse.wisc.edu/graduate-studies/graduate-student-resources) is the repository for all of the program's policies and requirements.

**Prior Coursework**

**Graduate Work from Other Institutions**

For well-prepared advanced students, the program may accept prior graduate coursework from other institutions toward the minimum graduate degree credit and minimum graduate coursework (50%) requirement. The minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison. Coursework earned ten or more years prior to admission to
A doctoral degree is not allowed to satisfy requirements. Up to 6 research credits received for the master's degree may be transferred from another accredited institution. No other research credit may be transferred. Eighteen (18) Master's course credits earned from another institution may be transferred towards Ph.D. Additional credits need to be approved by the BSE Graduate Instruction and Research committee.

**UW–Madison Undergraduate**

For well-prepared advanced students, the program may decide to accept up to 7 credits numbered 300 or above completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. This work would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison University Special**

The program may decide to accept up to 15 University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**OTHER**

Funding decisions are made by faculty supervisors of the admitted students based on the funding availability and project need.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
3. Creates research, scholarship, or performance that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions of the field of study to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.

**PEOPLE**

**Faculty:** Professors Reinemann, Anex, Bohnhoff (emeritus), Etzel, Gunasekaran, Hanna, Hartel, Holmes, Kammel, Karthikeyan, Kung, O’Leary, Pan, Ralph, Shinners, Straub, A. Thompson, Walsh; Associate Professor Larson, Range (chair); Assistant Professors Digman, Luck, Zhang

BIOMEDICAL ENGINEERING, DOCTORAL MINOR

REQUIREMENTS
Students must:
• Earn at least 10 credits from a single degree program and satisfy the requirements specified by the Department of Biomedical Engineering. Approval of the courses for the Option A minor is certified by the BME Associate Chair of Graduate Advising (https://www.engr.wisc.edu/department/bme/contact/people-in-bme).
• Meet the requirements identified on the Option A Minor Approval Form and submit the form to the BME associate chair of graduate advising for approval (no later than halfway through the minor course sequence and before requesting the preliminary exam warrant).

BIOMEDICAL ENGINEERING, M.S.
Biomedical engineering is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, who specialize in medical and biological applications. This area of study combines fundamentals of the biomedical sciences with advanced engineering methods of analysis and design, and brings together these two fields in order to contribute to the design of new medical instruments and devices, apply engineering principles for understanding and repairing the human body and other biological systems, and use engineering tools for decision making and cost containment.

The department offers three distinct master’s-level programs. Two course-based M.S. named options, Accelerated Program (p. 197) and Biomedical Innovation, Design, and Entrepreneurship (p. 201), are accelerated programs that can be completed in one full year of study and are designed for students pursuing advanced academic degrees or careers in industry. The Biomedical Engineering M.S. without a named option is designed for students who want to conduct research during their program.

The Department of Biomedical Engineering should be of interest to students who wish to practice engineering or engage in research in an engineering specialization in medicine and biology. An individualized course of study is planned with a faculty advisor. Biomedical engineering faculty and affiliated faculty come from the various colleges and professional schools throughout the university. They specialize in biomedical engineering areas as diverse as biomechanics, bioinstrumentation, biomedical imaging and biophotonics, micro and nanotechnology, systems biology, biomaterials, cellular engineering, tissue engineering, neuroengineering, and rehabilitation and human performance. A list of biomedical engineering faculty, affiliated faculty, and their respective areas of specialization is available from the department website (https://directory.engr.wisc.edu/bme/faculty).

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>

<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/english-proficiency">https://grad.wisc.edu/apply/requirements/english-proficiency</a>).</td>
</tr>
<tr>
<td>Other Test(s) (e.g., GMAT, MCAT)</td>
<td>The MCAT may be accepted as an alternate to the GRE.</td>
</tr>
<tr>
<td>Letters of Recommendation</td>
<td>Required</td>
</tr>
</tbody>
</table>

Applicants should have a bachelor’s degree in engineering (biomedical, chemical, electrical, industrial, mechanical, etc.) or science (biology, biochemistry, chemistry, genetics, immunology, physics, etc.). Each application is judged on the basis of:

- Official academic transcripts
- Graduate Record Examinations (http://www.ets.org/gre) (GRE) scores or Medical College Admission Test (MCAT) scores for the general test
- Test of English as a Foreign Language (http://www.ets.org/toefl) (TOEFL) examination for international students
- Three letters of recommendation
- Statement of purpose (https://grad.wisc.edu/apply/prepare)
- Resume (for Ph.D. applicants only)

All applicants must satisfy requirements that are set forth by the Graduate School (https://grad.wisc.edu). Students admitted to the program may be required to make up deficiency course requirements.

To apply to the BME program, complete applications (https://grad.wisc.edu/apply), including supportive materials, must be submitted as described below and received by the following deadline dates:

- Fall Semester—December 15 (MS and Ph.D.)
- Spring Semester—October 1 (MS and Ph.D.)
- Summer Session 1 —December 15 (MS and Ph.D.)

1Please note that summer admissions are generally limited to continuing BME students at UW–Madison or applicants who have research assistantships already arranged with UW faculty.

OFFICIAL ACADEMIC TRANSCRIPT

Electronically submit one copy of your transcript of all undergraduate and previous graduate work along with your online application to the Graduate School. Unofficial copies of transcripts will be accepted for review, but official copies are required for admitted students. Please do not send transcripts or any other application materials to the Graduate School. Unofficial copies of transcripts will be accepted for review, but official copies are required for admitted students. Please do not send transcripts or any other application materials to the Graduate School.
School or the BME department unless requested. If you have questions, please contact bmegradadmission@engr.wisc.edu.

**GRADUATE RECORD EXAMINATION (GRE)**
Applicants should request ETS to send their official GRE scores by using institution code 1846.

MCAT scores may be substituted for GRE. Domestic applicants who choose to substitute MCAT scores for the GRE should send their MCAT score report to bmegradadmission@engr.wisc.edu.

**TEST OF ENGLISH AS A FOREIGN LANGUAGE (TOEFL)**
The TOEFL is required for international students unless a degree from a U.S. educational institution is held. Scores should be sent using institution code 1846.

An applicant whose TOEFL (paper-based) test score is below 580; TOEFL computer-based test (CBT) score below 237; (TOEFL internet-based iBT) test score below 92; IELTS score below 7; or MELAB below 82 must take an English assessment test upon arrival. Depending on your score, you may need to register for any recommended English as a Second Language (ESL) courses in the first semester you are enrolled.

Any international applicant who will hold a teaching assistantship (TA), and whose native language is not English must take the SPEAK test (https://esl.wisc.edu/ita-training/speak) when arriving on campus.

**THREE LETTERS OF RECOMMENDATIONS**
These letters are required from people who can accurately judge the applicant’s academic or research performance. Letters of recommendation are submitted electronically to graduate programs through the online application. Applicants should not send any more than three letters (if more than three are sent, only the first three will be considered). See the Graduate School for FAQs (https://grad.wisc.edu/apply) regarding letters of recommendation.

**STATEMENT OF PURPOSE**
In this document, applicants should explain why they want to pursue further education in BME and discuss which UW faculty members they would be interested in doing research with during their graduate study (see the Graduate School for more advice on how to structure a personal statement (https://grad.wisc.edu/apply/prepare)).

**RESUME (FOR PH.D. APPLICATIONS ONLY)**
Include your resume ONLY if applying for the Ph.D. program.

**APPLICATION FEE**
Submission must be accompanied by the one-time application fee. It is non-refundable and can be paid by credit card (Master Card or Visa) or debit/ATM. By state law, this fee can only be waived or deferred through the conditions outlined here by the Graduate School (https://grad.wisc.edu/apply/fee-grant).

**FUNDING**

**GRADUATE SCHOOL RESOURCES**
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIREMENTS**

</tbody>
</table>

| Overall Graduate GPA Requirement | 3.00 GPA required. |
Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

There are no degree-specific assessments and examinations outside of those given in individual courses.

Language Requirements

n/a

REQUIRED COURSES

Specific course selection is very flexible and draws upon a variety of courses. The required coursework is designed to complement each student’s interests and background in biomedical engineering and meet the spirit of a BME degree; deviations from the requirements should be discussed with the associate chair of graduate advising and will be decided on a case-by-case basis.

- Two semesters of BME 701 Seminar in Biomedical Engineering
- At least one course in bioscience (if not from a bioscience or BME background)

- At least 12 credits of engineering courses, 400 level or above
- At least 15 credits in one track (https://guide.wisc.edu/graduate/biomedical-engineering/biomedical-engineering-phd/#requirementstext), 400 level or above
- At least 15 credits that are graduate level (700 or above or courses with the Graduate Level Coursework attribute)
- Optional, but recommended: 3-6 credits of independent study project experience (BME 799 Advanced Independent Study) or master’s thesis research (BME 790 Master’s Research and Thesis) in the student’s track (a maximum of 6 credits can be applied to the M.S. although students may take more). These credits may count toward your track credits.

NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral.

- BIOMEDICAL ENGINEERING: ACCELERATED PROGRAM, M.S. (P. 197)
- BIOMEDICAL ENGINEERING: BIOMEDICAL INNOVATION, DESIGN, AND ENTREPRENEURSHIP, M.S. (P. 201)

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2016/01/bme_grad_handbook_2017-2.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

A student may transfer graduate coursework from other institutions with program approval. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit. Coursework earned five years or more prior to admission to the master’s program is not allowed to satisfy requirements. Reach out to the BME Graduate Coordinator for more information.

UW–Madison Undergraduate

A student who has completed their bachelor’s degree in Biomedical Engineering at UW-Madison may transfer 6 credits of coursework with program approval. These courses must be biomedical engineering department coursework numbered 300 level or above. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit.

UW–Madison University Special

A maximum of 15 credits from the UW–Madison University Special student career may count toward program
Biomedical Engineering, M.S.

requirements. Minimum graduate resident credits requirement and minimum graduate degree credit requirement: allowed up to 15 credits numbered 300 or above. Minimum graduate coursework (50%) requirement: allowed up to 15 credits numbered 700 or above. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
Every BME graduate student must have a faculty advisor. A faculty advisor provides the graduate student with academic guidance in their course program and research oversight in their thesis, project, or engineering report. Graduate students should always seek advice from their advisor and other faculty in their interest area prior to enrolling for courses.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Full-time students usually complete an M.S. in BME in one or two years.

OTHER
n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES
THE INDIVIDUAL DEVELOPMENT PLAN (IDP)
An Individual Development Plan (IDP) (https://grad.wisc.edu/pd/idp) helps graduate students and postdoctoral researchers:

• communicate with supervisors, advisors, and mentors about evolving goals and related skills.

The IDP is a document to be revisited again and again, to update and refine as goals change and/or come into focus, and to record progress and accomplishments.

The university recommends IDPs for all postdoctoral researchers and graduate students, and requires IDPs for all postdoctoral researchers and graduate students supported by National Institutes of Health (NIH) funding. See the Graduate School for more information and IDP resources (https://grad.wisc.edu/pd/idp).

ENGINEERING CAREER SERVICES
The Engineering Career Services (https://ecs.wisc.edu) staff offers assistance to students searching or preparing for internships, co-ops, and jobs with well-recognized organizations.

THE WRITING CENTER
The Writing Center (https://writing.wisc.edu) is a campus-wide organization that provides free of charge, face-to-face and online consultations for students writing papers, reports, resumes, and applications.

LEARNING OUTCOMES
1. Demonstrate a strong understanding of mathematical, scientific, and engineering principles in the field.
2. Demonstrate an ability to formulate, analyze, and solve advanced engineering problems.
3. Demonstrate creative, independent problem solving skills.
4. Apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools to these problems.
5. Recognize and apply principles of ethical and professional conduct.

BIOMEDICAL ENGINEERING: ACCELERATED PROGRAM, M.S.

This is a course-based named option within the Biomedical Engineering M.S. (http://guide.wisc.edu/graduate/biomedical-engineering/biomedical-engineering-ms/#text)

The Accelerated Program named option in the Biomedical Engineering M.S. is a non-thesis program with coursework focused on engineering and science to afford further preparation and training for students interested in careers in industry or pursuing advanced academic degrees.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Deadline</td>
<td>December 15</td>
</tr>
<tr>
<td>Spring Deadline</td>
<td>October 1</td>
</tr>
<tr>
<td>Summer Deadline</td>
<td>December 15</td>
</tr>
<tr>
<td>GRE (Graduate Record Exam)</td>
<td>Required.*</td>
</tr>
</tbody>
</table>

English Proficiency Test: Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency).

Other Test(s) (e.g., GMAT, MCAT): The MCAT may be accepted as an alternate to the GRE.

Letters of Recommendation Required: 3*

* Not required for applicants with a UW–Madison Biomedical Engineering bachelor's degree.

Applicants should have a bachelor's degree in engineering (biomedical, chemical, electrical, industrial, mechanical, etc.) or science (biology, biochemistry, chemistry, genetics, immunology, physics, etc.). Each application is judged on the basis of:

- Official academic transcripts
- Graduate Record Examinations (http://www.ets.org/gre) (GRE) scores or Medical College Admission Test (MCAT) scores for the general test
- Test of English as a Foreign Language (http://www.ets.org/toefl) (TOEFL) examination for international students
- Three letters of recommendation
- Statement of purpose (https://grad.wisc.edu/apply/prepare)
- Resume (for Ph.D. applicants only)

All applicants must satisfy requirements that are set forth by the Graduate School (https://grad.wisc.edu). Students admitted to the program may be required to make up deficiency course requirements.

To apply to the BME program, complete applications (https://grad.wisc.edu/apply), including supportive materials, must be submitted as described below and received by the deadline.

OFFICIAL ACADEMIC TRANSCRIPT

Electronically submit one copy of your transcript of all undergraduate and previous graduate work along with your online application to the Graduate School. Unofficial copies of transcripts will be accepted for review, but official copies are required for admitted students. Please do not send transcripts or any other application materials to the Graduate School or the BME department unless requested. If you have questions, please contact bmegradadmission@engr.wisc.edu.

GRADUATE RECORD EXAMINATION (GRE)

Applicants should request ETS to send their official GRE scores by using institution code 1846.

MCAT scores may be substituted for GRE. Domestic applicants who choose to substitute MCAT scores for the GRE should send their MCAT score report to bmegradadmission@engr.wisc.edu.

TEST OF ENGLISH AS A FOREIGN LANGUAGE (TOEFL)

The TOEFL is required for international students unless a degree from a U.S. educational institution is held. Scores should be sent using institution code 1846.

An applicant whose TOEFL (paper-based) test score is below 580; TOEFL computer-based test (CBT) score below 237; (TOEFL internet-based iBT) test score below 92; IELTS score below 7; or MELAB below 82 must
take an English assessment test upon arrival. Depending on your score, you may need to register for any recommended English as a Second Language (ESL) courses in the first semester you are enrolled.

Any international applicant who will hold a teaching assistantship (TA), and whose native language is not English must take the SPEAK test (https://esl.wisc.edu/ita-training/speak) when arriving on campus.

THREE LETTERS OF RECOMMENDATIONS
These letters are required from people who can accurately judge the applicant’s academic or research performance. Letters of recommendation are submitted electronically to graduate programs through the online application. Applicants should not send any more than three letters (if more than three are sent, only the first three will be considered). See the Graduate School for FAQs (https://grad.wisc.edu/apply/fee-grant) regarding letters of recommendation.

STATEMENT OF PURPOSE
In this document, applicants should explain why they want to pursue further education in BME and discuss which UW faculty members they would be interested in doing research with during their graduate study (see the Graduate School for more advice on how to structure a personal statement (https://grad.wisc.edu/apply/prepare)).

RESUME (FOR PH.D. APPLICATIONS ONLY)
Include your resume ONLY if applying for the Ph.D. program.

APPLICATION FEE
Submission must be accompanied by the one-time application fee. It is non-refundable and can be paid by credit card (Master Card or Visa) or debit/ATM. By state law, this fee can only be waived or deferred through the conditions outlined here by the Graduate School (https://grad.wisc.edu/apply/fee-grant).

FUNDING
GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

REQUIREMENTS
MINIMUM GRADUATE SCHOOL REQUIREMENTS
Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

M E 539 Intermediate Fluid Systems
M E 563 Computational Fluid Dynamics
M E/E M A 570 Experimental Mechanics
M E 573 Computational Fluid Dynamics
M S & E 521 Advanced Polymeric Materials

Optional courses:
(4) Project/Independent Study 0-6
B M E 799 Advanced Independent Study
B M E 790 Master’s Research and Thesis

(5) Students are encouraged to pursue courses in mathematics and data analysis. Relevant options include:
B M I/STAT 541 Introduction to Biostatistics
COMP SCI/B M I 567 Medical Image Analysis
COMP SCI/MATH 714 Methods of Computational Mathematics I
COMP SCI 765 Data Visualization
COMP SCI 766 Computer Vision
COMP SCI/MATH 443 Computational Methods for Medical Image Analysis
MATH 443 Applied Linear Algebra
MATH 519 Ordinary Differential Equations
MATH 619 Analysis of Partial Differential Equations

(6) Additional credits taken in consultation with your advisor

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES
GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2016/01/bme.grad_handbook_2017-2.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK
Graduate Work from Other Institutions
A student may transfer graduate coursework from other institutions with program approval. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit. Coursework earned five years or more prior to admission to the master’s program is not allowed to satisfy requirements. Reach out to the BME Graduate Coordinator for more information.

UW–Madison Undergraduate
A student who has completed their bachelor’s degree in Biomedical Engineering at UW-Madison may transfer 6 credits
of coursework with program approval. These courses must be biomedical engineering department coursework numbered 300 level or above. These courses may not be used toward the Graduate School's Minimum Graduate Residence Credit.

**UW–Madison University Special**

With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement and, the minimum graduate degree credit requirement; if that coursework is numbered 700 or above it may be used to satisfy the minimum graduate coursework (50%) requirement.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies. In many cases, an advisor is assigned to incoming students. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements but that coursework may not count toward Graduate School credit requirements.

**OTHER**

Students enrolled in this program are not permitted to accept teaching assistantships, project assistantships, research assistantships or other appointments that would result in a tuition waiver without department approval. Students in this program may not take courses outside the prescribed curriculum without faculty advisor approval. Students in this program cannot enroll concurrently in other undergraduate, graduate or certificate programs.

**PROGRAM RESOURCES**

**THE INDIVIDUAL DEVELOPMENT PLAN (IDP)**

An Individual Development Plan (IDP) (https://grad.wisc.edu/pd/idp) helps graduate students and postdoctoral researchers:

- assess current skills, interests, and strengths;
- make a plan for developing skills to meet academic and professional goals; and
- communicate with supervisors, advisors, and mentors about evolving goals and related skills.

The IDP is a document to be revisited again and again, to update and refine as goals change and/or come into focus, and to record progress and accomplishments.

The university recommends IDPs for all postdoctoral researchers and graduate students, and requires IDPs for all postdoctoral researchers and graduate students supported by National Institutes of Health (NIH) funding. See the Graduate School for more information and IDP resources (https://grad.wisc.edu/pd/idp).

**ENGINEERING CAREER SERVICES**

The Engineering Career Services (https://ecs.wisc.edu) staff offers assistance to students searching or preparing for internships, co-ops, and jobs with well-recognized organizations.

**THE WRITING CENTER**

The Writing Center (https://writing.wisc.edu) is a campus-wide organization that provides free of charge, face-to-face and online consultations for students writing papers, reports, resumes, and applications.

**PEOPLE**

**FACULTY**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
BIOMEDICAL ENGINEERING: BIOMEDICAL INNOVATION, DESIGN, AND ENTREPRENEURSHIP, M.S.

This is a course-based named option within the Biomedical Engineering M.S. (http://guide.wisc.edu/graduate/biomedical-engineering/biomedical-engineering-ms) The Biomedical Innovation, Design, and Entrepreneurship named option in the Biomedical Engineering M.S. program is designed to provide additional graduate-level, project-based experiences in design, prototyping, and manufacturing, as well as an understanding of business fundamentals, entrepreneurship, and project management. Upon completion, student will be prepared for careers at the interface of engineering and business.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

* Not required for applicants with a UW–Madison Biomedical Engineering bachelor’s degree.

Applicants should have a bachelor’s degree in engineering (biomedical, chemical, electrical, industrial, mechanical, etc.) or science (biology, biochemistry, chemistry, genetics, immunology, physics, etc.). Each application is judged on the basis of:

- Official academic transcripts
- Graduate Record Examinations (http://www.ets.org/gre) (GRE) scores or Medical College Admission Test (MCAT) scores for the general test
- Test of English as a Foreign Language (http://www.ets.org/toefl) (TOEFL) examination for international students
- Three letters of recommendation
- Statement of purpose (https://grad.wisc.edu/apply/prepare)
- Resume (for Ph.D. applicants only)

All applicants must satisfy requirements that are set forth by the Graduate School (https://grad.wisc.edu). Students admitted to the program may be required to make up deficiency course requirements.

To apply to the BME program, complete applications (https://grad.wisc.edu/apply), including supportive materials, must be submitted as described below and received by the following deadline dates:

- Fall Semester—December 15 (MS and Ph.D.)
- Spring Semester—October 1 (MS and Ph.D.)

OFFICIAL ACADEMIC TRANSCRIPT

Electronically submit one copy of your transcript of all undergraduate and previous graduate work along with your online application to the Graduate School. Unofficial copies of transcripts will be accepted for review, but official copies are required for admitted students. Please do not send transcripts or any other application materials to the Graduate School or the BME department unless requested. If you have questions, please contact bmegradadmission@engr.wisc.edu.

GRADUATE RECORD EXAMINATION (GRE)

Applicants should request ETS to send their official GRE scores by using institution code 1846.

MCAT scores may be substituted for GRE. Domestic applicants who choose to substitute MCAT scores for the GRE should send their MCAT score report to bmegradadmission@engr.wisc.edu.
TEST OF ENGLISH AS A FOREIGN LANGUAGE (TOEFL)
The TOEFL is required for international students unless a degree from a U.S. educational institution is held. Scores should be sent using institution code 1846.

An applicant whose TOEFL (paper-based) test score is below 580; TOEFL computer-based test (CBT) score below 237; (TOEFL internet-based iBT) test score below 92; IELTS score below 7; or MELAB below 82 must take an English assessment test upon arrival. Depending on your score, you may need to register for any recommended English as a Second Language (ESL) courses in the first semester you are enrolled.

Any international applicant who will hold a teaching assistantship (TA), and whose native language is not English must take the SPEAK test (https://esl.wisc.edu/ita-training/speak) when arriving on campus.

THREE LETTERS OF RECOMMENDATIONS
These letters are required from people who can accurately judge the applicant’s academic or research performance. Letters of recommendation are submitted electronically to graduate programs through the online application. Applicants should not send any more than three letters (if more than three are sent, only the first three will be considered). See the Graduate School for FAQs (https://grad.wisc.edu/apply/prepare) regarding letters of recommendation.

STATEMENT OF PURPOSE
In this document, applicants should explain why they want to pursue further education in BME and discuss which UW faculty members they would be interested in doing research with during their graduate study (see the Graduate School for more advice on how to structure a personal statement (https://grad.wisc.edu/apply/prepare)).

RESUME (FOR PH.D. APPLICATIONS ONLY)
Include your resume ONLY if applying for the Ph.D. program.

APPLICATION FEE
Submission must be accompanied by the one-time application fee. It is non-refundable and can be paid by credit card (Master Card or Visa) or debit/ATM. By state law, this fee can only be waived or deferred through the conditions outlined here by the Graduate School (https://grad.wisc.edu/apply/fee-grant).

GRADUATE SCHOOL ADMISSIONS
Graduate admissions is a two-step process between academic degree programs and the Graduate School. Applicants must meet requirements of both the program(s) and the Graduate School. Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/admissions).

FUNDING

GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

REQUIREMENTS

B M E 799 | Advanced Independent Study

Additional credits taken in consultation with advisor

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the
degree program faculty. Policies set by the academic degree program can be found below.

**NAMED OPTION-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**
The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2016/01/bme_grad_handbook_2017-2.pdf) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

- **Graduate Work from Other Institutions**
  A student may transfer graduate coursework from other institutions with program approval. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit. Reach out to the BME Graduate Coordinator for more information.

- **UW–Madison Undergraduate**
  A student who has completed their bachelor’s degree in Biomedical Engineering at UW–Madison may transfer 6 credits of coursework with program approval. These courses must be biomedical engineering department coursework numbered 300 level or above. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit.

- **UW–Madison University Special**
  With program approval and payment of the difference in tuition (between Special and graduate tuition), students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement and the minimum graduate degree credit requirement; if that coursework is numbered 700 or above it may be used to satisfy the minimum graduate coursework (50%) requirement.

**PROBATION**
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**
Every BME graduate student must have a faculty advisor. A faculty advisor provides the graduate student with academic guidance in their course program and research oversight in their thesis, project, or engineering report. Graduate students should always seek advice from their advisor and other faculty in their interest area prior to enrolling for courses.

**CREDITS PER TERM ALLOWED**
15 credits maximum

**TIME CONSTRAINTS**
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**
Students enrolled in this program are not permitted to accept teaching assistantships, project assistantships, research assistantships or other appointments that would result in a tuition waiver without department approval. Students in this program may not take courses outside the prescribed curriculum without faculty advisor approval. Students in this program cannot enroll concurrently in other undergraduate, graduate or certificate programs.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PROGRAM RESOURCES**

**THE INDIVIDUAL DEVELOPMENT PLAN (IDP)**
An Individual Development Plan (IDP) (https://grad.wisc.edu/pd/idp) helps graduate students and postdoctoral researchers:

- assess current skills, interests, and strengths;
- make a plan for developing skills to meet academic and professional goals; and
- communicate with supervisors, advisors, and mentors about evolving goals and related skills.

The IDP is a document to be revisited again and again, to update and refine as goals change and/or come into focus, and to record progress and accomplishments.

The university recommends IDPs for all postdoctoral researchers and graduate students, and requires IDPs for all postdoctoral researchers and graduate students supported by National Institutes of Health (NIH) funding. See the Graduate School for more information and IDP resources (https://grad.wisc.edu/pd/idp).

**ENGINEERING CAREER SERVICES**
The Engineering Career Services (https://ecs.wisc.edu) staff offers assistance to students searching or preparing for internships, co-ops, and jobs with well-recognized organizations.

**THE WRITING CENTER**
The Writing Center (https://writing.wisc.edu) is a campus-wide organization that provides free of charge, face-to-face and online consultations for students writing papers, reports, resumes, and applications.

BIOMEDICAL ENGINEERING, PH.D.

Biomedical engineering is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, who specialize in medical and biological applications. This area of study combines fundamentals of the biomedical sciences with advanced engineering methods of analysis and design, and brings together these two fields in order to contribute to the design of new medical instruments and devices, apply engineering principles for understanding and repairing the human body and other biological systems, and use engineering tools for decision making and cost containment.

The interdisciplinary degree program offers a course of graduate study leading to the master of science or the doctor of philosophy degrees in biomedical engineering. The Department of Biomedical Engineering should be of interest to students who wish to practice engineering or engage in research in an engineering specialization in medicine and biology. An individualized course of study is planned with a faculty advisor. Biomedical engineering faculty and affiliated faculty come from the various colleges and professional schools throughout the university. They specialize in biomedical engineering areas as diverse as biomechanics, bioinstrumentation, biomedical imaging and biophotonics, micro and nanotechnology, systems biology, biomaterials, cellular engineering, tissue engineering, neuroengineering, and rehabilitation and human performance. A list of biomedical engineering faculty, affiliated faculty, and their respective areas of specialization is available from the department website.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online.

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>

<td>December 15</td>
</tr>
<tr>
<td>GRE (Graduate Record Examinations)</td>
<td>Required.</td>
</tr>
<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/#english-proficiency">https://grad.wisc.edu/apply/requirements/#english-proficiency</a>).</td>
</tr>
<tr>
<td>Other Test(s) (e.g., GMAT, MCAT)</td>
<td>The MCAT may be accepted as an alternate to the GRE.</td>
</tr>
<tr>
<td>Letters of Recommendation Required</td>
<td>3</td>
</tr>
</tbody>
</table>

Applicants should have a bachelor’s degree in engineering (biomedical, chemical, electrical, industrial, mechanical, etc.) or science (biology, biochemistry, chemistry, genetics, immunology, physics, etc.). Each application is judged on the basis of:

• Official academic transcripts
• Graduate Record Examinations (http://www.ets.org/gre) (GRE) scores or Medical College Admission Test (MCAT) scores for the general test
• Test of English as a Foreign Language (http://www.ets.org/toefl) (TOEFL) examination for international students
• Three letters of recommendation
• Statement of purpose (https://grad.wisc.edu/apply/prepare)
• Resume (for Ph.D. applicants only)

All applicants must satisfy requirements that are set forth by the Graduate School (https://grad.wisc.edu). Students admitted to the program may be required to make up deficiency course requirements.

To apply to the BME program, complete applications (https://grad.wisc.edu/apply), including supportive materials, must be submitted as described below and received by the following deadline dates:

- Fall Semester—December 15 (MS and Ph.D.)
- Spring Semester—October 1 (MS and Ph.D.)
- Summer Session¹—December 15 (MS and Ph.D.)

¹Please note that summer admissions are generally limited to continuing BME students at UW–Madison or applicants who have research assistantships already arranged with UW faculty.

OFFICIAL ACADEMIC TRANSCRIPT

 Electronically submit one copy of your transcript of all undergraduate and previous graduate work along with your online application to the Graduate School. Unofficial copies of transcripts will be accepted for review, but official copies are required for admitted students. Please do not send transcripts or any other application materials to the Graduate School or the BME department unless requested. If you have questions, please contact bmegradadmission@engr.wisc.edu.

GRADUATE RECORD EXAMINATION (GRE)

Applicants should request ETS to send their official GRE scores by using institution code 1846.

MCAT scores may be substituted for GRE. Domestic applicants who choose to substitute MCAT scores for the GRE should send their MCAT score report to bmegradadmission@engr.wisc.edu.

TEST OF ENGLISH AS A FOREIGN LANGUAGE (TOEFL)

The TOEFL is required for international students unless a degree from a U.S. educational institution is held. Scores should be sent using institution code 1846.

An applicant whose TOEFL (paper-based) test score is below 580; TOEFL computer-based test (CBT) score below 237; (TOEFL internet-based iBT) test score below 92; IELTS score below 7; or MELAB below 82 must take an English assessment test upon arrival. Depending on your score, you may need to register for any recommended English as a Second Language (ESL) courses in the first semester you are enrolled.

Any international applicant who will hold a teaching assistantship (TA), and whose native language is not English must take the SPEAK test (https://esl.wisc.edu/ita-training/speak) when arriving on campus.

THREE LETTERS OF RECOMMENDATIONS

These letters are required from people who can accurately judge the applicant’s academic or research performance. Letters of recommendation are submitted electronically to graduate programs through the online application. Applicants should not send any more than three letters (if more than three are sent, only the first three will be considered). See the Graduate School for FAQs (https://grad.wisc.edu/apply) regarding letters of recommendation.

STATEMENT OF PURPOSE

In this document, applicants should explain why they want to pursue further education in BME and discuss which UW faculty members they would be interested in doing research with during their graduate study (see the Graduate School for more advice on how to structure a personal statement (https://grad.wisc.edu/apply/prepare)).

RESUME (FOR PH.D. APPLICATIONS ONLY)

Include your resume ONLY if applying for the Ph.D. program.

APPLICATION FEE

Submission must be accompanied by the one-time application fee. It is non-refundable and can be paid by credit card (Master Card or Visa) or debit/ATM. By state law, this fee can only be waived or deferred through the conditions outlined here by the Graduate School (https://grad.wisc.edu/apply/fee-grant).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

It is our experience that nearly all doctoral students in the BME department obtain funding, but there are no guarantees. A limited number of students receive fellowships. A few students enrolled in M.S. coursework program are self-funded.

Research assistantships are available from individual faculty based on their research funding and awarded when grants are funded and after applications for BME admission are accepted. Sometimes there are project assistantships, teaching assistantships, and traineeships also available. A few students enrolled in M.S. coursework program are self-funded.

ADMITTED WITH FUNDING

We have a limited number of university or departmental fellowships to offer each year. In addition, there are research assistantships that are offered to grad applicants from individual faculty members. Teaching assistantships (TA) are possible through specific departments with more opportunity in lower-level courses, such as calculus, chemistry, and physics. Often, funding matches with specific faculty occur during the Visit Wisconsin Weekend in the spring.

ADMITTED WITHOUT FUNDING

If you are admitted without funding, please know that you will be considered by BME faculty for potential support. You are also encouraged to contact faculty in BME (http://www.engr.wisc.edu/bme/faculty) whose research is of particular interest. Please wait to hear from us about your admission with/without aid before contacting faculty for support. You may also apply to BME specific TA positions after being admitted or other TA positions on campus.
REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

**Requirements**  |  **Detail**
--- | ---
Minimum Credit Requirement | 60 credits
Minimum Residence Credit Requirement | 32 credits
Minimum Graduate Coursework Requirement | Half of degree coursework (30 credits out of 60 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide.
Overall Graduate GPA Requirement | 3.00 GPA required.

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

PhD candidates are required to pass a comprehensive qualifying examination, preliminary examination, and final oral defense. Deposit of the doctoral dissertation to the Graduate School is required.

Language Requirements

No language requirements.

REVIEW COURSES

M.S. Requirements

To receive a Ph.D., students must first complete the requirements for an M.S. degree in biomedical engineering (https://guide.wisc.edu/graduate/biomedical-engineering/biomedical-engineering-ms/#requirementstext):

- Two semesters of BME 701 Seminar in Biomedical Engineering
- At least one course in bioscience (if not from a bioscience or BME background)

- At least 12 credits of engineering courses, 400-level or above
- At least 15 credits in one track, 400-level or above
- At least 15 credits that are graduate level (700 or above or courses with the Graduate Level Coursework attribute)
- Optional, but recommended: 3-6 credits of independent study project experience (B M E 799 Advanced Independent Study) or master’s thesis research (B M E 790 Master’s Research and Thesis) in the student’s track (a maximum of 6 credits can be applied to the M.S. although students may take more). These credits may count towards your track credits.

Specific course selection is very flexible and draws upon a variety of courses. The required coursework is designed to complement each student's interests and background in biomedical engineering and meet the spirit of a BME degree; deviations from the requirements should be discussed with the associate chair of graduate advising and will be decided on a case-by-case basis.

**Ph.D. Requirements**

In addition to the M.S. requirements listed above, Ph.D. students must complete one the following six Ph.D. tracks. Credits used toward the M.S. requirements may also be used toward the Ph.D. track requirements.

Students must complete a minimum of 60 credits total to earn the Ph.D. degree. Beyond the 30 credits used to satisfy the M.S. degree requirements, students typically take 30 credits of research (B M E 790 Master's Research and Thesis, B M E 890 Pre-dissertation Research, and B M E 990 Research and Thesis).

**Biomaterials & Tissue Engineering Track**

Biomaterials and tissue engineering employ a diverse range of approaches to develop methods to diagnose and treat diseases, create living tissue environments that may be used to restore the function of a damaged organ, and uncover biological mechanisms related to tissue development and disease. Graduate students trained in biomaterials and tissue engineering are expected to gain a detailed understanding of cellular and molecular biology, materials science, and engineering methods relevant to their research focus.

**Elective Requirement**

To provide breadth, at least 6 credits of electives must be chosen from courses that are not listed above.

**Total Credits**

17-20

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Biomedical Imaging & Optics Track**

Biomedical imaging and optics research develops and utilizes new experimental and computational tools to characterize tissue structure across multiple size scales. A particular focus is on human health, especially with respect to achieving superior diagnostic/prognostic tools for a spectrum of diseases states. Graduate students trained in this track are expected to gain a detailed understanding of mathematics, biology and engineering both optical and/or physical methods relevant to their research focus.

**Elective Requirement** To provide breadth, at least 6 credits of electives must be taken from courses that are not listed above.

**Total Credits** 21-26

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

### Medical & Microdevices Track

Medical and microdevices involve the use of electronic and computational tools to develop devices used in diagnosis and treatment of disease ranging from the systemic to the cellular and molecular levels.

Neuroengineering Track

Neuroengineering is the convergence of neuroscience, computation, device development, and mathematics to improve human health. Neuroengineering brings together state-of-the-art technologies for the development of devices and algorithms to assist those with neural disorders. It is also used to reverse engineer living neural systems via new algorithms, technologies and robotics. Students pursing this track are involved in all of these endeavors so as the next generation of engineers, they will transcend the traditional boundaries of neuroscience, technology, engineering and mathematics.

**Systems & Synthetic Biology Track**

Systems and synthetic biology utilizes experimental and computational tools in an iterative fashion to analyze and regulate biological systems.

Students interested in earning a doctoral minor in Quantitative Biology (p. 213): enrollment in BME 601 Special Topics in Biomedical Engineering (Topic in Methods in Quantitative Biology) is a requirement. Additionally, students will need to take one additional 3-credit course in quantitative science, biology, or integrated biology/quantitative science from the approved list of courses in the doctoral minor (this course counts toward the elective credits for this track).

Total Credits: 18-23

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2016/01/bme_grad_handbook_2017-2.pdf) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

A student may transfer graduate coursework from other institutions with program approval. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit. Reach out to the BME Graduate Coordinator for more information.

**UW–Madison Undergraduate**

A student who has completed their bachelor’s degree in Biomedical Engineering at UW-Madison may transfer 6 credits of coursework with program approval. These courses must be biomedical engineering department coursework numbered 300 level or above. These courses may not be used toward the Graduate School’s Minimum Graduate Residence Credit.

**UW–Madison University Special**

A maximum of 15 credits from the UW–Madison University Special student career may count toward program requirements. Minimum graduate resident credits requirement and minimum graduate degree credit requirement: allowed up to 15 credits numbered 300 or above. Minimum graduate coursework (50%) requirement: allowed up to 15 credits numbered 700 or above. Coursework earned five or more years prior to admission to a Ph.D. program is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

Advisor: Every BME graduate student must have a faculty advisor. A faculty advisor provides the graduate student with academic guidance in their course program and research oversight in their thesis, project, or engineering report. Graduate students should always seek advice from their advisor and other faculty in their interest area prior to enrolling for courses.

Doctoral Committee: In addition to the committee requirements put forth by the Graduate School, BME has department-specific criteria that Ph.D. students must meet when forming their committees:

• Committees should consist of 5 members (one more than the Graduate School's requirement of four).
• The chair should be a faculty member in BME (primary or affiliate).
• At least one member must be from outside of the primary BME faculty.
• At least one member must be a primary BME faculty.
• The Ph.D. committee chair should approve the other members of the committee.
• Students must have a yearly committee meeting after passing the preliminary exam.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Students typically complete their degree within seven years of entering the program.

Within two years of entering their program, students are required to pass a comprehensive qualifying examination.

Within one year of completion of their qualifying examination, students are required to prepare for a preliminary examination.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

THE INDIVIDUAL DEVELOPMENT PLAN (IDP)

An Individual Development Plan (IDP) (https://grad.wisc.edu/pd/idp) helps graduate students and postdoctoral researchers:

• assess current skills, interests, and strengths;
• make a plan for developing skills to meet academic and professional goals; and
• communicate with supervisors, advisors, and mentors about evolving goals and related skills.

The IDP is a document to be revisited again and again, to update and refine as goals change and/or come into focus, and to record progress and accomplishments.

The university recommends IDPs for all postdoctoral researchers and graduate students, and requires IDPs for all postdoctoral researchers and graduate students supported by National Institutes of Health (NIH) funding. See the Graduate School for more information and IDP resources (https://grad.wisc.edu/pd/idp).

ENGINEERING CAREER SERVICES

The Engineering Career Services (https://ecs.wisc.edu) staff offers assistance to students searching or preparing for internships, co-ops, and jobs with well-recognized organizations.

THE WRITING CENTER

The Writing Center (https://writing.wisc.edu) is a campus-wide organization that provides free of charge, face-to-face and online consultations for students writing papers, reports, resumes, and applications.

LEARNING OUTCOMES

1. Demonstrate an ability to synthesize knowledge from a subset of the biological and physical sciences.
2. Conduct original research.
3. Demonstrate an ability to create new knowledge and communicate it to their peers.
4. Foster ethical and professional conduct.

QUANTITATIVE BIOLOGY, DOCTORAL MINOR

Technological innovations have revolutionized the scale and detail with which biological systems can be explored. With that revolution has come a demand for scientists who can develop and analyze quantitative and predictive models of biological systems. The doctoral minor in Quantitative Biology (https://qbi.wisc.edu) is designed to complement the depth of training in biological or quantitative sciences that a student achieves through UW–Madison’s graduate programs with the breadth that is needed to conduct research under this paradigm. In addition to coursework in biological, quantitative, and integrated courses, students in the program will take an inter-disciplinary research seminar to prepare them for research that crosses these boundaries. This training will prepare students for careers in academic and industrial settings, where the ability to cross disciplinary lines and work in teams with diverse expertise is critical.

REQUIREMENTS

Students who are candidates for the Ph.D. degree in any department or program may obtain an interdisciplinary minor in Quantitative Biology by earning:

- A minimum of 10 credits from the courses listed below, divided into four categories:
  - A required, 1-credit research seminar (students are advised to take during first year of graduate program)
  - One course from a quantitative science
  - One course from a biological science
  - One integrated course

Admissions to the Bioinformatics, Graduate/Professional Certificate have been suspended as of spring 2019 and will be discontinued as of spring 2022. If you have any questions, please contact the department.

Bioinformatics is the application of computational and statistical methods to molecular biology. In the realm of biological and medical science, bioinformatics is a central discipline and is placing a new demand on the training of graduate students and other scientists in the biological and computer sciences.

The educational objective of the graduate certificate program in bioinformatics is to provide added formal training for graduate students currently enrolled at UW–Madison to improve their fundamental skills in bioinformatics. The goal is to allow them to have enough basic knowledge to continue their own research and to collaborate with computer scientists specializing in bioinformatics methods.

Admissions to the Bioinformatics, Graduate/Professional Certificate have been suspended as of spring 2019 and will be discontinued as of spring 2022. If you have any questions, please contact the department.

The Department of Biostatistics and Medical Informatics is the administrative home of the bioinformatics certificate program.

You must be currently enrolled in a graduate program at UW–Madison.

To apply for the certificate program you must provide the following:

- A completed Graduate Certificate in Bioinformatics Application Form (https://www.biostat.wisc.edu/sites/default/files/Application.pdf)
- A Statement of Purpose explaining how the certificate program will help your current and future research
- A CV/resume
- One letter of recommendation

Please submit the listed materials to Beth Bierman, graduate coordinator, bbierman@wisc.edu

For additional information about the certificate program, see Graduate Certificate in Bioinformatics (https://www.biostat.wisc.edu/content/graduate-certificate-bioinformatics)

Applications are accepted on a rolling basis.

**Requirements**

The Graduate/Professional Certificate in Bioinformatics consists of four courses for a total of 12 credits. Three of the courses are required; one is an elective. Depending on their course and/or research load, students are given two years to complete the program.

**Prerequisites:**
The current explosion of biomedical data provides an awesome opportunity to improve understanding of the mechanisms of disease and ultimately to improve human health care. However, fully harnessing the power of high-dimensional, heterogeneous data requires a new blend of skills including programming, data management, data analysis, and machine learning.

The M.S. degree program in biomedical data science covers core concepts and allows for concentrated coursework, in both methodology and application.

### Admission

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Potential students include both those with bachelor’s degrees in an area of data-science (e.g., computer science, statistics), as well as health professionals and clinicians (e.g., M.D.’s, Pharm.D.’s, R.N.’s). It is expected that admitted candidates will have demonstrated an aptitude for computer science and math, fundamental programming skills, knowledge of data structures and algorithms, and at least two semesters of college calculus. We will however consider candidates who have a wide range of undergraduate backgrounds; providing opportunities to develop necessary skills immediately upon entering the program.

### Application

**Application Deadline:** January 12
For additional information about admission to the program, see MS Program in Biomedical Data Science (https://www.biostat.wisc.edu/content/ms_program_in_biomedical_data_science) on the department website.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Funding guarantees are not provided for students in this program. Students are encouraged to explore funding options available across campus.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**Mode of Instruction Definitions**

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

2 The Professional track is intended for students who are interested in a terminal M.S. degree that will equip them to work as a professional in industry (e.g., developers of health information systems and electronic health records, and of novel genetic tests—as just a few examples), a hospital, or a research lab. In consultation with their advisor, students will select courses that will provide them with additional biomedical background for future employment opportunities.

For example, if the professional track is chosen, students may focus their studies on genetics or neuroscience.

3 The Research track is for students who are interested in developing their skills as an independent researcher. Students will conduct an independent research project with their faculty advisor. In consultation with their advisor students will select a course in responsible conduct of research. In addition, the advisor will help students select an elective specifically orientated to the topic of the research.

For example, if the Research track is chosen, a student could conduct an independent research project on breast cancer risk prediction. For the responsible conduct of research, the student could take Ethics for Data Scientists. For the research-oriented elective, the student might take a course in cancer genetics or machine learning.

Policies

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.biostat.wisc.edu/sites/default/files/Handbook2017.pdf) is the repository for all of the program’s policies and requirements.

