As a student in the School of Business, you will find yourself inspired by peers, staff, alumni, business leaders, and world-renowned faculty who are focused, collaborative, and engaged in every aspect of the student experience. You will join a highly-ranked program that equips you to meet both academic and career challenges. Employers value School of Business graduates because of the comprehensive preparation this

learning environment provides. Graduates possess highly sought-after general management and specialized expertise in business.

Joining collaborative, inspiring, trustworthy, and progressive School of Business alumni, Business Badger graduates are prepared to lead their organizations to success and transform the world of business. Together Forward!

BACHELOR OF BUSINESS ADMINISTRATION IN BUSINESS: MANAGEMENT

The BBA in Management (BBAM) degree prepares students to plan, organize, direct, and orchestrate the activities and resources of organizations in various industries and sectors. Students who pursue the BBAM degree will learn how to formulate and implement effective strategies that enable organizations to achieve their vision, mission, and objectives as well as to adapt to changing industry conditions and competitive forces.

The program is open to students who have completed the pre-business requirements and have been admitted to the School of Business. BBAM students will complete a core curriculum that covers the fundamentals of business, such as accounting, finance, marketing, operations, and strategy. Additionally, BBAM students will choose from a variety of electives that focus on different aspects of management, such as inclusive leadership, organizational behavior, strategic innovation, organizational change, international business, and social responsibility. BBAM students will also have the opportunity to participate in experiential learning activities, such as case competitions, consulting projects, and simulations.

The BBAM degree aims to develop students' knowledge and skills in management as well as their professional and ethical values. Students will gain an understanding of the theories and frameworks that underlie management along with practical tools and techniques that are applicable in diverse organizational contexts. They will have the ability to assess the financial, marketing, and operational implications of organizational strategies, identify and appropriate business value through analysis and action, and communicate ideas and recommendations to others. Students will also develop collaboration skills.

The BBAM degree opens up a wide range of career paths for graduates, including roles involving project management, business development, and strategic or financial analysis where an understanding of an organization's strategy, design, process, culture, and context are desirable. Whether they choose to work as managers or consultants, entrepreneurs or analysts, BBAM graduates will be equipped with the skills and knowledge to lead private businesses, nonprofit organizations, and public-interest agencies.

HOW TO GET IN

HOW TO GET IN CURRENT UW-MADISON STUDENTS

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://admissions.wsb.wisc.edu/BbaPreBusiness)

Courses required to get in Students are required to complete each of the 4 requirements below. Requirements can be completed via coursework, test credit, transfer work, or placement exam (if applicable).

Communication A

- ENGL 100
- COM ARTS 100
- ESL 118
- LSC 100

Quantitative Reasoning A

- MATH 112
- MATH 114
- MATH 171
- COMP SCI/
​L 1 S 102

Economics

- ECON 101
- ECON 111

Human Behavior

- PSYCH 202
- SOC/
​C&E SOC 211
- ANTHRO 104
- GEN&WS 102
- HDFS 263

GPA requirements to get in Minimum 3.0 UW-Madison GPA.

Credits required to get in

- If you started at UW-Madison as a first-year student, 24 credits completed/in-progress at UW-Madison are required for application.
- If you started at UW-Madison as a transfer student, 12 completed/in-progress at UW-Madison are required for application.
- In-progress course credits towards this minimum must be completed at the end of the spring application term.

Other

- Pre-Business 101 workshop required during the intended application year.
- Pre-Business applicants may apply once within their first four terms (Fall/Spring) at UW-Madison, based on enrollment date. There is no credit maximum.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	Mid March	On or before July 1st.
To apply for a spring start	This program does not accept applications to start in the spring.	
To apply for a summer start	This program does not accept applications to start in the summer.	

PROSPECTIVE FIRST-YEAR APPLICANTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Prospective high school students may be considered for direct admission to Business based on their application to the University of Wisconsin-Madison. Simply list a Business interest as your top academic area of interest on the University application.

PROSPECTIVE TRANSFER APPLICANTS

Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin-Madison and the School of Business during the spring term for fall enrollment. Information for prospective transfer students can be found here: <https://business.wisc.edu/undergraduate/admissions/transfer-students/>.

ADDITIONAL INFORMATION

Students declared in Business: Management cannot earn the Summer Certificate in Business Fundamentals, Certificate in Business, or the Certificate in Entrepreneurship due to curriculum overlap.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) program combines UW–Madison’s general liberal education requirements, broad coverage of core business disciplines, and cutting-edge signature courses to create a strong academic foundation upon which students delve deeply into their majors.

¹ Only 3 credits can be counted towards the 6 required Elective credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Analyze organizational capabilities and external opportunities to develop strategies in pursuit of competitive advantages.
2. Assess and respond to different types of change in the competitive environment (technological, rivals’ actions, disruption, etc.) that may affect a firm’s strategic position.
3. Develop appropriate tactics in competitive and cooperative negotiations to promote team effectiveness, manage conflict, and support organizational strategies when negotiating with external partners.
4. Develop team norms, routines, and structures to maximize team performance and align with organizational goals and strategies.
5. Diagnose management, organizational, and environmental challenges from a change agent’s perspective and design interventions to enhance effectiveness and stakeholder value.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

ENTREPRENEURSHIP, CERTIFICATE

The undergraduate certificate in entrepreneurship (<https://business.wisc.edu/undergraduate/certificates/entrepreneurship/>) is one of the most popular certificates at UW–Madison. It offers opportunities

for **non-business undergraduates** interested in learning the skills for entrepreneurial thinking. These skills are critical both now and in the future if you are starting a new venture, working for a startup, or tackling new ventures within existing organizations. Modern businesses rely heavily on the ability to recognize and seize opportunities. Cutting-edge technologies, innovative business models, and ever-changing market landscapes determine which firms thrive and which do not. Taking initiative, thinking entrepreneurially, and acting upon opportunities are key ingredients of success in this environment.

This certificate program offers a distinct array of courses that combine business entrepreneurship classes with the curricula of several colleges and schools at UW–Madison. Classes in entrepreneurship and related topics provide the skills necessary to succeed throughout a student's career. Student projects outside the classroom with local firms or student ventures provide students with hands-on business experience. This certificate program helps prepare students for roles such as business founder, product manager, engineer/scientist, new product designer, marketing or finance professional, nonprofit administrator, or consultant.

HOW TO GET IN

HOW TO GET IN

The certificate is open to undergraduates declared in a major outside of the School of Business who are in good academic standing. Students declared in a major in the School of Business are not eligible for the certificate and should explore the Business: Entrepreneurship, BBA (p. 1437).

To declare the Certificate in Entrepreneurship, complete the declaration form linked within the Contact Information box.

REQUIREMENTS

REQUIREMENTS

A total of 15 credits is required to complete the certificate which includes a foundation course, advanced entrepreneurship coursework, and electives. Students are strongly encouraged to participate in related non-credit entrepreneurship immersion experiences such as competitions and student organizations.

- At least 9 of the required 15 credits for the certificate must be completed in residence.
- Students must earn a 2.5 cumulative GPA in all certificate in entrepreneurship coursework.

FOUNDATION COURSEWORK

Code	Title	Credits

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Correctly demonstrate knowledge of basic market discovery techniques and apply basic market discovery techniques.
2. Demonstrate proficiency in knowing the basic steps taken to start a new venture.
3. Demonstrate knowledge of career paths in entrepreneurship.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students who have declared the Certificate in Entrepreneurship will be assigned to the Business Certificate Advising Committee.

MARKETING

Marketing is the dynamic force that bridges organizations and customers, creating vibrant exchanges that drive success. It encompasses the thrilling journey of planning, designing, pricing, promoting, and distributing goods and services that meet the needs of both organizations and their customers. In the bustling economy of the United States and many other countries, marketing has evolved into a critical and comprehensive business function, becoming increasingly broad and vital.

Students diving into the world of marketing can explore a plethora of exciting career opportunities, including: advertising/public relations/communication, digital marketing, general marketing, marketing research/analyst, merchandising/buyer/planner, product/brand management, business-to-business (B2B), sales/business development, sports marketing & communication and supply chain management.

Today's marketing managers must master not only the traditional realms of marketing channels, sales management, advertising, and research, but also understand the intricate motivations of consumers and distributors. They must skillfully translate insights into compelling marketing strategies. The marketing program is designed to be broad enough to provide a comprehensive understanding of these areas, yet flexible enough to allow students to focus on their specific interests.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Business Administration: Marketing, BBA (p. 1462)
- Business: Marketing, BBA (p. 1464)

BUSINESS ADMINISTRATION: MARKETING, BBA

If you're a strategic thinker and a creative problem-solver, then advancing in a career in marketing could be a good choice for you. Marketing is a diverse field that involves in-demand skills desired by top employers, large and small. It's also a growing field, particularly in the digital realm. Successful marketers will be analytical, creative and know how to leverage technology.

The BBA in Business Administration: Marketing, offered fully online, provides a robust foundation in business. From the highly ranked School of Business, you will gain valuable skills in communication, collaboration, creativity, relationship building and planning. You will learn to implement strategies related to product, place/distribution, price and promotion; analyze market segments and generate effective plans; leverage relevant sources to determine and support marketing actions; and apply analytical rigor to decisions.

Graduates pursue a variety of careers in marketing, including brand/product management, marketing research/analytics, sales management, advertising, business-to-business marketing, digital and social media, consulting, and supply chain management. You could be a product manager, social media strategist or market research analyst, among other dynamic jobs.

HOW TO GET IN

HOW TO GET IN

Students applying to the BBA in Business Administration-Marketing program apply through UW-Madison Online (<https://online.wisc.edu/>). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (<https://online.wisc.edu/apply/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

BUSINESS: MARKETING, BBA

DIVE INTO THE WORLD OF MARKETING!

In the marketing major, you'll master the core principles of marketing—product, place, price, and promotion—and discover how these elements shape business strategies across various industries. Marketing is a critical, dynamic, and multi-faceted area of business that facilitates exchanges between organizations and customers. The marketing function is integral to organizations and businesses of all sizes, from global enterprises to start-ups, and spans services such as healthcare and banking, as well as nonprofits and municipalities. You'll explore the art of building strong relationships with customers and channel partners, a crucial aspect of successful marketing. As a marketing professional, you'll develop a diverse skill set that includes both qualitative and quantitative analysis, critical thinking, creativity, communication, and problem-solving. Our marketing major provides a robust foundation in marketing principles while offering the flexibility to delve into specialized areas that ignite your passion.

Ready to shape the future of business? Join us and turn your creativity and strategic thinking into a powerful career! Learn more about the marketing major (<https://business.wisc.edu/undergraduate/majors/marketing/>).

PROSPECTIVE FIRST-YEAR APPLICANTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Prospective high school students may be considered for direct admission to Business based on their application to the University of Wisconsin–Madison. Simply list a Business interest as your top academic area of interest on the University application.

PROSPECTIVE TRANSFER APPLICANTS

Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin–Madison and the School of Business during the spring term for fall enrollment. Information for prospective transfer students can be found here: <https://business.wisc.edu/undergraduate/admissions/transfer-students/>.

ADDITIONAL INFORMATION

Students declared in Business: Marketing cannot earn the Summer Certificate in Business Fundamentals, Certificate in Business, or the Certificate in Entrepreneurship due to curriculum overlap.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) program combines UW–Madison's general liberal education requirements, broad coverage of core business disciplines, and cutting-edge signature courses to create a strong academic foundation upon which students delve deeply into their majors.

Code	Title	Credits
School of Business BBA Requirements		
Complete requirements: (p. 1399)

	Business Core Requirement	
	Business Signature Requirement	

BUSINESS: MARKETING MAJOR REQUIREMENTS

All marketing majors must take MARKETNG 300 Marketing Management, which is a business core course and a prerequisite for most of the undergraduate marketing courses. In addition to MARKETNG 300, the major consists of three required marketing courses and a minimum of nine additional MARKETNG credits. These required and elective courses can be taken in any order, with the exception of MARKETNG 460 Marketing Strategy. MARKETNG 460 should be taken after completing MARKETNG 305 Consumer Behavior and MARKETNG 310 Marketing Research and preferably in the final year of the major.

Code	Title	Credits
MARKETNG 305	Consumer Behavior	3
MARKETNG 310	Marketing Research	3
MARKETNG 460	Marketing Strategy	3
Elective Coursework: Select a minimum of 9 additional MARKETNG credits. Students may choose elective coursework that follows a specific "career path".		9
Total Credits		18

POTENTIAL MARKETING CAREER GUIDANCE AND CAREER PATHS

For further information on recommended electives and career paths, see the Department of Marketing website linked within the Contact Information box.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate the ability to formulate and implement marketing strategies related to product, place/distribution, price, promotion.
2. Demonstrate the ability to evaluate and analyze appropriate market segments and generate effective marketing plans.
3. Locate, evaluate, and leverage relevant sources to determine and support their marketing actions.
4. Apply analytical rigor to marketing decisions.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal

struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Unleash the power of marketing! Marketing is the heartbeat of business, driving dynamic exchanges between organizations and customers. It's a critical, ever-evolving field that spans every corner of the business world—from global enterprises to innovative start-ups, and from essential services like healthcare and banking to impactful nonprofits and municipalities. As a marketing student, you'll unlock a world of career possibilities, including: advertising/public relations/communication, digital marketing, general marketing, marketing research/analyst, merchandising/buyer/planner, product/brand management, business-to-business (B2B), sales/business development, sports marketing & communication and supply chain management.

More information on Career Pathways (<https://business.wisc.edu/undergraduate/careers/pathways/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

OPERATIONS AND INFORMATION MANAGEMENT

The Department of Operations and Technology Management administers the operations and technology management major, the information systems major, and the supply chain management major.

The Operations and Technology Management (OTM) major focuses on the design, production, and delivery of products and services to satisfy customer needs. It equips students with the essential tools and strategies to use resources efficiently, make desirable trade-offs, and strategically redesign or restructure operations. OTM majors distinguish themselves by strong analytical and problem-solving capabilities together with the ability to provide high-level managerial insights into value-based service and production management.

Built on a solid foundation of a business and information technology (IT) curriculum, the major in Information Systems delivers a unique blend of business acumen, industry standards, and practical computing instruction. Students enjoy successful placement and satisfying careers because they possess both the in-depth knowledge of business processes and the ability to readily translate business requirements into value-added IT solutions. The curriculum is designed to prepare effective leaders in the design, development, and management of information systems—the lifeblood of a successful business model. Students learn how to use computer technologies to analyze business problems and processes in order to design and implement computer-based information systems which support business operations, decision-making, and planning. Career opportunities exist in management consulting and in industry in the areas of systems development, database administration, network management and as corporate information systems managers.

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. Supply Chain Management majors learn how to develop appropriate strategies through exploration of logistics, routes to market, analytics, sourcing, and IT systems. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

CAREERS

Information systems professionals help clients address some of their most complex business problems through the effective use of technology. They see pathways to solutions of highly complex technical issues and are key leaders in conceptualizing and sourcing the best solutions. Information systems professionals collect, store, and analyze information and data to assist organizations and departments in executing business initiatives and making informed decisions. In addition, they use hardware, software, technology infrastructure combined with input from internal or external clients to develop tools to solve and track business objectives.

For more information about careers in information systems, please visit our Undergraduate Info Systems website (<https://business.wisc.edu/undergraduate/majors/information-systems/>).

UNIVERSITY DEGREE REQUIREMENTS

- | | |
|--------------|---|
| Total Degree | To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. |
|--------------|---|

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand how to analyze and evaluate business processes combined with a capability for improving those processes.
2. Understand how the effects of increased utilization and variability impact process capacity and flow times, and will be able to suggest approaches to improve system performance.
3. Build analytical models to solve business problems.
4. Articulate the commonalities and differences between service and manufacturing processes, and be able to manage and make improvements within either context.
5. Analyze and implement operational business decisions from both strategic and tactical perspectives.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

All products and services, from cars to surgeries to consulting, are delivered by organized systems. It is the job of operations managers to make sure those activities occur when they are needed, in the right way, with the right quality, and in the right quantity. Operations management designs and oversees the transformation of inputs, such as labor, equipment, facilities, materials, energy, and information, into goods and services for customers. To make this all happen, the operations function is responsible for critical activities such as process design, resource planning, scheduling, and quality management.

Common Career Paths Process Analysis and Improvement

A process or improvement analyst can serve many roles in an organization. Overall, they facilitate process workflow modeling in order to collaborate on process improvements. They create process documentation and workflows as well as knowledge articles and self-service guidance. A process or improvement analyst may review information and trends at a company to ensure that they are achieving the desired results and that the services are meeting the agreed upon services. They identify issues and risks, as well as bring inconsistencies and problems to the attention of management and then participate in problem resolution. They extract reports and provide a high-level analysis of data for review. They also understand policies and procedures and their impact on workflow.

Project Management

Project managers are responsible for client engagements from the planning phase through implementation and delivery. Project management involves determining the scope of client engagements, allocating resources to implementation teams, and determining effective approaches to work completion. Those working in this area must be able to meet deadlines and to interact extensively with clients, developers, and external departments. A project manager may also be required to design performance and expense comparisons. Above all else, project management is concerned with ensuring accuracy and quality of client deliverables.

Planning and Analytics

Planning and analytics is the forward-looking process of coordinating assets to optimize delivery of goods, services, and information from supplier to customer, balancing supply and demand. Planning is necessary at just about every stage in the supply chain. Different planning roles include supply chain planner, demand planner, and inventory planner.

Management Consulting – Specialist

Both large and boutique consulting firms hire talent to focus on specific practice areas or industries (i.e., specialists). These firms and their employees provide deep expertise on a particular topic area or industry for their clients. These niche areas require a higher level of expertise and personnel in these areas are usually referred to as SMEs (Subject Matter Experts). Consultants in this pathway have a more focused and specialized

path, while still serving a variety of clients. There are many boutique firms that only consult in one of these specialties.

Operations and Process:

Support clients and provide guidance around increasing efficiencies across the entire value chain. This can include cost reduction, operational improvements, optimization of technology or processes, and more.

Supply Chain:

Work on the value delivery chain that encompasses suppliers all the way to customer delivery of the intended products/services. Supply chain management consultants traditionally work on the improvement of some portion of this value chain such as logistics of in-bound freight, or reduction in working capital (inventory) as examples.

General Management

Experience working within the operations function of an organization is excellent preparation for managerial roles within the business from product or process manager through facilities manager through C-level roles such as COO or CEO. This is true in companies that provide services to their customers as well as in firms that make products for their customers. Today's businesses favor leaders with operations experience.

Please visit our website (<https://business.wisc.edu/undergraduate/majors/operations-technology-management/>) for further details about potential career areas and responsibilities.

More information on Career Pathways (<https://business.wisc.edu/undergraduate/careers/pathways/>).

Accreditation status: Accredited. Next accreditation review: 2026–2027.

BUSINESS: SUPPLY CHAIN MANAGEMENT, BBA

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. SCM is a cross-functional discipline involving many components of business including product development, marketing, demand/supply planning, sourcing, production, inventory, logistics, customer service, and the relationships between businesses and their channels of distribution. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers. As a result, SCM is a critical, strategic component of business, and students with SCM education and expertise are in high demand in the marketplace.

The supply chain management major is open to all undergraduate students enrolled in the School of Business and is administered by the Grainger Center for Supply Chain Management at the School of Business. Students will have the opportunity to interact with business leaders, participate in experiential learning and social activities, have access to a global trip/

experience, and be eligible for scholarship opportunities from the Grainger Center.

It is important to appreciate SCM from both the theoretical and applied perspectives. Students declared in the supply chain management major will have the opportunity to participate in a large number of speaker events, site visits, and employer networking opportunities. Additionally, students will be eligible to participate in annual global trip opportunities led by the Grainger Center for Supply Chain Management. These trips allow for the exploration of SCM in new and different locations throughout the world.

For questions or additional information about the major in supply chain management, please visit the Grainger Center (<https://business.wisc.edu/centers/grainger/>) (3450 Grainger Hall).

HOW TO GET IN

HOW TO GET IN CURRENT UW-MADISON STUDENTS

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://admissions.wsb.wisc.edu/BbaPreBusiness (https://admissions.wsb.wisc.edu/BbaPreBusiness/))

Courses required to get in	Students are required to complete each of the 4 requirements below. Requirements can be completed via coursework, test credit, transfer work, or placement exam (if applicable).
	<p>Communication A</p> <ul style="list-style-type: none"> • ENGL&#160;100 • COM&#160;ARTS&#160;100 • ESL&#160;118 • LSC&#160;100 <p>Quantitative Reasoning A</p> <ul style="list-style-type: none"> • MATH&#160;112 • MATH&#160;114 • MATH&#160;171 • COMP&#160;SCI/ &#8203;L&#160;I&#160;S&#160;&#160;102 <p>Economics</p> <ul style="list-style-type: none"> • ECON&#160;101 • ECON&#160;111 <p>Human Behavior</p> <ul style="list-style-type: none"> • PSYCH&#160;202 • SOC/ &#8203;C&E&#160;SOC&#160;&#160;211 • ANTHRO&#160;104 • GEN&WS&#160;102 • HDF&#160;263

To apply for a summer start	This program does not accept applications to start in the summer.	

PROSPECTIVE FIRST-YEAR APPLICANTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Prospective high school students may be considered for direct admission to Business based on their application to the University of Wisconsin–Madison. Simply list a Business interest as your top academic area of interest on the University application.

PROSPECTIVE TRANSFER APPLICANTS

Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin–Madison and the School of Business during the spring term for fall enrollment. Information for prospective transfer students can be found here: <https://business.wisc.edu/undergraduate/admissions/transfer-students/>.

ADDITIONAL INFORMATION

Students declared in Business: Supply Chain Management cannot earn the Summer Certificate in Business Fundamentals, Certificate in Business, or the Certificate in Entrepreneurship due to curriculum overlap.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) program combines UW–Madison’s general liberal education requirements, broad coverage of core business disciplines, and cutting-edge signature courses to create a strong academic foundation upon which students delve deeply into their majors.

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

Additional Advising Information for Supply Chain Students

Students are offered a variety of applied learning events, site visits, a Supply Chain Management career fair, as well as a global experience trip. These activities enhance classroom learning and allow students to gain hands-on knowledge about the industry.

In addition to the advising offered through the School of Business, Supply Chain Management students are also offered degree-specific career and academic coaching from the Grainger Center's Assistant Director. It's encouraged that students connect with the Assistant Director every semester, as well as participate in the many events that the Center offers each year.

CAREERS

Students enrolled in the supply chain management major have access to excellent internship opportunities and earn some of the highest salaries at the School of Business. The average full-time salary for members of the graduating class of 2023 with a supply chain management degree was approximately \$73,500, while the average monthly internship salary was \$3,934.

Some of the companies that recruit students with a specialization in supply chain management include (but are not limited to):

- 3M
- Amazon
- Baker Tilly
- BCG
- BP Americas
- Cargill
- Deloitte
- Ford
- Georgia-Pacific
- Kohler
- Kohl's Department Stores
- Macy's

- Medtronic

REAL ESTATE AND URBAN LAND ECONOMICS

The primary goal of the undergraduate real estate (<https://business.wisc.edu/undergraduate/majors/real-estate/>) major is to comprehensively underwrite commercial real estate, which is broad-based and follows the education thought leadership of James A. Graaskamp, who expressed that "Real estate should be taught as a process of dynamic interactions rather than functional and historical facts." Underwriting commercial real estate includes the analysis of all property types and the development of residential communities while assessing and managing risk in all aspects of real estate relative to finance, development, valuation, and market analysis. To effectively underwrite commercial real estate, students must be able to identify and synthesize technical or basic skills, conceptual knowledge, critical thinking skills, and understand the real estate landscape to make informed and thoughtful property decisions. Graduates of the real estate major secure employment in a wide range of positions and responsibilities, including real estate private equity investment, commercial real estate lending and valuation, and real estate development, among many other areas including asset/property management and investment sales and brokerage.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
-----------	---

Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
-----------------	--

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Assemble and analyze market, linkage, and economic data to make prudent investment decisions.
2. Identify debt and equity capital sources that meet investor risk/return parameters for development, acquisitions, debt and value-add investment opportunities.
3. Responsibly and ethically consider investor, tenant, community, and municipal needs in the development process.
4. Create value in the built environment through developments that are built to scale, affordable, and sustainable.
5. Communicate the merits of real estate projects to investors, community stakeholders, and municipal/publicly elected officials.
6. Provide a network of professionals with cutting-edge perspectives and employment opportunities.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This is a **sample** four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major,

they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Real estate as a career encompasses a wide range of activities—from development and construction to financing; from brokerage and leasing to property management; from appraisal and assessment to insurance and regulation; from research to urban planning, government affairs, and more. Job responsibilities vary by function and can be office-based or in the field. Qualifications also vary from licensing and certification to advanced degrees.

Please visit our website (<https://business.wisc.edu/undergraduate/majors/real-estate/>) to learn more about careers in real estate.

More information on Career Pathways (<https://business.wisc.edu/undergraduate/careers/pathways/>).

ACCREDITATION

ACCREDITATION

AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

RISK AND INSURANCE

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. While it is not required for students to sit for actuarial exams, more than 90% of our students pass at least two professional exams before they graduate.

The major in risk management and insurance prepares students to identify, analyze, and manage risks that are inherent in the operation of profit and not-for-profit institutions. Besides professional careers

in risk management, the major cultivates skills required for challenging opportunities in organizations that accept these risks—private and governmental insurers, as well as brokerage/agency and consulting organizations.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Business: Actuarial Science, BBA (p. 1483)
- Business: Risk Management and Insurance, BBA (p. 1487)
- Risk Management and Insurance, Certificate (p. 1490)

BUSINESS: ACTUARIAL SCIENCE, BBA

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The Actuarial Science (<https://business.wisc.edu/undergraduate/majors/actuarial-science/>) major curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. Some of our actuarial courses allow students to earn credit for their professional exams by earning a minimum score in those courses (without taking the professional exam). While it is not required for students to sit for actuarial exams, more than 90% of our students will sit for at least two professional exams before they graduate.

MISSION

The actuarial science program distinguishes itself through leadership, innovation, community, connections, networks, and recognition of the quality of the faculty, the courses, and the students.

GPA requirements to get in Minimum 3.0 UW-Madison GPA.

Credits required to get in

- If you started at UW-Madison as a first-year student, 24 credits completed/in-progress at UW-Madison are required for application.
- If you started at UW-Madison as a transfer student, 12 completed/in-progress at UW-Madison are required for application.
- In-progress course credits towards this minimum must be completed at the end of the spring application term.

Other

- Pre-Business 101 workshop required during the intended application year.
- Pre-Business applicants may apply once within their first four terms (Fall/Spring) at UW-Madison, based on enrollment date. There is no credit maximum.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	Mid March	On or before July 1st.
To apply for a spring start	This program does not accept applications to start in the spring.	
To apply for a summer start	This program does not accept applications to start in the summer.	

PROSPECTIVE FIRST-YEAR APPLICANTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Prospective high school students may be considered for direct admission to Business based on their application to the University of Wisconsin–Madison. Simply list a Business interest as your top academic area of interest on the University application.

PROSPECTIVE TRANSFER APPLICANTS

Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin–Madison and the School of Business during the spring term for fall enrollment. Information for prospective transfer students can be found here: <https://business.wisc.edu/undergraduate/admissions/transfer-students/>.

ADDITIONAL INFORMATION

Students declared in Business: Actuarial Science cannot earn the Summer Certificate in Business Fundamentals, Certificate in Business, or the Certificate in Entrepreneurship due to curriculum overlap.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF BUSINESS REQUIREMENTS

The Wisconsin Bachelor of Business Administration (BBA) program combines UW–Madison’s general liberal education requirements, broad coverage of core business disciplines, and cutting-edge signature courses to create a strong academic foundation upon which students delve deeply into their majors.

Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Recognize and explain the concept of risk, and apply the knowledge to the development of insurance products that are used to manage risk for the consumer as well as the risk of those products on the insurance organization.
2. Describe the actuarial profession, including the major professional organizations, the professional obligations of being an actuary, and the requirements to obtain and maintain a professional actuarial designation.
3. Demonstrate skills in critical thinking, quantitative analysis, and communication, as well as to develop an appreciation for actuarial theory, research, and the link to practical application.

4. Demonstrate the soft skills of being a professional.
5. Communicate their experiences and inspire others across the WSOB learning community.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

Actuarial program faculty offer advising nights every fall semester to help students plan their course sequencing and professional exams.

CAREERS

Actuaries are problem solvers with expertise in understanding and managing financial risk. They use historical information and models to help predict the future. Actuaries may specialize in life and health (risk of illness, disability or death), pensions (develop and analyze retirement programs) or property and casualty (personal property risks and risks associated with businesses).

Some of our actuarial students utilize the analytical and technical skills they learn in the actuarial program and apply those skills to pursue data analytics or data science as a career. They may do this in the risk and

insurance industry or in any industry that has the need to analyze, project and make decisions from large amounts of data.

Find out more about common industries and essential skills needed to be an actuary on the Undergraduate Actuarial Science website (<https://business.wisc.edu/undergraduate/majors/actuarial-science/>).

More information on Career Pathways (<https://business.wisc.edu/undergraduate/careers/pathways/>).

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

There are several exams and credentials from the Casualty Actuarial Society (<http://www.casact.org/>) and the Society of Actuaries (<https://www.soa.org>) that we prepare students to obtain during their undergraduate career. Students are encouraged to pass at least two actuarial exams before graduation in order to obtain an internship and/or job.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

Auditing, M H R 640 Creative Destruction Lab I, or M H R 641 Creative Destruction Lab II.

ADVISING AND CAREERS

ADVISING AND CAREERS
ADVISING

Advising is an integral part of any student’s educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing, and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

Assigned Academic and Career Coaches
Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

Accessing Advising
Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our Academic Advising page (<https://business.wisc.edu/undergraduate/academic-advising/>).

For more information on accessing career coaching, please see our Career Coaching page (<https://business.wisc.edu/undergraduate/careers/>).

CAREERS

Risk professionals identify, develop, and analyze solutions to manage risk (financial, credit, operational, etc.) at both the organizational and consumer level. Effective risk management encompasses all divisions of an organization, allowing the organization to grow safely and to be more resilient. Insurance is a key solution for managing risk and is deployed by risk professionals working as brokers, underwriters, claims adjusters, product developers, and a host of other potential insurance careers.

To learn more about careers in risk management and insurance, please visit the BBA RMI website (<https://business.wisc.edu/undergraduate/majors/risk-management-insurance/>).

More information on Career Pathways (<https://business.wisc.edu/undergraduate/careers/pathways/>).

ACCREDITATION

ACCREDITATION

AACSB International–The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Accreditation status: Accredited. Next accreditation review: 2026–2027.

RISK MANAGEMENT AND INSURANCE, CERTIFICATE

The undergraduate Risk Management and Insurance (RMI) certificate offers non-business undergraduates a focused pathway to develop expertise in identifying, assessing, and mitigating risks across industries. This 12-credit program provides a flexible curriculum to complement students' primary fields of study outside of business. Whether exploring new career paths in risk management, brokerage, or insurance, graduates emerge well-equipped to navigate the complexities of today's risk landscape. With an emphasis on practical skills and industry relevance, the RMI certificate prepares students for success in a variety of professional roles, contributing to both their personal growth and the broader workforce demands of the risk management industry.

HOW TO GET IN

HOW TO GET IN

The certificate is open to undergraduates declared in a major outside of the School of Business who are in good academic standing. Students declared in a major in the School of Business are not eligible for the certificate. To declare the certificate, go to the Academic Forms (<https://business.wisc.edu/undergraduate/academic-advising/#forms/>) page and complete the Business Major and Certificate Declaration form.

REQUIREMENTS

REQUIREMENTS

A minimum 2.5 GPA must be earned on all coursework applied to meet the requirements of the certificate program. All certificate credits must be earned in residence at UW-Madison.

Code	Title	Credits
R M I 300	Principles of Risk Management	3
Choose one of the following:		3
R M I 640	Management of Insurance Enterprise	
R M I 645	Commercial Insurance	
R M I 655	Risk Financing Techniques	
R M I 660	Risk Analytics and Behavioral Science	

Six additional credits of R M I coursework numbered 600-699

6

Total Credits

12

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Integrate a holistic risk management process (framework) across all dimensions of an organization, implementing risk management decisions that add value.
2. Apply fundamental insurance principles that support economic development through insurance markets.
3. Identify decision-making challenges, and use appropriate statistical techniques and data analysis to support risk management decisions.
4. Demonstrate strong critical thinking skills in emerging areas or risk as observed through their ability to debate various positions, ask skeptical questions, and probe underlying assumptions.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students who have declared the Certificate in Risk Management and Insurance will be assigned to the School of Business Certificate Advising Committee.

SCHOOL OF EDUCATION

The School of Education at UW-Madison is consistently ranked as one of the finest schools of education in the United States, and among the best in the world. The school embraces fields of study that define the human experience: education to challenge minds, health to improve lives, and the arts to inspire creative spirits. World-class research is conducted to drive conversation forward. The school prepares students in a variety of disciplines and for a range of professional roles, including artist, teacher, and therapist.

Approximately 2,200 undergraduates are enrolled each year in the School of Education. While many students are pursuing teacher certification, a significant number are completing programs in the performing and visual arts, human movement, and human services.

The School of Education offers a broad array of undergraduate programs that reflect the wide range of disciplines housed in the school. Although undergraduate majors are not offered in all departments, all ten departments do offer courses to undergraduate students. The school's departments include:

- Art (<https://art.wisc.edu/>)
- Counseling Psychology (<http://counselingpsych.education.wisc.edu/>)

- Curriculum and Instruction (<https://ci.education.wisc.edu/>)
- Dance (<https://dance.wisc.edu/>)
- Educational Leadership and Policy Analysis (<http://elpa.education.wisc.edu/>)
- Educational Policy Studies (<https://eps.education.wisc.edu/>)
- Educational Psychology (<https://edpsych.education.wisc.edu/>)
- Kinesiology (<https://kinesiology.education.wisc.edu/>)
- Rehabilitation Psychology and Special Education (<https://rpse.education.wisc.edu/>)
- Theatre and Drama (<https://theatre.wisc.edu/>)

Students find that the School of Education is their academic and administrative home—a source of advising, guidance, support, and community. Small class sizes in many pre-professional and professional courses allow students to develop a strong sense of community and to get ample individual attention from professors, instructors, and teaching assistants. Teaching staff are extremely willing to get to know their students and work with them to meet their goals. School of Education courses also provide students the chance to get to know their classmates well. Faculty seek committed, creative, and reflective students who are sensitive to differing perspectives.

Students are encouraged to challenge themselves and their initial career choices through volunteer experiences, service learning courses, internships or paid work experiences, and study abroad. The School of Education works to offer a caring, secure, and supportive environment that encourages taking risks, expanding personal boundaries, and developing into a professional.

- Theatre, Certificate (p. 1714)

Students previously enrolled in another UW–Madison school or college will not be readmitted directly into a new, School of Education program. They must apply for reentry to the university with another school or college – usually the school or college in which they were previously enrolled. Once readmitted to the university, students may apply to the School of Education program by following the declaration process for that program. Select the major of interest here (p. 1491), and then look for the How to Get in tab.

All prospective School of Education students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone. To schedule an appointment, email soeacademicervices@education.wisc.edu or call 608-262-1651. Current students can also schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

ENTERING THE SCHOOL

APPLYING TO UW-MADISON

All prospective UW–Madison students must apply through the central campus Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate an interest in a School of Education major on their UW–Madison application will be admitted to the School of Education program or pre-program of choice at the point of admission to the university. Considering more than one School of Education major? It's also possible to declare "undecided in the School of Education" when completing the application.

In addition, students may indicate their interest in a School of Education major when registering for the Student Orientation, Advising, and Registration (SOAR) program.

CURRENT UW-MADISON STUDENTS

Students interested in pursuing a School of Education major should consult the program's declaration criteria, which vary by program area. Select the major of interest here (p. 1491), and then look for the How to Get in tab.

RE-ENTRY STUDENTS

Students previously enrolled at UW–Madison who have not attended for a semester or more must complete a reentry application, as outlined by the UW–Madison Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>). In general, students enrolled in a School of Education program before their absence from UW–Madison will be readmitted to that program, provided they were in good academic standing when they left (i.e., not on probation, strict probation, or dropped by the university). Note: Students seeking readmission to the professional part of their program should be aware of potential qualifications related to their return. See Re-Entry to Campus After an Absence (p. 1494) for details.

Reentry applicants who were dropped by the university are asked to submit supplemental application materials. Instructions for the supplemental application are sent after the student has submitted the online reentry application. If an applicant is not in good academic standing the reentry application will be referred to the Associate Dean for Student Services in the School.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience, (<https://wisconsinexperience.wisc.edu/about/>) combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus.

- Empathy & Humility (<https://wisconsinexperience.wisc.edu/empathy-and-humility/>) – Badgers bring heart – empathy and humility – to everything that we do. It's the very lens of our worldview. We develop and demonstrate a cultural understanding of ourselves and others; we engage locally, nationally, and globally in a respectful and civil manner; and we appreciate and celebrate one another's abilities, views, and accomplishments.
- Relentless Curiosity (<https://wisconsinexperience.wisc.edu/relentless-curiosity/>) – Badgers show relentless curiosity at every step of life's journey. We question things that no one has ever thought to question. We actively learn with expert instructors, scholars, and peers; we engage in creative inquiry, scholarship, and research; we develop resilience; and we foster courage in life and learning.
- Intellectual Confidence (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>) – Badgers fearlessly sift and winnow until we achieve intellectual confidence. At our core, we're learners and teachers. We develop competence, depth, and expertise in a field of study; we integrate ideas and synthesize knowledge across multiple contexts; and we exercise critical thinking and effective communication.
- Purposeful Action (<https://wisconsinexperience.wisc.edu/purposeful-action/>) – Badgers strive to find greater meaning every day through purposeful action. We work for the common good – for something that's bigger than ourselves. We apply knowledge and skills to solve problems; we engage in public

service, partner with others, and contribute to the community; and we lead for positive change.

THE WISCONSIN EXPERIENCE IN THE SCHOOL OF EDUCATION

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Some of the activities are listed below; additional activities are listed under each major.

SERVICE LEARNING AND COMMUNITY SERVICE

- Students in the Physical Education Teacher Education (PETE) (<https://guide.wisc.edu/undergraduate/education/kinesiology/physical-education-bs/>) program partnered with the Boys and Girls Club of Dane County to help kids and their families stay active during the holiday break from school. Working together, they developed games that can be done at home using common household items. A flyer describing the games was included in over 500 Thanksgiving baskets distributed by the Boys and Girls Club last year, and associated videos were made available on their website. Who wouldn't want to play "Reverse Pig Trash Ball?"
- RP & SE 300 Individuals with Disabilities includes a field-based experience where students engage in work that directly or indirectly supports a person with a disability. Hundreds of students each year are placed in a wide variety of placement sites in the Madison area. This experience allows students to gain first-hand knowledge of the contributions of, and services provided to, individuals with disabilities within the community.
- As part of required courses, art education students teach art to children and teens in school and community-based settings in three of the four semesters of the program. Some of our most recent partners include:
 - Monroe Street Arts Center (<https://www.monroestreetarts.org/>)
 - Madison School & Community Recreation (<https://www.msccr.org/programs/after-school-camps/elementary-school/elementary-after-school-programs/>) (MSCR) art clubs
 - The Wisconsin Art Education Association's Youth Art Month and Visual Arts Classic
 - K-12 fieldwork experiences in private schools like Edgewood, Eagle, and Madison Country Day; public schools in rural, suburban, and urban districts; plus public charter and alternative schools like Shabazz High School and Nuestro Mundo Elementary.

STUDY ABROAD

The School of Education sponsors a number of summer study abroad (<https://global.education.wisc.edu/study-abroad/>) opportunities that are led by SoE instructors. These two or three-week courses make it possible to have a study abroad experience and still have time to work or pursue other activities during the summer. Students participated in the following programs in the summer of 2025:

- Education, Diversity, and Community in the Galapagos Islands (Ecuador)
- Dancing Cultures in Greece
- Disability Rights and Access in Australia

- Youth, Language, and Experiential Education in the Dominican Republic
- City as Studio: Drawing in Portugal
- Team Building in Costa Rica
- Crossroads of Culture and Health in New Zealand
- Theatre in London
- Inclusive Physical Activity and Sports in Ireland
- Exploring Cuba Through Art
- Movement as Medicine in Portugal

STUDENT ORGANIZATIONS

- Aspiring Educators of Wisconsin (<https://win.wisc.edu/organization/aspiringeducators/>) is a pre-professional association for those pursuing careers as educators. It provides opportunities to meet other education majors and current teachers, explore cutting-edge issues in education, and interact with the community.
- The Photography Club (<https://win.wisc.edu/organization/photographyclub/>), AIGA Wisconsin UW-Madison (<https://win.wisc.edu/organization/aigauwmadison/>) (graphic design), Mad Gaffers (<https://win.wisc.edu/organization/madgaffers/>) (glassblowing), and Art for Change (activism) are just a few of the available options for art students.
- The Health Promotion/Health Equity Learning Community (HPHE LC) was recently launched with the goal of providing hard-working and dedicated students with support, resources, and opportunities within the Health Promotion and Health Equity field. Provided services include a cohort program, internship pools, tutoring services, and networking events.

RESEARCH AND DEPTH OF STUDY

- Students pursuing health-related studies are encouraged to get involved in research. Students have participated in labs such as the Promotion of Health Equity & Adapted Physical Activity (PHEAPA) (<https://kinesiology.education.wisc.edu/research/pheapa-lab/>) lab or the Pain, Context, and Innovation (<https://www.shinyekim.com/>) lab. Students also participate in programs run through the Wisconsin Area Health Education Centers (AHEC), such as the Community Health Internship Program (<https://ahec.wisc.edu/chip/>).
- A new Honors program for educational policy studies majors will begin in the fall of 2025.
- The Center for Research on Early Childhood Education (<https://crece.wceruw.org/>) created an undergraduate research fellowship program. The program's goal is to diversify the research communities that address early childhood education.
- Many rehabilitation psychology students are currently working with professors and graduate students on research in rehabilitation psychology. Several are leading their own research with faculty support, and many students have presented at the spring Undergraduate Research Symposium.
- Physical education staff and students partnered with experts in the academic technology department to create a smartphone app, "EnCourage." The app provides hundreds of team-building activities for use by teachers, coaches, and anyone trying to develop teamwork with groups. Its development was one of the School of Education Innovation Projects, "Social and Emotional Learning in Physical Education."

- The dance department provides financial awards (<https://dance.wisc.edu/admissions-and-aid/scholarships-and-awards/>) to encourage students to continue their studies, both nationally and internationally, over the summer. For example, full-tuition scholarships are given to dance majors to study in the summer study program at the Dance Education Lab in New York. One award of full tuition and accommodation is given to a freshman dance major to study at the six-week Perry Mansfield pre-professional summer study program. Students have these, and other opportunities, to make professional connections in the field and in the global dance community.
- The theatre and drama department offers an Honors option (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/#requirementstext>) in the major and a named option in Acting (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/theatre-drama-acting-bs/>).
- Undergraduate awards (<https://eps.education.wisc.edu/admissions-and-aid/financial-aid/>) in writing, research, and community-based scholarship are sponsored by the educational policy studies department. One such award is the Eric Flanagan Community-Engaged Scholarship Award.

VOLUNTEER OPPORTUNITIES

- One of the UW's most sought-after volunteer experiences, the kinesiology department's Adapted Fitness program offers fitness training and physical activities to community-based clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the Physical Activity for Diverse Abilities Certificate (<https://guide.wisc.edu/undergraduate/education/kinesiology/promoting-activity-diverse-abilities-certificate/>) receive priority placement for volunteer positions.

INTERNSHIPS AND FIELD PLACEMENTS

- Students earning an undergraduate degree in Rehabilitation Psychology (<https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/rehabilitation-psychology-bse/>) complete at least six credits of internship, selected from a large and diverse number of sites in the community. The goals of the experience include exploring career interests and gaining experience in community agencies serving and advocating for individuals with disabilities.
- Undergraduates in teacher education programs have multiple field experiences in K-12 schools, culminating in a full-time student teaching experience following the semester of the cooperating school.
- Art internships provide real-world experience and can often be completed for university credit through enrollment in ART 393 Internships in Art. Students have interned and conducted research at many businesses, institutions, and on-campus locations, including the Madison Children's Museum, Bayview Center for Arts and Education, ArtWrite Collective, Chazen Museum of Art, Museum of Modern Art, Metropolitan Museum of Art, Monroe Street Arts Center, and the Madison Museum of Contemporary Art.

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS ACADEMIC CONCERNS AND STATUS

Academic Actions and Exceptions

Academic actions and exceptions are used to record a student's progress through the university and to document various administrative and academic situations. Actions can be grouped into two broad categories:

- those that permit exceptions to program requirements and school/university policies *and*
- those that affect a student's standing in the university – e.g., probation or transferring from one program to another.

As the undergraduate dean's office, the School of Education Student Services office is responsible for reviewing, approving, documenting, and sometimes initiating academic actions and exceptions. To be posted to a student's record, exceptions must go through several steps. Exceptions may be initiated either by program faculty/staff or by Student Services staff, who often consult about a specific exception. Once an exception has been approved, it is processed either as an official "Dean's action" or as a DARS exception. Students can find a record of dean's actions on their printed unofficial transcript (also called the student record) or on their DARS report. A DARS exception will be reflected in the individual student's DARS report.

Exceptions to faculty-approved program requirements generally include course substitutions and rarely involve course or program requirement waivers. Exceptions to campus or School policies include permission for adding or dropping a course beyond the deadlines, waiving senior or major residency requirements, extending the deadline for meeting a deficiency or finishing an Incomplete, and permitting students to repeat a course for credit. A request for an exception requires careful consideration from all parties involved. Students should be prepared to explain the reasoning behind a request and offer supporting documentation.

Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate answer to a request during the initial appointment.

Academic Standing: Dean's List, Academic Probation, and May Not Continue

To remain in good academic standing in the School of Education, students must earn both a semester grade point average (GPA) and a cumulative grade point average of at least 2.5. Academic standing is not calculated after the completion of summer coursework. While the 2.5 grade point average may not be sufficient to permit students to be considered for admission to their program of choice, it is the minimum required to remain in the School of Education. This may be substantially higher than minimum grade point average requirements in other schools/colleges on campus.

Dean's List

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic

actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

Probation

A student's grade point average for a particular semester falls below 2.5, while the cumulative campus GPA remains at or above 2.5. Students must earn a minimum 2.5 grade point average on the next semester's coursework to be removed from probation status.

Strict Probation

Strict Probation occurs when either (1) a student's cumulative GPA falls below a 2.5 OR (2) a student already on probation earns less than a 2.5 grade point average for the subsequent semester. To be in good academic standing, students on strict probation must earn both a 2.5 GPA on the next semester's coursework and also have a cumulative GPA of 2.5 by the end of the next semester. Students on Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with an advisor in the School of Education Student Services office.

Continued Strict Probation

A student already on strict probation obtained a 2.5 GPA or above on the next semester's coursework, but the cumulative GPA is still below 2.5. Once both grade point averages are at or above 2.5, the student will be in good academic standing. Students on Continued Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with a Student Services advisor.

May Not Continue in the School of Education

Students on strict probation or continued strict probation who earn less than a 2.5 GPA on the next semester's work will receive notice that they may not continue in the School of Education. Students on May Not Continue status who do not seek or are not granted permission to continue may be withdrawn from the university and dropped from courses ("disenrolled"). Students are expected to contact the School of Education Student Services office immediately, to discuss options, including transfer to another school or college on campus, transfer to another university, or withdrawal from UW-Madison.

Continuation Requirement: Department of Kinesiology

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus coursework. A student whose GPA falls below 2.75 will be placed on probation for the following semester. If the GPA remains below a 2.75 at the end of the probationary semester, the student will receive a discontinuation letter indicating that they must transfer out of the Department of Kinesiology. A hold will be placed on the student's registration for the second semester following the probationary semester until the transfer is complete. Students in this situation must transfer to another School of Education program, another UW-Madison school/college, to another institution altogether, or must withdraw from the university.

If a student wishes to appeal being discontinued in the department, it must be done in writing to the Chair of the Undergraduate Studies Committee within 30 days of the date of the notification letter. The Undergraduate Studies Committee may request that the student

appear in person at an Undergraduate Studies Committee meeting to present the case.

If a negative decision is reached by the Undergraduate Studies Committee, a student may choose to appeal in writing to the Department of Kinesiology Student Affairs Committee within 30 days of the date of the notification.

If a negative decision is reached by the Department's Student Affairs Committee, a student may choose to appeal in writing to the Chair of the Department of Kinesiology within 30 days of the date of the notification.

If a negative decision is reached by the Chair of the Department of Kinesiology, a student may choose to follow the School of Education Grievance Policy.

In the event of a positive decision at any level, the student will be allowed to continue for one semester in order to raise the GPA to 2.75 or higher. A 2.5 cumulative GPA is required to graduate from the Department of Kinesiology.

Grievance Policy in the School of Education School of Education Grievance Policy and Procedures

The following School of Education Student Grievance Policy and associated procedures are designed for use in response to individual student grievances regarding faculty or staff in the School of Education.

Any individual student who feels they have been treated unfairly by a School of Education faculty or staff member has the right to file a grievance about the treatment and receive a timely response addressing their concerns. Any student, undergraduate or graduate, may use these grievance procedures, except employees whose complaints are covered under other campus policies. The grievance may concern classroom treatment, mentoring or advising, program admission or continuation, course grades (study abroad grade complaints are handled through International Academic Programs (<https://studyabroad.wisc.edu/>)), or issues not covered by other campus policies or grievance procedures.

For grievances regarding discrimination based on protected bases (<https://compliance.wisc.edu/eo-complaint/>) (i.e., race, color, national origin, sex, disability, age, etc.), contact the Office of Compliance (<https://compliance.wisc.edu/eo-complaint/>).

For grievances or concerns regarding sexual harassment or sexual violence (including sexual assault, dating/domestic violence, stalking, and sexual exploitation), contact the Sexual Misconduct Resource and Response Program (<https://compliance.wisc.edu/titleix/>) within the Office of Compliance.

For grievances that involve the behavior of a student, contact the Office of Student Conduct and Community Standards in the Dean of Students Office at <https://conduct.students.wisc.edu/>.

For grievances about, or directed at, faculty or staff in a School of Education department, unit, or program, students should follow these steps:

1. Students are strongly encouraged to first talk with the person against whom the concern is directed. Many issues can be settled informally at this level. If students are unable to resolve concerns directly or without additional support, step 2 or 3 should be pursued.
2. If unresolved after taking or considering step 1:

- a. If the concern is directed against a teaching assistant (TA), and the student is not satisfied, the student should contact the TA's supervisor, who is usually the course professor. The course professor will attempt to resolve the concern informally.
- b. If the concern involves a non-TA instructor, staff member, professor, academic department, or School of Education office or unit, the student should contact the chair of the department or the director of the office or unit, or their designee. The chair or director, or their designee, will attempt to resolve the concern informally. If the concern is about the department chair or office/unit director, the student should consult the School of Education Senior Associate Dean for guidance.
3. If the concern remains unresolved after step 2, the student may submit a formal grievance to the chair or director in writing within 30 business days¹ of the alleged unfair treatment. To the fullest extent possible, a formal written grievance shall contain a clear and concise statement of the issue(s) involved and the relief sought.
4. On receipt of a written grievance, the chair or director will notify the person at whom the grievance is directed with a copy of the written grievance. The person at whom the complaint is directed may submit a written response, which would be shared with the student.
5. On receipt of a written grievance, the chair or director will refer the matter to a department, office, or unit committee comprised of at least two members. The committee may be an existing committee or one constituted for this purpose. The committee, or delegates from the committee, may meet with the parties involved and/or review any material either party shares with the committee.
6. The committee will provide a written description of the facts of the grievance and communicate recommendations to the department chair or office/unit head regarding how the grievance should be handled.
7. The chair or director will offer to meet with the student who made the grievance and also will provide a written decision to the student, including a description of any related action taken by the committee, within 30 business days of receiving the formal grievance.

¹ For the purpose of this policy, business days refers to those days when the University Offices are open and shall not include weekends, university holidays, spring recess, or the period from the last day of exams of fall semester instruction to the first day of spring semester instruction. All time limits may be modified by mutual consent of the parties involved.

If the grievance concerns an undergraduate course grade, the decision of the department chair after reviewing the committee's recommendations is final.

Other types of grievances may be appealed using the following procedures:

1. Both the student who filed the grievance or the person at whom the grievance was directed, if unsatisfied with the decision of the department, office or unit, have five (5) business days from receipt of the decision to contact the Senior Associate Dean, indicating the intention to appeal.

2. A written appeal must be filed with the Senior Associate Dean within 10 business days of the time the appealing party was notified of the initial resolution of the complaint.
3. On receipt of a written appeal, the Senior Associate Dean will convene a sub-committee of the School of Education's Academic Planning Council. This subcommittee may ask for additional information from the parties involved and/or may hold a meeting at which both parties will be asked to speak separately (i.e., not in the room at the same time).
4. The subcommittee will then make a written recommendation to the Dean of the School of Education, or their designee, who will render a decision. The dean or designee's written decision shall be made within 30 business days from the date when the written appeal was filed with the Senior Associate Dean. For undergraduate students, the dean or designee's decision is final.

Further appealing a School of Education decision – *graduate students only*

Graduate students have the option to appeal decisions by the School of Education dean or designee by using the process detailed on the Graduate School's website (<https://grad.wisc.edu/documents/grievances-and-appeals/>).

Questions about these procedures can be directed to the School of Education Dean's Office, 377 Education Building, 1000 Bascom Mall, 608-262-1763.

Part-Time Enrollment Status

Students who choose part-time enrollment status or who anticipate falling below full-time enrollment status due to dropping a course should consult with an advisor in the School of Education Student Services office. Part-time enrollment may have important implications for any number of issues, including health insurance coverage or financial aid. It is especially important that athletes and international students consult with Student Services advisors and other advisors if considering part-time enrollment. Students who drop below 12 credits need not leave university housing.

Re-entry to Campus after an Absence

Students wishing to reenter UW–Madison after an absence of a semester or more must file a reentry application form. This form is available from the UW–Madison Office of Admissions and Recruitment (<https://admissions.wisc.edu/apply-as-a-reentry-student/>). If an applicant is not in good academic standing, the reentry application will be referred to the associate dean.

Students admitted to the professional part of a program may leave UW–Madison for a maximum of two consecutive semesters (excluding summer sessions) and be eligible to reenter directly into the program. Students in this situation are not guaranteed immediate placement in a practicum or student teaching placement upon reentry, and graduation may be delayed because of prior commitments to continuing students. Students who leave the program for more than two consecutive semesters (excluding summer sessions) may be considered for readmission only on an individual basis. Lack of space in a program may preclude readmission directly into a program for any future semester. Given the individual circumstances, a student may be required to reapply to the program altogether.

The general policy above may be modified by any particular program so that the conditions of reentry match the structure of the professional program. Some programs require that students obtain prior approval to interrupt the program sequence. All students intending to be absent should leave with a firm understanding of the conditions guiding their reentry into their professional program. Consult with the appropriate faculty advisor and with the School of Education Student Services office.

Residency (Major & Senior) Requirements

Major Residency

Students must complete at UW–Madison at least 15 credits in upper-level courses in the major. Some programs, e.g., Art, require more credits to meet major residency requirements. Upper-level courses are generally defined as those numbered 300 and above, but this varies by program area. Retroactive credits and credits granted by examination do not count toward the residency requirement.

Senior Residency

Seniors in the School of Education must complete the last 30 credits in residence. Special permission to take a portion of senior work either at another institution or by correspondence (via UW Extension) must be obtained in advance from the School of Education Student Services office. Coursework taken as part of a UW–Madison-sponsored study abroad program does not count against senior residency. Students should discuss senior residency

issues with their Student Services advisor. Retroactive credits and credits granted by examination do not count toward the residency requirement.

Excess Cumulative Credits and Satisfactory Progress

Excess Cumulative Credits

Wisconsin resident undergraduates who have accumulated more than 165 completed credits will be assessed a 100% tuition surcharge on credits over 165, as required by the University of Wisconsin–Madison. This policy was effective beginning Spring 2021. See Excess Cumulative Credits (<https://kb.wisc.edu/apir/110093/>) on Academic Planning and Institutional Research's KnowledgeBase page for more information about this policy and the criteria used in counting cumulative, completed credits. Note: Students who have already been awarded a Bachelor's degree from any accredited institution are exempt from the tuition surcharge. Special students are also exempt.

Satisfactory Progress: Second Degree Candidates and Education Special (non-degree-seeking) Students

The School of Education is enriched by admitting students with a previous degree to our programs. We welcome these students and encourage them to apply to the School. At the same time, admission as a second-degree or Education Special (designated EDS or EDCS) student is a privilege granted by the School of Education. Second-degree and Education Special students are expected to make the same timely progress toward program completion as initial-degree students.

To ensure satisfactory progress, second-degree and Education Special students who are identified to have met any one of the criteria below will be required to confer with her/his program coordinator and the undergraduate academic dean for purposes of developing a formal plan for program completion:

- Student has earned over 200 total credits.
- Student enrolled for two consecutive semesters without completing requirements for the professional program to which the student was initially admitted.
- Student withdrew from classes for two consecutive semesters.
- Student failed to enroll in a required course when it was available, particularly those that are intermittently offered.
- Student engages in other course selection patterns that result in his/her failing to make progress toward completion of the initial program.

Students who do not meet the terms of the plan for program completion may be restricted to enrollment in specific courses or departments, prevented from enrolling entirely, or withdrawn from classes by the academic undergraduate dean after consultation with program faculty. Students may appeal the terms of the plan or any of the dean's actions above under the provisions of the School of Education Grievance Policy.

Withdrawing from UW–Madison

Students wishing to withdraw from the semester in progress must do so through a formal process after reviewing the university policy on Withdrawals (<https://registrar.wisc.edu/withdraw/>), including the Medical Withdrawal (<https://registrar.wisc.edu/medical-withdrawal/>). Requests after the first day of the semester and prior to the deadline can be

initiated through the Student Center in MyUW. Instructions can be found on this KB page (<https://kb.wisc.edu/25601/>).

Withdrawing after the deadline (<https://registrar.wisc.edu/dates/>) requires permission from the School of Education Student Services office. Students must meet with the designated staff member to discuss withdrawal details, supports, and future plans. Students may be asked to provide a written justification for the request and supply medical or other documentation. The decision will be provided via email.

