Certificate students may enroll in a capstone course after the majors have enrolled, and the capstone course will be allowed to count in the thematic requirement. Junior standing is required for enrollment.

PASS/FAIL COURSES

Courses taken on a pass/fail basis will not count toward the certificate.

Courses listed under more than one category in the curriculum may be used to satisfy only one category.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Explain the social and historical processes that impact our current environments. Interpret the meanings, values, and aesthetics that are created, shaped, and revealed as humans interact with and modify the environments they inhabit.
2. Explain ecological processes and fundamental principles of environmental sciences relating to humanity's key environmental challenges of the past, present, and future.
3. Analyze and respond to environmental questions by applying interdisciplinary approaches that integrate multiple perspectives, including those from a coordinate major.
4. Recognize through critical thinking a diversity of viewpoints, ethical commitments, and disciplinary approaches to environmental concerns across various scales from the local to the global.
5. Demonstrate excellent reading, writing, communication, and research skills, both individually and in interdisciplinary teams.

ADVISING AND CAREERS

Environmental studies students are represented in majors across campus and in most undergraduate schools and colleges. Environmental studies certificate students should utilize the career office for their home school as appropriate. All students, not just Letters & Science students, can also benefit from SuccessWorks at the College of Letters & Science.

PEOPLE

A complete list of faculty and staff affiliated with the Nelson Institute is available here. (<http://nelson.wisc.edu/people/>)

SUSTAINABILITY, CERTIFICATE

WHY CHOOSE A SUSTAINABILITY CERTIFICATE?

Perhaps the best reason for pursuing a sustainability certificate is a personal interest in learning practical skills to make a difference in the world—in your life, in your job, and in your community. Working toward a certificate offers students the opportunity to pursue interests that complement their major(s). For example, the interdisciplinary nature of sustainability encourages students to consider multiple perspectives. In doing so, this certificate provides a breadth of perspective highly applicable to complex problems, such as those we face in our communities, in our workplaces, and in our personal lives.

The Nelson Institute also offers a major and another certificate:

Environmental Studies Major (p. 720)
Environmental Studies Certificate (p. 1417)

The sustainability certificate can be added to any undergraduate major. Students who earn a sustainability certificate may **not** earn the environmental studies certificate or the certificate in engineering for energy sustainability.

HOW TO GET IN

AM I ELIGIBLE TO APPLY?

Undergraduate students enrolled at the University of Wisconsin—Madison may apply for the sustainability certificate if they meet two criteria: (1) completion of one of the approved courses for the certificate with a grade of B or better and (2) are **not** earning the environmental studies certificate, or the certificate in engineering for energy sustainability.

HOW CAN I APPLY?

Interested? Eligible as described above? If so, fill out this application form (https://uwmadison.qualtrics.com/SE/?SID=SV_6DWJeRMGBmPHmDz). Be ready to upload an unofficial copy of your transcript and to answer two short essay questions (fewer than 500 words). The first question asks "Pick an experience from your own life, and explain how it has influenced your interest in sustainability." The second question asks "If you could change one thing in the world, what would it be and why?" You might find it helpful to draft your responses beforehand.

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

- A 3.00 GPA in all coursework that counts toward the certificate
- 12 credits of coursework, 3 credits from each of the four main categories below
- 1 credit in ENVIR ST 398 Independent Study: Sustainability Community Engagement for a sustainability-related community service project
- Courses taken on a pass/fail basis will not count toward the certificate.

EXCEPTIONS

Students can request to use a maximum of 3 credits from the "Multidimensional and Cross-Topics Courses" list to substitute for 3 credits from the economic, social or environmental category. Requests can be granted to the extent that the student's proposed course portfolio still covers all four dimensions of the certificate's curriculum. Such a request requires that the student submits a written explanation how the substitute course meets the learning outcomes (<https://guide.wisc.edu/undergraduate/environmental-studies/environmental-studies/sustainability-certificate/#learningoutcomestext>) of the certificate and assists the student in reaching his or her individual goals for taking the certificate. Please also submit a syllabus of the substitute class. All substitution requests require approval.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Students will be able to identify, critically analyze, and propose solutions to the environmental, social, and economic dimensions of sustainability.
2. Students will be able to engage in systems thinking and practice so as to address the interrelationships among the three dimensions of sustainability.
3. Students will develop the capacity for an engaged life in which theory, practice, and reflection are integrated in the pursuit of a more sustainable world.

ADVISING AND CAREERS

Nelson Institute students are represented in majors across campus and in most undergraduate schools and colleges. Sustainability certificate students should utilize the career office for their home school as appropriate. All students, not just Letters & Science students, can also benefit from SuccessWorks at the College of Letters & Science.

PEOPLE

A complete list of faculty and staff affiliated with the Nelson Institute is available here. (<http://nelson.wisc.edu/people/>)

SCHOOL OF BUSINESS

The School of Business (<https://business.wisc.edu/>) attracts talented, energetic, creative students who are known for their strong work ethic and technical capabilities. Students in the Wisconsin School of Business Undergraduate Program (https://business.wisc.edu/undergraduate/?_ga=1.242357250.1617918104.1481300313) experience innovative coursework directed by leading scholars in business. They have opportunities to connect with outstanding alumni for applied learning, mentoring, and general life-experience lessons. Students also enjoy access to an unlimited array of activities, clubs, and life-changing opportunities.

In 1900, UW–Madison established one of the first six commerce programs in the country, beginning as a department in the College of Letters & Science, and receiving separate school status by a 1944 act of the Wisconsin Legislature. The School of Business was a founding member of Beta Gamma Sigma (<https://www.betagammastigma.org/home/>), a national professional business honor society and the Association to Advance Collegiate Schools of Business (AACSB) (<http://www.aacsb.edu/>), the standard-setting organization for collegiate business education. The School's undergraduate and graduate programs were reaccredited by the AACSB in 2017.

EXPERIENCE A HIGH-CALIBER UNDERGRADUATE BUSINESS EDUCATION

The University of Wisconsin–Madison is a world-class university, nationally and internationally recognized for academic excellence, incredible students, and inspiring faculty. As a student in the undergraduate business program, you will have access to the academic and co-curricular resources of the entire university, combined with the personalized experience of being a Business Badger. It's like having the best of both worlds.

The curriculum for the WSB Undergraduate Program incorporates a foundation in the liberal arts with a business education, including focused coursework in eleven majors. The liberal arts foundation—including courses taken outside of the School of Business—develops your skills in thinking critically, analyzing problems, generating creative solutions, communicating effectively, and working in diverse teams. These are all skills top employers seek when filling positions with strong potential for advancement.

Eleven undergraduate business majors are offered, giving you the specialized knowledge you need to begin a great career. You will graduate with skills gained from top-notch faculty and real-world learning experiences. It all adds up to an educational experience that prepares you for career success and to be a trusted leader. The School of Business offers many certificate options. There are also opportunities for further education through our graduate, master's, and doctoral programs.

THE BUSINESS BADGER EXPERIENCE

The **Wisconsin Business Badger Experience** is about creating strong foundations and exploring student passions. Business Badgers take part in core experiences and amazing opportunities on their path toward graduation. All our Business Badgers gain academic preparation that applies learning in and out of the classroom building both technical knowledge rooted in business school courses and a broad-based liberal arts education. Our career preparation builds skills that don't just get students a first job, but build a life-long growth mindset. We staff our own

Student Life office which supports over 40 student organizations that are integrated into our leadership framework and corporate partners. Our students develop a leadership style that is grounded in personal integrity, inclusive engagement, and community. Nearly all of our students participate in at least one internship and 40% of our students study abroad. These experiences help students develop intercultural competence that prepare them to be trusted global business leaders. Our network of Wisconsin School of Business Alumni is 40,000 strong—and growing—and fiercely loyal to our students. As students build their Business Badger Experience they are challenged and supported by a team of outstanding faculty and staff.

THE ACCENTURE LEADERSHIP CENTER

The Accenture Leadership Center (<https://business.wisc.edu/undergraduate/leadership/>) (ALC) was one of the first in-house leadership centers at a US business school. Today, it continues to be student-driven and alumni-supported. The center offers a variety of activities, workshops, service opportunities and leadership training events. WSB undergraduate students graduate with the confidence, self-awareness, and professional skills to lead and inspire others.

SCHOOL OF BUSINESS CLUBS

There are more than 40 student-run clubs associated with the School of Business. These clubs enable students to connect with peers interested in similar majors or career fields. Clubs also have access to funding to help them go to career and industry-related conferences.

PERSONAL AND PROFESSIONAL FOUNDATIONS IN BUSINESS (GENERAL BUSINESS 110)

Every student admitted to the School of Business takes GEN BUS 110 Personal and Professional Foundations in Business. This 1-credit course helps students explore their leadership style, who they are as individuals, and how they function in team-orientated tasks. The course also provides career foundations such as resume building and introduction of networking at career fairs.

BUSINESS BADGER BADGES: LEADERSHIP PATHWAYS TO SUCCESS

The Business Badger Badge program is a customizable co-curricular leadership program that combines workshops, experiences, and reflection opportunities designed to provide a deeper level of understanding and practice with certain skills/competencies. By completing specific criteria for each badge, students can earn digital achievements, which serve as credentials that can be showcased via personal profile, social media, and shared with potential employers as a way to help articulate skills gained from completing a badge. The badges available to earn are Personal Leadership Styles, Group Dynamics, and Inclusive Leadership. Each Badge has specific learning outcomes and criteria. Additionally, we've collaborated with the campus leadership office to make sure our program is integrated into the campus leadership certificate as well!

PEOPLE

For a complete listing of Wisconsin School of Business Undergraduate Program staff, please visit our directory (<https://business.wisc.edu/undergraduate/contact/>).

ENTERING THE SCHOOL

A STUDENT-CENTERED ADMISSIONS PROCESS

The School of Business boasts a student body that is focused and engaged. Our highly talented undergraduate students, in turn, attract recruiting employers who return to Wisconsin year after year to fill internships and full-time positions.

Although admission to the Wisconsin Undergraduate Business Program is selective, we provide a variety of informational and workshop events to help you prepare for the admissions process.

Students may apply and enroll into the residential Undergraduate Business Program through the following pathways:

- Prospective high school students may be considered for Direct Admission to Business based on their application to the University of Wisconsin-Madison. Simply list a Business interest as your top academic area of interest on the University application.
- Current University of Wisconsin-Madison students can participate in a series of preparatory workshops and apply through the spring-term pre-business admissions process.
- Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin-Madison and the Wisconsin School of Business during the spring term for fall enrollment.

Once a student knows they have a Business interest, earlier enrollment in the Undergraduate Business Program is encouraged to maximize the

use of resources like advising, career coaching, co-curricular engagement, and other enriching opportunities. The right choice for you depends on your current goals and where you are in your journey to becoming a Business Badger. Prospective/pre-business applicants are encouraged to familiarize themselves with the admissions eligibility policies listed on the Wisconsin BBA Admissions Policies (<https://business.wisc.edu/undergraduate/admissions/pre-business-policies/>) page.

For more information about these options, including directions for navigating the admissions processes and tips for submitting a competitive application, please visit the Wisconsin BBA Program website (<https://business.wisc.edu/undergraduate/admissions/>).

Transfer applicants (<https://business.wisc.edu/undergraduate/admissions/transfer-students/>) should visit the School of Business website to determine which process fits their situation.

Questions along the way? We're here to help. Reach out to a Wisconsin BBA Student Ambassador (<https://business.wisc.edu/undergraduate/contact/ambassadors/>) or contact the School of Business Undergraduate Program Office (<https://business.wisc.edu/undergraduate/contact/>) at 608-890-2490.

BUSINESS ONLINE UNDERGRADUATE PROGRAMS

Students applying to a Wisconsin School of Business Online Undergraduate Program apply through UW-Madison Online (<https://online.wisc.edu/>). Students who have earned 12 or more college credits are eligible to apply. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>) or email a UW-Madison Online enrollment coach (uwmadisononline@wisc.edu). They are here to help you navigate the application process.

WISCONSIN EXPERIENCE

INTEGRATE CLASSROOM LEARNING WITH DIRECT EXPERIENCE

Wisconsin School of Business Undergraduate students are expected to apply learning inside and outside the traditional classroom in ways that have a positive impact on the world. Known as the Wisconsin Experience, this principle draws upon opportunities ranging from conducting research to embracing entrepreneurship to developing multicultural competence (<https://business.wisc.edu/undergraduate/diversity-inclusion/>), on campus or through study abroad programs (<https://business.wisc.edu/undergraduate/study-abroad/>). By applying classroom learning in leadership programs (<https://business.wisc.edu/undergraduate/leadership/>) or student organizations (<https://business.wisc.edu/undergraduate/student-organizations/>), you will build your résumé and gain practical experience in using your business skills.

POLICIES AND REGULATIONS

RESIDENTIAL PROGRAM

School of Business students are responsible for being familiar with the policies that affect them. School of Business policy is subject to change, so be sure to review this website for the most up-to-date information. Questions related to policy interpretation can be directed to your academic advisor for clarification. Please note that pre-business students are subject to the academic policies and procedures of their current school/college. **In addition to the academic-related policies**

below, we strongly encourage prospective/pre-business applicants to review all admission policies listed on the Wisconsin BBA Admission Policies (<https://business.wisc.edu/undergraduate/admissions/pre-business-policies/>) page.

COURSES/ENROLLMENT

Business Credit Limit

Undergraduate students may not take more than 75 credits of School of Business courses.

10-semester rule (reentry and transfer)

Students re-entering after an absence of 10 or more semesters:

A pre-business student seeking admission to the School of Business is responsible for completing all of the current School of Business admission and degree requirements that are in effect at the time of re-entry to UW–Madison.

A business student reentering UW–Madison is responsible for completing all the current School of Business degree requirements that are in effect at the time of reentry to UW–Madison and the School of Business. Students who left the institution as a business student do not need to reapply for admission to the School of Business when they return.

Transfer Students seeking admission to the School of Business:

A transfer student whose first college entry date is ten or more semesters prior to UW–Madison matriculation must complete all of the current School of Business requirements that are in effect at the time of UW–Madison matriculation.

A transfer student whose first college entry date is less than ten semesters prior to UW–Madison matriculation must complete all School of Business requirements that were in effect at the time of the student's first college matriculation date.

Graduation

The School of Business will graduate a student at the end of the semester (spring, summer or fall) in which all university, BBA degree and business major requirements are complete and have a cumulative GPA of 2.00 or higher. Students cannot graduate with a temporary grade (<https://registrar.wisc.edu/grades-and-gpa/>), such as I or NR, for any requirements. Speak with the course instructor or your advisor to resolve temporary grades. The date when the outstanding Incompletes (I) are resolved will determine the semester of graduation.

If a student is completing their final coursework while not in residence, the student must notify the WSB Undergraduate Program's Advising Office when the official transcript has been evaluated by UW–Madison and appears on their record. This allows their DARS to be certified for graduation.

Graduation will not be postponed for any incomplete School of Business certificate(s), specialization(s); or additional certificate(s) or major(s) outside the School of Business.

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all graduation requirements have been met.

Student responsibility for enrollment

Each student is responsible for arranging a course list that will permit satisfactory progress toward degree requirements and a class schedule

that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor prior to initial enrollment and before making any changes to enrollment.

No-Credit Courses

The School of Business does not award credit for the following:

- Failed courses (grade of "F")
- Repeated courses (except where a repeat is allowed)
- Courses for which a student may not receive credit because of a previously completed course (as indicated in the Course Search & Enroll App)

Being enrolled in any of the above courses could impact your application to the School of Business. Before enrolling in and taking any of the above courses, please consult your academic advisor.

Part-time Enrollment

To maintain full-time standing, students must be enrolled in 12–18 credits.

Undergraduate students who are considering dropping below full time (less than 12 credits) are responsible for knowing how part-time status will affect them. Below are some of the more common scenarios to explore before dropping credits:

International Students:

Dropping below full time as an international student can have serious consequences, up to and including deportation. Please be sure to check with the International Student Services Office before dropping below 12 credits.

Scholarships, Grants, and Other Awards:

Depending on the conditions of the scholarship, a student may be required to be full time in order to remain eligible for an award. Be sure to check the stipulations for any awards you have received.

Financial Aid:

Be sure to check with the Office of Student Financial Aid to find out if being part time will affect your financial aid package.

Tuition Refunds:

Depending on when the credits are dropped, you may be eligible for a tuition refund. Check the registrar's website for information about refund deadlines.

Athletes:

Varsity athletes are governed by Big Ten and NCAA rules that do not allow them to drop below full time. Be sure to check with your coach and athletic advisor before dropping below 12 credits.

Degree Completion:

Taking fewer credits or courses than anticipated may delay your graduation. Be certain that if you drop a course, you will still be able to complete all required courses within your desired timeline. If you are not sure, please see your academic advisor.

Pass/Fail

Undergraduate business students who are in good academic standing (i.e., not on probation) may take only one (1) course as pass/fail per semester including the summer session. A maximum of 16 total credits may be completed as pass/fail to count toward completion of the 120 degree credits required for the BBA.

The pass/fail privilege is for a non-business elective course. The following courses cannot be taken pass/fail:

- Any business courses including those designated as “meets with,” “cross-listed,” and those taken during study abroad programs
- Any requirement for the business major or degree, including, but not limited to, pre-business and liberal studies requirements

Note: It is the responsibility of the student to check requirements and policies for non-business majors and certificates prior to requesting the pass/fail privilege.

The pass/fail grade will not be included when computing your GPA, but the pass/fail credits with S (Satisfactory) grades will apply toward graduation. S is the grade for A to C; U (Unsatisfactory) is the grade for D and F.

Students must complete a minimum of 12 graded credits each semester in order to be eligible for the dean's list.

In order to apply for the pass/fail privilege, students must submit an online request (<https://kb.wisc.edu/7700/>) via Student Center. Please disregard the message that says “Reminder - print this form and obtain appropriate signatures.” You do not need to do this.

Your request is then sent directly to the WSB Undergraduate Program's Academic Advising Office. You will be notified by email whether or not your request has been approved.

Please complete the online pass/fail form by the deadline. See the Office of the Registrar website (<https://registrar.wisc.edu/dates/>) for deadline information.

Once the student has submitted the form, the course may not be changed from pass/fail back to a conventionally graded course after the established deadline. Once a pass/fail grade is recorded as S or U, it cannot be changed to a letter grade.

Auditing a Course

Auditing a course allows a student to take a class without the benefit of a grade or credit for a course.

A student who wishes to audit a course is expected to attend classes on a regular basis as an observer. Auditors do not take exams. Auditors will receive a final grade of Satisfactory (S) or No Report (NR), and AU will appear in place of a number of credits. Audit courses carry no academic credit and do not satisfy any degree or major requirements. Also audit courses do not satisfy any minimum or maximum credits required in each term. Students interested in auditing a course should consult with their academic advisor.

Audits are not free. A course taken for audit costs the same as a course taken for credit. If students are not paying full-time fees, they will be assessed per-credit fees for an audit course.

Information about submitting a formal request to audit a class can be found at the course change request on the Registrar's Office website. The course is offered only on a space available basis with approvals of both the instructor of the course and the Academic Dean's Office in the School of Business.

Repeating a Course

Students thinking about repeating a course should talk with their advisor. Students must do all the work in the repeated course, including laboratory; attend regularly; participate in class discussions; and take examinations. Students will earn a final grade in the course. The transcript denotes repeated courses with a lowercase 'x' appearing immediately before the course description. Students should know that:

- the original grade still counts in GPA and remains on the transcript;
- credits in the repeated course do not count toward the degree, unless the course was failed the first time;
- grade points in the repeated course count toward calculation of cumulative GPA;
- credits carried on courses being repeated count toward the maximum credits permitted in a semester.

Transfer students must be particularly careful to avoid taking courses on the UW–Madison campus that duplicate courses taken at another school. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower-level course in a sequence if students have already received credit for a higher-level course in that sequence. Students should carefully check the Evaluation of Transfer Credits prepared by Credit Evaluation Services and should consult with their advisor. Duplicate courses may include transfer credits and credit by exam, such as Advanced Placement, coming in as course equivalents.

Residency for Degree

Students admitted to the Wisconsin School of Business Undergraduate Program, including students who transfer from another college or university, must complete a minimum of 30 credits in business courses in residence.

Withdrawal

Withdrawal indicates that a student intends to stop attending all classes for the current term/semester. If a student wishes to drop all of their classes for a particular semester/term after the first day of classes, a student needs to formally withdraw from the semester by submitting the online withdrawal request in the MyUW Student Center. Failure to do so may result in a recording of Failure for all courses and a “may not continue” action. Any student may withdraw with permission and without grades being recorded at any time up to the last three weeks of a fall or spring semester. Students should refer to the enrollment dates and deadlines (<https://registrar.wisc.edu/dates/>) provided by the Office of the Registrar if they are enrolled in summer term and wish to withdraw. The Office of the Registrar provides additional information regarding withdrawal (<https://registrar.wisc.edu/withdraw/>), including impacts of withdrawal.

Medical Withdrawal: For information on medical withdrawals, students should refer to the Medical Withdrawal (<https://policy.wisc.edu/library/UW-1084/>) policy.

In addition to entering a request for medical withdrawal in the MyUW Student Center, Business students will need to submit the Petition for Special Consideration form. (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.152083449.1715547210.1624291160-630380142.1620053901) A

staff member from the Academic Dean's Office will be in contact with you following the submission. Medical withdrawals are approved on a case-by-case basis, and medical documentation will be required.

Courses scheduled for fewer than 15 weeks

Deadlines for sessions and modular courses (<https://registrar.wisc.edu/modular/>) are listed on the Office of the Registrar's website.

Credit Overload

To obtain special permission for a credit overload, students need to submit a petition for special consideration (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.5642675.1034170563.1614009576-1842162041.1564425520) and demonstrate that special circumstances are involved.

Students who wish to take more than 18 credits during the fall or spring semester must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 20 total credits during the fall or spring semester.

Students can take a maximum of 12 credits during the summer session. Please note that there are credit limits by session as well. Students may enroll for one credit per week of instruction (e.g.: a student can earn 3 credits during a 3-week session, but needs approval to earn 4 credits in a 3-week session). Students who are seeking a credit overload for the summer session must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 13 total credits during the summer session.

Credit overloads will incur additional tuition costs. Visit Tuition & Fees (<https://bursar.wisc.edu/tuition-and-fees/>) for more information.

FIRST-YEAR REQUIREMENTS (FRESHMAN DIRECT ADMIT STUDENTS ONLY)

Academic progression requirements & policies

To progress in the Wisconsin School of Business Undergraduate Program after direct admission, students must complete the following requirements by the end of their first year at UW-Madison:

1. Students must complete a minimum of 24 degree credits in residence.
2. Students must complete the following requirements through successful completion of a course, placement test, transfer credit or test credit:
 - a. *Communication Part A (complete one):*
 - ENGL 100 Introduction to College Composition (3 cr)
 - COM ARTS 100 Introduction to Speech Composition (3 cr)
 - ESL 118 Academic Writing II (3 cr), non-native English speakers only
 - b. *Calculus (complete one):*
 - MATH 211 Calculus (5 cr)
 - MATH 217 Calculus with Algebra and Trigonometry II (5 cr) (must complete MATH 171 first)
 - MATH 221 Calculus and Analytic Geometry 1 (5 cr)
 - c. *Economics (complete one):*
 - ECON 101 Principles of Microeconomics (4 cr)
 - ECON 111 Principles of Economics-Accelerated Treatment (4 cr, Honors course)
 - d. *Psychology*
 - PSYCH 202 Introduction to Psychology (3 cr)

e. *Business course for first-year students*

- GEN BUS 110 Personal and Professional Foundations in Business (1 cr)

Monitoring and communication after fall semester

First-year progression progress will be monitored after the fall semester. Students will receive an email notification after the fall term informing them whether or not they are on track to meet the progression requirements by the end of their first year.

Action for students who did not meet the First-Year Progression Requirements

Students who do not meet progression requirements after the first year will receive an enrollment hold. To remove the enrollment hold, students must meet with their academic advisor in the Undergraduate Program and create a progression plan.

EXAMS

Finals

General Info/Schedule:

Final exam times are automatically assigned for both fall and spring semesters. Final exam times can be found in MyUW.

Make-Up Final Exams:

Make-up exams may not consist of more than 10% of the total number of students enrolled. If an instructor needs to give a make-up to more than 10% of students enrolled, they must obtain the dean's written approval.

Student Conflicts:

Students should attempt to avoid having more than two exams within 24 hours. If a student has more than two exams in 24 hours, the instructor may—but is not required to—offer a make-up final exam or allowable alternative. However, if a student has two exams at the same time and date, one instructor must offer a make-up final exam or allowable alternative.

Midterms

Midterm exams can occur throughout the term and may take place outside of the regularly scheduled class time. More information on the campus policy for evening midterm exams can be found here (<https://policy.wisc.edu/library/UW-879/>).

GRADES

Academic Probation

Students admitted to the School of Business must maintain all of the following GPA minimums:
2.00 cumulative GPA on all UW-Madison coursework
2.00 semester GPA for each semester

Failure to meet either of these standards will result in probationary status.

A student will be cleared of probationary status at the end of the semester or summer session when all of the above conditions are met and the student's record contains no grade of incomplete.

Students continuing on probation for a second, consecutive semester will be placed on strict probation. Students who are not removed from strict probation after one semester will be dropped from enrollment in the School of Business and UW-Madison for one semester. School of Business undergraduate students have the opportunity to appeal the "dropped for one term" status by participating in an appeals process. The

WSB Academic Dean's Office will notify students by email of the appeals process and timeline.

Students who were dropped for one term may reapply on probationary status (after a one-semester hiatus) if they can demonstrate the ability and desire to devote sufficient energy to scholastic work. To reapply, students may complete a reentry application through the Office of Admissions and Recruitment.

GPA deficiencies causing probationary status cannot be removed through coursework at another university or through correspondence study.

Dean's List

Business students who achieve a grade point average of 3.75 for any semester in which they complete 12 graded degree credits will have their names on the dean's list. A permanent record of this achievement is entered on the student's transcript. Students with I, P, or U on their grade report will automatically be ineligible for the dean's list. Subsequent academic action may change eligibility.

Grading Policy

The mean grade should be no higher than 3.0 in the following undergraduate classes:

ACCT I S 100 Introductory Financial Accounting, GEN BUS 301 Business Law, ACCT I S 211 Introductory Managerial Accounting, FINANCE/ ECON 300 Introduction to Finance, MARKETNG 300 Marketing Management, M H R 300 Managing Organizations, OTM 300 Operations Management, R M I 300 Principles of Risk Management

For all other undergraduate courses with class numbers below 600 and 15 or more students enrolled, the mean grade should be no higher than 3.3 and the maximum percentage of As is 30%.

Graduating with Distinction

The Office of the Registrar compiles a preliminary list of business students eligible for distinction. These students are eligible to wear an honors stole with their commencement attire. The WSB Undergraduate Program will notify eligible students via email 2-3 weeks before the commencement ceremony.

Distinction is awarded to graduated business students who meet the following criteria:

- At least sixty (60) credits earned (in residence) at UW–Madison
- A cumulative UW–Madison GPA in the top twenty percent (20%) of the graduating business class

Please note that students on the preliminary list for distinction may or may not receive distinction. The distinction designation is subject to change and is dependent upon official graduation date (semester), number of students graduating, and final grade calculations, including last semester and in-progress courses.

Students who graduate with distinction are eligible to wear a cardinal stole with their commencement attire. The stoles can be obtained from the University Bookstore with a deposit and do not need to be ordered in advance. More information on graduation attire can be found on the site of the Secretary of the Faculty.

"Graduated with Distinction" is notated on official transcripts only.

Incomplete Policy

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then,

because of illness or other unusual and substantiated cause beyond his/her control, has been unable to take or complete the final examination or to complete some limited amount of term work. An incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof, the grade shall be F; even with such proof, if his/her work has convinced the instructor that he/she cannot pass, the grade shall be F.

If an admitted business student earns an incomplete, the work for that course must be completed by the last class day of the student's next semester in residence (exclusive of summer sessions). Incompletes incurred in the last semester of residence may not be removed after five years of absence from the university without special advance permission of the associate dean. Such incompletes must remain on the record with grades of PI and do not lapse into failures.

MAJOR DECLARATION

Additional major outside of business

Business students may declare **one** additional major outside the School of Business in the College of Letters & Science (excluding AMEP, Journalism, Landscape Architecture, Social Work, Music: Education B.M., and Music: Performance: B.M.), School of Education (options include: Educational Policy Studies, Health Promotion and Health Equity or Theater & Drama), or College of Agricultural and Life Sciences (only including Global Health). Students who gain approval to complete an additional major in the College of Letters & Science, the School of Education, or the College of Agricultural and Life Sciences must complete major requirements prior to, or concurrently with, their business degree. Students who have fulfilled the degree requirements for the BBA will be graduated, even if the additional major outside the School of Business had not been completed.

To declare a second major:

Students will need to meet with the advisor of their additional major, and the advisor will fill out and submit an additional major declaration form on their behalf. This will be sent to the WSB Undergraduate Program for approval.

Meet regularly with your School of Business academic advisor and additional major advisor regarding major and/or degree requirements.

To cancel a second major:

Students interested in cancelling their additional major will need to make this request through their additional major advisor or department.

School of Business Major

Direct admit business students will declare their business major at SOAR, and business students admitted through the prebusiness process will be declared in their selected business major at time of acceptance into the School. Students can indicate that they are exploring in business at that time. Business students may update their major plan (can declare or cancel any of the business majors offered) by completing the major declaration form (<https://bus.wisc.edu/current-student-resources/bba/academic-support-resources/forms/>).

Students interested in declaring a certificate offered through the School of Business should follow the procedures outlined on the Certificates page for the appropriate program.

COURSES AT OTHER INSTITUTIONS

Common Guidance for Off-Campus Coursework

WSB Undergraduate students are advised to take no more than two courses in their major (or per major if pursuing multiple majors) off-campus. This guidance includes courses taken for transfer credit at another accredited institution as well as courses taken on a School of Business or UW–Madison-sponsored study abroad program. Due to the international emphasis of the major, there is no limit on the number of courses taken towards the International Business major while on a School of Business or UW–Madison-sponsored study abroad program. The academic departments of the School of Business strongly recommend that all BBA students complete the core or initial course in their major(s) on campus.

While WSB Undergraduate students are able to take courses off-campus, the WSB Undergraduate Program reminds students that they should plan to complete all prerequisites for any off-campus course, regardless of its place in the BBA curriculum, prior to taking the course off-campus. Attention to these prerequisites is crucial to ensuring WSB Undergraduate students are prepared for their coursework whether it is taken on or off campus. Advance academic planning is an integral part of a student's success and ability to remain on track to graduate. Students are strongly encouraged to share with their advisor if they plan to enroll in course work off-campus at any time once they are a UW-Madison student. Advisors assist students in making decisions regarding enrollment in off-campus course work and share resources with students to ensure that courses will transfer to UW-Madison for degree credit and satisfy the requirement(s) they expect. While students are always encouraged to share this information with their advisor, students are required to gain permission to take courses off-campus in certain circumstances.

Concurrent Enrollment

School of Business students are not allowed to enroll concurrently at other accredited post-secondary institutions during any term in which they are enrolled at UW–Madison (fall, spring) without seeking special permission. This includes enrollment in online, distance education, and physical attendance classes (exceptions may be made for UW–Extension/Independent Learning—see below).

Students are permitted to enroll in more than one university during the summer session. However, please be aware that if you are taking a course at another university that begins in the summer and coincides with the fall and/or spring semester, it will fall into this category of concurrent enrollment, regardless of when the course will be completed.

If students are taking a course at another institution of higher learning over UW-Madison's winter break, they do not need to seek permission for concurrent enrollment if the course does not overlap UW-Madison's spring term or if the overlap is two weeks or less. Please note that students may take no more than one course off-campus during winter recess.

If it is discovered that a student violated this policy, this credit will be removed from the student's record. It is the responsibility of the student to verify with their academic advisor that they are not in violation of this policy.

Independent Learning

UW Independent Learning (UW IL) is a branch of UW Extension that offers online and distance learning courses. Courses taken through UW

Independent Learning are considered **concurrent enrollment** and require special permission to enroll in the fall, spring or summer.

Students interested in taking a course through UW IL should meet with an academic advisor. If the advisor and student agree this is a good option the student should follow these steps to request permission for concurrent enrollment and request a tuition waiver (if applicable). Forms should be returned to 3150 Grainger.

- Fill out a **Petition/Special Consideration Request** requesting permission for concurrent enrollment with UW Independent Learning. Be sure to include which class you intend to take.
- Students with full time status at UW–Madison may request a **tuition waiver** for UW Extension Independent Learning Courses provided that the following conditions are met:
 - The student requests the waiver and enrolls in the course by the UW–Madison add deadline (second Friday of the semester).
 - The course is taken during the regular academic session.
 - The course is completed during the term for which the tuition waiver is requested.
 - The student does not exceed 18 credits total between the two campuses.

Students are responsible for the \$75 administrative fee for enrolling in a UW IL course.

The minimum length of time to complete an IL course is typically three months. Foreign language courses often require more time. Students should take this into consideration as they are planning the completion of their degree.

Transfer Credits

UW–Madison students may choose to take courses off campus during the summer or winter session and potentially transfer credit to UW–Madison. The UW–Madison Office of the Registrar handles transfer course equivalencies. Please note that UW–Madison students may not take courses at another institution during the fall or spring semester if they are concurrently taking courses at UW–Madison (see **concurrent enrollment policy**). Students may take no more than one course off-campus during winter recess. Students interested in earning transfer credit for a **non–UW study abroad program** must work with UW–Madison's International Academic Programs well in advance.

It is highly recommended that students do not take a course unless they know in advance that it will transfer to UW–Madison for credit. The Office of the Registrar provides information regarding how to determine course equivalencies (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>).

Transfer Credit Process

- Review your DARS report and consult your academic advisor to see what you still need to take and whether the course(s) would be a good option to take at another institution over the summer or winter session. It is not advised to take your business major courses off campus.
- Research course options at the institution where you plan on taking the course(s).
- Determine equivalency using Office of the Registrar course equivalency resources (<https://registrar.wisc.edu/course-equivalency-service/>), beginning with Transferology (<https://www.transferology.com/state/wisconsin.htm>).

- Apply as a “special” or “guest” student at the institution you plan on attending.
- Enroll in the course and pay tuition directly to the institution you are attending.
- After the course is complete, have the institution send an official transcript to the UW–Madison Office of Admissions and Recruitment at 702 West Johnson Street, Suite 1101, Madison, WI 53715-1007 or etranscripts@admissions.wisc.edu.

APPEAL

Academic Policy or Requirement Appeal

If an undergraduate business student wishes to request an exception to a School of Business academic policy or regulation, or a degree or major requirement, they should start by consulting with their academic advisor. They then will need to formally submit their request using the Petition for Special Consideration (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.2520624.1034170563.1614009576-1842162041.1564425520) form. Exception requests could include dropping a course or withdrawing after the deadline, enrolling in a credit overload, concurrent enrollment, or meeting a requirement with a substitution. Students pursuing one of the business certificate options should utilize the Petition for course or requirement exceptions related to their certificate.

Exceptions to established policies, regulations, and/or program requirements should be rare and will be considered on an individual case by case basis. They will be reviewed by the School of Business Undergraduate Program’s Academic Advising Office. School of Business Department Chairs will be consulted on major requirement exceptions.

Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate response.

Grade Appeal

If a student is dissatisfied with a grade received in a School of Business course, the following procedure must be followed should the student wish to appeal the grade.

The student will first discuss the grade appeal with the instructor of the course.

If the student and instructor cannot come to an agreement, the student will provide a formal written request for grade appeal to the associate dean in charge of the relevant program. The written request must include the class, instructor, grade received, date and conclusion of meeting with instructor, and the specific reason(s) for appealing the grade.

The associate dean will forward the appeal request to the chair of the department which houses the course in question. The department chair will perform the due diligence necessary (including, but limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the associate dean.

The associate dean will communicate the decision to both the student and instructor.

Should the student wish to appeal the decision further, the associate dean will perform the due diligence necessary (including, but limited to, meeting with the chair, instructor, and student) to assess the merits of the appeal request. The associate dean has the discretion to review not only the process that was undertaken in the first review, but also the earlier

decision. The associate dean will provide a decision in writing to the chair, instructor, and student.

The instructor will take action if needed.

Please note that The Office of Compliance is responsible for investigating allegations of discrimination. If a student is appealing a grade due to alleged discrimination, they should be in contact with the Office of Compliance.

ONLINE DEGREE PROGRAM

School of Business students are responsible for being familiar with the policies that affect them. School of Business policy is subject to change, so be sure to review this website for the most up-to-date information. Questions related to policy interpretation can be directed to your academic advisor for clarification. The following policies apply to students pursuing one of the School of Business online degree programs.

COURSES/ENROLLMENT

Program Requirements

When students enter a School of Business online degree program, they are held to the degree requirements described in the most recent Guide. The term of admittance to the online program results in a catalog and alternate catalog year that reflects the most recent BBA requirements for the online program.

10 Semester Rule for Reentry Students

Students re-entering after an absence of 10 or more semesters:

A business student reentering UW–Madison is responsible for completing all the current School of Business degree requirements that are in effect at the time of reentry to UW–Madison and the School of Business. Students who left the institution as a business student do not need to reapply for admission to the School of Business when they return.

Modality

The modality for School of Business online degree program courses are online only. Students in an online program who are enrolled in a class section which is not “Online Only” will be dropped from that class section. A change of program that requires change of modality of instruction is not permitted. Should there be compelling extenuating circumstances that justify a change in learning modality option for an individual student, the student may request of change of modality via the Petition for Special Consideration (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.207081875.1034170563.1614009576-1842162041.1564425520).

Graduation

The School of Business will graduate a student at the end of the semester (spring, summer or fall) in which all university, BBA degree and business major requirements are complete and have a cumulative GPA of 2.00 or higher. Students cannot graduate with a temporary grade (<https://registrar.wisc.edu/grades-and-gpa/>), such as I or NR, for any requirements. Speak with the course instructor or your advisor to resolve temporary grades. The date when the outstanding Incompletes (I) are resolved will determine the semester of graduation.

If a student is completing their final coursework while not in residence, the student must notify the WSB Undergraduate Program’s Advising Office when the official transcript has been evaluated by UW–Madison and appears on their record. This allows their DARS to be certified for graduation.

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all graduation requirements have been met.

Student Responsibility for Enrollment

Each student is responsible for arranging a course list that will permit satisfactory progress toward degree requirements and for verifying registration in chosen classes.

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Please pay special attention to session deadlines (<https://registrar.wisc.edu/sessioncodes/>). Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor prior to initial enrollment and before making any changes to enrollment.

No Credit Courses

The School of Business does not award credit for the following:

- Failed courses (grade of "F")
- Repeated courses (except where a repeat is allowed)
- Courses for which a student may not receive credit because of a previously completed course (as indicated in the Course Search & Enroll App)

Before enrolling in and taking any of the above courses, please consult your academic advisor.

Part-time Enrollment

To maintain full-time standing, students must be enrolled in 12–18 credits.

Undergraduate students who are considering dropping below full time (less than 12 credits) are responsible for knowing how part-time status will affect them. Below are some of the more common scenarios to explore before dropping credits:

Scholarships, Grants, and Other Awards:

Depending on the conditions of the scholarship, a student may be required to be full time in order to remain eligible for an award. Be sure to check the stipulations for any awards you have received.

Financial Aid:

Be sure to check with the Office of Student Financial Aid to find out if being part time will affect your financial aid package.

Tuition Refunds:

Depending on when the credits are dropped, you may be eligible for a tuition refund. Check the registrar's website for information about refund deadlines.

Athletes:

Varsity athletes are governed by Big Ten and NCAA rules that do not allow them to drop below full time. Be sure to check with your coach and athletic advisor before dropping below 12 credits.

Degree Completion:

Taking fewer credits or courses than anticipated may delay your graduation. Be certain that if you drop a course, you will still be able to complete all required courses within your desired timeline. If you are not sure, please see your academic advisor.

Pass/Fail

Undergraduate business students who are in good academic standing (i.e., not on probation) may take only one (1) course as pass/fail per semester including the summer session. A maximum of 16 total credits may be completed as pass/fail to count toward completion of the 120 degree credits required for the BBA.

The pass/fail privilege is for a non-business elective course. The following courses cannot be taken pass/fail:

- Any business courses including those designated as "meets with," "cross-listed," and those taken during study abroad programs
- Any requirement for the business major or degree, including, but not limited to, pre-business and liberal studies requirements

Note: It is the responsibility of the student to check requirements and policies for non-business majors and certificates prior to requesting the pass/fail privilege.

The pass/fail grade will not be included when computing your GPA, but the pass/fail credits with S (Satisfactory) grades will apply toward graduation. S is the grade for A to C; U (Unsatisfactory) is the grade for D and F.

Students must complete a minimum of 12 graded credits each semester in order to be eligible for the dean's list.

In order to apply for the pass/fail privilege, students must submit an online request via Student Center. Please disregard the message that says "Reminder - print this form and obtain appropriate signatures." You do not need to do this.

Your request is then sent directly to the WSB Undergraduate Program's Academic Advising Office. You will be notified by email whether or not your request has been approved.

Please complete the online pass/fail form by the deadline. See the Office of the Registrar website for deadline information (<https://registrar.wisc.edu/dates/>).

Once the student has submitted the form, the course may not be changed from pass/fail back to a conventionally graded course after the established deadline. Once a pass/fail grade is recorded as S or U, it cannot be changed to a letter grade.

Repeating a Course

Students thinking about repeating a course should talk with their advisor. Students must do all the work in the repeated course, including laboratory; attend regularly; participate in class discussions; and take examinations. Students will earn a final grade in the course. The transcript denotes repeated courses with a lowercase 'x' appearing immediately before the course description. Students should know that:

- the original grade still counts in GPA and remains on the transcript;
- credits in the repeated course do not count toward the degree, unless the course was failed the first time;
- grade points in the repeated course count toward calculation of cumulative GPA;
- credits carried on courses being repeated count toward the maximum credits permitted in a semester.

Transfer students must be particularly careful to avoid taking courses on the UW–Madison campus that duplicate courses taken at another school. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower-level course in a sequence if students have already received credit for a higher-level course in that sequence. Students should carefully check the Evaluation of Transfer Credits

prepared by Credit Evaluation Services and should consult with their advisor. Duplicate courses may include transfer credits and credit by exam, such as Advanced Placement, coming in as course equivalents.

Residency for Degree

Students admitted to the Wisconsin School of Business Undergraduate Program, including students who transfer from another college or university, must complete a minimum of 30 credits in residence.

Withdrawal

Withdrawal indicates that a student intends to stop attending all classes for the current term/semester. If a student wishes to drop all of their classes for a particular semester/term after the first day of classes, a student needs to formally withdraw from the semester by submitting the online withdrawal request in the MyUW Student Center. Failure to do so may result in a recording of Failure for all courses and a "may not continue" action. Any student may withdraw with permission and without grades being recorded at any time up to withdrawal deadline. Students should refer to the enrollment dates and deadlines (<https://registrar.wisc.edu/dates/>) provided by the Office of the Registrar.

The Office of the Registrar provides additional information regarding withdrawal (<https://registrar.wisc.edu/withdraw/>), including impacts of withdrawal.

Medical Withdrawal: For information on medical withdrawals, students should refer to the Medical Withdrawal (<https://policy.wisc.edu/library/UW-1084/>) policy.

In addition to entering a request for medical withdrawal in the MyUW Student Center, Business students will need to submit the Petition for Special Consideration form (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.152083449.1715547210.1624291160-630380142.1620053901). A staff member from the Academic Dean's Office will be in contact with you following the submission. Medical withdrawals are approved on a case-by-case basis, and medical documentation will be required.

Credit Overload

To obtain special permission for a credit overload, students need to submit a petition for special consideration (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.5642675.1034170563.1614009576-1842162041.1564425520) and demonstrate that special circumstances are involved.

Students who wish to take more than 18 credits during the fall or spring semester must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 20 total credits during the fall or spring semester.

Students can take a maximum of 12 credits during the summer session. Please note that there are credit limits by session as well. Students may enroll for one credit per week of instruction (e.g.: a student can earn 3 credits during a 3-week session, but needs approval to earn 4 credits in a 3-week session). Students who are seeking a credit overload for the summer session must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 13 total credits during the summer session.

Credit overloads will incur additional tuition costs. Visit Tuition & Fees (<https://bursar.wisc.edu/tuition-and-fees/>) for more information.

GRADES

Academic Probation

Students admitted to the School of Business must maintain all of the following GPA minimums:

2.00 cumulative GPA on all UW-Madison coursework

2.00 semester GPA for each semester

Failure to meet either of these standards will result in probationary status.

A student will be cleared of probationary status at the end of the semester or summer session when all of the above conditions are met and the student's record contains no grade of incomplete.

Students continuing on probation for a second, consecutive semester will be placed on strict probation. Students who are not removed from strict probation after one semester will be dropped from enrollment in the School of Business (and UW-Madison) for one semester. School of Business undergraduate students have the opportunity to appeal the "dropped for one term" status by participating in an appeals process. The WSB Academic Dean's Office will notify students by email of the appeals process and timeline.

Students who were dropped for one term may reapply on probationary status (after a one-semester hiatus) if they can demonstrate the ability and desire to devote sufficient energy to scholastic work. To reapply, students may complete a reentry application through the Office of Admissions and Recruitment.

GPA deficiencies causing probationary status cannot be removed through coursework at another university or through correspondence study.

Dean's List

Business students who achieve a grade point average of 3.75 for any semester in which they complete 12 graded degree credits will have their names on the dean's list. A permanent record of this achievement is entered on the student's transcript. Students with I, P, or U on their grade report will automatically be ineligible for the dean's list. Subsequent academic action may change eligibility.

Grading Policy

The mean grade should be no higher than 3.0 in the following undergraduate classes:

ACCT I S 100 Introductory Financial Accounting, GEN BUS 301 Business Law, ACCT I S 211 Introductory Managerial Accounting, ECON/ FINANCE 300 Introduction to Finance, MARKETNG 300 Marketing Management, M H R 300 Managing Organizations, OTM 300 Operations Management, R M I 300 Principles of Risk Management

For all other undergraduate courses with class numbers below 600 and 15 or more students enrolled, the mean grade should be no higher than 3.3 and the maximum percentage of As is 30%.

Graduating with Distinction

The Office of the Registrar compiles a preliminary list of business students eligible for distinction. These students are eligible to wear an honors stole with their commencement attire. The WSB Undergraduate Program will notify eligible students via email 2-3 weeks before the commencement ceremony.

Distinction is awarded to graduated business GPA students who meet the following criteria:

- At least sixty (60) credits earned (in residence) at UW-Madison
- A cumulative UW-Madison GPA in the top twenty percent (20%) of the graduating business class

Please note that students on the preliminary list for distinction may or may not receive distinction. The distinction designation is subject to change and is dependent upon official graduation date (semester), number of students graduating, and final grade calculations, including last semester and in-progress courses.

Students who graduate with distinction are eligible to wear a cardinal stole with their commencement attire. The stoles can be obtained from the University Bookstore with a deposit and do not need to be ordered in advance. More information on graduation attire can be found on the site of the Secretary of the Faculty.

"Graduated with Distinction" is notated on official transcripts only.

Incomplete Policy

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond his/her control, has been unable to take or complete the final examination or to complete some limited amount of term work. An incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof, the grade shall be F; even with such proof, if his/her work has convinced the instructor that he/she cannot pass, the grade shall be F.

If an admitted business student earns an incomplete, the work for that course must be completed by the last class day of the student's next semester in residence (exclusive of summer sessions). Incompletes incurred in the last semester of residence may not be removed after five years of absence from the university without special advance permission of the associate dean. Such incompletes must remain on the record with grades of PI and do not lapse into failures.

MAJOR DECLARATION

Additional Major

Students in a School of Business online degree program will only be permitted to declare the designated degree/major/option they have been admitted to and will not be permitted to be concurrently enrolled in more than one academic program (degree/major/option or certificate).

Major Change

Students enrolled in a School of Business online degree program may apply for change to another online major within the School of Business. Students can submit their request via the Online Degree Major Change Form (<https://business.wisc.edu/undergraduate/academic-advising/>).

Students enrolled in a School of Business online degree program may apply for a change to another UW-Madison online degree program. All change requests will be reviewed and need approval by the designated academic dean in both schools/colleges.

COURSES AT OTHER INSTITUTIONS

Common Guidance for off campus coursework

WSB Undergraduate students are advised to take no more than two courses in their major (or per major if pursuing multiple majors) off-campus. This guidance includes courses taken for transfer credit at another accredited institution as well as courses taken on a School of Business or UW-Madison-sponsored study abroad program. While WSB Undergraduate students are able to take courses off-campus, the WSB Undergraduate Program reminds students that they should plan to complete all prerequisites for any off-campus course, regardless of its place in the BBA curriculum, prior to taking the course off-campus. Attention to these prerequisites is crucial to ensuring WSB Undergraduate students are prepared for their coursework whether it is taken on or off campus. Advance academic planning is an integral part of a student's success and ability to remain on track to graduate.

Concurrent Enrollment

Students are strongly encouraged to share with their advisor if they plan to enroll in coursework at another institution at any time once they are a UW-Madison student. Advisors assist students in making decisions regarding enrollment in coursework at a different institution and share resources with students to ensure that courses will transfer to UW-Madison for degree credit and satisfy the requirement(s) they expect. While students are always encouraged to share this information with their advisor, students are required to gain permission to take courses elsewhere in certain circumstances.

School of Business students are not allowed to enroll concurrently at other accredited post-secondary institutions when they are enrolled at UW-Madison (fall, spring) without seeking special permission.

Students are permitted to enroll in more than one university during the summer session. However, please be aware that if you are taking a course at another university that begins in the summer and coincides with the fall and/or spring semester, it will fall into this category of concurrent enrollment, regardless of when the course will be completed.

If students are taking a course at another institution of higher learning over UW-Madison's winter break, they do not need to seek permission for concurrent enrollment if the course does not overlap UW-Madison's spring term or if the overlap is two weeks or less. Please note that students may take no more than one course off-campus during winter recess.

If it is discovered that a student violated this policy, this credit will be removed from the student's record. It is the responsibility of the student to verify with their academic advisor that they are not in violation of this policy.

Independent Learning

UW Independent Learning (UW IL) is a branch of UW Extension that offers online and distance learning courses. Courses taken through UW Independent Learning are considered concurrent enrollment and require special permission to enroll in the fall, spring or summer.

Students interested in taking a course through UW IL should meet with an academic advisor. If the advisor and student agree this is a good option the student should follow these steps to request permission for concurrent enrollment and request a tuition waiver (if applicable). Forms should be returned to 3150 Grainger.

- Fill out a Petition/Special Consideration Request (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.215341335.1034170563.1614009576-1842162041.1564425520) requesting permission for concurrent enrollment with UW Independent Learning. Be sure to include which class you intend to take.
- Students with full time status at UW-Madison may request a tuition waiver (https://registrar.wisc.edu/wp-content/uploads/sites/36/2017/06/independent_learning_form.pdf) for UW Extension Independent Learning Courses provided that the following conditions are met:
 - The student requests the waiver and enrolls in the course by the UW-Madison add deadline (second Friday of the semester).
 - The course is taken during the regular academic session
 - The course is completed during the term for which the tuition waiver is requested
 - The student does not exceed 18 credits total between the two campuses.

Students are responsible for the \$75 administrative fee for enrolling in a UW IL course.

The minimum length of time to complete an IL course is typically three months. Foreign language courses often require more time. Students should take this into consideration as they are planning the completion of their degree.

Transfer Credits

UW–Madison students may choose to take courses off campus during the summer or winter session and potentially transfer credit to UW–Madison. The UW–Madison Office of the Registrar handles transfer course equivalencies. Please note that UW–Madison students may not take courses at another institution during the fall or spring semester if they are concurrently taking courses at UW–Madison (see concurrent enrollment policy). Students may take no more than one course off-campus during winter recess. Students interested in earning transfer credit for a non–UW study abroad program (<https://studyabroad.wisc.edu/nonapproved/>) must work with UW–Madison's International Academic Programs well in advance.

It is highly recommended that students do not take a course unless they know in advance that it will transfer to UW–Madison for credit. The Office of the Registrar provides information regarding how to determine course equivalencies (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>).

Transfer Credit Process

- Review your DARS report and consult your academic advisor to see what you still need to take and whether the course(s) would be a good option to take at another institution over the summer or winter session. It is not advised to take your business major courses off campus.
- Research course options at the institution where you plan on taking the course(s).
- Determine equivalency using Office of the Registrar course equivalency resources (<https://registrar.wisc.edu/course-equivalency-service/>), beginning with Transferology (<https://www.transferology.com/state/wisconsin.htm>).
- Apply as a “special” or “guest” student at the institution you plan on attending.
- Enroll in the course and pay tuition directly to the institution you are attending.
- After the course is complete, have the institution send an official transcript to the UW–Madison Office of Admissions and Recruitment at 702 West Johnson Street, Suite 1101, Madison, WI 53715-1007 or etranscripts@admissions.wisc.edu.

APPEAL

Academic Policy or Requirement Appeal

If an undergraduate business student wishes to request an exception to a School of Business academic policy or regulation, or a degree or major requirement, they should start by consulting with their academic advisor. They then will need to formally submit their request using the Petition for Special Consideration (https://buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?_ga=2.2520624.1034170563.1614009576-1842162041.1564425520) form. Exception requests could include dropping a course or withdrawing after the deadline, enrolling in a credit overload, concurrent enrollment, or meeting a requirement with a substitution.

Exceptions to established policies, regulations, and/or program requirements should be rare and will be considered on an individual case by case basis. They will be reviewed by the School of Business Undergraduate Program's Academic Advising Office. School of Business Department Chairs will be consulted on major requirement exceptions.

Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate response.

Grade Appeal

If a student is dissatisfied with a grade received in a School of Business course, the following procedure must be followed should the student wish to appeal the grade.

The student will first discuss the grade appeal with the instructor of the course.

If the student and instructor cannot come to an agreement, the student will provide a formal written request for grade appeal to the associate dean in charge of the relevant program. The written request must include the class, instructor, grade received, date and conclusion of meeting with instructor, and the specific reason(s) for appealing the grade.

The associate dean will forward the appeal request to the chair of the department which houses the course in question. The department chair will perform the due diligence necessary (including, but limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the associate dean.

The associate dean will communicate the decision to both the student and instructor.

Should the student wish to appeal the decision further, the associate dean will perform the due diligence necessary (including, but limited to, meeting with the chair, instructor, and student) to assess the merits of the appeal request. The associate dean has the discretion to review not only the process that was undertaken in the first review, but also the earlier decision. The associate dean will provide a decision in writing to the chair, instructor, and student. The instructor will take action if needed.

Please note that The Office of Compliance is responsible for investigating allegations of discrimination. If a student is appealing a grade due to alleged discrimination, they should be in contact with the Office of Compliance.

REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business.

PRE-BUSINESS REQUIREMENTS

Students applying through the pre-business or direct transfer process need to complete or be in the process of completing all pre-business courses at the time of application. In-progress courses must be completed by the end of the application term and cannot be deferred to a later term.

Students admitted through the direct admit process must complete these courses by the end of their first year.

Code	Title	Credits
Communication Part A		
Complete one course designated Communication Part A, preferably:		0-3
COM ARTS 100	Introduction to Speech Composition	
ENGL 100	Introduction to College Composition	
ESL 118	Academic Writing II	

Completion of Communication Part A based on UW Placement Test

Economics

ECON 101	Principles of Microeconomics	4
or ECON 111	Principles of Economics-Accelerated Treatment	

Psychology

PSYCH 202	Introduction to Psychology	3-4
-----------	----------------------------	-----

Calculus

Select one of the following: 5

MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry I	

Total Credits 12-16

LIBERAL STUDIES REQUIREMENTS

Liberal studies requirements must be completed prior to graduation. **Students may not use courses offered by the Department of Economics or by the School of Business to fulfill liberal studies requirements. In addition, a single course may not be used to fulfill multiple liberal studies requirements.**

Code	Title	Credits
------	-------	---------

Literature

Select one 3 (or more) credit course designated Literature (L)	3
--	---

Science

Select six credits designated Biological, Natural or Physical Science. Courses that MAY NOT COUNT include: Courses in Computer Science, Mathematics, Statistics or Economics.	6
---	---

Ethics

Select one of the following:	3-4
------------------------------	-----

PHILOS 241	Introductory Ethics	
PHILOS 243	Ethics in Business	
PHILOS 341	Contemporary Moral Issues	
PHILOS/ ENVIR ST 441	Environmental Ethics	

Humanities

Select one 3 (or more) credit course designated Humanities (H or Z) ¹	3
--	---

Ethnic Studies

Select one 3 (or more) credit course designated Ethnic Studies (e)	3
--	---

Social Science

Select one 3 (or more) credit course designated Social Science (S or Z)	3
---	---

Total Credits 21-22

¹

Note: If a student completes an additional Literature (L) course, this requirement will be satisfied

BUSINESS FOUNDATION REQUIREMENTS

All BBA degree candidates are required to complete foundation courses in business and economics. The foundation courses, in conjunction

with a broad educational base, are designed to integrate the student's specialized training with an understanding of the structure and functions of business and its role in the larger social system. Business foundation courses make up the business preparatory, core, and breadth requirements. Sequencing of courses in business preparatory, core, and breadth sections may vary based on a student's academic plan or major. Consult with your academic advisor for specific recommendations.

BUSINESS PREPARATORY REQUIREMENT

All students must take the following:

Code	Title	Credits
GEN BUS 110	Personal and Professional Foundations in Business	1
or GEN BUS 120	Personal and Professional Foundations in Business	
GEN BUS 106	Foundational Skills for Business Analysis	1
GEN BUS 360	Workplace Writing and Communication	3
ECON 102	Principles of Macroeconomics	3-4
or ECON 111	Principles of Economics-Accelerated Treatment	
ACCT I S 100	Introductory Financial Accounting	3
ACCT I S 211	Introductory Managerial Accounting	3
	Business Analytics (options for this are found below)	6-9
Total Credits		20-24

BUSINESS ANALYTICS REQUIREMENT

The business analytics requirement is part of the Business Preparatory Requirement, and has 3 options. Most students complete Option 1. GEN BUS 306 & GEN BUS 307 should be taken as soon as possible and in subsequent semesters. Actuarial science majors and economics majors or certificate students will fulfill Option 2 or 3. Number of credits for this requirement varies between options:

Code	Title	Credits
<i>Option 1:</i>		
GEN BUS 306 & GEN BUS 307	Business Analytics I and Business Analytics II	6
<i>Option 2 (Required for Actuarial Science Majors):</i>		
This is a 3-course sequence. Choose one course from each of the three options:		
MATH/STAT 431	Introduction to the Theory of Probability	
or STAT/ MATH 309	Introduction to Probability and Mathematical Statistics I	
or STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT/MATH 310	Introduction to Probability and Mathematical Statistics II	
or STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	
ACT SCI 654	Regression and Time Series for Actuaries	
or ACT SCI 655	Health Analytics	
or GEN BUS 656	Machine Learning for Business Analytics	

Option 3 (Recommended for Economics Double Majors or Certificate Students):

This is a 2-course sequence. Choose one course from each of the two options: 8

ECON 310	Statistics: Measurement in Economics
ECON 410	Introductory Econometrics
or ECON 400	Introduction to Applied Econometrics

BUSINESS CORE REQUIREMENT

Business Core courses are recommended to be completed by the end of a student's junior year.

Code	Title	Credits
FINANCE/ECON 300	Introduction to Finance	3
MARKETNG 300	Marketing Management	3
M H R 300	Managing Organizations	3
OTM 300	Operations Management	3
Total Credits		12

Business Breadth Requirement

Business Breadth courses must be completed by graduation.

Code	Title	Credits
GEN BUS 301	Business Law	3
Business Breadth Course ¹		3
Business Breadth Course ¹		3
Total Credits ²		3-9

¹

Students must complete two business courses (3 credits each) that are outside their major from two separate School of Business departments. Courses taken to satisfy this requirement may not include preparatory or core courses, courses required by or cross-listed with the student's major, general business courses, any 399 (Readings and Research) course, or business courses cross-listed with foreign language departments. Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e. not elective credit which is sometimes given an X10 course number).

²

Students with two majors in business or students with one major and a business related certificate need only one course (3 credits) outside their majors/certificate to satisfy this requirement. Students with three or more business majors or two majors and a business related certificate are not required to take additional breadth courses.

CREDITS FOR BBA DEGREE**CREDIT REQUIREMENTS**

Candidates for the BBA degree must meet all of the following credit requirements in addition to completing the required coursework.

120 Degree Credits

All students who plan to graduate from the University of Wisconsin–Madison with a bachelor's degree must complete a minimum of 120 degree credits.

RESOURCES**ACADEMIC ADVISING**

As a student in the Wisconsin Business Undergraduate Program, you will work directly with academic advisors who will help you plan your business education every step of the way. The advisors are here to help you explore options, define goals, and accomplish what you set out to achieve during your time as a Business Badger and beyond. Academic advisors also support students in making choices about course enrollment and understanding and interpreting degree requirements and policies.

Advisors in the Wisconsin Business Undergraduate Program work in partnership with you. They give you the tools and support you need to make your own decisions about the course of your education. Your partnership with the advising team begins early in your academic career at the University of Wisconsin–Madison. When you enroll in the UW–Madison, one of your first steps will be to attend Student Orientation, Advising, and Registration (SOAR), where you will have your first meeting with an academic advisor.

Admitted students are welcomed and encouraged to check in with their academic advisor each term. Academic Advising also offers drop-in advising hours daily during the academic year. UW–Madison students who are not yet enrolled in the Wisconsin Business Undergraduate Program but who expect to apply through the pre-business admissions process (<https://business.wisc.edu/undergraduate/admissions/current-uw-students/>) receive their business advising at the School of Business with pre-business academic advisors.

In addition to providing advising, the Wisconsin School of Business Undergraduate Program serves as the academic dean's office: interpreting policy, administering academic processes, and performing graduation checks for graduating business students. For more information, visit the advising website (<https://business.wisc.edu/undergraduate/academic-advising/>) or contact Undergraduate Academic Advising in 3150 Grainger Hall; 608-262-0471; wibbaadvising@wsb.wisc.edu (wibbaadvising@bus.wisc.edu).

CAREER DEVELOPMENT

The WSB Career Engagement Team takes a relationship-based approach to working with students throughout the career development process and consults with top employers to facilitate the recruitment, hiring and career readiness of our students. Our Career Forward offers a variety of services to admitted undergraduate business, certificate in business, certificate in entrepreneurship, capstone in actuarial science, and master of accountancy students including 1:1 coaching, career/major pathways exploration and planning, career workshops, mock interviews, career fairs, employer information sessions, on-campus interviewing, experiential learning opportunities, industry connections and networking events. We will also coach you through the development of a professional resume, cover letter, networking and interviewing skills and job search, offer and negotiation skills. Through the exploration of your values, strengths, skills and interests, we will help you create a career action plan early on in your collegiate experience so that you can participate in experiences both on and off campus to build your skills and readiness for the workplace or graduate study. Career planning is an ongoing process, and we are committed to helping you determine and achieve your immediate career

goals and support you in developing the skills to manage a successful career throughout your lifetime.

For more information about Career Engagement resources for students and faculty/staff, please see this page (<https://mycareer.wsb.wisc.edu/>).

STUDENT LIFE

The WSB Undergraduate Program Student Life office coordinates leadership and involvement opportunities (<https://business.wisc.edu/undergraduate/leadership/>) for students to enhance their personal and professional skills.

The Accenture Leadership Center (ALC) offers students unique, hands-on opportunities to develop leadership skills through workshops, guest speaker events, leadership case competitions, and more. The ALC acts as a general resource for all business affiliated Student Organizations and coordinates the room reservations for the Undergraduate Lounge space and offices held within. The ALC can also facilitate tailored leadership workshops upon request, and plan larger leadership conferences open to all business and pre-business students.

The WSB Undergraduate Program also has its own student government, UBC (Undergraduate Business Council), to unify and represent the student voice on issues of shared governance within the school and to promote community among business students. In addition, there are 40+ undergraduate business student organizations, offering plenty of opportunities for students to get involved and put their leadership and collaboration skills into practice. A business student organization fair is held at the start of each semester where potential new members can meet with representatives of organizations.

In recognition that community and connection are vital to student success, the Student Life team also provides support and programs geared towards underrepresented student populations. Students can join a variety of identity-based affinity groups, participate with the Student Organization Diversity & Inclusion Council, and/or get involved with the new Multicultural Space within the School of Business. Student Life also hosts a variety of educational events centered on topics of diversity, equity, and inclusion for all business and pre-business students to attend.

The student life team also oversees the Personal and Professional Foundations in Business course that all newly admitted BBA students take. This course introduces students to School of Business resources, helps them develop important leadership skills, facilitates networking, and encourages personal reflection about their time as a BBA student and future goals.

For more information about Wisconsin BBA Student Life, see this page (<https://business.wisc.edu/undergraduate/leadership/>).

BBA GLOBAL PROGRAMS

A study abroad experience (<https://business.wisc.edu/undergraduate/study-abroad/>) can complement and enhance every aspect of your business education. The Wisconsin BBA Program makes this opportunity possible by partnering with more than 35 of the top business schools and study abroad programs across the globe. Around 40 percent of each Wisconsin BBA graduating class studies abroad. These students regularly speak of their experience as professionally rewarding and personally transformative. A study abroad experience can be a great way to demonstrate enhanced autonomy, motivation, organization, worldview, and resilience. You, too, can return from study abroad with a developed

set of skills (that employers value!), a new sense of self, and a greater appreciation of cultural differences.

The Wisconsin School of Business works in close partnership with International Academic Programs (IAP) to administer study abroad programs geared specifically for undergraduate business students. All approved UW-Madison programs share policies, procedures, and best practices.

The UW-Madison Study Abroad (<https://studyabroad.wisc.edu/>) website highlights the portfolio of business specific programs (<https://studyabroad.wisc.edu/programsearch/?advisinglocation=102>) as well as other programs that may have a focus outside of, or in addition to, business (e.g. liberal studies, language learning, engineering, or life sciences).

ACCOUNTING AND INFORMATION SYSTEMS

The accounting major allows students to develop strong technical and professional skills to succeed in a dynamic profession. Learn how emerging technologies are changing the landscape of business and gain an appreciation for the global and diverse nature of a career path in accounting. The curriculum covers financial, managerial and cost accounting, accounting systems and emerging technologies, taxation, audit and advisory services. Students will learn to evaluate the economic transactions on which businesses are built and organize and report the impact of those transactions.

DEGREES/MAJORS/CERTIFICATES

- Accounting, Certificate (p. 1439)
- Business: Accounting, BBA (p. 1441)

ACCOUNTING, CERTIFICATE

The undergraduate certificate in accounting provides students the opportunity to develop additional expertise in accounting without having to pursue a double major. This 12-credit certificate is available to all undergraduate students enrolled in the Wisconsin School of Business, with the exception of those students majoring in accounting. This certificate allows for a lot of flexibility so that students can customize their coursework to best complement their current business major. Students who complete this certificate would be prime candidates to continue their study in the one-year MAcc program, which will expand potential career opportunities.

HOW TO GET IN

To declare this certificate, students must be admitted to UW–Madison and the School of Business (WSB). To find out more about the school's admissions process for undergraduate students, please see Entering the School (<https://guide.wisc.edu/undergraduate/business/#enteringtheschooltext>). Contact the Wisconsin BBA Advising Center listed under the Advising and Careers tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with a BBA in Accounting.

REQUIREMENTS

A minimum 2.5 GPA must be earned on all course work applied to meet the requirements of the certificate program. At least 50% of the certificate credits must be earned in residence at UW-Madison as a degree-seeking undergraduate. Completion of this certificate satisfies one of the business breadth courses needed for the BBA.

Code	Title	Credits
ACCT I S 301	Financial Reporting I	3
ACCT I S Electives		9
<i>These electives can include any courses numbered ACCT I S 302 through ACCT I S 699</i>		
Total Credits		12

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the proper presentation, measurement, and reporting financial statement elements and transactions, and the use of financial statement information for analysis purposes.
2. Understand that financial and nonfinancial information serves numerous purposes in an organization, especially in relation to facilitating and influencing decisions.
3. Document, evaluate, and recommend improvements to basic accounting information systems used to control processes and communicate information to be used in financial reporting.
4. Understand the objective of taxes applicable at the federal level, and apply a framework for integrating income tax planning into accounting and business transactions as a foundation for structuring tax efficient business transactions.
5. Gain technical knowledge about how to perform a high-quality audit, and gain familiarity with how independence, objectivity, professional skepticism, and ethical behavior contribute to a high-quality.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

Students may direct questions about the IMAcc program to Kristen Fuhremann (kristen.fuhremann@wisc.edu), director of the program, or their academic or career advisor.

CAREERS

The most common career paths in accounting include public and corporate accounting.

Public accountants work with clients to review or prepare financial documents. All areas of public accounting work together to inspect control processes and determine accuracy of financial information and compliance with laws, regulations, and generally accepted accounting principles. They make recommendations regarding business decisions and company finances. Public accounting includes audit/assurance and tax.

Corporate accountants manage an organization's financials and provide expertise in financial reporting and control to assist management in forming and implementing business strategy. Corporate accounting is a broad term that can include many different functions, such as management accounting, internal audit, and financial analysis.

BUSINESS: ACCOUNTING, BBA

By pursuing the accounting major (<https://business.wisc.edu/undergraduate/majors/accounting/>), you will develop strong technical and professional skills to succeed in a dynamic profession. Learn how emerging technologies are changing the landscape of business and gain an appreciation for the global and diverse nature of a career path in accounting.

Topics, skills, and concepts:

- Financial and managerial accounting, cost accounting, accounting systems, emerging technologies, taxation, audit and advisory services.
- Evaluate the economic transactions on which businesses are built, and organize and reporting the impact of those transactions. Learn to evaluate the tax impact of business decisions.
- Critical analysis, group dynamics, problem solving, and communication skills.

RELATED STUDENT ORGANIZATIONS

Beta Alpha Psi (<https://win.wisc.edu/organization/BetaAlphaPsi/>)

Institute of Management Accountants (<https://win.wisc.edu/organization/imauwmadison/>)

Women in Finance and Accounting (<https://win.wisc.edu/organization/wifa/>)

HOW TO GET IN

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see *Entering the School* (p. 1426).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Code	Title	Credits
School of Business BBA Requirements		
Complete requirements: (p. 1436)		
	Pre-Business	
	Liberal Studies	
	Business Prep	
	Business Core	
	Business Breadth	

ACCOUNTING MAJOR REQUIREMENTS

The accounting major is a total of 24 credits, distributed as follows:

Code	Title	Credits
GEN BUS 302	Business Organizations and Negotiable Instruments	3
ACCT I S 301	Financial Reporting I	3
ACCT I S 302	Financial Reporting II	3
ACCT I S 310	Cost Management Systems.	3
ACCT I S 340	Accounting Systems	3
ACCT I S 406	Advanced Financial Reporting ¹	3
ACCT I S 620	Fundamentals of Taxation	3
ACCT I S 630	Audit and Assurance Services	3

Accounting majors must maintain a minimum 2.5 GPA in business and econ courses every semester

Accounting majors must take a minimum of 18 credits of ACCT I S courses at the 301 level or higher at UW-Madison

Total Credits	24
----------------------	-----------

1

Students admitted to the Integrated Master's of Accountancy (IMAcc) Program (<https://wsb.wisc.edu/programs-degrees/macc/imacc-program-overview/>) who complete a spring semester internship must complete ACCT I S 600 and ACCT I S 601 instead of ACCT I S 406. IMAcc students who complete a summer internship will still be responsible for completing ACCT I S 406 as part of the undergraduate degree requirements and will not enroll in ACCT I S 600 and ACCT I S 601.

RECOMMENDED ELECTIVES ¹

Code	Title	Credits
ACCT I S 603	Financial Statement Analysis	3
ACCT I S 621	Corporate and Advanced Taxation	3

The following courses are recommended as program electives outside of accounting. The student is encouraged to elect as many as a program will permit.

FINANCE/ECON 320	Investment Theory	3
FINANCE 325	Corporation Finance	3
INFO SYS 371	Technology of Computer-Based Business Systems	3
INFO SYS 424	Analysis and Design of Computer-Based Systems	3
OTM 654	Production Planning and Control	3
REAL EST/A A E/ ECON/URB R PL 306	The Real Estate Process	3
R M I 300	Principles of Risk Management	3

1

Students who are interested in sitting for the CPA Exam may consider taking 1–2 extra accounting courses, as CPA requirements vary from state to state.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand the conceptual and technical knowledge foundations of financial accounting, managerial accounting, taxation, business law, and auditing.
2. Apply Generally Accepted Accounting Principles (GAAP) (and relevant assumptions, principles, and constraints) to prepare financial statements.
3. Understand that management accounting and control systems, providing financial and non-financial performance information, are integral to the successful design and implementation of an organizational strategy.
4. Interpret and validate business events and transactions through the lens of business processes and systems.
5. Demonstrate technical competence in income taxation of individuals, partnerships, corporations, and international organizations.
6. Identify the legal implications of their choices and how the law impacts their interactions with others in a business setting.
7. Explain how to complete an audit from beginning to end, applying auditing standards, assessing risk, and gathering evidence.
8. Understand how earning trust and demonstrating integrity as successful accounting professionals impact business, contracts, and capital markets, as well as society at large.
9. Understand that leadership in the field of accounting is the consistent display and communication of respect, trust, expertise and adaptability within various business relationships and contexts.
10. Engage in effective written communication practices by crafting professional memos and reports that integrate research and analysis skills, technical information, and expert writing proficiency.
11. Understand how accounting is a global practice requiring knowledge of national and international standards, the examination of sociocultural impacts within business contexts, and the ability to leverage the advantages that diversity brings to an organization.

FOUR-YEAR PLAN

This page includes two **sample** four-year plans for students directly admitted into the School of Business from high school. The first plan represents the accounting major and the second plan represents the accounting major with the Integrated Master of Accountancy Program (IMAcc). We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

PLAN 1: ACCOUNTING MAJOR

Freshman

Fall	Credits	Spring	Credits
MATH 211		5 ECON 101	4
GEN BUS 106		1 PSYCH 202	3
GEN BUS 110		1 GEN BUS 360	3
Communications A		3 Humanities	3
Ethnic Studies		3 Elective	3
		13	16

Sophomore

Fall	Credits	Spring	Credits
ACCT I S 100		3 ACCT I S 211	3
GEN BUS 306		3 ACCT I S 301	3
MARKETNG 300		3 FINANCE/ECON 300	3

CERTIFICATION/LICENSURE

CERTIFIED PUBLIC ACCOUNTANT (CPA)

The state of Wisconsin, and most other states, mandate that candidates for the CPA license must have earned a bachelor's or higher degree and 150 credit hours. There are several degree options for completing these requirements at the University of Wisconsin – Madison, including:

1. **Master of Accountancy (MAcc):** Students who earn the Master of Accountancy degree will meet the CPA requirements in most states. Students can pursue the MAcc degree through different paths, including:
 - a. **Integrated:** Undergraduate business students pursuing the accounting major in the School of Business are eligible to apply for the Integrated Master of Accountancy (IMAcc) program. Students pursuing the IMAcc program will earn a Bachelor of Business Administration (BBA) degree with a major in accounting along with a MAcc degree, typically in about 5-years total. The IMAcc program culminates with students earning a minimum of 150-credits and eligibility for the CPA exam.
 - b. **Stand-alone:** Any student who has earned a four-year undergraduate degree, in any discipline, from an accredited institution, may pursue the MAcc program. Students with an undergraduate major in accounting will complete a 1-year, 30-

credit program. Non-accounting business majors complete a 33-36 credit program while any students applying with a non-business undergraduate major will complete a 2-year, 54-credit program. Upon graduation from the MAcc program, students will have a minimum of 150-credits and will be eligible for the CPA exam.

2. **Undergraduate Business Degree with Accounting Major:** Students can meet the eligibility requirements for the CPA exam by completing a 120-credit BBA degree with a major in accounting along with 30-additional credits to meet the 150-credit requirement. Students pursuing this option should carefully consider the CPA eligibility requirements in the state in which they intend to get certified as many states will require additional accounting credits beyond what is included in the BBA accounting major. Students can earn the additional 30-credits as follows:
 - a. **Advanced Credits from High School:** College credits earned in high school that are reflected on a student's UW-Madison transcript may count towards the 30-additional credits for CPA eligibility.
 - b. **Double Major:** Students may pursue an additional undergraduate major to achieve the additional 30-credits for CPA eligibility.
 - c. **Non-accounting Advanced Degree:** Students who earn an undergraduate degree with a major in accounting and any other advanced degree (specialized masters, MBA, Law School, etc.) may be eligible for the CPA exam as long as they have 150-total credits.
 - d. **Undergraduate Credits:** Students may earn the additional 30-credits by taking any undergraduate courses at a degree-granting institution.

Please consult the Department of Accounting and Information Systems (<https://wsb.wisc.edu/faculty-research/academic-departments/accounting-information-systems/>) for additional information.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

BUSINESS FUNDAMENTALS, SUMMER CERTIFICATE

The Summer Certificate in Business Fundamentals (<https://business.wisc.edu/undergraduate/certificates/summer/>) provides basic business education to students pursuing majors outside of the Wisconsin School of Business. The 12-credit certificate is designed to be completed over multiple summer terms with in-person and online course options, making it a more flexible option for students seeking fundamental business knowledge. Knowledge gained through the Summer Certificate in Business Fundamentals aims to better prepare students for business-related careers upon graduation.

HOW TO GET IN

The Summer Certificate in Business Fundamentals is not open to students declared in a major in the School of Business or the Certificate in Business (<https://guide.wisc.edu/undergraduate/business/school-wide/business-certificate/>).

To declare students must have completed 12 credits in residence at UW-Madison and have earned a minimum GPA of 2.75.

To declare the certificate, go to the Academic Forms (<https://business.wisc.edu/undergraduate/academic-advising/#forms/>) page and complete the Summer Certificate in Business Fundamentals declaration form.

REQUIREMENTS

Students are expected to take 9 of the 12 required credits in-residence during the summer term.

REQUIRED COURSES

Code	Title	Credits
ACCT I S 300 or ACCT I S 100	Accounting Principles ¹ Introductory Financial Accounting	3
Select three of the following:		
FINANCE/ECON 300	Introduction to Finance	
MARKETNG 300	Marketing Management	
M H R 300	Managing Organizations	
OTM 300	Operations Management	
R M I 300	Principles of Risk Management	

1

Students are strongly encouraged to take ACCT I S 300, unless ACCT I S 100 is required by their major.

QUALITY OF WORK

A minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

A minimum grade of C must be earned in each course.

9 of the 12 required credits must be taken in-residence (UW-Madison on-campus, study abroad, or distance courses).

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Describe basic business measurement as conveyed through accounting methods and reports. Read and interpret a balance sheet and income statement.
2. Describe the basic risk and return relationship and the use of diversification to manage overall risk.
3. Identify and describe basic business strategy and processes.
4. Measure and interpret cost benefit analysis including consideration of time value of money concepts.

ADVISING AND CAREERS

ADVISING

Students declared in the Summer Certificate in Business Fundamentals will have an assigned academic advisor and career coach. More

information can be found on the School of Business website (<https://business.wisc.edu/undergraduate/certificates/summer/>).

BUSINESS, CERTIFICATE

The Certificate in Business (<https://business.wisc.edu/undergraduate/certificates/business/>) (CIB) program provides non-business students the opportunity to earn a concentration in a clearly defined academic program in business. The coursework allows students to develop a foundational understanding of business and apply this to their specific field, such as international studies or engineering. In addition to careers related to their own fields, students who earn the certificate have also found job opportunities in management, marketing, and other business fields.

HOW TO GET IN

The certificate in business is for **non-business students only**. An application is required to be accepted into the CIB Program. Not all students are admitted, so it is important to make your application as strong as possible. There are no specific courses that must be taken before applying. If a student chooses to take CIB courses before being admitted, the courses will fulfill requirements after admission.

ELIGIBILITY

To be eligible to apply, students must meet the following requirements:

- 54 degree credits completed at time of application (junior standing)
- 12 GPA credits (transfer students must complete a minimum of 12 credits at UW–Madison)
- 2.75 minimum cumulative GPA (This GPA does not guarantee admission to the CIB)
- Grades and GPAs from transfer coursework do not count toward CIB admission
- Currently enrolled UW–Madison student
- Undergraduate, degree-seeking student (non-business)

APPLICATION

The application (<https://apps.wsb.wisc.edu/undergrad/certificate/application/closed.aspx>) is available the first Friday of the fall semester and due the fourth Friday of the fall semester. Students must complete the application in one sitting.

The certificate in business application requires an essay on behalf of the applicant.

Admission decisions are based primarily on cumulative UW–Madison GPA and fit for the program as evidenced through the applicant's essay. All admission decisions are final and there is no appeal process for denied students.

Admitted students will be charged a \$150 tuition differential until degree completion/graduation. The tuition differential provides CIB students access to all School of Business resources, including career coaches and academic advisors within the Undergraduate Program.

REQUIREMENTS

The CIB program consists of six courses (four core courses and two additional breadth courses), for a total of 18 credits. Students are also responsible for any pre-requisite courses needed for core or breadth courses. Specific pre-requisites for each course can be found by clicking on the hyperlinked courses below or by searching for the course in Guide.

Students must take at least 12 of the 18 required credits in residence at UW–Madison. Study abroad courses taken through a UW–Madison-sponsored program will count toward the 12 credits in residence.

Students must earn a grade of "C" or better in all required courses for the CIB.

REQUIRED COURSES

Code	Title	Credits
ACCT I S 300	Accounting Principles ¹	3
or ACCT I S 100	Introductory Financial Accounting	
FINANCE/ECON 300	Introduction to Finance	3
MARKETNG 300	Marketing Management	3
M H R 300	Managing Organizations	3
Breadth Course ²		3
Breadth Course ²		3
Total Credits ³		18

1

CIB students are strongly encouraged to take ACCT I S 300, unless ACCT I S 100 is required by their major. Please note, however, that ACCT I S 100 is a requirement for many other upper-level accounting and finance courses. Students planning to take additional accounting or finance courses, should consult with the CIB advisor.

2

Breadth Requirement information:

- Breadth courses must be at least 3 credits
- Breadth courses must be School of Business courses (or courses cross-listed with School of Business). Breadth courses may be from the same department as the core courses
- Breadth courses must be from *two different School of Business departments* (or cross-listed with two different School of Business departments)
- Courses taken at another institution must be directly equivalent to a UW–Madison business course and title (i.e., not elective credit)

3

Due to pre-requisites for some of the required courses, total credits to complete the Certificate in Business may be more than 18.

EXCLUSIONS

The following courses **may not be used** to satisfy the CIB Breadth Courses requirement:

Code	Title	Credits
GEN BUS 306	Business Analytics I	3
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3

GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	3
GEN BUS 365	Contemporary Topics	3
ACCT I S 211	Introductory Managerial Accounting	3
Any business course numbered 399		
Any business course cross-listed with a foreign language		

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. (Accounting) Apply accounting principles to develop decision-useful accounting information that supports implementation of organizational strategy.
2. (Finance) Know and have a deep understanding of the net present value model and its components, and be able to apply the model to the valuation of assets.
3. (Management and Human Resources) Know and be able to illustrate how organizational success is a function of strategy, organizational culture, human resource management, leadership, teams, structure, managing change, and entrepreneurship.
4. (Marketing) Answer the "big questions" of the marketing planning process by explaining and demonstrating mastery of: 1) why marketing is a strategy and not a slogan, 2) how marketing is personal, 3) the importance of balancing risk, reward, cost, and time to optimize the 4 p's (product, price, place, and promotion), and 4) how marketing is a conduit between customer needs and company wants.

ADVISING AND CAREERS

ADVISING

Students admitted to the Certificate in Business will have an assigned academic advisor and career coach. Further information can be found on the School of Business website (<https://business.wisc.edu/undergraduate/certificates/business/>).

CAREERS

Certificate students are qualified for many entry-level business positions. While the career opportunities available to CIB students are vast, common business careers pursued following graduation include:

- Advertising
- Business analyst—information systems
- Business development
- Commercial and retail banking
- Consulting
- Event management
- Human resources
- Investment management
- Management

- Project lead/manager—information systems
- Retail (stores and corporate)
- Underwriting/claims adjusting

Other CIB students pursue careers in education, engineering, the nonprofit sector, or the healthcare industry, to name a few. Some CIB students attend graduate school following graduation in programs including law school, public policy, medical school, engineering, social work, and more.