Prior Coursework

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, students are allowed up to 7 credits numbered 300 or above from a UW–Madison undergraduate degree to count toward the degree. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison Special student. Coursework earned five
or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION
The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30. Failure to do so will result in a hold being placed on the student’s registration.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
If students have been absent for five or more years, they must file a new Graduate School application for admission and submit it with a new application fee. Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Students may count the coursework completed before their absence for meeting graduate degree-credit requirements; the Graduate School will not count that work toward the Graduate School’s minimum residence credit requirement.

OTHER
Funding guarantees are not provided for students in this program. Students are encouraged to explore funding options available across campus.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Understand, apply, and evaluate common informatics theories, methods, and tools related to biological and biomedical problems, health care and public health.
2. Apply, adapt, and validate an existing approach to a specific biomedical and health problem.
3. Produce solutions that address academic or industrial needs using informatics tools and knowledge.
4. Evaluate the impact of biomedical informatics applications and interventions.
5. Understand the challenges and limitations of technological solutions.
6. Demonstrate scholarly oral and written presentations.
7. Adhere to the professional and legal standards of conduct in Biomedical Data Science.

PEOPLE
Faculty: Broman, Buchanan, Burnside, Chappell, Chen, Chung, Craven, Dewey, Doan, Dyer, Elwert, Gangnon, Gianola, Gitter, Keles, Kendziorksi, Kim, Lu, Mao, Mendonça, Mumford, Newton, Ong, Page, Palta, Patel, Peissig, Rathouz (chair), Rosa, Rosenberg, Roy, Singh, Sorkness, Tang, Wahba, Yandell, Velten, Yu, Zhang, Zhu

BIOMEDICAL DATA SCIENCE, PH.D.
The current explosion of biomedical data provides an awesome opportunity to improve understanding of the mechanisms of disease and ultimately to improve human health care. However, fully harnessing the power of high-dimensional, heterogeneous data requires a new blend of skills including programming, data management, data analysis, and machine learning.

Blending the best of statistics and computer sciences, biostatistics and biomedical informatics, this program provides students the training they need to make sense of large-scale biomedical data, and to be scientific leaders in the team science that invariably accompanies such data. Unique features of the program include cross-training in computer science and biostatistics, and research rotations mentored by a program faculty member jointly with a scientific collaborator.

ADMISSIONS
Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>

<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/#english-proficiency">https://grad.wisc.edu/apply/requirements/#english-proficiency</a>).</td>
</tr>
</tbody>
</table>
Other Test(s) (e.g., GMAT, MCAT)  The MCAT may be accepted as an alternate to the GRE.
Letters of Recommendation 3
Required

Potential students include both those with bachelor’s degrees in an area of data-science (e.g., computer science, statistics), as well as health professionals and clinicians (e.g., M.D.'s, Pharm.D.'s, R.N.’s). It is expected that admitted candidates will have demonstrated an aptitude for computer science and math, fundamental programming skills, knowledge of data structures and algorithms, and at least two semesters of college calculus. We will however consider candidates who have a wide range of undergraduate backgrounds; providing opportunities to develop necessary skills immediately upon entering the program.

Applying to the Program:

- A formal online application (https://grad.wisc.edu/apply) with required fee through the UW–Madison Graduate School
- Three letters of recommendation
- Transcripts from each higher-education institution attended
- A statement of purpose
- GRE or MCAT scores
- Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score (TOEFL, MELAB, or IELTS)
- Evidence of quantitative preparation, including at least two semesters of college calculus (similar to MATH 221–MATH 222) and either a course in linear algebra (similar to MATH 340) or courses in programming and data structures

Application Deadline: December 31

For additional information about admission to the program, see PhD Program in Biomedical Data Science (https://www.biostat.wisc.edu/PHD-Biomedical-Data-Science) on the department website.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The program is designed such that almost all students who are accepted to the program will receive guaranteed funding for five years. This funding may take a number of forms including, but not limited to training grants, teaching assistantships, and research assistantships. For more information about funding opportunities, see Graduate Assistantships (https://grad.wisc.edu/studentfunding/currentstudents).

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Assessments
Students must complete an Oral Preliminary Exam, ideally taken in the students’ third year.

Examinations

Language
No language requirements.

Requirements

Doctoral Minor/ Breadth
All doctoral students are required to complete a minor.

---

REQUIRED COURSES
CORE TOPICS
Three year-long course sequences (18 credits) will be selected from a set of core topics.

1. A Biostatistics Theory and Methods sequence (topics 1–3)
2. A Computer Science/Informatics sequence (topics 4–7)
3. A sequence from any of the listed topics from Biostatistics Theory and Methods, Computer Science/Informatics, and the Specializations (topics 1–12)

SEQUENCES IN BIOSTATISTICS THEORY AND METHODS (TOPICS 1–3)

GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.biostat.wisc.edu/sites/default/files/Handbook2017.pdf) is the repository for all of the program's policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions toward the graduate degree credit and graduate course work (50%) requirements. Course work earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW-Madison Undergraduate

For well-prepared advanced students, a student’s program may decide to accept up to 7 credits numbered 300 or above of required or elective courses from the undergraduate work completed at UW–Madison toward fulfillment of minimum degree and minor credit requirements. However, this work would not be allowed to count toward the 50% graduate course work minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA. The Graduate School’s minimum graduate residence credit requirement can be satisfied only with courses taken as a graduate student at UW–Madison.

UW-Madison University Special

After admission to a graduate program, the student’s program may decide to accept up to fifteen University Special student credits as fulfillment of the minimum graduate residence, graduate degree, or minor credit requirements on occasion as an exception (on a case-by-case basis). In all these cases, the student would have to pay the difference in tuition for the terms in question. UW–Madison course work taken as a University Special student would not be allowed to count toward the 50% graduate course work minimum unless taken at the 700 level or above. This work will not appear on the graduate career portion of UW–Madison transcript nor count toward the graduate career GPA.

PROBATION

The status of a student can be one of three options:

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee remains in place).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

All students are required to conduct a yearly progress report meeting with their advisor, scheduled by December 17 and completed by April 30. Failure to do so will result in a hold being placed on the student’s registration.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

If students have been absent for five or more years, they must file a new Graduate School application for admission and submit it with a new application fee.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may by require to take another
preliminary examination and to be admitted to candidacy a second time.

**OTHER**

Funding guarantees are not provided for students in this program. Students are encouraged to explore funding options available across campus.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Articulate the biological context of a research question and the scientific relevance of analysis results.
2. Communicate with scientific and quantitative (computational and statistical) colleagues about data analysis goals, methods, and results.
3. Extract the statistical or computational problems from a scientific problem. Develop, characterize, and implement suitable analysis methods to answer questions from biomedical data. Evaluate the validity of analysis methods.
4. Analyze data; extract knowledge and guide decisions based on biomedical data. Organize data and software so that quantitative analyses are meaningful and reproducible.
5. Critically evaluate quantitative approaches in the scientific literature.
6. Evaluate and develop study designs and recognize limitations and potential biases in research data sets.
7. Identify the ethical and regulatory issues surrounding a research project.
8. As part of a biological, biomedical or population health investigative team, serve as the leader in the area of rigorous computational and statistical investigation.

**PEOPLE**

**Faculty:** Professors Ane, Baum, Cameron (chair), Emshwiller, Fernandez, Gilroy, Givnish, Graham, Hotchkiss, Larget, Otegui, Spalding, Sytsma, Waller; Associate Professors Maeda, Pringle; Assistant Professors Keefover-Ring, McCulloh; Affiliate and Adjunct Faculty: Amasino, Brunet, Damschen, Spooner, Wiedenhoft, P. Zedler

**BOTANY, DOCTORAL MINOR**

Any student enrolled in a UW–Madison doctoral program can pursue a doctoral minor in botany. The doctoral minor offers training in the field of botany and can be tailored to a student’s specific interests. A doctoral minor in botany is an excellent way to gain a fundamental breadth of understanding of the basic properties of plant life.

**REQUIREMENTS**

Graduate students who wish to pursue an Option A external minor in the botany department should consult a faculty member within botany (their potential minor professor) or the chair of the botany graduate committee. Courses are chosen in conjunction with the chosen botany faculty member who serves as the minor advisor, and the student’s departmental advisor. A student may earn a doctoral minor in botany with 9 credits minimum in botany, including a seminar course, while in residence at UW–Madison. All 9 credits are either exclusively graduate-level botany courses numbered 700 and above or courses numbered 300 and above and identified as designed for graduate work. Directed study courses do not count toward the minor.

**PEOPLE**

**Faculty:** Professors Ane, Baum, Cameron (chair), Emshwiller, Fernandez, Gilroy, Givnish, Graham, Hotchkiss, Larget, Otegui, Spalding, Sytsma, Waller; Associate Professors Maeda, Pringle; Assistant Professors Keefover-Ring, McCulloh; Affiliate and Adjunct Faculty: Amasino, Brunet, Damschen, Spooner, Wiedenhoft, P. Zedler

**BOTANY, M.S.**

The Department of Botany consists of 18 faculty members with about 45 graduate students pursuing M.S. and Ph.D. degrees. The American Council on Education Rating of Graduate Program Quality ranks the department among the top five departments of botany in the country.

Graduate students work with faculty and staff on a range of projects in plant biology at all levels of organization, from molecules, through cells and organs, to populations, communities, and lineages of organisms. Major research areas include molecular, cellular, and developmental biology; structural plant biology; ecology; evolution; and systematics. We also provide advanced instruction and opportunities for research in phycology, bryology, mycology, ethnobotany, paleoecology, conservation and restoration ecology, taxonomy, genetics, and physiology.

Increasingly, graduate student projects encompass two or more of these categories. Master’s students may complete a non-thesis program in conservation or restoration ecology designed to prepare them for
careers in environmental consulting, natural resource agencies, and nongovernmental organizations.

Students interested in fields bordering botany will find rich opportunities for course work, collaborative research, and seminars in many other departments and schools such as Agronomy, Bacteriology, Biochemistry, Chemistry, Engineering, Entomology, Forest and Wildlife Ecology, Genetics, Geography, Geoscience, Horticulture, Physics, Plant Breeding/Plant Genetics, Plant Pathology, Soil Science, Zoology, and the Nelson Institute for Environmental Studies. Interdisciplinary work is encouraged.

Graduate study in the Department of Botany requires a combination of advanced course work, participation in seminars, and original research. Course requirements follow one of five tracks: general botany; ecology; evolution; molecular, cellular, and developmental biology; or the non-thesis master’s degree in conservation and restoration ecology. The department encourages students to pursue independent research soon after arrival. In consultation with the faculty advisor, each student selects a track that includes courses and research topics related to his or her interests and training in the array of techniques and approaches needed to pursue research.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>

</tbody>
</table>

The Department of Botany will consider applicants for graduate degrees who surpass the minimum admissions requirements of the Graduate School. Candidates for fall admission should submit their full applications to the department by December 1 to be considered for financial support. Applications may be reviewed until April 15. The general Graduate Record Exam (GRE) is not required, but if available, will be considered in the admissions process. The GRE subject test in Biology or in Cell and Molecular Biology is not required but, if available, will be considered. Admission is based on the applicant’s statement of purpose, undergraduate record, letters of recommendation, experience in research, and the interests they share with one or more potential faculty advisors.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial support is available to qualified graduate students in the form of teaching, research and project assistantships and fellowships. Typically, there are approximately 35 graduate students who hold assistantships or fellowships in the botany department. In addition, graduate students are eligible for a number of intradepartmental awards and grants.

Graduate students who have a teaching, research or project assistantships of at least a 33.3% appointment (approximately 13.3 hours per week) for a fall or spring term are eligible to receive remission of full tuition. Fellowships or traineeships that are payrolled through the university and that carry stipends equivalent to at least a 33.3% research assistantship also qualify for remission of nonresident tuition. Tuition remission is conditionally awarded at the start of the semester based on the expectation that actual earnings during the semester will be at least 33.3% of the full-time rate. All students pay segregated fees. The only exception is that fellowships paid through the Graduate School have segregated fees waived in addition to tuition.

Assistantships and fellowships also provide eligibility for an excellent health insurance program, an extremely valuable benefit that provides single or family coverage that is more comprehensive than individuals can usually purchase on their own.

TEACHING ASSISTANTSHIPS

The most common source of support is a teaching assistantship. Historically, stipend rates for teaching and project assistants are governed by the Teaching Assistants’ Association (TAA) bargaining unit.

To receive a teaching assistantship, candidates for admission must meet the following requirements:

- evidence (usually from the undergraduate transcript) of an appropriate background in the relevant subject matter of the course(s) to which appointment is being considered;
- evidence (usually from letters of recommendation or verbal communication) of the candidate’s potential as a teaching assistant;
- an undergraduate GPA of 3.0 or above (on a 4.0 scale); and
- for students whose native language is not English, evidence of competence in spoken English through the SPEAK test that is administered by the UW. International applicants should note that a TA appointment is not normally possible during the first year of graduate study.
Current students, who apply for their first teaching assistantship, are also subject to the above criteria, as well as their performance as a graduate student. Reappointment as a teaching assistant depends upon satisfactory progress as a graduate student, satisfactory performance as a teaching assistant, and completing the Equity/Diversity TA Training.

Teaching assistants may be eligible for University teaching awards (https://grad.wisc.edu/taawards), including the UW–Madison Early Excellence in Teaching Award, UW–Madison Exceptional Service Award, UW–Madison Innovation in Teaching Award, UW–Madison Capstone Ph.D. Teaching Award, and the College of Letters & Science Teaching Fellow.

RESEARCH OR PROJECT ASSISTANTSHIPS
Research and project assistantships are made possible by grants awarded to individual professors for particular research programs. Recipients are selected by the individual professor concerned. Availability of research and project assistantships varies.

ADVANCED OPPORTUNITY FELLOWSHIPS
Advanced Opportunity Fellowships (AOF) are granted to the UW–Madison's Graduate School by the State of Wisconsin and are combined with other graduate education funds to support the recruitment and retention of highly qualified underrepresented students in UW–Madison graduate programs. Fellowships are competitive and merit based. AOF funding is intended to increase the racial and ethnic diversity of the graduate student population, as well as to support economically disadvantaged and first generation college students. AOF fellowships are paid through the Graduate School by the College of Letters & Science’s Community of Graduate Research Scholars (http://ls.wisc.edu/current-students/graduate-students/cgrs) (C-GRS) program.

EXTERNAL FELLOWSHIPS
Fellowships from professional societies and outside agencies provide another important source of aid for which students may apply either before or after commencing graduate work at UW–Madison. If necessary, external fellowships can often be supplemented with university funds up to prevailing university fellowship rates.

All qualified students who are US citizens, nationals or permanent resident aliens of the US are urged to apply to the National Science Foundation for the pre-doctoral fellowship competition. Students apply directly to NSF; the closing date is usually in early November. Please check the NSF website (http://www.nsf.gov) for the application instructions and deadline.

INTRADEPARTMENTAL FELLOWSHIPS AND AWARDS
For more information on Intradepartmental Fellowships and Awards, please see the latest descriptions (https://botany.wisc.edu/financial-support) on the botany website.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.
COURSES REQUIRED
A minimum of 30 credits in natural sciences (undergraduate and graduate program courses combined) is required. A minimum of 6 credits in graduate-level botany courses must be completed at UW–Madison. Seminars and research credits do not count toward the 6 credits in botany. Courses may be required to address deficiencies in the following: GENETICS 466 Principles of Genetics or equivalent; CHEM 103 General Chemistry I and CHEM 104 General Chemistry II or equivalent; CHEM 341 Elementary Organic Chemistry or equivalent; a physics course including electricity and light; one semester of statistics; one semester of calculus. Contact the department for more information.

M.S. students complete a minimum of 16 credits while in residence at the UW, including:

• Courses required for their selected track (see below)
• Six (6) credits within the botany department (can also fulfill track requirements)
• Two (2) seminar courses
• Courses assigned by the Academic Advisory Committee and/or the student's M.S. committee
• Research credits

Each graduate student in botany selects one of the following tracks 1:

General Botany Track
M.S. students must have one course from at least six of the seven.

• genetics,
• biochemistry, cell or molecular biology,
• plant physiology or plant developmental biology,
• cryptogamic botany,
• plant anatomy or morphology,
• ecology, and
• evolution or systematics

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Ecology Track
M.S. students must have a minimum of five courses as follows:

• at least three courses (minimum of 9 credits) in ecology,
• one course in evolution, and
• one course in any of the following: systematics; cryptogamic botany; biochemistry, cell or molecular biology; plant physiology or plant developmental biology; plant anatomy or morphology; or genetics

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Evolution Track
M.S. students must have a minimum of five courses, at least one from each of the following:

• evolution,
• systematics or cryptogamic botany,
• population or quantitative genetics,
• ecology, and
• one course in any of the following: biochemistry, cell or molecular biology; plant physiology or plant developmental biology; or plant anatomy or morphology

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Molecular, Cellular, and Developmental Biology (MCDB) Track
M.S. students must have a minimum of five courses, at least one from each of the following:

• plant anatomy or morphology,
• biochemistry, cell or molecular biology,
• plant physiology,
• plant developmental biology or genetics, and
• one course in any of the following: ecology; systematics; evolution; or cryptogamic botany

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES
GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://uwmadison.app.box.com/v/botanyhandbook) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK
Graduate Work from Other Institutions
No credits from other institutions are allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement.

UW–Madison University Special
No credits earned as a UW–Madison Special student are allowed to count toward the minimum graduate residence credit requirement, the minimum graduate degree credit
and launch your career.

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Acquire and demonstrate fundamental understanding of the basic properties of plant life from the subcellular to the ecosystem level of organization.
2. Use critical elements of the methodological or theoretical framework in a specialized botanical subdiscipline to develop hypotheses, acquire scientific information, and interpret results in the context of the historical scientific literature.
3. Develop the skills of communicating scientific information, especially in written form.
5. Recognize and apply ethical conduct in the collection, analysis, and presentation of scientific data.
6. Develop the skills essential to critical debate, discussion, and exchange of scientific information among peers and audiences of diverse intellectual and personal backgrounds.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

A major professor must be chosen as soon as possible after beginning graduate study and in all cases by the end of the first year. A vice major professor is required.

Students meet with an advisory committee before their first semester and with their M.S. committee by the end of their first year to plan their coursework.

Students meet with their advisor on a regular basis to assess progress.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

The master’s degree should be completed within two and one-half years of study.

OTHER

Assistantships are only available for thesis M.S. and Ph.D. degrees.

PROFESSIONAL DEVELOPMENT

The Department of Botany consists of 22 faculty members with about 40 graduate students pursuing M.S. and Ph.D. degrees. The American Council on Education Rating of Graduate Program Quality ranks the department among the top five departments of botany in the country.

Graduate students work with faculty and staff on a range of projects in plant biology at all levels of organization, from molecules, through cells and organs, to populations, communities, and lineages of organisms. Major research areas include molecular, cellular, and developmental biology; structural plant biology; ecology; evolution; and systematics. We also provide advanced instruction and opportunities for research in phycology, bryology, mycology, ethnobotany, paleoecology, conservation and restoration ecology, taxonomy, genetics, and physiology.

Increasingly, graduate student projects encompass two or more of these categories. Master’s students may complete a non-thesis program in conservation or restoration ecology designed to prepare them for careers in environmental consulting, natural resource agencies, and nongovernmental organizations.

Students interested in fields bordering botany will find rich opportunities for course work, collaborative research, and seminars in many other departments and schools such as Agronomy, Bacteriology, Biochemistry, Chemistry, Engineering, Entomology, Forest and Wildlife Ecology, Genetics, Geography, Geoscience, Horticulture, Physics, Plant Breeding/Plant Genetics, Plant Pathology, Soil Science, Zoology, and the Nelson Institute for Environmental Studies. Interdisciplinary work is encouraged.

Graduate study in the Department of Botany requires a combination of advanced course work, participation in seminars, and original research. Course requirements follow one of five tracks: general botany; ecology; evolution; molecular, cellular, and developmental biology; or the non-thesis master’s degree in conservation and restoration ecology. The department encourages students to pursue independent research soon after arriving. In consultation with the faculty advisor, each student selects a track that includes courses and research topics related to his or her interests and training in the array of techniques and approaches needed to pursue research.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).
Financial support is available to qualified graduate students in the form of teaching, research and project 
assistantships and fellowships. Typically, there are approximately 35 graduate students who hold 
assistantships or fellowships in the botany department. In addition, graduate students are eligible for a number of 
intradepartmental awards and grants.

Graduate students who have a teaching, research or project 
assistantships of at least a 33.3% appointment (approximately 13.3 hours 
per week) for a fall or spring term are eligible to receive remission of 
full tuition. Fellowships or traineeships that are payrolled through the 
university and that carry stipends equivalent to at least a 33.3% research 
assistantship also qualify for remission of nonresident tuition. Tuition 
remission is conditionally awarded at the start of the semester based 
on the expectation that actual earnings during the semester will be at 
least 33.3% of the full-time rate. All students pay segregated fees. The 
only exception is that fellowships paid through the Graduate School have 
segregated fees waived in addition to tuition.

Assistantships and fellowships also provide eligibility for an excellent health insurance program, an extremely valuable benefit that provides single or family coverage that is more comprehensive than individuals can usually purchase on their own.

TEACHING ASSISTANTSHIPS
The most common source of support is a teaching assistantship. Historically, stipend rates for teaching and project assistants are governed by the Teaching Assistants’ Association (TAA) bargaining unit.

To receive a teaching assistantship, candidates for admission must meet the following requirements:

- evidence (usually from the undergraduate transcript) of an appropriate background in the relevant subject matter of the course(s) to which appointment is being considered;
- evidence (usually from letters of recommendation or verbal communication) of the candidate’s potential as a teaching assistant;
- an undergraduate GPA of 3.0 or above (on a 4.0 scale); and
- for students whose native language is not English, evidence of competence in spoken English through the SPEAK test that is administered by the UW. International applicants should note that a TA appointment is not normally possible during the first year of graduate study.

Current students, who apply for their first teaching assistantship, are also subject to the above criteria, as well as their performance as a graduate student. Reappointment as a teaching assistant depends upon satisfactory progress as a graduate student, satisfactory performance as a teaching assistant, and completing the Equity/Diversity TA Training.

Teaching assistants may be eligible for University teaching awards (https://grad.wisc.edu/taawards), including the UW-Madison Early Excellence in Teaching Award, UW–Madison Exceptional Service Award, UW–Madison Innovation in Teaching Award, UW–Madison Capstone Ph.D. Teaching Award, and the College of Letters & Science Teaching Fellow.

RESEARCH OR PROJECT ASSISTANTSHIPS
Research and project assistantships are made possible by grants 
awarded to individual professors for particular research programs. 
Recipients are selected by the individual professor concerned. Availability of research and project assistantships varies.

ADVANCED OPPORTUNITY FELLOWSHIPS
Advanced Opportunity Fellowships (AOF) are granted to the UW–Madison’s Graduate School by the State of Wisconsin and are combined with other graduate education funds to support the recruitment and retention of highly qualified underrepresented students in UW–Madison graduate programs. Fellowships are competitive and merit based. AOF funding is intended to increase the racial and ethnic diversity of the graduate student population, as well as to support economically disadvantaged and first generation college students. AOF fellowships are paid through the Graduate School by the College of Letters & Science's Community of Graduate Research Scholars (http://ls.wisc.edu/current-students/graduate-students/cgrs) (C-GRS) program.
EXTERNAL FELLOWSHIPS
Fellowships from professional societies and outside agencies provide another important source of aid for which students may apply either before or after commencing graduate work at UW–Madison. If necessary, external fellowships can often be supplemented with university funds up to prevailing university fellowship rates.

All qualified students who are US citizens, nationals or permanent resident aliens of the US are urged to apply to the National Science Foundation for the pre-doctoral fellowship competition. Students apply directly to NSF; the closing date is usually in early November. Please check the NSF website (http://www.nsf.gov) for the application instructions and deadline.

INTRADEPARTMENTAL FELLOWSHIPS AND AWARDS
For more information on Intradepartmental Fellowships and Awards, please see the latest descriptions (https://botany.wisc.edu/financial-support) on the botany website.

REQUIRED COURSES
A minimum of 51 credits in natural sciences (undergraduate and graduate program courses combined) is required. A minimum of 6 credits in graduate-level botany courses must be completed at UW–Madison. Seminars and research credits do not count toward the 6 credits in botany. Courses may be required to address deficiencies in the following: GENETICS 466 Principles of Genetics or equivalent; CHEM 103 General Chemistry I and CHEM 104 General Chemistry II or equivalent; CHEM 341 Elementary Organic Chemistry or equivalent; a physics course including electricity and light; one semester of statistics; one semester of calculus. Contact the department for more information.

Ph.D. students complete a minimum of 32 credits while in residence at the UW prior to earning dissertator status. These credits complete the following requirements:
• Courses required for their selected track (see below)
• Six (6) credits within the botany department (can also fulfill track requirements)
• Two (2) seminar courses, including one outside the student’s track and/or outside botany
• Courses for the student’s minor field of study
• Courses assigned by the Academic Advisory Committee and/or the student’s Ph.D. committee

Each graduate student in botany selects one of the following tracks:

**General Botany Track**
Ph.D. students must have one course from each of the following:
• genetics,
• biochemistry, cell or molecular biology,
• plant physiology or plant developmental biology,
• cryptogamic botany,
• plant anatomy or morphology,
• ecology, and
• evolution or systematics

**Ecology Track**
Ph.D. students must have a minimum of five courses as follows:
• at least three courses (minimum of 9 credits) in ecology,
• one course in evolution, and
• one course in any of the following: systematics; cryptogamic botany; biochemistry, cell or molecular biology; plant physiology or plant developmental biology; plant anatomy or morphology; or genetics

**Evolution Track**
Ph.D. students must have a minimum of five courses, at least one from each of the following:
• evolution,
• systematics or cryptogamic botany,
• population or quantitative genetics,
• ecology, and
• one course in any of the following: biochemistry, cell or molecular biology; plant physiology or plant developmental biology; or plant anatomy or morphology

**Molecular, Cellular, and Developmental Biology (MCDB) Track**
Ph.D. and M.S. students must have a minimum of five courses, at least one from each of the following:
• plant anatomy or morphology,
• biochemistry, cell or molecular biology,
• plant physiology,
• plant developmental biology or genetics, and
• one course in any of the following: ecology; systematics; evolution; or cryptogamic botany

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**POLICIES**

**GRADUATE SCHOOL POLICIES**
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**
The Graduate Program Handbook (https://uwmadison.box.com/v/botanyhandbook) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**
No credits from other institutions are allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement.

**UW–Madison Undergraduate**
No credits from a UW–Madison undergraduate degree are allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement.

**UW–Madison University Special**
No credits earned as a UW–Madison Special student are allowed to count toward the minimum graduate residence credit requirement, the minimum graduate degree credit requirement, or the minimum graduate coursework requirement.

Assistantships are only available for thesis M.S. and Ph.D. degrees.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Demonstrate a fundamental breadth of understanding of the basic properties of plant life from the subcellular to the ecosystem level of organization, and an ability to integrate acquired botanical expertise with knowledge of related disciplines including, but not limited to, mathematics, physical sciences, and other life sciences.
2. Apply all elements of the methodological or theoretical framework within a specialized botanical subdiscipline to skillfully develop and execute original research, thereby demonstrating intellectual and technical competency appropriate to that subdiscipline.
3. Achieve a professional level of proficiency communicating scientific research proposals and/or results in written format.
4. Develop skills in oral presentation of scientific research data to peers and general audiences.
5. Evaluate, critique, and apply critical thinking skills to the generation of hypotheses, analysis of data, and interpretation of scientific results in botany and related disciplines.
6. Value and promote professional ethics in the collection, analysis, storage, and presentation of scientific data.
7. Engage in critical and respectful debate, discussion, and exchange of scientific information among peers and audiences of diverse intellectual and personal backgrounds.
8. Appreciate the importance of professional service.

- Business: Supply Chain Management, M.S. (p. 247)
- Business: Supply Chain Management, MBA (p. 249)

**PEOPLE**

**Faculty:** Dean Vallabh “Samba” Sambamurthy

**Accounting and Information Systems**—Professors Warfield (chair), Covaleski, Johnstone, Matsumura, Mayhew, Nair, Wild; Associate Professor Laplante; Assistant Professors Barr-Pulliam, Gaertner, Griffith, Lynch, Steele, Thomas

**Actuarial Science, Risk Management and Insurance**—Professors Schmit (chair), Frees, Rosenberg; Associate Professors Leverty, Shi, Sydnor; Assistant Professor Mukherjee

**Finance, Investment and Banking**—Professors Ready (chair), Brown, Corbae, Eraker, Johannes, Krainer, Mello, Wright; Associate Professors Fedenia, Odders-White; Assistant Professors Chang, Gofman, Levine, Robatto, Wu

**Management and Human Resources**—Professors Trevor (chair), Aldag, Coff, Dunham, Gerhart; Associate Professors Eckhardt, Ganco, Posen, Stajkovic, Terlaak, Triana; Assistant Professors Honor’e, Sarada, Shin

**Marketing**—Professors O’Guinn (chair), Arora, Heide, Moreau, Thompson; Associate Professors Epp, Hoban, Lim, Liu, Peck, Tanner; Assistant Professors Chung, Liu, Mallucci, Polman, Weiss

**Operations and Technology Management**—Professors Morris (chair), De Croix, Hausch, Wemmerlov; Associate Professors Finster, Kim, Lazimy, Siemens; Assistant Professors Baeva, Tong

**Real Estate and Urban Land Economics**—Professors Yavas (chair), Malpezzi, Riddiough; Associate Professors Ghent, Quintin; Assistant Professors Diop, Luque

**BUSINESS ANALYTICS, GRADUATE/PROFESSIONAL CERTIFICATE**

The purpose of the Graduate Business Analytics Certificate program is to achieve three objectives: Prepare students to (1) participate in and promote the progression from data and assumptions to information (descriptive methods), (2) to apply knowledge and understanding of how tools and methods can be used to support decision making (predictive...
methods), and (3) ultimately to document and communicate findings that lead to decisions and plans for implementation (prescriptive methods). Basic elements of the journey have long existed, but it is the integration of these objectives that defines business analytics here in the School of Business.

The certificate prepares students to use analytics for making decisions with a business mindset—seeking answers to questions in order to define the problem, gather necessary data, convert those data to decisions, arrive at and support a business-appropriate answer, and successfully communicate that answer in a form appropriate to the audience. By combining analytics with business knowledge, we prepare our students to function successfully in the data-rich business environment. Business students understand how business operates, how to communicate successfully with others in business, and are familiar with the concept of business goals and objectives. This business perspective is central to the design and differentiation of our certificate.

**ADMISSIONS**

Only MBA, M.S. and M.Acc. students in the School of Business are eligible for this certificate. A student must discuss the certificate requirements with program directors and/or the certificate directors before declaring with the form at the certificate website.

**LEARNING OUTCOMES**

1. Apply analytic tools to prepare, manage, and analyze data for projects (DESCRIPTIVE)
2. Apply analytical tools and methods to both model business issues and appropriately assess and analyze model output (PREDICTIVE)
3. Design and manage data analysis, interpret results, and communicate answers and/or recommendations to support decision making (PRESCRIPTIVE)

**BUSINESS, DOCTORAL MINOR**

Non-business students may earn a doctoral minor in business by completing a minimum of 10 credits in coursework from the School of Business.

**ADMISSIONS**

For both minor options, an interested student should complete the following steps:

- Meet with a major advisor in your home department to determine the business subjects most relevant to your program and/or research.
- Print and complete your portion of the Minor Agreement Form (https://uwmadison.app.box.com/s/nhsn16g1dz6z9bjogwptn90wmjgwf2oi).
- Consult with WSB faculty member in the area(s) where coursework is being considered. This faculty member will sign your Minor Agreement Form to indicate approval of the course(s) shown for that field of study.
- Submit the completed Minor Agreement Form to the Ph.D. Program Office (3115 Grainger Hall) for final approval.

Coursework should begin only after receiving final written approval. A copy of the approved agreement will be kept in the Ph.D. Program Office. It is strongly recommended that you have a copy of this agreement placed in your permanent file in your home (major) department.

If you have questions about the School of Business minor options, faculty representatives, or the Minor Agreement Form, please contact the Ph.D. coordinator (phd@wsb.wisc.edu) or visit 3115 Grainger Hall.

**REQUIREMENTS**

UW-Madison doctoral students from departments outside of the School of Business should follow these guidelines for a minor involving business
coursework. Any minor earned through the School of Business appears as “Business” on a transcript and not from a specific program.

**Option 1:** Complete at least 10 credits within one School of Business program (Accounting, Finance, Management and Human Resources, Marketing, Operations and Information Management, Real Estate and Urban Land Economics, or Risk Management). All courses/credits taken must be graded (A–F).

**Option 2:** Complete a general business minor made up of at least 10 credits from multiple programs (same as above) within the School of Business.

---

## BUSINESS, ENVIRONMENT, AND SOCIAL RESPONSIBILITY, GRADUATE/PROFESSIONAL CERTIFICATE

Business, Environment, and Social Responsibility (BESR) is a 12-credit graduate/professional certificate that offers a suite of courses addressing the interrelations between business and its natural and social environment. Its goal is to provide graduate students the fundamental knowledge and skills to sustainably manage enterprises that integrate economic, environmental, and social dimensions into their decision-making.

Students in the program will acquire knowledge of (1) the causes of environmental and social challenges as relating to business, and respective policy and business responses; (2) frameworks and measurement systems for incorporating sustainability concerns into business analysis and decision-making; and (3) domains in which business activities and sustainability concerns intersect, and the management of these intersections. They further will acquire skills to (1) analyze the causes of and responses to environmental and social problems, as well as develop and implement solutions to these problems as managers and policymakers; (2) identify and apply frameworks for effectively incorporating sustainability considerations into the analysis and decision-making of managers and policymakers; and (3) analyze where and how environmental and social issues intersect with business, as well as develop and implement solutions for managing these intersections.

As determined by each student’s individual course path, students will acquire deeper knowledge and skills in select domains such as systems designs, risk management, green real estate, and more. Students are also encouraged but not required to participate in a variety of events and activities that provide a forum to exchange ideas and connect the business community with students and faculty interested in sustainability.

## ADMISSIONS

The BESR certificate is open to any student with graduate standing at the University of Wisconsin–Madison. Before beginning the application to the graduate/professional certificate, students should gather the information listed below.

- Current GPA
- Advisor’s name and email address
- Planned semester to begin the certificate

**Note:** For the application to be approved, it is required that the student has consent from the faculty advisor (or, where appropriate, graduate program coordinator) to participate in the BESR certificate. The student must have the advisor send an email to the certificate director at aterlaak@bus.wisc.edu confirming this consent.

For more information: Certificate advisor, aterlaak@bus.wisc.edu; bus.wisc.edu/degrees-programs/certificates/graduate/sustainability (https://bus.wisc.edu/degrees-programs/certificates/graduate/sustainability)

### REQUIREMENTS

The required foundation course, advanced business sustainability coursework, and electives from across the campus need to tally a minimum of 12 credits. The slate of coursework options available for fulfilling the certificate program is shown in the table below. Students are strongly encouraged to participate in related non-credit sustainability experiences via competitions, conferences, and speaker events.

The foundation course has no prerequisites and is open to all graduate students on campus. Students will: (1) take one required foundation course (M H R/ENVIR ST 710 Challenges & Solutions in Business Sustainability) (2) choose at least 3 additional credits from a list of School of Business advanced business sustainability coursework, and (3) select up to 6 credits of additional courses from other elective coursework.

Learning Outcomes

1. Gain knowledge of (i) causes of environmental and social challenges related to business and respective policy and business responses, (ii) frameworks and measurement systems for incorporating sustainability concerns into business analysis and decision-making, and (iii) domains in which business activities and sustainability concerns intersect and the management of these intersections.

2. Acquire skills to (i) analyze causes of and responses to environmental/social problems; develop and implement solutions as managers and policymakers, (ii) identify and apply frameworks for incorporating sustainability considerations into analysis and decision-making, (iii) analyze where and how environmental and social issues intersect with business and develop and implement solutions.

3. (i) develop/articulate view of role business plays in sustainability, (ii) use knowledge and skills in business to strengthen sustainability and in sustainability to strengthen business, (iii) create network of likeminded individuals, acquire ability to engage with professionals.

Extracurricular Activities (Certificate students are encouraged, but not required, to engage in extracurricular activities that enhance the certificate's learning outcomes.) These include:

- Speaker events such as the Weston Lecture Series
- Competitions such as Walmart's Sustainable Business Plan Competition and Burrill Business Plan Competition
- Conferences such as the Nelson's Institute Annual Earth Day Conference and Wisconsin Sustainable Business Council Conference
outside their fields, and grow appreciation of how different professions contribute to business sustainability.

**BUSINESS, PH.D.**

The School of Business Ph.D. program has a rich tradition of training scholars who can both enhance the intellectual understanding of business theory and practice and effectively transmit this knowledge to other scholars, business professionals and students.

The high scholarly productivity and leadership of the school’s 80 faculty members are regularly noted in national rankings. Recent studies of U.S. and worldwide scholarly research productivity rated School of Business faculty among the top graduate business schools in the country. In addition to world-renowned recognition for research, the School of Business faculty bring a variety of real-world experience to the program.

The Ph.D. degree provides advanced instruction that actively involves the student in research. School of Business doctoral candidates share with their professors the experience of exploring the frontiers of knowledge while acquiring the spirit as well as the methods of productive scholarship. At the time of enrollment, each student is assigned a major advisor to provide program counsel and to channel communication within and between School of Business departments. The mentoring relationship between the major professor and student is one of mutual agreement.

**DEGREE PROGRAM SPECIALIZATIONS**

The School of Business Ph.D. program (https://wsb.wisc.edu/programs-degrees/phd-admissions) allows students to select from seven specialization tracks available along with a variety of minors. Each specialization permits the student, with the assistance and direction of a major advisor, to tailor a program based on research interests and career goals. The average time needed to complete the degree program is five years.

**ADMISSIONS**

Admission consideration requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. Work experience is not required. Applicants should have an undergraduate minimum grade point average (GPA) of 3.0 or higher on a 4.0 scale. In addition to academic credentials, test scores, personal achievements, motivation, communication skills (written and oral) and recommendation letters are considered in the admission process at both the master’s and doctoral levels.

*Please note:* The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE), taken within five years of the starting term, is required of all applicants to the School of Business Ph.D. and M.S. programs. Also, all domestic (including Puerto Rico) and international applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL). A recommended minimum TOEFL score of 106 (New iBT) and 27 Speaking, obtained within two years of the intended starting term, is needed for admission consideration. International applicants who have completed a four-year bachelor’s degree in a country where the official language is English may request a waiver of the TOEFL requirement. A master’s degree from an English-speaking institution does not qualify for a waiver of the TOEFL, unless you have completed a minimum of 4 years of education (undergrad and graduate) in a country where English is the native language. The school accepts IELTS and Pearson Test of English as substitutes for TOEFL.

To learn more about the application and admissions process, visit Ph.D. Admission Requirements (https://wsb.wisc.edu/programs-degrees/phd-admissions/admissions-requirements).

**HOW TO APPLY**

Students interested in business degrees do not apply through the Graduate School application system and should instead refer to the School of Business Admissions page. (https://admissions.bus.wisc.edu/?_ga=2.47171374.802634615.1518557744-1236773262.1518557744)

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Prospective students should see the program website for funding information (https://wsb.wisc.edu/programs-degrees/phd-admissions/phd-financing).

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**REQUIRED COURSES**

Business Ph.D. students choose one of seven tracks to complete course requirements.

**Accounting and Information Systems Track**

Three seminars in accounting research are required:

- Introduction to Accounting Research
- Behavioral Accounting Research
- Archival Accounting Research

Students in our program develop a basic research background in both archival and behavioral empirical research. The program is one of the most balanced programs in the country in terms of support for different research methodologies and topics. Most students ultimately specialize in the research area and methodology that best suits their skills and research interests. Both behavioral (including experimental economics) and archival methods are strongly supported.

Students also develop specialization in a related field such as economics, psychology, or sociology. Finally, students build a foundation in statistics that supports their research interests. Methodology courses in economics, agricultural economics, or psychology will generally provide a strong foundation.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Actuarial Science, Risk Management, and Insurance Track**

The course sequence for Ph.D. students in actuarial science, risk management, and insurance is customized to fit each student’s unique research interests and background. You will work with a Ph.D. faculty advisor to set an appropriate course sequence during your first two years of study. However, all students are expected to take the following minimum core course sequence:

- Two semesters of Ph.D.-level Microeconomic Theory
- Two semesters of Ph.D.-level Econometrics
- Panel-data statistics/econometrics
- Seminar in Actuarial Science, Risk Management, and Insurance I
- Seminar in Actuarial Science, Risk Management, and Insurance II

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Operations and Information Management Track

Working with an advisor, each student chooses a minimum of four courses (12 credits) in the area of research methodology. While students are required to develop basic research background in multiple research areas, most students ultimately specialize in the research area and methodology that best suits their skills and research interests. These courses can be drawn from inside or outside the School of Business. Coursework in this group may be used to fulfill the requirements for the major and minor program.

Coursework in the candidate’s major research area of interest is to be chosen together with the advisor. For a student entering the Ph.D. program with a master’s degree in the major area, the required coursework is estimated to take two years. Students without a relevant master’s degree may take an additional semester to complete the required coursework.

Before becoming a dissertator, Ph.D students must both complete 32 credits of coursework and pass a preliminary exam. The preliminary exam includes two parts: a written exam and an oral presentation of an original research paper.

Management and Human Resources Track

- The management and human resources department offers a slate of foundational PhD seminars across the group’s core areas of research, including human resource management (HR), organizational behavior (OB), organizational theory (OT), entrepreneurship (ENT), and strategy. The seminar offerings vary from year to year. Doctoral students are expected to take all PhD seminars offered by the department.
- Required coursework in advanced research methods and statistics includes a minimum of 18 credits, consisting of two courses in statistics, two in research methodology, and two depth courses. Courses are selected in consultation with the student’s advisor.
- Students may declare a secondary academic discipline as a minor (e.g., sociology, economics, psychology).
- Preliminary exams are written at the end of the second year. The exam, which takes place over two days, consists of four questions. Two questions cover the student’s primary concentration, one question covers the student’s secondary concentration, and there is one methods question. (The concentrations are human resource management, organizational behavior, or strategy/ENT/OT.)
- The subsequent two years of study are allocated to developing and defending a dissertation.

Marketing Track

Students complete four Ph.D. seminars in marketing at the University of Wisconsin–Madison.

Students complete four courses at the graduate level, either inside or outside the School of Business, including at least one course in the methods of data collection and at least one in the methods of data analysis.

1These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Starting in the second year, students take the real estate workshop. This workshop is designed to help students make progress toward completion of their second-year paper and their dissertation. In addition, students take a finance or economics workshop each semester beginning with the second semester in the program and continuing as long as the student is in residence.

Students are encouraged to audit both workshops during their first semester.

At the beginning of the second year, each student proposes a set of three advanced courses that form a coherent package and enhance the student’s research skills. Students are free to choose elective courses offered by the economics, finance, mathematics, or statistics departments. It may also be appropriate to choose courses in computer science, law, psychology, accounting, or other areas taught at UW–Madison.

1These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Policies

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://bus.wisc.edu/phd/current-student-resources) is the repository for all of the program’s policies and requirements.
PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER

Virtually all Ph.D. students in business are funded at a level that guarantees a minimum of four years of the following: Full tuition remission; scholarship funding; a monthly stipend; comprehensive family health insurance plan, travel funding for students presenting at academic conferences.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Articulates challenges, frontiers and limits with respect to theory, knowledge or practice within the field of study.
2. Creates research, scholarship or performance that makes a substantive contribution within the field of study.
3. Develops a proficiency in statistical analysis relevant to the field of study.
4. Demonstrates breadth within their learning experiences.
5. Communicates complex or ambiguous ideas in a clear and understandable manner.
6. Advances and articulates the value of contributions of the field of study to society.
7. Fosters ethical and professional conduct.

PEOPLE

Faculty: Dean Vallabh “Samba” Sambamurthy

Accounting and Information Systems—Professors Warfield (chair), Covaleski, Johnstone, Matsumura, Mayhew, Nair, Wild; Associate Professor Laplante; Assistant Professors Barr-Pulliam, Gaertner, Griffith, Lynch, Steele, Thomas

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

BUSINESS: GENERAL MANAGEMENT, M.S.

Founded in 1900, the School of Business established one of the first five business programs in the nation. That entrepreneurial spirit remains strong.

As a student in the School of Business, you will find yourself inspired by peers, staff, alumni, business leaders, and world-renowned faculty who are focused, collaborative, and engaged in every aspect of the student experience. You will join a highly ranked program that equips you to meet both academic and career challenges. Employers value School of Business graduates because of the comprehensive preparation this learning environment provides. Graduates possess highly sought-after general management and specialized expertise in business.

Joining collaborative, inspiring, trustworthy, and progressive School of Business alumni, Business Badgers graduate prepared to lead their organizations to success and transform the world of business. Together Forward!

ADMISSIONS

This master’s program is offered for work leading to the Ph.D. Students may not apply directly for the master’s, and should instead see the admissions information for the Ph.D. (p. 234)

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIRED COURSES**
This master's degree is earned by students on the way to earning the Ph.D. in Business. Refer to the curricular requirements for specific tracks within the Business Ph.D. (p. 234) for required courses.