COURSES AND COURSE ENROLLMENT

Attendance Policies

Faculty and instructors may require students to attend scheduled meetings of a class and/or to participate in other course-related activities, including distance activities. Students are responsible for materials presented in such meetings or activities. Because courses are designed and conducted in diverse ways, faculty and instructors are expected to inform students in writing at the beginning of each course if there are specific expectations for attendance/participation, including whether any component of the grade is based on such attendance/participation.

Auditing a Course

A student may audit a course only if the instructor consents and if no laboratory or performance skills are required. (The second restriction usually prevents students from auditing Dance or Art courses.) Auditors do not participate in classroom discussions or take examinations but are expected to attend with reasonable regularity and do some assigned work.

Audited courses carry no degree credits, are not graded, do not count in determining full-time/part-time load for enrollment certification in an academic term, and do not meet degree requirements for School of Education students. Students interested in auditing a course should confer with their Student Services advisor. The deadline to change a course from credit to audit is the end of the fourth week of classes; no exceptions to this deadline are permitted.

Concurrent Enrollment at Two Institutions

School of Education students may occasionally choose to take courses at another institution – e.g., Madison College or Independent Learning through UW Extension – while being a fully enrolled student on the UW–Madison campus. Full-time or part-time student status is usually determined by the credits taken at UW–Madison only; thus, students who take only nine credits on campus and three credits at another institution may not be considered full-time students.

Credit Overload Permission

Students may carry a maximum of 18 credits per semester without the special permission of an academic dean. School of Education undergraduates wishing to take over 18 credits should complete the Credit Overload Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnbp/). Students must be in excellent academic standing to be considered for a credit overload, usually a 3.0 cumulative GPA on the UW–Madison campus.

Please note that additional fees are assessed for credit overloads on a per-credit basis.

During summer sessions, students may, as a rule, carry one credit per week of instruction unless special permission is given. The maximum

credit load for Education students for the entire summer session is 12. Session-specific limits follow the rule of one credit per week of instruction, except nine credits are allowed in the Eight-Week General Session. Students must obtain permission from an academic dean to carry an overload in any of the summer sessions; start this process by completing the Credit Overload Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnbp/).

Directed/Independent Study

Directed Study, also called Independent Study, offers the student an opportunity to work with a School of Education faculty member on an individual topic of interest. Most School of Education departments make directed study courses available to students on the basis of the student's preparation and motivation and a faculty member's willingness to accept the student in such an endeavor. Directed Study courses are generally numbered 199, 299, 399, and 699.

This study option is intended primarily for advanced students who have a depth of knowledge in a field, the self-discipline necessary for independent work, and strong motivation to pursue a special project. Some program areas limit the number of Directed Study credits that can be applied to major or minor requirements.

Directed Study is taken as a supplement to, but not as a replacement for, available course offerings. In this way, it may be used to expand areas of particularly strong interest. Extra responsibility is required from the faculty member involved, and no member of the faculty is obligated to accept a proposal for a directed study project. Students should have a well-defined outline of the topic to be studied before discussing the project with a faculty member.

Both the student and instructor must follow UW–Madison's Policy on Directed/Independent Study for Undergraduates (<https://kb.wisc.edu/page.php?id=36263>). Important components of this document include, but are not limited to:

- The student's responsibility to develop a written study plan, in collaboration and agreement with the instructor, consistent with the responsibilities of the instructor. The study plan will include expectations for learning and student work, the time and place for regular meetings, the number of credits to be earned, and any other issues related to the learning experience.
- Guidelines for assigning the appropriate number of credits to the Directed Study.
- Responsibilities of the Directed Study instructor.
- The approval process for enrolling in a Directed Study after the course add deadline (usually the end of the second week of class in the fall and spring semesters).

Independent Learning Course Enrollment

Students occasionally elect to take an Independent Learning (<https://il.wisconsin.edu/course-catalog/>) course through the University of Wisconsin Extension. Many of the courses offered through Independent Learning (IL) can count toward specific degree requirements and students have an entire year to complete the coursework. Individuals interested in enrolling in an Independent Learning course should note the following important issues:

Course Equivalencies

Independent Learning courses are not automatically transferable as equivalent UW–Madison campus courses – even when the

Independent Learning course carries the same number and title. Use Transferology (<https://www.transferology.com/state/wisconsin.htm>) to ensure that the Independent Learning course is equivalent to the campus required course. Faculty and dean's offices may have some discretion in permitting courses to count for requirements even when they are not coded as exactly equivalent; students should see their Student Services advisor.

Concurrent Enrollment

UW Extension is an entirely separate institution from UW–Madison. Thus, UW–Madison students must have permission from their academic dean to be enrolled concurrently in another higher education institution. Permission for concurrent enrollment is granted routinely for School of Education students through the School of Education Student Services office. Students should go to the Registrar's Office's website for the permission form. The completed form indicates permission for concurrent enrollment and, in some circumstances, provides for a waiver of the tuition for the Independent Learning course (see additional information below). Students should take this form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and meet with an advisor. Send it to Independent Learning after it has been approved at the School of Education Student Services office.

Tuition Waiver

The tuition for an Independent Learning course may be waived with the academic dean's permission, although the student is still responsible for other course enrollment fees. Students are eligible for a tuition waiver if they register for an Independent Learning course during the semester they are concurrently enrolled at UW–Madison. In some cases, students may be allowed to register for Independent Learning classes once they have enrolled in courses for the subsequent semester, linking their Independent Learning registration with the credits for the succeeding semester. Students interested in receiving a tuition waiver must be enrolled full time (at least 12 credits) at UW–Madison, and have no more than 18 credits after adding the Independent Learning course. Students should see their Student Services advisor for additional information on these policies. Complete the form and submit it to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. This stamped form must then be sent to Independent Learning, with a copy remaining at Student Services.

Posting Independent Learning Courses to the UW–Madison Transcript

Independent Learning courses are posted to the campus transcript after staff at the Office of Admissions and Recruitment (<http://admissions.wisc.edu>) receive the original transcript. An official transcript for an Independent Learning course must be submitted to this office.

Timing for Course Completion and Degree Posting

Independent Learning courses require a substantial time commitment. Students should not plan to begin an Independent Learning course only a few weeks before it must be completed! Perhaps even more important, students completing an Independent Learning course to meet degree requirements during their last semester on campus should be aware that the Independent Learning course must be completed prior to the University's official graduation date for that semester. The completion date listed on the UW Extension transcript must be on or before the UW–Madison degree completion date or the student's degree will be awarded after the subsequent semester. For example, if a

student's UW Extension transcript indicates a course completion date of May 25 but the UW–Madison degree completion date is May 23, the student's degree will be posted for the subsequent August graduation date, not for the May graduation day. This could create serious problems for teacher education students hoping to secure a position. For this reason, students completing final degree requirements via Independent Learning should consult carefully with Student Services and Independent Learning staff regarding the timing of their course completion and degree posting.

Late Course Adds or Drops

Course enrollment regulations must be followed when adding and dropping courses. Students are responsible for knowing and complying with the published deadlines; see the Office of the Registrar's website (<https://registrar.wisc.edu/dates/>) for deadlines. Students are expected to check their academic records routinely to minimize the need for late drops based on enrollment errors.

Late Course Add

Students must obtain instructor, departmental, and dean's approval to add a course after the course add deadline. See the Office of the Registrar's website (<https://registrar.wisc.edu/permissions/>) for instructions.

Late Course Drop

After the drop deadline, courses may be dropped only with permission of the School of Education Student Services office. Permission is granted only in unusual circumstances. Late drops may result in unintended consequences in other areas, e.g., financial aid, insurance coverage, and student status (for international students). Requests for backdated drops due to simply missing the campus drop deadlines (<https://registrar.wisc.edu/dates/>) or to remove a "DR" from the student's record will not be honored.

To initiate the late drop process, students are encouraged to meet with an academic advisor to discuss their circumstances. Students must fill out a formal request form (available through Education Student Services (<https://education.wisc.edu/academics/undergrad-majors/academic-policies-and-forms/>)), and meet with the Director of Advising. Students will be required to provide a written justification for the request and may be asked to submit medical or other documentation. The decision will be provided via email.

Repeating Courses

Most courses on the UW–Madison campus may be taken only once for purposes of credit. Some courses may be repeated a limited number of times for credit. Other courses may be repeated an unlimited number of times for credit. When courses are taken more than once, all grades and their associated grade points are included in the cumulative campus grade point average.

Some School of Education professional programs may permit students to retake courses for admission eligibility purposes only. Students should consult Student Services staff with questions regarding repeated courses.

DEGREES, "DOUBLE MAJORS," AND GRADUATION

Additional Major or "Double Major"

School of Education students may be permitted to complete an additional major with their School of Education degree program. Students must be admitted to the professional part of their degree

program to be eligible to add an additional major; pre-professional students cannot add another major.

Education students wishing to complete an additional major in the College of Letters & Science must complete these steps:

1. Contact the department that houses the major of interest. Meet with the undergraduate major advisor there, if appropriate. Complete the Major Declaration form and obtain departmental approval (usually a signature or stamp).
2. Take the form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and ask for a dean's action to permit the additional major. Student Services staff will take the action and send the form to the Registrar's Office. Note: Students in the School of Education should not take the form to the L&S Student Academic Affairs office – even if this is the advice of departmental staff. Requests for an additional major will be rejected by the Registrar's Office for lack of the appropriate dean's approval.

Students will be granted a degree at the end of the fall, spring, or summer semesters in which all School of Education degree requirements are complete. Graduation will **not** be postponed if students have an unfinished additional major or certificate program that is not required for the degree.

Exceptions to the requirements of an additional major or certificate program must be approved by the department and school/college dean's office in which the major or certificate program is located.

Credits-to-Degree

School of Education programs require a minimum of 120 credits in all programs for graduation, although programs may require more. To earn 120 credits in four years (eight semesters), students must average 15 credits per semester. The number of credits carried each semester may depend upon a student's preparation, motivation, course selection, employment, and extracurricular activities.

Degree Audit Reporting System (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options,

research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

Dual Degrees

Students may be permitted to complete two degrees simultaneously. For example, students may complete two degree programs in the School of Education or may choose a degree program in the College of Agricultural and Life Sciences along with their School of Education degree. Not all schools/colleges permit dual degrees – e.g., this is not permitted by the College of Letters & Science or by the College of Engineering. Students should confer with an academic dean regarding the ability and feasibility of completing two degrees programs simultaneously. Students wishing to earn two undergraduate degrees must follow these academic policies:

- If the two degrees to be earned are within the School of Education, at least 30 additional credits and all course and grade point average requirements for the second degree must be completed for the second degree. When the first degree requires 120 credits, a minimum of 150 credits for most majors will be required. The two degree programs must differ sufficiently to permit the total credits to be accumulated. Courses may count toward the fulfillment of both degree programs. Permission to complete two degrees simultaneously requires the academic dean's approval. This approval, and the formal academic action permitting the dual degree work, should be sought as early as possible to ensure that it is feasible to complete both degrees.
- If the two degrees to be earned are from two different schools/colleges (one degree in Education and one degree in another school or college on this campus), the following academic policies shall be followed:
- Permission to complete two degrees simultaneously requires academic dean's approval from both schools/colleges. Students should see their current dean's office for the required paperwork.
- Admission into the other school/college shall be based on the admission criteria for that particular school/college and, when necessary, particular program.
- The two degree programs must differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits.
- The student's program must be reviewed and approved in both colleges before the start of a student's senior year in residence.
- The degree from each college will be awarded simultaneously.
- Exceptions to degree requirements must be taken by staff from the school/college linked to the particular degree.

Grades and Grading System

See Enrollment and Records (p. 36) for detailed information on the campus grading system, including the list of possible grades and their impact on a student's grade point average.

Credit/No Credit Courses

Courses designated as being offered on a Credit/No Credit basis are indicated on the transcript as either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

"F" Grade Policies

If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA. If a grade of F, N (no credit), or U (unsatisfactory) is received in student teaching or in courses within required practica, the course may be repeated only if the faculty adviser, the supervisor of the practicum or student teaching, and the appropriate associate dean gives approval. A third attempt to register in a course under these conditions is not allowed.

Incompletes

A grade of Incomplete may be assigned to a student who, because of illness or another unusual and substantiated cause beyond their control, is unable to complete the coursework.

To be eligible for an Incomplete grade, the student must:

- be earning a passing grade to-date in the course,
- and have a limited amount of work to complete by the end of the term.

For a short summary of the policy, see the Enrollment and Records - Incompletes section of Guide (p. 38).

Pass/Fail Grading

All undergraduate students are eligible to take a course on a pass/fail basis if they request the option prior to the deadline and are in good academic standing at the time of the request. Good academic standing for this purpose means that students have a minimum 2.5 cumulative grade-point average based on UW-Madison coursework. Undergraduates may carry one course on a pass/fail basis per term. (Each year's summer sessions collectively count as a single term.)

Pass/fail can be chosen only for elective courses. Required courses cannot be taken on a pass/fail basis. The School of Education may reject pass/fail requests for non-elective work, but it is the student's responsibility to be sure that the requested course is an elective. Courses taken on a pass/fail basis will not count for non-elective requirements—even if they would normally count toward such requirements.

Students may submit pass/fail requests via their Student Center link from the time that they register until midnight on the Friday at the end of the fourth week of fall and spring semesters. For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed. Students may not cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.

Instructors are not notified when a student elects the pass/fail option (Students can see whether a course is pass/fail in their Student Center). When a course is taken on a pass/fail basis, the instructor reports a letter grade, which is converted by the registrar to an S (satisfactory) or U (unsatisfactory).

The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U shall be recorded by the registrar in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade-point average. A student must earn at least a C to receive credit for the course.

Please note that courses completed on a pass/fail basis do not apply toward Liberal Studies, major, minor, or professional education requirements for graduation. Students planning graduate study should not take courses on a pass/fail basis if these are pre-professional requirements for admission to graduate and/or professional programs. Individuals who are undecided about a major should avoid taking a course on a pass/fail basis that might later become a required course needed to complete a major. Students may wish to consult with an advisor before taking a course on a pass/fail basis.

Six-Weeks (Midterm) Grades

Only first-year students receive midterm, or "six-week" grades. Midterm grades (<https://registrar.wisc.edu/exam-grading/>) for first-year students are prepared at the end of the sixth week of classes and are made available to students in their Student Center in My UW on Monday of the eighth week. An email is sent to all students with six-week grades informing them of their availability in the Student Center.

The midterm grade report provides students with important feedback about course enrollment and performance before the course drop deadline. Students should check their six-week grade report to make sure all courses are listed and grades indicated. An "NW" means that "No Work" has been turned in; students who have been attending the course should contact the instructor immediately. In the case of a course registration problem, students should see their Student Services advisor immediately.

Grades from Transfer Courses

Grades from transfer courses are not posted to the UW-Madison transcript; however, the School of Education uses all attempted transferable coursework to determine program admission eligibility and selection grade point average. Students should be aware that grades earned at another institution will be included in admission calculations. (Courses for which an "F" is earned do not transfer to UW-Madison.) Students should see their School of Education advisor if they have additional questions about this policy.

PROGRAM ADMISSIONS

Last 60 Credit Rule

Two grade point averages will be calculated to determine candidates' eligibility for programs. GPAs will be calculated using:

1. all transferable college-level coursework attempted, *and*
2. the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.)

The use of the last 60 credits does not supersede other eligibility requirements. For example, when a minimum GPA on prerequisite courses is required, or a minimum major GPA is required to be eligible for admission, all required courses will be used in calculating this GPA. This will include courses taken prior to the last 60 credits. A cumulative GPA, however, will still be calculated based on the last 60 college credits attempted.

Currently, retention and graduation GPAs are based on all credits attempted at UW–Madison as an undergraduate student. If each semester's GPA after admission to the program meets the required GPA for retention, the student will be allowed to continue and complete the program.

This policy does not apply to certification programs in Music Education, as the degree is granted from the College of Letters and Science, not the School of Education.

Contact the School of Education Student Services office for additional information regarding the interpretation of this policy.

Students with a Previous Degree

A prospective student who already holds an undergraduate degree is admitted to the School of Education as either an Education Special student or a Second Degree student, depending on the academic area of interest and the individual's previous coursework. The term "Special Student" indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; the student does not receive a second degree for this "certification only" coursework. Second undergraduate degree students are seeking a second degree from the School of Education in an area that is different from the major coursework of the first degree. This degree may or may not include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission.

Special Students

Applicants must file an undergraduate application with the Office of Admissions and Recruitment (<http://admissions.wisc.edu>). Education Special students not yet admitted to a professional program are given an EDS classification, are not eligible for financial aid, and enroll last with the other special students on campus. Candidates seeking Special student status in open enrollment programs must obtain written permission for admission from the relevant program coordinator and must submit a professional program application to the School of Education Student Services office. Candidates seeking admission to a limited enrollment program must meet all admission eligibility requirements for the program and must compete with other eligible candidates for program admission. Applicants admitted to a certification professional program become Education Certification Special students (EDCS classification) to distinguish them from Special students not so admitted. Students with an EDCS classification may be eligible for financial aid. Continuing EDCS students may register with undergraduates having junior status.

Second Degree Candidates

Students who wish to earn a second baccalaureate degree in the School of Education must file an undergraduate application with the Office of Admissions and Recruitment (<http://admissions.wisc.edu>) and must file a professional program application with the School of Education Student Services office. Second-degree students not yet admitted to a professional

program are given a pre-professional classification. Second-degree candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- complete at least 15 upper-level credits in the new major;
- complete at least 30 credits beyond their previous coursework.

The determination of whether a student should be admitted as a second degree candidate or Education Special student is made by the faculty advisor in consultation with Student Services staff after analyzing the student's remaining requirements. The faculty advisor will determine the specific remaining requirements for students admitted to a program. In addition to completing the requirements specific to the program(s) of interest, returning students must also complete any relevant campus-wide requirements, complete the requirements specific to individual program areas such as the Environmental Education requirement, and satisfy any high school deficiencies identified at the time of admission to UW–Madison. Students are strongly encouraged to discuss their academic plans with their faculty advisor and must make satisfactory progress toward program completion – see Satisfactory Progress/Excess credits for details.

REQUIREMENTS

REQUIREMENTS

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

How Students Meet Requirements

All students are required to complete a minimum of 40 credits of liberal studies coursework. Most liberal studies courses are offered by academic departments in the College of Letters & Science. Each course is assigned a number of descriptors (attributes) that provide information about its content. For example, a breadth designation indicates what kind of course it is – a science course, a literature course, etc. Level designations describe how advanced the content of a course is in relation to other courses in the department – elementary, intermediate, or advanced level.

The Liberal Arts and Sciences (LAS) attribute identifies courses that contain liberal arts content. These courses are found in many schools and colleges across the campus, including the School of Education. All courses with the LAS attribute may be selected to meet the liberal studies requirement. These courses, and those on the fine arts list, are the only School of Education courses that will count toward the requirement.

Details about each course, including breadth, level, and LAS status, can be found in Course Search and Enroll (<https://registrar.wisc.edu/course-search-enroll/>). Click on the course number to obtain this information. Students can also search for courses meeting specific breadth, level, credits, and other attributes using Course Search and Enroll (<https://registrar.wisc.edu/course-search-enroll/>). School of Education departments with LAS courses include Art, Counseling Psychology, Curriculum and Instruction, Dance, Educational Leadership and Policy Analysis, Educational Policy Studies, Educational Psychology, Kinesiology, Rehabilitation Psychology and Special Education, and Theatre and Drama.

LITTRANS/ FOLKLORE 327	Vampires	3
LITTRANS/ THEATRE 336	In Translation: The Drama of August Strindberg	3-4

Music

Any course from the Department of Music (<https://guide.wisc.edu/courses/music/>)

Music Performance

Any course from the Department of Music Performance (https://guide.wisc.edu/courses/mus_perf/)

Theatre

Any course from the Department of Theatre and Drama (<https://guide.wisc.edu/courses/theatre/>)

Humanities Elective(s)

May include courses designated as *Humanities*, *Literature*, *Humanities or Natural Science*, *Humanities or Social Science*, elementary and intermediate level foreign language, or additional fine arts. May also count COM ARTS 181 Elements of Speech-Honors Course, and any English (<https://guide.wisc.edu/courses/engl/>) department intermediate or advanced level creative writing or composition course toward this requirement (ESL classes and elementary level composition courses are excluded).

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Select from courses with a breadth designation of *Social Science*, *Social or Natural Science*, *Biological or Social Science*, or as *Humanities or Social Science*.

Teacher education and kinesiology students have unique requirements in this category; see below:

Teacher Education requirement

Teacher education students must complete a Local, State, and National Government requirement by enrolling in one of the following courses as part of the 9 credits:

- POLI SCI 104 Introduction to American Politics and Government or
- POLI SCI 205 Introduction to State Government

Kinesiology

Kinesiology students must complete PSYCH 202 Introduction to Psychology as part of the 9 credits.

Science

All students must complete a minimum of 9 credits, including one course designated as a Biological Science course and one designated as a Physical Science course. All students must complete one science course with a laboratory. The lab course can also count toward the Biological or Physical Science requirement if it has the requisite breadth designation.

Biological Science

Any course with a breadth designation of *Biological Science*, or as *Biological or Social Science*.

Physical Science

Any course with a breadth designation of *Physical Science*.

Science Elective(s)

Other courses with a breadth designation of *Biological Science*, *Physical Science*, *Natural Science*, *Social or Natural Science*, *Humanities or Natural Science*, or as *Biological or Social Science*.

Laboratory Requirement

Most sciences with lab sections are identified as such in Course Search and Enroll (<https://registrar.wisc.edu/course-search-enroll/>).

In addition to courses with lab sections, the following courses include some lab experience and will meet the lab requirements for students in the School of Education:

Code	Title	Credits
Course options within the College of Letters & Science		
ANTHRO 105	Principles of Biological Anthropology	3
ATM OCN 101	Weather and Climate	4
BOTANY 100	Survey of Botany	3
GEOSCI 100	Introductory Geology: How the Earth Works	3
PHYSICS 109	Physics in the Arts	3
Suggested course options outside the College of Letters & Science		
BOTANY/PL PATH 123	Plants, Parasites, and People	3
FOOD SCI/ MICROBIO 324	Food Microbiology Laboratory	2
HORT 120		3
PL PATH/ BOTANY 123	Plants, Parasites, and People	3

Cultural and Historical Studies

All students must complete three requirements met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation. A single course cannot satisfy more than one of the three Cultural and Historical Studies requirements listed below.

Ethnic Studies (minimum 3 credit course)

The Ethnic Studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States and to equip students to respond constructively to issues connected with our pluralistic society and global community. Courses that meet this requirement have a specific ethnic studies designation that can be utilized in a course search.

United States or European History (minimum 3 credits)

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services office.

Code	Title	Credits

Global Perspectives (minimum 3 credits)

Global perspectives courses include courses whose primary emphasis is on:

- cultures whose origins lie outside of the Western tradition, or
- analyzing and interpreting cultural differences through the study of language, gender, race, ethnicity, religion, or class, or
- cultural pluralism within specific geographical areas.

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services Office, 139 Education Building.

Population Health			Important Notes Regarding the Liberal Studies Electives		
POP HLTH/ C&E SOC 370	Introduction to Public Health	3	<ul style="list-style-type: none"> Completion of the Liberal Studies requirements is not a prerequisite to professional program declaration or admission. Whether a course can double count toward liberal studies and major requirements varies by program area and will be reflected in a student's DARS report. Courses that transfer to UW-Madison as departmental electives (e.g., POLI SCI X10) might meet specific Liberal Studies requirements. Students may consult with an advisor in the School of Education Student Services office to discuss transfer electives that appear to meet specific course requirements. While one course may cover two requirements, students must still complete both the 40-credit total and the 9-credit minimum requirements in Humanities, Social Studies (Social Science), and Science. For example, THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature, a Literature course also on the Fine Arts list, may be used to meet both the specific Fine Arts and Literature requirements of the Humanities area, but a total of 9 credits of Humanities are still required. No liberal studies coursework may be taken on a Pass/Fail basis. 		
Religious Studies			Guidelines for Specific Program Areas Teacher Education Programs

Sociology					
SOC/C&E SOC 140	Introduction to Community and Environmental Sociology	4			

the Liberal Studies requirements. Art education students may apply all of the aesthetics credits (usually 14) toward the Liberal Studies requirements, but not courses taken to meet the studio requirements.

Art (BFA and BS)

In general, students may not satisfy Liberal Studies requirements with courses meeting studio or aesthetics requirements. However, Art-BFA candidates may apply 4 aesthetics elective credits toward the Humanities credits.

Kinesiology and Physical Education

Kinesiology and physical education students will meet the Science requirement by completing their required science courses – e.g., chemistry and physics.

Communication Sciences and Disorders

Communication sciences and disorders students should consult both the Liberal Studies requirements and the communication sciences and disorders program requirements, particularly the "related courses" section, when selecting Liberal Studies coursework. Courses may count in both places. Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.

- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

Dance (BFA & BS)

Dance and Dance-BFA students must complete ANAT&PHY 338 Human Anatomy Laboratory, or equivalent, which will meet both a Science requirement and the Science Laboratory requirement. In general, Liberal Studies requirements cannot be met with courses taken to meet other program requirements.

Rehabilitation Psychology

In general, rehabilitation psychology students may not satisfy Liberal Studies requirements with courses taken to meet the Related Course Requirements in Rehabilitation Psychology. Courses applied toward the other parts of the Rehab Psych requirements cannot also count toward the 40 Liberal Studies credits. However, if a course is taken to meet any of the three Cultural/Historical Studies requirements, the course *content* can be used to meet both requirements, but the *credits* will only count in the Rehabilitation Psychology or Related Course Requirements areas. Once the required credits have been met, additional coursework in Psychology, Sociology, Social Work, etc. may be applied toward Liberal Studies.

Theatre and Drama

Theatre and drama students can apply major coursework toward the Liberal Studies requirements.

Dedicated to supporting and promoting student success, the School of Education Student Services (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) office coordinates a number of student-related services for prospective and current School of Education students in all programs. Student Services staff provide:

- Academic advising
- Career advising and programming
- Mentoring and advocacy for underrepresented and international students
- Requirement monitoring and help with course selection
- Referrals to other campus resources
- Someone to talk to
- And more!

The UW–Madison School of Education is committed to promoting equity and increasing diversity in its programs. In keeping with this commitment, Student Services staff include advisors with extensive experience assisting underrepresented and international students.

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey. More information about academic and career advising follows.

ACADEMIC ADVISING

Choosing a major and navigating the completion of a degree or certificate can be an exciting process and one that students don't need to figure out on their own. Advisors help you find the right fit and create a unique pathway through your degree.

All students are assigned an academic advisor (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) from the Student Services office who will provide advising throughout the degree. If desired, appointments can still be made with any advisor on the team. Program or departmental advisors are also assigned to School of Education students. Plan to utilize your advising team – your academic, career, and program advisors; each advisor has specialized knowledge to help you succeed.

Regular meetings with an academic advisor can help keep you on track to complete your requirements and also help refine your learning goals. Tell us what you are enjoying about your learning, something you want to try out, skills you want to build, and careers that are intriguing to you.

In conversations with your advisor, we/you can:

- Discuss your major, degree requirements, course selection, and career ideas.
- Tell us what you need. We are experts in helping you find campus resources such as tutoring, counseling, advising for pre-health careers, getting involved with student organizations, or acquiring experience in your career interest area.
- Explore studying abroad, working/volunteering and internships, or learning specific skills like a language, communication techniques, or leadership.
- Think expansively! Make the most out of your college experience.

To schedule an appointment: Current students should schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at

RESOURCES

RESOURCES SCHOOL OF EDUCATION STUDENT SERVICES

139 Education Building, 1000 Bascom Mall; 608-262-1651

studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department and, in the case of certification programs, follow their students' progress through their professional coursework.

The divisions between program advising and Student Services advising are flexible. Students are encouraged to consult with all advisors who can help with a situation or answer a question.

CAREER CENTER

As a School of Education student, the experiences and skills you develop through our programs will prepare you for success in a wide variety of career fields.

The Career Center (<https://careercenter.education.wisc.edu/>) is here to support you every step of the way!

- Meet with a Career & Internship Advisor (<https://careercenter.education.wisc.edu/meet-with-us/>) during your first year on campus to begin exploring your interests and opportunities. Learn what the possibilities are and start to build your roadmap for success. Current students may schedule career advising appointments through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in their MyUW accounts.
- Connect with professionals in your desired field(s) for guidance or to gain experience through paid internships (<https://careercenter.education.wisc.edu/gain-experience/internships/>), work-based learning experiences, or career events (<https://careercenter.education.wisc.edu/attend-an-event/>). Several on-campus events designed to introduce you to key employers, alumni, and professional contacts are offered each semester.
- Prepare to successfully secure an internship, job, or graduate school admittance through personalized career advising, workshops, for-credit career courses, or online tools (<https://careercenter.education.wisc.edu/prepare-apply/>) to build a solid resume and cover letter, apply for experiences, interview successfully, and make important career and life decisions.
- Stay connected (<https://www.linkedin.com/groups/8489112/>) throughout college and post-graduation as you navigate your professional career; share your experience with future School of Education Badgers!

Internships

The School of Education Career Center actively builds relationships with employers in various fields and geographic locations to offer high-quality, paid internships to our students. Internships are learning experiences designed to apply the concepts learned in your academic program in a workplace setting. These experiences help students confirm their interest in specific career fields, develop important professional skills and connections, and build their resumes as they prepare for future full-time work or graduate school. More about internships as a student in the School of Education is available [here](https://careercenter.education.wisc.edu/gain-experience/internships/) (<https://careercenter.education.wisc.edu/gain-experience/internships/>).

Interested in working abroad? UW's International Internship Program (<https://internships.international.wisc.edu/>) offers experiences in a wide variety of fields across the world including the arts, education, and health.

SCHOLARSHIPS/THE TEACHER PLEDGE/TEACH GRANTS

Scholarships

The School of Education distributes approximately \$2 million in scholarships and financial support to undergraduate students each year, made possible by the generosity of alumni and supporters who believe in our mission.

Our goal is to make the process simple. All admitted high school and undergraduate School of Education students are automatically considered for scholarships yearly. This includes transfer students, students newly declaring a School of Education major, and current students. We review your student record, such as your major and financial need, to determine scholarship eligibility.

Priority consideration goes to students who have submitted a FAFSA (<https://financialaid.wisc.edu/applying/>). Other selection priorities include:

- Attracting, retaining, and graduating talented students
- Supporting students with financial need

A variety of scholarships are available, including 4-year renewable awards for newly admitted high school students and a limited number of 2-year awards for undergraduate students.

For more details, please visit the:

- Admitted High School Students Scholarships (<https://wisc.academicworks.com/opportunities/94335/>) page.
- Undergraduate and Transfer Students Scholarships (<https://wisc.academicworks.com/opportunities/94347/>) page.

The Teacher Pledge

The UW-Madison School of Education Wisconsin Teacher Pledge is a financial aid program for UW-Madison teacher education students. The Teacher Pledge offers undergraduate and graduate teacher education students up to the cost of in-state tuition, plus testing and licensing fees, in exchange for completing the FAFSA annually and making a commitment to teach in Wisconsin. For each year taught in a PK-12 school in Wisconsin, a portion of the Teacher Pledge loan will be forgiven – reaching 100% forgiveness after a three-to-four-year teaching commitment.

- For general information, visit the Teacher Pledge website (<https://tec.education.wisc.edu/teacher-pledge/>).
- Check out How to Take the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/how-to-take-pledge/>) – a checklist that guides students through Teacher Pledge requirements from A to Z, including how to participate.
- For answers to frequently asked questions, check out the Teacher Pledge FAQ. (<https://tec.education.wisc.edu/teacher-pledge/faq/>)

TEACH Grants

Students willing to teach in high-need teaching fields have received TEACH Grants of up to \$4,000 per year for a total of \$16,000 over their undergraduate academic career, or \$8,000 over their graduate academic career. The officially designated high-need fields vary by state; see the Department of Education website (<https://tsa.ed.gov/#/reports>) for current information. A state or local education agency (LEA) may also document high-need fields.

Students receiving TEACH Grants must complete a service obligation of four years of teaching full-time in their high-need field in a designated low-income school. This must be accomplished within eight years after completing a teacher preparation program. Low-income schools are defined as public or private nonprofit elementary or secondary schools, or educational service agencies eligible for assistance under Title I of the Elementary and Secondary Education Act. In Wisconsin, more than one thousand schools are designated as low income.

TEACH Grant applicants must attain certain academic eligibility criteria. Candidates must have scored minimally above the 75th percentile on a nationally normed admissions test or have earned a 3.25 minimum cumulative grade point average. Grant recipients must have completed a Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/>) to be eligible; indicate an interest in the TEACH Grant on the FAFSA.

Prior to submitting an application, students are strongly encouraged to learn about the parameters of the TEACH Grant and obtain answers to any related questions. For more information, please visit the Federal Student Aid webpage (<https://studentaid.gov/understand-aid/types/grants/teach/>).

GLOBAL ENGAGEMENT OFFICE AND STUDY ABROAD

The Global Engagement Office (GEO) (<https://global.education.wisc.edu/>) is the School of Education's (SoE) office for SoE-specific global opportunities and curriculum, supporting students, faculty, staff, and international visiting scholars. GEO works within the SoE and with the broader campus community to facilitate experiences such as study abroad, study away (within the United States and U.S. territories), or international internship opportunities. GEO can help a student navigate these processes.

Study Abroad, Study Away, and International Internships

GEO works with the International Academic Programs (IAP) (<https://studyabroad.wisc.edu/>) office (301 Red Gym, 716 Langdon Street, 608-265-6329) to provide SoE students with opportunities that fit their specific needs. IAP is the central study abroad, study away, and international internship office at UW–Madison. IAP offers over 200 study abroad options in over 60 countries on six continents. Together, GEO and IAP provide information about academics, funding, and health and safety to make participating in a global opportunity possible.

Global Opportunities and Resources SoE – IAP Signature Study Abroad or Away Programs

- The SoE has developed faculty-led short-term summer and winter break abroad and away opportunities specifically designed for SoE students to earn credits for their field of study. In 2025, the SoE offered twelve short-term summer programs around the globe. Programs vary each year. For a complete list of programs, visit the GEO website (<https://global.education.wisc.edu/study-abroad/>).

Help with Course Planning and Timing Advising and Earning Credit

- Many SoE academic departments have created Major Advising Pages (MAPs) (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>). MAPs are a guide to the academic requirements of specific majors in relation to study abroad or study away programs. While many programs include language training, many IAP

programs have no language requirement and include courses taught in English.

- All courses taken abroad through IAP count as “in-residence” credit, just like taking courses on campus at UW–Madison. In addition to the classroom experience, many students also complete internships and do research, fieldwork, and service learning.

When to Study or Intern Abroad or Study Away

- Studying and interning abroad or away is open throughout the undergraduate years. However, for some majors, going early is the best option. For example, in the SoE, teacher education and kinesiology have structured course sequences in the junior and senior years. Studying abroad or away during the first two years may be the best option for students in these program areas.
- SoE students, and students pursuing a certificate in the SoE, are encouraged to explore different global experiences early, even during their first or second semester on campus.
- Review the MAPs and meet with advisors in the SoE or IAP to determine the most suitable time to participate and identify the location that is right for you.

Financing a Study Abroad or Away Experience

- Learn more about funding on the IAP Scholarship webpage (<https://studyabroad.wisc.edu/funding/scholarships/>) and on the GEO website (<https://global.education.wisc.edu/study-abroad/>). Working with the IAP, International Internships, Financial Aid, and GEO early allows students to explore many scholarship options. Pre-planning around the costs of studying or interning abroad or away helps make participating a reality. Student financial aid is usually applied to study abroad experiences, and some countries permit students to work while participating in a study abroad program.

International Internships

- As a SoE student, you have several avenues for exploring International Internships. You can visit GEO (<https://global.education.wisc.edu/>) to help you find the right office to connect with, you can meet with the IAP International Internships (<https://studyabroad.wisc.edu/intern-abroad/>) team, or meet with the SoE Career Center (<https://careercenter.education.wisc.edu/>) staff to discuss your options.
- Students can pursue international internships during the summer months as well as during the semester, if allowed by the student's academic program. The UW Signature Internships, cultivated specifically for UW–Madison undergraduates, can be found in the International Internships database (<https://my.studyabroad.wisc.edu/Account/Login/?returnUrl=%2Fiip%2F>).

UNDERGRADUATE RESEARCH

UW–Madison is a research-rich environment and students are encouraged to participate in the research activities of our world-class faculty and staff. Here are some pathways students use to get involved with research:

Apply to a Structured Program

- Some students get involved in research through a specific program (<https://research.wisc.edu/information->

for-undergraduate-students/) designed to connect undergraduate students to research. This program may be a scholarship program, or simply provide funding to work on a guided research project. It may provide mentoring related to research methodology and/or require students to enroll in a course for credit. An example of such a program is the Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>), one of the more popular options available to School of Education students.

Seek out Research Opportunities

- Many students take the initiative and seek out research opportunities on their own. The School of Education Career Center (<http://careercenter.education.wisc.edu/>) can provide help with writing an inquiry email. Here are a few ways to conduct this search:
- Find information about undergraduate research and fellowship opportunities on the UW Research (<https://research.wisc.edu/information-for-undergraduate-students/>) website.
- The Office of Experiential Learning (<https://experientiallearning.wisc.edu/>) helps DDEEA scholars to start exploring research opportunities that best align with their interests.
- Find helpful information about undergraduate research experiences in science on the BioCommons (<https://biology.wisc.edu/undergraduate-research/>) and the WISCIENCE (<https://wiscience.wisc.edu/resources/guide-to-undergraduate-research/>) websites.
- Find a listing of labs on the Wisconsin Center for Education Research (<https://www.wcer.wisc.edu/research/>) and departmental websites. The lab descriptions often contain contact information for students interested in getting involved in the lab's activities. The Kinesiology department (<https://kinesiology.education.wisc.edu/research/>) and the Communication Sciences and Disorders department (<https://csd.wisc.edu/research/>) are two good examples of how this information is shared. Many School of Education students participate in research through the Department of Educational Psychology.
- The Student Jobs (<https://studentjobs.wisc.edu/>) website lists some research opportunities.
- Read the online bios of professors to learn about their areas of research. Send an email inquiry. The Center for Pre-Health Advising (<https://prehealth.wisc.edu/research-opportunities/>) has a helpful email template you may use.
- Ask the professor or TA in a class if they know of any opportunities to become involved with research.

Participate When Enrolled in a Course

- Some courses have research opportunities built into the course itself. For example:
- BIOLOGY/BOTANY/ZOOLOGY 152 has provided students with an option to participate in a mentored research opportunity.
- Students can serve as research participants to earn extra credit in their courses. Students enrolled in Educational Psychology courses, for example, are often provided with such an opportunity.

- Some professors will announce research opportunities through email to their students.

THE CENTER FOR COMMUNITY AND WELL-BEING

The Center for Community and Well-Being in the School of Education provides leadership and support to faculty, staff, and students in developing and implementing strategic initiatives that promote a sense of community and well-being. See the School of Education website (<https://education.wisc.edu/about/community-well-being/>) for more information regarding the Center's activities and programs.

COUNSELING PSYCHOLOGY TRAINING CLINIC

The Counseling Psychology Training Clinic (CPTC) (<https://counselingpsych.education.wisc.edu/clinic-and-outreach/cptc/>) is an award-winning training clinic run by the School of Education's Department of Counseling Psychology. The clinic provides high-quality, cost-efficient, and multiculturally competent psychological and mental health services to UW-Madison students and members of the community. Clinicians assist individuals with a variety of concerns including:

- Depression
- Anxiety
- Relationship issues
- Family concerns
- Trauma
- Eating disorders
- Sexual orientation/identity
- Sexuality
- Culture/ethnicity
- Poor concentration
- Grief
- Gender issues
- Anger
- Counseling for gifted and talented students

Fees for counseling services are on a sliding scale determined by income.

MARY T. KELLNER TEACHER EDUCATION CENTER

L139 Education Building, 608-262-2997

The Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/>) supports all prospective, current, and former teacher education students across the UW-Madison campus. The Center highlights the benefits, crucial importance, and real joys of choosing teaching as a career. Our student supports are designed to promote success and cultivate leadership. Specifically, we coordinate the Wisconsin Teacher Pledge student financial support program, assist students to achieve and document mastery of teacher education standards, and facilitate all required field experiences. The Mary T. Kellner Teacher Education Center also oversees the statutory requirements for our teacher education programs, including Act 31, which ensures that all preservice teachers learn about the history, culture, and tribal sovereignty of Wisconsin's American Indian communities. The Mary T. Kellner Teacher Education Center is the main point of contact for school district partners, cooperating teachers, and the Wisconsin Department of Public Instruction. At the TEC, we cultivate a community of inquiry and leverage our shared

resources to help prepare the excellent educators our Wisconsin PK-12 schools, families, and students deserve.

MERIT (MEDIA, EDUCATION RESOURCES, AND INFORMATION TECHNOLOGY)

301 Teacher Education Building, 608-263-4750

MERIT (<https://merit.education.wisc.edu/>) offers information and technology services to the School of Education and UW-Madison community partners. MERIT is designed as a collaborative and comprehensive cluster of service and support for the School of Education, UW-Madison, and beyond. Staff play an active role in the design and implementation of programs that connect the K-12 community to UW-Madison.

Some of our services include evaluation and selection of tools for delivery of content, instructional design and consulting for development of online learning, library services, and collections to support practicing teachers (including equipment loans), poster printing, lamination, workshops, and instructional support aimed at adoption of new tools, instructional technologies, and information literacy.

COOPERATIVE CHILDREN'S BOOK CENTER (CCBC)

401 Teacher Education, 608-263-3720

The CCBC (<https://ccbc.education.wisc.edu/>) is a library of the School of Education that provides education students, faculty, and staff with a noncirculating collection of children's and adolescent literature. The CCBC also serves other adults on campus and across the state who are interested in literature for the young, including Wisconsin teachers and school and public librarians.

This nationally unique library is the primary resource on campus and elsewhere for contemporary books published for children and young adults from preschool through high school ages. CCBC resources include extensive reference materials about literature for the young and a wide range of books for children and adolescents, including a book examination collection of new and recently published books, a comprehensive collection of recommended contemporary books, and historical literature from the 20th century. The CCBC is nationally known for its services related to intellectual freedom and advocacy for diversity in children's and young adult literature. Each year the CCBC compiles and releases statistics documenting the number of children's and young adult books published by and/or about Black, Indigenous, and People of Color (BIPOC), and additional aspects of identity including disability, LGBTQ+, and religion.

As a library of the School of Education, the CCBC is committed to being a vital part of the teacher education experience on campus. The CCBC's noncirculating collection provides immediate access to a wide range of literature for the young. CCBC librarians are available to meet with education students to help them identify children's and adolescent literature to fulfill class assignments, as well as to use in practicum and student teaching classrooms. Librarians are also available to meet with faculty and teaching assistants to discuss children's and young adult literature as it relates to the courses they are teaching.

The CCBC website (<https://ccbc.education.wisc.edu/>) provides full-text access to many national children's and young adult literature awards and recommended lists as well as specialized bibliographies from CCBC staff. The CCBC offers special events throughout the academic year that

provide opportunities to hear from authors and illustrators, as well as to interact with others who are interested in books for children and teens.

HONORS

HONORS DEAN'S LIST

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

GRADUATING WITH HONORS AND GRADUATING WITH DISTINCTION

Undergraduate students are invited to wear an honors stole at graduation, representing **Graduating with Honors**, if they have indicated they expect to graduate at the conclusion of the current semester, have a cumulative GPA that places them in the top 20% of students expecting to graduate in their school/college, and have earned at least 60 credits in residence at UW-Madison. Credits in progress in the current semester count toward the 60 credit requirement.

Graduating With Distinction is a separate calculation and is posted to the undergraduate student's transcript after all grades and degrees have been recorded. Students qualify for the Distinction notation if they have received their degree, have a cumulative GPA that places them in the top 20% of degree recipients in their school/college, and have earned at least 60 credits in residence at UW-Madison.

HONORS COLLABORATION WITH THE COLLEGE OF LETTERS & SCIENCE

The School of Education does not currently offer a school-level Honors program. However, through a collaboration between the School of Education and the College of Letters & Science (L&S), students in the School of Education may participate in the L&S Honors Program and have these achievements posted on their transcript.

Three L&S Honors options may be completed by School of Education students.

L&S Honors in the Liberal Arts (HLA)

Students pursuing Honors in the Liberal Arts complete Honors courses in broadly distributed subjects from the humanities, social sciences, and natural sciences. Through Honors coursework, students select enriching academic opportunities and build connections with faculty throughout the completion of their degree.

Courses taken for Honors can also be applied toward other degree requirements. For example, of the 24 required Honors credits:

- At least 6 of the credits must be in courses designated as Humanities (including Literature)
- At least 6 of the credits must be in courses designated as Social Science
- At least 6 of the credits must be in courses designated as Biological, Physical, or Natural Science

These requirements completely overlap with the School of Education liberal studies requirements.

Honors in the Major (HM)

Students completing an *additional* major housed in the College of Letters and Science may choose to complete the Honors requirements of this major. Honors in the Major requirements vary by program, but typically include a cumulative GPA of at least 3.3, a minimum major GPA, Honors coursework in the major, and successful completion of a two-semester senior Honors thesis or other capstone experience.

If Honors courses overlap with School of Education requirements, they can count in both areas.

Comprehensive Honors (both HLA and HM)

Comprehensive Honors, the highest level of Honors achievement, is awarded to students who are admitted to and complete the requirements for both Honors in the Liberal Arts and Honors in the Major.

Full details of requirements, application procedures and policies are available in the Guide (p. 376) and the program's website (<http://www.honors.ls.wisc.edu>). Students with questions about how L&S Honors connects with School of Education programs and requirements should consult both L&S Honors and School of Education advisors to plan a course of study.

EDUCATOR LICENSING

EDUCATOR LICENSING TEACHER LICENSING PROGRAMS

- Art Education - Grades K-12
- Communication Sciences and Disorders (Speech-Language Pathology) - Grades K-12*
- Elementary Education - Kindergarten - 9th Grade, with optional minors in Early Childhood Education - Birth through Grade 3, and K-12 English as a Second Language

- Certificate in Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/graphic-design-certificate/>)

ABOUT

The Department of Art conducts an exemplary experimental undergraduate program emphasizing the importance of a broad background in the study and practice of visual art and design, liberal arts, and knowledge of art and design movements throughout history.

The nationally and internationally recognized faculty of visual artists and designers provides a stimulating educational environment to prepare students for careers in a broad array of creative fields and/or graduate

study. The program also supports and encourages the development of a visually and culturally literate community.

The art department offers two professional programs, Art and Art Education. Art majors may pursue either the Bachelor of Science degree (p. 1544) or the Bachelor of Fine Arts degree (p. 1529). Art majors wanting to complete a strong emphasis in graphic design may pursue either the Bachelor of Science: Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/art-bs/art-graphic-design-bs/>) or Bachelor of Fine Arts: Graphic Design (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/art-graphic-design-bfa/>) options. Art Education majors (p. 1520) receive the Bachelor of Science–Art Education degree and eligibility to apply for licensure to teach in both elementary and secondary schools. Entrance requirements vary for each program.

ART EDUCATION, BS

Art education is a perfect choice for students who thrive in creative, collaborative environments. People who choose this meaningful career path love viewing, discussing, and making works of art, and are also passionate about engaging others in these artistic processes.

UW–Madison’s art education program provides essential preparation for a variety of careers in art education. Students work directly with children and adolescents in both school and community-based field placements in three of four semesters of the program. They study with outstanding art and education faculty in a range of rigorous and engaging studio, art history, and education courses, while also connecting with Madison’s vibrant arts community through field trips and service learning.

Graduates of our program earn a bachelor of science degree, a career-ready Wisconsin teaching license in K–12 art education, and gain the skills, knowledge, and confidence to teach the visual arts in a variety of school and community-based settings. The job market for art educators is incredibly healthy across the nation, and virtually all of our graduates land jobs that match their interests and expertise.

Consult the departmental website (<https://art.wisc.edu/undergraduate/undergraduate-degrees/>) for additional information about art education. Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>), an opt-in loan forgiveness program for teacher education students.

Watch what students have to say about being an Art Education major (<https://www.youtube.com/watch?v=wHtc6qSNPho>).

HOW TO GET IN

HOW TO GET IN

ART EDUCATION DECLARATION OVERVIEW

Students typically enter UW–Madison as Pre–Art Education students (PAED), spend the first two years completing liberal studies, general education, and foundational studio requirements, and declare Art Education during their sophomore year for their final two years on campus.

On-campus students starting at UW–Madison in other majors can move to Pre–Art Education by completing a Pre–Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1494), is required to transfer into Pre–Art Education. It is not necessary to be a Pre–Art Education student before declaring an Art Education major.

ELIGIBILITY TO DECLARE ART EDUCATION

Art Education currently accepts declarations at any point during the year. The on-campus declaration form is located on the School of Education’s Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Art Education should complete the on-campus declaration and must also be admitted to UW–Madison. See Transfer Students and Students with a Bachelor’s Degree, below.

Eligibility Requirements:

- Meet with the Art Education advisor Dr. Mary Hoefflerle (email her directly to set up an appointment at hoefflerle@wisc.edu) or a School of Education Student Services advisor. Email studentservices@education.wisc.edu or call 608-262-1651 to schedule an appointment in Student Services. On-campus students can schedule using Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- Earn 40 or more total credits by the end of the semester prior to declaration.
- Complete at least 6 aesthetics credits (such as ART 108 Foundations of Contemporary Art, ART 208 Current Directions in Art and/or art history courses) and 20 studio credits by the end of the declaration semester.
- Earn a minimum 2.75 cumulative GPA based on all college coursework attempted or a 2.75 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester.¹

¹ Last 60 Credits Rule – Two grade point averages may be calculated to determine a candidate’s eligibility to declare. A GPA may be calculated using (1) UW–Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1494).

Students will be provisionally admitted pending the completion of all eligibility requirements by the end of the declaration semester.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a Bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Art Education should complete both the on-campus declaration and the UW-Madison application. All eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the Pre-Art Education designation.

An applicant with a previous undergraduate degree will be admitted to Art Education as a second degree candidate. Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1494).

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The art education program is divided into five areas of study:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements offer an in-depth study of studio art.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The *professional sequence* is a three-semester sequence of art education teaching methods coursework and field experiences in schools.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the foundations program should enroll in ART 102 2D Foundations, ART 212 Drawing Foundations, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 3D Foundations, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENT

Complete four courses focusing on the history of art and contemporary developments in the visual arts.

Code	Title	Credits
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	4
Select one of the following: ¹		3-4
ART HIST 103	Topics in Art History (world art topics)	
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	
ART HIST 205	Global Arts	
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ AFROAMER 242	Introduction to Afro-American Art	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 308	The Tastes of Scholars and Emperors: Chinese Art in the Later Periods	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 411	Topics in Asian Art	
ART HIST 412	Topics in African and African Diaspora Art History	
ART HIST/ ASIAN 428	Visual Cultures of India	
ART HIST 440	Art and Power in the Arab World	
ART HIST 475	Japanese Ceramics and Allied Arts	

¹ Additional art history courses addressing arts from underrepresented cultures will be considered. A course may also count for the global perspectives or ethnic studies requirement if it has that designation.

MAJOR REQUIREMENTS

Students must complete 45 credits of studio art, including the specific requirements below. At least 15 upper-level studio credits must be taken in residence on the UW–Madison campus. Upper-level classes include Art courses numbered 214 and above, excluding ART 236 and ART 338.

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Foundations	3
ART 222	Introduction to Painting	3-4
ART 306 or ART 336	Relief Printmaking Serigraphy	3-4
ART 214 or ART 244	Sculpture I Art Metal I	3-4
ART 224	Ceramics I	4
Digital Media Elective - select one of the following:		
ART 176	Digital Photography for Non-Art Majors	
ART 309	Digital Art and Code	
ART 346	Basic Graphic Design	
ART 348	Introduction to Digital Printmaking	
ART 409	Digital Fabrication Studio	
ART 428	Digital Imaging Studio	
ART 448	Special Topics (digital media topics only)	

Take additional art electives to reach the minimum of 45 credits

PROFESSIONAL EDUCATION REQUIREMENTS

Code	Title	Credits
Foundations of the Profession		3
ED POL/ HISTORY 412 or ED POL 300	History of American Education ¹ School and Society	3
RP & SE 605	Development, Learning and Education Foundations in Special Education	3
Literacy, Including Reading		3
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Special Education		3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	

¹ Will also fulfill the liberal studies requirement in U.S./European history.

ART EDUCATION REQUIREMENTS

Code	Title	Credits
ART ED 321	Introduction to Teaching Art	2
ART ED 323	Foundations in Art Education	3

ART ED 324	Methods in Art Education	3
ART ED 327	Practicum in Art Education	6
ART ED 425	Seminar in Art Education	2
ART ED 423	Student Teaching in Elementary Art ¹	5
ART ED 424	Student Teaching in Secondary Art ¹	5

¹ Must have a minimum 2.75 GPA in Professional Education and Art Education courses to student teach.

GPA AND OTHER GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average in all major course work.
- 2.75 cumulative grade point average in all upper-level major course work. Art courses numbered 214 and above, excluding ART 236 and ART 338, are considered upper-level courses.
- 2.75 in professional education course work (excluding practicum and student teaching).
- Major Residency. Students must complete a minimum of 15 upper-level studio credits in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 120 total credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1526).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify and explore important eras, developments, movements, and theories in historical and contemporary art practice.
2. Identify and analyze the elements and principles of design in the work of other artists and consistently and effectively employ the elements and principles in their own studio work.
3. Develop technical skill, a personal creative practice, and knowledge of the historical and current practices of at least four separate visual art disciplines, including 2D, 3D, 4D, and graphics areas.
4. Examine best practices (historical and contemporary) in art curriculum planning, instruction and assessment, apply knowledge to k-12

- curriculum development, and effectively teach art to diverse populations in community and school-based settings.
5. Meet all School of Education Teacher Education Standards and DPI k-12 art licensure requirements (including child development and learning theories, history of American Education, and the role of art in literacy education).

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Science: Art Education - Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Total Credits 120**ADVISING AND CAREERS****ADVISING AND CAREERS****ART EDUCATION ADVISING**

Prospective off-campus and on-campus art education students will meet with the art education program coordinator Dr. Mary Hoefflerle, hoefflerle@wisc.edu. Students considering art education should contact Dr. Hoefflerle as soon as possible. Pre-declaration advising is conducted by the Department of Art and advisors in the School of Education Student Services office, see below.

Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made by calling 608-262-1660.

SCHOOL OF EDUCATION ADVISING**Academic Advising in the School of Education**

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments

can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE**

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

ART EDUCATION AND THE WISCONSIN EXPERIENCE

Teaching Art

As part of required courses, art education students teach art to children and teens in school and community-based settings in three of the four semesters of the program. Some of our most recent partners include:

- Monroe Street Arts Center (<https://www.monroestreetarts.org/>)
- Madison School & Community Recreation (<https://www.msccr.org/programs/after-school-camps/elementary-school/elementary-after-school-programs/>) (MSCR) after school art clubs
- The Wisconsin Art Education Association's Youth Art Month and Visual Arts Classic
- K-12 fieldwork experiences in private schools like Edgewood, Eagle, and Madison Country Day; public schools in rural, suburban, and urban districts; plus public charter and alternative schools like Shabazz High School and Nuestro Mundo Elementary.

Learning from Current Practitioners

In all field placements, art education majors receive support, guidance and advice from veteran art teachers and university supervisors. Many art teachers with specific expertise also join us on campus to lead special-topic workshops such as Integrating Art and Literacy, Adaptive Art, Elementary Classroom Management, and mental health concerns in the high school art classroom.

Paid Work Experience

Art education majors also find valuable, paid work experience in the community as teaching assistants or lead art instructors in organizations like the Wheelhouse Studios (<https://union.wisc.edu/events-and-activities/open-art-studio-and-classes/>), the Chazen Museum of Art (<https://chazen.wisc.edu/>), Madison School and Community Recreation (<https://www.msccr.org/>), Prairie Music & Arts, (<https://prairiemusic.org/>) and provide one-to-one art tutoring.

Student Organizations

Art education majors join a wide variety of student organizations on campus. Art-related organizations (<https://art.wisc.edu/art-at-uw/student-orgs/>) include the Mad Gaffers (glass blowing), Fresh Hot Press (printmakers), and the Chazen Art Museum Ambassadors. Aspiring Educators of Wisconsin (<https://www.facebook.com/AspiringEducatorsUWMadison/>) is an active organization for pre-service teachers in all areas of education.

Exhibiting Artwork

Art education majors also have ample opportunity to submit their artwork for consideration for groups and solo art exhibitions, scholarships and competitions.

Study Abroad

Many art education students study abroad for a semester or a summer as part of their academic plan, taking studio and art history classes in Italy, Cuba, or Portugal.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE ADDITIONAL CERTIFICATION REQUIREMENTS

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/current-students/>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following undergraduate teacher licensing options are offered at UW-Madison.

- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education.
- The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level.
- Health licenses at the Kindergarten through Grade 12 level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW-Madison teacher certification students the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall.

Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

- all certification requirements are met;
- student teaching (following the school district calendar) is completed;
- final grades are posted and reviewed;
- the degree is posted (<https://registrar.wisc.edu/posting-of-degrees/>) by the Registrar's Office (which can take up to four to six weeks after the degree conferral date); and
- a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional six to eight weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education's Mary T. Kellner Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/?toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW–Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Colorado, Illinois, Minnesota, Wisconsin

The requirements of this program do not meet certification/licensure requirements in the following states:

Not applicable

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

ART STUDIO, CERTIFICATE

The Certificate in Art Studio allows students from across campus, regardless of their major or degree program, to engage in a structured, meaningful art studio experience. Students should work closely with their major advisor to see how the certificate requirements can fit into their degree plan. Note: Most art courses do not carry the LAS (L&S) designation.

This certificate was designed for students who may not have professional ambitions in the arts, but still have an interest in a special discipline and want to develop their talents; previous coursework in art is not required.

The program provides a course of study in four focus areas: 2D, 3D, 4D, or Photography. Students select one of these options and complete the courses required of this area of study.