I SY E 412	Fundamentals of Industrial Data Analytics	3
I SY E 516	Introduction to Decision Analysis	3
I SY E 620	Simulation Modeling and Analysis	3
M H R 614	People Analytics	3
OTM 453	Operations Analytics	3
R M I 660	Risk Analytics and Behavioral Science	3

CONSULTING, CERTIFICATE

The Consulting Certificate from the Wisconsin School of Business is a 13 credit certificate that helps students develop a consultative process and mindset that integrates critical skills in the areas of project management, business communication, advanced analytics and/or strategy and technology. The Consulting Certificate will prepare students to seek answers to questions in order to define the problem, gather necessary data and information, convert the information into decisions, and successfully communicate that answer in a form appropriate to the audience. Upon completion of the certificate, students will understand how businesses operate, how to communicate successfully with others in business, and will be familiar with the concept of business goals and objectives. This perspective is central to the design and differentiation of our certificate. The goal of this certificate program is to be an add-on to any undergraduate major at UW-Madison so students can apply their major to the field of consulting.

HOW TO GET IN

The consulting certificate is open to UW-Madison undergraduate students. Space in the consulting certificate program is limited so an application is required to be accepted into the program. To find out more about the application process for this certificate, please visit the Undergraduate Certificate (<https://business.wisc.edu/undergraduate/certificates/>) page of the School of Business.

R M I 670	Cyber Risk & Regulations	3

A minimum 3.0 GPA must be earned on all course work used to meet the requirements (13 credits) of the certificate program. All certificate credits must be earned in residence at UW-Madison.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Apply critical thinking skills to complex real-world problems to develop strategies and make actionable recommendations to solve business issues based on a variety of important analytical tools and techniques.
2. Develop case analysis skills in diagnosing business issues and managerial problems, propose workable solutions, and explain and defend solutions.
3. Apply and evaluate project management techniques, and have a basic understanding of the formal and informal tools available to manage time, resources, and stakeholders in executing a project.
4. Develop and practice aspects of successful communication: writing, presenting, and listening. A theoretical foundation provides a method

of deep audience analysis; apply that analysis when producing a variety of written genres and when preparing content for formal presentation.

ADVISING AND CAREERS

Students who have declared the Consulting Certificate will be assigned a Wisconsin School of Business academic advisor and career coach.

INTERNATIONAL BUSINESS, CERTIFICATE

The first term for enrollment in the Certificate in International Business is **fall 2023**.

The Certificate in International Business helps students develop an understanding of the global macroeconomic environment and the complexities of cross-border transactions. International Business is an interdisciplinary field and courses focus on knowledge acquisition as well as application of concepts. The embedded study abroad requirement helps students develop cross-cultural awareness and skills, and gain a regional perspective that often underpins successful adaptation for local markets.

International business careers span industries and economic sectors, as well as business functions and geographies, and often include domestic positions with global scope. Positions in international business involve strategy, leadership, research, government relations, creativity, technical expertise, and cultural fluency.

PEOPLE

FACULTY AND STAFF IN INTERNATIONAL BUSINESS

Reflecting the interdisciplinary nature of the field, instructors from various departments within the Wisconsin School of Business, as well as across campus, teach international business courses.

For more information about the faculty and their teaching and research interests, please visit the directory (<https://business.wisc.edu/directory/>).

SUPPLY CHAIN MANAGEMENT, CERTIFICATE

Admissions to the Supply Chain Management Certificate have been suspended as of fall 2020. If you have any questions, please contact the department.

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services and information along the value chain with the goal of creating value for the end customer. SCM is a cross-functional discipline involving many components of business including product development, marketing, demand/supply planning, sourcing, production, inventory, logistics, customer service, and the relationships between businesses and their channels of distribution. In today's complex business environment, there

is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers. As a result, SCM is a critical, strategic component of business, and students with SCM education and expertise are in high demand in the marketplace.

The supply chain management certificate is open to all undergraduate students enrolled in the School of Business and is administered by the Grainger Center for Supply Chain Management at the School of Business. In addition to the BBA requirements, students complete an 18-credit curriculum required for the certificate. Students will also have the opportunity to interact with business leaders, participate in experiential learning and social activities, have access to a global trip/experience, and be eligible for scholarship opportunities from the Grainger Center.

Each semester, the center offers an informational workshop to help interested students learn about the certificate. At this event students will be exposed to the curriculum and potential career opportunities in the field, as well as network with current students, alumni, and corporate partners.

For questions or additional information about the certificate in supply chain management, please visit the Grainger Center (3450 Grainger Hall) or call 608-262-0710.

The supply chain management certificate is only for students in the School of Business.

Students interested in pursuing the supply chain management certificate must complete an application to verify the degree plan, including a resume review by the BBA Advising Center. All applications will also include a meeting with the Grainger Center staff in 3452 Grainger Hall.

HOW TO GET IN

Admissions to the Supply Chain Management Certificate have been suspended as of fall 2020. If you have any questions, please contact the department.

The supply chain management certificate is only for students in the School of Business.

APPLICATION

Application for students in the School of Business can be found here (https://docs.google.com/forms/d/e/1FAIpQLScykyz1fwVRhydjtIVjqHkiwwa0fGYMg5zb2oF28kJ366uhXw/viewform/?usp=sf_link).

Pre-Application Requirements:

- Meet with a professional career advisor in the BBA Advising Center for a resume review.
- After your resume has been reviewed, upload the revised copy to Handshake.
- Include the SCM designation on your Handshake profile.
- Complete the application and schedule an appointment with the Grainger Center for review. **Be sure to read the application carefully and complete all portions before scheduling an appointment.**

REQUIREMENTS

If you are interested in this certificate, more details about the applied learning events and other benefits will be offered upon declaration.

Attending these events makes students eligible for certificate benefits including scholarships, global trip, etc.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Develop appropriate supply chain strategies, and will be able to assess the financial, marketing and operational implications of such strategies.
2. By engaging in a wide range of applied activities, students will develop an understanding of how supply chain decisions are made in real-world settings.
3. Identify relevant sources of data, know how to access that data, and will be able to analyze it using both statistical and/or optimization techniques to support supply chain decision making.
4. Identify and assess the opportunities and risks associated with sources of supply and markets for goods.
5. Communicate their ideas and recommendations to individuals in all functional areas within an organization.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

ADDITIONAL ADVISING INFORMATION FOR SUPPLY CHAIN STUDENTS

In addition to the required courses for the Supply Chain certificate, students are also required to attend four applied learning events each year, keep up with resume reviews and updates, and report all job and internship offers to the Grainger Center and BBA Career office.

CAREERS

Students enrolled in the supply chain management certificate consistently have access to excellent internship opportunities and earn some of the highest salaries at the School of Business. The average full-time salary for members of the graduating class of 2019 with a supply chain management certificate was approximately \$61,034, while the average monthly internship salary was \$3,000.

Some of the companies that recruit students with a specialization in supply chain management include (but are not limited to):

- 3M
- Amazon
- BP Americas
- Cargill
- Cisco Systems
- Ford
- Georgia-Pacific
- KBX Logistics
- Kimberly-Clark
- Kohler
- Kohl's Department Stores
- Macy's
- Milwaukee Tool
- Nestle
- Rockwell Automation
- Target Corporation
- Uline
- Walgreen's Corporate
- W.W. Grainger

FINANCE

The finance curriculum prepares students for a wide variety of career pathways including corporate finance, the investments and securities industry, the management of financial institutions including banks and insurance companies, and the evolving financial technology sector. The theory of finance and its applications are emphasized. Students learn about: security analysis and valuation, security trading, financial markets and government policies, financial forecasting, capital structure, financial risk management, venture capital, security issuance, international finance and financial technology.

DEGREES/MAJORS/CERTIFICATES

- Business: Finance, Investment, and Banking, BBA (p. 1452)

BUSINESS: FINANCE, INVESTMENT, AND BANKING, BBA

The finance, investment, and banking (<https://business.wisc.edu/undergraduate/majors/finance-investment-banking/>) curriculum prepares students for a wide variety of career pathways including corporate finance, the investments and securities industry, the management of financial institutions including banks and insurance companies, and the evolving financial technology sector. The theory of finance and its applications are emphasized. Students learn about security analysis and valuation, security trading, financial markets and government policies, financial forecasting, capital structure, financial risk management,

venture capital, security issuance, international finance, and financial technology.

A significant part of the coursework teaches students to understand risk and uncertainty, both at an intuitive level and at a technical level. More important, students learn to construct models of financial decisions—e.g., an investor's portfolio choice problem, the issuance of securities by corporations, and the structure of financial investments by banks.

Students pursuing an additional major in Actuarial Science or Economics may opt for a different Business Analytics course. The approved list is detailed on the School of Business Requirements (p. 1436) page.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Code	Title	Credits
School of Business BBA Requirements		
Complete requirements: (p. 1436)		
	Pre-Business	
	Liberal Studies	
	Business Prep	
	Business Core	
	Business Breadth	

FINANCE MAJOR REQUIREMENTS

See the Advising and Careers tab (p. 1455) for helpful progression advice or the Four-Year Plan tab (p. 1454) to see a sample on how to graduate in four years.

Code	Title	Credits
MATH 213	Calculus and Introduction to Differential Equations	3
	or MATH 222	Calculus and Analytic Geometry 2
ACCT I S 301	Financial Reporting I	3
FINANCE 305	Financial Markets, Institutions and Economic Activity	3
FINANCE/ECON 320	Investment Theory	3
FINANCE 325	Corporation Finance	3
FINANCE 330	Derivative Securities	3

Complete two 3-credit Finance courses numbered above 330¹

6 your optimal course sequencing plan, so please consult with your academic advisor.

Total Credits **24**

¹ Each course must be at least 3 credits each.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Apply proper controls and best practices in the governance of modern organizations while recognizing the impact of finance on business and society.
2. Explain the workings of financial markets, the role of financial intermediaries, and market mechanisms to create and trade securities.
3. Evaluate the risk and return of financial securities and transactions.
4. Interpret models of asset pricing and demonstrate how to value financial securities.
5. Learn and apply best practices in data-driven decisions about investments, financing and payout policies, corporate restructuring, and risk management.
6. Identify the role of financial technology in shaping the financial system and financial operations.
7. Formulate a comprehensive financial plan for individuals or business entities.

FOUR-YEAR PLAN

Please use this recommended course sequencing guide as a reference point as you work with your academic advisor to plan your schedule throughout your BBA experience. This guide is intended for students whose primary major and career interests are in finance. Many business breadth and core finance courses are recommended early on so that students are prepared for the internship interview process which begins as early as sophomore year. There are several factors that may impact

Freshman	Credits Spring	Credits Summer	Credits
Fall			
MATH 211 or 221	5 MATH 213 or 222	3-4 See footnote 3	
PSYCH 202	3 GEN BUS 306	3	
ECON 101	4 ACCT I S 100	3	
GEN BUS 110 ¹	1 ECON 102	3-4	
GEN BUS 106	1 FINANCE 200 ²	1	
Communications A	3-4		

17-18 **13-15** **0**

Sophomore	Credits Spring	Credits Summer	Credits
Fall			
FINANCE 205 ²	1 FINANCE/ ECON 320	3 Internship	
FINANCE/ ECON 300	3 FINANCE 325	3	
FINANCE 305	3 MARKETNG 300, M H R 300, or OTM 300	3	
ACCT I S 301	3 GEN BUS 360	3	
GEN BUS 307	3 Ethnic Studies	3	
MARKETNG 300, M H R 300, or OTM 300	3		

16 **15** **0**

Junior	Credits Spring	Credits Summer	Credits
Fall			
FINANCE 330	3 MARKETNG 300, M H R 300, or OTM 300	3 Internship	
Finance Elective ⁴	3 Business Breadth	3	
ACCT I S 211	3 Ethics ⁵	4	
Electives	6 Humanities or Social Science Elective	3	

15 **16** **0**

Senior	Credits Spring	Credits
Fall		
Finance Elective ⁴	3 Business Breadth	3
GEN BUS 301	3 Humanities, Literature, or Social Science	3
Humanities, Literature, or Social Science	3 Science	3
Science Elective	3 Electives	4
Elective	3	

15 **13**

Total Credits 120-123

1

Pre-business admits will take this course in the term of admission to the Wisconsin School of Business.

2

This is the recommended course but any elective is acceptable.

3

Taking summer courses is an option to reduce credit loads during the traditional semesters. Ideal classes to take over the summer include: MARKETNG 300, M H R 300, OTM 300, ACCT I S 211, ECON 102 and Business Breadth.

4

This can be any 3 credit FINANCE course numbered above 330.

5

Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, PHILOS/ENVIR ST 441 Environmental Ethics

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

PLANNING FOR THE FINANCE MAJOR

In preparation for completing the major requirements for the Finance major, taking these courses early will help you graduate in a timely fashion.

Code	Title	Credits
Prior to enrolling in FINANCE/ECON 320, FINANCE 325, or FINANCE 330, plan to take:		
FINANCE/ECON 300	Introduction to Finance	3
MATH 213	Calculus and Introduction to Differential Equations	3
or MATH 222	Calculus and Analytic Geometry 2	
GEN BUS 307	Business Analytics II (can be taken concurrently) ¹	3
Prior to enrolling in FINANCE 325 take:		
ACCT I S 301	Financial Reporting I	3
Prior to your third year, complete:		
FINANCE/ECON 300	Introduction to Finance	3
GEN BUS 307	Business Analytics II ¹	3
ACCT I S 301	Financial Reporting I	3

Other guidance:

It is recommended to take FINANCE/ECON 320 before or concurrently with FINANCE 330; FINANCE 330 is the most quantitatively challenging of the three required courses beyond principles.

If the mathematics requirement has not been completed prior to admission to the School of Business, then you must take MATH 213 and MATH 222 as early as possible.

Prior to your summer internship it can be useful to complete certain finance electives that match your internship and/or career focus area. Please refer to our course sequencing guides for additional information.²

1

Students pursuing an additional major in Actuarial Science or Economics may opt for a different Business Analytics course. The approved list are detailed on the School of Business Requirements (p. 1436) page.

2

See the Career Forward Hub (<https://mycareer.wsb.wisc.edu/career-forward-hub-finance-investment-banking/>) for more information.

CAREERS

Finance is the integration of time, returns and risk and how they are interrelated. Two pressing questions in finance are:

- What do I invest in?
- How do I pay for it?

Organizations that focus on finance include banks, credit card companies, insurance companies, consumer finance companies, corporations, stock brokerages, investment funds, government sponsored enterprises, education, and individuals.

Students may pursue careers in many different industries, including but not limited to:

- Commercial and retail banking
- Corporate finance
- Investment banking
- Investment management
- Investment research
- Global markets (sales and trading)
- Financial technology/cryptocurrency
- Wealth management and financial planning

Find more details about these industries on the BBA Finance website (<https://business.wisc.edu/undergraduate/majors/finance-investment-banking/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

INTERNATIONAL BUSINESS

DEGREES/MAJORS/CERTIFICATES

- Business: International Business, BBA (p. 1457)

BUSINESS: INTERNATIONAL BUSINESS, BBA

Admissions to the Business: International Business, BBA will be suspended as of fall 2023. If you have any questions, please contact the department.

The international business (<https://business.wisc.edu/undergraduate/majors/international-business/>) major helps students develop an understanding of the global macroeconomic environment and the complexities of cross-border transactions. International business is an interdisciplinary field and courses focus on knowledge acquisition as well as application of concepts. A selected regional emphasis provides a platform to gain language and area studies knowledge that often underpins successful adaptation for regional and local markets. The embedded study abroad requirement helps students develop cross-cultural awareness and skills.

International business careers span industries and economic sectors, and business functions and geographies, and often include domestic positions with global scope. Positions in international business involve strategy, leadership, research, government relations, creativity, technical expertise, and cultural fluency.

HOW TO GET IN

Admissions to the Business: International Business, BBA will be suspended as of fall 2023. If you have any questions, please contact the department.

Admission to the Business: International Business, BBA has been suspended as of fall 2023. The School of Business is putting forward a proposal for an international business certificate program to meet the needs of future students.

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see *Entering the School* (p. 1426).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

INTERNATIONAL BUSINESS MAJOR REQUIREMENTS

International business responsibilities and careers typically arise after graduates first develop skills in a functional area of business, such as marketing, finance, management and operations. This functional expertise typically drives initial career placement and advancement. Therefore, the international business major must be paired with another major within the School of Business.

Some international business issues are global in nature, but many challenges and opportunities faced by multinational firms are regional and local in nature and often arise due to differences in institutions, politics and cultures among nations. This 'glocal' reality means that international business leaders must possess both global and local awareness. To develop some perspective on regional and local cultural issues, international business majors select a geographic region of emphasis and select language and area studies courses accordingly. Studying abroad on an approved program in the selected region of emphasis for one fall or spring semester is also required for the major.

A student must complete a minimum of 24 credits, distributed as follows:

Code	Title	Credits
INTL BUS 200	International Business	3
International Business Coursework		9
Minimum of 3 credits must be from the International Business Department		
INTL BUS/ GEN BUS 320	Intercultural Communication in Business	
INTL BUS 365	Contemporary Topics	
INTL BUS/ M H R 403	Global Issues in Management	
INTL BUS/ MARKETNG 420	Global Marketing Strategy	
INTL BUS/ REAL EST 430	International Real Estate	
INTL BUS/ FINANCE 445	Multinational Business Finance	
INTL BUS/A A E/ ECON 462	Latin American Economic Development	
A A E/ INTL ST 373	Globalization, Poverty and Development	
A A E/ INTL ST 374	The Growth and Development of Nations in the Global Economy	
ECON 309	Study Abroad in Intermediate Economics	
ECON 409	Study Abroad in Advanced Economics	
ECON 364 or ECON 464	Survey of International Economics International Trade	

ECON 467	International Industrial Organizations
ECON/A A E 473	Economic Growth and Development in Southeast Asia
ECON/A A E 474	Economic Problems of Developing Areas

Global Interdisciplinary Perspective **3**

Select one course from the following:

GEOG 340	World Regions in Global Context
INTL ST 101	Introduction to International Studies
ANTHRO 104	Cultural Anthropology and Human Diversity
POLI SCI 140	Introduction to International Relations

Coursework in Foreign Language and Area Studies **9**

Select 9 credits of approved coursework for the specified region (found below)

Semester Abroad

Complete a semester abroad on an approved program within the region of emphasis selected (found below)

Total Credits **24**

REGIONS OF EMPHASIS

Students must take 9 credits of language or area studies courses applicable to the region of emphasis. It is recommended to take at least one 3 credit language course applicable to your study abroad destination (unless the official language of that nation is English). Students must also choose a study abroad program that aligns with their region of emphasis.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Know and be able to apply international business theories and concepts to a variety of business situations.
2. Formulate business strategies appropriate to global, regional and local contexts.
3. Know the skills necessary for cross-cultural adaptation and know how to access resources to continue future learning.

FOUR-YEAR PLAN

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic

advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

The perspective, intercultural awareness and regional knowledge gained through the study of international business is always relevant, but has greatest career impact several years into one's career. Therefore, the international business major is designed to serve as a complement to another business major. International business careers develop after graduates first develop skills and expertise in a functional area of business, which drives initial career placement and advancement.

Careers in international business are not necessarily located overseas or even in major cities. Many positions are in U.S.-based offices or divisions of international firms.

PEOPLE

FACULTY AND STAFF IN INTERNATIONAL BUSINESS

Reflecting the interdisciplinary nature of the field, instructors from various departments within the Wisconsin School of Business, as well as across campus, teach international business courses.

For more information about the faculty and their research interests, please visit the [directory](https://business.wisc.edu/directory/) (<https://business.wisc.edu/directory/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

MANAGEMENT AND HUMAN RESOURCES

Students in human resources management study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Management studies focus on the activities of leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions. Studies in entrepreneurship are designed for students who are interested in bringing new ideas to the marketplace.

The M H R major is designed to give students the choice of which option(s) to study: human resources, management, or entrepreneurship.

DEGREES/MAJORS/CERTIFICATES

- Business Administration: Human Resources, BBA (p. 1475)
- Business Administration: Management, BBA (p. 1476)

BUSINESS ADMINISTRATION: HUMAN RESOURCES, BBA

Human resources professionals play a crucial role in an organization's success: They attract, motivate, develop and retain employees. If you enjoy a high level of personal interaction and have a healthy amount of empathy and patience, advancing in this field is for you.

In the UW–Madison Online BBA in Human Resources you will learn about leadership, strategy, and decision-making that will land you in a demanding yet rewarding field. Through the highly ranked Wisconsin School of Business, you will gain valuable skills in communication, collaboration, problem solving, research and planning. You will learn to analyze an organization's compensation strategy, discern the best staffing techniques, address challenges facing labor and employment relations, use the best negotiation tactics and design work systems that help employees contribute to an organization's performance.

After you graduate, you'll attract top national employers in a variety of industries, such as finance and insurance, health care and social assistance, professional/scientific/technical services and manufacturing. The BBA in Human Resources from UW–Madison Online will equip you for a broad array of careers, from human resources manager to compensation analyst or compliance manager.

HOW TO GET IN

Students applying to the BBA in Business Administration-Human Resources program apply through UW-Madison Online (<https://online.wisc.edu/>). UW–Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Code	Title	Credits
School of Business BBA Requirements		
Complete requirements: (p. 1436)		
	Pre-Business	
	Liberal Studies	
	Business Prep

BBA IN BUSINESS ADMINISTRATION - HUMAN RESOURCES MAJOR REQUIREMENTS

The BBA in Business Administration - Human Resources major is a total of 12 credits consisting of the following 4 required courses.

Code	Title	Credits
M H R 305	Human Resource Management	3
M H R 423	Strategic Management	3
M H R 610	Compensation: Theory and Administration	3
M H R 611	Personnel Staffing and Evaluation	3
Total Credits		12

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand that the management of human resources is vital to a successful business strategy and organizational effectiveness.
2. Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
3. Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance.
4. Identify and address the various challenges currently facing labor and employment relations.
5. Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
6. Design work systems and roles that allow employees to contribute to organizational performance.

FOUR-YEAR PLAN

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the [Requirements](#) tab for more information about the curriculum and program plan.

ADVISING AND CAREERS

ACCESSING ADVISING

Each UW-Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-career-coach/>). The AC advisor will support the academic and personal success of each student by partnering with current Wisconsin School of Business advisors in the Wisconsin BBA Advising Center to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

CAREERS

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

PEOPLE

FACULTY AND STAFF IN MANAGEMENT AND HUMAN RESOURCES

For more information about the faculty and their research interests, please visit the [directory](https://business.wisc.edu/directory/) (<https://business.wisc.edu/directory/>).

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS ADMINISTRATION: MANAGEMENT, BBA

Management studies focus on the activities of leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions. If you aim to be an entrepreneur or advance in a leadership position in a private business, government or nonprofit organization, a BBA in Management is a good fit for you.

Through UW–Madison Online, you'll learn from top faculty in the field. From the highly ranked Wisconsin School of Business, you will gain valuable skills in communication, collaboration, planning, problem solving and building relationships. You will learn to develop successful team structures that maximize performance, design systems to achieve strategic objectives in a global business environment, diagnose problems and design effective interventions, and evaluate an organization to maximize its competitive advantage within an industry.

This degree will prepare you to work for businesses large and small or for yourself as a business owner or entrepreneur. Top industries hiring in this field include finance and insurance, health care and social assistance, professional/scientific/technical services and manufacturing. The BBA in Management from UW–Madison Online will equip you for a broad array of careers, from business owner to talent acquisition manager or compensation analyst, to name just a few.

HOW TO GET IN

Students applying to the BBA in Business Administration-Management program apply through UW-Madison Online (<https://online.wisc.edu/>). UW–Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS: MANAGEMENT AND HUMAN RESOURCES, BBA

Students in the Management and Human Resources (<https://business.wisc.edu/undergraduate/majors/management-human-resources/>) major can choose from various options. Students in human resources study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Management studies focus on the activities of leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions. Studies in entrepreneurship are designed for students who are interested in bringing new ideas to the marketplace.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Human Resources and Management Tracks) Understand that the management of human resources is vital to a successful business strategy and organizational effectiveness.
2. (Human Resources Track) Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
3. (Human Resources Track) Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance.
4. (Human Resources Track) Identify and address the various challenges currently facing labor and employment relations.
5. (Human Resources Track) Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
6. (Human Resources Track) Design work systems and roles that allow employees to contribute to organizational performance.
7. (Entrepreneurship Track) Develop innovative solutions to challenging problems and generate economic and socially valuable outcomes.
8. (Entrepreneurship Track) Create, assess, shape, and act on opportunities in a variety of contexts and organizations.
9. (Entrepreneurship Track) Make decisions based on mindfulness of relevant stakeholders, ethical reflections, and an attempt to create and sustain social, environmental, and economic value.
10. (Entrepreneurship Track) Incorporate cultural context and complexities when managing in a global environment.
11. (Entrepreneurship Track) Exercise appropriate leadership, value diverse perspectives, and work collaboratively to accomplish organizational objectives in a dynamic environment.
12. (Management Track) Develop successful team structures that mitigate decision-making pitfalls and interpersonal conflict while maximizing team performance.
13. (Management Track) Design successful organization structures to achieve strategic objectives and execute operational plans within a global business environment.
14. (Management Track) Diagnose management and organizational problems from an internal or external consultant's perspective and design interventions to enhance organizational effectiveness.
15. (Management Track) Evaluate an organization's internal capabilities and external pressures and maximize its competitive advantage within an industry.

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

There are three named options for the MHR major from which students must choose. Students may also select any combination of two options. There are six plans below representing these options.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student’s educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Students who pursue a major in management go on to careers in a wide range of fields. To find more information about common industries that management majors work in following graduation, please visit our website (<https://business.wisc.edu/undergraduate/majors/management-human-resources/>).

BUSINESS: MANAGEMENT AND HUMAN RESOURCES: HUMAN RESOURCES

HUMAN RESOURCES OPTION

Students in human resources management study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Topics covered include recruiting, external and internal staffing, compensation theory and administration, performance management, training and development, labor-management relations, and equal employment opportunity. This concentration is pursued by students seeking staff jobs in the human resources department, supervisory and team leader jobs, and entry into management training programs that precede job placement. It is appropriate for those who seek positions in both public and private sector organizations.

REQUIREMENTS

A student must take a minimum of 12 credits, distributed as follows:

Code	Title	Credits
M H R 305	Human Resource Management	3
<i>Complete 3 of the following HR electives OR 2 of the following and 1 Management elective:</i>		9-10

BUSINESS: MANAGEMENT AND HUMAN RESOURCES: MANAGEMENT

MANAGEMENT OPTION

This major focuses on the activities of management in organizations. Course material covers leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions (such as marketing and finance). The topics apply to business, government, health care, and other service organizations. This concentration is especially appropriate for students who seek roles as general managers and administrators at all levels of an organization, rather than roles as technical specialists. Students are also helped in developing a long-term perspective of both their own careers and the function of management in organizations and society.

REQUIREMENTS

Students must take a minimum of 12 credits, distributed as follows:

Code	Title	Credits
M H R 423	Strategic Management	3
<i>Complete 3 of the following OR 2 of the following and 1 elective</i>		9
M H R 305	Human Resource Management

ENTREPRENEURSHIP, CERTIFICATE

The undergraduate certificate in entrepreneurship (<https://business.wisc.edu/undergraduate/certificates/entrepreneurship/>) is one of the most popular certificates at UW–Madison. It offers opportunities for **non-business undergraduates** interested in learning the skills for entrepreneurial thinking. These skills are critical both now and in the future if you are starting a new venture, working for a startup, or tackling new ventures within existing organizations. Modern businesses rely heavily on the ability to recognize and seize opportunities. Cutting-edge technologies, innovative business models, and ever-changing market landscapes determine which firms thrive and which do not. Taking initiative, thinking entrepreneurially, and acting upon opportunities are key ingredients of success in this environment.

This certificate program offers a distinct array of courses that combine business entrepreneurship classes with the curricula of several colleges and schools at UW–Madison. Classes in entrepreneurship and related topics provide the skills necessary to succeed throughout a student's career. Student projects outside the classroom with local firms or student ventures provide students with hands-on business experience. This comprehensive certificate program helps prepare students for roles such as business founder, product manager, engineer/scientist, new product designer, marketing or finance professional, nonprofit administrator, or consultant.

HOW TO GET IN

The certificate is open to undergraduate students who have home departments outside of the School of Business and are in good academic standing. Business undergraduates should explore the entrepreneurship major option.

To declare the certificate in entrepreneurship, go to the Academic Forms (<https://bus.wisc.edu/current-student-resources/bba/academic-support-resources/forms/>) page and complete the declaration form.

REQUIREMENTS

A total of 15 credits is required to complete the certificate. The required foundation course, advanced entrepreneurship coursework, and electives from across the campus are used to earn the 15 credits. Coursework options available for fulfilling the certificate program are shown in the accompanying tables. Students are strongly encouraged to participate in related non-credit entrepreneurship immersion experiences such as competitions and student organizations.

Students will:

1. Take one 3-credit required foundation course (M H R 322 OR M H R 422)
2. Choose 3 additional credits from a list of approved School of Business advanced entrepreneurship courses
3. Choose 9 credits of additional courses from a list of approved other electives or advanced entrepreneurship courses.

At least 9 of the required 15 credits for the certificate must be completed in residence.

Students must earn a 2.5 cumulative GPA in all certificate in entrepreneurship coursework.

REQUIRED FOUNDATION COURSEWORK

Code	Title	Credits
M H R 322	Introduction to Entrepreneurial Management (restricted to non-business majors)	3
or M H R 422	Entrepreneurial Management	

ADVANCED ENTREPRENEURSHIP COURSEWORK ¹

Students must choose **at least 3 credits** from the following list of courses:

Code	Title	Credits
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors ²	3
or ACCT I S 100	Introductory Financial Accounting	
or ACCT I S 300	Accounting Principles	
M H R 434	Venture Creation	3
M H R 427	Entrepreneurial Growth Strategies	3
M H R 441	Technology Entrepreneurship	3
FINANCE 457	Entrepreneurial Finance	3

¹

Some courses listed have pre-requisites, so please make sure those are satisfied before selecting a course.

²

Non-business majors are strongly recommended to take GEN BUS 310 **instead of** ACCT I S 100 or ACCT I S 300.

ELECTIVE COURSEWORK

9 credits of other elective coursework (below) can be counted toward the required 15 certificate credits.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Correctly demonstrate knowledge of basic market discovery techniques and apply basic market discovery techniques.
2. Demonstrate proficiency in knowing the basic steps taken to start a new venture.
3. Demonstrate knowledge of career paths in entrepreneurship (M H R 322 Introduction to Entrepreneurial Management/M H R 422 Entrepreneurial Management).

ADVISING AND CAREERS**ACADEMIC ADVISING**

Students who have declared the Certificate in Entrepreneurship will have an assigned academic advisor and career coach. Contact information for a student's assigned academic advisor and career coach can be found here (<https://business.wisc.edu/undergraduate/certificates/entrepreneurship/>).

MARKETING

Marketing creates exchanges between organizations and customers. It includes planning, designing, pricing, promoting and distributing goods and services that satisfy organizational and customer needs. In the high-level economy of the United States and many other countries, marketing has become a critical and comprehensive business function. The concept of marketing is becoming increasingly broad and important. Students may pursue career opportunities in: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing & Communication and Supply Chain Management.

Contemporary marketing managers must understand not only the traditional areas of marketing channels, sales management, advertising, and research, but must also be familiar with consumer and dealer motivation. The manager must be able to translate knowledge of

consumer behavior into marketing strategy. The marketing program is broad enough to permit a major to develop knowledge in these several areas, but flexible enough so that students may focus on special interest areas.

DEGREES/MAJORS/CERTIFICATES

- Business Administration: Marketing, BBA (p. 1492)
- Business: Marketing, BBA (p. 1493)

BUSINESS ADMINISTRATION: MARKETING, BBA

If you're a strategic thinker and a creative problem-solver, then advancing in a career in marketing could be a good choice for you. Marketing is a diverse field that involves in-demand skills desired by top employers, large and small. It's also a growing field, particularly in the digital realm. Successful marketers will be analytical, creative and know how to leverage technology.

The UW–Madison Online BBA in Marketing provides a robust foundation in business. From the highly ranked Wisconsin School of Business, you will gain valuable skills in communication, collaboration, creativity, relationship building and planning. You will learn to implement strategies related to product, place/distribution, price and promotion; analyze market segments and generate effective plans; leverage relevant sources to determine and support marketing actions; and apply analytical rigor to decisions.

Graduates pursue a variety of careers in marketing, including brand/product management, marketing research/analytics, sales management, advertising, business-to-business marketing, digital and social media, consulting, and supply chain management. You could be a product manager, social media strategist or market research analyst, among other dynamic jobs.

HOW TO GET IN

Students applying to the BBA in Business Administration-Marketing program apply through UW-Madison Online (<https://online.wisc.edu/>). UW–Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to

the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

BBA IN BUSINESS ADMINISTRATION - MARKETING MAJOR REQUIREMENTS

The BBA in Business Administration - Marketing major is a total of 18 credits consisting of the following 6 required courses.

Code	Title	Credits
MARKETNG 305	Consumer Behavior	3
MARKETNG 310	Marketing Research	3
MARKETNG 355	Marketing in a Digital Age	3
MARKETNG/ OTM 421	Fundamentals of Supply Chain Management	3
MARKETNG 430	Strategic Pricing	3
MARKETNG 460	Marketing Strategy	3
Total Credits		18

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Apply analytical rigor to marketing decisions.
2. Locate, evaluate, and leverage relevant sources to determine and support their marketing actions.
3. Demonstrate the ability to formulate and implement marketing strategies related to product, place/distribution, price, promotion.
4. Demonstrate the ability to evaluate and analyze appropriate market segments and generate effective marketing plans.

FOUR-YEAR PLAN

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the [Requirements](#) tab for more information about the curriculum and program plan.

ADVISING AND CAREERS

ACCESSING ADVISING

Each UW-Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-career-coach/>). The AC advisor will support the academic and personal success of each student by partnering with current Wisconsin School of Business advisors in the Wisconsin BBA Advising Center to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

CAREERS

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS: MARKETING, BBA

Marketing facilitates exchanges between organizations and customers and is a critical, dynamic, and multi-faceted area of business. The marketing function is found throughout organizations and businesses from global enterprises to start-ups; for services such as healthcare and banking; for nonprofits and municipalities. Students may pursue a variety of careers in marketing including: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing & Communication and Supply Chain Management.

In the marketing major, students learn the foundations of marketing—product, place, price, promotion—and how these concepts impact business strategy and execution in different industries and contexts, as well as the importance of relationships with customers and channel partners. Marketing professionals possess and develop a variety of skills including qualitative and quantitative analysis, critical thinking, creativity, communications, and problem solving. The marketing major (<https://business.wisc.edu/undergraduate/majors/marketing/>) provides a robust foundation in the marketing discipline, coupled with the flexibility to pursue several areas of interest in the discipline.

RECOGNITION

In 2022, the marketing department at the School of Business was ranked 9th in the United States by *U.S. News & World Report*.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

The marketing function is found throughout all organizations and businesses from global enterprises to start-ups; for services such as healthcare and banking; for non-profits and municipalities. Students may pursue a variety of careers in: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing & Communication and Supply Chain Management.

OPERATIONS AND INFORMATION MANAGEMENT

The Department of Operations and Technology Management administers the operations and technology major, the information systems major, and the supply chain management major.

The Operations and Technology Management (OTM) major focuses on the design, production, and delivery of products and services to satisfy customer needs. It equips students with the essential tools and strategies to use resources efficiently, make desirable trade-offs, and strategically redesign or restructure operations. OTM majors distinguish themselves by strong analytical and problem-solving capabilities together with the ability to provide high-level managerial insights into value-based service and production management.

Built on a solid foundation of a business and information technology (IT) curriculum, the major in Information Systems delivers a unique

blend of business acumen, industry standards, and practical computing instruction. Students enjoy successful placement and satisfying careers because they possess both the in-depth knowledge of business processes and the ability to readily translate business requirements into value-added IT solutions. The curriculum is designed to prepare effective leaders in the design, development, and management of information systems—the lifeblood of a successful business model. Students learn how to use computer technologies to analyze business problems and processes in order to design and implement computer-based information systems which support business operations, decision-making, and planning. Career opportunities exist in management consulting and in industry in the areas of systems development, database administration, network management and as corporate information systems managers.

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. Supply Chain Management majors learn how to develop appropriate strategies through exploration of logistics, routes to market, analytics, sourcing, and IT systems. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers.

DEGREES/MAJORS/CERTIFICATES

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Information systems professionals help clients address some of their most complex business problems through the effective use of technology. They see pathways to solutions of highly complex technical issues and are key leaders in conceptualizing and sourcing the best solutions. Information systems professionals collect, store, and

analyze information and data to assist organizations and departments in executing business initiatives and making informed decisions. In addition, they use hardware, software, technology infrastructure combined with input from internal or external clients to develop tools to solve and track business objectives.

For more information about careers in information systems, please visit our Undergraduate Info Systems website (<https://business.wisc.edu/undergraduate/majors/information-systems/>).

BUSINESS: OPERATIONS AND TECHNOLOGY MANAGEMENT, BBA

The Operations and Technology Management (<https://business.wisc.edu/undergraduate/majors/operations-technology->

management/) (OTM) major focuses on the design, production, and delivery of products and services to satisfy customer needs. It equips students with the essential tools and strategies to use resources efficiently, make desirable trade-offs, and strategically redesign or restructure operations. OTM majors distinguish themselves by strong analytical and problem-solving capabilities together with the ability to provide high-level managerial insights into value-based service and production management.

OTM majors have many career opportunities due to their process orientation and analytical training. They are especially well-equipped for positions in supply chain management and logistics, business analytics, management consulting, service operations management, and manufacturing management.

HOW TO GET IN

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see *Entering the School* (p. 1426).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Code	Title	Credits

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand how to analyze and evaluate business processes combined with a capability for improving those processes.
2. Understand how the effects of increased utilization and variability impact process capacity and flow times, and will be able to suggest approaches to improve system performance.
3. Build analytical models to solve business problems.
4. Articulate the commonalities and differences between service and manufacturing processes, and be able to manage and make improvements within either context.
5. Apply principles of supply chain management in business contexts.
6. Analyze and implement operational business decisions from both strategic and tactical perspectives.

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

All products and services—from cars to surgeries—are delivered by organized systems. It's the job of operations managers to make sure those activities occur when they are planned, in the right way, in the right quantity, and with the right quality. Operations management transforms inputs—such as labor, equipment, facilities, materials, energy, and information—into goods and services for customers. To make this all happen, the operations function is responsible for critical activities such as materials management, resource planning, purchasing, scheduling, and quality.

Common Career Paths

Production Management

- Production management involves the design, operations, and improvement of processes used to manufacture goods valued by end users. Key tasks involve planning and control of materials and resources to enable these processes and make them error-free, fast, and low cost.

Service Operations Management

- Service operations management is concerned with the design, operations, and improvement of processes used to produce and deliver services to end customers. Key tasks involve planning control of resources (including training of service personnel) to enable these processes and make them error-free, fast, and low cost.

Technology Management

- Technology management allows an organization to manage its technological fundamentals to create a competitive advantage. The role of technology management is to understand the value technologies can have for an organization and for its customers—and to decide when to invest in technology development and/or when to withdraw from using it.

Supply Chain Management

- Supply chain management focuses on the movement of products and information along the value chain. The organizations that make up the supply chain are “linked” together through physical flows and information flows. Key tasks are focused on integrating marketing, sourcing, production, logistics, and information systems—not only within the organization, but also with business partners and customers.

Consulting

- Operations consulting is the process of assisting various types of businesses to assess the current status of internal procedures and strategies, and enhance the overall operation of the company. While operations consulting is often thought to focus on manufacturing plants or production facilities, the scope of operations consulting is actually broader than that. Even businesses that are service-based rather than product-based can benefit from operations consulting.

Project Management

- Project management is the application of processes, methods, knowledge, skills, tools, and experience to achieve project goals. Projects are separate to business-as-usual activities, requiring people to come together temporarily to focus on specific project objectives

Please visit our website (<https://business.wisc.edu/undergraduate/majors/operations-technology-management/>) for further details about potential career areas and responsibilities.

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS: SUPPLY CHAIN MANAGEMENT, BBA

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. SCM is a cross-functional discipline involving many components of business including product development, marketing, demand/supply planning, sourcing, production, inventory, logistics, customer service, and the relationships between businesses and their channels of distribution. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers. As a result, SCM

is a critical, strategic component of business, and students with SCM education and expertise are in high demand in the marketplace.

The supply chain management major is open to all undergraduate students enrolled in the Wisconsin School of Business and is administered by the Grainger Center for Supply Chain Management at the Wisconsin School of Business. Students will have the opportunity to interact with business leaders, participate in experiential learning and social activities, have access to a global trip/experience, and be eligible for scholarship opportunities from the Grainger Center.

It is important to appreciate SCM from both the theoretical and applied perspectives. Students declared in the supply chain management major will have the opportunity to participate in a large number of speaker events, site visits, and employer networking opportunities. Additionally, students will be eligible to participate in annual global trip opportunities led by the Grainger Center for Supply Chain Management. These trips allow for the exploration of SCM in new and different locations throughout the world.

For questions or additional information about the major in supply chain management, please visit the Grainger Center (<https://business.wisc.edu/centers/grainger/>) (3450 Grainger Hall).

HOW TO GET IN

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (<https://guide.wisc.edu/undergraduate/business/#enteringtheschooltext>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Assess the financial, marketing, and operational implications of fundamental supply chain strategies.
2. Compare how supply chain strategies are applied by examining decisions made in various real-world settings.
3. Create business value through the analysis of appropriate data using statistical and/or optimization techniques.
4. Synthesize supply chain concepts into a business strategy that is implemented through a cross-functional business simulation.
5. Effectively communicate ideas and recommendations to individuals in all functional areas of an organization.
6. Evaluate opportunities and risks necessary to develop effective sourcing strategies.
7. Assess costs and benefits in the formulation of appropriate go-to-market channels to reach desired customer groups.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

ADDITIONAL ADVISING INFORMATION FOR SUPPLY CHAIN STUDENTS

In addition to the required courses for the supply chain management major, students are also required to attend four applied learning events each year, keep up with resume reviews and updates, and report all job and internship offers to the Grainger Center and BBA Career office.

CAREERS

Students enrolled in the supply chain management major have access to excellent internship opportunities and earn some of the highest salaries at the Wisconsin School of Business. The average full-time salary for members of the graduating class of 2019 with a supply chain management certificate (offered prior to implementation of the supply chain management major) was approximately \$61,034, while the average monthly internship salary was \$3,000.

Some of the companies that recruit students with a specialization in supply chain management include (but are not limited to):

- 3M
- Accenture
- Amazon
- BP Americas
- Cargill
- Deloitte
- Ford
- Georgia-Pacific
- KBX Logistics
- Kohler
- Kohl's Department Stores
- Macy's
- Milwaukee Tool
- Nestle
- Procter & Gamble
- Rockwell Automation
- Target Corporation
- Uline
- Wayfair
- W.W. Grainger

REAL ESTATE AND URBAN LAND ECONOMICS

The primary goal of the undergraduate real estate (<https://business.wisc.edu/undergraduate/majors/real-estate/>) major is to **comprehensively underwrite commercial real estate**, which is broad-based and follows the education thought leadership of James A. Graaskamp, who expressed that “Real estate should be taught as a process of dynamic interactions rather than functional and historical facts.” Underwriting commercial real estate includes the analysis of all property

types and the development of residential communities, while assessing and managing risk in all aspects of real estate relative to finance, development, valuation and market analysis. To effectively underwrite commercial real estate, students must be able to identify and synthesize technical or basic skills, conceptual knowledge, critical thinking skills, and understand the real estate landscape to make informed and thoughtful property decisions. Graduates of the real estate major secure employment in a wide-range of positions and responsibility including real estate private equity investment, commercial real lending and valuation, and real estate development among many other areas including asset/property management and investment sales and brokerage.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1436) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Code	Title	Credits
School of Business BBA Requirements		
Complete requirements: (p. 1436)		
	Pre-Business	
	Liberal Studies	
	Business Prep	
	Business Core	
	Business Breadth	

REAL ESTATE MAJOR REQUIREMENTS

Code	Title	Credits
REAL EST/A A E/ ECON/URB R PL 306	The Real Estate Process	3
REAL EST 410	Real Estate Finance	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Assemble and analyze market, linkage, and economic data to make prudent investment decisions.
2. Identify debt and equity capital sources that meet investor risk/return parameters for development, acquisitions, debt and value-add investment opportunities.
3. Responsibly and ethically consider investor, tenant, community, and municipal needs in the development process.
4. Create value in the built environment through developments that are built to scale, affordable, and sustainable.
5. Communicate the merits of real estate projects to investors, community stakeholders, and municipal/publicly elected officials.
6. Provide a network of professionals with cutting-edge perspectives and employment opportunities.

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Real estate as a career encompasses a wide range of activities—from development and construction to financing; from brokerage and leasing to property management; from appraisal and assessment to insurance and regulation; from research to urban planning, government affairs and more. Job responsibilities vary by function and can be office-based or in the field. Qualifications also vary from licensing and certification to advanced degrees.

Please visit our website (<https://business.wisc.edu/undergraduate/majors/real-estate/>) to learn more about careers in real estate.

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

RISK AND INSURANCE

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. While it is not required for students to sit for actuarial exams, more than 90% of our students pass at least two professional exams before they graduate.

The major in risk management and insurance prepares students to identify, analyze, and manage risks that are inherent in the operation of profit and not-for-profit institutions. Besides professional careers in risk management, the major cultivates skills required for challenging opportunities in organizations that accept these risks—private and governmental insurers, as well as brokerage/agency and consulting organizations.

DEGREES/MAJORS/CERTIFICATES

- Business: Actuarial Science, BBA (p. 1511)
- Business: Risk Management and Insurance, BBA (p. 1515)

BUSINESS: ACTUARIAL SCIENCE, BBA

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The Actuarial Science (<https://business.wisc.edu/undergraduate/majors/actuarial-science/>) major curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. While it is

not required for students to sit for actuarial exams, more than 90% of our students pass at least two professional exams before they graduate.

MISSION

The actuarial science program distinguishes itself through leadership, innovation, community, connections, networks, and recognition of the quality of the faculty, the courses, and the students.

Total Credits		23

¹

The probability, statistics and regression/analytics requirements above for the actuarial science major also fulfill the business analytics requirement found in the BBA Business Preparatory Requirements.

RECOMMENDED ELECTIVES

Code	Title	Credits
MATH 234	Calculus–Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3

R M I 300	Principles of Risk Management	3
FINANCE/ECON 320	Investment Theory	3
COMP SCI 220	Data Science Programming I ¹	4
STAT 303	R for Statistics I	3
& STAT 304	and R for Statistics II	
& STAT 305	and R for Statistics III	

¹

Recommended to take either COMP SCI 220 or the STAT 303, STAT 304, STAT 305 sequence.

Students are encouraged to take MATH 234 Calculus–Functions of Several Variables before taking probability (MATH/STAT 431 Introduction to the Theory of Probability, STAT/MATH 309 Introduction to Probability and Mathematical Statistics I, or STAT 311 Introduction to Theory and Methods of Mathematical Statistics I), courses in risk management and insurance; finance; and computer science.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Recognize and explain the concept of risk, and apply the knowledge to the development of insurance products that are used to manage risk for the consumer as well as the risk of those products on the insurance organization.
2. Describe the actuarial profession, including the major professional organizations, the professional obligations of being an actuary, and the requirements to obtain and maintain a professional actuarial designation.
3. Demonstrate skills in critical thinking, quantitative analysis, and communication, as well as to develop an appreciation for actuarial theory, research, and the link to practical application.
4. Demonstrate the soft skills of being a professional.
5. Communicate their experiences and inspire others across the WSOB learning community.

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

Actuarial program faculty offer advising nights every fall semester to help students plan their course sequencing and professional exams.

CAREERS

Actuaries are problem solvers with expertise in understanding and managing financial risk. They use historical information and models to help predict the future. Actuaries may specialize in life and health (risk of illness, disability or death), pensions (develop and analyze retirement programs) or property and casualty (personal property risks and risks associated with businesses).

Some of our actuarial students utilize the analytical and technical skills they learn in the actuarial program and apply those skills to pursue data analytics or data science as a career. They may do this in the risk and insurance industry or in any industry that has the need to analyze, project and make decisions from large amounts of data.

Find out more about common industries and essential skills needed to be an actuary on the Undergraduate Actuarial Science website (<https://business.wisc.edu/undergraduate/majors/actuarial-science/>).

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

There are several exams and credentials from the Casualty Actuarial Society (<http://www.casact.org/>) and the Society of Actuaries (<https://www.soa.org>) that we prepare students to obtain during their undergraduate career. Students are encouraged to pass at least two actuarial exams before graduation in order to obtain an internship and/or job.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

If you are good at math and are interested in pursuing a career as an actuary, apply for our UW-Madison Actuarial Program Scholarship (<https://business.wisc.edu/faculty-research/risk-insurance/actuarial-profession-awareness/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS: RISK MANAGEMENT AND INSURANCE, BBA

The major in risk management and insurance (<https://business.wisc.edu/undergraduate/majors/risk-management-insurance/>) prepares students to identify, analyze, and manage risks that are inherent in the operation of profit and not-for-profit institutions. Besides professional careers in risk management, the major cultivates skills required for challenging opportunities in organizations that accept these risks—private and governmental insurers, as well as brokerage/agency and consulting organizations.

The program of study may be structured to aid students seeking professional designations of Chartered Property and Casualty Underwriter (CPCU) and Associate in Risk Management (ARM).

RECOGNITION

Our risk management and insurance undergraduate program is ranked 3rd in the US by *U.S. News & World Report*, 2022.

	Business Breadth	

RISK MANAGEMENT & INSURANCE (R M I) MAJOR REQUIREMENTS

The risk management and insurance major consists of 12 required credits. R M I 300 should be completed prior to any other R M I coursework, as it is a prerequisite for all other courses.

Code	Title	Credits
R M I 300	Principles of Risk Management	3
Complete 2 of the following courses ¹		
R M I 640	Management of Insurance Enterprise	6
R M I 645	Commercial Insurance	
R M I 655	Risk Financing Techniques	
R M I 660	Risk Analytics and Behavioral Science	

Complete 1 other 600-level R M I course, 600-level ACT SCI course, FINANCE 325, or FINANCE 330 ²	3
Total Credits	12

¹ Students may choose to take a third course from this list to count as their additional 3-credit, 600-level R M I course.

² None of the elective courses may be used to satisfy the business breadth requirement.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Integrate a holistic risk management process (framework) across all dimensions of an organization, implementing risk management decisions that add value.
2. Use appropriate statistical techniques and data analysis to support risk management decisions.
3. Apply fundamental insurance principles that support economic development through insurance markets.
4. Identify decision-making challenges, and implement strategies to address those challenges, in environments involving risk and uncertainty.
5. Demonstrate strong critical thinking skills as observed through their ability to debate various positions, ask skeptical questions, and probe underlying assumptions.
6. Demonstrate leadership qualities in moving the profession forward.

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

Freshman			
Fall	Credits Spring	Credits Summer	Credits

Total Credits 111-113

¹ Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, ENVIR ST/PHILOS 441 Environmental Ethics

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the Wisconsin School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

ASSIGNED ACADEMIC AND CAREER COACHES

Admitted business students will have one assigned academic advisor.

Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the Wisconsin School of Business, there is a team of pre-business advisors available.

ACCESSING ADVISING

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our career coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Risk professionals identify, develop, and analyze solutions to manage risk (financial, credit, operational, etc.) at both the organizational and consumer level. Effective risk management encompasses all divisions of an organization, allowing the organization to grow safely and to be more resilient. Insurance is a key solution for managing risk and is deployed by risk professionals working as brokers, underwriters, claims adjusters, product developers, and a host of other potential insurance careers.

To learn more about careers in risk management and insurance, please visit the BBA RMI website (<https://business.wisc.edu/undergraduate/majors/risk-management-insurance/>).

PEOPLE

FACULTY AND STAFF IN RISK AND INSURANCE

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

SCHOOL OF EDUCATION

The School of Education at UW–Madison is consistently ranked as one of the finest schools of education in the United States, and among the best in the world. The school embraces fields of study that define the human experience: **education** to challenge minds, **health** to improve lives, and the **arts** to enhance creative spirits. World-class research is conducted to drive conversation forward. The school prepares students in a variety of disciplines and for a range of professional roles, including artist, teacher, and therapist.

Approximately 1,500 undergraduates are enrolled each year in the School of Education. While many students are pursuing teacher certification, a significant number are completing programs in the performing and visual arts, human movement, and human services.

The School of Education offers a broad array of undergraduate programs that reflect the wide range of disciplines housed in the school. Although undergraduate majors are not offered in all departments, all ten departments do offer courses to undergraduate students. The school's departments include: Art (p. 1549), Counseling Psychology (<http://counselingpsych.education.wisc.edu/>), Curriculum and Instruction (p. 1585), Dance (p. 1748), Educational Leadership and Policy Analysis (<http://elpe.education.wisc.edu/>), Educational Policy Studies (p. 1768), Educational Psychology (p. 1780), (<https://edpsych.education.wisc.edu/>) Kinesiology (p. 1783), Rehabilitation Psychology and Special Education (p. 1807), and Theatre and Drama (p. 1830).

School of Education faculty seek committed, creative, and reflective students who are sensitive to differing perspectives. For this reason, most of the school's programs use criteria beyond grade point average in the admissions process. Students are encouraged to challenge themselves and their initial career choices through volunteer experiences, service learning courses, internships or paid work experiences, and study abroad.

Students find that the School of Education is their academic and administrative home—a source of advising, guidance, support, and community. Small class sizes in many pre-professional and professional courses allow students to develop a strong sense of community and to get ample individual attention from professors, instructors, and teaching assistants. Teaching staff are extremely willing to get to

know their students and work with them to meet their goals. School of Education courses also provide students the chance to get to know their classmates well. The School of Education works to offer a caring, secure, and supportive environment that encourages taking risks, expanding personal boundaries, and developing into a professional.

DEGREES/MAJORS/CERTIFICATES

All students pursuing their undergraduate degree in the School of Education **must** fulfill the following requirements:

- University-wide General Education Requirements (p. 32)
- School of Education Liberal Studies Requirements (p. 1528)
- Major/Degree Program Requirements (see below)
- Art Education, B.S. (p. 1549)
- Art Studio, Certificate (p. 1558)
- Art, B.S. (p. 1561)
- Art, BFA (p. 1569)
- Arts and Teaching, Certificate (p. 1586)
- Athletic Healthcare, Certificate (p. 1783)
- Chinese, BSE (p. 1590)
- Communication Sciences and Disorders, BSE (p. 1601)
- Dance Studies, Certificate (p. 1748)
- Dance, B.S. (p. 1750)
- Dance, BFA (p. 1756)
- Dance, Certificate (p. 1762)
- Disability Rights and Services, Certificate (p. 1807)
- Education and Educational Services, Certificate (p. 1781)
- Education Studies, B.S. (p. 1769)
- Educational Policy Studies, Certificate (p. 1775)
- Elementary Education, BSE (p. 1609)
- French, BSE (p. 1635)
- Game Design, Certificate (p. 1648)
- German, BSE (p. 1651)
- Global Cultures, Languages, and Education, Certificate (p. 1776)
- Graphic Design, Certificate (p. 1584)
- Health Promotion and Health Equity, B.S. (p. 1785)
- Individual Major, BSE (p. 1764)
- International Development and Education, Certificate (p. 1778)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1763)
- Italian, BSE (p. 1668)
- Japanese, BSE (p. 1680)
- Kinesiology, B.S. (p. 1790)
- Latin, BSE (p. 1692)
- Physical Education, B.S. (p. 1797)
- Pilates, Certificate (p. 1764)
- Portuguese, BSE (p. 1709)
- Preparing to Teach Abroad, Certificate (p. 1722)
- Promoting Activity for Diverse Abilities, Certificate (p. 1806)
- Rehabilitation Psychology, B.S. (p. 1808)
- Social Justice and Education, Certificate (p. 1779)
- Spanish, BSE (p. 1736)

- Special Education, BSE (p. 1813)
- Theatre and Drama, B.S. (p. 1830)
- Theatre, Certificate (p. 1837)

Note: Students at UW–Madison become certified to teach secondary **English, Mathematics, Science, and Social Studies** through graduate-level coursework, not as undergraduates. A Master's degree offered by the Department of Curriculum and Instruction certifies students to teach in one or more of these four subject areas in grades 4-12, and also English as a Second Language in grades K-12. Information about this Master's degree program is available at uwteach.education.wisc.edu/ and on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) website.

The **World Language Education Program** (Chinese, French, German, Italian, Japanese, Latin, Portuguese and Spanish) has been discontinued and a new, Master's level program is being developed to provide teacher certification in world languages.

WISCONSIN EXPERIENCE

THE WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience, (<https://wisconsinexperience.wisc.edu/about/>) combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus.

- Empathy & Humility (<https://wisconsinexperience.wisc.edu/empathy-and-humility/>) - Badgers bring heart—empathy and humility—to everything that we do. It's the very lens of our worldview. We develop and demonstrate a cultural understanding of ourselves and others; we engage locally, nationally, and globally in a respectful and civil manner; and we appreciate and celebrate one another's abilities, views, and accomplishments.
- Relentless Curiosity (<https://wisconsinexperience.wisc.edu/relentless-curiosity/>) - Badgers show relentless curiosity at every step of life's journey. We question things that no one has ever thought to question. We actively learn with expert instructors, scholars, and peers; we engage in creative inquiry, scholarship, and research; we develop resilience; and we foster courage in life and learning.
- Intellectual Confidence (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>) - Badgers fearlessly sift and winnow until we achieve intellectual confidence. At our core, we're learners and teachers. We develop competence, depth, and expertise in a field of study; we integrate ideas and synthesize knowledge across multiple contexts; and we exercise critical thinking and effective communication.
- Purposeful Action (<https://wisconsinexperience.wisc.edu/purposeful-action/>) - Badgers strive to find greater meaning every day through purposeful action. We work for the common good—for something that's bigger than ourselves. We apply

knowledge and skills to solve problems; we engage in public service, partner with others, and contribute to the community; and we lead for positive change.

THE WISCONSIN EXPERIENCE IN THE SCHOOL OF EDUCATION

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Some of the current activities are listed below.

SERVICE LEARNING AND COMMUNITY SERVICE

- Students pursuing health-related studies, including the Health Promotion and Health Equity major (<https://guide.wisc.edu/undergraduate/education/kinesiology/health-promo-health-equity-bs/>), have an opportunity to become involved in the Fit Families (<https://education.wisc.edu/news/capital-times-spotlights-uw-madisons-luis-columna-and-fit-families-program/>) program, developed by Dr. Luis Columna. *Fit Families* is a physical activity program that brings together children with disabilities, their parents, college students and in-service professionals in related fields such as adapted physical education, special education, orientation & mobility, psychology, physical education, and exercise science.
- The art department offers ART 338, a service learning course. Students work with a community partner in an art-related capacity and learn about community-based practices in the field.
- Last Thanksgiving students in the Physical Education Teacher Education (PETE) (<https://guide.wisc.edu/undergraduate/education/kinesiology/physical-education-bs/>) program partnered with the Boys and Girls Club of Dane County to help kids and their families stay active during the holiday break from school. Working together, they developed games that could be done at home using common household items. A flyer describing the games was included in over 500 Thanksgiving baskets distributed by the Boys and Girls Club, and associated videos were made available on their website. Who wouldn't want to play "Reverse Pig Trash Ball?"

STUDY ABROAD

- Conflict, Human Rights, and Education in Colombia (<https://studyabroad.wisc.edu/program/?programId=672>) is the signature study abroad program of the educational policy studies department. This 3-week summer course takes place in Bogotá and its rural surroundings, inviting students to engage directly with local activists and communities at the frontlines of peace efforts underway. How do societies move from armed conflict to comprehensive peace? What strategies and actions advance human rights in situations of armed conflict? What role does education play in shaping conditions for peace and human rights? These issues are explored in the context of Colombia's long-term conflict, recent peace accords, and ongoing struggles to promote equity through education.

STUDENT ORGANIZATIONS

- Aspiring Educators of Wisconsin (<https://win.wisc.edu/organization/aspiringeducators/>) is a pre-professional association for those pursuing careers as educators. It provides opportunities to meet other education majors and current

teachers, to explore cutting edge issues in education, and interact with the community.

- The Kinesiology Club (<https://kinesiology.education.wisc.edu/home/student-orgs/kines-club/>) is a student organization committed to community service through engaging in opportunities to promote physical activity throughout the campus and community. Members are also committed to exploring career opportunities within the field of kinesiology.
- Diverse Leaders in Education (DLE) (<https://win.wisc.edu/organization/dle/>) aims to provide a loving and supportive space for BIPOC students interested in the field of education. The group provides a space that allows future educators of color to create networks with one another throughout subject areas and fields of study. Participants work within the community and provide support for other educators while diversifying the field of education.

RESEARCH AND DEPTH OF STUDY

- The Center for Research on Early Childhood Education (<https://crece.wceruw.org/>) recently announced the creation of a new undergraduate research fellowship program. The program's goal is to diversify the research communities that address early childhood education.
- The dance department provides financial awards (<https://dance.wisc.edu/admissions-and-aid/scholarships-and-awards/>) to encourage students to continue their studies, both nationally and internationally, over the summer. For example, full-tuition scholarships are given to dance majors to study in the summer study program at the Dance Education Lab in New York. One award of full tuition and accommodation is given to a freshman dance major to study at the six-week Perry Mansfield pre-professional summer study program. Students have these, and other opportunities, to make professional connections in the field and in the global dance community.
- The theatre and drama department offers an Honors option (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/#requirementstext>) in the major and a named option in Acting (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/theatre-drama-acting-bs/>).
- Undergraduate awards (<https://eps.education.wisc.edu/admissions-and-aid/financial-aid/>) in writing, research and community-based scholarship are sponsored by the educational policy studies department. One such award is the Eric Flanagan Community-Engaged Scholarship Award.

VOLUNTEER OPPORTUNITIES

- One of the UW's most sought-after volunteer experiences, the kinesiology department's Adapted Fitness (<https://kinesiology.education.wisc.edu/adapted-fitness-personal-training/>) program, located in the heart of campus, offers fitness training and physical activities to community-based clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the Physical Activity for Diverse Abilities certificate (<https://guide.wisc.edu/undergraduate/education/kinesiology/promoting-activity-diverse-abilities-certificate/>) receive priority placement for volunteer positions.

INTERNSHIPS AND FIELD PLACEMENTS

- Students earning an undergraduate degree in Rehabilitation Psychology (<https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/rehabilitation-psychology-bse/>) complete at least six credits of internship, selected from a large and diverse number of sites in the community. The goals of the experience include exploring career interests and gaining experience in community agencies serving and advocating for individuals with disabilities.
- Undergraduates in teacher education programs have multiple field experiences in K-12 schools, culminating in a full-time student teaching experience following the semester of the cooperating school.
- Art internships provide real-world experience and can often be completed for university credit through enrollment in ART 393 Internships in Art. Students have interned and conducted research at many businesses, institutions, and on-campus locations, including the Madison Children's Museum, Bayview Center for Arts and Education, ArtWrite Collective, Chazen Museum of Art, Museum of Modern Art, Metropolitan Museum of Art, Monroe Street Arts Center, and the Madison Museum of Contemporary Art.

POLICIES AND REGULATIONS

ACADEMIC CONCERNS AND STATUS

ACADEMIC ACTIONS AND EXCEPTIONS

Academic actions and exceptions are used to record a student's progress through the university and to document various administrative and academic situations. Actions can be grouped into two broad categories:

- those that permit exceptions to program requirements and school/university policies *and*
- those that affect a student's standing in the university —e.g., probation or transferring from one program to another.

As the undergraduate dean's office, the School of Education Student Services office is responsible for reviewing, approving, documenting, and sometimes initiating academic actions and exceptions. To be posted to a student's record, exceptions must go through several steps. Exceptions may be initiated either by program faculty/staff or by Student Services staff, who often consult about a specific exception. Once an exception has been approved, it is processed either as an official "Dean's action" or as a DARS exception. Students can find a record of dean's actions on their printed unofficial transcript (also called the student record) or on their DARS report. A DARS exception will be reflected in the individual student's DARS report.

Exceptions to faculty approved program requirements generally include course substitutions and rarely involve course or program requirement waivers. Exceptions to campus or School policies include permission for adding or dropping a course beyond the deadlines, waiving senior or major residency requirements, extending the deadline for meeting a deficiency or finishing an

Incomplete, and permitting students to repeat a course for credit. A request for an exception requires careful consideration from all parties involved. Students should be prepared to explain the reasoning behind a request and offer supporting documentation.

Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate answer to a request during the initial appointment.

ACADEMIC STANDING: DEAN'S LIST, ACADEMIC PROBATION, ETC.

To remain in good academic standing in the School of Education, students must earn both a semester grade point average (GPA) and a cumulative grade point average of at least 2.5. While the 2.5 grade point average may not be sufficient to permit students to be considered for admission to their program of choice, it is the minimum required to remain in the School of Education. This may be substantially higher than minimum grade point average requirements in other schools/colleges on campus.

Dean's List

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

Probation

A student's grade point average for a particular semester falls below 2.5, while the cumulative campus GPA remains at or above 2.5. Students must earn a minimum 2.5 grade point average on the next semester's coursework to be removed from probation status.

Strict Probation

Strict Probation occurs when either (1) a student's cumulative GPA falls below a 2.5 OR (2) a student already on probation earns less than a 2.5 grade point average for the subsequent semester. To be in good academic standing, students on strict probation must earn both a 2.5 GPA on the next semester's coursework and also have a cumulative GPA of 2.5 by the end of the next semester. Students on Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with an advisor in the School of Education Student Services office.

Continued Strict Probation

A student already on strict probation obtained a 2.5 GPA or above on the next semester's coursework, but the cumulative GPA is still below 2.5. Once both grade point averages are at or above 2.5, the student will be in good academic standing. Students on Continued Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with a Student Services advisor.

May Not Continue in the School of Education

Students on strict probation or continued strict probation who earn less than a 2.5 GPA on the next semester's work will receive notice that they may not continue in the School of Education. Students on May Not Continue status who do not seek or are not granted permission to continue may be withdrawn from the university and dropped from courses ("disenrolled"). Students are expected to contact the School of Education Student Services office

immediately to discuss options, including transfer to another school or college on campus, transfer to another university, or withdrawal from UW–Madison.

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW–Madison campus coursework. A student whose GPA falls below 2.75 will be placed on probation for the following semester. If the GPA remains below a 2.75 at the end of the probationary semester, the student will receive a discontinuation letter indicating that they must transfer out of the Department of Kinesiology. A hold will be placed on the student's registration for the second semester following the probationary semester, until the transfer is complete. Students in this situation must transfer to another School of Education program, another UW–Madison school/college, to another institution altogether, or must withdraw from the university.

If a student wishes to appeal being discontinued in the department, it must be done in writing to the Chair of the Undergraduate Studies Committee within 30 days of the date of the notification letter. The Undergraduate Studies Committee may request that the student appear in person at an Undergraduate Studies Committee meeting to present the case.

If a negative decision is reached by the Undergraduate Studies Committee, a student may choose to appeal in writing to the Department of Kinesiology Student Affairs Committee within 30 days of the date of the notification.

If a negative decision is reached by the Department's Student Affairs Committee, a student may choose to appeal in writing to the Chair of the Department of Kinesiology within 30 days of the date of the notification.

If a negative decision is reached by the Chair of the Department of Kinesiology, a student may choose to follow the School of Education Grievance Policy.

In the event of a positive decision at any level, the student will be allowed to continue for one semester in order to raise the GPA to 2.75 or higher. A 2.5 cumulative GPA is required to graduate from the Department of Kinesiology.

GRIEVANCE POLICY IN THE SCHOOL OF EDUCATION

Any student who feels that they have been treated unfairly by a faculty or staff member has the right to complain about the treatment and to receive a prompt hearing of the grievance, following these grievance procedures. The complaint may concern course grades, classroom treatment, program admission, or other issues. To insure a prompt and fair hearing of any complaint, and to protect both the rights of the student and the person at whom the complaint is addressed, the procedures below are used in the School of Education.

The person whom the complaint is directed against must be an employee of the School of Education. Any student or potential student may use these procedures unless the complaint is covered by other campus rules or contracts. The following steps are available within the School of Education when a student has a grievance:

1. The student should first talk with the person against whom the grievance is directed. Most issues can be settled at this level. If the complaint is directed against a teaching assistant, and the student is not satisfied, the next step would be to talk to the TA's supervisor, who is usually the course professor. If the complaint is not resolved satisfactorily, the student may continue to step 2.
2. If the complaint does not involve an academic department, the procedure outlined in Step 4 below should be followed. If the complaint involves an academic department, the student should contact the chair of the department. The chair will attempt to resolve the problem informally. If this cannot be done to the student's satisfaction, the student may submit the grievance to the chair in writing. This must be done within 60 calendar days of the alleged unfair treatment.
3. On receipt of a written complaint, the chair will refer the matter to a departmental committee, which will obtain a written response from the person at whom the complaint is directed. This response shall be shared with the person filing the grievance. The chair will provide a timely written decision to the student on the action taken by the committee.
4. If either party is not satisfied with the decision of the department, they have five working days from receipt of the decision to contact the dean's office (at the number below), indicating the intention to appeal. If the complaint does not involve an academic department in the school, the student must contact the dean's office within 60 calendar days of the alleged unfair treatment.
5. In either case, there will be an attempt to resolve the issue informally by the associate dean. If this cannot be done, the complaint can be filed in writing with the dean's office. This must be done within 10 working days of the time the appealing party was notified that informal resolution was unsuccessful.
6. On receipt of such a written complaint, the associate dean will convene a subcommittee of the school's Equity & Diversity Committee. This subcommittee may ask for additional information from the parties involved and may hold a hearing at which both parties will be asked to speak separately. The subcommittee will then make a written recommendation to the dean of the School of Education who will render a decision. Unless a longer time is negotiated, this written decision shall be made within 20 working days from the date when the grievance was filed with the dean's office.

Questions about these procedures can be directed to the School of Education Dean's Office, 377 Education Building, 1000 Bascom Mall, 608-262-1763.

State law contains additional provisions regarding discrimination and harassment. Wisconsin Statutes 36.12 reads, in part: "No student may be denied admission to, participation in or the benefits of, or be discriminated against in any service, program, course or facility of the system or its institutions or center because of the student's race, color, creed, religion, sex, national origin, disability, ancestry, age, sexual orientation, pregnancy, marital status or parental status." In addition, UW–System prohibits discrimination based on gender identity or gender expression. Students have the right to file discrimination and harassment complaints with the Office of Compliance (<https://compliance.wisc.edu/>), 361 Bascom Hall, 608-265-6018, uwcomplianceoffice@wisc.edu.

PART-TIME ENROLLMENT STATUS

Students who choose part-time enrollment status or who anticipate falling below full-time enrollment status due to dropping a

course should consult with an advisor in the School of Education Student Services office. Part-time enrollment may have important implications for any number of issues, including health insurance coverage or financial aid. It is especially important that athletes and international students consult with Student Services advisors and other advisors if considering part-time enrollment. Students who drop below 12 credits need not leave university housing.

RE-ENTRY TO CAMPUS AFTER AN ABSENCE

Students wishing to reenter UW–Madison after an absence of a semester or more must file a reentry application form. This form is available from the UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>). If an applicant is not in good academic standing, the reentry application will be referred to the associate dean.

Students admitted to the professional part of a program may leave UW–Madison for a maximum of two consecutive semesters (excluding summer sessions) and be eligible to reenter directly into the program. Students in this situation are not guaranteed immediate placement in a practicum or student teaching placement upon reentry, and graduation may be delayed because of prior commitments to continuing students. Students who leave the program for more than two consecutive semesters (excluding summer sessions) may be considered for readmission only on an individual basis. Lack of space in a program may preclude readmission directly into a program for any future semester. Given the individual circumstances, a student may be required to reapply to the program altogether.

The general policy above may be modified by any particular program so that the conditions of reentry match the structure of the professional program. Some programs require that students obtain prior approval to interrupt the program sequence. All students intending to be absent should leave with a firm understanding of the conditions guiding their reentry into their professional program. Consult with the appropriate faculty advisor and with the School of Education Student Services office.

RESIDENCY (MAJOR & SENIOR) REQUIREMENTS

Major Residency

Students must complete at UW–Madison at least 15 credits in upper-level courses in the major. Some programs, e.g., Art, require more credits to meet major residency requirements. Upper-level courses are generally defined as those numbered 300 and above, but this varies by program area. Retroactive credits and credits granted by examination do not count toward the residency requirement.

Senior Residency

Seniors in the School of Education must complete the last 30 credits in residence. Special permission to take a portion of senior work either at another institution or by correspondence (via UW–Extension) must be obtained in advance from the School of Education Student Services office. Coursework taken as part of a UW–Madison sponsored study abroad program does not count against senior residency. Students should discuss senior residency issues with their Student Services advisor. Retroactive credits and credits granted by examination do not count toward the residency requirement.

EXCESS CUMULATIVE CREDITS AND SATISFACTORY PROGRESS

Excess Cumulative Credits

Wisconsin resident undergraduates who have accumulated more than 165 completed credits will be assessed a 100% tuition surcharge on credits over 165, as required by the University of Wisconsin-Madison. This policy was effective beginning Spring 2021. See Excess Cumulative Credits (<https://kb.wisc.edu/apir/110093/>) on Academic Planning and Institutional Research's KnowledgeBase page for more information about this policy and the criteria used in counting cumulative, completed credits. Note: Students who have already been awarded a Bachelor's degree from any accredited institution are exempt from the tuition surcharge. Special students are also exempt.

Satisfactory Progress: Second Degree Candidates and Education Special (non-degree-seeking) Students

The School of Education is enriched by admitting students with a previous degree to our programs. We welcome these students and encourage them to apply to the School. At the same time, admission as a second-degree or Education Special (designated EDS or EDCS) student is a privilege granted by the School of Education. Second-degree and Education Special students are expected to make the same timely progress toward program completion as are initial-degree students.

To ensure satisfactory progress, second-degree and Education Special students who are identified to have met any one of the criteria below will be required to confer with her/his program coordinator and the undergraduate academic dean for purposes of developing a formal plan for program completion:

- Student has earned over 200 total credits.
- Student enrolled for two consecutive semesters without completing requirements for the professional program to which the student was initially admitted.
- Student withdrew from classes for two consecutive semesters.
- Student failed to enroll in a required course when it was available, particularly those that are intermittently offered.
- Student engages in other course selection patterns that result in his/her failing to make progress toward completion of initial program.

Students who do not meet the terms of the plan for program completion may be restricted to enrollment in specific courses or departments, prevented from enrolling entirely, or withdrawn from classes by the academic undergraduate dean after consultation with program faculty. Students may appeal the terms of the plan or any of the dean's actions above under the provisions of the School of Education Grievance Policy.

WITHDRAWING FROM UW-MADISON

Formal withdrawal procedures must be observed by individuals who wish to leave the university before completing the semester in progress. Students who leave the university without formally withdrawing may receive failing grades in all courses.

COURSES AND COURSE ENROLLMENT

ATTENDANCE POLICIES

Faculty and instructors may require students to attend scheduled meetings of a class and/or to participate in other course-related activities, including distance activities. Students are responsible for

materials presented in such meetings or activities. Because courses are designed and conducted in diverse ways, faculty and instructors are expected to inform students in writing at the beginning of each course if there are specific expectations for attendance/participation, including whether any component of the grade is based on such attendance/participation.

AUDITING A COURSE

A student may audit a course only if the instructor consents and if no laboratory or performance skills are required. (The second restriction usually prevents students from auditing Dance or Art courses.) Auditors do not participate in classroom discussions or take examinations, but are expected to attend with reasonable regularity and do some assigned work.

Audited courses carry no degree credits, are not graded, do not count in determining full-time/part-time load for enrollment certification in an academic term, and do not meet degree requirements for School of Education students. Students interested in auditing a course should confer with their Student Services advisor. The deadline to change a course from credit to audit is the end of the fourth week of classes; no exceptions to this deadline are permitted.

CONCURRENT ENROLLMENT AT TWO INSTITUTIONS

School of Education students may occasionally choose to take courses at another institution—e.g., Madison College or Independent Learning through UW-Extension—while being a fully enrolled student on the UW-Madison campus. This is generally permitted, but does require a specific dean's action. Full-time or part-time student status is usually determined by the credits taken at UW-Madison only; thus, students who take only nine credits on campus and three credits at another institution may not be considered full-time students.

CREDIT OVERLOAD PERMISSION

Students may carry a maximum of 18 credits per semester without the special permission of an academic dean. School of Education undergraduates wishing to take over 18 credits should complete the Credit Overload Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnpb/). Students must be in excellent academic standing to be considered for a credit overload, usually a 3.0 cumulative GPA on the UW-Madison campus.

Please note that additional fees are assessed for credit overloads on a per credit basis.

During summer sessions, students may, as a rule, carry one credit per week of instruction unless special permission is given. The maximum credit load for Education students for the entire summer session is 12. Session-specific limits follow the rule of 1 credit per week of instruction, except 9 credits are allowed in the Eight-Week General Session. Students must obtain permission from an academic dean to carry an overload in any of the summer sessions; start this process by completing the Credit Overload Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnpb/).

DIRECTED/INDEPENDENT STUDY

Directed Study, also called Independent Study, offers the student an opportunity to work with a School of Education faculty member

on an individual topic of interest. Most School of Education departments make directed study courses available to students on the basis of the student's preparation and motivation and a faculty member's willingness to accept the student in such an endeavor. Directed Study courses are generally numbered 199, 299, 399, and 699.

This study option is intended primarily for advanced students who have a depth of knowledge in a field, the self-discipline necessary for independent work, and strong motivation to pursue a special project. Some program areas limit the number of Directed Study credits that can be applied to major or minor requirements.

Directed Study is taken as a supplement to, but not as a replacement for, available course offerings. In this way, it may be used to expand areas of particularly strong interest. Extra responsibility is required from the faculty member involved, and no member of the faculty is obligated to accept a proposal for a directed study project. Students should have a well-defined outline of the topic to be studied before discussing the project with a faculty member.

Both the student and instructor must follow UW–Madison's Policy on Directed/Independent Study for Undergraduates (<https://kb.wisc.edu/page.php?id=36263>). Important components of this document include, but are not limited to:

- The student's responsibility to develop a written study plan, in collaboration and agreement with the instructor, consistent with the responsibilities of the instructor. The study plan will include expectations for learning and student work, the time and place for regular meetings, the number of credits to be earned, and any other issues related to the learning experience.
- Guidelines for assigning the appropriate number of credits to the Directed Study.
- Responsibilities of the Directed Study instructor.
- The approval process for enrolling in a Directed Study after the course add deadline (usually the end of the second week of class in fall and spring semesters).

INDEPENDENT LEARNING COURSE ENROLLMENT

Students occasionally elect to take an Independent Learning (<https://il.wisconsin.edu/course-catalog/>) course through the University of Wisconsin–Extension. Many of the courses offered through Independent Learning (IL) can count toward specific degree requirements and students have an entire year to complete the coursework. Individuals interested in enrolling in an Independent Learning course should note the following important issues:

Course Equivalencies

Independent Learning courses are not automatically transferable as equivalent UW–Madison campus courses—even when the Independent Learning course carries the same number and title. Use Transferology (<https://www.transferology.com/state/wisconsin.htm>) to ensure that the Independent Learning course is equivalent to the campus required course. Faculty and dean's offices may have some discretion in permitting courses to count for requirements even when they are not coded as exactly equivalent; students should see their Student Services advisor.

Concurrent Enrollment

UW–Extension is an entirely separate institution from UW–Madison. Thus, UW–Madison students must have permission from their academic dean to be enrolled concurrently in another higher education institution. Permission for concurrent enrollment is granted routinely for School of Education students through the School of Education Student Services office. Students should go to the registrar's office website for the permission form (https://registrar.wisc.edu/wp-content/uploads/sites/36/2017/06/independent_learning_form.pdf). The completed form indicates permission for concurrent enrollment and, in some circumstances, provides for a waiver of the tuition for the Independent Learning course (see additional information below). Students should take this form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and meet with an advisor. Send it to Independent Learning after it has been approved at the School of Education Student Services office.

Tuition Waiver

The tuition for an Independent Learning course may be waived with the academic dean's permission, although the student is still responsible for other course enrollment fees. Students are eligible for a tuition waiver if they register for an Independent Learning course during the semester they are concurrently enrolled at UW–Madison. In some cases, students may be allowed to register for Independent Learning classes once they have enrolled in courses for the subsequent semester, linking their Independent Learning registration with the credits for the succeeding semester. Students interested in receiving a tuition waiver must be enrolled full time (at least 12 credits) at UW–Madison, and have no more than 18 credits after adding the Independent Learning course. Students should see their Student Services advisor for additional information on these policies. As indicated above, download and complete the form (https://registrar.wisc.edu/documents/independent_learning_form.pdf) and submit to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. This stamped form must then be sent to Independent Learning, with a copy remaining at Student Services.

Posting Independent Learning Courses to the UW–Madison Transcript

Independent Learning courses are posted to the campus transcript after staff at the Office of Admissions and Recruitment (<http://admissions.wisc.edu>) receive the original transcript. A official transcript for an Independent Learning course must be submitted to this office.

Timing for Course Completion and Degree Posting

Independent Learning courses require a substantial time commitment. Students should not plan to begin an Independent Learning course only a few weeks before it must be completed! Perhaps even more important, students completing an Independent Learning course to meet degree requirements during their last semester on campus should be aware that the Independent Learning course must be completed prior to the University's official graduation date for that semester. The completion date listed on the UW–Extension transcript must be on or before the UW–Madison degree completion date or the student's degree will be awarded after the subsequent semester. For example, if a student's UW–Extension transcript indicates a course completion date of May 25, but the UW–Madison degree completion date is May 23, the student's degree will be posted for the subsequent August graduation date, not for the May graduation day. This could create

serious problems for teacher education students hoping to secure a position. For this reason, students completing final degree requirements via Independent Learning should consult carefully with Student Services and Independent Learning staff regarding the timing of their course completion and degree posting.

LATE COURSE ADDS OR DROPS

Course enrollment regulations must be followed when adding and dropping courses. Students are responsible for knowing and complying with the published deadlines; see the registrar's website (<http://www.registrar.wisc.edu>) for deadlines. Students are expected to check their academic records routinely to minimize the need for late drops based on enrollment errors.

Late Course Add

Students must obtain instructor, departmental, and dean's approval to add a course after the course add deadline. See the registrar's website (<http://www.registrar.wisc.edu>) for instructions.

Late Course Drop

After the drop deadline, courses may be dropped only with the permission of the School of Education Student Services office. Such permission is not granted routinely, but only in unusual circumstances. Students seeking a late drop will be required to complete a formal request form and may be asked to supply a written justification, medical or other documentation, and/or proof of having consulted with the course instructor. Requests for backdated drops due to ignorance of campus drop deadlines or to remove a "DR" from the student's record will not be honored. Students seeking a late drop must schedule a meeting with a Student Services advisor.

The student will meet with the advisor to discuss the drop request. The advisor will collect information about the circumstances around the request. If appropriate, the advisor will warn about the drop's possible consequences for financial aid, insurance coverage, student status (for international students), etc. The decision around the late drop may or may not be made during this meeting. Advisors may confer with instructors as needed to verify students' reports and obtain additional information. Advisors may also require students to contact the instructor and may also consult with one another and with the associate dean about specific cases. Students will be informed via email or telephone about the disposition of their request.

REPEATING COURSES

Most courses on the UW–Madison campus may be taken only once for purposes of credit. Some courses may be repeated a limited number of times for credit. Other courses may be repeated an unlimited number of times for credit. When courses are taken more than once, all grades and their associated grade points are included in the cumulative campus grade point average.

Some School of Education professional programs may permit students to retake courses for admission eligibility purposes only. Students should consult Student Services staff with questions regarding repeated courses.

DEGREES, "DOUBLE MAJORS," AND GRADUATION ADDITIONAL MAJOR OR "DOUBLE MAJOR"

School of Education students may be permitted to complete an additional major with their School of Education degree program. Students must be admitted to the professional part of their degree program to be eligible to add an additional major; pre-professional students cannot add another major.

Education students wishing to complete an additional major in the College of Letters & Science must complete these steps:

1. Contact the department that houses the major of interest. Meet with the undergraduate major advisor there, if appropriate. Complete the Major Declaration form and obtain departmental approval (usually a signature or stamp).
2. Take the form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and ask for a dean's action to permit the additional major. Student Services staff will take the action and send the form to the registrar's office. Note: Students in the School of Education should not take the form to the L&S Student Academic Affairs office—even if this is the advice of departmental staff. Requests for an additional major will be rejected by the registrar's office for lack of the appropriate dean's approval.

Students will be granted a degree at the end of the fall, spring, or summer semesters in which all School of Education degree requirements are complete. Graduation will **not** be postponed if students have an unfinished additional major or certificate program that is not required for the degree.

Exceptions to the requirements of an additional major or certificate program must be approved by the department and school/college dean's office in which the major or certificate program is located.