**POLICIES**

**GRADUATE SCHOOL POLICIES**
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**
With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

**UW–Madison University Special**
With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 700 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to the master’s degree is not allowed to satisfy requirements.

**PROBATION**
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**
15 credits

**TIME CONSTRAINTS**
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**
n/a

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Demonstrate ability to diagnose and solve problems by drawing on accumulated knowledge, understanding correlation vs. causation, integrating inductive and deductive reasoning, and being aware of perceptual and conceptual biases that can affect individual and group decision-making and knowing how to correct these biases.
2. Demonstrate ability to synthesize data and inputs from multiple sources to analyze business problems.
3. Demonstrate ability to derive valid inferences from data and make recommendations based on marginal analysis of costs and benefits.
4. Communicate clearly and effectively as managers in professional settings to meet organizational goals.
5. Persuasive skills in verbal and written communication.
6. Utilize a variety of media and technologies.
7. Manage the message and its flow through an organization.
8. Develop multi-disciplinary approaches to frame and analyze complex business problems and situations.
9. Understand perspectives on the role of business in society, e.g., shareholder value as its sole objective and corporations having a social responsibility.
10. Explain how these views are shaped by globalization, environmental and social circumstances, technology, law, and the role of government.
11. Analyze the cultural, economic, and legal/regulatory issues that impact international business activities and relationships.
12. Understand that a leader motivates and inspires people while a manager manages processes, that leader and manager roles are distinct and complementary, and that both roles are necessary for success in complex, multifaceted organizations.
13. Explain and contrast the different systems of behaviors for leaders and managers within the organization.
14. Frame, reflect on, and respond to the ethical dimensions of business decisions.
15. Demonstrate the skills and know processes to maximize team performance to successfully meet goals, both as an effective team member and leader.
16. Understand the advantages of a diverse and inclusive workforce, and demonstrate the cultural competencies necessary to manage such a workforce.
17. Analyze the impact of laws and regulations on their decisions.

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

BUSINESS: GENERAL MANAGEMENT, MBA

The Master of Business Administration (MBA) is a professional degree for the student preparing for a career in the business world. The cross-functional/interdisciplinary program exposes the student to each of the functional areas of business combined with a specialization in a specific area of business. Areas of specialization include corporate finance and investment banking, applied security analysis, arts administration, brand and product management, general management, marketing research, operations and technology management, real estate and urban land economics, risk management and insurance, strategic human resource management, and supply chain management.

Founded in 1900, the School of Business established one of the first five business programs in the nation. That entrepreneurial spirit remains strong.

As a student in the School of Business, you will find yourself inspired by peers, staff, alumni, business leaders, and world-renowned faculty who are focused, collaborative, and engaged in every aspect of the student experience. You will join a highly ranked program that equips you to meet both academic and career challenges. Employers value School of Business graduates because of the comprehensive preparation this learning environment provides. Graduates possess highly sought-after general management and specialized expertise in business.

Joining collaborative, inspiring, trustworthy, and progressive School of Business alumni, Business Badgers graduate prepared to lead their organizations to success and transform the world of business. Together Forward!

EVENING MBA

The School of Business offers the Evening MBA (p. 242)—a part-time program that allows students to complete an MBA degree while continuing full-time employment. The evening MBA is a 32-month, lockstep, cohort program offering a major in general management. Classes meet Monday and Thursday evenings during fall, spring and summer, and alternate Fridays and Saturdays in January. There is an international trip in the second year of the program.

EXECUTIVE MBA

The Executive MBA Program (p. 244) at the School of Business gives experienced, high-potential managers the opportunity to earn an advanced degree over 21 months without career interruption.

Offered in lock step with a single cohort, the Executive MBA Program meets every other Friday and Saturday. The curriculum is specifically designed to build on the unique knowledge and experience executives bring to the classroom.

ADMISSIONS

Admission consideration for the MBA Program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores, and work experience, personal achievements, motivation, communication skills (written and oral), international exposure, and recommendation letters are considered in the admission process at both the master’s and doctoral levels.

Note: The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case by case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS), or show the completion of an Interlink program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

HOW TO APPLY

Students interested in business degrees do not apply through the Graduate School application system and should instead refer either the Evening MBA admissions (https://wsb.wisc.edu/programs-degrees/mba/evening/admissions) or the Executive MBA admissions (https://wsb.wisc.edu/programs-degrees/mba/executive/admissions) information.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Prospective students to the Evening program should see the program website for funding information (https://wsb.wisc.edu/programs-degrees/mba/evening/admissions/tuition-financial-aid-scholarships).
Prospective students to the Executive program should see the program website for funding information (https://wsb.wisc.edu/programs-degrees/mba/executive/admissions/tuition-financial-aid-scholarships).

# Requirements

## Minimum Graduate School Requirements

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

## Major Requirements

Note: The major is currently non-admitting. Students are admitted through one of the named options (sub-majors) below (p. 241).

**Mode of Instruction Definitions**

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

<td></td>
</tr>
</tbody>
</table>

### Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

## Required Courses

Select a Named Option (p. 241) for courses required.

### Named Options (Sub-Majors)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the MBA in Business: General Management must select one of the following named options:

- **BUSINESS: GENERAL MANAGEMENT: EVENING, MBA** (P. 242)
- **BUSINESS: GENERAL MANAGEMENT: EXECUTIVE, MBA** (P. 244)

### Graduation School Policies

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

### MAJOR-Specific Policies

**Graduate Program Handbook**

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

### Prior Coursework

**Graduate Work from Other Institutions**

No credits of prior coursework are allowed to satisfy requirements.

**UW-Madison Undergraduate**

No credits from a UW-Madison undergraduate degree are allowed to count toward the degree.
UW–Madison University Special
No credits of prior coursework are allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
No credits of prior coursework are allowed to satisfy requirements.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
No credits of prior coursework are allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

 ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students in the following programs are not permitted to seek dual degrees. Students must plan to attend on the dates of the academic calendar for the respective year of graduation. Students must take part in the required global learning experience (10 days). Merit scholarships are awarded at admission for the entirety of the academic program as long as student is in good academic standing. Veterans scholarships also available. Contact emba@bus.wisc.edu for details on merit veterans scholarships.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
Wisconsin’s M.S. in Supply Chain Management, supported by the Grainger Center for Supply Chain Management, is a one-year program that provides students with an interdisciplinary education combining fundamental knowledge and applied learning experiences. The strategic, cross-functional curriculum takes an integrated business process view of supply chains, including marketing, sourcing, logistics, operations, and customer service. Students connect with and learn from real-world supply chain leaders and are part of a strong, close-knit community. See the program website (https://wsb.wisc.edu/programs-degrees/masters/supply-chain) for more information.

**ADMISSIONS**

The following will be required for admission to the MS-Business: Supply Chain Management program:

- Undergraduate university degree, or expected completion of such a degree prior to starting the MS-Business: Supply Chain Management program
- Demonstrated knowledge of business fundamentals (or specific plan for acquiring prior to the start of the program); some possible ways of satisfying this include:
  - Undergraduate degree with business major or minor
  - Completion of Certificate in Business at UW-Madison
  - Earning GPA >= 3.0 in intermediate college course work covering at least two core business disciplines (marketing, operations, finance, accounting, management); completion of GEN BUS 310 or GEN BUS 311 satisfies this requirement, and can be taken online during the summer prior to the start of the program
- Undergraduate transcript, GPA >= 3.0
- One letter of recommendation, preferably addressing the applicant’s professional skills
- Resume
- Response to essay question
- GMAT or GRE score

An interview may be requested by the Program Office or Grainger Center staff.

Additional international student requirements:

- TOEFL score of at least 100

The TOEFL will not be required for international applicants whose four-year undergraduate degree and/or master’s degree (minimum of eight semesters total) instruction was in English or who will complete such a degree prior to matriculation in the MS-Business: Supply Chain Management program.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Due to the interdisciplinary nature of supply chain management, any course with the graduate course attribute offered by the School of Business (including departments: ACCT I S, ACT SCI, FINANCE, GEN BUS, INFO SYS, INTL BUS, M H R, MARKETING, OTM, REAL EST, or R M I) can be used to complete the required elective credits. Courses outside of the School of Business will be considered on a case-by-case basis.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count no more than 9 credits of coursework numbered 700 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to the master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students must be enrolled full-time.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

This program provides significant opportunities for professional development through the applied learning curriculum.
LEARNING OUTCOMES

1. Apply knowledge in operations, finance, marketing and information systems to support decision making within and across the fundamental dimensions of supply chain management – planning, sourcing, making and delivering physical and non-physical products.
2. Make supply chain decisions in real-world settings through significant exposure to leading supply chain practitioners.
3. Identify relevant sources of data, know how to access that data, and be able to analyze it to support supply chain decision making.
4. Identify and assess the opportunities and risks associated with global sources of supply and global markets for goods.
5. Communicate ideas and recommendations to individuals in all functional areas within an organization.

PEOPLE

Please see the Grainger Center’s website (https://bus.wisc.edu/centers/grainger-center-for-supply-chain-management/contact-us) for a list of program leaders.

ACCREDITATION

AACSBI International—The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

BUSINESS: SUPPLY CHAIN MANAGEMENT, MBA

The Wisconsin MBA in Business: Supply Chain Management, supported by the Grainger Center for Supply Chain Management, provides students with a personalized, industry-focused program which partners with companies known for supply chain excellence. The program provides students with an exceptional interdisciplinary education that builds on fundamental knowledge and incorporates the latest in supply chain thinking. The strategic, cross-functional curriculum takes an integrated business process view of supply chains, including marketing, sourcing, logistics, operations, and customer service. Students connect with and learn from real-world supply chain leaders and are part of a strong, close-knit community. See the program website (https://wsb.wisc.edu/programs-degrees/mba/full-time/career-specializations/supply-chain-management) for more information.

Founded in 1900, the School of Business established one of the first five business programs in the nation. That entrepreneurial spirit remains strong.

As a student in the School of Business, you will find yourself inspired by peers, staff, alumni, business leaders, and world-renowned faculty who are focused, collaborative, and engaged in every aspect of the student experience. You will join a highly ranked program that equips you to meet both academic and career challenges. Employers value School of Business graduates because of the comprehensive preparation this learning environment provides. Graduates possess highly sought-after general management and specialized expertise in business.

Joining collaborative, inspiring, trustworthy, and progressive School of Business alumni, Business Badgers graduate prepared to lead their organizations to success and transform the world of business. Together Forward!

ADMISSIONS

Admission consideration for the MBA program requires a four-year undergraduate degree or the equivalent, in any discipline, from an accredited institution. The School of Business seeks a minimum of two years of full-time work experience along with a strong undergraduate performance. In addition to academic credentials, GMAT scores and work experience, personal achievements, motivation, communication skills (written and oral), international exposure and recommendation letters are considered in the admission process at both the master’s and doctoral levels. You can learn more about admission to this program here (https://wsb.wisc.edu/programs-degrees/mba/full-time/admissions).

Note: The Graduate Management Admission Test (GMAT), taken within five years of the starting term, is required of all applicants to the School of Business; the Graduate Record Exam (GRE) may be an acceptable alternative on a case by case basis. All applicants whose native language is not English must submit scores from the Test of English as a Foreign Language (TOEFL), the Pearson Test of English (PTE), Intensive English as a Second Language (IELTS), or show the completion of an Interlink program. A minimum iBT TOEFL score of 100 or equivalent, obtained within two years of the intended start term, is required. International applicants who have completed a degree at an institution whose primary language of instruction was English may request a waiver of this requirement on the application.

HOW TO APPLY

Students interested in business degrees do not apply through the Graduate School application system and should instead refer to the School of Business Admissions page. (https://wsb.wisc.edu/programs-degrees/mba/full-time/admissions)

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

Mode of Instruction Definitions

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
No credits of prior coursework are allowed to satisfy requirements.

UW–Madison Undergraduate
No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special
No credits of prior coursework are allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students must be enrolled full-time.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Develop appropriate supply chain strategies, and will be able to assess the financial, marketing and operational implications of such strategies.
2. Apply foundational knowledge in operations, marketing and other core business disciplines to support decision making within and across the fundamental dimensions of supply chain management planning, sourcing, making and delivering products.
3. By engaging in a wide range of applied activities, students will develop the ability to make supply chain decisions in real-world settings.
4. Identify relevant sources of data, know how to access that data, and will be able to analyze it using both statistical and optimization techniques to support supply chain decision making.
5. Identify and assess the opportunities and risks associated with global sources of supply and global markets for goods.
6. Develop a professional network of supply chain professionals in a wide variety of industries through engagement with the Executive Advisory Board, program alumni and affiliated companies and professional organizations.
7. Communicate their ideas and recommendations to individuals in all functional areas within an organization.

ACCREDITATION

CELL AND REGENERATIVE BIOLOGY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

• Applied Biotechnology, M.S. (p. 252)
• Biotechnology, M.S. (p. 254)
APPLIED BIOTECHNOLOGY, M.S.

Every day, biotechnology is working to solve some of the world's most pressing problems—infected and hereditary disease, food security, and sustainable alternatives to fossil fuels—and moving forward with revolutionary solutions. Whether your experience is based in healthcare, agriculture, or industry—the online, 11-course, 31-credit University of Wisconsin Master of Science in Applied Biotechnology program will teach you how to bring the best of biotechnology innovation to the market, where it can do the most good. You'll graduate with an understanding of the principles and techniques of biotechnology, ethical, safety, and privacy concerns, funding, intellectual property and patents, professional and technical communication, experimental design and analysis, and organizational leadership—all within the scope of the global biotechnology industry. Focus your learning within one or more specialization tracks: Quality Assurance and Compliance, Business Management, or Research and Development. And you'll earn a degree from the University of Wisconsin, one of the largest and most widely respected public higher education systems in the country. The multi-campus partnership means you'll learn from expert faculty from across the UW System with strong connections to the industry and the online format offers working adults like you a flexible, convenient way to pursue an advanced degree.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

APPLY TO THE GRADUATE SCHOOL

Applications are submitted online only; paper copy applications are not available. Apply to the Graduate School online and select the "Applied Biotechnology MS" program option:

THE GRADUATE SCHOOL'S ONLINE APPLICATION (HTTPS://APPLY.GRAD.WISC.EDU)

The online application and $75 application fee must be submitted electronically to the Graduate School before you can be considered for admission.

The following materials must be uploaded to your Graduate School online application:

- Professional resume
- Two letters of recommendation (can be initiated and processed online via the Graduate School online application)
- A one- or two-page statement of purpose (uploaded via the Graduate School online application) that provides the following: A brief summary of your professional and academic background, a clear explanation of your short- and long-term professional goals, and a clear explanation of how the online M.S. in Applied Biotechnology degree will help you meet your goals. (Please be specific to the M.S. in Applied Biotechnology online degree.)

Additional Graduate School resources:

- Graduate School Admission Frequently Asked Questions (https://grad.wisc.edu/apply/#FAQ)
- Graduate School Admission Requirements (https://grad.wisc.edu/admissions/requirements)

If you have any questions about how to apply or about the status of your application, you should contact Bryan Husk (https://www.ms-biotech.wisc.edu/admissions.cfm#bryan).

APPLICATION DEADLINE

Applications are accepted year round for the online M.S. in Applied Biotechnology Program. Students can begin in Fall, Spring or Summer term. To guarantee consideration for a particular term, applications should be completed by July 15 for Fall, December 15 for Spring, and April 15 for Summer.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The M.S. in Applied Biotechnology Program does not offer any financial aid, and graduate students are not permitted to accept any research, project, or teaching assistantship positions that would waive tuition. However, students may contact the Office of Student Financial Aid...

Other Grade Requirements: The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations: Contact the program for information on required assessments and examinations.

Language: Contact the program for information on any language Requirements requirements.

COURSE REQUIREMENTS

The following core courses are required (22 credits):

<table>

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies...
beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**
No prior coursework from other institutions may be applied toward program requirements.

**UW–Madison Undergraduate**
No prior coursework from UW–Madison undergraduate career may be applied toward program requirements.

**UW–Madison University Special**
No prior coursework taken as a UW–Madison University Special student may be applied toward program requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

The M.S. in Applied Biotechnology Program does not offer any financial aid, and graduate students are not permitted to accept any research, project, or teaching assistantship positions that would waive tuition.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Demonstrate professional and scientific communication appropriate for biotechnology settings

2. Demonstrate comprehensive understanding of organizational processes and product development pipelines

3. Distinguish among diverse methods and technologies and their applications in biotechnology

4. Demonstrate strategic leadership and decision-making skills necessary in biotechnology

5. Appraise the current regulatory, quality control, and legal frameworks that impact biotechnology

6. Demonstrate professional and ethical behaviors that foster positive and productive interactions in diverse biotechnology settings

**PEOPLE**

The UW Applied Biotechnology curriculum is designed and taught in collaboration of faculty from seven University of Wisconsin campuses: UW-Green Bay, UW-Madison, UW-Oshkosh, UW-Parkside, UW-Platteville, UW-Stevens Point, and UW-Whitewater. However, by selecting UW-Madison as your campus, your degree will come from UW-Madison.

Richard Moss, PhD
- Senior Associate Dean for Basic Research, Biotechnology, and Graduate Studies
- Executive Director for the Biotechnology and Applied Biotechnology Programs
- Professor, School of Medicine and Public Health

Natalie Betz, PhD
- Faculty director for the UW-Madison Applied Biotechnology program
- Associate Director for the M.S. in Biotechnology Program
- Faculty Instructor, School of Medicine and Public Health
- nabetz@wisc.edu
- 608-274-4330 office

Bryan Husk, M.A.
- Assistant Directory of the M.S. in Biotechnology and Applied Biotechnology programs
- Academic Staff, School of Medicine and Public Health
- bhusk@wisc.edu
- 608-265-0773 office • 608-577-9182 cell

Michele Smith, M.S., SCT(ASCP)
- Program Manager for the M.S. in Biotechnology and Applied Biotechnology programs
- Academic Staff, School of Medicine and Public Health
- michele.smith@wisc.edu
- 608-262-9753 office • 608-658-5311 cell

**BIOTECHNOLOGY, M.S.**

The Master of Science (M.S.) in Biotechnology provides students with an overarching view of modern biotechnology operations, addressing fundamental scientific and legal matters, innovative technologies and complex business issues. Students thrive in an environment rich in academic and industrial collaboration, leaving the program prepared to
assume leadership roles in the biotechnology industry. Practical and results oriented, this two-year program provides the foundation necessary for succeeding and advancing in one of the fastest growing and most complex industries in the world. Top-rated UW–Madison faculty and talented business partners in Wisconsin combine their expertise to provide hands-on, problem-solving experiences while offering flexible schedules for students, including convenient weekend and evening courses.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

STEP 1: APPLY TO THE GRADUATE SCHOOL

Applications are only submitted online; paper copy applications are not available. Apply to the Graduate School online at the UW–Madison Graduate School website:

THE GRADUATE SCHOOL'S ONLINE APPLICATION (HTTPS://GRAD.WISC.EDU/APPLY)
The online application and $75 application fee must be submitted electronically to the Graduate School before you can be considered for admission.

• Three letters of recommendation (can be initiated and processed online via the Graduate School online application)
• A one- or two-page statement of purpose (uploaded via the Graduate School online application) that provides the following:
  A brief summary of your professional and academic background, a clear explanation of your short- and long-term professional goals, and a clear explanation of how the M.S. in biotechnology degree will help you meet your goals. (Please be specific to the M.S. in biotechnology degree.)
• Professional resume

Important: Select Biotechnology (Program Code G040) as your Intended Major Field of Study.

Additional Graduate School resources:

• Graduate School Admission Frequently Asked Questions (https://grad.wisc.edu/admissions/faq)
• Graduate School Admission Requirements (https://grad.wisc.edu/admissions/requirements)
• Information to Send to the Graduate School (https://grad.wisc.edu/apply/requirements)

STEP 2: SEND MATERIALS TO OUR PROGRAM OFFICE

Materials to send directly to the M.S. in Biotechnology Program:

• Your official transcripts or academic records from each institution attended must be sent to the M.S. in Biotechnology Program from the issuing university. Applications will not be considered complete until all required official transcripts have been received.

Send the above materials to the following address:

Master's Degree in Biotechnology
505 Rosa Road, Suite 118
Madison, WI
53719-1262

If you have any questions about how to apply or about the status of your application, you should contact Bryan Husk (https://www.ms-biotech.wisc.edu/admissions.cfm#bryan).

APPLICATION DEADLINE

Applications for fall semester are accepted until a full cohort of up to 28 students has committed to attend. Spaces are sometimes available for strong applicants until as late as June or July for domestic applicants, however, the cutoff date for international applicants is May 1st each year. There is no admission for spring semester.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The M.S. in Biotechnology Program does not offer any financial aid, and graduate students are not permitted to accept any research, project, or teaching assistantship positions that would waive tuition. However, students may contact the Office of Student Financial Aid (https://
Biotechnology, M.S. financialaid.wisc.edu) to discuss federal loan programs and other lending opportunities.

## REQUIREMENTS

### MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

### MAJOR REQUIREMENTS

#### MODE OF INSTRUCTION

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.
MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.ms-biotech.wisc.edu/pdf/GraduateHandbook_MSBiotech_final.pdf) is the repository for all of the program's policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
No prior coursework from other institutions may be applied toward program requirements.

UW–Madison Undergraduate
No prior coursework from UW–Madison undergraduate career may be applied toward program requirements.

UW–Madison University Special
No prior coursework taken as a UW–Madison University Special student may be applied toward program requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

The M.S. in Biotechnology Program does not offer any financial aid, and graduate students are not permitted to accept any research, project, or teaching assistantship positions that would waive tuition. Students with two or more years work experience after receiving their bachelor’s degree are preferred for admission.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Apply core scientific and business principles to distinguish the difference between scientific and commercial success, and gain insight in to the challenge of balancing product usefulness with positive return on investment.
2. Understand how regulation is developed and how it interacts with business and finance to influence the formation and growth of technology companies.
3. Understand and apply modern biotechnology methods and practice, as well as effective written and oral scientific communication, through hands-on participation in the laboratory.
4. Apply knowledge of seven functional specialties (regulatory affairs, quality assurance, biomanufacturing, quality control, non-clinical development, clinical development and project management) to the coordinated process of product development.
5. Understand the processes, technologies, scientific principles and major challenges of the early drug discovery process as it continues to evolve.
6. Evaluate the potential of a product or technology based on the organizational resources required for full commercialization.
7. Understand firm-level strategic development, and apply strategic business principles in day-to-day operations.
8. Demonstrate an ability to identify a global problem, and how biotechnology may offer a novel solution(s).
9. Integrate the technical, sociological and leadership skills that are necessary to design, use and defend a global project management plan.
10. Integrate topics in science, policy, law and business in order to lead the development and commercialization of new and promising technologies.
11. Recognize and apply principles of ethical and professional conduct develop long-term networks and relationships with industry partners.
12. Understand the ethical and safety issues that help shape public policies on biotechnology and its applications.

PEOPLE

The program’s instructional faculty are a blend of world-renowned scholars from across UW–Madison and dynamic leaders from the region’s private biotechnology industries. All the program’s faculty and staff are committed to your education and career success.

Faculty and Staff Directory (https://www.ms-biotech.wisc.edu/directory.cfm)
PUBLIC HUMANITIES, GRADUATE/PROFESSIONAL CERTIFICATE

The Graduate Certificate in the Public Humanities (http://humanities.wisc.edu/public-humanities/graduate-certificate) prepares graduate students to pursue careers outside of academia and trains students who wish to remain within academia to articulate new horizons for their research.

The Graduate Certificate in the Public Humanities builds on the Center for the Humanities’ pioneering work in the public humanities and its related programs for graduate students, including the Public Humanities Exchange (HEX) (http://humanities.wisc.edu/public-humanities/exchange-program) and the Public Humanities Fellowships (http://humanities.wisc.edu/public-humanities/graduate-fellowships). It provides enrolled students with training and experience in the focuses on essential knowledge and skills required for professional paths that may not include traditional university teaching positions, whether in other sectors of higher education, policymaking and analysis, cultural organizations, new media, government, or research. Through coursework and hands-on project development, the program equips students with theoretical, historical, and practical knowledge that will help them to develop alternative applications for their scholarly research and engage their scholarly methods for use in broader social and professional contexts.

LEARNING OUTCOMES

1. a. Discover inherent value of working collaboratively with constituencies outside of the university, especially community based program partners. b. Learn how to more effectively assess the needs and capacities of program partners and community organizations in general. c. Advance the Wisconsin Idea and its of community engagement across racial, ethnic, economic, and cultural differences.
2. a. Recognize public cultures through institutions, publication, program development and public intellectual, art, and criticism. b. Gain understanding of Public Humanities as emerging/significant field and its academic/nonacademic value. c. Understand foundations of Public Humanities/current discussions about its nature/value. d. Develop concepts/skills translating humanities for nonacademics.
3. a. Be able to critically analyze and engage with the role of the public intellectual. b. Develop alternative applications for scholarly research and training for use in a broader context.

**CHEMICAL AND BIOLOGICAL ENGINEERING**

**DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE PROFESSIONAL/CERTIFICATES**

- Chemical Engineering, Doctoral Minor (p. 259)
- Chemical Engineering, M.S. (p. 259)
- Chemical Engineering, Ph.D. (p. 262)

**PEOPLE**

**Faculty:** Professors Abbott, Dumesic, Graham, Huber, Klingenberg, Kuech, Lynn, Maravelias (assistant chair), Mavrikakis (chair), Murphy, Palecek, Pfleger, Rawlings, Root, Shusta, Yin; Associate Professors Reed and Swaney; Assistant Professors Van Lehn, and Zavala.

For interests and activities of faculty members, along with a list of selected publications for each, see the department’s faculty directory.

**CHEMICAL ENGINEERING, DOCTORAL MINOR**

**REQUIREMENTS**

A Ph.D. candidate in another department who wishes to minor in chemical engineering should contact the Chemical and Biological Engineering (CBE) Graduate Program Office. A CBE minor consists of 9 credits of courses in Chemical and Biological Engineering numbered 300 and above with an average grade of B or better.

**PEOPLE**

**Faculty:** Professors Abbott, Dumesic, Graham, Huber, Klingenberg, Kuech, Lynn, Maravelias (assistant chair), Mavrikakis (chair), Murphy, Palecek, Pfleger, Rawlings, Root, Shusta, Yin; Associate Professors Reed and Swaney; Assistant Professors Van Lehn, and Zavala.

For interests and activities of faculty members, along with a list of selected publications for each, see the department’s faculty directory.

**CHEMICAL ENGINEERING, M.S.**

The Department of Chemical and Biological Engineering does not consider applications for a terminal M.S. degree; the department admits only to the Ph.D. program. The M.S. degree can be awarded post admission for work completed leading to the Ph.D. degree. The M.S. degree is not a prerequisite for the Ph.D. degree.

Graduate study in the department may be directed toward the master of science or the doctor of philosophy in chemical engineering. The
graduate courses are planned to train outstanding students for advanced work in research and development.

The Department of Chemical and Biological Engineering has a tradition of excellence dating back to 1905. For a century, the program has consistently ranked as one of the best in the world. The department offers research opportunities in both traditional and emerging areas of research in chemical and biological engineering. These areas include energy-related science and technology, soft and hard materials science and engineering, systems engineering and optimization, catalysis, process control and design, nanotechnology, biotechnology, biomedical engineering, complex fluids, colloid and interfacial phenomena, atomic, molecular, and multiscale modeling, polymers (synthesis and processing), micro- and nano-electronics, environmental engineering and sustainability, reactor design, and atomic-scale design of surface reactivity. These areas of research are advanced by leveraging tools from the fields of applied mathematics, statistical mechanics, kinetics and catalysis, thermodynamics, and transport phenomena.

Research in the department is highly interdisciplinary, capitalizing on programs of national prominence such as the NSF Materials Research Science and Engineering Center (MRSEC), the nation’s largest NIH-funded biotechnology training program, and the Computation and Informatics in Biology and Medicine training program. Interdisciplinary research opportunities are also available through the Materials Science Program, the Center for Nanotechnology, and the Rheology Research Center. Researchers in the department have access to state-of-the-art facilities for research, including facilities for nanofabrication and the life sciences.

Graduate students in the department are encouraged to participate in international research experiences, industry internships, and entrepreneurial activities.

For interests and activities of faculty members, along with a list of selected publications for each, see the department’s faculty directory (http://directory. engr.wisc.edu/che/faculty).

AMINATIONS

This master's program is offered for work leading to the Ph.D. Students may not apply directly for the master's, and should instead see the admissions information for the Ph.D. (https://wisc-curr.courseleaf.com/graduate/chemical-biological-engineering/chemical-engineering-phd)

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial support for qualified graduate students is available in the form of research assistantships, teaching assistantships, and fellowships.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

</tbody>
</table>
Other Grade Requirements
Professional group of courses: Grades of B or better are required.

Elective group of courses: Grades of B or better are required.

Assessments
An M.S. candidate not planning to seek re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus two other CBE faculty members. An M.S. candidate who is seeking re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus three other CBE faculty members. The candidate may defend an M.S. thesis or an independent study project report in a closed defense. The independent study project will comprise a minimum of three credits of supervised CBE 790 and may involve a lab project, theoretical work, or a critical review of an advanced engineering topic. The defense of an independent study project is conducted in a closed session.

UW–Madison Undergraduate
A total of 7 undergraduate credits from the UW–Madison undergraduate degree may be counted toward coursework requirements. If those credits are numbered 300 or above, they may be counted toward the Minimum Graduate Degree Credit Requirement. If those credits are numbered 700 or above, they may be counted toward the Minimum Graduate Coursework (50%) Requirement. No credits from other institutions can be counted toward the Minimum Graduate Residence Credit Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement and the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
An M.S. candidate not planning to seek re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus two other CBE faculty members. An M.S. candidate who is seeking re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus three other CBE faculty members.
CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Admitted students are offered research assistantships to support the pursuit of dissertation or degree research in chemical engineering. The stipend, after tuition and fees, is guaranteed for the duration of a student's graduate studies provided satisfactory progress is made toward their degree. Support for students receiving external funding or other program opportunities are reviewed case by case. Although students can be awarded M.S. degrees, there is no direct admission to the M.S. program.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Demonstrate a strong understanding of mathematical, scientific, and engineering principles in the field.
2. Demonstrate an ability to formulate, analyze, and solve advanced engineering problems.
3. Demonstrate creative, independent problem solving skills.
4. Apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools to these problems.
5. Recognize and apply principles of ethical and professional conduct.

PEOPLE
Faculty: Professors Abbott, Dumesic, Graham, Huber, Klingenberg, Kuech, Lynn, Maravelias (assistant chair), Mavrikakis (chair), Murphy, Palecek, Pfleger, Rawlings, Root, Shusta, Yin; Associate Professors Reed and Swaney; Assistant Professors Van Lehn, and Zavala.

For interests and activities of faculty members, along with a list of selected publications for each, see the department's faculty directory.

CHEMICAL ENGINEERING, PH.D.
The Department of Chemical and Biological Engineering has a tradition of excellence dating back to 1905. For over a century, the program has consistently ranked as one of the best in the world. The department offers research opportunities in both traditional and emerging areas of research in chemical and biological engineering. These areas include energy-related science and technology, soft and hard materials science and engineering, systems engineering and optimization, catalysis, process control and design, nanotechnology, biotechnology, biomedical engineering, complex fluids, colloid and interfacial phenomena, atomic, molecular, and multiscale modeling, polymers (synthesis and processing), micro- and nano-electronics, environmental engineering and sustainability, reactor design, and atomic-scale design of surface reactivity. These areas of research are advanced by leveraging tools from the fields of applied mathematics, statistical mechanics, kinetics and catalysis, thermodynamics, and transport phenomena. The graduate courses are planned to train outstanding students for advanced work in research and development. Graduate students in the department are encouraged to participate in international research experiences, industry internships, and entrepreneurial activities.

Research in the department is highly interdisciplinary, capitalizing on programs of national prominence such as the NSF Materials Research Science and Engineering Center (MRSEC), the nation's largest NIH-funded biotechnology training program, and the Computation and Informatics in Biology and Medicine training program. Interdisciplinary research opportunities are also available through the Materials Science Program, the Center for Nanotechnology, and the Rheology Research Center. Researchers in the department have access to state-of-the-art facilities for research, including facilities for nanofabrication and the life sciences.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>
<thead>
<tr>

<td>The program does not admit in the summer.</td>
</tr>
<tr>
<td>GRE (Graduate Record Examinations)</td>
<td>Required.</td>
</tr>
<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/#english-proficiency">https://grad.wisc.edu/apply/requirements/#english-proficiency</a>).</td>
</tr>
<tr>
<td>Other Test(s) (e.g., GMAT, MCAT)</td>
<td>n/a</td>
</tr>
<tr>
<td>Letters of Recommendation Required</td>
<td>3</td>
</tr>
</tbody>
</table>

Students with a strong background in chemical engineering or related field and a strong interest in research are encouraged to apply for admission. Most applicants accepted into the program have grade-point averages well above the Graduate School minimum of 3.0 on a 4.0 scale. All applicants are required to take the Graduate Record Exam (GRE) general test. Applications are evaluated on the basis of previous
academic record, GRE scores, letters of recommendation, and personal statement. The Department of Chemical and Biological Engineering does not consider applications for a terminal M.S. degree; the department admits only to the Ph.D. An M.S. degree can be awarded post admission as an alternative to the Ph.D. degree. The M.S. degree is not a prerequisite for the Ph.D. degree.

Applicants with degrees in the physical or life sciences or other engineering fields are encouraged to apply for admission into the Ph.D. graduate program. These students should contact the chair of the graduate admissions committee to discuss their preparation for the graduate program. Students are not accepted for spring semester except when space is available. Fall applications and supporting materials must be received by December 15.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Students admitted to the graduate program are guaranteed financial support from the department in the form of research assistantships, teaching assistantships and fellowships. Support will continue as long as the student maintains satisfactory progress toward their degree.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Minimum Credit Requirement</td>
<td>51 credits</td>
</tr>
<tr>
<td>Minimum Residence Credit Requirement</td>
<td>32 credits</td>
</tr>
<tr>
<td>Minimum Graduate Coursework Requirement</td>
<td>Half of degree coursework (26 credits out of 51 total credits) must be completed graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide.</td>
</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>3.00 GPA required.</td>
</tr>
<tr>
<td>Other Grade Requirements</td>
<td>At least two of the core graduate classes must be taken in the first semester of residence in the graduate program, and at least four core graduate classes must be completed with grades of B or better by the end of the second semester of residence. A student who receives one grade of BC or lower in a core class but who wishes to remain in the PhD program must take the fifth core course or re-take the low graded core course in the third semester, and the student must receive a B or better. A student who receives more than one grade of BC or lower in core graduate classes will be placed in the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty for readmission to the Ph.D. program. A student who receives an average of 3.0 or higher on their preliminary exam becomes a candidate for the Ph.D. program. A student who does not receive an average score of 3.0 or higher in the qualifying process is placed in the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty to be readmitted to the Ph.D. program.</td>
</tr>
<tr>
<td>Assessments and Examinations</td>
<td>A Ph.D. candidate who has met the grade requirements must complete a preliminary exam consisting of a written report and oral examination. During the fall semester of the fourth year of the program, candidates will participate in a mandatory research progress meeting with their thesis committee. The Ph.D. candidate defends a written thesis in a final oral examination.</td>
</tr>
<tr>
<td>Language Requirements</td>
<td>No language requirements.</td>
</tr>
</tbody>
</table>
Doctoral Minor/ Breadth Requirements

Students must complete a minor.

The Ph.D. candidate is required to undertake a program of coursework in a field other than chemical and biological engineering. This requirement may be satisfied by an external minor (option A) or a distributed minor (option B).

The minor, whether Option A or B, is designed to represent a coherent body of work, and should not be simply an after-the-fact ratification of a number of courses taken outside the major department. To ensure coherence, the student must consult with his or her advisor. The Ph.D. Minor Agreement Form should be submitted for approval at an early date, before the student is halfway through the proposed course sequence.

REQUIRED COURSES

Students must complete at least six semester courses (totaling at least 18 credits) in the CBE department. Four courses will be core CBE courses and two will be CBE electives, chosen at the discretion of the student in consultation with their advisor. These classroom courses shall be in the range numbered 500-899 and will not be laboratory courses, Independent Studies or Research. Grades of B or better are required in all CBE courses used towards degree requirements.

At least four of the six CBE courses shall be selected from these core graduate courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

</tr>
<tr>
<td>CBE 710</td>
<td>Advanced Chemical Engineering Thermodynamics</td>
<td>3</td>
</tr>
<tr>
<td>CBE 735</td>
<td>Kinetics and Catalysis</td>
<td>3</td>
</tr>
<tr>
<td>CBE 781</td>
<td>Biological Engineering: Molecules, Cells &amp; Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

At least two of the core graduate courses must be taken in the first semester of residence in the graduate program, and at least four core graduate courses must be completed with grades of B or better by the end of the second semester of residence. A student who receives one grade of BC or lower in a core class but who wishes to remains in the PhD program must take the fifth core course or re-take the low graded core course in the third semester, and the student must receive a B or better. Students are expected to take a total of four courses in their first semester of residence.

The requirement of four core CBE graduate courses shall not be met by substitution of other courses. Students matriculating with an M.S. degree from another university may, with department approval, use up to two courses from their M.S. work toward the requirement of six CBE graduate courses.

Students taking advanced courses outside the department in excess of minor requirements may, with department approval, use up to two of these courses toward the requirement of six CBE graduate courses. Seminar courses may not be used to satisfy CBE course requirements.

Elective course requirement: Students must complete at least one course totaling at least three credits. Courses must be numbered 300 and above. A B average is required. Pass/fail or audit courses may not be used for the elective course requirement. Courses used to satisfy the minor program may not be used for the elective course requirement. Advisor approval is required and secured through submission of the Ph.D. Elective Course Approval Form. Elective courses can be foreign language courses.

Teaching assistantship: Each student in the Ph.D. program is required to serve as a teaching assistant (TA) for two semesters. Under normal circumstances, each student should serve as a TA one semester of the second year and one semester of the third year. Requests for alternate arrangements, partial or full waiver of the requirement, should be submitted in writing to the Graduate Program Committee.

Policies

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2016/01/CBE_Academic-Policies-8-17.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count graduate coursework from other institutions toward the Minimum Graduate Degree Credit Requirement and the Minimum Graduate coursework (50%) Requirement. No credits from other institutions can be counted toward the Minimum Graduate Residence Credit Requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

A total of 7 undergraduate credits from the UW–Madison undergraduate degree may be counted toward coursework requirements. If those credits are numbered 300 or above, they may be counted toward the Minimum Graduate Degree Credit Requirement. If those credits are numbered 700 or above, they may be counted toward the Minimum Graduate coursework (50%) Requirement. No credits can be counted toward the Minimum Graduate Residence Credit Requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement and the Minimum Graduate Coursework (50%) Requirement. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.
PROBATION
A student who receives more than one grade of BC or lower in core graduate courses will be placed in the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty for readmission to the Ph.D. program.

A student who receives an average of 3.0 or higher becomes a candidate for the Ph.D. program. A student who does not receive an average score of 3.0 or higher in the qualifying process is placed in the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty to be readmitted to the Ph.D. program.

Students placed in the M.S. program are expected to finish the M.S. program within five semesters of admission into the Ph.D. program.

ADVISOR / COMMITTEE
All students are required to have an advisor and form a committee. Students should refer to the departmental Graduate Handbook of Academic Policies and Procedures for more information.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
The CBE department expects students to complete their Ph.D. degree within five years. Any student unable to defend her or his thesis in this period must petition the faculty for an extension by July 1 of the fifth year, specifying reasons for the request and length of requested extension.

OTHER
Admitted students are offered research assistantships to support the pursuit of dissertation or degree research in chemical engineering. The stipend, after tuition and fees, is guaranteed for the duration of a student’s graduate studies provided satisfactory progress is made toward their degree. Support for students receiving external funding or other program opportunities are reviewed case by case. Although students can be awarded M.S. degrees, there is no direct admission to the M.S. program.

PROFESSIONAL DEVELOPMENT
Graduate School Resources
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

Program Resources
The CBE Graduate Program office coordinates on-going professional development workshops. Topics have included: life in industry, ethical decision making, intellectual property agreements, maintaining self-motivation, how to utilize software in creating figures, effective management of undergraduate researchers, effective management of your thesis advisor and individual development plans (IDPs).

Also, the Graduate School Office of Professional Development offers training opportunities for graduate students and this information is e-mailed to all of the CBE grad students on a regular basis. Examples of these training offerings include sharing of information about DELTA, dissertation writing, grant writing and job search strategies.

In order to foster effective teaching among our graduate students, all students are required to serve as a TA for two semesters. Before graduate students are allowed to TA, each must participate in the New Educator’s Orientation (NEO) training offered each semester. They are also encouraged to connect with the University’s DELTA program.

LEARNING OUTCOMES
1. Demonstrate an ability to synthesize knowledge from a subset of the biological, physical, and social sciences to help frame problems critical to the future of their discipline.
2. Conduct original research.
3. Demonstrate an ability to create new knowledge and communicate it to their peers.
4. Fosters ethical and professional conduct.

PEOPLE
Faculty: Professors Abbott, Dumesic, Graham, Huber, Klingenberg, Kuech, Lynn, Maravelias (assistant chair), Mavrikakis (chair), Murphy, Palecek, Pfleger, Rawlings, Root, Shustas, Yin; Associate Professors Reed and Swaney; Assistant Professors Van Lehn, and Zavala.

For interests and activities of faculty members, along with a list of selected publications for each, see the department’s faculty directory.

CHEMISTRY, DOCTORAL MINOR
The mission of the Department of Chemistry at the University of Wisconsin–Madison is to conduct world-class, groundbreaking research in the chemical sciences while offering the highest quality of education to undergraduate students, graduate students, and postdoctoral associates. Our leadership in research includes the traditional areas of physical, analytical, inorganic, and organic chemistry, and has rapidly evolved to encompass environmental chemistry, chemical biology, biophysical chemistry, soft and hard materials chemistry, and nanotechnology. We pride ourselves on our highly interactive, diverse, and collegial scientific environment. Our emphasis on collaboration connects us to colleagues across campus, around the country, and throughout the world.

ADMISSIONS
The associate chair of the Department of Chemistry approves all minors for the department.

REQUIREMENTS
The Department of Chemistry follows the guidelines of the Graduate School with regard to minor requirements. For a student in an external department, a minimum of 9 credits in chemistry must be completed to fulfill the minor requirement. All grade requirements of the Graduate School must be adhered to.

A student in chemistry may fulfill their minor requirement in the chemistry department by taking courses in a single path outside of their major path. For example, a chemistry graduate student who majors in the analytical path may fulfill their minor requirement by successfully completing 9 credits in the physical path.

CHEMISTRY, M.S.
The mission of the Department of Chemistry at the University of Wisconsin–Madison is to conduct world-class, groundbreaking research in the chemical sciences while offering the highest quality of education to undergraduate students, graduate students, and postdoctoral associates. Our leadership in research includes the traditional areas of physical, analytical, inorganic, and organic chemistry, and has rapidly evolved to encompass environmental chemistry, chemical biology, biophysical chemistry, soft and hard materials chemistry, and nanotechnology.
chemistry, soft and hard materials chemistry, and nanotechnology. We pride ourselves on our highly interactive, diverse, and collegial scientific environment. Our emphasis on collaboration connects us to colleagues across campus, around the country, and throughout the world.

The Department of Chemistry offers a master of science in chemistry to a limited number of students. Specializations within the program are analytical, inorganic, materials, organic, and physical chemistry as well as chemical biology. Breadth coursework may be taken in other departments including physics, mathematics, computer sciences, biochemistry, chemical engineering, and in fields other than the student’s specialization within the Department of Chemistry.

Excellent facilities are available for research in a wide variety of specialized fields including synthetic and structural chemistry; natural product and bio-organic chemistry; molecular dynamics and photochemistry; biophysical, bioanalytical, and bioinorganic chemistry; spectroscopy (including magnetic resonance and microwave), theoretical and experimental chemical physics, chemical dynamics, quantum and statistical mechanics; macromolecular and polymer chemistry, materials science, surface and solid-state chemistry; x-ray crystallography, lasers, and light scattering; and chemical education. Programs are assisted by department computing and instrument centers and by other facilities on campus including those of the Division of Information Technology (DoIT).

Information on the research fields of faculty members is available on the chemistry website (http://www.chem.wisc.edu).

Financial assistance is not guaranteed to master’s candidates, but it may be possible to obtain a position as a teaching assistant.

### ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

There are two tracks leading to the Master of Science in Chemistry. Currently the department does not directly admit students seeking the master’s degree via either track, except under special circumstances, such as being employed by a local company or in the military. Ph.D. candidates often obtain a Master’s degree on the way to completion of their doctoral degrees. To obtain a master of science (M.S.) degree, the student must meet both the Department of Chemistry and the Graduate School requirements.

Prospective master’s candidates are expected to have satisfactorily completed the equivalent in class and lab of the fundamental courses in chemistry offered at UW–Madison, one year of physics, and mathematics through calculus. Students who have not completed all the prerequisites may be admitted in exceptional cases, but any deficiencies must be made up in the first year of graduate study.