For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two or three related electives that allow for the exploration and development of their skills specific to the area of focus. Students interested in graphic design and typography should consider the Graphic Design Certificate (<https://guide.wisc.edu/undergraduate/education/art/graphic-design-certificate/>), also offered through the Department of Art.

The Art Studio certificate may also appeal to individuals who have already completed a bachelor's degree in art, but now want to complete an emphasis in a different discipline; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>). In these instances, the student will work closely with an advisor in the Department of Art to substitute higher-level courses for the foundational studio courses.

HOW TO GET IN

HOW TO GET IN DECLARATION PROCESS

Students intending to complete the Art Studio certificate can find the declaration form on the School of Education's Certificate Programs page

(<https://education.wisc.edu/academics/certificates/>). The declaration for this certificate program can be submitted at any time during the academic year.

ELIGIBILITY

Undergraduate students in good academic standing with a cumulative GPA of 2.50 or higher, who are not participating in the Art-BS, Art Education, or Art-BFA degree programs, may declare this certificate. University Special students who have already completed a bachelor's degree are also eligible to complete this certificate.

REQUIREMENTS

REQUIREMENTS

The certificate requires a minimum total of 17-18 credits, depending on the selected area. It is possible to complete the certificate in three semesters, making it a viable option for most students, including transfers.

Select a course of study in one of four focus areas: 2D, 3D, 4D (time-based), or Photography, and complete the required courses. For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two or three related electives that allow for the exploration and development of their skills.

HISTORICAL CONTEXT OF ART/DESIGN

Students in all certificate focus areas must complete **one** of the following:

Code	Title	Credits
ART 100	Introduction to Art	3
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART HIST 206	Survey of Photography: 1839 to 1989	3-4

FOCUS AREAS

Focus One: Painting, Drawing, Printmaking

Ideal for the novice artist, as well as for students who want to develop previous skill in the creation of two-dimensional art. Students interested in pursuing this focus area can find more information about painting (<https://art.wisc.edu/media-disciplines/drawing-painting/>), drawing, (<https://art.wisc.edu/media-disciplines/drawing-painting/>) and printmaking (<http://art.wisc.edu/art/academics/media/printmaking/>) on the art department's website.

Code	Title	Credits
Foundations		
Complete one of the following:		
ART 102	2D Foundations	3

ART 531	Screen Performance	3-4
ART 636	Computer Augmented Printmaking	4
INTEGART 310	Interdisciplinary Artist in Residence Studio	1-3

Focus Four: Photography (Film and Digital)

Ideal for the novice artist, as well as for students who want to develop previous skill with photography. Students interested in pursuing this focus area can find more information about photography (<https://art.wisc.edu/media-disciplines/printmaking/>) on the art department's website. ART HIST 206 Survey of Photography: 1839 to 1989 is highly recommended as the historical context course.

Code	Title	Credits

---------	--	---

Development

Complete the following:

ART 376	Darkroom Photography	4
ART 476	Intermediate Photography	4
ART 576	Advanced Photography	4

PROGRESS AND COMPLETION REQUIREMENTS

A minimum cumulative GPA of 2.5 must be achieved and maintained across all certificate course work in order to remain in, and successfully complete the certificate. All courses required by the certificate must be taken for a grade; none may be taken on a pass/fail, credit/no credit basis or as an auditor.

At least 12 of the required credits must be completed in residence in the UW-Madison Department of Art. Courses taken in a study abroad program sponsored by UW-Madison do not count toward this residency requirement.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Correctly identify and explain important eras in historical and contemporary art practice.
2. Develop technical and conceptual skill in studio practice by consistently employing the elements and principles of effective visual art and/or design in their chosen focus area.

ART, BFA

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and technically advanced art works, and encourages the sharing of diverse points of view.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art & Artists First-Year Interest Group (<https://figs.wisc.edu/what/>) (FIG), before branching out into one or more specialized areas (<https://art.wisc.edu/media-disciplines/>):

- 4D Digital Media
- 4D Video and Performance
- Ceramics

- Drawing/Painting
- Glass/Neon
- Graphic Design
- Metals/Jewelry
- Printmaking/Book Arts
- Photography
- Sculpture
- Wood/Furniture

Potential careers for artists include creative director, content marketing manager, arts coordinator and studio manager, ceramics, glassblowing, metal fabrication, illustration, commercial or fine arts photographer, primary/secondary school art teacher, gallerist, or studio artist. Our graduates also work as community arts organizers, user experience designers, technical assistants for major film companies, jewelry designers and fabricators, book designers, museum preparators, and more!

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

"I did the first-year interest group (FIG) freshman year and it was a great way to find a core group of friends while navigating being away from home for the first time. I had never been around so many art people before, and it was invigorating to be able to share that interest with others who were just as passionate." – Cam Erhardt, Graphic Design Option (read more (https://education.wisc.edu/news/cam-erhardt-from-the-school-of-educations-art-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=art_majors&utm_id=student&utm_content=Student_Story))

admissions.wisc.edu/) for application information. Note that off-campus transfer students will be held to the UW-Madison admission GPA requirements. BFA candidates cannot transfer directly into the BFA program; instead, they will be admitted to campus as if pursuing a BS-Art degree (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the Department of Art advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

HOW TO GET IN

HOW TO GET IN PROGRAM ADMISSION OVERVIEW

Students interested in the Art-BFA degree, or Art-BFA with the Graphic Design named option, initially enroll in the Art-BS degree or Art-BS with the Graphic Design named option while completing prerequisite coursework and establishing other criteria for BFA eligibility. A BFA mentoring meeting to review a portfolio of work is part of the BFA selection process. Students will typically declare the BFA in their junior year and must have attained a minimum of junior standing. For the BFA, a BFA mentoring meeting may be scheduled during the semester that the required courses will be completed. For the BFA: Graphic Design named option, the declaration may be submitted during the semester that the required courses will be completed, with the exception of ART 102 2D Foundations and ART 107 Introduction to Digital Forms, which must be successfully completed.

APPLICATION AND ADMISSION

New freshmen and off-campus transfers are admitted directly to the Art-BS degree program and receive an ART classification. All art degree programs currently admit on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (<https://education.wisc.edu/admissions-aid/undergraduate-admissions/>) page for updates to eligibility requirements prior to submitting an application.

APPLICATION PROCEDURES

Prospective UW-Madison Applicants

The Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) makes final determinations regarding admission criteria and the status of all applicants. Additional information, including submission guidelines, is available on the How to Apply (<https://art.wisc.edu/undergraduate/undergraduate-application/>) page of the art department's website.

Current UW-Madison Students

On-campus students interested in pursuing the BFA must first apply to the Art-BS degree program. A meeting with an undergraduate advisor in the Department of Art is required, and can be scheduled using Starfish, (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) or by contacting the Department of Art at 608-262-1660. Upon completion of the BFA mentoring meeting (<https://art.wisc.edu/undergraduate/undergraduate-degrees/>) (see additional details below), students will complete an application signed by an undergraduate advisor in the Department of Art to move into the BFA program.

Transfer Students

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Note that off-campus transfer students will be held to the UW-Madison admission GPA requirements. BFA candidates cannot transfer directly into the BFA program; instead, they will be admitted to campus as if pursuing a BS-Art degree (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the Department of Art advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

Students With a Previous Degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must

compete with the eligible applicants for program admission.
More information is available here (p. 1494).

CRITERIA FOR ADMISSION

- Previous Art-BS or Art-BS Graphic Design named option degree program status.
- Cumulative grade point average of at least a 2.5 based on UW-Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- For the BFA degree and the BFA degree with the Graphic Design named option, successful completion or concurrent enrollment in the following courses:

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 108	Foundations of Contemporary Art	3
ART 208	Current Directions in Art	3
ART 212	Drawing Foundations	3

One course from each of the following. See Requirements section for course options:

2D Studio
3D Studio
4D Studio
Graphics

- For the Graphic Design named option, must have successfully completed ART 102 2D Foundations and ART 107 Introduction to Digital Forms.
- Minimum 3.0 Art studio course GPA.
- BFA mentoring meeting (<https://art.wisc.edu/undergraduate/undergraduate-degrees/>).
 - The declaration process includes a portfolio and artist statement that must be submitted only after all prerequisite coursework has been completed or during the semester the courses will be completed. The portfolio must contain images of work completed in college art courses. BFA mentoring meetings are held throughout the academic school year.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1494).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth-Humanities/Literature/Arts: 6 credits • Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth-Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Fine Arts (BFA) degree program in art has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. BFA students are required to reach an advanced level in two studio disciplines.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art Foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 2D Foundations, ART 212 Drawing Foundations, and ART 108 Foundations of Contemporary Art

for the fall semester and complete ART 104 3D Foundations, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENTS

The BFA programs require a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Liberal studies coursework in fine arts and literature can also count as aesthetics electives. Additional courses may be approved by the art department advisor.

REQUIRED AESTHETICS COURSES

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
Select two additional courses from the following:		8
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	
ART 438	History of Graphic Design and Typography ¹	

¹ If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

AESTHETICS ELECTIVES

Select from the following to complete the required 18 credits. Liberal studies coursework in fine arts and literature can also double count as aesthetics electives.

MAJOR REQUIREMENTS

The requirements listed here are effective for students admitted to the Art or BFA program effective summer, 2016. Students admitted prior to this time can find their major requirements listed in previous editions of the *Undergraduate Catalog* and on their DARS reports.

Bachelor of Fine Arts (BFA) Program: Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 total credits. Admission to the BFA program requires the completion of (or concurrent enrollment in) ART 102, ART 104, ART 107, ART 108, ART 208, ART 212, and one course in each of the 2D, 3D, 4D and graphics areas. Students must have a 3.0 GPA in their studio coursework to be considered for the BFA program and have attained a minimum of sophomore standing. Successful participation in a portfolio review is also part of the selection process. Application may be made during the semester that the required courses will be completed. See How to Get In (p. 1530) for details about the application process.

Major residency requirement. The BFA program requires that at least 36 credits of major studio coursework be completed in residence at UW–Madison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATIONS COURSES

Complete the following:

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Foundations	3

REQUIRED STUDIO BREADTH COURSES

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in at least two disciplines. BFA candidates are required to participate in an exhibit and concurrently enroll in a capstone course.

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4
ART 454	Neon: Light as Sculpture	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

Graphics

Select one of the following:

Code	Title	Credits
ART 306	Relief Printmaking	3-4
ART 316	Lithography	4
ART 326	Etching	4
ART 336	Serigraphy	3-4
ART 346	Basic Graphic Design	4
ART 348	Introduction to Digital Printmaking	4

ART COLLOQUIUM

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

ADVANCED STUDIO REQUIREMENT

Complete a 500-level or 600-level Art studio course in two disciplines. ART 508, ART 608, and ART 699 will **not** fulfill this requirement.

EXHIBIT PARTICIPATION

BFA students must participate at least once in the department-sponsored exhibit, held in the spring semester. Requires concurrent enrollment in the professional practices/capstone course.

PROFESSIONAL PRACTICES/CAPSTONE COURSE

BFA students must enroll in this course during the required semester of participation in the department-sponsored exhibit. Currently, offered as ART 448 section 10; a unique course number will be forthcoming.

ELECTIVE STUDIO COURSES

Select elective studio courses (<https://guide.wisc.edu/courses/art/>) to reach the minimum of 72 credits.

AREAS OF CONCENTRATION

Although a specific emphasis is not required, students may wish to develop an area of interest within the requirements of the BFA

program. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are some of the available tracks (<https://art.wisc.edu/media-disciplines/>) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible.

View as listView as grid

• ART: GRAPHIC DESIGN, BFA (P. 1539)

GPA AND OTHER GRADUATION REQUIREMENTS

These requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 Bascom Course and ART 338 Service Learning in Art).
- Major Residency: Students must complete at least 36 major credits while enrolled in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits are required for graduation in the Art–BFA degree program.

DEGREE AUDIT (DARS)

UW–Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, printmaking, photography, or graphic design media.
5. Demonstrate competency at an advanced level in at least two disciplines of student's choice. (Graphic design named options: one of the two disciplines must be in graphic design.)

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Fine Arts: Art – Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

ADVISING AND CAREERS

ADVISING AND CAREERS

ART DEPARTMENT ADVISING

Students declared in the BS–Art or BFA–Art major (including graphic design named options), as well as potential transfers into art, will meet with the Undergraduate Art Program Advisor or through email via artadvising@education.wisc.edu.

Prospective freshmen and art studio/graphic design certificate students will meet with the Prospective Student and Certificate Advisor or through email via artadvising@education.wisc.edu.

Current Art majors can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Certificate students can also use the Starfish app (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/109896>) to schedule an appointment. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search

- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Art Pathways (<https://careercenter.education.wisc.edu/explore-career/art-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

ART AND THE WISCONSIN EXPERIENCE

The UW–Madison Art Department provides a wide range of opportunities for students on campus and beyond. Available resources include courses that connect with the community, job opportunities, the chance to show work, and the ability to manage campus student organizations.

Visiting Artists

The Art department is unique in its ability to bring in weekly visiting artists through the Art Colloquium series. A professional national or international artist comes to campus to provide an artist's talk, studio visits, and general conversation about artmaking with students. Individual courses often bring in visiting artists throughout the semester to provide workshops on unique techniques from those who specialize in particular processes.

Career Advising and Internships

The School of Education Career Center (<https://careercenter.education.wisc.edu/>) has a designated advisor for art students who can provide connections with hourly campus employment, internships, and career options after graduation. The Art department offers courses that focus on internships in the arts and many studios hire hourly workers who learn the basics of maintaining an artist's studio space. The BFA capstone course also provides detailed instruction in writing a resume, cover letter, grant proposals, and residency applications.

Student Organizations

Student organizations are an excellent opportunity for art majors to establish connections with working artists, host workshops for the community, and raise funds for travel. Fresh Hot Press (printmaking), AIGA (graphic design), Mad Gaffers (glassblowing), and Art for Change (activism) are just a few of the art-related options (<https://art.wisc.edu/art-at-uw/student-orgs/>). Student organizations are led by undergraduates and graduate students, with several using fundraising throughout the year to attend national conferences. Overall, there are multiple ways for undergraduates to refine their professional and technical skills in relation to their future career goals in the arts through student organizations.

Exhibiting Artwork

It is important for any artist to consistently show their work, and the Art Department does its part to provide this professional development to our students. Undergraduates have the opportunity to reserve one of our three large-scale galleries to install their work for documentation and submission of future exhibitions. Students also work with faculty to submit their pieces into galleries throughout Madison, Milwaukee, and nationally. The Art Department works with students in many ways to help promote their work and develop the skills necessary to establish a thriving career in the world of art.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

ART: GRAPHIC DESIGN, BFA

REQUIREMENTS

REQUIREMENTS

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provide professional

preparation, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the BFA - Art (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/#requirementstext>) degree requirements.

AESTHETICS REQUIREMENTS - GRAPHIC DESIGN OPTION

The BFA Graphic Design option program requires a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Additional aesthetics courses may be approved by the art department advisor.

REQUIRED AESTHETICS COURSES

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
ART 438	History of Graphic Design and Typography	3

MAJOR REQUIREMENTS - GRAPHIC DESIGN OPTION

Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 credits. At least 36 credits of major studio coursework be completed in residence at UW-Madison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATION COURSES - GRAPHIC DESIGN OPTION

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Foundations	3

REQUIRED STUDIO BREADTH COURSES - GRAPHIC DESIGN OPTION

Complete one course in each of the Graphic Design, 2D, 3D, and 4D areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in graphic design and also in another discipline.

Graphic Design

Code	Title	Credits
ART 346	Basic Graphic Design	4

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4
ART 454	Neon: Light as Sculpture	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

VISITING ARTIST LECTURE SERIES - GRAPHIC DESIGN OPTION

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

ADDITIONAL STUDIOS - GRAPHIC DESIGN OPTION

Complete at least 20 studio credits of graphic design coursework, **to include at least one 500 or 600 level course**, from the following list:

Code	Title	Credits
ART 333	Intro to Responsive Web Design	4
ART 356	Coding for Graphic Design	4
ART 458	Graphic Design for Branding and Identity	4
ART 463	Information Graphics	4
ART 465	Graphic Design for Packaging	4
ART 467	Graphic Design for Posters	4
ART 525	Advanced Typography	4
ART 546	Graphic Design for Publications	4
ART 556	Graphic Design for Interactive Media	4
ART 558	Product Development for Graphic Design	4
ART 560	Graphic Design Senior Thesis Project and Exhibition	4
ART 563	Graphic Design for Games	4
ART 564	Graphic Design for Accessibility	4
ART 565	Typeface Design	4
ART 568	Motion Typography	4
ART 575	User Experience for Graphic Design	4
ART 656	Design Portfolio and Professional Practice	4
ART 663	Graphic Design Practicum	2

ADVANCED LEVEL COURSE IN A SECOND DISCIPLINE

BFA-Art Graphic Design option students must plan for and complete an advanced-level (500-600) studio course in a secondary discipline of their choice. Common selections are in digital media, drawing/painting, video, glass, printmaking, and photography.

ELECTIVE STUDIO COURSES

Select additional elective studio courses (<https://guide.wisc.edu/courses/art/>) to reach the minimum of 72 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW-Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 36 credits of major coursework in the UW-Madison Art Department. All graphic design coursework must be completed in residence.

- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits must be completed to earn the BFA degree.

DEGREE AUDIT (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Fine Arts: Art - Graphic Design Named Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

Freshman

ART, BS

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and technically advanced art works, and encourages the sharing of diverse

points of view. Students can pair the BS Art degree with many different majors on campus in order to work toward specific career goals.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art & Artists First-Year Interest Group (<https://figs.wisc.edu/what/>) (FIG), before branching out into one or more specialized areas (<https://art.wisc.edu/media-disciplines/>):

- 4D Digital Media
- 4D Video and Performance
- Ceramics
- Drawing/Painting
- Glass/Neon
- Graphic Design
- Metals/Jewelry
- Printmaking/Book Arts
- Photography
- Sculpture
- Wood/Furniture

Potential careers for artists include creative director, content marketing manager, arts coordinator and studio manager, ceramics, glassblowing, metal fabrication, illustration, commercial or fine arts photographer, primary/secondary school art teacher, gallerist, or studio artist. Our graduates also work as community arts organizers, user experience designers, technical assistants for major film companies, jewelry designers and fabricators, book designers, museum preparators, and more!

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

"I came in as a Communication Arts major and knew I wanted to get an Art certificate. Then, through the art classes at UW, I was like, this is where I need to be and went full Art [major] my sophomore year." – Wylie Knight (read more (https://education.wisc.edu/news/wylie-knight-from-the-school-of-educations-art-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=art_majors&utm_id=stu))

HOW TO GET IN

HOW TO GET IN PROGRAM ADMISSION OVERVIEW

The Art-BS degree program currently admits on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (<https://education.wisc.edu/admissions-aid/undergraduate-admissions/>) page for eligibility requirements prior to submitting an application.

ENTERING THE SCHOOL OF EDUCATION

Prospective UW–Madison Applicants

The Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) makes final determinations regarding admission criteria and status of all applicants. Additional information, including submission guidelines, is available on the How to Apply (<https://art.wisc.edu/undergraduate/>)

undergraduate-application/) page of the art department's website.

New and Current UW–Madison Students

New freshmen and off-campus transfers are admitted directly to the Art–BS degree program. Students planning on declaring the Art–BS: Graphic Design named option should first declare Art–BS. The successful completion of ART 102 2D Foundations and ART 107 Introduction to Digital Forms is required to declare the named option. All other on-campus students interested in becoming Art students must follow the application procedures outlined below.

Prospective Transfer Students

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. BFA candidates cannot transfer directly into the Art–BFA degree program; instead, they will be admitted to campus as if pursuing the Art–BS degree program (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the art department advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

Students With A Previous Degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1494).

APPLICATION AND ADMISSION

On-campus students should contact an undergraduate advisor in the Department of Art to discuss their interest in pursuing the Art–BS degree program. This meeting is required and can be scheduled using Starfish, (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) or by contacting the Department of Art at 608-262-1660. An application to the Art–BS degree program will be completed after this meeting.

Criteria for Admission

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- If applying for named option in Graphic Design, successful completion of ART 102 2D Foundations and ART 107 Introduction to Digital Forms.
- Filing of all required paperwork, including professional program application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) and transcripts. Application must be signed by the art department advisor.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1494).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth–Humanities/Literature/Arts: 6 credits
- Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth–Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The bachelor of science (BS) degree program in art has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- The *Foundations Program* requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- *Aesthetics* coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- *Major* requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. BS–Art majors are required to reach an advanced level in at least one studio discipline.
- *Elective* credits to pursue individual areas of interest, such as a second major or additional studio credits. Many BS–Art students complete an additional major from the College of Letters & Science. Some use this major to complement their art preparation (e.g., focusing on written communication for an eventual career in advertising), or a subject that complements their interest in art. Students interested in medical illustration, for example, may wish to take courses in the biological sciences. Others select majors that reflect interests completely unrelated to art.

ART FOUNDATIONS PROGRAM

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 2D Foundations, ART 212 Drawing Foundations, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 3D Foundations, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists First-Year Interest Group (FIG), (<https://figs.wisc.edu/>) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (<https://art.wisc.edu/media-disciplines/foundations/>) is available on the departmental website.

AESTHETICS REQUIREMENTS

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3
ART 208	Current Directions in Art (component of the Foundations Program)	3
Select two additional courses from the following:		8
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	
ART 438	History of Graphic Design and Typography ¹	

¹ If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

MAJOR REQUIREMENTS

The requirements listed here are effective for students admitted to the program effective summer 2016. Students admitted prior to this time can find their major requirements listed in previous editions of the *Undergraduate Catalog* and on their DARS reports.

Complete a minimum of 45 studio credits, including the specific coursework below. No more than 58 studio credits will be counted toward the minimum 120 credits required for the BS degree. Thus, if a student wishes to graduate with the minimum of 120 credits, 62 of these credits must be "non-studio" coursework.

Major residency requirement: Students completing the BS degree must complete at least 24 credits of major studio coursework in residence on the UW-Madison campus.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATIONS COURSES

Complete the following:

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Foundations	3

REQUIRED STUDIO BREADTH COURSES

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in at least one discipline.

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4
ART 454	Neon: Light as Sculpture	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

Graphics

Select one of the following:

Code	Title	Credits
ART 306	Relief Printmaking	3-4
ART 316	Lithography	4
ART 326	Etching	4
ART 336	Serigraphy	3-4
ART 346	Basic Graphic Design	4
ART 348	Introduction to Digital Printmaking	4
ART 376	Darkroom Photography	4
ART 446	Artists' Books	4

ART COLLOQUIUM

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

ADVANCED STUDIO REQUIREMENT

Complete a 500-level or 600-level art studio course in at least one discipline. ART 508, ART 608, and ART 699 will not fulfill this requirement.

ELECTIVE STUDIO COURSES

Select elective studio courses (<https://guide.wisc.edu/courses/art/>) to reach the minimum of 45 credits.

AREAS OF CONCENTRATION

Although a concentration is not required, students may wish to select a sequence of related courses to develop an area of interest. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are just some of the concentrations (<https://art.wisc.edu/media-disciplines/>) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible..

View as listView as grid

· ART: GRAPHIC DESIGN, BS (P. 1551)

ELECTIVE COURSEWORK

BS–Art students must complete additional coursework to reach the minimum 120 credits required for the degree. These students must complete a minimum of 62 non-studio credits. Another way of describing this requirement is that only 13 additional studio credits beyond the required 45 credits can count toward the 120 credits. Students interested in completing more than 58 total studio credits may wish to consider the BFA degree program, which requires at least 72 studio credits.

Completing an additional major. Students choosing the BS–Art option often also choose to complete an additional major in the College of Letters & Science. Review Academic Policies and Procedures (p. 1494) to find detailed information about declaring an additional L&S major while a student in the School of Education.

Completing two degree programs. Students also occasionally choose a second degree in another campus school or college. For instance, students may choose an Art degree program as well as a science degree program in the College of Agricultural and Life Sciences. See Academic Policies and Procedures (p. 1494) for more detailed information about the requirements and the approvals necessary to be permitted to complete dual degrees. Important note: Some campus schools/colleges do not permit dual degrees; at the present time this includes the College of Letters & Science and the College of Engineering. These policies do not permit students to complete, for example, an art degree program and a journalism degree program.

Students interested in additional majors or dual degrees should consult carefully with an advisor in the School of Education Student Services office. Students may be referred to the associate dean for additional consultation and approvals.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.5 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in residence on the UW–Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 non-studio credits are required for graduation in the Art–BS degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, and in a choice of printmaking, photography, or graphic design media.
5. Demonstrate competency at an advanced level in at least one discipline of student's choice. (Graphic design named option: Generate advanced level competency in graphic design.)

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Science in Art: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

¹ At least 62 "non-studio" credits must be taken to complete the BS Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

ADVISING AND CAREERS

ADVISING AND CAREERS

ART DEPARTMENT ADVISING

Students declared in the BS–Art or BFA–Art major (including graphic design named options), as well as potential transfers into art, will meet with Undergraduate Art Program Advisor A`ha Vuong, ttvuong@wisc.edu, or through artadvising@education.wisc.edu.

Prospective freshmen and art studio/graphic design certificate students will meet with the Prospective Student and Certificate Advisor Annmarie Suglio, suglio@wisc.edu, or through artadvising@education.wisc.edu.

Current Art majors can schedule an appointment with Anna online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Certificate students can also use the Starfish app (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/109896>) to schedule an appointment with Annmarie. Appointments can also be made via email or, by calling 608-262-1660. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Art Pathways (<https://careercenter.education.wisc.edu/explore-career/art-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

ART AND THE WISCONSIN EXPERIENCE

The UW-Madison Art Department provides a wide range of opportunities for students on campus and beyond. Available resources include courses that connect with the community, job opportunities, the chance to show work, and the ability to manage campus student organizations.

Visiting Artists

The Art Department is unique in its ability to bring in weekly visiting artists through the Art Colloquium series. A professional national or international artist comes to campus to provide an artist's talk, studio visits, and general conversation about artmaking with students. Individual courses often bring in visiting artists throughout the semester to provide workshops on unique techniques from those who specialize in particular processes.

Career Advising and Internships

The School of Education Career Center (<https://careercenter.education.wisc.edu/>) has a designated advisor for art students who can provide connections with hourly campus employment, internships, and career options after graduation. The Art Department offers courses that focus on internships in the arts and many studios hire hourly workers who learn the basics of maintaining an artist's studio space. The BFA capstone course also provides detailed instruction in writing a resume, cover letter, grant proposals, and residency applications.

Student Organizations

Student organizations are an excellent opportunity for art majors to establish connections with working artists, host workshops for the community, and raise funds for travel. Fresh Hot Press (printmaking), AIGA (graphic design), Mad Gaffers (glassblowing), and Art for

Change (activism) are just a few of the art-related options (<https://art.wisc.edu/art-at-uw/student-orgs/>). Student organizations are led by undergraduates and graduate students, with several using fundraising throughout the year to attend national conferences. Overall, there are multiple ways for undergraduates to refine their professional and technical skills in relation to their future career goals in the arts through student organizations.

Exhibiting Artwork

It is important for any artist to consistently show their work, and the Art Department does its part to provide this professional development to our students. Undergraduates have the opportunity to reserve one of our three large-scale galleries to install their work for documentation and submission of future exhibitions. Students also work with faculty to submit their pieces into galleries throughout Madison, Milwaukee, and nationally. The Art Department works with students in many ways to help promote their work and develop the skills necessary to establish a thriving career in the world of art.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

ART: GRAPHIC DESIGN, BS

REQUIREMENTS

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provides professional preparation, exhibition experience, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the BS Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/#requirementstext>) degree requirements.

AESTHETICS REQUIREMENTS - GRAPHIC DESIGN OPTION

Code	Title	Credits
ART 108	Foundations of Contemporary Art (component of the Foundations Program)	3

ART 208	Current Directions in Art (component of the Foundations Program)	3
ART 438	History of Graphic Design and Typography	3
Select one additional courses from the following:		4
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 205	Global Arts	

MAJOR REQUIREMENTS - GRAPHIC DESIGN OPTION

Complete a minimum of 45 studio credits, including the specific coursework below. No more than 58 studio credits will be counted toward the minimum 120 credits required for the BS degree. Thus, if a student wishes to graduate with the minimum of 120 credits, 62 of these credits must be "non-studio" coursework.

Major residency requirement: Students completing the BS degree must complete at least 24 credits of major studio coursework in residence on the UW-Madison campus. All graphic design coursework must be completed in residence.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATION COURSES - GRAPHIC DESIGN OPTION

Complete the following:

Code	Title	Credits
ART 102	2D Foundations	3
ART 104	3D Foundations	3
ART 107	Introduction to Digital Forms	3
ART 212	Drawing Foundations	3

REQUIRED STUDIO BREADTH COURSES - GRAPHIC DESIGN OPTION

Complete one course in each of the Graphic Design, 2D, 3D, and 4D areas. Students will also take ART 508 at least once and complete a 500-level or 600-level art studio course in graphic design.

Graphic Design

Code	Title	Credits
ART 346	Basic Graphic Design	4

2D Studio

Select one of the following:

Code	Title	Credits
ART 222	Introduction to Painting	3-4
ART 232	Life Drawing I	4
ART 242	Watercolor I	3-4
ART 302	Color	4
ART 312	Intermediate Drawing I	3-4

3D Studio

Select one of the following:

Code	Title	Credits
ART 214	Sculpture I	4
ART 224	Ceramics I	4
ART 244	Art Metal I	3-4
ART 334	Wood Working	3-4
ART 343	Metal Fabrication and Welding in Sculpture	3-4
ART 354	Glassworking	4
ART 454	Neon: Light as Sculpture	4

4D Studio

Select one of the following:

Code	Title	Credits
ART 309	Digital Art and Code	4
ART 318	Introduction to Video, Performance & Installation Art	4
ART 338	Service Learning in Art	2
ART 409	Digital Fabrication Studio	4
ART 428	Digital Imaging Studio	4
ART 429	3D Digital Studio I	4
ART 470	Special Topics in 4D Art	3-4
ART 521	Installations and Environments	4
ART 531	Screen Performance	3-4

VISITING ARTIST LECTURE SERIES - GRAPHIC DESIGN OPTION

Complete the following:

Code	Title	Credits
ART 508	Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)	1

ADDITIONAL STUDIOS - GRAPHIC DESIGN OPTION

Complete 12 Graphic Design elective credits from the following list, to include at least one 500 or 600 level course.

Code	Title	Credits
ART 333	Intro to Responsive Web Design	4
ART 356	Coding for Graphic Design	4
ART 458	Graphic Design for Branding and Identity	4
ART 463	Information Graphics	4
ART 465	Graphic Design for Packaging	4
ART 467	Graphic Design for Posters	4
ART 525	Advanced Typography	4
ART 546	Graphic Design for Publications	4
ART 556	Graphic Design for Interactive Media	4
ART 558	Product Development for Graphic Design	4

ART 560	Graphic Design Senior Thesis Project and Exhibition	4
ART 563	Graphic Design for Games	4
ART 564	Graphic Design for Accessibility	4
ART 565	Typeface Design	4
ART 568	Motion Typography	4
ART 575	User Experience for Graphic Design	4
ART 656	Design Portfolio and Professional Practice	4
ART 663	Graphic Design Practicum	2

ELECTIVE STUDIO COURSESSelect additional elective studio courses (<https://guide.wisc.edu/courses/art/>) to reach the minimum of 45 credits.**GPA AND OTHER GRADUATION REQUIREMENTS**

Requirements are based on UW-Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.75 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.75 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in the UW-Madison Art Department. All graphic design coursework must be completed in residence.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 non-studio credits are required for graduation in the Art-BS degree program.

DEGREE AUDIT (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Science in Art: Graphic Design Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

¹ At least 62 "non-studio" credits must be taken to complete the BS Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

GRAPHIC DESIGN, CERTIFICATE

The Graphic Design Certificate allows students from across campus, regardless of their major or degree program, to engage in a meaningful, rigorous sequence of coursework introducing them to the field of graphic design. Previous college coursework or job experience in art and design is very beneficial, but not required.

An inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic designers function as the "fusion" between art, business, engineering, research, and science fields. Students intending to pursue a career in graphic design should instead select the Graphic Design named option in either the BS-Art (<https://guide.wisc.edu/undergraduate/education/art/art-bs/#text>) or Art BFA (<https://guide.wisc.edu/undergraduate/education/art/art-bfa/>) degree program. Contact an advisor in the Art Department to explore the major.

Students must complete a required foundations course before being able to declare the certificate.

Due to the required sequencing of courses, a minimum of four semesters (excluding summers) are usually necessary to complete the certificate; please plan accordingly.

HOW TO GET IN

HOW TO GET IN
DECLARATION PROCESS

Students intending to complete the Graphic Design certificate can find the declaration form on the School of Education's Certificate Programs page (<https://education.wisc.edu/academics/certificates/>). The declaration for this certificate program can be submitted at any time during the academic year. At least four regular (non-summer) semesters remaining after declaring are required to complete the Graphic Design certificate on time.

ELIGIBILITY

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, and who have completed either ART 102 2D Foundations or ART 107 Introduction to Digital Forms with a grade of B or higher, may declare this certificate. University Special students are also eligible to complete this certificate if they started at UW-Madison and graduated before completing the requirements.

Students participating in the Art-BS, Art Education, or Art-BFA degree programs may not declare this certificate. Auditors are also not eligible.

REQUIREMENTS

REQUIREMENTS

The Graphic Design Certificate requires a minimum of 18 credits as distributed below. At least 12 credits must be completed in residence in the Art Department. Study abroad credits do not count toward the residency requirement.

Completion of the certificate requires a 2.75 grade point average across all certificate coursework.

Code	Title	Credits
To declare the certificate, complete either course with a grade of B or better		
ART 102 or ART 107	2D Foundations (preferred) Introduction to Digital Forms	3
After certificate declaration, complete both courses		
ART 346	Basic Graphic Design	4
ART 438	History of Graphic Design and Typography	3
After completing ART 346 and ART 438, complete at least 8 additional credits from the following		8
ART 333	Intro to Responsive Web Design	
ART 356	Coding for Graphic Design	
ART 458	Graphic Design for Branding and Identity	
ART 463	Information Graphics	
ART 465	Graphic Design for Packaging	
ART 467	Graphic Design for Posters	
ART 525	Advanced Typography	
ART 546	Graphic Design for Publications	

ART 556	Graphic Design for Interactive Media
ART 558	Product Development for Graphic Design
ART 560	Graphic Design Senior Thesis Project and Exhibition
ART 563	Graphic Design for Games
ART 564	Graphic Design for Accessibility
ART 565	Typeface Design
ART 568	Motion Typography
ART 575	User Experience for Graphic Design
ART 663	Graphic Design Practicum

Total Credits 18

UNDERGRADUATE/SPECIAL
STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Correctly recognize and identify important eras, developments, movements, and theories in historical and contemporary design practice.
2. Recognize, develop and consistently employ the elements and principles of effective graphic design and typography in their own studio work, and will recognize it in the work of other artists.
3. Demonstrate technical and conceptual proficiency and will apply critical thinking skills in order to contextualize their practice in the contemporary design arena.
4. Understand the steps, tools, and skills necessary for participating in professional activities pertaining to graphic design and typography.
5. Develop a strong work ethic driven by both logical and inventive working process.

CURRICULUM AND
INSTRUCTION

The Department of Curriculum and Instruction is one of the premier research and teaching departments devoted to understanding the complex world of teaching, learning, curriculum, and policy. Faculty pursue a diverse array of research combining experience in schools with expertise drawn from a range of disciplinary fields. This world-class research is the

foundation of its work preparing future teachers and the next generation of educational researchers.

The department offers an undergraduate degree program in Elementary Education (p. 1567). Students interested in Elementary Education can pursue one of five dynamic certification options:

- Kindergarten through Ninth Grade (p. 1574) – Students completing this core program option will be certified to teach general education at the grade levels of K-9 and will also be eligible to teach in a 4K classroom.
- English as a Second Language (ESL) K-12 (p. 1578) and also Kindergarten through Ninth Grade (p. 1574) – A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) and also English as a Second Language in grades K-12.
- Early Childhood Education (ECE) (p. 1565) and Kindergarten through Ninth Grade (p. 1574) – A minor in Early Childhood can also be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4K) and also in Early Childhood (birth through grade 3).
- Kindergarten through Ninth Grade (p. 1574), and Early Childhood Education (p. 1565), and English as a Second Language K-12 (p. 1578) – Students may opt to complete both the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas: general education in grades K-9 (including eligibility for 4K), Early Childhood (birth through grade 3), and also English as a Second Language in grades K-12.
- Kindergarten through Ninth Grade and also Special Education K-12 (Dual Certification) (p. 1682) – Students interested in both Elementary and Special Education should investigate the new Elementary Education and Special Education degree, housed in the Department of Rehabilitation Psychology and Special Education. Upon completion, students are certified in general education at the grade levels of K-9 (including eligibility for 4K), and also Special Education in grades K-12.

Three certificate programs, Arts and Teaching (p. 1555), Game Design (p. 1581), and Preparing to Teach Abroad (p. 1595), may be completed by undergraduates from across the campus.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

Undergraduate programs are offered in the areas listed below. Upon successful completion of a program leading to certification, candidates are certified in their respective subject and grade level and become eligible for a Wisconsin teaching license obtained through the Wisconsin Department of Public Instruction.

Note: Students at UW–Madison become certified to teach secondary English, Mathematics, Science, Social Studies, and World Languages only through graduate-level coursework, not as undergraduates. Information

about the Master's degree program is available at UW–Madison Teach (<https://uwteach.education.wisc.edu/>).

- Arts and Teaching, Certificate (p. 1555)
- Biology, Minor (p. 1557)
- Chemistry, Minor (p. 1559)
- Communication Sciences and Disorders, BSE (p. 1560)
- Early Childhood Education, Minor (p. 1565)
- Earth Science, Minor (p. 1566)
- Economics, Minor (p. 1566)

- Psychology, Minor (p. 1597)
- Science Specialized, Minor (p. 1598)
- Social Studies, Minor (p. 1598)
- Sociology, Minor (p. 1607)

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

ARTS AND TEACHING, CERTIFICATE

The Certificate in Arts and Teaching is a great opportunity for undergraduate art-makers from all disciplines to incorporate teaching into their professional practice. The teaching artist is a valued professional in a range of learning settings from museums to theatre companies to providing support for school-based arts programs. We are excited to offer undergraduates from across campus the opportunity to learn about theories of teaching and learning, to work alongside future classroom teachers and other arts practitioners, and to get the opportunity to try out teaching artist work in a community-based learning setting. We also strongly encourage future teachers who want to meaningfully incorporate the arts into their teaching practice to be a part of the certificate program.

The program offers a range of experiences in introductory education and arts practice, including a teaching artist practicum. This program is

for all student-artists, those who are majoring in the arts and those who practice their art form in their lives outside of the classroom. While you will not earn a teaching license to teach art in schools, the completion of this certificate will likely make you more competitive for jobs that require teaching experience in the arts, including afterschool programs, museum education, non-profit organizations, and private arts studios.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Arts and Teaching. Students should meet with the certificate advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the declaration form located on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page.

REQUIREMENTS

REQUIREMENTS

The Certificate in Arts and Teaching requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Students must complete two required courses, one course in Foundations of Teaching and Learning, and two courses from the Arts listing. Students are encouraged to take Arts courses that will broaden their artistic practice.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

THEATRE 357	Introduction to Theatre for Cultural and Social Awareness	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Gain understanding of the theories of teaching and learning that guide informal learning environments
2. Experience a breadth of artistic practice, including those outside a student's primary artistic discipline
3. Develop a framework for arts teaching in informal learning environments

4. Create an arts program for an informal learning environment that integrates theories of teaching and learning with disciplinary arts practice

BIOLOGY, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with a biology undergraduate advisor (<http://biologymajor.wisc.edu/advising/>) to discuss course selection and other issues related to this field of study. The Biology Major website (<http://biologymajor.wisc.edu/>) is also a good resource, providing information about areas of study within biology and upcoming biology-related activities on campus. Biology is offered as a major in both the College of Letters & Science and the College of Agricultural and Life Sciences.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

The Biology minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all Biology minor coursework taken on the UW-Madison campus. Biocore sequence coursework may also be used to meet these requirements; consult with an advisor in Education Student Services.

Discipline-related course work is also required, but not calculated into the minor credits or GPA.

REQUIRED DISCIPLINE-RELATED COURSES

Code	Title	Credits
Select a minimum of 6 credits in Mathematics (MATH) and/or Statistics (STAT)		
Select one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	

CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	

MINOR REQUIREMENTS

Introductory Biology

Select one of the following options:

Code	Title	Credits
Option 1: ¹		
BIOLOGY/ ZOOLOGY 101	Animal Biology	3
BIOLOGY/ ZOOLOGY 102	Animal Biology Laboratory	2
BIOLOGY/ BOTANY 130	General Botany	5
Option 2:		
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5
BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology	5

¹ Students earning Advanced Placement (AP) or International Baccalaureate (IB) Biology scores of 4 or above are given credit for BIOLOGY/BOTANY/ZOOLOGY 151 at UW–Madison. This course fulfills the entire 151–152 sequence. Students taking BIOLOGY/BOTANY/ZOOLOGY 151 coursework at UW–Madison or transfer it from another campus must complete both BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152 to complete the 151–152 sequence.

Genetics

Code	Title	Credits
GENETICS 466	Principles of Genetics	3

Electives

Complete biology elective coursework from the approved lists to reach a minimum of 24 credits. The courses must be numbered 300 and above and include at least one course from two of the following three areas:

(1) Ecology, Evolution, Genetics, (2) Cell and Molecular Biology, and (3) Physiology. Additional courses may, with the consent of an advisor, be selected to meet the elective requirements.

Area 1: Ecology/Evolution/Genetics

Code	Title	Credits
AN SCI 610	Quantitative Genetics	3
BOTANY 300	Plant Anatomy ¹	4
BOTANY 305	Plant Morphology and Evolution ¹	4
BOTANY 330	Algae	3
BOTANY/ PL PATH 332	Fungi ¹	4
BOTANY 400	Plant Systematics ¹	4

BOTANY 401	Vascular Flora of Wisconsin ¹	4
BOTANY/ F&W ECOL 402	Dendrology: Woody Plant Identification and Ecology ¹	3
BOTANY 403	Field Collections and Identification ¹	1-4
BOTANY 422	Plant Geography	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin ¹	4
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology ¹	4
BOTANY/ PL PATH 563	Phylogenetic Analysis of Molecular Data	3
ZOOLOGY/ ENTOM 302	Introduction to Entomology ¹	4
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources	2
ZOOLOGY 316	Laboratory for Limnology- Conservation of Aquatic Resources ¹	2-3
ZOOLOGY/ENTOM/ M M & I/PATH- BIO 350	Parasitology	3
ZOOLOGY/ ENVIR ST/ F&W ECOL 360	Extinction of Species	3
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY/ BOTANY/ F&W ECOL 460	General Ecology ¹	4
ZOOLOGY/ ENVIR ST 510	Ecology of Fishes	3
ZOOLOGY/ ENVIR ST 511	Ecology of Fishes Lab ¹	2
ZOOLOGY/AN SCI/ F&W ECOL 520	Ornithology	3
ZOOLOGY/AN SCI/ F&W ECOL 521	Birds of Southern Wisconsin ¹	3
ENTOM 331	Taxonomy of Mature Insects ¹	4
ENTOM 468	Studies in Field Entomology ¹	3
GENETICS/ MD GENET 565	Human Genetics	3
GENETICS/ BIOCHEM/ MICROBIO 612	Prokaryotic Molecular Biology	3
GENETICS/ BIOCHEM/ MD GENET 620	Eukaryotic Molecular Biology	3
PLANTSCI 501	Principles of Plant Breeding	3
LAND ARC/ ENVIR ST 361	Wetlands Ecology ¹	3
PL PATH 300	Introduction to Plant Pathology ¹	4

¹ Courses are lab or field courses.

Area 2: Cell and Molecular Biology

Code	Title	Credits
MICROBIO 303	Biology of Microorganisms	3
M M & I/PATH-BIO 528	Immunology	3
BOTANY/PL PATH 563	Phylogenetic Analysis of Molecular Data	3
PL PATH/M M & I/ONCOLOGY 640	General Virology-Multiplication of Viruses	3
GENETICS/BIOCHEM/MICROBIO 612	Prokaryotic Molecular Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 570	Cell Biology	3

Area 3: Physiology

Code	Title	Credits
BOTANY 500	Plant Physiology	3-4
ZOOLOGY 611	Comparative and Evolutionary Physiology	3
ZOOLOGY 612	Comparative Physiology Laboratory ¹	2
ANAT&PHY 335	Physiology ¹	5

¹ Courses are lab or field courses.

CHEMISTRY, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Chemistry is housed in the College of Letters & Science. Students may wish to consult with a chemistry undergraduate advisor (<http://www.chem.wisc.edu/content/undergraduate-advising/>) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs.

To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

PREREQUISITES

While there are no specific course requirements for declaring the minor, students can expect to take some of these courses before being eligible for enrolling in the minor coursework:

Code	Title	Credits
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Organic Chemistry I	3
MATH 222	Calculus and Analytic Geometry 2	4
PHYSICS 201 or PHYSICS 207	General Physics	5
PHYSICS 247	A Modern Introduction to Physics	5

Prerequisite coursework may be used to meet liberal studies requirements.

REQUIREMENTS

REQUIREMENTS

PREREQUISITE COURSEWORK

Students must complete prerequisite coursework (p. 1559) before enrolling in some of the required courses for minor.

MINOR REQUIREMENTS

A minimum cumulative grade point average of 2.75 is required, based on all chemistry minor coursework taken on the UW-Madison campus.

Complete at least 22 credits, including the following:

Code	Title	Credits
Introductory Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115	Chemical Principles I	
Analytical Chemistry		
Select one of the following:		4-5
CHEM 327	Fundamentals of Analytical Science	
CHEM 329	Fundamentals of Analytical Science	
CHEM 116 & CHEM 115	Chemical Principles II and Chemical Principles I	
Organic Chemistry		
Select one of the following options:		7-8
Option 1:		
CHEM 341	Elementary Organic Chemistry	
CHEM 342	Elementary Organic Chemistry Laboratory	
BIOCHEM 501	Introduction to Biochemistry	
Option 2:		
CHEM 343	Organic Chemistry I	
CHEM 344	Introductory Organic Chemistry Laboratory	
CHEM 345	Organic Chemistry II	

Inorganic Chemistry **4**

CHEM 311 Chemistry Across the Periodic Table

Physical Chemistry **3**

CHEM 561 Physical Chemistry I

or CHEM 665 Biophysical Chemistry

ElectivesComplete Chemistry electives to total 22 credits¹

¹ CHEM 346 Intermediate Organic Chemistry Laboratory is recommended. BIOCHEM 501 Introduction to Biochemistry, CIV ENGR 500 Water Chemistry, CBE 440 Chemical Engineering Materials, CBE 540 Polymer Science and Technology, are also recommended elective options.

COMMUNICATION SCIENCES AND DISORDERS, BSE

Admission to the Communication Sciences and Disorders BSE was suspended in the fall of 2023, and the program will be discontinued as of fall 2026. If you have any questions, please contact the department. Students must complete their degree requirements no later than the summer of 2026.

UW–Madison continues to offer an undergraduate degree in Communication Sciences and Disorders (<https://csd.wisc.edu/undergraduate/>) through the College of Letters and Science.

HOW TO GET IN

HOW TO GET IN

Admission to the Communication Sciences and Disorders BSE was suspended in the fall of 2023, and the program will be discontinued as of fall 2026. If you have any questions, please contact the department.

PROGRAM ADMISSION OVERVIEW

The School of Education's Communication Sciences and Disorders program currently accepts students during both fall and spring semesters. Prospective applicants typically begin taking the three-course "gateway course" sequence (detailed below) as sophomores.

ENTERING THE SCHOOL OF EDUCATION

Admission to the School of Education as a "Pre-Professional" Student

New freshmen and transfer students interested in communication sciences and disorders are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in communication sciences and disorders receive the "pre-professional" classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A

minimum GPA of 2.5, based on UW–Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1561)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

Transfer Students

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

Students with a Previous Degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1494).

APPLICATION AND ADMISSION

The communication sciences and disorders degree program currently accepts students during both fall and spring semesters. Requirements and selection criteria may be modified from one application/admission period to the next.

Criteria for Program Admission Eligibility for consideration requires:

- Fifty-four (54) or more transferable semester credits (junior standing) completed by the end of the semester prior to admission. Students can first apply during the semester that they will be completing 54 or more credits.
- A cumulative grade-point average of at least a 2.75 (on a 4.0 scale) based on all college-level coursework attempted (as modified by the Last 60 Credits Rule; see below). Grade-point averages are calculated from both Madison campus coursework and coursework taken at any other colleges or universities.¹
- Completion of the "gateway courses," CS&D 201 Anatomy and Physiology of Speech Production (3 cr), CS&D 202 Hearing Science (3 cr), and CS&D 240 Language Development in

Children and Adolescents (3 cr). If any "gateway" courses were taken on another campus, then the first three Communication Sciences and Disorders courses taken at UW–Madison become the "gateway" courses.

- A minimum 3.0 GPA across CS&D 201, CS&D 202, and CS&D 240 the first time these courses are attempted. If any "gateway" course was taken on another campus, students must earn a minimum 3.0 GPA on the first three communication and sciences disorders courses taken at UW–Madison. Note that "gateway" courses may **not** be repeated for the purpose of raising the student's "gateway" course GPA.
- A cumulative GPA of at least a 3.0 on all major coursework completed to date, excluding CS&D 110 Introduction to Communicative Disorders.
- Completed program application (see details below).
- Note: In previous years, applicants to teacher education programs were required to submit scores from one of the following exams: ACT, SAT, Praxis I/PPST, Praxis Core, or GRE. Under emergency rules announced by the Wisconsin Department of Public Instruction, no applicants need to submit scores for any exam as a component of their application to this program. The exam requirement was officially removed by the School of Education on November 15, 2017.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

Application Procedures

Submit completed program application materials specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page. Official transcripts from all other colleges or universities attended are required. Applications cannot be processed unless a complete academic record is presented for consideration.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The School of Education undergraduate degree provides students with a conceptual background in the field of communication sciences and disorders and includes five categories of coursework:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major* coursework offers in-depth study of foundations for clinical practice.
- *Discipline-related* coursework supports the major coursework.
- *Education* coursework examines many aspects of the educational enterprise, including child development and learning, societal expectations of schools and instruction, and teaching methods.
- *Elective* coursework is taken to meet the minimum of 120 credits required for the degree.

The School of Education’s Bachelor of Science degree in Communication Sciences and Disorders is one path toward eventual clinical practice, though a graduate degree is required for licensure. Thus, students must plan on graduate studies if they intend to pursue Wisconsin State licensure. Not all students eligible for admission to the undergraduate degree program can be accepted to the Master’s degree program on this campus. Many students obtain their undergraduate degrees from UW–Madison and complete their Master’s degree and licensing requirements at another institution.

MAJOR REQUIREMENTS

Complete all the courses listed below. At least 15 credits of upper-level major coursework (courses number 300–699) must be taken in residence on the UW–Madison campus for graduation.

Students must complete the three "gateway" courses—CS&D 201, CS&D 202, and CS&D 240—to be eligible for admission. Prospective applicants typically begin taking the three-course “gateway” sequence as sophomores. A grade point average of 3.0 or better must also be earned across these three courses the first time these courses are attempted.

Code	Title	Credits
CS&D 201	Anatomy and Physiology of Speech Production	3
CS&D 202	Hearing Science	3
CS&D 210	Neural Basis of Communication	3
CS&D 240	Language Development in Children and Adolescents	3
CS&D 303	Speech Acoustics and Perception	3
CS&D 315	Phonetics and Phonological Development	3
CS&D 318	Voice, Craniofacial, and Fluency Disorders	3
CS&D 320	Introduction to Audiology	3
CS&D 371	Pre-Clinical Observation of Children and Adults	3
CS&D 425	Auditory Rehabilitation	3
CS&D 440	Child Language Disorders, Assessment and Intervention	3

DISCIPLINE-RELATED COURSEWORK

The Communication Sciences and Disorders program requires both major and related coursework. Related coursework is mandatory, but not considered part of the major or calculated into the major grade point average. This coursework may be used to satisfy Liberal Studies requirements, if appropriate.

Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.

- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

Code	Title	Credits
Required Course		
RP & SE 300	Individuals with Disabilities	3
Select a statistics course; the following are recommended:		3-4
STAT 301	Introduction to Statistical Methods	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	

PSYCH 210	Basic Statistics for Psychology
SOC/ C&E SOC 360	Statistics for Sociologists I

Humanities **3**

Select one of the following:

ENGL 314	Structure of English
ENGL 316	English Language Variation in the U.S.
LINGUIS 101	Human Language
LINGUIS/ ANTHRO 301	Introduction to Linguistics: Descriptive and Theoretical

Ethnic Studies **3-4**

Select one of the following:

ANTHRO 104	Cultural Anthropology and Human Diversity
ASIAN AM 101	Introduction to Asian American Studies
CHICLA 201	Introduction to Chicana/o and Latina/o Studies
SOC 134	Sociology of Race & Ethnicity in the United States
SOC/ ASIAN AM 220	Ethnic Movements in the United States

Science **3-4**

Select one of the following:

ANTHRO 105	Principles of Biological Anthropology
PHYSICS 103	General Physics
PHYSICS 109	Physics in the Arts
GEN&WS 103	Gender, Women, Bodies, and Health
BIOLOGY/ ZOOLOGY 101	Animal Biology

EDUCATION COURSEWORK

Code	Title	Credits
Development 3		
Select one of the following (minimum 3 credits):		
ED PSYCH 320	Human Development in Infancy and Childhood	
ED PSYCH 321	Human Development in Adolescence	
PSYCH 460	Child Development	
Learning		
ED PSYCH 301	How People Learn (minimum 3 credits)	3
Educational Policy Studies		
ED POL 300	School and Society (minimum 3 credits)	3
Literacy, including Reading		
CURRIC 305	Integrating the Teaching of Reading with Other Language Arts	3
Additional Education Coursework 3		

Select 3 credits in School of Education electives. Required School of Education courses may not be applied toward this requirement.

ELECTIVE COURSEWORK

Select additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements below are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level (300–699) major coursework
- 2.75 cumulative grade point average in all education coursework
- Major Residency. Degree candidates must complete at least 15 credits of upper-level major coursework (300–699) in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Practicum work is considered part of the 30 credits.
- 40-Credit Rule. Students may not count more than 40 credits from one department within the 120 degree credits needed for graduation. For example, if 42 credits of coursework have been completed from the Department of Communication Sciences and Disorders, the student will need 122 credits to graduate. CS&D 110 does not count toward the 40 credits.
- 120 credits required for graduation.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL INFORMATION REGARDING CERTIFICATION

A Master's degree in Speech-Language Pathology (Communication Sciences and Disorders) is required to work as a public school speech-language pathologist in Wisconsin, and most states. The Master's degree prepares graduates to function competently and independently in public school programs, hospitals, rehabilitation centers, birth-to-three programs, or clinics. At UW-Madison the Bachelor of Science degree can be earned in the School of Education and the Master's degree is earned in the Department of Communication Sciences and Disorders, part of the College of Letters & Science. Student teaching and other professional education courses will be taken while earning the Bachelor's and Master's degrees. Not all students who apply for admission can be accepted into the Master's degree program.

For detailed information about the Master's program, see the Communication Sciences & Disorders Guide page (<https://guide.wisc.edu/graduate/communication-sciences-disorders/communication-sciences-disorders-ms/>) and the departmental website (<https://csd.wisc.edu/masters/>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Ability to successfully integrate subject knowledge and pedagogy knowledge flexibly in authentic situations through field experiences with secondary students under the supervision of highly qualified, experienced teachers and university supervisors.
2. Students will be prepared for recommendation for initial licensure in the state of Wisconsin and beyond in accordance with state standards.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Communication Sciences and Disorders: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

ADVISING AND CAREERS COMMUNICATION SCIENCES AND DISORDERS ADVISING

Students must consult with an undergraduate advisor in the Department of Communication Sciences and Disorders as soon as a decision has been made to major in this field. Course sequencing in the major is not flexible—certain courses are requisites to others, and many courses are offered only once a year. Please visit the department's website (<https://csd.wisc.edu/undergraduate.htm>) for details on advising and advisors.

Current CS&D majors in the School of Education may wish to consult with advising staff in the School of Education Student Services office; schedule online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person at 139 Education Building.

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments

can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

EARLY CHILDHOOD EDUCATION, MINOR

Students with a special interest in teaching young children should consider this minor, which leads to certification from birth through grade 3.

The Early Childhood Education (ECE) minor was designed to be completed in tandem with the Elementary Education (p. 1567) certification program; only students also completing Elementary Education may declare this minor.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education program. The declaration is made at the time of program application.

REQUIREMENTS

REQUIREMENTS

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in Early Childhood Education requires the completion of the Elementary Education degree program. These courses will also fulfill the elective credits required for Elementary Education.

Code	Title	Credits
CURRIC 660	Foundations of Early Childhood Education	3
CURRIC 663	Learning Environments for Initial Education Programs	3
Total Credits		6

EARTH SCIENCE, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (studentservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs.

To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 24 credits from the following departments: Astronomy (<https://guide.wisc.edu/courses/astron/>), Atmospheric and Oceanic Sciences (https://guide.wisc.edu/courses/atm_ocn/), Geoscience (<https://guide.wisc.edu/courses/geosci/>), and Geography (<https://guide.wisc.edu/courses/geog/>). Only Geography courses designated as Physical Science may be used toward the minor requirements. At least 10 credits of the 24 credits must be numbered 200 or above. A minimum 2.75 grade point average is required, based on all UW-Madison coursework included in this minor.

ECONOMICS, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Economics is housed in the College of Letters & Science. Students may wish to consult with an economics undergraduate advisor to discuss course selection and other issues related to this field of study. Academic advising (<https://econ.wisc.edu/undergraduate/find-academic-advising/>) is available in Room 7238 of the Social Science Building. Email: econadvise@ssc.wisc.edu. (econadvise@ssc.wisc.edu)

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

The Economics minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all Economics minor coursework taken on the UW-Madison campus.

Students completing the Economics minor will need calculus as a prerequisite to the required minor coursework. Mathematics coursework may be applied toward the liberal studies requirement.