CREDITS-TO-DEGREE

School of Education programs require a minimum of 120 credits in all programs for graduation, although programs may require more. To earn 120 credits in four years (eight semesters), students must average 15 credits per semester. The number of credits carried each semester may depend upon a student's preparation, motivation, course selection, employment, and extracurricular activities.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of

study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

DUAL DEGREES

Students may be permitted to complete two degrees simultaneously. For example, students may complete two degree programs in the School of Education or may choose a degree program in the College of Agricultural and Life Sciences along with their School of Education degree. Not all schools/colleges permit dual degrees—e.g., this is not permitted by the College of Letters & Science or by the College of Engineering. Students should confer with an academic dean regarding the ability and feasibility of completing two degrees programs simultaneously. Students wishing to earn two undergraduate degrees must follow these academic policies:

- If the two degrees to be earned are within the School of Education, at least 30 additional credits and all course and grade point average requirements for the second degree must be completed for the second degree. When the first degree requires 120 credits, a minimum of 150 credits for most majors will be required. The two degree programs must differ sufficiently to permit the total credits to be accumulated. Courses may count toward the fulfillment of both degree programs. Permission to complete two degrees simultaneously requires the academic dean's approval. This approval, and the formal academic action permitting the dual degree work, should be sought as early as possible to ensure that it is feasible to complete both degrees.
- If the two degrees to be earned are from two different schools/colleges (one degree in Education and one degree in another school or college on this campus), the following academic policies shall be followed:
- Permission to complete two degrees simultaneously requires academic dean's approval from both schools/colleges. Students should see their current dean's office for the required paperwork.
- Admission into the other school/college shall be based on the admission criteria for that particular school/college and, when necessary, particular program.
- The two degree programs must differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits.
- The student's program must be reviewed and approved in both colleges before the start of a student's senior year in residence.
- The degree from each college will be awarded simultaneously.

- Exceptions to degree requirements must be taken by staff from the school/college linked to the particular degree.

GRADES AND GRADING

Grading System

See Enrollment and Records (p. 36) for detailed information on the campus grading system, including the list of possible grades and their impact on a student's grade point average.

Credit/No Credit Courses

Courses designated as being offered on a Credit/No Credit basis are indicated on the transcript as either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

"F" Grade Policies

If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA. If a grade of F, N (no credit), or U (unsatisfactory) is received in student teaching or in courses within required practica, the course may be repeated only if the faculty adviser, the supervisor of the practicum or student teaching, and the appropriate associate dean gives approval. A third attempt to register in a course under these conditions is not allowed.

Incompletes

A grade of "Incomplete" may be reported for a student who has carried a subject with passing grades until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination, or to complete some limited amount of term work. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of substantiated cause, the grade shall be F. Even with such proof, if the student's work has convinced the instructor that s/he cannot pass the course, the grade shall be F.

Any Incomplete taken by School of Education students must be completed by the end of the student's next semester of residence (specifically, by the last day of classes), excluding Summer Sessions. If the work is not completed by this deadline, the Incomplete will lapse into a Failure unless the time limit has been extended in writing by the dean's office. (Note that this differs for College of Letters & Science students: Incompletes must be completed by the end of the fourth week of classes of the student's next semester of residence at UW–Madison, excluding Summer Sessions.)

Pass/Fail Grading

All undergraduate students are eligible to take a course on a pass/fail basis if they request the option prior to the deadline and are in good academic standing at the time of the request. Good academic standing for this purpose means that students have a minimum 2.5 cumulative grade-point average based on UW–Madison coursework. Undergraduates may carry one course on a pass/fail basis per term. (Each year's summer sessions collectively count as a single term.)

Pass/fail can be chosen only for elective courses. Required courses cannot be taken on a pass/fail basis. The School of Education may reject pass/fail requests for non-elective work, but it is the student's responsibility to be sure that the requested course is an elective. Courses taken on a pass/fail basis will not count for non-elective requirements—even if they would normally count toward such requirements.

Students may submit pass/fail requests via their Student Center link from the time that they register until midnight on the Friday at the end of the fourth week of fall and spring semesters. For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed. Students may not cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.

Instructors are not notified when a student elects the pass/fail option. (Students can see whether a course is pass/fail in their Student Center.) When a course is taken on a pass/fail basis, the instructor reports a letter grade, which is converted by the registrar to an S (satisfactory) or U (unsatisfactory). The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U shall be recorded by the registrar in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade-point average. A student must earn at least a C to receive credit for the course.

Please note that courses completed on a pass/fail basis do not apply toward Liberal Studies, major, minor, or professional education requirements for graduation. Students planning graduate study should not take courses on a pass/fail basis if these are pre-professional requirements for admission to graduate and/or professional programs. Individuals who are undecided about a major should avoid taking a course on a pass/fail basis that might later become a required course needed to complete a major. Students may wish to consult with an advisor before taking a course on a pass/fail basis.

Six-Weeks (Midterm) Grades

Only first-year students receive midterm, or "six-weeks" grades. Midterm grades for first-year students are prepared at the end of the sixth week of classes and are made available to students in their Student Center in My UW on Monday of the eighth week. An email is sent out to all students with six-week grades informing them of their availability in the Student Center.

The midterm grade report provides students with important feedback about course enrollment and performance before the course drop deadline. Students should check their six-week grade report to make sure all courses are listed and grades indicated. An "NW" means that "No Work" has been turned in; students who have been attending the course should contact the instructor immediately. In the case of a course registration problem, students should see their Student Services advisor immediately.

Grades from Transfer Courses

Grades from transfer courses are not posted to the UW–Madison transcript; however, the School of Education uses all attempted transferable coursework to determine program

admission eligibility and selection grade point average. Students should be aware that grades earned at another institution will be included in admission calculations. (Courses for which an "F" is earned do not transfer to UW–Madison.) Student should see their School of Education advisor if they have additional questions about this policy.

PROGRAM ADMISSIONS

LAST 60 CREDIT RULE

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

1. all transferable college level coursework attempted, *and*
2. the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.)

The use of the last 60 credits does not supersede other eligibility requirements. For example, when a minimum GPA on prerequisite courses is required, or a minimum major GPA is required to be eligible for admission, all required courses will be used in calculating this GPA. This will include courses taken prior to the last 60 credits. A cumulative GPA, however, will still be calculated based on the last 60 college credits attempted.

Currently, retention and graduation GPAs are based on all credits attempted at UW–Madison as an undergraduate student. If each semester's GPA after admission to the program meets the required GPA for retention, the student will be allowed to continue and complete the program.

This policy does not apply to certification programs in Music Education, as the degree is granted from the College of Letters and Science, not the School of Education.

Contact the School of Education Student Services office for additional information regarding the interpretation of this policy.

STUDENTS WITH A PREVIOUS DEGREE

A prospective student who already holds an undergraduate degree is admitted to the School of Education as either an Education Special student or a Second Degree student, depending on the academic area of interest and the individual's previous coursework. The term "Special Student" indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; the student does not receive a second degree for this "certification only" coursework. Second undergraduate degree students are seeking a second degree from the School of Education in an area that is different from the major coursework of the first degree. This degree may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission.

Special Students

Applicants must file an undergraduate application with the Office of Admissions and Recruitment (<http://admissions.wisc.edu>). Education Special students not yet admitted to a professional program are given an EDS classification, are not eligible for financial aid, and enroll last with the other special students on campus. Candidates seeking Special student status in open enrollment programs must obtain written permission for admission from the relevant program coordinator and must submit a professional program application to the School of Education Student Services office. Candidates seeking admission to a limited enrollment program must meet all admission eligibility requirements for the program and must compete with other eligible candidates for program admission. Applicants admitted to a certification professional program become Education Certification Special students (EDCS classification) to distinguish them from Special students not so admitted. Students with an EDCS classification may be eligible for financial aid. Continuing EDCS students may register with undergraduates having junior status.

Second Degree Candidates

Students who wish to earn a second baccalaureate degree in the School of Education must file an undergraduate application with the Office of Admissions and Recruitment (<http://admissions.wisc.edu>) and must file a professional program application with the School of Education Student Services office. Second degree students not yet admitted to a professional program are given a pre-professional classification. Second degree candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- complete at least 15 upper-level credits in the new major;
- complete at least 30 credits beyond their previous coursework.

The determination of whether a student should be admitted as a second degree candidate or Education Special student is made by the faculty advisor in consultation with Student Services staff after analyzing the student's remaining requirements. The faculty advisor will determine the specific remaining requirements for students admitted to a program. In addition to completing the requirements specific to the program(s) of interest, returning students must also complete any relevant campus-wide requirements, complete the requirements specific to individual program areas such as the Environmental Education requirement, and satisfy any high school deficiencies identified at the time of admission to UW–Madison. Students are strongly encouraged to discuss their academic plans with their faculty advisor and must make satisfactory progress toward program completion - see Satisfactory Progress/Excess credits for details.

Students seeing a second degree in Kinesiology–Exercise & Movement Science must complete PSYCH 202 Introduction to Psychology as part of the professional program if an equivalent course was not completed during the initial baccalaureate degree.

REQUIREMENTS

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

HOW STUDENTS MEET REQUIREMENTS

The School of Education's Liberal Studies Requirements automatically satisfy most of the University's General Education Requirements, including Ethnic Studies, Humanities/Literature, Social Studies, and Science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program.

Beginning at Student Orientation and Registration (SOAR), School of Education academic advisors help each student determine how they can meet General Education Requirements while pursuing a specific degree program, or through exploration of a variety of interests. The General Education and Liberal Studies requirements provide an opportunity to do some academic exploration. If a student cannot complete a General Education requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

Students with a previous undergraduate degree are not required to complete the Liberal Studies coursework.

LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies coursework. Most Liberal Studies courses are offered by academic departments in the College of Letters & Science. Each course is assigned a number of descriptors that provide information about its content. For example, a breadth designation indicates what kind of course it is—a Science course, a Literature course, etc. Level designations describe how advanced the content of a course is in relation to other courses in the department—Elementary, Intermediate, Advanced, or Intermediate/Advanced level. Course listings in Course Search and Enroll (<https://registrar.wisc.edu/course-search-enroll/>) provide breadth and level designations. Click on the course number to obtain this information. Students can also search for courses meeting specific breadth or level designations using Course Search and Enroll (<https://registrar.wisc.edu/course-search-enroll/>).

UW–Madison breadth designations

Biological Science
Humanities
Literature
Natural Science
Physical Science
Social Science
Social or Natural Science
Humanities or Natural Science
Biological or Social Science
Humanities or Social Science

HUMANITIES

All students must complete a minimum of 9 credits, to include:

Literature (minimum of 2 credits)

Any course designated as *Literature*.

Fine Arts (minimum of 2 credits)

The courses listed below are approved for the Fine Arts requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services Office.

Code	Title	Credits
African Languages and Literature		
AFRICAN/ AFROAMER 220	HipHop, Youth Culture, and Politics in Senegal	3

ENGL 411	Creative Writing: Special Topics Workshop	3

Environmental Studies

ENVIR ST/HIST SCI/ HISTORY 125	Green Screen: Environmental Perspectives through Film	3
-----------------------------------	---	---

Folklore

FOLKLORE/ MUSIC 103	Introduction to Music Cultures of the World	3
FOLKLORE/DANCE/ THEATRE 321	Javanese Performance	2

Gender and Women's Studies

GEN&WS/ AFROAMER 267	Artistic/Cultural Images of Black Women	3
-------------------------	---	---

German

GERMAN 267	Yiddish Song and the Jewish Experience	3-4
------------	--	-----

Integrated Liberal Studies

ILS 203	Western Culture: Literature and the Arts I	3
ILS 204	Western Culture: Literature and the Arts II	3-4

Literature in Translation

LITTRANS 207	Slavic Science Fiction through Literature and Film	3
LITTRANS 231	Manga	3
LITTRANS 232	Anime	3
LITTRANS 233	Russian Life and Culture Through Literature and Art (to 1917)	3-4
LITTRANS 234	Soviet Life and Culture Through Literature and Art (from 1917)	3-4
LITTRANS 272	French Pop Culture	3
LITTRANS/ THEATRE 335	In Translation: The Drama of Henrik Ibsen	3-4
LITTRANS/ FOLKLORE 327	The Vampire in Literature and Film	3
LITTRANS/ THEATRE 336	In Translation: The Drama of August Strindberg	3-4

Music

Any course from the Department of Music (<http://guide.wisc.edu/courses/music/>)

Music Performance

Any course from the Department of Music Performance (http://guide.wisc.edu/courses/mus_perf/)

Theatre

Any course from the Department of Theatre and Drama (<http://guide.wisc.edu/courses/theatre/>)

Humanities Elective(s)

May include courses designated as *Humanities, Literature, Humanities or Natural Science, Humanities or Social Science*, elementary and intermediate level foreign language, or additional fine arts. May also count COM ARTS 105 Public Speaking, COM ARTS 181 Elements of Speech-Honors Course, and any English (<http://guide.wisc.edu/courses/engl/>) department intermediate or advanced level creative writing or composition course toward this requirement (ESL classes and elementary level composition courses are excluded).

SOCIAL STUDIES (SOCIAL SCIENCE)

All students must complete a minimum of 9 credits. Select from courses with a breadth designation of *Social Science, Social or Natural Science, Biological or Social Science*, or as *Humanities or Social Science*.

Teacher education and kinesiology students have unique requirements in this category; see below:

Teacher Education requirement

Teacher education students must complete a Local, State, and National Government requirement by enrolling in one of the following courses as part of the 9 credits:

- POLI SCI 104 Introduction to American Politics and Government or
- POLI SCI 205 Introduction to State Government

Kinesiology

Kinesiology students must complete PSYCH 202 Introduction to Psychology as part of the 9 credits.

SCIENCE

All students must complete a minimum of 9 credits, including one course designated as a Biological Science course and one designated as a Physical Science course. All students must complete one science course with a laboratory. The lab course can also count toward the Biological or Physical Science requirement if it has the requisite breadth designation.

Biological Science

Any course with a breadth designation of *Biological Science*, or as *Biological or Social Science*.

Physical Science

Any course with a breadth designation of *Physical Science*.

Science Elective(s)

Other courses with a breadth designation of *Biological Science, Physical Science, Natural Science, Social or Natural Science, Humanities or Natural Science*, or as *Biological or Social Science*.

Laboratory requirement

Most sciences with lab sections are identified as such in Course Search and Enroll (<https://registrar.wisc.edu/course-search->

enroll/). An AP Biology score of 4 or 5 will also fulfill the Laboratory requirement.

In addition to courses with lab sections, the following courses include some lab experience and will meet the lab requirements for students in the School of Education:

Code	Title	Credits
Course options within the College of Letters & Science		
ANTHRO 105	Principles of Biological Anthropology	3
ATM OCN 101	Weather and Climate	4
BOTANY 100	Survey of Botany	3
GEOSCI 100	Introductory Geology: How the Earth Works	3
PHYSICS 109	Physics in the Arts	3
Suggested courses options outside the College of Letters & Science		
AGRONOMY 100	Principles and Practices in Crop Production	4
BOTANY/PL PATH 123	Plants, Parasites, and People	3
FOOD SCI/MICROBIO 324	Food Microbiology Laboratory	2
HORT 120	Survey of Horticulture	3
PL PATH/BOTANY 123	Plants, Parasites, and People	3

CULTURAL AND HISTORICAL STUDIES

All students must complete three requirements met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation. A single course cannot satisfy more than one of the three Cultural and Historical Studies requirements listed below.

Ethnic Studies (minimum 3 credit course)

The Ethnic Studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Courses that meet this requirement have a specific ethnic studies designation that can be utilized in a course search.

United States or European History (minimum 3 credits)

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services office.

Code	Title	Credits

Global Perspectives (minimum 3 credits)

Global perspectives courses include courses whose primary emphasis is on:

- cultures whose origins lie outside of the western tradition, or
- analyzing and interpreting cultural differences through the study of language, gender, race, ethnicity, religion, or class, or
- cultural pluralism within specific geographical areas.

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services Office.

- No Liberal Studies coursework may be taken on a Pass/Fail basis.

GUIDELINES FOR SPECIFIC PROGRAM AREAS

Teacher Education programs

All teacher education students, except those in music education or art education, may apply any appropriate coursework from the major or minor toward the Liberal Studies requirements. Students in music and art education are restricted in this overlap. For students in music education, no more than 6 credits of music history and no more than 4 art and dance credits may count toward the 40 total credits. Music history courses (e.g., MUSIC 211 Survey of the History of Western Music, MUSIC 212 Survey of the History of Western Music) may not be used to meet the U.S./ European History requirement. Art education students may apply all of the aesthetics credits (usually 14) toward the Liberal Studies requirements, but not courses taken to meet the studio requirements.

Elementary education students can use a Science course or Social Studies course from the Environmental Education course list to meet both the Liberal Studies and Environmental Education requirements.

Art (BFA and BS)

In general, students may not satisfy Liberal Studies requirements with courses meeting studio or aesthetics requirements. However, Art–BFA candidates may apply 4 aesthetics elective credits toward the Humanities credits.

Kinesiology and Physical Education

Kinesiology and physical education students will meet the Science requirement by completing their required science courses—e.g., chemistry and physics.

Communication Sciences and Disorders

Communication sciences and disorders students should consult both the Liberal Studies requirements and the communication sciences and disorders program requirements, particularly the "related courses" section, when selecting Liberal Studies coursework. Courses may count in both places. Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.

- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

Dance (BFA & BS)

Dance and Dance–BFA students must complete ANAT&PHY 338 Human Anatomy Laboratory, which will meet both a Science requirement and the Science Laboratory requirement. In general, Liberal Studies requirements cannot be met with courses taken to meet other program requirements.

Rehabilitation Psychology

In general, rehabilitation psychology students may not satisfy Liberal Studies requirements with courses taken to meet the Related Course Requirements in Rehabilitation Psychology. Courses applied toward the other parts of the Rehab Psych requirements cannot also count toward the 40 Liberal Studies

LIBERAL STUDIES ELECTIVES

Complete additional liberal studies coursework as needed to reach the required 40 Liberal Studies credits.

IMPORTANT NOTES REGARDING THE LIBERAL STUDIES REQUIREMENTS

- Completion of the Liberal Studies requirements is not a prerequisite to professional program application or admission.
- For the most part, courses listed in School of Education departments may not be used to satisfy the Liberal Studies requirements. School of Education departments include Art, Art Education, Counseling Psychology, Curriculum and Instruction, Dance, Educational Leadership and Policy Analysis, Educational Policy Studies, Educational Psychology, Kinesiology, Rehabilitation Psychology and Special Education, and Theatre and Drama.
 - For example, KINES 100 Exercise, Nutrition, and Health, cannot count toward the Liberal Studies requirement even though it is a Biological Science course. ED PSYCH 320 Human Development in Infancy and Childhood cannot count toward Liberal Studies even though it is a Social Science course.
 - Exceptions include some courses that are cross-listed in departments outside the School of Education such as ED POL/HISTORY 412 History of American Education. Art and Dance department courses count toward the Humanities requirement.
- Courses that transfer to UW–Madison as departmental electives (e.g., POLI SCI X10) might meet specific Liberal Studies requirements. Students may consult with an advisor in the School of Education Student Services Office to discuss transfer electives that appear to meet specific course requirements.
- While one course may cover two requirements, students must still complete both the 40-credit total and the 9-credit minimum requirements in Humanities, Social Studies (Social Science), and Science.
 - For example, THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature, a Literature course also on the Fine Arts list, may be used to meet both the specific Fine Arts and Literature requirements of the Humanities area, but a total of 9 credits of Humanities are still required.
- Courses in other schools/colleges (excluding the School of Education) may count as Liberal Studies if they have an L&S Credit Type designation of C and/or assigned a level or breadth descriptor.

credits. However, if a course is taken to meet any of the three Cultural/Historical Studies requirements, the course *content* can be used to meet both requirements, but the *credits* will only count in the Rehabilitation Psychology or Related Course Requirements areas. Once the required credits have been met, additional course work in Psychology, Sociology, Social Work, etc. may be applied toward Liberal Studies.

Theatre and Drama

Theatre and drama students can apply major coursework toward the Liberal Studies requirements.

RESOURCES

SCHOOL OF EDUCATION STUDENT SERVICES - ACADEMIC ADVISING, STUDENT DIVERSITY SUPPORT, SCHOOL OF EDUCATION CAREER CENTER

139 Education Building, 1000 Bascom Mall; 608-262-1651

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) office coordinates a number of student-related services for prospective and current School of Education students in all programs. Student Services staff provide:

- academic advising
- career advising
- mentoring and advocacy for underrepresented and international students
- requirement monitoring and help with course selection
- referrals to other campus resources
- someone to talk to
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

ACADEMIC ADVISING

Choosing a major and navigating the completion of a degree or certificate can be an exciting process, and one that students don't need to figure out on their own! Advisors help find the right fit. Students are encouraged to meet with an advisor during their first semester on campus (if not before) and should check in at least once a semester to discuss academic and personal goals, course selection, and for assistance in monitoring degree requirements and progress to graduation; this is particularly important during the freshman and sophomore years.

Students are also encouraged to consider the Student Services office a first step for any number of questions and concerns. Academic advisors

refer students to experts in other areas across campus, such as study abroad, counseling, or pre-health advising.

Each student is assigned a dedicated Student Services advisor to provide assistance throughout their undergraduate years, from SOAR through commencement. Once a student is admitted to a professional program within the School of Education, they will also be assigned a faculty or staff program advisor. Advising then becomes a partnership, with Student Services advisors continuing to help students with course selection, progress to degree, academic and personal concerns, and interpretation of policies and procedures. We collaborate with the School faculty and staff to best support students.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department and, in the case of certification programs, follow the students' progress through their professional courses. The divisions between program advising and Student Services advising are flexible. Students are encouraged to consult with all advisors who can help with a situation or answer a question.

STUDENT DIVERSITY SUPPORT

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. In keeping with this commitment, Student Services staff include advisors with extensive experience assisting underrepresented and international students.

Students are supported in their personal and professional growth, their transition from high school to college, financial aid, and career exploration. Advisors perform outreach, recruitment, and advising on behalf of the School, and work collaboratively with the rest of Student Services and other campus and community partners to support underrepresented and international students interested in School of Education majors. Prospective transfer students will get assistance with the application process, how courses transfer to UW-Madison, and other transfer-related concerns.

Students are invited to stop in the Student Services office or set up an appointment for a visit. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

SCHOOL OF EDUCATION CAREER CENTER

Need assistance with any of the following?

- Exploring career options linked to School of Education majors
- Seeking a major that fits you and helps you reach your career goals
- Researching graduate schools and preparing application materials
- Beginning your job search and not sure where to start
- Want assistance with your résumé, cover letter, or interviewing skills
- Want to connect with potential employers
- Discover the events and career fairs available to you
- Explore job and internship opportunities in **Handshake!**

The Career Center is ready help you!

Personalized career assistance is available through individual career advising appointments.

Current students can schedule an appointment through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in their MyUW account. Appointments can also be made via email at soeacademicservices@education.wisc.edu.

SCHOLARSHIPS/THE TEACHER PLEDGE/TEACH GRANTS

SCHOLARSHIPS

The generosity of alumni and friends has enabled the School of Education to distribute over \$1 million in scholarships and awards annually to deserving undergraduate students.

School of Education departmental scholarships (Art, Dance, Curriculum and Instruction, Theatre and Drama, Kinesiology, Rehabilitation Psychology and Special Education, and Educational Policy Studies) are generally awarded to students declared in their major or accepted to their program. School-wide scholarships are available to any student; however, most of these are based on financial need.

Selections of scholarship recipients are made by committees, and based on matches to particular scholarships as well as strength of application. The criteria for scholarships may include academic performance, excellence in a specific field or area, potential as a prospective teacher, leadership ability, personal attributes (such as returning adult status or home county), and financial need. All scholarship and award recipients must be in good academic standing in the School of Education.

Applying for School of Education Scholarships begins with completing the Wisconsin Scholarship Hub WiSH "General Application." Through a series of filtering questions, students are guided to appropriate departmental or school-wide applications, including All School and Teacher Education categories. Each application represents a group of scholarships for which a student might be eligible, and a student may be eligible for more than one group (and thus may need to complete several applications). Note that some applications require responses to essay questions and/or submission of letters of recommendation or other materials.

While the WiSH (<https://wisc.academicworks.com/>) General Application has an annual application cycle from August – August, the School of Education (and several department) scholarship applications open in early February and remain open until the end of March each academic year. There are a few School of Education department applications that open and close outside of the February – March window. Please be sure to check your department's application deadlines. Scholarship decisions are generally made between March – June.

Each year the number of scholarships available continues to grow; however, not every student who applies receives funding.

THE TEACHER PLEDGE

The UW-Madison School of Education Wisconsin Teacher Pledge is a financial aid program for UW-Madison teacher education students. The Teacher Pledge offers teacher education undergraduates and graduates up to the cost of in-state tuition, plus testing and licensing fees annually, in exchange for a commitment to teach in Wisconsin. For each year taught in a PK-12 school in Wisconsin, a portion of the Teacher Pledge loan will be forgiven – reaching 100% forgiveness after a three-to-four

year teaching commitment. Please note: this program is currently funded for six years, beginning with Academic Year 2020-2021.

- For general information, visit the Teacher Pledge Website (<https://tec.education.wisc.edu/teacher-pledge/>).
- Check out How to Take the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/how-to-take-pledge/>) – a checklist that guides students through Teacher Pledge requirements from A to Z, including how to participate.
- For answers to frequently asked questions, check out the Teacher Pledge FAQ (<https://tec.education.wisc.edu/teacher-pledge/faq/>). (<https://tec.education.wisc.edu/teacher-pledge/faq/>)

TEACH GRANTS

Students willing to teach in high-need teaching fields can receive TEACH Grants of up to \$4,000 per year for a total of \$16,000 over their undergraduate academic career, or \$8,000 over their graduate academic career. Officially-designated high need fields include Master of Science with Secondary Teaching & ESL Certification; Bilingual Education; Communication Sciences and Disorders; English as a Second Language; Mathematics; Music; Reading Specialist; Science certification areas; Special Education; World Language Education certification areas, and any other fields documented as high-need by the federal government and/or state or local education agency (LEA). Elementary Education students completing the Early Childhood/ESL, Middle Childhood-Early Adolescence/ESL or the Middle Childhood-Early Adolescence/Special Education program options are also eligible for a TEACH Grant.

Students receiving TEACH Grants must complete a service obligation of four years of teaching full-time in their high-need field in a designated low-income school. This must be accomplished within eight years after completing a teacher preparation program. Low-income schools are defined as public or private nonprofit elementary or secondary schools, or educational service agencies eligible for assistance under Title I of the Elementary and Secondary Education Act. In Wisconsin over a thousand schools are designated as low income.

TEACH Grant applicants must attain certain academic eligibility criteria. For example, candidates must have scored minimally above the 75th percentile on a nationally normed admissions test or have earned a 3.25 minimum cumulative grade point average. TEACH Grants are not need-based, so students may receive a grant without regard to financial background. Grant recipients must have completed a Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/>) to be eligible.

Prior to submitting an application, students are strongly encouraged to learn about the parameters of the TEACH Grant and obtain answers to any related questions. Indicate an interest in the TEACH Grant via the FAFSA and by completing the program application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/scholarships-and-grants/>). Students should make sure to review the complete application instructions (<https://education.wisc.edu/wp-content/uploads/sites/4/2021/03/TEACH-Grant-Documents-February-2021.pdf>) to ensure the proper submission of all application materials.

STUDY ABROAD AND INTERNATIONAL INTERNSHIPS

The School of Education encourages all students to participate in study abroad and international internship opportunities. Studying and interning

abroad builds skills and knowledge that prepare students to work with others from around the globe to address the world's toughest challenges. Through study abroad and international internship programs, students can:

- Expand their world view.
- Enhance their career opportunities and grow their network.
- Position themselves to learn another language and improve multi-lingual and cross-cultural communications skills.
- Experience another culture first-hand.
- Make new friends and connections from around the world.
- Discover new things about their own culture.
- Learn more about themselves and gain self-awareness.
- Strengthen communication, team-building, and adaptability skills.
- Boost confidence and independence.
- Become a savvy traveler.

(International Institute of Education (<https://www.iie.org/Learn/Blog/2017/11/2017-Nov-14-10-Great-Reasons-to-Study-Abroad/>), 2017)

The School of Education seeks to make studying abroad a possibility for all students. Many academic departments have created Major Advising Pages (MAPs) (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>). MAPs are a guide to the academic requirements of specific majors or certificates in relation to study abroad. Check out the Major Advising Pages to find out when and where might be the best options to study abroad.

The International Academic Programs (IAP) Office (see below) and the School of Education seek to make studying abroad affordable for students. Make sure to review the IAP scholarship page (<https://studyabroad.wisc.edu/funding/scholarships/>). In particular, check out the scholarships that are specifically for SoE majors.

School of Education students, and students planning to pursue a certificate in the School, are encouraged to explore different study abroad and international internship options early, even during the first or second semester on campus. While study and interning abroad is open throughout the undergraduate years, for some majors going early is the best option.

Why should School of Education students explore their options to study or intern abroad early?

- Some degree programs, such as teacher education or kinesiology, have structured course sequences in the junior and senior year. Studying abroad in the first two years may be the best course of action for students in these program areas. Advisors in the School of Education Student Services and International Academic Programs offices can assist in identifying the best time to study abroad.
- Scholarships! Working with the International Academic Programs, International Internship Program, Financial Aid, and the SoE Global Engagement Office early allows students to explore many [scholarship options](#). Pre-planning around the costs of studying or interning abroad helps make participating a reality.
- Many UW-Madison students are the first in their families to study or intern abroad. Exploring study and intern abroad options early allows students to get key information to share

with those closest to them. Considering a study or intern abroad opportunity can be daunting. Getting as much information as possible, as early as possible, can help dispel some of the fears and uncertainties students and their families may have.

STUDY ABROAD

International Academic Programs, 301 Red Gym, 716 Langdon Street
608-265-6329

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) is the central study abroad office at UW–Madison. IAP typically offers over 200 study abroad options in over 60 countries on 6 continents. Studying abroad complements students' on-campus academic goals, strengthens their professional potential and enriches their personal lives. Although COVID-19 has altered IAP's offerings, there are still opportunities to explore both internationally and domestically (e.g., the Washington D.C. semester program).

Students of all academic levels and majors study abroad. While many programs include language training—from the basics to full language immersion—most IAP programs have no language requirement and include courses taught in English.

Students advance towards their degrees while studying abroad. All courses taken abroad through IAP count as “in-residence” credit, just like taking courses on campus at UW–Madison. And study abroad isn't limited to classroom experience! Many students also complete internships, do research, fieldwork, and service learning.

In addition to resources on health, safety, academic planning and other aspects of studying abroad, UW–Madison students receive personalized guidance on how to finance their experience and the many scholarship opportunities available through the UW–Madison and external scholarships. Program costs vary widely. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. Student financial aid is usually applied to study abroad experiences, and some countries permit students to work while participating in a study abroad program. Working out these details takes time, dedication and patience. IAP works closely with students through all of these processes.

For more information on study abroad at UW–Madison, check out IAP's website (<http://studyabroad.wisc.edu>) or call 608-265-6329. IAP's offices are on the third floor of the Red Gym.

INTERNATIONAL INTERNSHIPS

259 Bascom Hall, 500 Lincoln Drive, 608-890-2085

As stated on their website, the International Internship Program (IIP) (<http://internships.international.wisc.edu/>) at UW–Madison identifies, cultivates and promotes high quality internships that:

- Advance the professional training of UW–Madison undergraduate students.
- Foster global competency.
- Reinforce academic learning through practical application.

Students can pursue international internships during the summer months, as well as during the semester, if allowed by the student's academic program. IIP offers both in-person and virtual internships with organizations and companies outside of the U.S. If traveling to do an internship is not an option at the moment, make sure to review the virtual internship options they offer.

IIP advises undergraduates on all aspects of an international internship experience which include:

- Internships search strategies and considerations
- Applications
- Academic Credit
- Funding
- Visas
- International health and travel insurance

The International Internship Program (IIP) Office maintains a number of resources including an IIP Database of international internships that have been cultivated for UW-Madison students and a number of guides to help students navigate participating in an international internship. IIP serves as a resource to students pursuing international internships prior to departure, during the internship, and upon return. Their advisors work closely with both students and program sites to ensure that students have a quality experience.

UNDERGRADUATE RESEARCH

UW-Madison is a research-rich environment and students are encouraged to participate in the research activities of our world-class faculty and staff. Here are some pathways students use to get involved with research:

1) Apply to a structured program. Some students get involved in research through a specific program (<https://research.wisc.edu/information-for-undergraduate-students/>) designed to connect undergraduate students to research. This program may be a scholarship program, or simply provide funding to work on a guided research project. It may provide mentoring related to research methodology and/or require students to enroll in a course for credit. An example of such a program is the Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>), one of the more popular options available to School of Education students.

The Undergraduate Research Scholars program (URS), 716 Langdon Street, 608-890-3696, is dedicated to enhancing the academic experience of UW–Madison students by providing first and second year undergraduates with opportunities to earn credit for participating in the research and creative work with UW–Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities. Please refer to the website (<https://urs.ls.wisc.edu/>) for more information.

2) Seek out research opportunities. Many students take the initiative and seek out research opportunities on their own. The School of Education Career Center (<http://careercenter.education.wisc.edu/>) can provide help with writing an inquiry email. Here are a few ways to conduct this search:

- The Wisconsin Discovery Portal (<https://discoveryportal.org/default.aspx>) is a searchable directory of more than 3,000 researchers at UW–Madison. It provides easy access to information about research interests, publications, patents and more.
- Find information about undergraduate research and fellowship opportunities on the UW Research (<https://research.wisc.edu/information-for-undergraduate-students/>) website.
- Find helpful information about undergraduate research experiences in science on the BioCommons (<https://biology.wisc.edu/undergraduate-research/>) website and the

WISCIENCE (<https://wiscience.wisc.edu/research-mentor-training/#undergrad>) website.

- Find a listing of labs on the Wisconsin Center for Education Research (<https://www.wcer.wisc.edu/research/>) and departmental websites. The lab descriptions often contain contact information for students interested in getting involved in the lab's activities. The Kinesiology department (<https://kinesiology.education.wisc.edu/research/>) and the Communication Sciences and Disorders department (<https://csd.wisc.edu/research/>) are two good examples of how this information is shared. Many School of Education students participate in research through the Department of Educational Psychology.
- The Student Jobs (<https://studentjobs.wisc.edu/>) website lists some research opportunities.
- Read the online bios of professors to learn about their areas of research. Send an email inquiry. The Center for Pre-Health Advising (<https://prehealth.wisc.edu/research-opportunities/>) has a helpful email template you may use.
- Ask the professor or TA in a class if they know of any opportunities to become involved with research.

3) Participate when enrolled in a course. Some courses have research opportunities built into the course itself. For example:

- Biology 152 has provided students with an option to participate in a mentored research opportunity.
- Students can serve as research participants to earn extra credit in their courses. Students enrolled in Educational Psychology courses, for example, are often provided with such an opportunity.
- Some professors will announce research opportunities through email to their students.

OFFICE OF EQUITY, DIVERSITY, AND INCLUSION

102 Education Building, 1000 Bascom Mall, 608-263-3600

The University of Wisconsin-Madison School of Education seeks to promote equity, diversity and inclusion by reducing barriers to access, increasing the demographic diversity of our faculty, staff and students, and encouraging scholarship, teaching and service that embraces and engages the full measure of the diversity of our society. The School of Education recognizes that our desire to be an unbiased and inclusive academic community is ongoing and involves shared commitment, responsibility, action and accountability. We believe that diversity, equity, inclusion, and excellence, the four essential pillars of inclusive excellence, build upon our scholarship and our reputation as an excellent educational institution.

The Office of Equity, Diversity and Inclusion (OEDI) (<https://education.wisc.edu/about/diversity-inclusion/>) provides and promotes programs and initiatives that establishes and supports a culture of academic and inclusive excellence in the School of Education. OEDI promotes initiatives that recruit, retain and support the success of historically marginalized students, faculty, and staff, utilizing every person's individual and cultural assets as a competitive advantage to leadership in the arts, health, and education fields. OEDI promotes a community of scholars, practitioners, and collaborators within the School that effectively and efficiently enrich the quality of life for *all* our faculty,

staff, and students, as well as local communities and communities abroad.

OEDI is a new and developing office that houses programs that serve students at multiple levels. Some of our programs include:

- **Summer Education Research Program (SERP):** The Summer Education Research Program (SERP) is a ten-week residential program for undergraduate students interested in pursuing graduate degrees in the School of Education. SERP Scholars, as a part of the Summer Research Opportunities Program (SROP), conduct research projects under the supervision of School of Education faculty/research mentors. In the process, they engage in cutting edge research in their chosen fields and present their final projects to faculty members, peers, and the broader university community. SERP Scholars also participate in workshops and seminars related to graduate school, ensuring that they are prepared for both the application process and the graduate student experience itself. As part of SERP, participants also receive a competitive stipend for their work.
- **Education Graduate Research Scholars (Ed-GRS):** The Education Graduate Research Scholars Program (Ed-GRS) is a graduate fellowship program and research community which provides funding and a broad support system to graduate students who are either first generation students or from underrepresented backgrounds. Ed-GRS Fellows participate in a variety of discussions and workshops that prepare them to successfully navigate the graduate school experience, including the job search process and assuming a role as a research or faculty member after graduation. Fellows are also offered a number of special opportunities to connect with faculty, research staff, and peers throughout the School of Education to help them build a sense of supportive community.
- **Summer Precollege Access Program (under development):** The purpose of our summer precollege program is to expose high school students to the value and benefits of attending the School of Education and the different career opportunities that await them after graduation from any departments within the School of Education. Due to a variety of factors, including the COVID-19 pandemic and a shift in strategic planning, the precollege program will not run for Summer 2022. We are currently re-imagining significant aspects of the program and will share our exciting new vision as it matures. If you have questions about our precollege offerings, please contact our office at the email below.
- **Student Affinity Groups:** OEDI helps support affinity groups designed to help underrepresented student populations establish a sense of community. The groups convene both to discuss topical issues and for simple fun social outings. Currently, OEDI sponsored affinity groups include a Latinx group, an African American group, and an LGBTQ+ group. There is definitely room for more though! If you would like to participate in an existing group or to help launch a new one, please reach out to our office for more information.

Students are encouraged to email oedi@education.wisc.edu with any questions regarding the Office or any of its programs.

COUNSELING PSYCHOLOGY TRAINING CLINIC

The Counseling Psychology Training Clinic (CPTC) (<https://counselingpsych.education.wisc.edu/clinic-and-outreach/cptc/>) is an award-winning training clinic run by the School of Education's Department of Counseling Psychology. The clinic provides high-quality, cost-efficient, and multiculturally competent psychological and mental health services to UW-Madison students and members of the community. Clinicians assist individuals with a variety of concerns including:

- Depression
- Anxiety
- Relationship issues
- Family concerns
- Trauma
- Eating disorders
- Sexual orientation/identity
- Sexuality
- Culture/ethnicity
- Poor concentration
- Grief
- Gender issues
- Anger
- Counseling for gifted and talented students

Fees for counseling services are on a sliding scale determined by income.

TEACHER EDUCATION CENTER

L139 Education Building, 608-262-2997

The Teacher Education Center (<https://tec.education.wisc.edu/>) supports all students enrolled in teacher education programs across the UW-Madison campus. The Center highlights the benefits, crucial importance and real joys of choosing teaching as a career. Our supports are designed to promote success and cultivate leadership. Specifically, we provide individual appointments and drop-in sessions to help students pass educator licensing exams, achieve and document mastery of teacher education standards, and complete all required field experiences. The Teacher Education Center also oversees the statutory requirements for our teacher education programs, including Act 31, which ensures that all preservice teachers learn about the history, culture, and tribal sovereignty of Wisconsin's American Indian communities. The Teacher Education Center is the main point of contact for school district partners, cooperating teachers, and the Wisconsin Department of Public Instruction. At the TEC, we cultivate a community of inquiry and leverage our shared resources to help prepare the excellent educators our Wisconsin PK-12 schools deserve.

MERIT (MEDIA, EDUCATION RESOURCES, AND INFORMATION TECHNOLOGY)

301 Teacher Education Building, 608-263-4750

MERIT (<https://merit.education.wisc.edu/>) offers information and technology services to the School of Education and UW-Madison community partners. MERIT is designed as a collaborative and comprehensive cluster of service and support for the School of Education, the UW-Madison and beyond. Staff play an active role in

the design and implementation of programs which connect the K-12 community to UW–Madison.

Some of our services include evaluation and selection of tools for delivery of content, instructional design and consulting for development of online learning, library services and collections to support practicing teachers (including equipment loans), workshops and instructional support aimed at adoption of new tools, instructional technologies and information literacy.

COOPERATIVE CHILDREN'S BOOK CENTER (CCBC)

401 Teacher Education, 608-263-3720

The CCBC (<https://ccbc.education.wisc.edu/>) is a library of the School of Education that provides Education students, faculty, and staff with a noncirculating collection of children's and adolescent literature. The CCBC also serves other adults on campus and across the state who are interested in literature for the young, including Wisconsin teachers and school and public librarians.

This nationally unique library is the primary resource on campus and elsewhere for contemporary books published for children and young adults from preschool through high school ages. CCBC resources include extensive reference materials about literature for the young and a wide range of books for children and adolescents, including a book examination collection of new and recently published books, a comprehensive collection of recommended contemporary books, and historical literature from the 19th and early 20th centuries. The CCBC is nationally known for its services related to intellectual freedom and advocacy for diversity in children's and young adult literature. Each year the CCBC compiles and releases statistics documenting the number of children's and young adult books by and/or about people of color published in the United States.

As a library of the School of Education, the CCBC is committed to being a vital part of the teacher education experience on campus. The CCBC's noncirculating collection provides immediate access to a wide range of literature for the young. CCBC librarians are available to meet with education students to help them identify children's and adolescent literature to fulfill class assignments, as well as to use in practicum and student teaching classrooms. Librarians are also available to meet with faculty and teaching assistants to discuss children's and young adult literature as it relates to the courses they are teaching.

The CCBC website (<https://ccbc.education.wisc.edu/>) provides full-text access to many national children's and young adult literature awards and recommended lists as well as specialized bibliographies from CCBC staff. The CCBC offers special events throughout the academic year that provide opportunities to hear from authors and illustrators, as well as to interact with others who are interested in books for children and teens.

HONORS

DEAN'S LIST

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

GRADUATING WITH HONORS AND GRADUATING WITH DISTINCTION

Undergraduate students are invited to wear an honors stole at graduation, representing **Graduating with Honors**, if they have indicated they expect to graduate at the conclusion of the current semester, have a cumulative GPA that places them in the top 20% of students expecting to graduate in their school/college, and have earned at least 60 credits in residence at UW–Madison. Credits in progress in the current semester count toward the 60 credit requirement.

Graduating With Distinction is a separate calculation and is posted to the undergraduate student's transcript after all grades and degrees have been recorded. Students qualify for the Distinction notation if they have received their degree, have a cumulative GPA that places them in the top 20% of degree recipients in their school/college, and have earned at least 60 credits in residence at UW–Madison.

HONORS COLLABORATION WITH THE COLLEGE OF LETTERS & SCIENCE

The School of Education does not currently offer an Honors degree, with the exception of Honors in the Theatre and Drama major. However, through a collaboration between the School of Education and the College of Letters & Science (L&S), students in the School of Education may participate in the L&S Honors Program and have these achievements posted on their transcript.

Three L&S Honors options may be completed by School of Education students.

L&S Honors in the Liberal Arts (HLA). Students pursuing Honors in the Liberal Arts complete Honors courses in broadly distributed subjects from the humanities, social sciences, and natural sciences. Through Honors coursework, students select enriching academic opportunities and build connections with faculty throughout the completion of their degree.

Courses taken for Honors can also be applied toward other degree requirements. For example, of the 24 required Honors credits

- At least 6 of the credits must be in courses designated as Humanities (including Literature)
- At least 6 of the credits must be in courses designated as Social Science
- At least 6 of the credits must be in courses designated as Biological, Physical, or Natural Science

These requirements completely overlap with the School of Education liberal studies requirements.

Honors in the Major (HM). Students completing an *additional major* housed in the College of Letters and Science may choose to complete the Honors requirements of this major. Honors in the Major requirements vary by program, but typically include a cumulative gpa of at least 3.3, a minimum major gpa, Honors coursework in the major, and successful completion of a two-semester senior Honors thesis or other capstone experience.

If Honors courses overlap with School of Education requirements, they can count in both areas.

Comprehensive Honors (both HLA and HM). Comprehensive Honors, the highest level of Honors achievement, is awarded to students who are admitted to, and complete the requirements for both Honors in the Liberal Arts and Honors in the Major.

Full details of requirements, application procedures and policies are available in the Guide (p. 376) and the program's website (<http://www.honors.ls.wisc.edu>). Students with questions about how L&S Honors connects with School of Education programs and requirements should consult both L&S Honors and School of Education advisors to plan a course of study.

WISCIENCE

WISCIENCE

SUPPORT FOR SCIENCE UNDERGRADUATES

UW–Madison offers a wealth of opportunities in the natural sciences for undergraduate students, including several undergraduate courses and programs at WISCIENCE designed to enhance an academic course of study in STEM.

Exploring Biology (<https://wisience.wisc.edu/Exploring-Biology/>) (INTEGSCI 100) This lecture/discussion course is designed to help first-year students understand career and academic options in the biosciences. It fulfills CALS seminar requirements and counts as a Biological Science Breadth credit. *2 credits*

BioHouse Seminar (<https://wisience.wisc.edu/BioHouse-program/>) (INTEGSCI 110) This seminar creates a formal space for residents of UW–Madison's 10th learning community to learn about life science and the Wisconsin Idea. *1 credit*

Exploring Service in Science (<https://wisience.wisc.edu/Exploring-Service/>) (INTEGSCI 140) Students learn about campus–community partnership and outreach in STEM. *1 credit*

Exploring Research in Science (<https://wisience.wisc.edu/course/exploring-research-science-course/>) (INTEGSCI 150) This seminar is designed to help students learn how research processes and the skills necessary for success with academic programs or careers in research. *1 credit*

Exploring Discipline-based Leadership in Science (<https://www.wisience.wisc.edu/discipline-based-leadership/>) (INTEGSCI 230) This course will help STEM students develop crucial skills for civic engagement, leadership, and social justice while reflecting on personal experiences in their field. *2 credits*

Service with Youth in (<https://wisience.wisc.edu/Engage-Children/>) **STEM Series** (INTEGSCI 240) This 2 semester series partners with the Adult Role Models in Science (ARMS) program to help students learn the process of learning, how to evaluate inform learning experiences, and how to collaborate with community partners in after-school science clubs. *2 credits per semester*

Entering Research Series (<https://wisience.wisc.edu/Entering-Research/>) (INTEGSCI 260 and INTEGSCI 261). This two-semester series is designed to be taken while undergraduates are engaged in mentored

research to help them build a meaningful and productive experience in the lab. *1 credit per course*

Special Topics (<https://wisience.wisc.edu/secrets-science/>) (INTEGSCI 375): Our faculty offers a variety of topics allowing undergraduates to delve into a variety of STEM topics like the "Secrets of Science." *1–3 credits*

WISCIENCE also offers customized options for undergraduates with independent study and internship opportunities available.

ADVANCING HIGHER EDUCATION IN STEM

WISCIENCE promotes cross-college collaboration among university educators around issues in science education, including teaching for diversity.

Faculty Development Programming and Courses

Wisconsin Program for Scientific Teaching (WIPST)

Scientific Teaching Fellows (<https://wisience.wisc.edu/WPST-program/>): This program provides a hands-on approach to combine theory, practice, reflection, assessment, while strengthening participant's skill in teaching, with focus on educating the undergraduate.

INTEGSCI 650 College Science Teaching

INTEGSCI 750 Instructional Materials Design for College Science Teaching

INTEGSCI 850 Mentored Practicum in College Science Teaching

INTEGSCI 675 Special Topics

INTEGSCI 660 Research Mentor Training Practicum: Offered in collaboration with the Delta Program, our mentor training is based on the Entering Mentoring curriculum and gives participants time to reflect and build the tools necessary for a successful mentor/mentee relationship.

INTEGSCI 605 Scientific Teaching for TAs: This course is designed to help the newer teaching assistant (TA) enhance their own skills in teaching and learning to be more effective in the classroom or lab.

SCIENCE OUTREACH AND COMMUNITY ENGAGEMENT

WISCIENCE initiates and supports outreach efforts to improve K–12 science education, prepare future science undergraduates, and encourage general public engagement with the natural sciences.

Outreach in Science at WISCIENCE

Adult Role Models in Sciences (<http://www.wisience.wisc.edu/ARMS-program/>)

Science Alliance (<https://science.wisc.edu/science-alliance/>)

National Alliance for Broader Impacts (<https://broaderimpacts.net/>)

Beyond the Classroom

BioHouse (<https://www.housing.wisc.edu/residence-halls/learning-communities/biohouse/>)

BioCommons (<http://www.biology.wisc.edu/>)

IMPACT Peer Leaders (<https://wiscience.wisc.edu/IMPACT-program/>)

CONTACT INFORMATION

WISCIENCE

EDUCATOR LICENSING

CERTIFICATION PROGRAMS LEADING TO EDUCATOR LICENSING

In August of 2018 the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels listed below will occur as program areas implement the new requirements.

TEACHER LICENSING PROGRAMS

- Art Education
- Communication Sciences and Disorders (Speech-Language Pathology)
- Elementary Education
 - **New Program Options**
 - Kindergarten – 9th Grade with optional minors in Early Childhood and K-12 English as a Second Language
 - Kindergarten – 9th Grade/Special Education Kindergarten – 12th Grade Dual Certification
 - **Previous Program Options**
 - Early Childhood/English as a Second Language Early Childhood
 - Middle Childhood through Early Adolescence/English as a Second Language Middle Childhood through Early Adolescence
 - Middle Childhood through Early Adolescence - Dual Certification in Elementary and Cross Categorical Special Education
 - Middle Childhood through Early Adolescence with Content Minor (*Language Arts minors* available in English, English Language Arts; *Mathematics minors* available in Mathematics, Specialized Mathematics, Mathematics/Science dual minor; *Science minors* available in Biology, Chemistry, Earth Science, Specialized Science, Physics, Mathematics/Science dual minor; *Social Studies minors* available in Economics, Geography, History, Political Science, Psychology, Social Studies, Sociology)
- Health
- Music Education
 - **New Program**
 - Music
 - **Previous Program Options**
 - General and Choral Music
 - General and Instrumental Music
- Physical Education
- School Library Media Specialist
- Special Education

- **New Program Options**
 - Early Childhood Special Education
 - Special Education Cross Categorical Grades K-12
 - Early Childhood Special Education/Special Education Cross Categorical K-12 Dual Certification (Birth-Grade 12)
 - Kindergarten – 9th Grade/Special Education Kindergarten – 12th Grade Dual Certification
- **Previous Program Options**
 - Cross Categorical Middle Childhood through Early Adolescence/Early Adolescence through Adolescence
 - Middle Childhood through Early Adolescence - Dual Certification in Elementary and Cross Categorical Special Education
 - Intellectual Disabilities Middle Childhood through Early Adolescence/Early Adolescence through Adolescence (graduate-level only)
- Secondary Education
 - **New Program Options**
 - English Grades 4-12/English as a Second Language Grades K-12
 - Mathematics Grades 4-12/English as a Second Language Grades K-12
 - Science Grades 4-12/English as a Second Language Grades K-12
 - Social Studies Grades 4-12/English as a Second Language Grades K-12
 - **Previous Program Options**
 - English Early Adolescence through Adolescence/English as a Second Language Early Adolescence through Adolescence
 - Mathematics Early Adolescence through Adolescence/English as a Second Language Early Adolescence through Adolescence
 - Science certification options in Biology, Broad Field Science, Chemistry, Earth and Space Science, Environmental Studies, and Physics Early Adolescence through Adolescence/English as a Second Language Early Adolescence through Adolescence
 - Social Studies certification options in Broad Field Social Studies, Economics, History, Geography, Political Science, Psychology, Sociology: Early Adolescence through Adolescence /English as a Second Language: Early Adolescence through Adolescence
- World Language Education - undergraduate program is closed to new admissions; graduate-level WLE certification program is in development.
 - Chinese
 - French
 - German
 - Italian
 - Japanese
 - Latin
 - Portuguese
 - Spanish

SUPPLEMENTARY TEACHING LICENSING PROGRAMS

- Adaptive Physical Education
- Bilingual/Bicultural Education
- English as a Second Language (available with concurrent completion of relevant Elementary or Secondary certification program; add-on option for previously certified teachers closed to new admissions.)
- Reading Teacher

ADMINISTRATOR LICENSING PROGRAMS

- Superintendent
- Principal
- Director of Instruction
- Director of Special Education and Pupil Services
- Reading Specialist

PUPIL SERVICES LICENSING PROGRAMS

- School Nurse
- School Psychologist
- School Social Worker

ART

Undergraduate Degrees

- B.S.–Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/#requirementstext>) and B.S.-Art with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bs/art-graphic-design-bs/>)
- B.S.–Art Education (<https://guide.wisc.edu/undergraduate/education/art/art-education-bs/>)
- Bachelor of Fine Arts (BFA) (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/>) and Bachelor of Fine Arts (BFA) with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/art-graphic-design-bfa/>)

Undergraduate certificates

- Certificate in Art Studio (<https://guide.wisc.edu/undergraduate/education/art/art-studio-certificate/>)
- Certificate in Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/graphic-design-certificate/>)

The Department of Art conducts an exemplary experimental undergraduate program emphasizing the importance of a broad background in the study and practice of visual art and design, liberal arts, and knowledge of art and design movements throughout history. The nationally and internationally recognized faculty of visual artists and designers provides a stimulating educational environment to prepare students for careers in a broad array of creative fields and/or graduate study. The program also supports and encourages the development of a visually and culturally literate community.

The art department offers two professional programs, Art and Art Education. Art majors may pursue either the Bachelor of Science degree (p. 1561) or the Bachelor of Fine Arts degree (p. 1569). Art majors wanting to complete a strong emphasis in graphic design may pursue either the Bachelor of Science: Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/art-bs/art-graphic-design-bs/>) or Bachelor of Fine Arts: Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/art-graphic-design-bfa/>) options. Art Education majors (p. 1549) receive the Bachelor of Science–Art Education degree and eligibility to apply for licensure to teach in both elementary and secondary schools. Entrance requirements vary for each program. For exhibition purposes, the department may temporarily retain one piece of work from each student in art studio courses. All degree programs are accredited by the National Association of Schools of Art and Design (NASAD).

DEGREES/MAJORS/CERTIFICATES

- Art Education, B.S. (p. 1549)
- Art Studio, Certificate (p. 1558)
- Art, B.S. (p. 1561)
- Art, BFA (p. 1569)
- Graphic Design, Certificate (p. 1584)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

ART EDUCATION, B.S.

Art education is a perfect choice for students who thrive in creative, collaborative environments. People who choose this meaningful career path love viewing, discussing, and making works of art/design **and** are passionate about engaging others in the artistic process. Art educators help children and adults discover their own creative capacities and the countless contributions visual artists make to our communities each day.

UW–Madison's art education program provides essential preparation for a variety of careers in art education. Students work directly with children and adolescents in both school and community-based field placements in every semester of the program. They study with outstanding art and education faculty in a range of rigorous and engaging studio, art history, curriculum and instruction, educational psychology, and educational policy studies courses, while also connecting with Madison's vibrant arts community through field trips and service learning.

Graduates of our program earn a Bachelor of Science degree, a career-ready Wisconsin teaching license in PK–12 art education, and gain the skills, knowledge, and confidence to teach the visual arts in public and private schools, at the elementary and secondary levels, in the United States and internationally, and in community settings such as art museums, maker spaces, and senior centers.

Consult the departmental website (<https://art.wisc.edu/undergraduate/undergraduate-degrees/>) for additional information about art education. Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>), an opt-in loan forgiveness program for teacher education students.

HOW TO GET IN

ART EDUCATION DECLARATION OVERVIEW

Students typically enter UW–Madison as Pre-Art Education students (PAED), spend the first two years completing liberal studies, general education, and foundational studio requirements, and declare Art Education during their sophomore year for their final two years on campus.

On-campus students starting at UW–Madison in other majors can move to Pre-Art Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/>)

academic-program-admission/). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1520), is required to transfer into Pre-Art Education. It is not necessary to be a Pre-Art Education student before declaring an Art Education major.

ELIGIBILITY TO DECLARE ART EDUCATION

Art Education currently accepts declarations once a year, from February 1 – May 1. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Art Education should complete the on-campus declaration and must also be admitted to UW-Madison. See Transfer Students and Students with a Bachelor's Degree, below.

ELIGIBILITY REQUIREMENTS:

- Meet with the Art Education advisor Dr. Mary Hoefflerle (email her directly to set up an appointment at hoefflerle@wisc.edu) or a School of Education Student Services advisor. Email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment in Student Services. On-campus students can schedule using Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- Earn 40 or more total credits by the end of the semester prior to declaration.
- Complete at least 6 aesthetics credits (such as ART 108, ART 208 and/or art history courses) and 20 studio credits by the end of the declaration semester.
- Earn a minimum 2.75 cumulative GPA based on all college coursework attempted or a 2.75 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester.¹

1

Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1520).

Students will be provisionally admitted pending the completion of all eligibility requirements by the end of the declaration semester.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a Bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and

Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Art Education should complete both the on-campus declaration and the UW-Madison application. All eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the Pre-Art Education designation.

An applicant with a previous undergraduate degree will be admitted to Art Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background. Admission as an Education Special Student indicates that the student has an interest in pursuing teacher certification in Art Education and studied this subject area extensively during their initial degree. A student enrolls in Art Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1520).

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The art education program is divided into five areas of study:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements offer an in-depth study of studio art.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a three-semester sequence of art education teaching methods course work and field experiences in schools.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the foundations program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods & Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 Three-

Dimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENT

Complete four courses focusing on the history of art and contemporary developments in the visual arts.

Code	Title	Credits
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	4
Select one of the following: ¹		3-4
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 203	Survey of Asian Art	
ART HIST 205	Global Arts	
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ AFROAMER 242	Introduction to Afro-American Art	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 308	The Tastes of Scholars and Emperors: Chinese Art in the Later Periods	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues	
ART HIST 372	Arts of Japan	
ART HIST 375	Later Japanese Painting and Woodblock Prints	

¹

Additional art history courses addressing arts from underrepresented cultures will be considered.

MAJOR REQUIREMENTS

Students must complete 48 credits of studio art, including the specific requirements below. At least 15 upper-level studio credits must be taken in residence on the UW–Madison campus. Upper-level classes include

Art courses numbered 214 and above, excluding ART 236 and ART 338.

Note: These requirements are effective beginning spring 2016 admission to art education.

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Methods & Concepts	3
ART 222	Introduction to Painting	3-4
ART 338	Service Learning in Art	2
ART 306	Relief Printmaking	3-4
or ART 336	Serigraphy	
ART 244	Art Metal I	3-4
ART 224	Ceramics I	4
ART 214	Sculpture I	3-4
or ART 334	Wood Working	

Take additional art electives to reach the minimum of 48 credits

PROFESSIONAL EDUCATION REQUIREMENTS

Code	Title	Credits
Development (Minimum of 3 credits)		3
Select one of the following:		
ED PSYCH 331	Human Development From Childhood Through Adolescence	
ED PSYCH 320	Human Development in Infancy and Childhood	
ED PSYCH 321	Human Development in Adolescence	
Learning (Minimum of 3 credits)		3
ED PSYCH 301	How People Learn	
Foundations of the Profession (Minimum of 3 credits)		3
ED POL 300	School and Society	
or ED POL/ HISTORY 412	History of American Education	
Literacy, Including Reading		3
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	
Special Education		3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	
or CURRIC/ ART ED 570	Art in Exceptional Education	

¹

Will also fulfill the liberal studies requirement in U.S./European history.

ART EDUCATION REQUIREMENTS

Code	Title	Credits
Fall Semester		
<i>Module 1 (first 7 weeks)</i>		
ART ED/CURRIC 323	Art in Elementary Education	3

ART ED/CURRIC 470 Practicum in Elementary School Art <i>Module 2 (second 7 weeks)</i>	3
ART ED/CURRIC 324 Art in Secondary Education	3
ART ED/CURRIC 493 Practicum in Secondary School Art	3
Spring Semester	
ART ED/CURRIC 423 Student Teaching in Art in Elementary Schools	6
ART ED/CURRIC 424 Student Teaching in Art in Secondary Schools	6

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average, first effective for students admitted into the art education program fall 2016. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major course work.
- 2.75 cumulative grade point average in all upper-level major course work. Art courses numbered 214 and above, excluding ART 236 and ART 338, are considered upper-level courses.
- 2.75 in professional education course work (excluding practicum and student teaching).
- Major Residency. Students must complete a minimum of 15 upper-level studio credits in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 120 total credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course

options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1555).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Identify and explore important eras, developments, movements, and theories in historical and contemporary art practice.
2. Identify and analyze the elements and principles of design in the work of other artists and consistently and effectively employ the elements and principles in their own studio work.
3. Develop technical skill, a personal creative practice, and knowledge of the historical and current practices of at least four separate visual art disciplines, including 2D, 3D, 4D, and graphics areas.
4. Examine best practices (historical and contemporary) in art curriculum planning, instruction and assessment, apply knowledge

to k-12 curriculum development, and effectively teach art to diverse populations in community and school-based settings.

- Meet all School of Education Teacher Education Standards and DPI k-12 art licensure requirements (including child development and learning theories, history of American Education, and the role of art in literacy education).

FOUR-YEAR PLAN

Bachelor of Science: Art Education - Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

ADVISING

ART EDUCATION ADVISING

Prospective off-campus and on-campus art education students will meet with the art education program coordinator Dr. Mary Hoefflerle, 6241 Humanities Building, 455 North Park Street, hoefflerle@wisc.edu. Students considering art education should contact Dr. Hoefflerle as soon as possible. Pre-declaration advising is conducted by the Department of Art and advisors in the School of Education Student Services office, see below.

The undergraduate art program advisors are located at 6241 Humanities Building, 455 North Park Street. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made by calling 608-262-1660.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resource>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu,

(soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Art Education have searched for titles such as Classroom Teacher, Human Resources Manager, Curriculum Specialist, and Camp Director.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements

regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of Become a Teacher (<https://tec.education.wisc.edu/become-a-teacher/>).

A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management

tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.

- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program

and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood, or English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language*

Kindergarten through Grade 12. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.

- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Colorado, Illinois, Minnesota, Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ART STUDIO, CERTIFICATE

The Certificate in Art Studio allows students from across campus, regardless of their major or degree program, to engage in a structured, meaningful art studio experience. **Note: Most art courses do not carry the LAS (L&S) designation.** Students should work closely with their major advisor to see how the certificate requirements can fit into their degree plan.

This certificate was designed for students who may not have professional ambitions in the arts, but still have an interest in a special discipline and want to develop their talents; previous coursework in art is not required.

The program provides a course of study in four focus areas: 2D, 3D, 4D, or photography. Students select one of these options and complete the courses required of this area of study.

For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two related electives that allow for the exploration and development of their skills specific to the area of focus.

Students interested in graphic design and typography should consider the Graphic Design Certificate (<https://guide.wisc.edu/undergraduate/>)

education/art/graphic-design-certificate/), also offered through the Department of Art.

The Art Studio certificate may also appeal to individuals who have already completed a bachelor's degree in art, but now want to complete an emphasis in a different discipline; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>). In these instances, the student will work closely with an advisor in the Department of Art to substitute higher-level courses for the foundational studio courses.

HOW TO GET IN

DECLARATION PROCESS

Students intending to complete the Art Studio certificate can find the declaration form on the School of Education's Certificate Programs page. The declaration for this certificate program can be submitted at any time during the academic year.

ELIGIBILITY

Undergraduate students in good academic standing with a cumulative GPA of 2.50 or higher, who are not participating in the Art–B.S., Art Education, or Art–BFA degree programs, may declare this certificate. University Special students who have already completed a bachelor's degree are also eligible to complete this certificate.

REQUIREMENTS

The studio art certificate may be completed by any UW–Madison undergraduate student who is not a declared art major.

Select a course of study in one of four focus areas: 2D, 3D, 4D (time-based), or Photography, and complete the required courses. For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two or three related electives that allow for the exploration and development of their skills.

The certificate requires a minimum total of 17–18 credits, depending on the selected area. A minimum of 12 of these credits must be completed in residence. It is possible to complete the certificate in three semesters, making it a viable option for most students, including transfers.

HISTORICAL CONTEXT OF ART/DESIGN

Students in all certificate focus areas must complete **one** of the following:

Code	Title	Credits
ART 100	Introduction to Art	3
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART HIST 206	Survey of Photography: 1839 to 1989	3-4

FOCUS AREAS

FOCUS ONE: PAINTING, DRAWING, PRINTMAKING

Ideal for the novice artist, as well as for students who want to develop previous skill in the creation of two-dimensional art. Students interested in pursuing this focus area can find more information about painting

(<https://art.wisc.edu/media-disciplines/drawing-painting/>), drawing (<https://art.wisc.edu/media-disciplines/drawing-painting/>) and printmaking (<http://art.wisc.edu/art/academics/media/printmaking/>) on the art department's website.

Painting, Drawing, Printmaking Requirements

Code	Title	Credits
Foundations		
Complete one of the following:		
ART 102	Two-Dimensional Design	3
ART 112	Drawing I	3
ART 212	Drawing Methods & Concepts (preferred)	3
Development		
Complete a minimum of three courses from the list.		
ART 222	Introduction to Painting	4
ART 232	Life Drawing I	4
ART 242	Watercolor I	4
ART 302	Color	4
ART 306	Relief Printmaking	4
ART 307	Making Comics 1	4
ART 312	Intermediate Drawing I	4
ART 316	Lithography	4
ART 322	Intermediate Painting I	4
ART 326	Etching	4
ART 332	Life Drawing II	4
ART 336	Serigraphy	4
ART 342	Watercolor II	4
ART 348	Introduction to Digital Printmaking	4
ART 446	Artists' Books	4
ART 452	Intermediate Painting: New Figuration I	4
ART 506	Advanced Relief Printmaking	4
ART 507	Making Comics 2	4
ART 512	Advanced Drawing I	4
ART 516	Advanced Lithography	3
ART 522	Advanced Painting I	4
ART 526	Advanced Etching/Intaglio	4
ART 532	Advanced Life Drawing I	4
ART 536	Advanced Serigraphy	4
ART 542	Advanced Watercolor I	4
ART 552	Advanced Painting: New Figuration II	4
ART 612	Advanced Drawing II	4
ART 622	Advanced Undergraduate Painting Workshop	3
ART 632	Advanced Life Drawing II	4
ART 636	Computer Augmented Printmaking	4
ART 642	Advanced Watercolor II	4

FOCUS TWO: 3D FORMS

Ideal for the novice artist, as well as for students who want to develop previous skill in the creation of three-dimensional art. Students interested in pursuing this focus area can find more information about ceramics (<https://art.wisc.edu/media-disciplines/3d/>), glass and neon (<https://>

art.wisc.edu/media-disciplines/3d/), metals/metalsmithing (<https://art.wisc.edu/media-disciplines/3d/>), sculpture/installations (<https://art.wisc.edu/media-disciplines/3d/>), and wood (<https://art.wisc.edu/media-disciplines/3d/>) on the art department's website.

3D Forms Requirements

Code	Title	Credits
Foundations		
Complete the following:		
ART 104	Three-Dimensional Design	3
ART 214	Sculpture I	4
Development		
Complete a minimum of two courses from the list.		
ART 224	Ceramics I	4
ART 244	Art Metal I	4
ART 314	Sculpture II	4
ART 324	Ceramics II	4
ART 334	Wood Working	4
ART 343	Metal Fabrication and Welding in Sculpture	4
ART 354	Glassworking	4
ART 409	Digital Fabrication Studio	4
ART 414	Art Foundry	3
ART 454	Neon: Light as Sculpture	4
ART 514	Advanced Sculpture Workshop 1	4
ART 521	Installations and Environments	4
ART 534	Advanced Wood Working	4
ART 544	Advanced Art Metal I	4
ART 554	Advanced Glassworking	4
ART 614	Advanced Sculpture Workshop 2	3-4
ART 624	Advanced Ceramics II	4
ART 644	Advanced Art Metal II	4

FOCUS THREE: 4D-DIGITAL, TIME-BASED, PERFORMATIVE OR SOCIAL PRACTICE

Ideal for the novice artist, as well as for students who want to develop previous skill with new art genres. Students interested in pursuing this focus area can find more information about digital media and animation (<https://art.wisc.edu/media-disciplines/4d/>), (<https://art.wisc.edu/media-disciplines/4d/>) or performance, video, or social practice (<https://art.wisc.edu/media-disciplines/4d/>) on the art department's website.

4D-Digital, Time-based, Performative or Social Practice Requirements

Code	Title	Credits
Foundations		
Complete the following:		
ART 107	Introduction to Digital Forms	3
Development		
Complete minimum of three courses from list.		
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 348	Introduction to Digital Printmaking	4

ART 393	Internships in Art	1
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 511	Art Performance	3-4
ART 518	Artist's Video	4
ART 528	Digital Interactive Studio	4
ART 529	3D Digital Studio II	4
ART 570	Advanced Topics in 4D Art	4
ART 531	Screen Performance	3-4
ART 636	Computer Augmented Printmaking	4
ART 660	Art and Technology	4
INTEGART 310	Interdisciplinary Artist in Residence Studio	1-3

FOCUS FOUR: PHOTOGRAPHY (FILM AND DIGITAL)

Ideal for the novice artist, as well as for students who want to develop previous skill with photography. Students interested in pursuing this focus area can find more information about photography (<https://art.wisc.edu/media-disciplines/printmaking/>) on the art department's website. ART HIST 206 Survey of Photography: 1839 to 1989 is highly recommended as the historical context course.

Photography Requirements

Code	Title	Credits
Foundations		
Complete the following:		
ART 176	Digital Photography for Non-Art Majors	4
Development		
Complete the following:		
ART 376	Photography	4
ART 476	Intermediate Photography	4
ART 576	Advanced Photography	4

PROGRESS AND COMPLETION REQUIREMENTS

A minimum cumulative GPA of 2.5 must be achieved and maintained across all certificate course work in order to remain in, and successfully complete the certificate. All courses required by the certificate must be taken for a grade; none may be taken on a pass/fail, credit/no credit basis or as an auditor.

At least 12 of the required credits must be completed in residence in the UW–Madison Department of Art. Courses taken in a study abroad program sponsored by UW–Madison do not count toward this residency requirement.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged

to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. Correctly identify and explain important eras in historical and contemporary art practice.
2. Develop technical and conceptual skill in studio practice by consistently employing the elements and principles of effective visual art and/or design in their chosen focus area.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

ART, B.S.

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and technically advanced art works, and encourages the sharing of diverse points of view.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art & Artists First-Year Interest Group (FIG), before branching out into one or more specialized areas (<https://art.wisc.edu/media-disciplines/>) such as book arts, ceramics, comics, digital animation, glass and neon, graphic design, painting, performance/video, photography, sculpture, social practices, etc.

Potential Careers for Artists include: animation, ceramics, glassblowing, metal fabrication, graphic and multi-media design, illustration, videography, photography, teaching, and (of course) as a gallery artist. Our graduates also work as community arts organizers, user experience designers, medical imagists, technical assistants for major film companies, jewelry designers and fabricators, book designers, and more.

The department offers five ways to complete a degree:

- The Bachelor of Science in Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/>) degree
- The Bachelor of Science in Art degree with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bs/art-graphic-design-bs/>)
- The Bachelor of Fine Arts (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/>) degree
- The Bachelor of Fine Arts degree with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/art-graphic-design-bfa/>)
- The Bachelor of Science in Art Education (<https://guide.wisc.edu/undergraduate/education/art/art-education-bs/>) degree

The Bachelor of Fine Arts (BFA) degree differs from the B.S.–Art degree by requiring a larger number of studio and aesthetic courses. The BFA degree is often selected by students wishing to develop a refined visual art portfolio in preparation for a career as a professional artist

or designer, and/or for graduate study. Studio art majors begin their undergraduate career in the B.S.–Art program. After completing the foundations and studio breadth coursework, students can declare one of the other art programs, if desired.

The Bachelor of Science in Art Education degree program licenses students to teach in both elementary and secondary schools.

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

The Art–B.S. degree program currently admits on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (<https://education.wisc.edu/admissions-aid/undergraduate-admissions/>) page for eligibility requirements prior to submitting an application.

ENTERING THE SCHOOL OF EDUCATION PROSPECTIVE UW–MADISON APPLICANTS

Prospective applicants to UW–Madison are strongly encouraged to submit a portfolio to the Department of Art for review. Though a portfolio is not required, it does provide the art department an opportunity to make a recommendation on the applicant's behalf to UW–Madison's Office of Admissions and Recruitment. The Office of Admissions and Recruitment makes final determinations regarding the admission status of all applicants. Additional information, including submission guidelines, is available on the How to Apply (<https://art.wisc.edu/undergraduate/undergraduate-application/>) page of the art department's website.

NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and off-campus transfers are admitted directly to the Art–B.S. degree program. Students planning on declaring the Art–B.S.: Graphic Design named option should first declare Art–B.S. The successful completion of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms is required to declare the named option. All other on-campus students interested in becoming Art students must follow the application procedures outlined below.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. BFA candidates cannot transfer directly into the Art–BFA degree program; instead, they will be admitted to campus as if pursuing the Art–B.S. degree program (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the art department advisor prior to coming to campus; call

608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

APPLICATION AND ADMISSION

On-campus students should contact an undergraduate advisor in the Department of Art to discuss their interest in pursuing the Art–B.S. degree program. This meeting is required and can be scheduled using Starfish, (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) or by contacting the Department of Art at 608-262-1660. An application to the Art–B.S. degree program will be completed after this meeting.

CRITERIA FOR ADMISSION

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- If applying for named option in Graphic Design, successful completion of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms.
- Filing of all required paperwork, including professional program application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) and transcripts. Application must be signed by the art department advisor.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"

coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1520).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The bachelor of science (B.S.) degree program in art has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. B.S.–Art majors are required to reach an advanced level in at least one studio discipline.
- *Elective* credits to pursue individual areas of interest, such as a second major or additional studio credits. Many B.S.–Art students complete an additional major from the College of Letters & Science. Some use this major to complement their art preparation (e.g., focusing on written communication for an eventual career in advertising), or a subject that complements their interest in art. Students interested in medical illustration, for example, may wish to take courses in the biological sciences. Others select majors that reflect interests completely unrelated to art.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year

as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods & Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 Three-Dimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENTS

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
Select two additional courses from the following:		8
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	
ART 438	History of Graphic Design and Typography ¹	

¹

If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

MAJOR REQUIREMENTS

The requirements listed here are effective for students admitted to the program effective summer 2016. Students admitted prior to this time can find their major requirements listed in previous editions of the *Undergraduate Catalog* and on their DARS reports.

Complete a minimum of 45 studio credits, including the specific coursework below. No more than 58 studio credits will be counted toward the minimum 120 credits required for the B.S. degree. Thus, if a student

wishes to graduate with the minimum of 120 credits, 62 of these credits must be "non-studio" coursework.

Major residency requirement: Students completing the B.S. degree must complete at least 24 credits of major studio coursework in residence on the UW–Madison campus.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATIONS COURSES

Complete the following:

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Methods & Concepts	3

REQUIRED STUDIO BREADTH COURSES

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in at least one discipline.

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4

ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

Graphics

Select one of the following:

Code	Title	Credits
ART 306	Relief Printmaking	3-4
ART 316	Lithography	4
ART 326	Etching	4
ART 336	Serigraphy	3-4
ART 346	Basic Graphic Design	4
ART 348	Introduction to Digital Printmaking	4
ART 376	Photography	4
ART 446	Artists' Books	4

Art Colloquium

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

Advanced Studio Requirement

Complete a 500-level or 600-level art studio course in at least one discipline. ART 508, ART 608, and ART 699 will **not** fulfill this requirement.

ELECTIVE STUDIO COURSES

Select elective studio courses (<http://guide.wisc.edu/courses/art/>) to reach the minimum of 45 credits.

AREAS OF CONCENTRATION

Although a concentration is not required, students may wish to select a sequence of related courses to develop an area of interest. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are just some of the concentrations (<https://art.wisc.edu/media-disciplines/>) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible..

View as listView as grid

- ART: GRAPHIC DESIGN, B.S. (P. 1567)

ELECTIVE COURSEWORK

B.S.–Art students must complete additional coursework to reach the minimum 120 credits required for the degree. These students must complete a minimum of 62 non-studio credits. Another way of describing this requirement is that only 13 additional studio credits beyond the required 45 credits can count toward the 120 credits. Students interested in completing more than 58 total studio credits may wish to consider the BFA degree program, which requires at least 72 studio credits.

Completing an additional major. Students choosing the B.S.–Art option often also choose to complete an additional major in the College of Letters & Science. Review Academic Policies and Procedures (p. 1520) to find detailed information about declaring an additional L&S major while a student in the School of Education.

Completing two degree programs. Students also occasionally choose a second degree in another campus school or college. For instance, students may choose an Art degree program as well as a science degree program in the College of Agricultural and Life Sciences. See Academic Policies and Procedures (p. 1520) for more detailed information about the requirements and the approvals necessary to be permitted to complete dual degrees. **Important note:** Some campus schools/colleges do not permit dual degrees; at the present time this includes the College of Letters & Science and the College of Engineering. These policies do not permit students to complete, for example, an art degree program and a journalism degree program.

Students interested in additional majors or dual degrees should consult carefully with an advisor in the School of Education Student Services office. Students may be referred to the associate dean for additional consultation and approvals.

GPA AND OTHER GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.5 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 non-studio credits are required for graduation in the Art–B.S. degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course

options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, and in a choice of printmaking, photography, or graphic design media.
5. Demonstrate competency at an advanced level in at least one discipline of student’s choice. (Graphic design named option: Generate advanced level competency in graphic design.)

FOUR-YEAR PLAN

Bachelor of Science in Art: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

At least 62 "non-studio" credits must be taken to complete the B.S. Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

ADVISING AND CAREERS**ADVISING****ART DEPARTMENT ADVISING**

Prospective freshmen and art studio/graphic design certificate students will meet with undergraduate art program advisor Matthew Mauk, artadvising@education.wisc.edu. Students declared in the B.S.–Art or BFA–Art major, as well as potential transfers into art, will meet with an undergraduate art program advisor; email artadvising@education.wisc.edu. Advisors are located at 6241 Humanities Building, 455 North Park Street.

Current students can schedule an appointment with Matthew online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made via email or, by calling 608-262-1660. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring

in Art have searched for titles such as Art Conservator, Art Therapist, Antiques Dealer, Cinematographer, Graphic Designer, Interior Designer, Museum Curator, Photographer, Photojournalist, and Video Editor.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ACCREDITATION

Accreditation

National Association of Schools of Art and Design (<https://nasad.arts-accredit.org/>)

Accreditation status: Accredited. Next accreditation review: 2025-2026.

ART: GRAPHIC DESIGN, B.S.

REQUIREMENTS

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provides professional preparation, exhibition experience, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the B.S. Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/#requirementstext>) degree requirements.

AESTHETICS REQUIREMENTS - GRAPHIC DESIGN OPTION

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
ART 438	History of Graphic Design and Typography	3
Select one additional courses from the following:		4
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	

MAJOR REQUIREMENTS - GRAPHIC DESIGN OPTION

Complete a minimum of 45 studio credits, including the specific coursework below. No more than 58 studio credits will be counted toward the minimum 120 credits required for the B.S. degree. Thus, if a student wishes to graduate with the minimum of 120 credits, 62 of these credits must be "non-studio" coursework.

Major residency requirement: Students completing the B.S. degree must complete at least 24 credits of major studio coursework in residence on the UW–Madison campus. All graphic design coursework must be completed in residence.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATION COURSES - GRAPHIC DESIGN OPTION

Complete the following:

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Methods & Concepts	3

REQUIRED STUDIO BREADTH COURSES - GRAPHIC DESIGN OPTION

Complete one course in each of the Graphic Design, 2D, 3D, and 4D areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in graphic design.

Graphic Design

Code	Title	Credits
ART 346	Basic Graphic Design	4

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4

VISITING ARTIST LECTURE SERIES - GRAPHIC DESIGN OPTION

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

ADDITIONAL STUDIOS - GRAPHIC DESIGN OPTION

Complete 12 Graphic Design elective credits from the following list, to include at least one 500 or 600 level course.

Code	Title	Credits
ART 458	Graphic Design for Branding and Identity	4
ART 463	Information Graphics	4
ART 465	Graphic Design for Packaging	4
ART 467	Graphic Design for Posters	4

ART 525	Advanced Typography	4
ART 546	Graphic Design for Publications	4
ART 556	Graphic Design for Interactive Media	4
ART 558	Product Development for Graphic Design	4
ART 563	Graphic Design for Games	4
ART 565	Typeface Design	4
ART 568	Motion Typography	4
ART 575	User Experience for Graphic Design	4
ART 656	Design Portfolio and Professional Practice	4
ART 663	Graphic Design Practicum	2

ELECTIVE STUDIO COURSESSelect additional elective studio courses (<http://guide.wisc.edu/courses/art/>) to reach the minimum of 45 credits.**GPA AND OTHER GRADUATION REQUIREMENTS****GRADUATION REQUIREMENTS**

Requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.75 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.75 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in the UW–Madison Art Department. All graphic design coursework must be completed in residence.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 non-studio credits are required for graduation in the Art–B.S. degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

FOUR-YEAR PLAN

Bachelor of Science in Art: Graphic Design Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Total Credits 120

1

At least 62 "non-studio" credits must be taken to complete the B.S. Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

ART, BFA

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and technically advanced art works, and encourages the sharing of diverse points of view.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art & Artists First-Year Interest Group (FIG), before branching out into one or more specialized areas (<https://art.wisc.edu/media-disciplines/>) such as book arts, ceramics, comics, digital animation, glass and neon, graphic design, performance/video, photography, sculpture, social practices, etc.

Potential Careers for Artists include: animation, ceramics, glassblowing, metal fabrication, graphic and multi-media design, illustration, videography, photography, teaching and as a gallery artist. Our graduates also work as community arts organizers, user experience designers, medical imagists, technical assistants for major film companies, jewelry designers and fabricators, book designers, and more.

The department offers five ways to complete a degree:

- The Bachelor of Science in Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/>) degree
- The Bachelor of Science in Art degree with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bs/art-graphic-design-bs/>)

- The Bachelor of Fine Arts (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/>) degree
- The Bachelor of Fine Arts degree with Graphic Design option (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/art-graphic-design-bfa/>)
- The Bachelor of Science in Art Education (<https://guide.wisc.edu/undergraduate/education/art/art-education-bs/>) degree

The Bachelor of Fine Arts (BFA) degree differs from the B.S.–Art degree by requiring a larger number of studio and aesthetic courses. The BFA degree is often selected by students wishing to develop a refined visual art portfolio in preparation for a career as a professional artist or designer, and/or for graduate study. Studio art majors begin their undergraduate career in the B.S.-Art program. After completing the foundations and studio breadth coursework, students can declare one of the other art programs, if desired.

The Bachelor of Science in Art Education degree program licenses students to teach in both elementary and secondary schools.

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students interested in the Art–BFA degree, or Art-BFA with the Graphic Design named option, initially enroll in the Art–B.S. degree or Art-B.S. with the Graphic Design named option while completing prerequisite coursework and establishing other criteria for BFA eligibility. A portfolio review is part of the BFA selection process. Students will typically apply to the BFA program in their junior year and must have attained a minimum of junior standing. For the BFA, an application may be submitted during the semester that the required courses will be completed. For the BFA: Graphic Design named option, an application may be submitted during the semester that the required courses will be completed, with the exception of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms, which must be successfully completed.

APPLICATION AND ADMISSION

New freshmen and off-campus transfers are admitted directly to the Art–B.S. degree program and receive an ART classification. All art degree programs currently admit on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (<https://education.wisc.edu/admissions-aid/undergraduate-admissions/>) page for updates to eligibility requirements prior to submitting an application.

APPLICATION PROCEDURES

PROSPECTIVE UW–MADISON APPLICANTS

Prospective applicants to UW–Madison are strongly encouraged to submit a portfolio to the Department of Art for review. Though a portfolio is not required, it does provide the art department an opportunity to make a recommendation on the applicant's behalf to UW–Madison's Office of Admissions and Recruitment. The Office of Admissions and Recruitment makes final determinations regarding the admission status of

all applicants. Additional information, including submission guidelines, is available on the How to Apply (<https://art.wisc.edu/undergraduate/undergraduate-application/>) page of the art department's website.

CURRENT UW–MADISON STUDENTS

On-campus students interested in pursuing the BFA must first apply to the Art–B.S. degree program. A meeting with an undergraduate advisor in the Department of Art is required, and can be scheduled using Starfish, (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) or by contacting the Department of Art at 608-262-1660. Upon successful completion of the BFA portfolio review (see details below), students will complete an application signed by an undergraduate advisor in the Department of Art to move into the BFA program.

TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Note that off-campus transfer students will be held to the UW–Madison admission GPA requirements. BFA candidates cannot transfer directly into the BFA program; instead, they will be admitted to campus as if pursuing a B.S.–Art degree (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the Department of Art advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

CRITERIA FOR ADMISSION

- Previous Art–B.S. or Art-B.S. Graphic Design named option degree program status.