A grade point average of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate work is the minimum required for admission to graduate studies. The Graduate Record Exam (GRE) is also required. The Chemistry subject test is required for international applicants and strongly encouraged for domestic students. Students for whom English is not the native language are required to present scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Before teaching assistant appointments can be finalized, students for whom English is a second language must participate in the SPEAK Test, the institutional version of the Test of Spoken English (TSE).

### FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIRED COURSES**

Of the 30 credits required for the Master’s degree, at least 24 must be completed in the chemistry department. The remaining 6 can be from chemistry or related topic areas such as physics, mathematics, computer science, or business. The selection of courses must be approved by the student’s advisor.

There are two tracks leading to the Master of Science in Chemistry.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Policies**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (http://chem.wisc.edu/content/graduate) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 12 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

Up to 7 credits numbered 300 or above from a UW–Madison undergraduate career are allowed to count toward the minimum graduate degree credit requirement; if those 7 credits are numbered 700 or above from a UW–Madison undergraduate career, they are allowed to count toward the minimum graduate coursework requirement. All credits so counted must be over and above the minimum credits that were required by the original undergraduate degree. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the residence and degree credit requirements; if those 15 credits of coursework taken as a UW–Madison Special student are numbered 700 or above, they are allowed to count toward the minimum
graduate coursework requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
All admitted Ph.D. graduate students receive tuition remission and a stipend, guaranteed for 10 semesters, as long as progress to the degree is made.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Articulates, critiques, and elaborates the theories, research methods, and approaches to inquiry in an area of chemistry.
2. Identifies sources and assembles evidence pertaining to questions or challenges in an area of chemistry.
3. Demonstrates understanding of chemical science in a historical, social, or global context.
4. Demonstrates the ability to select and utilize appropriate methodologies and practices to solve chemical problems.
5. Evaluates and synthesizes information pertaining to questions and challenges in an area of chemistry.
6. Communicates clearly in both written and oral formats.
7. Recognizes and applies principles of ethical and professional conduct.

AFFILIATE PROFESSORS
Forest, Katrina (Professor of Bacteriology)
The mission of the Department of Chemistry at the University of Wisconsin–Madison is to conduct world-class, groundbreaking research in the chemical sciences while offering the highest quality of education to undergraduate students, graduate students, and postdoctoral associates. Our leadership in research includes the traditional areas of physical, analytical, inorganic, and organic chemistry, and has rapidly evolved through collaboration with colleagues in other disciplines.

Excellent facilities are available for research in a wide variety of specialized fields including synthetic and structural chemistry; natural product and bio-organic chemistry; molecular dynamics and photochemistry; biophysical, bioanalytical, and bioinorganic chemistry; spectroscopy (including magnetic resonance and microwave), theoretical and experimental chemical physics, chemical dynamics, quantum and statistical mechanics; macromolecular and polymer chemistry, materials science, surface and solid-state chemistry, x-ray crystallography, lasers, and light scattering; and chemical education. Programs are assisted by department computing and instrument centers and by other facilities on campus including those of the Division of Information Technology (DoIT).

Information on the research fields of faculty members is available on the chemistry website (http://www.chem.wisc.edu).

The department offers opportunities for graduate students to obtain teaching experience. Financial assistance is available to most graduate students in the form of teaching or research assistantships, fellowships, or traineeships.

## ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Prospective graduate students are expected to have satisfactorily completed the equivalent in class and lab of the fundamental courses in chemistry offered at UW–Madison, one year of physics, and mathematics through calculus. Students who have not completed all the prerequisites...
may be admitted in exceptional cases, but any deficiencies must be made up in the first year of graduate study.

A grade point average of 3.0 (on a 4.0 scale) in the last 60 hours of undergraduate work is the minimum required for admission to graduate studies. The Graduate Record Exam (GRE) is also required. The subject test is required for international applicants, and strongly recommended for domestic students. Students for whom English is not the native language are required to present scores from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Before teaching assistant appointments can be finalized, students for whom English is a second language must participate in the SPEAK Test, the institutional version of the Test of Spoken English (TSE).

Admission deadline for the fall semester is December 15. Although some exam scores or recommendation letters might not have been received at that time, the application should be substantially complete by then to be considered for admission in the following fall.

Admission for the spring semester is not the norm, and applications for spring should only be submitted following discussion with a faculty member and/or the director of graduate study. Most summer admissions are applicants who were already admitted for the fall semester, and decided to start earlier so they could serve as a teaching assistant or research assistant.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

With few exceptions, students admitted to the Ph.D. program in the Department of Chemistry are guaranteed support for five continuous academic years. The support will be at the level of at least 50% time, and may come from a variety of sources—teaching assistantships, research assistantships, project assistantships, traineeships, and fellowships. This guarantee requires that you remain a graduate student in good standing in the Ph.D. program in the Department of Chemistry, and that your teaching or other assigned responsibilities are satisfactory.

Currently, graduate students who have at least a 33.4% appointment for a fall or spring term are eligible to receive a full tuition (but not segregated fee) waiver.

Although serving as a teaching assistant is not a requirement of the chemistry department at this time, teaching can be an important part of the graduate training you receive. Most students will serve at least two semesters as a teaching assistant, and many will serve for two years. Whether or not an individual student will be appointed as a teaching assistant, research assistant, trainee or fellow depends on the availability of funding from the major professor, and eligibility for traineeships and fellowships from other sources.

**CURRICULAR REQUIREMENTS**

</tr>
<tr>
<td>Overall Graduate GPA Requirement</td>
<td>3.00 GPA required.</td>
</tr>
</tbody>
</table>
Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.

Language Requirements

There are currently no language requirements to obtain the Ph.D. in Chemistry.

Doctoral Minor/Breadth Requirements

Doctoral students must complete a doctoral minor.

REQUIRED COURSES

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

<td>Seminar-Analytical Chemistry</td>
<td>0</td>
</tr>
</tbody>
</table>

Select two of the following:

- CHEM 622 Organic Analysis
- CHEM 623 Experimental Spectroscopy
- CHEM 624 Electrochemistry
- CHEM 625 Separations in Chemical Analysis
- CHEM/GENETICS 626 Genomic Science
- CHEM/BMOLCHEM 627 Methods and Technologies for Protein Characterization
- CHEM 628 Chemical Instrumentation: Design and Control Applications
- CHEM 630 Selected Topics in Analytical Chemistry

- Every semester until you reach dissertator status, enroll in and attend CHEM 920 Seminar-Analytical Chemistry
- During the spring semester of the second year, complete the written Thesis Background Oral (TBO) and oral defense.
- During the spring semester of the third year, complete the written Research Proposal (RP) and oral defense.
- By May of the fourth year, complete an oral presentation to your thesis committee.

Chemical Biology Track

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 606</td>
<td>Physical Methods for Structure</td>

<td>Inorganic and Organometallic Chemistry of the Main Group Elements</td>
<td>1-3</td>
</tr>
<tr>
<td>CHEM 900</td>
<td>Seminar-Inorganic Chemistry</td>
<td>0</td>
</tr>
</tbody>
</table>

Fulfill the minor requirements and at least 2 of the following:

- CHEM 606 Physical Methods for Structure Determination
- CHEM 613 Chemical Crystallography
- CHEM 630 Selected Topics in Analytical Chemistry (Chemistry of Inorganic Materials)
- CHEM 714 Organometallic Chemistry of the Transition Elements
- CHEM 801 Selected Topics in Inorganic Chemistry

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.
• By January 31 of the second year, complete the written Thesis Background Exam (TBE); complete the oral defense by the end of the semester.
• By January 31 of the third year, complete the written Research Proposal (RP); complete the oral defense by the end of the semester.
• During spring of the fourth year, complete an oral presentation at the weekly seminar series.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Materials Chemistry Track**

<table>
<thead>
<tr>
<th>Code</th>

<td>Seminar-Physical Chemistry</td>
<td>2</td>
</tr>
</tbody>
</table>

Complete at least 2 credits from the following:

- CHEM 654 | Materials Chemistry of Polymers            |
- CHEM 664 | Physical Chemistry of Macromolecules       |
- CHEM/ BIOCHEM 665 | Biophysical Chemistry                 |
- CHEM 668 | Biophysical Spectroscopy                   |
- CHEM 762 | Molecular Reaction Dynamics               |
- CHEM 763 | Introduction to Molecular Spectroscopy     |
- CHEM 775 | Electronic Structure of Molecules         |
- CHEM 777 | Physical Chemistry of Surfaces            |
- CHEM 860 | Selected Topics in Physical Chemistry      |
- CHEM 864 | Statistical Mechanics                      |
- CHEM/ BIOCHEM 872 | Selected Topics in Macromolecular and Biophysical Chemistry |

- Every semester until you reach dissertator status, enroll in and attend CHEM 960 Seminar-Physical Chemistry
- During the Spring semester of the second year, complete the written Thesis Background Oral (TBO) and the oral defense.
- During the Spring semester of the third year, complete the written Research Proposal and oral defense.
- By May of the fourth year, complete an oral presentation to the thesis committee.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Policies**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the
degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (http://chem.wisc.edu/content/graduate) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 12 credits of graduate coursework from other institutions. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
Up to 7 credits numbered 300 or above from a UW–Madison undergraduate career are allowed to count toward the minimum graduate degree credit requirement; if those 7 credits are numbered 700 or above from a UW–Madison undergraduate career, they are allowed to count toward the minimum graduate coursework requirement. All credits so counted must be over and above the minimum credits that were required by the original undergraduate degree. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count no more than 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the residence and degree credit requirements; if those 15 credits of coursework taken as a UW–Madison Special student are numbered 700 or above, they are allowed to count toward the minimum graduate coursework requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER
All admitted Ph.D. graduate students receive tuition remission and a stipend, guaranteed for 10 semesters, as long as progress to the degree is made.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Articulates research problems, potentials, and limits with respect to theory, knowledge, and practice within an area of chemistry.
2. Formulates ideas, concepts, designs, and techniques beyond the current boundaries of knowledge within an area of chemistry.
3. Creates research and scholarship that makes a substantive contribution to an area of chemistry.
4. Demonstrates breadth within their learning experiences.
5. Advances the beneficial societal impacts of research in chemistry.
6. Communicates complex scientific ideas in a clear and understandable manner.
7. Fosters safe, ethical, and professional conduct.

CHICANA/O AND LATINA/O STUDIES

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

- Chicana/o and Latina/o Studies, Doctoral Minor (p. 275)

PEOPLE

Faculty: See Faculty (https://chicla.wisc.edu/chican-latin-studies-professors) on the program website.

In 2007, the University of Wisconsin–Madison Graduate School approved the Chicana/o/Latina/o doctoral minor. It became the first such program to be offered in this field at the UW–Madison as well as the University of Wisconsin System. The Chicana/o and Latina/o Studies minor program offers a comparative and transnational approach to the study of Mexican- and Latin-American-origin communities in the United States, including the Commonwealth of Puerto Rico. The curriculum offers students the opportunity to study issues of race, ethnicity, class, gender, and sexuality from both historical and contemporary perspectives. The interdisciplinary program is designed to provide students with an extensive knowledge base and the intellectual tools to understand the unity and diversity of U.S. Latina/o populations. The primary objective of the program is to offer students a multidisciplinary, broad-based perspective on the study of Chicana/os and Latina/os, as well as to introduce them to the central questions, topics, and applications within this field of inquiry. Chicana/o and Latina/o studies maintains a central focus on U.S. Chicana/o and Latina/o populations, offering a variety of courses, some focusing on
particular national-origin groups or specific academic disciplines, and others organized comparatively and across disciplinary boundaries.

**REQUIREMENTS**

Graduate students interested in a minor in Chicana/o and Latina/o studies are required to take a minimum of 12 credits of graduate-level coursework (numbered 300 and above) that has been reviewed and approved for its relevance to the CLS program. A list of current CLS courses can be found here (http://guide.wisc.edu/courses/chicla). In addition to these courses, CLS faculty members offer courses in their home departments which may count toward the minor.

These courses have a specific emphasis on Chicana/o and Latina/o issues or have a central focus on comparative cultures with which Chicana/o and Latina/o issues are emphasized. Graduate students are expected to complete graduate-level work (e.g., research and/or scholarly papers and classroom presentations) and meet with faculty to supplement their graduate learning experience. Because many courses taught by faculty across the campus can fulfill these criteria, the program has been designed to be flexible enough to accommodate students’ primary fields of study and interests. Each student’s focus will be determined in consultation between the student, the CLS faculty mentor, and the CLS director.

**PEOPLE**

**Faculty:** See Faculty (https://chicla.wisc.edu/chican-latin-studies-professors) on the program website.

**CIVIL AND ENVIRONMENTAL ENGINEERING**

**DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES**

- Civil and Environmental Engineering, Doctoral Minor (p. 276)
- Civil and Environmental Engineering, M.Eng. (p. 277)
- Civil and Environmental Engineering, M.S. (p. 282)
- Civil and Environmental Engineering, Ph.D. (p. 307)
- Geological Engineering, Doctoral Minor (p. 311)
- Geological Engineering, M.S. (p. 311)
- Geological Engineering, Ph.D. (p. 314)

**CIVIL AND ENVIRONMENTAL ENGINEERING, DOCTORAL MINOR**

Students from departments outside of Civil and Environmental Engineering can receive a doctoral minor in civil and environmental engineering. The minor must be approved by the Department of Civil and Environmental Engineering. The minor approval form is available at the department office. The completed form must be returned to the department office for review and approval.

**REQUIREMENTS**

1. A minimum of 9 formal course credits (not independent study or research credits) taken in Civil and Environmental Engineering (http://guide.wisc.edu/courses/civ_ engr).
2. Courses must be numbered 300 or above in Civil and Environmental Engineering.
3. Two of the courses must be numbered 500 or above in Civil and Environmental Engineering.
4. Only one of the courses may be cross listed in the student’s major department and cannot be used to satisfy the student’s major requirements.
5. No examinations are required other than those given in each course.

**PEOPLE**

**Civil and Environmental Engineering Faculty:** Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Nozura, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

**Geological Engineering Faculty:** Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoot (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

**Environmental Chemistry and Technology:** Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).
McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering), Pedersen (Soil Science), Roden (Geoscience); Assistant Professors Anantharaman (Bacteriology), Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING, M.ENG.

Students interested in the Civil and Environmental Engineering M.Eng. degree should see information on its named option in Environmental Engineering (p. 279).

ADMISSIONS

Students interested in the Civil and Environmental Engineering M.Eng. should see admissions information for the named option in Environmental Engineering (https://wisc-curr.courseleaf.com/graduate/civil-environmental-engineering/civil-environmental-engineering-meng/civil-environmental-engineering-environmental-engineering-meng/#admissionstext).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

No financial support from the university is available to students in the online Civil and Environmental M.Eng. at this time.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

MAJOR REQUIREMENTS

Note: The major is currently non-admitting. Students are admitted through the named option (sub-major) below (p. 278).

MODE OF INSTRUCTION

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

</tr>
</tbody>
</table>
Minimum Graduate Coursework Requirement: At least 50% of credits applied toward the graduate degree credit requirement must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide.

Overall Graduate GPA Requirement: 3.00 GPA required.

Other Grade Requirements: The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations: Contact the program for information on required assessments and examinations.

Language Requirements: Contact the program for information on any language requirements.

REQUIREMENTS COURSES
See coursework requirements for the named option in Environmental Engineering (p. 280).

NAMED OPTIONS (SUB-MAJORS)
A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Master of Engineering in Civil and Environmental Engineering must select the named option:

- CIVIL AND ENVIRONMENTAL ENGINEERING: ENVIRONMENTAL ENGINEERING, M.ENG. (P. 279)

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK
Graduate Work from Other Institutions: With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate: With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special: With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Faculty will contact successful applicants directly regarding funding opportunities. Admission is not a guarantee of funding.
PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Demonstrate a strong understanding of mathematical, scientific, and engineering principles in the field.
2. Demonstrate an ability to formulate, analyze, and solve advanced engineering problems.
3. Demonstrate creative, independent problem solving skills.
4. Apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools to these problems.
5. Fosters ethical and professional conduct.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING: ENVIRONMENTAL ENGINEERING, M.ENG.

This is a named option in the Civil and Environmental Engineering M.Eng (p. 277).

The M.Eng. named option in Environmental Engineering is a fully online degree that includes a full curriculum of courses incorporating the latest research and practices in water supply, wastewater reclamation and reuse, resource recovery, and urban storm water management. The M.Eng. degree has been developed to give the practicing environmental engineer and scientist the skills needed to meet contemporary and future challenges. For more information about the online M.Eng. degree, see the program website (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/master-engineering-civil-environmental-engineering-2).

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

Requirements | Detail
--- | ---
Fall Deadline | July 15
Spring Deadline | November 15
Summer Deadline | March 15
GRE (Graduate Record Examinations) | Not required.
English Proficiency Test | Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency).
Other Test(s) (e.g., GMAT, MCAT) | n/a
Letters of Recommendation Required | 3

All applicants must meet the Graduate School’s admission requirements (http://grad.wisc.edu/admissions/requirements) to be considered for admission. The application deadline is November 15 for the spring term, March 15 for the summer term, and July 15 for the fall term. In addition, applicants must also meet the department’s more stringent admission requirements listed below to be considered for admission:

- Grades: A minimum undergraduate grade point average (GPA) of 3.00 (on a 4.00 scale) on the equivalent of the last 60 semester
hours (approximately two years of work) is required for domestic applicants. A strong academic performance comparable to an average of B or above grades for all undergraduate course work is required for international applicants.

- On a case by case basis the admissions committee may consider an applicant with a GPA lower than 3.0 for applicants with exceptional circumstances, if supported by a strong career track and references.
- Degree: A bachelor’s degree from an ABET-accredited engineering program or from a recognized international institution is required.
- On a case by case basis the admissions committee may consider an applicant with a non ABET-accredited B.S. degree depending on the applicant’s academic record.

A complete graduate application is required before an application will be reviewed by the faculty. A complete graduate application contains the following:

- **Graduate School Application Form and application fee:** Applicants must submit an online application to the UW–Madison Graduate School. See Graduate School Admissions (http://grad.wisc.edu/admissions/requirements) to apply.
- **Statement of purpose:** A statement of purpose for graduate study must be submitted through an applicant’s online UW–Madison Graduate School application. Please limit this important document to 1,000 words.
- **Letters of recommendation:** Three letters of recommendation must be submitted through an applicant’s online UW–Madison Graduate School application.
- **Transcripts:** One official transcript from each institution you have attended must be sent to the department directly. International academic records must be in the original language accompanied by an official English translation. Documents must be issued by the institution with the official seal/stamp and an official signature.
- **English proficiency scores:** Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. See Graduate School Admission Requirements (http://grad.wisc.edu/admissions/requirements) for more information on the English proficiency requirement.

Students interested in pursuing the online M.Eng. degree must follow the steps to apply found on the program website (https://epd.wisc.edu/online-degree/environmental-engineering/#/apply).

## Funding

### Graduate School Resources

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

### Program Resources

No financial support from the university is available to students in the online Civil and Environmental M.Eng. at this time.

## Requirements

### Minimum Graduate School Requirements

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

### POLICIES

#### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

#### NAMED OPTION-SPECIFIC POLICIES

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2018/10/CEEGraduateStudentHandbook102018.pdf) is the repository for all of the program’s policies and requirements.

#### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 14 credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison special student. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

#### PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

#### ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes
a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**
15 credits

**TIME CONSTRAINTS**
Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**Geological Engineering Faculty:** Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thorber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainer). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/ people).

**Environmental Chemistry and Technology:** Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

**CIVIL AND ENVIRONMENTAL ENGINEERING, M.S.**

The Department of Civil and Environmental Engineering offers an M.S. degree with advanced independent study or thesis research option. The following six accelerated M.S. degree programs are also offered:

- Civil and Environmental Engineering: Construction Engineering and Management M.S. (p. 288)
- Civil and Environmental Engineering: Environmental Science and Engineering M.S. (p. 291)
- Civil and Environmental Engineering: Geological/Geotechnical Engineering M.S. (p. 295)
- Civil and Environmental Engineering: Structural Engineering M.S. (p. 298)
- Civil and Environmental Engineering: Transportation Engineering M.S. (p. 301)
- Civil and Environmental Engineering: Water Resources M.S. (p. 304)

In addition, an online program in Civil & Environmental Engineering: Environmental Engineering M.Eng. (p. 277) is offered.

The mission of the civil and environmental engineering program is to develop leaders in education, industry, and government who can use their acquired skills to improve society. The academic program provides a comprehensive framework of courses in the broad area of civil and environmental engineering with opportunities to develop specialized expertise. It also emphasizes the development of integrated teamwork abilities, communication, leadership, entrepreneurship, and creative research skills. Graduate study in the department offers an opportunity to undertake advanced study and research in various areas of specialization. Areas include:

- **Construction engineering and management:** construction labor productivity management, integrated lean project delivery systems, risk management, advanced computer applications to construction, and change management.
- **Environmental engineering:** water supply, water quality, water treatment, wastewater treatment, solid and hazardous waste management, air pollution, biotechnology, and alternative energy.
- **Geo and pavement engineering:** geotechnical and geological engineering, pavement materials and design, asphalt binders and mixtures, geosynthetics, in-situ testing and engineering geophysics, recycled materials in sustainable construction.
- **Structural engineering:** behavior, analysis and design of reinforced/prestressed concrete, steel, and wood structures; design for earthquake and wind loading; seismic rehabilitation.
- **Transportation engineering:** highway and traffic engineering, intelligent transportation systems, connected and automated vehicles, transportation planning, freight/infrastructure management, transportation safety, user comprehension and behavior, advanced driving- and micro-simulation, big data.
- **Water resources/environmental fluid mechanics:** analysis, measurement, modeling of currents, flows, and waves in natural...
Lake Mendota. The Environmental Engineering Field Laboratory is located facilities in the Water Science and Engineering Laboratory on the shore of environmental engineering, and water chemistry have additional research processes and engineering chemistry. Water resources engineering, engineering; environmental fluid mechanics; environmental engineering geotechnical and geoenvironmental engineering; coastal and hydraulic systems; driving simulation and human factors; soil mechanics, facilities for structural engineering; highway materials; transportation In support of the instructional and research programs are laboratory and limnology and marine science.

Degrees require a coordinated core program of courses, selected from CEE and other department/program offerings. Graduate degree programs closely associated with the department include engineering mechanics, human factors, environmental chemistry and technology, water resources management, geological engineering, land resources, and limnology and marine science.

In support of the instructional and research programs are laboratory facilities for structural engineering; highway materials; transportation systems; driving simulation and human factors; soil mechanics, geotechnical and geoenvironmental engineering; coastal and hydraulic engineering; environmental fluid mechanics; environmental engineering processes and engineering chemistry. Water resources engineering, environmental engineering, and water chemistry have additional research facilities in the Water Science and Engineering Laboratory on the shore of Lake Mendota. The Environmental Engineering Field Laboratory is located at the Nine-Springs Madison Metropolitan Wastewater Treatment Plant.

**ADMISSIONS**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. [Applicants must meet the minimum requirements](https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

All applicants must meet the Graduate School’s admission requirements (http://grad.wisc.edu/admissions/requirements) to be considered for admission. The application deadline is December 15 for the fall term and October 1 for the spring term. Late applications may not be reviewed for funding opportunities.

In addition, applicants must also meet the department’s more stringent admission requirements listed below to be considered for admission:

- Grades: A minimum undergraduate grade point average (GPA) of 3.00 (on a 4.00 scale) on the equivalent of the last 60 semester hours (approximately two years of work) is required for domestic applicants. A strong academic performance comparable to an average of B or above grades for all undergraduate course work is required for international applicants.
- Degree: A bachelor's degree from an ABET-accredited engineering program or from a recognized international institution is required. Applicants who do not have a bachelor's degree as specified above may study for the master of science in civil and environmental engineering (Program Option C); however, to become eligible for this program, applicants must meet the department’s deficiency requirements, some of which may be completed as deficiencies after admission. As a general rule, students with more than 12 credits in deficiencies are not admitted to the graduate program. Rather, they are encouraged to enroll as special students until most of their deficiencies are satisfied. All plans of study within this option must be approved by the department faculty. The deficiency requirements for applicants without a bachelor's degree from an ABET-accredited engineering program or from a recognized international institution must be obtained from the department.

A complete graduate application is required before an application will be reviewed by the faculty. A complete graduate application contains the following:

- **Graduate School Application Form and application fee:** Applicants must submit an online application to the UW-Madison Graduate School. See Graduate School Admissions (https://grad.wisc.edu/admissions) to apply.
- **Statement of purpose:** A statement of purpose for graduate study must be submitted through an applicant’s online UW-Madison Graduate School application. Please limit this important document to 1,000 words.
- **Letters of recommendation:** Three letters of recommendation must be submitted through an applicant’s online UW-Madison Graduate School application.
- **Transcripts:** Upload the most recent copies of your transcripts to the electronic application, from each institution attended. Study abroad transcripts are not required if coursework is reflected on the degree granting university’s transcript. If the application is recommended for admission then we will follow-up with instructions for official transcript submission.
- **Graduate Record Examination (GRE) Scores:** Graduate Record Examination (GRE) General Test scores are required for most applicants.
- **English proficiency scores:** Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted
if they are within two years of the start of the admission term. See Graduate School Admission Requirements (http://grad.wisc.edu/admissions/requirements) for more information on the English proficiency requirement.

- GRE and TOEFL scores may be sent to institution code 1846 from ETS

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Financial support is available through fellowships, project/program assistantships (PA), research assistantships (RA), and teaching assistantships (TA). Faculty will contact successful M.S./Ph.D. applicants directly regarding funding opportunities. Admission is not a guarantee of funding.

Students in the accelerated course-only M.S. named options and M.Eng. (named option in Environmental Engineering) online programs are not eligible for department funded opportunities.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MAJOR REQUIREMENTS**

**Mode of Instruction Definitions**

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**REQUIRED COURSES**

**Option A—Thesis Option**

Students who wish to do advanced work and research in a well-defined area of specialization are encouraged to pursue this program.

This option requires a minimum of 30 credits of graduate work including:

- A minimum of 18 credits graduate-level coursework (300-level and higher); at least 9 of the 18 credits must be in Civil and Environmental Engineering (may include the seminar course with approval from the faculty advisor; may not include CIV ENGR 790) Some 300-level courses may require special faculty approval.
- A minimum of one-credit seminar course (Discuss seminar options with faculty advisor)
- A minimum of 6 credits of CIV ENGR 790 Master’s Research or Thesis A faculty committee will conduct a final examination on the thesis research.

These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

**Option B—Advanced Independent Study Option**

This option requires a minimum of 30 credits of graduate work including:
A minimum of 21 credits graduate-level coursework (300 level and higher); at least 9 of the 21 credits must be in Civil and Environmental Engineering (may include the seminar course with approval from the advisor; may not include independent study or research courses) Some 300-level courses may require special faculty approval.

A minimum of one-credit seminar course. (Discuss seminar options with faculty advisor.)

A minimum of 3 credits of CIV ENGR 790 Master’s Research or Thesis or CIV ENGR 999 Advanced Independent Study A required written report based on the student’s advanced independent study project does not have to meet UW-Madison Graduate School requirements for a thesis, but has to show independent thinking by the student. A faculty committee will review and approve the final report. A final examination is not required but may be requested by the faculty committee.

**Option C—Master’s Option** (for Students without Engineering Bachelor’s Degrees)

This program is designed for students without engineering bachelor’s degrees. Students will meet with their faculty advisor to determine the courses and total credits required to fulfill the deficiency requirements. As a general rule, students with more than 12 credits in deficiencies are not admitted to the program. Rather, they are encouraged to enroll as special students until more of their deficiencies are satisfied. Some of the deficiency course requirements may be completed after admission. The exact number of deficiency courses and credits completed before and after admission will be determined by the faculty advisor. All prerequisite courses must be taken for a letter grade. In addition to the total deficiency credit requirement, Option C requires a minimum of 30 credits of graduate work. Students can select either a Thesis Option or Advanced Independent Study Option, consistent with the requirements of Option A or Option B described above, to complete the non-deficiency requirements of Option C. Students should meet with their faculty advisor to determine which option is most appropriate for their degree plan. Deficiency credits cannot be applied to fulfill the 30 credit degree requirement.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do
not appear in the Graduate School admissions application, and they will not appear on the transcript.

**NAMED OPTIONS (SUB-MAJORS)**

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral.

View as list
- **CIVIL AND ENVIRONMENTAL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT, M.S.** (P. 288)
- **CIVIL AND ENVIRONMENTAL ENGINEERING: ENVIRONMENTAL SCIENCE AND ENGINEERING, M.S.** (P. 291)
- **CIVIL AND ENVIRONMENTAL ENGINEERING: GEOLOGICAL/GEOTECHNICAL ENGINEERING, M.S.** (P. 295)
- **CIVIL AND ENVIRONMENTAL ENGINEERING: STRUCTURAL ENGINEERING, M.S.** (P. 298)
- **CIVIL AND ENVIRONMENTAL ENGINEERING: TRANSPORTATION ENGINEERING, M.S.** (P. 301)
- **CIVIL AND ENVIRONMENTAL ENGINEERING: WATER RESOURCES ENGINEERING, M.S.** (P. 304)

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://www.engr.wisc.edu/app/uploads/2018/10/CEEGraduateStudentHandbook102018.pdf) is the repository for all of the program's policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis or independent study advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master's degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Students in the accelerated M.S. named options are not eligible for department funded opportunities.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
LEARNING OUTCOMES

1. Demonstrate a strong understanding of mathematical, scientific, and engineering principles in the field.
2. Demonstrate an ability to formulate, analyze, and solve advanced engineering problems.
3. Apply the latest scientific and technological advancements, advanced techniques, and modern engineering tools to these problems.
4. Recognize and apply principles of ethical and professional conduct.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thuber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering), Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering), Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (GRAinger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Kashikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering), Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering), Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT, M.S.

This is a named option in the Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis). The M.S.–CEE named option in Construction Engineering and Management (CEM) from the University of Wisconsin–Madison provides you with expertise in the theoretical and practical methods of planning, design, and construction, building on your civil engineering foundation in environmental engineering, transportation, structural analysis, fluid dynamics, and material science.

In just one year of intensive face-to-face learning, you gain an enriched understanding of construction scheduling, cost estimating, construction law, business management, ethics, risk management, safety and quality management, project control, teamwork, leadership, written and oral communications, and continuous improvement. You emerge fully prepared to immerse yourself in construction engineering and management.

Industry partners are strongly engaged in all aspects of the Construction Engineering and Management program, serving as adjunct professors, professors of practice, instructors, strategic advisors, and general supporters. This provides you with a valuable network of contacts during your time on the UW–Madison campus and once you enter the workforce.

Our Construction and Engineering Management graduates are among the top executive performers and leaders in the industry. Leading construction companies consider the UW–Madison Construction and Engineering Management program a top producing school and first choice for future recruiting.

Earn your master’s degree through a program created with professional values in mind. As a UW–Madison graduate, you can provide outstanding service and expertise to the construction industry.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</table>
Applicants must first meet all of the requirements of the Graduate School. Please visit this website (https://grad.wisc.edu) for details.

Applicants must also meet department specific requirements as outlined below:

- Have a bachelor’s degree in civil and environmental engineering from an ABET-accredited engineering program or from a recognized international institution
- Submit a 1,000 word or fewer statement of purpose; include your technical areas of interest, coursework emphasis, research experience, professional goals, faculty members you are interested in working with, and any other items relevant to your qualifications for graduate school
- Submit three letters of recommendation
- Non-native English speakers must have a Test of English as a Foreign Language (TOEFL) with a score of 580 (written) or 92 (Internet version)

Please do not mail paper copies of application materials. Upload the required application materials to the electronic Graduate School application, including a PDF copy of the most current transcripts. Applicants who are recommended for admission by the CEE Admissions Committee, will receive an e-mail with further instructions from the CEE Graduate Admissions Office, requesting official transcripts or other required application material.

Applicants should monitor the application status by visiting the “Graduate Application Status” window within your MyUW portal (information on this is received after submitting an application). You may need to activate a NetID to gain access to the MyUW portal.

Graduate Application Status will remain “pending” until recommendations are determined. All applicants will receive an e-mail from the CEE Graduate Admissions Team with more details once the admission committees have made decisions.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Students in this program are not eligible for department funded opportunities in the form of teaching assistantship (TA), research assistantship (RA), or project assistantship (PA).

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.
REQUIRED COURSES

This is a face-to-face, accelerated program:

- 30 credit degree program
- Complete the program in one academic year (fall, spring, summer)
- Courses begin in fall semester only
- Take 15 credits from the approved list of Construction Engineering and Management courses (see below)
- 6 credits from a second discipline within the approved list of Civil and Environmental Engineering (CEE) specialization courses, based on your career interests
- 3 credits from a third discipline within the approved list of CEE specialization courses, based on your career interests
- 5 credits of independent study
- 1 credit in a graduate student seminar

Typical Curriculum in this Program
(Student and advisor will select specific courses)

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering/) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.
ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Students in the accelerated MS (named options) are not eligible for department funded opportunities.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger).

See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING: ENVIRONMENTAL SCIENCE AND ENGINEERING, M.S.

This is a named option within Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis).

The Environmental Science and Engineering M.S.–CEE named option from the Department of Civil and Environmental Engineering (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/accelerated-master-science-programs-civil-environmental-engineering) at the University of Wisconsin–Madison teaches you how to apply science to solve complex environmental problems. Our program is multidisciplinary, so you gain a deeper understanding of chemistry, biology, and systems thinking to better approach your work.

In just one year (fall, spring, and summer), learn to comprehensively address practical problems associated with drinking water and wastewater treatment, air quality, environmental chemistry, sustainable design, energy efficiency, and solid and hazardous waste remediation. Additionally, some courses explore the combination of law and practice, so you discover how to develop and enforce environmental policies and regulations that forge the way for a greener future.

At UW–Madison, our graduate research program is dynamic. Engineering and environmental chemistry professors, visiting professors, academic staff members, and a cadre of research graduate and undergraduate students provide context for your studies. We sustain a broad range of research topics, so you can explore environmental chemistry, wastewater treatment, drinking water treatment, freshwater quality, environmental microbiology, bioenergy production, sustainable engineering design, and many more.

With a master’s degree in CEE with a named option in Environmental Science and Engineering, you are at the forefront of rapidly developing and world-changing innovations.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.
Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

**Mode of Instruction Definitions**

- **Face to Face**: These programs are offered in a traditional classroom setting. For more information about the meeting schedule of a specific program, contact the program.
- **Evening/Weekend**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

**REQUIRED COURSES**

This is a face to face, accelerated program:

- 30 credit degree program
- Complete the program in one academic year (fall, spring, summer)
- Courses begin in fall semester only
- Take 18 credits from the approved list of specialized courses
- Up to 6 credits of advanced study, 1-2 credits in a graduate student seminar, and up to 6 credits from a second discipline based on your career interests and faculty advisement

**Typical Curriculum in this Program**

Students typically take 12 credits in the fall semester, 12 credits in the spring semester, and 6 credits in the summer semester.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.
NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students in the accelerated MS named options are not eligible for department funded opportunities.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguer, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT
Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING: GEOLOGICAL/ GEOTECHNICAL ENGINEERING, M.S.

This is a named option within Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis).

The Geological/Geotechnical Engineering (https://www.engr.wisc.edu/20department/civil-environmental-engineering/academics/accelerated-20master-science-programs-civil-environmental-engineering) M.S. CEE named option from the University of Wisconsin-Madison is interdisciplinary, taught by faculty from the College of Engineering and the College of Letters & Science. Our program integrates expertise from geology and engineering, so you acquire deep understanding of the interrelation between nature and the built environment.

In just one year, learn to solve a variety of practical problems associated with rocks and soils using principles of sustainable engineering. Combine your knowledge of geology with your engineering expertise to build structures, manage groundwater and surface water resources, construct subsurface repositories for waste disposal, and design systems to help extract conventional and alternative energy and mineral resources.

Our program is dynamic. You work with engineering and geoscience professors, visiting professors, academic staff members, and a cadre of research graduate and undergraduate students. Choose your electives based on your specific career or research needs. Research topics include alternative energy, geoenvironmental engineering, rock mechanics, earthquake engineering, hydrogeology, near-surface geophysics, and many more.

In the UW–Madison Geological/Geotechnical Engineering master’s program, you develop strong skills in geoenvironmental engineering, groundwater technology, rock and soil mechanics, geophysics, and geology. Graduate ready to excel in your field, whether it be consulting, petroleum and gas industries, mining, infrastructure, federal and state laboratories, or research. The Earth can be your office!

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

<table>

GRE (Graduate Record Examinations) Not required.

English Proficiency Test Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency).

Other Test(s) (e.g., GMAT, MCAT) n/a

Letters of Recommendation Required 3

Applicants must first meet all of the requirements of the Graduate School. Please visit this website (https://grad.wisc.edu) for details.

Applicants must also meet department specific requirements as outlined below.

- Have a bachelor’s degree in civil and environmental engineering from an ABET-accredited engineering program or from a recognized international institution
- Submit a 1,000 word or fewer statement of purpose; include your technical areas of interest, coursework emphasis, research experience, professional goals, faculty members you are interested in working with, and any other items relevant to your qualifications for graduate school
- Submit three letters of recommendation
- Non-native English speakers must have a Test of English as a Foreign Language (TOEFL) with a score of 580 (written) or 92 (Internet version)

Please do not mail paper copies of application materials. Upload the required application materials to the electronic Graduate School application, including a PDF copy of the most current transcripts. Applicants who are recommended for admission by the CEE Admissions Committee will receive an e-mail with further instructions from the CEE Graduate Admissions Office, requesting official transcripts or other required application material.

Applicants should monitor the application status by visiting the “Graduate Application Status” window within your MyUW portal (information on this is received after submitting an application). You may need to activate a NetID to gain access to the MyUW portal.

Graduate Application Status will remain “pending” until recommendations are determined. All applicants will receive an e-mail from the CEE Graduate Admissions Team with more details once the admission committees have made decisions.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
PROGRAM RESOURCES

Students in this program are not eligible for department funded opportunities in the form of teaching assistantship (TA), research assistantship (RA), or project assistantship (PA).

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

NAMED OPTION REQUIREMENTS

MODE OF INSTRUCTION

Face to Face Evening/Weekend Online Hybrid Accelerated
Yes No No No Yes

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

Requirements Detail

Minimum Credit Requirement 30 credits
Minimum Residence Credit Requirement 16 credits
Minimum Graduate Coursework Credit Requirement At least 50% of credits applied toward the graduate degree credit requirement must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide.

Overall Graduate GPA Requirement 3.00 GPA required.
Other Grade Requirements The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments Contact the program for information on required assessments and examinations.
Language Contact the program for information on any language Requirements requirements.

REQUICK CURRSCES

Typical Curriculum in this program

• Students typically take 12 credits in the fall semester, 12 credits in the spring semester, and 6 credits in the summer semester.

• 15 credits from the approved list of Geological/Geotechnical Engineering Specialization courses. Student and advisor will select specific courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

• 6 credits from a second discipline within the approved list of Civil and Environmental Engineering specialization courses, based on your career interests.

• 3 credits from a third discipline within the approved list of CEE specialization courses, based on your career interests.

• 5 credits of GLE 699 Independent Study and 1 credit of GLE 900 Seminar

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.
POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special
With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students in the accelerated MS (named options) are not eligible for department funded opportunities.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguer, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil
and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

**CIVIL AND ENVIRONMENTAL ENGINEERING: STRUCTURAL ENGINEERING, M.S.**

This is a named option within Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis).

State-of-the-art expertise informs the University of Wisconsin's M.S.–CEE named option in Structural Engineering.

In just one year, students you build an advanced thorough understanding of the basic governing principles of structural engineering and gain exposure to the latest techniques and trends in civil engineering.

Students have the flexibility to choose courses that focus on structural analysis and design, geotechnical engineering, and construction engineering management. Students may also add related coursework from other departments, such as Engineering Mechanics, to craft precisely the expertise they seek.

UW-Madison’s unique combination of classroom understanding with real-world application allows you to fully master developments in the structural engineering industry and gain the practical knowledge to join the engineering profession or consider further education upon graduation.

**ADMISSIONS**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Applicants must also meet department specific requirements as outlined below:

- Have a bachelor’s degree in civil and environmental engineering from an ABET-accredited engineering program or from a recognized international institution
- Submit a 1,000 word or fewer statement of purpose; include your technical areas of interest, coursework emphasis, research experience, professional goals, faculty members you are interested in working with, and any other items relevant to your qualifications for graduate school
- Submit three letters of recommendation
- Non-native English speakers must have a Test of English as a Foreign Language (TOEFL) with a score of 580 (written) or 92 (Internet version)

Please do not mail paper copies of application materials. Upload the required application materials to the electronic Graduate School application, including a PDF copy of the most current transcripts. Applicants who are recommended for admission by the CEE Admissions Committee, will receive an e-mail with further instructions from the CEE Graduate Admissions Office, requesting official transcripts or other required application material.

Applicants should monitor the application status by visiting the “Graduate Application Status” window within your MyUW portal (information on this is received after submitting an application). You may need to activate a NetID to gain access to the MyUW portal.

Graduate Application Status will remain “pending” until recommendations are determined. All applicants will receive an e-mail from the CEE Graduate Admissions Team with more details once the admission committees have made decisions.

**FUNDING**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

Students in this program are not eligible for department funded opportunities in the form of teaching assistantship (TA), research assistantship (RA), or project assistantship (PA).

CIVIL AND ENVIRONMENTAL ENGINEERING: TRANSPORTATION ENGINEERING, M.S.

This is a named option within Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis).

The Transportation Engineering (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/accelerated-master-science-programs-civil-environmental-engineering) named option in the M.S. – CEE at the University of Wisconsin–Madison teaches you to conduct research and disseminate knowledge for the safe and efficient movement of people and goods.

Because of energy constraints, population growth, capacity constraints, and environmental awareness, there is an industry need for engineers who understand traditional engineering principles and can also adapt and embrace innovative opportunities in the field.

The Transportation Engineering program focuses on technology-based learning and utilizes UW–Madison’s prominence in cutting-edge scholarly research. Learn how to drive the discovery, planning, design, development, operation, maintenance, and safety of intelligent transportation systems and play the important role in connected and autonomous transportation.

You also gain the tools to develop efficient and reliable multi-modal freight systems that lead to economic growth and provide the foundation for the success of most industries.

Because the rapid growth in digital communication and automotive design requires new thinking, our program takes advantage of emerging opportunities in remote controls and the use of interactive signals in vehicles, satellites, mobile phones, and stationary traffic operations devices. Plus, you learn within UW-Madison’s full-scale driving simulator and our national CV/AV proving grounds.

The unique combination of classroom understanding with real-world application allows you to fully master developments in the transportation industry.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

**UW–Madison University Special**

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Students in the accelerated MS (named options) are not eligible for department funded opportunities.

**PROFESSIONAL DEVELOPMENT**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**GRADUATE SCHOOL RESOURCES**

See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

**Civil and Environmental Engineering Faculty:** Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

**Geological Engineering Faculty:** Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

**Environmental Chemistry and Technology:** Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil
CIVIL AND ENVIRONMENTAL ENGINEERING: WATER RESOURCES ENGINEERING, M.S.

This is a named option within Civil and Environmental Engineering M.S. (p. 282) It is based on coursework only (no research-based thesis).

The Water Resources Engineering named option in the M.S. –CEE from the Department of Civil and Environmental Engineering (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/accelerated-master-science-programs-civil-environmental-engineering) at the University of Wisconsin–Madison teaches you the scientific and engineering skills to evaluate, plan, and operate water resource and environmental systems.

Our program takes just one year to complete, and focuses on a systems-based approach to managing water resources for societal benefit. You learn principles of water movement through the environment and understand how to best utilize it for municipal and industrial uses, agriculture, and natural ecosystems. You also solve practical problems in hydrology; fluid mechanics; environmental flows in rivers, lake, and coastal environments; and water resource management.

Build the expertise to analyze and design systems that control all aspects of the distribution of water to meet the needs of humans and improve natural resource management. You also analyze and solve scientific and engineering questions through field methods, laboratory experiments, remote-sensing techniques, numerical and statistical modeling, and analytic approaches.

With an M.S.-CEE named option in Water Resources Engineering at UW–Madison, you develop strong quantitative skills in modeling, systems thinking, and sustainability science. Graduate ready to succeed in consulting firms, federal and state laboratories and agencies, and municipal and county governments, and place yourself at the forefront of rapidly developing and world-changing innovations.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Please visit this website (https://grad.wisc.edu) for details. The application deadline is December 15 for the fall term.

Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency). Non-native English speakers must have a Test of English as a Foreign Language (TOEFL) with a score of 580 (written) or 92 (Internet version)

Please do not mail paper copies of application materials. Upload the required application materials to the electronic Graduate School application, including a PDF copy of the most current transcripts. Applicants who are recommended for admission by the CEE Admissions Committee, will receive an e-mail with further instructions from the CEE Graduate Admissions Office, requesting official transcripts or other required application material.

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from...
the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Students in this program are not eligible for department funded opportunities in the form of teaching assistantship (TA), research assistantship (RA), or project assistantship (PA).