Code	Title	Credits
Introduction to Microeconomics and Macroeconomics		
Complete one of the following:		4-7
ECON 101 & ECON 102	Principles of Microeconomics and Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
Intermediate Microeconomic Theory		3-4
ECON 301 or ECON 311	Intermediate Microeconomic Theory or Intermediate Microeconomic Theory - Advanced Treatment	
Intermediate Macroeconomic Theory		3-4
ECON 302 or ECON 312	Intermediate Macroeconomic Theory or Intermediate Macroeconomic Theory - Advanced Treatment	
Statistics		
Select one of the following, or an approved substitute:		3-4
ECON 310	Statistics: Measurement in Economics (preferred)	
STAT 301	Introduction to Statistical Methods	
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
Economics Elective		
Select one of the following (ECON 330 or 464 are preferred):		3-4
ECON 330	Money and Banking	
ECON 464	International Trade	
ECON 410	Introductory Econometrics	
ECON 441	Analytical Public Finance	
ECON 448	Human Resources and Economic Growth	
ECON 450	Wages and the Labor Market	
ECON 467	International Industrial Organizations	
ECON 468	Industrial Organization and Imperfect Competition	
ECON 475	Economics of Growth	
ECON 521	Game Theory and Economic Analysis	
ECON 522	Law and Economics	
ECON/POP HLTH/PUB AFFR 548	The Economics of Health Care	
ECON 664	Issues in International Trade	
ECON 666	Issues in International Finance	

If needed, additional Economics coursework to reach the minimim of 24 credits.

ELEMENTARY EDUCATION, BSE

Elementary Education graduates receive a bachelor's degree, teacher certification in grades K-9, and an outstanding preparation to enter one of the most important careers ever: teaching young children! Our program prides itself on preparing successful educators in a socially just and equitable manner, and job placement is exceptionally high.

The Elementary Education professional sequence is a two-year commitment, typically starting in the fall of the junior year, although some courses may be taken in the sophomore year. Coursework and field experiences lead to the capstone experience of student teaching.

Our graduates become teacher leaders committed to teaching all children effectively and advancing justice through classroom practices, personal interactions, and community engagement. We teach research-based practices that assist teachers throughout their careers in education.

Students are encouraged to get involved as soon as they arrive on campus, and we have a variety of ways for this to happen. Many education-related courses are open to freshmen and sophomores. The School of Education's Buddy Program, in which new students are paired with a junior or senior in the program, helps students find a supportive community on our Big Ten campus. Many students volunteer in local schools and community organizations, including Schools of Hope (<https://schoolsofhope.org/>). We also welcome you to join our active chapter of Aspiring Educators (<https://www.facebook.com/AspiringEducatorsUWMadison/>), a pre-professional educators association.

UW-Madison's Elementary Education program trains teachers to recognize, appreciate, and value the wide range of gifts diverse students bring to our increasingly multicultural, complex world.

See what an elementary education professor and a teacher candidate have to say about the Elementary Education Program (<https://www.youtube.com/watch?v=uCKPIVGrC3k>) at UW-Madison.

CERTIFICATION OPTIONS

The Elementary Education area offers five certification options, giving students many choices as they plan their career paths. All certification options are designed to be completed in four semesters after program admission and some classes may be taken prior to starting the professional sequence. Students are admitted once a year and begin the four-semester professional sequence in the following fall. Notification of admission takes place in the spring and is effective in the summer.

- Kindergarten through Ninth Grade (p. 1574) – Students completing this core program option will be certified to teach general education at the grade levels of K-9 and will also be eligible to teach in a 4K classroom.
- English as a Second Language (ESL) K-12 (p. 1578) and Kindergarten through Ninth Grade – A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach K-9 and English as a Second Language in grades K-12. Only fluency in English is needed to teach ESL.
- Early Childhood Education (ECE) (p. 1565) and Kindergarten through Ninth Grade – A minor in Early Childhood can also be added to the core K-9 program. Students selecting this

combination will be certified to teach K-9 and Early Childhood Education from birth through Grade 3.

- Kindergarten through Ninth Grade, and Early Childhood Education, and English as a Second Language K-12 – Students may opt to complete both the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas.
- Kindergarten through Ninth Grade and Special Education K-12 (Dual Certification) (p. 1682) – Students interested in both Elementary and Special Education should investigate the new Elementary Education and Special Education degree housed in the Department of Rehabilitation Psychology and Special Education. Upon completion, students are certified in K-9 general education and Special Education in grades K-12.

THE TEACHER PLEDGE

The School of Education at UW–Madison currently offers a very unique financial opportunity for students in the Elementary Education program called the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>). The School pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, Elementary Education students pledge to work at a Wisconsin PreK-9 school for three to four years after graduation, depending on the location.

MADISON COLLEGE TRANSFER AGREEMENT

Madison College students should also investigate the new transfer agreement (<https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/>) between Madison College and UW–Madison. Students meeting the requirements of this agreement are guaranteed admission to UW–Madison's School of Education and to Elementary Education.

"My instructors play a huge role in helping me become the person that I am today. They value who I am as a person and a learner, and through their influences and passion for teaching students of color, I have been inspired to do the same."

– Mai Ya Her, UW–Madison Elementary

Education

HOW TO GET IN

HOW TO GET IN

Students typically enter UW–Madison as Pre-Elementary Education students (PRE) and spend the first two years completing liberal studies, general education, and some of the professional education requirements. Elementary Education is declared during the sophomore year for the final two years on campus.

On-campus students starting at UW–Madison in other majors can move to Pre-Elementary Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.50, based on all UW–Madison coursework or the last 60 credits (<https://guide.wisc.edu/undergraduate/education/#policiesandregulationstext>), is required to transfer into Pre-Elementary Education. It is not necessary to be a Pre-Elementary Education student before declaring the Elementary Education major.

ELIGIBILITY TO DECLARE ELEMENTARY EDUCATION

Elementary Education currently accepts declarations once a year, usually from December 1 – February 1. This period may be extended if additional spaces are available after the initial deadline. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current admission requirements. Students should consult this site prior to submitting a declaration, as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Elementary Education should complete the on-campus declaration and must also be admitted to UW–Madison. See Transfer Students and Students with a Bachelor's Degree, below.

Elementary Education students are admitted to the program once a year, effective in the summer. Selection is made the previous spring and students begin the four-semester professional sequence in the subsequent fall semester.

Current Eligibility Requirements:

- Earn 40 or more total credits by the end of the fall semester of the declaration year.
- Submit completed program declaration form(s), transcripts, and all other related declaration materials by the declaration deadline specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.
- While no minimum gpa is required to apply for program admission, students should be aware of the 2.75 gpa required for graduation.

Students will be provisionally admitted pending the completion of all eligibility requirements by the end of the spring semester of the declaration year.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a bachelor's degree must be admitted to UW–Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Elementary Education should complete both the on-campus declaration and the UW–Madison application. All eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW–Madison with the Pre-Elementary Education designation.

An applicant with a previous undergraduate degree will be admitted to Elementary Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (<https://guide.wisc.edu/>

undergraduate/education/#policiesandregulationtext). Almost all students returning to pursue Elementary Education will be candidates for a second degree.

Admission as an Education Special Student indicates that the student has an interest in pursuing teacher certification in Elementary Education and studied this subject area extensively during their initial degree. This is rarely the case, however. A student enrolls in Elementary Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

Students of Elementary Education:

- Are exposed to a broad range of academic disciplines through *liberal studies* course work. The university-wide *General Education* requirements also encourage this breadth of study.
- Examine schools' relationship to society, the development of children and adolescents, and the processes of learning in their *education course work*.
- Study teaching methods and gain experience in schools through supervised field placements during their four-semester *professional sequence*.
- Complete *elective* coursework to reach the minimum of 120 credits required for the degree.

Practicum experiences provide a school-based setting for students to develop their professional and classroom skills. These part-time experiences generally begin a few weeks after the start of the semester and are approximately nine weeks in length. Concurrent registration in methods courses provide students with an opportunity to learn about, and then apply, teaching techniques in a classroom.

The *full-semester student teaching assignment* is the capstone experience of the professional sequence. Through it students expand upon the activities, responsibilities and expectations encountered during the practicum experiences. Student teachers will function as regular staff members in their assigned schools and also attend a seminar on campus one afternoon each week. Student teachers are required to follow the school day, school calendar, vacation days and policies of the school where they work.

PROGRAM OPTIONS - SELECT ONE

View as listView as grid

- **ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE (P. 1574)**

ELECTIVE COURSEWORK

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS—REQUIRED FOR ALL PROGRAM OPTIONS

GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- 2.75 cumulative grade point average in the minor, if required.
- Minimum 120 credits (degree candidates only).
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (<https://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-bse/#certificationlicensuretext>)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Create and implement developmentally appropriate and challenging learning experiences that reflect high expectations for every learner, supporting learners to (1) develop deep understanding of content areas and their connections, and (2) apply understanding in meaningful ways.
2. Select and/or create and sequence individually supportive and challenging learning experiences that reflect knowledge of individual learners, curriculum, pedagogies, and relevance to all learners and their families.
3. Use a variety of teaching strategies, and evidence-based technologies and information resources to engage learners in meaningful learning activities that lead to content knowledge, critical thinking, creativity,

innovation, self-evaluation, and self-directed learning. Use evidence to continually evaluate the effectiveness of these practices, and adjust these as needed to improve learner outcomes.

4. Collaborate with others to create supportive, inclusive, linguistically responsive, and safe learning environments that help all learners meet high standards and reach their full potential.
5. Choose, modify, and/or create multiple forms of unbiased formative and summative assessments to measure each learner's progress toward instructional goals. Use assessment data gathered to respond to each learner's strengths and needs in relation to short and long-term goals. Reflect on and justify planning decisions and ground one's justifications in knowledge of learners, development, curriculum, pedagogies, and resources.
6. Use studies completed in science and mathematics, social sciences, the humanities, histories, languages, and the arts to inform and deepen their teaching of content areas and meeting learners' needs.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Four-year plans related to different certification options are located under the Kindergarten - 9th Grade program option.

ADVISING AND CAREERS

ADVISING AND CAREERS ELEMENTARY EDUCATION ADVISING

Students not yet admitted to Elementary Education meet with their assigned advisor in the School of Education Student Services office (see below). Students are assigned an additional departmental advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison’s vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

ELEMENTARY EDUCATION AND THE WISCONSIN EXPERIENCE

Learning from Current Practitioners

Teacher candidates in the elementary education program have multiple field experiences in K-9 schools, culminating in a full-time student teaching experience sharing a classroom with a cooperating teacher. The connection between the teacher candidate, their field supervisor, and the

cooperating classroom teacher in the Madison-area schools provides a high level of support for our students from the first day forward. Many of our graduates end up being offered teaching positions by the schools in which they did their fieldwork.

Partnering with Community Organizations

The elementary education team partners with non-profit organizations and area businesses. Our teacher candidates:

- Volunteer with Girls on the Run (<https://www.girlsontherunscwi.org/>), Schools of Hope (<https://schoolsofhope.org/>), Centro Hispano (<https://www.micentro.org/volunteer/>), Madison Literacy Network (<https://www.litnetwork.org/volunteer/>), and Badger Volunteers – Tutoring and Mentoring (<https://morgridge.wisc.edu/get-connected-students/badger-volunteers-math-mentoring-and-tutoring-programs/>)
- Work at the Cooperative Children’s Book Center (CCBC) (<https://ccbc.education.wisc.edu/>), MERIT Library (<https://merit.education.wisc.edu/>), Badger Precollege (<https://precollege.wisc.edu/>), and Red Caboose Childcare (<https://www.redcaboosechildcare.org/>)
- Conduct research at UW’s Child Development Lab (<https://childdevelopmentlab.wisc.edu/>) and Eagle’s Wing Child Care Center (<https://www.housing.wisc.edu/apartments/eagles-wing/>)
- Lead educational events and panels with schools and university faculty
- Intern at the Boys and Girls Club (<https://www.bgcdc.org/>), Lussier Community Education Center, (<https://lcecmadison.org/>) and the Goodman Community Center (<https://www.goodmancenter.org/>); explore more opportunities through the Career Center’s Featured Education Internships (<https://careercenter.education.wisc.edu/gain-experience/internships/#education-internships>) or the International Internship Program (<https://internships.international.wisc.edu/>)

For additional experiences, visit the Career Center’s Student Jobs and Other Experiences (<https://careercenter.education.wisc.edu/gain-experience/#student-jobs-and-other-experiences>) page.

Participation with Professional Organizations

Our teacher candidates attend and/or present at educational conferences such as the:

- American Educational Research Association (AERA)
- Teachers of English to Speakers of Other Languages (TESOL)
- National K-8 Literacy and Reading Recovery Conference (LitCon)
- Association for Supervision and Curriculum Development (ASCD)

Guest Speakers

Instructors in the Elementary Education Program bring guests from a variety of community organizations into their classrooms:

- Teachers, principals, and superintendents from area school districts to share information about school life and provide tips on the interview process
- Madison’s Preschool to Prison pipeline with a focus on teaching for social justice
- PBS Wisconsin to share technology and teaching resources

- Wisconsin Education Association Council (WEAC) to introduce programs such as “Ambassadors for Equity” and “Early Career Educators”
- WIDA to introduce English Language Development Standards and to practice administering the ACCESS for ELLs assessment to K-9 students who may need academic English language support

Seeking Out Community Experiences

We encourage our students to venture outside the classroom and get to know the families and communities of their pupils by attending a community activity such as a worship service, a neighborhood festival, or a community potluck. Students spend time in and around the attendance area of their schools to develop an understanding of the places, people, spaces, and experiences that influence their pupils at home, in their schools, and in their communities.

Field Trips

While completing practicum experiences, students enjoy educational excursions to places in the Madison community such as the Madison Children's Museum (<https://madisonchildrensmuseum.org/>), the Wisconsin State Historical Society (<https://wisconsinhistory.org/>), Madison Public Library's Play Lab (<https://www.madisonpubliclibrary.org/spaces/playlab/>), and on-campus gems like the UW-Madison Geology Museum (<https://museum.geoscience.wisc.edu/>), Allen Centennial Garden (<https://allencentennialgarden.wisc.edu/>), and the UW-Madison Arboretum (<https://uwarboretum.org/>).

Study Abroad

Teacher candidates are encouraged to explore cultures other than their own by participating in one of the School of Education's exciting study abroad programs (<https://global.education.wisc.edu/study-abroad/>). For example, the Curriculum & Instruction department offers a 3-credit, three-week course in June entitled "Diversity and Community in the Galapagos Islands" (<https://www.youtube.com/watch?v=IC4qVTi8Ikw>) led by faculty in Elementary Education.

Additional Certifications, Majors, Minors, and Certificates

Many students in the K-9 elementary education program also complete programs in other areas of interest. Certification minors in Early Childhood Education and/or English as a Second Language can be combined with the core K-9 program. Popular additional majors are in Spanish, Environmental Studies, Educational Policy Studies, Psychology, and History. Students frequently select certificates in Educational Policy Studies, Disability Rights and Services, Chican@ and Latin@ Studies, and Environmental Studies, and minors in Social Studies, English Language Arts, Math, and Science. These options complement the skills and knowledge acquired through elementary education coursework.

Student Clubs and Organizations

Elementary education students have multiple opportunities to participate in related organizations and activities such as Aspiring Educators of Wisconsin (<https://www.facebook.com/AspiringEducatorsUWMadison/>), Qouncil (<https://lgbt.wisc.edu/get-involved/student-orgs/#qouncil-student-org-coalition>), the Multicultural Student Center (<https://msc.wisc.edu/>), and the UW Game Lab (<https://games.education.wisc.edu/lab/>).

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE ADDITIONAL CERTIFICATION REQUIREMENTS

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/current-students/>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following undergraduate teacher licensing options are offered at UW-Madison.

- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education.
- The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level.
- Health licenses at the Kindergarten through Grade 12 level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of “Endorsed Candidate for Licensure” (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW-Madison teacher certification students the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall.

Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW–Madison requires that

- all certification requirements are met;
- student teaching (following the school district calendar) is completed;
- final grades are posted and reviewed;
- the degree is posted (<https://registrar.wisc.edu/posting-of-degrees/>) by the Registrar’s Office (which can take up to four to six weeks after the degree conferral date); and
- a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional six to eight weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW–Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education’s Mary T. Kellner Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/?toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW–Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:
Wisconsin

The requirements of this program do not meet certification/licensure requirements in the following states:
Not applicable

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school’s Resources (p. 1514) page.

ELEMENTARY EDUCATION: KINDERGARTEN – 9TH GRADE

REQUIREMENTS

REQUIREMENTS

The core program in Elementary Education requires 60 credits of professional coursework in addition to other degree requirements. Students are certified to teach kindergarten through grade 9 (K-9) and can also teach at the 4K level.

The option coursework listed here is one component of the Elementary Education, BSE degree (<https://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-education-bse/#requirementstext>) requirements.

PROFESSIONAL SEQUENCE

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while the scheduling of other requirements is more flexible; some may be completed prior to beginning the sequence.

Code	Title	Credits
Semester 1		
CURRIC 312	Foundations of ESL Education	3
CURRIC 319	Pedagogical Content Knowledge for Teaching Elementary Mathematics 1	3
CURRIC 339	Cultural Foundations of Learning and Development 1	3

CURRIC/ RP & SE 406	Race, Intersectionality, and Equity in Education ¹	3

Semester 3

CURRIC 347	The Teaching of Writing and Other Language Arts	3
CURRIC 370	Teaching Mathematics	3
CURRIC 371	Teaching Social Studies	3
CURRIC 372	Teaching Science	3
CURRIC/ RP & SE 506	Strategies for Inclusive Schooling	3
CURRIC 367	Elementary Education Practicum II	3

Semester 4

CURRIC 463	Seminar in Elementary Education	2
CURRIC 464 or CURRIC 454	Student Teaching in the Elementary School Student Teaching in the Middle School	10

¹ May be taken before semester 1 of the professional sequence, including prior to program admission.

² May be taken any time before semester 4 of the professional sequence, including prior to program admission. Enrollment in either ED POL 300 or ED POL/HISTORY 412 can follow this schedule.

ELECTIVE COURSES

The professional sequence includes 3 credits selected from the following options. Additional courses that expand a student's skill set or further a student's knowledge as a future teacher may also be considered to meet this requirement. Contact the Elementary Education Program Manager for approval prior to enrolling in additional courses. The frequency in which the listed courses are offered can vary based on teaching schedules as well as student interest.

Elective Course Options

Code	Title	Credits
ART ED 321	Introduction to Teaching Art	2

CONTENT AREA MINOR (OPTIONAL REQUIREMENT)

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, **but students will not**

receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. Choose from the links below for more details about the requirements of each minor.

Minor Options

- Biology (p. 1557)
- Chemistry (p. 1559)
- Earth Science (p. 1566)
- Economics (p. 1566)
- English (p. 1580)
- English Language Arts (p. 1578)
- Geography (p. 1582)
- History (p. 1585)
- Mathematics (p. 1592)
- Mathematics and Science Dual (p. 1589)
- Mathematics Specialized (p. 1591)
- Physics (p. 1592)
- Political Science (p. 1593)
- Psychology (p. 1597)
- Science Specialized (p. 1598)
- Social Studies (p. 1598)
- Sociology (p. 1607)

ADDITIONAL CERTIFICATION OPTIONS IN ELEMENTARY EDUCATION

Students interested in Early Childhood Education (birth-Grade 3) and/or English as a Second Language (grades K-12) may earn certification in these areas along with the completion of the K-9 program. It is also possible to combine K-9 Elementary Education with K-12 Special Education certification through the completion of the Elementary Education and Special Education (p. 1682) degree.

- The Early Childhood Education (ECE) certification (p. 1565) minor (p. 1565)
- The English as a Second Language (ESL) certification (p. 1578) minor (p. 1578)
- Certification in both Early Childhood Education and English as a Second Language (p. 1576)

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Elementary Education: Sample Four-Year Plans

These sample four-year graduation plans reflect the certification options available to students completing a degree in Elementary Education. A plan is included for:

- Kindergarten-Grade 9 certification
- Kindergarten-Grade 9 certification+ Early Childhood Education certification
- Kindergarten-Grade 9 certification + English as a Second Language certification

- Kindergarten-Grade 9 certification + Early Childhood Education certification + English as a Second Language certification

A four-year plan for the Kindergarten-Grade 9 certification + Special Education Kindergarten-Grade 12 certification is available here (p. 1686). (p. 1686)

Four-year plans are designed to guide your course selection throughout your academic career; they do not establish a contractual agreement. Use them along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ENGLISH AS A SECOND LANGUAGE, MINOR

"Ms. Yang's Class," by Jerry Jordan

Students with a special interest in teaching English language learners should consider this minor, which leads to certification in English as a Second Language (ESL) from kindergarten through grade 12. Only fluency in English is required to teach ESL.

The ESL minor was designed to be completed in tandem with the Elementary Education (p. 1567) certification program; only students also completing Elementary Education may declare this minor.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education program. The declaration is made at the time of program application.

REQUIREMENTS

REQUIREMENTS

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in English as a Second Language, Kindergarten through Grade 12 requires the completion of the Elementary Education degree program. These courses will also fulfill the elective credits required for Elementary Education.

Code	Title	Credits
CURRIC 338	Linguistics for Teachers	3
CURRIC 311	Language Acquisition for Multilingual Learners	3
CURRIC 316	ESL/Bilingual Methods	3
Total Credits		9

ENGLISH LANGUAGE ARTS, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to

teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

The English Language Arts minor requires the completion of 24 credits to include the requirements of each group of courses. A minimum cumulative grade point average of 2.75 is required, based on all UW-Madison coursework included in the minor.

The courses listed here will meet the requirements in each category, but additional courses can be considered.

INTRODUCTORY LITERATURE

Complete two introductory literature courses. Courses with a Literature breadth designation from many departments—e.g., Comparative Literature, Classics, African Languages and Literature, English, or Theatre—may be selected to meet this requirement.

INTERNATIONAL LITERATURE

Select one course from the following:

International Literature Courses		
Code	Title	Credits
African Cultural Studies		
AFRICAN/ FOLKLORE 210	The African Storyteller	3
AFRICAN 300	African Literature in Translation	3
AFRICAN 405	Topics in African Cultural Studies	3

ENGLISH, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of English is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in English

(<https://english.wisc.edu/undergraduate/undergraduate-advising/>) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

The English minor requires the completion of 24–30 credits to include the coursework listed below. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

Note: Six credits of introductory literature must be completed prior to enrolling in coursework required for the English minor. Courses with a Literature breadth designation from many subjects—e.g., Comparative Literature, Classical & Ancient Near Eastern Studies, African Cultural Studies, or Theatre and Drama—may be selected to meet this requirement. Students are encouraged to explore these options, although introductory English department coursework may also be used in this capacity.

Code	Title	Credits
Required Courses		
Complete the following:		
ENGL 241	Literature and Culture I: to the 18th Century	3
ENGL 242	Literature and Culture II: from the 18th Century to the Present	3
ENGL 314	Structure of English (students are encouraged to take this course as early as possible)	3
Children's or Young Adult Literature chosen in consultation with advisor		3
Shakespeare		
Select one of the following:		3
ENGL 220	Shakespearean Drama	
ENGL 431	Early Works of Shakespeare	
ENGL 432	Later Works of Shakespeare	
Elective		
Select one English department elective numbered 204 and above, except for ENGL 207 and ENGL 236 ¹		
Ethnic Literature		
Select one 3-credit intermediate or advanced ethnic literature course ²		
Applied English Linguistics		

Select one of the following (listed in order of preference): 3

ENGL 516	English Grammar in Use
ENGL 417	History of the English Language
ENGL 316	English Language Variation in the U.S.
ENGL 416	English in Society
ENGL 414	Global Spread of English

Composition for English Teachers

ENGL 304	History and Theory of Rhetoric and Writing Studies
----------	--

Or, select a course in consultation with an advisor in the School of Education Student Services office.

Additional Credits

If necessary, select additional coursework to reach the minimum of 24 credits. Introductory literature may be used.

- ¹ Students considering a Letters & Science English major should select a pre-1800, non-Shakespeare literature course.
- ² Search for Intermediate/Advanced-level courses that are designated as both Literature and Ethnic Studies courses in the enrollment application.

GAME DESIGN, CERTIFICATE

WHAT IS GAME DESIGN?

Game Design is the theory and practice of creating games. We focus on games broadly speaking — puzzles, toys, board games, role-playing, sports, or simply not stepping on the cracks in the sidewalk. Making games offers an opportunity for creative expression, for simulating real-world problems, for positive social change, and for communicating complex ideas about systems and processes.

WHAT IS THE GAME DESIGN CERTIFICATE?

The Game Design Certificate is an interdisciplinary program that gives students from a wide variety of backgrounds the chance to make games. The certificate is jointly offered by the departments of Curriculum and Instruction, Art, and Computer Sciences. Certificate students work both independently and in small teams to develop a portfolio of board games, video games, and physical spaces. The certificate focuses on creating, testing, and understanding how to design gameplay to be fun and impactful.

WHAT WILL STUDENTS GAIN?

Students acquire the skills, understanding, and background to create and produce games independently, develop a body of work, and gain critical perspectives on games and game design.

HOW DO I GET INVOLVED?

Interested students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, 608-262-1651, or studentservices@wisc.edu (studentservices@education.wisc.edu), to discuss course sequencing, declaring, and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

HOW TO GET IN

HOW TO GET IN

To be eligible to declare the Game Design Certificate, students must complete two courses prior to submitting a certificate declaration. One course is required of all prospective certificate students:

Code	Title	Credits
CURRIC 357	Game Design I	3

The second course may be selected by the student from the following options:

Code	Title	Credits
ART 107	Introduction to Digital Forms	3
COMP SCI 200	Programming I	3
COMP SCI 220	Data Science Programming I	4
COMP SCI 300	Programming II	3

Students meeting the eligibility criteria who intend to complete the Game Design Certificate may find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

REQUIREMENTS

REQUIREMENTS

The Game Design certificate program includes both required and elective coursework for a minimum of 18 credits. All coursework must be taken for a letter grade. At least 10 credits of the certificate must be earned in residence at UW–Madison.

Students must have an overall 2.5 GPA in Game Design Certificate coursework upon completion of the certificate.

Code	Title	Credits
Required Courses		
CURRIC 277 or CURRIC 576	Videogames & Learning Topics in Game Design	3
CURRIC 357	Game Design I	3
CURRIC 432	Game Design II	3
ART 107	Introduction to Digital Forms	3
Computer Science Elective		
Select one of the following:		3
COMP SCI 200	Programming I	
COMP SCI 220	Data Science Programming I	
COMP SCI 300	Programming II	
Arts Elective		
Select one of the following:		3–4
ART 428	Digital Imaging Studio	
ART 429	3D Digital Studio I	
ART 529	3D Digital Studio II	
ART 563	Graphic Design for Games	
ART 629	3D Digital Studio III	

THEATRE 230	Environment Design for Games and other Virtual Storytelling Spaces
Total Credits	18

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Utilize the design and technical skills necessary to create games.
- 2. Discuss the critical and theoretical perspectives necessary to understand the production and reception contexts in/for which they design such games.

GEOGRAPHY, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Geography (<https://geography.wisc.edu/>) is housed in the College of Letters & Science. Students may wish to consult with academic advisor Joel Gruley, jgruley@wisc.edu, 144 Science Hall, 608-262-4438, to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

The Geography minor requires a minimum of 24 credits. In addition to the required course, select one course from each of the distribution lists.

Each course may be counted in only one of the groups. Coursework must include at least two upper-level courses, numbered 300–699.

A minimum cumulative grade point average of 2.75 is required, based on all Geography minor coursework taken on the UW–Madison campus.

REQUIRED COURSE

Code	Title	Credits
GEOG 342	Geography of Wisconsin (Or an acceptable substitute selected in consultation with the undergraduate advisor in the Department of Geography. This course may be also used to fulfill the requirement in Area Studies and Global Systems)	3

COURSE DISTRIBUTION REQUIREMENTS

Complete one course from each of the six groups:

Physical Geography: Earth Systems and Environmental Processes

Courses address the locational arrangements of earth phenomena and their interaction as physical systems.

Physical Geography: Earth Systems and Environmental Processes course options		
Code	Title	Credits
GEOG/ENVIR ST 120	Introduction to the Earth System	3
GEOG/ENVIR ST 127	Physical Systems of the Environment	4
GEOG/GEOSCI 320	Geomorphology	3
GEOG/ATM OCN/ENVIR ST 322	Polar Regions and Their Importance in the Global Environment	3
GEOG/ATM OCN/ENVIR ST 332	Global Warming: Science and Impacts	3
GEOG/ATM OCN/ENVIR ST/GEOSCI 335	Climatic Environments of the Past	3
GEOG/BOTANY 338	Environmental Biogeography	3
GEOG 344	Changing Landscapes of the American West	3
GEOG/GEOSCI 420	Glacial and Pleistocene Geology	3
GEOG 523	Advanced Paleoecology: Species Responses to Past Environmental Change	3
GEOG/SOIL SCI 525	Soil Geomorphology	3
GEOG/SOIL SCI 526	Human Transformations of Earth Surface Processes	3

People–Environment Interaction

Courses examine human use, perception, and modification of environments.

People–Environment Interaction course options		
Code	Title	Credits
GEOG/ENVIR ST 139	Global Environmental Issues	3

GEOG/ENVIR ST/SOIL SCI 230	Soil: Ecosystem and Resource	3
GEOG/ART HIST/ENVIR ST/HISTORY/LAND ARC 239	Making the American Landscape	3-4
GEOG/ENVIR ST 309	People, Land and Food: Comparative Study of Agriculture Systems	3
GEOG/ATM OCN/ENVIR ST 332	Global Warming: Science and Impacts	3
GEOG/ENVIR ST 333	Green Urbanism	3
GEOG/ENVIR ST 337	Nature, Power and Society	3
GEOG/BOTANY 338	Environmental Biogeography	3
GEOG/ENVIR ST 339	Environmental Conservation	4

HISTORY/ AFROAMER 628	History of the Civil Rights Movement in the United States	3

ELECTIVES

Complete additional coursework, if necessary, to reach the minimum of 24 credits. It is recommended that students completing the history minor take a one-year continuous course in American history (e.g., HISTORY 101 Amer Hist to the Civil War Era, the Origin & Growth of the U S and HISTORY 102 American History, Civil War Era to the Present).

MATHEMATICS AND SCIENCE DUAL, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

This minor is intended for Elementary Education and Elementary Education and Special Education majors wishing to enhance their content preparation in mathematics and science. It is particularly suitable for students who intend to teach mathematics and science in the middle school.

A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW-Madison campus.

MATHEMATICS COMPONENT

Students will contact a Student Services advisor or the Elementary Education Program Manager (see Contact Information) to choose a 12 credit group of mathematics courses that will:

1. Deepen their understanding of the reasoning, problem solving strategies, models, mathematical tools, structures, and principles, which underlie core elementary mathematics topics relevant to K-12 math education and related to fractions and rational numbers, proportional reasoning, measurement, algebraic thinking, Geometry and Measurement, and Algebra and Functions.
2. Develop the important mathematical practices, or habits of mind, that can support the learning of mathematics.

SCIENCE COMPONENT

The aim of the science component of this minor is for students to understand science as an intellectual activity. The goals of science and the diverse means by which scientific knowledge is generated and validated should be at the core of the science portion of this minor. Upon its completion, students should have had opportunities to understand some of the most powerful organizing ideas in the various scientific disciplines as well as how those ideas have been and are generated. Such

an understanding should provide students with the fundamental tools and outlook necessary to teach the variety of science content typically taught in middle schools.

The committee that developed this science component has indicated that the primary purpose for the minor should be consistent with the goals of a liberal or general education, thus viewing the minor as an extension of the current liberal studies requirement. In addition to the 9 credits of science required for the liberal studies requirement, students completing this minor must also take 9 credits in science for the math-science dual minor. With these 18 credits it is possible to provide a minimal level of breadth and depth of science coursework. This minor is also expected to provide Elementary Education students with a background in the sciences that are most commonly taught at the middle school level.

Complete the following requirements:

- At least 18 credits from the courses listed below. Additional courses can be considered; please consult with an advisor in the School of Education Student Services office, 139 Education Building.
- One course in each of three of the four science areas of biology, chemistry, physics, and earth and space science from the approved list, below. Integrated Liberal Studies 153 does not count in any of the areas, but can count toward the 18 credit total.
- At least 6 credits of coursework from the courses listed below that are **not** marked with an asterisk (*). Courses with the asterisk are considered to be introductory level courses.

The following courses are approved for inclusion in the science component of the math/science minor:

Code	Title	Credits
ILS 153	Ways of Knowing in the Sciences *	4

MATH/	Introduction to Discrete	3
COMP SCI 240	Mathematics	
MATH 340	Elementary Matrix and Linear Algebra	3
MATH 461	College Geometry I	3
MATH/HIST SCI 473	History of Mathematics	3

liberal studies requirement, but may not be applied toward the credits required for the mathematics minor.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
STAT 301	Introduction to Statistical Methods	3
MATH 461	College Geometry I	3
MATH 541	Modern Algebra	3

Because of prerequisites and scheduling issues, the sequencing of this coursework requires careful planning to be completed in a timely fashion. Students are encouraged to consult with an advisor regarding the appropriate sequencing of these courses.

MATHEMATICS, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Mathematics is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor in the department to discuss course selection and other issues related to this field of study. The current list of advisors and the schedule of office hours can be found on the departmental advising page (<https://www.math.wisc.edu/undergraduate/advising/>).

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 28 credits. A minimum cumulative grade point average of 2.75 is required, based on all UW–Madison coursework included in the minor.

Elementary Education students may also wish to consider the Specialized Mathematics minor, which exchanges some of the higher-level mathematics courses for a broader range of coursework in mathematics, computer sciences, and statistics. A mathematics/science dual minor option is also available.

The first 13 credits of the mathematics minor involves calculus-level coursework. Students may need to complete prerequisite coursework—e.g., MATH 112 College Algebra, MATH 113 Trigonometry—to reach this proficiency level. These preparatory courses may be used to meet the

PHYSICS, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Physics (<https://www.physics.wisc.edu/>) is housed in the College of Letters & Science. Students may wish to consult with an undergraduate advisor (<https://www.physics.wisc.edu/undergraduate/contact-us/>) in the physics department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

ELECTIVES

Complete additional coursework, if necessary, to reach the minimum of 24 credits.

PREPARING TO TEACH ABROAD, CERTIFICATE

The Certificate in Preparing to Teach Abroad prepares undergraduate students interested in teaching beyond the U.S. to develop essential skills for engaging diverse learners in various educational settings. The program prepares students to teach a variety of subject matters including and beyond academics that revolve around student interests and job-site demands. It fosters skills for working with a wide age range spectrum from children to adults and builds confidence in entering new spaces, asking critical questions, and designing robust lessons that meet expected learning goals. Students will engage with multiple models of culturally responsive teaching while critically examining challenges to such models in different global contexts.

Through this certificate, students will explore the complexities of formal and informal education beyond U.S. pedagogical frameworks, identifying and analyzing both mainstream and contested narratives about education in non-U.S. settings and their implications for lesson planning. Coursework and field experiences will provide opportunities to:

- Prepare culturally responsive lessons and participate in cross-cultural field experiences, considering the role of power in constructions such as race, gender, disability, socioeconomic status (SES), and language.
- Examine educational thought in both informal and formal education settings, reflecting on how different traditions and systems shape teaching and learning.
- Engage in fieldwork in U.S. settings in person and in non-U.S. settings virtually to reflect on issues of teaching, curriculum, and learning across cultural contexts.
- Analyze power relations in education, paying close attention to colonial legacies, hierarchies, and assumptions about difference that emerge in cross-cultural teaching.

The certificate is open to all domestic and international undergraduate students seeking to develop skills in analyzing cultural contexts, planning instruction, designing curriculum, and teaching in professional communities beyond the U.S. While it does not lead to a K-12 public school teaching license, it enhances competitiveness for international teaching positions and strengthens applications for Fulbright ETA, Peace Corps, international internships, and study abroad programs.

The certificate is also a gateway to post-undergraduate study opportunities in education. Its content is not restricted by state-based teacher education requirements, making it valuable preparation for graduate programs and teaching assistantships in the field of education more broadly.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Preparing to Teach Abroad. To declare the certificate, students should meet with the Certificate advisor and then visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

REQUIREMENTS

The Certificate in Preparing to Teach Abroad requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

REQUIRED COURSES

Code	Title	Credits
CURRIC 366	Internationalizing Educational Knowledge	3
CURRIC 418	Preparing to Teach Abroad	3
CURRIC 419	Preparing to Teach Abroad Capstone	3

ELECTIVES

The 6 credits of electives can be taken concurrently with required certificate classes. Students can choose to concentrate their electives on the following themes, but are not required to do so. In selecting courses we will encourage students to consider courses both relevant to the areas of interest, but also issues raised in the certificate's required courses. Course selection can be guided in consultation with the certificate advisor.

FOCUS ON SCHOOL OF EDUCATION-ORIENTED TOPICS

Courses in this section include special education, bilingual education, educational psychology and educational policy studies.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Analyze issues of coloniality, power, and difference as they relate to teaching, learning, and curriculum in non-US settings.
2. Examine key cultural, social, and historical relationships to educational knowledges before entering a pedagogical space abroad.
3. Identify curriculum and teaching practices that produce difference and exclusions, focusing on the intersection of transnational and local contexts.
4. Develop culturally responsive practices and pedagogies focused on teaching abroad.
5. Use experiential knowledge of practicum teaching to reflect on pedagogical practices and contextual differences in non-US contexts.

PSYCHOLOGY, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Psychology (<https://psych.wisc.edu/>) is housed in the College of Letters & Science. Students interested in completing an additional major in psychology may wish to consult with an undergraduate advisor (<https://psych.wisc.edu/undergraduate-program/advising/>) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 26 credits. A minimum cumulative grade point average of 2.75 is required, based on all psychology minor coursework taken at UW–Madison. Students wishing to complete an additional major in psychology through the College of Letters & Science must also complete supporting coursework in introductory biology; see Requirements for the Major (p. 1266).

Code	Title	Credits
PSYCH 202	Introduction to Psychology	3–4
PSYCH 210	Basic Statistics for Psychology	3
PSYCH 225	Research Methods	4
PSYCH 405	Adult Psychopathology	3–4
PSYCH 456	Social Psychology	3–4
PSYCH 403	Psychology of Personality	3
PSYCH 414	Cognitive Psychology	3
Select one of the following:		3–4
PSYCH 449	Animal Behavior	
PSYCH 450	Primate Psychology: Insights into Human Behavior	
PSYCH 454	Behavioral Neuroscience	
Select additional coursework, if necessary, to reach the minimum of 26 credits		

SCIENCE SPECIALIZED, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 22 credits selected from one or more of the following areas. Courses must be taken from the departments indicated. A minimum 2.75 grade point average is required, based on all UW–Madison coursework included in this minor.

- Biology: Departments of Botany (<https://guide.wisc.edu/courses/botany/>), Zoology (<https://guide.wisc.edu/courses/zoology/>), and Bacteriology (<https://guide.wisc.edu/courses/microbio/>) (Microbiology course listings)
- Chemistry: Departments of Chemistry (<https://guide.wisc.edu/courses/chem/>) and Biochemistry (<https://guide.wisc.edu/courses/biochem/>)
- Physics: Department of Physics (<https://guide.wisc.edu/courses/physics/>)
- Earth Science: Departments of Astronomy (<https://guide.wisc.edu/courses/astron/>), Geography (<https://guide.wisc.edu/courses/geog/>) (Physical Geography courses designated as Physical Science only), Geoscience (<https://guide.wisc.edu/courses/geosci/>), and Atmospheric and Oceanic Sciences (https://guide.wisc.edu/courses/atm_ocn/).

At least 10 of the 22 credits must be numbered 200 and above.

SOCIAL STUDIES, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification

or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete 24 credits to include the requirements listed below. A minimum 2.75 grade point average is required, based on all UW-Madison course work included in the Social Studies minor. The courses listed here will meet this requirement, but additional courses may be considered. Confer with an advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651, for consideration of additional courses.

Some courses may be listed in multiple categories, but can count in only one.

HISTORY/CIVILIZATIONS

United States or European History

Select one course from the following.

SOC 170	Population Problems	3-4

ELECTIVES

Choose additional electives to reach the minimum of 24 credits. Electives must be chosen from the courses listed above or from the departments of Economics (<https://guide.wisc.edu/courses/econ/>), Geography (<https://guide.wisc.edu/courses/geog/>), History (<https://guide.wisc.edu/courses/history/>), Political Science (https://guide.wisc.edu/courses/poli_sci/), Psychology (<https://guide.wisc.edu/courses/psych/>) and Sociology (<https://guide.wisc.edu/courses/soc/>).

RECOMMENDED COURSE OPTIONS

It is strongly recommended to take at least one of the following non-Western interdisciplinary courses while meeting the minor requirements.

Code	Title	Credits
GEOG/ASIAN/ HISTORY/POLI SCI/ SOC 244	Introduction to Southeast Asia: Vietnam to the Philippines	4
ASIAN 252	Contemporary Indian Society	3
GEOG/AFROAMER/ ANTHRO/C&E SOC/ HISTORY/LACIS/ POLI SCI/SOC/ SPANISH 260	Latin America: An Introduction	3-4
GEOG/AFRICAN/ AFROAMER/ ANTHRO/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
HISTORY/ASIAN/ POLI SCI 255	Introduction to East Asian Civilizations	3-4
HISTORY/GNS 265	An Introduction to Central Asia: From the Silk Route to Afghanistan	3

SOCIOLOGY, MINOR

This minor may only be completed by students admitted to the Elementary Education (p. 1567) or the Elementary Education and Special Education (p. 1682) programs. A minor is not required to complete either program.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Sociology (<https://sociology.wisc.edu>) is housed in the College of Letters & Science. Students may wish to consult with the undergraduate advisor (<https://sociology.wisc.edu/undergraduate-program/academic-advising/>) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW–Madison transcript. Students will not receive an additional certification or license in the subject area. The Wisconsin Department of Public Instruction does not offer content licenses in association with the Elementary Education or Special Education teaching licenses.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing the K-9 Elementary Education or the Elementary Education and Special Education programs. To declare the minor, contact your academic advisor in Education Student Services any time after program admission.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all Sociology minor coursework taken on the UW–Madison campus.

FOUNDATIONAL CORE COURSES

Introduction

Select one of the following:

Code	Title	Credits
SOC/C&E SOC 210	Survey of Sociology	3-4
SOC/C&E SOC 211	The Sociological Enterprise	3
SOC 181	Honors Introductory Seminar-The Sociological Enterprise	3-4

Research Methods and Statistics

Students may take methods and statistics in the same semester. If students take methods and statistics in different semesters, it is recommended that methods be taken before statistics. This will provide a better entry point to the methods and materials of the field.

Code	Title	Credits
Research Methods		
SOC/C&E SOC 357	Methods of Sociological Inquiry	3-4
Statistics		
Complete one of the following statistics courses:		3-4
SOC/C&E SOC 360	Statistics for Sociologists I	
ECON 310	Statistics: Measurement in Economics	
MATH/STAT 310	Introduction to Probability and Mathematical Statistics II	
PSYCH 210	Basic Statistics for Psychology	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Classical Theory

Code	Title	Credits
SOC/C&E SOC 475	Classical Sociological Theory	3

DISTRIBUTION REQUIREMENTS

Select **at least one course from two of the following groups** of departmental offerings. Courses used to meet the requirements above

may not be applied to this requirement. Courses that appear in more than one area may fulfill only one area requirement.

Additional Methods/Statistics

Code	Title	Credits
SOC 351	Introduction to Survey Methods for Social Research	3
SOC/C&E SOC 361	Statistics for Sociologists II	4

ELECTIVES

Additional coursework, if needed, to reach the minimum of 24 credits.

DANCE

Students who pursue an undergraduate degree in dance gain an in-depth understanding and mastery of dance as an art form and an area of scholarly inquiry. Dance courses focus on the study of various dance techniques and movement practices, dance repertory, performance, improvisation, composition, movement analysis, body studies, dance history, dance and politics, dance and identity, and dance writing. Dance courses at the University of Wisconsin–Madison stress personal creativity, individual growth, strong technical training, and historical, theoretical, and interdisciplinary knowledge.

Two undergraduate options are offered in dance. The Bachelor of Fine Arts – Dance (p. 1612) (BFA) undergraduate degree program in dance is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science–Dance (<https://guide.wisc.edu/undergraduate/education/dance/dance-bs/>) option is designed for students who wish to combine their interest in dance with other fields of study, or to prepare for graduate work in dance studies or related disciplines. Students are admitted to the degree program in dance by audition (<https://dance.wisc.edu/admissions-and-aid/>).

The Department of Dance also offers five certificate programs open to students across the campus: a general certificate in Dance

(<https://guide.wisc.edu/undergraduate/education/dance/dance-certificate/>), a certificate in Dance Education (p. 1610), one in Dance Studies (p. 1611), a certificate in Dance/Movement Therapy (<https://guide.wisc.edu/undergraduate/education/dance/introductory-studies-dance-movement-therapy-certificate/>), and another certificate in Pilates (<https://guide.wisc.edu/undergraduate/education/dance/pilates-certificate/>).

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Dance Education, Certificate (p. 1610)
- Dance Studies, Certificate (p. 1611)
- Dance, BFA (p. 1612)
- Dance, BS (p. 1619)
- Dance, Certificate (p. 1625)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1626)
- Pilates, Certificate (p. 1627)

DANCE EDUCATION, CERTIFICATE

The Certificate in Dance Education provides students with specialized knowledge specific to the field of dance education. Students are prepared for a wide variety of careers that involve teaching dance or integrating dance in the classroom.

Careers specific to dance include: teaching in private dance studios, community centers, non-profit organizations, public schools, after school programs, fitness centers, and within professional companies. Careers that are non-specific to dance include: community based programs, physical education, arts education, theatre education, music education, and non-arts education in elementary education and secondary education.

Courses will enhance skills for current dance majors to add pedagogy to their dance understandings and provide dance understandings to students majoring other areas, including elementary education and physical education.

This certificate is also available to individuals who have already completed a Bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>). Current educators wishing to incorporate dance and movement in their classrooms may enroll in this unique opportunity to develop expertise in dance and creative movement for the classroom.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates in good academic standing are eligible to complete the Dance Education Certificate. BS, BFA, and Certificate candidates in Dance are eligible for the Dance Education

Certificate. University Special students who have previously completed any Bachelor's degree, are also eligible to pursue this certificate.

Students must meet with the Dance Education Certificate Advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form located on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page.

REQUIREMENTS

REQUIREMENTS

The Certificate in Dance Education requires the following course distribution for a minimum of 14 credits.

Code	Title	Credits
DANCE 156	Movement as Material Through Improvisation	2
DANCE 274	Methods in Dance Education	3
DANCE 373	Introduction to Dance and Community	3
DANCE 374	Teaching Dance	3
DANCE 379	Dance Teaching Practicum	3
Total Credits		14

RESIDENCE AND QUALITY OF WORK

- At least 7 credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Gain a working knowledge of historical and progressive approaches, theories, and methodologies to teaching dance across diverse community settings.
2. Engage with dance and dance education as embodied forms of artistry and vehicles for learning, self discovery, empowerment, and transformation.
3. Analyze dance education in relation to the social and cultural circumstances in which it is embedded.
4. Integrate social-emotional, kinesthetic motor, and cognitive development with trauma-informed and culturally sustaining practices through dance lesson planning, implementation, and ongoing critical assessment.

DANCE STUDIES, CERTIFICATE

The Dance Studies Certificate is for any undergraduate student interested in the exploration of dance from an interdisciplinary, academic approach – to understand its political, social, and historical significance. The certificate is designed to enhance a student's main area of study and provide knowledge and skills in the analysis, interpretation, and contextualization of dance and movement in society and culture.

Courses in writing, body studies, history, and theory will prepare students to integrate the physical and theoretical knowledge of dance in written, oral, and embodied forms.

This program was designed for students in a broad range of disciplines including the arts, humanities, and social sciences. Students who wish to integrate dance research into their existing degree program, those considering graduate study in Dance Studies or a related field in the arts and humanities, including Art History, Theatre Studies, Performance Studies, or Cultural Studies, will benefit from this program.

This certificate program is flexible and can be completed primarily through summer coursework. Students can opt to complete the majority of the courses online, primarily in the summers, or through a mix of online and in-person courses in the summers and academic year.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Dance Studies Certificate. BS, BFA, and Certificate candidates in Dance are eligible for the Dance Studies Certificate as long as there is zero overlap of coursework. Undergraduate students in good academic standing may declare this certificate. University Special students who started as an undergraduate at UW-Madison, but graduated before completing the requirements are also eligible for this certificate.

Students should meet with the Dance Studies Certificate Advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form located on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page.

REQUIREMENTS

REQUIREMENTS

The Dance Studies Certificate requires the following course distribution for a minimum of 14 credits. At least 7 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

FOUNDATIONAL COURSE

All students are required to complete the following:

Code	Title	Credits
DANCE 200	Writing the Moving Body	3

BODY STUDIES

Select 2 credits from the following:

Code	Title	Credits
DANCE 110	Workshop in Dance Activity	1-2
DANCE 101	Social Dance I	1
DANCE 102	Social Dance II	1
DANCE 103	Modern Jazz Dance	1
DANCE 105	Ballet I	1
DANCE 106	Ballet II	1
DANCE 107	Contemporary Dance I	1
DANCE 108	Contemporary Dance II	1
DANCE 115	Hip-Hop Dance Technique and Theory I	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1

DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 410	Contemporary Dance Forms	1-3
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2
DANCE 131	Somatic Theory and Practices	2
DANCE 132	Workshop in Body Studies and Practices	1
DANCE 133	Relaxation Techniques for Embodiment and Stress Management	1
DANCE 135	Pilates Mat I	1
DANCE 136	Pilates Equipment I	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 213	New Movement Techniques	1-2
DANCE 231	Introduction to Dance/Movement Therapy	3
DANCE 235	Pilates Mat II	1
DANCE 236	Pilates Equipment II	2
DANCE/AFROAMER/ASIAN AM/FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3

DANCE 330	Functional Anatomy for Movement Practices	2
-----------	---	---

DANCE THEORY

Select 3 credits from the following:

Code	Title	Credits
DANCE 168	Dancing Gender: Embodiment, Politics and Feminist Theory	3
DANCE 268	Political and Cultural Perspectives in Dance Studies	3

DANCE HISTORY

Select 3 credits from the following:

Code	Title	Credits
DANCE 165	Introduction to the Histories of Dance	3
DANCE 265	Dance History I: Dance in the Modern Era	3
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3

ETHNIC STUDIES BREADTH

Select 3 credits from the following:

Code	Title	Credits
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/ AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Gain understanding of the main approaches and methodologies of the field of dance studies as an academic approach to dance with an interdisciplinary focus.
2. Engage with dance as a site through which cultural, social, and political identities are constructed, manifested, and negotiated.

3. Analyze dance in relation to the social, cultural, and historical circumstances in which it is embedded.
4. Integrate physical and theoretical knowledge of dance in written, oral, and embodied forms.

DANCE, BFA

Students pursuing a BFA in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree prepares students for careers in professional dance and provides a foundation for teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Fine Arts (BFA) in Dance requires a minimum of 85 major credits and is designed for students who wish to spend more time preparing for a professional career in dance.

A dance degree at UW-Madison offers opportunities to:

- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Experience an interdisciplinary approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.
- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in August, November, and February.

The Dance Department also offers five certificates: a general certificate in Dance (<https://guide.wisc.edu/undergraduate/education/dance/dance-certificate/>), a certificate in Dance Education (p. 1610), one in Dance Studies (p. 1611), a certificate in Dance/Movement Therapy (<https://guide.wisc.edu/undergraduate/education/dance/introductory-studies-dance-movement-therapy-certificate/>), and another certificate in Pilates (<https://guide.wisc.edu/undergraduate/education/dance/pilates-certificate/>).

HOW TO GET IN

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance

department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply/>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION

New and Current UW–Madison Students

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>), to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

Prospective Transfer Students

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

Students with a previous degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with a School of Education advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1494).

- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- On-campus transfer students must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

ADMISSION AND APPLICATION

Criteria for Admission

Requirements and selection criteria may be modified from one application/admission period to the next. Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education’s Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student’s primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The BFA degree in Dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.
- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
Complete one of the following:		2
DANCE 330	Functional Anatomy for Movement Practices	
KINES 227	Introduction to Clinical Anatomy of Human Movement	
ANAT&PHY 338	Human Anatomy Laboratory	

MAJOR REQUIREMENTS

Complete a minimum of 85 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–BS and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, DANCE 115 Hip-Hop Dance Technique and Theory I, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 8 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 Introduction to the Histories of Dance is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 18 credits from the following; 9 credits must be numbered DANCE 311 Contemporary Dance Technique and Theory V or higher:

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	
DANCE 112	Contemporary Dance Technique and Theory II	
DANCE 211	Contemporary Dance Technique and Theory III	
DANCE 212	Contemporary Dance Technique and Theory IV	
DANCE 311	Contemporary Dance Technique and Theory V	
DANCE 312	Contemporary Dance Technique and Theory VI	
DANCE 410	Contemporary Dance Forms	

Ballet Technique

Select a minimum of 14 credits from the following; 10 credits must be numbered DANCE 225 Ballet Technique II or higher:

Code	Title	Credits
DANCE 125	Ballet Technique I	
DANCE 126	Ballet Technique I-B	
DANCE 225	Ballet Technique II	
DANCE 226	Ballet Technique II-B	
DANCE 325	Ballet Technique III	
DANCE 326	Ballet Technique III-B	

Additional Techniques

Select a minimum of 6 credits of the following. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 101	Social Dance I	1
DANCE 102	Social Dance II	1
DANCE 103	Modern Jazz Dance	1
DANCE 110	Workshop in Dance Activity (Sections numbered 010 and above)	1-2
DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 115	Hip-Hop Dance Technique and Theory I	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2

DANCE/ AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/ AFROAMER/ ASIAN AM/ FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3

BODY STUDIES

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
Select 4 credits of the following:		4
DANCE 110	Workshop in Dance Activity (Yoga)	
DANCE 132	Workshop in Body Studies and Practices	
DANCE 135	Pilates Mat I	
DANCE 235	Pilates Mat II	
DANCE 136	Pilates Equipment I	
DANCE 236	Pilates Equipment II	
DANCE 213	New Movement Techniques	

CRITICAL AND CREATIVE INVESTIGATIONS

Code	Title	Credits
DANCE 140	Dance Production	2
MUSIC 151	Basic Concepts of Music Theory	3
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 162	First Year Workshop	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Dance in the Modern Era	3
Design - Complete one of the following:		3-4
DANCE/ART 341	Sound Design for the Performing and Visual Arts	
DANCE 345	Screendance Production	
ART 318	Introduction to Video, Performance & Installation Art	
ART 518	Artist's Video	
ART 531	Screen Performance	
DANCE 355	Dance Composition II	3
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3
DANCE 374	Teaching Dance	3
Dance Repertory Theater - Complete 6 credits from the following:		6
DANCE 451	Dance Repertory Theater	
DANCE 452	Dance Repertory Theater	
DANCE 453	Dance Repertory Theatre	
DANCE 455	Dance Composition III	2
DANCE 462	Senior Seminar	3

PUBLIC PRESENTATIONS

BFA students must create one solo and one group piece (trio or larger) after the completion of DANCE 255 Movement Composition for the Performing and Visual Arts. These works must be submitted for faculty approval and publicly presented in concert. Senior projects must be presented in an approved public forum.

ELECTIVE CREDITS

Complete additional coursework, if necessary, to reach the minimum of 125 credits. DANCE 165 Introduction to the Histories of Dance is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements are based on UW–Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 125 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Dance: Bachelor of Fine Arts – Sample Four Year Plan

This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200 and 300-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance–BS and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, DANCE 115 Hip-Hop Dance Technique and Theory I, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 8 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these

courses. DANCE 165 Introduction to the Histories of Dance is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

This degree requires a minimum of 125 credits, although additional contemporary dance technique and theory courses are strongly recommended. BFA Dance students must create one Solo and one Group piece (trio or larger) after completion of 255. These works must be faculty approved for public presentation.

Freshman

Fall	Credits Spring	Credits
DANCE 111	3 Communication A	3
DANCE 115	2 DANCE 112	3
DANCE 125	2 DANCE 126	2
DANCE 156	2 DANCE 255	2
DANCE 162	1 MUSIC 151	3
DANCE 165 (also meets Liberal Studies Global Perspectives requirement)	3 Quantitative Reasoning A	3
Liberal Studies course work (U.S. or European History recommended)	3	
	16	16

Sophomore

Fall	Credits Spring	Credits
DANCE 211	2 DANCE 212	1
DANCE 225	2 DANCE 226	2
DANCE 157	2 DANCE 131	2
DANCE 200 (also meets Liberal Studies and Communication B)	3 DANCE 140	2
DANCE 265	3 DANCE 135	1
Ethnic Studies (not from Dance) or other Liberal Studies course work ¹	4 DANCE 355	3
	DANCE 365	3
	DANCE 451	1
	16	15

Junior

Fall	Credits Spring	Credits
DANCE 311	2 DANCE 312	2
DANCE 325	2 DANCE 326	2
DANCE 235	1 DANCE 345	3
DANCE 241	3 DANCE 213	1
ANAT&PHY 338 (also counts toward Liberal Studies Science requirement)	2 DANCE 374	3
Liberal Studies course work	6 DANCE 452	1
	Quantitative Reasoning B	3
	16	15

Senior

Fall	Credits Spring	Credits
DANCE 410	2 DANCE 410	3
DANCE 325	1 DANCE/AFROAMER/MUSIC 318	3
DANCE 110	1 DANCE 326	1
DANCE 132	1 DANCE 455	2
DANCE 451	2 DANCE 452	2
DANCE 462	3 Liberal Studies course work	4
Liberal Studies course work	6	
	16	15

Total Credits 125

¹ Some Dance department courses meet both the ethnic studies and additional techniques requirements. If this option is selected, a three-credit liberal studies course must be completed this semester.

ADVISING AND CAREERS

ADVISING AND CAREERS DANCE DEPARTMENT ADVISING

All dance degree students receive targeted advising through the department's undergraduate advisor, Karen McShane-Hellenbrand. Dance Department advising is designed to assist students in choosing classes and evaluating their degree path. This is particularly critical for students pursuing a dance degree and an additional degree program or major.