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- For the BFA degree and the BFA degree with the Graphic Design named option, successful completion or concurrent enrollment in the following courses:

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART 212	Drawing Methods & Concepts	3

One course from each of the following. See Requirements section for course options:

2D Studio

3D Studio

4D Studio

Graphics

- For the Graphic Design named option, must have successfully completed ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms.
- Minimum 3.0 Art studio course GPA.
- Portfolio review.
 - The portfolio must be submitted only after all prerequisite coursework has been completed or during the semester the courses will be completed. The portfolio must contain images of work completed in college art courses. Specific portfolio requirements will be announced prior to scheduled reviews, held near the end of the fall and/or spring semesters. Students not accepted into the BFA program will be encouraged to continue in the B.S.–Art program and will be allowed to present their portfolio for review one additional time.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1520).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Fine Arts (BFA) degree program in art has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. BFA students are required to reach an advanced level in two studio disciplines.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art Foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods & Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 Three-Dimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENTS

The BFA programs require a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Liberal studies coursework in fine arts and literature can also count as aesthetics electives. Additional courses may be approved by the art department advisor.

REQUIRED AESTHETICS COURSES

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
Select two additional courses from the following:		8
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	
ART 438	History of Graphic Design and Typography ¹	

¹

If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

AESTHETICS ELECTIVES

Select from the following to complete the required 18 credits. Liberal studies coursework in fine arts and literature can also double count as aesthetics electives.

MAJOR REQUIREMENTS

The requirements listed here are effective for students admitted to the Art or BFA program effective summer, 2016. Students admitted prior to this time can find their major requirements listed in previous editions of the *Undergraduate Catalog* and on their DARS reports.

Bachelor of Fine Arts (BFA) Program: Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 total credits. Admission to the BFA program requires the completion of (or concurrent enrollment in) ART 102, ART 104, ART 107, ART 108, ART 208, ART 212, and one course in each of the 2D, 3D, 4D and graphics areas. Students must have a 3.0 GPA in their studio coursework to be considered for the BFA program and have attained a minimum of sophomore standing. Successful participation in a portfolio review is also part of the selection process. Application may be made during the semester that the required courses will be completed. See How to Get In (p. 1570) for details about the application process.

Major residency requirement. The BFA program requires that at least 36 credits of major studio coursework be completed in residence at UW–Madison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATIONS COURSES

Complete the following:

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Methods & Concepts	3

REQUIRED STUDIO BREADTH COURSES

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in at least two disciplines. BFA candidates are required to participate in an exhibit and concurrently enroll in a capstone course.

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

Graphics

Select one of the following:

Code	Title	Credits
ART 306	Relief Printmaking	3-4
ART 316	Lithography	4
ART 326	Etching	4
ART 336	Serigraphy	3-4
ART 346	Basic Graphic Design	4
ART 348	Introduction to Digital Printmaking	4
ART 376	Photography	4
ART 446	Artists' Books	4

Art Colloquium

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

Advanced Studio Requirement

Complete a 500-level or 600-level Art studio course in two disciplines.

ART 508, ART 608, and ART 699 will **not** fulfill this requirement.

Exhibit Participation

BFA students must participate at least once in the department-sponsored exhibit, held in the spring semester. Requires concurrent enrollment in the professional practices/capstone course.

Professional Practices/Capstone Course

BFA students must enroll in this course during the required semester of participation in the department-sponsored exhibit. Currently, offered as ART 448 section 10; a unique course number will be forthcoming.

ELECTIVE STUDIO COURSES

Select elective studio courses (<http://guide.wisc.edu/courses/art/>) to reach the minimum of 72 credits.

AREAS OF CONCENTRATION

Although a specific emphasis is not required, students may wish to develop an area of interest within the requirements of the BFA program. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are some of the available tracks (<https://art.wisc.edu/media-disciplines/>) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible.

View as listView as grid

- ART: GRAPHIC DESIGN, BFA (P. 1578)

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 Bascom Course and ART 338 Service Learning in Art).
- Major Residency: Students must complete at least 36 major credits while enrolled in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits are required for graduation in the Art–BFA degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, printmaking, photography, or graphic design media.
5. Demonstrate competency at an advanced level in at least two disciplines of student's choice. (Graphic design named options: one of the two disciplines must be in graphic design.)

FOUR-YEAR PLAN

Bachelor of Fine Arts: Art - Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely

revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

ADVISING AND CAREERS

ADVISING

ART DEPARTMENT ADVISING

Prospective freshmen and art studio/graphic design certificate students will meet with undergraduate art program advisor Matthew Mauk, artadvising@education.wisc.edu. Students declared in the B.S.–Art or BFA–Art major, as well as potential transfers into art, will meet with an undergraduate art program advisor; email artadvising@education.wisc.edu. Advisors are located at 6241 Humanities Building, 455 North Park Street.

Current students can schedule an appointment with Matthew online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made via email or, by calling 608-262-1660. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. BFA students have searched for titles such as Art Conservator, Art Therapist, Antiques Dealer, Cinematographer, Graphic Designer, Interior Designer, Museum Curator, Photographer, Photojournalist, and Video Editor.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ACCREDITATION

ACCREDITATION

National Association of Schools of Art and Design (<https://nasad.arts-accredit.org/>)

Accreditation status: Accredited. Next accreditation review: 2025-2026.

ART: GRAPHIC DESIGN, BFA

REQUIREMENTS

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provide professional preparation, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a

changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the BFA - Art (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/#requirementstext>) degree requirements.

AESTHETICS REQUIREMENTS - GRAPHIC DESIGN OPTION

The BFA Graphic Design option program requires a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Additional aesthetics courses may be approved by the art department advisor.

REQUIRED AESTHETICS COURSES

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
ART 438	History of Graphic Design and Typography	3
Select one additional courses from the following:		
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	4
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	4
ART HIST 205	Global Arts	4

AESTHETICS ELECTIVES

Select from the following to complete the required 18 credits. Liberal studies coursework in fine arts and literature can also double count as aesthetics electives.

Elective Courses

Code	Title	Credits
AFRICAN/ FOLKLORE 210	The African Storyteller	3

MAJOR REQUIREMENTS - GRAPHIC DESIGN OPTION

Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 credits. At least 36 credits of major studio coursework be completed in residence at UW–Madison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATION COURSES - GRAPHIC DESIGN OPTION

Code	Title	Credits
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Methods & Concepts	3

REQUIRED STUDIO BREADTH COURSES - GRAPHIC DESIGN OPTION

Complete one course in each of the Graphic Design, 2D, 3D, and 4D areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in graphic design and also in another discipline.

Graphic Design

Code	Title	Credits
ART 346	Basic Graphic Design	4

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4
ART 454	Neon: Light as Sculpture	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

Visiting Artist Lecture Series _ Graphic Design Option

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

Additional Studios - Graphic Design Option

Complete at least 20 studio credits of graphic design coursework, to include at least one 500 or 600 level course, from the following list:

Code	Title	Credits
ART 458	Graphic Design for Branding and Identity	4
ART 463	Information Graphics	4
ART 465	Graphic Design for Packaging	4
ART 467	Graphic Design for Posters	4
ART 525	Advanced Typography	4
ART 546	Graphic Design for Publications	4
ART 556	Graphic Design for Interactive Media	4
ART 558	Product Development for Graphic Design	4
ART 563	Graphic Design for Games	4
ART 565	Typeface Design	4
ART 568	Motion Typography	4
ART 575	User Experience for Graphic Design	4
ART 656	Design Portfolio and Professional Practice	4
ART 663	Graphic Design Practicum	2

ADVANCED LEVEL COURSE IN A SECOND DISCIPLINE

BFA-Art Graphic Design option students must plan for and complete an advanced-level (500-600) studio course in a secondary discipline of their choice. Common selections are in digital media, drawing/painting, video, glass, printmaking, and photography.

ELECTIVE STUDIO COURSES

Select additional elective studio courses (<http://guide.wisc.edu/courses/art/>) to reach the minimum of 72 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 36 credits of major coursework in the UW-Madison Art Department. All graphic design coursework must be completed in residence.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits must be completed to earn the BFA degree.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

FOUR-YEAR PLAN

Bachelor of Fine Arts: Art - Graphic Design Named Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting

your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

GRAPHIC DESIGN, CERTIFICATE

The Graphic Design Certificate allows students from across campus, regardless of their major or degree program, to engage in a meaningful, rigorous sequence of coursework introducing them to the field of graphic design. Previous college coursework or job experience in art and design is very beneficial, but not required.

An inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic designers function as the “fusion” between art, business, engineering, research, and science fields.

Students intending to pursue a **career in graphic design** should instead select the Graphic Design named option in either the BS-Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/#text>) or Art BFA (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/>) degree program. Contact an advisor in the Art Department to explore the major.

Students completing a degree within the College of Letters & Science should be aware that none of the courses within the Graphic Design certificate count as LAS credits (L&S). All students should work with their primary academic advisors to assess if the certificate will work within their academic plan.

Due to the required sequencing of courses, a minimum of four regular semesters are usually necessary to complete the certificate; please plan accordingly.

HOW TO GET IN

DECLARATION PROCESS

Students intending to complete the Graphic Design certificate can find the declaration form on the School of Education's Certificate Programs page. The declaration for this certificate program can be submitted at any time during the academic year.

ELIGIBILITY

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, and who have completed either ART 102 Two-Dimensional Design or ART 107 Introduction to Digital Forms with a grade of B or higher, may declare this certificate. University Special students are also eligible to complete this certificate if they started at UW-Madison and graduated before completing the requirements.

Students participating in the Art-B.S., Art Education, or Art-BFA degree programs may not declare this certificate. Auditors are also not eligible.

REQUIREMENTS

The Graphic Design Certificate requires a minimum of 18 credits as distributed below. At least 12 credits must be completed in residence

in the Art Department. Study abroad credits do not count toward the residency requirement.

Completion of the certificate requires a 2.75 grade point average across all certificate coursework.

Code	Title	Credits
To declare the certificate, complete either course with a grade of B or better		
ART 102	Two-Dimensional Design (preferred)	3
ART 107	Introduction to Digital Forms	3
After certificate declaration, complete both courses		
ART 346	Basic Graphic Design	4
ART 438	History of Graphic Design and Typography	3
After completing 346 and 438, complete at least 8 additional credits from the following		8
ART 458	Graphic Design for Branding and Identity	
ART 463	Information Graphics	
ART 465	Graphic Design for Packaging	
ART 467	Graphic Design for Posters	
ART 525	Advanced Typography	
ART 546	Graphic Design for Publications	
ART 556	Graphic Design for Interactive Media	
ART 558	Product Development for Graphic Design	
ART 563	Graphic Design for Games	
ART 565	Typeface Design	
ART 568	Motion Typography	
ART 575	User Experience for Graphic Design	
ART 663	Graphic Design Practicum	

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

1. Correctly recognize and identify important eras, developments, movements, and theories in historical and contemporary design practice.
2. Recognize, develop and consistently employ the elements and principles of effective graphic design and typography in their own studio work, and will recognize it in the work of other artists.

3. Demonstrate technical and conceptual proficiency and will apply critical thinking skills in order to contextualize their practice in the contemporary design arena.
4. Understand the steps, tools, and skills necessary for participating in professional activities pertaining to graphic design and typography.
5. Develop a strong work ethic driven by both logical and inventive working process.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (<https://art.wisc.edu/>).

CURRICULUM AND INSTRUCTION

The Department of Curriculum and Instruction is one of the premier research and teaching departments devoted to understanding the complex world of teaching, learning, curriculum, and policy. Faculty pursue a diverse array of research combining experience in schools with expertise drawn from a range of disciplinary fields. This world-class research is the foundation of its work preparing future teachers and the next generation of educational researchers.

Undergraduate degree programs offered by the department include Elementary Education (p. 1609) and Communication Sciences and Disorders (p. 1601). Students admitted to Elementary Education can pursue one of five dynamic certification options:

- **Kindergarten through Ninth Grade** - Students completing this core program option will be certified to teach general education at the grade levels of K-9 and will also be eligible to teach in a 4K classroom.
- English as a Second Language (ESL) K-12 (p. 1632) **and** Kindergarten through Ninth Grade (p. 1619) - A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) **and** English as a Second Language in grades K-12.
- Early Childhood Education (ECE) (p. 1607) **and** Kindergarten through Ninth Grade (p. 1619) - A minor in Early Childhood can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) **and** in Early Childhood Education (approximately birth through age 8).
- Kindergarten through Ninth Grade (p. 1619), **and** Early Childhood Education (p. 1607), **and** English as a Second Language K-12 (p. 1632) - Students may opt to complete both the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas: general education in grades K-9 (including eligibility for 4K), Early Childhood Education, and English as a Second Language in grades K-12.
- Kindergarten through Ninth Grade and Special Education K-12 (p. 1624) (**Dual Certification & Major**) - Students completing this option successfully are double majors in Elementary Education and Special Education. Students are certified in general education at the grade levels of K-9 (including eligibility for 4K), and Special Education in grades K-12.

Two new certificate programs, Arts and Teaching (p. 1586) and Preparing to Teach Abroad (p. 1722), have recently been developed and may be completed by undergraduates across the campus.

DEGREES/MAJORS/CERTIFICATES

Undergraduate programs are offered in the areas listed below. Upon successful completion of a program leading to certification, candidates are certified in their respective subject and grade level and become eligible for a Wisconsin teaching license obtained through the Wisconsin Department of Public Instruction.

Note: Students at UW–Madison become certified to teach secondary **English, Mathematics, Science and Social Studies** only through graduate-level coursework, not as undergraduates. Information about the Master's degree program is available at uwteach.org (<https://uwteach.education.wisc.edu/>) and the Curriculum and Instruction website. (<https://ci.education.wisc.edu>)

The **World Language Education Program** (Chinese, French, German, Italian, Japanese, Latin, Portuguese and Spanish) was suspended in the fall of 2020 and will be discontinued at the undergraduate level. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages.

- Arts and Teaching, Certificate (p. 1586)
- Biology, Minor (p. 1587)
- Chemistry, Minor (p. 1589)
- Chinese, BSE (p. 1590)
- Communication Sciences and Disorders, BSE (p. 1601)
- Early Childhood Education, Minor (p. 1607)
- Earth Science, Minor (p. 1608)
- Economics, Minor (p. 1608)
- Elementary Education, BSE (p. 1609)
- English as a Second Language, Minor (p. 1632)
- English Language Arts, Minor (p. 1632)
- English, Minor (p. 1634)
- French, BSE (p. 1635)
- French, SED Minor (p. 1647)
- Game Design, Certificate (p. 1648)
- Geography, Minor (p. 1649)
- German, BSE (p. 1651)
- German, SED Minor (p. 1663)
- History, Minor (p. 1664)
- Italian, BSE (p. 1668)
- Italian, SED Minor (p. 1679)
- Japanese, BSE (p. 1680)
- Latin, BSE (p. 1692)

- Sociology, Minor (p. 1733)
- Spanish, BSE (p. 1736)
- Spanish, SED Minor (p. 1747)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Curriculum and Instruction can be found on the department's website. (<http://ci.education.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ARTS AND TEACHING, CERTIFICATE

The Certificate in Arts and Teaching is a great opportunity for undergraduate art-makers from all disciplines to incorporate teaching into their professional practice. The teaching artist is a valued professional in a range of learning settings from museums to theatre companies to providing support for school-based arts programs. We are excited to offer undergraduates from across campus the opportunity to learn about theories of teaching and learning, to work alongside future classroom teachers and other arts practitioners, and to get the opportunity to try out teaching artist work in a community-based learning setting.

The program includes two required courses, CURRIC 328 Arts Integration for Teaching and Learning and CURRIC 329 Teaching Artist Practicum, and three electives offering a range of experiences in introductory education and arts practice courses. This program is for all student-artists, those who are majoring in the arts and those who practice their art form in their lives outside of the classroom. While you will not earn a teaching license to teach art in schools, the completion of this certificate will likely make you more competitive for jobs that require teaching experience in the arts, including afterschool programs, museum education, non-profit organizations, and private arts studios.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Arts and Teaching. Students should meet with the certificate advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the declaration form located on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page.

REQUIREMENTS

COURSE REQUIREMENTS

The Certificate in Arts and Teaching requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Students must complete two required courses, CURRIC 328 and CURRIC 329, one course in Foundations of Teaching and Learning, and two courses in the Arts. Students are encouraged to take Arts courses that will broaden their artistic practice.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

REQUIRED COURSES

Code	Title	Credits
CURRIC 328	Arts Integration for Teaching and Learning	3
CURRIC 329	Teaching Artist Practicum	3

FOUNDATIONS OF TEACHING AND LEARNING

Select 3 credits from the following:

Code	Title	Credits
CURRIC 209	Digital Media and Literacy	3
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
CURRIC 331	Taking Education Outside of School	3
CURRIC 364	Introduction to Education	3
ED PSYCH 301	How People Learn	3
ED PSYCH 320	Human Development in Infancy and Childhood	2-3
ED POL 200	Race, Ethnicity, and Inequality in American Education	3
ED POL 300	School and Society	3
ED POL 450	Rethinking "After-School" Education	3

COURSES IN THE ARTS

Select 6 credits from the following:

Code	Title	Credits
ART 100	Introduction to Art	3
ART 102	Two-Dimensional Design	3
ART 104	Three-Dimensional Design	3
ART 107	Introduction to Digital Forms	3
ART 108	Foundations of Contemporary Art	3
ART 112	Drawing I	3
ART 176	Digital Photography for Non-Art Majors	4
ART 208	Current Directions in Art	3
ART 212	Drawing Methods & Concepts	3
ART 214	Sculpture I	4
ART 222	Introduction to Painting	3-4
ART 224	Ceramics I	4
ART/DS 226	Textile Design: Off-Loom Construction	3

ART/DS 229	Textile Design: Weaving I	3
ART 232	Life Drawing I	4
ART 236	Bascom Course	3
ART 242	Watercolor I	3-4
ART 244	Art Metal I	3-4
ART 302	Color	4
ART 306	Relief Printmaking	3-4
ART 307	Making Comics 1	4
ART 309	Digital Art and Code	4
ART 312	Intermediate Drawing I	3-4
ART 314	Sculpture II	4
ART 316	Lithography	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 322	Intermediate Painting I	4
ART 324	Ceramics II	4
ART 326	Etching	4
ART 332	Life Drawing II	4
ART 334	Wood Working	3-4
ART 336	Serigraphy	3-4
ART 338	Service Learning in Art	2
ART/DANCE 341	Sound Design for the Performing and Visual Arts	3
ART 342	Watercolor II	4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 346	Basic Graphic Design	4
ART 348	Introduction to Digital Printmaking	4
ART 354	Glassworking	4
ART 356	Coding for Graphic Design	4
ART/THEATRE 366	Stage Lighting I	3-4
ART/THEATRE 372	Set Design I	3
ART 376	Photography	3-4
ART 393	Internships in Art	1
ART ED 321	Introduction to Teaching Art	2
ART ED/CURRIC 322	Information Design for Visual Learning	3
ART ED/CURRIC 323	Art in Elementary Education	3
ART ED/CURRIC 324	Art in Secondary Education	3
ART ED 326	Design Education	3
DANCE 156	Movement as Material Through Improvisation	2
DANCE 131	Somatic Theory and Practices	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 231	Introduction to Dance/Movement Therapy	2
DS 341	Design Thinking for Transformation	3
M H R/ INTEGART 632	Introduction to Arts Entrepreneurship	3
M H R/ INTEGART 636	Entrepreneurship in Arts & Cultural Organizations	3
MUSIC 151	Basic Concepts of Music Theory	3
MUSIC 240	Style, Sound and Society	3

MUSIC 497	Special Topics in Music	1-3
CURRIC/SLAVIC/ THEATRE 362	Drama for Teaching and Learning	3
THEATRE 150	Acting I: Introduction to Acting	3
THEATRE 200	Acting Skills for Life	2
THEATRE 219	Undergraduate Topics in Theatre and Drama	1-3
THEATRE 260	Producing Theatre	3
THEATRE 357	Introduction to Theatre for Cultural and Social Awareness	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Gain understanding of the theories of teaching and learning that guide informal learning environments
2. Experience a breadth of artistic practice, including those outside a student's primary artistic discipline
3. Develop a framework for arts teaching in informal learning environments
4. Create an arts program for an informal learning environment that integrates theories of teaching and learning with disciplinary arts practice

BIOLOGY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with a biology undergraduate advisor (<http://biologymajor.wisc.edu/advising/>) to discuss course selection and other issues related to this field of study. The Biology Major website (<http://biologymajor.wisc.edu/>) is also a good resource, providing information about areas of study within biology and upcoming biology-related activities on campus. Biology is offered as a major in both the College of Letters & Science and the College of Agricultural and Life Sciences.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The biology minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all biology minor coursework taken on the UW–Madison campus. Biocore sequence coursework may also be used to meet these requirements; consult with an advisor in Education Student Services.

Discipline-related course work is also required, but not calculated into the minor credits or gpa.

REQUIRED DISCIPLINE-RELATED COURSES

Code	Title	Credits
Select a minimum of 6 credits in Mathematics and/or Statistics, college level, excluding MATH 130–MATH 132		
Select one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	

MINOR REQUIREMENTS

INTRODUCTORY BIOLOGY. SELECT ONE OF THE FOLLOWING OPTIONS:

Code	Title	Credits
Option 1: ¹		
BIOLOGY/ ZOOLOGY 101	Animal Biology	3
BIOLOGY/ ZOOLOGY 102	Animal Biology Laboratory	2
BIOLOGY/ BOTANY 130	General Botany	5
Option 2:		
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5
BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology	5

1

Students earning Advanced Placement (AP) or International Baccalaureate (IB) Biology scores of 4 or above are given credit for BIOLOGY/BOTANY/ZOOLOGY 151 at UW–Madison. This course fulfills the entire 151–152 sequence. Students taking BIOLOGY/BOTANY/ZOOLOGY 151 coursework at UW–Madison or transfer it from another campus must complete both BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152 to complete the 151–152 sequence.

GENETICS

Code	Title	Credits
GENETICS 466	Principles of Genetics	3

ELECTIVES

Complete biology elective coursework from the approved lists to reach a minimum of 24 credits. The courses must be numbered 300 and above and include at least one course from two of the following three areas: (1) Ecology, Evolution, Genetics, (2) Cell and Molecular Biology, and (3) Physiology. Additional courses may, with the consent of an advisor, be selected to meet the elective requirements.

Area 1: Ecology/Evolution/Genetics

Code	Title	Credits
AN SCI 610	Quantitative Genetics	3
BOTANY 300	Plant Anatomy ¹	4
BOTANY 305	Plant Morphology and Evolution ¹	4
BOTANY 330	Algae	3
BOTANY/ PL PATH 332	Fungi ¹	4
BOTANY 400	Plant Systematics ¹	4
BOTANY 401	Vascular Flora of Wisconsin ¹	4
BOTANY/ F&W ECOL 402	Dendrology ¹	2
BOTANY 403	Field Collections and Identification ¹	1-4
BOTANY 422	Plant Geography	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin ¹	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology ¹	4
BOTANY 563	Phylogenetic Analysis of Molecular Data	3
ZOOLOGY/ ENTOM 302	Introduction to Entomology ¹	4
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources	2
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources ¹	2-3
ZOOLOGY/ENTOM/ M M & I/PATH- BIO 350	Parasitology	3
ZOOLOGY/ENVIR ST/ F&W ECOL 360	Extinction of Species	3
ZOOLOGY/ANTHRO/ BOTANY 410	Evolutionary Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5

ZOOLOGY/BOTANY/ F&W ECOL 460	General Ecology ¹	4
ZOOLOGY/ ENVIR ST 510	Ecology of Fishes	3
ZOOLOGY/ ENVIR ST 511	Ecology of Fishes Lab ¹	2
ZOOLOGY/AN SCI/ F&W ECOL 520	Ornithology	3
ZOOLOGY/AN SCI/ F&W ECOL 521	Birds of Southern Wisconsin ¹	3
ZOOLOGY 525	Tropical Herpetology	1
MICROBIO 607	Advanced Microbial Genetics	3
ENTOM 331	Taxonomy of Mature Insects ¹	4
ENTOM 468	Studies in Field Entomology ¹	3
GENETICS/ MD GENET 565	Human Genetics	3
GENETICS/ BIOCHEM/ MICROBIO 612	Prokaryotic Molecular Biology	3
GENETICS/ BIOCHEM/ MD GENET 620	Eukaryotic Molecular Biology	3
HORT/ AGRONOMY 501	Principles of Plant Breeding	3
LAND ARC/ ENVIR ST 361	Wetlands Ecology ¹	3
PL PATH 300	Introduction to Plant Pathology ¹	4

1

Courses are lab or field courses.

Area 2: Cell and Molecular Biology

Code	Title	Credits
MICROBIO 303	Biology of Microorganisms	3
MICROBIO 607	Advanced Microbial Genetics	3
M M & I/PATH- BIO 528	Immunology	3
BOTANY 563	Phylogenetic Analysis of Molecular Data	3
PL PATH/ ONCOLOGY 640	General Virology-Multiplication of Viruses	3
GENETICS/ BIOCHEM/ MICROBIO 612	Prokaryotic Molecular Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 570	Cell Biology	3

Area 3: Physiology

Code	Title	Credits
BOTANY 500	Plant Physiology	3-4
ZOOLOGY 611	Comparative and Evolutionary Physiology	3
ZOOLOGY 612	Comparative Physiology Laboratory ¹	2
ANAT&PHY 335	Physiology ¹	5

1

Courses are lab or field courses.

CHEMISTRY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Chemistry is housed in the College of Letters & Science. Students may wish to consult with a chemistry undergraduate advisor (<http://www.chem.wisc.edu/content/undergraduate-advising/>) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

CHEMISTRY MINOR PREREQUISITES

Note that students must complete prerequisite coursework before enrolling in some courses required for the minor. For example, MATH 222 Calculus and Analytic Geometry 2 and PHYSICS 201 General Physics or PHYSICS 207 General Physics must be completed before taking CHEM 561 Physical Chemistry. Prerequisite coursework may be used to meet liberal studies requirements.

CHEMISTRY MINOR REQUIREMENTS

A minimum cumulative grade point average of 2.75 is required, based on all chemistry minor coursework taken on the UW-Madison campus.

Complete at least 22 credits, including the following:

Code	Title	Credits
Introductory Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115	Chemical Principles I	

Analytical Chemistry

Select one of the following: 4-5

CHEM 327 Fundamentals of Analytical Science

CHEM 329 Fundamentals of Analytical Science

CHEM 116 Chemical Principles II
& CHEM 115 and Chemical Principles I**Organic Chemistry**

Select one of the following options: 7-8

Option 1:

CHEM 341 Elementary Organic Chemistry

CHEM 342 Elementary Organic Chemistry
Laboratory

BIOCHEM 501 Introduction to Biochemistry

Option 2:

CHEM 343 Organic Chemistry I

CHEM 344 Introductory Organic Chemistry
Laboratory

CHEM 345 Organic Chemistry II

Inorganic Chemistry 4

CHEM 311 Chemistry Across the Periodic Table

Physical Chemistry 3CHEM 561 Physical Chemistry
or CHEM 565 Biophysical Chemistry**Electives**Complete Chemistry electives to total 22 credits¹

1

CHEM 346 Intermediate Organic Chemistry Laboratory is recommended. BIOCHEM 501 Introduction to Biochemistry, CIV ENGR 500 Water Chemistry, CBE 440 Chemical Engineering Materials, CBE 540 Polymer Science and Technology, are also recommended elective options.

CHINESE, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Chinese major, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs

of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admission to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a bachelor of science degree in education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the Chinese BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes

freshmen beginning in the fall of 2019. Contact the School of Education Student Services office for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1592)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education’s Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement

has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in the School of Education Student Services office.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

PREREQUISITE COURSEWORK

Students must be at a fifth semester level of Chinese or demonstrate a proficiency level equivalent to ASIALANG 202 Fourth Semester Chinese in order to complete the major requirements. If not at that level, the following courses should be taken. Prerequisite courses do not count toward major credits. Note: Prior to the fall semester of 2019, the prerequisite courses were listed under the E Asian subject listing.

Code	Title	Credits
ASIALANG 101	First Semester Chinese	4
ASIALANG 102	Second Semester Chinese	4
ASIALANG 201	Third Semester Chinese	4
ASIALANG 202	Fourth Semester Chinese	4

MAJOR REQUIREMENTS

Complete a minimum of 36 credits. At least 15 credits of upper-level major coursework (courses numbered 220 and above) must be completed in residence at UW–Madison to meet the major residency requirement. Directed study coursework may not be applied to the major requirements. Note: Prior to the fall semester of 2019, most of the major coursework was listed under the E Asian subject heading.

Code	Title	Credits
Required Courses		
ASIALANG 301	Fifth Semester Chinese	4
ASIALANG 302	Sixth Semester Chinese	4
ASIALANG 311	First Semester Classical Chinese	3
ASIALANG 378	Chinese Conversation	3
ASIAN 351	Survey of Classical Chinese Literature	3
ASIAN 352	Survey of Modern Chinese Literature	3
HISTORY/ASIAN 103	Introduction to East Asian History: China	3-4
Linguistics (requires advisor permission)		3
Chinese Civilization (requires advisor permission)		3
Select from the following to reach 36 credits:		
ASIALANG 401	Seventh Semester Chinese	3
ASIALANG 402	Eighth Semester Chinese	3
ASIAN 432	Chinese Linguistics II	3

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience

(second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		

CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>

CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework

- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p.).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

Chinese Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your

academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required year long immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in the World Language Program enter UW-Madison having completed at least the first two semesters of the language; this level of proficiency is reflected in the plan.

ADVISING AND CAREERS

CHINESE EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Chinese. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview

skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and Asian Languages and Cultures (<http://alc.wisc.edu/>) department websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been

placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of Become a Teacher (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required

to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management.

Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet

state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood, or English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

COMMUNICATION SCIENCES AND DISORDERS, BSE

OVERVIEW

The major in communication sciences and disorders provides students with opportunities for study in the areas of speech–language pathology, audiology, and the normal aspects of speech, hearing, and language. Most students pursue this major because they hope to work as a licensed and certified clinical speech-language pathologist or audiologist, assisting clients with communication impairments arising from acquired neurological conditions, developmental conditions, genetic conditions, or unknown causes. Professional clinical practice follows completion of a master's degree in speech–language pathology, or a Doctor of Audiology degree. Some students pursue the undergraduate major as a foundation for a research career in speech, language or hearing sciences. Others pursue the major as a preliminary step toward advanced training in other professional fields (e.g., medicine, nursing, special education), or as a liberal arts degree that could lead to a variety of different career paths (speech–language pathology assistant, educational assistant, line therapist).

The major in communication sciences and disorders can be completed through the College of Letters & Science or through the School of Education. Students select one program to follow and should be aware that the two programs differ somewhat in their requirements. Moreover, each program (L&S and Education) has its own general liberal studies requirements. Students should plan to complete many of these general requirements as well as some courses in communication sciences and disorders during their first and second years on this campus.

The department is accredited in speech–language pathology and in audiology by the Council on Academic Accreditation of the American Speech–Language–Hearing Association (ASHA). Therefore, academic courses and clinical practica in the Department of Communication Sciences and Disorders may be applied toward clinical certification by ASHA (speech language pathology or audiology), and toward state licensure.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

The School of Education's Communication Sciences and Disorders program currently accepts students during both fall and spring semesters. Prospective applicants typically begin taking the three-course "gateway course" sequence (detailed below) as sophomores.

ENTERING THE SCHOOL OF EDUCATION

ADMISSION TO THE SCHOOL OF EDUCATION AS A "PRE-PROFESSIONAL" STUDENT

New freshmen and transfer students interested in communication sciences and disorders are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in communication sciences and disorders receive the "pre-professional" classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1603)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates

that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

APPLICATION AND ADMISSION

The communication sciences and disorders degree program currently accepts students during both fall and spring semesters. Requirements and selection criteria may be modified from one application/admission period to the next.

CRITERIA FOR PROGRAM ADMISSION

Eligibility for consideration requires:

- Fifty-four (54) or more transferable semester credits (junior standing) completed by the end of the semester prior to admission. Students can first apply during the semester that they will be completing 54 or more credits.
- A cumulative grade-point average of at least a 2.75 (on a 4.0 scale) based on all college-level coursework attempted (as modified by the Last 60 Credits Rule; see below). Grade-point averages are calculated from both Madison campus coursework and coursework taken at any other colleges or universities.¹
- Completion of the "gateway courses," CS&D 201 Anatomy and Physiology of Speech Production (3 cr), CS&D 202 Normal Aspects of Hearing (3 cr), and CS&D 240 Language Development in Children and Adolescents (3 cr). If any "gateway" courses were taken on another campus, then the first three Communication Sciences and Disorders courses taken at UW–Madison become the "gateway" courses.
- A minimum 3.0 GPA across CS&D 201, CS&D 202, and CS&D 240 the first time these courses are attempted. If any "gateway" course was taken on another campus, students must earn a minimum 3.0 GPA on the first three communication and sciences disorders courses taken at UW–Madison. Note that "gateway" courses may **not** be repeated for the purpose of raising the student's "gateway" course GPA.
- A cumulative GPA of at least a 3.0 on all major coursework completed to date, excluding CS&D 110 Introduction to Communicative Disorders.
- Completed program application (see details below).
- Note: In previous years, applicants to teacher education programs were required to submit scores from one of the following exams: ACT, SAT, Praxis I/PPST, Praxis Core, or GRE. Under emergency rules announced by the Wisconsin Department of Public Instruction, no applicants need to submit scores for any exam as a component of their application to this program. The exam requirement was officially removed by the School of Education on November 15, 2017.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

APPLICATION PROCEDURES

Submit completed program application materials specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page. Official transcripts from all other colleges or universities attended are required. Applications cannot be processed unless a complete academic record is presented for consideration.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total **40 Credits**.

PROGRAM STRUCTURE

The School of Education undergraduate degree provides students with a conceptual background in the field of communication sciences and disorders and includes five categories of coursework:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major* coursework offers in-depth study of foundations for clinical practice.
- *Discipline-related* coursework supports the major coursework.
- *Education* coursework examines many aspects of the educational enterprise, including child development and learning, societal expectations of schools and instruction, and teaching methods.
- *Elective* coursework is taken to meet the minimum of 120 credits required for the degree.

The School of Education's Bachelor of Science degree in Communication Sciences and Disorders is one path toward eventual clinical practice, though a graduate degree is required for licensure. Thus, students must plan on graduate studies if they intend to pursue Wisconsin State licensure. Not all students eligible for admission to the undergraduate degree program can be accepted to the Master's degree program on this campus. Many students obtain their undergraduate degrees from UW–Madison and complete their Master's degree and licensing requirements at another institution.

MAJOR REQUIREMENTS

Complete all the courses listed below. At least 15 credits of upper-level major coursework (courses number 300–699) must be taken in residence on the UW–Madison campus for graduation.

Students must complete the three "gateway" courses—CS&D 201, CS&D 202, and CS&D 240—to be eligible for admission. Prospective applicants typically begin taking the three-course "gateway" sequence as sophomores. A grade point average of 3.0 or better must also be earned across these three courses the first time these courses are attempted.

Code	Title	Credits
CS&D 201	Anatomy and Physiology of Speech Production	3
CS&D 202	Normal Aspects of Hearing	3
CS&D 210	Neural Basis of Communication	3
CS&D 240	Language Development in Children and Adolescents	3
CS&D 303	Speech Acoustics and Perception	3
CS&D 315	Phonetics and Phonological Development	3

CS&D 318	Voice, Craniofacial, and Fluency Disorders	3
CS&D 320	Introduction to Audiology	3
CS&D 371	Pre-Clinical Observation of Children and Adults	3
CS&D 425	Auditory Rehabilitation	3
CS&D 440	Child Language Disorders, Assessment and Intervention	3

DISCIPLINE-RELATED COURSEWORK

The Communication Sciences and Disorders program requires both major and related coursework. Related coursework is mandatory, but not considered part of the major or calculated into the major grade point average. This coursework may be used to satisfy Liberal Studies requirements, if appropriate.

Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.

- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

Code	Title	Credits
Required Course		
RP & SE 300	Individuals with Disabilities	3
Select a statistics course; the following are recommended:		3-4
STAT 301	Introduction to Statistical Methods	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
Humanities		3
Select one of the following:		
ENGL 314	Structure of English	
ENGL 316	English Language Variation in the U.S.	
LINGUIS 101	Human Language	
LINGUIS/ ANTHRO 301	Introduction to Linguistics: Descriptive and Theoretical	
Ethnic Studies		3-4
Select one of the following:		
ANTHRO 104	Cultural Anthropology and Human Diversity	
ASIAN AM 101	Introduction to Asian American Studies	
CHICLA 201	Introduction to Chicana/o and Latina/o Studies	
SOC 134	Sociology of Race & Ethnicity in the United States	

SOC/
ASIAN AM 220 Ethnic Movements in the United States

Science 3-4

Select one of the following:

ANTHRO 105	Principles of Biological Anthropology
PHYSICS 103	General Physics
PHYSICS 109	Physics in the Arts
GEN&WS 103	Gender, Women, Bodies, and Health
BIOLOGY/ ZOOLOGY 101	Animal Biology

EDUCATION COURSEWORK

Code Title Credits
Development 3

Select one of the following (minimum 3 credits):

ED PSYCH 320	Human Development in Infancy and Childhood
ED PSYCH 321	Human Development in Adolescence
PSYCH 460	Child Development

Learning

ED PSYCH 301	How People Learn (minimum 3 credits)	3
--------------	--------------------------------------	---

Educational Policy Studies

ED POL 300	School and Society (minimum 3 credits)	3
------------	--	---

Literacy, including Reading

CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
------------	--	---

Additional Education Coursework 3

Select 3 credits in School of Education electives. Required School of Education courses may not be applied toward this requirement.

ELECTIVE COURSEWORK

Select additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements below are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level (300–699) major coursework
- 2.75 cumulative grade point average in all education coursework
- Major Residency. Degree candidates must complete at least 15 credits of upper-level major coursework (300–699) in residence on the UW–Madison campus.

- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Practicum work is considered part of the 30 credits.
- 40-Credit Rule. Students may not count more than 40 credits from one department within the 120 degree credits needed for graduation. For example, if 42 credits of coursework have been completed from the Department of Communication Sciences and Disorders, the student will need 122 credits to graduate. CS&D 110 does not count toward the 40 credits.
- 120 credits required for graduation.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL INFORMATION REGARDING CERTIFICATION

A Master’s degree in Speech-Language Pathology (Communication Sciences and Disorders) is required to work as a public school speech-language pathologist in Wisconsin, and most states. The Master’s degree prepares graduates to function competently and independently in public school programs, hospitals, rehabilitation centers, birth-to-three programs, or clinics. At UW–Madison the Bachelor of Science degree can be earned in the School of Education and the Master’s degree is earned in the Department of Communication Sciences and Disorders, part of the College of Letters & Science. Student teaching and other professional education courses will be taken while earning the Bachelor’s and Master’s degrees. Not all students who apply for admission can be accepted into the Master’s degree program.

For detailed information about the Master’s program, see the Communication Sciences & Disorders Guide page (<http://guide.wisc.edu/graduate/communication-sciences-disorders/communication-sciences-disorders-ms/>) and the departmental website (<https://csd.wisc.edu/masters/>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Ability to successfully integrate subject knowledge and pedagogy knowledge flexibly in authentic situations through field experiences with secondary students under the supervision of highly qualified, experienced teachers and university supervisors.
2. Students will be prepared for recommendation for initial licensure in the state of Wisconsin and beyond in accordance with state standards.

FOUR-YEAR PLAN

Communication Sciences and Disorders: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

COMMUNICATION SCIENCES AND DISORDERS ADVISING

Students **must** consult with an undergraduate advisor in the Department of Communication Sciences and Disorders (Goodnight Hall, 1975 Willow Drive) as soon as a decision has been made to major in this field. Course sequencing in the major is not flexible—certain courses are requisites

to others, and many courses are offered only once a year. Please visit the department's website (<https://csd.wisc.edu/undergraduate.htm>) for details on advising and advisors.

Students should also consult with advising staff in the School of Education Student Services office, see below. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Communication Sciences and Disorders have searched for titles such as Speech Therapist, Audiologist, Genetic Counselor, Communication Specialist, Children's Hearing Specialist, Health Specialty Teacher, and Behavioral Technician. (Some of these positions may require advanced training or degrees.)

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://>

wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Communication Sciences and Disorders (<https://csd.wisc.edu/directory/>) or Curriculum and Instruction (<http://ci.education.wisc.edu/>) departmental websites.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

EARLY CHILDHOOD EDUCATION, MINOR

Students with a special interest in teaching young children should consider this minor, which leads to certification from birth through grade 3.

The Early Childhood Education (ECE) minor was designed to be completed in tandem with the Elementary Education: Kindergarten through Grade 9 (p. 1619) certification program; only students completing the K-9 option may declare this minor.

HOW TO GET IN

This minor may be completed only by students admitted to the Kindergarten - Grade 9 (p. 1619) named option of Elementary Education (p. 1609).

REQUIREMENTS

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in Early Childhood Education requires the completion of the Elementary Education degree program. The three requirements listed here will also fulfill the 6 credits of electives required for Elementary Education.

Code	Title	Credits
CURRIC 660	Foundations of Early Childhood Education	3
CURRIC 663	Learning Environments for Initial Education Programs	3

Complete 3 credits of Elementary Education K-9 program electives, excluding these two required courses¹ 3

Total Credits 9

1

Not required if completing both Early Childhood and English as a Second Language minors.

EARTH SCIENCE, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

Complete a minimum of 24 credits from the following departments: Astronomy (<http://guide.wisc.edu/courses/astron/>), Atmospheric and Oceanic Sciences (http://guide.wisc.edu/courses/atm_ocn/), Geoscience (<http://guide.wisc.edu/courses/geosci/>), and Geography (<http://guide.wisc.edu/courses/geog/>). Only Geography courses designated as Physical Science may be used toward the minor requirements. At least 10 credits of the 24 credits must be numbered 200 or above. A minimum 2.75 grade point average is required, based on all UW-Madison coursework included in this minor.

ECONOMICS, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Economics is housed in the College of Letters & Science. Students may wish to consult with an economics undergraduate advisor to discuss course selection and other issues related to this field of study. Academic advising (<https://econ.wisc.edu/undergraduate/academic-advising/>) is available in Room 7238 of the Social Science Building. Email: econadvise@ssc.wisc.edu. (econadvise@ssc.wisc.edu)

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The Economics minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all Economics minor coursework taken on the UW-Madison campus.

Students completing the Economics minor must complete at least one semester of calculus. Mathematics coursework may be applied toward the liberal studies requirement.

Code	Title	Credits
Introduction to Microeconomics and Macroeconomics		
Complete one of the following:		4-7
ECON 101 & ECON 102	Principles of Microeconomics and Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
Intermediate Microeconomic Theory		3-4
ECON 301 or ECON 311	Intermediate Microeconomic Theory or Intermediate Microeconomic Theory - Advanced Treatment

Statistics

Select one of the following, or an approved substitute: 3-4

ECON 310	Statistics: Measurement in Economics (preferred)
STAT 301	Introduction to Statistical Methods
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I

Economics Elective

Select one of the following (330 or 464 are preferred): 3-4

ECON 330	Money and Banking
ECON 464	International Trade
ECON 410	Introductory Econometrics
ECON 441	Analytical Public Finance
ECON 448	Human Resources and Economic Growth
ECON 450	Wages and the Labor Market
ECON 467	International Industrial Organizations
ECON 468	Industrial Organization and Imperfect Competition
ECON 475	Economics of Growth
ECON 508	Wealth and Income
ECON 521	Game Theory and Economic Analysis
ECON 522	Law and Economics
ECON/POP HLTH/ PUB AFFR 548	The Economics of Health Care
ECON 664	Issues in International Trade
ECON 666	Issues in International Finance

If needed, additional Economics coursework to reach the minimum of 24 credits.

ELEMENTARY EDUCATION, BSE

The University of Wisconsin–Madison Elementary Education Program prepares teachers to foster high academic achievement in all students. Schools are places that can both increase equity and perpetuate injustice - ideas our students tackle as they learn to navigate the challenges and joys of teaching. Our graduates become teacher leaders committed to advancing justice through classroom practices, personal interactions, and community engagement. We teach research-based practices that keep teachers growing throughout long careers in education.

Practical, hands-on experience is built into our curriculum. At UW–Madison, our students learn to teach through exhilarating coursework, supervised field experiences at multiple grade levels, community-based experiences, rigorous self-examination, and authentic learning experiences. We are training teachers to recognize, appreciate and value the wide range of gifts diverse students bring to our increasingly multicultural, globally connected and morally complex world.

“My instructors play a huge role in helping me become the person that I am today. They value who I am as a person and a learner, and through their

influences and passion for teaching students of color, I have been inspired to do the same.”

- Mai Ya Her, UW-Madison

Elementary Education

NEW CERTIFICATION OPTIONS!

Effective with fall 2022 program admission, new teacher certification licensing options are being implemented at UW-Madison in response to changes in Wisconsin teacher licensing requirements.

Pending final approval from the Wisconsin Department of Public Instruction, students admitted to Elementary Education can pursue one of five dynamic certification options that lead to related, yet different, career paths. All certification options are designed to be completed in four semesters after program admission. Students are admitted once a year in the summer and begin a four-semester professional sequence in the fall.

- **Kindergarten through Ninth Grade** - Students completing this core program option will be certified to teach general education at the grade levels of K-9 and will also be eligible to teach in a 4K classroom.
- English as a Second Language (ESL) K-12 (p. 1632) **and** Kindergarten through Ninth Grade (p. 1619) - A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) **and** English as a Second Language in grades K-12.
- Early Childhood Education (ECE) (p. 1607) **and** Kindergarten through Ninth Grade (p. 1619) - A minor in Early Childhood can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) **and** in Early Childhood Education (approximately birth through age 8).
- Kindergarten through Ninth Grade (p. 1619), **and** Early Childhood Education (p. 1607), **and** English as a Second Language K-12 (p. 1632) - Students may opt to complete both the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas: general education in grades K-9 (including eligibility for 4K), Early Childhood Education, and English as a Second Language in grades K-12.
- Kindergarten through Ninth Grade and Special Education K-12 (p. 1624) (**Dual Certification & Major**) - Students completing this option successfully are double majors in Elementary Education and Special Education. Students are certified in general education at the grade levels of K-9 (including eligibility for 4K), and Special Education in grades K-12.

THE TEACHER PLEDGE

The School of Education at UW-Madison currently offers a unique financial opportunity for students in the Elementary Education program called The Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>). The school pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, students pledge to work at a Wisconsin PreK-12 school for three to four years after graduation.

MADISON COLLEGE TRANSFER AGREEMENT

Madison College students should also investigate the new transfer agreement (<https://tec.education.wisc.edu/become-a-teacher/uw->

madison-school-of-education-transfer-agreement/) between Madison College and UW-Madison. Students meeting the requirements of this agreement are guaranteed admission to UW-Madison's School of Education and to Elementary Education.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Students are admitted to the program once a year, effective in the summer. Selection is made the previous spring and students begin a four-semester professional sequence in the subsequent fall semester.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW-MADISON STUDENTS

New freshmen and transfer students interested in Elementary Education are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in Elementary Education receive the "pre-professional" classification of PRE.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1610)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu>) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651 or email soeacademicservices@education.wisc.edu.

STUDENTS WITH A PREVIOUS DEGREE

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person, via telephone or online; to schedule, call 608-262-1651 or email soeacademicservices@education.wisc.edu.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

APPLICATION AND ADMISSION

Certification to teach Elementary Education requires that a student be admitted into the professional part of the degree program. Admission into the Elementary Education program occurs once a year, effective for summer following selection.

The Elementary Education program faculty selects candidates based on a variety of criteria. In particular they seek individuals who can demonstrate academic competence, multicultural and interpersonal competence, and reflective practices; the program also purposefully cultivates students' capacities in these domains.

PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission to the professional program, applicants must:

- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Undergraduate Admissions page.
- successfully complete at least 40 transferable college-level credits by the end of the fall semester before application.
- complete RP & SE 300 Individuals with Disabilities by the end of the summer before beginning the professional sequence if applying to the K-9/Special Education Dual Major option.
- While GPA is a factor in the selection process, no minimum is required to apply for program admission. If admitted, students must earn the minimum cumulative GPA for UW-Madison coursework established by the program and the School of Education each semester after admission.

Last 60 Credits Rule

For programs requiring a minimum GPA to apply, two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"

coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

PROGRAM ADMISSION SELECTION CRITERIA

The Elementary Education program admissions procedures are intended to result in an academically qualified student body that is diverse in terms of both academic strengths and life experiences and has a commitment to providing the best possible education to elementary and middle school students. Having students with diverse life experiences, backgrounds and attitudes is critical if faculty are to prepare students to teach in schools that themselves have diverse enrollments. Faculty will accept only those students judged to have the potential to be successful in the academically challenging Elementary Education Program. In making admissions decisions, no factor will outweigh judgment that a particular applicant's credentials, taken as a whole, represent unacceptably high academic risk.

The Admissions Committee will take the following into consideration when making admissions decisions:

Academic Competence

The Mission Statement of the Elementary Education Area points to the role that our graduates have in creating academically rigorous classrooms that lead to high academic achievement in all students. For elementary and middle schools to promote academic achievement, elementary and middle school teachers must have demonstrated high levels of success in core disciplines throughout their university studies. Therefore, program faculty expect that students admitted to the program will have demonstrated high levels of academic preparation.

Multicultural and Interpersonal Competencies

The Elementary Education program's mission is to prepare teachers who are able to promote academic achievement in all elementary-school and middle-school students. This includes those from diverse races, cultures, language backgrounds, family forms, and sexual orientations, as well as those from diverse economic, gender, and ability groups. The program faculty seek prospective teachers who will demonstrate both commitment to this mission and the prospect of contributing to it. The Admissions Committee will therefore examine the materials from each candidate for evidence of such commitment and prospect.

Reflective Competence

To have performed at high academic levels or to have had diverse life experiences is not adequate for admissions purposes unless these are accompanied by evidence that the applicant has been able to reflect on and learn from them. Demonstration of reflective competence is important as it likely contributes to one's interpersonal skills as well as to the qualities such as integrity, social awareness, and cultural sensitiveness that are qualities of a well-rounded human being who will be an excellent elementary or middle school teacher. The ability to reflect on one's life experiences is one factor that will allow the Admissions Committee to look for evidence that our students will be reflective practitioners who evaluate the effects of their assumptions, choices, and actions on others (students, parents, and other professionals in the learning community) and who will actively seek out opportunities to grow professionally.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Teacher Education Center, tec@education.wisc.edu, (tec@education.wisc.edu) about the potential impact of this result on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science,

and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

Students of Elementary Education:

- Are exposed to a broad range of academic disciplines through *liberal studies* course work. The university-wide *General Education* requirements also encourage this breadth of study.
- Examine schools' relationship to society, the development of children and adolescents, and the processes of learning in their *education course work*.
- Study teaching methods and gain experience in schools through supervised field placements during their four-semester *professional sequence*.

- Complete *elective* coursework to reach the minimum of 120 credits required for the degree.

Practicum experiences provide a school-based setting for students to develop their professional and classroom skills. These experiences generally begin a few weeks after the start of the semester and are approximately nine weeks in length. Students will usually spend three half-days at their assigned schools. Concurrent registration in methods courses provide students with an opportunity to learn about, and then apply, teaching techniques in a classroom.

The *full-semester student teaching assignment* is the capstone experience of the professional sequence. Through it students expand upon the activities, responsibilities and expectations encountered during the practicum experiences. Student teachers will function as regular staff members in their assigned schools and also attend a seminar on campus one afternoon each week. Student teachers are required to follow the school day, school calendar, vacation days and policies of the school where they work.

PROGRAM OPTIONS - SELECT ONE

View as listView as grid

- ELEMENTARY EDUCATION: EARLY CHILDHOOD/ ENGLISH AS A SECOND LANGUAGE (P. 1618)
- ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE (P. 1619)
- ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE/SPECIAL EDUCATION KINDERGARTEN - 12TH GRADE DUAL CERTIFICATION (P. 1624)
- ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/CONTENT-FOCUSED MINOR (P. 1626)
- ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ENGLISH AS A SECOND LANGUAGE (P. 1628)
- ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/SPECIAL EDUCATION DUAL CERT (P. 1630)

ELECTIVE COURSEWORK

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS—REQUIRED FOR ALL PROGRAM OPTIONS GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- 2.75 cumulative grade point average in the minor, if required.
- Minimum 120 credits (degree candidates only).
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (<http://guide.wisc.edu/>

[undergraduate/education/curriculum-instruction/elementary-bse/#certificationlicensuretext](#)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Create and implement developmentally appropriate and challenging learning experiences that reflect high expectations for every learner, supporting learners to (1) develop deep understanding of content areas and their connections, and (2) apply understanding in meaningful ways.
2. Select and/or create and sequence individually supportive and challenging learning experiences that reflect knowledge of individual learners, curriculum, pedagogies, and relevance to all learners and their families.
3. Use a variety of teaching strategies, and evidence-based technologies and information resources to engage learners in meaningful learning activities that lead to content knowledge, critical thinking, creativity, innovation, self-evaluation, and self-directed learning. Use evidence to continually evaluate the effectiveness of these practices, and adjust these as needed to improve learner outcomes.
4. Collaborate with others to create supportive, inclusive, linguistically responsive, and safe learning environments that help all learners meet high standards and reach their full potential.
5. Choose, modify, and/or create multiple forms of unbiased formative and summative assessments to measure each learner’s progress toward instructional goals. Use assessment data gathered to respond to each learner’s strengths and needs in relation to short and long-term goals. Reflect on and justify planning decisions and ground one’s justifications in knowledge of learners, development, curriculum, pedagogies, and resources.
6. Use studies completed in science and mathematics, social sciences, the humanities, histories, languages, and the arts to inform and deepen their teaching of content areas and meeting learners’ needs.

FOUR-YEAR PLAN

Refer to the available named options for more information on the four-year plans.

ADVISING AND CAREERS

ELEMENTARY EDUCATION ADVISING

Students not yet admitted to Elementary Education meet with their assigned advisor in the School of Education Student Services office, see below. Students are assigned an additional departmental advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resource>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Elementary Education have searched for titles such as

Classroom Teacher, Human Resources Manager, Curriculum Specialist, and Camp Director.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Curriculum and Instruction can be found on the department's website. (<http://ci.education.wisc.edu/>)

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/

Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function

as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully

complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW–Madison demonstrate their knowledge and skills in five broad standard areas: (1)

learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available

through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of “Endorsed Candidate for Licensure” (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is “posted” by the registrar’s office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas,

Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ELEMENTARY EDUCATION: EARLY CHILDHOOD/ENGLISH AS A SECOND LANGUAGE

REQUIREMENTS

The Early Childhood/English as a Second Language option prepares teachers to work at the preschool and primary levels (approximately birth through age 8). Students are also certified in English as a Second Language at the Early Childhood level. Admitted students begin the four-semester professional sequence in the fall after admission.

The option coursework listed here is one component of the Elementary Education, BSE degree (p. 1611) requirements.

Environmental Education Requirement

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st/) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

FOUR-YEAR PLAN

Elementary Education: Sample Four-Year Plan

Early Childhood/English as a Second Language Option

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE

REQUIREMENTS

The core program in Elementary Education requires 60 credits of professional coursework in addition to other degree requirements. Students are certified to teach kindergarten through grade 9 (K-9) and can also teach at the 4K level.

The option coursework listed here is one component of the Elementary Education, BSE degree (<https://guide.wisc.edu/undergraduate/>)

education/curriculum-instruction/elementary-education-bse/
#requirementstext) requirements.

PROFESSIONAL SEQUENCE

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while the scheduling of other requirements is more flexible; some may be completed prior to beginning the sequence.

May be taken before semester 1 of the professional sequence, including prior to program admission.

²

May be taken any time before semester 4 of the professional sequence, including prior to program admission. Enrollment in either ED POL 300 or ED POL/HISTORY 412 can follow this schedule.

ELECTIVE COURSES

The professional sequence includes 6 credits selected from the following options. Additional courses that expand a student's skill set or further a student's knowledge as a future teacher may also be considered to meet this requirement. Contact the Elementary Education Program Manager for approval prior to enrolling in additional courses. The frequency in which the listed courses are offered can vary based on teaching schedules as well as student interest.

Elective Course Options

Code	Title	Credits
ART ED 321	Introduction to Teaching Art	2
COMP SCI 402	Introducing Computer Science to K-12 Students	2
CURRIC 209	Digital Media and Literacy	3
CURRIC 277	Videogames & Learning	3
CURRIC/MUSIC 300	Introduction to Music Education	2
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
CURRIC/CHICLA 306	Latinx Literacies	3
CURRIC 309	Reading and Writing Across the Content Areas	3
CURRIC 311	Language Acquisition and Use In and Out of Schools	3
CURRIC 314	Becoming Literate in and out of Schools	3
CURRIC 315	Reading and Writing Across the Curriculum in Early Childhood	3
CURRIC 316	ESL/Bilingual Methods	3
CURRIC 317	Dimensions of Literacy	3
CURRIC/CHICLA 321	Chicano/Latino Educational Justice	3
CURRIC 328	Arts Integration for Teaching and Learning	3
CURRIC 331	Taking Education Outside of School	3
CURRIC 338	The Language of Schooling	3
CURRIC 357	Game Design I	3
CURRIC/SLAVIC/ THEATRE 362	Drama for Teaching and Learning	3
CURRIC 368	The Teaching of Reading	3
CURRIC 369	The Teaching of Language Arts	3
CURRIC/C&E SOC/ ENVIR ST 405	Education for Sustainable Communities	3

CURRIC/ THEATRE 525	Theatre in Education	3-4
CURRIC 632	Literature and Literacy	3
CURRIC 660	Foundations of Early Childhood Education	2-3

CURRIC 663	Learning Environments for Initial Education Programs	3
CURRIC/ED POL 677	Education, Health and Sexuality: Global Perspectives and Policies	3
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	3
KINES 325	Group Development and Behavior Management	3
L I S 622	Childrens Literature	3
RP & SE 300	Individuals with Disabilities	3

CONTENT AREA MINOR (OPTIONAL REQUIREMENT)

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, **but students will not receive an additional certification in the subject area.** The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. Choose from the links below for more details about the requirements of each minor.

Minor Options

- Biology (p. 1587)
- Chemistry (p. 1589)
- Earth Science (p. 1608)
- Economics (p. 1608)
- English (p. 1634)
- English Language Arts (p. 1632)
- Geography (p. 1649)
- History (p. 1664)
- Mathematics (p. 1705)
- Mathematics and Science Dual (p. 1703)
- Mathematics Specialized (p. 1705)
- Physics (p. 1706)
- Political Science (p. 1707)
- Psychology (p. 1723)
- Science Specialized (p. 1724)
- Social Studies (p. 1724)
- Sociology (p. 1733)

ADDITIONAL CERTIFICATION OPTIONS IN ELEMENTARY EDUCATION

Students interested in Early Childhood Education (birth-Grade 3) and/or English as a Second Language (grades K-12) may earn certification in these areas along with the completion of the K-9 program. It is also possible to combine K-9 Elementary Education with K-12 Special Education certification through the completion of this named option (p. 1624).

The Early Childhood Education (ECE) certification minor (p. 1607) requires an additional 6 credits of required coursework, CURRIC 660 Foundations of Early Childhood Education, CURRIC 663 Learning Environments for Initial Education Programs, and only 3 credits of K-9

electives for a total of 63 credits. The K-9 professional sequence listed above will be modified to accommodate the ECE minor; see the ECE/K-9 Four Year Plan (p. 1621) for this sequence.

The English as a Second Language (ESL) certification minor (p. 1632) requires an additional 9 credits of required coursework, CURRIC 311 Language Acquisition and Use In and Out of Schools, CURRIC 338 The Language of Schooling, CURRIC 316 ESL/Bilingual Methods, and only 3 credits of K-9 electives for a total of 66 credits. The K-9 professional sequence listed above will be modified to accommodate the ESL minor; see the ESL/K-9 Four Year Plan (p. 1621) for this sequence.

Certification in both Early Childhood Education and English as a Second Language requires the completion of the five additional required ECE and ESL courses listed above. These courses will fulfill the entire K-9 electives requirement for a total of 69 credits. The K-9 professional sequence listed above will be modified to accommodate both minors; see the ECE/ESL/K-9 Four Year Plan (p. 1621) for this sequence.

Certification in both K-9 Elementary Education and K-12 Special Education requires the completion of the Kindergarten - 9th Grade/ Special Education Kindergarten - 12th Grade Dual Certification named option (p. 1624); 70 credits are required.

FOUR-YEAR PLAN

Elementary Education: Sample Four-Year Plans

These sample four-year graduation plans reflect the certification options available to students completing a degree in Elementary Education. A plan is included for:

- Kindergarten - Grade 9 Certification
- Early Childhood Education/Kindergarten - Grade 9 Certifications
- English as a Second Language/Kindergarten - Grade 9 Certifications
- English as a Second Language/Early Childhood Education/Kindergarten - Grade 9 Certifications
- Special Education Kindergarten - Grade 12/Kindergarten - Grade 9 Certifications

Four-year plans are designed to guide your course selection throughout your academic career; they do not establish a contractual agreement. Use them along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE/SPECIAL EDUCATION KINDERGARTEN - 12TH GRADE DUAL CERTIFICATION

REQUIREMENTS

The Elementary Education Kindergarten - 9th Grade/Special Education Kindergarten - 12th Grade option requires 70 credits of professional coursework in addition to other degree requirements. RP & SE 300

Individuals with Disabilities must also be completed prior to beginning the professional sequence.

The option coursework listed here is one component of the Elementary Education, BSE degree (<https://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-education-bse/#requirementstext>) requirements.

INDIVIDUALS WITH DISABILITIES - PREREQUISITE FOR PROGRAM ADMISSION

This course must be completed by the end of the summer of the application year, before beginning the professional course sequence.

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3

PROFESSIONAL SEQUENCE

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while other requirements may be completed prior to beginning the sequence.

Code	Title	Credits
Semester 1 (Fall)		
CURRIC 319	Pedagogical Content Knowledge for Teaching Elementary Mathematics ¹	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities ¹	3
CURRIC/RP & SE 406	Race, Intersectionality, and Equity in Education ¹	3
RP & SE 465	Language and Reading Instruction for Students with Disabilities	3

1

May be taken before semester 1 of the professional sequence, including prior to program admission.

A minimum of 120 credits is still required to complete the degree.

CONTENT AREA MINOR (OPTIONAL REQUIREMENT)

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, but **students will not receive an additional certification in the subject area**. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. For more details about the requirements of each minor, choose from the links below.

A minimum of 120 credits is still required to complete the degree.

ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/CONTENT-FOCUSED MINOR

REQUIREMENTS

The Middle Childhood–Early Adolescence/Content Focused Minor option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12–13). Admitted students begin the four-semester professional sequence in the fall after admission. Students complete a content area minor that may lead to licensing in that subject.

The option coursework listed here is one component of the Elementary Education, BSE degree (p. 1611) requirements.

Environmental Education Requirement

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st/) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Environmental Education courses

Code	Title	Credits
ATM OCN/ SOIL SCI 132	Earth's Water: Natural Science and Human Use	3
BOTANY 100	Survey of Botany	3
BOTANY/ PL PATH 123	Plants, Parasites, and People	3

SOIL SCI 301	General Soil Science	4
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality	3

Fine Arts

Select 6 credits of fine arts coursework. These credits may also be applied toward the liberal studies requirement. See a list of fine arts courses under liberal studies (p. 1528).

Mathematics for Elementary Teachers

Code	Title	Credits
Complete One Group		
<i>Group A</i>		
CURRIC 319	Pedagogical Content Knowledge for Teaching Elementary Mathematics 1	3
CURRIC 320	Pedagogical Content Knowledge for Teaching Elementary Mathematics 2	3
<i>Group B</i>		
MATH 130	Mathematics for Teaching: Numbers and Operations 1	3
MATH 131	Mathematics for Teaching: Geometry and Measurement 1	3
MATH 132	Problem Solving in Algebra, Probability and Statistics 1	3

1

Students with college-level calculus coursework or advanced placement credit should see the exemption rules (<http://www.math.wisc.edu/~lempp/Exemptionsfor130-32.htm>) for this coursework. More detailed information (<http://www.math.wisc.edu/~lempp/educ.html>) about these courses is available on the math department website.

Education Coursework

Code	Title	Credits
Child and Adolescent Development		
3-6		
Select one option:		
ED PSYCH 331	Human Development From Childhood Through Adolescence	
ED PSYCH 320 & ED PSYCH 321	Human Development in Infancy and Childhood and Human Development in Adolescence 1	

Foundations of the Profession

6

Select 6 credits of coursework numbered below 600 from the Educational Policy Studies department.

Recommended courses include:

ED POL 300	School and Society
ED POL/ HISTORY 412	History of American Education
ED POL 500	Topics on Social Issues and Education

1

With permission, PSYCH 460 Child Development (formerly 560) may be substituted for ED PSYCH 320 Human Development in Infancy and Childhood. Students are strongly encouraged to complete this requirement before program admission.

Minor Requirement: Elementary Education

Elementary Education majors choosing the Content Focus option are required to complete a minor area of study that will lead to Wisconsin licensing in English Language Arts, Mathematics, Science or Social Studies. Students can select from the minors listed below or complete the equivalent Letters & Science major in the subject area. For more details about the requirements of each minor, choose from the links below.

- Biology (p. 1587)
- Chemistry (p. 1589)
- Earth Science (p. 1608)
- Economics (p. 1608)
- English (p. 1634)
- English Language Arts (p. 1632)
- Geography (p. 1649)
- History (p. 1664)
- Mathematics (p. 1705)
- Mathematics and Science Dual (p. 1703)
- Mathematics Specialized (p. 1705)
- Physics (p. 1706)
- Political Science (p. 1707)
- Psychology (p. 1723)
- Science Specialized (p. 1724)
- Social Studies (p. 1724)
- Sociology (p. 1733)

Professional Sequence

Admitted students complete a four-semester sequence of professional courses. Effective fall, 2018, admitted students will begin the four-semester professional sequence in the fall after admission instead of the spring semester. Professional sequence coursework listed here may be reordered slightly as part of this transition. Each semester of the sequence must be followed sequentially and taken in consecutive semesters.

Code	Title	Credits
Semester 1

	or CURRIC 454 Student Teaching in the Middle School	

FOUR-YEAR PLAN

Elementary Education: Sample Four-Year Plan

Middle Childhood through Early Adolescence/Content Focused Minor Option

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Note: Courses selected taken to meet liberal studies, Environmental Education and minor requirements may overlap and be applied to more than one requirement. Most minors require 24 credits; the plan reflects this number.

ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ENGLISH AS A SECOND LANGUAGE

REQUIREMENTS

The Middle Childhood–Early Adolescence/English as a Second Language option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12–13). Students are also certified in English as a Second Language at the Middle Childhood–Early Adolescence levels. Admitted students begin the four-semester professional sequence in the fall after admission.

The option coursework listed here is one component of the Elementary Education, BSE degree (p. 1611) requirements.

Environmental Education Requirement

Select one Environmental Studies (http://guide.wisc.edu/courses/envir_st/) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Environmental Education courses

Code	Title	Credits
ATM OCN/	Earth's Water: Natural Science and	3
SOIL SCI 132	Human Use	

1

Students with college-level calculus coursework or advanced placement credit should see the exemption rules (<http://www.math.wisc.edu/~lempp/Exemptionsfor130-32.htm>) for this coursework. More detailed information (<http://www.math.wisc.edu/~lempp/educ.html>) about these courses is available on the math department website.

Educational Arts or Educational Technology

Select one of the following. Additional courses can be considered; consult with an advisor in Education Academic Services.

MC-EA Minor Requirement

Students will complete a minor in English as a Second Language through their professional sequence coursework.

Professional Sequence

Each semester of the sequence must be followed sequentially and taken in consecutive semesters. Effective fall, 2018, admitted students will begin the four-semester professional sequence in the fall after admission instead of the spring semester. Professional sequence coursework listed here may be reordered slightly as part of this transition.

ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/SPECIAL EDUCATION DUAL CERT

REQUIREMENTS

The Middle Childhood–Early Adolescence/Dual Elementary and Special Education option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12–13). Students are certified in both Special Education and Elementary Education at the Middle Childhood–Early Adolescence levels. Admitted students begin the four-semester professional sequence in the fall following admission.

The option coursework listed here is one component of the Elementary/ Special Education, BSE degree (p. 1611) requirements.

RP & SE 300 Individuals with Disabilities—Admission Prerequisite

This course must be completed prior to beginning the professional sequence.

Code	Title	Credits

ENGLISH AS A SECOND LANGUAGE, MINOR

Ms. Yang's Class, by Jerry Jordan

Students with a special interest in teaching English language learners should consider this minor, which leads to certification in English as a Second Language (ESL) from kindergarten through grade 12.

The ESL minor was designed to be completed in tandem with the Elementary Education: Kindergarten through Grade 9 (p. 1619) certification program; only students completing the K-9 option may declare this minor.

HOW TO GET IN

This minor may be completed only by students admitted to the Kindergarten - Grade 9 (p. 1619) named option of Elementary Education (p. 1609).

REQUIREMENTS

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in English as a Second Language, Kindergarten through Grade 12 requires the completion of the Elementary Education degree program. The four requirements listed here will also fulfill the 6 credits of electives required for Elementary Education.

Code	Title	Credits
CURRIC 338	The Language of Schooling	3
CURRIC 311	Language Acquisition and Use In and Out of Schools	3
CURRIC 316	ESL/Bilingual Methods	3
	Complete 3 credits of Elementary Education K-9 program electives, excluding these three required courses. ¹	3
Total Credits		12

¹

Not required if completing both ESL and Early Childhood minors.

ENGLISH LANGUAGE ARTS, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The English Language Arts minor requires the completion of 24 credits to include the requirements of each group of courses. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

The courses listed here will meet the requirements in each category, but additional courses can be considered.

INTRODUCTORY LITERATURE

Complete two introductory literature courses. Courses with a Literature breadth designation from many departments—e.g., Comparative Literature, Classics, African Languages and Literature, English, or Theatre—may be selected to meet this requirement.

INTERNATIONAL LITERATURE

Select one course from the following:

International Literature Courses		
Code	Title	Credits

ENGLISH, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of English is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in English (<https://english.wisc.edu/undergraduate/undergraduate-advising/>) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The English minor requires the completion of 24–30 credits to include the coursework listed below. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

Note: Six credits of introductory literature must be completed prior to enrolling in coursework required for the English minor. Courses with an Literature breadth designation from many departments—e.g., Comparative Literature, Classical & Ancient Near Eastern Studies, African Languages and Literature, or Theatre and Drama—may be selected to meet this requirement. Students are encouraged to explore these options, although introductory English department coursework may also be used in this capacity.

Code	Title	Credits
Required Courses		
Complete the following:		
ENGL 241	Literature and Culture I: to the 18th Century	3
ENGL 242	Literature and Culture II: from the 18th Century to the Present	3
CURRIC 431	Young Adult Literature for Schools (or approved substitute)	3
ENGL 314	Structure of English (students are encouraged to take this course as early as possible)	3
Shakespeare		
Select one of the following:		
ENGL 219	Shakespearean Drama	3
ENGL 220	Shakespearean Drama	3
ENGL 431	Early Works of Shakespeare	3
ENGL 432	Later Works of Shakespeare	3
Elective		
Select one English department elective numbered 204 and above, except for ENGL 207 and ENGL 236 ¹		
Ethnic Literature		
Select one 3-credit intermediate or advanced ethnic literature course ²		
Applied English Linguistics		
Select one of the following (listed in order of preference):		
ENGL 516	English Grammar in Use	3

ENGL 417	History of the English Language
ENGL 316	English Language Variation in the U.S.
ENGL 416	English in Society
ENGL 414	Global Spread of English

Composition for English Teachers

ENGL 304	Composition & Rhetoric In and Beyond the University
----------	---

Or, select a course in consultation with an advisor in the School of Education Student Services office.

Additional Credits

If necessary, select additional coursework to reach the minimum of 24 credits. Introductory literature may be used.

1

Students considering a Letters & Science English major should select a pre-1800, non-Shakespeare literature course.

2

Search for Intermediate/Advanced-level courses that are designated as both Literature and Ethnic Studies courses in the enrollment application.

FRENCH, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the French major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation, and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a bachelor of science degree in education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the French BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not

applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1637)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System's Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- Academic Qualifications: The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- Career Maturity: The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students,

including consideration of his or her own strengths and limitations as a potential teacher.

- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

PREREQUISITE COURSEWORK

Students must be at a fifth semester level of French or demonstrate a proficiency level equivalent to FRENCH 204 to begin the major requirements. If not at that level, the following courses should be taken. Rerequisite courses do not count toward major credits, but may be used to meet the liberal studies requirements.

Code	Title	Credits
FRENCH 101	First Semester French	4
FRENCH 102	Second Semester French	4
FRENCH 203	Third Semester French	4
FRENCH 204	Fourth Semester French	4

MAJOR REQUIREMENTS

Complete a minimum of 36 credits to include at least 24 upper-level/advanced credits (300 and above). The credits of the major required for admission must be taken from this coursework. At least 15 credits of upper-level major coursework must be completed in residence on the UW–Madison campus. Directed study coursework may not be applied to the major requirements.

Code	Title	Credits
FRENCH 271	Introduction to Literary Analysis	3-4
FRENCH 228	Intermediate Language and Culture	3-4

FRENCH 321	Introduction to Medieval, Renaissance, and Early Modern Literature	3
FRENCH 322	Introduction to Literature of Modernity	3
FRENCH 347	Introduction to Medieval, Renaissance, and Early Modern Civilization ¹	3
Two advanced language courses (311 and above) ²		6-8
Two additional courses in literature or civilization numbered at the 400 or 500 level		6-8
FRENCH 590	Advanced Phonetics	3

Additional credits as necessary to complete the 36 credit total or 24 advanced level credits required for the French major. Introductory French coursework (101–204) may be used to meet the 36 credit total, but all other requirements must be met.

¹

FRENCH 348 Modernity Studies may be substituted with permission from the faculty advisor.

²

It is strongly recommended that students complete fourth year language practice (FRENCH 311 and above), FRENCH 590, and FRENCH 347 and also Early Modern Civilization, before the first methods/student teaching semester of the professional program.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite

310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		

CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)

CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework

- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1643).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in the World Language Program enter UW-Madison having completed at least the first four semesters of the language; this level of proficiency is reflected in the plan.

LEARNING OUTCOMES

- In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
- In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
- During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
- In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
- To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

French Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your

Study abroad course availability will influence the selection of UW-Madison courses in the major.

ADVISING AND CAREERS

FRENCH EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach French. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult an undergraduate advisor (<https://frit.wisc.edu/undergraduate-programs-in-french/#academic-advising>) in the French and Italian department regarding course sequencing and other aspects of this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and French and Italian (<http://frit.wisc.edu/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification

candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of Become a Teacher (<https://tec.education.wisc.edu/become-a-teacher/>).

A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW-Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW-Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management

tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.

- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program

and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW–Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9*, *Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language*

Kindergarten through Grade 12. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.

- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

FRENCH, SED MINOR

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the French major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

HOW TO GET IN

Admissions to the French Minor have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

This minor is available only to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in French must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Note: The undergraduate World Language Education Program, including this minor, will be suspended in the fall of 2020. A new, graduate-level program is being developed for teacher certification in these languages.

The last group of undergraduates will be selected in the spring semester of 2020. Admission criteria have been modified from previous years to accommodate all students interested in applying for the final undergraduate cohort, including freshmen beginning in the fall of 2019. See the How to Get In section of the language major for more details about the application process, eligibility criteria and deadlines.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

FRENCH MINOR

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1638) in this subject for an explanation of these requirements and the World Language Education professional sequence.

PREREQUISITE COURSEWORK

These courses, or demonstrated proficiency through fourth semester French, must be completed before beginning the minor requirements.

Code	Title	Credits
FRENCH 101	First Semester French	4
FRENCH 102	Second Semester French	4
FRENCH 203	Third Semester French	4
FRENCH 204	Fourth Semester French	4

MINOR REQUIREMENTS

Complete a minimum of 24 credits. The French minor requires a minimum cumulative grade point average of 2.75, based on all French minor coursework taken on the UW–Madison campus.

Code	Title	Credits
FRENCH 271	Introduction to Literary Analysis	4
FRENCH 321	Introduction to Medieval, Renaissance, and Early Modern Literature	3

FRENCH 322	Introduction to Literature of Modernity	3
FRENCH 347	Introduction to Medieval, Renaissance, and Early Modern Civilization ¹	3
Language course elective numbered 227 or above		3
FRENCH 590	Advanced Phonetics	3
Additional credits to complete 24 credits. ²		

1

FRENCH 348 Modernity Studies may be substituted with permission of faculty advisor.

2

Introductory coursework (prerequisites) may be used to fulfill this requirement, but all other requirements must be met.

ADVISING AND CAREERS

FRENCH EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach French. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult an undergraduate advisor (<https://frit.wisc.edu/undergraduate-programs-in-french/#academic-advising>) in the French and Italian department regarding course sequencing and other aspects of this field of study.

GAME DESIGN, CERTIFICATE

What is game design?

Game Design is the theory and practice of creating games. We focus on games broadly speaking – puzzles, toys, board games, role-playing, sports, or simply not stepping on the cracks in the sidewalk. Making games offers an opportunity for creative expression, for simulating real-world problems, for positive social change, and for communicating complex ideas about systems and processes.

What is the game design certificate?

The Game Design Certificate is an interdisciplinary program that gives students from a wide variety of backgrounds the chance to make games. The certificate requires 18-19 credits and is jointly offered by the departments of Curriculum and Instruction, Art, and Computer Sciences. Certificate students work both independently and in small teams to develop a portfolio of board games, video games, and physical spaces. The certificate focuses on creating, testing, and understanding how to design gameplay to be fun and impactful.

What will students gain?

Students acquire the skills, understanding, and background to create and produce games independently, to develop a body of work, and to gain critical perspectives on games and game design.

How do I get involved?

Interested students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, 608-262-1651, or soeacademicservices@education.wisc.edu, to discuss course sequencing, declaring, and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

HOW TO GET IN

DECLARATION PROCESS

To be eligible to declare the Game Design Certificate, students must complete two courses prior to submitting a certificate declaration. One course is required of all prospective certificate students:

Code	Title	Credits
CURRIC 357	Game Design I	3

The second course may be selected by the student from the following options:

Code	Title	Credits
ART 107	Introduction to Digital Forms	3
COMP SCI 200	Programming I	3
COMP SCI 300	Programming II	3

Students meeting the eligibility criteria who intend to complete the Game Design Certificate may find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

REQUIREMENTS

CERTIFICATE REQUIREMENTS

The Game Design certificate program includes both required and elective coursework for a minimum of 18 credits. All coursework must be taken for a letter grade. At least 10 credits of the certificate must be earned in residence at UW–Madison.

Students must have an overall 2.5 GPA in Game Design Certificate coursework upon completion of the certificate.

Code	Title	Credits
Required Courses		
CURRIC 277	Videogames & Learning	3
or CURRIC 576	Topics in Game Design	
CURRIC 357	Game Design I	3
CURRIC 432	Game Design II	3
ART 107	Introduction to Digital Forms	3
Computer Science Elective		
Select one of the following:		3
COMP SCI 200	Programming I	
COMP SCI 300	Programming II	
Arts Elective		
Select one of the following:		3-4

ART 428	Digital Imaging Studio
ART 429	3D Digital Studio I
ART 528	Digital Interactive Studio
ART 529	3D Digital Studio II
ART 563	Graphic Design for Games
ART 629	3D Digital Studio III
THEATRE 230	Environment Design for Games and other Virtual Storytelling Spaces
Total Credits	18-19

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Utilize the design and technical skills necessary to create games.
2. Discuss the critical and theoretical perspectives necessary to understand the production and reception contexts in/for which they design such games.

PEOPLE

Information about faculty, staff, and other contributions to the certificate in game design can be found on the Game Lab's website (<https://games.education.wisc.edu/>).

GEOGRAPHY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Geography is housed in the College of Letters & Science. Students may wish to consult with academic advisor Joel Gruley, jgruley@wisc.edu, (jgruley@wisc.edu) 144 Science Hall, 262-4438, to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of

Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The geography minor requires a minimum of 24 credits to include GEOG 342 and the required course distribution listed below. Each course may be counted in only one of the groups. Coursework must include at least two upper-level courses, numbered 300–699.

A minimum cumulative grade point average of 2.75 is required, based on all geography minor coursework taken on the UW–Madison campus.

REQUIRED COURSE

Code	Title	Credits
GEOG 342	Geography of Wisconsin (Or an acceptable substitute selected in consultation with the undergraduate advisor in the Department of Geography. This course may be also used to fulfill the requirement in Area Studies and Global Systems)	3

COURSE DISTRIBUTION REQUIREMENTS

Complete one course from each of the six groups:

PHYSICAL GEOGRAPHY: EARTH SYSTEMS AND ENVIRONMENTAL PROCESSES

Courses address the locational arrangements of earth phenomena and their interaction as physical systems.

Physical Geography: Earth Systems and Environmental Processes course options

GERMAN, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the German major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;

- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a bachelor of science degree in education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the German BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional

Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1653)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional

Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- Academic Qualifications: The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- Career Maturity: The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- Ability to Relate to Youth: The applicant demonstrates the ability to work effectively with young people.
- Commitment to All Students: The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- Interpersonal Skills: The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent level. Prerequisite courses do not generally count toward the required credits of the major.

Code	Title	Credits
GERMAN 101	First Semester German	4
GERMAN 102	Second Semester German	4
GERMAN 203	Third Semester German	4
GERMAN 204	Fourth Semester German	4
GERMAN 249	Intermediate German - Speaking and Listening	3
GERMAN 258	Intermediate German-Reading	3
GERMAN 262	Intermediate German-Writing	3

MAJOR REQUIREMENTS

Complete a minimum of 27 credits in German courses numbered 300 and above. The credits in the major required for admission must be taken from the coursework below. Students must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus. Directed study coursework may not be applied to the major requirements. Other courses, especially those transferred from international programs, may be substituted with the approval of the program coordinator.

Code	Title	Credits
GERMAN 337	Advanced Composition & Conversation	3-4
GERMAN 351	Introduction to German Linguistics	3-4
GERMAN 676	Advanced Seminar in German Studies	3

Additional 12 credits from any German courses numbered 300 or above. These must be courses designated by the Department of German as acceptable for the L&S major in German.

Two upper-level courses (300 or above) in related fields ¹

1

These "cognate" courses must deal substantially with the German-speaking world and may be taken at any time during the degree work on campus. Courses come from related fields such as history, art history, philosophy, or music, and must receive prior approval from the program coordinator.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience

which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442 or CURRIC 443	Student Teaching in World Languages (K-8) ² Student Teaching in World Languages (6-12)	6
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443 or CURRIC 442	Student Teaching in World Languages (6-12) ³ Student Teaching in World Languages (K-8)	6
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9

CURRIC 564 Advanced Problems on the
Teaching of World Languages

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all

- 3 the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1659)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

German Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in German Education enter UW-Madison having completed the first two semesters of the language; this level of proficiency is reflected in the plan.

Freshman

Fall	Credits	Spring	Credits

Study abroad course availability will influence the selection of UW-Madison courses in the major.

ADVISING AND CAREERS

GERMAN EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach German. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult an undergraduate advisor (p. 810) in the German, Nordic and Slavic department regarding course sequencing and other aspects of this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://>

wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and German, Nordic and Slavic (<https://gns.wisc.edu/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or

education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of Become a Teacher (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a

reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW-Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW-Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter

part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge

(Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood, or English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of “Endorsed Candidate for Licensure” (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is “posted” by the registrar’s office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states: The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia,

Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

GERMAN, SED MINOR

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the German major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

HOW TO GET IN

Admissions to the German Minor have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

This minor is available only to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in German must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Note: The undergraduate World Language Education Program, including this minor, will be suspended in the fall of 2020. A new, graduate-level program is being developed for teacher certification in these languages.

The last group of undergraduates will be selected in the spring semester of 2020. Admission criteria have been modified from previous years to accommodate all students interested in applying for the final undergraduate cohort, including freshmen beginning in the fall of 2019.

See the How to Get In section of the language major for more details about the application process, eligibility criteria and deadlines.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1654) in this subject for an explanation of these requirements and the World Language Education professional sequence.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent level. Prerequisite courses do not count toward the required credits of the minor.

Code	Title	Credits
GERMAN 101	First Semester German	4
GERMAN 102	Second Semester German	4
GERMAN 203	Third Semester German	4
GERMAN 204	Fourth Semester German	4
GERMAN 249	Intermediate German - Speaking and Listening	3
GERMAN 258	Intermediate German-Reading	3
GERMAN 262	Intermediate German-Writing	3

MINOR REQUIREMENTS

The German minor requires a minimum of 18 credits of advanced (numbered 300 and above) coursework. The prerequisites to these courses are listed above. The German minor also requires a minimum cumulative grade point average of 2.75, based on all German minor coursework taken on the UW–Madison campus.