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

NAMED OPTION REQUIREMENTS

Mode of Instruction Definitions

- **Face to Face**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

REQUIRED COURSES

This is a face-to-face, accelerated program:

- 30 credit degree program
- Complete the program in one academic year (fall, spring, summer)
- Courses begin in fall semester only
- Take 18 credits from the approved list of specialized courses; up to 6 credits of advanced independent study; 1-2 credits in a graduate student seminar; and up to 6 credits from a second discipline based on your career interests and faculty advisement

Typical curriculum in this program: 12 credits fall semester. 12 credits spring semester. 6 credits summer semester.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Students in the accelerated MS (named options) are not eligible for department funded opportunities.
PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noquera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainer). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL AND ENVIRONMENTAL ENGINEERING, PH.D.

The mission of the civil and environmental engineering program is to develop leaders in education, industry, and government who can use their acquired skills to improve society. The academic program provides a comprehensive framework of courses in the broad area of civil and environmental engineering with opportunities to develop specialized expertise. It also emphasizes the development of integrated teamwork abilities, communication, leadership, entrepreneurship, and creative research skills. Graduate study in the department offers an opportunity to undertake advanced study and research in various areas of specialization. Areas include:

- **Construction engineering and management:** construction labor productivity management, integrated lean project delivery systems, risk management, advanced computer applications to construction, and change management
- **Environmental engineering:** water supply, water quality, water treatment, wastewater treatment, solid and hazardous waste management, air pollution, biotechnology, and alternative energy
- **Geo and pavement engineering:** geotechnical and geological engineering, pavement materials and design, asphalt binders and mixtures, geosynthetics, in-situ testing and engineering geophysics, recycled materials in sustainable construction
- **Structural engineering:** behavior, analysis and design of reinforced/ prestressed concrete, steel, and wood structures; design for earthquake and wind loading; seismic rehabilitation
- **Transportation engineering:** highway and traffic engineering, intelligent transportation systems, connected and automated vehicles, transportation planning, freight, and infrastructure management, transportation safety, user comprehension and behavior, advanced driving- and micro-simulation, big data
- **Water resources/environmental fluid mechanics:** analysis, measurement, modeling of currents, flows, and waves in natural and constructed systems; surface and groundwater hydrology; hydraulic engineering; coastal engineering; sedimentation and transport processes; infrastructure impacts of extreme weather events, hydroecology and stream restoration

Students may also pursue studies in the broad fields of environmental engineering/science and systems analysis. Areas of specialization are organized into a constructed facilities division (including transportation engineering, structural engineering, construction engineering and management, pavement engineering, materials for constructed facilities, and geotechnical engineering) and an environmental engineering division (including geoenvironmental engineering, environmental fluid mechanics and water resources engineering, environmental science and technology, and environmental and water chemistry).

Degrees require a coordinated core program of courses, selected from CEE and other department/program offerings. Graduate degree programs closely associated with the department include engineering mechanics, human factors, environmental chemistry and technology, water resources management, geological engineering, land resources, and limnology and marine science.

In support of the instructional and research programs are laboratory facilities for structural engineering; highway materials; transportation systems; driving simulation and human factors; soil mechanics, geotechnical and geoenvironmental engineering; environmental fluid mechanics; environmental engineering processes and engineering chemistry. Water resources engineering, environmental engineering, and water chemistry have additional research facilities in the Water Science and Engineering Laboratory on the shore of Lake Mendota. The Environmental Engineering Field Laboratory is located at the Nine-Springs Madison Metropolitan Wastewater Treatment Plant.
ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

All applicants must meet the Graduate School’s admission requirements (http://grad.wisc.edu/admissions/requirements) to be considered for admission. The application deadline is December 15 for the fall term and October 1 for the spring term. Late applications may not be reviewed for funding opportunities.

In addition, applicants must also meet the department’s more stringent admission requirements listed below to be considered for admission:

- Grades: A minimum undergraduate grade point average (GPA) of 3.00 (on a 4.00 scale) on the equivalent of the last 60 semester hours (approximately two years of work) is required for domestic applicants. A strong academic performance comparable to an average of B or above grades for all undergraduate course work is required for international applicants.
- Degree: A bachelor’s degree from an ABET-accredited engineering program or from a recognized international institution is required.

A complete graduate application is required before an application will be reviewed by the faculty. A complete graduate application contains the following:

- Graduate School Application Form and application fee: Applicants must submit an online application to the UW–Madison Graduate School. See Graduate School Admissions (https://grad.wisc.edu/admissions) to apply.
- Statement of purpose: A statement of purpose for graduate study must be submitted through an applicant’s online UW–Madison Graduate School application. Please limit this important document to 1,000 words.
- Letters of recommendation: Three letters of recommendation must be submitted through an applicant’s online UW–Madison Graduate School application.
- Transcripts: Upload the most recent copies of your transcripts to the electronic application, from each institution attended. Study abroad transcripts are not required if coursework is reflected on the degree granting university’s transcript. If the application is recommended for admission then we will follow-up with instructions for official transcript submission.
- Graduate Record Examination (GRE) Scores: Graduate Record Examination (GRE) General Test scores are required for most applicants.
- English proficiency scores: Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. See Graduate School Admission Requirements (http://grad.wisc.edu/admissions/requirements) for more information on the English proficiency requirement.
  - GRE and TOEFL scores may be sent to institution code 1846 from ETS.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial support is available through fellowships, project/program assistantships (PA), research assistantships (RA), and teaching assistantships (TA). Faculty will contact successful applicants directly regarding funding opportunities. Admission is not a guarantee of funding.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

</tr>
</tbody>
</table>

**REQUIRED COURSES**

Basic requirements for a Ph.D. degree in Civil and Environmental Engineering include: (1) Ph.D. major coursework; (2) qualifying examination; (3) Ph.D. minor coursework; (4) preliminary examination; (5) dissertation research; and (6) final oral examination. Advanced coursework in a major area of civil and environmental engineering is required. The academic program for each doctoral student is planned on an individual basis with their advisor. 32 credits and minor coursework must be completed prior to achieving dissertator status (for students who have earned an M.S. degree, credits accumulated for the M.S. can be applied toward this requirement). All graduate students must register for a 1-credit seminar course; students will discuss seminar options with faculty advisors.

**Seminar course options; must discuss seminar options with faculty advisor.**

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic department can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count credits of graduate coursework from other institutions. Approved credits will be allowed to count toward the minimum graduate degree credit requirement and the minimum graduate coursework requirement, but will not count toward the minimum graduate residence credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.
**UW–Madison Undergraduate**

With program approval, no more than 7 credits of coursework numbered 300 or higher from a UW–Madison undergraduate degree are allowed to count only toward the minimum graduate degree credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement; those courses numbered 700 or above may be applied toward the Minimum Graduate Coursework (50%) Requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

A committee often accomplishes advising for the students in the early stages of their studies.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**OTHER**

Faculty will contact successful applicants directly regarding funding opportunities. Admission is not a guarantee of funding.

---

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. Demonstrate an extraordinary, deep understanding of mathematical, scientific, and engineering principles in the field.
2. Demonstrate an ability to formulate, analyze, and independently solve advanced engineering problems.
3. Apply the relevant scientific and technological advancements, techniques, and engineering tools to address these problems.
4. Recognize and apply principles of ethical and professional conduct.
5. Demonstrate an ability to synthesize knowledge from a subset of the biological, physical, and/or social sciences to help frame problems critical to the future of their discipline.
6. Demonstrate an ability to conduct original research and communicate it to their peers.

**PEOPLE**

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pinheiro, Remucal, Tinjum; Assistant Professors Blum, Gadiokota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Titoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www.engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karihikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadiokota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT
Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

GEOLOGICAL ENGINEERING, DOCTORAL MINOR

Students from departments outside of the Geological Engineering Program in the Department of Civil and Environmental Engineering can receive a Ph.D. minor in Geological Engineering. The requirements for an external minor in Geological Engineering are listed below. The minor must be approved by Geological Engineering faculty in the Department of Civil and Environmental Engineering. The minor approval form is available at the Civil and Environmental Engineering office. Completed form can be returned to the Civil and Environmental Engineering office for review and approval.

REQUIREMENTS

1. A minimum of 9 formal course credits (not independent study or research credits) taken in the Geological Engineering curriculum.

2. Courses must be numbered 300 or above in Geological Engineering.

3. One of the courses must be numbered 600 or above in Geological Engineering.

4. Only one of the courses may be cross listed in the student’s major department and cannot be used to satisfy the student’s major requirements.

5. No examinations are required other than those given in each course.

PEOPLE

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory.engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurber (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Tinjum (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainer). Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www.engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

GEOLOGICAL ENGINEERING, M.S.

The graduate program offers training leading to the master of science and the doctor of philosophy degrees in geological engineering. Geological engineering is a rapidly growing field of study that integrates the two disciplines of geology and engineering. Geological engineers help find the best ways to use the earth’s resources for solving technical problems while protecting the environment. The need for graduate education in geological engineering has been brought about by modern developments and activities in science and industry that have an impact on earth materials including soil, rock, water, and air. The area of study combines research and application methodologies of geology and of several engineering disciplines to address engineering problems in which the geologic nature of a site or geologic processes constitute major design objectives or constraints.

Emphasis in the program is on development of the student’s ability to originate and perform analytical, numerical, and/or laboratory analysis techniques to address new and challenging earth-related problems associated with modern land-use practices, earthen construction, energy and mineral extraction, and environmental pollution control and remediation. The program is expected to be of interest to students in engineering (particularly mining, civil, environmental, and mechanical) and physical sciences (particularly geology, geophysics, and geography). Students select their research topics from such areas as geotechnical and geo-environmental engineering, applied geophysics, hydrology and hydrogeology, numerical modeling of rock masses, remote sensing, rock mechanics, and soil and rock engineering.

Modern facilities include soil and rock mechanics laboratories; drilling equipment and instrumentation for rock and soil mechanics field testing; and soils, geosynthetics, and geo-environmental laboratories. Research assistantships, teaching assistantships, and fellowships are available to qualified applicants either upon admission or one to two semesters after entering the program.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).
admission requirements listed below to be considered for admission:

In addition, applicants must also meet the department’s more stringent application deadline for spring term is October 1st. The application deadline for fall term is December 15th; the [Graduate School’s admission requirements](http://grad.wisc.edu/admissions/requirements) All applicants must meet the Graduate School’s admission requirements.

**Statement of purpose:**

A statement of purpose for graduate study must be submitted through an applicant’s online UW–Madison Graduate School application. Please limit this important document to 1,000 words.

**Letters of recommendation:**

Three letters of recommendation must be submitted through an applicant’s online UW–Madison Graduate School application.

**Transcripts:**

Upload the most recent copies of your transcripts to the electronic application, from each institution attended. Study abroad transcripts are not required if coursework is reflected on the degree granting university’s transcript. If the application is recommended for admission then we will follow-up with instructions for official transcript submission.

**Graduate Record Examination (GRE) Scores:**

Graduate Record Examination (GRE) General Test scores are required for all applicants.

- English proficiency scores: Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. See Graduate School Admission Requirements ([http://grad.wisc.edu/admissions/requirements](http://grad.wisc.edu/admissions/requirements)) for more information on the English proficiency requirement.
- GRE and TOEFL scores may be sent to institution code 1846 from ETS

---

### FUNDING

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information ([https://grad.wisc.edu/funding](https://grad.wisc.edu/funding)) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

### PROGRAM RESOURCES

Financial support is available through fellowships, project/program assistantships (PA), research assistantships (RA), and teaching assistantships (TA). Faculty will contact successful applicants directly regarding funding opportunities. Admission is not a guarantee of funding.

### REQUIREMENTS

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**Mode of Instruction Definitions**

- **Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

REQUIRED COURSES

All graduate students must register for G L E 900 Seminar each spring semester. M.S. degree candidates may choose from two options for their program of study.

Thesis Option

This option requires at least 16 credits of graduate-level coursework (300-level and higher) and at least 6 credits of G L E 790 Master’s Research or Thesis.

Independent Study Option

This option requires at least 21 credits of graduate-level coursework (300-level and higher) and 3 credits of G L E 999 Independent Work. A written report must be prepared based on the independent study project.

Policies

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count graduate coursework from other institutions toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

Up to 7 credits numbered 300 or above can be counted toward the minimum graduate degree credit requirement; if those 7 credits are from courses numbered 700 or above, they may be counted toward the minimum graduate coursework (50%) requirement. No credits can be counted toward the minimum graduate residence credit requirement. coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement, and the minimum graduate degree credit requirement; if those credits are from courses numbered 700 or above, they may be counted toward the minimum graduate coursework (50%) requirement. coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree,
the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

English Proficiency Test

Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (https://grad.wisc.edu/apply/requirements/english-proficiency).

Other Test(s) (e.g., GMAT, MCAT) | n/a

Letters of Recommendation | 3

Required

All applicants must meet the Graduate School's admission requirements (http://grad.wisc.edu/admissions/requirements) to be considered for admission. The application deadline for fall term is December 15; the application deadline for spring term is October 1st.

In addition, applicants must also meet the department's more stringent admission requirements listed below to be considered for admission:

- Grades: A minimum undergraduate grade point average (GPA) of 3.00 (on a 4.00 scale) on the equivalent of the last 60 semester hours (approximately two years of work) is required for domestic applicants. A strong academic performance comparable to an average of B or above grades for all undergraduate course work is required for international applicants.
- Degree: A bachelor's degree from an ABET-accredited engineering program or from a recognized international institution is preferred or bachelor's degree in physical sciences. Admission to the program requires approval of the admissions committee.
- A complete graduate application is required before an application will be reviewed by the faculty. A complete graduate application contains the following:
  - Graduate School Application Form and application fee: Applicants must submit an online application to the UW-Madison Graduate School. See Graduate School Admissions (http://grad.wisc.edu/admissions/requirements) to apply.
  - Statement of purpose: A statement of purpose for graduate study must be submitted through an applicant's online UW-Madison Graduate School application. Please limit this important document to 1,000 words.
- Letters of recommendation: Three letters of recommendation must be submitted through an applicant's online UW-Madison Graduate School application.
- Transcripts: Upload the most recent copies of your transcripts to the electronic application, from each institution attended. Study abroad transcripts are not required if coursework is reflected on the degree granting university's transcript. If the application is recommended for admission then we will follow up with instructions for official transcript submission.
- Graduate Record Examination (GRE) Scores: Graduate Record Examination (GRE) General Test scores are required for most applicants.
- English proficiency scores: Applicants whose native language is not English, or whose undergraduate instruction was not in English, must provide an English proficiency test score. Scores are accepted if they are within two years of the start of the admission term. </tr>
</tbody>
</table>

## REQUIRED COURSES

The academic program for each doctoral student is planned on an individual basis with their advisor.

Basic requirements for a Ph.D. degree in geological engineering include: (1) Ph.D. major coursework; (2) qualifying examination; (3) Ph.D. minor coursework; (4) preliminary examination; (5) dissertation research; and (6) final oral examination (dissertation defense).

The Graduate School minimum Ph.D. credit requirement is 51 credits. 32 credits and the doctoral minor requirement must be completed prior to achieving dissertator status (for students who have earned an M.S. degree, credits accumulated for the M.S. can be applied toward this requirement). Students must register for GLE 900 Seminar each spring semester.

## POLICIES

## GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

## MAJOR-SPECIFIC POLICIES

### GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://www.engr.wisc.edu/department/civil-environmental-engineering/academics/ms-phd-civil-and-environmental-engineering) is the repository for all of the program's policies and requirements.

### PRIOR COURSEWORK

#### Graduate Work from Other Institutions

With program approval, students are allowed to count graduate coursework from other institutions toward the minimum graduate degree credit requirement and the minimum graduate coursework (50%) requirement. No credits from other institutions can be counted toward the minimum graduate residence credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

#### UW–Madison Undergraduate

Up to 7 credits numbered 300 or above can be counted toward the minimum graduate degree credit requirement; if those 7 credits are from courses numbered 700 or above, they may be counted toward the minimum graduate coursework (50%) requirement. No credits can be counted toward the minimum graduate residence credit requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.

#### UW–Madison University Special

With program approval, students are allowed to count up to 15 credits of coursework numbered 300 or above taken as a UW–Madison Special student toward the minimum graduate residence credit requirement, and the minimum graduate degree credit requirement; if those credits are from courses numbered 700 or above, they may be counted toward the minimum graduate coursework (50%) requirement. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements.
PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

Civil and Environmental Engineering Faculty: Professors Noyce (chair), Adams, Bahia, Cramer, Hanna, Harrington, Hurley, Likos, Loheide, McMahon, Noguera, Park, Parra-Montesinos, Ran, Russell, Schauer, Wu; Associate Professors Ahn, Block, Fratta, Pincheira, Remucal, Tinjum; Assistant Professors Blum, Gadikota, Ginder-Vogel, Hampton, Hicks, Prabhakar, Pujara, Sone, Wang, Wright, Zhu. M.Eng Program Director Carlson. See also CEE faculty (http://directory. engr.wisc.edu/cee/faculty).

Geological Engineering Faculty: Professors Likos (director) (Civil and Environmental Engineering), Feigl (Geoscience), Goodwin (Geoscience), Holloway (Nelson Institute), Loheide (Civil and Environmental Engineering), Thurbur (Geoscience), Tikoff (Geoscience), Wu (Civil and Environmental Engineering); Associate Professors Cardiff (Geoscience), Fratta (Civil and Environmental Engineering), Jin (Civil and Environmental Engineering); Assistant Professors Gadikota (Civil and Environmental Engineering), Ginder-Vogel (Civil and Environmental Engineering), Hampton (Civil and Environmental Engineering), Hicks (Civil and Environmental Engineering), Sone (Civil and Environmental Engineering), Zoet (Geoscience); Professor of Practice Pakes (Grainger). See also GLE faculty (https://www. engr.wisc.edu/geological-engineering/people).

Environmental Chemistry and Technology: Professors Hurley (director) (Civil and Environmental Engineering), Bleam (Soil Science), Harrington (Civil and Environmental Engineering), Karthikeyan (Biological Systems Engineering), McMahon (Civil and Environmental Engineering/Bacteriology), Pedersen (Soil Science), Roden (Geoscience), Root (Chemical and Biological Engineering), Schauer (Civil and Environmental Engineering), Thompson (Biological Systems Engineering); Associate Professors Bertram (Chemistry), Remucal (Civil and Environmental Engineering); Assistant Professors Anantharaman (Bacteriology), Ginder-Vogel (Civil and Environmental Engineering), Gadikota (Civil and Environmental Engineering), Whitman (Soil Science). See also ECT Faculty (https://www. engr.wisc.edu/academics/graduate-academics/environmental-chemistry-technology).

CIVIL SOCIETY & COMMUNITY STUDIES

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES

• Community-Engaged Scholarship, Doctoral Minor (p. 318)
• Community-Engaged Scholarship, Graduate/Professional Certificate (p. 319)
COMMUNITY-ENGAGED SCHOLARSHIP, DOCTORAL MINOR

The purpose of this doctoral minor is to train graduate students in the practice of community-engaged scholarship (CES), which is defined as teaching or research that is done in collaboration with community organizations or community partners in equitable, mutually beneficial, respectful relationships.

CES can include:

- community-based (service) learning, in which students work with community organizations or members (typically through direct service, advocacy or policy efforts, or other project-based work) to enhance their academic learning, professional development, and personal development while providing tangible benefits to the community organization and its constituents.
- community-based research, a spectrum of research including community-based participatory research and participatory action research. In this type of research, researchers work with community members to address research questions or issues identified by the community itself. These collaborations typically yield both academic research and useful outcomes or products for community members, who often act as co-researchers. Additionally, the relationships between community partners and researchers are mutually beneficial, equitable, and respectful.
- other community engagement and outreach efforts, including scholarship on CES.

Graduate students in this doctoral minor may focus on one, several, or all facets of CES, depending on their interests. Through this minor, students will feel confident to teach community-based learning courses, conduct community-based research, and/or lead community engagement initiatives.

ADMISSIONS

Students interested in pursuing an Option A (External) Doctoral Minor in Community-Engaged Scholarship should contact the Faculty Director to obtain a Minor Agreement Form. This form must be obtained prior to completing all of the coursework required for the minor.

Doctoral students in the Human Ecology PhD: Civil Society and Community Research program are not eligible to receive this doctoral minor.

LEARNING OUTCOMES

1. Apply theory and effective practices in the conduct of community-based research and evaluation.
2. Utilize theories of translational and transformative learning and community change in performing engaged scholarship.
3. Develop mutually beneficial and equitable partnerships with community organizations and members.
5. Demonstrate application of community-engaged scholarship through a presentation, report or other artifact involving a public/community audience.
6. Cultivate a leadership style and communication skills that engage community partners in scholarship.

COMMUNITY-ENGAGED SCHOLARSHIP, GRADUATE/PROFESSIONAL CERTIFICATE

The purpose of this certificate program is to train graduate students in the practice of community-engaged scholarship (CES), which is defined as teaching or research that is done in collaboration with community organizations or community partners in equitable, mutually beneficial, respectful relationships.

CES can include:

- community-based (service) learning, in which students work with community organizations or members (typically through direct service, advocacy or policy efforts, or other project-based work) to enhance their academic learning, professional development, and personal development while providing tangible benefits to the community organization and its constituents.

- community-based research, a spectrum of research including community-based participatory research and participatory action research. In this type of research, researchers work with community members to address research questions or issues identified by the community itself. These collaborations typically yield both academic research and useful outcomes or products for community members, who often act as co-researchers. Additionally, the relationships between community partners and researchers are mutually beneficial, equitable, and respectful.

- other community engagement and outreach efforts, including scholarship on CES.

Graduate students in this certificate may focus on one, several, or all facets of CES, depending on their interests. Through this certificate, students will feel confident to teach community-based learning courses, conduct community-based research, and/or lead community engagement initiatives.

ADMISSIONS

Students must be current UW–Madison graduate students in good standing with the graduate school. For assistance in declaring the certificate through the eDeclaration process, contact the SoHE Graduate Program Coordinator.

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES, M.A.

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may follow one of two courses of study, classical languages and literatures, or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient near eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources available online.

ADMISSIONS

Students apply to the Master of Arts in Classical and Ancient Near Eastern Studies through one of the named options:

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every attempt to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department’s intention to give the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department’s needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities for support outside the department at all stages of their study. Details can be found below.

TEACHING ASSISTANTSHIPS

Criteria: Teaching assistant appointments will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student’s qualification to teach scheduled courses, and availability of budgeted positions.

Eligibility: To be eligible to become a teaching assistant, graduate students should ordinarily meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress towards an advanced degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding or under consideration for a teaching assistantship. For information and scheduled tests, please consult the English as a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.

Class Assignments: Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, and the preference of the TA, and the preference of the instructor.

Training Program: All TAs are required to attend the department’s annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department’s annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number, of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

Review: Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

Workload/Percentage of Appointment: Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

Stipend & Benefits: The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.
DEPARTMENTAL TRAVEL SUPPORT

Eligibility Guidelines: The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW–Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.

Application: Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowships Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.

Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

SCHOLARSHIPS & FELLOWSHIPS

Adams-Lemoine Dissertation Fellowship: This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published university award amounts and may supply funding for one or two semesters of study.

Frank R. Kramer Summer Fellowship: A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

Hieronimus Prize for Greek Composition: This monetary award is given in memory of Professor John Paul Hieronimus (Ph.D. ’31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

Pillinger Prize for Latin Composition: This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

OTHER FUNDING OPTIONS

The Graduate School provides additional information helpful to graduate students in need of funding.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Minimum Graduate Coursework Requirement

See either the M.A. named option in Classics (https://next-guide.wisc.edu/graduate/classical-ancient-near-eastern-studies/classical-ancient-near-eastern-studies-classics-ma/#requirementstext) or Hebrew Bible (https://next-guide.wisc.edu/graduate/classical-ancient-near-eastern-studies/classical-ancient-near-eastern-studies-hebrew-bible-ma/#requirementstext) for the requirement information.

Other Grade Requirements: The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

REQUIRED COURSES
Select a Named Option (p. 324) for courses required.

NAMED OPTIONS (SUB-MAJORS)
A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Master of Arts in Classical and Ancient Near Eastern Studies must select one of the following named options:

- CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: CLASSICS, M.A. (P. 325)
- CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: HEBREW BIBLE, M.A. (P. 331)

POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK
Graduate Work from Other Institutions
See either the M.A. named option in Classics (p. 330) or Hebrew Bible (p. 336) for the policy information.

UW–Madison Undergraduate
See either the M.A. named option in Classics (p. 330) or Hebrew Bible (p. 336) for the policy information.

UW–Madison University Special
See either the M.A. named option in Classics (p. 330) or Hebrew Bible (p. 336) for the policy information.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
See either the M.A. named option in Classics (p. 330) or Hebrew Bible (p. 336) for the policy information.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
See either the M.A. named option in Classics (p. 330) or Hebrew Bible (p. 336) for the policy information.

OTHER
All applications received by January 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for university fellowships or scholarships, although you may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.
PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Articulates, critiques, and applies the philological and theoretical approaches established in the field of Classics or Hebrew Bible.
2. Identifies appropriate sources and assembles evidence relevant to questions and challenges in Classics or Hebrew Bible.
3. Demonstrates understanding of Classical or Hebrew Bible literature in a historical and social context.
4. Selects and utilizes the most appropriate methodologies and practices.
5. Evaluates and synthesizes information pertaining to questions and challenges.
6. Communicates complex ideas in a clear and understandable manner.
7. Recognizes and applied principles of ethical and professional conduct.

Toni Landis, Advisor/Student Services Coordinator

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: CLASSICS, M.A.

This is a named option within the Classical and Ancient Near Eastern Studies M.A. (p. 320)

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may follow one of two courses of study, classical languages and literatures, or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient near eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources available online.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website.
Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

---

Thank you for your interest in the graduate program in Classical and Ancient Near Eastern Studies! Our Department offers both an MA program and a PhD program.

Applicants for graduate study may enter the program with either a bachelor's or master's degree. For the Classics option, candidates are expected to have covered at least the equivalent of an undergraduate major in Classics, which consists of at least three years of both Greek and Latin. Candidates whose preparation falls short of the minimum requirements may be admitted with deficiencies at the discretion of the Department, but will be required to do additional work within the first year of the program. Applications are evaluated on the basis of previous academic record, Graduate Record Exam (GRE) scores, letters of recommendation, the writing sample and a personal statement.

All applicants to the program must apply online by January 5 (https://grad.wisc.edu/apply). Only select the MA application if you plan on a terminal MA at UW-Madison—all other applicants select the PhD application, even if you have not yet received a master's degree. **Please note:** the $75 application fee must be paid at the time of application (international students will be charged an additional $6 for processing).

As part of the online application process, you will be asked supplemental questions regarding your level of language preparation and expected to upload the information listed below:

1. Writing sample of scholarly work no more than 25 pages (optional).
2. Transcripts or academic records from each institution attended. You may upload unofficial copies for department review. International academic records must be in the original language accompanied by an official English translation. **Please note:** official, hard copy transcripts will only be requested by the Graduate School upon Department recommendation for admission. Further information will be provided upon department admission.
3. Official Graduate Record Examination (GRE) (http://www.gre.org) score report sent from the Educational Testing Service (ETS). Use institution code 1846 to route your results to the UW Graduate School. Once results are received, they will populate on your online application.
4. TOEFL or MELAB (https://grad.wisc.edu/admissions/requirements) for all international applicants.
5. Statement of purpose (citing your reasons for graduate study).
6. Curriculum vitae listing language experience, awards, honors, etc.
7. Three letters of reference. You must submit your requests to all three of your references as part of the online application. Recommenders will receive a notice via email and will submit their letters accordingly.

In addition to University funds, there are limited scholarship funds available which are administered independently by the Department of Classical and Ancient Near Eastern Studies. All applications received in full by January 5 will be eligible for fellowship opportunities from the Graduate School. If application materials are received after the deadline, you will no longer be eligible for a University Fellowship, although you may be eligible for consideration for financial assistance through Department funds such as Teaching Assistantships, Project Assistantships, Research Assistantships, or Departmental Fellowships.

Please do not hesitate to contact us at info@canes.wisc.edu should you have any questions about the application process.

---

### FUNDING

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every attempt to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department's intention to give the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department's needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities for support outside the department at all stages of their study. Details can be found below.

**TEACHING ASSISTANTSHIPS**

**Criteria:** Teaching assistant appointments will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student's qualification to teach scheduled courses, and availability of budgeted positions.

**Eligibility:** To be eligible to become a teaching assistant, graduate students should ordinarily meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress towards an advanced...
degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding or under consideration for a teaching assistantship. For information and scheduled tests, please consult the English as a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.

Class Assignments: Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, the need for graduate students to have a variety of teaching experiences, the preference of the TA, and the preference of the instructor.

Training Program: All TAs are required to attend the department’s annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department’s annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

Review: Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

Workload/Percentage of Appointment: Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

Stipend & Benefits: The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5,225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.

DEPARTMENTAL TRAVEL SUPPORT

Eligibility Guidelines: The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW–Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.

Application: Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowships Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.
Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

**SCHOLARSHIPS & FELLOWSHIPS**

**Adams-Lemoine Dissertation Fellowship:** This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published University award amounts. Award periods vary and funding may be available for one or two semesters of study.

**Moses S. Slaughter Fellowship:** This fellowship is awarded in memory of Moses S. Slaughter, University of Wisconsin Professor of Latin from 1906 to 1923. The Slaughter Fellowship is given to a current or incoming graduate student who maintains Wisconsin residency. It provides tuition remission, a stipend, and benefits in accordance with published university award amounts and may supply funding for one or two semesters of study.

**Frank R. Kramer Summer Fellowship:** A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

**Hieronimus Prize for Greek Composition:** This monetary award is given in memory of Professor John Paul Hieronimus (Ph.D. '31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

**Pillinger Prize for Latin Composition:** This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

**OTHER FUNDING OPTIONS**

**Mode of Instruction Definitions**

- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format to accommodate working schedules. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

**CURRICULAR REQUIREMENTS**

**Requirements Detail**

<table>
<thead>
<tr>
<th>Minimum Residence Credit Requirement</th>
<th>18 credits</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Minimum Graduate Coursework Requirement</strong></td>
<td>M.A. named option in Classics: 24 credits out of 36 total credits must be completed in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide (<a href="http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle">http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle</a>). Of those 24 credits, at least 9 credits must come from each language.</td>
</tr>
<tr>
<td><strong>Overall Graduate GPA Requirement</strong></td>
<td>3.25 GPA required.</td>

</table>
Candidates meet with the thesis committee by the end of the first month in the semester in which they plan to graduate. In order to evaluate the viability of the thesis topic, candidates should submit an abstract of one to two pages to the committee.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
The thesis, written in consultation with the thesis advisor, must be completed no later than two semesters after thesis work begins.

OTHER
All applications received by January 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for university fellowships or scholarships, although they may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

FACULTY
For full faculty profiles, visit our website (https://canes.wisc.edu/our-faculty).

William Aylward: Greek and Roman archaeology
Jeffrey Beneker: Biography and historiography; Roman Republic
Jeffrey Blakely: Biblical and ancient Near Eastern archaeology
William Brockliss: Homer; Latin and Greek pedagogy
Alex Dressler: Ancient philosophy; gender and sexuality
Jeremy M. Hutton: Hebrew Bible; Northwest Semitics
Laura McClure: Greek literature; gender and reception studies
J C McKeown: Greek and Roman literature and culture
Grant Nelsestuen: Roman cultural history; Latin prose
Nandini Pandey: Latin poetry; Augustan culture
Vanessa Schmitz-Siebertz: Latin Instructor
Mike Vanden Heuvel: Theater and performance theory

AFFILIATE FACULTY
Nicholas Cahill: Ancient Greek archaeology and art history
Emily Fletcher: Ancient Greek philosophy
Paula Gottlieb: Ancient Greek philosophy; ethics
Daniel Kapust: Roman political thought, rhetoric; political theory
Marc Kleijwegt: Roman and Greek history
Leonora Neville: Roman Empire (the Byzantine Empire) in the 9th-12th centuries

Jordan Rosenblum: Rabbinic Judaism; biblical interpretation; food and religion
Claire Taylor: Greek socio-economic history; Athenian democracy; epigraphic culture

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: HEBREW BIBLE, M.A.

Admissions to the Classical and Ancient Near Eastern Studies: Hebrew Bible, M.A. have been suspended as of spring 2019. If you have any questions, please contact the department (canes@wisc.edu).

This is a named option within the Classical and Ancient Near Eastern Studies M.A. (p. 320)

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may follow one of two courses of study, classical languages and literatures, or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient near eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library

University of Wisconsin-Madison 2019-2020 9/17/2019
contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources available online.

**ADMISSIONS**

Admissions to the Classical and Ancient Near Eastern Studies: Hebrew Bible, M.A. have been suspended as of spring 2019. If you have any questions, please contact the department (canes@wisc.edu).

Applicants for graduate study may enter the program with either a B.A. or M.A. (M.A., M.Div., Th.M.) degree. For the Classics option, candidates are expected to have covered at least the equivalent of an undergraduate major in Classics, which consists of at least three years of both Greek and Latin. For the option in Hebrew Bible program, candidates are expected to have taken at least two years of Biblical Hebrew and one year of Greek. Candidates whose preparation falls short of the minimum requirements may be admitted with deficiencies at the discretion of the department, but will be required to do additional work within the first year of the program.

Applications are evaluated on the basis of previous academic record, Graduate Record Exam (GRE) scores, letters of recommendation, the writing sample and a personal statement.

All applicants to the program must apply on-line (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2f) by January 5. **ONLY select the M.A. application if you plan on a terminal M.A. at UW–Madison; all other applicants select the Ph.D. application even if you have not yet received an M.A. Please note:** the $75 application fee must be paid at the time of application (international students will be charged an additional $6 for processing).

As part of the online application process, you will be asked supplemental questions regarding your level of language preparation and expected to upload the information listed below:

1. Writing sample of scholarly work no more than 25 pages (optional).
2. Transcripts or academic records from each institution attended. You may upload unofficial copies for department review. International academic records must be in the original language accompanied by an official English translation. **Please note:** official transcripts will only be requested by the Graduate School upon department recommendation for admission. Further information will be provided upon admission.
3. Official Graduate Record Examination (GRE) (http://www.gre.org) score report sent from the Educational Testing Service (ETS). Use institution code 1846 to route your results to the UW Grad School. Once results are received, they will populate in your online application.
4. TOEFL or MELAB (https://grad.wisc.edu/admissions/requirements) for all international applicants.
5. Statement of purpose (citing your reasons for graduate study).
6. Curriculum vitae listing language experience, awards, honors, etc.
7. Three letters of reference. You must submit your requests to all three of your references as part of the online application. Recommenders will receive a notice via email and will submit their letters accordingly.

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) **of the Graduate School as well as the program(s).** Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every attempt to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department’s intention to provide the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department’s needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities for support outside the department at all stages of their study. Details can be found below.

**TEACHING ASSISTANTSHIPS**

Criteria: Teaching assistant appointments will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student’s qualification to teach scheduled courses, and availability of budgeted positions.

Eligibility: To be eligible to become a teaching assistant, graduate students should ordinarily meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress towards an advanced degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding a teaching assistantship. For information and scheduled tests, please consult the English as a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.
Class Assignments: Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, the need for graduate students to have a variety of teaching experiences, the preference of the TA, and the preference of the instructor.

Training Program: All TAs are required to attend the department’s annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department’s annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number, of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

Review: Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

Workload/Percentage of Appointment: Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

Stipend & Benefits: The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.

DEPARTMENTAL TRAVEL SUPPORT
Eligibility Guidelines: The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW–Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.

Application: Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowships Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.

Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

SCHOLARSHIPS & FELLOWSHIPS
Adams-Lemoine Dissertation Fellowship: This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published University award
Moses S. Slaughter Fellowship: This fellowship is awarded in memory of Moses S. Slaughter, University of Wisconsin Professor of Latin from 1906 to 1923. The Slaughter Fellowship is given to a current or incoming graduate student who maintains Wisconsin residency. It provides tuition remission, a stipend, and benefits in accordance with published university award amounts and may supply funding for one or two semesters of study.

Frank R. Kramer Summer Fellowship: A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

**Hieronimus Prize for Greek Composition:** This monetary award is given in memory of Professor John Paul Hieronimus (Ph.D. '31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

**Pillinger Prize for Latin Composition:** This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

**OTHER FUNDING OPTIONS**

CURRICULAR REQUIREMENTS

Requirements Detail

| Minimum Credit Requirement | 36 credits |
| Minimum Residence Credit Requirement | 18 credits |
| Minimum Graduate Coursework Requirement | MA named option in Hebrew Bible: 24 credits out of 36 total credits must be completed in graduate-level language courses within the department; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (https://registrar.wisc.edu/course-guide/). |

Overall Graduate GPA Requirement 3.00 GPA required.
Other Grade Requirements The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.
Assessments and Examinations M.A. exams are based on coursework and the M.A. Reading List. The exams are given at the end of the final semester of study for the degree, typically at the end of the summer of the second year. An exam can be taken no more than twice.

All M.A. Candidates
- Hebrew Texts and Grammar Exam
- Translation from Hebrew to English, including some sight passages
- Hebrew grammar and syntax (including parsing and producing forms)
- Translation from English to pointed Biblical Hebrew Oral Defense
This exam will include oral reading, translation, and discussion of sight passages, as well as questions calling for synthesis of knowledge learned in course work and readings.

Terminal M.A. Candidates Only
- General Exam
- M.A. candidates should have a basic familiarity with the history and methodology of biblical studies, especially of the 19th–20th centuries. They should know the main features of the Pentateuchal sources, according to the classical source division. In text criticism, they should demonstrate a familiarity with the major documents used, the methodology of textual criticism, and the history of the masoretic text and the Septuagint. They should be able to identify the masorahs and to explain the meaning of the most common masoretic notes. The exam includes questions on biblical literature and its interpretation; history and archaeology of Israel and the ancient Near East; postbiblical Judaism; Hebrew language, biblical text and canon, and the ancient versions.
- Exegetical Presentation
The candidate will prepare an exegetical presentation on a selected passage from the Hebrew Bible in consultation with director of graduate studies.

Language Requirements In addition to coursework in Hebrew and Semitic languages (Aramaic, Ugaritic & Canaanite, Syriac, and Akkadian), M.A. students must pass a proficiency exam in Hebrew.

REQUIRED COURSES

6 credits across two semesters of Biblical Hebrew. The number of credits depends on the student’s preparation
6 credits of Semitic language:
HEBR-BIB 702 Aramaic II
Or
HEBR-BIB 703 Ugaritic Texts
HEBR-BIB 704 Canaanite Dialects
Or
HEBR-BIB 705 Syriac I
HEBR-BIB 706 Syriac II
Or
HEBR-BIB 700 Advanced Near Eastern Languages (Akkadian I & II)
12 credits advanced text courses to include two of the following text-based sequences:
HEBR-BIB 743 Pentateuchal Narratives
HEBR-BIB 744 Pentateuchal Legal Codes
Or
HEBR-BIB 751 The Book of Isaiah
HEBR-BIB 752 The Book of Isaiah
Or
HEBR-BIB 753 Wisdom Literature: Proverbs and Qohelet
HEBR-BIB 755 Psalms
Or
HEBR-BIB 799 Independent Study (Samuel I & II)
3 credits in one of the following courses:
HEBR-BIB 723 Classical Hebrew Linguistics: Historical and Descriptive
Or
CLASSICS/JEWISH 451 Biblical Archaeology
Or
3 credits in one graduate level course in the department as approved by the Hebrew Bible director of graduate studies (this may be a 799 or, preferably, an approved course in Classics)
3 credits in one graduate level course in the department (this may be a 799 or, preferably, an approved course in Classics)
3 credits in a CANES Advanced Seminar:
CLASSICS 900 Advanced Seminar in Theory and Methodology
3 credits in one seminar in Hebrew Bible or in a second CANES Advanced Seminar with a different topic than the first
Total Credits 36

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program's policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions. Normally, 6 of these credits will be allocated to fulfilling the Intermediate Hebrew requirement (HEBR-BIB 323 Intermediate Biblical Hebrew, I - HEBR-BIB 324 Intermediate Biblical Hebrew, II).

UW-Madison Undergraduate
With program approval, no more than 6 credits from a UW–Madison undergraduate degree are allowed to count toward the degree by fulfilling the Intermediate Hebrew requirement (HEBR-BIB 323 Intermediate Biblical Hebrew, I - HEBR-BIB 324 Intermediate Biblical Hebrew, II).

UW-Madison University Special
With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison University Special student. Coursework earned five or more years prior to admission to a master's degree is not allowed to satisfy requirements. UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

All Hebrew Bible M.A. candidates will meet with the Director of Graduate Studies on a regular basis.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students...
completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
All applications received by January 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for university fellowships or scholarships, although you may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

FACULTY
For full faculty profiles, visit our website (https://canes.wisc.edu/our-faculty).

William Aylward: Greek and Roman archaeology
Jeffrey Beneker: Biography and historiography; Roman Republic
Jeffrey Blakely: Biblical and ancient Near Eastern archaeology
William Brockliss: Homer; Latin and Greek pedagogy
Alex Dressler: Ancient philosophy; gender and sexuality
Jeremy M. Hutton: Hebrew Bible; Northwest Semitics
Laura McClure: Greek literature; gender and reception studies
J C McKeown: Greek and Roman literature and culture
Grant Nelsestuen: Roman cultural history; Latin prose
Nandini Pandey: Latin poetry; Augustan culture
Vanessa Schmitz-Siebertz: Latin Instructor
Mike Vanden Heuvel: Theater and performance theory

AFFILIATE FACULTY
Nicholas Cahill: Ancient Greek archaeology and art history
Emily Fletcher: Ancient Greek philosophy
Paula Gottlieb: Ancient Greek philosophy; ethics
Daniel Kapust: Roman political thought; rhetoric; political theory
Marc Kleijwegt: Roman and Greek history
Leonora Neville: Roman Empire (the Byzantine Empire) in the 9th-12th centuries
Jordan Rosenblum: Rabbinic Judaism; biblical interpretation; food and religion
Claire Taylor: Greek socio-economic history; Athenian democracy; epigraphic culture

ACADEMIC STAFF
Bill Bach, Department Administrator

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES, PH.D.

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may follow one of two courses of study, classical languages and literatures (Classics), or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient near eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources online.

ADMISSIONS

Students apply to the Ph.D. in Classical and Ancient Near Eastern Studies through one of the named options:

Toni Landis, Advisor/Student Services Coordinator
FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every effort to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department’s intention to give the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department’s needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities for support outside the department at all stages of their study. Details can be found below.

TEACHING ASSISTANTSHIPS

Criteria: Teaching assistant appointments will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student’s qualification to teach scheduled courses, and availability of budgeted positions.

Eligibility: To be eligible to become a teaching assistant, graduate students should meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress toward an advanced degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding or considering a teaching assistantship. For information and scheduled tests, please consult the English as a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.

Class Assignments: Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, the need for graduate students to have a variety of teaching experiences, the preference of the TA, and the preference of the instructor.

Training Program: All TAs are required to attend the department’s annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department’s annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

Review: Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

Workload/Percentage of Appointment: Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

Stipend & Benefits: The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.
DEPARTMENTAL TRAVEL SUPPORT

Eligibility Guidelines: The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW-Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.

Application: Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowships Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.

Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

SCHOLARSHIPS & FELLOWSHIPS

Adams-Lemoine Dissertation Fellowship: This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published University award amounts and may supply funding for one or two semesters of study.

Frank R. Kramer Summer Fellowship: A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

Hieronimus Prize for Greek Composition: This monetary award is given in memory of Professor John Paul Hieronimus (Ph.D. ’31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

Pillinger Prize for Latin Composition: This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

OTHER FUNDING OPTIONS

The Graduate School provides additional information helpful to graduate students in need of funding.

Mode of Instruction Definitions

**Evening/Weekend:** These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online:** These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid:** These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated:** These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Eastern Studies must select one of the following named options: conferral. Students pursuing the Ph.D. in Classical and Ancient Near Eastern Studies must select one of the following named options: classics, Ph.D. (p. 342) and Hebrew Bible, Ph.D. (p. 348).

Policies

Graduate School Policies
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

Major-Specific Policies

Graduate Program Handbook
A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

Prior Coursework

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
See either the Ph.D. named option in Classics (p. 347) or Hebrew Bible (p. 352) for the policy information.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements. UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

Required Courses

Select a Named Option (p. 341) for courses required.

Named Options (Sub-Majors)
A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Ph.D. in Classical and Ancient Near Eastern Studies must select one of the following named options:

- Classical and Ancient Near Eastern Studies: Classics, Ph.D. (p. 342)
- Classical and Ancient Near Eastern Studies: Hebrew Bible, Ph.D. (p. 348)

Graduate Program Handbook

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

Prior Coursework

Graduate Work from Other Institutions
With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate
See either the Ph.D. named option in Classics (p. 347) or Hebrew Bible (p. 352) for the policy information.

UW–Madison University Special
With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements. UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

Probation
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place to remove of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).
ADVISOR / COMMITTEE
See either the Ph.D. named option in Classics (p. 347) or Hebrew Bible (p. 352) for the policy information.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
All applications received by Jan. 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for a university fellowships or scholarships, although you may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES
1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice in the field of Classics or Hebrew Bible.
2. Formulates ideas, concepts, and approaches beyond the current boundaries of knowledge within Classics or Hebrew Bible.
3. Creates research and scholarship that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions of Classics or Hebrew Bible to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.

PEOPLE

FACULTY
For full faculty profiles, visit our website (https://canes.wisc.edu/our-faculty).