Students may also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns, see below. Current students can schedule an appointment with a School of Education advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments

can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Dance Pathways (<https://careercenter.education.wisc.edu/explore-career/dance-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently

seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

DANCE AND THE WISCONSIN EXPERIENCE

The UW–Madison Dance department provides students with a wide range of opportunities to perform, work with and learn from national/international guest artists, create and show their own work, conduct their own research, study abroad, volunteer, and connect with the local education community.

Guest Artists

The Dance department brings in guest artists-in-residence each year to work directly with students. These professionals are national or international artists who teach master classes, hold auditions, and set works on students for performance in our annual faculty concert. The department also brings in several guest artist teachers throughout the academic year to teach master classes to our students.

Student Performance Opportunities

Dance students have many opportunities to perform in student- and faculty-choreographed concerts throughout the academic year. Technique and theory courses prepare students with the technical, compositional, and artistic skills for performance in our in-house theater, the H'Doubler Performance Space, in historic Lathrop Hall.

Peer Mentorship

Several volunteer roles are available to students through the department's peer mentor program. Dance Peer Mentors support and encourage new first-year dance degree students in their adjustment to UW–Madison and the Dance department, provide support during incoming student audition days, and serve as role models and advocates for success in the dance degree program.

Study Abroad

The Dance department offers a three-credit study abroad program to Greece (<https://studyabroad.wisc.edu/program/?programId=330295>), as well as summer awards for students to travel and train at the American Dance Festival, Bates Dance Festival, Peridance Contemporary Dance Company, Perry Mansfield, The Ailey School, Seattle Festival of Dance + Improvisation, NYU | Tisch, and the Dance Education Laboratory, among others.

Student Research

In their final year of the degree program, students design and complete their own research projects. Some of the projects include funding to do creative research which culminates in a full-length concert.

Work with the Local Community

The Dance department offers courses in Dance Education and Dance Movement Therapy which include practicum experiences with students in local schools. Students have opportunities to engage preschool and school-aged students in dance for social-emotional, kinesthetic motor, and cognitive development using trauma-informed, culturally-responsive, and student-centered practices.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources

for students in the School of Education can be found on the school's Resources (p. 1514) page.

ACCREDITATION

ACCREDITATION

National Association of Schools of Dance (<https://nasd.arts-accredit.org/>)

The University of Wisconsin-Madison is an accredited institutional member of the National Association of School of Dance (NASD). Accreditation status: Accredited. Next accreditation review: 2025-2026.

DANCE, BS

Students pursuing an undergraduate degree in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree provides a foundation for eventual careers in professional dance, dance teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Science (BS) degree in Dance requires a minimum of 57 major credits and is designed for students who wish to pursue a degree in dance and another major or degree program in a second area of interest.

A dance degree at UW-Madison offers opportunities to:

- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Pursue an additional major or degree in a second area of interest.
- Experience an interdisciplinary, rigorous approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.
- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in August, November, and February.

The Dance department also offers five certificates: a general certificate in Dance (p. 1625), a certificate in Dance Education (p. 1610), one in Dance Studies (p. 1611), (p. 1611) a certificate in Dance/Movement Therapy (p. 1626), and another certificate in Pilates (p. 1627).

HOW TO GET IN

HOW TO GET IN

PROGRAM ADMISSION OVERVIEW

All students wishing to major in dance must complete a performance audition to be admitted to the program. Auditions are held in August, November, and February. Consult the Dance department website (<http://www.dance.wisc.edu/dance/admissions/how-to-apply/>) for more detailed information about the audition process.

ENTERING THE SCHOOL OF EDUCATION

New and Current UW-Madison Students

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

Prospective Transfer Students

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with a Student Services advisor in advance of their application; to schedule, call 608-262-1651.

Students with a Previous Degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an *Education Special student* or a *second degree student*, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the

eligible applicants for program admission. More information is available here (p. 1494).

ADMISSION AND APPLICATION

Criteria for Admission

Requirements and selection criteria may be modified from one application/admission period to the next.

Eligibility for consideration:

- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale).¹
- Students who have transferred to and are currently enrolled in UW–Madison coursework must have a cumulative grade point average of at least a 2.5 on the UW–Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General
Education

- Breadth–Humanities/Literature/Arts: 6 credits
- Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth–Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The BS degree in dance has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Discipline-related coursework* provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- *Major* requirements offer an in-depth study of dance.
- *Elective* credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

DISCIPLINE-RELATED REQUIREMENTS

Code	Title	Credits
DANCE 200	Writing the Moving Body	3
DANCE 560	Current Topics in Dance: Workshop (Anatomy for Dancers)	2
or ANAT&PHY 338	Human Anatomy Laboratory	
Choose One:		2
DANCE 330	Functional Anatomy for Movement Practices	
ANAT&PHY 338	Human Anatomy Laboratory	
KINES 227	Introduction to Clinical Anatomy of Human Movement	

MAJOR REQUIREMENTS

Complete a minimum of 57 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW–Madison campus.

New first-year Dance–BS and BFA students should expect to register for the following 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, DANCE 115 Hip-Hop Dance Technique and Theory I, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 8 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 Introduction to the Histories of Dance is also strongly

recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

Contemporary Dance Technique and Theory

Select a minimum of 14 credits from the following; 6 credits must be numbered 211 or higher.

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 410	Contemporary Dance Forms	1-3

Ballet Technique

Select a minimum of 8 credits from the following; 4 credits must be numbered 225 or higher:

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2

Additional Techniques

Select a minimum of 2 credits. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop. Jazz and Ballroom courses do not count toward this requirement.

Code	Title	Credits
DANCE 101	Social Dance I	1
DANCE 102	Social Dance II	1
DANCE 103	Modern Jazz Dance	1
DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 110	Workshop in Dance Activity (all sections numbered 010 and above)	1-2
DANCE 115	Hip-Hop Dance Technique and Theory 1	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2

DANCE/ AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/ AFROAMER/ ASIAN AM/ FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 140	Dance Production	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2
DANCE 162	First Year Workshop	1
DANCE 240	Dance Production Laboratory	1
DANCE 241	Music Fundamentals for Dancers	3
DANCE 255	Movement Composition for the Performing and Visual Arts	2
DANCE 265	Dance History I: Dance in the Modern Era	3
Design - Complete one of:		3-4
DANCE/ART 341	Sound Design for the Performing and Visual Arts	
DANCE 345	Screendance Production	
ART 318	Introduction to Video, Performance & Installation Art	
ART 518	Artist's Video	
ART 531	Screen Performance	
DANCE 365	Dance History II: Directions and Issues of Contemporary Dance	3
DANCE 462	Senior Seminar	3
Select 3 credits from the following:		3
DANCE 355	Dance Composition II	
DANCE 373	Introduction to Dance and Community	
DANCE 374	Teaching Dance	
Select 3 credits from the following:		3
DANCE 451	Dance Repertory Theater	
DANCE 452	Dance Repertory Theater	
DANCE 453	Dance Repertory Theatre	

ELECTIVE COURSEWORK

Complete additional coursework, if necessary, to reach the minimum of 124 credits. DANCE 165 Introduction to the Histories of Dance is recommended and will meet the Global Perspectives requirement in liberal studies.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Requirements below are based on UW-Madison coursework.

- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 124 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Bachelor of Science: Dance – Sample Four Year Plan

This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance–BS and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, DANCE 115 Hip-Hop Dance Technique and Theory I, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 8 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 Introduction to the Histories of Dance is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

This degree requires a minimum of 124 credits. Contemporary dance technique and theory classes beyond the minimum requirement are strongly recommended and included in this plan as electives. Bachelor of Science – Dance students must present their senior projects in an approved public forum.

Freshman

Fall	Credits Spring	Credits
DANCE 111	3 Communication A	3
DANCE 125	2 DANCE 112	3
DANCE 156	2 DANCE 115	2

ADVISING AND CAREERS

ADVISING AND CAREERS DANCE DEPARTMENT ADVISING

All dance degree students receive targeted advising through the department's undergraduate advisor, Karen McShane-Hellenbrand. Dance department advising is designed to assist students in choosing classes and evaluating their degree path. This is particularly critical for students pursuing a dance degree and an additional degree program or major.

Students may also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns, see below. Current students can schedule an appointment with a

School of Education advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Dance Pathways

(<https://careercenter.education.wisc.edu/explore-career/dance-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

DANCE AND THE WISCONSIN EXPERIENCE

The UW–Madison Dance department provides students with a wide range of opportunities to perform, work with and learn from national/international guest artists, create and show their own work, conduct their own research, study abroad, volunteer, and connect with the local education community.

Guest Artists

The Dance department brings in guest artists-in-residence each year to work directly with students. These professionals are national or international artists who teach master classes, hold auditions, and set works on students for performance in our annual faculty concert. The department also brings in several guest artist teachers throughout the academic year to teach master classes to our students.

Student Performance Opportunities

Dance students have many opportunities to perform in student and faculty choreographed concerts throughout the academic year. Technique and theory courses prepare students with the technical, compositional, and artistic skills for performance in our in-house theater, the H'Doubler Performance Space, in historic Lathrop Hall.

Peer Mentorship

Several volunteer roles are available to students through the department's peer mentor program. Dance Peer Mentors support and encourage new first-year dance degree students in their adjustment to UW–Madison and the Dance department, provide support during incoming student audition days, and serve as role models and advocates for success in the dance degree program.

Study Abroad

The Dance department offers a three-credit study abroad program to Greece (<https://studyabroad.wisc.edu/program/?programId=330295>), as well as summer awards for students to travel and train at the American Dance Festival, Bates Dance Festival, Peridance Contemporary Dance Company, Perry Mansfield, The Ailey School, Seattle Festival of Dance +

Improvisation, NYU | Tisch, and the Dance Education Laboratory among others.

Student Research

In their final year of the degree program, students design and complete their own research projects. Some of the projects include funding to do creative research which culminates in a full-length concert.

Work with the Local Community

The Dance department offers courses in Dance Education and Dance Movement Therapy which include practicum experiences with students in local schools. Students have opportunities to engage preschool and school-aged students in dance for social-emotional, kinesthetic motor, and cognitive development using trauma-informed, culturally-responsive, and student-centered practices.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

ACCREDITATION

ACCREDITATION

National Association of Schools of Dance (<https://nasd.arts-accredit.org/>)

The University of Wisconsin-Madison is an accredited institutional member of the National Association of School of Dance (NASD).

Accreditation status: Accredited. Next accreditation review: 2025-2026.

DANCE, CERTIFICATE

The Dance Certificate is a 19-credit program open to all students. Students who pursue a Dance Certificate often have a background in dance but may not be seeking a degree in dance. Others are beginning dance students.

The program provides a foundation in contemporary dance practice and theory, as well as offering opportunities in a variety of movement, somatic, and creative practice courses including contemporary dance, ballet, movement analysis, improvisation, dance composition, as well as dance history. The certificate also offers students the flexibility of choosing among a wide variety of courses that may interest them, including hip-hop, African, Tai Ji, among others. Students may also participate in performance opportunities if they have an interest in performance.

HOW TO GET IN

HOW TO GET IN

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, may declare this certificate.

Students must meet with the dance certificate advisor to discuss their intention to pursue the certificate. Students will enroll in two semesters of dance technique and apply for admission to the Dance Certificate at the end of the second semester. Students intending to pursue the Dance Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

REQUIREMENTS

The Dance Certificate requires the following course distribution for a minimum of 19 credits.

CONTEMPORARY DANCE TECHNIQUE AND THEORY

Select 6 credits from the following:

Code	Title	Credits
DANCE 111	Contemporary Dance Technique and Theory I	1-3
DANCE 112	Contemporary Dance Technique and Theory II	1-3
DANCE 211	Contemporary Dance Technique and Theory III	1-3
DANCE 212	Contemporary Dance Technique and Theory IV	1-3
DANCE 311	Contemporary Dance Technique and Theory V	1-3
DANCE 312	Contemporary Dance Technique and Theory VI	1-3
DANCE 410	Contemporary Dance Forms	1-3

BALLET TECHNIQUE

Select 2 credits from the following:

Code	Title	Credits
DANCE 125	Ballet Technique I	1-2
DANCE 126	Ballet Technique I-B	1-2
DANCE 225	Ballet Technique II	1-2
DANCE 226	Ballet Technique II-B	1-2
DANCE 325	Ballet Technique III	1-2
DANCE 326	Ballet Technique III-B	1-2

ADDITIONAL TECHNIQUES

Select 2 credits from the following. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop .

Code	Title	Credits
DANCE 101	Social Dance I	1
DANCE 102	Social Dance II	1
DANCE 103	Modern Jazz Dance	1
DANCE 110	Workshop in Dance Activity (Sections numbered 010 and above)	1-2

DANCE 110	Workshop in Dance Activity (Hip Hop)	1-2
DANCE 110	Workshop in Dance Activity (Tai Ji)	1-2
DANCE 115	Hip-Hop Dance Technique and Theory 1	1-2
DANCE 116	Workshop in World Dance	2
DANCE 118	African Dance	1
DANCE/ ASIAN AM 121	Asian American Movement	3
DANCE/ THEATRE 218	African Dance Performance	2
DANCE/ AFROAMER/ MUSIC 318	Cultural Cross Currents: West African Dance/Music in the Americas	3
DANCE/ AFROAMER/ ASIAN AM/ FOLKLORE 319	Afro Asian Improv: From Hip Hop to Martial Arts Fusion	3

ADDITIONAL REQUIRED COURSES

Code	Title	Credits
DANCE 131 or DANCE 157	Somatic Theory and Practices Introduction to Movement Analysis	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 255 or DANCE 373 or DANCE 374	Movement Composition for the Performing and Visual Arts Introduction to Dance and Community Teaching Dance	2
DANCE 265 or DANCE 365	Dance History I: Dance in the Modern Era Dance History II: Directions and Issues of Contemporary Dance	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate technical specificity, musicality and artistic confidence in ballet and contemporary dance techniques through sequenced skill level progressions.
2. Recognize, identify and embody a wide range of somatic theories and practices and produce work investigating its impacts and uses in contemporary dance as practice.
3. Demonstrate an intermediate level of contemporary dance literacy and artistry.
4. Develop and practice vocabulary and methodology for analyzing and discussing dance in performance and historical contexts and begin to respond critically and thoughtfully to dance scholarship.

INTRODUCTORY STUDIES IN DANCE/MOVEMENT THERAPY, CERTIFICATE

Dance/movement therapy (DMT) is one of the creative arts therapies. It is a form of psychotherapy that uses movement, both creative and functional, as well as words, to help people – those who are generally healthy as well as those dealing with emotional, mental, or physical problems – to regain a sense of wholeness by experiencing the fundamental unity of body, mind, and spirit. The dance therapy certificate introduces students to the fascinating nonverbal aspects of human communication and its applications to a wide range of other fields such as social work, teaching, occupational therapy, physical therapy, and communication disorders.

Students will also be introduced to the use of movement in the fields of violence prevention, behavior management, and social skills development from a movement or body/mind perspective. Students who complete this certificate are prepared to attend graduate school in the field of dance/movement therapy, a requirement for the professional practice in this field, or to use embodied practices in related fields. In addition, students develop a repertoire of strategies to help cope with the stress and anxiety inherent in college life and develop insights into their own body/mind connections.

This certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

HOW TO GET IN

HOW TO GET IN DECLARATION PROCESS

Prospective certificate students should meet with the Dance/Movement Therapy Certificate advisor to discuss their intentions to pursue the certificate. Enroll in the first- or second-semester dance/movement therapy course:

- DANCE 231 Introduction to Dance/Movement Therapy or
- DANCE 232 Introduction to Dynamics of Dance Therapy.

Application is usually made directly after the completion of Introduction to Dynamics of Dance Therapy. Students intending to pursue the Dance/Movement Therapy Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

REQUIREMENTS

REQUIREMENTS

The Introductory Studies in Dance/Movement Therapy certificate requires a minimum of 19 credits.

SUPPORTIVE DISCIPLINARY COURSEWORK

Choose a course (3-credit minimum) from the following departments: Counseling Psychology (https://guide.wisc.edu/courses/coun_psy/), Educational Psychology (https://guide.wisc.edu/courses/ed_psy/),

Psychology (<https://guide.wisc.edu/courses/psych/>), Rehabilitation Psychology and Special Education (https://guide.wisc.edu/courses/rp_se/).

BODY STUDIES

Select 2 courses from the following:

Code	Title	Credits
DANCE 131	Somatic Theory and Practices	2
DANCE 156	Movement as Material Through Improvisation	2
DANCE 157	Introduction to Movement Analysis	2

REQUIRED DANCE DEPARTMENT COURSEWORK

All students are required to complete the following:

Code	Title	Credits
DANCE 231	Introduction to Dance/Movement Therapy	3
DANCE 232	Introduction to Dynamics of Dance Therapy	3
DANCE 331	Dynamics of Dance Therapy	3
DANCE 431	Dance Therapy Practicum	3

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Body Studies) Gain skill in expressing through movement and understanding its connection to emotion.
2. Develop literacy about the field of Dance/Movement Therapy.
3. Practice and practical work in movement analysis as a tool for Dance/Movement Therapy.

PILATES, CERTIFICATE

The Pilates certificate includes coursework in the classic Pilates mat and equipment repertoire, current teaching methods, and functional anatomy. The certificate prepares students to teach Pilates in a studio setting and also creates a practical foundation for those who wish to pursue graduate work in movement-based fields.

This certificate program is open to all interested students and is often pursued by students working toward degrees in dance, kinesiology, athletic training, physical therapy, occupational therapy, or other health/fitness fields.

The curriculum can be completed in two years. Upon completion, students are encouraged to sit for the Pilates Method Alliance certification exam to earn their credentials as nationally certified Pilates teachers.

This certificate is also available to individuals who have already completed a Bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates and University Special Students are eligible to complete the Certificate in Pilates.

Students should meet with the Pilates Certificate Coordinator to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form (<https://education.wisc.edu/academics/certificates/>) located on the School of Education's Certificate Programs page.

REQUIREMENTS

REQUIREMENTS

The Pilates certificate requires a minimum of 20 credits.

Code	Title	Credits
DANCE 135	Pilates Mat I	1
DANCE 136	Pilates Equipment I	2
DANCE 235	Pilates Mat II	1
DANCE 236	Pilates Equipment II	2
DANCE 237	Pilates Studio I	3
DANCE 330	Functional Anatomy for Movement Practices	2
DANCE 337	Pilates Studio II	3
DANCE 375	Pilates Teaching Methods	1
DANCE 376	Pilates Teaching I	2
DANCE 476	Pilates Teaching II	3
Total Credits		20

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Pilates Practice - Strength, Focus, Movement Efficiency)
Demonstrate proficiency in Pilates exercises, including fundamental exercises and beginner through advanced mat and equipment work.

Students will show significant improvement in body awareness, physical skill and strength, and efficient movement patterning.

2. (Pilates Teaching – Safety, Clarity, Communication) Confidently teach one-on-one and group Pilates classes, effectively communicating physical and conceptual ideas about the body to a variety of learning styles, body types and physical backgrounds.
3. (Anatomical Approaches to Pilates) Integrate current anatomical research into practice and teaching, using a variety of somatic approaches to embodying healthy anatomical function.

EDUCATION – SCHOOL-WIDE

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Individual Major, BSE (p. 1628)

INDIVIDUAL MAJOR, BSE

The individual major provides undergraduates with an opportunity to develop a unique course of study; one that is interdepartmental and not reflected in existing degree programs. Completion of the individual major does not lead to a professional license or certification, although graduates may be interested in pursuing alternative educational careers or graduate work. Graduates earn a BS–Education degree.

HOW TO GET IN

HOW TO GET IN ADMISSION ELIGIBILITY REQUIREMENTS

To be eligible, applicants must:

- earn a 2.75 cumulative GPA on the UW–Madison campus.¹
- complete a minimum of 54 credits
- receive approval of major program proposal submitted by the applicant.

¹ For alternative calculation of cumulative GPA, see Last 60 Credits Rule.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to the program. GPAs will be calculated using

- all transferable college-level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

APPLICATION PROCEDURES

Once a committee of three persons has been chosen in accord with the guidelines and required courses have been selected, students should proceed as follows:

- Submit an Individual Major in Education proposal form (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>).
- Submit the program plan and narrative with the transfer application for associate dean's approval. The three-member committee must sign the proposal in the spaces indicated. Failure to submit a program narrative will void the transfer.

Once an application form has been submitted, changes must be approved by both the chair of the committee and the associate dean. Changes must be recorded on the program plan. If more than two program changes are made, a new application form must be filed by the student.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural

and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (BS) degree program with an individual major has three components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major* requirements permit in-depth study of a unique area within the School of Education. Students create their own, interdepartmental major following the guidelines established by the school. When completed, the title of the individual major is listed on the student's transcript.

- *Elective* credits make it possible to pursue additional areas of interest and are necessary to reach the minimum of 120 credits required for the degree.

REQUIREMENTS OF THE INDIVIDUAL MAJOR DEVELOPMENT OF THE MAJOR

Students must have an area of interest that they wish to develop into a 36–42 credit formalized program of study, or major. Advisors in Education Student Services, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss students' interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. A program title cannot duplicate the existing title of any program at UW–Madison.

SELECTION OF MAJOR COURSEWORK

Select courses that support the program narrative, in consultation with the major advisor; see below. **All courses in the major must be from School of Education course offerings.** All credits in the major must be completed after admission into the program (IME classification).

Additional requirements regarding the major are:

- To ensure depth and breadth of study, no more than two-thirds of the total credits in a major can be taken from any one department (i.e., if a major is 36 credits, no more than 24 credits can be in one department).
- A sequential development of courses must be planned in consultation with the major advisor and committee, and must be approved by the committee. The course sequence must include beginning through advanced levels of work as prescribed by the credit distribution.
- At least 20 of the IME credits must be at the intermediate or advanced levels (generally numbered 300 or above, but this varies in some departments).
- Courses in the School of Education completed prior to admission to the IME classification may not be used toward satisfaction of the 36–42 credits in the major without the faculty committee and associate dean's approval. The credits may count toward the 120 credits required for graduation.
- Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- An individual major which essentially parallels an existing departmental major will not be accepted.
- Directed study credits (e.g. 399, 699) are acceptable, but each course must be accompanied by a statement that includes a description of the focus of study, the requirements for successful completion of the credits, and a discussion of the applicability of content to the proposed individual major. Usually no more than 3 credits of Independent Study will be allowed. Approval of the associate dean is required in order to exceed three credits.
- Students must complete prerequisites for all courses and, in some departments, may be required to complete foundational courses.

SELECTING THE ADVISORY COMMITTEE AND MAJOR ADVISOR

The applicant must create a three-member committee to oversee his or her work. Only assistant, associate, and full professors may serve on the committee; individuals holding such titles as Lecturer or Instructor cannot serve in this capacity. One of the committee members will be selected by the student to be the major advisor. The major advisor must be from a department within the School of Education and from the department in which the majority of courses for the individual major will be taken, i.e., the core area of study. The second faculty member must be from the same department as the major advisor/committee chair. The third faculty member must be from another department in the School of Education in which courses will be taken for the individual major. The associate dean serves as ex officio to the three-member committee and gives final approval to all programs and any exceptions.

ELECTIVE CREDITS

Elective credits make it possible to pursue additional areas of interest. Many students, for example, use their elective credits to complete an additional major from the College of Letters & Science. Some use this second major to complement their individual major, while others select second majors that are completely unrelated to their first. Elective credits are necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

Graduation requirements are based on UW–Madison coursework. Graduation GPA requirements may be modified by the Last 60 Credits Rule (p. 1494).

- 2.75 cumulative grade point average.
- 2.75 cumulative grade point average across all major coursework
- 2.75 cumulative grade point average across all upper-level (numbered 300 and above) major coursework
- Degree candidates must complete at least 120 total credits.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW–Madison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification

such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Individual Major: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Development of the Major

Students must have an area of interest that they wish to develop into a 36–42 credit formalized program of study, or major. Advisors in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss your interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. All courses in the major must be from School of Education course offerings and all credits in the major must be completed after admission into the major (IME classification). The title of the major cannot duplicate the existing title of any other major or program at UW–Madison. Consult the Guide for more information on creating an individual major and its requirements.

Freshman

Fall	Credits Spring	Credits
Communication A (fall or spring semester)	3 Communication A (fall or spring semester)	3
Liberal Studies course work	12-15 Ethnic Studies	3
	Quantitative Reasoning A	3
	Liberal Studies course work	6-9
	15	15

Sophomore

Fall	Credits Spring	Credits
Communication B	3 Develop and submit major proposal for approval	
Liberal Studies course work	12 Quantitative Reasoning B	3
	Liberal Studies or General Elective course work	12
	15	15

Junior

Fall	Credits Spring	Credits
Major course work ¹	9-12 Major course work	9-12
Liberal Studies or General Elective course work	3-6 Liberal Studies or General Elective course work	3-6
	15	15

Senior

Fall	Credits Spring	Credits
Major course work (upper level)	9-12 Major course work (upper level)	9-12
Liberal Studies or General Elective course work	3-6 Liberal Studies or General Elective course work	3-6
	15	15

Total Credits 120

¹ At least 15 credits of major course work must be upper-level (numbered 300 and above) and taken in residence.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING FOR THE INDIVIDUAL MAJOR

Students interested in the Individual Major should first consult with an advisor in the School of Education Student Services office, see below. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Eventually, a committee to oversee the major will be formed and also provide advising in the major.

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

EDUCATIONAL POLICY STUDIES

The Department of Educational Policy Studies, the #4 ranked education policy department in the nation, deepens and expands the understanding of educational policy and practice, past and present, at local, national, and international levels.

Through eye-opening, challenging coursework, students analyze educational dilemmas, conduct research, and develop skills to shape policy and practice across the globe. Students have opportunities for experiential learning through internships, community-based learning, and study abroad. The department provides a supportive intellectual community with peers and faculty committed to addressing the most pressing issues in education and in society.

Undergraduate courses emphasize the impact of educational programs and policies on equity, justice, educational improvement, and well-being. Course topics include the history, sociology, anthropology, economics, politics, and philosophy of education, comparative and international education, policy and evaluation, and educational equity. The department has strong ties with institutions and scholars in the U.S. and in other countries.

The department offers an undergraduate Bachelor of Science degree program in Educational Policy Studies (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/education-studies-bs/>). This program is designed to meet the needs of undergraduate students who are interested in working in domestic and/or global educational policy and practice. A new Honors program in Educational Policy Studies will be launched in the fall of 2025.

Graduates work as policy researchers, education specialists, program directors, community leaders, and more. Others go on to graduate research and professional degrees in a range of education fields.

The department features four certificate programs:

- The popular Educational Policy Studies (EPS) Certificate (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/educational-policy-studies-certificate/>) provides students with an understanding of education debates, education policy, and education advocacy, and allows them to develop skills to critically examine policy.
- The Social Justice and Education Certificate (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/social-justice-education-certificate/>) provides students with an understanding of the social, political, and economic inequities that shape our schools and broader society, as well as how educators, students, administrators, parents, and community members have sought to interrupt these inequities (historically and in the contemporary period).
- The Global Languages, Cultures, and Education Certificate (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/global-cultures-languages-education-certificate/>) examines cultural diversity, social inequality, language policy, and literacy. It provides students with skills to work globally, within and beyond schools, in fields related to language, culture, and education.
- The International Education and Development Certificate (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/international-development-education-certificate/>) investigates the complex issues that shape international educational policies, programs, and practices as they address challenges of poverty, inequality, forced migration, sustainability, colonialism, and human rights. Students explore careers in international education development and global service with governmental and non-governmental organizations, educational institutions, and community development organizations.

Many Educational Policy Studies students pursue a second major and/or certificates that complement the skills and knowledge they are gaining via their EPS coursework and experiences.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Educational Policy Studies, BS (p. 1632)
- Educational Policy Studies, Certificate (p. 1641)
- Global Cultures, Languages, and Education, Certificate (p. 1642)
- International Development and Education, Certificate (p. 1650)
- Social Justice and Education, Certificate (p. 1651)

EDUCATIONAL POLICY STUDIES, BS

The Educational Policy Studies degree program, formerly the Education Studies program, addresses urgent questions related to domestic and global education policy and practice. Majors become thought leaders who engage critically and ethically in educational policy debates and practice. While pursuing Educational Policy Studies, students (<https://eps.education.wisc.edu/current-students/student-profiles/>):

- Analyze the relationships among education, inequality, and social justice
- Investigate local, national, and global connections between education and other policy areas, including housing, healthcare, migration, justice, political reform, economic development, and foreign policy

- Explore contemporary educational issues from early childhood through K-12, higher education, and the workforce
- Engage in community-based learning, study abroad and study away, career development, internships, and research experiences related to education
- Compete for grants (<https://eps.education.wisc.edu/about/student-awards/>) for research or applied work and awards (<https://eps.education.wisc.edu/about/student-awards/>) in writing, research, and community-engaged scholarship
- Acquire qualitative, quantitative, philosophical, and historical research skills to study current issues in education policy and apply knowledge to practice

Through coursework, projects, advising, and independent studies, the Educational Policy Studies major prepares students for work in educational settings such as:

- Governmental agencies
- Non-governmental organizations (both domestic and international)
- Think tanks and policy institutes
- Community organizations
- Corporate, community, and non-traditional educational spaces

Graduates might serve as education and policy analysts, education specialists, policy researchers, education advocates, program directors, community-based educators or youth workers, education trainers, or in other positions of institutional leadership. They will also be well prepared to work in government, education, and social justice-related organizations, or to pursue advanced studies in education or educational policy at the master's and doctoral level.

Graduates will receive a Bachelor of Science degree in Educational Policy Studies from the School of Education. This program does not lead to teacher certification, but it can enhance and complement teacher preparation programs. Students interested in gaining teaching licenses after graduation should connect with the School of Education Student Services (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) office or the School of Education Career Center (<https://careercenter.education.wisc.edu/>) office on campus to discuss their options.

"There were two classes I took in the same semester that made me switch my major to Educational Policy Studies completely. They were ED POL 412: History of American Education and ED POL 300: School and Society. ED POL 412 was about how education came to be from the colonial time period in the United States through the present day. ED POL 300 is a class that makes us ask questions like, 'how does our society influence our schools?' and 'how do our schools influence our society?,' all within the context of the United States. Both courses were really interesting to me."

– Abby Stoa (read more (https://education.wisc.edu/news/abby-stoa-from-the-school-of-educations-educational-policy-studies-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=EPS_majors&utm_id=student&utm_content=Student_Story))

HOW TO GET IN

HOW TO GET IN

PROGRAM DECLARATION OVERVIEW

The Educational Policy Studies major may be completed either as the primary major or as an additional ("double") major.

Primary Major in Educational Policy Studies

Undergraduate students interested in completing the Bachelor of Science–Educational Policy Studies degree program will fulfill the School of Education's liberal studies and other degree requirements in addition to the 30 credits required for the Educational Policy Studies major.

Additional Major in Educational Policy Studies

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Educational Policy Studies as an additional major. Students completing Educational Policy Studies as an additional major do not need to complete the School of Education's liberal studies and other degree requirements. For declaration information, go directly to the Additional Major in Educational Policy Studies (p. 1634) section below.

ENTERING THE SCHOOL OF EDUCATION

New and Current UW–Madison Students

Incoming freshmen enter directly into the Bachelor of Science–Educational Policy Studies degree program upon admission to UW–Madison; list Educational Policy Studies as the intended major. No additional declaration to Educational Policy Studies is required. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

All other on-campus students will submit a declaration form following a meeting with an advisor in the School of Education Student Services office, 139 Education Building. Call 608-262-1651 or email studentservices@education.wisc.edu, to schedule an appointment; current students can also schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

Prospective Transfer Students

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Transfer students enter directly into the Bachelor of Science–Educational Policy Studies degree program upon admission to UW–Madison; list Educational Policy Studies as the intended major. No additional declaration to Educational Policy Studies is required. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office, 139 Education Building, in advance of their application. Consultations with advisors are available in person, virtually, or via telephone. To schedule, call 608-262-1651 or email studentservices@education.wisc.edu. Requirements and selection criteria may be modified from one declaration period to the next. .

Students With A Previous Degree

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions

and Recruitment (<http://admissions.wisc.edu/>) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science–Educational Policy Studies degree program. No additional declaration to Educational Policy Studies is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office, 139 Education Building, in advance of their application to UW–Madison. Consultations with advisors are available in person, virtually, or via telephone. To schedule, call 608-262-1651 or email studentservices@education.wisc.edu. (studentservices@education.wisc.edu)

DECLARATION AND ADMISSION

While new first year students and off-campus transfers are admitted directly to the Bachelor of Science–Educational Policy Studies degree program, all other current UW–Madison students seeking to enter the BS–Educational Policy Studies degree program must consult with an advisor in the School of Education Student Services office, 139 Education Building, prior to submitting a declaration form. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Criteria for Admission

Eligibility to declare the Bachelor of Science–Educational Policy Studies degree:

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule described below. Note: Students declaring Educational Policy Studies as an additional major are not held to this requirement.
- Submission of all required declaration materials, including program declaration form and transcripts.

Requirements and selection criteria may be modified from one declaration period to the next.

Last 60 Credits Rule

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted,

all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

ADDITIONAL MAJOR IN EDUCATIONAL POLICY STUDIES

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Educational Policy Studies as an additional major. Students wishing to declare the additional major must visit an advisor in the School of Education Student Services office, 139 Education Building, to complete the declaration form; call 608-262-1651 or schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. The declaration must also be approved by the student's home school/college.

An additional major in Educational Policy Studies only requires the completion of the 30 credit major. Students do not need to complete the School of Education's liberal studies and other degree requirements for the additional major. Applicants are not held to the 2.5 cumulative GPA required of students completing the Educational Policy Studies degree program.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

DECLARING HONORS IN THE MAJOR

Students wishing to pursue Honors in Educational Policy Studies must consult with an advisor in the School of Education Student Services office, 139 Education Building, prior to submitting an Honors declaration form. Current students can schedule an appointment with an advisor online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Criteria for Admission

Admission to Honors in Educational Policy Studies requires that students:

- Be a declared major in Educational Policy Studies. Students may declare the major and Honors at the same time.
- Have a minimum GPA of 3.3
- Have met with a School of Education Advisor regarding Honors in the Major
- Select a research method pathway and *have completed* one prerequisite research course (ED POL 209 or ED POL 308) with a grade of AB or higher
- Submit all required declaration materials, including the Honors declaration form and transcript(s).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Educational Policy Studies program has three primary components:

- *Liberal studies* and *general education* courses that expose students to a broad range of academic disciplines.
- *Major* coursework in educational policy studies, including core course, depth, and breadth requirements.
- *Elective* credits to pursue individual areas of interest. Educational Policy Studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the Educational Policy Studies degree program makes it possible to complete an additional major and still graduate in four years.

MAJOR REQUIREMENTS

The Educational Policy Studies major requires 30 credits, to include core courses (9 credits), information literacy requirement (3 credits), depth requirements (9 credits) and breadth requirements (9 credits).

CORE COURSES, 9 CREDITS

Complete the following:

Code	Title	Credits
ED POL 240	Comparative Education	3
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	3

INFORMATION LITERACY REQUIREMENT, 3 CREDITS

Complete a minimum of one course (3 credits) which provides focused attention on developing information literacy in the field of education.

According to the American Library Association, "Information literacy is a set of abilities, requiring individuals to 'recognize when information is needed and have the ability to locate, evaluate, and use effectively the needed information' (American Library Association. Presidential Committee on Information Literacy. (<https://www.ala.org/acrl/publications/whitepapers/presidential/>)) 'To be information literate, then,

one needs skills not only in research but in critical thinking" (American Library Association, 2025 (<https://literacy.ala.org/information-literacy/>)). "Information Literacy empowers people in all walks of life to seek, evaluate, use and create information effectively to achieve their personal, social, occupational and educational goal." (UNESCO, 2023 (<https://www.unesco.org/en/ifap/information-literacy/>)).

Code	Title	Credits
ED POL 134	Media Literacy and Misinformation in Education	3
ED POL/ HISTORY 143	History of Race and Inequality in Urban America	3
ED POL 145	Introduction to Education Policy	3
ED POL 209	Introduction to Quantitative Methods in Education Policy	3
ED POL 308	Introduction to Qualitative Research Methods in Education	3

DEPTH REQUIREMENTS, 9 CREDITS

Complete a minimum of three courses (9 credits) to facilitate in-depth study of education policy and practice. At least one course (3 credits) must be an advanced ED POL course (numbered 500 or above).

Code	Title	Credits
ED POL/ HISTORY 107	The History of the University in the West	3
ED POL 112	Global Education through Film	3
ED POL 123	Education, Technology, and Society: AI, Big Data, and the Digital Divide	3

ED PSYCH 541	Applied Behavior Analysis in Classrooms	3
ELPA 640	Legal Rights and Responsibilities for Teachers	1-3
INTER-LS 300	Topics in Teaching and Learning in the Letters, Arts, and Sciences (Understanding and Improving Instruction topic only; other topics require approval)	3

ELECTIVE CREDITS

Complete additional credits to complete the minimum of 120 required for the degree. Educational Policy Studies majors are encouraged to consider completing complementary coursework in the College of Letters & Science, possibly including an additional major. The structure of the Educational Policy Studies degree program makes it possible to complete an additional major and still graduate in four years.

HONORS IN THE MAJOR

Honors in the major is for students who want more in-depth understanding and experiences in educational policy studies, as well as hands-on research experience. Honors in the Major also provides students with opportunities to develop leadership, writing, and critical thinking skills beneficial to a range of graduate programs and career choices. Honors students in Educational Policy Studies will join a vibrant intellectual community of faculty, staff, and students committed to furthering socially just visions of education to answer the most pressing issues in education and in society.

To be admitted to the program, Honors in Educational Policy Studies students must:

- Be a declared major in Educational Policy Studies,
- Have a minimum GPA of 3.3,
- Have met with a School of Education Advisor regarding Honors in the Major
- Select a research method pathway and *have completed* one prerequisite research course with a grade of AB or higher:

See How to Get in (p. 1633) for more details regarding the Honors declaration process.

EDUCATIONAL POLICY STUDIES HONORS RESEARCH PATHWAY

To earn Honors in the Major, students must satisfy the requirements for the major and the following additional requirements:

- Earn a 3.3 University GPA
- Earn a 3.5 GPA average for all ED POL courses
- Participate in Department research colloquium.
- Complete a two-semester Honors capstone experience, comprising the Honors Capstone class (ED POL 680), and an ED POL course (Qualitative: ED POL 618 or ED POL 580; Quantitative: ED POL 605 or ED POL 688) that offers a mentored research experience.
- Students must receive a B or higher in ED POL 680 in order to receive honors in the major.

BREADTH REQUIREMENTS, 9 CREDITS

Code	Title	Credits
Required Breadth Course		
Complete one of the following:		3
ED PSYCH 301	How People Learn	
ED PSYCH 320	Human Development in Infancy and Childhood	
ED PSYCH 321	Human Development in Adolescence	
ED PSYCH 331	Human Development From Childhood Through Adolescence	

Additional Breadth Course Options

Complete additional coursework NOT selected above, or from the courses listed below. ED PSYCH 301, 320, 321 and 331 may also count here, but not toward both breadth requirements.

CURRIC 240	Critical Aspects of Teaching, Schooling, and Education	3
CURRIC/ CHICLA 321	Chicano/Latino Educational Justice	3
CURRIC 331	Taking Education Outside of School	3
CURRIC 366	Internationalizing Educational Knowledge	3
CURRIC/C&E SOC/ ENVIR ST 405	Education for Sustainable Communities	3

Qualitative Research Honors Pathway

Code	Title	Credits
Prerequisite for honors declaration		
ED POL 308	Introduction to Qualitative Research Methods in Education	
Capstone Course		
ED POL 680	Educational Policy Studies Honors Capstone	
Mentored Research Course		
ED POL 618	Advanced Qualitative Research Methods in Education	
or ED POL 580	Participatory and Community-Based Research and Evaluation	

Quantitative Research Honors Pathway

Code	Title	Credits
Prerequisite for honors declaration		
ED POL 209	Introduction to Quantitative Methods in Education Policy	3
Capstone Course		
ED POL 680	Educational Policy Studies Honors Capstone	3
Mentored Research Course		
ED POL 605	Using Secondary Data: Applied Quantitative Analysis	3
or ED POL 688	Introduction to Survey Methods for Education Research	

ADDITIONAL CONSIDERATIONS FOR HONORS IN THE MAJOR

Students may take ED POL 680 before or after their research apprenticeship class. ED POL 680 will only be offered in the Fall semester.

The capstone course will give students an opportunity to develop expertise in existing research on an issue or question of interest to them and complete a capstone project. The capstone course will also help students engage in interdisciplinary conversations, consider pressing issues in education, explore potential professional and academic trajectories, and prepare for future careers and graduate education.

Students may declare the major and honors at the same time and may do so any time in their programs; however, being accepted to into the Honors program is a prerequisite to enrolling in ED POL 680. It is strongly advised that you declare Honors in the major as soon as you that know that you would like to do the program so that you can receive information and opportunities related to honors in the major.

The mentored research course (ED POL 618, ED POL 580, ED POL 605, or ED POL 688) is an opportunity to gain educational research and policy skills appropriate for graduate school or an array of future careers. Students may take ED POL 680 before or after their mentored research class

Honors research will be in the social sciences, either quantitative or qualitative research methods. Educational Policy Studies Honors in the Major cannot currently accommodate student research apprenticeships in philosophy or history. Students interested in writing a historical or philosophical thesis are encouraged to do so through the History and

Philosophy departments. Several Educational Policy Studies history and philosophy faculty have served on such committees in the past.

Students may change their intended research pathway (quantitative or qualitative) after being admitted to the Honors program but will still need to complete the appropriate prerequisite for the advanced research methods course (either ED POL 209 or ED POL 308) or receive permission of the instructor and the department chair.

GPA AND OTHER GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.

2.5 cumulative major grade point average.

2.5 cumulative grade point average in all upper-level major coursework ("upper-level" defined as numbered 300 and above).

Major Residency: Students must complete at least 15 credits of upper-level major coursework numbered 300 or above in residence on the UW–Madison campus. At least three of these credits must be in an advanced ED POL course numbered 500 and above.

Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.

Total credits: A minimum of 120 credits are required for graduation.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Formulate research-based arguments on topics in education policy using academic literature, including both primary and secondary sources.
2. Critically examine education and its contexts through multiple theoretical perspectives (e.g., sociocultural, economic/political, historical, philosophical).
3. Analyze pressing questions in education using different historical, philosophical, and/or social science research methods.
4. Analyze education issues from diverse perspectives related to forms of social difference (e.g., race, class, nationality, disability, gender, sexuality).
5. Gather information, critically analyze arguments, and thoughtfully communicate research-based arguments to a variety of audiences, using different modes of communication.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Educational Policy Studies: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

ADVISING AND CAREERS EDUCATIONAL POLICY STUDIES ADVISING

Students are advised by staff from the School of Education Student Services office (Room 139 Education Building) at SOAR and during the regular academic year (see below). Admitted students are also assigned a departmental advisor.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at student-services@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions

- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Educational Policy Studies Pathways (<https://careercenter.education.wisc.edu/explore-career/education-policy-studies-career-pathway/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

EDUCATION STUDIES AND THE WISCONSIN EXPERIENCE

Educational Policy Studies (EPS) coursework is enhanced by supplemental activities – in and beyond the classroom – that extend what students are learning in course texts and discussions.

Engage with Guest Experts

Many Educational Policy Studies (ED POL) courses feature guest speakers, including prominent scholars from universities across the globe, local educational leaders from community-based organizations and school districts, and educational policymakers. The Department also hosts speakers who highlight cutting-edge research, policy debates, careers, new developments in education (<https://eps.education.wisc.edu/about/conferences/>), and examples of how educational research informs policy and practice. Students have opportunities to learn from a variety of experts, expand their perspectives, ask questions, and connect.

Honors Program

Students in the Honors program gain more in-depth understanding and experiences in educational policy studies, as well as a hands-on, mentored research experience with faculty. Students also have opportunities to develop leadership, writing, and critical thinking skills beneficial to a range of graduate programs and career choices.

Volunteer, Leadership, and Community-Based Experiences

Educational Policy Studies students often volunteer and assume leadership roles on campus and/or within the broader community. They may take Community-based Learning (CBL) courses in EPS that enable them to integrate what they're learning in the classroom with what they're learning as volunteers in local educational spaces, such as schools, the United Way (<https://www.unitedwaydanecounty.org/>), Centro Hispano (<https://www.micentro.org/>), Goodman Center (<https://www.goodmancenter.org/>), and other organizations.

Leadership and Mentoring in the EPS Community

EPS majors develop leadership skills through programs like the EPS Ambassadors Program, in which students advise Educational Policy Studies faculty and staff, and recruit new students via course presentations and participation in departmental events. Incoming and transferring Education Studies majors are invited to partake in our Education Studies Buddy program, where they will be paired with a Junior or Senior Education Studies major for guidance and mentorship. Students contribute actively to building a supportive intellectual community in the major.

Career Development and Internships

Our department encourages career development beyond our classrooms by offering internships and courses such as ED POL 202 Careers in Education that prepare EPS majors to pursue careers post-graduation.

Awards

Awards in the EPS program, including the Outstanding Research Paper in Educational Policy Studies Award, the Outstanding Project in Educational Policy Studies Award, and the Eric Flanagan Community-Engaged Scholarship Award, recognize undergraduate excellence.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

EDUCATIONAL POLICY STUDIES, CERTIFICATE

Through the Educational Policy Studies Certificate, students learn about education debates, education policy, and educational advocacy. Courses emphasize the implications of policy decisions for equity, justice, and well-being. Students critically analyze policy issues from multiple perspectives.

Students interested in pursuing this certificate are encouraged to consult with advising staff in the School of Education Student Services

office, Room 139 Education Building, 1000 Bascom Mall. Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email, studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

The EPS certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates and University Special Students are eligible to complete the Certificate in Educational Policy Studies. Students must complete at least one Educational Policy Studies (ED POL) (https://guide.wisc.edu/courses/ed_pol/) course with a grade of B or better prior to declaring the certificate program. Students intending to complete the Educational Policy Studies Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Educational Policy Studies major, the Certificate in International Development and Education, the Certificate in Global Cultures, Languages, and Education, and/or the Certificate in Social Justice and Education, are not eligible to complete the Educational Policy Studies certificate.

REQUIREMENTS

REQUIREMENTS

The Certificate in Educational Policy Studies requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

- Complete a minimum of four Educational Policy Studies courses (https://guide.wisc.edu/courses/ed_pol/) (12 credits).
- Students must take at least one of the following courses:

Code	Title	Credits
ED POL 240	Comparative Education	3
ED POL 300	School and Society	3
ED POL/ HISTORY 412	History of American Education	3

- At least two courses must be numbered 300 or above.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.
2. Examine education policy from multiple theoretical perspectives (e.g., ethical/philosophical, economic/political, etc.).
3. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

GLOBAL CULTURES, LANGUAGES, AND EDUCATION, CERTIFICATE

The Certificate in Global Cultures, Languages, and Education (GCLE) educates students about global cultural, sociolinguistic, literacy and language policy and planning perspectives.

Students explore key questions about the relationships among cultural diversity, social inequality, and language. Skills are developed to facilitate working globally, within and beyond schools, in the field of culture, communication, and education.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Global Cultures, Languages, and Education. To declare the certificate, students should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Educational Policy Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Global Cultures, Languages, and Education.

REQUIREMENTS

REQUIREMENTS

The Certificate in Global Cultures, Languages, and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

LANGUAGE, CULTURE AND SCHOOLING

Select two of the following courses (6 credits):

Code	Title	Credits
ED POL 205	Language and Social Inequality	3
ED POL 240	Comparative Education	3
ED POL/ ANTHRO 570	Anthropology and Education	3

ED POL 595	Language Politics and Education	3
CURRIC 312	Foundations of ESL Education	3

GLOBAL EDUCATION

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student’s undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate an understanding of the social, cultural, and historical contexts of global language policy and linguistic and cultural practices.
2. Reflect on one’s own position and the positions of others in global political, social, and institutional structures and the possibilities for growth and change for oneself and others.
3. Analyze information about culture and communication from diverse perspectives.
4. Formulate arguments on global topics in language, culture, and education using academic literature and theoretical frameworks, identifying and integrating diverse sources of information.
5. Collaborate and communicate ideas, reflections, and research effectively with people from a range of perspectives, cultures, and backgrounds.
6. Use practice to inform theory and research and theory and research to reflect on and modify practice.

INTERNATIONAL DEVELOPMENT AND EDUCATION, CERTIFICATE

The Certificate in International Development and Education cultivates global education leaders who understand the complex issues that shape international education and are prepared to engage in transforming policy and practice.

Students will explore a range of topics such as: poverty, inequity, sustainability, human rights, and governance; engage in self-reflection about the roles they might play in international development efforts; and learn about international education innovations.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in International Development and Education. Students intending to complete this certificate should visit the School of

Education’s Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Educational Policy Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in International Development and Education.

REQUIREMENTS

REQUIREMENTS

The Certificate in International Development and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

CORE COURSE

This course (3 credits) provides a foundational overview of the field of International Development Education and should be taken as early as possible.

Code	Title	Credits
ED POL 260	Introduction to International Education Development	3

EDUCATION POLICY GLOBAL EDUCATION AND DEVELOPMENT ELECTIVES

Select two courses from the following options (6 credits). These topical courses allow students to explore a key theme (e.g., human rights, climate change, poverty and inequality, health) in International Development Education in greater depth, or to deepen their understanding of the field of International and Comparative Education.

Code	Title	Credits
ED POL 112	Global Education through Film	3
ED POL/ INTL ST 220	Human Rights and Education	3
ED POL 237	Wealth, Poverty and Inequality: Transnational Perspectives on Policy and Practice in Education	3
ED POL 245	Education in East Asia	3
ED POL 320	Climate Change, Sustainability, and Education	3
ED POL/ INTL ST 335	Globalization and Education	3
ED POL 423	Education for Global Change	3
ED POL 460	Immigration, Education, and Equity	3
ED POL/ ANTHRO 570	Anthropology and Education	3
ED POL 675	Introduction to Comparative and International Education	3

CAMPUS-WIDE INTERNATIONAL DEVELOPMENT AND EDUCATION ELECTIVE

Select one course from the following options (3 credits). These topical courses allow students to explore how key disciplines and fields of study across the campus engage with International Development:

Code	Title	Credits
A A E/INTL ST 373	Globalization, Poverty and Development	3
A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	3

INTL ST 403	Topics in Culture in the Age of Globalization	3-4
INTL ST/POLI SCI 431	Contentious Politics	3-4

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate an understanding of the global contexts of colonialism, US post-war imperialism, bi-/multi-lateralism, and capitalism that shape the international development and international education fields, as well as key debates and trends in the field.
2. Reflect on experiences, resources, and national positions and the positions of others engaged in the field of international development education; recognize the consequences of this positionality on one's own understanding of the concepts of human development and wellbeing and of the desire to improve and develop other places and people; and critically examine possibilities for growth and change.
3. Analyze information about international development and education (as theory and as practice) from diverse disciplinary, methodological, and epistemological perspectives.
4. Evaluate multiple theories of change and effectively apply appropriate theories of change to key international development problems.
5. Formulate arguments on topics in international development and education by evaluating and then drawing from academic and practitioner literatures, and identifying and integrating diverse sources of information.
6. Communicate ideas, reflections, and research on international development and education effectively to people from a range of perspectives, cultures, backgrounds, and roles in the field of international development (e.g., policymakers, program officers, community members, Peace Corps volunteers, Fulbright, etc.).

SOCIAL JUSTICE AND EDUCATION, CERTIFICATE

The Certificate in Social Justice and Education examines equity in educational policy and practice. Students gain a foundational understanding of the social inequities that shape education and broader society. Students also learn how educators, students, administrators, parents, and community members have effectively responded to these inequities.

This certificate prepares UW-Madison students to critically analyze the role education policies and practices play in broader social inequalities and social justice efforts. Students connect course concepts to their own lives as well as to historical and contemporary social and educational issues in the U.S. and/or globally.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the Certificate in Social Justice and Education. Students intending to

complete this certificate should visit the School of Education’s Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students pursuing the Educational Policy Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Social Justice and Education.

REQUIREMENTS

REQUIREMENTS

The Certificate in Social Justice and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

REQUIRED COURSE

This course provides students with foundational knowledge about social justice in education that they can build from and connect to their other coursework and assignments as part of the certificate.

Code	Title	Credits
ED POL 212	Education for Social Justice	3

ELECTIVE COURSES

Select three additional courses that have a central focus on social justice in education. Two of the three must be in ED POL coursework. These courses meet most or all of the certificate’s Learning Outcomes, and enable students to tailor the certificate to their specific topical and disciplinary areas of interest (e.g. historical perspectives on social justice and education, social justice and education in the U.S., comparative/global studies of social justice and education).

Code	Title	Credits

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student’s undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Demonstrate an understanding of how education, and education policy and practice specifically, has been used as a tool for both social justice and the (re)production of inequality in the United States and/or globally.
- 2. Identify and describe the social inequities that shape education and broader society, as well as how various social actors (e.g. educators, students, administrators, parents, and community members) have responded to these inequities through their social justice efforts.
- 3. Draw from theory and research to analyze issues of social justice in education.
- 4. Demonstrate an ability to apply critical thinking skills to the study of inequities in education, by recognizing and questioning knowledge claims and their own assumptions and preconceived notions.

EDUCATIONAL PSYCHOLOGY

Although the department does not offer an undergraduate major, students from across the campus may take undergraduate courses from this highly-ranked department. Courses are offered in each of the main content areas: human development, learning sciences, and quantitative methods. The department also offers courses required of teacher education programs.

The Education and Educational Services (p. 1653) certificate may be completed by undergraduate students from across the campus. This certificate provides a cohesive set of courses for students interested in the many aspects of education, but who choose not to major in education while completing their undergraduate degree. Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Education and Educational Services, Certificate (p. 1653)

EDUCATION AND EDUCATIONAL SERVICES, CERTIFICATE

Education is a topic of widespread interest to UW–Madison students and is one of the hotly contested subjects in today's politics and society. The Education and Educational Services (EES) Certificate Program provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree.

Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education. The certificate also provides grounding and learning experiences that will increase access to careers in education. Students completing the certificate may be considering future plans to:

- Enter a post-baccalaureate teacher education program.
- Pursue a graduate program focused on educational services, including programs such as counseling psychology, school psychology, and rehabilitation psychology.
- Complete advanced work in educational psychology or educational administration.
- Begin a career in teaching and learning settings and practices outside the K–12 education system.

This certificate program offers a variety of course options that can be customized to each student's area of interest. It is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (<https://guide.wisc.edu/nondegree/>).

In addition to reading the information here, students may wish to consult the department's website (<https://edpsych.education.wisc.edu/academics/ees-certificate/>) or email the EES administrator (ees@education.wisc.edu).

HOW TO GET IN

HOW TO GET IN

All current UW–Madison undergraduates and University Special Students are eligible to complete the Certificate in Education and Educational Services (EES).

Students intending to pursue the Education and Educational Services Certificate should visit the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note: Students completing a course of study designed to lead to teacher certification are not eligible to complete the EES certificate. This also includes School of Education degree students pursuing the education studies or communication sciences and disorders majors. Other students completing a major within the School of Education are limited to 6 credits of overlap between their major and the certificate; that is, no more than 6 credits of coursework used to satisfy requirements for a major within the School of Education may also be counted toward completion of the EES certificate.

REQUIREMENTS

REQUIREMENTS

Requirements of this 15-credit certificate program include both Foundation and Focus coursework. All coursework must be taken for a letter grade (not credit/no-credit or pass/fail) and students must earn at least a C grade in each course of the certificate. At least 12 credits of the certificate must be earned in residence at UW–Madison.

There is no formal prerequisite structure to the certificate, although students will generally be expected to take CURRIC 240 Critical Aspects of Teaching, Schooling, and Education first, followed by the two remaining Foundation courses and then the two Focus courses.

FOUNDATION COURSES, 9 CREDITS

Code	Title	Credits
Required Foundation Course		3

ED PSYCH 542	The Biological Basis of Behavior
ED PSYCH 551	Quantitative Ethnography
ED PSYCH 570	Foundations of Educational Measurement
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations

¹ Students may also substitute up to 3 credits of independent study with faculty from the departments of Coun Psy, Curric, ELPA, Ed Pol, Ed Psych or RP&SE. Independent study work with faculty from other School of Education departments may be considered; contact an advisor in the School of Education Student Services office.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Understand how learning environments and pedagogical practices for students are grounded in concepts and interpretive frameworks provided by disciplines that study human development and learning. Understand both typical and atypical development in relation to education.
2. Understand basic cognitive, social, emotional, and biological bases of teaching and learning.
3. Understand how issues of race, class, gender, cultural, sexual orientation, immigrant status, language background, and disability status interact with various educational contexts to affect learning and its outcomes.
4. Understand how local, state, national, and global social and political contexts differentially affect schooling and its outcomes for students both typical and atypical development in relation to education.

5. Understand the multiple contexts in which education occurs.
6. Understand historical, political, and cultural influences on education and educational institutions.
7. Understand supportive services available to learners in educational contexts and institutions.
8. Be familiar with some of the issues and controversies surrounding the selection of concepts taught, the assumptions associated with content choices, tools of inquiry, and ways of reasoning.
9. Be an informed consumer of educational research and policy prescriptions.

KINESIOLOGY

The study of movement, physical activity, exercise, and athletics has the potential to dramatically impact health and quality of life. Department programs focus on the scientific study of movement behavior, anatomy and physiology, research in kinesiology and fundamentals of exercise, and their application to health, physical education, and functional performance. The department's ultimate goal is to enhance human health, productivity, and quality of life.

The BS degree in Kinesiology (p. 1663) prepares students for graduate or professional study, and the BS degree in Physical Education (p. 1672) prepares teacher education students to teach physical education in elementary and secondary schools. Students in PE can choose to add a minor in Adapted Physical Education (p. 1655) and/or a minor in Health Education (p. 1656).

A collaborative BS degree program in Health Promotion and Health Equity (p. 1657) is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels.

Two certificates in Athletic Healthcare (p. 1655) and Promoting Activity for Diverse Abilities (p. 1679) may be completed by students pursuing kinesiology and other majors on campus.