Code	Title	Credits
GERMAN 337	Advanced Composition & Conversation	3-4
GERMAN 351	Introduction to German Linguistics	3-4

Complete 12 credits of any German courses numbered 300 or above. These must be courses designated by the Department of German, Nordic and Slavic as acceptable for the L&S major in German.

ADVISING AND CAREERS

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach German. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult an undergraduate advisor

(p. 810) in the German, Nordic and Slavic department regarding course sequencing and other aspects of this field of study.

HISTORY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of History is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in the department to discuss course selection and other issues related to this field of study.

Students have numerous advising resources available to them, including both professional and peer advisors. Information on the History advising team, how to contact an advisor, how to schedule an appointment, and drop-in advising hours can be found on the departmental website (<https://history.wisc.edu/undergraduate-program/undergraduate-advising/>). (<https://history.wisc.edu/undergraduate-program/undergraduate-advising/>)

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

The History minor requires a minimum of 24 credits. **No more than three courses may be numbered below 300.** A minimum cumulative grade point average of 2.75 is required, based on all history minor coursework taken on the UW-Madison campus.

EUROPEAN HISTORY

Complete at least one course; includes British or Russian history.

HISTORY/ AFROAMER 628	History of the Civil Rights Movement in the United States	3

ELECTIVES

Complete additional coursework, if necessary, to reach the minimum of 24 credits. It is recommended that students completing the history minor take a one-year continuous course in American history (e.g., HISTORY 101 Amer Hist to the Civil War Era, the Origin & Growth of the U S and HISTORY 102 American History, Civil War Era to the Present).

ITALIAN, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Italian major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program. The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a bachelor of science degree in education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the Italian BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1670)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with

advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education’s Apply to a Program (

www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of

the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

MAJOR REQUIREMENTS

Complete a minimum of 36 credits. Students must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus. Directed study coursework may not be applied to the major requirements.

Code	Title	Credits
Complete 16 credits of Elementary and Intermediate Italian, or demonstrate proficiency at the equivalent levels:		
ITALIAN 101	First Semester Italian	4
ITALIAN 102	Second Semester Italian	4
ITALIAN 203	Third Semester Italian	4
ITALIAN 204	Fourth Semester Italian	4
Select 20 hours beyond ITALIAN 204 to include:		
ITALIAN 311 & ITALIAN 312	Advanced Italian Language and Writing Workshop	6
ITALIAN 321 & ITALIAN 322	Studies in Italian Literature and Culture I and Studies in Italian Literature and Culture II	6
Upper level Culture/Civilization course chosen in consultation with advisor		3
Select two more courses in literature or culture/ civilization (400 or 500 level)		6-8
Additional coursework, if necessary, to reach the minimum of 36 credits		

Students who expect to become teachers of Italian should elect courses in related fields, such as art history, history, other languages and literatures (especially English), music appreciation, and philosophy. Prospective teachers should take every opportunity to increase oral mastery of the language. The Italian Club at the university offers lectures and films about Italy, and opportunities to converse in Italian. Occasionally, modern and classical plays are presented for the public.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach.

Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the International Academic Programs (IAP) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the approval form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary

education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3

ED PSYCH 301	How People Learn	3
--------------	------------------	---

Semester 2

<i>Required Courses</i>		
CURRIC 442	Student Teaching in World Languages (K-8) ²	6
or CURRIC 443	Student Teaching in World Languages (6-12)	

<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3

Semester 3

<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443	Student Teaching in World Languages (6-12) ³	6
or CURRIC 442	Student Teaching in World Languages (K-8)	

<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3

Semester 4

<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and

certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1676)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

Italian Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in Italian Education enter UW-Madison having completed at least the first two semesters of the language; this level of proficiency is reflected in the plan.

Freshman

Fall	Credits	Spring	Credits

Study abroad course availability will influence the selection of UW-Madison courses in the major.

ADVISING AND CAREERS

ITALIAN EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, for general questions regarding certification to teach Italian. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to meet with an undergraduate advisor (<https://frit.wisc.edu/undergraduate-programs-in-italian/#academic-advising>) in the French and Italian department regarding course sequencing and other aspects of this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students

- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and French and Italian (<http://frit.wisc.edu/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–

Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student

teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification

programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW–Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood, or English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These

new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.

- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ITALIAN, SED MINOR

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Italian major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

HOW TO GET IN

Admissions to the Italian Minor have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

This minor is available only to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Italian must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Note: The undergraduate World Language Education Program, including this minor, will be suspended in the fall of 2020. A new, graduate-level program is being developed for teacher certification in these languages.

The last group of undergraduates will be selected in the spring semester of 2020. Admission criteria have been modified from previous years to accommodate all students interested in applying for the final undergraduate cohort, including freshmen beginning in the fall of 2019. See the How to Get In section of the language major for more details about the application process, eligibility criteria and deadlines.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1671) in this subject for an explanation of these requirements and the World Language Education professional sequence.

MINOR REQUIREMENTS

The Italian minor requires a minimum of 26 credits and a minimum cumulative grade point average of 2.75, based on all Italian minor coursework taken on the UW–Madison campus.

Code	Title	Credits
ITALIAN 101 & ITALIAN 102	First Semester Italian and Second Semester Italian ¹	8
18 credits above ITALIAN 102, to include at least 2 credits in composition and conversation		

¹

Or demonstrated proficiency at the equivalent levels.

ADVISING AND CAREERS

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Italian. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to meet with an undergraduate advisor (<https://frit.wisc.edu/undergraduate-programs-in-italian/#academic-advising>) in the French and Italian department regarding course sequencing and other aspects of this field of study.

JAPANESE, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Japanese major, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from underrepresented groups to apply for admissions to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;

- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the Japanese BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact the School of Education Student Services office for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is

required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1682)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For

more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- Academic Qualifications: The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- Career Maturity: The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- Ability to Relate to Youth: The applicant demonstrates the ability to work effectively with young people.
- Commitment to All Students: The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- Interpersonal Skills: The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program

coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in the School of Education Student Services office.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an

opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.

- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent levels. Prerequisite courses do not count toward the credits required of the major. Note: Prerequisite coursework was listed under the E Asian subject heading prior to fall, 2019,

Code	Title	Credits
ASIALANG 103	First Semester Japanese	4
ASIALANG 104	Second Semester Japanese	4

MAJOR REQUIREMENTS

Complete a minimum of 38 credits. Students must complete at least 15 credits of upper-level major coursework (numbered 220 and above) in residence on the UW–Madison campus. Directed study coursework may not be applied to the major requirements. Note: Most major coursework was listed under the E Asian subject heading prior to fall, 2019.

Code	Title	Credits
ASIAN 253	Japanese Popular Culture	3
ASIAN 354	Early Modern Japanese Literature	3
ASIALANG 203	Third Semester Japanese	4
ASIALANG 204	Fourth Semester Japanese	4
ASIALANG 303	Fifth Semester Japanese	4
ASIALANG 304	Sixth Semester Japanese	4
ASIALANG 376	Japanese Conversation	3
ASIAN 353	Lovers, Warriors and Monks: Survey of Japanese Literature	3
ASIAN 434	Introduction to Japanese Linguistics	3
HISTORY/ASIAN 104	Introduction to East Asian History: Japan	3-4

If needed, select additional coursework to reach the minimum of 38 credits

Recommended courses:

ASIALANG 403	Seventh Semester Japanese	3
ASIALANG 404	Eighth Semester Japanese	3
ASIALANG 313	Classical Japanese	3

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral**

Proficiency Interview (OPI). Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance

in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional

judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>

CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1688)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.

2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

Courses available during the study abroad experience will influence the selection of major course work taken while at UW-Madison.

FOUR-YEAR PLAN

Japanese Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in the World Language Program enter UW-Madison having completed at least the first two semesters of the language; this level of proficiency is reflected in the plan.

ADVISING AND CAREERS

JAPANESE EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Japanese. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, by calling 608-262-1651, or in person. Professor Naomi Fujita Geyer, nfgeyer@wisc.edu, 1260 Van Hise Hall, 262-9221 or 262-2291, is also a valuable source of information regarding the teaching of Japanese.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/>)

education/#resource) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and Asian Languages and Cultures (<http://alc.wisc.edu/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the

requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher

candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW-Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW-Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D")

from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9*, *Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and

5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

LATIN, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CURRENTLY CHINESE, FRENCH, GERMAN, JAPANESE, LATIN, AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Latin major, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require

that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

Admissions to the Latin BSE have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1693)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of

Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System's Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least

one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the

Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education

program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies course work by the start of the professional sequence.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits. At least 15 credits of upper-level major coursework (numbered 301, 302, 500 and above) must be completed in residence at UW–Madison to meet the major residency requirement. Directed study coursework may not be applied to the major requirements.

REQUIRED COURSES

Complete the following, 22 credits.

Code	Title	Credits
LATIN 103	Elementary Latin	4
LATIN 104	Elementary Latin	4
LATIN 203	Intermediate Latin	4
LATIN 204	Introduction to Latin Literature	4
LATIN 301	Latin Literature of the Roman Republic	3
LATIN 302	Latin Literature of the Roman Empire	3

READING COURSES

Select two Latin reading courses numbered 500 or above. Most courses require completion of LATIN 302 or consent of instructor. Suggested courses include:

Code	Title	Credits
LATIN 505	Elementary Prose Composition	3
LATIN 515	Vergil	3
LATIN 519	Latin Poetry	3
LATIN 520	Roman Drama	3
LATIN 521	Roman Elegy	3
LATIN 522	Roman Lyric Poetry	3
LATIN 523	Roman Satire	3
LATIN 539	Latin Historical Writers	3
LATIN 549	Latin Philosophical Writers	3
LATIN 559	Latin Oratory	3
LATIN/ MEDIÆVAL 563	Mediaeval Latin	3

THE CLASSICAL WORLD

Complete the following Classics courses:

Code	Title	Credits
CLASSICS 322	The Romans	3
CLASSICS 370	Classical Mythology	3

ELECTIVES

Complete additional upper-level Latin coursework (<http://guide.wisc.edu/courses/latin/>) to reach the minimum of 40 credits.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on

an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of

Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442 or CURRIC 443	Student Teaching in World Languages (K-8) ² Student Teaching in World Languages (6-12)	6
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443 or CURRIC 442	Student Teaching in World Languages (6-12) ³ Student Teaching in World Languages (K-8)	6
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and

those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1699)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
2. In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
3. During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
4. In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
5. To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

Latin Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before enrolling in upper level course requirements. The degree also requires a four-semester professional education sequence. While most students seeking teacher certification in a language have completed some course work during high school, this particular plan begins with course work at the most elementary level.

Freshman

ADVISING AND CAREERS

LATIN EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Latin. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made

through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult the undergraduate advisor (<https://canes.wisc.edu/undergraduate-studies/>) in the Department of Classical and Ancient Near Eastern Studies if they are interested in this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resource-text>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and Classical and Ancient Near Eastern Studies (<https://canes.wisc.edu/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license.

School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/ Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and

staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and

school staff, including training in the use of peer mediation to resolve conflicts between pupils.

- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9*, *Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of “Endorsed Candidate for Licensure” (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall.

Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is “posted” by the registrar’s office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

MATHEMATICS AND SCIENCE DUAL, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

This minor is intended for Elementary Education majors wishing to enhance their content preparation in mathematics and science and is particularly suitable for Elementary Education majors who intend to teach mathematics and science in the middle school.

A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW-Madison campus.

MATHEMATICS COMPONENT

The mathematics sequence emphasizes problem solving, mathematical reasoning and justification, communicating, and building on students' mathematical ideas in areas such as algebraic thinking, calculus, and

probability and statistics. The capstone course, MATH 138 Mathematics for Teaching: Conjecture, Generalization, and Proof, is for students to build connections across core ideas in upper-level elementary and middle school mathematics and to understand how these evolve from and into elementary and higher level mathematics. This sequence is also intended to prepare students to take the Praxis examination for middle school mathematics, thereby permitting certification and licensure in most other states that require more in-depth content preparation.

Complete the following courses. Students completing this minor will take MATH 135 instead of MATH 132 in the Elementary Education sequence.

Code	Title	Credits
MATH 135	Algebraic Reasoning for Teaching Math ¹	3
MATH 136	Pre-calculus and Calculus for Middle School Teachers ²	6
MATH 138	Mathematics for Teaching: Conjecture, Generalization, and Proof ³	3

1

Offered each spring semester.

2

This is a 6-credit course based on the large lecture of MATH 213 Calculus and Introduction to Differential Equations with a special discussion section for students completing this minor. Offered each fall semester. The following students will be exempt from this course requirement: students having taken MATH 213, MATH 217, MATH 221, MATH 222, MATH 234, MATH 275, MATH 276, or MATH 375 (or an exact transfer equivalent of any of these) with a grade of B or better; students having passed the AP Calculus AB test with a score of 5; and students having passed the AP Calculus BC test with a score of 4 or better.

3

This 3-credit capstone course is similar to MATH 132 Problem Solving in Algebra, Probability and Statistics.

SCIENCE COMPONENT

The aim of the **science component** of this minor is for students to understand science as an intellectual activity. The goals of science and the diverse means by which scientific knowledge is generated and validated should be at the core of the science portion of this minor. Upon its completion, students should have had opportunities to understand some of the most powerful organizing ideas in the various scientific disciplines as well as how those ideas have been and are generated. Such an understanding should provide students with the fundamental tools and outlook necessary to teach the variety of science content typically taught in middle schools.

The committee that developed this science component has indicated that the primary purpose for the minor should be consistent with the goals of a liberal or general education, thus viewing the minor as an extension of the current liberal studies requirement. In addition to the 9 credits of science required for the liberal studies requirement, students completing this minor must also take 9 credits in science for the math-science dual minor. With these **18 credits** it is possible to provide a minimal level of breadth and depth of science coursework. This minor is also expected to provide Elementary Education program students with a background in the sciences that are most commonly taught at the middle school level.

Complete the following requirements:

- At least 18 credits from the courses listed below. Additional courses can be considered; please consult with an advisor in the School of Education Student Services office, 139 Education Building.
- One course in each of three of the four science areas of biology, chemistry, physics, and earth and space science from the approved list, below. Integrated Liberal Studies 153 does not count in any of the areas, but can count toward the 18 credit total.
- At least 6 credits of coursework from the courses listed below that are **not** marked with an asterisk (*). Courses with the asterisk are considered to be introductory level courses.

The following courses are approved for inclusion in the science component of the math/science minor:

All courses numbered 556 and above

MATHEMATICS SPECIALIZED, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be

made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

Complete a minimum of 22 credits to include the requirements listed below. A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW-Madison campus.

Code	Title	Credits
Required Courses		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
STAT 301	Introduction to Statistical Methods	3
Additional credits chosen from the following:		
MATH 135	Algebraic Reasoning for Teaching Math	3
MATH 138	Mathematics for Teaching: Conjecture, Generalization, and Proof	3
MATH 234	Calculus--Functions of Several Variables	4
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	3
MATH 340	Elementary Matrix and Linear Algebra	3
MATH 461	College Geometry I	3
MATH/HIST SCI 473	History of Mathematics	3

MATHEMATICS, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Mathematics is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor

in the department to discuss course selection and other issues related to this field of study. The current list of advisors and the schedule of the office hours can be found at the departmental advising page (<https://www.math.wisc.edu/undergraduate/advising/>).

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

REQUIREMENTS

Complete a minimum of 28 credits. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

Elementary Education students may also wish to consider the Specialized Mathematics minor, which exchanges some of the higher-level mathematics courses for a broader range of coursework in mathematics, computer sciences, and statistics. A mathematics/science dual minor option is also available.

The first 13 credits of the mathematics minor involves calculus-level coursework. Students may need to complete prerequisite coursework—e.g., MATH 112 Algebra, MATH 113 Trigonometry—to reach this proficiency level. These preparatory courses may be used to meet the liberal studies requirement, but may not be applied toward the credits required for the mathematics minor.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus—Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
STAT 301	Introduction to Statistical Methods	3
MATH 441	Introduction to Modern Algebra	3
MATH 461	College Geometry I	3

Because of prerequisites and scheduling issues, the sequencing of this coursework requires careful planning to be completed in a timely fashion. Students are encouraged to consult with an advisor regarding the appropriate sequencing of these courses.

PHYSICS, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood

through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Physics is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in the physics department to discuss course selection and other issues related to this field of study.

To meet with a Physics advisor, you may either email physics-advisors@wisc.edu or contact them directly.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete a minimum of 22 credits. A minimum cumulative grade point average of 2.75 is required, based on all Physics minor coursework taken on the UW–Madison campus.

INTRODUCTORY REQUIREMENTS

Code	Title	Credits
Select one of the following First Introductory Courses:		5-6
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	

PHYSICS 247	A Modern Introduction to Physics ¹
E M A 201 & E M A 202	Statics and Dynamics
E M A 201 & M E 240	Statics and Dynamics

Select one of the following Second Introductory Courses: **5**

PHYSICS 202	General Physics
PHYSICS 208	General Physics
PHYSICS 248	A Modern Introduction to Physics

Select one of the following Third Introductory Courses: **3-4**

PHYSICS 249	A Modern Introduction to Physics
PHYSICS 205	Modern Physics for Engineers
PHYSICS/ E C E 235	Introduction to Solid State Electronics
PHYSICS 241	Introduction to Modern Physics

¹

Any combination of courses can be used to satisfy the three introductory course requirements, but students may not transfer into the PHYSICS 247, PHYSICS 248, PHYSICS 249 sequence from another introductory sequence.

ADDITIONAL COURSE REQUIREMENTS

Code	Title	Credits
PHYSICS 307	Intermediate Laboratory-Mechanics and Modern Physics	2
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4

Select physics electives, if necessary, to total 22 credits

POLITICAL SCIENCE, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Political Science is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor (p. 1297) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-

Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all political science minor coursework taken on the UW-Madison campus.

REQUIRED COURSES

Code	Title	Credits
Complete any 100-level Political Science course (one course)		3-4
POLI SCI 205 or POLI SCI 405	Introduction to State Government State Government and Public Policy	3-4

ELECTIVES

Complete additional coursework, if necessary, to reach the minimum of 24 credits.

PORTUGUESE, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Portuguese major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from underrepresented groups to apply for admissions to the program. The director of the World Language Education program is Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

The objectives of the K-12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;

- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional

Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1711)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this “certification only” coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System’s Regional

Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- Academic Qualifications: The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- Career Maturity: The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- Ability to Relate to Youth: The applicant demonstrates the ability to work effectively with young people.
- Commitment to All Students: The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- Interpersonal Skills: The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods course work and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits. At least 15 credits of upper-level major coursework (numbered 300 and above) must be taken in residence on the UW–Madison campus. Directed study coursework may not be applied to the major requirements.

INTRODUCTORY-LEVEL COURSE REQUIREMENTS

Complete the following or demonstrate proficiency at the equivalent levels.

Code	Title	Credits
PORTUG 101	First Semester Portuguese	4
PORTUG 102	Second Semester Portuguese	4
PORTUG 201	Third Semester Portuguese	4
PORTUG 202	Fourth Semester Portuguese	4
PORTUG 221	Introduction to Luso-Brazilian Literatures	4
PORTUG 225	Third Year Conversation and Composition	3
PORTUG 226	Third Year Conversation and Composition	3

UPPER-LEVEL COURSE REQUIREMENTS

Select 16 credits from the following list; 4 must be in Composition and Conversation. Placement in advanced composition and conversation will be based upon proficiency. Additional courses may be substituted with the program advisor's permission.

Code	Title	Credits
PORTUG 311	Fourth Year Composition and Conversation	3
PORTUG 312	Fourth Year Composition and Conversation	3
PORTUG 361	Portuguese Civilization	3
PORTUG 362	Brazilian Civilization	3
PORTUG 411	Survey of Portuguese Literature before 1825	3

PORTUG 412	Survey of Brazilian Literature before 1890	3
PORTUG 467	Survey of Portuguese Literature since 1825	3
PORTUG 468	Survey of Brazilian Literature since 1890	3

Students expecting to become teachers of Portuguese should also elect courses in related fields, such as history, political science, or sociology. Consult the Latin American, Caribbean, and Iberian Studies Program (<http://www.lacis.wisc.edu/>) for a complete listing of related courses. Students should also seek opportunities to work with children and young adults in positions of volunteer/leadership, such as camp counselor, day camp leader, teacher aid, tutor, etc. Prospective teachers should also take every opportunity to increase their oral mastery of the target language, Portuguese.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if

similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE REQUIREMENTS

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3

CURRIC 443	Student Teaching in World Languages (6-12) ³	6

or CURRIC 442	Student Teaching in World Languages (K-8)	
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (https://pubs.wisc.edu/ug/education_policy.htm#last60).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.

- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1717)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in Portuguese Education enter UW–Madison having completed at least the first two semesters of the language; this level of proficiency is reflected in the plan.

Freshman

LEARNING OUTCOMES

- In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.
- In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
- During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
- In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
- To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

Portuguese Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Fifth Year

Fall	Credits	Spring	Credits
CURRIC 343		3 CURRIC 443	9
CURRIC 443 or 442		6 CURRIC 564	3
CURRIC 305 (also meets Communication B)	3		
	12		12

Total Credits 129

1

Study abroad course availability will influence the selection of UW-Madison courses in the major.

ADVISING AND CAREERS

PORTUGUESE EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Portuguese. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, or in person. Students may want to consult the undergraduate advisor (<https://spanport.wisc.edu/undergrad-advising/>) in the Spanish and Portuguese department if interested in this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, or in person. Students may want to consult the undergraduate advisor (<https://spanport.wisc.edu/undergrad-advising/>) in the Spanish and Portuguese department if interested in this field of study.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-

world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://ci.education.wisc.edu/>) and Spanish and Portuguese (<http://spanport.wisc.edu/home/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. These requirements include those required by UW-Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete

a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a

major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW-Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW-Madison require students to complete additional field experiences.

Pre-Student Teaching Practicum

The pre-student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a

university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.

- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching

standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9. Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the

Prekindergarten through Grade 12 level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of “Endorsed Candidate for Licensure” (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is “posted” by the registrar’s office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

PORTUGUESE, SED MINOR

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Portuguese major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

HOW TO GET IN

Admissions to the Portuguese Minor have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

This minor is only available to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Portuguese must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be

possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Note: The undergraduate World Language Education Program, including this minor, will be suspended in the fall of 2020. A new, graduate-level program is being developed for teacher certification in these languages.

The last group of undergraduates will be selected in the spring semester of 2020. Admission criteria have been modified from previous years to accommodate all students interested in applying for the final undergraduate cohort, including freshmen beginning in the fall of 2019. See the How to Get In section of the language major for more details about the application process, eligibility criteria and deadlines.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1712) in this subject for an explanation of these requirements and the World Language Education professional sequence.

MINOR REQUIREMENTS

Complete a minimum of 30 credits. The Portuguese minor also requires a minimum cumulative grade point average of 2.75, based on all Portuguese minor coursework taken on the UW–Madison campus. Students may exempt from a course requirement based on demonstrated proficiency at that level.

Code	Title	Credits
PORTUG 101	First Semester Portuguese	4
PORTUG 102	Second Semester Portuguese	4
PORTUG 201	Third Semester Portuguese	4
PORTUG 202	Fourth Semester Portuguese	4
PORTUG 221	Introduction to Luso-Brazilian Literatures	4
PORTUG 225	Third Year Conversation and Composition	3
PORTUG 226	Third Year Conversation and Composition	3

ADVISING AND CAREERS

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Portuguese. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult the undergraduate advisor

(<https://spanport.wisc.edu/undergrad-advising/>) in the Spanish and Portuguese department if interested in this field of study.

PREPARING TO TEACH ABROAD, CERTIFICATE

The Certificate in Preparing to Teach Abroad is designed to enable undergraduate students from any national background interested in teaching abroad to consider the complexities involved in entering beyond-US pedagogical settings. This entails understanding the importance of analyzing power-knowledge relations in sociocultural, political and historico-philosophical contexts in international locations, including attention to differences within such contexts. Students considering this pathway will learn basic principles of culturally responsive lesson design, teaching techniques, and strategies of reflection and modification.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Preparing to Teach Abroad. To declare the certificate, students should meet with the Certificate advisor and then visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

The Certificate in Preparing to Teach Abroad requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Students must complete two required courses, CURRIC 366 and CURRIC 418, 6 credits of electives, and a required capstone course, CURRIC 419.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

REQUIRED COURSES

Code	Title	Credits
CURRIC 366	Internationalizing Educational Knowledge	3
CURRIC 418	Preparing to Teach Abroad	3
CURRIC 419	Preparing to Teach Abroad Capstone	3

ELECTIVES

The 6 credits of electives can be taken concurrently with required certificate classes. Students can choose to concentrate their electives on the following themes, but are not required to do so. In selecting courses we will encourage students to consider courses both relevant to the areas of interest, but also issues raised in the certificate's required courses. Course selection can be guided in consultation with the certificate advisor.

FOCUS ON SCHOOL OF EDUCATION-ORIENTED TOPICS

Courses in this section include special education, bilingual education, educational psychology and educational policy studies.

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Analyze issues of coloniality, power, and difference as they relate to teaching, learning, and curriculum in non-US settings.
2. Examine key cultural, social, and historical relationships to educational knowledges before entering a pedagogical space abroad.
3. Identify curriculum and teaching practices that produce difference and exclusions, focusing on the intersection of transnational and local contexts.
4. Develop culturally responsive practices and pedagogies focused on teaching abroad.
5. Use experiential knowledge of practicum teaching to reflect on pedagogical practices and contextual differences in non-US contexts.

PSYCHOLOGY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Psychology is housed in the College of Letters & Science. Students interested in completing a double major in psychology may wish to consult with an undergraduate advisor (p. 1310) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete a minimum of 26 credits. A minimum cumulative grade point average of 2.75 is required, based on all Psychology minor coursework taken at UW–Madison. Students wishing to complete an additional major in Psychology through the College of Letters & Science must also complete supporting coursework in introductory biology; see Requirements for the Major (p. 1307).

Code	Title	Credits
PSYCH 202	Introduction to Psychology	3-4
PSYCH 210	Basic Statistics for Psychology	3
PSYCH 225	Research Methods	4
PSYCH 405	Abnormal Psychology	3-4
PSYCH 456	Social Psychology	3-4
PSYCH 403	Psychology of Personality	3
PSYCH 414	Cognitive Psychology	3
Select one of the following:		3-4
PSYCH 449	Animal Behavior	
PSYCH 450	Primates and Us: Insights into Human Biology and Behavior	
PSYCH 454	Behavioral Neuroscience	

Select additional coursework, if necessary, to reach the minimum of 26 credits

1

Note: Effective fall 2017, the course number of Abnormal Psychology changed from Psych 509 to PSYCH 405. The course number of Social Psychology changed from Psych 530 to PSYCH 456.

SCIENCE SPECIALIZED, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu,

(soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete a minimum of 22 credits selected from one or more of the following areas. Courses must be taken from the departments indicated. A minimum 2.75 grade point average is required, based on all UW–Madison coursework included in this minor.

- Biology: Departments of Botany (<http://guide.wisc.edu/courses/botany/>), Zoology (<http://guide.wisc.edu/courses/zoology/>), and Bacteriology (<http://guide.wisc.edu/courses/microbio/>) (Microbiology course listings)
- Chemistry: Departments of Chemistry (<http://guide.wisc.edu/courses/chem/>) and Biochemistry (<http://guide.wisc.edu/courses/biochem/>)
- Physics: Department of Physics (<http://guide.wisc.edu/courses/physics/>)
- Earth Science: Departments of Astronomy (<http://guide.wisc.edu/courses/astron/>), Geography (<http://guide.wisc.edu/courses/geog/>) (Physical Geography courses designated as Physical Science only), Geoscience (<http://guide.wisc.edu/courses/geosci/>), and Atmospheric and Oceanic Sciences (http://guide.wisc.edu/courses/atm_ocn/).

At least 10 of the 22 credits must be numbered 200 and above.

SOCIAL STUDIES, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be

made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete 24 credits to include the requirements listed below. A minimum 2.75 grade point average is required, based on all UW-Madison course work included in the Social Studies minor. The courses listed here will meet this requirement, but additional courses may be considered. Confer with an advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651, for consideration of additional courses.

Some courses may be listed in multiple categories, but can count in only one.

ELECTIVES

Choose additional electives to reach the minimum of 24 credits. Electives must be chosen from the courses listed above or from the departments of Economics (<http://guide.wisc.edu/courses/econ/>), Geography (<http://guide.wisc.edu/courses/geog/>), History (<http://guide.wisc.edu/courses/history/>), Political Science (http://guide.wisc.edu/courses/poli_sci/), Psychology (<http://guide.wisc.edu/courses/psych/>) and Sociology (<http://guide.wisc.edu/courses/soc/>).

RECOMMENDED COURSE OPTIONS

It is strongly recommended to take at least one of the following non-Western interdisciplinary courses while meeting the minor requirements.

Code	Title	Credits
GEOG/ASIAN/ HISTORY/POLI SCI/ SOC 244	Introduction to Southeast Asia: Vietnam to the Philippines	4
ASIAN 252	Contemporary Indian Society	4
GEOG/AFROAMER/ ANTHRO/C&E SOC/ HISTORY/LACIS/ POLI SCI/SOC/ SPANISH 260	Latin America: An Introduction	3-4
GEOG/AFRICAN/ AFROAMER/ ANTHRO/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
HISTORY/ASIAN/ POLI SCI 255	Introduction to East Asian Civilizations	3-4
HISTORY/GNS 265	An Introduction to Central Asia: From the Silk Route to Afghanistan	3

SOCIOLOGY, MINOR

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Sociology is housed in the College of Letters & Science. Students may wish to consult with the undergraduate advisor (p. 1370) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. **Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission.** The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

HOW TO GET IN

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-Early-Adolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

REQUIREMENTS

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all sociology minor coursework taken on the UW–Madison campus.

FOUNDATIONAL CORE COURSES

INTRODUCTION

Select one of the following:

Code	Title	Credits
SOC/C&E SOC 210	Survey of Sociology	3-4
SOC/C&E SOC 211	The Sociological Enterprise	3
SOC 181	Honors Introductory Seminar-The Sociological Enterprise	3-4

RESEARCH METHODS AND STATISTICS

Students may take methods and statistics in the same semester. If students take methods and statistics in different semesters, it is recommended that methods be taken before statistics. This will provide a better entry point to the methods and materials of the field.

Code	Title	Credits
Research Methods		
SOC/C&E SOC 357	Methods of Sociological Inquiry	3-4
Statistics		
Complete one of the following statistics courses:		3-4
SOC/C&E SOC 360	Statistics for Sociologists I	
ECON 310	Statistics: Measurement in Economics	
GEOG 360	Quantitative Methods in Geographical Analysis	
MATH/STAT 310	Introduction to Probability and Mathematical Statistics II	
PSYCH 210	Basic Statistics for Psychology	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

THEORY

Code	Title	Credits
SOC/C&E SOC 475	Classical Sociological Theory	3

DISTRIBUTION REQUIREMENTS

Select at least one course from two of the following groups of departmental offerings. Courses used to meet the requirements above

may not be applied to this requirement. Courses that appear in more than one area may fulfill only one area requirement.

ADDITIONAL METHODS/STATISTICS

Additional Methods/Statistics course options

Code	Title	Credits
SOC 351	Introduction to Survey Methods for Social Research	3
SOC/C&E SOC 361	Statistics for Sociologists II	4
SOC 362	Statistics for Sociologists III	4
SOC/C&E SOC 365	Data Management for Social Science Research	3-4
SOC 375	Introduction to Mathematical Sociology	3
SOC 376	Mathematical Models of Social Systems	3
SOC 461	Study Abroad in Additional Methods and Statistics ¹	1-6

¹

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

ADDITIONAL THEORY

Additional Theory course options

Code	Title	Credits
SOC 462	Study Abroad in Additional Theory ¹	1-6
SOC 476	Contemporary Sociological Theory	3
SOC/GEN&WS 477	Feminism and Sociological Theory	3

¹

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

DEVIANT BEHAVIOR

Deviant Behavior course options

Code	Title	Credits
SOC 421	Processes of Deviant Behavior	3-4
SOC/SOC WORK 422	Social Issues in Aging	3
SOC/GEN&WS/LEGAL ST 425	Crime, Gender and Justice	3
SOC/CHICLA/LEGAL ST 440	Ethnicity, Race, and Justice	3-4
SOC 441	Criminology	3-4
SOC/CHICLA/LEGAL ST 443	Immigration, Crime, and Enforcement	3-4
SOC 446	Juvenile Delinquency	3-4
SOC 463	Study Abroad in Deviant Behavior ¹	1-6

¹

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

SOCIAL PSYCHOLOGY

Social Psychology course options

Code	Title	Credits
SOC/PSYCH 453	Human Sexuality	4
SOC 464	Study Abroad in Social Psychology ¹	1-6
SOC/C&E SOC 532	Health Care Issues for Individuals, Families and Society	3
SOC/C&E SOC 533	Public Health in Rural & Urban Communities	3
SOC 535	Talk and Social Interaction	3
SOC 543	Collective Behavior	3
SOC/C&E SOC 573	Community Organization and Change	3
SOC 575	Sociological Perspectives on the Life Course and Aging	3
SOC/AMER IND/ C&E SOC 578	Poverty and Place	3

1

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

SOCIAL ORGANIZATION

Social Organization course options

Code	Title	Credits
SOC/LEGAL ST 415	The Legal Profession	3-4
SOC 465	Study Abroad in Social Organization ¹	1-6
SOC/CHICLA 470	Sociodemographic Analysis of Mexican Migration	3
SOC/GEN&WS 611	Gender, Science and Technology	3
SOC/C&E SOC/ URB R PL 617	Community Development	3
SOC 621	Class, State and Ideology: an Introduction to Marxist Social Science	3
SOC/C&E SOC 623	Gender, Society, and Politics	3
SOC 624	Political Sociology	3
SOC 626	Social Movements	3
SOC/C&E SOC 630	Sociology of Developing Societies/ Third World	3
SOC 632	Sociology of Organizations	3-4
SOC 633	Social Stratification	3
SOC 640	Sociology of the Family	3
SOC/LAW/ LEGAL ST 641	Sociology of Law	3-4
SOC 643	Sociology of Occupations and Professions	3
SOC/C&E SOC/ URB R PL 645	Modern American Communities	3
SOC 646	Race and Ethnic Relations	3
SOC 647	Sociology of Sport	3
SOC/ED POL 648	Sociology of Education	3
SOC/C&E SOC 650	Sociology of Agriculture	3

SOC/C&E SOC 652	Sociology of Economic Institutions	3
SOC/C&E SOC 655	Microfoundations of Economic Sociology	3
SOC/HISTORY 670	Capitalism, Socialism, and Democracy in America Since 1890	3-4
SOC 678	Sociology of Persecution	3

1

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

DEMOGRAPHY AND ECOLOGY

Demography and Ecology course options

Code	Title	Credits
SOC 460	Study Abroad in Demography and Ecology ¹	1-6
SOC 575	Sociological Perspectives on the Life Course and Aging	3
SOC/ECON 663	Population and Society	3
SOC 674	Demographic Techniques I	3

1

This course, taken abroad, could be a UW–Madison sociology course in the designated area although it is not a direct equivalent to a departmental offering.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Community and Environmental Sociology course options

Code	Title	Credits
SOC/C&E SOC 533	Public Health in Rural & Urban Communities	3
SOC/C&E SOC/ ENVIR ST 540	Sociology of International Development, Environment, and Sustainability	3
SOC/C&E SOC 541	Environmental Stewardship and Social Justice	3
SOC/C&E SOC 573	Community Organization and Change	3
SOC 575	Sociological Perspectives on the Life Course and Aging	3
SOC/AMER IND/ C&E SOC 578	Poverty and Place	3
SOC/C&E SOC/ URB R PL 617	Community Development	3
SOC/C&E SOC 650	Sociology of Agriculture	3

ELECTIVES

Additional coursework, if needed, to reach the minimum of 24 credits.

SPANISH, BSE

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Spanish major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

The mission of the World Language Education (WLE) program is (1) to promote a community-based approach to world language instruction; (2) to educate teachers who understand different cultures, are proficient in their languages, routinely visit other countries, and can build bridges across nations, races, socioeconomic groups, cultures, and languages; and (3) to certify teachers who are prepared to serve the global needs of increasingly multicultural and multilingual schools and are strongly committed to act for a world in which shared understanding through conflict resolution, negotiation and communication are guiding principles.

There is a growing need for multilingual teachers from diverse backgrounds. The WLE faculty encourages qualified applicants from under-represented groups to apply for admissions to the program.

The objectives of the K–12 WLE program are

- to provide a philosophy of action designed to promote thoughtful curriculum development and classroom teaching in WLE;
- to provide regular contacts with the global community and in-service teachers in schools through field evenings, workshops, conferences, and other professional meetings;
- to provide clinical settings which enhance opportunities for beginning teachers to develop skillful practice and build bridges across languages, cultures, races, and nationalities;
- to help student teachers use multilingual educational technologies and document their experiences in electronic portfolios and implement research-based practices in their teaching;
- to provide university instructors and supervisors who are well-versed in WLE, who have an international orientation, and who are both approachable and helpful to student teachers.

Program majors include Chinese, French, German, Japanese, Latin, and Spanish, and may also include Italian and Portuguese if field placements are available in these subject areas. Completion of the WLE program leads to a Bachelor of Science degree in Education with a major in the specific subject area. Wisconsin state licensing regulations require that students are licensed to teach at the early childhood through adolescence (approximately kindergarten through high school) levels.

Oral and written examinations are required for all world language teacher candidates enrolled in Wisconsin educator preparation programs, as is an extensive immersion experience. (Students becoming certified to teach Latin are exempt from both the Oral Proficiency Exam and immersion experience requirement.)

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Note: The undergraduate World Language Education Program will be suspended in the fall of 2020. A new graduate-level program is being developed for teacher certification in these languages.

Students are admitted to the World Language Education undergraduate professional program once a year, effective in the fall. Selection is made the previous spring.

The last group of undergraduates will be selected for the professional program in the spring of 2020 and must apply by May 1, 2020 at 4:30 p.m. for consideration. Admission criteria listed below have been modified from previous years to accommodate students interested in applying for the final undergraduate cohort. This group includes freshmen beginning in the fall of 2019. Contact Education Academic Services for additional information.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and transfer students interested in World Language Education are admitted directly to the School of Education with a “pre-professional” classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in World Language Education receive the pre-professional classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1737)). It is not necessary to be a pre-professional student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in Education Academic Services (EAS), 139 Education Building, 1000 Bascom Mall; call 608-262-1651 to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires an additional application and admission process. **The deadline for this application may be different, and much earlier, than the application to the professional program.** See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly

advised to meet with an Education Academic Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an Education Academic Services advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

NATIVE AND HERITAGE SPEAKERS

Native or heritage speakers of a language major offered within the World Language Education program are welcome to pursue admission to the World Language Education program. Prospective applicants and transfer students who have previous experience with a language are encouraged to consult with an advisor in Education Academic Services as early as possible; to schedule, call 608-262-1651.

Native or heritage speakers must take a placement exam in the corresponding language to determine the appropriate level of remaining instruction in grammar, communication standards and social customs, and other topics related to language acquisition and proficiency. Placement examinations for Spanish, French, and German are offered on campus through Testing & Evaluation Services or the University of Wisconsin System's Regional Placement Testing Program. Placement examinations for Chinese, Japanese, Italian, Latin, and Portuguese are administered by faculty or staff within the relevant academic department. For more information regarding placement in language courses, consult the Languages at UW–Madison placement guide (<http://languages.wisc.edu/advising/placement/>).

APPLICATION AND ADMISSION

Applicants to the World Language Education program will be selected once a year, during the spring semester. Admission decisions will be based on coursework completed through the preceding fall semester. Admission is provisional until spring semester work has been completed and posted, and Education Academic Services staff have verified that students have met the eligibility requirements.

Resources limit the number of students who can be served by the UW–Madison World Language Education teacher education program. In recent years the World Language Education program has been able to accommodate all qualified applicants; however, if the number of qualified applicants to World Language Education exceeds program resources, admission will become limited and competitive. If this

happens, meeting or surpassing the minimum eligibility criteria will not guarantee admission.

ELIGIBILITY FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be considered for admission, students must:

- earn a minimum 2.75 grade point average on all major coursework completed
- earn a cumulative GPA of at least 2.75 (on a 4.00 scale).¹
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Apply to a Program (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- Immersion Experience - In previous years, program eligibility included the completion of an immersion experience. While this requirement has been removed as a consideration for program eligibility, **students must still complete an immersion experience prior to beginning the professional sequence.**

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1520).

APPLYING FOR CERTIFICATION IN MORE THAN ONE SUBJECT AREA

Students may apply to be certified in more than one language. Eligibility requirements must be met and separate applications must be filed for each area of interest. Students must be admitted as a major in at least

one of the program areas as it is not possible to be admitted only to complete a minor.

Students interested in combining the World Language Education degree program with certification in another area altogether must apply to both programs and meet the minimum criteria for admission to each program. It is suggested that students apply as majors in each area of interest, thus maximizing the chances of admission. Certification in two different areas requires the consent and cooperation of the World Language Education program coordinator and the faculty coordinator of the other subject area. Not all subjects can be combined with the World Language Education degree program.

While multiple majors or major–minor combinations are feasible and may be advantageous as a career strategy, it may take extra time to complete the additional subject area coursework. Students are encouraged to work closely with their Education Academic Services advisor to assess the possibility of completing certification in more than one area and to coordinate the requirements of multiple certifications.

PROGRAM ADMISSION SELECTION CRITERIA

The files of all applicants will be individually and holistically reviewed by a panel of World Language professionals. The criteria used for admission include the following:

- **Academic Qualifications:** The applicant demonstrates mastery of the target language and knowledge of its literature, civilization, and culture.
- **Career Maturity:** The applicant demonstrates commitment to teaching the target language to elementary, middle, and high school students, including consideration of his or her own strengths and limitations as a potential teacher.
- **Ability to Relate to Youth:** The applicant demonstrates the ability to work effectively with young people.
- **Commitment to All Students:** The applicant demonstrates commitment to working with all students including those of different racial, ethnic, and socioeconomic backgrounds, and students with disabilities, not just the economically privileged or highly motivated.
- **Interpersonal Skills:** The applicant demonstrates the ability to work effectively with peers, other professionals, and members of the community outside of school settings.

The application files are rated according to the above criteria for each language. A final cohort is selected along with rank-ordered alternates, based on a combination of ratings made by the World Language Education review committee and judgement by the faculty program coordinator about optimal cohort characteristics for each language. The availability of field placements in the subject area may also influence the selection process. Admission procedures are reviewed every other year to ensure fairness and effectiveness.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the

Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the academic dean in Education Academic Services.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education

program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

This program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Prerequisite coursework* prepares students for work in the major. Program applicants must also complete and document an *immersion experience* as a prerequisite to beginning the professional sequence.
- *Major coursework* offers in-depth study of the subject students will teach.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a four-semester sequence of world language teaching methods coursework and field experiences in schools.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

The four semesters of professional coursework are followed sequentially and taken in consecutive semesters. Because of the program structure, students are expected to have completed most of their major and liberal studies coursework by the start of the professional sequence.

PREREQUISITE COURSEWORK

Complete the following courses or demonstrate proficiency at the equivalent levels. Prerequisite courses do not count toward the credits required of the major.

Code	Title	Credits
SPANISH 101	First Semester Spanish	4
SPANISH 102	Second Semester Spanish	4
SPANISH 203	Third Semester Spanish	4
SPANISH 204	Fourth Semester Spanish	4
SPANISH 226	Intermediate Language Practice with Emphasis on Writing and Grammar	3
SPANISH 223	Introduction to Hispanic Cultures	3
SPANISH 224	Introduction to Hispanic Literatures	3

MAJOR REQUIREMENTS

Complete 27 credits of Spanish courses numbered 300 and above, to include the requirements below. At least 15 credits of upper-level major coursework (numbered 220 and above) must be completed in residence on the UW–Madison campus to meet the major residency requirement. Directed study coursework may not be applied to the major requirements.

Code	Title	Credits
SPANISH 311	Advanced Language Practice	3
SPANISH 320	Spanish Phonetics	3
SPANISH 361	Spanish Civilization	3
	or SPANISH 363 Spanish American Civilization	

Select one Spanish language practice course at or above the 300 level¹

Select one Spanish linguistics course at or above the 300 level²

Select 6 credits of Spanish department literature 300 level or above to include one survey course

Select 6 credits of electives in Spanish department coursework, 300 level or above

Select additional credits 300 level or above as necessary to total 27 additional credits

¹

SPANISH/INTL BUS 329 Spanish for Business and SPANISH 359 Spanish Business Area Studies are excluded.

²

SPANISH 327 Introduction to Spanish Linguistics and SPANISH 331 Spanish Applied Linguistics are highly recommended.

ORAL AND WRITTEN PROFICIENCY EXAMS

ABOUT THE ORAL AND WRITTEN PROFICIENCY EXAMS

Students in the World Language Education program must provide evidence of having earned at least an Intermediate High score on an American Council on the Teaching of Foreign Languages (ACTFL) **Oral Proficiency Interview (OPI)**. Latin Education students are exempt from this requirement, see below.

The interview must be taken prior to beginning the first student teaching experience (second semester of the professional sequence). Students should be aware that it may take as long as three months to obtain results, and factor this delay into the scheduling of the OPI. If the score of Intermediate High is not made after the first examination, a student will be asked to take measures to improve their spoken language proficiency before continuing in the program. The student must repeat the OPI and achieve the required Intermediate High proficiency level.

All students in World Language Education (except Latin Education), are also required to complete the **Writing Proficiency Test (WPT)** no later than the third semester in the program. It is recommended that students take the test during the second semester of the professional sequence. A proficiency level of Intermediate High is also required for this examination. Students must take and pass the WPT in their program area and the scores must be received by Education Academic Services before beginning the final student teaching semester. Students who do not take and pass the exam will not be permitted to student teach. Successful completion of the WPT meets the Department of Public Instruction's content proficiency requirement.

Both the Oral Proficiency Interview and the Writing Proficiency Test are administered by Language Testing International (LTI) (<http://www.languagetesting.com>). Their address is LTI, 3 Barker Avenue, Suite 310, White Plains, NY 10601; 800-486-8444. Students are responsible for costs associated with the OPI and the WPT.

Students seeking Latin certification will be required to take a proficiency exam administered by the Department of Classical and Ancient Near Eastern Studies prior to beginning the first student teaching experience (second semester of the professional sequence). This exam will take the place of the OPI and WPT required for certification in other languages.

See the World Language Education program coordinator with questions about these requirements.

IMMERSION EXPERIENCE

ABOUT THE IMMERSION EXPERIENCE

Participation in an intensive immersion experience is one of the most important and meaningful ways of developing competence in a language. In preparation for the proficiency exams, students seeking certification in a language must participate in an approved immersion experience which emphasizes prolonged and intensive interaction within the target language and culture.

Program applicants completing French, German, and Spanish majors must complete and document a full-semester (or minimum four-month-long) immersion experience prior to beginning the professional program course work. Students completing majors in Chinese and Japanese must spend at least one academic year living in China or Japan, respectively—also a prerequisite to beginning the professional program.

The immersion experience must be completed by July 15 preceding the program start. The experience must also have been completed no more than three years before this date.

An approved experience involves significant interaction and day-to-day functioning in the host language, including use of the target language on a daily basis such as in college-level courses, a training program, or a work experience. The immersion experience need not involve attendance in an academic program only, but may take some form such that the language of routine communication is the target language. Simply living with relatives or traveling as a tourist is not considered an immersion

experience for the purposes of the World Language Education Program. Most students choose to participate in a structured educational or exchange immersion program.

Students should consult with the [International Academic Programs \(IAP\)](http://www.studyabroad.wisc.edu) (<http://www.studyabroad.wisc.edu>) office, 106 Red Gym, regarding campus-based study abroad programs. These experiences need not receive prior approval. Experiences through off-campus programs must have prior approval of the World Language Education faculty program coordinator. To obtain prior immersion experience approval, download and complete the [approval form](http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/) (<http://www.education.wisc.edu/soe/academics/undergraduate-students/forms/>), meet with the WLE program coordinator, and obtain authorization. Bring two copies of the form to your meeting, obtain signatures on both, and leave one copy with the coordinator.

Native speakers are normally considered to have fulfilled this requirement without further documentation, especially if they received their secondary education in an environment where the target language is the primary means of communication. Heritage speakers are usually considered to have fulfilled this requirement; applicants must consult with the program coordinator about this requirement.

PROFESSIONAL EDUCATION REQUIREMENTS (PROFESSIONAL SEQUENCE)

ABOUT THE PROFESSIONAL SEQUENCE

The professional program is typically a full-time, four-semester sequence of education courses and school-based field experiences. The four semesters of required professional coursework must be followed sequentially and taken in consecutive semesters. Students must enroll in all required coursework outlined in each semester of the program, even if similar coursework was taken at another institution. Students begin the professional sequence in the fall.

It is expected that the immersion experience and almost all major and liberal studies coursework be completed by the start of the professional sequence; completion of the entire major is preferred. The structure of the sequence allows very little time to pursue remaining coursework in these areas.

ACTFL OPI certification of speaking ability in the language rated Intermediate High or above is required by the end of the first semester in the program. Students must also complete the Writing Proficiency Test (WPT) no later than their third semester in the program. A rating of Intermediate High or above must be earned before a student is allowed to participate in the final student teaching semester. See further information under Oral and Written Proficiency Exams.

Students admitted to two areas of language certification follow the same four-semester sequence as single certification students; consult with the World Language Education program coordinator to arrange sequence requirements.

The professional program is a full-time commitment and places heavy demands on students' time and energy. Students must make satisfactory progress in their program to continue. This professional judgment is made by the faculty program coordinator in consultation with cooperating teachers and supervisors.

PROFESSIONAL SEQUENCE COURSES

Complete all of the courses listed below. *Required courses* must be taken during the semester listed. *Other courses* may be taken at any time, including summer, but a suggested course sequence is provided.

Code	Title	Credits
Semester 1		
<i>Required Courses</i>		
CURRIC 342	Teaching World Languages (K-8)	3
CURRIC 243	Practicum in World Languages (K-12) ¹	3
<i>Other Courses</i>		
ED POL 300 or ED POL/ HISTORY 412	School and Society History of American Education	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
ED PSYCH 301	How People Learn	3
Semester 2		
<i>Required Courses</i>		
CURRIC 442 or CURRIC 443	Student Teaching in World Languages (K-8) ² Student Teaching in World Languages (6-12)	6
<i>Other Courses</i>		
ED PSYCH 331	Human Development From Childhood Through Adolescence	3
Semester 3		
<i>Required Courses</i>		
CURRIC 343	Teaching World Languages (6-12)	3
CURRIC 443 or CURRIC 442	Student Teaching in World Languages (6-12) ³ Student Teaching in World Languages (K-8)	6
<i>Other Courses</i>		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Semester 4		
<i>Required Courses</i>		
CURRIC 443	Student Teaching in World Languages (6-12) ⁴	9
CURRIC 564	Advanced Problems on the Teaching of World Languages	3

1

The practicum will take place three days a week; placement will probably be at the elementary level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar. Placements are made within a 50-mile field experiences service area and may not necessarily be in the city of Madison.

2

Placement will probably be at the elementary level, three days a week. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the UW–Madison calendar.

3

Placement will probably be at the middle school level. Fieldwork this semester is a half-time commitment and encompasses an entire semester based on the school district calendar. (Fall semester extends from late August through mid-January; spring semester extends from mid-January through early mid-June.)

4

Student teaching this semester is a full-time commitment and will be at the high school level. Fieldwork this semester encompasses an entire semester based on the school district calendar.

ELECTIVE COURSEWORK

Complete additional coursework as needed to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level major coursework
- 2.75 cumulative grade point average in all professional education coursework
- Degree candidates must complete at least 120 total credits.
- No more than 40 credits from a single academic department may be applied toward the 120 minimum credits required for graduation.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum work are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1744)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. In Semester 1, prior to starting student teaching, students must have acquired Intermediate High proficiency in their target language on the ACTFL OPI scale as measured by two independent external evaluators.

- In Year 1, student teachers must demonstrate the ability to teach in a K-8 context, as evaluated by their University supervisor and their mentor teacher through repeated direct observations.
- During their content courses, students must meet (a) teacher education standards; and (b) ACTFL standards, as measured by (a) formative and summative evaluation of their assignments; (b) Teacher Education portfolio.
- In Year 2, student teachers must demonstrate the ability to teach in a 6-12 school context, as evaluated by their University supervisor and their cooperating teacher through repeated direct observations.
- To get certified by the Department of Public Instruction, at the end of Year 2, student teachers must have successfully completed an EdTPA Portfolio of their classroom experiences that demonstrates professionalism and meets the EdTPA standards, as evaluated by external evaluators.

FOUR-YEAR PLAN

Spanish Major: Sample Graduation Plan

This sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

The requirements and structure of this degree program extend graduation beyond the typical four years. Proficiency in the language must be developed before embarking on the required immersion experience. A four-semester professional education sequence follows the immersion experience, beginning in the fall semester. Most students in Spanish Education enter UW-Madison having completed the first four semesters of the language; this level of proficiency is reflected in the plan.

Freshman

Study abroad course availability will influence the selection of UW-Madison courses in the major.

ADVISING AND CAREERS

SPANISH EDUCATION ADVISING

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Spanish. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult the undergraduate advisor

(<https://spanport.wisc.edu/undergrad-advising/>) in the Spanish and Portuguese department if interested in this field of study.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the program can be found on the Curriculum and Instruction (<http://>

ci.education.wisc.edu/) and Spanish and Portuguese (<http://spanport.wisc.edu/home/>) departmental websites.

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their

own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.

- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW–Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department

of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9*, *Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

for students in the School of Education can be found on the school's Resources (p. 1541) page.

SPANISH, SED MINOR

WORLD LANGUAGE EDUCATION PROGRAM (CHINESE, FRENCH, GERMAN, ITALIAN, JAPANESE, LATIN, PORTUGUESE AND SPANISH MAJORS AND MINORS)

The undergraduate World Language Education Program, including the Spanish major and minor, was suspended in the fall of 2020 and will be discontinued at the undergraduate level as of fall 2023. A new, graduate-level program in World Language Education is under development and will provide teacher certification in these languages. Contact the Department of Curriculum and Instruction, curric@education.wisc.edu, regarding the status of this new program.

The information included here in the *Guide* is still provided as a resource for admitted undergraduate students.

HOW TO GET IN

Admissions to the Spanish Minor have been suspended as of fall 2020 and will be discontinued as of fall 2023. If you have any questions, please contact the department.

This minor is only available to students admitted to the World Language Education program, or to teachers already licensed to teach at an appropriate level and subject in Wisconsin. Undergraduate students interested in completing a certification minor in Spanish must also complete a major in another World Language certification subject area and be admitted to the World Language Education program. It is not possible to be certified only in a minor area. Consult with an Education Academic Services advisor to discuss the feasibility of combining this minor with the major subject area—not all combinations may be possible and will require approval of the WLE program coordinator. Interested students must apply and be admitted to both language subject areas. The oral proficiency exam, any written exams, and the immersion experience required for certification must be completed in both languages.

Note: The undergraduate World Language Education Program, including this minor, will be suspended in the fall of 2020. A new, graduate-level program is being developed for teacher certification in these languages.

The last group of undergraduates will be selected in the spring semester of 2020. Admission criteria have been modified from previous years to accommodate all students interested in applying for the final undergraduate cohort, including freshmen beginning in the fall of 2019. See the How to Get In section of the language major for more details about the application process, eligibility criteria and deadlines.

Licensed teachers interested in pursuing certification in this minor should consult with the World Language Education program director, Professor François Tochon, ftochon@education.wisc.edu, 544C Teacher Education Building.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources

REQUIREMENTS

Note: The oral proficiency exam, any written exams, and an immersion experience are required for certification in this language. Consult the major requirements (p. 1738) in this subject for an explanation of these requirements and the World Language Education professional sequence.

PREREQUISITE COURSEWORK

Complete the following or demonstrate proficiency at the equivalent levels.

Code	Title	Credits
SPANISH 101	First Semester Spanish	4
SPANISH 102	Second Semester Spanish	4
SPANISH 203	Third Semester Spanish	4
SPANISH 204	Fourth Semester Spanish	4

MINOR REQUIREMENTS

Complete a minimum of 24 credits. The Spanish minor also requires a minimum cumulative grade point average of 2.75, based on all Spanish minor coursework taken on the UW–Madison campus.

Code	Title	Credits
SPANISH 226	Intermediate Language Practice with Emphasis on Writing and Grammar	3
SPANISH 223	Introduction to Hispanic Cultures	3
SPANISH 224	Introduction to Hispanic Literatures	3
One advanced (300 level or above) literature or culture course		
One advanced (300 level or above) language practice or linguistics course		
Elective credits in Spanish, 300 level or above, to total 24 credits.		

ADVISING AND CAREERS

Consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, for general questions regarding certification to teach Spanish. Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person. Students may want to consult the undergraduate advisor (<https://spanport.wisc.edu/undergrad-advising/>) in the Spanish and Portuguese department if interested in this field of study.

DANCE

An undergraduate major in dance is an excellent means of gaining in-depth understanding and mastery of dance as an art form and an area of scholarly inquiry. Dance courses focus on the study of various dance techniques and movement practices, dance repertory, performance, improvisation, composition, movement analysis, body studies, dance

history, dance and politics, dance and identity, and dance writing. UW–Madison dance courses stress personal creativity, individual growth, strong technical training, and historical, theoretical, and interdisciplinary knowledge.

Two undergraduate options are offered in dance. The Bachelor of Fine Arts - Dance (p. 1756) (BFA) undergraduate degree program in dance is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science–Dance (p. 1750) option is designed for students who wish to prepare for graduate work in dance studies or related disciplines, or who wish to combine their interest in dance with other fields of study. The BFA requires a minimum of 85 major credits, including public presentations of original work, while the B.S. degree requires a minimum of 57 major credits. Students are admitted to the major in dance by audition (<https://dance.wisc.edu/admissions-and-aid/>).

The Dance department also offers four certificate programs open to students across the campus: a general certificate in Dance (p. 1762), a certificate in Dance Studies (p. 1748), a certificate in Dance/Movement Therapy (p. 1763), and a certificate in Pilates (p. 1764).

Dance elective courses are open to all university students. Most dance technique courses at the 100 level are open to all university students. Dance technique courses at the 200 level and above are also open to students with the prerequisite skill level; this is determined by placement auditions typically held during the first week of classes.

DEGREES/MAJORS/CERTIFICATES

- Dance Studies, Certificate (p. 1748)
- Dance, B.S. (p. 1750)
- Dance, BFA (p. 1756)
- Dance, Certificate (p. 1762)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1763)
- Pilates, Certificate (p. 1764)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (<http://dance.wisc.edu>).

DANCE STUDIES, CERTIFICATE

The Dance Studies Certificate is a 14-credit certificate program for any undergraduate student interested in the exploration of dance from an interdisciplinary, academic approach – to understand its political, social and historical significance. The certificate is designed to enhance a student's main area of study, and provide knowledge and skills in the analysis, interpretation, and contextualization of dance and movement in society and culture.

Courses in writing, body studies, history and theory will prepare students to integrate the physical and theoretical knowledge of dance in written, oral, and embodied forms. Coursework for this certificate will fulfill the Comm B requirement, Ethnic Studies requirement and some Humanities and Social Science breadth requirements. Students pursuing degrees

in the School of Education can also satisfy their Global Perspectives requirement with this coursework.

This program is designed for students in a broad range of disciplines including the arts, humanities, and social sciences. Students who wish to integrate dance research into their existing degree program, those considering graduate study in Dance Studies or a related field in the arts and humanities, including Art History, Theatre Studies, Performance Studies, or Cultural Studies, will benefit from this program.

This certificate program is flexible and can be completed primarily through summer coursework. Students can opt to complete the majority of the courses online, primarily in the summers, or through a mix of online and in-person courses in the summers and academic year.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Dance Studies Certificate. BS, BFA, and Certificate candidates in Dance are eligible for the Dance Studies Certificate as long as there is zero overlap of coursework. Undergraduate students in good academic standing may declare this certificate. University Special students who started as an undergraduate at UW-Madison, but graduated before completing the requirements are also eligible for this certificate.

Students should meet with the Dance Studies Certificate Advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form located on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page.

REQUIREMENTS

COURSE REQUIREMENTS

The Dance Studies Certificate requires the following course distribution for a minimum of 14 credits. At least 7 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

FOUNDATIONAL COURSE

All students are required to complete the following:

Code	Title	Credits
DANCE 200	Writing the Moving Body	3

BODY STUDIES

Select 2 credits from the following:

Code	Title	Credits
DANCE 110	Workshop in Dance Activity	1-2
DANCE 101	Ballroom Dance I	1
DANCE 102	Ballroom Dance II	1
DANCE 103	Modern Jazz Dance	1
DANCE 105	Ballet I	1
DANCE 106	Ballet II	1
DANCE 107	Contemporary Dance I	1
DANCE 108	Contemporary Dance II	1

DANCE 115	Hip-Hop Dance Technique and Theory I	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2
DANCE 131	Somatic Theory and Practices	2
DANCE 132	Workshop in Body Studies and Practices	1
DANCE 133	Relaxation Techniques for Embodiment and Stress Management	1
DANCE 135	Pilates Mat I	1
DANCE 136	Pilates Equipment I	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 213	New Movement Techniques	1-2
DANCE/ THEATRE 218	African Dance Performance	2
DANCE 231	Introduction to Dance/Movement Therapy	2
DANCE 235	Pilates Mat II	1
DANCE 236	Pilates Equipment II	2
DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE 330	Functional Anatomy for Movement Practices	1

DANCE THEORY

Select 3 credits from the following:

Code	Title	Credits
DANCE 168	Dancing Gender: Embodiment, Politics and Feminist Theory	3
DANCE 268	Political and Cultural Perspectives in Dance Studies	3

DANCE HISTORY

Select 3 credits from the following:

Code	Title	Credits
DANCE 165	World Dance Cultures: Traditional to Contemporary	3
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3

ETHNIC STUDIES BREADTH

Select 3 credits from the following:

Code	Title	Credits
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3

CERTIFICATE COMPLETION REQUIREMENT

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW–Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

1. Gain understanding of the main approaches and methodologies of the field of dance studies as an academic approach to dance with an interdisciplinary focus.
2. Engage with dance as a site through which cultural, social, and political identities are constructed, manifested, and negotiated.
3. Analyze dance in relation to the social, cultural, and historical circumstances in which it is embedded.
4. Integrate physical and theoretical knowledge of dance in written, oral, and embodied forms.

DANCE, B.S.

Students pursuing an undergraduate degree in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree provides a foundation for eventual careers in professional dance, dance teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Science (B.S.) degree in Dance requires a minimum of 57 major credits and is designed for students who wish to pursue a degree in dance and another major or degree program in a second area of interest.

A dance degree at UW–Madison offers opportunities to:

- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Pursue an additional major or degree in a second area of interest.
- Experience an interdisciplinary, rigorous approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.
- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in November and February.

The Dance department also offers four certificates: a general certificate in Dance (p. 1762), a certificate in Dance Studies (p. 1748), (p. 1748) a certificate in Dance/Movement Therapy (p. 1763), and a certificate in Pilates (p. 1764).

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply/>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with a Student Services advisor in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

ADMISSION AND APPLICATION

CRITERIA FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next.

Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- Students who have transferred to and are currently enrolled in UW–Madison coursework must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major.

Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The B.S. degree in dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.
- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
DANCE 560	Current Topics in Dance: Workshop (Anatomy for Dancers) or ANAT&PHY 338 Human Anatomy Laboratory	2

MAJOR REQUIREMENTS

Complete a minimum of 57 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 3–5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures: Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 14 credits from the following; 6 credits must be numbered 211 or higher.

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3

Ballet Technique

Select a minimum of 8 credits from the following; 4 credits must be numbered 225 or higher.

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2

DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2

Additional Techniques

Select a minimum of 2 credits. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE/FOLKLORE/ THEATRE 421	Javanese Performance Repertory	2

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 140	Dance Production	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 162	First Year Workshop	1
DANCE 240	Dance Production Laboratory	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
Design - Complete one of:		3-4
DANCE/ART 341	Sound Design for the Performing and Visual Arts	
DANCE 345	Video Design for the Performing and Visual Arts	
ART 318	Introduction to Video, Performance & Installation Art	
ART 518	Artist's Video	
ART 531	Screen Performance	
DANCE 355	Dance Composition II	2
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3

DANCE 462	Senior Seminar	3
DANCE 463	Senior Project	1-2
Select 3 credits from the following:		3
DANCE 451	Dance Repertory Theater	
DANCE 452	Dance Repertory Theater	

ELECTIVE COURSEWORK

Complete additional coursework, if necessary, to reach the minimum of 124 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements below are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 124 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

strongly recommended and included in this plan as electives. Bachelor of Science - Dance students must present their senior projects in an approved public forum.

Freshman

Fall	Credits	Spring	Credits
Communication A (fall or spring semester)	3	Communication A (fall or spring semester)	3
DANCE 111 (meets M,W,F)	3	DANCE 112	3

LEARNING OUTCOMES

1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

FOUR-YEAR PLAN

Bachelor of Science: Dance – Sample Four Year Plan

This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 (<http://guide.wisc.edu/search/?P=DANCE%20111>) Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 (<http://guide.wisc.edu/search/?P=DANCE%20125>) Ballet Technique I, and DANCE 162 (<http://guide.wisc.edu/search/?P=DANCE%20162>) First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique.

This degree requires a minimum of 124 credits. Contemporary dance technique and theory classes beyond the minimum requirement are

ADVISING AND CAREERS

DANCE DEPARTMENT ADVISING

Each freshmen cohort is assigned a faculty mentor who guides their artistic and academic progress until graduation. All dance majors receive targeted advising from Karen McShane-Hellenbrand (<http://dance.wisc.edu/dance/people/instructional-staff/karen-mcshane-hellenbrand/>), who assists students in choosing classes and evaluating their degree path. Students undergo a yearly review with a faculty panel that provides feedback on their progress in the degree program. Faculty mentors in the department include Kate Corby (<http://dance.wisc.edu/dance/people/faculty/kate-corby/>), Andrea Harris (<http://dance.wisc.edu/dance/people/faculty/andrea-harris/>), Duane Lee Holland Jr. (<https://dance.wisc.edu/dance/people/faculty/duane-holland/>), Li Chiao-Ping (<http://dance.wisc.edu/dance/people/faculty/li-chiao-ping/>), Marlene Skog (<http://dance.wisc.edu/dance/academics/bs-program/>), Chris Walker (<https://www.dance.wisc.edu/dance/people/faculty/chris-walker/>), Jin-Wen Yu, (<http://dance.wisc.edu/dance/people/faculty/jin-wen-yu/>) and Natalie Zervou (<https://dance.wisc.edu/dance/people/faculty/natalie-zervou/>).

Advising in dance is primarily conducted through the Department of Dance, 608-262-1691, 125 Lathrop Hall, 1050 University Avenue. Students also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns, see below. Current students can schedule an appointment online through the

Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in dance have searched for titles such as Choreographer, Professional Dancer, Production Designer, and Dance Teacher.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://dance.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ACCREDITATION

ACCREDITATION

National Association of Schools of Dance (<https://nasd.arts-accredit.org/>)

Accreditation status: Accredited. Next accreditation review: 2018-2019, site visit postponed until Spring 2022 due to COVID-19, final report forthcoming.

DANCE, BFA

Students pursuing an undergraduate degree in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree provides a foundation for eventual careers in professional dance, dance teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Fine Arts (BFA) in Dance requires a minimum of 85 major credits and is designed for students who wish to spend more time preparing for a professional career in dance.

A dance degree at UW–Madison offers opportunities to:

- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Pursue an additional major or degree in a second area of interest.
- Experience an interdisciplinary, rigorous approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.

- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in November and February.

The Dance department also offers four certificates: a general certificate in Dance (p. 1762), a certificate in Dance Studies (p. 1748), a certificate in Dance/Movement Therapy (p. 1763), and a certificate in Pilates (p. 1764).

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply/>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>), to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with a School of Education advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education*

Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

ADMISSION AND APPLICATION CRITERIA FOR ADMISSION

Requirements and selection criteria may be modified from one application/admission period to the next. Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- On-campus transfer students must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The BFA degree in Dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.
- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
DANCE 560	Current Topics in Dance: Workshop (Anatomy for Dancers)	2
	or ANAT&PHY 338 Human Anatomy Laboratory	

MAJOR REQUIREMENTS

Complete a minimum of 85 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 11 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures:

Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 18 credits from the following; at least 9 credits must be from DANCE 311 Contemporary Dance Technique and Theory V or DANCE 312 Contemporary Dance Technique and Theory VI. Note: 100- and 200-level technique classes must be taken for 3 credits; 300 and 400 level may be taken for 2 credits.

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	
DANCE 112	Contemporary Dance Technique and Theory II	
DANCE 211	Contemporary Dance Technique and Theory III	
DANCE 212	Contemporary Dance Technique and Theory IV	
DANCE 311	Contemporary Dance Technique and Theory V	
DANCE 312	Contemporary Dance Technique and Theory VI	

Ballet Technique

Select a minimum of 14 credits from the following; 10 must be numbered 225 or higher:

Code	Title	Credits
DANCE 125	Ballet Technique I	
DANCE 126	Ballet Technique I-B	
DANCE 225	Ballet Technique II	
DANCE 226	Ballet Technique II-B	
DANCE 325	Ballet Technique III	
DANCE 326	Ballet Technique III-B	

Additional Techniques

Select a minimum of 6 credits of the following. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3

DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE/FOLKLORE/ THEATRE 421	Javanese Performance Repertory	2

BODY STUDIES

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
Select 4 credits of the following:		4
DANCE 110	Workshop in Dance Activity (Yoga)	1-2
DANCE 132	Workshop in Body Studies and Practices	
DANCE 135	Pilates Mat I	
DANCE 235	Pilates Mat II	
DANCE 136	Pilates Equipment I	
DANCE 236	Pilates Equipment II	
DANCE 213	New Movement Techniques	

CRITICAL AND CREATIVE INVESTIGATIONS

Code	Title	Credits
DANCE 140	Dance Production	2
MUSIC 151	Basic Concepts of Music Theory	3
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 162	First Year Workshop	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
Design - Complete one of the following:		3-4
DANCE/ART 341	Sound Design for the Performing and Visual Arts	
DANCE 345	Video Design for the Performing and Visual Arts	
ART 318	Introduction to Video, Performance & Installation Art	
ART 518	Artist's Video	
ART 531	Screen Performance	
DANCE 355	Dance Composition II	2
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3
DANCE 374	Teaching Dance	3
Dance Repertory Theater - Complete 6 credits from the following:		6
DANCE 451	Dance Repertory Theater	
DANCE 452	Dance Repertory Theater	
DANCE 455	Dance Composition III	2
DANCE 462	Senior Seminar	3
DANCE 463	Senior Project	1-2

PUBLIC PRESENTATIONS

BFA students must create one solo and one group piece (trio or larger) after the completion of DANCE 225 Ballet Technique II. These works must be submitted for faculty approval and publicly presented in concert. Senior projects must be presented in an approved public forum.

ELECTIVE CREDITS

Complete additional coursework, if necessary, to reach the minimum of 125 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 125 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

FOUR-YEAR PLAN

Dance: Bachelor of Fine Arts – Sample Four Year Plan

This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200 and 300-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance–B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 (<http://guide.wisc.edu/search/?P=DANCE%20111>) Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 (<http://guide.wisc.edu/search/?P=DANCE%20125>) Ballet Technique I, and DANCE 162 (<http://guide.wisc.edu/search/?P=DANCE%20162>) First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique.

This degree requires a minimum of 125 credits, although additional contemporary dance technique and theory courses are strongly

recommended. This plan includes 7 credits beyond the minimum requirement in this area. BFA Dance students must create one Solo and one Group piece (trio or larger) after completion of 255. These works must be faculty approved for public presentation.

Some Dance department courses meet both the ethnic studies and additional techniques requirements. If this option is selected, a three-credit liberal studies course must be completed this semester.

ADVISING AND CAREERS

DANCE DEPARTMENT ADVISING

Each freshmen cohort is assigned a faculty mentor who guides their artistic and academic progress until graduation. All dance majors receive targeted advising from Karen McShane-Hellenbrand (<http://dance.wisc.edu/dance/people/instructional-staff/karen-mcshane-hellenbrand/>), who assists students in choosing classes and evaluating their degree path. Students undergo a yearly review with a faculty panel that provides feedback on their progress in the degree program. Faculty mentors in the department include Kate Corby (<http://dance.wisc.edu/dance/people/faculty/kate-corby/>), Andrea Harris (<http://dance.wisc.edu/dance/people/faculty/andrea-harris/>), Duane Lee Holland Jr. (<https://dance.wisc.edu/dance/people/faculty/duane-holland/>), Li Chiao-Ping (<http://dance.wisc.edu/dance/people/faculty/li-chiao-ping/>), Marlene Skog (<http://dance.wisc.edu/dance/academics/bs-program/>), Chris Walker (<https://www.dance.wisc.edu/dance/people/faculty/chris-walker/>), Jin-Wen Yu, (<http://dance.wisc.edu/dance/people/faculty/jin-wen-yu/>) and Natalie Zervou (<https://dance.wisc.edu/dance/people/faculty/natalie-zervou/>).

Advising in dance is primarily conducted through the dance department, 608-262-1691, 125 Lathrop Hall, 1050 University Avenue. Students also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns, see below. Current students can schedule an appointment online through the

Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in dance have searched for titles such as Choreographer, Professional Dancer, Production Designer, and Dance Teacher.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (<http://dance.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

ACCREDITATION

ACCREDITATION

National Association of Schools of Dance (<https://nasd.arts-accredit.org/>)

Accreditation status: Accredited. Next accreditation review: 2018-2019, site visit postponed until Spring 2022 due to COVID-19, final report forthcoming.

DANCE, CERTIFICATE

Dance Certificate students are involved in the Dance department's community in a meaningful way through participating in performance and choreography opportunities. Students pursuing the Dance Certificate often have an extensive background in dance, but may not be seeking a degree in dance. Other students are beginning dance students who have always wanted to study dance. There is a place for all interested students in our certificate.

HOW TO GET IN

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, may declare this certificate.

Students must meet with the dance certificate advisor to discuss their intention to pursue the certificate. Students will enroll in two semesters of dance technique and apply for admission to the Dance Certificate at the end of the second semester. Students intending to pursue the Dance Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

COURSE REQUIREMENTS

The Dance Certificate requires the following course distribution for a minimum of 19 credits.

CONTEMPORARY DANCE TECHNIQUE AND THEORY

Select 6 credits from the following:

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3

BALLET TECHNIQUE

Select 2 credits from the following:

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2

ADDITIONAL TECHNIQUES

Select 2 credits from the following. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop .

Code	Title	Credits
DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/FOLKLORE/ THEATRE 321	Javanese Performance	2
DANCE/FOLKLORE/ THEATRE 421	Javanese Performance Repertory	2

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131 or DANCE 157	Somatic Theory and Practices Introduction to Movement Analysis	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 255	Movement Composition for the Performing and Visual Arts	2

DANCE 265	Dance History I: Western Theatrical Dance from the Renaissance through the 1920s	3
or DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	

This certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

HOW TO GET IN

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate technical specificity, musicality and artistic confidence in ballet and contemporary dance techniques through sequenced skill level progressions.
2. Recognize, identify and embody a wide range of somatic theories and practices and produce work investigating its impacts and uses in contemporary dance as practice.
3. Demonstrate an intermediate level of contemporary dance literacy and artistry.
4. Develop and practice vocabulary and methodology for analyzing and discussing dance in performance and historical contexts and begin to respond critically and thoughtfully to dance scholarship.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (<http://dance.wisc.edu>).

INTRODUCTORY STUDIES IN DANCE/ MOVEMENT THERAPY, CERTIFICATE

Dance/movement therapy (DMT) is one of the creative arts therapies. It is a form of psychotherapy that uses movement, both creative and functional, as well as words, to help people—those who are generally healthy as well as those dealing with emotional, mental, or physical problems—to regain a sense of wholeness by experiencing the fundamental unity of body, mind, and spirit. The dance therapy certificate introduces students to the fascinating nonverbal aspects of human communication and its applications to a wide range of other fields such as social work, teaching, occupational therapy, physical therapy, and communication disorders.

Students will also be introduced to the use of movement in the fields of violence prevention, behavior management, and social skills development from a movement or body/mind perspective. Students who complete this certificate are prepared to attend graduate school in the field of dance/movement therapy, a requirement for the professional practice in this field, or to use embodied practices in related fields. In addition, students develop a repertoire of strategies to help cope with the stress and anxiety inherent in college life and develop insights into their own body/mind connections.

DECLARATION PROCESS

Prospective certificate students should meet with the Dance/Movement Therapy Certificate advisor to discuss their intentions to pursue the certificate. Enroll in the first- or second-semester dance/movement therapy course:

- DANCE 231 Introduction to Dance/Movement Therapy *or*
- DANCE 232 Introduction to Dynamics of Dance Therapy.

Application is usually made directly after the completion of Introduction to Dynamics of Dance Therapy. Students intending to pursue the Dance/Movement Therapy Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

The DMT certificate requires a minimum of 19 credits.

SUPPORTIVE DISCIPLINARY COURSEWORK

Choose a course (3-credit minimum) from the following departments: Counseling Psychology (http://guide.wisc.edu/courses/coun_psy/), Educational Psychology (http://guide.wisc.edu/courses/ed_psy/), Psychology (<http://guide.wisc.edu/courses/psych/>), Rehabilitation Psychology and Special Education (http://guide.wisc.edu/courses/rp_se/).

DANCE DEPARTMENT COURSEWORK

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 231	Introduction to Dance/Movement Therapy	2
DANCE 232	Introduction to Dynamics of Dance Therapy	2
DANCE 331	Dynamics of Dance Therapy	3
DANCE 431	Dance Therapy Practicum	3

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. (Body Studies) Gain skill in expressing through movement and understanding its connection to emotion.
2. Develop literacy about the field of Dance/Movement Therapy.
3. Practice and practical work in movement analysis as a tool for Dance/Movement Therapy.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (<http://dance.wisc.edu>).

PILATES, CERTIFICATE

The Pilates certificate (20 credits) includes coursework that covers the classic Pilates mat and equipment repertoire, current teaching methods, and functional anatomy. The certificate prepares students to teach Pilates in a studio setting, and also creates a practical foundation for those who wish to pursue graduate work in movement-based fields.

Students commonly pair the certificate with dance or kinesiology majors, although it is open to all interested students. The curriculum can be completed in 2–2.5 years, including two summer courses. Upon completion, students are encouraged to sit for the Pilates Method Alliance certification exam to earn their credentials as nationally certified Pilates teachers.

This certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<http://guide.wisc.edu/nondegree/>).

HOW TO GET IN

DECLARATION PROCESS

Students should meet with the Pilates certificate advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form (<https://education.wisc.edu/academics/certificates/>) located on the School of Education's Certificate Programs page.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

The Pilates certificate requires a minimum of 20 credits. Collette Stewart is the advisor for the Pilates certificate, stewart1@wisc.edu; interested students should contact her for an advising appointment.

Code	Title	Credits
DANCE 135	Pilates Mat I	1
DANCE 136	Pilates Equipment I	2
DANCE 235	Pilates Mat II	1
DANCE 236	Pilates Equipment II	2
DANCE 237	Pilates Studio I	3

DANCE 330	Functional Anatomy for Movement Practices	1
DANCE 337	Pilates Studio II	3
DANCE 375	Pilates Teaching Methods	1
DANCE 376	Pilates Teaching I	3
DANCE 476	Pilates Teaching II	3

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. (Pilates Practice - Strength, Focus, Movement Efficiency) Demonstrate proficiency in Pilates exercises, including fundamental exercises and beginner through advanced mat and equipment work. Students will show significant improvement in body awareness, physical skill and strength, and efficient movement patterning.
2. (Pilates Teaching - Safety, Clarity, Communication) Confidently teach one-on-one and group Pilates classes, effectively communicating physical and conceptual ideas about the body to a variety of learning styles, body types and physical backgrounds.
3. (Anatomical Approaches to Pilates) Integrate current anatomical research into practice and teaching, using a variety of somatic approaches to embodying healthy anatomical function.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (<http://dance.wisc.edu>).

EDUCATION - SCHOOL-WIDE

DEGREES/MAJORS/CERTIFICATES

- Individual Major, BSE (p. 1764)

INDIVIDUAL MAJOR, BSE

The individual major provides undergraduates with an opportunity to develop a unique course of study; one that is interdepartmental and not reflected in existing degree programs. Completion of the individual major does not lead to a professional license or certification, although graduates may be interested in pursuing alternative educational careers or graduate work. Graduates earn a B.S.—Education degree.

HOW TO GET IN

ADMISSION ELIGIBILITY REQUIREMENTS

To be eligible, applicants must:

- earn a 2.75 cumulative GPA on the UW–Madison campus.¹
- complete a minimum of 54 credits
- receive approval of major program proposal submitted by the applicant.

1

For alternative calculation of cumulative GPA, see Last 60 Credits Rule.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to the program. GPAs will be calculated using

- all transferable college-level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

APPLICATION PROCEDURES

Once a committee of three persons has been chosen in accord with the guidelines and required courses have been selected, students should proceed as follows:

- Submit an Individual Major in Education proposal form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>).
- Submit the program plan and narrative with the transfer application for associate dean's approval. The three-member committee must sign the proposal in the spaces indicated. Failure to submit a program narrative will void the transfer.

Once an application form has been submitted, changes must be approved by both the chair of the committee and the associate dean. Changes must be recorded on the program plan. If more than two program changes are made, a new application form must be filed by the student.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as

needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (B.S.) degree program with an individual major has three components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major* requirements permit in-depth study of a unique area within the School of Education. Students create their own, interdepartmental major following the guidelines established by the school. When completed, the title of the individual major is listed on the student's transcript.
- *Elective* credits make it possible to pursue additional areas of interest and are necessary to reach the minimum of 120 credits required for the degree.

REQUIREMENTS OF THE INDIVIDUAL MAJOR

DEVELOPMENT OF THE MAJOR

Students must have an area of interest that they wish to develop into a 36–42 credit formalized program of study, or major. Advisors in Education Student Services, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss students' interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. A program title cannot duplicate the existing title of any program at UW–Madison.

SELECTION OF MAJOR COURSEWORK

Select courses that support the program narrative, in consultation with the major advisor; see below. **All courses in the major must be from School of Education course offerings.** All credits in the major must be completed after admission into the program (IME classification).

Additional requirements regarding the major are:

- To ensure depth and breadth of study, no more than two-thirds of the total credits in a major can be taken from any one department

(i.e., if a major is 36 credits, no more than 24 credits can be in one department).

- A sequential development of courses must be planned in consultation with the major advisor and committee, and must be approved by the committee. The course sequence must include beginning through advanced levels of work as prescribed by the credit distribution.
- At least 20 of the IME credits must be at the intermediate or advanced levels (generally numbered 300 or above, but this varies in some departments).
- Courses in the School of Education completed prior to admission to the IME classification may not be used toward satisfaction of the 36–42 credits in the major without the faculty committee and associate dean's approval. The credits may count toward the 120 credits required for graduation.
- Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- An individual major which essentially parallels an existing departmental major will not be accepted.
- Directed study credits (e.g. 399, 699) are acceptable, but each course must be accompanied by a statement that includes a description of the focus of study, the requirements for successful completion of the credits, and a discussion of the applicability of content to the proposed individual major. Usually no more than 3 credits of Independent Study will be allowed. Approval of the associate dean is required in order to exceed three credits.
- Students must complete prerequisites for all courses and, in some departments, may be required to complete foundational courses.

SELECTING THE ADVISORY COMMITTEE AND MAJOR ADVISOR

The applicant must create a three-member committee to oversee his or her work. Only assistant, associate, and full professors may serve on the committee; individuals holding such titles as Lecturer or Instructor cannot serve in this capacity. One of the committee members will be selected by the student to be the major advisor. The major advisor must be from a department within the School of Education and from the department in which the majority of courses for the individual major will be taken, i.e., the core area of study. The second faculty member must be from the same department as the major advisor/committee chair. The third faculty member must be from another department in the School of Education in which courses will be taken for the individual major. The associate dean serves as ex officio to the three-member committee and gives final approval to all programs and any exceptions.

ELECTIVE CREDITS

Elective credits make it possible to pursue additional areas of interest. Many students, for example, use their elective credits to complete an additional major from the College of Letters & Science. Some use this second major to complement their individual major, while others select second majors that are completely unrelated to their first. Elective credits are necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework. Graduation GPA requirements may be modified by the Last 60 Credits Rule (p. 1520).