William Aylward: Greek and Roman archaeology

Jeffrey Beneker: Biography and historiography; Roman Republic
Jeffrey Blakely: Biblical and ancient Near Eastern archaeology
William Brockliss: Homer; Latin and Greek pedagogy
Alex Dressler: Ancient philosophy; gender and sexuality
Jeremy M. Hutton: Hebrew Bible; Northwest Semitics
Laura McClure: Greek literature; gender and reception studies
J C McKeown: Greek and Roman literature and culture
Grant Nelsestuen: Roman cultural history; Latin prose
Nandini Pandey: Latin poetry; Augustan culture
Vanessa Schmitz-Siebertz: Latin Instructor
Mike Vanden Heuvel: Theater and performance theory

AFFILIATE FACULTY
Nicholas Cahill: Ancient Greek archaeology and art history
Emily Fletcher: Ancient Greek philosophy
Paula Gottlieb: Ancient Greek philosophy; ethics
Daniel Kapust: Roman political thought; rhetoric; political theory
Marc Kleijwegt: Roman and Greek history
Leonora Neville: Roman Empire (the Byzantine Empire) in the 9th-12th centuries
Jordan Rosenblum: Rabbinic Judaism; biblical interpretation; food and religion
Claire Taylor: Greek socio-economic history; Athenian democracy; epigraphic culture

EMERITUS FACULTY
Barry Powell
Ronald L. Troxel

ACADEMIC STAFF
Bill Bach, Department Administrator
Toni Landis, Advisor/Student Services Coordinator

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: CLASSICS, PH.D.

This is a named option within the Classical and Ancient Near Eastern Studies Ph.D. (p. 320)

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may follow one of two courses of study, classical languages and literatures (Classics), or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient near eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the
languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources available online.

**ADMISSIONS**

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table on the program’s website.

Graduate admissions is a two-step process between academic programs and the Graduate School. **Applicants must meet the minimum requirements** (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

In addition to University funds, there are limited scholarship funds available which are administered independently by the Department of Classical and Ancient Near Eastern Studies. All applications received in full by January 5 will be eligible for fellowship opportunities from the Graduate School. If application materials are received after the deadline, you will no longer be eligible for a University Fellowship, although you may be eligible for consideration for financial assistance through Department funds such as Teaching Assistantships, Project Assistantships, Research Assistantships, or Departmental Fellowships.

Please do not hesitate to contact us at info@canes.wisc.edu should you have any questions about the application process.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
### PROGRAM RESOURCES

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every attempt to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department's intention to give the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department's needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities for support outside the department at all stages of their study. Details can be found below.

### TEACHING ASSISTANTSHIPS

**Criteria:** Teaching assistantships will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student’s qualification to teach scheduled courses, and availability of budgeted positions.

**Eligibility:** To be eligible to become a teaching assistant, graduate students should ordinarily meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress towards an advanced degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.

**Class Assignments:** Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, the need for graduate students to have a variety of teaching experiences, the preference of the TA, and the preference of the instructor.

**Training Program:** All TAs are required to attend the department's annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department's annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number, of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

**Review:** Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

**Workload/Percentage of Appointment:** Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

**Stipend & Benefits:** The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.

### DEPARTMENTAL TRAVEL SUPPORT

**Eligibility Guidelines:** The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The
Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW–Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.

**Application:** Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowships Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.

Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

**SCHOLARSHIPS & FELLOWSHIPS**

**Adams-Lemoine Dissertation Fellowship:** This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published University award amounts. Award periods vary and funding may be available for one or two semesters of study.

**Moses S. Slaughter Fellowship:** This fellowship is awarded in memory of Moses S. Slaughter, University of Wisconsin Professor of Latin from 1906 to 1923. The Slaughter Fellowship is given to a current or incoming graduate student who maintains Wisconsin residency. It provides tuition remission, a stipend, and benefits in accordance with published University award amounts and may supply funding for one or two semesters of study.

**Frank R. Kramer Summer Fellowship:** A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

**Hieronimus Prize for Greek Composition:** This monetary award is given in memory of Professor John Paul Hieronimus (Ph.D. ‘31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

**Pillinger Prize for Latin Composition:** This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

**OTHER FUNDING OPTIONS**

The Graduate School provides additional information helpful to graduate students in need of funding.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

Assessments and Examinations

- Proficiency examination in Latin, Greek, and German
- Proficiency examination in Ancient History
- 4 Preliminary Examinations
  * Greek literature, Latin literature, Greek author, Latin author

Planning: Candidates should begin making arrangements for the preliminary examinations early in the program. Within a semester after passing the M.A., candidates should tentatively select special authors and make arrangements with the Director of Graduate Studies to supervise their course of study.

Executing: Preliminary examinations are offered during the academic year, near the end of the fall and spring semesters and are taken within two years of entering the Ph.D. program. The candidate should complete all the preliminary examinations in two to three consecutive semesters (all four examinations may be completed in the same semester, but is generally not recommended).

Language Requirements

The student must pass a sight-reading proficiency examination in Latin, Greek, and German. A sight-reading proficiency examination in French or Italian must also be passed before beginning work on the dissertation. Exams from the M.A. may be counted toward this requirement.

Doctoral Minor/Breadth Requirements

All doctoral students are required to complete a minor. Students may not complete a minor with the same name as their named option.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements. UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific
plan with dates and deadlines in place in regard to removal of probationary status).

3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE
Candidates for the Ph.D. should form a provisional dissertation committee the semester before they intend to complete their last preliminary exam and reach dissertation status. This committee should consist of at least four members representing more than one graduate program, three of whom must be UW–Madison graduate faculty or former UW–Madison graduate faculty up to one year after resignation or retirement. At least one of the four members must be from outside of the student’s major program or major field (often from the minor field).

During the first semester of dissertator status, candidates will schedule a dissertation proposal defense to discuss the proposal’s viability. Under the guidance of their dissertation advisor, candidates will provide all committee members with a detailed abstract of the proposed dissertation, including a synopsis of each chapter and a timeline for scheduled completion. After the provisional committee has approved the proposal, the candidate may begin writing in consultation with their committee.

CREDITS PER TERM ALLOWED
15 credits

TIME CONSTRAINTS
A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing the preliminary examination may by require to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
All applications received by January 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for university fellowships or scholarships, although they may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

FACULTY
For full faculty profiles, visit our website (https://canes.wisc.edu/our-faculty).

William Aylward: Greek and Roman archaeology
Jeffrey Beneker: Biography and historiography; Roman Republic
Jeffrey Blakely: Biblical and ancient Near Eastern archaeology
William Brockliss: Homer; Latin and Greek pedagogy
Alex Dressler: Ancient philosophy; gender and sexuality
Jeremy M. Hutton: Hebrew Bible; Northwest Semitics
Laura McClure: Greek literature; gender and reception studies
J C McKeown: Greek and Roman literature and culture
Grant Nelsestuen: Roman cultural history; Latin prose
Nandini Pandey: Latin poetry; Augustan culture
Vanessa Schmitz-Siebertz: Latin Instructor
Mike Vanden Heuvel: Theater and performance theory

AFFILIATE FACULTY
Nicholas Cahill: Ancient Greek archaeology and art history
Emily Fletcher: Ancient Greek philosophy
Paula Gottlieb: Ancient Greek philosophy; ethics
Daniel Kapust: Roman political thought; rhetoric; political theory
Marc Kleijwegt: Roman and Greek history
Leonora Neville: Roman Empire (the Byzantine Empire) in the 9th-12th centuries
Jordan Rosenblum: Rabbinic Judaism; biblical interpretation; food and religion
Claire Taylor: Greek socio-economic history; Athenian democracy; epigraphic culture

EMERITUS FACULTY
Barry Powell
Ronald L. Troxel

ACADEMIC STAFF
Bill Bach, Department Administrator
Toni Landis, Advisor/Student Services Coordinator

CLASSICAL AND ANCIENT NEAR EASTERN STUDIES: HEBREW BIBLE, PH.D.

Admissions to the Classical and Ancient Near Eastern Studies: Hebrew Bible, Ph.D. have been suspended as of spring 2019. If you have any questions, please contact the department.

This is a named option within the Classical and Ancient Near Eastern Studies Ph.D. (p. 320)

Soon after the founding of the University of Wisconsin in 1848, the department was created as one of the first academic units at the university. The Department of Classical and Ancient Near Eastern Studies (CANES) has enjoyed a long tradition of excellence in philological scholarship, literary criticism, archaeology, and ancient history. At the graduate level, the department offers the master of arts and doctor of philosophy in classical and ancient near eastern studies. Students may
follow one of two courses of study, classical languages and literatures (Classics), or Hebrew bible.

The primary goal of the program is to familiarize students with the core linguistic, historical, and philological aspects of classical and ancient Near Eastern studies. Students also learn to conduct original research in such varied areas as gender studies, literary theory, translation studies, and classical reception under the guidance of established scholars in these areas.

In addition to specified coursework, students participate in directed readings with individual faculty members in their areas of specialization and gain valuable professional experience teaching in courses on the languages, literature, and culture of the ancient world. Additional work may be done in allied fields such as archaeology, art history, linguistics, comparative literature, history, philosophy, and political science. Affiliated faculty in many of these fields regularly offer courses, supervise theses and dissertations, and participate in department activities.

A wide range of professional networks provides graduate students with enhanced opportunities for education and career development. In addition to faculty connections to scholars and institutions in their fields of study, the department has formal affiliations with the Society for Classical Studies, the Classical Association of the Middle West and South, the American School of Classical Studies in Athens, the Society of Biblical Literature, and the American Schools of Oriental Research.

The Pillinger Library and Mansoor Reading Room, both located within the department, provide convenient access to a large number of texts, while the larger Greek and Latin Reading Room in the Memorial Library contains an extensive, noncirculating research collection of texts and commentaries. The Memorial Library maintains an excellent research collection of books and periodicals in classics and Hebrew bible, with many of its resources available online.

ADMISSIONS

Admissions to the Classical and Ancient Near Eastern Studies: Hebrew Bible, Ph.D. have been suspended as of spring 2019. If you have any questions, please contact the department.

Applicants for graduate study may enter the program with either a B.A. or M.A. (M.A., M.Div., Th.M.) degree. For the Classics option, candidates are expected to have covered at least the equivalent of an undergraduate major in Classics, which consists of at least three years of both Greek and Latin. For the option in Hebrew Bible program, candidates are expected to have taken at least two years of Biblical Hebrew and one year of Greek. Candidates whose preparation falls short of the minimum requirements may be admitted with deficiencies at the discretion of the department, but will be required to do additional work within the first year of the program.

Applications are evaluated on the basis of previous academic record, Graduate Record Exam (GRE) scores, letters of recommendation, the writing sample and a personal statement.

All applicants to the program must apply on-line (https://apply.grad.wisc.edu/Account/Login?ReturnUrl=%2F) by January 5. ONLY select the M.A. application if you plan on a terminal M.A. at UW-Madison; all other applicants select the Ph.D. application even if you have not yet received an M.A. Please note: the $75 application fee must be paid at the time of application (international students will be charged an additional $6 for processing).

As part of the online application process, you will be asked supplemental questions regarding your level of language preparation and expected to upload the information listed below:

1. Writing sample of scholarly work no more than 25 pages (optional).
2. Transcripts or academic records from each institution attended. You may upload unofficial copies for department review. International academic records must be in the original language accompanied by an official English translation. Please note: official transcripts will only be requested by the Graduate School upon department recommendation for admission. Further information will be provided upon admission.
3. Official Graduate Record Examination (GRE) (http://www.gre.org) score report sent from the Educational Testing Service (ETS). Use institution code 1846 to route your results to the UW Grad School. Once results are received, they will populate in your online application.
4. TOEFL or MELAB (https://grad.wisc.edu/admissions/requirements) for all international applicants.
5. Statement of purpose (citing your reasons for graduate study).
6. Curriculum vitae listing language experience, awards, honors, etc.
7. Three letters of reference. You must submit your requests to all three of your references as part of the online application. Recommenders will receive a notice via email and will submit their letters accordingly.

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The Department of Classical and Ancient Near Eastern Studies works to support all graduate students in good standing who continue to make satisfactory progress toward their degree. The department makes every attempt to distribute its resources as fairly as possible outside of guaranteed support offers. Thus, it is the department's intention to give the maximum number of graduate students in the Classics and Hebrew Bible programs an opportunity to hold teaching assistantships (TA) consistent with the department's needs and criteria. It should be remembered that teaching funds are variable, depending on budget and class enrollments. All students are encouraged to pursue opportunities
for support outside the department at all stages of their study. Details can be found below.

**TEACHING ASSISTANTSHIPS**

**Criteria:** Teaching assistant appointments will be offered to eligible graduate students on the basis of the following criteria: contractual obligations made to the student, satisfactory progress towards degree, satisfactory student evaluations and faculty teaching observations, departmental judgment of the student’s qualification to teach scheduled courses, and availability of budgeted positions.

**Eligibility:** To be eligible to become a teaching assistant, graduate students should ordinarily meet the following requirements: students should be enrolled in the Classics or Hebrew Bible graduate program (exceptions will be made due to lack of qualified or available students), students should be making satisfactory progress towards an advanced degree, and students should not have exceeded the limited allotment of teaching within the department (five years after the B.A. or three years after the M.A.).

Students who are non-native speakers of English must complete the SPEAK test for assessing English proficiency. The SPEAK test is the institutional version of the Test of Spoken English (TSE), which is administered by the Educational Testing Service. The SPEAK test measures oral proficiency and is frequently used to evaluate the spoken English of international TAs. The test is available only to students holding or under consideration for a teaching assistantship. For information and scheduled tests, please consult the English as a Second Language website (http://www.english.wisc.edu/esl). Students must achieve a score of 45 or higher before being placed in the classroom.

**Class Assignments:** Class assignments are made by the department chair in consultation with department faculty with consideration of the following items in order of importance: previous positive assessment of teaching ability, fair rotation of teaching among qualified graduate students, background and experience of the TA in course materials, the need for graduate students to have a variety of teaching experiences, the preference of the TA, and the preference of the instructor.

**Training Program:** All TAs are required to attend the department’s annual Graduate Student Orientation and Teaching Assistant Workshop. Subjects discussed in the department’s annual workshop include preparation, organization, sensitivity to ethnic and gender issues, and pedagogical methods. Experienced TAs are encouraged to share successful teaching methods and ideas with the group in an open discussion. Information is also provided on such university resources as the Writing Center.

New TAs are also required to attend the L&S Teaching Assistant Workshop and the Graduate Assistants Equity Workshop within the first two semesters of teaching appointments. In addition, for TAs with a first-time Comm B appointment, the Writing Across Campus Comm B Training workshop will also be required. TAs are also encouraged to take advantage of the writing workshops offered by the Writing Center at the start of the academic year and throughout each semester.

For each course, the TA must meet with the professor to outline the goals and objectives of the course, the exam and grading procedures, the syllabus and assigned readings, and specific pedagogical methods appropriate for the course. The syllabus of each course should include the name, office number, and phone number, of the supervising professor, the TA, and the current department chair. Should there be concerns about the course that the TA feels unable to address, he or she can refer students to the professor in charge of the course for initial consultation. Regular meetings between the TA and the professor are held throughout the semester to discuss the progress and success of the course.

**Review:** Within the first few weeks of class, the supervising professor will observe the TA, with new TAs being a priority. After the visit, the professor will discuss the strengths and weaknesses of the class and put forward a set of recommendations for further teaching development. A written evaluation, to be discussed in person, is then provided to the department chair and will be placed in the student’s file. If the chair deems necessary, a second faculty member will make an additional classroom observation with a written evaluation. At the end of each semester or course, student evaluations for the TA classes are to be completed and kept on file in the department for future reference.

**Workload/Percentage of Appointment:** Teaching assistantship appointments are percentage based. The percentage of appointment is based on the total expected hours of work throughout the course of the semester. For example, a 33% TA would be expected to work a total of 240 hours over the semester, which is roughly 13 hours per week. The CANES department has teaching appointments that range from 33.4% to 50% time depending on the course assigned.

Each TA will receive a breakdown of expected workload with their official appointment letter. The TA is expected to review and discuss the workload with the supervising faculty member of the course. By signing and returning the workload to the department administrator, the TA is accepting his or her appointment for the semester.

**Stipend & Benefits:** The current pay rate for a full-time beginning TA is about $31,300 per year. The approximate stipend for a 33.4% position is roughly $5225 per semester.

All graduate assistantships at or above 33.4% include full tuition remission, a full array of benefits including health insurance, and office space within the department. Spring teaching appointments also carry summer tuition remission.

**DEPARTMENTAL TRAVEL SUPPORT**

**Eligibility Guidelines:** The CANES department can provide some funding for Classics students who are presenting a paper addressing a topic in the classics field or interviewing for hire. Applicable conferences include the ASA and CAMWS, but other conferences such as graduate student colloquia will also be considered. First time recipients of this award may be asked to present a departmental Pillinger Talk in preparation for their conference presentation.

All applications for department travel must be supported by satisfactory progress in the student’s program. Graduate students may submit one request for travel support to the department per academic year. Every attempt will be made to fund student travel up to a maximum of $750. Students should recognize that funding is based on availability. The Fellowships Committee will assess the validity of all applications and determine the amount of each individual award if granted.

Before requesting travel funds from the department, graduate students should conduct due diligence to learn about and apply for travel awards offered by other units (Graduate School, ASM, etc.) at UW–Madison and by sponsors of the event for which travel funds are requested. Evidence of awards applied for and/or received should accompany all requests for department travel funding. Being competitive for awards outside the department is a matter of professional development.
**Application:** Having applied for travel awards and supplements from external sources, students should then petition the CANES department for travel support. All petitions are considered on a case by case basis and evaluated on the basis of academic merit and satisfactory progress in the graduate program.

Petitions should take form of a letter addressed to the chair of the graduate Fellowship Committee detailing the title of the talk, proof of acceptance, the date and place of the conference, and any other relevant information. All petitions should include a budget and should disclose details of awards or denial of funding from other sources.

Awards from other sources will not necessarily disqualify students from classics department funding. The applications will be read and voted on by the committee which will attempt to respond to requests in a timely fashion. The student will be notified in writing by the chair of the committee normally within a few weeks of the submission of application.

Since applications will be read on a rolling basis and funds are usually more plentiful at the beginning of the year, students are encouraged to apply early.

**SCHOLARSHIPS & FELLOWSHIPS**

**Adams-Lemoine Dissertation Fellowship:** This fellowship is awarded in memory of C.K. Adams, Professor of Latin & History and University of Wisconsin President from 1892 to 1902, and Fannie Lemoine, Professor of Latin from 1906 to 1923. The Adams-Lemoine Fellowship is utilized for student recruitment or completion of degree. It provides tuition remission, a stipend, and benefits in accordance with published University award amounts. Award periods vary and funding may be available for one or two semesters of study.

**Moses S. Slaughter Fellowship:** This fellowship is awarded in memory of Moses S. Slaughter, University of Wisconsin Professor of Latin from 1906 to 1923. The Slaughter Fellowship is given to a current or incoming graduate student who maintains Wisconsin residency. It provides tuition remission, a stipend, and benefits in accordance with published university award amounts. Award periods vary and funding may be available for one or two semesters of study.

**Frank R. Kramer Summer Fellowship:** A predoctoral summer research grant awarded in memory of Dr. Frank R. Kramer, who earned a B.A. in Humanities in 1929, an M.A. in Greek & Latin in 1931, and a Ph.D. in Classics in 1936. The Kramer Fellowship is meant to enable graduate students in their second year of study or above (pre-dissertation) to receive support for research connected to the advancement of their studies in Classics. Calls for applications typically come out in December and recipients are notified in late January. Award totals range between $750-$2,000.

**Hieronymous Prize for Greek Composition:** This monetary award is given in memory of Professor John Paul Hieronymous (Ph.D. ’31). Entrants are asked to translate a selected passage into ancient Greek or compose an original piece in ancient Greek addressing a specific topic. Awards are given in late spring.

**Pillinger Prize for Latin Composition:** This monetary award is given in memory of Assistant Professor Hugh Edward Pillinger (1965–70). Entrants are asked to translate a selected passage into Latin or compose an original piece in Latin addressing a specific topic. Awards are given in late spring.

**OTHER FUNDING OPTIONS**

The Graduate School provides additional information helpful to graduate students in need of funding.

<td>No</td>
</tr>
</tbody>
</table>

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

CURRICULAR REQUIREMENTS

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Requirement</th>
<th>Residence Credit Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum</td>
<td>72 credits</td>
<td>36 credits</td>
</tr>
</tbody>
</table>

Overall Graduate GPA Requirement

3.00 GPA required.

Other Grade Requirements

The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations

- Reading competency in German and French or Modern Hebrew (by exam)
- Proficiency in Biblical Hebrew by exam, to include:
  - Translation of passages, together with textual and philological notes, and consultation of the Septuagint, Targum, and Peshitta.
  - Grammatical parsing, pointing of unpointed texts, production of forms.
  - Discussion of Biblical Hebrew in its Semitic context, translation of Hebrew epigraphic texts (in Paleo-Hebrew script), together with discussion of problems they present.
- Proficiency in Semitic languages by exam, to include:
  - Translation of texts written in Canaanite dialects, Ugaritic, Aramaic, Syriac, and Akkadian. Some of these texts will be read in Semitics courses; other texts must be prepared independently.
- General Exam, based on reading list and coursework

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.
Language Requirements

Students must demonstrate reading competency in German and either French or Modern Hebrew. Students must demonstrate proficiency in Hebrew and Semitic languages by exam.

Doctoral Minor/Breadth Requirements

All doctoral students are required to complete a minor. Students may not complete a minor with the same name as their named option.

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate course work from other institutions. Coursework earned five or more years prior to admission to a master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, no more than 6 credits from a UW–Madison undergraduate degree are allowed to count toward the degree by fulfilling the Intermediate Hebrew requirement (HEBR-BIB 323 Intermediate Biblical Hebrew, I-HEBR-BIB 324 Intermediate Biblical Hebrew, II).

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of course work numbered 300 or above taken as a UW–Madison University Special student. Coursework earned ten or more years prior to admission to a doctoral degree is not allowed to satisfy requirements. UW–Madison coursework taken as a University Special student would not be allowed to count toward the 50% graduate coursework minimum unless taken at the 700 level or above.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).
ADVISOR / COMMITTEE

Candidates for the Ph.D. should form a provisional dissertation committee the semester before they intend to complete their last preliminary exam and reach dissertator status. This committee should consist of a dissertation advisor and at least two additional faculty advisors. During the first semester of dissertator status, candidates will schedule a dissertation proposal defense to discuss the proposal’s viability. Under the guidance of their dissertation advisor, candidates will provide all committee members with a detailed abstract of the proposed dissertation, including a synopsis of each chapter and a timeline for scheduled completion. After the provisional committee has approved the proposal, the candidate may begin writing in consultation with their committee.

The final composition of the dissertation committee must have at least four members representing more than one graduate program, three of whom must be UW–Madison graduate faculty or former UW–Madison graduate faculty up to one year after resignation or retirement. At least one of the four members must be from outside of the student’s major program or major field (often from the minor field). Once the dissertation has been completed and approved by the dissertation advisor, the candidate will distribute the final document to all committee members at least four weeks before the anticipated defense date. If the committee supports the dissertation, the advisor will set a date for the oral defense. Dissertation defenses will be scheduled for the academic year only. Graduate students may not hold a dissertation fellowship in any semester following the semester of their defense, regardless of whether or not they have filed their thesis for graduation.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

All applications received by January 5 are eligible for fellowship, scholarship, and graduate assistantship opportunities. For applications received after the deadline, applicants will not be eligible for university fellowships or scholarships, although you may be eligible for department funds such as teaching assistantships, project assistantships, research assistantships, or department fellowship.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

FACULTY

For full faculty profiles, visit our website (https://canes.wisc.edu/our-faculty).

William Aylward: Greek and Roman archaeology
Jeffrey Beneke: Biography and historiography; Roman Republic
Jeffrey Blakely: Biblical and ancient Near Eastern archaeology
William Brockliess: Homer; Latin and Greek pedagogy
Alex Dressler: Ancient philosophy; gender and sexuality
Jeremy M. Hutton: Hebrew Bible; Northwest Semitics

Communication Arts, Doctoral Minor

Graduate students from other departments may pursue a doctoral minor in Communication Arts in one of four distinct areas of study: Communication Science; Film; Media and Cultural Studies; and Rhetoric, Politics, and Culture. Students should reach out to a faculty member in their chosen area of minor study for guidance in course selection. This faculty member then serves as the student’s advisor in the minor, and
COMMUNICATION ARTS offers four distinct areas of graduate study:

- Communication science
- Film
- Media and cultural studies
- Media and cultural studies

The study of film concentrates primarily on motion picture history, theory, and criticism, approached through intensive critical analysis of individual films; research into the primary documents of filmmakers and the film industry; and the construction of theoretical models of films forms and styles, national cinemas, film genres, and the economics of the film industry. The program believes in the connection between film studies and film practice. Courses in film production enhance our understanding of motion picture history, theory, and criticism by revealing the practical decisions filmmakers confront. The program is not designed for students whose sole interest is in film production.

The media and cultural studies (MCS) program emphasizes the study of media in their historical, economic, social, and political context. MCS courses examine the cultural forms created and disseminated by media industries and the ways in which they resonate in everyday life, on the individual, national, and global level. Focusing primarily on sound and screen media—television, new media, film, popular music, radio, video games—but reaching out across boundaries, MCS encourages interdisciplinary and transmedia research. MCS courses draw on a broad range of cultural theories spanning a spectrum of concerns all centrally relevant to the functioning of sound and screen media in a diverse and globalizing cultural environment.
RHETORIC, POLITICS, AND CULTURE

Whether speaking from the podium or chatting on Facebook, people use discourse to craft identities, enact social change, and form a shared sense of community. Seeking to better understand this social force, the study of discourse explores significant themes, trajectories, and transformations in politics and society while considering particular individuals and groups, cultures, eras, genres, and topics. Courses in this area explore issues of power, digital media, citizenship, gender, sexuality, race, ethnicity, globalization, religion, inclusion and exclusion, social status, and marginalization.

Graduate work in rhetoric focuses on three interrelated areas: discourse, theory, and method. All three areas of study in rhetoric, politics, and culture are united by a common commitment to understanding the role of discourse in society as we act together to engage in culture and politics. Students are encouraged to investigate a wide range of discursive phenomena as they develop expertise that will empower them to conduct significant research and to take an active role in scholarly communities.

Our graduate program considers students for fall semester admission only.

Applications are due December 15.

Applicants must have earned a bachelor’s degree from an accredited institution. The Graduate School minimum GPA is 3.0 on a 4.0 scale. The department likes to see at least a 3.25 in courses relevant to the area in which you apply, although successful applicants usually have much higher GPAs.

Within the department, students may apply to only one track of study, which must be indicated on the statement of purpose: Communication Science, Film, Media and Cultural Studies; or Rhetoric, Politics, and Culture.

There are five supporting documents which complete the application:

1. Statement of purpose clearly telling us what you want to study and why you think you can do it here. Although it cannot be said to be the most important part of your application, the statement of purpose is our introduction to you as a student and as such, you will want it to be as professional and persuasive as possible to put your application in the best light.

2. Three letters of recommendation, preferably from academic sources. Email addresses of recommenders are submitted within the online application.

3. Official GRE score sent to us from ETS. The department requires no minimum GRE scores; however, successful candidates typically score well on portions of the examination related to their area of study. We don’t set absolute numbers because each year’s applicants are judged against all others in that year only. UW–Madison is institution #1846; no department code is necessary.

4. PDFs of transcripts from all postsecondary schools attended after high school. Official transcripts will be requested upon admission.

5. A writing sample (in English), 15–20 pages long. The best writing sample is an academic paper you wrote for a class related to the area in which you apply. It should have citations and footnotes. You may send a portion of a longer thesis if you wish, but please select a representative sample no longer than 20 pages. Include a cover page identifying it as a chapter or section of a longer work.

INTERNATIONAL APPLICANTS: An official TOEFL, IELTS or MELAB score sent to us from ETS is required for all applicants whose native language is not English. UW–Madison is institution #1846; no department code is necessary. The minimum scores are as follows:

- TOEFL: 92 on an internet-based exam; 580 on a paper-based exam
- IELTS: 7
- MELAB: 82

We will waive the TOEFL requirement if you have a bachelor’s degree from an English-speaking institution.

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from
the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**PROGRAM RESOURCES**

(Program note: Though terminal M.A. degrees may occasionally be awarded, the programs are designed with successful completion of the Ph.D. as the goal.)

Beginning graduate students in communication arts receive 10 consecutive semesters of guaranteed funding if they are entering with a bachelor’s degree, complete their master’s degree, and plan to continue on to the Ph.D. The guaranteed funding package for graduate students includes full tuition remission, monthly compensation, and benefits including health insurance.

Most communication arts graduate students are supported by teaching assistantships (TA). Additional funding comes in the form of research assistantships (RA), project assistantships (PA), Graduate School–supported fellowships, departmental awards, and conference travel awards.

**Graduate Assistantships**

Graduate students who hold an appointment as a TA, RA, or PA will be entitled to remission of tuition in any semester in which their appointment equals at least 33.4% of a full-time appointment for the semester. Graduate assistantships in communication arts are typically offered at the 50% level, which is a full-time appointment for a full-time student.

**Graduate School–Supported Fellowships**

A limited number of fellowships are available. All students are considered for fellowships at the time of application; no separate application is necessary. These fellowships may be for terms from one semester to two years and include tuition remission and benefits including health insurance.

**Department Awards**

The Department of Communication Arts is pleased to be able to grant yearly monetary awards to graduate students based on scholastic performance. Nominations for the awards are generated by the faculty in the four areas of graduate study. To be eligible for consideration, graduate students must be continuing in the program, must be making satisfactory progress toward their degree, and must not have any incompletes on their transcript. The amount and number of awards vary from year to year depending on funds available.

**Conference Travel Awards**

The department provides a once-per-academic-year travel stipend for students to present academic papers at a conference. Students not residing in Madison during the semester in which they present at conference are not eligible for this funding.

## REQUIREMENTS

### MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.
these credit hours must be received in courses specifically designed for graduate work, which the Graduate School defines as:

- courses numbered 700 and above;
- courses numbered 300–699 that are specifically designed for graduate students in a graduate program;
- courses numbered 300–699 that assess graduate students separately from undergraduate students;
- courses numbered 300–699 that have a graduate student enrollment greater than 50 percent in a given semester.

The department requires that a minimum of 16 credit hours must be completed in residence.

Each area of graduate study has further specific requirements for the completion of the M.A.:

### Communication Science Track

<table>
<thead>

<tr>
<td>Two 900-level seminars</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COM ARTS 902</td>
<td>Film Colloquium</td>
<td>1</td>
</tr>
</tbody>
</table>

1. These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.
2. Some required courses may be waived if the student already has taken equivalent courses. A determination about waiving courses is made by a student’s advisor after reviewing syllabi and other relevant materials. Students who enter the program without an undergraduate degree in film may be required to take additional coursework.
GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://commarts.wisc.edu/sites/default/files/files/2017/10/05/comm-arts-grad-handbook-2017-10-05.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a Master’s degree is not allowed to satisfy requirements.

UW–Madison Undergraduate

With program approval, students are allowed to count no more than 7 credits of graduate coursework taken as a UW–Madison undergraduate student. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

UW–Madison University Special

With program approval, students are allowed to count no more than 15 credits of graduate coursework taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

All graduate students must stay “in good standing” in the department to be eligible for teaching assignments, awards, and fellowships, and in order to be considered to be making satisfactory progress in the program. Students whose progress is rated unsatisfactory by their faculty may face loss of funding and/or dismissal from the program.

The department’s minimum criteria for good standing are:

1. Timely progress through the program, consisting of successful completion of M.A. requirements and compliance with coursework, advising, and thesis/comprehensive exam expectations.
2. A cumulative grade point average for coursework within the department of 3.5 or above.
3. No grades of Incomplete on the student’s record.
4. Fulfillment of responsibilities for teaching/project assistantships or lectureships.

Students are expected to carry a full load, defined as three courses (nine credits) plus colloquium (one credit) per semester, unless a student’s advisor recommends an exception.

ADVISOR / COMMITTEE

Although an initial faculty advisor is assigned to each student during the summer prior to matriculation in the graduate program, students should seek out regular advisors by the end of their first year in residence. The regular advisor should be a faculty member whose research interests and methodological expertise match closely to those that the student intends to acquire. While no faculty member is obliged to accept a student’s request to serve as advisor, invitations are usually accepted except where the faculty member judges that a different advisor would serve the student’s needs and interests better.

Early in the semester in which the comprehensive exam/thesis will be completed, students will form an M.A. defense committee consisting of three to four faculty members, one of which is their
advisor. In the case of comprehensive examinations, all committee members will write exam questions, read the answers, and sit on the M.A. defense. In the case of a thesis, all committee members will read the manuscript and sit on the M.A. defense.

**CREDITS PER TERM ALLOWED**

10-credit maximum unless additional credits are approved by faculty advisor, up to 15

**TIME CONSTRAINTS**

Master’s degrees are generally expected to be completed within five semesters of matriculation.

**OTHER**

Incoming M.A. students are generally offered five academic years (fall semester and spring semester) of support in the form of teaching assistantships, project assistantships, and fellowships. Incoming Ph.D. students are generally offered three years of support. This support includes a stipend, tuition remission, and benefits.

---

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PROGRAM RESOURCES**

Graduate students should consider opportunities for professional development as they begin their programs of graduate study. As students plan programs of study, participation in campus and disciplinary organizations, scholarly presentations at academic conferences, and potential outlets for publication of research, they should consider the ways that these activities begin to establish areas of scholarly and pedagogical competence, connections with other researchers and teachers in the field, and audiences for their scholarship. Some of the best resources for professional development are the people—both faculty and other graduate students—in the Department of Communication Arts. These people may serve as sources of valuable advice and information, and their actions may provide examples of practices that promote professional development. Further, campus-wide resources are available to enrich students’ graduate studies and enhance their professional skills.

**DEPARTMENT RESOURCES FOR PROFESSIONAL DEVELOPMENT**

Two important departmental resources for professional development are a graduate student’s advisor and the department colloquia.

The advisor is concerned with a graduate student’s academic progress as well as with the professional development of advisees. Throughout a graduate student’s residence in the program (and often beyond), an advisor will discuss and answer questions and concerns about professional development. For instance, as submission deadlines to academic conferences approach, an advisor may discuss with a student potential submission options and the appropriate venues for these submissions. If a student is working on revising a seminar paper for potential publication in an academic journal, an advisor will often guide the student through the revision process. When a student is applying for jobs, an advisor will often edit application materials. When a student is interviewing for a position or negotiating a job offer, an advisor will often provide tips for how to proceed.

The department colloquia offers additional resources for professional development. The four areas of study (Communication Science, Film; Media and Cultural Studies; and Rhetoric, Politics, and Culture) hold individual and joint colloquia on most Thursday afternoons during the academic year. Often, these colloquia are devoted to research presentations from department faculty and graduate students as well as campus visitors. Sometimes, the colloquia will address issues of professional development. Colloquia topics on professional development include practicing conference presentations; preparing a teaching dossier; practicing job talks; negotiating the revise and resubmit process in journal publishing; and networking. Colloquia on professional development engage graduate students in discussion on professional topics, workshop materials, and offer advice on best practices.

**FACULTY REVIEWS OF GRADUATE STUDENT TEACHING**

Since most Communication Arts Ph.D. students pursue academic careers, developing teaching skills constitutes an important aspect of professionalization. Some colleges and universities may ask a student to prepare a teaching demonstration as part of the on-campus interview process, or otherwise seek evaluation and evidence of a graduate student’s teaching abilities. To facilitate the development of graduate student teaching, faculty will provide reviews of teaching assistants (TA) in courses in which they have worked directly with graduate students in the classroom. Graduate students should expect these reviews in every semester in which they serve as a TA in one of these faculty-led courses (e.g., a lecture-discussion section course taught by a faculty member). These reviews are intended to help students identify strengths in their teaching as well as areas in which they may improve. In relevant courses, faculty will deposit an electronic copy of a teaching review with the graduate coordinator no more than two weeks after a semester has concluded. The graduate coordinator will maintain files of teaching reviews for each graduate student in the department. The graduate coordinator will send a copy of the review to the student’s advisor. Faculty also will share a copy of the review with the student reviewed, who may wish to incorporate favorable reviews and quotations into a teaching dossier. Graduate students should feel welcome to discuss all reviews with their supervising faculty members. Graduate students should note, too, that these reviews will assist faculty in addressing matters of pedagogy when preparing letters of recommendation for academic employment, which will benefit students in their job searches.

**TRAVEL TO MEETINGS AND CONFERENCES**

The Department of Communication Arts provides a once-per-academic-year travel stipend for those students who will be presenting a paper at an academic conference. Students who are not residing in Madison during the semester in which they present at conference are not eligible for this funding.

**INSTRUCTIONAL MEDIA CENTER**

Located on the third floor of Vilas Hall, the Instructional Media Center (IMC) provides media and technology services for the entire department. The IMC houses the Hamel Family Digital Media Lab, the Walter Mirisch Seminar Room, and Communication Arts media production classrooms. The IMC circulates laptops, video projectors, and other equipment to graduate students for instruction and short-term use. The IMC also maintains a media library containing thousands of DVDs and blu-rays of films, television shows, video games, and off-air recordings. Graduate students may check out any item not reserved for classroom use for
their research. IMC staff can assist graduate students with their research needs. Upon request, the IMC can provide film to video transfers, media creation (files, DVDs, blu-rays), video capture, as well as training in these areas. The IMC provides assistance for the Center for Communication Research. The IMC is staffed by individuals with a wide range of media knowledge and skills to assist graduate students.

LEARNING OUTCOMES

1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry or schools of practice in the field of study.
2. Identifies sources and assembles evidence pertaining to questions or challenges in the field of study.
3. Demonstrates understanding of the primary field of study in a historical, social, or global context.
4. Selects and/or utilizes the most appropriate methodologies and practices.
5. Evaluates or synthesizes information pertaining to questions or challenges in the field of study.
6. Communicates clearly in ways appropriate to the field of study.
7. Recognizes and applies principles of ethical and professional conduct.

FACULTY

Professors Kelley Conway (chair), Robert Asen, Jonathan Gray, Robert Glenn Howard, Lea Jacobs, Marie-Louise Mares, Zhongdang Pan, Jeff Smith, Lyn Van Swol, and Michael Xenos

Associate Professors Maria Belodubrovskaya, Eric Hoyt, Derek Johnson, Jenell Johnson, Lori Lopez, Sara McKinnon, Jeremy Morris, Ben Singer, and Catalina Toma

COMMUNICATION ARTS, PH.D.

The Department of Communication Arts at the University of Wisconsin in Madison has long been one of the world’s leading centers for study and research in communication. It was the first department in the United States to award a Ph.D. degree in the field, and its graduates serve on the faculties of leading universities, in research institutions, and in public and private agencies throughout this country and abroad.

The graduate programs in communication arts are designed to educate research scholars. Through intensive coursework within the department and in other departments, and through close professional association with appropriate faculty, graduate students in communication arts gain proficiency and sophistication in their chosen areas of study. Their attainment of doctoral degrees signifies their readiness to work as independent scholars in their areas and to make original contributions to human knowledge.

Communication Arts offers four distinct areas of graduate study:

COMMUNICATION SCIENCE

Communication science is concerned with how people interact with one another in various means, modes, and contexts. It involves social scientific exploration utilizing both quantitative and qualitative methods. Reflecting the multi-faceted nature of the subject matter and a cross-disciplinary orientation of the field, students in communication science typically complete course work both in the department and in other social science fields. Graduate study in communication science is flexible and tailored to the individual. With a low faculty to student ratio and close collaboration with related academic units on campus, students have high access to faculty and with it, opportunities to work closely with faculty on research and broaden their horizon. Students are expected to develop fluency in at least two of the following areas:

- **Social influence** that focuses interpersonal interactions, both online and offline, as well as group and organizational dynamics. It examines information exchange, persuasion, and other influence processes in various social contexts.
- **Computer-mediated communication** that examines individuals’ uses of the media with digital, interactive, and networking features, as well as the effects of such usage on self, relationships, group dynamics, and other social processes.
- **Human development and communication** that addresses communication in relation to life cycle, focusing in particular on life cycle patterns in the means and modes of communication, as well as the effects of communicative engagement and media usage of youths and aging.
- **Political communication** that focuses on patterns and effects of communication, both face-to-face and mediated, on the democratic process. In particular it concerns how communication shapes the public sphere, how public deliberation over political issues takes place, and how the media may be related to civic and political engagement.

FILM

The study of film concentrates primarily on motion picture history, theory, and criticism, approached through intensive critical analysis of individual films; research into the primary documents of filmmakers and the film industry; and the construction of theoretical models of films forms and styles, national cinemas, film genres, and the economics of the film industry. The program believes in the connection between film studies and film practice. Courses in film production enhance our understanding of motion picture history, theory, and criticism by revealing the practical decisions filmmakers confront. The program is not designed for students whose sole interest is in film production.

MEDIA AND CULTURAL STUDIES

The media and cultural studies (MCS) program emphasizes the study of media in their historical, economic, social, and political context. MCS courses examine the cultural forms created and disseminated by media industries and the ways in which they resonate in everyday life, on the individual, national, and global level. Focusing primarily on sound and screen media—television, new media, film, popular music, radio, video games—but reaching out across boundaries, MCS encourages interdisciplinary and transmedia research. MCS courses draw on a broad range of cultural theories spanning a spectrum of concerns all centrally relevant to the functioning of sound and screen media in a diverse and globalizing cultural environment.

RHEOTORIC, POLITICS, AND CULTURE

Whether speaking from the podium or chatting on Facebook, people use discourse to craft identities, enact social change, and form a shared sense of community. Seeking to better understand this social force, the study of discourse explores significant themes, trajectories, and transformations in politics and society while considering particular...
individuals and groups, cultures, eras, genres, and topics. Courses in this area explore issues of power, digital media, citizenship, gender, sexuality, race, ethnicity, globalization, religion, inclusion and exclusion, social status, and marginalization.

Graduate work in rhetoric focuses on three interrelated areas: discourse, theory, and method. All three areas of study in rhetoric, politics, and culture are united by a common commitment to understanding the role of discourse in society as we act together to engage in culture and politics. Students are encouraged to investigate a wide range of discursive phenomena as they develop expertise that will empower them to conduct significant research and to take an active role in scholarly communities.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Applicants choose their area of study when applying to the program; however, the specific area of study will not appear on the transcript.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website.

Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</tr>
<tr>
<td>English Proficiency Test</td>
<td>Every applicant whose native language is not English or whose undergraduate instruction was not in English must provide an English proficiency test score and meet the Graduate School minimum requirements (<a href="https://grad.wisc.edu/apply/requirements/#english-proficiency">https://grad.wisc.edu/apply/requirements/#english-proficiency</a>).</td>
</tr>
<tr>
<td>Other Test(s) (e.g., GMAT, MCAT)</td>
<td>n/a</td>
</tr>
<tr>
<td>Letters of Recommendation Required</td>
<td>3</td>
</tr>
</tbody>
</table>

Our graduate program considers students for fall semester admission only.

Applications are due December 15.

Applicants must have earned a master’s degree from an accredited institution. The Graduate School minimum GPA is 3.0 on a 4.0 scale. The department likes to see at least a 3.25 in courses relevant to the area in which you apply, although successful applicants usually have much higher GPAs.

Within the department, students may apply to only one track of study, which must be indicated on the statement of purpose: Communication Science; Film; Media and Cultural Studies; or Rhetoric, Politics, and Culture.

There are five supporting documents which complete the application:

1. Statement of purpose clearly telling us what you want to study and why you think you can do it here. Although it cannot be said to be the most important part of your application, the statement of purpose is our introduction to you as a student and as such, you will want it to be as professional and persuasive as possible to put your application in the best light.
2. Three letters of recommendation, preferably from academic sources. Email addresses of recommenders are submitted within the online application.
3. Official GRE results sent to us from ETS. The department requires no minimum GRE scores; however, successful candidates typically score well on portions of the examination related to their area of study. We don’t set absolute numbers because each year’s applicants are judged against all others in that year only. UW-Madison is institution #1846; no department code is necessary.
4. PDFs of transcripts from all post-secondary schools attended after high school. Official transcripts will be requested upon admission.
5. A writing sample (in English), 15-20 pages long. The best writing sample is an academic paper you wrote for a class related to the area in which you apply. It should have citations and footnotes. You may send a portion of a longer thesis if you wish, but please select a representative sample no longer than 20 pages. Include a cover page identifying it as a chapter or section of a longer work.

INTERNATIONAL APPLICANTS: An official TOEFL, IELTS or MELAB score sent to us from ETS is required for all applicants whose native language is not English. UW-Madison is institution #1846; no department code is necessary. The minimum scores are as follows:

- TOEFL: 92 on an internet-based exam; 580 on a paper-based exam
- IELTS: 7
- MELAB: 82

We will waive the TOEFL requirement if you have a master's degree from an English-speaking institution.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Beginning Ph.D. students in Communication Arts receive six consecutive semesters of guaranteed funding if they are entering with an M.A. in their area of focus. Students who enter with an M.A. outside of their area of focus may be required to complete an M.A. in their area of focus prior to continuing on to the Ph.D. In these cases, students receive 10 consecutive semesters of guaranteed support. The guaranteed funding package for graduate students includes full tuition remission, monthly compensation, and benefits including health insurance.
Most communication arts graduate students are supported by teaching assistantships (TA). Additional funding comes in the form of research assistantships (RA), project assistantships (PA), senior lecturer appointments (SLA), Graduate School–supported fellowships, dissertation scholarships, departmental awards, and conference travel awards.