The department also offers health theory, strength and conditioning, and leadership courses to improve understanding, appreciation, and use of the body in movement and sports. Once the kinesiology students have enrolled, kinesiology classes are open to all university students.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Adapted Physical Education, Minor (p. 1655)
- Athletic Healthcare, Certificate (p. 1655)
- Health Education, Minor (p. 1656)

- Kinesiology, BS (p. 1663)
- Physical Education, BS (p. 1672)
- Promoting Activity for Diverse Abilities, Certificate (p. 1679)

ADAPTED PHYSICAL EDUCATION, MINOR

This minor allows Physical Education majors to obtain an additional teacher certification in Adapted Physical Education. Courses and field placements provide the knowledge, skills, and dispositions to teach children with disabilities.

In addition to teacher certification in Adapted Physical Education, this minor now provides all the information necessary to sit for the Adapted Physical Education National Standards (APENS) Examination for national Certification in Adapted Physical Education (CAPE). Students are encouraged to take this examination, but it is not required.

The Adapted Physical Education minor is only available to students majoring in Physical Education.

HOW TO GET IN

HOW TO GET IN

This minor may only be declared by students completing Physical Education, BSE. The declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page and can be submitted at any time after admission into the program.

ATHLETIC HEALTHCARE, CERTIFICATE

The Certificate in Athletic Healthcare provides a structured undergraduate offering for students with an interest in healthcare for active populations. Students acquire specialized knowledge related to the fields of healthcare, sports medicine, and physically active populations.

The combination of required core courses and elective options makes this certificate appealing to students from a wide array of backgrounds and majors. Students can select elective courses that will be applicable

to a variety of career interests; substitutions for the core courses are not allowed.

This program is intended to provide students with meaningful learning experiences and ultimately an advantage in pursuing advanced or professional degrees in a variety of health-related fields.

HOW TO GET IN

HOW TO GET IN DECLARATION PROCESS

Students must complete KINES 127 Introduction to Athletic Healthcare to apply to the certificate program. Students intending to complete the Athletic Healthcare certificate will find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Students completing a Bachelor of Science degree in Athletic Training may not complete the Certificate in Athletic Healthcare.

REQUIREMENTS

REQUIREMENTS

Requirements of this minimum 14-credit certificate program include both required and elective coursework. All coursework must be taken for a letter grade. Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be earned in residence at UW–Madison.

CORE COURSES

Complete all of the following:

Code	Title	Credits
KINES 127	Introduction to Athletic Healthcare	2
KINES 227	Introduction to Clinical Anatomy of Human Movement	2
KINES 387	The Young Athlete: Considerations for Exercise, Medicine, and Activity	2
KINES 487	Athletic Healthcare: Contemporary Perspectives	3

BREADTH ELECTIVE COURSES

Complete a minimum of 5 credits from the following:

Code	Title	Credits
C&E SOC/SOC 533	Public Health in Rural & Urban Communities	3
HDFS 262	Development of the Young Child (was 362 prior to fall, 2023)	3
HDFS 263	Development from Adolescence to Old Age (was 363 prior to fall, 2023)	3
KINES 140	Science and Practice of Resistance Training	2
KINES 150	Foundations of Health Behavior and Health Equity	3
KINES 555	Sports Science & Athlete Monitoring	3

NURSING/ S&A PHM/ SOC WORK 105	Health Care Systems: Interdisciplinary Approach	2
POP HLTH/ C&E SOC 370	Introduction to Public Health	3
RP & SE 125	Health and Rehabilitation Professions	3
RP & SE 310	Positive Psychology and Well Being	3
PSYCH 405	Adult Psychopathology	3-4

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Define Athletic Healthcare and identify components of the healthcare system commonly used in athletic healthcare.
2. Differentiate specific roles of healthcare professions that comprise a interdisciplinary healthcare team.
3. Identify the impact of public health policy on clinical practice in athletic healthcare.
4. Develop practical skills and knowledge that are commonly utilized in an athletic healthcare clinical setting.

HEALTH EDUCATION, MINOR

The Health Education minor provides a great opportunity for students who are passionate about helping others live healthier lives. Health minors are willing to tackle universal health challenges and intend to have a real and lasting impact in their communities. Our graduates work in diverse positions such as:

- Elementary health education specialist
- High school health educator
- Junior high school health educator
- Prevention specialist in a school district or community
- District health education coordinator
- Public health educator

Students are taught a skills-based approach to teaching health education that is grounded in health standards. In turn, this framework facilitates instruction in schools for K-12 students. Youth are empowered to practice these skills in their everyday lives, making the connection from theory to practice relevant and applicable.

Students in the Health Education minor will participate in the following throughout their enrollment in the program:

- Coursework designed and developed around the health education standards to build the skills-based health education knowledge for teaching.
- Observation and practicum placements: undergraduate students will work alongside health education teachers and professionals

in field-based settings, learning, observing practice, designing, and delivering health education content with the teaching professional.

- Community outreach projects: applying knowledge from minor courses to address specific health topics.
- Student teaching in school settings, K-12, in a health education classroom as a part of the culmination of the Health Education minor.

We are committed to providing quality health instruction to our students, and ultimately to developing health-literate students in schools. To that end, the Health Education minor also includes:

- Placements in urban/suburban/rural, inclusive, and multicultural settings
- Small class sizes and advising groups
- Instruction within the nationally ranked UW–Madison School of Education

Students in Physical Education teacher education or teachers already licensed to teach at an appropriate level in Wisconsin are eligible to complete the Health Education minor.

Graduates are eligible to apply for a Wisconsin teaching license in Health at the Kindergarten through Grade 12 level.

HOW TO GET IN

HOW TO GET IN

Upon admission into their teacher education degree program in the School of Education, students should meet immediately with the Health minor coordinator to develop a course completion schedule.

Students should meet with the Pre-Declaration Physical Education Advisor to declare the Health Education minor; see Contact Information for details.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 23 credits to include all coursework below. A minimum 2.75 GPA is required, based on all UW–Madison coursework included in the minor requirements.

Students may wish to consult with the Health minor coordinator or advising staff in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651.

Upon acceptance into a major program in the School of Education, students should meet immediately with the Health minor coordinator to work out a schedule for required courses.

CORE REQUIREMENTS (23–24 CREDITS)

Code	Title	Credits
KINES 116	First Aid and Basic Life Support ¹	2
ANAT&PHY 235 or ANAT&PHY 335	Human Physiology and Health Physiology	4
KINES 501	Theory-Based Health Education and Health Promotion Programs	3

KINES 547	Skills for Health: Methods and Practicum of Teaching Health	3
SOC WORK 453	Substance Use Disorders	3
Take one of the following:		3–4
SOC/PSYCH 160	Human Sexuality: Social and Psychological Issues	
PSYCH/SOC 453	Human Sexuality	
KINES 566	Promoting Health in the Community	3
KINES 568	Student Teaching in Health Education ²	2

Total Credits **23–24**

¹ Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid **AND** either American Red Cross Basic Life Support or American Red Cross CPR/AED for Professional Rescuers.

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

Documentation of current First Aid certification must be presented to the Health Education program advisor. If the certification equivalent is used, the minor will require 21–22 credits.

² Eligibility for student teaching requires the completion of all courses required for the minor with a minimum GPA of 2.75. Students must also meet the content knowledge requirements for Health Education. A meeting with the Health minor coordinator is required before submitting a student teaching application. Students should bring a current transcript to this meeting. Special arrangements can be made for teachers seeking add-on certification in Health Education.

HEALTH PROMOTION AND HEALTH EQUITY, BS

The Health Promotion and Health Equity (HPHE) major was created through a collaborative effort across the departments of Counseling Psychology, Kinesiology, and Rehabilitation Psychology and Special Education in the School of Education. The Department of Kinesiology is the home of this major; its mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

The program is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels. Students will learn about the theoretical, programmatic and empirical foundations of health promotion and health equity interventions and be taught to demonstrate competence in evaluating strengths and weaknesses in health promotion programs.

The coursework will prepare students for emerging career opportunities as health educators within community health organizations, hospitals, mental health centers, clinics, schools and universities, businesses and non-profits, governmental health offices, and various other public health-related professions.

"I'm from Madison and became interested in the HPHE program because I knew I wanted to work in the healthcare field, but was not sure in what direction. When I heard about this degree I loved how versatile it was!" –Victoria Ruiz de la Vega (read more (<https://education.wisc.edu/news/victoria-ruiz-de-la-vega-from-the->

school-of-educations-health-promotion-and-health-equity-major/?

utm_source=Early_AD&utm_medium=email&utm_campaign=HPHE_majors&utm_content=hphe_additional_degree_transfer_story) to transfer and declare the major.

HOW TO GET IN

HOW TO GET IN ADMISSION OVERVIEW

Students interested in Health Promotion and Health Equity may complete this major in two ways: (1) by entering the School of Education to complete a Bachelor of Science degree with a major in Health Promotion and Health Equity, or (2) adding the Health Promotion and Health Equity major as an additional major while completing another degree and major on campus. Students selecting the second option should review the Additional Major in Health Promotion and Health Equity (p. 1658) section below.

ENTERING THE SCHOOL OF EDUCATION

New and Current UW–Madison Students

New freshmen and off-campus transfers interested in completing the Bachelor of Science degree with the Health Promotion and Health Equity major are admitted directly to the School of Education and the major upon admission to UW–Madison. Current UW–Madison students wishing to transfer to the School of Education to complete an undergraduate degree with this major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

Prospective Transfer Students

Applicants not already enrolled on the UW–Madison campus must be admissible to the university to enroll in a School of Education degree program. Admission to UW–Madison requires a separate application and admission process. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Prospective transfer students are advised to meet with an advisor in the School of Education Student Services office in person or by telephone in advance of their application; to schedule, call 608-262-1651.

Students with a Previous Degree

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as a candidate for a second degree upon completion of the admission process. Second degree students are seeking a second degree that is unrelated to their first degree. More information is available here (p. 1494) under the Students with a Previous Degree heading.

APPLICATION AND ADMISSION

New freshmen and off-campus transfers are admitted directly to the Bachelor of Science–Health Promotion and Health Equity degree program. Current UW–Madison students must consult with an advisor in the School of Education Student Services office

(608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

Note: Requirements and selection criteria may be modified from one application/admission period to the next.

Criteria for Admission

Eligibility for admission consideration to the Bachelor of Science–Health Promotion and Health Equity degree:

- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Filing of all required paperwork and other application materials, including program application and transcripts.

Last 60 Credits Rule

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

ADDITIONAL MAJOR IN HEALTH PROMOTION AND HEALTH EQUITY

Undergraduate students from all schools and colleges on campus may declare Health Promotion and Health Equity as an additional major.

Students wishing to declare the additional major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major. The declaration must also be approved by the student's home school/college.

Students completing Health Promotion and Health Equity as an additional major do not need to complete the School of Education's liberal studies and other degree requirements unless their primary major is also in the School of Education.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (BS) degree program in Health Promotion and Health Equity has three primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major requirements* provide an opportunity to study the interrelated areas of physical health, mental health, and disability.
- *Additional electives* to reach the minimum of 120 degree credits. These credits allow students to pursue additional health-related courses, enroll in course work required for admission to graduate-level programs or develop other areas of interest. Health Promotion and Health Equity majors may also use these elective credits to complete an additional major to augment their interest in health or to explore a completely different subject.

MAJOR REQUIREMENTS

Complete a minimum of 40 credits with a 2.5 gpa across all major course work. At least 15 credits of upper-level major course work (courses numbered 300 and above) must be taken in residence with a minimum 2.5 grade point average.

REQUIRED HEALTH PROMOTION CORE, 31 CREDITS

Code	Title	Credits

NUTR SCI 132	Nutrition Today	3
NUTR SCI 332	Human Nutritional Needs	3
POP HLTH/C&E SOC 370	Introduction to Public Health	3
PSYCH 202	Introduction to Psychology	3-4

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major course work.
- Upper-level major course work: 2.5 cumulative grade point average in all upper-level (courses numbered 300 and above) major course work.
- Major Residency: Students must complete at least 15 upper level major credits while enrolled in residence on the UW–Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits are required for graduation in the Health Promotion and Health Equity degree program.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Recognize concepts and theories related to health promotion and health equity.
2. Relate the role of social factors in facilitating or hindering health.
3. Evaluate the strengths and weaknesses of health behavior and health equity interventions.
4. Identify links between physiological and psychological health.
5. Interpret and communicate the interaction between personal and environmental determinants of health and well-being.
6. Draw from personal and professional identities to develop socially just practices and to lead effectively within their communities of practice.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Health Promotion and Health Equity: Sample Four-Year Plan

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and

refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Freshman

Note: The HP & HE major requires 9 credits of elective course work. A number of the course options, e.g., RP & SE 100, RP & SE 121 RP & SE 125; COUN PSY 225, COUN PSY 230; KINES 100, KINES 123; PSYCH 202; NUTR SCI 132, can be taken during the freshmen and sophomore years.

ADVISING AND CAREERS

ADVISING AND CAREERS HEALTH PROMOTION AND HEALTH EQUITY ADVISING

Students are collaboratively advised by advising staff in the School of Education Student Services office and the department. Students not yet declared in Health Promotion and Health Equity meet with advising staff in the Student Services office, see below, or the departmental advisor.

Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Health Promotion and Health Equity Pathways (<https://careercenter.education.wisc.edu/explore-career/hphe-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

HEALTH PROMOTION AND HEALTH EQUITY (HPHE) AND THE WISCONSIN EXPERIENCE

Community Engagement and Research Opportunities

Health Promotion and Health Equity majors are encouraged to get involved in research. Students have participated in labs such as the Promotion of Health Equity & Adapted Physical Activity (PHEAPA) (<https://kinesiology.education.wisc.edu/research/pheapa-lab/>) lab or the Pain, Context, and Innovation (<https://www.shinyekim.com/>) lab.

Students also participate in programs run through the Wisconsin Area Health Education Centers (AHEC), such as the Community Health Internship Program (<https://ahec.wisc.edu/chip/>).

Student Organizations

There are numerous campus student organizations (<https://win.wisc.edu/>) that Health Promotion and Health Equity majors can join to connect with students with similar interests. The Health Promotion and Health Equity Learning Community is an organization led by students in the major; they organize different alumni panels and study groups for students to connect.

Study Abroad

Health Promotion and Health Equity students can participate in School of Education led study abroad opportunities. These 2-3 week summer courses make it possible for students to have a study abroad experience and still have time to work or pursue other activities during the summer.

- Movement as Medicine in Portugal examines the connection between sedentary behavior and health outcomes in Portugal. Participants review definitions and rates of sedentary behavior, physical activity and physical inactivity in the U.S. and across the globe. While in Lisbon, participants hear from local experts and members of the healthcare and educational systems about how physical activity is viewed and promoted across the population. Side trips to relevant cultural local places contribute to the full picture of health in Portugal. An overnight trip to Porto and two additional day trips provide additional opportunities to learn more about local culture and history. Credit is given for KINES 250 Sedentary Behavior in the U.S. and Abroad or C&E SOC 400 Study Abroad in Community and Environmental Sociology.
- Inclusive Activity and Sports in Ireland offers a unique learning opportunity for UW–Madison students interested in pursuing careers in allied health, fitness and well-being, health education, and public health. Ireland has a distinct history, culture, and approach to health and movement. It is in the midst of comprehensive and progressive reforms to their health and social care with an emphasis on providing better outreach and rehabilitation services for people with disabilities. This course will focus on applying models, research, and best practices in motor control and motor learning to inclusive physical activity, sports, and rehabilitation for individuals with disabilities in Ireland. Students participate in training seminars led by Active Disability Ireland, Sport Ireland in Dublin, and Munster Technological University in Tralee. Included are visits to rehabilitation facilities and community organizations to attend guest lectures from occupational therapists, physical and physiotherapists, athletes with disabilities, and government employees. At the University of Limerick, students learn about bachelor's and graduate degree programs in the health sciences and hear about relevant research in physical activity, sedentary behavior, sport, and health for individuals with diverse abilities. Co-curricular activities provide an opportunity to explore and participate in sports, recreation, and physical activities through the lens of a tourist/participant with disabilities. Credit is given for KINES 260 Inclusive Physical Activity, Sport & Rehabilitation in Ireland.

HPHE majors have crafted their Wisconsin Experience in some of the following ways:

- A student majoring in HPHE is the event coordinator of a new student organization, the HPHE Learning Community. This individual is also part of a research team that codes conversations about the health and well-being of Latino children and is a teaching assistant for the Waisman Early Childhood Program.
- An HPHE student developed a passionate interest in social justice-based public health after interning at Milwaukee's Gerald Ignace Indian Health Center and the Philippine Cultural and Civic Center Foundation. They are currently working with the Wisconsin Division of Public Health as an enteric disease research analyst and beginning research on Asian American health under Dr. Dorothy Edwards and the NIH's All of Us (<https://allofus.wisc.edu/>)

elqTrackId=38719B11F064F2937F31EA8EC23D7CFB&elq=c21876d204e4 program. This semester they will continue participating on the Asian Pacific Islander Desi American (APIDA) Heritage Month Planning Committee, the Kinesiology department's Equity Climate, and Diversity Committee, and has joined the HPHE Learning Community.

- Another one of our students is combining HPHE with the Gender and Women's Studies Certificate. This student has spent time as a research and communications intern of the Social Media Adolescent Health Research Team (SMAHRT) and presented at two national conferences. They also assumed the role of a fellow in the Undergraduate Research Scholars Program of the College of Letters & Science, facilitating conversations among undergraduate students in a weekly seminar. Previously, they worked as an intern lead for the Technology and Mental Wellness Program Youth Advisory Board, and internationally as a volunteer at the Galway Autism Partnership (GAP) in Galway, Ireland.
- An HPHE student with certificates in environmental studies, French, and global health is part of a team working on developing an evidence-based physical activity program for adolescents. Last summer was spent teaching in a low-income neighborhood.
- While also completing the Certificate in Disability Rights and Services, this student serves as the co-president of the HPHE Learning Community and helped to found the organization. They work as a social media and marketing assistant for two UW-affiliated organizations and as a peer advisor with the Cross College Advising Service.
- A student majoring in HPHE and working toward certificates in environmental studies and global health is the treasurer of the HPHE Learning Community student organization and has been elected to serve in a financial position for the Slow Food Club on campus.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

KINESIOLOGY, BS

The Kinesiology department's mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

Students in this major take coursework grounded in the basic sciences (e.g., physiology, anatomy, biology) and in kinesiology. Kinesiology core courses examine how the body responds to physical activity, the role of physiology and psychological factors in exercise, mechanics driving movement, how movement is controlled, learned, and developed over the lifespan, and the role of physical activity in the health of the U.S. population.

The curriculum includes coursework, engaging laboratory research opportunities, and hands-on learning experiences. Additionally, elective

courses give students some flexibility to tailor the program to their specific interests. Examples of elective topics include strength and conditioning, leadership, health theory, athlete monitoring, clinical exercise prescription, and advanced courses in exercise physiology, exercise psychology, and biomechanics.

Kinesiology is a pre-professional program. This means that our students are well prepared for subsequent graduate or professional training in the allied health disciplines. The degree also prepares students for graduate programs in kinesiology and athletic training. Kinesiology graduates may pursue entry-level careers in a wide variety of professions, including those in the area of fitness, home health, and rehabilitation assistance.

Graduating seniors have reported starting the following jobs: club coach, programming administrator, medical scribe, AmeriCorps, rehabilitation aide, personal trainer, research assistant/specialist, physical therapy aide, nursing home caregiver, nanny, group exercise instructor, certified nursing assistant, medical device sales, strength and conditioning internship, United Cerebral Palsy inclusion facilitator, financial counselor, EKG tech, behavioral technician, project manager, ranch worker, wellbeing intern, glacier guide.

Graduating seniors have reported acceptance into the following graduate programs: Doctor of Physical Therapy, Master of Public Health, Doctor of Medicine, Chiropractic School, Clinical Exercise Physiology, Biomedical Engineering, Master in Physician Assistant Studies, Doctor of Occupational Therapy, Master of Science in Exercise Science, Master of Science in Applied Sport and Exercise Psychology, Dentistry.

HOW TO GET IN

HOW TO GET IN KINESIOLOGY DECLARATION OVERVIEW

Incoming freshmen typically enter UW–Madison as Pre-Kinesiology students (PKN), spend the first two years completing liberal studies, general education, and Kinesiology prerequisite requirements, and declare the Kinesiology major during their sophomore year for the final two years on campus.

On-campus students starting at UW–Madison in other majors can move to Pre-Kinesiology by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1494), is required to transfer into Pre-Kinesiology. It is not necessary to be a Pre-Kinesiology student before declaring Kinesiology.

ELIGIBILITY TO DECLARE KINESIOLOGY

Kinesiology currently accepts declarations once a year, from December 1st through February 1st. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Kinesiology should complete the on-campus declaration and must also be admitted to UW–

Madison. See Transfer Students and Students with a Bachelor's Degree, below.

Eligibility Requirements:

- Complete the following prerequisite coursework by the end of the spring semester of the declaration year:

Code	Title	Credits
Biology Sequence		
Complete one of the following Biology sequences:		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	5
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5
Advanced Placement (AP) Biology exam score of 4 or 5		
International Baccalaureate (IB) Biology exam score of 4 or 5		
Chemistry Sequence		
Complete one of the following Chemistry sequences:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	10
Physics Course		
Complete one of the following Physics courses:		
PHYSICS 103	General Physics	4
PHYSICS 201	General Physics	5
PHYSICS 207	General Physics	5
Kinesiology Course		
KINES 119	Introduction to Kinesiology	2

- Students may complete no more than three of the prerequisite courses during the spring semester of the declaration year. For this purpose CHEM 109 satisfies the full general chemistry requirement and constitutes one course. BIOLOGY/ZOOLOGY 101 and BIOLOGY/ZOOLOGY 102 are counted as two courses in determining eligibility for the program.
- Earn a minimum 2.75 cumulative GPA or a 2.75 cumulative GPA based on the Last 60 Credits Rule by the end of the fall semester of the declaration year.³

³ Last 60 Credits Rule – Two grade point averages may be calculated to determine a candidate's eligibility to declare Kinesiology. A GPA may be calculated using (1) UW–Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1494).

Students will be provisionally admitted in the spring, pending the completion of all prerequisite courses and GPA requirements by the end of the spring semester.

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to transfer directly into Kinesiology should complete both the on-campus Kinesiology declaration and the UW-Madison application. All eligibility requirements must be met. Other transfer and second degree candidates will be admitted to UW-Madison with the Pre-Kinesiology designation.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1494).

Off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

ADVISING AFTER DECLARATION

The Kinesiology department holds mandatory spring orientation sessions for new majors, led by a departmental advisor. The sequencing of coursework and enrollment in Kinesiology courses are addressed at these meetings. Students will be authorized to enroll in Kinesiology courses after the orientation meetings are completed.

After declaration, advising about the major will be provided by the Department of Kinesiology. Majors are required to meet with the departmental advisor at least once per semester. All questions about School of Education and university requirements should be referred to an advisor in the School of Education Student Services office.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University

General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Kinesiology program has five components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- *Advanced coursework in Kinesiology* requires at least 11 credits of Kinesiology electives, thus giving students some flexibility to tailor the program to their specific interests.
- *Elective* classes are generally related to the student's area of study and are taken to reach the minimum of 120 credits.

SCIENCE CORE

Code	Title	Credits
Select one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Select one of the following:		5
AP or IB Biology score of 4 or above		
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102	Animal Biology and Animal Biology Laboratory	
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
Select one of the following:		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
PSYCH 202	Introduction to Psychology	

Code	Title	Credits
Complete one option:		0-10
Placement into MATH 221		
MATH 112 & MATH 113	College Algebra and Trigonometry (or test out of MATH 112 and/or MATH 113)	
MATH 114	Precalculus	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II (both courses must be taken)	
Select one of the following:		3
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT 301	Introduction to Statistical Methods	
PSYCH 210	Basic Statistics for Psychology	
ANAT&PHY 335	Physiology	
ANAT&PHY 337	Human Anatomy	3
ANAT&PHY 338	Human Anatomy Laboratory	2

KINESIOLOGY CORE

Code	Title	Credits
KINES 116	First Aid and Basic Life Support ¹	2
KINES 119	Introduction to Kinesiology	2
KINES 300	Practicum in Kinesiology ²	3
KINES 314	Physiology of Exercise	4
KINES 318	Biomechanics of Human Movement	3
KINES 330	Research in Kinesiology	2
KINES 350	Introduction to Exercise Psychology	3
KINES 361	Motor Learning and Performance	3
Select one of the following:		3
KINES 355	Socio-Cultural Aspects of Physical Activity	
KINES 521	Physical Activity and Health	
KINES 540	Diversity in Health and Physical Activity Settings	
KINES 560	Senior Research Writing in Kinesiology	
KINES 600	Advanced Exercise Psychology	
KINES 614	Biological Factors Influencing Exercise Performance	

¹ Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid **AND** either American Red Cross Basic Life Support or American Red Cross CPR/AED for Professional Rescuers.
If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

² Criminal background investigations may be conducted for some students, based on the site of the practicum assignment. The cooperating agency to which the student has been assigned will determine if a background check is necessary.

ADVANCED COURSEWORK IN KINESIOLOGY

Select a minimum of 11 credits from the following:

Code	Title	Credits
KINES 214	Culture and Environment in Exercise Physiology Abroad	3
KINES 250	Sedentary Behavior in the U.S. and Abroad	3
KINES 260	Inclusive Physical Activity, Sport & Rehabilitation in Ireland	3
KINES 312	Technology for Physical Activity and Health Professionals	2
KINES 325	Group Development and Behavior Management	3
KINES 360	Lifespan Motor Development	3
KINES 387	The Young Athlete: Considerations for Exercise, Medicine, and Activity	2
KINES 390	Principles of Exercise Leadership	2
KINES 427	Fitness Testing and Exercise Prescription	3

KINES 618	Biomechanics	2-3

ELECTIVE COURSEWORK

Select additional courses to reach the minimum of 120 credits.

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus coursework. Consult the School of Education's Academic Policies and Procedures (p. 1494) for additional information about the Continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

These requirements are based on UW-Madison coursework.

- Must earn a minimum 2.50 cumulative grade point average. Graduation GPA may be modified by the Last 60 Credits Rule (p. 1494).
- Major residency: Students must complete a minimum of 15 credits from the Department of Kinesiology while enrolled on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Must complete a minimum of 120 credits.

DEGREE AUDIT (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Knowledge) Define and explain major concepts across the breadth of kinesiology.
2. (Application) Apply their knowledge related to movement and physical activity techniques and approaches in clinical and applied settings to enhance human health and quality of life.
3. (Critical Thinking) Demonstrate competence in the scientific research process, which includes the ability to consume, analyze, interpret and critically review scientific literature.
4. (Communication) Develop appropriate styles of written and oral communication to use both within and outside of the scientific community.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Kinesiology: Sample Four-Year Plans

A four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests.

There are many ways to complete the degree and course selection should reflect your own situation. Consult with an advisor in Education Student Services, 139 Education Building, to develop a personalized plan of study. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Three plans are presented below. The first is for students who need to take MATH 112 Algebra, followed by a plan for students testing out it. The third is for students who test into MATH 96.

STARTING WITH MATH 112

Freshman

Fall	Credits Spring	Credits
Communication A (fall or spring semester)	3 Communication A (fall or spring semester)	3
BIOLOGY/ ZOOLOGY 102 ²	2 KINES 119 (or fall sophomore year)	2

MATH 112 (also meets Quantitative Reasoning A)	3 CHEM 103	4
Liberal Studies course work	7-10 Liberal Studies course work	0-3
	Ethnic Studies	3
	PSYCH 202	3
	15	15

Sophomore

Fall	Credits Spring	Credits
BIOLOGY/ ZOOLOGY 101 or 151 ²	3 PHYSICS 103	4
CHEM 104	5 Choose One: Also Meets Quantitative Reasoning B	3
Liberal Studies course work	2-4 STAT 301	
MATH 113	3 PSYCH 210	
	STAT 371	
	KINES 116	2
	Liberal Studies or General Elective course work	6
	15	15

Junior

Fall	Credits Spring	Credits
KINES 330 or 361	2-3 KINES 361 or 330	2-3
KINES 350 (or Advanced Kines Elective) ¹	3 KINES 314	4
ANAT&PHY 335	5 ANAT&PHY 337	3
Advanced Kines Elective ¹	3 ANAT&PHY 338	2
	KINES 350 (or Advanced Kines Elective)	3
	14	14

Senior

Fall	Credits Spring	Credits
KINES 318 or 300	3 KINES 300 or 318	3
Communication B - Select one of the following in the fall or spring semester	3 Communication B - Select one of the following in the fall or spring semester. 600 is not offered in the spring.	3
KINES 355	KINES 355

Total Credits 120

¹ A total of 11 credits of Advanced Kines Electives are required. Elective course options are 2-3 credits.

² Select either BIOLOGY/ZOOLOGY 101 Animal Biology/BIOLOGY/ZOOLOGY 102 Animal Biology Laboratory or BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology

ADVISING AND CAREERS**ADVISING AND CAREERS
KINESIOLOGY ADVISING**

Students not yet admitted to Kinesiology meet with an advisor in the School of Education Student Services office, see below. Once admitted to the professional program, students are also advised in the Department of Kinesiology.

SCHOOL OF EDUCATION ADVISING**Academic Advising in the School of Education**

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Kinesiology Pathways (<https://careercenter.education.wisc.edu/explore-career/kinesiology-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

KINESIOLOGY AND THE WISCONSIN EXPERIENCE

Research in the Kinesiology Department

Students are serving as Research Assistants in the labs of Professors Cook, Ausderau, Andreae, Schrage, Barnes, and Mason, and also in the Promotion of Health Equity & Adapted Physical Activity (PHEAPA) lab. Kinesiology students may apply for the American Physiological Society Summer Undergraduate Research Fellowship.

Participation in Departmental Activities

Undergraduate students are members of the Equity, Climate, Diversity and Undergraduate Studies Committees, are peer learning facilitators in ANAT&PHY 335 and ANAT&PHY 337, and participate in the KinEqT Mentorship Program.

The peer learning facilitators hold study groups for current Kines students either in ANAT&PHY 335 or ANAT&PHY 337. These students have a weekly meeting with the instructional staff to cover common challenges in the content and to go over the plan for the study groups, including community building, active learning, and peer facilitation strategies. This is not a tutoring session, but a peer-led facilitation of learning by asking questions and helping the students work with the material in new ways.

The new KinEqT mentorship program is organized by graduate students to help undergraduate students connect and build community in the Department. The program helps facilitate mentorship

and access to resources—both academic and professional—between graduate and undergraduate students with underrepresented racial, disability, social class and gender identities, especially those who are underrepresented within the UW–Madison Department of Kinesiology.

Community-Based Learning Experiences

The Kinesiology Practicum is a Community Based Learning Course and is structured for students to gain experience and skills outside of the classroom. This is one of the highlights of the major. Students are placed in a relevant setting for their career goals and spend approximately seven hours per week working with these partners. The options for placements include research labs, strength and conditioning settings, peer facilitating or teaching assistants, public health, and community outreach physical activity programs.

Related Student Organizations

Sports Medicine & Athletic Healthcare Club, Pre-PT club, Kinesiology Club, Students for Rare, an organization that promotes activism for individuals suffering from rare diseases, and Letters of Love, writing positive letters for children in hospitals.

Study Abroad Courses

The Department of Kinesiology recently developed three new study abroad courses in Portugal, Costa Rica, and Ireland. These 2-3 week courses make it possible for students to have a study abroad experience and still have time to work or pursue other activities during the summer.

- **Movement as Medicine in Portugal** examines the connection between sedentary behavior and health outcomes in Portugal. Participants review definitions and rates of sedentary behavior, physical activity and physical inactivity in the U.S. and across the globe. While in Lisbon, participants hear from local experts and members of the healthcare and educational systems about how physical activity is viewed and promoted across the population. Side trips to relevant cultural local places contribute to the full picture of health in Portugal. An overnight trip to Porto and two additional day trips provide additional opportunities to learn more about local culture and history. Credit is given for KINES 250 or C&E SOC 400.
- **Team Building in Costa Rica** was designed to enhance the group development skills of its participants while engaging in activities such as white-water rafting, ziplining and hiking. It combined a very successful kinesiology course, KINES 325 Group Development and Behavior Management, with a unique cultural opportunity in Costa Rica. Each day provides opportunities to not only explore the Pura Vida (Pure Life) of Costa Rica, but also to engage in personal reflection. Participants experience the process of growing together as a community and develop skills to create lasting communities in their personal and professional lives. Students earn credit for KINES 325, a required course in the physical education program.
- **Inclusive Activity and Sports in Ireland** offers a unique learning opportunity for UW–Madison students interested in pursuing careers in allied health, fitness and well-being, health education, and public health. Ireland has a distinct history, culture, and approach to health and movement. It is in the midst of comprehensive and progressive reforms to their health and social care with an emphasis on providing better outreach and rehabilitation services for people with disabilities. This course will focus on applying models, research, and best practices in motor control and motor learning to inclusive physical activity, sports,

and rehabilitation for individuals with disabilities in Ireland. Students participate in training seminars led by Active Disability Ireland, Sport Ireland in Dublin, and Munster Technological University in Tralee. Included are visits to rehabilitation facilities and community organizations to attend guest lectures from occupational therapists, physical and physiotherapists, athletes with disabilities, and government employees. At the University of Limerick, students learn about bachelor's and graduate degree programs in the health sciences and hear about relevant research in physical activity, sedentary behavior, sport, and health for individuals with diverse abilities. Co-curricular activities provide an opportunity to explore and participate in sports, recreation, and physical activities through the lens of a tourist/participant with disabilities. Credit is given for KINES 260.

Volunteering

Students have volunteered to work with Ballroom Basics for Balance (BB4B), GiGi's Playhouse, and helped out in adapted fitness, assisted living, and pro bono clinic settings.

Paid Work Experiences Related to Kinesiology

Current Kines students have found employment in some of the following areas: Physical Therapy Aide, University Health Services Student Health Technician – SH/GYN Clinic, Nuclear Cardiac Stress Testing Intern, UnityPoint Health, Nursing Care Partner, Recreation & Wellbeing, Nicholas Recreation Center Member Services Supervisor, Badger Sports Camps at UW-Madison, Cardiac Rehab Intern SSM St Mary's Hospital Center of Wellness, Personal Caregiver, Home Health Aide.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

PHYSICAL EDUCATION, BS

Welcome to the Physical Education Teacher Education program! We believe great PE teachers help students grow into healthy, happy, and helpful humans. Our unique PE teacher preparation program has dedicated faculty with decades of experience who are committed to guiding you to be the best teacher you can be.

The Physical Education program is not one of the larger programs in the state, but we think it is one of the best. More than once, a retired Health and Physical Education Curriculum Director from a school district in Wisconsin told us our graduates are better prepared than students coming out of any other program. We feel good about that.

In addition to the Physical Education major, we also offer a minor in Adapted Physical Education (p. 1655) and a minor in Health Education (p. 1656). The Adapted minor is important for teaching at all levels and the Health minor is important for teaching at the secondary level. You can develop the program to fit your needs and graduate with just the Physical Education major, the major and one minor, or the major and both minors.

The UW-Madison School of Education Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>) can financially support your dreams of becoming a teacher. You pledge to teach in Wisconsin PK-12 schools for 3-4 years after graduation. In return, we pledge to pay the equivalent of in-state tuition and fees, testing, and licensing costs.

We are committed to transforming physical education into a powerful experience in which students develop physical, mental, and social skills for life. To that end, our program includes the following elements:

- Standards-based curriculum models
- Culturally responsive teaching techniques in inclusive and multicultural settings
- Social and emotional learning that incorporates community building and behavior management

Physical education students also benefit from:

- Nationally and state-recognized faculty and staff members
- Student teaching placements in urban, suburban, or rural settings, depending on the needs of the individual
- Small class sizes and advising groups
- A strong science and technology-based curriculum
- Instruction within the #1 nationally ranked UW-Madison School of Education

From the beginning, you will get to work with students from diverse educational backgrounds, ensuring you will be prepared to thrive in any setting after graduation. We offer many "out-of-the-classroom" opportunities to strengthen and expand your physical education knowledge, and proudly have a presence in Special Olympics, adapted clubs, and local Boys & Girls Clubs.

You'll also have a chance to study abroad and take our team-building course in Costa Rica! We go every May after the spring semester, and our students learn how to create a safe, inclusive learning community in a unique cultural setting.

Throughout the Physical Education program, you'll observe PE teachers, team-teach homeschooled elementary students, and participate in community service opportunities in the Madison area. In your final year at UW, you'll be mentored by veteran PE teachers who use various PE curriculum models: Adventure Learning, Fitness Education, Teaching Games for Understanding, and Sport Education. These invaluable teaching practices will prepare you for the joys and responsibilities of your own PE classroom.

Physical Education students also have the opportunity for professional growth as they earn their degree. Students have given presentations at the Wisconsin, Midwest, and national Society of Health and Physical Educators (SHAPE America) conferences. Several students have recently completed serving in leadership positions at the state and district levels.

The world needs individuals like you who want to make a difference through physical education. We are excited you want to be a part of the movement!

On, Wisconsin!

"I think one of the most impactful and important aspects of this program is how often I go into schools, am involved in volunteer opportunities, and just work directly with students and people with and without disabilities. There's

a lot of great opportunities to get involved in hands-on experiences instead of just being in a classroom."

–Lucas Mandel (read more ([https://education.wisc.edu/news/lucas-mandel-from-the-school-of-educations-physical-education-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=teaching_phys_majors&utm_term=.275cumulativeGPA\(4.00\)](https://education.wisc.edu/news/lucas-mandel-from-the-school-of-educations-physical-education-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=teaching_phys_majors&utm_term=.275cumulativeGPA(4.00))))

• Have second year academic standing.
• Earned a minimum 2.75 cumulative GPA (4.00 scale) on all college work attempted or 2.75 on the last 60 credits (<https://guide.wisc.edu/undergraduate/education/#policiesandregulationstext>).

HOW TO GET IN

HOW TO GET IN PHYSICAL EDUCATION DECLARATION OVERVIEW

Students interested in a degree in Physical Education can enter UW–Madison with a Pre-Physical Education classification. They spend their initial semesters completing liberal studies, general education, and science core requirements.

UW–Madison students who started in another major can move to Pre-Physical Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.75, based on all UW–Madison coursework or the last 60 credits (p. 1494), is required to transfer into Pre-Physical Education.

It is not necessary to be a Pre-Physical Education student before declaring the Bachelor of Science in Physical Education.

DECLARING BACHELOR OF SCIENCE IN PHYSICAL EDUCATION (BSPE)

On-Campus Students

On-campus students may declare the Bachelor of Science in Physical Education degree at any time, provided they have met the following requirements:

- Have second-year academic standing.
- Earned a minimum 2.75 cumulative GPA (4.00 scale) on all college work attempted, or a 2.75 on the last 60 credits (<https://guide.wisc.edu/undergraduate/education/#policiesandregulationstext>).
- Have met with a Physical Education or School of Education Student Services advisor who will submit the declaration form; see Contact Information for details.

¹ Last 60 Credits Rule – Two grade point averages may be calculated to determine a candidate's eligibility to declare Physical Education. A GPA may be calculated using (1) UW–Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1494).

Off-Campus Transfers to UW–Madison

Off-campus students wishing to transfer to UW–Madison and declare the Bachelor of Science in Physical Education degree must be admitted to UW–Madison. Admission to the university has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu/>) for application information. Students also need to meet with a Physical Education or School of Education Student Services advisor, who will determine if the

following eligibility requirements to declare the BSPE degree have been met:

- Have second year academic standing.
- Earned a minimum 2.75 cumulative GPA (4.00 scale) on all college work attempted or 2.75 on the last 60 credits (<https://guide.wisc.edu/undergraduate/education/#policiesandregulationstext>).

See Contact Information for details. The advisor will submit the declaration form if the student has met the eligibility requirements. Transfer students who do not meet the declaration eligibility requirements may be admitted to UW–Madison with the Pre-Physical Education classification.

Students with a Previous Undergraduate Degree

Students who already hold a Bachelor's degree and wish to become certified to teach Physical Education must be admitted to UW–Madison. Admission to the university has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for university application information.

Students need to meet with a Physical Education or School of Education Student Services advisor who will (1) review the student's eligibility to declare the BSPE degree, and (2) discuss their admission status, see below. Eligibility requires that a student has:

- Earned a minimum 2.75 cumulative GPA (4.00 scale) on all college work attempted or 2.75 on the last 60 credits (<https://guide.wisc.edu/undergraduate/education/#policiesandregulationstext>).

See Contact Information for details. The advisor will submit the declaration form if the student has met the eligibility requirement.

An applicant with a previous undergraduate degree will be admitted to Physical Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background. *Second degree candidates* in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first degree. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1494).

Admission as an *Education Special Student* indicates that the applicant wishes to pursue teacher certification in Physical Education and studied it extensively during their initial degree. An individual enrolls in Physical Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All returning students are strongly advised to meet with an advisor in the School of Education Student Services office before applying for admission to UW–Madison. Consultations with advisors are available in person, virtually, or via telephone; email studentservices@education.wisc.edu (soeacademicservices@education.wisc.edu) or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare,

safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural

and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Physical Education program has six components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Science Core* coursework offers in-depth study of the basic sciences and mathematics.
- *Kinesiology Core* courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.

- The *Physical Education requirements* focus on advanced study in Physical Education pedagogy, including teaching methods coursework and field experiences in the schools.
- *Education* coursework includes an examination of the school's relationship to our society and also of the processes by which students grow and learn.
- *Elective* coursework is taken to reach the minimum of 120 credits required for the degree.

While not required, teaching certifications in Adapted Physical Education and Health Education are also offered. See Additional Certification Options (p. 1675), below.

SCIENCE AND KINESIOLOGY CORE COURSES

With the exception of KINES 116 First Aid and Basic Life Support and KINES 121 Foundations of Physical Education, Kinesiology coursework must be taken after admission into the professional part of the undergraduate program.

Code	Title	Credits
MATH 112	College Algebra	3
CHEM 108	Chemistry in Our World	5
or CHEM 103	General Chemistry I	
ANAT&PHY 337	Human Anatomy	3
ANAT&PHY 235	Human Physiology and Health	4
KINES 116	First Aid and Basic Life Support ¹	2
KINES 308	Biomechanics of Physical Activity	2
KINES 314	Physiology of Exercise	4
KINES 361	Motor Learning and Performance	3

¹ Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid **AND** either American Red Cross Basic Life Support or American Red Cross CPR/AED for Professional Rescuers, enroll here. (<https://www.redcross.org/take-a-class/>)

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

PHYSICAL EDUCATION COURSES

Effective for Fall, 2023 program admission.

Code	Title	Credits
KINES 121	Foundations of Physical Education	2
KINES 315	Assessment and Research in Physical Activity Pedagogy	3
KINES 316	Adapted Physical Activity	3
KINES 325	Group Development and Behavior Management	3
KINES 327	Current Topics in Outdoor Pursuits	1
KINES 353	Health and Physical Education in a Multicultural Society	3
KINES 372	Methods and Practicum of Teaching PK-5 Physical Education	4
KINES 373	Methods and Practicum of Teaching 6-12 Physical Education	4

KINES/CURRIC 478	Elementary School Physical Education Student Teaching	6
KINES 479	Middle School or High School Physical Education Student Teaching	6

PROFESSIONAL EDUCATION COURSES

Code	Title	Credits
Learning (Minimum of 3 credits)		
ED PSYCH 301	How People Learn	3
Foundations of the Profession: (Minimum of 3 credits)		
ED POL 300	School and Society	3
or ED POL/ HISTORY 412	History of American Education	

ADDITIONAL CERTIFICATION OPTIONS

Physical Education students are encouraged to increase their content knowledge and teaching capabilities through additional training. Although not required, teaching certifications are available in Health Education and Adapted Physical Education. Students may pursue more than one additional certification.

- Health Education Minor (p. 1656)
- Adapted Physical Education Minor (p. 1655)

CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus course work. Consult the School of Education's Academic Policies and Procedures (p.) for additional information about the continuation requirement.

GPA AND OTHER GRADUATION REQUIREMENTS

Based on UW-Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- A minimum of 120 credits.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus.

Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1679).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Standard 1: Scientific Foundational Knowledge. Physical education candidates demonstrate an understanding of scientific foundations for the delivery of an effective preK–12 physical education program.
2. Standard 2: Physical Education Foundational Knowledge. Physical education candidates demonstrate an understanding of theoretical foundations for the delivery of an effective preK–12 physical education program.
3. Standard 3: Physical Education Content Knowledge. Physical education candidates understand physical education content, concepts and skills associated with the development of a physically educated student.
4. Standard 4: Planning for Instruction. Physical education candidates plan developmentally appropriate learning experiences aligned with local, state and/or SHAPE America National Standards and Grade-Level Outcomes for K–12 Physical Education.
5. Standard 5: Instructional Delivery and Management. Physical education candidates engage students in meaningful learning experiences through effective use of pedagogical skills. They use communication, feedback, and instructional and managerial skills to enhance student learning.
6. Standard 6: Assessment of Student Learning. Physical education candidates select and implement appropriate assessments to monitor students’ progress and guide decision making related to instruction and learning that do not marginalize students.
7. Standard 7: Technology. Physical education candidates select and implement a variety of technologies to enhance learning, as well as personal and professional productivity.
8. Standard 8: Social-Emotional Learning and Trauma Based Practices. Physical education candidates understand and utilize a variety of practices critical to SEL and positive mental health outcomes.
9. Standard 9: Professional Responsibility. Physical education candidates demonstrate behaviors essential to becoming effective professionals.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Physical Education – Sample Four-Year Plan

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide,

and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

ADVISING AND CAREERS PHYSICAL EDUCATION ADVISING

Prospective off-campus and on-campus physical education students will meet with Dan Timm in the Department of Kinesiology. Students considering physical education should schedule an appointment with Dr. Timm, dtimm@education.wisc.edu as soon as possible. Pre-declaration advising is conducted by the Department of Kinesiology and staff in the School of Education Student Services office, see below.

Students with either a pre-certification (PED) or certification (BSPE) classification are required to meet with their department advisor at least once per semester. Mandatory advising meetings are conducted every semester, just before enrollment begins for the following semester.

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison’s vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

PHYSICAL EDUCATION AND THE WISCONSIN EXPERIENCE

On-Campus Activities and Experiences Homeschool Physical Education

Physical Education students in an Elementary PE methods course provide an eight-week physical education program for local homeschool students. This experience is a win-win for both groups, as PE students practice their teaching skills while homeschool students get the vital motor and social skill development they need.

Smartphone App Development

Physical education staff and students recently partnered with experts in academic technology to create a smartphone app, "EnCourage." The app provides hundreds of team-building activities for use by teachers, coaches, and anyone trying to develop teamwork with groups. Its development was one of the School of Education Innovation Projects, "Social and Emotional Learning in Physical Education."

Participation in the Virginia Horne Henry PE History Project

Current students met with physical education alumni to share stories, learn about the rich program history, and establish new traditions to enhance the program.

Partnering with the Campus Recreation Program to Train Officials

Students in KINES 373 Methods and Practicum of Teaching 6-12 Physical Education, developed training modules for the RecWell employees (UW students) who serve as officials for the intramural sports.

UW–Madison Science Expeditions Presentation

Students and staff in the physical education program set up a station at this campus-wide open house where youngsters could test the speed of their overhand throw, receive feedback from the physical education students, and increase their throwing speed.

Youth Coaches Workshop

Through PLACE, physical education students helped to design a summer workshop to help area youth coaches incorporate teamwork into their practice sessions.

Guest Speakers

Past guest speakers in physical education classes have included Brett Fuller, retired Health and Physical Education Curriculum Director for Milwaukee Public Schools, and Chris Munson, an enrolled member of the Oneida Nation.

Off-Campus Activities and Experience Team Building Activities

In KINES 325 Group Development and Behavior Management, students develop and plan team-building activities. The students then visit a local elementary school to teach these activities and help students develop positive social and emotional skills.

Teaching in Area Schools

Students in physical education methods courses provide physical education and social skill development in area schools.

Partnering with Boys & Girls Club of Dane County

Physical education students and staff provide training on the implementation of social and emotional learning for after-school staff.

Boys & Girls Clubs of Dane County Thanksgiving Baskets

Students from the physical education program create games that students can play in their homes over the Thanksgiving holiday. The activities are included in the Thanksgiving baskets delivered to over 500 homes in the Dane county area. In addition, students visit the Boys & Girls Club sites, pack the baskets, and hand them out on the day before Thanksgiving. Who wouldn't want to play "Reverse Pig Trash Ball?"

Volunteer Experiences

- Camp Courageous Counselor – Students in the Adapted Physical Education program volunteer for the weekend as camp counselors working one on one with campers with disabilities at camp. They provide activities like a scavenger hunt, support in the pool for aquatic activities, and other adventures such as ziplining with their camper.
- Students are also volunteering with the Adapted Sports Program at Sun Prairie Area School District, assisting in numerous capacities.

Multicultural Field Experience

As part of KINES 353 Health and Physical Education in a Multicultural Society, students complete the Multicultural Field Experience, in which they work with individuals from a cultural background different than their own. Placements for the MFE have included assisting teachers in school health or physical education classes, or volunteering with an after-school program through Madison School and Community Recreation or a community organization.

Additional Activities and Accomplishments Student Organizations and Memberships

Students have organized the local Physical Education Club on campus and have memberships with Wisconsin Health and Physical Education and the Society of Health and Physical Educators.

Additional Certifications

In addition to the Physical Education major, most students also complete the Adapted Physical Education minor and/or the Health Education minor.

Leadership Positions - Wisconsin Health and Physical Education

Several students have served as Future Professionals President and Vice President with Wisconsin Health and Physical Education (WHPE). They have also served as Future Professionals Secretary and Treasurer; additionally they have served as the Future Professionals representative on the Leadership Council for the Midwest District of the Society of Health and Physical Educators, the parent body of the WHPE association.

Professional Presentations and Workshops

Students are active participants as presenters at the Wisconsin Health and Physical Education Convention, Best Practices in Health and Physical Education Conference, Society of Health and Physical Educators Convention, and the UW-Madison Undergraduate Symposium. Students also participated in Society for Public Health Education/CDC sponsored Skills-Based Health Education Workshop implemented by Health Education faculty and students last spring. Another student was involved with the Our Wisconsin inclusion education program at UW-Madison.

EsTEam First Year Teacher Program

Physical education staff partner with selected first-year alums to help them incorporate social and emotional learning across their physical education curriculum.

Study Abroad Courses

In the summer of 2023, the Department of Kinesiology began offering summer, study-abroad courses.

- Team Building in Costa Rica was designed to enhance the group development skills of its participants while engaging in activities such as white-water rafting, ziplining, and hiking. It combined a very successful kinesiology course, KINES 325 Group Development and Behavior Management, with a unique cultural opportunity in Costa Rica. Each day provides opportunities to not only explore the Pura Vida (Pure Life) of Costa Rica but also to engage in personal reflection. Participants experience the process of growing together as a community and develop skills to create lasting communities in their personal and professional lives. Students earn credit for KINES 325, a required course in the physical education program.

additional certification requirements and information about applying for a license, see the Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/current-students/>).

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/ licensure requirements in the following states:

Wisconsin

The requirements of this program do not meet certification/licensure requirements in the following states:

Not applicable

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE ADDITIONAL CERTIFICATION REQUIREMENTS

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For

PROMOTING ACTIVITY FOR DIVERSE ABILITIES, CERTIFICATE

Are you looking for a great way to gain knowledge and hands-on experience that prepares you for a career in the fields of healthcare, education, fitness, public health, and corporate wellness?

If you answered “yes,” the Promoting Activity for Diverse Abilities (PADA) Certificate – offered through the Department of Kinesiology – is the perfect blend of coursework and experiential learning. Students who have completed the PADA Certificate go on to graduate programs and careers in occupational or physical therapy, speech-language pathology, medicine, nursing, dentistry, counseling, special education, and many other exciting and challenging fields.

The PADA certificate will prepare you with the knowledge and skills to safely promote inclusive physical activities to improve the health and well-being of individuals with disabilities. Plus, you’ll have an opportunity to gain hands-on experience in the Adapted Fitness Program, (<https://kinesiology.education.wisc.edu/academics/certificates/adapted-fitness-and-personal-training/>) which is one of UW’s most sought-after volunteer experiences. Located on campus, Adapted Fitness offers physical activities and exercise training to community-dwelling clients and youth with a wide range of diverse abilities. Students who pursue the PADA certificate receive priority placement for volunteer positions in Adapted Fitness.

HOW TO GET IN

HOW TO GET IN

The SoE’s Undergraduate Academic Advising Services will administer the process that students will use to declare enrollment in the certificate. Students declaring in the Certificate must have a minimum grade point average of 2.50 to be eligible for the certificate to align with the School of Education’s requirement for good academic standing. Students intending to complete the Promoting Activity for Diverse Abilities Certificate should visit the School of Education’s Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page to complete the declaration form.

Students declared in the Physical Education BS may not declare the Certificate in Promoting Activity for Diverse Abilities.

REQUIREMENTS

REQUIREMENTS

Students must complete a minimum of 16 total credits. The 10-11 credits of core courses will provide the foundation content and instruction needed to be successful in subsequent certificate courses and will provide an upper-level course focusing on application and mastering knowledge. Students will also complete 5-6 credits of breadth elective courses that span the departments of Kinesiology, Rehabilitation Psychology and Special Education, Dance, and Communication Sciences and Disorders. Breadth courses give students from a wide array of backgrounds and majors to select courses that will be applicable to a variety of diverse career interests or the students will also have the ability to choose courses in a more narrowed and detailed focus. Allowing for a set of focused elective choices or range of elective topic areas will be a benefit and a draw to students pursuing a variety of career paths.

Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be taken in residence.

CORE COURSES

Complete 10-11 credits from the following:

Code	Title	Credits
KINES 225	Introduction to Physical Activity Programming for Diverse Abilities	2
KINES 227 or ANAT&PHY 337	Introduction to Clinical Anatomy of Human Movement Human Anatomy	2-3
KINES 516	Physical Activity for Diverse Abilities	3
RP & SE 300	Individuals with Disabilities	3

BREADTH ELECTIVE COURSES

Complete 5-6 credits from the following:

Code	Title	Credits
CS&D 110	Introduction to Communicative Disorders	3
CS&D 210	Neural Basis of Communication	3
CS&D 424	Sign Language I	2
DANCE 231	Introduction to Dance/Movement Therapy	3
DANCE 232	Introduction to Dynamics of Dance Therapy	3
DANCE 331	Dynamics of Dance Therapy	3
KINES 100	Exercise, Nutrition, and Health	2
KINES 150	Foundations of Health Behavior and Health Equity	3
KINES 260	Inclusive Physical Activity, Sport & Rehabilitation in Ireland	3
KINES 360	Lifespan Motor Development	3
KINES 540	Diversity in Health and Physical Activity Settings	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 466	Diversity in Special Education	3

CERTIFICATE COMPLETION REQUIREMENTS

This undergraduate certificate must be completed concurrently with the student’s undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate the ability to increase healthy behaviors and safe activities for persons with diverse abilities.
2. Obtain the skills and knowledge to encourage, empower, and prescribe activity for people who exhibit a wide array of disabling conditions.
3. Identify, create and expand opportunities where larger organizations can create more accessible physical activity programs for those who exhibit diverse abilities.
4. Develop practical skills and knowledge to modify and or adapt activities to minimize the effects of disabling conditions and maximize healthy movement opportunities.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION

The Department of Rehabilitation Psychology and Special Education is dedicated to enhancing the lives of individuals with disabilities and their families. As the only department on campus solely focused on this mission, it prepares students to advocate for the full inclusion of people with disabilities across the lifespan.

The undergraduate programs in Rehabilitation Psychology and Special Education equip students with the knowledge, skills, and experience necessary to support individuals with disabilities across various settings—whether in schools, workplaces, or community-based environments.

The department offers the following undergraduate programs:

- Rehabilitation Psychology (p. 1690) (pre-professional track)
- Special Education (p. 1695), with certification options for:
 - Kindergarten-Grade 12 (p. 1704)
 - Birth-Grade 3 (p. 1701)
 - Birth-Grade 12 (p. 1703)
- Elementary Education and Special Education (p. 1682) – a joint program with the Department of Curriculum and Instruction, leading to certifications in both Special Education (K-12) and Elementary Education (K-9)

Additionally, the department offers a Disability Rights and Services Certificate (p. 1681), available to students pursuing other majors across campus.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/ CERTIFICATES

- Disability Rights and Services, Certificate (p. 1681)
- Elementary Education and Special Education, BSE (p. 1682)
- Rehabilitation Psychology, BS (p. 1690)
- Special Education, BSE (p. 1695)

DISABILITY RIGHTS AND SERVICES, CERTIFICATE

The Department of Rehabilitation Psychology and Special Education's primary mission is to improve the lives of individuals with disabilities. The Disability Rights and Services Certificate equips undergraduate students with the knowledge, skills, and attitudes needed to support this mission. Upon completion, students will be prepared to advocate for the equity and inclusion of individuals with disabilities in their academic fields and future careers.

This certificate is particularly popular among pre-health students who seek to gain valuable knowledge and skills related to supporting individuals with disabilities. It also serves as an excellent option for students considering

graduate studies in education, offering exposure to special education coursework.

STUDY ABROAD OPPORTUNITY

The Department of Rehabilitation Psychology and Special Education offers a short-term, faculty-led, summer study abroad course, Disability Rights and Access in Australia (<https://studyabroad.wisc.edu/program/?programId=330353>), which can be counted as an elective for the certificate.

HOW TO GET IN

HOW TO GET IN

Students intending to complete the Disability Rights and Services Certificate will find the declaration form on the School of Education's Certificate Programs (<https://education.wisc.edu/academics/certificates/>) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note, students completing a major in Rehabilitation Psychology, Special Education, or Elementary Education and Special Education are not eligible to complete this certificate.

REQUIREMENTS

REQUIREMENTS

Complete a minimum of 12 credits to include at least 6 credits in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

Code	Title	Credits

Total Credits**12**

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Identify and analyze societal barriers and supports that affect the lives of people with disabilities.
2. Explore the societal aspects of disabilities, including the culture of disabilities, attitudes toward persons with disabilities, and quality of life issues.
3. Evaluate current approaches, advocacy efforts, and proposed solutions for overcoming barriers experienced by people with disabilities.
4. Use disability as a lens through which to examine broader aspects of history and culture, including power, discrimination, social stigma, social and political activism, media representations, re-appropriation, identity, intersectionality, education, work, and design.