- 2.75 cumulative grade point average.
- 2.75 cumulative grade point average across all major coursework
- 2.75 cumulative grade point average across all upper-level (numbered 300 and above) major coursework
- Degree candidates must complete at least 120 total credits.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

FOUR-YEAR PLAN

Individual Major: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Development of the Major

Students must have an area of interest that they wish to develop into a 36–42 credit formalized program of study, or major. Advisors in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss your interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. All courses in the major must be from School of Education course offerings and all credits in the major must be completed after admission into the major (IME classification). The title of the major cannot duplicate the existing title of any other major or program at UW–Madison. Consult the Guide for more information on creating an individual major and its requirements.

Freshman

Fall	Credits	Spring	Credits
Communication A (fall or spring semester)		3 Communication A (fall or spring semester)	3

Total Credits 120

1

At least 15 credits of major course work must be upper-level (numbered 300 and above) and taken in residence.

ADVISING AND CAREERS**ADVISING FOR THE INDIVIDUAL MAJOR**

Students interested in the Individual Major should first consult with an advisor in the School of Education Student Services office, see below. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Eventually, a committee to oversee the major will be formed and also provide advising in the major.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

EDUCATIONAL POLICY STUDIES

The Department of Educational Policy Studies offers many courses for undergraduate students, including courses in the history, sociology, anthropology, and philosophy of education, comparative and international education, and educational equity. Courses emphasize the social context of programs and impact of policies on equity, justice, and well-being. The department has strong ties with institutions and scholars in other countries.

The Department of Educational Policy Studies offers an undergraduate degree program in Education Studies (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/education-studies-bs/>). The Bachelor of Science degree in Education Studies is designed to

meet the needs of a growing number of undergraduate students who are interested in working in domestic and/or global educational policy and practice.

The Department features four certificate programs. The popular Educational Policy Studies (EPS) Certificate (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/educational-policy-studies-certificate/>) formalizes a student's interest in education policy, generally. The Social Justice and Education Certificate (p. 1779) provides students with a foundational understanding of the social, political, and economic inequities that shape our schools and broader society, as well as the ways in which educators, students, administrators, parents, and community members have sought to interrupt these inequities (historically and contemporarily). The Global Languages, Cultures, and Education Certificate (p. 1776) courses examine the relationships among cultural diversity, social inequality, and language. They provide students with skills to work globally, within and beyond schools, in the fields of language policy, planning, and programming and culture, communication, and education. Finally, courses in the International Education and Development Certificate (p. 1778) investigate the complex issues that shape international educational policies, programming, and practices as they address challenges such as poverty, inequality, forced migration, sustainability, colonialism, and human rights. Students explore careers in international development education and global service with governmental and non-governmental organizations, educational institutions, and community development organizations.

DEGREES/MAJORS/CERTIFICATES

- Education Studies, B.S. (p. 1769)
- Educational Policy Studies, Certificate (p. 1775)
- Global Cultures, Languages, and Education, Certificate (p. 1776)
- International Development and Education, Certificate (p. 1778)
- Social Justice and Education, Certificate (p. 1779)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu/>)

EDUCATION STUDIES, B.S.

The Education Studies degree program addresses urgent questions related to domestic and global education policy and practice. Majors will become well-informed leaders who can engage critically, thoughtfully, and ethically in educational policy debates and practices in Wisconsin, the U.S., and the world.

Education Studies students (<https://eps.education.wisc.edu/current-students/student-profiles/>) focus on the relationships among education, inequality, and social justice. They investigate work at the local, national, and global levels on the connections between education and other policy areas, including housing, healthcare, migration, justice, political reforms, economic development, and foreign policy. Students explore contemporary educational debates and have opportunities to engage in community-based learning, study abroad, internship, and research experiences related to education studies.

Our students have won grants (<https://eps.education.wisc.edu/about/student-awards/>) for research or applied work and awards (<https://eps.education.wisc.edu/about/student-awards/>) in writing, research, and community-engaged scholarship. They have participated in the Wisconsin in Washington (<https://studyabroad.wisc.edu/uwindc/>) courses and internship (<https://studyabroad.wisc.edu/wiw-internships/>) opportunities, as well as our signature study abroad program on Conflict, Human Rights, and Education in Colombia (<https://studyabroad.wisc.edu/program/?programId=672>).

Through coursework, projects, advising, and independent studies, the Education Studies major prepares students for work in educational and governmental agencies, non-governmental organizations (both domestic and international), think tanks, policy institutes, community organizations, and other out-of-school educational spaces. Graduates might serve as project officers, policy directors, youth workers, or in other positions of institutional leadership and will be well prepared to work in education-related organizations or to pursue advanced studies in educational policy at the master's and doctoral level.

Graduates will receive a Bachelor of Science degree in Education Studies from the School of Education. (This program does not lead directly to teacher certification; students interested in gaining teaching licenses after graduation may be aided in that pursuit by staff in the School of Education Student Services office or other Career Services (<https://careers.wisc.edu/>) offices on campus.)

Students interested in pursuing this major are encouraged to consult with advising staff at the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

The Education Studies major may be completed either as the primary major or as an additional ("double") major.

PRIMARY MAJOR IN EDUCATION STUDIES

Undergraduate students interested in completing the Bachelor of Science–Education Studies degree program will fulfill the School of Education's liberal studies, and other degree requirements in addition to the 30 credits required for the Education Studies major.

ADDITIONAL MAJOR IN EDUCATION STUDIES

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Education Studies as an additional major. Students completing Education Studies as an additional major do not need to complete the School of Education's liberal studies and other degree requirements. For application information, go directly to the Additional Major in Education Studies (p. 1770) section below.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

Incoming freshmen enter directly into the Bachelor of Science–Education Studies degree program upon admission to UW–Madison; list Education Studies as the intended major. No additional application to Education Studies is required. See

UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

All other on-campus students will submit an application following a meeting with an advisor in the School of Education Student Services office. Call 608-262-1651 to schedule an appointment; current students can also schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

PROSPECTIVE TRANSFER STUDENTS

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Transfer students enter directly into the Bachelor of Science–Education Studies degree program upon admission to UW–Madison; list Education Studies as the intended major. No additional application to Education Studies is required. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science–Education Studies degree program. No additional application to Education Studies is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application to UW–Madison. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

APPLICATION AND ADMISSION

While new first year students and off-campus transfers are admitted directly to the Bachelor of Science–Education Studies degree program, all other current UW–Madison students seeking to enter the B.S.–Education Studies degree program must apply for admission to the program. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants must consult with an advisor in the School of Education Student Services

office prior to submitting an application. Call 608-262-1651 to schedule an appointment; current students can also schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

CRITERIA FOR ADMISSION

Eligibility for admission consideration to Bachelor of Science–Education Studies degree:

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule described below. Note: Students declaring Education Studies as an additional major are not held to this requirement.
- Submission of all required application materials, including program application and transcripts.

Last 60 Credits Rule

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

ADDITIONAL MAJOR IN EDUCATION STUDIES

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Education Studies as an additional major. Students wishing to declare the additional major must visit an advisor in the School of Education Student Services office to complete the declaration form; call 608-262-1651 or schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. The declaration must also be approved by the student's home school/college.

An additional major in Education Studies only requires the completion of the 30 credit major. Students do not need to complete the School of Education's liberal studies and other degree requirements for the additional major. Applicants are not held to the 2.5 cumulative GPA required of students completing the Education Studies degree program.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Education Studies program has three primary components:

- *Liberal studies* and *general education* courses that expose students to a broad range of academic disciplines.
- *Major* coursework in education studies, including core course, depth, and breadth requirements. Students choose either a U.S. or Global concentration.
- *Elective* credits to pursue individual areas of interest. Education Studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the Education Studies degree program makes it possible to complete an additional major and still graduate in four years.

MAJOR REQUIREMENTS

The Education Studies major requires 30 credits, to include core courses (9 credits), depth requirements (12 credits) and breadth requirements (9 credits). Students will select either a U.S. concentration or Global Concentration to fulfill the depth requirement of the major.

CORE COURSES, 9 CREDITS

Complete the following:

Code	Title	Credits
ED POL 240	Comparative Education	3
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	3

DEPTH REQUIREMENTS, 12 CREDITS

Complete a minimum of four courses (12 credits) in either the United States or Global concentration to facilitate in-depth study of education policy and practice.

U.S. Concentration

Code	Title	Credits
ED POL/ HISTORY 107	The History of the University in the West	3
ED POL 140	Introduction to Education	3
ED POL/ HISTORY 143	History of Race and Inequality in Urban America	3

ED POL 145	Introduction to Education Policy	3
ED POL 150	Education and Public Policy (U.S. topics only)	3
ED POL 180	Education and White Supremacy	3
ED POL 200	Race, Ethnicity, and Inequality in American Education	3
ED POL 202	Careers in Education	3
ED POL 205	Language and Social Inequality	3
ED POL 210	Youth, Education, and Society	3
ED POL 212	Education for Social Justice	3
ED POL 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 305	Democracy and Education	3
ED POL 320	Climate Change, Sustainability, and Education	3
ED POL 423	Education for Global Change	3
ED POL 450	Rethinking "After-School" Education	3
ED POL 460	Immigration, Education, and Equity	3
ED POL/ HISTORY 478	Comparative History of Childhood and Adolescence	3
ED POL 500	Topics on Social Issues and Education (U.S. topics only)	3
ED POL 501	Qualitative Research Methods in Education	3
ED POL 505	Issues in Urban Education in the U.S.	3
ED POL 510	Urban School Policy	3
ED POL/CURRIC/ RELIG ST 516	Religion and Public Education	3
ED POL 518	Introduction to Debates in Higher Education Policy	3
ED POL/PHILOS 545	Philosophical Conceptions of Teaching and Learning	3
ED POL/PHILOS 550	Philosophy of Moral Education	3
ED POL/ GEN&WS 560	Gender and Education	3
ED POL/ AFROAMER 567	History of African American Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3
ED POL 575	Education Policy and Practice	3
ED POL 595	Language Politics and Education	3
ED POL 600	Problems in Educational Policy (U.S. topics only)	3
ED POL/ HISTORY 612	History of Student Activism from the Popular Front to Black Lives Matter	3
ED POL/ HISTORY 622	History of Radical and Experimental Education in the US and UK	3
ED POL/SOC 648	Sociology of Education	3
ED POL/ HISTORY 665	History of the Federal Role in American Education	3

Global Concentration

Code	Title	Credits
ED POL/ HISTORY 107	The History of the University in the West	3
ED POL 140	Introduction to Education	3
ED POL 150	Education and Public Policy (Global topics only)	3
ED POL 205	Language and Social Inequality	3
ED POL 212	Education for Social Justice	3
ED POL 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 260	Introduction to International Education Development	3
ED POL 320	Climate Change, Sustainability, and Education	3
ED POL/INTL ST 335	Globalization and Education	3
ED POL 420	Education in East Asia	3
ED POL 423	Education for Global Change	3
ED POL 435	Education in Emergencies	3
ED POL 460	Immigration, Education, and Equity	3
ED POL/ HISTORY 478	Comparative History of Childhood and Adolescence	3
ED POL 500	Topics on Social Issues and Education (Global topics only)	3
ED POL 501	Qualitative Research Methods in Education	3
ED POL/CURRIC/ RELIG ST 516	Religion and Public Education	3
ED POL/ GEN&WS 560	Gender and Education	3
ED POL 595	Language Politics and Education	3
ED POL 600	Problems in Educational Policy (Global topics only)	3
ED POL/ HISTORY 622	History of Radical and Experimental Education in the US and UK	3
ED POL 675	Introduction to Comparative and International Education	3
ED POL/CURRIC 677	Education, Health and Sexuality: Global Perspectives and Policies	3

BREADTH REQUIREMENTS, 9 CREDITS

Code	Title	Credits
Required Breadth Course		
Complete one of the following:		3
ED PSYCH 301	How People Learn	
ED PSYCH 320	Human Development in Infancy and Childhood	
ED PSYCH 321	Human Development in Adolescence	
ED PSYCH 331	Human Development From Childhood Through Adolescence	

Additional Breadth Course Options

Complete additional coursework from the concentration NOT selected above, or from the courses listed below. ED PSYCH 301, 320, 321 and 331 may also count here, but not toward both breadth requirements.

CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	3
CURRIC/CHICLA 321	Chicano/Latino Educational Justice	3
CURRIC 331	Taking Education Outside of School	3
CURRIC 366	Internationalizing Educational Knowledge	3
CURRIC/C&E SOC/ ENVIR ST 405	Education for Sustainable Communities	3
ED PSYCH 326	Mind, Brain and Education	3
ED PSYCH 506	Contemporary Issues in Educational Psychology	3
ED PSYCH 541	Applied Behavior Analysis in Classrooms	3
ELPA 640	Legal Rights and Responsibilities for Teachers	1-3
INTER-LS 300	Topics in Teaching and Learning in the Letters, Arts, and Sciences (Understanding and Improving Instruction topic only; other topics require approval)	3

ELECTIVE CREDITS

Complete additional credits to complete the minimum of 120 required for the degree. Education Studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the Education Studies degree program makes it possible to complete an additional major and still graduate in four years.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework (“upper-level” defined as numbered 300 and above).
- Major Residency: Students must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are

planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Formulate research-based arguments on topics in education policy using academic literature, including both primary and secondary sources.
2. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.
3. Examine education policy from multiple theoretical perspectives (e.g., ethical/philosophical, economic/political, etc.).
4. Learn to use different historical and/or qualitative social-science methods to answer major questions in education policy research, both contemporary and enduring.
5. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

FOUR-YEAR PLAN

Education Studies: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

EDUCATION STUDIES ADVISING

Students are advised by staff from the School of Education Student Services office (Room 139 Education Building) at SOAR and during the regular academic year, see below. Admitted students are also assigned a departmental advisor.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview

skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Education Studies have searched for titles such as Policy Analyst, Program Developer, Outreach Specialist, and Admissions Counselor.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

EDUCATIONAL POLICY STUDIES, CERTIFICATE

The Educational Policy Studies Certificate was designed specifically for undergraduate students from across the campus. The certificate features multidisciplinary courses in the history, sociology, anthropology, and philosophy of education, comparative and international education, and educational equity. Courses in policy analysis emphasize the socio-economic context and implications of policy decisions on equity, justice, and well-being. The completion of the EPS certificate formalizes a student's interest in the multiple dimensions of this field.

Students interested in pursuing this certificate are encouraged to consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email, soeacademicservices@education.wisc.edu, by calling 608-262-1651, or in person.

The EPS certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

HOW TO GET IN

DECLARATION PROCESS

Students must complete at least one Educational Policy Studies (ED POL) (http://guide.wisc.edu/courses/ed_pol/) course with a grade of B or better prior to declaring the certificate program. Students intending to complete the Educational Policy Studies Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Education Studies major are not eligible to complete the Educational Policy Studies certificate.

REQUIREMENTS

COURSE REQUIREMENTS

- Complete a minimum of five Educational Policy Studies courses (https://guide.wisc.edu/courses/ed_pol/) (15 credits).
- At least two courses must be numbered 300 or above.
- Students must earn a grade of at least a B in each educational policy studies course in order to count toward the certificate requirements.
- No more than 3 credits of independent study may count toward the 15 credits.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.
2. Examine education policy from multiple theoretical perspectives (e.g., ethical/philosophical, economic/political, etc.).
3. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (<http://eps.education.wisc.edu/>)

GLOBAL CULTURES, LANGUAGES, AND EDUCATION, CERTIFICATE

The Certificate in Global Cultures, Languages, and Education (GCLE) educates students about global anthropological, sociolinguistic, and language policy and planning perspectives, while providing them with tools to think critically about global language, literacy, and sociocultural contexts.

The courses pose key questions about the relationships among cultural diversity, social inequality, and language, and they provide students with skills to work globally, within and beyond schools, in the field of culture, communication, and education.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Global Cultures, Languages, and Education. To declare the certificate, students should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Global Cultures, Languages, and Education.

REQUIREMENTS

COURSE REQUIREMENTS

The Certificate in Global Cultures, Languages, and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

LANGUAGE, CULTURE AND SCHOOLING

Select two of the following courses (6 credits):

Code	Title	Credits
ED POL 205	Language and Social Inequality	3
ED POL 240	Comparative Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3
ED POL 595	Language Politics and Education	3
CURRIC 312	ESL/Bilingual Issues	3

GLOBAL EDUCATION

Select one of the following Global Education courses (3 credits):

Code	Title	Credits
ED POL 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 260	Introduction to International Education Development	3

ED POL/INTL ST 335	Globalization and Education	3
ED POL 460	Immigration, Education, and Equity	3
ED POL 675	Introduction to Comparative and International Education	3
CURRIC 292	Globalizing Education	3
CURRIC 366	Internationalizing Educational Knowledge	3

GLOBAL STUDIES

Select one of the following courses in anthropology or international studies (3 credits):

Code	Title	Credits
ANTHRO 104	Cultural Anthropology and Human Diversity	3
ANTHRO/ FOLKLORE/INTL ST/ LINGUIS 211	Global Language Issues	3
ANTHRO 237	Cut 'n' Mix: Music, Race, and Culture in the Caribbean	3
ANTHRO/ AFROAMER/ C&E SOC/GEOG/ HISTORY/LACIS/ POLI SCI/SOC/ SPANISH 260	Latin America: An Introduction	3-4

INTL ST 403	Topics in Culture in the Age of Globalization	3-4			

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate an understanding of the social, cultural, and historical contexts of global language policy and linguistic and cultural practices.
2. Reflect on one's own position and the positions of others in global political, social, and institutional structures and the possibilities for growth and change for oneself and others.
3. Analyze information about culture and communication from diverse perspectives.
4. Formulate arguments on global topics in language, culture, and education using academic literature and theoretical frameworks, identifying and integrating diverse sources of information.
5. Collaborate and communicate ideas, reflections, and research effectively with people from a range of perspectives, cultures, and backgrounds.

6. Use practice to inform theory and research and theory and research to reflect on and modify practice.

INTERNATIONAL DEVELOPMENT AND EDUCATION, CERTIFICATE

The Certificate in International Development and Education will develop a new generation of global education leaders who understand the complex issues that shape international education policy and practice, including poverty, inequity, sustainability, colonial relations, human rights, health disparities, and governance. Students will recognize their own positionality in relation to international development education efforts, and learn about and reflect on new international education paradigms that center collaboration, partnership, and humility.

Graduates of the certificate program will develop an understanding of the fields of international educational development and change and the knowledge to engage in reflexive, culturally-sensitive and sustainable approaches to improving education development policy, practice, and outcomes.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in International Development and Education. Students intending to complete this certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in International Development and Education.

REQUIREMENTS

COURSE REQUIREMENTS

The Certificate in International Development and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

CORE COURSES

Complete the following two classes (6 credits). ED POL 260 Introduction to International Education Development provides a foundational overview of the field of International Development Education and should be taken as early as possible. ED POL 423 Education for Global Change provides a more advanced review of the theories of change that dominate in International Development, with particular attention to their assumptions about if and how different forms of learning lead to social change.

Code	Title	Credits
ED POL 260	Introduction to International Education Development	3
ED POL 423	Education for Global Change	3

ED POL INTERNATIONAL DEVELOPMENT AND EDUCATION ELECTIVE

Select one course from the following options (3 credits). These topical courses allow students to explore a key theme (e.g., human rights, climate change, poverty and inequality, health) in International Development Education in greater depth, or to deepen their understanding of the field of International and Comparative Education.

Code	Title	Credits
ED POL 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 320	Climate Change, Sustainability, and Education	3
ED POL/INTL ST 335	Globalization and Education	3
ED POL/ANTHRO 570	Anthropology and Education	3
ED POL 675	Introduction to Comparative and International Education	3
ED POL/CURRIC 677	Education, Health and Sexuality: Global Perspectives and Policies	3

CAMPUS-WIDE INTERNATIONAL DEVELOPMENT AND EDUCATION ELECTIVE

Select one course from the following options (3 credits). These topical courses allow students to explore how key disciplines and fields of study across the campus engage with International Development:

Code	Title	Credits
A A E/INTL ST 373	Globalization, Poverty and Development	3
A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	3
A A E/ECON/INTL BUS 462	Latin American Economic Development	3
A A E/ECON 473	Economic Growth and Development in Southeast Asia	3
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/ECON 477	Agricultural and Economic Development in Africa	3
ANTHRO 477	Anthropology, Environment, and Development	3
C&E SOC/ENVIR ST/SOC 540	Sociology of International Development, Environment, and Sustainability	3
C&E SOC/SOC/URB R PL 617	Community Development	3
C&E SOC/SOC 630	Sociology of Developing Societies/Third World	3
GEOG 307	International Migration, Health, and Human Rights	3
GEOG/INTL ST 315	Universal Basic Income: The Politics Behind a Global Movement	3
GEOG/ENVIR ST 337	Nature, Power and Society	3

GEOG 538	The Humid Tropics: Ecology, Subsistence, and Development	4
GEOG/ENVIR ST 557	Development and Environment in Southeast Asia	3
GEN&WS/ HISTORY 315	Gender, Race and Colonialism	3
GEN&WS 424	Women's International Human Rights	3
GEN&WS/ URB R PL 644	International Development and Gender	3
HISTORY/ INTL ST 330	Global History of Humanitarianism	3-4
HISTORY 434	American Foreign Relations, 1901 to the Present	3-4

INTL ST/GEOG 315	Universal Basic Income: The Politics Behind a Global Movement	3
INTL ST/ HISTORY 330	Global History of Humanitarianism	3-4
INTL ST/A A E 373	Globalization, Poverty and Development	3
INTL ST 401	Topics in Global Security	3-4
INTL ST 402	Topics in Politics and Policy in the Global Economy	3-4
INTL ST 403	Topics in Culture in the Age of Globalization	3-4
INTL ST/ POLI SCI 431	Contentious Politics	3-4

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate an understanding of the global contexts of colonialism, US post-war imperialism, bi-/multi-lateralism, and capitalism that shape the international development and international education fields, as well as key debates and trends in the field.
2. Reflect on experiences, resources, and national positions and the positions of others engaged in the field of international development education; recognize the consequences of this positionality on one's own understanding of the concepts of human development and wellbeing and of the desire to improve and develop other places and people; and critically examine possibilities for growth and change.
3. Analyze information about international development and education (as theory and as practice) from diverse disciplinary, methodological, and epistemological perspectives.
4. Evaluate multiple theories of change and effectively apply appropriate theories of change to key international development problems.

5. Formulate arguments on topics in international development and education by evaluating and then drawing from academic and practitioner literatures, and identifying and integrating diverse sources of information.
6. Communicate ideas, reflections, and research on international development and education effectively to people from a range of perspectives, cultures, backgrounds, and roles in the field of international development (e.g., policymakers, program officers, community members, Peace Corps volunteers, Fulbright, etc.).

SOCIAL JUSTICE AND EDUCATION, CERTIFICATE

The Certificate in Social Justice and Education, focused on education policy and practice, aims to provide students with a foundational understanding of the social inequities that shape education and broader society, as well as how educators, students, administrators, parents, and community members have responded to these inequities. This certificate is intended to prepare UW-Madison students to critically analyze the role of education policies and practices in relation to broader social inequalities and social justice efforts. Students will connect course concepts and ideas to both their own lives as well as to historical and contemporary social and educational issues in education (in the U.S. and/or globally).

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Social Justice and Education. Students intending to complete this certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Social Justice and Education.

REQUIREMENTS

COURSE REQUIREMENTS

The Certificate in Social Justice and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

All students are required to take ED POL 212 Education for Social Justice, a core course that provides students with foundational knowledge about social justice in education that they can build from and connect to their other coursework and assignments as part of the Certificate.

Students are also required to take three other courses that have a central focus on social justice in education, with two of the three courses in Educational Policy Studies. These courses meet most or all of the certificate's Learning Outcomes, and enable students to tailor the certificate to their specific topical and disciplinary areas of interest (e.g. historical perspectives on social justice and education, social justice and education in the U.S., comparative/global studies of social justice and education).

REQUIRED COURSE

Code	Title	Credits
ED POL 212	Education for Social Justice	3

ELECTIVE COURSES

Select from any of the following courses, 2 of which must be taken in Educational Policy Studies.

Code	Title	Credits
CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	3
CURRIC/CHICLA 321	Chicano/Latino Educational Justice	3
CURRIC/C&E SOC/ ENVIR ST 405	Education for Sustainable Communities	3
CURRIC/ RP & SE 406	Race, Intersectionality, and Equity in Education	3
ED POL/ HISTORY 143	History of Race and Inequality in Urban America	3
ED POL 145	Introduction to Education Policy	3
ED POL 180	Education and White Supremacy	3
ED POL 200	Race, Ethnicity, and Inequality in American Education	3
ED POL 205	Language and Social Inequality	3
ED POL 210	Youth, Education, and Society	3
ED POL 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 240	Comparative Education	3
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	3
ED POL 423	Education for Global Change	3
ED POL 435	Education in Emergencies	3
ED POL 460	Immigration, Education, and Equity	3
ED POL 505	Issues in Urban Education in the U.S.	3
ED POL 510	Urban School Policy	3
ED POL/ GEN&WS 560	Gender and Education	3
ED POL/ AFROAMER 567	History of African American Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3
ED POL 575	Education Policy and Practice	3
ED POL 595	Language Politics and Education	3
ED POL/ HISTORY 612	History of Student Activism from the Popular Front to Black Lives Matter	3
RP & SE 100	Disability and Society	3
RP & SE 300	Individuals with Disabilities	3
RP & SE 466	Diversity in Special Education	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate an understanding of how education, and education policy and practice specifically, has been used as a tool for both social justice and the (re)production of inequality in the United States and/or globally.
2. Identify and describe the social inequities that shape education and broader society, as well as how various social actors (e.g. educators, students, administrators, parents, and community members) have responded to these inequities through their social justice efforts.
3. Draw from theory and research to analyze issues of social justice in education.
4. Demonstrate an ability to apply critical thinking skills to the study of inequities in education, by recognizing and questioning knowledge claims and their own assumptions and preconceived notions.

EDUCATIONAL PSYCHOLOGY

Although the department does not offer an undergraduate major, students from across the campus may take undergraduate courses from this #1 ranked department in the nation, according to U.S. News & World Report (<https://www.usnews.com/best-graduate-schools/top-education-schools/education-psychology-rankings/>)! Courses are offered in each of the main content areas: human development, learning sciences, and quantitative methods. The department also offers courses specific to teacher education programs.

Educational Psychology is the academic home of the undergraduate certificate program in Education and Educational Services (p. 1781). This certificate provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree. Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education.

DEGREES/MAJORS/CERTIFICATES

- Education and Educational Services, Certificate (p. 1781)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website (<http://www.education.wisc.edu/edpsych/>). (<https://edpsych.education.wisc.edu/>)

EDUCATION AND EDUCATIONAL SERVICES, CERTIFICATE

Education is a topic of widespread interest to UW–Madison students and is one of the hotly contested subjects in today's politics and society. The Education and Educational Services (EES) Certificate Program provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree.

Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education. The certificate also provides grounding and learning experiences that will increase access to careers in education. Students completing the certificate may be considering future plans to:

- Enter a post-baccalaureate teacher education program.
- Pursue a graduate program focused on educational services, including programs such as counseling psychology, school psychology, and rehabilitation psychology.
- Complete advanced work in educational psychology or educational administration.
- Begin a career in teaching and learning settings and practices outside the K–12 education system.

This 15-credit certificate program offers a variety of course options that can be customized to each student's area of interest. It is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<http://guide.wisc.edu/nondegree/>).

In addition to reading the information here, students may wish to consult the department's website (<https://edpsych.education.wisc.edu/academics/ees-certificate/>) or email the EES administrator (ees@education.wisc.edu).

HOW TO GET IN

DECLARATION PROCESS

Students intending to pursue the Education and Educational Services Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note: Students completing a course of study designed to lead to teacher certification are not eligible to complete the EES certificate. This also includes School of Education degree students pursuing the education studies or communication sciences and disorders majors. Other students completing a major within the School of Education are limited to 6 credits of overlap between their major and the certificate; that is, no more than 6 credits of coursework used to satisfy requirements for a major within the School of Education may also be counted toward completion of the EES certificate.

REQUIREMENTS

Requirements of this 15-credit certificate program include both Foundation and Focus coursework. All coursework must be taken for a letter grade (not credit/no-credit or pass/fail) and students must earn at least a C grade in each course of the certificate. At least 12 credits of the certificate must be earned in residence at UW–Madison.

There is no formal prerequisite structure to the certificate, although students will generally be expected to take CURRIC 240 Critical Aspects of Teaching, Schooling, and Education first, followed by the two remaining Foundation courses and then the two Focus courses.

FOUNDATION COURSES, 9 CREDITS

Code	Title	Credits
Required Foundation Course		3
CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	
Social Context of Education		3
Select one of the following:		
ED POL 145	Introduction to Education Policy

ED PSYCH 563	Design of Educational Games and Simulations

ED PSYCH 570	Foundations of Educational Measurement
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations

1

Students may also substitute up to 3 credits of independent study with faculty from the departments of Coun Psy, Curric, ELPA, Ed Pol, Ed Psych or RP&SE. Independent study work with faculty from other School of Education departments may be considered; contact an advisor in the School of Education Student Services office.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. Understand how learning environments and pedagogical practices for students are grounded in concepts and interpretive frameworks provided by disciplines that study human development and learning. Understand both typical and atypical development in relation to education.
2. Understand basic cognitive, social, emotional, and biological bases of teaching and learning.
3. Understand how issues of race, class, gender, cultural, sexual orientation, immigrant status, language background, and disability status interact with various educational contexts to affect learning and its outcomes.
4. Understand how local, state, national, and global social and political contexts differentially affect schooling and its outcomes for students both typical and atypical development in relation to education.
5. Understand the multiple contexts in which education occurs.
6. Understand historical, political, and cultural influences on education and educational institutions.
7. Understand supportive services available to learners in educational contexts and institutions.
8. Be familiar with some of the issues and controversies surrounding the selection of concepts taught, the assumptions associated with content choices, tools of inquiry, and ways of reasoning.
9. Be an informed consumer of educational research and policy prescriptions.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website (<http://www.education.wisc.edu/edpsych/>). (<https://edpsych.education.wisc.edu/>)

KINESIOLOGY

The study of movement, physical activity, and exercise has the potential to dramatically impact health and quality of life. Department programs focus on the scientific study of movement behavior, anatomy and physiology, research in kinesiology and fundamentals of exercise, and application to health, physical education, and functional performance. The department's ultimate goal is to enhance human health, productivity, and quality of life.

The B.S. degree in Kinesiology (p. 1790) prepares students for graduate or professional study, and the B.S. degree in Physical Education (p. 1797) prepares teacher education students to teach physical education in elementary and secondary schools.

A new collaborative B.S. degree program in Health Promotion and Health Equity (<http://guide.wisc.edu/undergraduate/education/kinesiology/health-promo-health-equity-bs/>) is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels.

Two new certificates in Athletic Healthcare (p. 1783) and Promoting Activity for Diverse Abilities (p. 1806) may be completed by students pursuing kinesiology and other majors on campus.

The department also offers health theory, strength and conditioning, and leadership courses to improve understanding, appreciation, and use of the body in movement and sports. Once the kinesiology students have seats, kinesiology classes are open to all university students.

DEGREES/MAJORS/CERTIFICATES

- Athletic Healthcare, Certificate (p. 1783)
- Health Education, Minor (p. 1784)
- Health Promotion and Health Equity, B.S. (p. 1785)
- Kinesiology, B.S. (p. 1790)
- Physical Education, B.S. (p. 1797)
- Promoting Activity for Diverse Abilities, Certificate (p. 1806)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<https://kinesiology.education.wisc.edu/>)

ATHLETIC HEALTHCARE, CERTIFICATE

The Certificate in Athletic Healthcare provides a structured undergraduate offering for students with an interest in healthcare for active populations. Students acquire specialized knowledge related to the fields of healthcare, sports medicine, and physically active populations.

The combination of required core courses and elective options makes this certificate appealing to students from a wide array of backgrounds and majors. Students can select elective courses that will be applicable to a variety of career interests.

This program is intended to provide students with meaningful learning experiences and ultimately an advantage in pursuing advanced or professional degrees in a variety of health-related fields.

HOW TO GET IN

DECLARATION PROCESS

Students must complete KINES 127 Introduction to Athletic Healthcare to apply to the certificate program. Students intending to complete the Athletic Healthcare certificate will find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Students completing a Bachelor of Science degree in Athletic Training may not complete the Certificate in Athletic Healthcare.

REQUIREMENTS

Requirements of this minimum 14-credit certificate program include both required and elective coursework. All coursework must be taken for a letter grade. Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be earned in residence at UW–Madison.

CORE COURSES

Complete all of the following:

Code	Title	Credits
KINES 127	Introduction to Athletic Healthcare	2
KINES 227	Introduction to Clinical Anatomy of Human Movement	2
KINES 387	The Young Athlete: Considerations for Exercise, Medicine, and Activity	2
KINES 487	Athletic Healthcare: Contemporary Perspectives	3

BREADTH ELECTIVE COURSES

Complete a minimum of 5 credits from the following:

Code	Title	Credits
C&E SOC/SOC 533	Public Health in Rural & Urban Communities	3
HDFS 362	Development of the Young Child	3
HDFS 363	Development from Adolescence to Old Age	3
KINES 140	Science and Practice of Resistance Training	2
KINES 150	Foundations of Health Behavior and Health Equity	3
KINES 555	Sports Science & Athlete Monitoring	3
NURSING/S&A PHM/SOC WORK 105	Health Care Systems: Interdisciplinary Approach	2
POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	3
RP & SE 125	Health and Rehabilitation Professions	3

RP & SE 310	Positive Psychology and Well Being	3
PSYCH 405	Abnormal Psychology	3-4

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Define Athletic Healthcare and identify components of the healthcare system commonly used in athletic healthcare.
2. Differentiate specific roles of healthcare professions that comprise a interdisciplinary healthcare team.
3. Identify the impact of public health policy on clinical practice in athletic healthcare.
4. Develop practical skills and knowledge that are commonly utilized in an athletic healthcare clinical setting.

HEALTH EDUCATION, MINOR

Health education is a subject equally important, or even more important, than other subject areas. It is critical to students' education and development, and is a foundation for their success in all endeavors in school and life.

The health education minor at UW-Madison prepares individuals to teach health as a separate course or as an integral part of other subject areas. The minor also trains persons to assist school administrators and teaching staff in developing a broad school health program, engaging many aspects of the school and community at large.

The curriculum for the health education minor is varied. At its foundation lies health-related content. Building on that foundation, students are taught a skills-based approach to teaching health, which empowers youth in schools to make wise health-related decisions. Student teaching in a middle school or high school health classroom culminates the health education minor.

We are committed to providing quality health instruction to our students and ultimately to developing health-literate students in schools. To that end, the health education minor includes:

- Standards-based curriculum
- Skills-based approach to teaching health education
- Placements in urban, inclusive, and multicultural settings
- Small class sizes and advising groups
- Instruction within the nationally ranked UW-Madison School of Education

Students in physical education teacher education or teachers already licensed to teach at an appropriate level in Wisconsin are eligible to complete the health education minor.

Graduates are eligible to apply for a Wisconsin Health license at the Prekindergarten through Grade 12 (Early Childhood through Adolescence) level.

HOW TO GET IN

Upon admission into their teacher education degree program in the School of Education, students should meet immediately with the health education program coordinator to develop a course completion schedule.

To indicate the intent to complete the health education minor, students should fill out a minor declaration form available in the School of Education Student Services office, Room 139 Education Building.

REQUIREMENTS

Complete a minimum of 23 credits to include all coursework below. A minimum 2.75 GPA is required, based on all UW–Madison coursework included in the minor requirements.

Students may wish to consult with the health minor coordinator or advising staff in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651.

Upon acceptance into a major program in the School of Education, students should meet immediately with the health education program advisor to work out a schedule for required courses.

CORE REQUIREMENTS (23–24 CREDITS)

Code	Title	Credits
KINES 116	First Aid and Basic Life Support ¹	2
ANAT&PHY 235 or ANAT&PHY 335	Human Physiology and Health Physiology	4
KINES 501	Theory-Based Health Education and Health Promotion Programs	3
KINES 547	Skills for Health: Methods and Practicum of Teaching Health	3
SOC WORK 453	Substance Use Disorders	3
Take one of the following:		3-4
SOC/PSYCH 160	Human Sexuality: Social and Psychological Issues	
PSYCH/SOC 453	Human Sexuality	
ED POL/ CURRIC 677	Education, Health and Sexuality: Global Perspectives and Policies	
KINES 566	Promoting Health in the Community	3
KINES 568	Student Teaching in Health Education ²	2
Total Credits		23-24

1

Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid **AND** one of the following: 1) American Red Cross Basic Life Support, 2) American Red Cross Basic Life Support for Healthcare Providers, or 3) American Red Cross CPR/AED for Professional Rescuers.

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

Documentation of current certification must be presented to the Health Education program advisor. If the certification equivalent is used, the minor will require 24 credits.

2

Eligibility for student teaching requires the completion of all courses required for the minor with a minimum GPA of 2.75. Students must also meet the content knowledge requirements for Health. A meeting with the health education coordinator is required before submitting a student teaching application. Students should bring a current transcript to this meeting. Special arrangements can be made for teachers seeking add-on certification in Health.

HEALTH PROMOTION AND HEALTH EQUITY, B.S.

The Health Promotion and Health Equity (HPHE) major was created through a collaborative effort across the departments of Counseling Psychology, Kinesiology, and Rehabilitation Psychology and Special Education in the School of Education. The Department of Kinesiology is the home of this major; its mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

The core courses (31 credits) form the main content of the major and include: conceptual and theoretical foundations of health; awareness of multiple determinants of physical and psychological health; program planning, administration, and evaluation; and working effectively with underserved populations (e.g., persons with disability; low-income groups; racial and ethnic minority populations).

The elective curriculum (9 credits) will allow students to tailor the major in the direction of their personal interests (Physical Activity and Public Health; Chronic Illness, Disability and Health; Health Equity, Mental Health and Well-Being; Social Determinants of Health; Health Sciences).

The program is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels. Students will learn about the theoretical, programmatic and empirical foundations of health promotion and health equity interventions and be taught to demonstrate competence in evaluating strengths and weaknesses in health promotion programs.

The coursework will prepare students for emerging career opportunities as health educators within community health organizations, hospitals, mental health centers, clinics, schools and universities, businesses and non-profits, governmental health offices, and various other public health-related professions.

HOW TO GET IN

ADMISSION OVERVIEW

Students interested in Health Promotion and Health Equity may complete this major in two ways: (1) by entering the School of Education to complete a Bachelor of Science degree with a major in Health Promotion and Health Equity, or (2) adding the Health Promotion and Health Equity major as an additional major while completing another degree and major on campus. Students selecting the second option should review the Additional Major in Health Promotion and Health Equity (p. 1786) section below.

ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW–MADISON STUDENTS

New freshmen and off-campus transfers interested in completing the Bachelor of Science degree with the Health Promotion and Health Equity major are admitted directly to the School of Education and the major upon admission to UW–Madison. Current UW–Madison students wishing to transfer to the School of Education to complete an undergraduate degree with this major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education degree program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are advised to meet with an advisor in the School of Education Student Services office in person or by telephone in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as a candidate for a second degree upon completion of the admission process. Second degree students are seeking a second degree that is unrelated to their first degree. More information is available here (p. 1520) under the Students with a Previous Degree heading.

APPLICATION AND ADMISSION

New freshmen and off-campus transfers are admitted directly to the Bachelor of Science–Health Promotion and Health Equity degree program. Current UW–Madison students must consult with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

Note: Requirements and selection criteria may be modified from one application/admission period to the next.

CRITERIA FOR ADMISSION

Eligibility for admission consideration to the Bachelor of Science–Health Promotion and Health Equity degree:

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).

- Filing of all required paperwork and other application materials, including program application and transcripts.

Last 60 Credits Rule

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

ADDITIONAL MAJOR IN HEALTH PROMOTION AND HEALTH EQUITY

Undergraduate students from all schools and colleges on campus may declare Health Promotion and Health Equity as an additional major.

Students wishing to declare the additional major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major. The declaration must also be approved by the student's home school/college.

Students completing Health Promotion and Health Equity as an additional major do not need to complete the School of Education's liberal studies and other degree requirements unless their primary major is also in the School of Education.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (B.S.) degree program in Health Promotion and Health Equity has three primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major requirements* provide an opportunity to study the interrelated areas of physical health, mental health, and disability.
- *Additional electives* to reach the minimum of 120 degree credits. These credits allow students to pursue additional health-related courses, enroll in course work required for admission to graduate-level programs or develop other areas of interest. Health Promotion and Health Equity majors may also use these elective credits to complete an additional major to augment their interest in health or to explore a completely different subject.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits with a 2.5 gpa across all major course work. At least 15 credits of upper-level major course work (courses numbered 300 and above) must be taken in residence with a minimum 2.5 grade point average.

REQUIRED HEALTH PROMOTION CORE, 31 CREDITS

Code	Title	Credits
ANAT&PHY 235	Human Physiology and Health	4
KINES 150	Foundations of Health Behavior and Health Equity	3
KINES 370	Planning, Facilitating & Assessment in Movement and Health Professionals	3
KINES 566	Promoting Health in the Community	3
RP & SE 316	Health Promotion for Individuals with Disability and Chronic Illness	3

NUTR SCI 332	Human Nutritional Needs	3

POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	3
PSYCH 202	Introduction to Psychology	3-4

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major course work.
- Upper-level major course work: 2.5 cumulative grade point average in all upper-level (courses numbered 300 and above) major course work.
- Major Residency: Students must complete at least 15 upper level major credits while enrolled in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits are required for graduation in the Health Promotion and Health Equity degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Recognize concepts and theories related to health promotion and health equity.
2. Relate the role of social factors in facilitating or hindering health.
3. Evaluate the strengths and weaknesses of health behavior and health equity interventions.
4. Identify links between physiological and psychological health.
5. Interpret and communicate the interaction between personal and environmental determinants of health and well-being.
6. Draw from personal and professional identities to develop socially just practices and to lead effectively within their communities of practice.

FOUR-YEAR PLAN

Health Promotion and Health Equity: Sample Four-Year Plan

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Health Promotion and Health Equity have searched for titles such as Patient Education Coordinator, Corporate Wellness Coordinator, Family Services Specialist, and Health and Wellness Coordinator

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

ADVISING AND CAREERS

HEALTH PROMOTION AND HEALTH EQUITY ADVISING

Students are collaboratively advised by advising staff in the School of Education Student Services office and in the department. Students not yet declared in Health Promotion and Health Equity meet with advising staff in the Student Services office, see below, or the departmental advisor. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

PEOPLE

Information about faculty, staff, and other contributors to the Health Promotion and Health Equity major can be found on the departmental websites of Counseling Psychology (<https://counselingspsych.education.wisc.edu/>), Kinesiology (<https://kinesiology.education.wisc.edu/>), and Rehabilitation Psychology and Special Education. (<https://rpse.education.wisc.edu/>)

CERTIFICATION/LICENSURE

The National Commission for Health Education Credentialing (NCHEC) offers a Certified Health Education Specialist (CHES) exam. The HPHE program coordinators are currently working with NCHEC to insure that students completing the HPHE major requirements are qualified to take the CHES exam. Students in the HPHE program will be informed when this assurance has been received from NCHEC.

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

KINESIOLOGY, B.S.

The Kinesiology department's mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

Students in this major take coursework grounded in the basic sciences (e.g., physiology, anatomy, biology) and in kinesiology. Kinesiology core courses examine how the body responds to physical activity, the role of physiology and psychological factors in exercise, mechanics driving movement, how movement is controlled, learned, and developed over the lifespan, and the role of physical activity in the health of the U.S. population.

The curriculum includes coursework, laboratory research opportunities, and hands-on learning experiences. In addition, at least 11 credits of electives in exercise and movement science are required, giving students some flexibility to tailor the program to their specific interests. Examples of elective topics include strength and conditioning, leadership, health theory, and advanced courses in exercise physiology, exercise psychology, and biomechanics.

Kinesiology is a pre-professional program. This means that our students are well prepared for subsequent graduate or professional training in different health-related disciplines. The degree also prepares students for graduate programs in kinesiology and athletic training. Kinesiology graduates also pursue entry-level careers in a wide variety of professions, including those in the area of fitness.

Graduating seniors have reported starting the following jobs: club coach, programming administrator, medical scribe, AmeriCorps, rehabilitation aide, personal trainer, research assistant/specialist, physical therapy aide, nursing home caregiver, nanny, group exercise instructor, certified nursing

assistant, medical device sales, strength and conditioning internship, United Cerebral Palsy inclusion facilitator, financial counselor, EKG tech, behavioral technician, project manager, ranch worker, wellbeing intern, glacier guide.

Graduating seniors have reported acceptance into the following graduate programs: Doctor of Physical Therapy, Master of Public Health, Doctor of Medicine, Chiropractic School, Clinical Exercise Physiology, Biomedical Engineering, Master in Physician Assistant Studies, Doctor of Occupational Therapy, Master of Science in Exercise Science, Master of Science in Applied Sport and Exercise Psychology, Dentistry.

HOW TO GET IN

KINESIOLOGY DECLARATION OVERVIEW

Incoming freshmen typically enter UW–Madison as Pre-Kinesiology students (PKN), spend the first two years completing liberal studies, general education, and Kinesiology prerequisite requirements, and declare the Kinesiology major during their sophomore year for the final two years on campus.

On-campus students starting at UW–Madison in other majors can move to Pre-Kinesiology by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1520), is required to transfer into Pre-Kinesiology. It is not necessary to be a Pre-Kinesiology student before declaring Kinesiology.

ELIGIBILITY TO DECLARE KINESIOLOGY

Kinesiology currently accepts declarations once a year, from November 15 through March 1. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Kinesiology should complete the on-campus declaration and must also be admitted to UW–Madison. See Transfer Students and Students with a Bachelor's Degree, below.

ELIGIBILITY REQUIREMENTS:

- Complete the following prerequisite coursework by the end of the spring semester of the declaration year.

Code	Title	Credits
Biology Sequence		
Complete one of the following Biology sequences:		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	5
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology ¹	10

BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
------------------------------	--	---

Advanced Placement (AP) Biology exam score of 4 or 5²

International Baccalaureate (IB) Biology exam score of 4
or 5²

Chemistry Sequence

Complete one of the following Chemistry sequences:

CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	10

Physics Course

Complete one of the following Physics courses:

PHYSICS 103	General Physics	4
PHYSICS 201	General Physics	5
PHYSICS 207	General Physics	5

Kinesiology Course

KINES 119	Introduction to Kinesiology	2
-----------	-----------------------------	---

1

Students who take BIOLOGY/BOTANY/ZOOLOGY 151 at UW-Madison or transfer it from another campus must also take BIOLOGY/BOTANY/ZOOLOGY 152 to complete the Biology sequence.

2

Students awarded credit for BIOLOGY/BOTANY/ZOOLOGY 151 via an AP or IB Biology exam score of 4 or 5 have completed the entire Biology sequence.

- Students may complete no more than three of the prerequisite courses during the spring semester of the declaration year. For this purpose CHEM 109 satisfies the full general chemistry requirement and constitutes one course. BIOLOGY/ZOOLOGY 101 and BIOLOGY/ZOOLOGY 102 are counted as two courses in determining eligibility for the program.
- Earn a minimum 2.75 cumulative GPA or a 2.75 cumulative GPA based on the Last 60 Credits Rule by the end of the fall semester of the declaration year.³

3

Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare Kinesiology. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted.

The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1520).

Students will be provisionally admitted in the spring, pending the completion of all prerequisite courses and GPA requirements by the end of the spring semester.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in

a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to transfer directly into Kinesiology should complete both the on-campus Kinesiology declaration and the UW-Madison application. All eligibility requirements must be met. Other transfer and second degree candidates will be admitted to UW-Madison with the Pre-Kinesiology designation.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1520).

Off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

ADVISING AFTER DECLARATION

The Kinesiology department holds mandatory spring orientation sessions for new majors, led by a departmental advisor. The sequencing of coursework and enrollment in Kinesiology courses are addressed at these meetings. Students will be authorized to enroll in Kinesiology courses after the orientation meetings are completed.

After declaration, advising about the major will be provided by the Department of Kinesiology. Majors are required to meet with the departmental advisor at least once per semester. All questions about School of Education and university requirements should be referred to an advisor in the School of Education Student Services office.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Kinesiology program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- *Advanced coursework in Kinesiology* requires at least 11 credits of Kinesiology electives, thus giving students some flexibility to tailor the program to their specific interests.
- *Elective* classes are generally related to the student's area of study and are taken to reach the minimum of 120 credits.

SCIENCE CORE

Code	Title	Credits
Select one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Select one of the following:		4-10
AP or IB Biology score of 4 or above		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	
Select one of the following:		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	

PHYSICS 207	General Physics	
PSYCH 202	Introduction to Psychology	3-4

Code	Title	Credits
Select one of the following:		0-5

Placement into Calculus		
MATH 113	Trigonometry	
MATH 114	Algebra and Trigonometry	

Select one of the following:		3
------------------------------	--	---

STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT 301	Introduction to Statistical Methods	
PSYCH 210	Basic Statistics for Psychology	
ANAT&PHY 335	Physiology	5
ANAT&PHY 337	Human Anatomy	3
ANAT&PHY 338	Human Anatomy Laboratory	2

KINESIOLOGY CORE

Code	Title	Credits
KINES 116	First Aid and Basic Life Support ^{1 2}	2
KINES 119	Introduction to Kinesiology ¹	2
KINES 300	Practicum in Kinesiology ³	3
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 330	Research in Kinesiology	2
KINES 350	Introduction to Exercise Psychology ¹	3
KINES 361	Motor Learning and Performance	3
Select one of the following:		3
KINES 355	Socio-Cultural Aspects of Physical Activity	
KINES 521	Physical Activity and Health	
KINES 600	Advanced Exercise Psychology	

1

KINES 116, KINES 119 and KINES 350 may be taken prior to admission into the professional part of the undergraduate program.

2

Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid AND one of the following: 1) American Red Cross Basic Life Support, 2) American Red Cross Basic Life Support for Healthcare Providers, or 3) American Red Cross CPR/AED for Professional Rescuers.

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

3

Criminal background investigations may be conducted for some students, based on the site of the practicum assignment. The cooperating agency to which the student has been assigned will determine if a background check is necessary.

ADVANCED COURSEWORK IN KINESIOLOGY

This requirement was previously listed under the Exercise and Movement Science option; (p. 1796) it has not changed.

Select a minimum of 11 credits from the following:

Code	Title	Credits
KINES 312	Technology for Physical Activity and Health Professionals	2
KINES 325	Group Development and Behavior Management	3
KINES 360	Lifespan Motor Development	3
KINES 387	The Young Athlete: Considerations for Exercise, Medicine, and Activity	2
KINES 390	Principles of Exercise Leadership	2
KINES 427	Fitness Testing and Exercise Prescription	3
KINES 501	Theory-Based Health Education and Health Promotion Programs	3
KINES 508	Workshop in Kinesiology (Topic: Theories and Strategies for Behavioral Change)	3
KINES/ NURSING 523	Clinical Exercise Testing & Training	3
KINES/ NUTR SCI 525	Nutrition in Physical Activity and Health	3
KINES 527	Principles of Strength and Conditioning	3
KINES 531	Neural Control of Movement	3
KINES 555	Sports Science & Athlete Monitoring	3
KINES 614	Biological Factors Influencing Exercise Performance	3
KINES 615	Laboratory Techniques in Exercise Physiology	2
KINES 618	Biomechanics	2-3

ELECTIVE COURSEWORK

Select additional courses to reach the minimum of 120 credits.

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW–Madison campus coursework. Consult the School of Education's Academic Policies and Procedures (p. 1520) for additional information about the Continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW-Madison coursework.

- Must earn a minimum 2.50 cumulative grade point average. Graduation GPA may be modified by the Last 60 Credits Rule (p. 1520).
- Major residency: Students must complete a minimum of 15 credits from the Department of Kinesiology while enrolled on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Must complete a minimum of 120 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Knowledge) Define and explain major concepts across the breadth of kinesiology.
2. (Application) Apply their knowledge related to movement and physical activity techniques and approaches in clinical and applied settings to enhance human health and quality of life.
3. (Critical Thinking) Demonstrate competence in the scientific research process, which includes the ability to consume, analyze, interpret and critically review scientific literature.
4. (Communication) Develop appropriate styles of written and oral communication to use both within and outside of the scientific community.

FOUR-YEAR PLAN

Kinesiology: Sample Four-Year Plans

A four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Two plans are presented below. The first is for students testing into **MATH 112 Algebra**, followed by a plan for students testing into MATH 211 Calculus or MATH 221 Calculus and Analytic Geometry 1.

For Students Testing Into MATH 112 Algebra

Freshman			
Fall	Credits	Spring	Credits
Communication A (fall or spring semester)		3 Communication A (fall or spring semester)	3
MATH 112 (also meets Quantitative Reasoning A)		3 KINES 119	2
Liberal Studies course work		9-12 BIOLOGY/ZOOLOGY 101	3

Advanced Kines Elective		2 Liberal Studies, Advanced Kines Elective or General Elective course work	7-10
Liberal Studies, Advanced Kines Elective or General Elective course work		7-10	
15		16	

Total Credits 120

¹
A total of 11 credits of Advanced Kines Electives are required. Elective course options are 2-3 credits.

ADVISING AND CAREERS

EXERCISE AND MOVEMENT SCIENCE ADVISING

Students not yet admitted to Kinesiology: Exercise and Movement Science meet with an advisor in the School of Education Student Services office, see below. Once admitted to the professional program, students are also advised in the Department of Kinesiology.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Kinesiology have searched for titles such as Health Education Specialist, Health & Fitness Manager, and Kinesiologist.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (<https://kinesiology.education.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

KINESIOLOGY: EXERCISE & MOVEMENT SCIENCE

Admissions to the Kinesiology: Exercise & Movement Science, B.S. have been suspended as of fall 2022 and will be discontinued as of fall 2025. If you have any questions, please contact the department.

Due to the suspension and discontinuation of the Exercise and Movement Science option the courses listed on the requirements tab have merged with the other Kinesiology, B.S. Degree (p. 1791) requirements; see the Kinesiology Core and Advanced Kinesiology Electives. The Kinesiology degree requirements have not changed with the elimination of this option.

REQUIREMENTS

Due to the suspension and discontinuation of the Exercise and Movement Science option the courses listed here have merged with the other Kinesiology, B.S. Degree (p. 1791) requirements; see the Kinesiology Core and Advanced Kinesiology Electives. The Kinesiology degree requirements have not changed with the elimination of this option.

Select at least 11 credits from the following:

Code	Title	Credits
KINES 312	Technology for Physical Activity and Health Professionals	2
KINES 325	Group Development and Behavior Management	3
KINES 360	Lifespan Motor Development	3
KINES 390	Principles of Exercise Leadership	2
KINES 427	Fitness Testing and Exercise Prescription	3
KINES 501	Theory-Based Health Education and Health Promotion Programs	3
KINES 508	Workshop in Kinesiology (Topic: Theories and Strategies for Behavioral Change)	3

KINES 531	Neural Control of Movement	3
KINES 555	Sports Science & Athlete Monitoring	3
KINES 614	Biological Factors Influencing Exercise Performance	3
KINES 615	Laboratory Techniques in Exercise Physiology	2
KINES 618	Biomechanics	2-3

Select one of the following:

Code	Title	Credits
KINES 355	Socio-Cultural Aspects of Physical Activity	3
KINES 521	Physical Activity and Health	3
KINES 600	Advanced Exercise Psychology	3

PHYSICAL EDUCATION, B.S.

Now, more than ever, our society is focusing on health. The UW-Madison physical education program is committed to developing professionals who will provide the best movement experiences possible. Improvements in physical education experiences can inspire increased physical activity, with the potential to benefit the health of millions of people.

The Bachelor of Science degree in Physical Education prepares individuals for careers in a variety of areas. At the heart of the degree is the physical education teacher education program, which has been preparing excellent physical educators since 1911. The Bachelor of Science degree in Physical Education is the key to obtaining physical education teaching positions in Wisconsin, other states, and internationally.

A degree in physical education also readies individuals for other career paths. Some graduates have pursued teaching positions outside of school settings. Other graduates of the program have successful careers in many positions unrelated to teaching. Program alumni are well represented in the areas of coaching and officiating, recreation, fitness, healthcare and sport management.

The careers of some of our physical education alumni are highlighted here. (<https://kinesiology.education.wisc.edu/pete/alumni/>)

We are committed to transforming physical education into a powerful experience in which students develop physical, mental, and social skills for life. To that end, our program includes the following elements:

- A standards-based curriculum
- A cutting-edge conceptual approach to teaching physical education
- “Hands-on” guided teaching
- Culturally responsive teaching techniques in urban, inclusive, and multicultural settings
- Social and emotional learning that incorporates community building and behavior management
- Appropriate and sequential motor skill development

Physical education students also benefit from:

- Nationally and state recognized faculty and staff members
- Certification options in Adapted Physical Education and Health Education

- Small class sizes and advising groups
- A strong science and technology based curriculum
- Instruction within the nationally ranked UW–Madison School of Education

Graduates are eligible to apply for a Wisconsin Physical Education license at the *Early Childhood through Adolescence* (Prekindergarten through grade 12) level. Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>), an opt-in loan forgiveness program for teacher education students.

HOW TO GET IN

PHYSICAL EDUCATION DECLARATION OVERVIEW

Students typically enter UW–Madison as Pre-Physical Education students (PED), spend the first two years completing liberal studies, general education, and science core requirements, and declare Physical Education during the sophomore year for the final two years on campus.

On-campus students starting at UW-Madison in other majors can move to Pre-Physical Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1520), is required to transfer into Pre-Physical Education. It is not necessary to be a Pre-Physical Education student before declaring Physical Education.

ELIGIBILITY TO DECLARE PHYSICAL EDUCATION

Physical Education currently accepts declarations twice a year, from February 1 – May 1, and again from June 1 – August 1. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Physical Education should complete the on-campus declaration and must also be admitted to UW-Madison. See Transfer Students and Students with a Bachelor's Degree, below.

ELIGIBILITY REQUIREMENTS:

- Meet with a Physical Education or School of Education Student Services advisor during the declaration period. See Overview (p. 1797) page for contact information.
- Earn 40 or more credits by the end of the declaration semester.
- Have second year academic standing, including at least two semesters of enrollment in a higher education setting prior to the declaration semester. The two-semester calculation excludes summer enrollment and college-level coursework taken while in high school.
- Earn a minimum 2.75 cumulative GPA based on all college coursework attempted or a 2.75 last 60 credits GPA by the end

of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester.¹

1

Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare Physical Education. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1520).

Students will be provisionally accepted in the spring and summer, pending the completion of all eligibility requirements by the end of the declaration semester.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a Bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Physical Education should complete both the on-campus declaration and the UW-Madison application. All eligibility criteria must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the Pre-Physical Education designation.

An applicant with a previous undergraduate degree will be admitted to Physical Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background. Admission as an Education Special Student indicates that the student has an interest in pursuing teacher certification in Physical Education and studied this subject area extensively during their initial degree. A student enrolls in Physical Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1520).

All off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to

the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined

above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Physical Education program has six components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science Core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology Core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- The *Physical Education requirements* focus on advanced study in Physical Education pedagogy, including teaching methods coursework and field experiences in the schools.
- *Education* coursework includes an examination of the school's relationship to our society and also of the processes by which students grow and learn.

- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

While not required, teaching certifications in Adapted Physical Education and Health Education are also offered. See Additional Certification Options (p. 1800), below.

SCIENCE AND KINESIOLOGY CORE COURSES

With the exception of KINES 116 First Aid and Basic Life Support, KINES 119 Introduction to Kinesiology and KINES 121 Foundations of Physical Education, Kinesiology coursework must be taken after admission into the professional part of the undergraduate program.

Code	Title	Credits
MATH 112	Algebra	3
CHEM 108 or CHEM 103	Chemistry in Our World General Chemistry I	5
ANAT&PHY 337	Human Anatomy	3
ANAT&PHY 235	Human Physiology and Health	4
KINES 116	First Aid and Basic Life Support ¹	2
KINES 119	Introduction to Kinesiology	2
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 350	Introduction to Exercise Psychology	3
KINES 361	Motor Learning and Performance	3

1

Students may exempt from KINES 116 First Aid and Basic Life Support by completing [American Red Cross First Aid](#) **AND** one of the following: 1) American Red Cross Basic Life Support, 2) American Red Cross Basic Life Support for Healthcare Providers, or 3) American Red Cross CPR/AED for Professional Rescuers.

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

PHYSICAL EDUCATION COURSES

Effective for Summer, 2018 program admission.

Code	Title	Credits
KINES 121	Foundations of Physical Education	2
KINES 315	Assessment and Research in Physical Activity Pedagogy	3
KINES 316	Adapted Physical Activity	3
KINES 325	Group Development and Behavior Management	3
KINES 353	Health and Physical Education in a Multicultural Society	3
KINES 370	Planning, Facilitating & Assessment in Movement and Health Professionals	3
KINES 371	Methods and Practicum of Teaching PK-12 Dance and Gymnastics	3

KINES 372	Methods and Practicum of Teaching PK-12 Educational Games and Fitness	3	RP & SE/ CURRIC 506	Strategies for Inclusive Schooling	3
KINES 373	Methods and Practicum of Teaching Secondary Sport Concepts and Skills	3	CS&D 110	Introduction to Communicative Disorders	3
KINES 412	Organization and Administration of Physical Education	2	CS&D 240	Language Development in Children and Adolescents	3
KINES/CURRIC 478	Elementary School Physical Education Student Teaching	6	CS&D 424	Sign Language I	2
KINES/CURRIC 479	Middle School or High School Physical Education Student Teaching	6	PSYCH 405	Abnormal Psychology ¹	3-4
			PSYCH 512	Behavior Pathology-Psychoses	3

1

Effective fall 2017, the course number of Abnormal Psychology changed from Psych 509 to PSYCH 405 Abnormal Psychology .

PROFESSIONAL EDUCATION COURSES

Code	Title	Credits
Learning (Minimum of 3 credits)		
ED PSYCH 301	How People Learn	3
Foundations of the Profession: (Minimum of 3 credits)		
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	

ADDITIONAL CERTIFICATION OPTIONS

Physical Education students are encouraged to increase their content knowledge and teaching capabilities through additional training. Although not required, teaching certifications are available in Health Education and Adapted Physical Education. Students may pursue more than one additional certification.

HEALTH EDUCATION MINOR, 23-24 CREDITS.

Contact Cindy Kuhrasch, cnuhrasch@wisc.edu, for additional information about the Health Education minor (p. 1784).

ADAPTED PHYSICAL EDUCATION, 15 CREDITS.

Certification in Adapted Physical Education requires the coursework listed below. Contact Cindy Kuhrasch, cnuhrasch@wisc.edu, 608-262-4348, for additional information regarding this certification.

Code	Title	Credits
Required Courses		
KINES 316	Adapted Physical Activity (required of all PE majors)	3
KINES 300	Practicum in Kinesiology (Adapted Sport and Fitness:Adults)	1-3
KINES 364	Assessment and Programming in Adapted Physical Education	3
KINES 365	Practicum: Adapted Physical Education (Children)	2
RP & SE 300	Individuals with Disabilities	3
Select one elective. Requires advisor approval.		
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	3

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW–Madison campus course work. Consult the School of Education's Academic Policies and Procedures (p.) for additional information about the continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- A minimum of 120 credits.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of

study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1803).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Standard 1) Incorporates Understanding of Human Learning and Development. Teachers design learning environments and pedagogical practices for students that are grounded in concepts and

interpretive frameworks provided by disciplines that study human development and learning.

2. (Standard 2) Understands Social Context of Schooling. Teachers understand how local, state, national, and global social and political contexts differentially affect schooling and its outcomes for students.
3. (Standard 3) Demonstrates Sophisticated Curricular Knowledge. Teachers understand the central concepts, assumptions, tools of inquiry, ways of reasoning, uncertainties, and controversies of exercise science and physical educations.
4. (Standard 4) Demonstrates Pedagogical Knowledge in Specific Domains. Teachers are knowledgeable about the problems, challenges, and opportunities that commonly arise as students develop understanding or competence in physical education.
5. (Standard 5) Explains and Justifies Educational Choices. Teachers can articulate and defend their curricular and instructional choices with sound ethical and pedagogical justifications.
6. (Standard 6) Connects School and Community. Teachers use the knowledge and abilities necessary for collaboration with individuals, groups, and agencies within the school and community. They base instruction of students on an understanding of curricular goals, subject matter, and the community, and help the students make connections between community-based knowledge and school knowledge.
7. (Standard 7) Understands and Adapts to Multiple Forms of Communication. Teachers understand and adapt to students' multiple forms of expressing and receiving experiences, ideas, and feelings.
8. (Standard 8) Employs Varied Assessment Processes. Teachers understand and thoughtfully use formal and informal evaluation strategies to assess students' achievements, strengths, challenges, and learning styles for continuous development.
9. (Standard 9) Manages Learning Environment. Teachers establish and maintain an environment that engages students in learning while providing for their physical and socio-emotional well-being.
10. (Standard 10) Employs Varied Instructional Strategies. Teachers understand and use a variety of instructional strategies to enhance students' learning.
11. (Standard 11) Uses Technologies. Teachers appropriately incorporate new and proven technologies into instructional practice. They understand the major social, cultural, and economic issues surrounding their implementation.
12. (Standard 12) Accommodates for All Students. Teachers design educational environments and use instructional practices that accommodate students' achievements, strengths, challenges, interests, and learning styles.
13. (Standard 13) Is a Reflective Practitioner. Teachers are reflective practitioners who evaluate the effects of their assumptions, choices, and actions on others (students, parents, and other professionals in the learning community) and who actively seek out opportunities to grow professionally. They examine assumptions enmeshed in ways of thinking and in familial, institutional, and cultural lore, and practices.
14. (Standard 14) Relates Well with Students, Families, and Communities. Teachers relate to students, families, and community members in a fair, respectful, and sensitive manner. They show an appreciation for the cultural diversity of our society.
15. (Standard 15) Understands Legal Rights and Responsibilities. Teachers understand the legal rights and responsibilities of

professional educators and the law as it applies to their specific domains of teaching.

FOUR-YEAR PLAN

Physical Education – Sample Four Year Plan

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

ADVISING

PHYSICAL EDUCATION ADVISING

Prospective off-campus and on-campus physical education students will meet with Dan Timm in the Department of Kinesiology. Students considering physical education should schedule an appointment with Dr. Timm, dtimm@education.wisc.edu, or call 608-262-0259, as soon as possible. Pre-declaration advising is conducted by the Department of Kinesiology and staff in the School of Education Student Services office, see below.

Students with either a pre-certification (PED) or certification (BSPE) classification are required to meet with their department advisor at least once per semester. Mandatory advising meetings are conducted every semester, just before enrollment begins for the following semester.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online

resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Physical Education have searched for titles such as Classroom Teacher, Human Resources Manager, Curriculum Specialist, Personal Trainer, Wellness Coach, Fitness Instructor, Athletes Business Manager and Camp Director.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCApt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website (<https://kinesiology.education.wisc.edu/people/>). (<https://kinesiology.education.wisc.edu/>)

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification

candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of Become a Teacher (<https://tec.education.wisc.edu/become-a-teacher/>).

A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management

tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.

- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.
- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program

and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

PROMOTING ACTIVITY FOR DIVERSE ABILITIES, CERTIFICATE

Are you looking for a great way to gain knowledge and hands-on experience that prepares you for a career in the fields of healthcare, education, fitness, public health, and corporate wellness? Are you interested in enhancing your graduate school application in any of the aforementioned fields?

If you answered “yes,” the Promoting Activity for Diverse Abilities (PADA) Certificate—offered through the Department of Kinesiology—is the perfect blend of coursework and experiential learning. The Kinesiology Department’s mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life. Students who have completed the PADA Certificate go on to graduate programs and careers in occupational or physical therapy, speech language pathology, genetics counseling, nursing, medicine, special education, adapted physical activity, clinical exercise physiology, physical activity epidemiology, athletic training, public health, and many other exciting and challenging fields.

With a combination of coursework and opportunities to gain hands-on experience working directly with individuals with disabilities, this certificate will prepare you with the specialized knowledge and skills to safely promote and develop physical activities to improve the health, wellness, and functioning of individuals with a wide range of diverse abilities. You will be able to address inclusive activities aimed to improve general activities of daily living, functional fitness, posture, mobility, breathing, nutrition, and falls prevention, as well as adapted sports, fitness and recreation.

Coursework (16–18 credits) in this certificate is made up of a core that includes the topics of anatomy, disability, specialized program planning, and hands-on practica in the UW’s Adapted Fitness Program (<https://kinesiology.education.wisc.edu/adapted-fitness-personal-training/>). One of the UW’s most sought-after volunteer experiences, the Kinesiology Department’s Adapted Fitness Program, located in the heart of campus, offers fitness training and physical activities to community-dwelling clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the PADA certificate receive priority placement for volunteer positions. Elective options for the certificate will also give you some flexibility to tailor the certificate to your specific educational and career interests. Examples of elective topics include dance therapy, communicative disorders, health behavior and diversity in special education.

HOW TO GET IN

The SoE’s Undergraduate Academic Advising Services will administer the process that students will use to declare enrollment in the certificate. Students declaring in the Certificate must have a minimum grade point average of 2.50 to be eligible for the certificate to align with the School of Education’s requirement for good academic standing. Students intending to complete the Promoting Activity for Diverse Abilities Certificate should visit the School of Education’s Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students declared in the Physical Education BS may not declare the Certificate in Promoting Activity for Diverse Abilities.

REQUIREMENTS

Students must complete 16-18 total credits. The 9-10 credits of core courses will provide the foundation content and instruction needed to be successful in subsequent certificate courses and will provide an upper-level course focusing on application and mastering knowledge. Students will also complete 7-8 credits of breadth elective courses that span the departments of Kinesiology, Rehabilitation Psychology and Special Education, Dance, and Communication Sciences and Disorders. Breadth courses give students from a wide array of backgrounds and majors to select courses that will be applicable to a variety of diverse career interests or the students will also have the ability to choose courses in a more narrowed and detailed focus. Allowing for a set of focused elective choices or range of elective topic areas will be a benefit and a draw to students pursuing a variety of career paths.

Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be taken in residence.

CORE COURSES

Complete 9-10 credits from the following:

Code	Title	Credits
KINES 225	Practicum in Promoting Activity for Diverse Abilities	1
KINES 227 or ANAT&PHY 337	Introduction to Clinical Anatomy of Human Movement Human Anatomy	2
KINES 516	Physical Activity for Diverse Abilities	3
RP & SE 300	Individuals with Disabilities	3

BREADTH ELECTIVE COURSES

Complete 7-8 credits from the following:

Code	Title	Credits
CS&D 110	Introduction to Communicative Disorders	3
CS&D 210	Neural Basis of Communication	3
CS&D 424	Sign Language I	2
DANCE 231	Introduction to Dance/Movement Therapy	2
DANCE 232	Introduction to Dynamics of Dance Therapy	2
DANCE 331	Dynamics of Dance Therapy	3
KINES 100	Exercise, Nutrition, and Health	2
KINES 150	Foundations of Health Behavior and Health Equity	3
KINES 360	Lifespan Motor Development	3
KINES 540	Diversity in Health and Physical Activity Settings	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 466	Diversity in Special Education	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate the ability to increase healthy behaviors and safe activities for persons with diverse abilities.
2. Obtain the skills and knowledge to encourage, empower, and prescribe activity for people who exhibit a wide array of disabling conditions.
3. Identify, create and expand opportunities where larger organizations can create more accessible physical activity programs for those who exhibit diverse abilities.
4. Develop practical skills and knowledge to modify and or adapt activities to minimize the effects of disabling conditions and maximize healthy movement opportunities.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION

The Department of Rehabilitation Psychology and Special Education uniquely prepares personnel to support and advocate for the education and/or rehabilitation of people of all ages with disabilities. Special education and rehabilitation psychology are intrinsically related, both in basic objectives and in professional education and research. Instruction and research emphasize educational and behavioral assessment, treatment, and inclusion of children, as well as counseling, assessment, case management, advocacy, and job placement with adults to facilitate improved personal, social, and vocational adjustment.

Targeted populations encompassed by the program include adults and children with physical, emotional, intellectual and/or learning disabilities, traumatic brain injuries, alcohol and other drug abuse, and persons involved with the criminal justice system.

Three undergraduate programs are currently available:

- A pre-professional undergraduate program in Rehabilitation Psychology (p. 1808).
- Special Education (p. 1813), with certification options for three age groups:
 - Kindergarten-Grade 12 (p. 1828)
 - Birth-Grade 3 (p. 1822)
 - Birth-Grade 12 (p. 1824)
- A Special Education/Elementary Education dual major (p. 1630) is offered jointly with the Department of Curriculum and Instruction.

The Disability Rights and Services Certificate (p. 1807) may be completed by students pursuing other majors on campus.

Pending approval from the Wisconsin Department of Public Instruction (DPI), the department is thrilled to provide two new program options students may pursue to complete the bachelor of science in education (BSE) degree in special education. These options are available with fall 2022 program admission.

The first program option will prepare educators and interventionists to support young children with disabilities, and their families. This program, **Early Childhood Special Education (ECSE)**, will lead to certification in ECSE ages birth-Grade 3.

The second program option will prepare educators to support the needs of students with disabilities ages birth through Grade 12. This program is a dual certification option wherein students complete both the **ECSE program and the Special Education Cross-Categorical** program. Both new program options require four semesters of professional coursework and include multiple field experiences in local educational settings and schools.

DEGREES/MAJORS/CERTIFICATES

- Disability Rights and Services, Certificate (p. 1807)
- Rehabilitation Psychology, B.S. (p. 1808)
- Special Education, BSE (p. 1813)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website. (<http://rpse.education.wisc.edu/>)

DISABILITY RIGHTS AND SERVICES, CERTIFICATE

A primary mission of the Department of Rehabilitation Psychology and Special Education is to improve the lives of individuals with disabilities. The Disability Rights and Services Certificate provides undergraduates across the broader campus with knowledge, skills, and dispositions to contribute to the department's mission. Students completing the certificate will become advocates for equity and inclusion of individuals with disabilities within their own major programs of study and future careers.

Two required courses, RP & SE 100 Disability and Society and RP & SE 300 Individuals with Disabilities, address broad themes of disability, equity, and diversity that can be applied to a variety of other disciplines and majors. The certificate also allows students to individualize the certificate by selecting six credits of elective courses from an array of options. These choice courses relate to education, health, social sciences, psychology, and sociology. In this way students can make the certificate more complementary to their major program of study.

This 12-credit certificate can be completed in two semesters, or even one! Many of the courses are offered online in the summer.

HOW TO GET IN

Students intending to complete the Disability Rights and Services Certificate will find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note, students completing a major in Rehabilitation Psychology, Special Education or Elementary Ed-Special Education are not eligible to complete this certificate.

REQUIREMENTS

Complete a minimum of 12 credits to include at least 6 credits in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

Code	Title	Credits
<i>Required courses, 6 credits</i>		
RP & SE 100	Disability and Society	3
RP & SE 300	Individuals with Disabilities	3
<i>Specialization courses, 6 credits</i>		
RP & SE 121	Disability and Substance Abuse	
RP & SE 125	Health and Rehabilitation Professions	
RP & SE 200	Issues in Special Education (only offered as a FIG course)	
RP & SE 210	The Disability Experience (only offered as a FIG course)	
RP & SE 310	Positive Psychology and Well Being	
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	
RP & SE 401	Augmentative and Alternative Communication and Assistive Technology for Students with Disabilities	
RP & SE 402	Methods in Teaching Functional Skills	
RP & SE 405	Current Topics in Special Education	
RP & SE 435	Overview of Early Childhood Special Education	
RP & SE 466	Diversity in Special Education	
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations	
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Identify and analyze societal barriers and supports that affect the lives of people with disabilities.
2. Explore the societal aspects of disabilities, including the culture of disabilities, attitudes toward persons with disabilities, and quality of life issues.
3. Evaluate current approaches, advocacy efforts, and proposed solutions for overcoming barriers experienced by people with disabilities.
4. Use disability as a lens through which to examine broader aspects of history and culture, including power, discrimination, social stigma, social and political activism, media representations, re-appropriation, identity, intersectionality, education, work, and design.

REHABILITATION PSYCHOLOGY, B.S.

Rehabilitation Psychology is the academic home to students interested in the health or helping professions. Rehab Psych students enjoy working with people with disabilities or individuals who experience barriers in accomplishing personal goals; they gravitate toward psychology and other coursework in the social sciences.

In this major students learn how to promote and support the independence and full inclusion of people with disabilities in employment and the community. Students in the major examine various types of disabilities and other short-term or long-term barriers including physical, mental, intellectual, emotional, and developmental disabilities. Graduates are prepared to provide quality entry-level general services in a variety of community settings, including advocacy, behavioral support, independent living, and supported employment.

The majority of students go on to complete graduate programs in rehabilitation counseling, mental health counseling, occupational therapy, physical therapy, nursing, special education, social work, and other human services and health professions.

The culminating experience in the degree program is the community-based internship. Students complete six credits of internship, a minimum of 240 hours, working with agencies that serve individuals with disabilities. Students often find full-time employment at their internship site after completing their degree. Graduates receive a Bachelor of Science degree with a major in Rehabilitation Psychology.

Visit the departmental website (<http://rpse.education.wisc.edu/>) to view the program handbook (<https://rpse.education.wisc.edu/current-students/forms/>), learn more about internship opportunities and guidelines, and what students have to say (<https://www.youtube.com/watch/?list=PL9F9013685146C73A&v=Zu0u1MOjvB4&feature=youtu.be>) about the program.

"I chose to pursue rehabilitation psychology as I want to become an occupational therapist one day. This major allowed me to meet requirements for graduate programs while also furthering my passion to be a part of the human service field. I had a lot of opportunities to go out into the community and make a difference in people's lives." Aneta Glowacz, Rehab Psych B.S. graduate 2020

HOW TO GET IN

REHABILITATION PSYCHOLOGY DECLARATION

New first-year students and off-campus transfers are admitted directly to the Bachelor of Science–Rehabilitation Psychology degree program.

On-campus students starting at UW-Madison in other majors can declare Rehabilitation Psychology at any time of the year, and at any point in their academic career. First-semester students who have not established a GPA at UW-Madison may declare Rehabilitation Psychology.

Students are strongly encouraged to meet with the department's undergraduate program coordinator or an advisor in the School of Education Student Services office before declaring Rehabilitation Psychology. See the Overview (<https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/rehabilitation-psychology-bse/>) page for contact information.

ELIGIBILITY TO DECLARE REHABILITATION PSYCHOLOGY

The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with other information about current eligibility requirements and deadlines to declare (if any). Students should consult this site prior to submitting a declaration as this information may be modified from one year to the next.

Off-campus students wishing to transfer directly into Rehabilitation Psychology must be admitted to UW-Madison. See Transfer Students and Students with a Bachelor's Degree, below.

Students may not complete both Rehabilitation Psychology and the Certificate in Disability Rights and Services.

ELIGIBILITY REQUIREMENTS:

- Earn a minimum 2.50 cumulative GPA based on all college coursework attempted or a 2.50 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester.¹

1

Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.50 each semester after declaration. More information on this rule is available here (p. 1520).

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office

of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1520).

All off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu (soeacademicservices@education.wisc.edu) or call 608-262-1651 to schedule an appointment.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and

science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (B.S.) degree program in Rehabilitation Psychology has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Related coursework* comes from departments related to Rehabilitation Psychology—Psychology, Educational Psychology, Sociology, Social Work, and Gender and Women's Studies.
- *Rehabilitation Psychology* coursework offers an in-depth study of working with people with disabilities, including multiple opportunities for supervised field experience. In addition, at least 12 credits of electives in Rehabilitation Psychology are required, giving students some flexibility to tailor the program to their specific interests.
- *Elective* coursework is taken to meet the minimum of 120 credits required for the degree.

RELATED COURSE REQUIREMENTS PSYCHOLOGY/EDUCATIONAL PSYCHOLOGY

Complete 12 credits selected from Educational Psychology (http://guide.wisc.edu/courses/ed_psych/) and/or Psychology (<http://guide.wisc.edu/courses/psych/>) to include PSYCH 405 Abnormal Psychology.

SOCIOLOGY/SOCIAL WORK/GENDER AND WOMEN'S STUDIES

Complete 6 credits selected from Sociology (<http://guide.wisc.edu/courses/soc/>), Social Work (http://guide.wisc.edu/courses/soc_work/), and/or Gender and Women's Studies (https://guide.wisc.edu/courses/gen_ws/). Recommended areas include social disorganization, deviant behavior, alcohol and other drug abuse, community development, and issues in social welfare.

REHABILITATION PSYCHOLOGY COURSE REQUIREMENTS DIDACTIC CORE

Complete the following 21 credits:

Code	Title	Credits
RP & SE 125	Health and Rehabilitation Professions	3
RP & SE 316	Health Promotion for Individuals with Disability and Chronic Illness	3
RP & SE 325	Self Management of Chronic Illness and Disability	3
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations	3
RP & SE 501	Rehabilitation-Counseling Psychology: Applications	3
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	3
COUN PSY 655	Clinical Communication Skills	3

SUPERVISED FIELD EXPERIENCE

Complete 6 credits of RP & SE 630 Internship in Rehabilitation or Special Education; once in conjunction with RP & SE 501 Rehabilitation-Counseling Psychology: Applications. The remaining 3 credits may be completed in another semester or during the summer.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION ELECTIVES

Complete 12 credits from the following:

Code	Title	Credits
RP & SE 121	Disability and Substance Abuse	3
RP & SE 300	Individuals with Disabilities	3
RP & SE 310	Positive Psychology and Well Being	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 335	Introduction to Sport Psychology	3

RP & SE 401	Augmentative and Alternative Communication and Assistive Technology for Students with Disabilities	1
RP & SE 402	Methods in Teaching Functional Skills	1
RP & SE 405	Current Topics in Special Education	1
RP & SE 520	Case Management and Community Resources	3
RP & SE 560	Psychosocial Aspects of Chronic Illness and Disability	3
RP & SE 630	Internship in Rehabilitation or Special Education (Maximum 3 additional internship credits allowed in electives)	2-3
RP & SE 660	Special Topics (Forensic Rehabilitation, Technology Assisted Care, or Corrections and Disability topics only)	3

study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.50 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.50 cumulative grade point average in all major coursework. This GPA includes all coursework from the RP & SE department and COUN PSY 655.
- Major Residency. The rehabilitation psychology program requires that students complete 15 credits of the Didactic Core and Supervised Field Experience coursework while in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits. A minimum of 120 degree credits are required for graduation.

DEGREE AUDIT (DARS)

UW–Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of

LEARNING OUTCOMES

1. Analyze complex social issues using skills gained through the study of communication, quantitative reasoning, humanities, social sciences, natural sciences, ethnic studies, history and global issues.
2. Apply knowledge of models and concepts of disability and chronic illness to education, employment, rehabilitation, and healthcare services.
3. Identify basic theories in the field of psychology and recognize the importance of theoretical foundations in psychology for the study of rehabilitation, disability, and health.
4. Develop knowledge of the health and human services delivery systems and demonstrate pre-professional skills in communication, teamwork, problem solving, and ethical issues through engagement with the healthcare and rehabilitation services professional community.
5. Demonstrate the knowledge and skills necessary for graduate study in a variety of health and human service fields related to disability and rehabilitation or for entry-level positions in disability and related human services agencies.

FOUR-YEAR PLAN

Rehabilitation Psychology: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

ADVISING AND CAREERS

REHABILITATION PSYCHOLOGY ADVISING

Students not yet admitted to Rehabilitation Psychology meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, see below.

Students are assigned an additional faculty advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Rehabilitation Psychology have searched for titles such

as Behavioral Treatment Technician, Case Manager, Clinical Manager, Disability Services Coordinator, Inclusion Facilitator, Recreation Inclusion Specialist, Respite Provider, or Special Education Aide.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

ADDITIONAL RESOURCES

Students interested in graduate study may also want to consult the following resources:

- Center for Pre-Health Advising (<https://prehealth.wisc.edu/>)
- M.S. in Clinical Rehabilitation Psychology (<https://rpse.education.wisc.edu/academics/graduate-programs/master-of-science-m-s-in-rehabilitation-counseling/>)
- Occupational Therapy at UW-Madison (<https://kinesiology.education.wisc.edu/elotd/>)
- Physical Therapy at UW-Madison (<http://www.med.wisc.edu/physical-therapy-program/main/48437/>)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website (<https://rpse.education.wisc.edu/fac-staff/>).

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

SPECIAL EDUCATION, BSE

The Special Education program is the academic home to many students who enjoy working with children and youth, especially children and youth with disabilities. Special Education graduates enter a high-need field with an almost 100% job placement rate, with graduates finding employment in Wisconsin and across the country.

The program prepares educators to serve as resources and advocates for persons with disabilities and their families. This includes being a leader, collaborating with others, and working creatively within and outside schools to create inclusive educational experiences to improve the quality of life for individuals with disabilities and their families.