Graduate Assistantships
Graduate students who hold an appointment as a TA, RA, or PA will be entitled to remission of tuition in any semester in which their appointment equals at least 33.4% of a full-time appointment for the semester. Graduate assistantships in communication arts are typically offered at the 50% level, which is a full-time appointment for a full-time student.

Senior Lecturer Appointments
Students are assigned to SLA by faculty each semester based on need.

Graduate School Supported Fellowships
A limited number of fellowships are available. All students are considered for fellowships at the time of application; no separate application is necessary. These fellowships may be for terms from one semester to two years and include tuition remission and benefits including health insurance.

Dissertation Scholarships
The department awards Elliott Dissertation Scholarships to students who have successfully defended their dissertation proposal no later than 12 months after passing their preliminary exams. This award is designed to facilitate progress on researching and writing the dissertation.

Department Awards
The Department of Communication Arts is pleased to be able to grant yearly monetary awards to graduate students based on scholastic performance. Nominations for the awards are generated by the faculty in the four areas of graduate study. To be eligible for consideration, graduate students must be continuing in the program, must be making satisfactory progress toward their degree, and must not have any incompletes on their transcript. The amount and number of awards vary from year to year depending on funds available.

Conference Travel Awards
The department provides a once-per-academic-year travel stipend for students to present academic papers at a conference. Students not residing in Madison during the semester in which they present at conference are not eligible for this funding.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.
Assessments and Examinations

To assess satisfactory progress toward the degree and to facilitate determinations of good standing, graduate students must complete a Professional Activities Report (PAR) each spring. A PAR indicates a student’s academic and professional activities on and off campus each year. Faculty will use the PAR in their annual evaluations of student progress. A PAR represents one means of communication between graduate students and faculty, providing graduate students with an opportunity to enumerate their activities in a single document. PARS must be completed by April 1 each spring.

Students must successfully complete preliminary examinations before moving on to dissertator status. To take preliminary examinations, students must have completed all of the Ph.D. coursework requirements of their area and their minor coursework. Additional requirements vary by area of study. They are as follows:

Communication Science prelims consist of 16 hours of written examinations in the following areas:

Communication processes and contexts (8 hours): four hours each in two major topic areas in the field focusing on theories and major empirical findings
Specialization (4 hours): four hours in the student’s area of specialization; typically, the dissertation research dictates the area of specialization
Quantitative research methodology and theory construction (4 hours): this portion of the exam may include questions addressing statistics, research design, measurement, and the construction and evaluation of theory

Film prelims consist of 12 hours of written examination divided across the following four concentrations:

Film theory (3 hours)
Film history (3 hours)
Film analysis and criticism (3 hours)
Area of specialization determined in consultation with the student’s advisor (3 hours)

Media and Cultural Studies prelims consists of 24 hours of written examinations as follows: four open-book essay exams, six hours each, taken on separate days.

The examination covers a combination of general and specialized areas in relation to the planned dissertation project, to be chosen in a group consultation with the student’s advisor and major faculty.

Rhetoric, Politics, and Culture prelims consist of 12 hours of written examination divided across the following four concentrations:

Rhetorical theory (3 hours)
Rhetorical discourse (3 hours)
Critical method (3 hours)
Area of specialization determined in consultation with the student’s advisor and doctoral committee (3 hours)

Language

Depending on their dissertation topic, students in the Communication Science and Film areas may need to fulfill a foreign language requirement. The need for such a requirement is determined by the student’s advisor and doctoral committee.

Doctoral Minor/Breadth Requirements

All doctoral students are required to complete a minor of at least 9 credits.

REQUIRED COURSES

Successful completion of the Ph.D. requires a minimum of 51 credit hours, which includes coursework, independent study, and research credits. This requirement stipulates that at least 50 percent of these credit hours must be received in courses specifically designed for graduate work, which the Graduate School defines as:

• courses numbered 700 and above;
• courses numbered 300–699 that are specifically designed for graduate students in a graduate program;
• courses numbered 300–699 that assess graduate students separately from undergraduate students;
• courses numbered 300–699 that have a graduate student enrollment greater than 50 percent in a given semester.

Credit hours taken towards the completion of a master’s degree in the Department of Communication Arts may count toward this requirement. Credit hours taken while enrolled as a graduate student outside of the department and UW–Madison may count toward this requirement with the approval of the Graduate Committee. The department requires that a minimum of 40 credit hours must be completed in residence.

policies and requirements.

The Graduate Program Handbook (https://commarts.wisc.edu/sites/default/files/files/2017/10/05/comm-arts-grad-handbook-2017-10-05.pdf) is the repository for all of the program's policies and requirements.

### PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions. Coursework earned five or more years prior to admission to a Master's degree is not allowed to satisfy requirements.

**UW–Madison Undergraduate**

With program approval, students are allowed to count no more than 7 credits of graduate coursework taken as a UW–Madison undergraduate student. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

**UW–Madison University Special**

With program approval, students are allowed to count no more than 15 credits of graduate coursework taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a master's degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

### PROBATION

All graduate students must stay “in good standing” in the department to be eligible for teaching assignments, awards, and fellowships, and in order to be considered to be making satisfactory progress in the program. Students whose progress is rated unsatisfactory by their faculty may face loss of funding and/or dismissal from the program.

The department’s minimum criteria for good standing are:

1. Timely progress through the program, consisting of successful completion of M.A. requirements and compliance with coursework, advising, and thesis/comprehensive exam expectations.
2. A cumulative grade point average for coursework within the department of 3.5 or above.
3. No grades of incomplete on the student’s record.
4. Fulfillment of responsibilities for teaching/project assistantships or lectureships.

### ADVISOR / COMMITTEE

Although an initial faculty advisor is assigned to each student during the summer prior to matriculation in the graduate program, students should seek out regular advisors by the end of their first year in residence. The regular advisor should be a faculty member whose research interests and methodological expertise match closely to those that the student intends to acquire. While no faculty member is obliged to accept a student’s request to serve as advisor, invitations are usually accepted except where the faculty member judges that a different advisor would serve the student’s needs and interests better.

Early in the semester in which the preliminary exams will be completed, students will form a prelim committee consisting of three to four faculty members, one of which is the student’s advisor. In the case of preliminary examinations, all committee members will write exam questions, read the answers, and sit on the prelim defense.
Upon passing preliminary examinations, students will form a dissertation proposal committee, consisting of three to four faculty members, one of which is the student’s advisor. Before the student may proceed with writing the dissertation, the proposal must be approved by the dissertation proposal committee. While writing the dissertation, a student must obtain the approval of the advisor for modifications to the dissertation that depart significantly from the proposal.

Once the dissertation proposal has been approved, the student must form a dissertation committee. The dissertation committee serves as the final oral committee before whom the student must defend the completed dissertation manuscript. Often the members of the dissertation proposal committee serve on the dissertation committee as well, but the membership of the two committees may differ. A dissertation committee consists of at least four members, three of whom must be UW–Madison graduate faculty: the student’s advisor, at least two additional members from the student’s primary area of concentration, and at least one member from outside the department which may be someone on campus or from another institution. All members of a student’s dissertation committee must be designated as “readers,” defined as committee members who commit themselves to closely reading and reviewing the entire dissertation.

In exceptional circumstances, the student may seek a formal co-advisor for their dissertation committee. The department recognizes two situations in which this may be appropriate: (1) the student’s dissertation project genuinely pursues an interdisciplinary topic that requires the equal involvement of a faculty member in Communication Arts and a faculty member in another department at UW–Madison; or (2) the student’s advisor retires or resigns from the University, and the student cannot complete the dissertation within one year of the retirement or resignation, which requires the student to seek a new advisor in the department. (For the second situation, this person becomes the newly selected advisor.)

CREDITS PER TERM ALLOWED

10-credit maximum unless additional credits are approved by faculty advisor; up to 15

TIME CONSTRAINTS

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

OTHER

Incoming M.A. students are generally offered 5 academic years (fall semester and spring semester) of support in the form of teaching assistantships, project assistantships, and fellowships. Incoming Ph.D. students are generally offered 3 years of support. This support includes a stipend, tuition remission, and benefits.

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

Graduate students should consider opportunities for professional development as they begin their programs of graduate study. As students plan programs of study, participation in campus and disciplinary organizations, scholarly presentations at academic conferences, and potential outlets for publication of research, they should consider the ways that these activities begin to establish areas of scholarly and pedagogical competence, connections with other researchers and teachers in the field, and audiences for their scholarship. Some of the best resources for professional development are the people—both faculty and other graduate students—in the Department of Communication Arts. These people may serve as sources of valuable advice and information, and their actions may provide examples of practices that promote professional development. Further, campus-wide resources are available to enrich students’ graduate studies and enhance their professional skills.

DEPARTMENT RESOURCES FOR PROFESSIONAL DEVELOPMENT

Two important departmental resources for professional development are a graduate student’s advisor and the department colloquia.

The advisor is concerned with a graduate student’s academic progress as well as with the professional development of advisees. Throughout a graduate student’s residence in the program (and often beyond), an advisor will discuss and answer questions and concerns about professional development. For instance, as submission deadlines to academic conferences approach, an advisor may discuss with a student potential submission options and the appropriate venues for these submissions. If a student is working on revising a seminar paper for potential public in an academic journal, an advisor will often guide the student through the revision process. When a student is applying for jobs, an advisor will often edit application materials. When a student is interviewing for a position or negotiating a job offer, an advisor will often provide tips for how to proceed.

The department colloquia offers additional resources for professional development. The four areas of study (Communication Science; Film; Media and Cultural Studies; and Rhetoric, Politics, and Culture) hold individual and joint colloquia on most Thursday afternoons during the academic year. Often, these colloquia are devoted to research presentations from department faculty and graduate students as well as campus visitors. Sometimes, the colloquia will address issues of professional development. Colloquia topics on professional development include practicing conference presentations; preparing a teaching dossier; practicing job talks; negotiating the revise and resubmit process in journal publishing; and networking. Colloquia on professional development engage graduate students in discussion on professional topics, workshop materials, and offer advice on best practices.
FACULTY REVIEWS OF GRADUATE STUDENT TEACHING
Since most Communication Arts Ph.D.s pursue academic careers, developing teaching skills constitutes an important aspect of professionalization. Some colleges and universities may ask a student to prepare a teaching demonstration as part of the on-campus interview process, or otherwise seek evaluation and evidence of a graduate student’s teaching abilities. To facilitate the development of graduate student teaching, faculty will provide reviews of teaching assistants (TA) in courses in which they have worked directly with graduate students in the classroom. Graduate students should expect these reviews in every semester in which they serve as a TA in one of these faculty-led courses (e.g., a lecture-discussion section course taught by a faculty member). These reviews are intended to help students identify strengths in their teaching as well as areas in which they may improve. In relevant courses, faculty will deposit an electronic copy of a teaching review with the graduate coordinator no more than two weeks after a semester has concluded. The graduate coordinator will maintain files of teaching reviews for each graduate student in the department. The graduate coordinator will send a copy of the review to the student’s advisor. Faculty also will share a copy of the review with the student reviewed, who may wish to incorporate favorable reviews and quotations into a teaching dossier. Graduate students should feel welcome to discuss all reviews with their supervising faculty members. Graduate students should note, too, that these reviews will assist faculty in addressing matters of pedagogy when preparing letters of recommendation for academic employment, which will benefit students in their job searches.

TRAVEL TO MEETINGS AND CONFERENCES
The Department of Communication Arts provides a once-per-academic-year travel stipend for those students who will be presenting a paper at an academic conference. Students who are not residing in Madison during the semester in which they present at conference are not eligible for funding.

INSTRUCTIONAL MEDIA CENTER
Located on the third floor of Vilas Hall, the Instructional Media Center (IMC) provides media and technology services for the entire department. The IMC houses the Hamel Family Digital Media Lab, the Walter Mirisch Seminar Room, and Communication Arts media production classrooms. The IMC circulates laptops, video projectors, and other equipment to graduate students for instruction and short-term use. The IMC also maintains a media library containing thousands of DVDs and blu-rays of films, television shows, video games, and off-air recordings. Graduate students may check out any item not reserved for classroom use for their research. IMC staff can assist graduate students with their research needs. Upon request, the IMC can provide film to video transfers, media creation (files, DVDs, blu-rays), video capture, as well as training in these needs. The IMC provides assistance for the Center for Communication Research. The IMC is staffed by individuals with a wide range of media knowledge and skills to assist graduate students.

LEARNING OUTCOMES
1. Articulates research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of study.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of study.
3. Creates research, scholarship, or performance that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions of the field of study to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.

PEOPLE

FACULTY
Professors Kelley Conway (chair), Robert Asen, Jonathan Gray, Robert Glenn Howard, Lea Jacobs, Marie-Louise Mares, Zhongdang Pan, Jeff Smith, Lyn Van Swol, and Michael Xenos
Associate Professors Maria Belodubrovskaya, Eric Hoyt, Derek Johnson, Jenell Johnson, Lori Lopez, Sara McKinnon, Jeremy Morris, Ben Singer, and Catalina Toma

COMMUNICATION SCIENCES AND DISORDERS

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE/PROFESSIONAL CERTIFICATES
• Audiology, Au.D. (p. 369)
• Communication Sciences and Disorders, Doctoral Minor (p. 379)
• Communication Sciences and Disorders, M.S. (p. 379)
• Communication Sciences and Disorders, Ph.D. (p. 384)

PEOPLE

Information about faculty and staff can be found on the program’s website (https://csd.wisc.edu/peopleofCSD.htm).

AUDIOLOGY, AU.D.
The Au.D. program is a four-year professional doctorate program offered jointly by the UW–Madison Department of Communication Sciences and Disorders and the UW–Stevens Point School of Communicative Disorders.

The program was designed to train professional audiologists through a firm foundation in science and technology. Clerksips and onsite mentoring assure that students graduate with superior clinical skills.

In this unique program, lecture classes are taught simultaneously at both campuses; videoconferencing allows for interaction with students and faculty at the remote campus. Laboratory experiences are taught separately, using the same curriculum, on each campus. Summer academic course work is entirely online, and clinical experiences take place both on and off campus.

The Au.D. program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association.

The academic objectives of the program are:
• To prepare students to enter the profession of audiology fully able to function as independent audiologists in private practice, medical clinics, and school settings.
• To provide a strong theoretical, technical, and scientific base for the clinical practice of audiology.
• To prepare students to meet certification and licensure requirements for the practice of clinical audiology.
• To prepare students to be lifelong learners.

ADMISSIONS

Students apply to either the named option (sub-major) in "Audiology: Collaborative Program at Stevens Point (p. 373)" or "Audiology: Collaborative Program at UW-Madison (p. 376)."

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

Financial assistance, sometimes available to graduate students in communication sciences and disorders, consists of scholarships, fellowships, traineeships, and project and research assistant positions. Financial assistance is very limited and varies from year to year.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules.

Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. For more information about the on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

- CS&D 894: Externship in Audiology 3

**NAMED OPTIONS (SUB-MAJORS)**
A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Audiology Au.D. must select one of the following named options:

- AUDIOLOGY: COLLABORATIVE PROGRAM AT STEVENS POINT, AU.D. (P. 373)
- AUDIOLOGY: COLLABORATIVE PROGRAM AT UW-MADISON, AU.D. (P. 376)

**POLICIES**

**GRADUATE SCHOOL POLICIES**
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**
The Graduate Program Handbook (https://csd.wisc.edu/2017-2018-aud-student-handbook) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**
No prior coursework from other institutions is allowed.

**UW–Madison Undergraduate**
Up to 6 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. If the courses are numbered 500 and above, the credits may be counted toward the overall graduate credit requirement; if the courses are numbered 700 or above, they may count toward both the minimum graduate degree requirements and minimum graduate coursework (50%) requirement.

**UW–Madison University Special**
No prior coursework from UW–Madison University Special career is allowed.

**PROBATION**
A student failing to maintain a minimum GPA of 3.0 will be placed on academic probation and will be required to raise his/her GPA to 3.0 or above in the following semester. If the GPA is not raised to 3.0 or above in the following semester, the student will be dismissed from the program. A student receiving a course grade less than “B” shall receive a written warning reminding the student of the
"no more than two grades below a "B" rule and shall be placed on academic probation.

Students who are having difficulty with essential abilities and/or meeting competencies in coursework will receive a written improvement plan. An improvement plan specifies the ASHA standards and competencies that the student has not met, as well as a statement explaining what the student must do to meet competency level and a statement explaining what the faculty will do to provide opportunities for improved performance. An improvement plan may require the student to retake an examination or even repeat an entire course if deemed necessary by the academic instructor. If a student has an improvement plan, he/she should communicate regularly with each academic instructor to discuss the plan each semester the plan is in place. The student is responsible for scheduling these communications.

In addition to the department’s probation policy, the Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

When students are admitted to the Au.D. program, they are provided with a course sequence for the entire program. It is strongly recommended that students adhere to this sequence, although modifications to the plan may be made in consultation with the Au.D. program advisor and the director of clinical education. Every graduate student is required to have an advisor. The Au.D. program advisor is the assigned advisor for students in the Au.D. program. Students can be suspended from the Graduate School if they do not have an advisor.

CREDITS PER TERM ALLOWED

14 credits

TIME CONSTRAINTS

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Consult the program for additional program-specific time constraints.

**AUDIOLÓGY: COLLABORATIVE PROGRAM AT STEVENS POINT, AU.D.**

This is a named option within the Audiology Au.D. (p. 369)

The Au.D. program is a four-year professional doctorate program offered jointly by the UW–Madison Department of Communication Sciences and Disorders and the UW–Stevens Point School of Communication Sciences and Disorders.

The program was designed to train professional audiologists through a firm foundation in science and technology. Clerkships and onsite mentoring assure that students graduate with superior clinical skills.

In this unique program, lecture classes are taught simultaneously at both campuses; videoconferencing allows for interaction with students and faculty at the remote campus. Laboratory experiences are taught separately, using the same curriculum, on each campus. Summer academic course work is entirely online, and clinical experiences take place both on and off campus.

**ADMISSIONS**

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

An undergraduate major in communication sciences and disorders is recommended, but not required, for admission to the Au.D. program. If you do not have an undergraduate degree in communication sciences and disorders, you must make up any coursework deficiencies before your graduate study.

Students apply to either the named option (sub-major) in "Audiology: Collaborative Program at Stevens Point (p. 373)" or "Audiology: Collaborative Program at UW-Madison (p. 376)."

**NOTABLE ADVICE**

- Submit all materials one week prior to deadline. Late and incomplete applications will not be considered.
- File your application early. Do not wait until you can gather all your materials. It is better to file early and send additional items as they become available.
- Track your application status. After submission of your application, you will receive a link to a personal web page where you can track your application status. We update this page as we receive your materials, usually within two weeks of receipt.
- For more information, review the UW–Madison Graduate School Steps to Apply (http://grad.wisc.edu/admissions/process) and Admissions FAQs (http://grad.wisc.edu/admissions/faq).
FUNDING

GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. GRADUATE SCHOOL POLICIES

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

NAMED OPTION-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://csd.wisc.edu/2017-2018-aud-student-handbook) is the repository for all of the program's policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

No prior coursework from other institutions is allowed.

UW–Madison Undergraduate

Up to 6 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. If the courses are numbered 500 and above, the credits may be counted toward the overall graduate credit requirement; if the courses are numbered 700 or above, they may count toward both the minimum graduate degree requirements and minimum graduate coursework (50%) requirement.

UW–Madison University Special

No prior coursework from UW–Madison University Special career is allowed.

PROBATION

A student failing to maintain a minimum GPA of 3.0 will be placed on academic probation and will be required to raise his/her GPA to 3.0 or above in the following semester. If the GPA is not raised to 3.0 or above in the following semester, the student will be dismissed from the program. A student receiving a course grade less than "B" shall receive a written warning reminding the student of the "no more than two grades below a "B" rule and shall be placed on academic probation.

Students who are having difficulty with essential abilities and/or meeting competencies in coursework will receive a written improvement plan. An improvement plan specifies the ASHA standards and competencies that the student has not met, as well as a statement explaining what the student must do to meet competency level and a statement explaining what the faculty will do to provide opportunities for improved performance. An improvement plan may require the student to retake an examination or even repeat an entire course if deemed necessary by the academic instructor. If a student has an improvement plan, he/she should communicate regularly with each academic instructor to discuss the plan each semester the plan is in place. The student is responsible for scheduling these communications.

In addition to the department's probation policy, the Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE

When students are admitted to the Au.D. program, they are provided with a course sequence for the entire program. It is strongly recommended that students adhere to this sequence, although modifications to the plan may be made in consultation with the Au.D. program advisor and the director of clinical education. Every graduate student is required to have an advisor. The Au.D. program
Audiology: Collaborative Program at UW-Madison, Au.D.

If students do not have an advisor, they can be suspended from the Graduate School.

Credits per Term Allowed
14 credits

Time Constraints
Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Consult the program for additional program-specific time constraints.

Audiology: Collaborative Program at UW-Madison, Au.D.

This is a named option within the Audiology Au.D. (p. 369)

The Au.D. program is a four-year professional doctorate program offered jointly by the UW-Madison Department of Communication Sciences and Disorders and the UW-Stevens Point School of Communicative Disorders.

The program was designed to train professional audiologists through a firm foundation in science and technology. Clerkships and onsite mentoring assure that students graduate with superior clinical skills.

In this unique program, lecture classes are taught simultaneously at both campuses; videoconferencing allows for interaction with students and faculty at the remote campus. Laboratory experiences are taught separately using the same curriculum on each campus. Summer academic course work is entirely online, and clinical experiences take place both on and off campus.

The Au.D. program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association.

Admissions

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

An undergraduate major in communication sciences and disorders is recommended, but not required, for admission to the Au.D. program. If you do not have an undergraduate degree in communication sciences and disorders, you must make up any coursework deficiencies before your graduate study.

Students apply to either the named option (sub-major) in "Audiology: Collaborative Program at Stevens Point (p. 373)" or "Audiology: Collaborative Program at UW-Madison (p. 376)."

Apply Online

Fall Application Deadline: January 15

Notable Advice

- Submit all materials one week prior to deadline. Late and incomplete applications will not be considered.
- File your application early. Do not wait until you can gather all your materials. It is better to file early and send additional items as they become available.
- Track your application status. After submission of your application, you will receive a link to a personal web page where you can track your application status. We update this page as we receive your materials, usually within two weeks of receipt.
- For more information, review the UW-Madison Graduate School Steps to Apply (http://grad.wisc.edu/admissions/process) and Admissions FAQs (http://grad.wisc.edu/admissions/faq).
FUNDING

GRADUATE SCHOOL RESOURCES
Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES
Financial assistance, sometimes available to graduate students in communication sciences and disorders, consists of scholarships, fellowships, traineeships, and project and research assistant positions. Financial assistance is very limited and varies from year to year.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS
Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

NAMED OPTION REQUIREMENTS

MODE OF INSTRUCTION

Face to Face  Evening/Weekend  Online  Hybrid  Accelerated

Yes  No  No  No  No

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

**Policies**

**GRADUATE SCHOOL POLICIES**
The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**NAMED OPTION-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**
The Graduate Program Handbook (https://csd.wisc.edu/2017-2018-aud-student-handbook) is the repository for all of the program’s policies and requirements.

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**
No prior coursework from other institutions is allowed.

**UW-Madison Undergraduate**
Up to 6 credits from a UW-Madison undergraduate degree are allowed to count toward the degree. If the courses are numbered 500 and above, the credits may be counted toward the overall graduate credit requirement; if the courses are numbered 700 or above, they may count toward both the minimum graduate degree requirements and minimum graduate coursework (50%) requirement.

**UW-Madison University Special**
No prior coursework from UW-Madison University Special career is allowed.

**PROBATION**

A student failing to maintain a minimum GPA of 3.0 will be placed on academic probation and will be required to raise his/her GPA to 3.0 or above in the following semester. If the GPA is not raised to 3.0 or above in the following semester, the student will be dismissed from the program. A student receiving a course grade less than "B" shall receive a written warning reminding the student of the "no more than two grades below a “B” rule and shall be placed on academic probation.

Students who are having difficulty with essential abilities and/or meeting competencies in coursework will receive a written improvement plan. An improvement plan specifies the ASHA standards and competencies that the student has not met, as well as a statement explaining what the student must do to meet competency level and a statement explaining what the faculty will do to provide opportunities for improved performance. An improvement plan may require the student to retake an examination or even repeat an entire course if deemed necessary by the academic instructor. If a student has an improvement plan, he/she should communicate regularly with each academic instructor to discuss the plan each semester the plan is in place. The student is responsible for scheduling these communications.

In addition to the department’s probation policy, the Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

When students are admitted to the Au.D. program, they are provided with a course sequence for the entire program. It is strongly recommended that students adhere to this sequence, although modifications to the plan may be made in consultation with the Au.D. program advisor and the director of clinical education. Every graduate student is required to have an advisor. The Au.D. program
advisor is the assigned advisor for students in the Au.D. program. Students can be suspended from the Graduate School if they do not have an advisor.

CREDITS PER TERM ALLOWED
14 credits

TIME CONSTRAINTS
Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

Consult the program for additional program-specific time constraints.

OTHER
n/a

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PEOPLE

Information about faculty and staff can be found on the program’s website (https://csd.wisc.edu/directory).

COMMUNICATION SCIENCES AND DISORDERS, DOCTORAL MINOR

REQUIREMENTS
At least 9 credits in communication sciences and disorders courses are required for a minor completed by students from other programs. The minor advisor will work with the student to plan an appropriate sequence of coursework.

PEOPLE

Information about faculty and staff can be found on the program’s website (https://csd.wisc.edu/peopleofCSD.htm).

COMMUNICATION SCIENCES AND DISORDERS, M.S.

The department offers graduate programs leading to the M.S. and Ph.D. in communication sciences and disorders. An additional program in the department leads to the Au.D. in audiology. The graduate program provides the opportunity for study in the areas of audiology, speech–language pathology, hearing science, language science, and speech science. The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the discipline of communication sciences and disorders.

The M.S. program has two tracks. The Speech-Language Pathology track is a two-year professional program designed to prepare students for clinical work. It is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. At the master’s level, supervised diagnostic and therapy experiences with children and adults are provided in a variety of on- and off-campus clinical settings. This program meets the academic and clinical-practicum requirements for clinical certification set by the American Speech-Language-Hearing Association (ASHA). Opportunities are also available for pursuing a nonclinical program at the master’s level.

The Normal Aspects of Speech, Language, and Hearing track is a non-clinical degree. Most students complete this degree as a first step toward a Ph.D.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements/#english-proficiency). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</table>

The program is open to individuals who have completed an undergraduate degree and who meet the minimum admission requirements of the Graduate School and the department. Entering
students who do not have undergraduate majors in communicative disorders will typically be required to take prerequisite course work, which may lengthen the time required to earn a graduate degree.

**Apply Online**

Fall Application Deadline: January 15

**ADMISSION REQUIREMENTS**

All potential master’s degree applicants must meet the Graduate School’s admission requirements, as well as department-specific requirements.

**GRADUATE SCHOOL REQUIREMENTS**

UW-Madison Graduate School Requirements for Admission (http://grad.wisc.edu/admissions/requirements)

- A minimum grade point average (GPA) of 3.0 (4.0 = A); however, the students we accept into the program typically have much higher GPAs

**PROGRAM PREREQUISITES**

You must complete the following undergraduate courses before beginning graduate course work:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS&amp;D 201</td>
<td>Speech Science</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 202</td>
<td>Normal Aspects of Hearing</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 240</td>
<td>Language Development in Children and Adolescents</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 315</td>
<td>Phonetics and Phonological Development</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 318</td>
<td>Voice, Craniofacial and Fluency Disorders</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 320</td>
<td>Introduction to Audiology</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 371</td>
<td>Pre-Clinical Observation of Children and Adults</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 425</td>
<td>Auditory Rehabilitation</td>
<td>3</td>
</tr>
<tr>
<td>CS&amp;D 440</td>
<td>Child Language Disorders, Assessment and Intervention</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the above courses, you will need a course in each of the following areas:

- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

The American Speech–Language–Hearing Association (ASHA) standards now specify that a course in each of these areas is required for ASHA certification. For additional details, visit ASHA’s website Standard IV-A (http://www.asha.org/Certification/2014-Speech-Language-Pathology-Certification-Standards).

If you choose to complete prerequisites at UW–Madison before applying for graduate study, you must apply to the Capstone Program (http://guide.wisc.edu/nondegree/capstone/communication-sciences-disorders-capstone-certificate). These courses typically can be completed within two semesters. Equivalent courses from another university or department will be considered on a case-by-case basis.

**LETTERS OF RECOMMENDATION**

These letters should address your potential for academic success in graduate school. At least two should come from instructors who have knowledge of your academic performance. The third may come from a clinical supervisor, employer, or other individual who has knowledge of your academic potential and likelihood for success in graduate school.

No more than three.

**REASONS FOR GRADUATE STUDY**

This is an opportunity for you to highlight experiences, related skills, and personal attributes which make you an exceptional candidate. 1-3 pages, single-spaced.

**APPLICATION FEE**

UW–Madison charges a non-refundable $75 application fee that must be paid by credit card (Master Card or Visa) or debit card. In addition to the $75 application fee, non U.S. citizens will be charged a $6 international document processing fee.

There are also limited application fee grants available. Check the UW–Madison Graduation Application Fee grants (https://grad.wisc.edu/admissions/feegrants) to see if you qualify. Please note that fee grant applications must be submitted before you application and can take two weeks to process so you should plan to submit fee grant applications by December 1st with consideration of holidays.

**CV OR RESUME**

Include honors and awards

**TRANSCRIPTS**

Upload a copy of your unofficial transcripts. These show grades earned at every college or university you have attended, including study abroad. If admitted, the Graduate School will request official transcripts.

**SUPPLEMENTAL APPLICATION**

**OFFICIAL GRE SCORES**

Use institution code 1846. You may take the test more than once; we will consider the scores from your best testing date. Only official scores, submitted directly from ETS, from within the last five years and submitted by the application deadline will be accepted.

**OFFICIAL TOEFL SCORES**

If your native language is not English, or your undergraduate instruction was not in English, a TOEFL score is required. Use institution code 1846. You may take the test more than once; we will consider the scores from your best testing date. Only official scores, submitted directly from ETS, from within the last five years and submitted by the application deadline will be accepted.

**LETTERS OF RECOMMENDATION**

CURRICULAR REQUIREMENTS

Requirements Detail

Minimum Credit Requirement
Speech–Language Pathology track: 36 credits
Normal Aspects of Speech, Language, and Hearing track: 30 credits

Minimum Residence Credit Requirement
Speech–Language Pathology track: 36 credits
Normal Aspects of Speech, Language, and Hearing track: 30 credits

Minimum Graduate Coursework Requirement
Speech–Language Pathology track: All but 3 credits of the minimum 36 credits for the degree must be taken in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide (http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle).
Normal Aspects of Speech, Language, and Hearing track: All of the minimum number of credits (30) must be taken in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the University's Course Guide (http://my.wisc.edu/CourseGuideRedirect/BrowseByTitle).

Overall Graduate GPA Requirement
3.00 GPA required.

Other Grade Requirements
The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.

Assessments and Examinations
Contact the program for information on required assessments and examinations.

Language Requirements
Contact the program for information on any language requirements.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.

Normal Aspects of Speech, Language, and Hearing (non-clinical) Track

A minimum of 36 credits and a thesis is required. While the curriculum is individually designed for the specific student, it includes many of the same academic courses as in the Speech-Language Pathology Track curriculum above.

Because an emphasis on Normal Aspects of Speech, Language, and Hearing does not include clinical practice, CURRIC 720, CS&D 790, and CS&D 713 are not part of the curriculum.

1 These tracks are internal to the program and represent different pathways a student can follow to earn this degree. Track names do not appear in the Graduate School admissions application, and they will not appear on the transcript.
POLICIES

GRADUATE SCHOOL POLICIES
The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Graduate Work from Other Institutions
No prior coursework from other institutions is allowed.

UW–Madison Undergraduate
Up to 6 credits from a UW–Madison undergraduate degree are allowed to count toward the degree. If the courses are numbered 500 and above, the credits may be counted toward the overall graduate credit requirement; if the courses are numbered 700 or above, they may count toward both the minimum graduate degree requirement and minimum graduate coursework (50%) requirement.

UW–Madison University Special
No prior coursework from UW–Madison University Special career is allowed.

PROBATION
The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

ADVISOR / COMMITTEE
Every graduate student is required to have an advisor. To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

An advisor generally serves as the thesis advisor. In many cases, an advisor is assigned to incoming students. Students can be suspended from the Graduate School if they do not have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies.

A committee often accomplishes advising for the students in the early stages of their studies.

CREDITS PER TERM ALLOWED
14 credits

TIME CONSTRAINTS
Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER
Ph.D. students typically receive funding in the form of research assistantships and work in their advisor’s research lab.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. (Foundations of Practice) Possess foundational knowledge about basic human communication and swallowing processes.
2. (Foundations of Practice) Identify sources and assemble evidence pertaining to questions or challenges in communication sciences and disorders.
3. (Foundations of Practice) Articulate and critique the theories, research methods, and approaches in speech-language pathology.
4. (Foundations of Practice) Integrate research principles into evidence-based clinical practice.
5. (Foundations of Practice) Apply research findings in the provision of patient care.
6. (Foundations of Practice) Communicate complex ideas in a clear and understandable manner.
7. (Prevention, Identification and Assessment) Conduct screening and prevention procedures.
8. (Prevention, Identification and Assessment) Perform chart review and collect case history from patient interviews and/or relevant others.
9. (Prevention, Identification and Assessment) Select appropriate evaluation instruments/procedures.
10. (Prevention, Identification and Assessment) Administer and score diagnostic tests correctly.
11. (Prevention, Identification and Assessment) Adapt evaluation procedures to meet patient needs.
12. (Prevention, Identification and Assessment) Possess knowledge of etiologies and characteristics for each communication and swallowing disorder.
13. (Prevention, Identification and Assessment) Interpret and formulate diagnosis from test results, history, and other behavioral observations.
14. (Prevention, Identification and Assessment) Make appropriate recommendations for intervention.
15. (Prevention, Identification and Assessment) Complete administrative functions and documentation necessary to support evaluation.
16. (Prevention, Identification and Assessment) Make appropriate recommendations for patient referrals.
17. (Intervention) Develop appropriate treatment plans with measurable and achievable goals.
18. (Intervention) Collaborate with clients/patients and relevant others in the planning process.
19. (Intervention) Implement treatment plans.
20. (Intervention) Select and use appropriate materials/instrumentation.
21. (Intervention) Sequence tasks to meet objectives.
22. (Intervention) Provide appropriate introduction/explanation of tasks.
23. (Intervention) Measure and evaluate patients’ performance and progress.
24. (Intervention) Use appropriate models, prompts, or cues.
25. (Intervention) Adapt treatment session to meet individual patient needs.
27. (Intervention) Identify and refer patients for services as appropriate.
28. (Professional Conduct) Recognize and apply principles of ethical and professional conduct.
29. (Professional Conduct) Apply skills for life-long learning.
30. (Professional Conduct) Apply intercultural knowledge and competence in their practice.
32. (Professional Conduct) Possess knowledge of contemporary professional issues and advocacy.
33. (Professional Conduct) Communicate effectively, recognizing the needs, values, preferred mode of communication, and cultural/linguistic background of the patient, family, caregiver, and relevant others.
34. (Professional Conduct) Provide counseling and supportive guidance regarding communication and swallowing disorders to patients, family, caregivers, and relevant others.

PEOPLE

Information about faculty and staff can be found on the program’s website (https://csd.wisc.edu/peopleofCSD.htm).

ACCREDITATION

COMMUNICATION SCIENCES AND DISORDERS, PH.D.

The department offers graduate programs leading to the M.S. and Ph.D. in communication sciences and disorders. An additional program in the department leads to the Au.D. in audiology. The graduate program provides the opportunity for study in the areas of audiology, speech–language pathology, hearing science, language science, and speech science. The purpose of the graduate program is to prepare clinicians, researchers, and teachers who possess a solid foundation in both the theoretical and applied aspects of the discipline of communication sciences and disorders.

The Ph.D. program provides relevant classroom and laboratory experiences for the scholar–researcher interested in communication processes and communicative disorders. A student’s academic program will consist of course work within the department and in related areas such as psychology, linguistics, statistics, computer science, and education. Students completing the program will be prepared for careers as university professors, laboratory researchers, and senior clinicians.

Individual programs can be designed for students who wish to pursue professional training/clinical certification (in either speech–language pathology or audiology) and the Ph.D. degree. Such students follow a modified sequence of course work, clinical training, and research experience in order to satisfy all academic and certification requirements in five to six years.

ADMISSIONS

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

The program is open to individuals who have completed an undergraduate degree and who meet the minimum admission requirements of the Graduate School and the department. Entering students who do not have undergraduate majors in communicative disorders will typically be required to take prerequisite course work, which may lengthen the time require to earn a graduate degree.

Apply Online

Fall Application Deadline: January 1st

ADMISSION REQUIREMENTS

All potential doctoral degree applicants must meet the Graduate School's admission requirements, as well as department-specific requirements.

GRADUATE SCHOOL REQUIREMENTS

UW–Madison Graduate School Requirements for Admission

- A minimum grade point average (GPA) of 3.0 (4.0=A); however, the students we accept into the program typically have much higher GPAs

LETTERS OF RECOMMENDATION

These letters should address your potential for academic success in graduate school. At least two should come from instructors who have knowledge of your academic performance. The third may come from a clinical supervisor, employer, or other individual who has knowledge of your academic potential and likelihood for success in graduate school. **No more than three.**

REASONS FOR GRADUATE STUDY

This is an opportunity for you to highlight experiences, related skills, and personal attributes which make you an exceptional candidate. **1-3 pages, single-spaced.**

APPLICATION FEE

UW–Madison charges a non-refundable $75 application fee that must be paid by credit card (Master Card or Visa) or debit card. In addition to the $75 application fee, non U.S. citizens will be charged a $6 international document processing fee.

There are also limited application fee grants available. Check the UW–Madison Graduation Application Fee grants to see if you qualify. Please note that fee grant applications must be submitted before you application and can take two weeks to process so you should plan to submit fee grant applications by December 1 with consideration of holidays.

CV OR RESUME

Include honors and awards

TRANSCRIPTS

Upload a copy of your unofficial transcripts. These show grades earned at every college or university you have attended, including study abroad. If admitted, the Graduate School will request official transcripts.

SUPPLEMENTAL APPLICATION

Fill out the supplemental application that is found in the online graduate school application.

OFFICIAL GRE SCORES

Use institution code 1846. You may take the test more than once; we will consider the scores from your best testing date. Only official scores, submitted directly from ETS, from within the last five years and submitted by the application deadline will be accepted.

OFFICIAL TOEFL SCORES

If your native language is not English, or your undergraduate instruction was not in English, a TOEFL score is required. Use institution code 1846. You may take the test more than once; we will consider the scores from your best testing date. Only official scores, submitted directly from ETS, from within the last five years and submitted by the application deadline will be accepted.

NOTABLE ADVICE

- Submit all materials one week prior to deadline. Late and incomplete applications will not be considered.
- File your application early. Do not wait until you can gather all your materials. It is better to file early and send additional items as they become available.
- Track your application status. After submission of your application, you will receive a link to a personal web page where you can track your application status. We update this page as we receive your materials, usually within two weeks of receipt.
- For more information, review the UW–Madison Graduate School “Steps to Apply” (http://grad.wisc.edu/admissions/process) and “Admissions FAQ” (http://grad.wisc.edu/admissions/faq).

Please consult the table below for key information about this degree program’s admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program’s website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements of the Graduate School as well as the program(s). Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
PROGRAM RESOURCES

Financial assistance, sometimes available to graduate students in communication sciences and disorders, consists of scholarships, fellowships, traineeships, and project and research assistant positions. Financial assistance is very limited and varies from year to year. Students who are considering applying for financial aid should contact the department for further information.

REQUIREMENTS

MINIMUM GRADUATE SCHOOL REQUIREMENTS

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

MODE OF INSTRUCTION Definitions

**Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

**Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

**Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

**Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

CURRICULAR REQUIREMENTS

**Requirements Detail**

**Minimum Credit Requirement**

- **Minimum Credit Requirement**: 54 credits

**Residence Credit Requirement**

- **Minimum Residence Credit Requirement**: 54 credits

**Graduate Coursework Requirement**

- **Minimum Graduate Coursework Requirement**: At least 75% of the minimum number of credits (54) must be taken in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university's Course Guide.

**Overall Requirement**

- **Graduate GPA Requirement**: 3.00 GPA required.
- **Other Grade Requirements**: The Graduate School requires an average grade of B or better in all coursework (300 or above, not including research credits) taken as a graduate student unless conditions for probationary status require higher grades. Grades of Incomplete are considered to be unsatisfactory if they are not removed during the next enrolled semester.
- **Assessments and Examinations**: Doctoral students are required to take a comprehensive preliminary/oral examination after they have cleared their record of all Incomplete and Progress grades (other than research and thesis). Deposit of the doctoral dissertation in the Graduate School is required.
- **Language Requirements**
  - **Doctoral Minor/Breadth Requirements**: All doctoral students are required to complete a minor.

REQUIRED COURSES

The plan of study must encompass an area of specialization chosen from speech pathology, audiology, language disorders, and normal aspects of speech, hearing and language. Although there are no specific course requirements for the major, the study plan should be comprehensive in scope and should be tailored according to the student's research and academic needs. Students must also satisfy a core requirement by taking the following seminar/courses:

1. **Grant writing (3 credits)**
2. **Research methodology (3 credits)**. This may include an independent study/directed readings course or a course from outside of the department focused broadly on something related to research methods, depending on the particular student interest.
3. **Professional seminar (prosem) (4 semesters; 8 credits)**
4. **Teaching methods (1 credit or audit)**.

For the 2016-2017 academic year, students will complete the prosem seminar requirement by registering for a 2 credit independent study each semester with their individual academic advisor, who will be responsible for assigning a prosem grade. Students are expected to attend the weekly prosem lectures and attend any doctoral student discussion groups associated with the weekly lectures.

The teaching requirement can be met by taking a 1-credit seminar taught within or outside the department, a 1-credit independent study with the advisor that involves lecturing or developing course materials or student projects, or an independent study with the major advisor that involves reading and discussing scholarly writings that concern teaching. The form of the teaching credit should be discussed with the major advisor and must have the advisor's approval.

All doctoral students are expected to become proficient in statistical methods. Students are required to have 9 credits of statistical methods at a minimum, which must also include a course on research methods or experimental design. Many students satisfy this requirement by taking courses in the Educational Psychology department or the Statistics department. For instance, a rigorous and worthwhile statistics sequence could be STAT/F&W ECOL/HORT 571 Statistical Methods for Bioscience
I and STAT/F&W ECOL/HORT 572 Statistical Methods for Bioscience II plus an experimental design class, such as ED PSYCH 762 Introduction to the Design of Educational Experiments.

**POLICIES**

**GRADUATE SCHOOL POLICIES**

The Graduate School's Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

**MAJOR-SPECIFIC POLICIES**

**GRADUATE PROGRAM HANDBOOK**

**PRIOR COURSEWORK**

**Graduate Work from Other Institutions**

With program approval, students are allowed to count coursework from other institutions. In no case will coursework be considered that was earned ten or more years prior to admission to the Ph.D.

**UW—Madison Undergraduate**

With program approval, students are allowed to count up to 7 credits from coursework for a UW—Madison undergraduate degree. In no case will coursework be considered that was earned ten or more years prior to admission to the Ph.D.

**UW—Madison University Special**

No prior coursework taken as a UW—Madison University Special student is allowed.

**PROBATION**

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

**ADVISOR / COMMITTEE**

When you are admitted as a doctoral student, you will choose an academic advisor who will serve as your sponsor and mentor for the duration of the program. You may change advisors at any time in the course of your program, provided you and your advisor agree on this.

Your academic advisor may be a regular faculty member in the Department of Communication Sciences and Disorders, or may be affiliate or joint faculty. If an affiliate faculty member is serving as your academic advisor, a regular faculty member must be assigned as your departmental contact to regularly review your progress and adherence to departmental requirements.

Every graduate student is required to have an advisor. An advisor is a faculty member, or sometimes a committee, from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. Students can be suspended from the Graduate School if they do not have an advisor.

To ensure that students are making satisfactory progress toward a degree, the Graduate School expects them to meet with their advisor on a regular basis.

**CREDITS PER TERM ALLOWED**

13 credits

**TIME CONSTRAINTS**

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within 5 years after passing the preliminary examination may be required to take another preliminary examination and to be admitted to candidacy a second time.

**OTHER**

Ph.D. students typically receive funding in the form of research assistantships and work in their advisor's research lab.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**LEARNING OUTCOMES**

1. (Foundations of Research) Possess foundational knowledge about the particular subject area of the chosen area, and be fully conversant with the classic and contemporary literature.
2. (Foundations of Research) Master data collection techniques specific to their chosen area of research.
3. (Foundations of Research) Fully conversant with the theoretical issues and tensions within their chosen area of research.
4. (Foundations of Research) Gain high-level knowledge and expertise in the statistical analysis of research data and graphical approaches to exploration of data sets.