ELEMENTARY EDUCATION AND SPECIAL EDUCATION, BSE

The Elementary Education and Special Education (EESE) program is a unique opportunity for students to pursue licensure in both Elementary Education and Special Education. Successful graduates of the program are certified in general education at the grade levels of K-9 (including eligibility for 4K), and Special Education in grades K-12 (through age 21). Students graduate to a wide range of opportunities in both general and special education classrooms.

The Department of Rehabilitation Psychology and Special Education has a long-standing mission of preparing future leaders who actively improve the lives of people with disabilities. The EESE program is designed to prepare future educators who will promote equity, inclusivity, and accessibility within both general and special education classrooms. Graduates of this program are equipped to create inclusive learning environments where they will holistically identify and address biases and barriers to learning, and strive to meet the needs of all students.

The Elementary Education and Special Education program is a rigorous four-semester course sequence that includes coursework, practicum, and student teaching experiences. Courses include teaching methods in general education classrooms, implementing instructional strategies for

helping students with a variety of abilities succeed, creating individualized education programs, as well as assessing learning needs in all core academic areas.

In addition to coursework, students will have hands-on practical experiences in both general and special education classrooms across a range of ages. Students are placed in one general education practicum and student teaching placement along with one special education practicum and student teaching placement, providing them with all the practical experience they need to successfully teach in a K-9 general education classroom or K-12 special education classroom. Students will learn to effectively work with a diverse student population and to create learning environments that foster academic success and social-emotional development for all students.

THE TEACHER PLEDGE

The School of Education at UW-Madison currently offers a unique financial opportunity for students in the Elementary Education and Special Education program called The Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>). The school pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, students pledge to work at a Wisconsin PreK-12 school for three to four years after graduation.

MADISON COLLEGE TRANSFER AGREEMENT

Madison College students should also investigate the transfer agreement (<https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/>) between Madison College and UW-Madison. Students meeting the requirements of this agreement are guaranteed admission to UW-Madison's School of Education and to Special Education.

HOW TO GET IN

HOW TO GET IN ELEMENTARY EDUCATION AND SPECIAL EDUCATION (EESE) DECLARATION OVERVIEW

Students typically enter UW-Madison as Pre-Elementary Education and Special Education students (PEED designation) and spend the first two years completing liberal studies, general education, and some professional education requirements. EESE is declared during the sophomore year for the final two years on campus.

On-campus students starting at UW-Madison in other majors can move to Pre-Elementary Education and Special Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.5, based on all UW-Madison coursework or the last 60 credits (p. 1494), is required to transfer into Pre-Elementary Education and Special Education. It is not necessary to be a Pre-Elementary Education and Special Education student before declaring the major.

Note: Students cannot complete the Certificate in Disability Rights and Services, Elementary Education, or Special Education in conjunction with this program.

ELIGIBILITY TO DECLARE ELEMENTARY EDUCATION AND SPECIAL EDUCATION

EESE currently accepts declarations once a year, usually from December 1 – February 1. This period may be extended if additional spaces are available after the initial deadline. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration, as this information may be modified from one declaration year to the next.

Off-campus students wishing to transfer directly into Elementary Education and Special Education should complete the on-campus declaration and must also be admitted to UW-Madison. See Transfer Students and Students with a Previous Degree, below.

Current Eligibility Requirements

- Complete at least 40 transferable college-level credits by the end of the fall semester of the declaration year.
- Successfully complete RP & SE 300 Individuals with Disabilities by the end of the summer of the declaration year.
- Earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted.¹
- Submit all program declaration form(s), transcripts, and other related declaration materials by the deadline specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.

¹ Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1494).

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Elementary Education and Special Education should complete both the on-campus declaration and the UW-Madison application. All eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the Pre-Elementary Education and Special Education designation.

An applicant with a previous undergraduate degree will be admitted to EESE as a second degree candidate or as a School of Education "Special Student," depending on their academic background.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its

completion; more information is available here (p. 1494). Most applicants to EESE will be second degree candidates.

In rare cases a student may be admitted as an Education Special Student. Admission with this designation indicates that they have an interest in pursuing teacher certification in Elementary Education and Special Education and have already studied this subject area extensively during their initial degree. A student enrolls as an Education Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email studentservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education’s Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student’s primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science

- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Elementary Education and Special Education program has four primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Professional education* coursework includes an examination of the schools’ relationship to our society and the processes by which students grow and learn.
- *Core Requirements* offer an in-depth study of Elementary Education and Special Education, including a four-semester *professional sequence* of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- *Elective* coursework is taken to reach the required minimum of 120 credits.

The Elementary Education and Special Education major requires 70 credits of professional coursework in addition to other degree requirements. RP & SE 300 Individuals with Disabilities must also be completed prior to beginning the professional sequence.

INDIVIDUALS WITH DISABILITIES - PREREQUISITE FOR PROGRAM ADMISSION

This course must be completed by the end of the summer of the application year, before beginning the professional course sequence.

Code	Title	Credits
RP & SE 300	Individuals with Disabilities	3

PROFESSIONAL SEQUENCE

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while other requirements may be completed prior to beginning the sequence.

Code	Title	Credits
Semester 1 (Fall)		
CURRIC 319	Pedagogical Content Knowledge for Teaching Elementary Mathematics 1	3

CURRIC/ RP & SE 406	Race, Intersectionality, and Equity in Education ¹	3
RP & SE 320	Introduction to Teaching in Special Education	3
RP & SE 465	Language and Reading Instruction for Students with Disabilities	3
CURRIC 550	Methods, Materials and Activities in Early Childhood Education	3
RP & SE 605	Development, Learning and Education Foundations in Special Education ¹	3

Semester 2 (Spring)

CURRIC 320	Pedagogical Content Knowledge for Teaching Elementary Mathematics ^{2 1}	3
RP & SE 464	Diagnosis, Assessment, and Instructional Planning in Special Education	3
RP & SE 466	Diversity in Special Education	3
RP & SE 472	Methods in Transition and Vocational Education	3
RP & SE 473	Classroom Management for Inclusive Classrooms	3
RP & SE 480	Practicum in Teaching Literacy: Secondary Special Education (Grades 4-12)	3

Semester 3 (Fall)

CURRIC 347	The Teaching of Writing and Other Language Arts	3
RP & SE/ CURRIC 365	Teaching Mathematics in Inclusive Settings	3
CURRIC 371	Teaching Social Studies	3
CURRIC 372	Teaching Science	3
RP & SE 515	Access to the General Curriculum for Students with Disabilities	3
CURRIC 373	Elementary Teaching Practicum III	3

Semester 4 (Spring)

CURRIC 463	Seminar in Elementary Education	1
CURRIC 464	Student Teaching in the Elementary School	7
RP & SE 457	Elementary Student Teaching Seminar - Elementary/Special Education Dual Major	1
RP & SE 477	Special Education Student Teaching: Elementary (PK - Grade 9)	7

Total Credits **70**

¹ May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

CONTENT AREA MINOR (OPTIONAL REQUIREMENT)

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be

posted on the UW-Madison transcript, but students will not receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. See the links below for the requirements of each minor.

Minor Options

- **Biology (p. 1557)**
- **Chemistry (p. 1559)**
- **Earth Science (p. 1566)**
- **Economics (p. 1566)**
- **English (p. 1580)**
- **English Language Arts (p. 1578)**
- **Geography (p. 1582)**
- **History (p. 1585)**
- **Mathematics (p. 1592)**
- **Mathematics and Science Dual (p. 1589)**
- **Mathematics Specialized (p. 1591)**
- **Physics (p. 1592)**
- **Political Science (p. 1593)**
- **Psychology (p. 1597)**
- **Science Specialized (p. 1598)**
- **Social Studies (p. 1598)**
- **Sociology (p. 1607)**

ELECTIVE COURSEWORK

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

GPA AND OTHER GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW-Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- 2.75 cumulative grade point average in the minor, if required.
- Minimum 120 credits (degree candidates only).
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (<https://guide.wisc.edu/undergraduate/education/curriculum-instruction/elementary-bse/#certificationlicensuretext>)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Use knowledge of learners and human development to create responsive, inclusive, and respectful learning activities and environments that maximize learners’ cognitive, linguistic, social, emotional, and physical development.
2. Use knowledge of learners, contexts, disciplines, pedagogies, and standards to plan and adjust developmentally appropriate and challenging learning activities and assessments.
3. Use knowledge of learners, contexts, disciples, pedagogies, and standards to implement planned and unplanned developmentally appropriate, challenging, and learner-responsive learning activities and maintain safe, inclusive, and respectful learning environments.
4. Create and implement meaningful assessments and use assessment results to inform instruction, communicate with parents and others, and provide feedback to learners to guide their future performance and learning.
5. Exhibit professionalism and adhere to ethical practices as they continue their own development and collaborate with others to improve their profession, school communities, and outcomes for students and families.
6. Use studies completed in science and mathematics, social sciences, the humanities, histories, languages, and the arts to inform and deepen their teaching of content areas and meeting learners’ needs.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Total Credits 120

¹ May be taken before semester 1 of the professional sequence, including prior to program admission.

A minimum of 120 credits is still required to complete the degree.

academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

ADVISING AND CAREERS

ADVISING AND CAREERS ELEMENTARY EDUCATION AND SPECIAL EDUCATION (ESEE) ADVISING

Students not yet admitted to ESEE meet with their assigned advisor in the School of Education Student Services office (see below). Students are assigned an additional departmental advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/>)

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin

Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

ELEMENTARY EDUCATION AND SPECIAL EDUCATION (ESEE) AND THE WISCONSIN EXPERIENCE

Community-Based Learning

RP & SE 300 Individuals with Disabilities offers a field-based experience where students work directly or indirectly with individuals with disabilities. Each year, hundreds of students are placed in various community settings across Madison. This experience provides students with valuable, first-hand knowledge of the services and contributions made to support individuals with disabilities, encouraging learning beyond the traditional classroom. These real-world experiences allow students to better understand the community and its needs, extending their education beyond textbooks and lectures.

Learning from Current Practitioners

Teacher candidates in the elementary education and special education programs gain extensive field experience in schools, culminating in a full-time student teaching assignment alongside a cooperating teacher. The strong partnership between the teacher candidate, their field supervisor, and the cooperating teacher in Madison-area schools ensures robust support from day one. Many graduates are offered teaching positions by the schools where they completed their fieldwork.

Guest Speakers

Guest speakers contribute to learning in many ESEE courses, providing insights into the daily lives of individuals with disabilities and discussing the range of community organizations that support and advocate for them. Through these interactions, students gain a better understanding of how these organizations operate and their broader social impact.

Additionally, a wide range of guest speakers participate in Special Education practicum and student teaching seminars. These guests may include school district personnel, parents and family members, teachers, and individuals with disabilities.

Field Experiences

Students in the ESEE program engage in multiple field experiences in K-12 schools, culminating in a full-time student teaching assignment. These experiences allow students to apply their classroom learning in real-world educational settings, enhancing their professional development and deepening their learning beyond the classroom.

Partnering with Community Organizations

The ESEE team collaborates with local organizations to assist with food delivery and support families in need. Students also volunteer with organizations like Special Olympics, Camp Kesem, and Girls on the Run, which empowers girls of all abilities to build social, emotional, and physical skills. These volunteer opportunities give students the chance to engage with diverse community experiences, extending their learning beyond

academics and encouraging personal growth through service and active involvement.

Community Employment

The Department of Rehabilitation Psychology and Special Education has strong connections with the community. Students in the department often find both paid and volunteer opportunities in school and community organizations that serve children with disabilities and their families. Examples include the Schools of Hope Tutoring Program, Madison School and Community Recreation, and Gio's Garden.

Field Trips

While completing field experiences, students enjoy trips to places in the Madison community, such as the Madison Children's Museum (<https://madisonchildrensmuseum.org/>), Madison Public Library's Play Lab (<https://www.madisonpubliclibrary.org/spaces/playlab/>), Allen Centennial Garden (<https://allencentennialgarden.wisc.edu/>), Centro Hispano (<https://www.micentro.org/>), and the Madison Literacy Network (<https://www.litnetwork.org/>). These outings offer diverse learning opportunities outside the classroom, fostering new perspectives and deepening their understanding of the community they serve. The trips also encourage students to take initiative in discovering more about the world around them.

Study Abroad

We encourage students to explore different cultures and educational systems through study abroad opportunities. If a full semester or year-long program is not feasible, the School of Education offers several short-term, faculty-led, study abroad programs. These experiences give students a global perspective, expanding their educational journey beyond local or traditional settings.

Clubs and Organizations

ESEE students have numerous opportunities to join campus organizations, such as Aspiring Educators of Wisconsin and Game Design and Development. These clubs provide students with additional avenues to connect with like-minded peers, develop practical skills, and deepen their understanding of their field. By independently selecting activities that align with their personal interests and goals, students enhance their educational experience and foster a well-rounded Wisconsin Experience.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE ADDITIONAL CERTIFICATION REQUIREMENTS

Students interested in certification must, in addition to completing UW–Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW–Madison. For additional certification requirements and information about applying for a license, see the Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/current-students/>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students

intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following undergraduate teacher licensing options are offered at UW-Madison.

- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education.
- The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level.
- Health licenses at the Kindergarten through Grade 12 level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW-Madison teacher certification students the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that

- all certification requirements are met;
- student teaching (following the school district calendar) is completed;
- final grades are posted and reviewed;
- the degree is posted (<https://registrar.wisc.edu/posting-of-degrees/>) by the Registrar's Office (which can take up to four to six weeks after the degree conferral date); and
- a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional six to eight weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education's Mary T. Kellner Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/?toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Wisconsin

The requirements of this program do not meet certification/licensure requirements in the following states:

Not applicable

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

REHABILITATION PSYCHOLOGY, BS

Rehabilitation Psychology is an academic field designed for students passionate about health and helping professions. Students majoring in Rehabilitation Psychology are dedicated to supporting individuals with chronic illnesses and disabilities, preparing them for careers that improve lives and promote well-being. The curriculum integrates hands-on learning with theoretical knowledge, giving students valuable experience in addressing the real-life challenges faced by individuals with disabilities, as well as the services and supports that can enhance their quality of life.

A standout feature of the program is the required community-based internship, which offers students direct, real-world experience working with individuals with disabilities in a professional setting of their choice. This internship is crucial for helping students gain valuable skills, refine their career goals, and foster connections that often lead to permanent job opportunities. It also serves as an excellent stepping stone for those considering graduate studies.

Upon graduation, students enjoy a wide array of career options. Graduates often pursue roles supporting and advocating for individuals with chronic illnesses and disabilities in the community. Many graduates also continue their education in graduate programs in rehabilitation or mental health counseling, occupational therapy, physical therapy, special education, or other health and human services-related fields.

"I became interested in this program because of my desire to advance health equity and human rights. I am passionate about addressing systemic barriers that impact individuals' access to quality care, particularly for marginalized populations." – Andrew Trampf (read more (https://education.wisc.edu/news/andrew-trampf-from-the-school-of-educations-rehabilitation-psychology-major/?utm_source=Early_AD&utm_medium=email&utm_campaign=RP_majors&utm_id=student&utm_content=Student_Story))

HOW TO GET IN

HOW TO GET IN REHABILITATION PSYCHOLOGY DECLARATION

New first-year students and off-campus transfers are admitted directly to the Bachelor of Science–Rehabilitation Psychology degree program.

On-campus students starting at UW-Madison in other majors can declare Rehabilitation Psychology at any time of the year, and at any point in their academic career. First-semester students who have not established a GPA at UW-Madison may declare Rehabilitation Psychology.

Students are strongly encouraged to meet with the department's undergraduate program coordinator or an advisor in the School of Education Student Services office before declaring Rehabilitation Psychology. See the Overview (<https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/rehabilitation-psychology-bse/>) page for contact information.

ELIGIBILITY TO DECLARE REHABILITATION PSYCHOLOGY

The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/>)

academics/undergraduate-students/academic-program-admission/) page, along with other information about current eligibility requirements and deadlines to declare (if any). Students should consult this site prior to submitting a declaration as this information may be modified from one year to the next.

Off-campus students wishing to transfer directly into Rehabilitation Psychology must be admitted to UW-Madison. See Transfer Students and Students with a Bachelor's Degree, below.

Students may not complete both Rehabilitation Psychology and the Certificate in Disability Rights and Services.

Eligibility Requirements:

- Earn a minimum 2.50 cumulative GPA based on all college coursework attempted or a 2.50 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester.¹

¹ Last 60 Credits Rule – Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.50 each semester after declaration. More information on this rule is available here (p. 1494).

Transfer Students and Students with a Previous Degree

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1494).

All off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email studentservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (BS) degree program in Rehabilitation Psychology has four components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Related coursework* comes from departments related to Rehabilitation Psychology—Psychology, Educational Psychology, Sociology, Social Work, and Gender and Women's Studies.
- *Rehabilitation Psychology* coursework offers an in-depth study of working with people with disabilities, including multiple opportunities for supervised field experience. In addition, at least 12 credits of electives in Rehabilitation Psychology are required, giving students some flexibility to tailor the program to their specific interests.
- *Elective* coursework is taken to meet the minimum of 120 credits required for the degree.

RELATED COURSE REQUIREMENTS

PSYCHOLOGY/EDUCATIONAL PSYCHOLOGY

Complete 12 credits selected from Educational Psychology (https://guide.wisc.edu/courses/ed_psych/) and/or Psychology (<https://guide.wisc.edu/courses/psych/>) to include PSYCH 405 Adult Psychopathology.

SOCIOLOGY/SOCIAL WORK/GENDER AND WOMEN'S STUDIES

Complete 6 credits selected from Sociology (<https://guide.wisc.edu/courses/soc/>), Social Work (https://guide.wisc.edu/courses/soc_work/), and/or Gender and Women's Studies (https://guide.wisc.edu/courses/gen_ws/). Recommended areas include social disorganization, deviant behavior, alcohol and other drug abuse, community development, and issues in social welfare.

REHABILITATION PSYCHOLOGY COURSE REQUIREMENTS DIDACTIC CORE

Complete the following 21 credits:

Code	Title	Credits
RP & SE 125	Health and Rehabilitation Professions	3
RP & SE 316	Health Promotion for Individuals with Disability and Chronic Illness	3
RP & SE 325	Self Management of Chronic Illness and Disability	3
RP & SE 500	Rehabilitation-Counseling Psychology: Foundations	3
RP & SE 501	Rehabilitation-Counseling Psychology: Applications	3
RP & SE 505	Biological, Psychosocial, and Vocational Aspects of Disabilities	3
COUN PSY 655	Clinical Communication Skills	3

SUPERVISED FIELD EXPERIENCE

Complete 6 credits of RP & SE 630 Internship in Rehabilitation or Special Education; once in conjunction with RP & SE 501 Rehabilitation-Counseling Psychology: Applications. The remaining 3 credits may be completed in another semester or during the summer.

REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION ELECTIVES

Complete 12 credits from the following:

Code	Title	Credits
RP & SE 121	Disability and Substance Abuse	3
RP & SE/ LEGAL ST 135	Disability and the Criminal Justice System	3
RP & SE 300	Individuals with Disabilities	3
RP & SE 310	Positive Psychology and Well Being	3
RP & SE 311	International Perspectives on Disability in Australia	3
RP & SE 330	Behavior Analysis: Applications to Persons with Disabilities	3
RP & SE 335	Introduction to Sport Psychology	3
RP & SE 355	Remote Service Provision Strategies for Health and Rehabilitation Providers	3
RP & SE 390	Community Psychiatric Rehabilitation	3
RP & SE 405	Current Topics in Special Education (Related topics only - approval required)	1
RP & SE 520	Case Management and Community Resources	3
RP & SE 535	Introduction to Forensic Rehabilitation	3
RP & SE 630	Internship in Rehabilitation or Special Education (Maximum 3 additional internship credits allowed in electives)	2-3
RP & SE 660	Special Topics (Related topics only - approval required)	3

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Based on UW-Madison coursework.

- 2.50 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.50 cumulative grade point average in all major coursework. This GPA includes all coursework from the RP & SE department and COUN PSY 655.
- Major Residency. The rehabilitation psychology program requires that students complete 15 credits of the Didactic Core and Supervised Field Experience coursework while in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits. A minimum of 120 degree credits are required for graduation.

DEGREE AUDIT (DARS)

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar's website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Analyze complex social issues using skills gained through the study of communication, quantitative reasoning, humanities, social sciences, natural sciences, ethnic studies, history and global issues.
2. Apply knowledge of models and concepts of disability and chronic illness to education, employment, rehabilitation, and healthcare services.
3. Identify basic theories in the field of psychology and recognize the importance of theoretical foundations in psychology for the study of rehabilitation, disability, and health.
4. Develop knowledge of the health and human services delivery systems and demonstrate pre-professional skills in communication, teamwork, problem solving, and ethical issues through engagement with the healthcare and rehabilitation services professional community.
5. Demonstrate the knowledge and skills necessary for graduate study in a variety of health and human service fields related to disability and rehabilitation or for entry-level positions in disability and related human services agencies.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Rehabilitation Psychology: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic

advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

ADVISING AND CAREERS

ADVISING AND CAREERS REHABILITATION PSYCHOLOGY ADVISING

Students not yet admitted to Rehabilitation Psychology meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall (see below). Students are assigned an additional faculty advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING

Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Rehabilitation Psychology Pathways (<https://careercenter.education.wisc.edu/explore-career/rehabilitation-psychology-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

REHABILITATION PSYCHOLOGY AND THE WISCONSIN EXPERIENCE

Undergraduate Research

Each year, students in the major have the exciting opportunity to engage in hands-on learning beyond the classroom by collaborating with faculty and graduate students on research in rehabilitation psychology. Students may contribute to ongoing research projects or receive guidance as they design and launch their own initiatives. The annual Undergraduate Research Symposium offers students a chance to showcase their work, fostering valuable experience in presenting research to the broader community.

Community-Based Learning

RP & SE 300 Individuals with Disabilities includes a dynamic field-based component where students gain real-world experience working directly with individuals with disabilities. Hundreds of students are placed annually in diverse community settings across the Madison area. This immersive experience helps students gain invaluable, first-hand knowledge of the services provided to individuals with disabilities.

Guest Speakers

The Rehabilitation Psychology major prioritizes hosting guest speakers in the classroom. These experts share their diverse perspectives on the daily experiences of individuals with disabilities. Students also hear directly

from the various community organizations that advocate for and support individuals with disabilities.

Internships

Rehabilitation Psychology majors are required to complete 240 hours of internship in the community, giving them the chance to apply classroom knowledge in real-world settings. These internships allow students to immerse themselves in a variety of environments that support people with disabilities, providing hands-on experience in their specific areas of interest. This valuable opportunity allows students to gain experience putting their major to work in the field, while also giving them opportunities to explore future career paths.

Clubs and Organizations

Students actively participate in a wide range of extracurricular clubs and organizations that offer opportunities to learn and grow outside the classroom. Popular options include Badgers for Special Olympics, Best Buddies, Leadership in Adapted Fitness, and Camp Kesem. These clubs foster leadership, advocacy, and service, creating avenues for students to develop skills while making a positive impact in the community.

Study Abroad

Rehabilitation Psychology majors also have the opportunity to broaden their perspectives through study abroad programs. The Department of Rehabilitation Psychology and Special Education hosts a short-term, faculty-led summer study abroad course, Disability Access and Rights in Australia (<https://studyabroad.wisc.edu/program/?programId=330353>). This unique opportunity allows students to earn credit in their major while gaining a global perspective on disability access and rights.

Community Employment

The Department of Rehabilitation Psychology and Special Education, in conjunction with the School of Education's Career Center (<https://careercenter.education.wisc.edu/>), frequently connects students with part-time employment opportunities in the community. These positions allow students to gain valuable work experience while supporting local agencies or private individuals. This real-world experience further strengthens their understanding of the field and helps them develop the practical skills needed for future careers.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

SPECIAL EDUCATION, BSE

Special Education is for students who want to work with children and youth, particularly those with disabilities. Graduates of the program have almost 100% job placement, with opportunities in Wisconsin and nationwide.

Watch what students in Special Education have to say about the program (<https://www.youtube.com/watch?v=nsRvdf1bmao>).

Students pursuing Special Education can choose from four certification options, all completed in a four-semester sequence that includes coursework, field experiences, and starts each fall.

CERTIFICATION OPTIONS

Special Education Cross-Categorical K-12 (p. 1704)

This program prepares educators to serve as resources and advocates for individuals with disabilities and their families. Graduates will be equipped to lead, collaborate, and work creatively within and outside of schools to create inclusive educational experiences that improve the quality of life for individuals with disabilities and their families. Coursework and field experiences focus on elementary, middle, and high school settings, supporting students with a wide range of abilities, including those with severe disabilities.

Elementary Education K-9 and Special Education K-12 (p. 1682)

This program trains educators to work with all children, especially those from diverse backgrounds or with disabilities. Graduates will focus on inclusion and work with students across various disability categories, such as learning disabilities and emotional/behavioral disorders. The program emphasizes collaboration and provides training in both Elementary and Special Education; graduates will obtain certification in both Elementary Education (K-9) and Special Education (K-12).

Early Childhood Special Education (ECSE) (p. 1701)

This certification prepares educators to support young children who have, or are at greater risk of developing, disabilities. The program emphasizes early intervention and collaboration with families, schools, and community organizations. Graduates can work in settings like Early Head Start, Head Start, and childcare centers, in addition to classrooms through grade 3.

Early Childhood Special Education and Special Education Cross-Categorical K-12 (including 4K) (p. 1703)

This combined certification prepares educators to support students with disabilities from birth through grade 12. Students will be certified in both Early Childhood Special Education and Special Education Cross-Categorical K-12.

THE TEACHER PLEDGE

UW-Madison offers a financial program called the Teacher Pledge (<https://tec.education.wisc.edu/teacher-pledge/>). The school covers in-state tuition for Special Education students who agree to teach at a Wisconsin PreK-12 school for 3-4 years after graduation.

MADISON COLLEGE TRANSFER AGREEMENT

Madison College students can transfer to UW-Madison's School of Education and Special Education through a guaranteed admission (<https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/>) agreement.

HOW TO GET IN

HOW TO GET IN

SPECIAL EDUCATION DECLARATION OVERVIEW

Students typically enter UW-Madison as Pre-Special Education students (PSR) and spend the first two years completing liberal studies, general education, and some professional education requirements. The Special

Education major is declared during the sophomore year for the final two years on campus.

On-campus students starting at UW-Madison in other majors can move to Pre-Special Education by completing a Pre-Professional Declaration (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>). A GPA of 2.5, based on all UW-Madison coursework or the last 60 credits (p. 1494), is required to transfer into Pre-Special Education. It is not necessary to be a Pre-Special Education student before declaring the major.

Note: Students cannot complete the Certificate in Disability Rights and Services in conjunction with this program.

ELIGIBILITY TO DECLARE SPECIAL EDUCATION

Special Education currently accepts declarations once a year, usually from December 1 – February 1. This period may be extended if additional spaces are available after the initial deadline. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration year to the next.

Off-campus students wishing to transfer directly into Special Education should complete the on-campus declaration and must also be admitted to UW-Madison. See Transfer Students and Students with a Previous Degree, below.

Current Eligibility Requirements

- Complete at least 40 transferable college-level credits by the end of the fall semester of the declaration year.
- Successfully complete RP & SE 300 Individuals with Disabilities by the end of the summer of the declaration year.
- Earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted.¹
- Submit all program declaration form(s), transcripts, and other related declaration materials by the deadline specified on the School of Education's Undergraduate Admissions (<http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/>) page.

¹ Last 60 Credits Rule – Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1494).

TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE

Transfer students and students who already hold a Bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>) for campus application information.

Students wishing to enter directly into Special Education should complete both the on-campus declaration and the UW-Madison application. All

eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the Pre-Special Education designation.

An applicant with a previous undergraduate degree will be admitted to Special Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1494). Most applicants to Special Education will be second degree candidates.

In rare cases a student may be admitted as an Education Special Student. Admission with this designation indicates that they have an interest in pursuing teacher certification in Special Education and have already studied this subject area extensively during their initial degree. A student enrolls as an Education Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email studentservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

BACKGROUND CHECKS

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Special Education program has four primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Professional education* coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn.
- *Core Requirements* offer an in-depth study of Special Education, including a four-semester *professional sequence* of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- *Elective* coursework is taken to reach the required minimum of 120 credits.

SPECIAL EDUCATION OPTIONS - SELECT ONE

View as listView as grid

- **SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION BIRTH - GRADE 3, BSE (P. 1701)**
- **SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION/SPECIAL EDUCATION DUAL CERTIFICATION BIRTH-GRADE 12, BSE (P. 1703)**
- **SPECIAL EDUCATION: SPECIAL EDUCATION CROSS CATEGORICAL K-12, BSE (P. 1704)**

ELECTIVE COURSEWORK

Complete additional coursework to reach the minimum of 120 credits.

GPA AND OTHER GRADUATION REQUIREMENTS

GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty advisor(s) to receive certification through UW–Madison. The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW–Madison coursework.

- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1494).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- Minimum 120 credits (degree candidates only). Most students will need more than the minimum to complete all requirements.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300–699) in residence on the UW–Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus. Student teaching and practicum are considered part of the 30 credits.

DEGREE AUDIT (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE

In addition to completing UW–Madison’s program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program’s requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW–Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K–12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1700)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor’s degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. (Professionalism) Adhere to professional ethical standards and conduct her or himself in a courteous and professional manner.
2. (Collaboration and Communication) Collaborate and effectively communicate with students their families, other educators, related service providers and members of the community to address the needs of students with disabilities.
3. (Assessment) Collect information on student backgrounds, learning characteristics and achievement that can be used to determine students’ present level of performance and guide instruction.
4. (Special Education Evaluation and Individualized Educational Planning) To the maximum possible the teacher candidate will participate in the Educational Evaluation and Individualized Educational Planning process.

5. (Instructional Planning) Plan instruction that meets the needs of students, is consistent with State and local standards and provides access to the general education curriculum.
6. (Instructional Presentations) Present lessons and units of instruction that gain and maintain student attention and are consistent with students' interests and IEP goals.
7. (Classroom Management) Create and maintain a safe, positive and supportive learning environment that is conducive to learning and the mental health of the students.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Refer to the available named options for more information on the four-year plans.

ADVISING AND CAREERS

ADVISING AND CAREERS SPECIAL EDUCATION PROGRAM ADVISING

Students not yet admitted to special education meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall (see below). Students are assigned an additional departmental advisor when admitted to the professional component of their degree program.

SCHOOL OF EDUCATION ADVISING Academic Advising in the School of Education

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

ADDITIONAL RESOURCES

Students interested in special education may also want to consult the following resources:

- Read about the relationship between Special Education and regular education programs (<https://www.cec.sped.org/Policy-and-Advocacy/CEC-Professional-Policies/Special-Education-in-the-Schools/>).
- Watch a Video (<https://www.youtube.com/watch?v=2XsaK3pWyll>) describing the work of Special Educators.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW-Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

SPECIAL EDUCATION AND THE WISCONSIN EXPERIENCE

Community-Based Learning

RP & SE 300 Individuals with Disabilities includes a field-based experience where students engage in work that supports individuals with disabilities. Every year, hundreds of students are placed at a variety of sites in the Madison area. This experience allows students to gain hands-on experience working in the community.

Guest Speakers

The Special Education major emphasizes bringing guest speakers into the classroom. These experts offer diverse perspectives on the daily experiences of individuals with disabilities. Students also hear directly from community organizations that advocate for and support people with disabilities.

Additionally, a wide range of guest speakers participate in Special Education practicum and student teaching seminars. These guests may include school district personnel, parents and family members, teachers, and individuals with disabilities.

Field Experiences

Students in our teacher education programs participate in multiple field experiences, including practicum and student teaching, throughout their professional sequence. These hands-on experiences provide students with numerous opportunities to apply what they are learning in the classroom to real-world teaching in schools and communities.

Clubs and Organizations

Special Education students have many opportunities to participate in clubs and organizations. Popular options include Special Olympics, Aspiring Educators, and Camp Kesem.

Additional Majors and Certificates

Many students choose to pair their Special Education program with another major or certificate. Popular second majors include Education Policy Studies, Spanish, and Psychology, but students can select from a variety of majors and certificates that align with their academic and professional goals.

Community Employment

The Department of Rehabilitation Psychology and Special Education has strong connections with the community. Students in the department often find both paid and volunteer opportunities in school and community organizations that serve children with disabilities and their families. Examples include the Schools of Hope Tutoring Program, Madison School and Community Recreation, and Gio's Garden.

Study Abroad

Special Education students are encouraged to explore study abroad opportunities, including popular faculty-led short-term programs hosted by the School of Education. The Department of Rehabilitation Psychology and Special Education offers two key programs: Disability Rights & Access in Australia (<https://studyabroad.wisc.edu/program/?programId=330353>) and Disability, Access & Inclusion in Belize (<https://studyabroad.wisc.edu/program/?programId=330420>). These programs provide hands-on learning experiences in global contexts. Students are encouraged to explore all available options through the School of Education to enrich their academic journey and gain valuable international perspectives.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE ADDITIONAL CERTIFICATION REQUIREMENTS

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Mary T. Kellner Teacher Education Center (<https://tec.education.wisc.edu/current-students/>).

APPLYING FOR A TEACHING LICENSE

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

Licensing Levels

The following undergraduate teacher licensing options are offered at UW-Madison.

- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education.
- The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level.
- Health licenses at the Kindergarten through Grade 12 level.

Wisconsin State Licensing

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \$125. An online license application is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/elo/>). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (<http://dpi.wi.gov/tepd/licensing/fingerprint/electronic-submission/>).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UW-Madison teacher certification students the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall.

Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that

- all certification requirements are met;
- student teaching (following the school district calendar) is completed;
- final grades are posted and reviewed;
- the degree is posted (<https://registrar.wisc.edu/posting-of-degrees/>) by the Registrar's Office (which can take up to four to six weeks after the degree conferral date); and
- a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional six to eight weeks for license processing.

Licensing Outside of Wisconsin

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (<https://education.uky.edu/accreditation/certification/states/>) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a state-approved licensing program has been completed. These forms should be sent to the School of Education's Mary T. Kellner Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/?toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Wisconsin

The requirements of this program do not meet certification/licensure requirements in the following states:

Not applicable

Special Education Dual Certification Option

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

SPECIAL EDUCATION:
SPECIAL EDUCATION CROSS
CATEGORICAL K-12, BSE

REQUIREMENTS

REQUIREMENTS

Students in the Special Education Cross Categorical K-12 option will seek licensure to work with students in elementary and secondary schools (kindergarten through grade 12.) Admitted students begin a four-semester professional sequence in the fall following admission.

The option coursework listed here is one component of the Special Education, BSE degree (<https://guide.wisc.edu/undergraduate/education/rehabilitation-psychology-special-education/special-education-bse/>) requirements.

PROFESSIONAL EDUCATION
REQUIREMENTS

Individuals with Disabilities

This course is a prerequisite to declare Special Education. It must be completed by the end of the summer of the declaration year.

Code	Title	Credits

CORE REQUIREMENTS (INCLUDES PROFESSIONAL SEQUENCE)

RP & SE 300 Individuals with Disabilities is a prerequisite to declare Special Education. This course must be completed by the end of the summer of the declaration and is calculated into the major gpa required for graduation.

Special Education Professional Sequence

Students complete a four-semester sequence of professional courses after admission to the program. The professional methods courses and clinical (field) experiences must be followed sequentially and taken in consecutive semesters unless a modification is approved. Class schedules for the professional sequence courses are determined in advance.

Code	Title	Credits

THEATRE AND DRAMA

A degree in Theatre and Drama from the University of Wisconsin–Madison opens doors to a range of exciting careers in the theatre and entertainment industries, as well as other fields.

The department combines the best of a broad-based undergraduate education with specified training in many aspects of the performing arts – including acting, design, dramaturgy, technology, and theatre engineering. Students learn from faculty and staff who are professional artists, technicians, and scholars working actively in their fields, in an environment that is both supportive and challenging – combining one-on-one mentoring, small classes, and opportunities for applied work in production. Theatre students develop skills in communication, collaboration, and critical thinking, along with cultural and creative competencies which prepare them for successful careers in the professional theatre and entertainment industry, gaming, and education as well as for graduate studies and preparation for such fields as law, communications, business, and more.

The centerpiece of the department’s curriculum is its production program, chiefly the University Theatre (UT) program, as well as a Second Stage program supporting experimental and student work. Through a year-round season of productions, the Department of Theatre and Drama’s University Theatre serves as a vibrant arena for experiential and collaborative learning, engaging undergraduate students in embodied and hands-on work, allowing them to apply theoretical knowledge in performance, technical theatre, and design for audiences on campus and locally.

Theatre and Drama majors pursue a Bachelor of Science degree (p. 1708) through the School of Education, with the flexibility to informally explore such areas as design, stage management, directing, acting, and theatre technology. For students with a specific interest in acting, the department offers the Acting Option (p. 1713), a highly structured program designed to provide a deeper understanding of the craft and professional skills needed for a career in acting or advanced theatre studies. Students in this option receive personalized mentoring and performance reviews at the end of each semester. Upon completion, this option is formally noted on the student’s transcript.

Admission to the Acting Option is by audition only. Auditions are held at the midpoint of each semester and require the completion of specific prerequisite courses. Acting students are encouraged to audition for University Theatre (UT) productions to gain valuable performance experience and contribute to the vibrant season of University Theatre. For more information on the Acting Option and the audition process, students should contact the department advisor.

Students with specific interest in design, technology, and management are encouraged to explore one area of interest or several, with several opportunities for applied work including designing for the mainstage. Students are encouraged to participate in the production program as assistant directors and dramaturges and to produce their own work in our mentored Second Stage program or in the experimental black-box laboratory.

Non-majors who wish to explore theatre in both theory and practice are welcome to enroll in our courses and participate in productions. The Certificate in Theatre (p. 1714) offers students from all disciplines the opportunity to gain a structured and meaningful theatre experience. This certificate has attracted students from a wide variety of fields, including law, business, medicine, art, dance, science, and social work. These students are drawn to theatre for its ability to enhance communication skills, improve problem-solving abilities, and foster visual acumen—skills that are valuable across all professions.

DEGREES/MAJORS/CERTIFICATES

THEATRE AND DRAMA, BS

A degree in Theatre and Drama from the University of Wisconsin–Madison opens doors to a wide range of careers. The department combines the best of a broad-based undergraduate education with specified training in many aspects of the performing arts – including acting, design, dramaturgy, technology, and theatre engineering.

Students learn from faculty and staff who are professional artists, technicians, and scholars working actively in their fields, in an environment that is both supportive and challenging – combining one-on-one mentoring, small classes, and opportunities for applied work in production. Theatre students develop skills in communication, collaboration, and critical thinking, along with cultural and creative competencies which prepare them for successful careers in the professional theatre and

entertainment industry, gaming, and education as well as for graduate studies and preparation for such fields as law, communications, business, and more.

The centerpiece of the department's curriculum is its production program, chiefly the University Theatre (UT) program, as well as a Second Stage program supporting experimental and student work. Through a year-round season of productions, the Department of Theatre and Drama's University Theatre serves as a vibrant arena for experiential and collaborative learning, engaging undergraduate students in embodied and hands-on work, allowing them to apply theoretical knowledge in performance, technical theatre, and design for audiences on campus and locally.

Our majors complete a Bachelor of Science degree in Theatre and Drama through the School of Education. Students may informally select areas of emphasis such as design, stage management, directing, acting, or theatre technology.

Majors whose primary interest is acting may pursue the Acting Option (p. 1713). This highly structured program of study offers students a deeper practical knowledge and experience of the skills required to pursue professional work as an actor and/or advanced studies in theatre. Students are highly mentored and will benefit from personalized performance reviews with the acting faculty at the end of each semester. Upon completion, this named option will be formally documented on the student's transcript.

HOW TO GET IN

HOW TO GET IN PROGRAM ADMISSION OVERVIEW

The Theatre and Drama major may be completed either as the primary major or as an additional ("double") major.

Primary Major in Theatre and Drama

Undergraduate students interested in completing the Bachelor of Science–Theatre and Drama degree program will fulfill the School of Education's liberal studies and other degree requirements in addition to the 43 credits required for the Theatre and Drama major.

Additional Major in Theatre and Drama

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Theatre and Drama as an additional major. Students completing Theatre and Drama as an additional major do not need to complete the School of Education's liberal studies and other degree requirements. For application information, go directly to the Additional Major in Theatre and Drama (p. 1708) section below.

ENTERING THE SCHOOL OF EDUCATION

New and Current UW–Madison Students

Incoming freshmen enter directly into the Bachelor of Science–Theatre and Drama degree program upon admission to UW–Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

All other on-campus students will submit an application following a meeting with the department's academic advisor.

Prospective transfer students

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information. Transfer students enter directly into the Bachelor of Science–Theatre and Drama degree program upon admission to UW–Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required. Prospective transfer students are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective transfer students are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

Students with a previous degree

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll in a School of Education degree program. See UW–Madison Office of Admissions and Recruitment (<http://admissions.wisc.edu/>) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:

- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science–Theatre and Drama degree program. No additional application to Theatre and Drama is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective second degree candidates are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

APPLICATION AND ADMISSION

While new freshmen and off-campus transfers are admitted directly to the BS–Theatre and Drama degree program, all other current UW–Madison students seeking to enter the BS–Theatre and Drama program must apply for admission to the program. Students must make an appointment with the departmental advisor to complete the declaration form. Requirements and selection criteria may be modified from one application/admission period to the next.

Criteria for Admission

Eligibility for admission consideration to BS–Theatre and Drama:

- Cumulative grade-point average on all transferable college-level coursework of at least a 2.50 (on a 4.00 scale).¹
- Cumulative grade point average of at least a 2.5 based on UW–Madison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Submission of all required application materials, including program application and transcripts.

¹ A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW–Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UW–Madison coursework established by their program and the School of Education each semester after admission.

Last 60 Credits Rule

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using

- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1494).

ADDITIONAL MAJOR IN THEATRE & DRAMA

Undergraduate students from all schools and colleges on campus (including Education) may declare Theatre and Drama as an additional major. Students wishing to declare the additional major must make an appointment with the departmental advisor to complete the declaration form. The declaration must also be approved by the student's home school/college.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth–Humanities/Literature/Arts: 6 credits
- Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth–Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1502) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

The School of Education's Liberal Studies

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1502) for information about course selection and approved course options.

Humanities, 9 credits

All students must complete a minimum of 9 credits to include:

- Literature
- Fine Arts
- Humanities Electives

Social Studies (Social Science)

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

Science

All students must complete a minimum of 9 credits to include:

- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

Cultural and Historical Studies

All students must complete three requirements (9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.

- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1502) to total 40 Credits.

PROGRAM STRUCTURE

The Bachelor of Science (BS) degree program in Theatre and Drama has three primary components:

- *Liberal studies* courses expose students to a broad range of academic disciplines. The university-wide *General Education* requirements also encourage this breadth of study.
- *Major requirements* permit in-depth studies of theatre and drama.
- *Additional electives* to reach the minimum of 120 degree credits. These credits allow students to pursue individual areas of interest, such as a second major or additional theatre and drama credits. Many BS–Theatre and Drama students complete an additional major from the College of Letters & Science. Some use this major to complement their theatre preparation, while others select majors that reflect interests completely unrelated to theatre.

MAJOR REQUIREMENTS

Complete a minimum of 43 credits. At least 15 credits of upper-level major coursework (courses designated intermediate or advanced, and/or courses numbered 300 or above) must be taken in residence with a minimum 2.5 grade point average.

Code	Title	Credits
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature (The 4-credit option satisfies the General Education Communication Part B requirement.)	3-4
THEATRE 130	Fundamentals of Theatrical Design	3
THEATRE 140	Voice 1: Effective Communication	3
THEATRE 150	Acting I: Introduction to Acting	3
THEATRE 160	Technical Theatre Fundamentals	3
THEATRE 220	Scenic Studio Practicum	1
THEATRE 221	Costume Studio Practicum	1
THEATRE 222	Lighting & Sound Studio Practicum	1
THEATRE 234	Collaborative Problem Solving	3
THEATRE 260	Producing Theatre	3
THEATRE 262	Backstage Practicum	1
THEATRE 357	Introduction to Theatre for Cultural and Social Awareness (Also satisfies ethnic studies requirement.)	3

THEATRE 367	Script Analysis	3
Choose one of the following:		3
THEATRE 327	History of Costume for the Stage	
THEATRE 328	Material Culture for Performance Design	
THEATRE 431	History of Theatres and Staging	
THEATRE 526	The Theatres of China and Japan	
THEATRE 631	Theories of Acting	
Required Electives - Complete a minimum of 9 credits; 6 credits must be at the 300 level or above. Practicum courses do not count as elective credit.		6

Electives

Select any Theatre and Drama (<https://guide.wisc.edu/courses/theatre/>) department courses to total 43 credits. Majors are urged to consult the department academic advisor in selecting courses, especially when building an emphasis in any one area.

REQUIREMENTS FOR THE ACTING OPTION

View as listView as grid

• THEATRE AND DRAMA: ACTING (P. 1713)

HONORS IN THE MAJOR

Students completing the requirements for Honors in the Major engage in valuable preparation for graduate and professional training and learn worthwhile skills that will benefit them in the workplace.

Those students interested in earning Honors in Theatre and Drama should declare their intention to graduate with Honors in the Major at the end of their sophomore year or the beginning of their junior year. The department advisor must be consulted to determine the best way to fulfill the honors requirements and how to make the most out of the experience.

Honors in Theatre and Drama is earned by satisfying both the requirements for the major and these additional requirements:

- Maintain a minimum GPA of 3.5 in major courses and an overall GPA of at least 3.3 in all courses taken at UW–Madison at the time of graduation.
- Complete one of the following courses:

Code	Title	Credits
THEATRE 500	The Business of the Business	3
THEATRE 501	The Business of Acting	3
M H R 320	New Ventures in Business, the Arts and Social Entrepreneurship	3

- Complete the following two-semester senior honors thesis for a total of six credits. Students must procure a mentor to supervise these two courses and their honors thesis project. This thesis may be a written research thesis, an original work of art, a performance, or other project determined by the student and his/her mentor. All senior honors theses will culminate in an open presentation of their work.

Code	Title	Credits
THEATRE 681	Senior Honors Thesis	3
THEATRE 682	Senior Honors Thesis	3

Students should be aware that some courses are not offered on a regular basis (some are offered every other year, some based on student enrollment in the department, and some based on current staffing.). Please contact the department advisor for information on specific courses and course equivalence.

GPA AND OTHER GRADUATION REQUIREMENTS

Based on UW–Madison coursework.

- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Major Residency: Students must complete a minimum of 15 credits of upper-level coursework in the major in residence on the UW–Madison campus. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW–Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation in the BS–Theatre and Drama degree program.

DEGREE AUDIT REPORTING SYSTEM (DARS)

UW–Madison uses “DARS” to document a student’s progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search & Enroll app or Student Center via My UW.

DARS also has a “what-if” function. This feature makes it possible to request a DARS report as if pursuing another program, major, or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE) or Pre-Kinesiology should request a “what if” DARS report of their professional program of interest.

More information on how to request a DARS report is available on the Office of the Registrar’s website (<https://registrar.wisc.edu/dars/>).

DARS is not intended to replace student contact with academic advisors. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major, and certificate completion in the School of Education.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate the ability to evaluate the art and craft of theatre both critically and conceptually.
2. Demonstrate the ability to interpret and analyze a script as an integral part of the theatrical process.
3. Demonstrate knowledge of theatrical history and literature.
4. Demonstrate competence in effective communication through vocal dynamics, movement, and the sharing of ideas.
5. Demonstrate the ability to problem-solve creatively and generously collaborate as theatre artists.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Theatre and Drama: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING**

Prospective off-campus and on-campus BS-Theatre and Drama students must meet with the department's academic advisor; see contact information box on this page. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis (see below).

SCHOOL OF EDUCATION ADVISING**Academic Advising in the School of Education**

Dedicated to supporting and promoting student success, academic advisors (<https://education.wisc.edu/academics/undergrad-majors/academic-advising/>) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:

- Course selection
- Mentoring and advocacy for underrepresented and international students
- Understanding degree requirements and progression
- Interpreting academic policies
- Helping students recognize their strengths and suggesting ways to expand their skills
- Expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Career Advising in the School of Education

Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:

- Exploration of career and academic pathways (<https://careercenter.education.wisc.edu/explore-career/>)
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

¹ THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature is a requirement of the Theatre and Drama major. The 4-credit option also satisfies the General Education Communication Part B requirement.

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (<https://careercenter.education.wisc.edu/>) or reach out at career-center@education.wisc.edu.

Information about common career pathways, ways to get involved and gain experience, and transferrable skills developed through this major can be found on the School of Education Career Center's Theatre and Drama Pathways (<https://careercenter.education.wisc.edu/explore-career/theatre-and-drama-career-pathways/>) webpage.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

UW–Madison's vision for the total student experience, the Wisconsin Experience (<https://wisconsinexperience.wisc.edu/about/>), combines learning in and out of the classroom. Tied to the Wisconsin Idea (<https://www.wisc.edu/wisconsin-idea/>) and steeped in long-standing institutional values – the commitment to the truth, shared participation in decision-making, and service to local and global communities – the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW–Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy & Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (<https://wisconsinexperience.wisc.edu/intellectual-confidence/>).

Since its inception, the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

THEATRE & DRAMA AND THE WISCONSIN EXPERIENCE

The spirit of the Wisconsin Experience and its core values sit at the center of the field of theatre and of all our activities in UW's Department of Theatre and Drama. Theatre is inherently communal and collaborative, engaging audiences from diverse communities to witness live performances reflecting the most important questions of our time. In the Department of Theatre and Drama we seek to embrace these qualities, to train creative, hardworking, ethical, collaborative, interdisciplinary artists, technicians, and scholars—local and global citizens equipped to take on the challenges of the present and future.

We do this through a wide range of opportunities for students on campus and beyond. Available resources include production opportunities in the University Theatre program with a focus on community engagement, social justice, and ties to the professional theatre community, opportunities for student led work in our season and through support of student organizations, curricular support for production and professional opportunities, access to guest artists, and work with Theatre and Drama faculty and staff research tied to the community.

University Theatre

The University Theatre (UT) program engages students on every facet of production, tied to the curriculum across all degree programs. The season is selected with an emphasis on providing student opportunities to apply their training in design, management, tech and performance, with an emphasis on community engagement and outreach to campus and local communities as well as to the professional theatre community through work with guest artists.

UT productions regularly engage with the Odyssey Program and PLACE, for student matinees and other programming, with Interdisciplinary Theatre Studies Program and African American Studies, supporting guest artists with the Lorraine Hansberry Fund, as well as Office of Multicultural Arts Initiatives (OMAI) and the UW Division of the Arts, to name a few.

Second Stage

The Department of Theatre and Drama also regularly supports work generated by students and other arts organizations across campus and from local communities. These projects are supported with the department's resources through an application process each semester.

Student Organizations

Theatre students also have an opportunity participate in student-run theatre groups. InterMission Theatre (IMT) (<https://win.wisc.edu/organization/intermissiontheatre/>) empowers students to create performance art through interdisciplinary collaboration. Saying Theatre (<https://win.wisc.edu/organization/sayingtheatre/>) presents and promotes Chinese culture through theatre arts.

Community Engaged Coursework

Several required and elective course offerings in Theatre and Drama are tied to the community and theatre professions. These include TD 100 Experiencing Theatre, which exposes students to world class theatre in Madison and globally as well as guest artists, as well as Theatre for Cultural and Social Awareness (TCSA). (<https://theatre.wisc.edu/academics/theatre-for-cultural-and-social-awareness/>)

Ties to the Profession

The University of Wisconsin–Madison Department of Theatre and Drama ensures its students are up-to-date with current practices in professional theatre through diverse initiatives. These include inviting industry professionals for class visits, organizing educational trips to companies such as Electronic Theatre Controls, INC. (ETC) to explore advanced technologies and American Players Theatre (APT), and facilitating residencies for professional artists through UT and special initiatives. These opportunities not only enhance students' academic journey but also equip them for prosperous careers in several fields of the theatre and entertainment industry.

Through coursework and practice, UT and Second Stage programming, as well as engagement in creative as well as through special research projects, students in Theatre and Drama have multiple opportunities to work with faculty and staff who are actively working in their fields on campus, locally and around the world. A few selected recent examples include work with faculty the Odyssey Program and the First-Wave Hip-Hop Theatre Program, internships, assisting, and paid opportunities for research in immersive Theatre, design for video games, as well as with professional local theatres and scholarly conferences.

Study Abroad

The UW Theatre in London (<https://studyabroad.wisc.edu/program/?programId=330283>) program offers students an opportunity to be immersed in Britain's rich tradition of theatre-making. Students engage in class discussions and readings about British theatre, and experience the

culture, practice, methods, and results firsthand by attending a variety of productions abroad.

Career Advising and Internships

The School of Education Career Center (<https://careercenter.education.wisc.edu/>) has a designated advisor for art students who can provide connections with hourly campus employment, internships, and career options after graduation.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1514) page.

THEATRE AND DRAMA: ACTING

REQUIREMENTS

REQUIREMENTS

Theatre and Drama majors with a primary interest in acting may audition for the Acting Option. This highly structured program of study offers students a deeper practical knowledge and experience of the skills required to pursue professional work as an actor and/or advanced studies in theatre. These students are highly mentored and will benefit from personalized performance reviews with the acting faculty at the end of each semester.

Admission is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis and be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students in the Acting Option are expected to audition for University Theatre (UT) productions to gain experience and support a robust UT season. Actors are encouraged to participate in these faculty-led projects if cast, however students may indicate if they are unable to be cast in a given production for excused academic, personal/family health, and/or financial reasons.

This named option will be formally documented on the student's official transcript. The option coursework listed here is one component of the BS Theatre and Drama (<http://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/#requirementstext>) degree requirements.

Complete a minimum of 45 credits to include the following:

Code	Title	Credits
Core		
THEATRE/ENGL 120	Introduction to Theatre and Dramatic Literature	3
THEATRE 140	Voice 1: Effective Communication	3

THEATRE 240	Intermediate Voice Training	3
THEATRE 150	Acting I: Introduction to Acting	3
THEATRE 250	Fundamentals of Acting	3
THEATRE 350	Acting Realism	3
THEATRE 262	Backstage Practicum	1
THEATRE 631	Theories of Acting	3
THEATRE 367	Script Analysis	3
THEATRE 342	Fundamentals of Movement for the Stage	3

Choose four of the following: 12

THEATRE 351	Fundamentals of Asian Stage Discipline	
THEATRE 357	Introduction to Theatre for Cultural and Social Awareness	
THEATRE 440	Musical Performance for the Actor	
THEATRE 541	Acting Shakespeare	
THEATRE 352	Auditioning for Stage and Screen	
THEATRE 368	Fundamentals of Directing	
THEATRE 451	Acting for the Camera	
THEATRE 501	The Business of Acting	

Choose one of the following: 3

THEATRE 130	Fundamentals of Theatrical Design	
THEATRE 160	Technical Theatre Fundamentals	
THEATRE 234	Collaborative Problem Solving	
THEATRE 260	Producing Theatre	
THEATRE 364	Makeup for the Theatre	

Choose two of the following: 2

THEATRE 220	Scenic Studio Practicum	
THEATRE 221	Costume Studio Practicum	
THEATRE 222	Lighting & Sound Studio Practicum	
THEATRE 360	Performance in Practice	

If needed, additional Theatre courses to meet minimum of 45 credits

Total Credits 45

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Theatre and Drama Major: Acting Option

Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Admission to the Acting Option is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis, and be

enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students who qualify for the Acting Option are expected to audition for University Theatre productions and play as cast.

Total Credits 120

¹ THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature is a requirement of the Theatre and Drama major: Acting Option. The 4-credit option also satisfies the General Education Communication Part B requirement.

THEATRE, CERTIFICATE

The Certificate in Theatre may be completed by any University of Wisconsin-Madison undergraduate student who is not a declared Theatre major. Theatre is a collaborative art form with many varied disciplines and talents working together to create a unified piece of art.

This certificate program offers students the ability to develop knowledge and skills in the theatre discipline. The requirements are designed to be flexible enough for a student to pursue an individual area of interest (for example, in acting, in technical theatre, in costume design, or in stage management) or a combination. This flexible program allows students to shape an individualized plan on study in the certificate with an advisor, to support and/or complement studies in their major or field of study.

HOW TO GET IN

HOW TO GET IN

All current UW-Madison undergraduates are eligible to complete the certificate, with the exception of students completing the Theatre and Drama major.

To declare the certificate, students must meet with the theatre and drama academic advisor to discuss focus paths and to complete the theatre certificate declaration form.

REQUIREMENTS

REQUIREMENTS

The Certificate in Theatre requires a minimum of 16 credits, with at least 8 credits taken in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

Code	Title	Credits
Choose two Foundational courses:		6
THEATRE 100	Experiencing Theatre (THEATRE 100 is a variable Credit Course (2 or 3 credits). If taken for 2 credits, an additional credit must be added from listed certificate courses to meet 16-credit certificate requirement.)	
THEATRE/ ENGL 120	Introduction to Theatre and Dramatic Literature	
THEATRE 130	Fundamentals of Theatrical Design	
THEATRE 140	Voice I: Effective Communication	
THEATRE 150	Acting I: Introduction to Acting	
THEATRE 160	Technical Theatre Fundamentals	
Choose one Intermediate course:		3
THEATRE 219	Undergraduate Topics in Theatre and Drama	
THEATRE 234	Collaborative Problem Solving	
THEATRE 240	Intermediate Voice Training	
THEATRE 250	Fundamentals of Acting	
THEATRE 260	Producing Theatre	
THEATRE 266	Fundamentals of Stage Lighting Technology	
THEATRE 270	Fundamentals of Stagecraft	
Choose one Hands-On/Practicum course:¹		1-3
Students may request to take similar courses in other departments to fulfill this requirement.		
THEATRE 262	Backstage Practicum	
THEATRE 360	Performance in Practice	
THEATRE 361	Backstage Laboratory II	
Choose two Focus-Specific courses:		6
THEATRE 327	History of Costume for the Stage	
THEATRE 329	Introduction to African-American Performance	
THEATRE 328	Material Culture for Performance Design

THEATRE 619	Special Topics in Theatre and Drama	
THEATRE 631	Theories of Acting	
Total Credits		16

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate basic proficiency in one or more areas of theatre study.
2. Demonstrate understanding of basic theatre concepts and methodology.