Graduates are prepared to work effectively across disability categories, including intellectual and developmental disabilities, learning disabilities, and emotional/behavioral disorders. The program emphasizes coursework and experiences in elementary, middle, and high schools

with students who have a wide range of abilities, including students with severe disabilities.

The Special Education program emphasizes coursework in areas including:

- Assessing learning needs in all core academic areas
- Creating individualized education programs
- Implementing instructional strategies for helping students with a variety of abilities succeed
- Using assistive technology
- Understanding behavior and intervention strategies for social and academic success
- Diversity issues in special education
- Working collaboratively with teachers and other school professionals to create successful inclusive learning environments

Students learn about these topics through a four-semester sequence of coursework, practicum experiences, and student teaching experiences in elementary, middle, and high schools.

NEW CERTIFICATION OPTIONS!

The department is thrilled to provide two new certification programs beginning with fall 2022 program admission. The first is a certification program in **Early Childhood Special Education (ECSE)**. Graduates will be certified in ECSE, ages birth-grade 3. This program prepares early intervention and early childhood special education professionals to serve young children ages birth through eight years who have, or are at-risk for, developmental delays and disabilities, and also the families of these children. Graduates may work in a variety of settings including, but not limited to, the birth-grade 3 program. These might include Early Head Start, Head Start, licensed child care centers, 4K programs, and grades kindergarten-grade 3.

The second new program option will prepare educators to support the needs of students with disabilities ages birth through Grade 12. This program provides a path for students to become certified in **both ECSE and Special Education Cross-Categorical K-12**. Both new program options require four semesters of professional coursework and include multiple field experiences in local educational settings and schools.

Effective with fall 2022 program admission, new teacher certification licensing options are being implemented at UW-Madison in response to changes in Wisconsin teacher licensing requirements. Pending final approval from the Wisconsin Department of Public Instruction, students admitted to Special Education can pursue one of four certification paths:

- Special Education Cross-Categorical, Kindergarten through Grade 12 (K-12) (p. 1828)
- Early Childhood Special Education, Birth-Grade 3 (p. 1822)
- Early Childhood Special Education, Birth-Grade 3 (p. 1824) **and** Special Education Cross-Categorical, K-12
- Special Education Cross-Categorical, K-12 (p. 1825) **and** Elementary Education, Kindergarten through Grade 9 (K-9). This option is jointly offered by the RP & SE and Curriculum and Instruction departments, see below.

Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>), an opt-in loan forgiveness program for teacher education students.

Madison College students should also investigate the new transfer agreement (<https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/>) between Madison College and UW-Madison. Students meeting the requirements of the agreement are guaranteed admission to UW-Madison's School of Education and to Special Education.

ELEMENTARY EDUCATION AND SPECIAL EDUCATION DUAL MAJOR CERTIFICATION PROGRAM

Students interested in Special Education may want to consider another program option that certifies students in both Elementary Education and Special Education. The job placement rate for students graduating from this program is almost 100%. Employment opportunities are available across the country.

The Elementary-Special Education teacher certification program prepares educators who foster high academic achievement in all children—particularly students of color, students from minoritized racial, cultural, linguistic and socioeconomic backgrounds, as well as students with disabilities. The program helps students become leaders who collaborate and work creatively within and outside schools to foster inclusive educational experiences for all pupils, including those with disabilities. Program graduates understand the important role that families play in supporting students' development and achievement.

This program emphasizes collaboration, with training in both Elementary and Special Education program areas. It focuses on inclusion and gaining a strong background in working with students across disability categories, including learning disabilities, emotional/behavioral disorders, and other high incidence disabilities.

Graduates receive a bachelor of science degree in Education. Effective with fall 2022 program admission, students will be eligible to receive an Elementary Education license in grades K-9 and a Special Education license in grades K-12.

The Elementary Education-Special Education program emphasizes coursework in areas including:

- Recognizing how our backgrounds and experiences shape thinking and actions; reflecting and adapting to best serve students
- Assessing learning needs in all core academic areas
- Creating individualized education programs
- Understanding behavior and intervention strategies for social and academic success
- Diversity and social justice in education
- Working collaboratively with teachers and other school professionals to create successful inclusive learning environments

Students learn about these topics through a four-semester sequence of coursework, practicum experiences, and student-teaching experiences in elementary and middle schools. The sequence begins in the fall after program admission.

Information about requirements and application procedures for the Elementary-Special Education dual teacher certification program is available in the Elementary Education (p. 1609) section of the Guide.

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

Undergraduate students generally apply to the professional part of the Special Education degree program in their sophomore year. Selection is made during the spring semester. Currently, students are admitted to the program once a year, effective for the summer following selection. Once admitted, students typically spend four semesters completing their remaining coursework.

Information about application procedures for the Elementary-Special Education dual teacher certification option is available in the Elementary Education (p. 1609) section of the Guide.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW-MADISON STUDENTS

New freshmen and transfer students interested in special education are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in special education receive the "pre-professional" classification of PSR.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p.)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

PROSPECTIVE TRANSFER STUDENTS

Applicants not already enrolled on the UW-Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

STUDENTS WITH A PREVIOUS DEGREE

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available

in person, by telephone or online; call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1520).

APPLICATION AND ADMISSION

Certification to teach special education requires that a student be admitted into the professional part of the degree program. The School of Education admits students into the special education program one a year, effective for summer following selection. In recent years the program has been able to accommodate all qualified applicants.

PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

To be eligible for admission to the professional program, applicants must:

- complete at least 40 transferable college-level credits by the end of the fall semester before application.
- successfully complete RP & SE 300 Individuals with Disabilities (3 cr) by the end of the summer semester of the application year.
- earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted.¹
- submit all program application form(s), transcripts, and other related application materials by the application deadline specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility for program consideration. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

PROGRAM SELECTION CRITERIA

The special education faculty will review all completed applications that meet eligibility criteria. When reviewing an application, special education faculty want to learn as much about the applicant as possible and will make every effort to take into account the whole person. Applicants are encouraged to provide, in writing, whatever they would want to share in a face-to-face interview.

The selection committee members will consider several factors when selecting students for the program. Although the grade point average (GPA) is considered an important indicator of success, it is not the only basis on which applicants will be selected for admission. Trends in the applicant's grades, difficulty of course load, and outside work load will be considered (see factors 1, 2, and 3 below).

In addition to the GPA, faculty will consider the following factors:

- **College grading and course selection pattern.** Transcripts will be examined individually. Account will be taken whether an applicant has clearly followed an unusually easy or difficult pattern of courses or if the GPA reflects a poor grade in an exceptionally difficult subject area.
- **Trends of college grades.** An applicant who started very poorly or showed a decline in their early phases of college, but performed strongly in later college years, may be judged more favorably than another with the same GPA but level or declining record.
- **Diversity of experience or background.** Work/life experience, college activity, political activity, and other experiences or background that adds a diverse perspective to the special education student body may work in the applicant's favor. Volunteer or paid work with people with disabilities will be taken into account in the selection process. Volunteer or paid work with people from a background different than the applicant's may also be taken into account in the selection process.

- **Writing sample (Statement of Purpose).** Application materials must include an essay in which the applicant gives reasons for becoming a special education teacher. Writing is so important in the professional life of teachers and in the teacher education program that the quality of the applicant's writing will be taken into account in making admissions decisions.
- **Letters of recommendation.** Recommendation letters will play an important role in helping the selection committee judge the applicant's prospects for academic success in the program. Careful, thoughtful letters from mentors, teachers, or employers will provide information about the applicant's intellect, imagination, or prospects for becoming a successful teacher. Working with people with disabilities will be taken into account in the selection process. Working with people from a background different than the applicant's may also be taken into account in the selection process.
- **Other factors.** The program's quest for diversity leads the selection committee to take into account fully qualified applicants from under-represented groups. Race, ethnicity, cultural, geographic background, and economic disadvantage are among the factors that will be considered, taking into account the needs of the schools. A full-time or extra heavy part-time work load will be considered a factor in close cases.

CRIMINAL BACKGROUND INVESTIGATION

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK–12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center.

Note: Students cannot complete the Certificate in Disability Rights and Services in conjunction with this program.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Special Education program has four primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn.
- *Core Requirements* offer an in-depth study of Special Education, including a four-semester *professional sequence* of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- *Elective* coursework is taken to reach the required minimum of 120 credits.

SPECIAL EDUCATION OPTIONS - SELECT ONE

View as listView as grid

- SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION BIRTH - GRADE 3, BSE (P. 1822)
- SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION/SPECIAL EDUCATION DUAL CERTIFICATION BIRTH-GRADE 12, BSE (P. 1824)
- SPECIAL EDUCATION: KINDERGARTEN - 9TH GRADE/SPECIAL EDUCATION KINDERGARTEN - 12TH GRADE DUAL CERTIFICATION, BSE (P. 1825)
- SPECIAL EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ELEMENTARY EDUCATION DUAL CERT, BSE (P. 1827)
- SPECIAL EDUCATION: SPECIAL EDUCATION CROSS CATEGORICAL K-12, BSE (P. 1828)

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty advisor(s) to receive certification through UW–Madison. The State of Wisconsin requires that anyone

wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1520).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- Minimum 120 credits (degree candidates only). Most students will need more than the minimum to complete all requirements.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1819)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Professionalism) Adhere to professional ethical standards and conduct her or himself in a courteous and professional manner.
2. (Collaboration and Communication) Collaborate and effectively communicate with students their families, other educators, related service providers and members of the community to address the needs of students with disabilities.
3. (Assessment) Collect information on student backgrounds, learning characteristics and achievement that can be used to determine students' present level of performance and guide instruction.
4. (Special Education Evaluation and Individualized Educational Planning) To the maximum possible the teacher candidate will participate in the Educational Evaluation and Individualized Educational Planning process.
5. (Instructional Planning) Plan instruction that meets the needs of students, is consistent with State and local standards and provides access to the general education curriculum.
6. (Instructional Presentations) Present lessons and units of instruction that gain and maintain student attention and are consistent with students' interests and IEP goals.
7. (Classroom Management) Create and maintain a safe, positive and supportive learning environment that is conducive to learning and the mental health of the students.

FOUR-YEAR PLAN

Refer to the available named options for more information on the four-year plans.

ADVISING AND CAREERS

SPECIAL EDUCATION PROGRAM ADVISING

Students not yet admitted to special education meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, see below. Students are assigned an additional faculty advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students
- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Special Education have searched for titles such as Classroom Teacher, Human Resources Manager, Curriculum Specialist, Camp Director, Disability Services Coordinator, Inclusion Facilitator, Behavior Therapist, Training Consultant, Early Childhood Family Educator, and Special Education advocate.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

ADDITIONAL RESOURCES

Students interested in special education may also want to consult the following resources:

- Read about the *relationship between Special Education and regular education programs*.
- Watch a Video describing the work of Special Educators.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website (<https://rpse.education.wisc.edu/rpse/people/faculty/>). (<http://rpse.education.wisc.edu/>)

CERTIFICATION/LICENSURE

ADDITIONAL CERTIFICATION REQUIREMENTS

Note: In August of 2018, the Department of Public Instruction issued new administrative rules governing educator licensing. Changes in certification requirements and also the license types and levels will occur as program areas implement the new requirements.

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. These requirements include those required by UW–Madison, the Department of Public Instruction, and those mandated by state statutes. While most of these requirements are embedded in course content, some (e.g., the Wisconsin Foundations of Reading Test) are not related to course enrollment.

Students pursuing certification should be aware of the following requirements. See the Teacher Education Center website (<https://tec.education.wisc.edu/>) for additional information/requirements.

Certification requirements should be monitored carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Disclosure Statement and Background Checks

Disclosure Statement

Applicants to School of Education programs that involve a practicum, internship, or other field placement must complete a disclosure statement indicating (1) whether they have been admitted to, then withdrawn from, asked to withdraw from, or

been dropped from a student teaching, clinical experience, or other intern/practicum program, and (2) if they have ever been placed on probation or disciplined by any college or university for academic dishonesty.

Background Checks

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) is required by law to conduct a background check on all Wisconsin educator license applicants.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Environmental Education

This licensing requirement is mandatory for all UW-Madison students in Elementary Education, Secondary Science and Secondary Social Studies certification programs. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Depending on the program area, students meet this requirement through their methods courses or by taking an environmental studies course.

Student Teaching and Assessment

Students in teacher education programs are required to complete a significant performance assessment prior to certification and eventual licensure. This assessment demonstrates the candidate's preparedness to teach. Until recently, the edTPA was the required assessment tool; it is no longer the only option. Additional tests may also be required, although this varies by certification area.

Detailed information related to these requirements, along with fee and registration information can be found on the Teacher Education Center website; see the Exams section of *Become a Teacher* (<https://tec.education.wisc.edu/become-a-teacher/>). A brief description of these tests and assessments is provided below.

Content Proficiency

Students completing professional education programs must demonstrate proficiency in their content area. This is accomplished a number of ways, varying by certification area. For example, Elementary Education students must have a major GPA of 3.0. World Language Education students must have a 3.0 in their major or minor area, meet an ACTFL Oral

Proficiency Interview requirement, and also pass the ACTFL Writing Proficiency Test (WPT). A student may be required to take and pass an approved examination in their content area, usually the appropriate Praxis II: Subject Assessments/Specialty Area Tests through the Educational Testing Service (ETS).

Wisconsin Foundations of Reading Test

As of January 31, 2014, individuals seeking an initial Wisconsin license to teach in kindergarten through grade 5 or in special education, an initial Wisconsin license as a reading teacher, or an initial Wisconsin license as a reading specialist, must take and pass the Wisconsin Foundations of Reading Test. Students in Special Education have an additional portfolio option that can be used as a substitute for the WFORT. Undergraduate programs impacted by this requirement are Elementary Education and Special Education.

This test is for Wisconsin licensing purposes **only**. Students who choose not to pursue Wisconsin educator licensing need not take and pass this test.

Teacher Performance Assessment (edTPA)

Until recently, students were required to pass the edTPA to be recommended for licensure. Students may still elect to use it as an assessment tool, but it is no longer required. The edTPA is a subject area-specific, performance-based assessment for pre-service teacher candidates, which is centered on student learning. Evidence of candidate teaching proficiency in the areas of planning, engagement and instruction, and assessment is drawn from a subject-specific learning segment, 3–5 lessons from a unit of instruction. Assessment artifacts include video clips of instruction, lesson plans, student work samples, analysis of student learning, and reflective commentaries. These artifacts will be taken together and scored by trained evaluators using the standardized set of edTPA rubrics.

Field Experiences

School-based field experiences are a critical part of students' professional preparation for teaching. Under Wisconsin State regulations, students seeking teaching certification from UW–Madison are required to complete at least one pre-student teaching practicum and at least one full semester of student teaching. Most programs at UW–Madison require students to complete additional field experiences.

Pre–Student Teaching Practicum

The pre–student teaching practicum gives students firsthand knowledge of the classroom environment and the teacher's role. For many students, the practicum is the initial encounter with the real world of teaching. Practicum students do not assume the degree of classroom responsibility they do during student teaching. Under the supervision of an experienced teacher, practicum students observe classroom activities, assist the teacher with day-to-day classroom management tasks, interact one-to-one with students, and instruct small groups. The cooperating teacher and university supervisor use the practicum to assess the student's readiness for the student teaching experience.

Student Teaching Experience

Student teaching, the culminating field experience, is a full-time, school district semester assignment that places a university student under the guidance of an experienced, qualified cooperating teacher. After an orientation period, the

student teacher gradually assumes more responsibility for planning, instruction, and overall classroom management. Student teachers follow the daily schedule of the cooperating teacher and the building policies of the school, and function as regular staff members in arrival and departure times and attendance at school events.

The student teaching experience follows the calendar of the local school district. A fall semester assignment will typically begin the latter part of August and end the latter part of January. A spring semester assignment will begin the latter part of January and end mid-June. Holiday breaks follow the school district calendar. Carrying other formal course work during the student teaching semester is strongly discouraged.

Detailed policies and regulations regarding field experiences can be found on the Teacher Education Center website (<https://tec.education.wisc.edu/resources/>). Students and staff are responsible for knowing and complying with the Field Experience policies. Many professional programs have their own separate handbooks and specific policies; students are also responsible for those policies and procedures.

Withdrawing From/Failing Field Experience Assignments

Withdrawing from a field experience has serious implications for the student's progress in the program. Students who withdraw or receive an unsatisfactory grade (including a "D") from a field experience may not repeat such experiences without approval from the program coordinator. Students withdrawing from or receiving an unsatisfactory grade in field experiences in one major or program may not enroll in another major or program without written permission from the program coordinator. Because of the consequences that withdrawal from a confirmed assignment may have on a student's future progress in the teaching certification program, a student who contemplates such action is strongly urged to consult with the program coordinator to fully understand the implications of such action and the options available.

Minority Group Relations and Conflict Resolution

Minority Group Relations

Wisconsin State teacher education regulations require students to complete a section titled *Minority Group Relations*. The rules identify Minority Group Relations as

- The history, culture, and tribal sovereignty of American Indian tribes and bands located in Wisconsin.
- The history, culture and contributions of women and various racial, cultural, language and economic groups in the United States.
- The philosophical and psychological bases of attitude development and change.
- The psychological and social implications of discrimination, especially racism and sexism in the American society.
- Evaluating and assessing the forces of discrimination, especially racism and sexism on faculty, students, curriculum, instruction, and assessment in the school program.

- Minority group relations through direct involvement with various racial, cultural, language and economic groups in the United States.

UW–Madison teacher education programs address these areas through course work and experiences in each professional education program. Students who successfully complete their professional program will have satisfied each of the areas of Minority Group Relations.

Conflict Resolution Requirement

Wisconsin State teacher education regulations require all individuals pursuing teacher certification to have formal training in conflict resolution. This includes

- Resolving conflicts between pupils and between pupils and school staff.
- Assisting pupils in learning methods of resolving conflicts between pupils and between pupils and school staff, including training in the use of peer mediation to resolve conflicts between pupils.
- Dealing with crises, including violent, disruptive, potentially violent or potentially disruptive situations that may arise in school or activities supervised by school staff as a result of conflicts between pupils or between pupils and other persons.

All teacher certification programs include conflict resolution training in their required course work.

Phonics

As of July 1, 1998, the State of Wisconsin requires that all persons seeking initial and renewal licenses to teach reading or language arts in grades Pre-Kindergarten to Grade 6 (PK–6) must have successfully completed instruction in teaching reading and language arts using appropriate instructional methods, including phonics. "Phonics" means a method of teaching beginners to read and pronounce words by learning the phonetic value of letters, letter groups and syllables.

The Phonics requirement applies to students completing Elementary Education and Special Education certification programs. UW–Madison students fulfill this requirement through the successful completion of courses that are already required, so no additional course work is needed to meet this statutory requirement.

Cooperatives

This licensing requirement is mandatory for secondary Social Studies Education certification. Students with previous degrees in their subjects must also monitor and complete this requirement for certification and licensure.

Students typically complete the cooperatives requirement after being admitted to the Secondary Social Studies program and should consult with the program coordinator regarding its completion.

Teacher Standards

UW–Madison teacher education students must meet all state licensing requirements for initial teaching certification in Wisconsin. These requirements, sometimes referred to as administrative rules "PI 34," mandate that individuals demonstrate proficiency on state-approved teaching

standards. Each teacher education institution in Wisconsin has adopted a set of teacher education standards that meet state guidelines. These standards must be met by all students completing a licensing program.

Program graduates of UW-Madison demonstrate their knowledge and skills in five broad standard areas: (1) learner and learning environment, (2) planning, (3) engaging/instructing, (4) assessing, and (5) behaving in professional and ethical ways. Guided by Foundational Knowledge (Content) Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Knowledge-Standards-3.27.20.pdf>), programs provide the knowledge and skills needed to meet the Performance Standards (<https://merit-www.education.wisc.edu/tec/wp-content/uploads/sites/41/2020/06/Performance-Standards-3.27.20.pdf>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The Department of Public Instruction recently issued new administrative rules governing educator licensing. Changes in requirements and also the license types and levels will occur as program areas implement the new requirements.

Pending final approval from DPI, the following licensing options will be offered at UW–Madison.

- The core Elementary Education licensing level will be *Kindergarten through Grade 9*, *Early Childhood*, or *English as a Second Language Kindergarten through Grade 12*, may be added to the K-9 option. These new levels will replace the current licensing levels of *Early Childhood* and *Middle Childhood through Early Adolescence*.
- Special Education will offer licensing at the *Early Childhood* level, *Kindergarten through Grade 12* level, and a program option that licenses in *Early Childhood* and *K-12 Special Education*. The Special Education/Elementary Education dual major option certifies students in *Special Education Kindergarten through Grade 12* and *Elementary Education Kindergarten through Grade 9*. These new levels will replace and expand the current licensing levels of *Middle Childhood through Early Adolescence* and *Early Adolescence through Adolescence*.
- Secondary Education program areas will license in their subject area *Grades 4 through 12*, and also in *English as a Second Language Kindergarten through Grade 12*. These new levels will replace the current licensing level of *Early Adolescence through Adolescence*.
- World Language Education program areas will license at the *Prekindergarten through Grade 12* level, replacing the current level of *Early Childhood through Adolescence*.
- Students in special fields such as Art, Communication Sciences and Disorders, Music, and Physical Education will be licensed at the

Prekindergarten through Grade 12 level, replacing the current level of Early Childhood through Adolescence.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW–Madison teacher certification students, the endorsement will come from the School of Education, 139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education Student Services Office at 139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (mlpatton@wisc.edu) to be completed. You must complete your personal information on the form before sending it to Student Services. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to Student Services.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION BIRTH - GRADE 3, BSE

REQUIREMENTS

The Early Childhood Special Education option will prepare students to work as educators and early interventionists for children with disabilities from birth through grade 3.

PREREQUISITE FOR PROGRAM ADMISSION

This course must be completed by the end of the summer of the application year and is calculated into the major gpa required for graduation.

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3

EARLY CHILDHOOD SPECIAL EDUCATION PROFESSIONAL SEQUENCE

Students complete a four-semester sequence of professional courses after admission to the program. Although some requirements may be completed prior to program admission, the remaining professional methods courses and clinical (field) experiences must be followed sequentially and taken in consecutive semesters unless a modification is approved. Class schedules for the professional sequence courses are determined in advance.

¹ May be taken before semester 1 of the professional sequence, including prior to program admission. A minimum of 120 credits is still required to complete the degree.

CONTENT AREA MINOR (OPTIONAL REQUIREMENT)

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, **but students will not receive an additional certification in the subject area.** The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. See the links below for the requirements of each minor.

Minor Options

- Biology (p. 1587)
- Chemistry (p. 1589)

- Earth Science (p. 1608)
- Economics (p. 1608)
- English (p. 1634)

Total Credits 120

1

May be taken before semester 1 of the professional sequence, including prior to program admission.

A minimum of 120 credits is still required to complete the degree.

SPECIAL EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ELEMENTARY EDUCATION DUAL CERT, BSE

REQUIREMENTS

The Middle Childhood–Early Adolescence/Dual Elementary and Special Education option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12–13). Students are certified in both Special Education and Elementary Education at the Middle Childhood–Early Adolescence levels. Admitted students begin the four-semester professional sequence in the fall following admission.

The option coursework listed here is one component of the Elementary/Special Education, BSE degree (p. 1611) requirements.

RP & SE 300 Individuals with Disabilities–Admission Prerequisite

This course must be completed prior to beginning the professional sequence.

Course may be taken prior to scheduled semester, including prior to program admission.

FOUR-YEAR PLAN

Special Education: Special Education Cross Categorical K-12 option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

If you are interested in completing a study abroad semester, please meet with Kayla Armstrong prior to starting the professional sequence and review the study abroad section of the planning document (<https://uwmadison.box.com/s/kcids3uopuacgj5c2qtc8qke6ii6ods8/>). Study abroad semesters are usually completed during the fall semester of a student's senior year.

Total Credits 120

1

Course may be taken prior to scheduled semester, including prior to program admission. A minimum of 120 credits is required to complete the degree.

THEATRE AND DRAMA

A degree in Theatre and Drama from the University of Wisconsin–Madison can open doors to a wide range of careers. Our alumni are successful in theatre, film, television, gaming, production management, development, design, education, and all aspects of the entertainment industry. Our faculty are active theatre professionals who bring current and practical knowledge into the classrooms and productions. Our department is well known for the individual attention, mentoring, and commitment we give our students.

Through mainstage, open-stage, and student-produced works, the Department of Theatre and Drama provides students with excellent opportunities to apply skills and techniques learned in the classroom in fully staged productions.

New Theatre and Drama majors will complete a Bachelor of Science degree in Theatre and Drama (p. 1832) through the School of Education.

Majors may informally select areas of emphasis such as design, stage management, directing, acting, or theatre technology. Students whose primary interest is acting may pursue the Acting Option (p. 1836). An audition is required prior to acceptance to the Acting Option, and is held each semester. Students should see the department advisor for more information on the Acting Option.

Non-majors who wish to extend their familiarity with theatre in theory and practice are encouraged to enroll in department courses and participate in productions. The Certificate in Theatre (p. 1837) allows students from across campus, regardless of their major or degree program, to engage in a structured, meaningful theatre-related experience. The department has hosted students from many disciplines—such as law, business, medicine, art, dance, science, and social work—who wish to develop effective communication skills, enhance problem-solving abilities, and cultivate visual acumen.

DEGREES/MAJORS/CERTIFICATES

- Theatre and Drama, B.S. (p. 1830)
- Theatre, Certificate (p. 1837)

PEOPLE

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department’s website (<http://theatre.wisc.edu/>).

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

The Theatre and Drama major may be completed either as the primary major or as an additional ("double") major.

PRIMARY MAJOR IN THEATRE AND DRAMA

Undergraduate students interested in completing the Bachelor of Science–Theatre and Drama degree program will fulfill the School of Education's liberal studies and other degree requirements in addition to the 43 credits required for the Theatre and Drama major.

ADDITIONAL MAJOR IN THEATRE AND DRAMA

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Theatre and Drama as an additional major. Students completing Theatre and Drama as an additional major do not need to complete the School of Education's liberal studies and other degree requirements. For application information, go directly to the Additional Major in Theatre and Drama (p. 1832) section below.

ENTERING THE SCHOOL OF EDUCATION

NEW AND CURRENT UW–MADISON STUDENTS

Incoming freshmen enter directly into the Bachelor of Science–Theatre and Drama degree program upon admission to UW–Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

All other on-campus students will submit an application following a meeting with the department's academic advisor.

PROSPECTIVE TRANSFER STUDENTS

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Transfer students enter directly into the Bachelor of Science–Theatre and Drama degree program upon admission to UW–Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required. Prospective transfer students are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective transfer students are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

STUDENTS WITH A PREVIOUS DEGREE

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll

in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science–Theatre and Drama degree program. No additional application to Theatre and Drama is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective second degree candidates are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

APPLICATION AND ADMISSION

While new freshmen and off-campus transfers are admitted directly to the B.S.–Theatre and Drama degree program, all other current UW–Madison students seeking to enter the B.S.–Theatre and Drama program must apply for admission to the program. Students must make an appointment with the departmental advisor to complete the declaration form. Requirements and selection criteria may be modified from one application/admission period to the next.

CRITERIA FOR ADMISSION

Eligibility for admission consideration to B.S.–Theatre and Drama:

- Cumulative grade-point average on all transferable college-level coursework of at least a 2.50 (on a 4.00 scale).¹
- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Submission of all required application materials, including program application and transcripts.

1

A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1520).

ADDITIONAL MAJOR IN THEATRE & DRAMA

Undergraduate students from all schools and colleges on campus (including Education) may declare Theatre and Drama as an additional major. Students wishing to declare the additional major must make an appointment with the departmental advisor to complete the declaration form. The declaration must also be approved by the student's home school/college.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

REQUIREMENTS**UNIVERSITY GENERAL EDUCATION REQUIREMENTS**

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1528) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1528) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1528) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (B.S.) degree program in Theatre and Drama has three primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major requirements* permit in-depth studies of theatre and drama.
- *Additional electives* to reach the minimum of 120 degree credits. These credits allow students to pursue individual areas of interest, such as a second major or additional theatre and drama credits. Many B.S.–Theatre and Drama students complete an additional major from the College of Letters & Science. Some use this major to complement their theatre preparation, while others select majors that reflect interests completely unrelated to theatre.

MAJOR REQUIREMENTS

Effective Fall, 2018

Complete a minimum of 43 credits. At least 15 credits of upper-level major coursework (courses designated intermediate or advanced, and/or courses at the 300 level or above) must be taken in residence with a minimum 2.5 grade point average.

Code	Title	Credits
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature ¹	3-4
THEATRE 130	Fundamentals of Theatrical Design	3
THEATRE 140	Voice 1: Effective Communication	3
THEATRE 150	Acting I: Introduction to Acting	3

THEATRE 221	Costume Studio Practicum	1
THEATRE 222	Lighting & Sound Studio Practicum	1
THEATRE 234	Collaborative Problem Solving	3
THEATRE 260	Producing Theatre	3
THEATRE 357	Introduction to Theatre for Cultural and Social Awareness ³	3
THEATRE 367	Script Analysis	3
Choose one of the following:		3
THEATRE 327	History of Costume for the Stage	
THEATRE 431	History of Theatres and Staging	
THEATRE 526	The Theatres of China and Japan	
THEATRE 631	Theories of Acting	
Required Electives - Complete a minimum of 9 credits; 6 credits must be at the 300 level or above. Practicum courses do not count as elective credit.		9

1

The 4-credit option of ENGL/THEATRE 120 Introduction to Theatre and Dramatic Literature satisfies the General Education Communication Part B requirement.

2

Or approved substitute.

3

Also meets ethnic studies requirement.

Electives

Select any Theatre and Drama (<http://guide.wisc.edu/courses/theatre/>) department courses to total 43 credits. Majors are urged to consult the

department academic advisor in selecting courses, especially when building an emphasis in any one area.

REQUIREMENTS FOR THE ACTING OPTION

View as listView as grid

- THEATRE AND DRAMA: ACTING (P. 1836)

HONORS IN THE MAJOR

Students completing the requirements for Honors in the Major engage in valuable preparation for graduate and professional training and learn worthwhile skills that will benefit them in the workplace.

Those students interested in earning Honors in Theatre and Drama should declare their intention to graduate with Honors in the Major at the end of their sophomore year or the beginning of their junior year. The department advisor must be consulted to determine the best way to fulfill the honors requirements and how to make the most out of the experience.

Honors in Theatre and Drama is earned by satisfying both the requirements for the major and these additional requirements:

- Maintain a minimum GPA of 3.5 in major courses and an overall GPA of at least 3.3 in all courses taken at UW–Madison at the time of graduation.
- Complete one of the following courses:

Code	Title	Credits
THEATRE 500	The Business of the Business	3
THEATRE 501	The Business of Acting	3
M H R 320	New Ventures in Business, the Arts and Social Entrepreneurship	3

- Complete the following two-semester senior honors thesis for a total of six credits. Students must procure a mentor to supervise these two courses and their honors thesis project. This thesis may be a written research thesis, an original work of art, a performance, or other project determined by the student and his/her mentor. All senior honors theses will culminate in an open presentation of their work.

Code	Title	Credits
THEATRE 681	Senior Honors Thesis	3
THEATRE 682	Senior Honors Thesis	3

Students should be aware that some courses are not offered on a regular basis (some are offered every other year, some based on student enrollment in the department, and some based on current staffing.). Please contact the department advisor for information on specific courses and course equivalence.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.

- 2.5 cumulative grade point average in all upper-level major coursework. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Major Residency: Students must complete a minimum of 15 credits of upper-level coursework in the major in residence on the UW–Madison campus. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation in the B.S.–Theatre and Drama degree program.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar’s website (<https://registrar.wisc.edu/dars-student/>).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate the ability to evaluate the art and craft of theatre both critically and conceptually.
2. Demonstrate the ability to interpret and analyze a script as an integral part of the theatrical process.
3. Demonstrate knowledge of theatrical history and literature.
4. Demonstrate competence in effective communication through vocal dynamics, movement, and the sharing of ideas.
5. Demonstrate the ability to problem-solve creatively and generously collaborate as theatre artists.

FOUR-YEAR PLAN

Theatre and Drama: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Total Credits 120

1

THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature is a requirement of the Theatre and Drama major. The 4-credit option also satisfies the General Education Communication Part B requirement. If the 4-credit option is selected, it may not be available until after the sophomore year. Either the 3 or 4 credit option will meet the Theatre and Drama major requirement.

ADVISING AND CAREERS**THEATRE AND DRAMA DEPARTMENTAL ADVISING**

Prospective off-campus and on-campus B.S.–Theatre and Drama students will meet with department academic advisor Jim Stauffer, Department of Theatre and Drama, 6004 Vilas Communications Hall, 821 University Ave. (main office) 608-263-2329, jbstaufer@wisc.edu. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

SCHOOL OF EDUCATION ADVISING

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://guide.wisc.edu/undergraduate/education/#resourcestext>) staff is here to assist students with the adjustment to college, understanding their degree and career goals, and connecting to resources. ESS supports prospective and current School of Education students in all programs through:

- academic and career advising
- mentoring and advocacy for underrepresented and international students

- requirements monitoring
- interpreting academic policy
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

CAREER ADVISING IN THE SCHOOL OF EDUCATION

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-world application. Through individual appointments, events, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development. From building resumes, conducting job and internship searches, developing interview skills, and negotiation strategies, the Career Center provides a foundation for developing the essential skills for the ever-changing world of work.

Students can set up their profile on Handshake (<https://app.joinhandshake.com/login/>), the campus online career management system, to find open internships, jobs, and career events. In addition to Handshake, there are many other job search sites to consult, such as Indeed, Glassdoor, and some that are industry-specific. Students majoring in Theatre and Drama have searched for titles such as Actor, Production Manager, Prop Creation & Design Specialist, and Set & Stage Designer.

Current School of Education students can make an appointment with a Career and Internship Advisor by logging into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard and selecting a day and time that works best with their schedule.

School of Education Alumni can schedule an appointment by completing the appointment request form (<http://bit.ly/CCAppt/>).

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website. (<http://theatre.wisc.edu/>)

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1541) page.

THEATRE AND DRAMA: ACTING

REQUIREMENTS

Theatre and Drama majors with a primary interest in acting may audition for the Acting Option. This highly-structured program of study offers students a deeper practical knowledge and experience of the skills required to pursue professional work as an actor and/or advanced studies in theatre. These students are highly mentored and will benefit from personalized performance reviews with the acting faculty at the end of each semester.

Admission is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis and be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students who qualify for the Acting Option are expected to audition for University Theatre productions and play as cast. This named option will be formally documented on the student's official transcript. The option coursework listed here is one component of the B.S. Theatre and Drama (<http://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/#requirementstext>) degree requirements.

Effective Spring, 2019

Complete a minimum of 45 credits to include the following:

Code	Title	Credits
Required Courses		
THEATRE 140	Voice 1: Effective Communication	3
THEATRE 240	Intermediate Voice Training	3
THEATRE 150	Acting I: Introduction to Acting	3
THEATRE 250	Fundamentals of Acting	3
THEATRE 350	Acting Realism	3
THEATRE 162	Backstage Experience	1
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature	3
THEATRE 631	Theories of Acting	3
THEATRE 367	Script Analysis	3
THEATRE 342	Fundamentals of Movement for the Stage	3
Choose four of the following:		12
THEATRE 351	Fundamentals of Asian Stage Discipline	
THEATRE 357	Introduction to Theatre for Cultural and Social Awareness	
THEATRE 440	Musical Performance for the Actor	
THEATRE 541	Acting Shakespeare	
THEATRE 352	Auditioning for Stage and Screen	
THEATRE 368	Fundamentals of Directing	
THEATRE 451	Acting for the Camera	
THEATRE 501	The Business of Acting	
Choose one of the following:		3
THEATRE 130	Fundamentals of Theatrical Design	
THEATRE 160	Technical Theatre Fundamentals	

THEATRE 234	Collaborative Problem Solving	
THEATRE 260	Producing Theatre	
THEATRE 364	Makeup for the Theatre	
Choose two of the following:		2
THEATRE 220	Scenic Studio Practicum	
THEATRE 221	Costume Studio Practicum	
THEATRE 222	Lighting & Sound Studio Practicum	
THEATRE 360	Performance in Practice	
If needed, additional Theatre courses to meet minimum of 45 credits		

FOUR-YEAR PLAN

Theatre and Drama Major: Acting Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Admission to the Acting Option is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis, and be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students who qualify for the Acting Option are expected to audition for University Theatre productions and play as cast.

THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature is a requirement of the Theatre and Drama major: Acting Option. The 4-credit option also satisfies the General Education Communication Part B requirement. If the 4-credit option is selected, it may not be available until after the sophomore year. Either the 3 or 4 credit option will meet the Theatre and Drama major requirement.

THEATRE, CERTIFICATE

The Certificate in Theatre may be completed by any University of Wisconsin–Madison undergraduate student who is not a declared Theatre major. This certificate program offers students the ability to develop knowledge and skills in an area of theatre discipline.

Theatre is a collaborative art form with many varied disciplines and talents working together to create a unified piece of art. We've created this certificate to be flexible enough for a student to pursue an individualized focus of study in an area of their interest. For example, a student may wish to pursue an acting focus, a technical theatre focus, a costuming focus, a scenic design focus, or a stage management focus. Or, a student may wish to meet with the theatre advisor to create a custom focus that supplements and bolsters their primary degree path.

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the certificate, with the exception of students completing the Theatre and Drama major.

To declare the certificate, students must meet with the theatre and drama department advisor to discuss focus paths and to complete the theatre certificate declaration form. Contact Jim Stauffer at jbstauffer@wisc.edu, (jbstauffer@wisc.edu) 608-263-2329 (main office), 6004 Vilas Communications Hall, 821 University Ave. Madison, WI 53706.

REQUIREMENTS

The Certificate in Theatre requires a minimum of 16 credits, with at least 8 credits taken in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

Code	Title	Credits
Choose two Foundational courses:		6
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature

THEATRE 361	Backstage Laboratory II

1

Students may request to take similar courses in other departments to fulfill this requirement.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate basic proficiency in one or more areas of theatre study.
2. Demonstrate understanding of basic theatre concepts and methodology.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website (<http://theatre.wisc.edu/>).

SCHOOL OF HUMAN ECOLOGY

The School of Human Ecology (SoHE) at UW–Madison is a place where faculty and advisors work closely with students to prepare them for careers that improve the quality of people's lives. Our majors are: community and nonprofit leadership, human development and family studies, interior architecture, personal finance, retailing and consumer behavior, and textiles and fashion design. Each program provides a solid curriculum of practical skills that lead students to exciting professions, a better understanding of people and our world, and a bachelor of science undergraduate degree.

SoHE is located in Nancy Nicholas Hall, a beautiful and newly renovated building that provides first-class, cutting-edge classrooms and studio spaces. Within these walls we connect students to their passions, helping them discover exciting careers and opportunities to make a meaningful impact on individuals, families, and communities. Faculty, students, and staff are dedicated to providing students with solid and meaningful education through coursework, internships, travel, student organizations, community involvement, research, and scholarship.

Learn more about SoHE and its majors at sohe.wisc.edu (<https://sohe.wisc.edu/>).

PEOPLE

Visit the School of Human Ecology faculty and staff directory (https://humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/).

ENTERING THE SCHOOL

APPLYING TO UW–MADISON

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in a SoHE major on their UW–Madison application will be admitted to the SoHE program or pre-program of choice upon admittance to the university. In addition, students may indicate interest in a SoHE major when registering for Student Orientation, Advising, and Registration (SOAR).

VISITING CAMPUS AND SOHE

SoHE holds monthly visit events for prospective students and their families and guests.

View and register (<https://www.admissions.wisc.edu/visitbucky/events.php?etypeid=22>) for an upcoming visit event.

If you are unable to attend one of these dates, please contact the SoHE Advising and Career Center at 608-262-2608 or advising@sohe.wisc.edu to schedule an appointment.

CURRENT UW–MADISON STUDENTS DECLARATION

- First-semester students may declare SoHE majors.
- All students with fewer than 60 earned GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

APPLICATION

- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (<https://advising.humanecology.wisc.edu/>).

Visit On-campus Student Application (<http://advising.humanecology.wisc.edu/academics/apply/>) for application information and deadlines.

REENTERING STUDENTS

Students previously enrolled at the university who have not attended for a semester or more must complete a reentry application as outlined by the UW–Madison Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>). Students who were enrolled in a School of Human Ecology program before their absence from UW–Madison will be readmitted to that program, provided they were in good academic standing when they left (i.e., not on probation, strict probation, or dropped

by the university). Reentry applicants who were dropped by the university are asked to submit supplemental application materials. Instructions for the supplemental application are sent after the student has submitted the online reentry application.

Students who were previously enrolled in another UW–Madison school or college will not be admitted directly to a School of Human Ecology program. They must apply for reentry to the university with another school or college—usually the school or college in which they were previously enrolled. Once readmitted to the university, students may apply to the desired SoHE program through the application process for that program. For information about the school's programs and application processes, see *Applying to Human Ecology as an On-Campus Student* (<http://admissions.wisc.edu/apply-as-a-reentry-student/>).

It is recommended that students who have been readmitted to a School of Human Ecology program schedule an appointment with an academic advisor in the Advising & Career Center.

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit *SoHE Internships* (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

POLICIES AND REGULATIONS

SCHOLASTIC ACTIONS

FAILURES AND INCOMPLETES

Failures. Every course grade of F counts as 0 grade points, and as any other grade, remains permanently on the transcript. A student who fails a required course must repeat the course and secure a passing grade as soon as possible. The failure may not be addressed by repeating the course at another college or university.

Incompletes. An Incomplete may be granted when a documented illness or other substantiated hardship causes the student to be unable to take final examination or complete a limited portion of the course assignments. Under these conditions, a student who has carried a passing grade until near the end of the semester may request a grade of Incomplete. It is up to the instructor to decide whether an Incomplete is warranted. If granted a grade of Incomplete (I), the work must be completed and graded no later than the close of the next semester of residence at UW–Madison (exclusive of summer term). If not completed and graded by the last class day, the grade will lapse into a Failure (F). Instructors have the authority to set an earlier deadline for finishing up an incomplete. With documentation of extenuating circumstances, the student may seek permission to extend an Incomplete beyond the semester in which the course was scheduled to be completed. An extended Incomplete must be removed within the next semester in residence or the grade will lapse into Failure (F). Incompletes incurred during the summer session must also be completed no later than the close of the next semester in residence under the same rules. **Students are ineligible for the dean's list for the semester in which a grade of Incomplete is submitted.**

PROBATION AND DROPPED STATUS

Failure to earn at least a 2.0 GPA will result in the status of *Probation, Continued Probation, Strict Probation, Continued Strict Probation, or Dropped* from the university. Such actions are based on

1. the status of the student as a result of any previous academic action,
2. the cumulative GPA including the current semester, and
3. the GPA for the semester just completed.

Academic Actions will appear on the memoranda section of the student transcript.

DEFINITIONS OF SCHOLASTIC ACTIONS

Probation. A student with no previous action who earns a semester or summer term GPA less than 2.0 but 1.0 or more will be placed on probation.

Continued Probation. A student on probation whose cumulative GPA remains below 2.0 and whose semester or summer term GPA is 2.0 or above will be placed on continued probation. A student on continued probation whose cumulative GPA remains below 2.0 and whose semester

or summer term GPA is 2.0 or above will be placed again on continued probation.

Strict Probation. A student with no previous action but with a current semester or summer term GPA below 1.0 will be placed on strict probation. A student on probation whose semester or summer term GPA is less than 2.0 but 1.5 or above will be placed on strict probation.

Continued Strict Probation. A student on strict probation or continued strict probation who earns a semester or summer term GPA of 2.0 or above but whose cumulative GPA remains below 2.0 will be placed on continued strict probation.

Dropped from the University. A student on probation whose semester or summer term GPA is less than 1.5 will be dropped for one year.

A student on strict probation whose semester or summer term GPA is less than 2.0 will be dropped for at least one year.

Removal from Probation. Students on probation or strict probation will be automatically removed from probation when their cumulative GPA reaches 2.0 or more.

READMISSION AFTER DROPPED STATUS

Students who were dropped from the university based on academic performance are eligible for readmission consideration after one full calendar year. Students dropped for a third time will not be readmitted.

In order to reenter the university after one full year, a student must apply for readmission to the School of Human Ecology *and* for reentry to the university. **(Please note that a student is never guaranteed readmission after being dropped. Readmission is most likely if the student has addressed the issues that contributed to being dropped from the university and has been proactive in preparing for a successful return.)**

To apply for readmission to SoHE and the University of Wisconsin–Madison after being dropped, a student must:

1. Complete the SoHE Readmission Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSYMFD/).

To ensure readmission consideration, follow these deadlines:
 Summer or Fall Term—Apply by February 1
 Spring Term—Apply by October 1

2. Complete the university reentry application (<https://admissions.wisc.edu/apply-as-a-reentry-student/>).
3. Schedule an appointment with a SoHE academic advisor by calling 608-262-2608.

- Bring a copy of the completed SoHE Readmission Request Form and other supporting documentation (e.g. transcripts from other universities, other documents which support personal, academic, or health progress made during the time away) to the appointment.
- Use this advising appointment to: (re)establish a relationship with your academic advisor, review your enrollment plan for the term you intend to return, and review your degree completion plan.

4. The SoHE academic advisor will forward the Readmission Form, supporting documentation, and enrollment plan to the Assistant Dean for Academic Affairs for review. The dean may choose to consult with the student's previous academic department, Undergraduate Program Council and/or the student to make a decision. When a readmission decision has been made, the assistant dean will contact the student

in writing. Students who are granted permission for re-entry will be readmitted on strict academic probation to the School of Human Ecology.

DECLARING ADDITIONAL MAJORS

School of Human Ecology undergraduates can declare an additional undergraduate major in the College of Letters & Science. This is not a second degree. The additional major is noted on the student's transcript if all requirements of the Letters & Science major are completed.

School of Human Ecology students must plan to finish all additional academic programs concurrently with their SoHE degree. The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all SoHE degree requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program(s), specialization(s), study abroad, or honors program(s).

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

School of Human Ecology students interested in completing two degrees simultaneously (as opposed to two majors) should consult with their academic advisor early in their academic career to discuss the feasibility of completing requirements for both degrees. Degree combinations may come from two Human Ecology programs or from a Human Ecology program and a degree program in another school or college. Students must complete all of the requirements for both degrees, which include general education requirements, major coursework, and related disciplinary work.

It is the student's responsibility to be aware of any rules or regulations that could potentially impose additional financial responsibilities as a result of attempting to complete two degrees simultaneously. Please note that some campus schools and colleges do not permit dual degrees for their students, thus preventing Human Ecology degree combinations with degrees in these schools and colleges. Students wishing to earn two undergraduate degrees must follow these academic policies:

If the two degrees to be earned are within the School of Human Ecology, at least 30 additional credits and all course and grade point requirements must be completed for the second degree. Thus, a minimum of 150 credits would be required. The two degree programs must differ sufficiently to permit the total credits to be accumulated (for instance, personal finance and retailing & consumer behavior do not differ to the extent that it would take an additional 30 credits to complete the second degree; therefore, earning both degrees simultaneously will not be allowed). Before the start of the senior year in residence, students must meet the criteria for admission to both programs, must be certified to enroll in both programs, and must obtain academic dean's approval. The two degrees must be completed simultaneously. Some courses may satisfy requirements for both degrees, but course substitutions or curriculum exceptions between programs will be prohibited.

If the two degrees to be earned are from two different schools/colleges at UW–Madison, the two degree programs must differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits. Admission into the other school/college shall be based on the admission criteria for that particular school/college. The student must be certified to enroll in both programs/schools/colleges and written permission to complete the two degrees must be obtained from academic deans in both schools/colleges before the start of the student's senior year in residence. The two degrees must be completed

simultaneously. Some courses may satisfy requirements for both degrees, but course substitutions or curriculum exceptions between programs will be prohibited for the Human Ecology program.

RESIDENCY REQUIREMENT

The university requires that the last 30 credits be earned in residence at UW–Madison for students to be recommended for a degree, unless the student's major program requires completion of the degree at a cooperative institution. Permission of the assistant dean of academic affairs must be secured *in advance* to take any portion of the senior year at another institution or by correspondence. Students should initiate permission through their SoHE academic advisor.

CREDIT OVERLOAD

A full-time student carries a minimum of 12 credits to a maximum of 18 credits, with the usual or average credit load being 15–16 credits per semester. A student requesting more than 18 credits in a semester needs a signed request with approval from the School of Human Ecology academic dean. Students should initiate permission through their SoHE academic advisor. Students requesting this credit load must have earned a grade point average of at least 3.0 during the preceding semester on a program of at least 12 graded credits. "Graded credit" does **not** include courses taken on the Pass/Fail basis or Incompletes. Requests will be considered on an individual basis.

PASS/FAIL

The privilege of electing courses on a pass/fail basis is extended to undergraduate students in the school. Students who are in good academic standing (not on probation) may elect one course on the pass/fail basis per term. The summer sessions collectively count as one term. **A course taken pass/fail must be an elective.** A student may **not** take a required course or a prerequisite to a required course under this privilege. A maximum of 16 pass/fail credits may be counted toward a B.S. degree from the School of Human Ecology. **Courses taken pass/fail will count toward degree credits but will be excluded in the computation of grade point average and honors.**

Requests to take a course under the pass/fail privilege are initiated through the Course Change Request in the MyUW (<http://my.wisc.edu>) Student Center. Instructions for making a course change request can be found on the Registrar's website (<http://registrar.wisc.edu/>). After making the request in MyUW, the request is routed to the Advising & Career Center for approval or further communication.

The registrar will convert final grades submitted by the instructor, who is not informed of the student's pass/fail status, to an S (pass) for grades A, AB, B, BC or C, and to a U (fail) for a grade of D or F. The grade is excluded from the GPA.

APPEALS

APPEAL OF A SOHE GRADE

This appeal process is for a student who is dissatisfied with a grade received in a SoHE course.

1. The student will first discuss the grade appeal with the instructor of the course.
2. If the student and instructor cannot come to an agreement, the student will provide a formal written grade appeal to the assistant dean in SoHE. The written appeal must include: the class, instructor, grade received, date and conclusion of meeting with instructor, the

specific reason(s) for appealing the grade, and email address and telephone number where they can be reached for follow-up. Send to advising@sohe.wisc.edu.

3. The assistant dean will forward the appeal to the appropriate department chair. The department chair will perform the due diligence necessary (including, but not limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the assistant dean.
4. The assistant dean will communicate the decision to both the student and instructor in writing.
5. Should the student wish to appeal the decision further, the assistant dean will forward the appeal to the SoHE Undergraduate Program Council. The committee will perform the due diligence necessary (which may include, but not limited to, meeting with the instructor and department chair and/or student) to assess the merits of the appeal request and will provide a decision in writing to the assistant dean.
6. The assistant dean will communicate the decision to the student, the instructor, and the department chair in writing.

APPEAL OF DENIAL OF ADMISSION TO A SOHE UNDERGRADUATE PROGRAM

This appeal process is for a student who was denied admission to a SoHE undergraduate program.

Students who feel they have a compelling reason to appeal their admissions decision may do so in writing by the deadline indicated in the admission letter. Appeals must satisfy one of the following factors in order to be considered:

- The student believes a factual error was self-reported on the application or made by the admissions committee during review of the application.
- There is new information regarding academic or non-academic extenuating circumstances.

While admission appeals satisfying the above conditions will be reviewed by the admissions committee, it is important to understand that simply meeting these criteria in no way guarantees acceptance into the program.

Filing an Appeal

1. The student will file a letter of program admission appeal to the assistant dean in SoHE at advising@sohe.wisc.edu, stating the facts of the situation based on one or both of the conditions listed above and the student's email address and telephone number where they can be reached for follow-up. Any additional documentation or supporting evidence should be titled and attached to the letter of appeal. The deadline by which a student must file an appeal will be written in the denial letter for the undergraduate program in question. For a situation where grades/credits were not posted to a student's record prior to applying to the program, the student record must be complete with grades and credits on the official UW–Madison record by the time the appeal is filed in order to be considered.
2. The assistant dean will forward the appeal to the appropriate departmental admissions committee. The admissions committee will perform the due diligence necessary to assess the merits of the new information for the appeal and will provide a decision in writing to the assistant dean.
3. The assistant dean will communicate the decision to both the student and departmental admissions committee in writing.

4. Should the student wish to appeal the decision further in the case of extenuating circumstances, the assistant dean will forward the appeal to the SoHE Undergraduate Program Council (UPC). The UPC will perform the due diligence necessary (which may include, but not limited to, meeting with the admissions committee, department chair, and/or student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
5. The assistant dean will communicate the decision to the student and the admissions committee in writing.

APPEAL OF BEING DROPPED BY UW–MADISON FOR ONE YEAR

SoHE students who are dropped from the university based on academic performance are permitted to appeal for readmission consideration immediately after being dropped. Students with documentation of special circumstances outside their control, evidence that these circumstances have changed, and realistic strategies in place to improve their academic performance have the greatest likelihood of a successful appeal.

Filing An Appeal

1. Students wishing to appeal their dropped status must do so prior to the deadline outlined in their dropped status notification. Students who do not appeal before the deadline must wait at least one full calendar year before being eligible for readmission consideration. The appeals process is initiated when students complete the online Dropped Status Appeal Form (https://uwmadison.qualtrics.com/SE/?SID=SV_6Lv7QPa3P6Ay7mR).
2. The Assistant Dean for Student Academic Affairs will submit the appeal information to the SoHE Undergraduate Program Council (UPC) for review. UPC will make a decision regarding the appeal before the beginning of the next term.
3. The assistant dean will communicate the appeal decision to the student in writing. If the appeal is granted, the student will be readmitted to the university on strict probation. If the appeal is not granted, the dropped status is sustained and the student is eligible for readmission consideration **one full calendar year after** the dropped date.

LATE DROP PETITION

SoHE requires that students follow drop deadlines outlined by the Office of the Registrar (<https://registrar.wisc.edu/>). Under certain special situations students may request an exception to drop one or more courses after the drop deadline through a petition.

Late Drop Petitions are only considered when students face significant, unforeseeable circumstances outside of their control that negatively impact their ability to successfully complete a course(s).

Students who believe they meet the requirements to petition must meet with their SoHE academic advisor and complete the online petition form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8A14WZBMjvSyMFD/).

CREDIT BY EXAMINATION INTERIOR ARCHITECTURE CREDIT BY EXAMINATION

The design studies department offers exams to qualifying students who seek to earn credit for the following courses:

- DS 120 Design: Fundamentals I
- DS 130 Introduction to Interior Architecture

DS 220 Design: Fundamentals II
 DS 222 Interior Design I
 DS 224 Interior Materials and Finishes
 DS 241 Visual Communication I
 DS 242 Visual Communication II
 DS 322 Interior Design II
 DS 421 History of Architecture and Interiors I: Antiquity through 18th Century

These exams are intended primarily for transfer and second-degree students who have acquired the equivalent information in courses completed at another institution, but did not receive transfer credit. Students will be charged by the UW Bursar's Office for each exam.

Credit by examination may be requested by the qualifying student at any time. Students who are eligible for the credit exam are strongly encouraged to take it no later than the start of their first semester at UW–Madison.

For more information:

Jung-hye Shin (<https://humanecology.wisc.edu/staff/shin-jung-hye/>),
 Interior Architecture Program Coordinator

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SOHE GENERAL EDUCATION REQUIREMENTS

Seven undergraduate majors are available in the school. There are common general education requirements for all SoHE majors, but these are reflected differently in each program. Please review each major

requirement page for the specific general education courses needed for the degree.

Code	Title	Credits
Literature		3
Select 3 credits designated Literature breadth		
Humanities ¹		6
Social Science		9
Select 9 credits designated Social Science breadth		
Physical, Biological, and Natural Science		9
Select 9 credits designated Physical, Biological, and/or Natural Science breadth		
Human Ecology Breadth		
Select 3 credits in the School of Human Ecology taken outside the major		
Major Requirements and Electives		
Minimum total for graduation: 120 credits with no fewer than 25 credits taken within the School of Human Ecology.		

1

SoHE will accept as humanities credit courses from designated humanities breadth courses as well as the following areas or departments: art, art history, classics, English, foreign languages (including beginning languages), cultural history, history of science, integrated liberal studies, literature (including comparative literature), music (including applied music), philosophy, communication arts, studies of cultures—e.g., African studies, East Asian studies, Hebrew and Semitic studies, South Asian studies, Scandinavian studies.

REQUIREMENTS FOR GRADUATION

The bachelor of science (B.S.) degrees granted by the School of Human Ecology require a minimum total of 120 credits, with a minimum of 25 credits in the school. To remain in good academic standing, students must maintain a minimum GPA of 2.0. A 2.0 cumulative GPA must be earned by the end of the senior year in order to be recommended for a B.S. degree.

The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all SoHE major requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program (s), specialization(s), study abroad, or honors program(s). It is the student's responsibility to prepare for graduation and to ensure that all graduation requirements have been met. Students expecting to graduate and/or participate in commencement exercises should declare their intent through the My UW Student Center in accordance with campus deadlines.

RESOURCES

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

HONORS

DEAN'S HONOR LIST

At the end of each semester the names of all students with a grade point average of 3.75 or higher in at least 12 graded credits for that semester will be included on the Dean's Honor List. A notation of "Dean's Honor List" will be entered on the student's transcript.

GRADUATION WITH DISTINCTION

"Graduation with Distinction" will appear on the transcripts of students who have earned a cumulative grade point average that places them *within the top 20 percent* of students graduating that term in their school or college with 60 credits or more at the University of Wisconsin–Madison.

Students *in the top 5 percent* will receive the designation "Graduation with Highest Distinction." The Office of the Registrar determines whether students have met these criteria. Notations citing graduation distinction will be made on the transcript.

HONORS PROGRAM

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campuswide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a SoHE honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

For additional information about the Honors Program including admission, requirements, credits, and honors thesis, contact the SoHE Advising & Career Center (<https://advising.humanecology.wisc.edu/>).

CIVIL SOCIETY AND COMMUNITY STUDIES

The Department of Civil Society and Community Studies offers a bachelor of science degree in community and nonprofit leadership and a Ph.D. in human ecology: civil society and community research. The community and nonprofit leadership major prepares its graduates for careers in community and nonprofit settings, graduate school, and post-baccalaureate service-oriented programs. Academic requirements include specialized emphases in human ecology; general studies in humanities, social sciences and natural sciences; and coursework focused on community impact and social change processes. Students may also engage in complementary coursework, undergraduate certificates, or additional undergraduate majors.

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

COMMUNITY AND NONPROFIT LEADERSHIP, B.S.

Through academic study, community engagement, and applied research, Community and Nonprofit Leadership (CNPL) undergraduate students develop into competent, caring professionals interested in community-based change and the expanding nonprofit sector. In smaller, inclusive,

project-based courses, CNPL students collaborate with each other and community partners, gaining practical experience and making a difference through their coursework. The CNPL bachelor of science degree prepares its graduates for careers in community and nonprofit settings, graduate school (in law, policy, community health, etc.), and post-baccalaureate service-oriented programs (such as Peace Corps, AmeriCorps, City Year, etc.), enabling them to create, lead, and support innovative community-based initiatives that change lives and make the world a better place. Their work and advanced study address human, family, and civil society issues such as: food and environmental justice, homelessness and rights to housing, health equity, gender equality, racial justice, community and leadership development, community organizing, advocacy, and more.

CNPL majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in the community and nonprofit leadership (CNPL) major on their UW–Madison application will be admitted to the CNPL major upon admittance to the university. In addition, students may indicate interest in CNPL when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

Declaration

- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

Application

- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (<https://sohe.wisc.edu/students/applying-to-sohe/bass/>).

Visit On-campus Student Application (<https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology/>) for application information and deadlines.

UNIVERSITY DEGREE REQUIREMENTS

- Total Degree** To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
- Residency** Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
- Quality of Work** Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Ecological perspectives on community and society) Articulate and apply an ecological perspective at discrete levels of analysis (individual, group, community, and society).
2. (Civic literacy and the public sphere) Assess the major trends in civil society recognizing the influence and interconnectedness across the major sectors of society and exhibit strong capacity for sustained, high impact participation in civic life.

3. (Identity, diversity, and social justice) Recognize well-being and social justice as relational and position, applying these principles in community organizing and empowerment.
4. (Organizational management and professional development) Demonstrate entry-level knowledge and skills relevant to nonprofit and community organizations and exhibit the practices of a lifelong learner.
5. (Research, analysis, and communication) Vet and/or generate high quality data, perform relevant analyses, and share results with target audiences using oral, written, and visual communication techniques.
6. (Leadership, ethics, and well-being) Recognize the value of being a reflective, ethical leader who cultivates others' strengths and leadership capabilities, while exhibiting self-care and care for others.

FOUR-YEAR PLAN

This is a sample four-year plan for Community & Nonprofit Leadership. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as

they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

CONSUMER SCIENCE

The Department of Consumer Science studies interactions among consumers, business, and government in order to advance the well-being of consumers, families, and communities. The department is multi-disciplinary, including study in economics, finance, sociology, psychology, marketing, and public affairs. The Department of Consumer Science offers two undergraduate degree programs: personal finance, and retailing and consumer behavior. Both courses of study focus broadly on the economic well-being of consumers and society, and are offered on-campus and online. The department also offers M.S. and Ph.D. degrees in human ecology: consumer behavior and family economics.

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

CONSUMER BEHAVIOR AND MARKETPLACE STUDIES, B.S.

CONSUMER BEHAVIOR & MARKETPLACE STUDIES

Consumer Behavior & Marketplace Studies leverages technology and research to understand and improve the global customer experience. This bachelor of science degree blends business and analytics with creativity, trend tracking, and technology. Students develop the skills to work in an industry that powers economies and offers ample employment opportunities, including online retailing and social commerce professions. Our experienced faculty guide students through an inspiring and flexible curriculum that prepares them for careers in a dynamic and globally-focused industry.

Explore the world of commerce and technology from a people-first perspective. As a Consumer Behavior & Marketplace Studies major students will learn to research, improve, and better understand the global customer experience with the support and guidance of SoHE faculty, a team of industry experts and researchers. Coursework integrates analytics and statistics with retailing, consumer science, and business courses.

SoHE's Consumer Behavior & Marketplace Studies graduates work for diverse and rapidly growing retailing companies around the globe. Technology and management jobs have been in high demand for several years and are only expected to continue their rapid growth.

Consumer Behavior & Marketplace Studies majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in the consumer behavior and marketplace studies major on their UW–Madison application will be admitted to the consumer behavior and marketplace studies major upon admittance to the university. In addition, students may indicate interest in

consumer behavior and marketplace studies when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

Declaration

- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

Application

- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (<https://advising.humanecology.wisc.edu/>).

Visit On-campus Student Application (<http://advising.humanecology.wisc.edu/academics/apply/>) for application information and deadlines.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Total Credits **35-36**

1

CNSR SCI 250 Retail Leadership Symposium may be repeated for up to three credits. Credits in addition to the one required credit will be counted as elective credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

FOUR-YEAR PLAN

This is a sample four-year plan for Consumer Behavior and Marketplace Studies. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

Please note there are several prerequisites required for course sequencing within the major. View prerequisites by clicking on the course links in the plan below. Some examples include:

- Statistics course and Excel proficiency for CNSR SCI 201 Consumer Insights
- Accounting for CNSR SCI 564 Retail Financial Analysis
- CNSR SCI 657 Consumer Behavior for CNSR SCI 555 Consumer Design Strategies & Evaluation

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)

- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment

are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

CONSUMER FINANCE AND FINANCIAL PLANNING, B.S.

This program provides an opportunity for students to complete the B.S. Consumer Finance and Financial Planning degree at a distance. This option is ideal for returning students with some college credits who would like to complete the program in a flexible online format, with no on-campus attendance required. This program is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. Topics include financial counseling, coaching, wealth management, financial product development, financial technology, and consumer behavior. Completion of the program and one additional elective course will make graduates eligible to sit for the Certified Financial Planner® (CFP) exam, which SoHE students pass well above the national average.

HOW TO GET IN

Students applying to the BS in Consumer Finance and Financial Planning program apply through UW-Madison Online (<https://online.wisc.edu/>). UW–Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

CONSUMER MARKETPLACE STUDIES, B.S.

Consumer Marketplace Studies provides an opportunity for students to complete their degree at a distance. This option is ideal for returning students with some college credits who would like to complete their undergraduate degree in a flexible online format, with no on-campus attendance required. Program emphasis is on researching, understanding, and improving the global customer experience. Topics include retailing, consumer behavior, and consumer research and analysis. Graduates will be prepared to meet industry demand for employees with strong analytic and decision-making skills, who can redefine the way companies empathize and engage with their customers.

HOW TO GET IN

Students applying to the BS in Consumer Marketplace Studies program apply through UW-Madison Online (<https://online.wisc.edu/>). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

Electives

Select electives to bring degree credit total to 120

Total Credits **32-33**

1

CNSR SCI 250 Retail Leadership Symposium may be repeated for up to 3 credits. The additional credit(s) will be counted as elective credit.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

FOUR-YEAR PLAN

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the [Requirements](#) tab for more information about the curriculum and program plan.

ADVISING AND CAREERS

ACADEMIC ADVISING

Each UW-Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-career-coach/>). The AC advisor will support the academic and personal success of each student by partnering with SoHE advisors in the Student Academic Affairs & Career Development Office (SAA), to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience. To find out about other ways UW Madison's campus supports their online learners visit the Academic Support Services page. (<https://oss.wisc.edu/support-services/>)

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors (<https://online.wisc.edu/academic-career-advisor/>) help prepare students for life post-graduation through individual and group advising. The Office of Online Student Success (OSS) (<https://oss.wisc.edu/>) also provides a number of career resources (<https://oss.wisc.edu/resumes/>) for online learners.

PERSONAL FINANCE, B.S.

The bachelor of science in personal finance looks at economics from a people perspective, developing financial experts who can help individuals and families live more secure lives. Graduates of personal finance are prepared to work in financial product development, financial technology, and consumer behavior.

Personal Finance: Financial Planning

Within the personal finance program, students may choose to complete the financial planning option. This financial planning option is registered with the Certified Financial Planner® Board of Standards. The coursework is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. The financial planning option is the more traditional personal finance program leading to careers in counseling, coaching, and wealth management. Graduates of the financial planning option leave fully prepared to sit for the prestigious Certified Financial Planner® exam, which SoHE students pass well above the national average.

All on-campus personal finance majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in the personal finance major on their UW–Madison application will be admitted to the personal finance major upon admittance to the university. In addition, students may indicate interest in personal finance when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

Declaration

- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

Application

- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (<https://advising.humanecology.wisc.edu/>).

Visit On-campus Student Application (<http://advising.humanecology.wisc.edu/academics/apply/>) for application information and deadlines.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success

as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

WISCONSIN EXPERIENCE

INTERSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)

- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

CERTIFICATION/LICENSURE

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

The requirements of this program do not meet Certification/Licensure in the following states:

DESIGN STUDIES

Design Studies offers multidisciplinary education in design and research of interior design environments and textiles and apparel design, through participation in formal classroom instruction and ongoing research and scholarly endeavors. Students benefit from a broad-based program and faculty specializing in areas such as design visualization, environment and behavior studies, history of interiors and textiles, interior architecture, material culture, textile and apparel design, and textile science.

Two undergraduate degree majors are offered: interior architecture, and textiles and fashion design. There is also a human ecology: design studies graduate program, offering M.S., MFA, and Ph.D. degrees. The department also offers an undergraduate certificate in textiles and design and the interdisciplinary, school-wide certificate in design strategy.

Student internships in both undergraduate majors augment campus course offerings, providing students with unique learning opportunities in their chosen fields. Design studies majors have access to design resources: studios, a computer laboratory equipped to support design work; textile laboratories including a testing room; an interior architecture resource room, the Design Gallery, the Helen Louise Allen Textile Collection, and the Ruth Ketterer Harris Library. In addition, a strong collaborative environment exists for students and faculty interaction with other departments, institutes, and museums on the campus and other design programs within the state and country.

RESOURCES AND SCHOLARSHIPS**ADVISING & CAREER CENTER**

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising,

academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

INTERIOR ARCHITECTURE, B.S.

The undergraduate major in interior architecture is a four-year professional program accredited by the Council for Interior Design Accreditation (CIDA) and leading to the Bachelor of Science degree in Interior Architecture. The program develops students' creativity in the design and planning of interior spaces by emphasizing the process and communication of design. Students learn to integrate the art of design with the social sciences concerning the interaction of people and their environment, the history of design, and the physical sciences relating to the effects of materials on the physical health and comfort of inhabitants. Insight into professional practice is enhanced through internship experiences.

Faculty maintain scholarly programs of study in design and research that form the basis of the graduate program and enrich the undergraduate program through coursework, design review, and student mentoring.

Course content helps students develop verbal and visual communication skills with exposure to both residential and commercial interiors. In

addition, courses in art history, history of interiors, engineering, and art are required. A final portfolio is required before graduation. Studio spaces for student use, a resource center containing catalogs and samples, plus a lighting demonstration area and computer laboratory provide physical support for the interior architecture curriculum.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Freshmen should declare their intention to pursue the interior architecture (IA) major when they apply for admission to UW–Madison. In addition, students may indicate interest in the IA major when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

PHASE ONE: DESIGN CORE

A 2.75 minimum cumulative GPA is required for declaring the pre-interior architecture major (Phase One). Eligible students should meet with an advisor to declare as early in their academic career as possible.

Transfer students may take longer to complete their degree than students entering the program as freshmen, as they too must complete both Phase One and Phase Two, which contain specialized courses that must be taken sequentially.

Fall Coursework

Students must complete DS 120 and DS 221. Upon completion, students will be evaluated and ranked based on classroom performance and engagement.

Spring Coursework

Students must complete DS 220 and DS 140. In the case that student interest for spring courses exceeds course capacity, student ranking in fall courses (DS 120 and DS 221) and academic performance will be used to determine priority enrollment in the required spring courses. Enrollment in spring courses is not guaranteed and may be limited by permission based on class rankings and academic performance.

After completing DS 120 and DS 221, and while enrolled in DS 220 and DS 140, students may apply for admission to Phase Two: Professional Course Sequence. The selective application process for Phase Two admissions will open during the latter half of the spring semester and decisions will be made once the spring coursework is completed.

PHASE TWO: PROFESSIONAL COURSE SEQUENCE

Advancement into Phase Two is competitive and involves a holistic application process each spring. Evaluation for acceptance into the professional course sequence depends on rankings in the Phase One coursework (DS 120, 221, 220, and 140), cumulative GPA, and engagement within the major.

There are typically 32 available spots each application cycle. This is an industry standard to ensure appropriate student to faculty ratio.

After completing Phase One of the program and upon acceptance into Phase Two, all IA students must purchase a laptop computer based on minimum hardware specification and software licenses determined by the department and updated regularly. Students also have the option, but are not required, to purchase a laptop computer before completion of Phase One of the program.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

DS/LAND ARC 639	Culture and Built Environment	3
DS 641	Advanced Design Thinking for Transformation	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Grounded in the history and theory relevant to the built environment and human behavior.
2. Intellectual skills for inquiry, creative thinking, and critical analysis.
3. Professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Apply the design process to identify and explore complex problems and generate creative solutions that optimize the human experience within the interior environment. This includes the ability to apply research and the principles and theories of Design to their solutions.
5. Apply their knowledge of building materials and systems, building construction, and industry specific codes, standards and guidelines in order to enhance the health, safety, welfare and performance of building occupants.

FOUR-YEAR PLAN

This is a sample four-year plan for Interior Architecture. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

PEOPLE

PROFESSORS

FACULTY ASSOCIATES

Godfrey, Kurutz, Kwasny, Sager

FOR MORE INFORMATION, VISIT THE SCHOOL OF HUMAN ECOLOGY FACULTY AND STAFF DIRECTORY ([HTTPS://HUMANECOLOGY.WISC.EDU/STAFF/UW_STAFF_TYPE/FACULTY-STAFF/](https://humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/)).

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as

they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

ACCREDITATION

ACCREDITATION

Council for Interior Design Accreditation (<https://accredit-id.org/>)

Accreditation status: Accredited. Next accreditation review: 2023.

TEXTILES AND DESIGN, CERTIFICATE

The certificate in textiles and design allows students from any major to gain a fundamental understanding of the creative and innovative application of textiles and visual design. By nature, textiles are interdisciplinary, weaving together art, commerce, history, culture, technology, material culture, and science. Students will develop artistic and technical skills valuable for both pursuing a professional career in the textile industry and nurturing personal creative interests.

The certificate in textiles and design is an opportunity for students from a variety of disciplines to engage in an in-depth exploration of textiles. Studio courses cultivate a rich understanding of the physical and creative interaction of materials, techniques, and concepts: pattern, networks, woven structures, flexible materials, the interaction of multiples, tactility, color, and imagery. Students have the opportunity to be creative in design studios, using both low-tech handmade techniques and complex high-tech computer-generated systems.

The courses offered in this 12-credit certificate are broad and varied, allowing students to personalize course groupings to best enhance their major and area of interest.

HOW TO GET IN

All undergraduate are eligible for certificate declaration, except students pursuing textiles and fashion design major. Connect with an Academic Advisor (<https://advising.humanecology.wisc.edu/>) for application information.

REQUIREMENTS

Code	Title	Credits
Science and Culture		
Select one course:		3
DS 251	Textile Science	
DS 355	History of Fashion, 1400-Present	
DS 430	History of Textiles	
DS 561	Textiles: Specifications and End Use Analysis	
Studio		
Select one course:		2-3
DS 101	Introduction to Textile Design	
DS 153	Sewn Construction I	
DS 154	Sewn Construction II	
DS 215	Patternmaking for Accessories	
DS 227	Textile Design: Printing and Dyeing I	
DS 228	Textile Embellishment I

DS 529	Building a Sustainable Creative Practice	
DS 570	Design and Fashion Event Management	
Electives		

Other courses from either Science and Culture or Studio lists to reach 12 credits.	7-8
Total Credits	12

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate understanding of fiber properties, structure, techniques and construction.
2. Analyze historical, cultural, economic, technological and/or societal role of textiles.
3. Students will develop a sensitivity and awareness of material properties through hands-on learning.
4. Gain understanding of the creative process by envisioning and implementing original projects.

ADVISING AND CAREERS

TEXTILES AND FASHION DESIGN, B.S.

Textiles and Fashion Design (TFD) is a unique hybrid program that combines a deep understanding of materials and techniques with an academic base of history, science, and contemporary design. The heart of the major lies in the hands-on studio courses where students learn to weave, dye, print, construct, pattern, illustrate, design, and innovate. Going beyond technique, TFD faculty encourage students to intuitively make, analyze and revise, leading to discovery and creative problem solving. Special topics focus on environmental, economic, and cultural sustainability as well as technology and non-traditional entrepreneurship.

Coursework in the TFD program is enhanced by visiting lecturers, special projects with industry partners, and the on-site Helen Louise Allen Textile Collection. Upper-level students in the major are given the opportunity to professionally show their work to a public audience in the fall annual student showcase and the spring fashion show.

Our award-winning students are both highly creative and superb craftspeople engaged in addressing real-world problems and offering sustainable solutions.

TFD

Our bachelor of science degree (B.S.) in textiles and fashion design (TFD) highlights craft technique as a pathway to creative practice and prepares students for an exciting creative career in design. Studies can focus primarily in textiles or in fashion, but students are encouraged to experiment in both areas. The program emphasizes interdisciplinary partnerships and encourages learning by doing in studios, outreach projects, and sustainable practices.

Through capstone and thesis experiences in the final year, students are given time and mentoring to create and present their own unique body of work.

TFD-FIT

For those leaning toward an industry career, our program gives students the option to apply to spend their senior year at Fashion Institute of Technology (<http://www.fitnyc.edu/>) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Accessory Design, or Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a bachelor of science (B.S.) degree from the University of Wisconsin–Madison in textiles and fashion design with a named option in FIT. A named option is a formally documented sub-major within an academic major program.

Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (A.A.S) degree from FIT. Students attending FIT who are considered Wisconsin nonresidents continue to pay out-of-state tuition, even if they reside in the state of New York.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Freshmen should declare their intention to pursue the textiles and fashion design (TFD) major when they apply for admission to UW–Madison. In addition, students may indicate interest in the TFD major when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

Declaration

- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

Application

- All other students must apply through a competitive application process.

For transfer students, sequential courses and courses taught only once a year should be taken into account when calculating time toward completion of the degree, as graduation time may be extended.

Students intending to complete their final year of study at the Fashion Institute of Technology (FIT) must complete an additional application. Only students with a 3.0 or higher GPA in December of their third year in the program are eligible to apply for admission to FIT.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must

be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

TEXTILES AND FASHION DESIGN: FIT (FASHION INSTITUTE OF TECHNOLOGY)

For those leaning toward an industry career, the textiles and fashion design program gives students the option to apply to spend their senior year at Fashion Institute of Technology (<http://www.fitnyc.edu/>) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Accessory Design, or Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a bachelor of science (B.S.) degree from the University of Wisconsin–Madison in textiles and fashion design with a named option in FIT. A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (A.A.S) degree from FIT. Students attending FIT who are considered Wisconsin nonresidents continue to pay out-of-state tuition, even if they reside in the state of New York.

REQUIREMENTS

Core requirements for the named option are below. Students should follow the curriculum requirements in place at the time they entered the major. This requirement list should be used in combination with a DARS report.

Code	Title	Credits
Textiles and Fashion Design: FIT Named Option Requirements		
Design Core		18
DS 101	Introduction to Textile Design	
DS 120	Design: Fundamentals I	
DS 153	Sewn Construction I	
DS 150	Visual Thinking - Pixels and Pencils	

DS 251	Textile Science	
DS 355 or DS 430	History of Fashion, 1400-Present History of Textiles	
Textiles and Fashion Design Focus Area		21
Choose either the Fashion Sequence or the Textiles Sequence		
<i>Fashion Sequence (must be taken in this order)</i>		
DS 154	Sewn Construction II

HUMAN DEVELOPMENT AND FAMILY STUDIES

The Department of Human Development and Family Studies (HDFS) serves undergraduate and graduate students by offering a bachelor of science in human development and family studies and a Ph.D. in human ecology: human development and family studies. Students and faculty in HDFS are dedicated to improving the quality of life for children, adolescents, and adults by discovering, integrating, applying and disseminating knowledge about lifespan human development, relationships, families, and communities, all in their larger social contexts. The application of human ecological and interdisciplinary perspectives to solve societal problems and strengthen the well-being of children, adults, and families is a distinctive feature of the department.

HUMAN DEVELOPMENT AND FAMILY STUDIES, B.S.

- Major Overview (p. 1875)
- Certified Family Life Educator (CFLE) (p. 1875)
- Infant Mental Health (IMH) (p. 1875)

The undergraduate major in human development and family studies (HDFS) offers specialized courses in human development from infancy through old age, couples and family relationships, research methods, policymaking, parent-child relations, family health and well-being, parent education and support, and ethnic and cultural diversity in families. In addition to coursework, all students engage in a 150-hour, semester-long internship or high-impact learning experience in a professional setting related to their major and career goals. These settings include community mental health programs, early childhood education, legislative offices, health care agencies, research labs, criminal justice systems, child and family life education, and community-based social justice programs.

The major prepares students for careers in human and family service organizations and for graduate or professional school in a variety of fields including health care, education, family law, counseling, occupational therapy, program evaluation, physical therapy, case management, and the child life profession.

CERTIFIED FAMILY LIFE EDUCATOR (CFLE)

The National Council on Family Relations (NCFR) provides the Certified Family Life Educator (CFLE) credential, which is recognized in the U.S. and Canada for Family Life Education professions.

The program encourages applications from professionals who have preparation and experience in Family Life Education settings, including formal teaching, research/scholarship, community education, public information and education, curriculum and resource development, health care, military family support, and ministry. CFLEs have a minimum of a bachelor's degree, and many have advanced degrees.

Certification (<https://www.ncfr.org/cfle-certification/become-certified/>) must include graduating from HDFS, which is a CFLE-approved program here at UW-Madison.

Students seeking this designation must complete the following courses: HDFS 362, 363, 425, 471, 474, 501; Skills for Helping Professions, 516, 517, 535, 601, 650, CNSR SCI 273, PSYCH/SOC 453 OR GEN&WS 103.

For additional information, please contact SoHE's Advising & Career Center (<https://sohe.wisc.edu/students/advising/>) or Polina Levchenko (<https://humanecology.wisc.edu/staff/levchenko-polina/>), HDFS Faculty Associate.

INFANT MENTAL HEALTH (IMH)

The HDFS course concentration in IMH focuses on promoting the social emotional development of children age 0-6 years within the family and community context. It is designed to be compatible with IMH Endorsement by the Wisconsin Alliance for Infant Mental Health (WI-AIMH)—entry level Infant Family Associate Endorsement (<https://wiaimh.org/endorsement/>).

Please note that one must be a member of the organization and apply for endorsement with references in addition to completing the B.S. in HDFS

with course requirements and guidelines (<https://www.allianceaimh.org/endorsement-requirements-guidelines/>) specified below.

Competency areas:

1. Theoretical foundations
 - Any course in HDFS Learning Outcome 1 AND
 - HDFS 471 in Learning Outcome 3 AND
 - HDFS 663 OR HDFS 650 in Learning Outcome 5
2. Law, regulation, and agency policy
 - HDFS 535 in Learning Outcome 4
3. Systems expertise
 - HDFS 469 in Learning Outcome 4 OR
 - HDFS 516 AND 517 in Learning Outcome
4. Direct service skill
 - HDFS 663 in Learning Outcome 5 AND
 - Relevant internship (HDFS 601) and HDFS Professional Development sequence
5. Working with others
 - Any course in Learning Outcome 2 AND
 - HDFS 601
6. Communicating
 - Comm A and Comm B requirements for HDFS major
7. Thinking
 - Any Research Methods Course in Learning Outcome 6 AND
 - Quant A and Quant B requirements for HDFS major AND
 - HDFS 663 in Learning Outcome 5

For additional information, please contact SoHE's Advising & Career Center (<https://sohe.wisc.edu/students/advising/>) or Julie Poehlmann-Tynan (<https://humanecology.wisc.edu/staff/poehlmann-tynan-julie/>), Professor in HDFS.

HOW TO GET IN

PROSPECTIVE UW–MADISON STUDENTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate an interest in human development and family studies (HDFS) on their UW-Madison application will be admitted to the program upon admittance to the university. In addition, students may indicate interest the HDFS major when registering for Student Orientation, Advising, and Registration (SOAR).

CURRENT UW–MADISON STUDENTS

Declaration

- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

Application

- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (<https://advising.humanecology.wisc.edu/>).

Visit On-campus Student Application (<http://advising.humanecology.wisc.edu/academics/apply/>) for application timelines and deadlines.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Additional high-impact practice course to be approved by the student's SoHE academic advisor ¹		3

Electives

Select courses to bring degree credit total to 120

Total Credits **32-33**

1

Examples include service learning course, second internship or research experience, study abroad experience, select upper-level HDFS courses, or undergraduate teaching assistantship experience.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Knowledge of lifespan human development (including cognitive, social, and emotional development and individual differences) in social and ecological contexts.
2. Knowledge of family and community diversity.
3. Knowledge of internal family processes, including parenting and parent-child relations, couples, and family relationships across generations and family health and wellbeing.
4. Ability to consider and evaluate how children, adults, and individual families affect and are affected by policies, media, or other social institutions.

5. Knowledge about the effective and ethical practice of assessment, prevention, intervention, or outreach for individuals and families.
6. Ability to understand, evaluate, and ethically conduct social science research.

FOUR-YEAR PLAN

This is a sample four-year plan for Human Development and Family Studies. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

DEGREES/MAJORS/CERTIFICATES

- Design Strategy, Certificate (p. 1879)
- Individual Major, B.S. (p. 1882)
- School of Human Ecology Honors (p. 1884)

DESIGN STRATEGY, CERTIFICATE

WHAT IS IT ABOUT?

Housed in the School of Human Ecology, this eighteen-credit certificate in Design Strategy provides undergraduate students from all majors with a hands-on, interdisciplinary approach to problem solving for strategic change. Through applying Design Thinking techniques and exploring the interconnections between people, built, natural, and financial

environments, students will learn to put ideas into action and develop forward-thinking approaches to a variety of issues.

WHAT IS DESIGN STRATEGY?

Design Strategy is a successful approach to problem solving with a focus on quality of life and sustainable futures. It begins with asking 'better' questions as a way to understand the root of the problem and why it is an issue. It is an empathetic, human-centered perspective that uses Design Thinking and draws from historical precedence and current research from a variety of fields to help solve complex and persistent problems.

WHAT WILL STUDENTS GAIN?

Students acquire concrete methodologies which enable them to apply what they have learned in their degree studies in a way that goes beyond the theoretical emphasis of most degree programs. Rather than adding additional expertise and knowledge in a particular field, this certificate gives students ways to apply what they have learned in their majors to real world problems; in the process, they become confident and creative forward thinkers, who are able to work in interdisciplinary teams.