5. (Foundations of Research) Communicate complex ideas in a clear and understandable manner.

6. (Dissertation) Design and execute an original experiment (or experiments) that clearly fills a gap in the existing literature and is worthy of publication(s) in peer-reviewed journals.

7. (Dissertation) Skill, experience, and knowledge base to defend the dissertation work to a committee of five faculty members.

8. (Professional Conduct) Design and conduct experiments.

9. (Professional Conduct) Formulate research questions that are based on sound analyses of existing literature, and that show evidence of logical argument.

10. (Professional Conduct) Understand how to examine data for patterns that are meaningful and patterns that reflect likely data collection errors.

11. (Professional Conduct) Write research proposals and learn to develop carefully argued proposals and explanations.

12. (Professional Conduct) Make presentations of their research at national and international conferences.

13. (Professional Conduct) Pass a summary exam (6 hours written, 2 hours oral) that admits them to candidacy for the PhD degree.

PEOPLE

Information about faculty and staff can be found on the program’s website (https://csd.wisc.edu/peopleofCSD.htm).

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

DEGREES/MAJORS, DOCTORAL MINORS, GRADUATE PROFESSIONAL/CERTIFICATES

- Community and Environmental Sociology, Doctoral Minor (p. 388)
- Sociology, Ph.D. (p. 388)

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY, DOCTORAL MINOR

The mission of the Department of Community and Environmental Sociology is to advance knowledge, teaching, and outreach concerning the relationships between human communities (where people live, work, and play) and their biophysical environment. Learning goals for a doctoral minor in community and environmental sociology are to:

1. understand how social science arguments are constructed and evaluated;

2. develop the ability to assess data quality and understand whether data are appropriate to answer specific questions; and

3. learn general theories on basic social processes, especially those related to the relationships among society and the environment and the social organization of communities.

ADMISSIONS

For more information about the minor, contact:

Charlotte Frascona
Graduate Program Advisor
8127 Sewell Social Science Building
1180 Observatory Drive
frascona@ssc.wisc.edu
608-262-3805

REQUIREMENTS

An Option A minor in Community and Environmental Sociology is composed of 9 credits of graduate-level coursework. Students may enroll in any graduate-only courses (i.e., those numbered 700–999). They may also enroll in any of the advanced graduate—undergraduate courses (i.e., those numbered 300–699) that are either specifically designed for graduate students or assess graduate students separately from undergrads. Such courses carry this designation in the Course Guide: Graduate 50%: Y. A maximum of 3 credits of independent study is allowed.

SOCIOLOGY, PH.D.

The Department of Sociology and the Department of Community and Environmental Sociology conduct a combined graduate program in sociology designed to prepare students for scholarly research, teaching, or applied work. The program leads to the Master of Science degree with a major in sociology and the Doctor of Philosophy degree in sociology. It also offers a minor to students earning a doctoral degree in other departments. All major areas of sociological inquiry are represented in the curriculum. The program consistently ranks at or near the top in studies of U.S. doctoral programs.

Distinguished faculty, outstanding students who learn from and support each other, an increasingly multi-ethnic student body, a curriculum covering a broad spectrum of sociological interests, thriving research projects in many areas, and a stimulating campus environment make UW—Madison an excellent choice for students interested in sociology and/or community and environmental sociology.

Members of the departments also participate in a number of interdisciplinary programs. Faculty and students are involved with several research institutes, including the Applied Population Laboratory, the Center for Demography & Ecology, the Center for Demography of Health & Aging, the Center for Integrated Agricultural Systems, the Center on Wisconsin Strategy, the Holtz Center for Science & Technology Studies, the Institute for Research on Poverty, the Institute on Aging, the Nelson Institute for Environmental Studies, the Wisconsin Center for Education Research, and the University of Wisconsin Survey Center. Further information about faculty and areas of study is available on the department websites: Department of Sociology (http://www.ssc.wisc.edu/soc), and Department of Community and Environmental Sociology (http://dces.wisc.edu).
DEGREES AND CAREER GOALS

The sociology graduate program admits students who intend to earn a Ph.D. Students complete a Master of Science degree on the way to the Ph.D. or receive a waiver of the program's master's requirements based on their having written a thesis and obtained a master's degree previously. A few students leave the program after completing the master's degree and pursue careers in the public and private sectors. Of those who graduate with the Ph.D., a majority obtain university teaching and/or research positions; others take research and/or administrative positions in government organizations, non-profit organizations, or private firms.

ADMISSIONS

Please consult the table below for key information about this degree program's admissions requirements. The program may have more detailed admissions requirements, which can be found below the table or on the program's website. Graduate admissions is a two-step process between academic programs and the Graduate School. Applicants must meet the minimum requirements (https://grad.wisc.edu/apply/requirements) of the Graduate School as well as the program(s).

Once you have researched the graduate program(s) you are interested in, apply online (https://grad.wisc.edu/apply).

</tbody>
</table>

The program receives a large number of applications each fall from highly qualified individuals, requiring the admissions committee to be extremely selective. There is a very strong preference for students planning to pursue a Ph.D.; students whose goal is a master's are rarely accepted. A cohort of approximately 20 students is ideal, in terms of providing mentoring and training to all admitted students as well as making financial support available to them. Total graduate enrollment in the program is roughly 140 students. An undergraduate major in sociology is not a prerequisite. The admissions committee conducts a holistic assessment of each applicant's qualifications. Faculty members look for academic excellence as indicated by undergraduate GPA and Graduate Record Exam (GRE) scores, a writing sample, and references, along with interest in and motivation for graduate study in sociology as indicated by the statement of purpose. (Note that a weakness in one indicator can be balanced by evidence of strong abilities in others.) In particular, committee members look for students with the ability or potential to define a research question succinctly and to use empirical evidence to address significant sociological issues. They also make an effort to identify individuals who demonstrate the potential for a creative approach to investigating empirical and conceptual social science issues.

To apply, please submit an online application, all transcripts, a statement of reasons for graduate study, writing sample, recommendations, and tests scores. GRE scores (general test only) are required of all applicants; international applicants are required to submit English Proficiency test scores—either TOEFL, MELAB, or IELTS—as well. The application deadline is December 15 for the subsequent academic year.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PROGRAM RESOURCES

The departments guarantee five continuous years of funding to all incoming students. Sources of funding include teaching assistantships, project assistantships, research assistantships, traineeships, and fellowships. In addition, some admitted students arrive with outside fellowships such as National Science Foundation or Fulbright awards. International applicants admitted to the program must complete a financial statement that provides evidence of sufficient funds to support themselves for their first year and the intent for support to continue throughout the duration of study. Even though departmental funding is guaranteed, international students often must submit additional financial support documentation, demonstrating that they can cover the gap between the amount the departments provide and the amount the U.S. State Department requires. Additional information about international student expenses can be found here (http://grad.wisc.edu/international).

### GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

### MAJOR-SPECIFIC POLICIES

### GRADUATE PROGRAM HANDBOOK

A Graduate Program Handbook containing all of the program’s policies and requirements is forthcoming from the program.

### PRIOR COURSEWORK

#### Graduate Work from Other Institutions

With program approval, students may count up to 19 credits of graduate coursework from other institutions toward the minimum 51-credit Ph.D. degree requirement and the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

#### UW–Madison Undergraduate

With program approval, students may count up to 7 credits earned in an undergraduate degree program at UW–Madison toward the Ph.D. degree requirements. If the courses are numbered 300–699, the credits may count toward the minimum 51-credit degree requirement. If the courses are numbered 700–999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

#### UW–Madison University Special

With program approval, students may count up to 15 credits taken as a Special Student toward the Ph.D. degree requirements. If the courses are numbered 300–699, the credits may count toward the minimum 51-credit degree requirement. If the courses are numbered 700–999, the credits may also count toward the minimum 50% graduate coursework requirement. Coursework completed ten or more years prior to admission to the doctoral program may not be used to satisfy either of these requirements.

### PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).

3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

Students are expected to have ongoing contact with their faculty advisor. Dissertators who fail to confer with their advisor at least once each semester will not be allowed to register in the subsequent semester. All students are required to submit a yearly progress report that is read and discussed by a committee of faculty during the annual review. In addition, all students are expected to create and regularly update an Individual Development Plan (IDP) and use it as the basis for conversations with their advisor about evolving goals, current strengths, and plans for mastery of new skills. A student’s advisor serves as chair of the dissertation committee, which must have at least five members, all of whom read and evaluate the dissertation prior to the student’s final oral exam. Committees are composed of three graduate faculty in Sociology and/or Community & Environmental Sociology, one graduate faculty member from outside these two departments, and a fifth person who may be any individual deemed qualified by the program’s executive committee.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Doctoral students must complete the Ph.D. within five years of passing the oral preliminary examination and attaining dissertation status.

OTHER

The department guarantees five continuous years of funding to all admitted students. Our graduate students receive support toward their studies through project assistantships, research assistantships, teaching assistantships, lectureships, traineeships, and fellowships (fellowship awards may come from either the university or external agencies). All types of funding provide a full tuition remission, a stipend, and health insurance.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

PROGRAM RESOURCES

The Sociology graduate program offers students an array of professional development opportunities.

All new graduate students are required to take SOC 700 Introductory Proseminar for Graduate Students during their first semester in the program. This course provides an overview of the discipline and the graduate program and addresses such professional development issues as teaching strategies and grant proposal writing. The proseminar also explores topics like productive advisor-advisee relationships, working effectively as part of a research team, co-authoring, and other matters important to graduate school success. Those students affiliated with the multi-disciplinary Center for Demography & Ecology and Center for Demography of Health & Aging are required to enroll in SOC/C&E SOC 995 Research: Methodology Trainees, as well. This course provides training in writing grant applications, conducting research responsibly, making presentations, writing papers for publication, applying for academic and research jobs, and other essential professional skills. In addition, all students who are teaching for the first time are required to participate in a weekly teaching workshop, which focuses on issues typically of concern to new TAs—e.g., developing lesson plans, engaging students, facilitating discussions, and evaluating written work. Finally, all graduate students are required to create an Individual Development Plan to help them define interests and values, evaluate skills, develop specific plans for meeting degree milestones and professional goals, and communicate effectively with their advisors.

Students are encouraged to participate in “brownbags” each semester. The department offers nine of these training seminars, each focusing on a different sociology subfield. Brownbags meet weekly and involve presentation and discussion of student and faculty work-in-progress as well as analysis of current developments and debates; often guest speakers from other universities join the conversation. In addition, second- and third-year students are encouraged to take Soc 875, Professional Development, which covers a broad spectrum of topics—e.g., networking and peer support; time management; IRB approval and considering ethics throughout the research process; writing, revising, and submitting papers to scholarly journals; writing for public audiences; doing outreach work; speaking at conferences; investigating careers within and outside academia; and learning how to mentor. Students may also enroll in Soc 910, Teaching Sociology, a seminar focusing on course development, pedagogy, and evaluation.

The departments host scholars from other institutions who speak at departmental colloquia as well as speakers from campus units such as the Havens Center for Social Justice and the Institute for Research on Poverty. Students are encouraged to attend these events. They are also advised to participate in the program’s workshops on career exploration and creating a professional website. Students are invited to collaborate with faculty and staff serving on department committees, and they are encouraged to develop leadership skills by becoming involved in the Sociology Graduate Student Association.

The departments provide small grants that assist students with research expenses and support those who are traveling to present their work at professional conferences.

The Sociology website includes several pages containing valuable resources for graduate students—e.g., Graduate Student Professional Development, Diversity & Inclusion Resources for Classroom Teaching, and Job Search & Placement Tips.

LEARNING OUTCOMES

1. Demonstrate a broad understanding of major theories, methodologies, and research findings in the sociological literature. Develop critical thinking skills that empower them to analyze strengths and weaknesses in the existing literature, identify knowledge gaps, evaluate evidence, synthesize information, and form conclusions. Attain the skills necessary to teach and conduct research with intellectual and ethical rigor, care, and creativity.
2. Create individualized programs to suit their specific interests and goals. Formulate ideas and develop research questions, design feasible research projects, use appropriate methodologies, analyze and interpret the resulting data, and identify avenues for further exploration. Their original research will expand the current boundaries of knowledge in the field.

3. Write seminar papers and conduct dissertation research, prepare and submit manuscripts resulting from their research for publication in respected journals, and submit papers for presentation at professional conferences. Their independent research will contribute substantively to scholarship in the field.

4. Demonstrate breadth within their learning experience by taking at least four seminars, completing a minor area of study, and passing written preliminary exams in two different subfields. In addition, because our program emphasizes collective responsibility for training, students will be supervised and mentored by several faculty members with a range of expertise. They will also learn to mentor others.

5. Advance the contributions of sociological study to society by conducting research that explores complex ideas, analyzes quantitative and qualitative data, and disseminates new knowledge. Contribute to the vast body of scholarship and applied work that leads to the improvement of society. Share theory, methodology, and the results of research with the undergraduate students whom they teach and thereby foster an understanding of how social life works, what causes social change, and why humans behave in the ways they do.

6. Communicate complex ideas in a clear, organized, engaging manner to diverse audiences. Craft effective grant proposals; gather, manage, and analyze data; write papers that are thought-provoking, concise, and persuasive; present research informatively; listen with care and patience; and give and receive feedback orally and in writing.

7. Foster ethical and professional conduct by demonstrating respect for and having positive interactions with faculty members and staff, graduate student colleagues, and undergraduate students. Foster such conduct by the scientific rigor and honesty with which they design research, collect and analyze data, and interpret and report results.

8. (Career Preparation) Prepare for a range of sustainable careers in academia as well as government, private industry, and the nonprofit sector. Develop flexibility, leadership, and broadly applicable skills in critical thinking, problem solving, project management, collaboration, and communication.

### Comparative Literature and Folklore Studies

#### Degrees/Majors, Doctoral Minors, Graduate/Professional Certificates

- Comparative Literature and Folklore Studies, M.A. (p. 392)
- Comparative Literature and Folklore Studies, Ph.D. (p. 400)
- Comparative Literature, Doctoral Minor (p. 408)

#### People

**Faculty:** Professors Raymo (chair, Sociology), Green (chair, Community & Environmental Sociology), Bell, Borman (affiliated), Carlson, Collins, Curtis, Elwert, Emerbayer, Ermakoff, Fletcher, Freeland, Friedland (affiliated), Fujimura, Gerber, Goldberg, Grodsky, Lim, Logan, Massoglia, Maynard, Montgomery, Morales (affiliated), Nobles, Nordheim (affiliated), Rogers (director, COWS), Schaeffer (director, UWSC), Schwartz, Seidman, Stoecker, Thornton (affiliated), Tiggès, Wright; Associate Professors Alatout, Christens (affiliated), Conti, Eason, Engelman, Feinstein, Grant (director, Graduate Studies), Higgins (affiliated), Light, Shoemaker (affiliated); Assistant Professors Addo (affiliated), Conwell, Garoon, Goffman, Halpern-Meehin (affiliated), Leachman (affiliated), O’Brien (affiliated), Rios, Simmons (affiliated), White, Xiong (affiliated)

#### Comparative Literature and Folklore Studies, M.A.

Admissions to the Comparative Literature and Folklore Studies M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Graduate study in the Department of Comparative Literature and Folklore Studies (CLFS) emphasizes the active research into and theorizing of the comparative, the literary, the folkloric, and the cultural in a global context. CLFS faculty and students investigate cultures within, across, and beyond linguistic, regional, and national boundaries. The comparative and pluri-lingual nature of CLFS at UW–Madison enables the careful and informed study of new and evolving theories and cultural methodologies as well as of prior, present, and emerging cultural and literary practices and phenomena.

CLFS students study problems and create public projects exploring culture, genre, literary and cultural movements, mode, performance, periodization, theory and criticism, tradition, translation, and transmission. They engage problems and questions concerning the interaction and shifting boundaries of "elite" and 'folk' literatures and other forms of creative expression and their transformation in their interaction; folklore and literature with other arts or other disciplines; and the relationships between creative expression and economic, sociopolitical, traditional, and other historical structures and issues, including ideological and value formations.

In addition to professional research and communication in the academic fields of comparative literature and folklore studies, CLFS is committed to public humanities projects that place professional expertise in the service of communities and publics.
Graduate study leads to the M.A. and Ph.D. degrees in CLFS and must be in either a comparative literature named option or a folklore studies named option.

The department also offers doctoral minors in comparative literature and in folklore to interested Ph.D. candidates in other degree programs. At the beginning of study in the minor program, all students seeking a comparative literature or folklore doctoral minor should contact the CLFS director of graduate studies concerning coursework for the minor. Completion of the minor will be certified by either the director of graduate studies or the department chair.

**ADMISSIONS**

Admissions to the Comparative Literature and Folklore Studies M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Students apply to one of the named options:

- Comparative Literature M.A. (p. 395)
- Folklore Studies M.A. (p. 398)

All entering students are admitted into one of the two named options in the M.A. program. Students are accepted into the Ph.D. program upon successful completion of the Second-Year Examination.

**FUNDING**

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

**REQUIREMENTS**

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**MAJOR REQUIREMENTS**

Note: The major is currently non-admitting. Students are admitted through one of the named options (sub-majors) below (p. 394).

The department also offers doctoral minors in comparative literature and in folklore to interested Ph.D. candidates in other degree programs. At the beginning of study in the minor program, all students seeking a comparative literature or folklore doctoral minor should contact the CLFS director of graduate studies concerning coursework for the minor. Completion of the minor will be certified by either the director of graduate studies or the department chair.
Assessments and Examinations

The Second Year Examination is a written examination administered by the program followed by an oral defense.

M.A. named option in Folklore Studies: In consultation with the student’s supervisor, a student pursuing the Folklore named option may elect to produce an M.A. thesis. The thesis will be presented to a committee of three faculty members, including the supervisor, and defended in an oral examination. Depending on the length and nature of the thesis project, and subject to the supervisor’s approval, this project may substitute for all or part of the second-year exam. If a student opts for the M.A. thesis option, that thesis project will be the subject of the master’s oral examination. Otherwise, the second year examination will be the subject of the Master’s Oral Examination.

Students who are not interested in pursuing the Ph.D. may elect to offer an M.A. thesis in place of the seminar requirement. In such cases, the student must work under the direction of a department faculty member who will act as supervisor of the thesis. The thesis will be presented to a committee of three faculty members, including the supervisor, and defended in an oral examination. A bound copy of the thesis must be deposited with the department. Otherwise, the Second Year Examination will be the subject of the Master’s Oral Examination.

Language Requirements

Second Language: An examination in a second language (other than English) must be taken by the end of the second semester of graduate study and before the Second Year Examination.

In the event that the linguistic tradition under examination cannot be covered by a member of the comparative literature and folklore studies faculty, the advisor will invite an appropriate member of the UW–Madison faculty to assist in the administration of the examination.

REQUIRED COURSES

Select a Named Option (p. 394) for courses required.

NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Master of Arts in Comparative Literature and Folklore Studies must select one of the following named options:

- COMPARATIVE LITERATURE AND FOLKLORE STUDIES: COMPARATIVE LITERATURE, M.A. (P. 395)
- COMPARATIVE LITERATURE AND FOLKLORE STUDIES: FOLKLORE STUDIES, M.A. (P. 398)

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://clfs.wisc.edu/sites/clfs.wisc.edu/files/Documents/CLFS%20Grad%20Handbook%20December%202016.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions, provided this coursework relates directly to the student’s CLFS graduate studies. Coursework earned five or more years prior to admission to a master’s degree may not be used to satisfy the CLFS degree requirements.

To apply credit for prior graduate coursework toward requirements the student should furnish the student’s advisor and the director of graduate study with a transcript of the coursework and copies of work done in courses and syllabi, if available. This task should be completed in anticipation of the Second Year exam. Credits deemed eligible to apply toward requirements will be listed in the official form that the department provides to the Graduate School in preparation for the award of the master’s degree.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a Master’s degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.
1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. An advisor is assigned to incoming students but can be changed. Students can be suspended from the Graduate School if they do not have an advisor.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

The Second Year Examination must be taken in the fourth semester of graduate study. If a candidate enters the graduate program with an M.A. in comparative literature from another institution, the Second Year Examination must be taken in the second semester of graduate study. Students entering with an M.A. in another discipline may take the examination in either the second or the fourth semester.

The thesis, written in consultation with the major professor, must be completed no later than two semesters after thesis work begins.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Because we are committed to supporting and working closely with our graduate students, we are able to accept only a limited number (2–3 students per year) of the many excellent applications we receive each year. The CLFS’ admission form also serves as an application for fellowships and teaching assistantships. The deadline for all completed applications (and for fellowship consideration) for the fall semester is December 15.

LEARNING OUTCOMES

1. Articulates, critiques, or elaborates the theories, research methods, and approaches to inquiry and schools of practice in comparative humanities.
2. Identifies sources and assembles evidence pertaining to questions or challenges in comparative humanities.
3. Demonstrates understanding of comparative humanities in a historical, social, or global context.
4. Selects and/or utilizes the most appropriate methodologies and practices.
5. Evaluates or synthesizes information to questions or challenges in comparative humanities.
6. Communicates clearly in ways appropriate to comparative humanities.
7. Recognizes and applies principles of ethical and professional conduct.

PEOPLE

Faculty: Professors Dharwadker, Gilmore (also Landscape Architecture), Layoun, Livorni (chair, also French and Italian), Rosenblum (also Jewish Studies); Associate Professors Livanos, Statkiewicz; Assistant Professors Fielder, Grunewald, Neyrat, Wells. Affiliate Faculty: Adler (German, Nordic, and Slavic), Casid (Art History), Garlough (also Gender and Women’s Studies), Goodkin (French and Italian), Guyer (English), Kern (Asian Languages and Cultures), Longinovic (German, Nordic, and Slavic), Valentine (Linguistics); Associate Professors Kapust (Political Science); International Affiliate Faculty: Ramalho de Sousa Santos (University of Coimbra, Portugal). See also Faculty (http://clfs.wisc.edu/people/faculty) on the department website.

COMPARATIVE LITERATURE AND FOLKLORE STUDIES: COMPARATIVE LITERATURE, M.A.

Admissions to the Comparative Literature and Folklore Studies: Comparative Literature M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

This is a named option within the Comparative Literature and Folklore Studies M.A. (p. 392)

ADMISSIONS

Admissions to the Comparative Literature and Folklore Studies: Comparative Literature M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Applicants to the graduate program in the CLFS should submit to the department a statement of purpose for graduate study, transcripts, letters of recommendation, a writing sample (in English) of no more than 15 pages, a list of foreign language and literature coursework, and Graduate Record Exam (GRE) scores. (International applicants should consult
the department and the Graduate School website for information and additional application requirements regarding TOEFL, MELAB or IELTS tests.)

Admission to graduate study in the comparative literature named option requires advanced foreign language work at the literary level in at least one language other than English; the student’s academic record should demonstrate the ability to work critically in at least two literatures (one of which may be English).

All entering students are admitted into one of the two named options in the M.A. program. Students are accepted into the Ph.D. program upon successful completion of the Second-Year Examination.

### FUNDING

**GRADUATE SCHOOL RESOURCES**

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information ([https://grad.wisc.edu/funding](https://grad.wisc.edu/funding)) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

### REQUIREMENTS

**MINIMUM GRADUATE SCHOOL REQUIREMENTS**

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

**Mode of Instruction Definitions**

- **Face to Face**: These programs are offered primarily on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Evening/Weekend**: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.
- **Online**: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.
- **Hybrid**: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.
- **Accelerated**: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

15 credits

**TIME CONSTRAINTS**

The Second Year Examination must be taken in the fourth semester of graduate study. If a candidate enters the graduate program with an M.A. in comparative literature from another institution, the Second Year Examination must be taken in the second semester of graduate study. Students entering with an M.A. in another discipline may take the examination in either the second or the fourth semester.

The thesis, written in consultation with the major professor, must be completed no later than two semesters after thesis work begins.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**OTHER**

Because we are committed to supporting and working closely with our graduate students, we are able to accept only a limited number (2–3 students per year) of the many excellent applications we receive each year. The CLFS' admission form also serves as an application for fellowships and teaching assistantships. The deadline for all completed applications (and for fellowship consideration) for the fall semester is December 15.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PEOPLE**

**Faculty:** Professors Dharwadker, Gilmore (also Landscape Architecture), Layoun, Livorni (chair, also French and Italian), Rosenblum (also Jewish Studies); Associate Professors Livanos, Statkiewicz; Assistant Professors Fielder, Grunewald, Neyrat, Wells. **Affiliate Faculty:** Adler (German, Nordic, and Slavic), Casid (Art History), Garlough (also Gender and Women’s Studies), Goodkin (French and Italian), Guyer (English), Kern (Asian Languages and Cultures), Longinovic (German, Nordic, and Slavic), Valentine (Linguistics); Associate Professors Kapust (Political Science); **International Affiliate Faculty:** Ramalho de Sousa Santos (University of Coimbra, Portugal). See also Faculty (http://clfs.wisc.edu/people/faculty) on the department website.
COMPARATIVE LITERATURE AND
FOLKLORE STUDIES: FOLKLORE
STUDIES, M.A.

Admissions to the Comparative Literature and Folklore Studies: Folklore Studies M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

This is a named option within the Comparative Literature and Folklore Studies M.A. (p. 392)

ADMISSIONS

Admissions to the Comparative Literature and Folklore Studies: Folklore Studies M.A. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Applicants to the graduate program in the CLFS should submit to the department a statement of purpose for graduate study, transcripts, letters of recommendation, a writing sample (in English) of no more than 15 pages, a list of foreign language and literature coursework, and Graduate Record Exam (GRE) scores. (International applicants should consult the department and the Graduate School website for information and additional application requirements regarding TOEFL, MELAB or IELTS tests.)

Admission to graduate study in the comparative literature named option requires advanced foreign language work at the literary level in at least one language other than English; the student’s academic record should demonstrate the ability to work critically in at least two literatures (one of which may be English).

All entering students are admitted into one of the two named options in the M.A. program. Students are accepted into the Ph.D. program upon successful completion of the Second-Year Examination.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

GRADUATE SCHOOL POLICIES

The required Second Year Examination is a written examination administered by the program followed by an oral defense.

In consultation with the student’s supervisor, a student pursuing the Folklore named option may elect to produce an M.A. thesis. The thesis will be presented to a committee of three faculty members, including the supervisor, and defended in an oral examination. Depending on the length and nature of the thesis project, and subject to the supervisor’s approval, this project may substitute for all or part of the second-year exam. If a student opts for the M.A. thesis option, that thesis project will be the subject of the Master’s Oral Examination. Otherwise, the second year examination will be the subject of the Master’s Oral Examination.

Students who are not interested in pursuing the Ph.D. may elect to offer an M.A. thesis in place of the seminar requirement. In such cases, the student must work under the direction of a department faculty member who will act as supervisor of the thesis. The thesis will be presented to a committee of three faculty members, including the supervisor, and defended in an oral examination. A bound copy of the thesis must be deposited with the department. Otherwise, the Second Year Examination will be the subject of the Master’s Oral Examination.

Second Language: An examination in a second language (other than English) must be taken by the end of the second semester of graduate study and before the Second Year Examination.

In the event that the linguistic tradition under examination cannot be covered by a member of the comparative literature and folklore studies faculty, the advisor will invite an appropriate member of the UW–Madison faculty to assist in the administration of the examination.

Prior Coursework

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of coursework from other institutions, provided this coursework relates directly to the student’s CLFS graduate studies. Coursework earned five or more years prior to admission to a master’s degree may not be used to satisfy the CLFS degree requirements.

To apply credit for prior graduate coursework toward requirements the student should furnish the student’s advisor and the director of graduate study with a transcript of the coursework and copies of work done in courses and syllabi, if available. This task should be completed in anticipation of the Second Year exam. Credits deemed eligible to apply toward requirements will be listed in the official form that the department provides to the Graduate School in preparation for the award of the master’s degree.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned five or more years prior to admission to a Master’s degree is not allowed to satisfy requirements.

Probation

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

Advisor / Committee

Every graduate student is required to have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies. An advisor generally serves as the thesis advisor. An advisor is assigned to incoming
students but can be changed. Students can be suspended from the Graduate School if they do not have an advisor.

**CREDITS PER TERM ALLOWED**

15 credits

**TIME CONSTRAINTS**

The Second Year Examination must be taken in the fourth semester of graduate study. If a candidate enters the graduate program with an M.A. in comparative literature from another institution, the Second Year Examination must be taken in the second semester of graduate study. Students entering with an M.A. in another discipline may take the examination in either the second or the fourth semester.

The thesis, written in consultation with the major professor, must be completed no later than two semesters after thesis work begins.

Master’s degree students who have been absent for five or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

**PROFESSIONAL DEVELOPMENT**

**GRADUATE SCHOOL RESOURCES**

Take advantage of the Graduate School's professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

**PEOPLE**

**Faculty**: Professors Dharwadker, Gilmore (also Landscape Architecture), Layoun, Livorni (chair, also French and Italian), Rosenblum (also Jewish Studies); Associate Professors Livanos, Statkiewicz; Assistant Professors Fielder, Grunewald, Neyrat, Wells. **Affiliate Faculty**: Adler (German, Nordic, and Slavic), Casid (Art History), Garlough (also Gender and Women's Studies), Goodkin (French and Italian), Guyer (English), Kern (Asian Languages and Cultures), Longinovic (German, Nordic, and Slavic), Valentine (Linguistics); Associate Professors Kapust (Political Science); **International Affiliate Faculty**: Ramalho de Sousa Santos (University of Coimbra, Portugal). See also Faculty (http://clfs.wisc.edu/people/faculty) on the department website.

**COMPARATIVE LITERATURE AND FOLKLORE STUDIES, PH.D.**

Admissions to the Comparative Literature and Folklore Studies Ph.D. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Graduate study in the Department of Comparative Literature and Folklore Studies (CLFS) emphasizes the active research into and theorizing of the comparative, the literary, the folkloric, and the cultural in a global context. CLFS faculty and students investigate cultures within, across, and beyond linguistic, regional, and national boundaries. The comparative and pluri-lingual nature of CLFS at UW–Madison enables the careful and informed study of new and evolving theories and cultural methodologies as well as of prior, present, and emerging cultural and literary practices and phenomena.

CLFS students study problems and create public projects exploring culture, genre, literary and cultural movements, mode, performance, periodization, theory and criticism, tradition, translation, and transmission. They engage problems and questions concerning the interaction and shifting boundaries of ‘elite’ and ‘folk’ literatures and other forms of creative expression and their transformation in their interaction; folklore and literature with other arts or other disciplines; and the relationships between creative expression and economic, sociopolitical, traditional, and other historical structures and issues, including ideological and value formations. In addition to professional research and communication in the academic fields of comparative literature and folklore studies, CLFS is committed to public humanities projects that place professional expertise in the service of communities and publics.

Graduate study leads to the M.A. and Ph.D. degrees in CLFS and must be in either a comparative literature named option or a folklore studies named option.

The department also offers doctoral minors in comparative literature and in folklore to interested Ph.D. candidates in other degree programs. At the beginning of study in the minor program, all students seeking a comparative literature or folklore doctoral minor should contact the CLFS director of graduate studies concerning coursework for the minor. Completion of the minor will be certified by either the director of graduate studies or the department chair.

**ADMISSIONS**

Admissions to the Comparative Literature and Folklore Studies Ph.D. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Students apply to one of the named options:

- Comparative Literature M.A. (p. 395)
- Folklore Studies M.A. (p. 398)

All entering students are admitted into one of the two named options in the M.A. program. Students are accepted into the Ph.D. program upon successful completion of the Second-Year Examination.
FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. CURRICULAR REQUIREMENTS

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Credit Requirement</td>
<td>51 credits</td>
</tr>
<tr>
<td>Minimum Residence Credit Requirement</td>
<td>32 credits</td>
</tr>
</tbody>
</table>

Minimum Graduate Coursework Requirement: Successful completion of the Ph.D. requires 51 credit hours of coursework. This requirement includes that at least 50 percent of these credit hours must be received in graduate-level coursework; courses with the Graduate Level Coursework attribute are identified and searchable in the university’s Course Guide.

Overall Graduate GPA Requirement: 3.5 GPA required.

Other Grade Requirements: None.

Assessments and Examinations:

Comprehensive Examinations: The comprehensive examinations, or "prelims," consist of three written examinations based on reading lists that have been approved by the advisor and the reading committees followed by an oral defense.

Dissertation:

The dissertation is a written, substantial, and original contribution to knowledge guided by a dissertation committee consisting of the student’s advisor and two members of the faculty of the department. The student will submit to the dissertation committee for approval a written proposal that will include a bibliography of primary and secondary source materials.

Upon completion of the dissertation, the student will be examined in an oral defense of the dissertation and related areas by members of the dissertation committee in concert with two additional members, at least one of which must be from a related discipline outside of the department.

Language Requirements:

Second language: An examination in a second language (other than English) must be taken by the end of the second semester of graduate study and before the Second Year Examination.

In the event that the linguistic tradition under examination cannot be covered by a member of the comparative literature and folklore studies faculty, the advisor will invite an appropriate member of the UW–Madison faculty to assist in the administration of the examination.

Third Language: A third language (other than English and the second language) proficiency must be demonstrated by the completion of an appropriate intermediate or advanced literature course with a grade of AB or better. This requirement must be satisfied before the Comprehensive (or "prelim") Examinations.

Fourth Language Reading Requirement: For students pursuing the Comparative Literature Ph.D. option, each candidate must demonstrate reading knowledge of at least one of the following languages: Sanskrit, Hebrew, Classical Greek, Latin, a Medieval language, or a major Asian or African language. This requirement is satisfied by the completion of an appropriate course with a grade of AB or better.
Doctoral

Minor/Breadth Requirements

All doctoral students are required to complete a 12-credit minor. Students may pursue a concentrated minor including the Option A or a distributed minor (Option B). Students in either of the named options in the CLFS Ph.D. program may pursue minors in their department as long as they do not have the same name as their named option.

REQUIRED COURSES

Select a Named Option (p. 402) for courses required.

NAMED OPTIONS (SUB-MAJORS)

A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. Students pursuing the Ph.D. in Comparative Literature and Folklore Studies must select one of the following named options:

- **COMPARATIVE LITERATURE AND FOLKLORE STUDIES: COMPARATIVE LITERATURE, PH.D.** (P. 403)
- **COMPARATIVE LITERATURE AND FOLKLORE STUDIES: FOLKLORE STUDIES, PH.D.** (P. 406)

POLICIES

GRADUATE SCHOOL POLICIES

The Graduate School’s Academic Policies and Procedures (https://grad.wisc.edu/acadpolicy) provide essential information regarding general university policies. Program authority to set degree policies beyond the minimum required by the Graduate School lies with the degree program faculty. Policies set by the academic degree program can be found below.

MAJOR-SPECIFIC POLICIES

GRADUATE PROGRAM HANDBOOK

The Graduate Program Handbook (https://clfs.wisc.edu/sites/clfs.wisc.edu/files/Documents/CLFS%20Grad%20Handbook%20December%202016.pdf) is the repository for all of the program’s policies and requirements.

PRIOR COURSEWORK

**Graduate Work from Other Institutions**

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions, provided this coursework relates directly to the student’s CLFS graduate studies. Coursework earned five or more years prior to admission to a master’s degree may not be used to satisfy the CLFS degree requirements.

To apply credit for prior graduate coursework toward requirements the student should furnish the student’s advisor and the director of graduate study with a transcript of the coursework and copies of work done in courses and syllabi, if available. This task should be completed in anticipation of the Second Year exam. Coursework earned ten or more years prior to admission to the doctoral degree may not be used to satisfy the CLFS degree requirements.

**UW–Madison Undergraduate**

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

**UW–Madison University Special**

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies. The advisor also serves as the dissertation advisor. An advisor is assigned to incoming student but can be changed. Students can be suspended from the Graduate School if they do not have an advisor.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Comprehensive examinations must be taken only on completion of the requisite minimum degree credits.

Within six weeks of successful completion of the comprehensive examination, candidates must submit a working draft of a dissertation proposal their dissertation committee members.

The dissertation must be deposited within two weeks of completion of all degree requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may by require to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements;
that coursework may not count toward Graduate School credit requirements.

OTHER
Because we are committed to supporting and working closely with our graduate students, we are able to accept only a limited number (2–3 students per year) of the many excellent applications we receive each year. The CLFS’ admission form also serves as an application for fellowships and teaching assistantships. The deadline for all completed applications (and for fellowship consideration) for the fall semester is December 15.

PROFESSIONAL DEVELOPMENT

GRADUATE SCHOOL RESOURCES
Take advantage of the Graduate School’s professional development resources (https://grad.wisc.edu/pd) to build skills, thrive academically, and launch your career.

LEARNING OUTCOMES

1. Articulates research problems, potentials, and limits with respect to theory, knowledge, and practice in comparative humanities.
2. Formulates ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge in comparative humanities.
3. Creates research, scholarship, or performance that makes a substantive contribution.
4. Demonstrates breadth within their learning experiences.
5. Advances contributions in comparative humanities to society.
6. Communicates complex ideas in a clear and understandable manner.
7. Fosters ethical and professional conduct.

PEOPLE

Faculty: Professors Dharwadker, Gilmore (also Landscape Architecture), Layoun, Livorni (chair, also French and Italian), Rosenblum (also Jewish Studies); Associate Professors Livanos, Statkiewicz; Assistant Professors Fielder, Grunewald, Neyrat, Wells. Affiliate Faculty: Adler (German, Nordic, and Slavic), Casid (Art History), Garlough (also Gender and Women’s Studies), Goodkin (French and Italian), Guyer (English), Kern (Asian Languages and Cultures), Longinovic (German, Nordic, and Slavic), Valentine (Linguistics); Associate Professors Kapust (Political Science); International Affiliate Faculty: Ramalho de Sousa Santos (University of Coimbra, Portugal). See also Faculty (http://clfs.wisc.edu/people/faculty) on the department website.

This is a named option within the Comparative Literature and Folklore Studies, Ph.D. (p. 400)

ADMISSIONS

Admissions to the Comparative Literature and Folklore Studies: Comparative Literature Ph.D. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

Applicants to the graduate program in the CLFS should submit to the department a statement of purpose for graduate study, transcripts, letters of recommendation, a writing sample (in English) of no more than 15 pages, a list of foreign language and literature coursework, and Graduate Record Exam (GRE) scores. (International applicants should consult the department and the Graduate School website for information and additional application requirements regarding TOEFL, MELAB or IELTS tests.)

Admission to graduate study in the comparative literature named option requires advanced foreign language work at the literary level in at least one language other than English; the student’s academic record should demonstrate the ability to work critically in at least two literatures (one of which may be English).

All entering students are admitted into one of the two named options in the M.A. program. Students are accepted into the Ph.D. program upon successful completion of the Second-Year Examination.

FUNDING

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.

PRIOR COURSEWORK

Graduate Work from Other Institutions

With program approval, students are allowed to count no more than 9 credits of graduate coursework from other institutions, provided this coursework relates directly to the student's CLFS graduate studies. Coursework earned five or more years prior to admission to a master's degree may not be used to satisfy the CLFS degree requirements.

To apply credit for prior graduate coursework toward requirements the student should furnish the student's advisor and the director of graduate study with a transcript of the coursework and copies of work done in courses and syllabi, if available. This task should be completed in anticipation of the Second Year exam. Coursework earned ten or more years prior to admission to the doctoral degree may not be used to satisfy the CLFS degree requirements.

UW–Madison Undergraduate

No credits from a UW–Madison undergraduate degree are allowed to count toward the degree.

UW–Madison University Special

With program approval, students are allowed to count no more than 9 credits of coursework numbered 300 or above taken as a UW–Madison Special student. Coursework earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

PROBATION

The Graduate School regularly reviews the record of any student who earned grades of BC, C, D, F, or Incomplete in a graduate course (300 or above), or grade of U in research credits. This review could result in academic probation with a hold on future enrollment or in being suspended from the Graduate School.

1. Good standing (progressing according to standards; any funding guarantee remains in place).
2. Probation (not progressing according to standards but permitted to enroll; loss of funding guarantee; specific plan with dates and deadlines in place in regard to removal of probationary status).
3. Unsatisfactory progress (not progressing according to standards; not permitted to enroll, dismissal, leave of absence or change of advisor or program).

ADVISOR / COMMITTEE

Every graduate student is required to have an advisor. An advisor is a faculty member from the major department responsible for providing advice regarding graduate studies. The advisor also serves as the dissertation advisor. An advisor is assigned to incoming student but can be changed. Students can be suspended from the Graduate School if they do not have an advisor.

CREDITS PER TERM ALLOWED

15 credits

TIME CONSTRAINTS

Comprehensive examinations must be taken only on completion of the requisite minimum degree credits.

Within six weeks of successful completion of the comprehensive examination, candidates must submit a working draft of a dissertation proposal their dissertation committee members.

The dissertation must be deposited within two weeks of completion of all degree requirements.

A candidate for a doctoral degree who fails to take the final oral examination and deposit the dissertation within five years after passing the preliminary examination may require to take another preliminary examination and to be admitted to candidacy a second time.

Doctoral degree students who have been absent for ten or more consecutive years lose all credits that they have earned before their absence. Individual programs may count the coursework students completed prior to their absence for meeting program requirements; that coursework may not count toward Graduate School credit requirements.

OTHER

Because we are committed to supporting and working closely with our graduate students, we are able to accept only a limited number (2–3 students per year) of the many excellent applications we receive each year. The CLFS’ admission form also serves as an application for fellowships and teaching assistantships.
The deadline for all completed applications (and for fellowship consideration) for the fall semester is December 15.

FACULTY

Faculty: Professors Dharwadker, Gilmore (also Landscape Architecture), Layoun, Livorni (chair, also French and Italian), Rosenblum (also Jewish Studies); Associate Professors Livanos, Statkiewicz; Assistant Professors Fielder, Grunewald, Neyrat, Wells. Affiliate Faculty: Adler (German, Nordic, and Slavic), Casid (Art History), Garlough (also Gender and Women’s Studies), Goodkin (French and Italian), Guyer (English), Kern (Asian Languages and Cultures), Longinovic (German, Nordic, and Slavic), Valentine (Linguistics); Associate Professors Kapust (Political Science); International Affiliate Faculty: Ramalho de Sousa Santos (University of Coimbra, Portugal). See also Faculty (http://clifs.wisc.edu/people/faculty) on the department website.

ADMISSIONS

Admissions to the Comparative Literature and Folklore Studies: Folklore Studies Ph.D. have been suspended as of summer 2018. If you have any questions, please contact the department (complit@lss.wisc.edu).

This is a named option within the Comparative Literature and Folklore Studies Ph.D. (p. 400)

CURRICULAR REQUIREMENTS

Minimum Graduate School Requirements

Review the Graduate School minimum academic progress and degree requirements (p. 15), in addition to the program requirements listed below.

Named Option Requirements

Mode of Instruction Definitions

Evening/Weekend: These programs are offered in an evening and/or weekend format to accommodate working schedules. Enjoy the advantages of on-campus courses and personal connections, while keeping your day job. For more information about the meeting schedule of a specific program, contact the program.

Online: These programs are offered primarily online. Many available online programs can be completed almost entirely online with all online programs offering at least 50 percent or more of the program work online. Some online programs have an on-campus component that is often designed to accommodate working schedules. Take advantage of the convenience of online learning while participating in a rich, interactive learning environment. For more information about the online nature of a specific program, contact the program.

Hybrid: These programs have innovative curricula that combine on-campus and online formats. Most hybrid programs are completed on-campus with a partial or completely online semester. For more information about the hybrid schedule of a specific program, contact the program.

Accelerated: These on-campus programs are offered in an accelerated format that allows you to complete your program in a condensed time-frame. Enjoy the advantages of on-campus courses with minimal disruption to your career. For more information about the accelerated nature of a specific program, contact the program.

FUNDING

GRADUATE SCHOOL RESOURCES

Resources to help you afford graduate study might include assistantships, fellowships, traineeships, and financial aid. Further funding information (https://grad.wisc.edu/funding) is available from the Graduate School. Be sure to check with your program for individual policies and processes related to funding.
Assessments and Examinations
The comprehensive examinations, or "prelims," consist of three written examinations based on reading lists that have been approved by the advisor and the reading committees followed by an oral defense.

Dissertation
The dissertation is a written, substantial, and original contribution to knowledge guided by a dissertation committee consisting of the student's advisor and two members of the faculty of the department. The student will submit to the dissertation committee for approval a written proposal that will include a bibliography of primary and secondary source materials.

Upon completion of the dissertation, the student will be examined in an oral defense of the dissertation and related areas by members of the dissertation committee in concert with two additional members, at least one of which must be from a related discipline outside of the department.

Language Requirements
Second language: An examination in a second language (other than English) must be taken by the end of the second semester of graduate study and before the Second Year Examination.

In the event that the linguistic tradition under examination cannot be covered by a member of the comparative literature and folklore studies faculty, the advisor will invite an appropriate member of the UW–Madison faculty to assist in the administration of the examination.

Third Language: A third language (other than English and the second language) proficiency must be demonstrated by the completion of an appropriate intermediate or advanced literature course with a grade of AB or better. This requirement must be satisfied before the Comprehensive (or "prelim") Examinations.