HOW TO GET IN

All undergraduate students in good academic standing are eligible to apply for the Certificate in Design Strategy. Connect with an Academic Advisor for application information and the October and February deadlines.

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Develop and understand empathy mindsets through the practice of observation, interviewing skills, and other related techniques.
2. Recognize that theories, knowledge, and concepts intrinsic to the practice of design are relevant to informing new approaches to addressing topics that are difficult to formulate using traditional theories.
3. Incorporate methods that rely on team work, communication, and collaborative activity.
4. Examine a wide range of problems confronting society by looking at them in context, in order to uncover their roots, visualize their interconnections, and identify their interdependencies.
5. Become collaborative, divergent thinkers, able to generate and visually communicate multiple ideas.

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

PEOPLE

For more information, visit the School of Human Ecology faculty and staff directory (https://humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/).

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically

late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

INDIVIDUAL MAJOR, B.S.

The individual major is a program for undergraduate students who want to fulfill a specific academic goal that is not easily attained through a major in one or more departments. The major must meet a course of study that involves at least two departments and be targeted at a specific problem or academic interest identified by the student. A student proposal must be submitted and approved by the SoHE Undergraduate Program Council. Students are encouraged to begin working with faculty and advisors in the Advising & Career Center by the end of the sophomore year. Thirty credits must be earned in residence after the term in which the proposal is approved. The major will be guided by a committee of at least three faculty members (with no more than two faculty members from one department).

Individual majors are intended to create a unique program of study that otherwise does not exist on this campus individually or in a combination of majors and certificate programs. Students should carefully explore all University of Wisconsin–Madison majors and certificate programs before pursuing an individual major. A proposal that essentially parallels an existing SoHE or campus major will not be approved.

Graduates of the individual major earn a bachelor of science in human ecology. The major will match the approved proposal title, which must have a human ecology focus.

HOW TO GET IN

ELIGIBILITY

Students must be in good academic standing and have a minimum cumulative GPA of 3.5 to be considered for an individual major. Any interested student should have completed at least two semesters (a minimum of 24 credits) in residence before submitting an application. Ideally, proposals will be made by the end of sophomore year or the beginning of junior year.

PROPOSING AN INDIVIDUAL MAJOR

After discussing their proposed plan with a SoHE advisor and ensuring they meet the application qualifications, students will begin building a faculty committee and developing a proposal. An individual major must be composed of at least two different SoHE academic departments. If a third department is selected, it may be from in or outside of SoHE. Students should develop a one-page abstract to share with faculty as they work to build their committee. Once the committee is formed, the student will select one committee member as the major advisor. The major advisor must be from the SoHE department in which the majority of courses for the program will be taken. The student will work with the faculty committee to develop the proposal and select all required courses for the individual major, the majority of which must be completed in SoHE. The student will then submit a formal proposal to the SoHE Advising & Career Center to be forwarded for action to the SoHE

Undergraduate Program Council, which meets throughout the academic year.

Please contact the SoHE Advising & Career Center for the complete individual major proposal instructions.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

INDIVIDUAL MAJOR REQUIREMENTS

The student will work with the faculty committee to develop the individual major proposal and select all required courses, the majority of which must be completed in SoHE. If the Individual Major is approved by the SoHE Undergraduate Program Council, the student will complete all required courses as outlined with the faculty committee.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Association for Human Development and Family Studies (SAHDFS)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (<https://go.wisc.edu/sohestudentorganizations/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

FOUR-YEAR PLAN

There is no standard four-year plan for the Individual Major.

ADVISING AND CAREERS

Students interested in pursuing an individual major should first meet with a SoHE academic advisor to ensure program eligibility and to discuss their area of interest and rationale. Appointments should be made by contacting the SoHE Advising & Career Center at 608-262-2608.

PEOPLE

Visit the School of Human Ecology faculty and staff directory (https://humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/).

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

School of Human Ecology student organizations include:

- Apparel and Textile Association (ATA)
- Association of Fundraising Professionals - UW Madison Chapter (AFP)
- Community and Nonprofit Leaders (CNLUW)
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)/American Society of Interior Design (ASID) - Student Chapter

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/acc_office/).

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

SCHOOL OF HUMAN ECOLOGY HONORS

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campus wide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a SoHE honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

HOW TO GET IN

Students interested in pursuing the School of Human Ecology Honors Programs should first meet with an academic advisor in the Advising & Career Center. Admission decisions are made by a faculty committee in the appropriate SoHE department and will take into consideration the eligibility criteria listed below and the strength of the written application.

- *Freshmen.* Admission as a newly enrolled freshman requires a 3.3 grade point average or high school class ranking in the top 10% and a composite ACT score of 27 or a combined SAT score of 1100.
- *Continuing Students.* Admission of currently enrolled students requires a minimum 3.3 grade point average. Students, both transfer and those currently enrolled in SoHE, may apply for entrance to the Honors Program in any semester of their undergraduate career after the 3.3 minimum grade point average has been established.

REQUIREMENTS

In addition to the School of Human Ecology degree requirements, honors program students must:

- Complete a total of at least 24 honors credits, with at least 12 of the honors credits obtained in Human Ecology coursework.
- Maintain a minimum grade point average of 3.3 in all UW-Madison courses to continue in the honors program.
- Receive a grade of B or above in a course to receive honors credit for that course.
- Complete an honors thesis for at least three, but no more than six, senior honors thesis credits. Students are strongly recommended to consider registering for two semesters of senior honors thesis credits for adequate time to plan and complete the senior honors thesis. Senior honors thesis credits may count toward the 12 credits minimum of Human Ecology honors credits.

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as

they navigate the college experience—from exploring our majors as prospective students to becoming SoHE alumni.

ACADEMIC ADVISING

Each SoHE student is assigned to an academic advisor in the Advising & Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (<https://go.wisc.edu/sohecareerdevelopment/>).

SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late in the fall semester. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising & Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) (333 East Campus Mall; 608-262-3060).

SCHOOL OF NURSING

The School of Nursing (<https://nursing.wisc.edu/>), established in 1924, is the leading nursing research institution in Wisconsin and a crucial part of the state's health care system.

The school offers a full array of degree programs enrolling more than 1,000 students—the bachelor of science in nursing (BSN), the doctor of nursing practice (DNP), and the doctor of philosophy in nursing (Ph.D.), along with several graduate-level certificate programs.

At the undergraduate level, degree options include the Traditional BSN, a four-year degree program; the Accelerated BSN, a 12-month program for second-degree candidates; and the RN to BSN (BSN@Home) program, for registered nurses who hold an associate's degree in nursing and wish to earn the baccalaureate degree. Options exist for honors study in the major, as well as joint programs whereby students can earn the master of public health along with the BSN or transition directly to the Ph.D. program via the Early Entry Ph.D. Option.

Student life pairs the educational and social resources of a large, world-class university with a supportive environment at the school. Students receive comprehensive support services related to advising, program planning, clinical placements, career services, financial aid, and post-graduation credentialing.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; nursing homes; day-care centers; and public health agencies. The university's location in Wisconsin's capital offers additional opportunities in state government and policy making.

On campus, Signe Skott Cooper Hall, the School of Nursing's new facility, has state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff and the communities and populations we serve.

The school's mission is to develop leaders for the profession and society—we make discoveries, enhance systems, and improve health through research, education, and practice.

ENTERING THE SCHOOL

ADMISSION TO UW–MADISON

All prospective UW–Madison nursing students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

PRE-NURSING FRESHMEN

Students who indicate interest in the nursing major on their UW–Madison application will be admitted to the School of Nursing as pre-nursing (PRN) students. In addition, students may indicate interest in the nursing major when registering for Student Orientation, Advising, and Registration (SOAR). The School of Nursing is the academic home for pre-nursing students, providing orientation, academic advising, academic support, etc., while students complete nursing prerequisite courses and general education requirements in preparation to apply to the nursing major. Most pre-nursing students apply to the nursing major midway through their sophomore year to enter the two-year Traditional BSN program as juniors.

PRE-NURSING TRANSFERS

Students may transfer into UW–Madison as pre-nursing students. As with pre-nursing freshmen, transfer students have an academic home in the School of Nursing as they work to complete prerequisites and general education requirements in preparation to apply to the two-year Traditional BSN program.

SECOND-DEGREE CANDIDATES

Students seeking to earn a second degree in nursing can apply directly to either the Traditional BSN program or the Accelerated BSN program upon completing necessary admission requirements (see details below). Second-degree candidates must be admitted directly into the nursing program; they cannot enter UW–Madison as pre-nursing students.

ADMISSION TO THE NURSING PROGRAM TRADITIONAL BSN

As students complete the requirements to be eligible to apply to the nursing program, they apply to the two-year Traditional BSN program. To be eligible to apply, students must complete the necessary prerequisite courses and have the minimum 2.75 cumulative and prerequisite GPAs; complete details on the Traditional BSN admission requirements and application process can be found on the Traditional BSN admission page (p. 1893) of this *Guide*.

ACCELERATED BSN FOR SECOND-DEGREE CANDIDATES

Second-degree candidates can apply for the Accelerated BSN program. This is a 12-month intensive baccalaureate program that offers the quickest route to licensure as a registered nurse (RN) for students who have already completed a bachelor's degree or graduate degree in a non-nursing discipline. Students must complete nursing prerequisite courses and the university General Education Requirements, and have the minimum GPAs, to be eligible to apply. Complete details on the accelerated BSN admission requirements and application process can be found on the Accelerated BSN admission page (p. 1897) of this *Guide*.

RN TO BSN (BSN@HOME)

Registered nurses who have an associate's degree or diploma in nursing can apply to enter the BSN@Home program to earn their bachelor's degree in nursing (BSN). There are GPA minimums and course requirements necessary for admission eligibility. These details are included on the BSN@Home admission page (p. 1901) of this *Guide*.

CURRENT UW–MADISON STUDENTS

Students with at least a 2.75 cumulative and nursing prerequisite GPA may transfer into the School of Nursing as pre-nursing (PRN) students. Students who are not in the School of Nursing may also apply for the Traditional BSN program without being pre-nursing students. Transfer requests (i.e., classification changes) must be made before the twelfth week of the semester in order to be applied to that semester. Requests made after the twelfth week will take effect at the start of the following semester. For more information and to request a classification change to PRN, students should contact the nursing Office of Academic Affairs at 608-263-5202 or academic.affairs@nursing.wisc.edu.

POLICIES AND REGULATIONS

The students, faculty, administration, and staff of the School of Nursing are part of the University of Wisconsin–Madison's academic community, and as such, are subject to the policies, rules, and regulations of the university. In addition, the school and its respective programs may, as deemed necessary, develop their own policies and procedures to augment those of the university. Following are the specific School of Nursing policies and regulations that expand upon or differ from the policies of the university as a whole.

ACADEMIC STATUS

Academic Actions (Warning, Probation, Drop)

Every student (pre-nursing and nursing) is expected to maintain at least a 2.5 GPA on all work carried, whether passed or not, in each semester or summer session. Students who maintain this average are considered in **good academic standing**. Failure to earn this minimum GPA will result in the academic action of **warning**, **probation**, or **dropped** (academically

dismissed). Students must be in good academic standing in order to be eligible for graduation.

If not on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = warning
2. Earns a GPA in a semester or summer session of less than 1.75 = probation

If on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = probation
2. Earns a GPA in a semester or summer session of less than 1.75 = dropped from the program

If on probation and:

1. Earns a GPA in a semester or summer session of 2.5 or above but cumulative GPA remains under 2.5 = continued probation
2. Earns a GPA in a semester or summer session of less than 2.5 or a nursing cumulative GPA below 2.5 = dropped from the program

In addition to the academic actions detailed above, nursing (NUR) students are placed on probation if they:

1. Earn a grade of F or NC in any nursing course, and/or
2. Earn a nursing cumulative GPA below 2.5

Any student on academic action will automatically be cleared of action status when the semester GPA is 2.5 or above and the cumulative GPA is 2.5 or above; and if NUR or NCP (i.e., BSN@Home) classification, the nursing cumulative GPA is at least 2.5 or above.

Dean's Honor List

The purpose of the Dean's Honor List is to recognize superior academic achievement of undergraduate students. Students must achieve a minimum GPA of 3.75 on a semester load of not fewer than 12 credits in order to be placed on the Dean's Honor List. A notation of *Dean's Honor List* will appear on the student's grade report and transcript. Students who earn a semester GPA of 3.25–3.74 on 12 or more credits will receive a congratulatory statement on their end-of-semester grade report form.

English as a Second Language

All nursing students must be proficient in English to provide safe patient care and to be successful academically. Students facing challenges in these areas may be referred by self-identification, a faculty member, or advisor to support services. Although limited English proficiency in itself is not a reason for dismissal, it can interfere with a student's ability to complete course requirements, leading to failure to progress or meet program requirements.

Good Academic Standing

To be in good academic standing, students must maintain:

- a cumulative GPA of 2.5 or above, and
- a cumulative GPA of 2.5 or above on all nursing courses completed, and
- a GPA of 2.5 or above in the semester just completed

Graduating with Distinction

Graduation with Distinction will be noted on the transcript of students who earned 60 or more credits at UW–Madison and a GPA that places

them in the top 20 percent of those graduating from the School of Nursing that term.

Satisfactory Academic Progress

The time required to complete the program depends on the sequence of courses, plan of study, and placement availability in nursing courses. Students may complete the program in four years; however, additional semesters or summer sessions may be needed to fulfill requirements. If requirements for the degree have not been completed within five years after admission to the nursing major, the student's academic record will be reviewed by the Office of Academic Affairs to establish additional requirements, if appropriate.

PROGRESSION REQUIREMENTS

Students must successfully complete all courses for each term before proceeding to the next term. Successful course completion in the School of Nursing requires students to earn a grade of C or Credit/CR (in the clinical course that are offered on a Credit/No Credit basis) in each required nursing (N#) course. Any student who earns a grade below C or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program. Because nursing courses are not offered every semester, a student who does not successfully complete one or more courses during a term will fall off standard progression and will complete a modified program plan with an extended time to degree.

APPEALS, GRIEVANCES AND PETITIONS

Student Appeals and Grievance Procedures

Students who feel that they have been treated unfairly have the right to question this treatment and receive prompt hearing of the grievance. Before instituting an appeal or grievance, students should discuss their particular situations with an appropriate staff member, e.g., faculty member, assistant dean, associate dean, or adviser.

Section One: Appeals

Appeals are limited to requests to continue in the curriculum after being dropped from the program for academic reasons.

Procedure

Filing Appeal

Undergraduate Student: A written appeal must be filed with the Assistant Dean for Academic Programs within 10 working days of the date of the letter notifying the student of the decision to discontinue the student in the program, or the right to appeal is waived. The appellant (student) must submit to the Assistant Dean the following information:

1. A written statement addressed to the Chairperson of the appropriate appeals committee specifying:
 - Precise grounds on which the appeal is based.
 - Circumstances associated with the need to appeal.
 - Arguments supporting the appeal.
 - Description of proposed remedial actions to be taken to improve the student's academic performance.
2. The appellant may also submit letters of support from persons knowledgeable about the appellant's current and/or past academic work and/or other matters related to the appellant's academic performance. Any such letters must be submitted to the Assistant Dean by the same deadline.

Appeals Committee

Undergraduate Student: For the purposes of hearing the appeal, the Assistant Dean will arrange an appeals committee that consists of at least three School of Nursing faculty members from the Undergraduate Admissions and Progression Committee. The Assistant Dean will collect the information relative to the appellant's academic situation and forward the information to the Appeals Committee.

Appeals Committee Meeting

- Within 15 working days of the filing of the appeal, the Appeals Committee will schedule a meeting date for the purposes of hearing the appeal.
- Appellant must appear before the Appeals Committee to present the appeal. Appellant may have a support person accompany him or her to the meeting with the Appeals Committee. Appellant must address the Appeals Committee under all circumstances. Appellant's chosen support person is limited to providing advice and support to appellant. No fewer than three working days prior to the meeting with the Appeals Committee, the appellant shall identify to the Committee the individual's appellant wishes to be present at the meeting for the purpose of providing the Appeals Committee with information about the appeal.

The Appeals Committee is authorized to decide the appeal and is responsible for the following:

1. Reviewing all data presented by the Appellant and others.
2. Discussing the argument presented by Appellant and inviting Appellant to contribute to the discussion.
3. Limiting statements of appellant and other individuals where information being presented is irrelevant, unduly repetitious, or disrespectful.
 - Deciding the appeal and providing a written decision, including the reasons therefore, to the Appellant and the appropriate Assistant Dean within 15 working days of the Appeals Committee meeting. The written decision shall identify and include where appropriate:
 - Appellant's stated reason for the appeal
 - Action taken by the Appeals Committee
 - Stipulations and recommendations for appellant's continuation in program (where appeal granted)
 - Rationale for decision
 - Names of individuals present at the hearing
 - Notice of appellant's right to appeal the Appeals Committee decision to the Associate Dean for Academic Affairs.
4. If the appeal is granted, the Appeals Committee will discuss with the Appellant any stipulations (binding) and recommendations (non-binding) for continuation in the program.

Review of Appeals Committee Decision

1. A written request for review of the Appeals Committee Decision by the Dean of the School of Nursing or the Dean's designee must be submitted to the Associate Dean for Academic Affairs within 20 working days of the date of notification of the Committee's initial decision.

The request must state the specific grounds for appeal which are limited to:

- School policies were incorrectly applied;
- Decision is contrary to state or federal law;
- Proper appeal procedures were not followed; or

- Unfounded, arbitrary, or irrelevant assumptions of fact regarding the appellant's performance were made by the Appeals Committee. Appellant must also identify the specific aspects of the Committee decision that he or she believes meet the criteria cited as a basis for appeal.

The Dean or the Dean's designee may meet with the appellant to discuss the request for review.

- Copies of the information submitted to the Appeals Committee and the Appeals Committee decision shall be provided to the Dean or the Dean's designee for review. Only facts and information presented to the Appeals Committee may be introduced to and considered by the Dean or the Dean's designee.
- The burden of proof shall be on the student to demonstrate by a preponderance of the evidence that the Appeals Committee's decision was the result of one or more of the above bases for appeal.
- The Dean or the Dean's designee shall notify Appellant and the Appeals Committee in writing within 30 working days of receipt of the request for review of the Appeals Committee decision or the appellant's meeting with the Dean's or Dean's designee, whichever is later, stating the action on the appeal and the grounds for the action taken.
- The decision by the Dean or the Dean's designee on review is final.

Section Two: Grievances Informal Resolution

Any student in the School of Nursing who believes that he or she has been treated inequitably is encouraged to resolve the matter informally. The student should first talk with the person or group at whom the grievance is directed in an attempt to resolve the issue informally. The student may contact the Associate Dean for Academic Affairs for assistance in resolving the matter informally. The student may also contact the following groups for assistance in reaching an informal resolution and/or information regarding other possible formal procedures to resolve the matter.

1. Contact the UW-Madison Equity and Diversity Resource Center for information and assistance regarding discrimination or disability issues.
2. Contact the Dean of Students for information about resources for addressing student concerns.

School of Nursing Grievance Procedure:

The grievance procedure is available to resolve student concerns regarding inequitable treatment that have not been satisfactorily resolved through the informal resolution process or where the student believes that informal resolution would not be productive. The grievance procedure is described below. Through the grievance process, the student may be accompanied by a support person. The use of this grievance procedure shall not prevent the student from seeking redress through another administrative or legal process.

1. To initiate the formal grievance procedure, the student must submit his or her grievance, in writing, to the Associate Dean for Academic Affairs.

2. The written grievance shall include:

- a statement that the student wishes a review of the situation by a Grievance Committee;
- the identification of the person or group at whom the grievance is directed;
- the specifics of the perceived inequitable treatment;
- evidence in support of the student's belief that he or she has been treated inequitably; and
- the outcome or resolution desired by the student.

3. A grievance must be initiated no later than 20 calendar days from the time the student knew or could reasonably have been expected to have known of the circumstances giving rise to the grievance. Initiation of the informal procedure described above within the 20- day period will extend the deadline for initiating the grievance to 40 calendar days from the time the student knew or could reasonably have been expected to have known of the circumstances giving rise to the grievance.

4. Within 30 calendar days after receiving the grievance, the Associate Dean for Academic Affairs shall arrange for a committee meeting. The Committee may request a written response from the person or group at whom the grievance is directed, may ask for additional information from any or all parties involved, may request that the parties involved appear before the Committee, and/or may take other steps in attempting to resolve the grievance.

5. Within 60 calendar days after receiving the grievance from the Associate Dean for Academic Affairs, the Committee shall send a written report of the Committee's recommendations to the Associate Dean for Academic Affairs. The student will also receive a copy of the report. The report shall include notice to the student of his or her right to appeal the Committee's recommendation to the Dean of the School of Nursing.

6. A student wishing to appeal the Committee's recommendation to the Dean of the School of Nursing must submit a written appeal to the Dean within 10 calendar days of the date of the Committee's report. The request must state the specific bases for appeal and identify the specific aspects of the Committee's recommendation that he or she believes are the subject of the bases for appeal. Where an appeal is filed with the Dean, a copy of the Committee's report shall be provided to the Dean for review. Only facts presented to the Committee may be introduced to and considered by the Dean. The Dean shall notify the appellant and the Committee in writing within 30 calendar days of receiving the written appeal stating the action on the appeal and the grounds for the action taken.

Section Three: Course Grade Appeals Process

If a student believes s/he has been awarded a grade for a course that does not adequately represent her/his performance in the course, they should speak with the course faculty member in an effort to attempt to resolve the issue informally. This must be done within 10 working days of receipt of the grade. During this informal process both student and faculty may consult with the Associate Dean for Academic Affairs to seek resolution of the issue.

If the student remains dissatisfied with the grade, the student has the option to initiate the formal Grievance procedure. To do this, the student must submit the grievance, in writing, to the Associate Dean for Academic Affairs within 10 working days. The Associate Dean will appoint a committee to hear the grievance. The decision of the committee is final. There is no further appeal.

Petition for Special Consideration

Nursing students may use the Petition for Special Consideration (<https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf>) to request an alternative or exception to an academic rule, regulation, procedure, or requirement.

CLINICAL/EXPERIENTIAL LEARNING COURSES

All nursing students are required to complete credit hours in the clinical setting under the supervision of a nursing professional. In the School of Nursing, the term *experiential learning* is used to describe the clinical course experience. These clinical experiences support the mission of the School of Nursing, integrating practice and coursework, to provide a comprehensive nursing education. There are some policies specific to experiential learning courses:

Compliance Requirements

The School of Nursing is committed to ensuring all nursing students are compliant with national and state guidelines for personnel providing nursing care, as well as additional/specific requirements mandated by the school's clinical affiliates as set forth in the clinical affiliation agreements. Therefore all nursing students are required to be in full adherence to the school's compliance program while enrolled in the nursing program. The school's compliance program includes immunizations, trainings, and a background check. Students will be held accountable for complying with the clinical eligibility requirements prior to entering the program and throughout their program of study. All students are required to keep their compliance documents up to date as an essential part of their professional responsibility for patient safety. Review the Nursing Student Compliance Program (<https://students.nursing.wisc.edu/clinicals-compliance/compliance/>) for complete details.

Clinical Placements

Students are assigned to clinical placement sites based on the faculty's selection of clinical sites specific to the learning objectives of the course, site characteristics, and availability. Students need to be prepared to travel up to 90 miles from the School of Nursing and have varied schedules including evenings, nights and weekends. Clinical shifts may be 4-12 hours long. The School of Nursing secures clinical placements for all students who are eligible. Students are not asked to nor allowed to arrange their own clinical placements.

Clinical Hour Completion Within the Term/Rotation

Experiential learning/clinical work required for School of Nursing courses must be completed during the term or session of enrollment. These official terms and dates are when the faculty have effort allocated to course instruction and also when our clinical partners have agreed to engage with students in clinical rotations. Per the university's [Academic Calendar](https://secfac.wisc.edu/academic-calendar/) (<https://secfac.wisc.edu/academic-calendar/>), there are three terms each academic year: fall, spring, and summer. Each term has an official date instruction begins and last class day. In addition, some clinical courses are broken down into shorter rotations within a term, typically an eight-week session. Clinical work and clinical hours must be completed between these term/session/rotation dates. It is not an option to start clinical work prior to the first day of instruction or to complete clinical work after the last day. Exceptions may be made in the case of extenuating circumstances or if a student is assigned an Incomplete grade for the course. Any requests for an exception to this policy should be directed to the course instructor who will review the request with the Director of Clinical Practica to determine its appropriateness and feasibility.

Transportation

The School of Nursing recognizes that students need educational experiences beyond those available in hospitals in Madison, Wisconsin. In answer to this educational need, and in order to secure enough clinical sites for all students, the school places its students in a variety of venues in and beyond Madison. This includes ambulatory sites, clinics, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, etc. This gives our students comprehensive exposure to a broad range of patients, illness, and care. Nursing students are responsible for arranging their own transportation to and from their clinical sites. First-year clinicals are accessible by public transportation from Signe Skott Cooper Hall and other points in Madison. Second-year clinicals require travel to and from an agency, as well as to and from homes, schools, and other sites. Locales may be up to 90 miles from Madison. Therefore, second-year nursing students are required to have (1) a valid driver's license, and (2) individual access to a car. Students are responsible for all transportation costs incurred, including gas and parking fees. Students with extenuating circumstances that have an impact on their clinical transportation options (e.g., driving/medical restrictions) should use the Petition for Special Consideration (<https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf>) to request an accommodation or exception to the transportation policy. The petition must be submitted on/by March 1 for clinical placements during the next fall term and on/by November 1 for the next spring term placements. These deadlines are firm, as a petition must be reviewed in advance of clinical assignments. There is no guarantee the school will be able to honor such requests/conditions, and exceptions are granted in very rare circumstances.

Uniforms

Nursing students are required to purchase the approved School of Nursing uniform. The uniform consists of a white top and navy pants. The white top, embroidered with the School of Nursing logo, is available in two styles and the pants will be available in three styles. Lab coats embroidered with the school logo are also required and are worn when students are on their clinical units doing clinical preparation and during most community clinical experiences. In addition to the uniform requirements, there are also professional appearance guidelines (<https://students.nursing.wisc.edu/clinicals-compliance/clinical-information/>) for students.

Unsafe Clinical Performance

A student who demonstrates unsafe nursing practice that jeopardizes the client's or family's physical or emotional welfare may be dismissed at any time from the clinical area. Unsafe clinical practice is defined as any behavior determined by faculty or a preceptor to be actually or potentially detrimental to the client or to the healthcare agency. Unsafe clinical practice can include behaviors related to physical or mental health problems; use of alcohol, drugs, or chemicals; lack of preparation for clinical; or deficits in problem-solving skills. Reports of unsafe clinical performance will be routed through the course professor and/or the course coordinator to the Associate Dean for Academic Affairs who will work with the faculty and student to determine the appropriate outcome, which may include immediate removal from the course (i.e., administrative drop) and subsequent implications for academic progression.

Student Invasive Procedures

During clinical laboratory classes, experiential learning sessions, and/or at any other time, students may not practice invasive procedures on themselves, other students, faculty, preceptors, staff, and/or any other unauthorized individuals. This includes, but is not limited to, any

invasive procedures that require needles, syringes, and/or intravenous supplies; nasogastric tube insertion; catheterization; etc. During some non-invasive experiences, such as physical assessment, listening to a heartbeat, or taking a blood pressure, students may be asked to act as practice participants. If a student has any objection to providing this experience, they should notify the instructor immediately so that an alternate experience can be provided.

COURSES AND ENROLLMENT

Enrollment

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Attendance

The School of Nursing expects that students recognize they have entered a profession in which their commitment to full participation in the learning environment is an essential component of what will become a style of life-long learning. Regular class attendance is a student obligation and students are responsible for all the work of all educational activities. Students should not expect to be excused from required coursework for personal/family events, work obligations, or because of non-compliance with School of Nursing or clinical agency health and onboarding requirements. In extraordinary circumstances, an absence may be granted at the discretion of the course instructor. This might include an absence due to personal crisis, military or civic obligation, authorized university activity, religious observances, or health concerns that affect the student's ability to safely care for patients. In most cases, students will be required to provide documentation regarding the absence.

Didactic Course Attendance

In most didactic courses, attendance and/or participation are factored into the grading process. Absences may place students in jeopardy of not meeting course learning outcomes and thus successfully completing the course. If this occurs, the instructor will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs to determine the appropriate course of action, which may include being removed (i.e., administratively dropped) from the course. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences, if applicable.

Experiential Learning Attendance

It is the expectation that students attend all Experiential Learning activities as clinical learning is essential to the completion of the nursing program. If a student must miss an Experiential Learning session due to an extraordinary circumstance, a decision as to whether the student will make up the experience/hours will be based on the student's progress in meeting course learning outcomes. The instructor, in consultation with the Course Coordinator (if applicable), will determine if the absence will be made up and the nature of the make-up experience. The instructor/Course Coordinator will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs in situations where absence is placing the student's success in the course at risk. A student who misses more than 7.5 percent of Supervised Experiential Learning hours, as specified in the course syllabus, for any reason will be removed

(i.e., administratively dropped) from the course for as the result of not being able to meet course learning outcomes. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences/hours, if applicable.

Credit/No Credit Courses

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or N (meaning the the student did not earn any credit for the class). Students may not take such courses on any other basis.

Concurrent Registration and Enrollment

In some rare circumstances, and only with prior approval of the academic dean, students may enroll to earn degree credit concurrently at UW–Madison and any other accredited postsecondary school, including the UW–Extension. Requests for approval should be made prior to the end of the second week of classes of the semester in which dual registration is desired. Courses must be completed during the semester in which concurrent enrollment is allowed. To request permission for concurrent enrollment, submit the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Drop Notation

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see *Deadlines at a Glance* (http://www.registrar.wisc.edu/spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that the School of Nursing does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

Dropping a Nursing Course

A student who drops a nursing (N#) course may reenroll in the course when space is available. A student who drops a nursing course a second time is not eligible for the course a third time.

Independent Study

Students are responsible for identifying their area of interest or question, establishing objectives for their learning experience, and developing a learning contract with the faculty member. All independent study requires the consent of the instructor. Approval forms are available on the forms page (<https://students.nursing.wisc.edu/policies-forms/forms/>) within the School of Nursing Student Site.

Registration Changes

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Reentry

Any student who leaves the School of Nursing and wishes to return after an absence of one semester or more must file a reentry application with the UW–Madison Office of Admissions and Recruitment. Permission to

reenter is dependent on program capacity, previous academic standing, and length of absence. Immediate placement in required nursing courses is not assured. Students seeking reentry to the baccalaureate program who have left on academic action must be reviewed by the Office of Academic Affairs. If readmission is granted, academic requirements may be specified to insure currency in nursing knowledge and skills prior to enrolling in clinical nursing courses. These requirements may include remediation and/or repetition of courses, depending on academic standing or length of time since leaving the program. The remaining program will be planned as considered best for the student and according to the current curriculum.

Retaking Courses

Each individual required nursing course may be repeated only once with a maximum of two repeated courses in the curriculum. Students who do not successfully complete a course after two attempts or who must repeat more than two different courses will be dis-enrolled from the nursing program. A course for which a student earned a grade below C (or NC in a clinical course) must be repeated within the next two semesters in residence. All grades earned will be used in calculating the student's cumulative and nursing grade point averages, but credits will be counted only once toward the minimum nursing and degree credit requirements.

Didactic/Theory Courses: Undergraduate students may repeat any required didactic/theory course once without special permission.

Clinical Courses: To repeat a clinical course, an appeal must be made to the Associate Dean for Academic Affairs who will determine if the appeal merits approval. Upon a successful appeal, a student may repeat a clinical course based upon course schedule and program capacity.

Withdrawal

A nursing student who finds it necessary to withdraw during a semester or summer session must talk with an academic advisor and complete the withdrawal process. Failure to do so may result in a recording of failure for all courses. Any student may withdraw from the program without grades being recorded during the first 12 weeks of a semester. After the 12th week, a student may withdraw only with the permission of the Office of Academic Affairs.

CREDITS

30-Credit residence requirement

Students must complete at least 30 credits at UW–Madison. Baccalaureate students must complete at least 15 credits in nursing courses from the School of Nursing, including one required clinical nursing course at the 400 level or above.

Credit Load

A full-time program is 12 to 18 credits for a semester. Students who wish to carry more than 18 credits per semester must obtain permission from the Office of Academic Affairs. Students will be assessed additional tuition per credit on all credits carried over 18.

Retrocredits

The School of Nursing grants retroactive foreign language credit to students for foreign language skill developed in high school or elsewhere. To earn retroactive credits for language, students must enroll in a higher level language course at UW–Madison before the end of the first two semesters in residence. Transfer students must enroll in the course on the UW–Madison campus before they earn 30 degree credits (including credits transferred from other campuses but not including AP, CLEP, IB, or retro credits in another language). Students must earn a grade of B or better. If these conditions are met, retroactive credits should appear

automatically on a student's transcript by the beginning of the following semester. Students will receive credit for the UW course completed and for all lower level courses in that language up to 16 retroactive credits maximum. These retroactive language credits may be used to meet degree requirements of the college or department, but may not be used to meet humanities requirements. They will be counted as electives only.

DEGREES

Second Undergraduate Degree

Second undergraduate degree candidates are considered for admission to both the pre-nursing and nursing classifications. Students who apply as second undergraduate program candidates must meet the admission and transfer grade point requirements of the university in place at the time they apply for admission. If admitted, an action is taken granting permission to pursue a second degree.

Second Major

Students may request permission to pursue a second major along with the nursing degree. Students must complete the nursing school's Petition for Special Consideration (<https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf>) to make the request.

GRADES

Grading Scale

The school has a standard grading scale in nursing courses that are graded A-F, as noted below. Some Experiential Learning (i.e., clinical) courses are graded Credit/No Credit.

A: 94–100

AB: 88–93.99

B: 82–87.99

BC: 76–81.99

C: 70–75.99

D: 65–69.99

F: <65

Incompletes

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond the student's control, is unable to take or complete the final examination or is unable to complete some limited amount of term work. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of substantiated cause, the grade shall be F. Even with such proof, if the student's work has convinced the instructor that s/he cannot pass the course, the grade shall be F. Any Incomplete taken by a School of Nursing student must be completed by the end of the student's next semester of residence (specifically, by the last day of classes), excluding summer sessions. If the work is not completed by this deadline, the Incomplete will lapse into a Failure unless the time limit has been extended in writing by the Office of Academic Affairs.

Minimum Grade Requirement

Students must earn a grade of C (2.0) or higher in each required nursing (N#) course, including didactic/theory and clinical courses. Students must receive credit (CR) in any clinical course that is offered on a Credit/No Credit basis. Any student who earns a grade below C or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program in accordance with subsequent course prerequisites.

Pass/Fail

The total number of ungraded credits (i.e., pass/fail) applied to graduation requirements may not exceed 24. Students who plan graduate study are advised to consult with graduate studies departments to determine acceptance of credits taken under the pass/fail option. Students eligible for the pass/fail privilege are continuing students with NUR, NCP (BSN@Home), or PRN classifications who have a minimum 2.5 cumulative GPA on all courses completed and have no end-of-semester academic actions on their current record. Newly admitted students in these classifications are also eligible for the pass/fail privilege. Only one course can be carried on pass/fail basis during each semester or summer session; or 3 or 4 credits of 1-credit modular courses. No required courses may be carried under the pass/fail option. The registrar's office will convert final letter grades reported by the student's instructor to an S (pass) grade if the letter grade is C or higher or to a U (fail) if the final letter grade is below C. Course credits in which a student obtains a U grade cannot be counted toward the minimum of 124 credits required for graduation. Students interested in the pass/fail option must contact their nursing academic advisor to determine eligibility.

PROFESSIONAL STANDARDS

Students in the School of Nursing must demonstrate patterns of professional behavior that 1) follow the legal and ethical codes of nursing; 2) demonstrate intellectual honesty and a strong sense of personal integrity; 3) show exemplary moral and ethical character; 4) display a responsible, civil attitude towards patients, fellow healthcare workers, classmates, faculty, and staff; 5) show respect for the human rights of individuals; and 6) demonstrate appropriate action to ensure the safety of clients, self, and others. Professional behavior is expected in the classroom, clinical settings, learning activities, and in any additional circumstances where a student represents the university or the School of Nursing. Students whose behavior does not comply with these professional standards will receive sanctions that may include but are not limited to a lower or failing grade in a course, immediate removal from a course (i.e., administrative drop), or dismissal from the nursing program.

RESOURCES

SIGNE SKOTT COOPER HALL

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \$53.3 million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes and greater satisfaction with care.

ADVISING AND STUDENT SERVICES

OFFICE OF ACADEMIC AFFAIRS

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

ACADEMIC ADVISING

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is

to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

CAREER ADVISING

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

ACADEMIC SUPPORT SERVICES

The Nursing Learning Center (<https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/>) in Cooper Hall is a place where students can gather with other like-minded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

STUDENT ORGANIZATIONS

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>).

HONORS

HONORS PROGRAM

The School of Nursing offers an Honors Program for those high-ability students seeking early research involvement with a faculty mentor. Students who successfully complete the Honors Program graduate with distinguished academic performance and receive a Bachelor of

Science in Nursing (BSN) with Honors. In addition, students of the Honors Program acquire an enriched view of nursing science.

Each student in the Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Interested students apply for admission to the Honors Program during their first semester in the two-year Traditional BSN program. Admission to the Honors Program is based on past academic work, a short essay, and a letter of reference.

Review the Honors Program (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-program/>) page of the Student Site for complete details.

SCHOOL OF NURSING

DEGREES/MAJORS/CERTIFICATES

- Nursing, BSN (p. 1893)
- Nursing, BSN (Accelerated Program) (p. 1897)
- Nursing, BSN (Collaborative Program) (p. 1901)
- School of Nursing Honors (p. 1905)

NURSING, BSN

The bachelor of science in nursing (BSN) degree program prepares individuals for careers in professional nursing in hospitals and other health care agencies. This traditional BSN program provides a foundation for progressing to positions of increased responsibility, leadership, and continued education in graduate programs. Upon successful completion of the program, students receive a bachelor of science in nursing degree from the UW–Madison School of Nursing.

The curriculum includes courses in nursing as well as in liberal arts and sciences. Most students enter UW–Madison as pre-nursing students and spend their first two years completing nursing prerequisite and general education courses. Students then apply midway through their sophomore year to enter the nursing program as juniors. From there, the two-year nursing component includes lectures, laboratory, and clinical courses. Nursing courses emphasize clinical decision-making and the application of theoretical knowledge. Clinical experiences can be up to 90 miles from Madison and may include ambulatory sites, clinics, hospitals, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, policy centers, etc. This range of sites and opportunities gives students comprehensive exposure to a broad range of patients, illness, and care in both clinical patient and community health settings. Elective courses in general education and in nursing permit students to pursue individual interests.

HOW TO GET IN

Admission to the nursing major is competitive and determined by a comprehensive review of each student's academic preparation and performance, leadership, extracurricular activities and service, health care

experience and background, diversity in experience and background, and the quality of application statements/essays.

Upper Division admission is the standard route into the Traditional BSN nursing program. In this model, students enter UW–Madison as pre-nursing students (PRN), they spend the first two years completing general education requirements and nursing prerequisites, and then apply for admission to the nursing program for the final two years on campus. Students may also apply to transfer directly into the Traditional BSN campus from another institution, upon completing the admission requirements.

Admission is highly competitive and based on factors including academic performance, pattern and trend of grades, courses taken, leadership roles, extracurricular activities, experiences related to health care, and experiences or background in diverse cultural, social, and geographic settings. Approximately half the students who apply for admission are admitted. The application deadline is February 1 to enter the nursing program the following fall.

To be considered for the Traditional BSN program, students must, at the time of application:

1. be in progress to complete at least 54 degree credits of college-level course work by the end of the spring semester;
2. have a minimum cumulative college GPA of 2.75 (based on a 4.0 scale) at the end of the fall semester and again at the end of the spring semester;
3. have completed or have in progress four of the following seven prerequisite courses by the end of the fall semester, and be enrolled to complete all seven by the end of the spring semester; and
4. have a minimum combined prerequisite GPA of 2.75 and earn at least a C (2.0) in each of the individual seven prerequisite courses.

The seven prerequisite courses are:

1. Chemistry w/ Lab
2. Microbiology
3. Human Anatomy
4. Human Physiology
5. Psychology (introductory)
6. Sociology (introductory)
7. Human Growth and Development

Students transferring to the University of Wisconsin–Madison, as well as students who already have a bachelor's degree and wish to earn a second degree in nursing, also apply to the Traditional BSN program via the Upper Division Admission option. More information on the admission process and requirements for transfer students and second-degree students is available on the School of Nursing website (<https://nursing.wisc.edu/undergraduate/bsn/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education

requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
- Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
- Make effective use of technology for patient care, education, and management of health information.
- Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
- Use knowledge sources effectively to provide evidence-based care.
- Identify health disparities and advocate for basic essential health services for all.
- Allocate health care resources to maximize the health care benefit to clients, families, and community.
- Assume fiscal and ethical responsibility for clinical practice.

- Function as a member of the nursing profession within the community and the world.

FOUR-YEAR PLAN

This is a sample four-year plan. There are many potential variations of this plan, especially in the freshman/sophomore pre-nursing years. All students are strongly encouraged to consult with their academic advisor to develop an individualized plan that meets their specific needs. The degree requires a total of 120 credits minimum.

ADVISING AND CAREERS

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and

nursing years. As one of the smaller schools on campus, the school is able to offer a great deal of personal attention and individualized academic and career advising.

ACADEMIC ADVISING

All pre-nursing and nursing students are assigned an academic advisor based on the students last name. Generally speaking, freshmen receive advising in small-group sessions. Once students enter their sophomore year, they move to one-on-one advising appointments with their assigned advisor. Detailed information on the school's academic advising system and staff (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>) are available on the school's student intranet, called the Student Site. Questions about advising can also be directed to the Office of Academic Affairs at 608-263-5202.

CAREER ADVISING

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. In addition, the school offers a 1-credit seminar N590 Introduction to Career Development in Nursing.

CERTIFICATION/LICENSURE

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

CERTIFICATION/LICENSURE

National Council of State Boards of Nursing NCLEX-RN (<https://www.ncsbn.org/nclex.htm>)

Year of Exam	UW-Madison Graduates: First Attempt	National First Attempt
April-September 2021	81%	72%
April-September 2020	93%	79%
April-September 2019	89%	86%

Note: UW-Madison BSN Graduates pass rate reflects all UW-Madison Bachelor of Science-Nursing graduates who tested during the April-to-September test period for the first time, including recent and previous graduates.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Oklahoma, Ohio, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

The requirements of this program do not meet Certification/Licensure in the following states:

California, New York

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Pennsylvania, Vermont, Washington, American Samoa, Puerto Rico

RESOURCES AND SCHOLARSHIPS

SIGNE SKOTT COOPER HALL

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \$53.3 million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes and greater satisfaction with care.

ADVISING AND STUDENT SERVICES

OFFICE OF ACADEMIC AFFAIRS

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

ACADEMIC ADVISING

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>). Advising is offered in

individual appointments, group advising, and graduation checks for seniors.

CAREER ADVISING

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

ACADEMIC SUPPORT SERVICES

The Nursing Learning Center (<https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/>) in Cooper Hall is a place where students can gather with other like-minded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

STUDENT ORGANIZATIONS

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>).

ACCREDITATION

ACCREDITATION

Commission on Collegiate Nursing Education (<http://www.aacnursing.org/CCNE/>)

Accreditation status: Next accreditation review: 2029–2030.

NURSING, BSN (ACCELERATED PROGRAM)

Students who already have a bachelor's degree or higher and are interested in making a career change to nursing can apply to enter this

fast-track professional program to earn the bachelor of science in nursing (BSN) in just 12 months.

It is an intense, rigorous program with students completing approximately 1 credit a week, for a total of 49 credits over 12 months. This equates to an average of 50 classroom-based, clinical, and out-of-class hours each week.

Tuition is a flat rate of \$45,000 for Wisconsin residents (including reciprocity for MN residents), \$60,000 for nonresidents, plus fees and other program-related expenses.

HOW TO GET IN

SCHOOL OF NURSING REQUIREMENTS

Following are the requirements to be eligible to apply for the Accelerated BSN program:

- Bachelor's degree in a non-nursing field from an accredited institution, completed by the program start date. Students anticipating spring graduation can apply the prior fall; proof of timely progress is required.
- Admission to UW–Madison as a post-undergraduate degree-seeking student (separate application required)
- Minimum college-level cumulative GPA of 2.75
- Completion of the prerequisites listed below with a grade of C or better in each course and a minimum combined GPA of 2.75. The first four prerequisites (science courses) must be completed by the application deadline and within seven years of the program start date. All prerequisites must be complete before the program start date. Prerequisite equivalency information is available on the BSN Prerequisite Course Equivalencies (<https://nursing.wisc.edu/undergraduate/course-equivalencies/>) page.
 - a. Chemistry w/Lab
 - b. Microbiology
 - c. Human Anatomy
 - d. Human Physiology
 - e. Psychology (introductory)
 - f. Sociology (introductory)
 - g. Human Growth and Development

Note: *Anatomy and physiology may be satisfied by one semester of anatomy and one semester of physiology or by A&P I and II. With the latter option, students must complete both courses at the same institution.*

UW–MADISON GENERAL EDUCATION REQUIREMENTS

Applicants must also complete the following university-wide General Education Requirements (<http://gened.wisc.edu/Req.htm>). At least two must be completed by the application deadline, and all prerequisites must be completed before the program start date.

1. Communications Part A: Literacy Proficiency
2. Communications Part B: *Comm-B requirement is waived for students pursuing the Accelerated BSN degree only.*
3. Quantitative Reasoning Part A: QR Proficiency
4. Quantitative Reasoning Part B: Enhanced QR Proficiency
5. Ethnic Studies

APPLICATION DATES AND DEADLINES

The program requires two applications: one to UW–Madison, plus a supplemental application to the School of Nursing for the Accelerated BSN program. Both applications open September 1 and the deadline is October 1. In-person interviews occur in November. Admission decisions are released in December and students must submit their intent to enroll by March 1.

TRANSFER CREDIT EVALUATION AND PROOF OF ENROLLMENT

An unofficial transfer credit evaluation to check for completion of the nursing prerequisite courses and the university's General Education Requirements will be completed by the School of Nursing prior to the decision release date. Admission is contingent upon official verification by the UW–Madison Office of Admissions and Recruitment.

Applicants will be required to submit proof of enrollment at the time of application for any prerequisites not yet completed. If enrollment has not opened for a particular course, students will be asked to submit a statement of intent to register that lists the course, institution, dates of instruction, and enrollment date.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF NURSING REQUIREMENTS

The Accelerated bachelor of science in nursing (BSN) degree is a 49-credit curriculum comprised of 17 didactic and experiential learning (i.e., clinical) nursing courses. The program builds on the coursework Accelerated BSN students completed in their prior undergraduate and/or graduate degree(s) and the prerequisite coursework, including the

university's General Education Requirements, completed in preparation for admission to the program.

MAJOR REQUIREMENTS

During the 12-months in the Accelerated BSN program, students complete 49 credits of required nursing coursework, including classroom-based active learning courses and experiential learning courses in the clinical environment. This nursing coursework will include Pathology and Pharmacology.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
- Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
- Make effective use of technology for patient care, education, and management of health information.
- Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
- Use knowledge sources effectively to provide evidence-based care.
- Identify health disparities and advocate for basic essential health services for all.
- Allocate health care resources to maximize the health care benefit to clients, families, and community.
- Assume fiscal and ethical responsibility for clinical practice.
- Function as a member of the nursing profession within the community and the world.

FOUR-YEAR PLAN

The Accelerated BSN program is for second-degree candidates and is a 49-credit program completed over 12 months. There is not a four-year plan for this program. Please refer to the Requirements (p. 1898) tab for more about the curriculum and program plan.

ADVISING AND CAREERS

ACADEMIC ADVISING

The Office of Academic Affairs provides comprehensive academic advising services to students in the Accelerated BSN program. Molly Censky and Kate Knudson advise Accelerated BSN students.

CAREER ADVISING

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. Visit the Career Services page of the StudentNet for more information.

In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

FINANCIAL AID AND SCHOLARSHIPS

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>).

ACCREDITATION

ACCREDITATION

Commission on Collegiate Nursing Education (<http://www.aacnursing.org/CCNE/>)

Accreditation status: Accredited. Next accreditation review: 2029–2030.

NURSING, BSN (COLLABORATIVE PROGRAM)

BSN@HOME

The RN to BSN program, called the BSN@Home (<http://bsnathome.com/>) program, is for Registered Nurses who already have an associate's degree or diploma in nursing and wish to earn the bachelor of science in nursing degree.

The curriculum is designed for working adults. Almost all required coursework is completed online. Students can complete the program in as little as a year and a half.

The BSN@Home program is cooperatively administered by six campuses in the University of Wisconsin System: UW–Madison, UW–Eau Claire, UW–Green Bay, UW–Milwaukee, UW–Oshkosh and UW–Stevens Point. Students typically select their home institution based on proximity. All BSN@Home students are required to complete the same core nursing curriculum, but specific admission and degree requirements vary among campuses.

HOW TO GET IN

ELIGIBILITY REQUIREMENTS

- Associate's degree in nursing (ADN) or diploma in nursing from an accredited nursing program. Students with an ADN (or equivalent degree) through an international institution are eligible for admission consideration if they have completed the following required coursework. International Nurse Admission Requirements can be downloaded from this page.
- Overall GPA of 2.5 on 4.0 scale
- RN license
- Resident of Wisconsin, upper peninsula of Michigan, and/or contiguous counties in Illinois, Iowa or Minnesota
- Meets university transfer admission requirements (<https://www.admissions.wisc.edu/apply/transfer/requirements.php>) at UW–Madison. Factors considered in admission decisions include:
 - **Cumulative grade point average (GPA):** While the average GPA of admitted transfers is a 3.4, UW–Madison will consider prospective BSN@Home if they have a cumulative GPA of at least 2.5 with steady grade trends and patterns. GPA calculations will include all grades received for repeated courses; the initial grade, as well as grades received in second and subsequent attempts will be included in the GPA calculation.
 - **College-Level Course Preparation:** Students must have completed at least 24 transferable (https://www.admissions.wisc.edu/apply/transfer/transfer_credit.php) (college-level) non-nursing credits in addition to the nursing classes they completed in their ADN or nursing diploma program.
 - **High School Record:** Regardless of the number of college credits earned, the high school transcript is required and must show proof of graduation.
 - **Required Courses:** Students must have completed one year each of high school algebra, plane geometry, and college-preparatory math, and two high school years or two college semesters of a single foreign language. Requirements may vary if students graduated high school 1991 or prior. Contact the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/contact.php>) with specific questions about academic background.

TO APPLY

ADMISSIONS TIMELINE

Students can begin the program in either spring or fall.

- **Fall term application due:** February 1
- **Spring term application due:** October 1

REVIEW OF APPLICATIONS

Applications are reviewed by the UW–Madison Office of Admissions and Recruitment. Students will be evaluated on both high school and college records. Admission to the program is selective.

TO APPLY

Complete the UW System Application for Admission (<https://apply.wisconsin.edu/>):

- Intended campus: UW–Madison
- Intended major: BSN@Home/Nursing Collaborative Program

For this program, there is no supplemental application submitted to the School of Nursing.

UW–MADISON REENTRY ADMISSION

Students who have previously attended UW–Madison as degree-seeking students are eligible to apply to the BSN@Home program by submitting a Reentry Application (<https://www.admissions.wisc.edu/apply/reentry/>). Second-degree candidate should select BSN@Home/Nursing Collaborative Program as the intended major. Students who have not previously earned an undergraduate degree through UW–Madison will be readmitted to their previous classification (e.g., Letters & Science). If readmitted to the previous classification, students should email (bsnadmit@son.wisc.edu) the School of Nursing to request consideration for admission to the BSN@Home program.

Reentry applications will be evaluated by the UW–Madison Office of Admissions and Recruitment. While the Reentry Admissions (<https://www.admissions.wisc.edu/apply/reentry/>) site lists university-wide application deadlines, students should submit the application by the following dates to ensure access to open nursing courses:

- **Summer term:** February 1
- **Fall semester:** March 1
- **Spring semester:** October 1

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

RN TO BSN (BSN@HOME) MAJOR REQUIREMENTS

Students may transfer up to **90 credits** of coursework taken elsewhere (from a two-year or a four-year institution). A total of 120 credits is required for the Nursing, BSN (Collaborative).

Code	Title	Credits
Science ¹		12-13
Humanities and Social Science ¹		22
Nursing Transfer Credits ²		24-30
BSN@Home Coursework		24
Electives		31-38
Total Credits		120

1

The entirety of this requirement group may be fulfilled by transfer credit.

2

Students who earned an ADN from a Wisconsin Technical College may transfer 30 credits. All others receive 24 credits.

SCIENCE

All requirements may be transferred from a two-year or four-year institution (12-13 credits).

Code	Title	Credits
Science		
<i>Chemistry</i>		
Select one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	
<i>Microbiology</i>		
Select one of the following:		3
MICROBIO 101	General Microbiology	
BIOCHEM 501	Introduction to Biochemistry	
<i>Anatomy & Physiology</i>		
ANAT&PHY 335	Physiology	5
Total Credits		12-13

HUMANITIES AND SOCIAL SCIENCE

All requirements may be transferred from a two-year or four-year institution (22 credits).

Code	Title	Credits
Humanities and Social Science		
<i>Psychology</i>		
PSYCH 202	Introduction to Psychology (or equivalent)	3
<i>Sociology</i>		
Select any introductory Sociology course		3
<i>Human Growth and Development</i>		
Select three credits of Human Growth and Development		3
<i>Humanities</i>		
Select six credits of Humanities		6
<i>Humanities or Social Science</i>		
Select seven credits of Humanities or Social Science		7
Total Credits		22

NURSING TRANSFER CREDITS

Students pursuing a Nursing BSN may transfer in credits from another institution to fulfill some of the requirements of the degree. These transfer credits are awarded in recognition of the associate's degree in nursing (ADN) or nursing diploma. Students who earned the ADN from a Wisconsin Technical College receive 30 transfer credits¹. All other students receive 24 credits.²

1

Transcripted as NURSINGX02 and NURSINGX28.

2

Transcripted as NURSINGX02 and NURSINGX22.

Total Credits		31-38

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
- Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
- Make effective use of technology for patient care, education, and management of health information.
- Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
- Use knowledge sources effectively to provide evidence-based care.
- Identify health disparities and advocate for basic essential health services for all.
- Allocate health care resources to maximize the health care benefit to clients, families, and community.
- Assume fiscal and ethical responsibility for clinical practice.
- Function as a member of the nursing profession within the community and the world.

FOUR-YEAR PLAN

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

National Council of State Boards of Nursing NCLEX-RN (<https://www.ncsbn.org/nclex.htm>)

Year of Exam	UW-Madison Graduates: First Attempt	National First Attempt
April-September 2021	81%	72%
April-September 2020	93%	79%
April-September 2019	89%	86%

Note: UW-Madison BSN Graduates pass rate reflects all UW-Madison Bachelor of Science-Nursing graduates who tested during the April-to-September test period for the first time, including recent and previous graduates.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South

Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

The requirements of this program do not meet Certification/Licensure in the following states:

California, New York

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Pennsylvania, Vermont, Washington, American Samoa, Puerto Rico

ACCREDITATION

ACCREDITATION

Commission on Collegiate Nursing Education (<http://www.aacnursing.org/CCNE/>)

Accreditation status: Next accreditation review: 2029–2030.

SCHOOL OF NURSING HONORS

HOW TO GET IN

All Traditional BSN students may apply to the Nursing Honors Program. The application process occurs during the first fall of enrollment in the nursing program. Admission to the Nursing Honors Program is based on academic performance and one essay.

REQUIREMENTS

Each student in the Nursing Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Honors students enroll in NURSING 679 Nursing Honors Research Seminar during the spring term of the first year of enrollment in the nursing program. They complete 1-2 credits of the NURSING 681 Senior Honors Thesis/NURSING 682 Senior Honors Thesis course during both the fall and spring of the second year. Honors students also take the required NURSING 442 Health Systems, Policy, and Economics during the spring of the second year.

SCHOOL OF PHARMACY

Established by the Wisconsin Legislature in 1883, the "Department of Pharmacy" was the second pharmacy school in the United States associated with a state university. The School of Pharmacy offers two degrees available to undergraduate-level students: the **Doctor of Pharmacy (Pharm.D.) degree**, and the **Bachelor of Science in Pharmacology and Toxicology (PharmTox) degree**. The school also offers several M.S. and Ph.D. degrees.

With an enrollment of more than 500 undergraduate and professional students, the School of Pharmacy is part of the Center for Health Sciences, which includes the School of Medicine and Public Health,

the School of Nursing, University Hospital and Clinics, and the State Laboratory of Hygiene. Students have opportunities to interact with other students and professional personnel in related fields as they prepare to meet the health care needs of society.

DOCTOR OF PHARMACY (PHARM.D.)

Pharm.D. graduates are presented with opportunity and challenge: the opportunity to participate in the exciting field of health care and the challenge of expanding the role of the pharmacy professional within this changing system. Pharmacists are important members of the comprehensive health care team; the expertise of pharmacists is vital to the success of the health care team as it designs, implements, and monitors drug therapy for the benefit of patients. Pharmacists use their expertise to keep pace with the rapid changes taking place in the health care system and the growing complexities of providing optimal pharmaceutical care to patients. This care requires that pharmacists be effective health educators. The ultimate success of drug therapy can depend upon how well patients understand and follow their drug regimens. Therefore, opportunities for the development and improvement of communication skills, both written and oral, are essential components of the Pharm.D. professional curriculum; required and elective courses throughout the curriculum provide valuable practical experience in effective interaction with patients and other health practitioners.

Pharmacy offers many career opportunities. Graduates traditionally have pursued careers in community, hospital, and long-term care pharmacy, the pharmaceutical industry, pharmacy education, and government agencies. Pharmacists serve also in other roles, including managed care, home care, and primary care, to increase the availability and quality of pharmaceutical care.

B.S. IN PHARMACOLOGY AND TOXICOLOGY

The B.S. in Pharmacology and Toxicology (PharmTox) focuses on the biomedical sciences. **Pharmacology** is concerned with the properties, effects, and mechanisms of action of drugs, and with the interactions between chemical agents and biological systems. **Toxicology**, the science of poisons, combines the elements of biology and chemistry with those of many other disciplines to help us understand the harmful effects of chemicals on living organisms.

A major challenge for the **pharmacologist** is to determine how drugs act. This can be carried out at the subcellular and molecular level, the cellular level, the tissue level, the organ level, or the whole-animal level. Pharmacologists also are concerned with the development of new drugs that produce fewer side effects while curing disease, and provide more effective and/or more rapid treatment of disease in humans or animals.

Toxicologists find scientifically sound answers to questions about chemicals that may potentially threaten our health, about pesticides in the food we eat, pollutants in the air we breathe, chemicals in the water we drink, and toxic waste sites near our homes. Some toxicologists are concerned with determining the cellular mechanisms by which drugs and chemicals produce toxic effects. Many are involved in subspecialty areas in toxicology research, such as reproductive and developmental toxicology, neurotoxicology, immunotoxicology, and inhalation toxicology. Researchers in these areas utilize both laboratory animals and in vitro systems to examine the cellular, biochemical, and molecular processes underlying toxic responses.

B.S. IN PHARMACEUTICAL SCIENCES

The B.S. in Pharmaceutical Sciences **is not a major**, but is an internal degree granted to current Doctor of Pharmacy (Pharm.D.) students after they complete at least one year of the Pharm.D. program. In order to qualify for the B.S. in Pharmaceutical Sciences, students must have attended UW–Madison as an undergraduate prior to entering the School of Pharmacy and must meet all degree requirements.

DEGREES/MAJORS/CERTIFICATES

- Pharmaceutical Sciences, B.S. (p. 1907)
- Pharmacology and Toxicology, B.S. (p. 1909)

ENTERING THE SCHOOL

Admission to either the B.S. in Pharmacology and Toxicology or the Doctor of Pharmacy program is selective and competitive, and requires specific prerequisite coursework as well as a complete admissions application. Completion of required prerequisite coursework does not guarantee admission. Each applicant's admission credentials are considered not only on their own merit, but also in comparison with the credentials of other applicants.

For detailed information on prerequisites and the application for the B.S. in Pharmacology and Toxicology (PharmTox), see the major's "How to Get In" tab in the (<http://guide.wisc.edu/undergraduate/pharmacy/pharmacy/pharmacology-toxicology-bs/#howtogetintext>) *Guide*.

Information about the required elements of the application and prerequisites for the Pharm.D. (Doctor of Pharmacy) program can be found on the School of Pharmacy website (<https://pharmacy.wisc.edu/programs/pharmd/admissions/>).

Most pre-pharmacy students are admitted to UW-Madison as College of Letters & Science students with an intention to pursue a School of Pharmacy program (PharmTox undergraduate degree **and/or** the professional Pharm.D. program). While our School of Pharmacy does not directly admit students from high school, we do offer comprehensive academic, admissions, and career advising to students who have expressed an interest either of these programs. Please refer to the Resources (<https://guide.wisc.edu/undergraduate/pharmacy/#resourcestext>) section to start exploring available resources and opportunities available for pre-School of Pharmacy students at UW-Madison.

POLICIES AND REGULATIONS

BACHELOR OF SCIENCE - PHARMACOLOGY AND TOXICOLOGY POLICIES

For a list of Pharmacology and Toxicology (PharmTox) undergraduate policies, including academic standing and probation policies, please visit the PharmTox Policy Handbook (<https://students.pharmacy.wisc.edu/pharm-tox-handbook/>).

RESOURCES

ACADEMIC ADVISING

If you're a current UW–Madison undergraduate student, you have access to dedicated, structured pre-pharmacy advising at the School of Pharmacy. Please choose the School of Pharmacy as your advising group option when you make your SOAR reservation in April. We're here to help you with:

- Career paths related to pharmacy, pharmacology, and toxicology
- Understanding prerequisites and developing a plan for completion
- Accessing courses and guidance on how to sequence classes
- Pharm.D. and PharmTox curriculum and degree options
- Admissions selection criteria
- Application process and components

Who is a pre-pharmacy student? A pre-pharmacy student is anyone who is taking the courses necessary to be considered for admission to the Doctor of Pharmacy (Pharm.D.) professional program and/or the B.S. in Pharmacology and Toxicology (PharmTox) at the UW–Madison School of Pharmacy. Completion of prerequisite coursework does not guarantee admission as admission is selective and competitive.

How do I get started with pre-pharmacy advising? Schedule your pre-pharmacy advising appointment using the Starfish app (<https://wisc.starfishsolutions.com/starfish-ops/>) in MyUW. Search for "Kendra Gurnee" to meet with the pre-PharmTox advisor or "Amy Zwaska" to meet with the pre-Pharm.D. advisor. Any UW–Madison student with any major or no major can access our dedicated pre-pharmacy advising services at the School of Pharmacy. Individual appointments are typically scheduled for 30 minutes.

If you experience any trouble with the scheduling process:

- You can get help with Starfish here (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- You can also contact the School of Pharmacy Student and Academic Affairs Office at 608-262-6234 to set up your advising appointment.

Due to the selective nature of the Pharm.D. and PharmTox admissions processes, interested students are encouraged to meet with School of Pharmacy advisors early and often to explore our programs and get valuable guidance about prerequisites, selection criteria, application timeline/procedures, and career opportunities. We recommend that you meet with your pre-pharmacy advisor at least once per semester.

For more information on preparing for and applying to our programs, visit our admissions resources for Pharm.D. (<https://pharmacy.wisc.edu/academics/pharmd/admissions/>) and PharmTox (<https://pharmacy.wisc.edu/academics/pharm-tox/admissions/>).

FINANCIAL AID

Students who seek financial assistance should contact the UW–Madison Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for financial aid applications and information about scholarships, loans, grants, work-study programs, and student employment.

SCHOOL OF PHARMACY SCHOLARSHIPS

The School of Pharmacy awards a variety of scholarships each year to admitted PharmTox and Pharm.D. students. Awards are based on both academic merit and financial need. Students are invited to apply to School of Pharmacy-specific scholarships, as well as campus-wide or non-Pharmacy scholarships, through the Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>).

STUDENT ORGANIZATIONS

Students will find many organizations of interest, both in the School and across the UW–Madison campus. The School of Pharmacy student organizations website (<https://students.pharmacy.wisc.edu/student-life/student-organizations/>) has a comprehensive listing of student organizations and groups that are affiliated with the School.

FACILITIES

The School of Pharmacy is located in Rennebohm Hall on the west side of campus, near University Hospital and Clinics and Health Sciences Learning Center. The School of Pharmacy provides students and faculty with the finest possible physical environment for professional pharmacy and for research in pharmaceutical fields of study.

SCHOOL OF PHARMACY

DEGREES/MAJORS/CERTIFICATES

- Pharmaceutical Sciences, B.S. (p. 1907)
- Pharmacology and Toxicology, B.S. (p. 1909)

PHARMACEUTICAL SCIENCES, B.S.

The B.S. in Pharmaceutical Sciences **is not a major**, but is a milestone degree granted to current Doctor of Pharmacy (Pharm.D.) students while working toward the Pharm.D. degree. In order to qualify for the B.S. in Pharmaceutical Sciences, students must have attended UW–Madison prior to entering the School of Pharmacy, and must meet all degree requirements. More detailed information about this degree may be found on the school website (<https://pharmacy.wisc.edu/programs/pharmd/curriculum/bs-ps/>).

Information about our Doctor of Pharmacy program (Pharm.D.) can be found at <https://pharmacy.wisc.edu/programs/pharmd/>. The Pharm.D. is required to be eligible to take the North American Pharmacist Licensure Examination (NAPLEX) and be registered and licensed as a pharmacist.

Students interested in pursuing an **undergraduate** degree offered by the School of Pharmacy may want to investigate the B.S. Pharmacology and Toxicology (p. 1909) program. This interdisciplinary major in the biomedical sciences can serve as a foundation for further education in graduate or professional degree programs, or for entry-level scientific employment.

HOW TO GET IN

The B.S. in Pharmaceutical Sciences is a non-admitting milestone degree. Students earn this credential once degree requirements have been

met while working toward their Doctor of Pharmacy (Pharm.D.) degree. For more information on how to apply, see the Doctor of Pharmacy Program's Admissions (<https://pharmacy.wisc.edu/academics/pharmd/admissions/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

MAJOR REQUIREMENTS

The bachelor's degree will be awarded once all Pharmaceutical Sciences major requirements are met, as well as the University General Education Requirements and other coursework totaling at least 120 credits.

Code	Title	Credits

--------------	--	---

Total Credits **25**

ADDITIONAL NOTES

Foreign language coursework can count towards the "Humanities/Literature/Arts" gen ed requirement.

AP, IB, retro-credits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the elective credit requirement.

Students must also complete coursework appropriate for admissions to the PharmD program.

QUALITY OF WORK

Students must have a minimum 2.000 cumulative grade point average.

School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmD student policy handbook.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Drug factors. Apply knowledge of the physical, chemical, pharmacologic, and formulation properties of drugs and relate how these properties influence drug parameters (such as kinetics, pharmacodynamics, stability, dosage form design, and treatment-related outcomes). Differentiate among the major therapeutic drug classes based on mechanisms of action, clinical use and adverse effects, contraindications, drug interactions, dosage forms, and dosing regimens.
2. Patient factors. Collect, integrate and apply knowledge of a patient's biochemistry, anatomy, physiology, genomics, culture, socio-behavioral characteristics, and pathophysiologic states to develop an individualized patient care plan using drug factors that will improve

therapeutic outcomes, minimize drug reactions, reduce adverse events, and increase adherence.

3. Drug kinetics. Design or modify dosage regimens using patient-specific or population pharmacokinetic data, plasma concentration-time profile of drugs, and factors that alter them.
4. Product preparation. Compound parenteral and non-parenteral drug products using appropriate calculations, pharmaceutical components, and techniques. Demonstrate a commitment to patient safety by assuring total accuracy in calculation, preparation, labeling and dispensing of prescription and medication orders.
5. Teamwork. Collaborate effectively with pharmacy colleagues, other healthcare professionals, scientists, and patients and/or their caregivers.
6. Health disparities. Identify causes of health disparities and incorporate principles of cultural awareness, sensitivity, and competence into plans to address these issues.
7. Professional awareness. Identify emerging health-related issues, products, and services and analyze their potential implications for: disease prevention and/or treatment services; management of human, physical, medical, information, and technological resources involved in providing patient care; and patient-specific and population-based therapeutic outcomes.

PHARMACOLOGY AND TOXICOLOGY, B.S.

Pharmacology and Toxicology (PharmTox) is an undergraduate major offered through the School of Pharmacy; successful completion of program requirements results in earning the Bachelor of Science–Pharmacology and Toxicology degree. Pharmacology and toxicology are related biomedical science disciplines. **Pharmacology** is the study of the sites, properties, effects, and mechanisms of drug action—the interactions of chemicals with biological systems. **Toxicology** addresses adverse effects of chemicals on humans and animals and includes exposure assessment, hazard identification, dose response assessment, and risk characterization. Both subjects integrate multiple scientific disciplines and rely on cutting-edge biotechnological approaches to gain insight into drug and toxicant action at the molecular level. Though the degree is titled “Pharmacology and Toxicology,” the program’s curriculum is multidisciplinary across various biomedical sciences.

The PharmTox degree/major has a selective and competitive admissions process, requiring completion of 60 college credits and specific prerequisite coursework. These typically take two academic years (freshman and sophomore years) to complete. Prerequisite coursework can be done at UW–Madison or at most accredited colleges and universities (see this website (<https://pharmacy.wisc.edu/programs/pharm-tox/admissions/transfers/>) for course equivalencies from other universities). Questions about course equivalencies from other colleges or universities can also be addressed with the PharmTox advisor.

At UW–Madison, pre–PharmTox students are usually in either the College of Letters & Science or the College of Agricultural and Life Sciences during their freshman and sophomore years while taking prerequisite coursework and preparing to apply to the major. Students can request to be assigned to the PharmTox advisor during this time, in addition to having a primary academic advisor in their current school. It is important to stay in contact with the PharmTox advisor to remain up-to-date with admission requirements and program changes. Applications are typically

due in February, with students being admitted to the major and beginning core coursework in fall of the following year (typically junior year). The core major curriculum typically requires two years to complete (junior and senior years).

For those interested in becoming a licensed pharmacist, information about our Doctor of Pharmacy program (Pharm.D.) can be found at <https://pharmacy.wisc.edu/programs/pharmd/>. The Pharm.D. is required to be eligible to take the North American Pharmacist Licensure Examination (NAPLEX) and be registered and licensed as a pharmacist.

HOW TO GET IN

See the School of Pharmacy Academic and Admission Policies (p. 1906).

APPLICATION

Application to the B.S. in Pharmacology and Toxicology is required as the program’s size is limited. Students (both at UW–Madison and at other institutions) typically apply to the program by the beginning of February in their sophomore year for subsequent fall semester admission; students are not admitted at any other time of the year. (*Note that potential transfer students must also apply to UW–Madison itself (<https://www.admissions.wisc.edu/apply/transfer/deadlines.php>)*). Students are notified by the end of March regarding their admission status. Applications and current due dates can be found on our website (<https://pharmacy.wisc.edu/programs/pharm-tox/admissions/>).

PREREQUISITES

To be eligible to apply, students must complete the following courses by the end of the summer semester prior to entering the program. Potential transfer students from a wide variety of regional institutions can find course equivalents (from their current university/college) on this School of Pharmacy webpage (<https://pharmacy.wisc.edu/programs/pharm-tox/admissions/transfers/equivalencies/>).

CALCULUS I

Code	Title	Credits
Select one of the following options: ¹		
MATH 221	Calculus and Analytic Geometry I	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	

¹

MATH 211 Calculus taken at UW–Madison does not fulfill the Calculus I requirement for this major.

GENERAL AND ORGANIC CHEMISTRY

Code	Title	Credits
Select one of the following general chemistry options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115	Chemical Principles I	
Select ALL of the following organic chemistry courses:		
CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3

CHEM 344	Introductory Organic Chemistry Laboratory	2
----------	---	---

INTRODUCTORY BIOLOGY

Code	Title	Credits
------	-------	---------

Select one of the following options:

BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology Laboratory	
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	

COMMUNICATION

The UW–Madison Communication Part A requirement must be fulfilled.

SOCIAL SCIENCE

Any course that qualifies as social science (S or Z) credit, 3 credits required.

OTHER COLLEGE COURSES

Sixty (60) credits must be completed by the end of the summer semester prior to entering the program. AP, IB, retrocredits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the 60 credits.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

OVERVIEW OF REQUIREMENTS

The Pharmacology and Toxicology B.S. degree requires the following groups of coursework:

- University General Education requirements (above - those that are also prerequisite requirements will be completed before entering the program; remaining gen ed requirements can be completed at any time prior to graduation)
- Prerequisite requirements (completed prior to admittance/entrance to the program)
- Pharmacology and Toxicology major requirements (mostly completed after entering the program, though some courses can be completed earlier)

The PharmTox degree does not require any additional breadth courses beyond the University General Education requirements. Foreign language coursework can count towards the "Humanities/Literature/Arts" gen ed requirement.

School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmTox student policy handbook (<https://pharmacy.wisc.edu/student-resources/>).

Select one of the following general chemistry options:

CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the *Guide*.

CHEM 115	Chemical Principles I	
----------	-----------------------	--

Select ALL of the following organic chemistry courses:

CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

INTRODUCTORY BIOLOGY

Code **Title** **Credits**

Select one of the following options:

BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	

COMMUNICATION

The UW–Madison Communication Part A requirement must be fulfilled.

SOCIAL SCIENCE

Any course that qualifies as social science (S or Z) credit, 3 credits required.

OTHER COLLEGE COURSES

Sixty (60) credits must be completed by the end of the summer semester prior to entering the program. AP, IB, retrocredits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the 60 credits.

PHARMACOLOGY AND TOXICOLOGY MAJOR REQUIREMENTS

Students must take most of their major-level coursework in very specific semesters in order to graduate within four semesters of starting the program, due to prerequisites and fall or spring-only courses - see four year plans (p. 1914) for course sequences. It may be possible to take some major-level courses earlier if prerequisites are met; consult the advisor. The five credits of elective coursework, statistics, genetics, and physics requirements can be completed at any time, including prior to admission to the program. The directed/independent study requirement must be performed after matriculation into the program (i.e. the first fall semester officially declared in the major or any semester thereafter).

DIRECTED/INDEPENDENT STUDY (699), 2 CREDITS

Must be completed after matriculation into the major (i.e. the first fall semester officially declared in the major or any semester thereafter) and have prior approval to meet PharmTox major requirements. Students should not wait until the final semester to try to fulfill this requirement, as it can be difficult to find a research opportunity close to graduation. The research-based directed/independent study (typically a course numbered 699) must be in a biological, chemical, or biomedical sciences department, and can include laboratory-based research, library or literature-based research, or clinical research. Experiences such as peer mentoring or teaching assistance, even if a 699 course is used for credit, cannot fulfill this requirement.

PHYSICS I AND II

Code **Title** **Credits**

Select one of the following options (consult with advisor on recommended sequences):

PHYSICS 103 & PHYSICS 104	General Physics and General Physics	8
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	10

STATISTICS

Code **Title** **Credits**

Select one of the following:

STAT 240	Data Science Modeling I	4
STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	3
STAT 324	Introductory Applied Statistics for Engineers	3
STAT/B M I 541	Introduction to Biostatistics	3

BIOCHEMISTRY

Code	Title	Credits
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	6

PHYSIOLOGY

Code **Title** **Credits**

Select one of the following:

ANAT&PHY 335	Physiology	5
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	5

GENETICS

Code **Title** **Credits**

Select one of the following:

GENETICS 466	Principles of Genetics	3
GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 ¹	6

BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory ²	10
---	--	----

1

If students choose GENETICS 467 & GENETICS 468, 3 credits from this sequence will count towards the 5 required elective credits.

2

Students who have taken BIOCORE for introductory biology will have typically also completed the genetics requirement via BIOCORE courses taken sophomore/second year.

PATHOLOGY

Code	Title	Credits
PATH 404	Pathophysiologic Principles of Human Diseases	3

PHARMACUETICAL SCIENCES

Code	Title	Credits
All of the following are required:		
PHM SCI 558	Laboratory Techniques in Pharmacology and Toxicology	2
PHM SCI 679	Pharmacology and Toxicology Seminar (taken twice) ¹	1
PHM SCI/PHMCOL-M 521 & PHM SCI/PHMCOL-M 522	Pharmacology I and Pharmacology II	6
PHM SCI 623	Pharmacology III	3
or BIOCHEM/PHMCOL-M/ZOOLOGY 630	Cellular Signal Transduction Mechanisms	
or PHM SCI 581	Molecular and Cellular Principles in Pharmacology	
PHM SCI/M&ENVTOX/ONCOLOGY/PHMCOL-M/POP HLTH 625 & PHM SCI/M&ENVTOX/PATH/PHMCOL-M/POP HLTH 626	Toxicology I and Toxicology II	6

1

Students need to take PHM SCI 679 in both their first and second years in the major in spring semesters (typically junior and senior years); the course is repeatable for degree credit.

ELECTIVES IN THE MAJOR

Students must complete at least 5 elective credits in the pharmacology and toxicology major from the below list. Electives in the pharmacology and toxicology major are available within the School of Pharmacy and in many departments. It is suggested that students select electives in consultation with their advisor. Another option for fulfilling a portion or all of these 5 credits are additional directed/independent study (699) credits beyond the minimum 2 credits required for the major. Additional 699 credits must be approved by the PharmTox program to count towards

the elective requirement if they are not done under the same principle investigator that was approved for the original two credits required.

Pharmaceutical Sciences/Pharmacy

Code	Title	Credits

QUALITY OF WORK REQUIREMENTS AND PASS/FAIL

Students must have a 2.000 cumulative grade point average at the time of graduation in order to earn a Pharmacology and Toxicology B.S. degree.

No course that is used for Pharmacology and Toxicology degree requirements may be taken as pass/fail and must be taken for a letter grade (AP, IB, or other test credits or placement exemptions are excluded from this requirement). This includes all prerequisite coursework, major requirements, and University General Education requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate a knowledge and understanding of the supportive biomedical fields.
2. Demonstrate a knowledge and understanding of Pharmacology.
3. Demonstrate a knowledge and understanding of Toxicology.

4. Understand scientific principles of laboratory design and presentation of scientific data.

FOUR-YEAR PLAN

A minimum of 120 credits is required to earn the B.S. in Pharmacology and Toxicology. Below are sample four-year plans for the Pharmacology and Toxicology major, incorporating both prerequisites and major coursework. They focus on science coursework sequencing and do not take into account factors such as AP or advance standing credits, additional summer courses, study abroad, or preparing for standardized tests like the MCAT or PCAT.

It is **critical** that you talk with your advisor about your tentative plan for course sequences and prerequisites, which courses are offered fall vs. spring vs. summer, etc.

EXAMPLE PLAN: CHEM 103/104

Freshman

Fall	Credits	Spring	Credits
CHEM 103		4 CHEM 104	5
MATH 221		5 STAT 371	3
Communication A		3 Social Science	3-4
Electives		3-4 Electives	3-4
15-16		14-16	

Sophomore

Fall	Credits	Spring	Credits
CHEM 343		3 CHEM 345	3
ZOOLOGY/BIOLOGY/ BOTANY 151 (or Biocore)		5 CHEM 344	2

PHM SCI/PHM COL-M 521 Pharmacology I and PHM SCI 623 Pharmacology III are taken concurrently/in the same semester; PharmTox students can take PHM SCI 623 Pharmacology III before taking PHM SCI/PHM COL-M 522 Pharmacology II.

ADVISING AND CAREERS

ADVISING

Pre-PharmTox students are often in the College of Letters & Science or the College of Agricultural and Life Sciences during their freshman and sophomore years while they are taking prerequisite coursework and preparing to apply to the major. Students can request to be assigned to the PharmTox advisor during this time, in addition to having a primary academic advisor in their current school/college, and are welcome to meet with the PharmTox advisor at any time.

The PharmTox advisor advises both current undergraduates and prospective high school/transfer students interested in learning more about the major. Appointments may be scheduled by calling (608) 262-6234 (for prospective high school/transfer students) or scheduled online via Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) (for current students). Advising is also available at SOAR for incoming students and includes curriculum planning and introductions to enrollment tools. The advisor can connect prospective undergraduate students with upperclassmen and alumni with similar interests. Once admitted to the major, students will have the PharmTox advisor assigned as their primary academic advisor.

CAREERS

Students completing the program will be well qualified to pursue entry-level scientific career employment (<https://pharmacy.wisc.edu/programs/pharm-tox/careers-in-pharm-tox/>) in industry (e.g., biomedical; biotechnology; consumer products; contract research organizations; regulatory affairs; pharmaceutical), in academic basic science and clinical research laboratories, or in various agencies of government focused on science, health, or the environment. The program's depth and breadth has proved to be an excellent foundation for graduate work in pharmacology, toxicology, or other related biomedical sciences, as well as for medical school, veterinary medicine, and other health professions schools (e.g., pharmacy, dental, optometry, public health). For students who tailor their general education and elective coursework appropriately, the Pharmacology and Toxicology program can also uniquely launch students into scientific writing, business or regulatory positions, environmental positions, or law school. As future professionals aware of the pharmacological and toxicological sciences, pharmacology and toxicology graduates are well poised to make meaningful improvements in human and animal health.

Statistical information about immediate post-degree work or advanced degree attainment for alumni in the last decade may be found on the School website (<https://pharmacy.wisc.edu/programs/pharm-tox/student-outcomes/>). Due in part to its small size, the program has strong connections with its 400+ alumni who are located across the country and the globe. The PharmTox advisor can help students connect with alumni to explore careers and learn about employers.

Available career resources:

- The PharmTox advisor can assist with resume building, interview preparation, and career exploration, and also gives all PharmTox students access to a virtual career center via Canvas.
- Many L&S and CALS career workshops and fairs are open to all students, including PharmTox students. The Career Exploration Center (<https://cec.ccas.wisc.edu/>) (CEC) is also available to students who are in the early stages of career exploration, especially those who have lots of ideas or no ideas yet.
- Current students can join the Pharmacology and Toxicology LinkedIn group (<https://www.linkedin.com/groups/12266662/>) to network with fellow students and alumni.
- Handshake (<https://app.joinhandshake.com/auth/?auth=648>) features employer job postings specifically available to UW–Madison students, and is a great place to browse for internships and full-time jobs. Students can also post resumes and allow employers to contact them regarding potential employment.
- The Center for Prehealth Advising (<http://www.prehealth.wisc.edu>) assists students with preparing for and applying to professional healthcare programs, including medicine, physical therapy, physician assistant, dentistry, and more.
- Students have access to a student commons, group study rooms, lockers, and a variety of gathering spaces in Rennebohm Hall. Ebling Library, located adjacent to Rennebohm Hall in the Health Sciences Learning Center, serves the School of Pharmacy student body, in addition to that of students from medicine, veterinary medicine, and nursing.
- The School of Pharmacy hosts a variety of student organizations (<https://pharmacy.wisc.edu/student-organizations/>), several of which are available to PharmTox students. PharmTox students have their own Class Council with several representatives from each class. Junior and senior class presidents are elected each year and help facilitate Class Council, as well as serve on various School of Pharmacy committees as representatives of the PharmTox program.
- Students are required to participate in a wet-lab basic science research experience for at least one semester after being admitted to the major, though continued research involvement throughout one's time here is highly encouraged. The Biocommons website (<http://biology.wisc.edu/finding-mentor/>) has step-by-step information on how to find a research opportunity, and students can also speak with the advisor for additional guidance.
- Study abroad is definitely possible, although a winter session, spring break, or summer session experience fits most easily with the PharmTox curriculum. Visit the Study Abroad Major Advising Page for PharmTox (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/pharmacology-and-toxicology/>) to learn more.
- One to two travel awards are given annually to allow seniors to attend a national conference in the field of pharmacology and toxicology, and funding is often available to facilitate travel for interested students to regional conferences near Madison.
- The annual Pharm.D./PharmTox Research Symposium provides students with an opportunity to present their research projects each spring.

de Villiers, Melgardt (Vice Dean and Associate Dean for Academic Affairs)

ADMISSIONS/OVERSIGHT COMMITTEE

Altschaffl, Jeremy (Assistant Dean - Admissions)

Dai, Jun (Assistant Professor, Pharmaceutical Sciences)

Gurnee, Kendra (Advisor and Program Coordinator)

Hong, Seungpyo (Professor, Pharmaceutical Sciences)

Johnson, Jeffrey (Professor, Pharmaceutical Sciences)

Josephson, Laura (Alumna)

Vežina, Chad (Associate Professor, Comparative Biosciences)

de Villiers, Melgardt (Vice Dean and Associate Dean for Academic Affairs)

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in pharmacology, toxicology, and other biomedical sciences, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- The program's small size and cohort-based model makes it easy to arrange study groups, tutoring, and social events, and funds can be requested to support these activities.

INDEX