SCHOOL OF HUMAN ECOLOGY

The School of Human Ecology at UW-Madison is a place where faculty and advisors work closely with students to prepare them for careers that improve the quality of people's lives. Our majors are Community and Organizational Development; Consumer Behavior and Marketplace Studies; Design, Innovation, and Society; Human Development and Family Studies; Interior Architecture; Personal Finance; and Textiles and Fashion Design. Each program provides a solid curriculum of practical skills that lead students to exciting professions, a better understanding of people and our world, and a bachelor of science undergraduate degree.

Human Ecology is located in Nancy Nicholas Hall, a beautiful and recently renovated building that provides first-class, cutting-edge classrooms and studio spaces. Within these walls we connect students to their passions,

helping them discover exciting careers and opportunities to make a meaningful impact on individuals, families, and communities. Faculty, students, and staff are dedicated to providing students with solid and meaningful education through coursework, internships, travel, student organizations, community involvement, research, and scholarship.

Learn more about Human Ecology and its majors at humanecology.wisc.edu (<https://humanecology.wisc.edu/>).

ENTERING THE SCHOOL

ENTERING THE SCHOOL APPLYING TO UW-MADISON

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in a Human Ecology major on their UW-Madison application will be admitted to the Human Ecology program or pre-program of choice upon admittance to the university. In addition, students may indicate interest in a Human Ecology major when registering for Student Orientation, Advising, and Registration (SOAR).

VISITING CAMPUS AND HUMAN ECOLOGY

Human Ecology holds monthly visit events for prospective students and their families and guests.

View and register (<https://www.admissions.wisc.edu/visitbucky/events.php?etypeid=22>) for an upcoming visit event.

If you are unable to attend one of these dates, please contact the Human Ecology Advising and Career Center at 608-262-2608 or advising@sohe.wisc.edu to schedule an appointment.

CURRENT UW-MADISON STUDENTS

Students interested in the Human Ecology majors should refer to the program's "How to Get In" page or the Apply to Human Ecology (<https://advising.humanecology.wisc.edu/academics/apply/>) page for more information.

REENTERING STUDENTS

Students previously enrolled at the university who have not attended for a semester or more must complete a reentry application as outlined by the UW-Madison Office of Admissions and Recruitment (<http://www.admissions.wisc.edu>). Students who were enrolled in a School of Human Ecology program before their absence from UW-Madison will be readmitted to that program, provided they were in good academic standing when they left (i.e., not on probation, strict probation, or dropped by the university). Reentry applicants who were dropped by the university are asked to submit supplemental application materials. Instructions for the supplemental application are sent after the student has submitted the online reentry application.

Students who were previously enrolled in another UW-Madison school or college will not be admitted directly to a School of Human Ecology program. They must apply for reentry to the university with another school or college – usually the school or college in which they were previously enrolled. Once readmitted to the university, students may apply to the desired Human Ecology program through the application process for that program. For information about the school's programs and application processes, see Applying to Human Ecology as an On-Campus Student (<http://admissions.wisc.edu/apply-as-a-reentry-student/>).

It is recommended that students who have been readmitted to a School of Human Ecology program schedule an appointment with an academic advisor in the Advising & Career Center (<https://advising.humanecology.wisc.edu/>).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

ACADEMIC ACTIONS

GRADING AND INCOMPLETES

The School of Human Ecology follows UW-Madison letter grade and notation standards. Please see Valid Grades (<https://registrar.wisc.edu/valid-grades/>) for notation definitions and standard regulations.

Incompletes. A grade of Incomplete may be assigned to a student who, because of illness or another unusual and substantiated cause beyond their control, is unable to complete the coursework. To be eligible for an Incomplete grade, the student must:

- be earning a passing grade to-date in the course,
- and have a limited amount of work to complete by the end of the term.

For a short summary of the policy, see the Enrollment and Records - Incompletes section of Guide (p. 38).

Students are ineligible for the dean's list for the semester in which a grade of Incomplete is submitted.

ACADEMIC STANDING, PROBATION, AND DROPPED STATUS

- **Good Academic Standing.** Students are in good academic standing if their cumulative and most recent term (Fall, Spring, Summer) GPA are at least a 2.000. First-term students without a UW-Madison GPA are also in Good Academic Standing.
- **Probation.** A student with no previous action who earns a term GPA between 1.000 and 1.999 will be placed on probation.
- **Continued Probation.** A student on probation (or continued probation) whose cumulative GPA remains below 2.000 and whose term GPA is 2.000 or above will be placed on continued probation.
- **Strict Probation.** A student previously in Good Academic Standing with a current term GPA below 1.000 will be placed on strict probation. A student on probation whose term GPA is between 1.500 and 1.999 will be placed on strict probation.
- **Continued Strict Probation.** A student on strict probation or continued strict probation whose cumulative GPA remains below 2.000 but whose term GPA is 2.000 or above will be placed on continued strict probation.
- **Academic Dropped.** A student on probation whose term GPA is less than 1.500 or on strict probation whose term GPA is less than 2.000 will be dropped from the University for one year.

READMISSION AFTER ACADEMIC DROPPED STATUS

The purpose of an academic drop is to prevent students from further damaging their academic record and incurring tuition costs while not successfully earning credits. The expectation is for students to spend the year away from campus to reflect on and resolve the issues that resulted in their poor academic performance. Students who were academically dropped from the university are eligible for readmission consideration after one full calendar year. Students dropped for a third time will not be readmitted.

To reenter the university after one full year, a student must apply for readmission to the School of Human Ecology and for reentry to the university. A student is never guaranteed readmission after being dropped. Readmission is most likely if the student has addressed the issues that contributed to being dropped from the university and has a plan and resources to support a successful return.

To apply for readmission to Human Ecology and the University of Wisconsin-Madison after being dropped, a student must follow these steps:

1. Complete the Human Ecology Readmission Request Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/).

To ensure readmission consideration, follow these deadlines:

- Summer or Fall Term – Apply by March 1
- Spring Term – Apply by October 1

2. Complete the university reentry application (<https://admissions.wisc.edu/apply-as-a-reentry-student/>).

3. Schedule an appointment with a Human Ecology Academic Dean by calling 608-262-2608 or emailing deansservices@sohe.wisc.edu.

- Be prepared to discuss your activities while away from UW, including steps taken to address the circumstances that led to being dropped from UW and transcripts from other institutions that you may have attended while away.
- Use this advising appointment to: (re)establish a relationship with your academic advisor, review your enrollment plan for the term you intend to return, and review your degree completion plan.

When making readmission decisions and assigning any readmission stipulations, the Human Ecology academic dean will consider evidence of a student's readiness to re-enroll at UW, academic activity at other institutions while dropped, and enrollment plans if readmitted. Students who are granted permission for re-entry after academic drop will be readmitted on strict academic probation to the School of Human Ecology.

DECLARING MULTIPLE MAJORS

School of Human Ecology undergraduates can declare an additional undergraduate major in the College of Letters & Science and a limited number of majors in the School of Education and College of Agriculture and Life Sciences. This option is most often referred to as a "Double major" and is not a second or dual degree (see below). The additional major is noted on the student's transcript if all requirements of the second major are completed. School of Human Ecology students must plan to finish all additional academic programs concurrently with their Human Ecology degree.

EARNING DUAL DEGREES

Completing two degrees simultaneously (also referred to as Dual Degrees) is when a student completes two bachelor's degree programs and will receive two undergraduate degrees, as opposed to multiple transcript majors. Students interested in completing dual degrees should consult with their academic advisor early in their academic career and complete a four-year plan to understand the feasibility of completing requirements for both degrees. Earning a dual degree requires students to:

1. Earn an additional 30 credits specific to the second major,
2. Earn a minimum of 150 degree credits to graduate,
3. Complete all curriculum requirements for both degrees,
4. Ensure the two programs are substantially different from each other,
5. Complete coursework in both programs simultaneously,
6. Complete the Dual Degree Policy Request form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/) and secure Academic Dean's permission.

Students are responsible for any rules or regulations that could potentially impose additional financial responsibilities as a result of pursuing dual degrees. Please note that some campus schools and colleges do not permit dual degrees for their students, thus preventing Human Ecology degree combinations with degrees in these schools and colleges.

Before the start of the senior year in residence, students must meet the criteria for admission to both programs, secure academic dean and department approval to enroll, and the two degree programs' curriculum must differ substantially. Human Ecology curriculum does not substantially differ enough to allow dual degrees with two Human Ecology majors.

The two degrees must be earned from two different schools/colleges at UW–Madison. Admission into the other school/college shall be based on the admission criteria for that school/college. Written admission/Dean's approval to the other school/college must be obtained before pursuing Human Ecology approval.

RESIDENCY REQUIREMENT

School of Human Ecology undergraduate students must earn a minimum of 30-degree credits in residence at UW–Madison. Credits are considered "in residence" if they are earned through UW–Madison course work, including courses taken on a UW–Madison administered study abroad program. Retroactive credits, transfer credits, AP credits, and credits granted by examination are not considered "in residence."

CREDIT OVERLOAD

A full-time student credit load is 12 to 18 credits, with the most typical credit load being 15 to 16 credits per fall/spring semester. A student wishing to enroll in more than 18 credits in a fall/spring semester or 12 credits in the summer must complete a Credit Overload Request (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/) to obtain dean's approval. The maximum credits allowed with Dean's approval for fall/spring term is 21 credits, and summer term is 13 credits. These credit limits are inclusive of credits enrolled in at another institution, which may result in credits not being accepted at UW–Madison if approval is not secured in advance. Students should speak with their academic advisor prior to requesting a credit overload to ensure the overload is necessary and understand the workload and financial implications. Credit overload approvals will be based on prior academic performance and necessity.

PASS/FAIL

The privilege of electing courses on a pass/fail basis is extended to undergraduate students in the school. Students who are in good academic standing (not on probation) may elect one course on a pass/fail basis per term. The summer sessions collectively count as one term. **A course taken pass/fail must be an elective.** A student may **not** take a required course or a prerequisite to a required course under this privilege. A maximum of 16 pass/fail credits may be counted toward a BS degree from the School of Human Ecology. **Courses taken pass/fail will count toward degree credits but will be excluded in the computation of grade point average and honors.**

Requests to take a course under the pass/fail privilege are initiated through the Course Change Request in the MyUW (<http://my.wisc.edu>) Student Center and must be elected by the noted enrollment Dates and Deadlines (<https://registrar.wisc.edu/dates/>). After making the request in MyUW, the request is routed to the Advising & Career Center for approval or further communication.

The registrar will convert final grades submitted by the instructor, who is not informed of the student's pass/fail status, to an S (pass) for grades A, AB, B, BC, or C, and to a U (fail) for a grade of D or F. The grade is excluded from the GPA.

CONCURRENT ENROLLMENT

Human Ecology students may enroll in a class(es) at another institution while being enrolled at UW–Madison without special permission but must follow the credit limit and credit overload policies (<https://registrar.wisc.edu/credit-load-and-ranges/>). Students should consult with their academic advisor, Course Equivalency Service (<https://registrar.wisc.edu/course-equivalency-service/>), or Transferology (<https://kb.wisc.edu/registrar/page.php?id=122108>) to confirm the course will transfer to UW–Madison prior to enrolling. Upon completion of the non-UW–Madison courses, students must submit their transcripts with final grades to the Admissions Office (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) for evaluation.

• Concurrent Enrollment at UW Extension/UW

Independent Learning: Students concurrently enrolling in UW Extension/UW Independent Learning (https://uwex.wisconsin.edu/aas/uwex_landing_pages/aas-il-paid_search/?lead_source=PaidSearchGoogle&kw=uw%20independent%20learning&_bt=618815558309&_bm=e&gclid=CjwKCAiAnZCdBhBmEiwA8nD_uPEHB9qU50pgIRWR4DvbmHCYbBFy5qwSxoCvaAQAvD_BwE) courses should see more information Independent Learning Tuition Waiver (<https://advising.humanecology.wisc.edu/academic-dean-services/#:~:text=UW%2DExtension%20Independent%20Learning%20Tuition%20Waiver>).

• **Studying Abroad and Concurrent Enrollment:** Students studying abroad through International Academic Programs (IAP) (<https://studyabroad.wisc.edu/>) must contact IAP regarding restrictions and tuition rules to concurrent enrollment and the UW Independent Learning waiver. See more information (<https://advising.humanecology.wisc.edu/academics/frequently-asked-questions/#studying-abroad>) or speak with an academic advisor.

APPEALS

LATE DROP, WITHDRAWAL, OR MEDICAL WITHDRAWAL PETITIONS

Human Ecology students are expected to follow the Dates and Deadlines (<https://registrar.wisc.edu/dates/>) for adding and dropping courses outlined by the Office of the Registrar. Students considering a change in their enrollment are expected to speak with their academic advisor and take action before published university deadlines.

- **Late Drop** - A course drop is when a student decides to discontinue in one (or more) course(s) while continuing with at least one course in a term. A late drop appeal is when a student is requesting an exception to the drop deadline. It is only in rare non-academic circumstances outside of a student's control that exceptions to the drop deadline policy (<https://registrar.wisc.edu/dates/>) are approved, and never simply to avoid a poor grade. Students who face significant, unforeseeable circumstances outside of their control that negatively impact their ability to successfully complete a course(s) should schedule an appointment with their academic advisor or Human Ecology Deans' Services (deansservices@sohe.wisc.edu) and complete the Late Add/Drop Petition form (https://uwmadison.col.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/).
- **Withdrawal (non-medical)** - Students who do not wish to continue taking classes and drop all of their courses in a term are withdrawing/canceling their enrollment and must follow the Steps to Withdraw (<https://kb.wisc.edu/registrar/25601/>). Students may choose to withdraw for a variety of personal or financial reasons without dean's permission when processed by the university deadline. Students may be required to complete the Reentry Form (<https://admissions.wisc.edu/apply-as-a-reentry-student/>) to enroll in a future semester.
- **Medical Withdrawal** - Students who wish to withdraw as a result of a serious or unexpected physical or mental health condition, a serious or unexpected physical or mental health condition of an immediate family member who requires the student's care, or the death of an immediate family member that completely precludes the student from actively participating as a student can request a partial tuition refund according to the Medical Withdrawal process (<https://registrar.wisc.edu/medical-withdrawal/>). Students requesting a medical withdrawal and refund must complete the Steps to Withdraw (<https://kb.wisc.edu/registrar/25601/>), meet with Human Ecology Deans' Services (deansservices@sohe.wisc.edu), and provide required documentation within one year of the semester enrolled. Approval will be granted on a case-by-case basis.

A Drop (DR) or Withdrawal (W) transcript notation after the enrollment deadline is a national standard across universities and colleges to indicate when a student makes an enrollment change after the start of the semester, which has no negative impact on a student's academic record. Because students may drop courses for a wide variety of reasons, future employers and graduate/professional programs do not scrutinize or make any assumptions about the merits of a "DR" or "W." It is simply a notation that students have made an enrollment change after the deadline.

APPEAL OF A HUMAN ECOLOGY GRADE

A student who believes a grade received in a Human Ecology course was an error or not consistent with guidelines outlined in the syllabus or campus standards has the right to appeal the grade.

1. The student must first discuss the grade dispute with the instructor of the course.
2. If the student and instructor cannot come to an agreement, the student will provide a formal written grade appeal to the Human Ecology Deans' Services. The written appeal must include the class, instructor, grade received, date and conclusion of the meeting with the instructor, the specific reason(s) for appealing the grade, and telephone number where they can be reached for follow-up. Send to Human Ecology Deans' Services. (deansservices@sohe.wisc.edu)
3. The department chair will perform the due diligence necessary (including, but not limited to, meeting with the instructor and student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
4. Should the student wish to further appeal the decision, the Human Ecology Undergraduate Program Council will perform the due diligence necessary (which may include, but is not limited to, meeting with the instructor and department chair and/or student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
5. The Human Ecology Undergraduate Program Council appeals decision is final.

APPEAL OF DENIAL OF ADMISSION TO A HUMAN ECOLOGY UNDERGRADUATE MAJOR/CERTIFICATE

This appeal process is for students who were denied admission to a Human Ecology undergraduate program. Students who feel they have a compelling reason to appeal their admissions decision may do so in writing by the deadline indicated in the admission letter. Appeals must satisfy one of the following factors to be considered:

- The student believes a factual error was self-reported on the application or made by the admissions committee during review of the application.
- There is new information regarding academic or non-academic extenuating circumstances.

While admission appeals satisfying the above conditions will be reviewed by the admissions committee, it is important to understand that simply meeting these criteria in no way guarantees acceptance into the program.

Filing an Appeal

1. The student will file a letter of program admission appeal to Human Ecology Dean's Services (deansservices@sohe.wisc.edu), stating the facts of the situation based on one or both of the conditions listed above and include the student's telephone number where they can be reached for follow-up. Any additional documentation or supporting evidence should be titled and attached to the letter of appeal. The deadline by which a student must file an appeal will be written in the denial letter for the undergraduate program in question. For a situation where grades/credits were not posted to a student's record prior to applying to the program, the student record must be complete with grades and credits on the official UW-Madison record by the time the appeal is filed to be considered.
2. The Academic Dean will forward the appeal to the appropriate departmental admissions committee. The admissions committee will perform the due diligence necessary to assess the merits of the new information for the appeal.
3. The Academic Dean will communicate the decision to both the student and departmental admissions committee in writing.

- 4. Should the student wish to further appeal the decision in the case of extenuating circumstances, the Academic Dean will forward the appeal to the Human Ecology Undergraduate Program Council (UPC). The UPC will perform the due diligence necessary (which may include, but not limited to, meeting with the admissions committee, department chair, and/or student) to assess the merits of the appeal.
- 5. The Academic Dean will communicate the decision to the student and the admissions committee in writing. The Human Ecology Undergraduate Program Council's (UPC) decision is final.

APPEAL OF BEING DROPPED FROM UW-MADISON FOR ONE YEAR

Human Ecology students who are dropped from the university based on academic performance are permitted to appeal for readmission consideration immediately after being dropped. Students with documentation of special circumstances outside their control, evidence that these circumstances have changed, and realistic strategies in place to improve their academic performance have the greatest likelihood of a successful appeal. Students who do not appeal before the deadline must wait at least one full calendar year before being eligible for readmission consideration.

Filing An Appeal

- 1. Students wishing to appeal their dropped status must meet with Human Ecology Dean's Services (deansservices@sohe.wisc.edu) and complete the Dropped Status Appeal Form (https://uwmadison.qualtrics.com/SE/?SID=SV_6Lv7QPa3P6Ay7mR) prior to the deadline outlined in their dropped status notification. An Academic Dean will explore with the student the purpose of the drop process and circumstances that led to the drop and provide guidance on writing the appeal.
- 2. The Dean will submit the appeal, academic transcript, and additional background information to the Human Ecology Undergraduate Program Council (UPC) for review. UPC will make a decision regarding the appeal before the beginning of the next term.
- 3. The Academic Dean will communicate the appeal decision to the student in writing. If the appeal is granted, the student will be readmitted to the university on strict probation. If the appeal is not granted, the dropped status is upheld, all courses will be administratively dropped, and the student is eligible for readmission consideration **one full calendar year after the dropped date**.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

HUMAN ECOLOGY GENERAL EDUCATION REQUIREMENTS

Seven undergraduate majors are available in the school. There are common general education requirements for all Human Ecology majors, but these are reflected differently in each program. Please review each major requirement page for the specific general education courses needed for the degree.

Code	Title	Credits
Literature		3
Select 3 credits designated Literature breadth		
Humanities ¹		6
Social Science		9
Select 9 credits designated Social Science breadth		
Physical, Biological, and Natural Science		9
Select 9 credits designated Physical, Biological, and/or Natural Science breadth		
Human Ecology Breadth		
Select 3 credits in the School of Human Ecology taken outside the major not otherwise included in the program requirements		3
Major Requirements and Electives		
Minimum total for graduation: 120 credits with no fewer than 25 credits taken within the School of Human Ecology.		

¹ Human Ecology will accept as humanities credit courses from designated humanities breadth courses as well as the following areas or departments: art, art history, classics, English, foreign languages (including beginning languages), cultural history, history of science, integrated liberal studies, literature (including comparative literature), music (including applied music), philosophy, communication arts, studies of cultures—e.g., African studies, East Asian studies, Hebrew and Semitic studies, South Asian studies, Scandinavian studies.

REQUIREMENTS FOR GRADUATION

The bachelor of science (BS) degrees granted by the School of Human Ecology require a minimum total of 120 credits, with a minimum of 25 credits in the school. To remain in good academic standing, students must maintain a minimum GPA of 2.0. A 2.0 cumulative GPA must be earned by the end of the senior year in order to be recommended for a BS degree.

The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all Human Ecology major requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program(s), specialization(s), study abroad, or honors program(s). It is the student's responsibility to prepare for graduation and to ensure that all graduation requirements have been met. Students expecting to graduate and/or participate in commencement exercises should declare their intent through the My UW Student Center in accordance with campus deadlines.

RESOURCES

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

SCHOLARSHIPS AND SUPPORT RESOURCES

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://>

basicneeds.students.wisc.edu), Office of Student Assistance and Support (<https://osas.wisc.edu>), and University Health Services (<https://www.uhs.wisc.edu>).

HONORS

HONORS

DEAN'S HONOR LIST

At the end of each semester, the names of all students with a grade point average of 3.75 or higher in at least 12 graded credits for that semester will be included on the Dean's Honor List. A notation of "Dean's Honor List" will be entered on the student's transcript.

GRADUATION WITH DISTINCTION

"Graduation with Distinction" will appear on the transcripts of students who have earned a cumulative grade point average that places them *within the top 20%* of students graduating that term in their school or college with 60 credits or more at the University of Wisconsin–Madison.

Students *in the top 5%* will receive the designation "Graduation with Highest Distinction." The Office of the Registrar determines whether students have met these criteria. Notations citing graduation distinction will be made on the transcript.

HONORS PROGRAM

Students interested in pursuing a course with honors or a Human Ecology honors program should consult their academic advisor.

CIVIL SOCIETY AND COMMUNITY STUDIES

The Department of Civil Society and Community Studies offers a bachelor of science degree in Community and Organizational Development and a PhD in Human Ecology: Civil Society and Community Research. The Community and Organizational Development major prepares its graduates for careers spanning community and organizational development, nonprofit management, social justice activism, community organizing, social entrepreneurship, corporate social responsibility, higher education, government, social service agencies, and more. It also offers excellent preparation for graduate school in areas such as law, medical and public health advocacy, public policy, human ecology, and more. Academic requirements include specialized emphases in human ecology; general studies in humanities, social sciences, and natural sciences; and coursework focused on community impact and social change processes. Students may also engage in complementary coursework, undergraduate certificates, or additional undergraduate majors.

COMMUNITY AND ORGANIZATIONAL DEVELOPMENT, BS

The Bachelor of Science degree in Community & Organizational Development (<https://humanecology.wisc.edu/academics/undergraduate-majors/community-nonprofit-leadership/>) prepares students to advance positive change through communities and organizations.

Students tackle community, organizational, and societal challenges in collaboration with their peers and real-world partners, clients, and communities. Through project-based learning, applied research, and internship experiences, students learn how to make a positive human-centered impact on communities and society in meaningful and lasting ways.

The Community & Organizational Development degree allows students to tailor their learning and career pathways. Students are prepared for a variety of careers spanning community and organizational development, nonprofit management, executive leadership, social justice activism, community organizing, social entrepreneurship, corporate social responsibility, higher education, government, philanthropy, social service agencies, and more. It also offers excellent preparation for graduate school in areas such as law, medical and public health advocacy, public policy, human ecology, and more.

In addition to the hundreds of community-based organizations in the city of Madison, the Center for Nonprofit Studies (CommNS) (<https://commnsknowledge.wisc.edu/>), housed in the School of Human Ecology, provides students with a hub for community-engaged teaching, research, and outreach focused on advancing the work of the civic and nonprofit sector. Students can participate in innovative non-profit initiatives, network with community and organizational leaders, and attend annual conferences, workshops, and speaker series.

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Students within their first 60 GPA credits at UW-Madison

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.
GPA requirements to get in	<ul style="list-style-type: none">• First-semester students have no GPA requirement to declare.• Non-first-semester students within the first 60 GPA credits: Minimum 2.750 cumulative GPA based on all UW-Madison coursework.

Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

All other UW–Madison students (who do not meet the declaration criteria above)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- (Ecological perspectives on community and society) Articulate and apply an ecological perspective at discrete levels of analysis (individual, group, community, and society).
- (Civic literacy and the public sphere) Assess the major trends in civil society recognizing the influence and interconnectedness across the major sectors of society and exhibit strong capacity for sustained, high impact participation in civic life.
- (Identity, diversity, and social justice) Recognize well-being and social justice as relational and position, applying these principles in community organizing and empowerment.
- (Organizational management and professional development) Demonstrate entry-level knowledge and skills relevant to nonprofit and community organizations and exhibit the practices of a lifelong learner.
- (Research, analysis, and communication) Vet and/or generate high quality data, perform relevant analyses, and share results with target audiences using oral, written, and visual communication techniques.
- (Leadership, ethics, and well-being) Recognize the value of being a reflective, ethical leader who cultivates others' strengths and leadership capabilities, while exhibiting self-care and care for others.

ADVISING & CAREER CENTER**

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising,

academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Account Manager/Account Executive
- Annual Giving Director
- Business Development Representative
- Camp Counselor/Director
- Campaign Executive
- Communications & Development Coordinator
- Customer Engagement Manager
- Event Coordinator
- Project Assistant/Manager

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
INTERNSHIPS**

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and

career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

CONSUMER SCIENCE

The Department of Consumer Science studies interactions among consumers, business, and government in order to advance the well-being of consumers, families, and communities. The department is multi-disciplinary, including study in economics, finance, sociology, psychology, marketing, and public affairs. The Department of Consumer Science offers two undergraduate degree programs, Consumer Behavior & Marketplace Studies and Personal Finance. Both programs focus broadly on the economic well-being of consumers and society. The department also offers MS and PhD degrees in Human Ecology: Consumer Behavior and Family Economics.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

SCHOLARSHIPS AND SUPPORT RESOURCES

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

CONSUMER BEHAVIOR AND MARKETPLACE STUDIES, BS

The Bachelor of Science degree in Consumer Behavior & Marketplace Studies (<https://humanecology.wisc.edu/academics/undergraduate-majors/consumer-behavior-marketplace-studies/>) integrates research and knowledge from sociology, psychology, marketing, public affairs, economics and finance to understand, develop and improve the global customer experience. Students learn to analyze and solve problems from a people-first, and therefore a consumer-first perspective.

Our experienced faculty guide students through an applied and project-based curriculum that prepares them for careers in a variety of diverse and rapidly growing companies around the world. As a Consumer Behavior & Marketplace Studies major, students will learn to apply both creative and analytical skills to better understand and improve the global customer experience from a human-centered approach. Active student learning is accomplished with the support and guidance of faculty, industry experts, and researchers.

Consumer Behavior & Marketplace Studies majors complete a required internship before graduating, allowing them to further pursue their own personal interests and to further develop a strong portfolio of knowledge and experience that will propel them to launch successful careers.

Students in the major benefit from the Kohl's Center for Retailing (<https://badgersinretailing.wisc.edu/>), housed in the School of Human Ecology. The Center offers opportunities for students to network with industry partners, participate in case competitions, and attend trade shows and industry conferences. Additionally, as a National Retail Federation University Member (<https://nrf.com/membership/nrf-university-membership/>) and Fashion Scholarship Fund (<https://www.fashionscholarshipfund.org/about/>) member students gain the skills and resources needed for a life-changing career in a dynamic and growing global retail industry.

Potential career areas could be, and are not limited to:

- Consumer Insights and Analytics
- Merchandise Buying and Planning
- Media and Public Relations
- Product Development
- Brand Management
- Advertising, Marketing and Promotions
- Social Media and Content Development
- Corporate Social Responsibility
- Entrepreneurship
- Consulting

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Students in their first year of enrollment at UW-Madison

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.
GPA requirements to get in	<ul style="list-style-type: none"> • First-semester students have no GPA requirement to declare. • Non-first-semester students within their first year of enrollment at UW-Madison: Minimum 2.750 cumulative GPA based on all UW-Madison coursework.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

All other students (who do not meet the declaration criteria above)

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://go.wisc.edu/sohe-apply (https://go.wisc.edu/sohe-apply/))
Courses required to get in	None.
GPA requirements to get in	None.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.
To apply for a spring start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.
To apply for a summer start	This program does not accept applications to start in the summer.	

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW–Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in Consumer Behavior and Marketplace Studies on their UW–Madison application will be admitted to the major upon admittance to the University. In addition, students may indicate interest in Consumer Behavior and Marketplace Studies when registering for Student Orientation, Advising, and Registration (SOAR).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Professional Development

CNSR SCI 250	Retail Leadership Symposium ¹	1
INTER-HE 202	SoHE Career & Leadership Development	1
INTER-HE 601	Internship	3

Electives

Select electives to bring degree credit total to 120

Total Credits 35-36

¹ CNSR SCI 250 Retail Leadership Symposium may be repeated for up to three credits. Credits in addition to the one required credit will be counted as elective credits.

² Consider the course prerequisites when planning.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This is a sample four-year plan for Consumer Behavior and Marketplace Studies. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

Please note there are several prerequisites required for course sequencing within the major. View prerequisites by clicking on the course links in the plan below. Some examples include:

- Statistics course and Excel proficiency before CNSR SCI 201 Consumer Insights
- Accounting and Excel proficiency before CNSR SCI 564 Retail Financial Analysis
- CNSR SCI 657 Consumer Behavior before CNSR SCI 555 Consumer Design Strategies & Evaluation

ADVISING & CAREER CENTER**

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development

process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Account Executive/Manager
- Buyer
- Brand Manager
- Business Development Representative
- Consultant
- Customer Success Manager
- Inventory Analyst
- Merchant
- Social Media Manager

Other Career Resources

Kohl's Center for Retailing – connects industry partners with students to develop forward-thinking leaders of the future.

NRF University Member – The NRF Foundation provides the skills and resources needed for a life-changing career. As NRF's nonprofit 501(c)(3), they connect people to an industry that's a great place to start and a great place to grow. Together, they help people build better lives and stronger communities.

Fashion Scholarship Fund Member – The Fashion Scholarship Fund awards scholarships to help FSF Member School students succeed in all sectors of the industry including design, merchandising, marketing analytics, and business strategy. The FSF also provides scholars with a wide range of internship and career opportunities, mentorship, networking, professional development, and unprecedented access to the industry's most influential leaders and companies.

WISCONSIN EXPERIENCE**WISCONSIN EXPERIENCE
INTERNSHIPS**

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

CONSUMER FINANCE AND FINANCIAL PLANNING, BS

Admissions to the Consumer Finance and Financial Planning BS were suspended as of spring 2024 and will be discontinued as of summer 2032. If you have any questions, please contact the department (<https://www.online.wisc.edu>).

This program provides an opportunity for students to complete the BS Consumer Finance and Financial Planning degree at a distance. This option is ideal for returning students with some college credits who would like to complete the program in a flexible online format, with no on-campus attendance required. This program is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. Topics include financial counseling, coaching, wealth management, financial product development, financial technology, and consumer behavior. Completion of the program and one additional elective course will make graduates eligible to sit for the Certified Financial Planner® (CFP) exam, which Human Ecology students pass well above the national average.

HOW TO GET IN

Admissions to the Consumer Finance and Financial Planning BS were suspended as of spring 2024 and will be discontinued as of summer 2032. If you have any questions, please contact the department (<https://www.online.wisc.edu>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of consumer financial behavior and the role of income, savings, credit, planning, and benefits.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the [Requirements](#) tab for more information about the curriculum and program plan.

ADVISING AND CAREERS

ADVISING AND CAREERS ACADEMIC ADVISING

Each UW–Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-advisor/>). The AC advisor will support the academic and personal success of each student by partnering with SoHE advisors in the Student Academic Affairs & Career Development Office (SAA) to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience. To find out about other ways UW–

Madison's campus supports online learners, visit the Academic Support Services page. (<https://oss.wisc.edu/support-services/>)

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors (<https://online.wisc.edu/academic-career-advisor/>) help prepare students for life post-graduation through individual and group advising. The Office of Online Student Success (OSS) (<https://oss.wisc.edu/>) also provides a number of career resources (<https://oss.wisc.edu/resumes/>) for online learners.

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

Completion of the BS in Consumer Finance and Financial Planning and one additional elective course will make graduates eligible to sit for the Certified Financial Planner® (CFP) exam.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/?toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

The requirements of this program do not meet Certification/Licensure in the following states:

Not applicable

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS ACADEMIC ADVISING

Each UW-Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-career-coach/>). The AC advisor will support the academic and personal success of each student by partnering with Human Ecology advisors in the Student Academic Affairs & Career Development Office (SAA), to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience. To find out about other ways UW Madison's campus supports their online learners visit the Academic Support Services page. (<https://oss.wisc.edu/support-services/>)

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors (<https://online.wisc.edu/academic-career-advisor/>) help prepare students for life post-graduation through individual and group advising. CONSUMER MARKETPLACE STUDIES, BS

Admissions to the Consumer Marketplace Studies BS have been suspended as of spring 2024 and will be discontinued as of summer 2025. If you have any questions, please contact the department.

Consumer Marketplace Studies provides an opportunity for students to complete their degree at a distance. This option is ideal for returning students with some college credits who would like to complete their undergraduate degree in a flexible online format, with no on-campus attendance required. Program emphasis is on researching, understanding, and improving the global customer experience. Topics include retailing, consumer behavior, and consumer research and analysis. Graduates will be prepared to meet industry demand for employees with strong analytic and decision-making skills, who can redefine the way companies empathize and engage with their customers.

HOW TO GET IN

HOW TO GET IN

Admissions to the Consumer Marketplace Studies BS have been suspended as of spring 2024 and will be discontinued as of summer 2032. If you have any questions, please contact the department.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- General Education
- Breadth–Humanities/Literature/Arts: 6 credits
 - Breadth–Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth–Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF HUMAN ECOLOGY REQUIREMENTS

¹ CNSR SCI 250 Retail Leadership Symposium may be repeated for up to 3 credits. The additional credit(s) will be counted as elective credit.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the [Requirements](#) tab for more information about the curriculum and program plan.

ADVISING AND CAREERS

ADVISING AND CAREERS ACADEMIC ADVISING

Each UW-Madison Online student is assigned an academic and career (AC) advisor (<https://online.wisc.edu/academic-advisor/>). The AC advisor will support the academic and personal success of each student by partnering with Human Ecology advisors in the Student Academic Affairs & Career Development Office (SAA), to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience. To find out about other ways UW Madison's campus supports online learners, visit the Academic Support Services page. (<https://oss.wisc.edu/support-services/>)

CAREER DEVELOPMENT

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors (<https://online.wisc.edu/academic-career-advisor/>) help prepare students for life post-graduation through individual and group advising. The Office of Online Student Success (OSS) (<https://oss.wisc.edu/>) also provides a number of career resources (<https://oss.wisc.edu/resumes/>) for online learners.

PERSONAL FINANCE, BS

The Bachelor of Science degree in Personal Finance (<https://humanecology.wisc.edu/academics/undergraduate-majors/personal-finance/>) is an interdisciplinary program with an emphasis on financial management and the economic well-being of individuals and families. The program offers two options: (1) Personal Finance and (2) Financial Planning.

The Bachelor of Science degree in Personal Finance looks at economics from a human-centered perspective, developing financial experts who can help individuals and families live more financially secure lives. Graduates of the program are prepared to work in personal financial planning, wealth management, and financial policy management.

The Personal Finance option has an emphasis on financial product development, financial technologies, and governing/policy-making agencies that impact individuals and families. The coursework is interdisciplinary with an emphasis on financial management, economic and data analysis, and policy development. The Personal Finance option leads to careers in risk management, financial analysis, investment underwriting, banking, financial coaching, community-based financial education, and national policy trends (for example, the Federal Reserve).

The Financial Planning option is registered with the Certified Financial Planner® Board of Standards (view Financial Planning requirements (<https://guide.wisc.edu/undergraduate/human-ecology/consumer-science/personal-finance-bs/personal-finance-financial-planning-bs/#requirementstext>)). The coursework is interdisciplinary with an emphasis on financial advising and management to promote the economic well-being of individuals and families. The Financial Planning option is the more traditional personal finance program leading to careers in household financial planning, counseling, coaching, wealth management, and investment analysis and operations. Graduates of the Financial Planning option leave fully prepared to sit for the prestigious Certified Financial Planner® exam, which our students pass well above the national average.

Students complete a required internship before graduating, allowing them to pursue their own personal interests and develop a strong portfolio of skills and references that will propel them to launch successful careers.

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Students in their first year of enrollment at UW-Madison

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.

GPA requirements to get in

- First-semester students have no GPA requirement to declare.
- Non-first-semester students within their first year of enrollment at UW-Madison: Minimum 2.750 cumulative GPA based on all UW-Madison coursework.

Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

All other students (who do not meet the declaration criteria above)

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Account Manager/Executive
- Business Development Representative
- Client Service Associate
- Financial Advisor
- Financial Analyst
- Financial Planner
- Relationship Manager
- Wealth Management Advisor
- Wealth Services Associate

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of

Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas,

Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

The requirements of this program do not meet certification/licensure requirements in the following states:
Not applicable

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

DESIGN STUDIES

Design Studies offers multidisciplinary education in design and research of interior design environments, textiles and apparel design, and design as a broader discipline, through participation in formal classroom instruction and ongoing research and scholarly endeavors. Students benefit from a broad-based program and faculty specializing in areas such as design visualization, environment and behavior studies, history of interiors and textiles, interior architecture, material culture, textile and apparel design, and textile science.

Three undergraduate degree majors are offered: Interior Architecture; Textiles and Fashion Design; and Design, Innovation, and Society. The department also offers multiple undergraduate certificates in Design Strategy, Material Cultures Studies, and Textiles and Design. There is also a Human Ecology: Design Studies graduate program, offering both an MFA and PhD degrees.

Student internships in the undergraduate majors augment campus course offerings, providing students with unique learning opportunities in their chosen fields. Design Studies majors have access to many design resources; a computer laboratory equipped to support design work; a digital fabrication lab, textile studios for sewing, weaving, printing, and more; an interior architecture resource room, the Human Ecology Makerspace, the Helen Louise Allen Textile Collection (<https://cdmc.wisc.edu/textiles/helen-louise-allen-textile-collection/>), the Ruth Davis Design Gallery (<https://cdmc.wisc.edu/material-culture/ruth-davis-design-gallery/>), and the Lynn Mecklenburg Textile Gallery (<https://cdmc.wisc.edu/textiles/lynn-mecklenburg-textile-gallery/>). In addition, a strong collaborative environment exists for students and faculty interaction with other departments, institutes, and museums on the campus and other design programs within the state and country.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student’s personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

SCHOLARSHIPS AND SUPPORT RESOURCES

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu>), Office of Student Assistance and Support (<https://osas.wisc.edu>), and University Health Services (<https://www.uhs.wisc.edu>).

DESIGN STRATEGY, CERTIFICATE

Admissions to the Design Strategy Certificate have been suspended as of fall 2024. If you have any questions, please contact the department.

WHAT IS IT ABOUT?

Housed in the School of Human Ecology, this 18-credit certificate in Design Strategy provides undergraduate students from all majors with a hands-on, interdisciplinary approach to problem-solving for strategic change. Through applying Design Thinking techniques and exploring the interconnections between people and built, natural, and financial environments, students will learn to put ideas into action and develop forward-thinking approaches to a variety of issues.

WHAT IS DESIGN STRATEGY?

Design Strategy is a successful approach to problem-solving with a focus on quality of life and sustainable futures. It begins with asking "better" questions as a way to understand the root of the problem and why it is an issue. It is an empathetic, human-centered perspective that uses Design Thinking and draws from historical precedence and current research from a variety of fields to help solve complex and persistent problems.

WHAT WILL STUDENTS GAIN?

Students acquire concrete methodologies that enable them to apply what they have learned in their degree studies in a way that goes beyond the theoretical emphasis of most degree programs. Rather than adding additional expertise and knowledge in a particular field, this certificate gives students ways to apply what they have learned in their majors to real-world problems; in the process, they become confident and creative forward thinkers, who are able to work in interdisciplinary teams.

HOW TO GET IN

HOW TO GET IN

Admissions to the Design Strategy Certificate have been suspended as of fall 2024. If you have any questions, please contact the department.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Foundational Course		3

DS 361	Design-Related International Experience
DS 570	Design and Fashion Event Management
DS 641	Advanced Design Thinking for Transformation
HDFS 592	Research Experience in Human Development and Family Studies
Total Credits	18

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Develop and understand empathy mindsets through the practice of observation, interviewing skills, and other related techniques.
2. Recognize that theories, knowledge, and concepts intrinsic to the practice of design are relevant to informing new approaches to addressing topics that are difficult to formulate using traditional theories.
3. Incorporate methods that rely on team work, communication, and collaborative activity.
4. Examine a wide range of problems confronting society by looking at them in context, in order to uncover their roots, visualize their interconnections, and identify their interdependencies.
5. Become collaborative, divergent thinkers, able to generate and visually communicate multiple ideas.

DESIGN, INNOVATION, AND SOCIETY, BS

The Bachelor of Science degree in Design, Innovation & Society focuses on developing skill sets in design processes to innovate and solve problems in everyday life. Students will explore the interconnectedness between people, technology, culture, and social change to address today’s complex societal issues

Students learn how to leverage the influential role of design through a deeper understanding of social issues, ethical considerations, global perspectives, diverse cultures, sustainability challenges, and value systems. This knowledge is applied to help address complex issues and to envision possibilities for enhancing human life through design.

The program offers three pathways:

- **Design & Technology** pathway examines how innovative technologies enable the ways we communicate, build, and experience the world around us through design
- **Design & Social Change** pathway develops skills to identify opportunities, envision strategies, and create approaches to improve the health, well-being, and sustainability of individuals, communities, and the planet
- **Design & Culture** pathway explores the media, mechanisms, and institutional frameworks for human expression, examining how design influences and is influenced by history, politics, economics, and culture

The program spans diverse design theories, methods, and disciplines. It combines content areas like visual communication, the design process, research methods, and technology, to enable students to collaborate effectively with designers and professionals from various fields.

Graduates gain the skills, tools, methods, and strategies to become future leaders in the expansive field of design.

Required internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>) and collaborative capstone projects provide leadership opportunities, networking, and other career-building experiences.

HOW TO GET IN

HOW TO GET IN CURRENT UW-MADISON STUDENTS Students within their first 60 GPA credits at UW-Madison

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.
GPA requirements to get in	<ul style="list-style-type: none">• First-semester students have no GPA requirement to declare.• Non-first-semester students within the first 60 GPA credits: Minimum 2.750 cumulative GPA based on all UW-Madison coursework.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

All other students (who do not meet the declaration criteria above)

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission.(https://go.wisc.edu/sohe-apply (https://go.wisc.edu/sohe-apply/))
Courses required to get in	None.

GPA requirements to get in None.

Credits required to get in None.

Other Must be in good academic standing with their current school or college.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.
To apply for a spring start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.
To apply for a summer start	This program does not accept applications to start in the summer.	

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Freshmen should declare their intention to pursue Design, Innovation, and Society when they apply for admission to UW-Madison. In addition, students may indicate interest in Design, Innovation, and Society when registering for Student Orientation, Advising, and Registration (SOAR).

ADDITIONAL INFORMATION

Students cannot declare the Certificate in Design Strategy and the Design, Innovation, and Society major.

For transfer students, sequential courses and courses taught only once a year should be taken into account when calculating time toward completion of the degree, as graduation time may be extended.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF HUMAN ECOLOGY REQUIREMENTS

All Design, Innovation, and Society students complete the School of Human Ecology requirements listed below. Then, students complete the Design, Innovation, and Society requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Integrate thorough understanding of the history and theory of relationships between design and human behavior, with a particular emphasis on human ecology perspectives.
2. Demonstrate the intellectual skills for inquiry, creative thinking, and critical analysis in design and its application to local, national, and global challenges.
3. Demonstrate a range of research skills that will allow them to identify, evaluate, and apply design solutions for the betterment of social, political, economic, cultural, and environmental sectors.
4. Practice excellent communication skills, across a range of formats (eg, written, oral, and visual communications) and target audiences (eg, scholarly, professional, community-engaged communications) that will further understanding and application of the role of design in everyday life.

5. Develop professional skills (eg, teamwork both within and across fields, project management and leadership, representation of skills through portfolio production) to apply design research skills to create new knowledge and solve problems in real world settings.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Director of Design and Innovation
- Senior Manager of Innovation
- Art Director
- Web and Digital Interface Designer
- Producers and Director
- Special Effects Artists and Animator

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s)

of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

INTERIOR ARCHITECTURE, BS

The Bachelor of Science degree in Interior Architecture (<https://humanecology.wisc.edu/academics/undergraduate-majors/interior-architecture/>) is a four-year professional program accredited by the Council for Interior Design Accreditation (CIDA). The program develops students' creativity in the design and planning of interior spaces by emphasizing the process and communication of design. Students learn the art of design, drawing from physical and social sciences to understand the interaction of people and their environment, along with the history of

design. Insight into professional practice is enhanced through internship experiences.

Design Studies faculty are leading scholars in design research with design industry experience developing innovative and creative spaces. Students benefit from faculty's expertise, mentoring, and industry connections.

Through classroom learning, hands-on projects, and internships, students develop verbal and visual communication skills while gaining exposure to both residential and commercial interiors. The program has a competitive admissions process that involves two phases.

Coursework includes everything related to the design process and products, including environment-behavior studies, sketching, rendering, computer drafting and design, 3D modeling, art and art history, business, and engineering. Studio spaces, a resource center containing catalogs and samples, plus a digital fabrication lab and computer laboratory provide physical support for the Interior Architecture student experience.

In preparation for graduation, students develop a professional portfolio to demonstrate their expertise and creativity.

HOW TO GET IN

HOW TO GET IN CURRENT UW–MADISON STUDENTS Current UW–Madison students declaring Pre-Interior Architecture

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.
GPA requirements to get in	<ul style="list-style-type: none">• First-semester students have no GPA requirement to declare.• Non-first-semester students within the first 60 GPA credits: Minimum 2.75 minimum cumulative GPA is required for declaring the pre-interior architecture major. Eligible students should meet with an advisor to declare as early in their academic career as possible.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

Pre-Interior Architecture students applying to Interior Architecture

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://go.wisc.edu/sohe-apply (https://go.wisc.edu/sohe-apply/))

Courses required to get in	<ul style="list-style-type: none"> • DS&#160;120 • DS&#160;221 • DS&#160;252 • DS&#160;220 (in-progress) • DS&#160;140 (in-progress)
----------------------------	---

GPA requirements to get in None.

Credits required to get in None.

Other In the case that student interest for spring courses exceeds course capacity, student ranking in fall courses (DS 120, DS 221, and DS 252) and academic performance will be used to determine priority enrollment in the required spring courses. Enrollment in spring courses is not guaranteed and may be limited by permission based on class rankings and academic performance.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	Application opens during the latter half of the spring semester and close in late April.	Decisions will be made once the spring coursework is completed.
To apply for a spring start	This program does not accept applications to start in the spring.	
To apply for a summer start	This program does not accept applications to start in the summer.	

ADDITIONAL INFORMATION

Transfer students may take longer to complete their degree than students entering the program as freshmen, as they too must complete the Courses required to get in, which contain specialized courses that must be taken sequentially.

There are typically 32 available spots each application cycle. This is an industry standard to ensure appropriate student to faculty ratio.

Upon acceptance into the major students must purchase a laptop computer based on minimum hardware specification and software licenses determined by the department and updated regularly. Students also have the option, but are not required, to purchase a laptop computer before acceptance into the program.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Freshmen should declare their intention to pursue Interior Architecture when they apply for admission to UW-Madison. In addition, students may indicate interest in Interior Architecture when registering for Student Orientation, Advising, and Registration (SOAR).

Select a Human Ecology course from CNSR SCI, CSCS, HDFS, or INTER-HE not otherwise included in the program requirements. Design Studies (DS) courses in the area of Textiles & Fashion Design may also be completed.		3
Total Credits		30

INTERIOR ARCHITECTURE REQUIREMENTS

A complete list of requirements is below. Students should follow the curriculum requirements in place at the time they entered the major. This requirement list should be used in combination with a DARS report.

Code	Title	Credits
Phase One: Design Core		
DS 120	Design: Fundamentals I	3
DS 220	Design: Fundamentals II	3
DS 221	Person and Environment Interactions	3
DS 140	Visual Thinking - Form and Space	3
DS 252	Design Leadership Symposium	1
Phase Two: Professional Course Sequence		
Interior Architecture Studio Core		
DS 222	Interior Design I	4
DS 322	Interior Design II	4
DS 622	Interior Design III	4
DS 623	Interior Design IV	4
DS 626	Interior Design V	4
Content Area Courses		
DS 223	Interior Architectural Design	3
DS 224	Interior Materials and Finishes	3
DS 241	Visual Communication I	3
DS 242	Visual Communication II	3
DS 321	Problem-definition: Design Programming	3
DS 421	History of Architecture and Interiors I: Antiquity through 18th Century	3
DS 422	History of Architecture & Interiors II: 19th and 20th Centuries	3
DS 451	Color Theory and Technology	3
DS 549	Environmental Control Systems: Lighting, Acoustics, and Thermal Comfort in Buildings	3
DS 624	Interior Architecture Professional Practice	3
DS 679	Research Methods in Design	3
Professional Development		
INTER-HE 202	SoHE Career & Leadership Development	1
INTER-HE 601	Internship	3
Design Focus ¹		
Select 6 credits in consultation with your Human Ecology academic advisor		6
Electives		
Select electives to meet minimum total of 120 degree credits		
Total Credits		76

¹ Design Focus courses are intended to be an opportunity for students to develop more depth and uniqueness to their course of study. See Design Focus course list below. Please work with your Human Ecology

academic advisor to seek approval for coursework taken outside of Design Studies.

Design Focus course list		
Code	Title	Credits
DS 101	Introduction to Textile Design	3
DS 227	Textile Design: Printing and Dyeing I	3
DS 251	Textile Science	3
DS 252	Design Leadership Symposium (May be taken twice)	1
DS/ANTHRO/ART HIST/HISTORY/LAND ARC 264	Dimensions of Material Culture	4
DS 341	Design Thinking for Transformation	3
DS 361	Design-Related International Experience	1-6
DS 501	Special Topics (offerings vary by semester)	1-3
DS/COMP SCI/ I SY E 518	Wearable Technology	3
DS 521	Environments of Crisis & Design	3
DS 527	Global Artisans	3
DS 561	Textiles: Specifications and End Use Analysis	3
DS/COMP SCI 579	Virtual Reality	3
DS/LAND ARC 639	Culture and Built Environment	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Grounded in the history and theory relevant to the built environment and human behavior.
- 2. Intellectual skills for inquiry, creative thinking, and critical analysis.

- Professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
- Apply the design process to identify and explore complex problems and generate creative solutions that optimize the human experience within the interior environment. This includes the ability to apply research and the principles and theories of Design to their solutions.
- Apply their knowledge of building materials and systems, building construction, and industry specific codes, standards and guidelines in order to enhance the health, safety, welfare and performance of building occupants.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

This is a sample four-year plan for Interior Architecture. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Account Manager
- Architectural Drafter
- Business Development Director
- Design Assistant
- Design Consultant
- Design Engineer
- Interior Designer/Designer
- Interior Design Assistant
- Project Manager

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of

Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

ACCREDITATION

ACCREDITATION

Council for Interior Design Accreditation (<https://accredit-id.org/>)

Accreditation status: Accredited. Next accreditation review: 2030.

MATERIAL CULTURE STUDIES, CERTIFICATE

The certificate in material culture studies has two interrelated goals. First, students will become acquainted with the field of material culture studies and its methodologies. They will learn what kinds of objects are considered in the study of material culture (from small, intimate artifacts of daily life to large cultural landscapes) and how scholars and professionals from different fields and in different contexts enlist material culture in their research and activities. They will gain an appreciation for the information artifacts can provide. They will learn the kinds of questions that can be asked of objects and the kind of information that artifacts can show us. They will become familiar with (and able to distinguish between) descriptive and interpretive components of material culture study and gain an awareness of the variety of methods. Second, students will gain an appreciation for the ways that “things” help us to connect to the world and see it in a new way, and the ways “things” give meaning to our lives and the lives of those around us.

HOW TO GET IN

HOW TO GET IN

All undergraduate students in good academic standing are eligible to apply for the Material Culture Studies Certificate. Connect with an Academic Advisor (<https://advising.humanecology.wisc.edu/>) for application information and the October and February deadlines.

Students considering declaring the Art History Certificate as well as the Material Culture Certificate may complete both but **only one course** may overlap between the two certificates.

REQUIREMENTS

REQUIREMENTS

The Material Culture Studies Certificate requires **13 credits**.

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

Code	Title	Credits
Core		
ART HIST/ANTHRO/DS/HISTORY/LAND ARC 264	Dimensions of Material Culture	4
ART HIST 563	Proseminar in Material Culture	3
Electives		
Select at least two elective courses to reach 13 credit minimum:		6
Total Credits		13

¹ Prerequisite: no prerequisites. The course explores the field of material culture, introducing the range of approaches and topics within it. Faculty, staff, and professionals from different disciplines and fields

are invited to discuss their work and perspective, and discuss current literature.

² The intent of this requirement is to have an intensive small-size seminar to teach the methods used by material culture scholars, a set of tools for analysis, hands-on training and more familiarity with material culture theories, themes and objects. If students are unable to take this course prior to their intended graduation date, they may consult the program director about other courses that fit these same goals.

³ Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

ELECTIVES

- An internship/practicum experience is recommended, but not required.
- Work closely with your certificate advisor and major advisor to ensure that both major and certificate requirements are fulfilled.
- Other traditional disciplinary approaches and content courses may count as electives, but must be approved by the chair of the Material Culture Advisory Committee.

THEATRE 327	History of Costume for the Stage	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Acquisition of skills to describe and analyze objects of multiple types, scales and media that constitute the material world across time and space.
2. Understanding of the complex and multiple ways that objects and people relate in both the past and in the present using trans-disciplinary perspectives.
3. Ability to interpret and otherwise make meaning from objects using methods and theories from multiple disciplines including but not limited to art history, archaeology, anthropology, design, folklore/folklife studies, geography, history, literary studies, landscape history, and science studies.
4. Discernment of the importance of materiality and making in the production and shaping of culture.
5. Fluency in using research resources and tools appropriate for specific kinds of objects.
6. Demonstration of particular skills for object-based research projects, as well as online and in-person exhibitions, using objects and collections to prepare students for careers that include positions in museums, archives, and other professional contexts.
7. Coherent presentation of ideas in multiple media (oral, visual, digital, and written).

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience – from exploring our majors as prospective students to becoming Human Ecology alumni.

ACADEMIC ADVISING

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

*Note for students who are thinking about declaring the material culture certificate as well as the art history certificate: undergraduate students may request permission to complete both the material culture certificate and the art history certificate but **only one course** can overlap between the two certificates. Please consult with the Art History undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions related to the art history certificate.*

CAREER DEVELOPMENT

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

CAREERS: WHAT CAN MATERIAL CULTURE DO FOR YOU? LIFE-PRACTICE AND CAREERS

Interdisciplinary practice is central to material culture analysis. Significant engagement with material culture can have a noteworthy positive effect on students from a wide range of majors in their preparation for future careers. Understanding principles of design, analyzing the cultural meaning of physical objects, and gaining knowledge of varied systems of making, distributing, and using artifacts and consumer goods throughout history are all broadly applicable learning outcomes. The curricula of the 21st century often place extra value on science and technology, to the detriment of the study of the arts and humanities. The Material Culture Program helps integrate these and other disparate spheres into a university education. One undergraduate student summed it thus:

I ended up being able to use what I learned in material culture for my research in human computer interaction and design. I think having a background in material culture strengthened my skills as a user experience designer (which is what I will be doing at Intel after graduation).

Erica Lewis, 2016
Undergraduate certificate student
Engineering/Materials Design

Other material culture certificate holders have gone on to careers in museums, galleries, historic sites, historic preservation, digital media, design practice, universities, and business. Another former student comments:

Having worked in museums large and small, in education, exhibition design and development, collections, and interpretation—I draw on my background in Material Culture on a daily basis. As a historian, the practice of reading and contextualizing objects as primary sources is essential. But even more than an academic approach, the empathy one develops when learning to understand the world through the stuff of daily life is invaluable to the interdisciplinary collaboration of today's workplace.

Anna Altschwager, 2004
Creative Director
Thinkwell Group

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these

opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

TEXTILES AND DESIGN, CERTIFICATE

The certificate in textiles and design allows students from any major to gain a fundamental understanding of the creative and innovative application of textiles and visual design. By nature, textiles are interdisciplinary, weaving together art, commerce, history, culture, technology, material culture, and science. Students will develop artistic and technical skills valuable for both pursuing a professional career in the textile industry and nurturing personal creative interests.

The certificate in textiles and design is an opportunity for students from a variety of disciplines to engage in an in-depth exploration of textiles. Studio courses cultivate a rich understanding of the physical and creative interaction of materials, techniques, and concepts: pattern, networks, woven structures, flexible materials, the interaction of multiples, tactility, color, and imagery. Students have the opportunity to be creative in design studios, using both low-tech handmade techniques and complex high-tech computer-generated systems.

The courses offered in this certificate are broad and varied, allowing students to personalize course groupings to best enhance their major and area of interest.

HOW TO GET IN

HOW TO GET IN

All undergraduate are eligible to apply, except students pursuing textiles and fashion design major. Connect with an Academic Advisor (<https://advising.humanecology.wisc.edu/>) for application information.

TEXTILES AND FASHION DESIGN, BS

The Bachelor of Science degree in Textiles & Fashion Design (<https://humanecology.wisc.edu/academics/undergraduate-majors/textiles-fashion-design/>) is a unique program that combines experimentation with materials and techniques with a grounding in history, science, and contemporary design. The heart of the major lies in the hands-on studio courses where students learn to weave, dye, print, construct, pattern, illustrate, design, and innovate. This program nurtures students to become leaders in their chosen fields through responsible, resourceful, and research-driven approaches to design.

Going beyond technique, students are encouraged to intuitively make, analyze, and revise, leading to discovery and creative problem-solving. Special topics focus on environmental, economic, and cultural sustainability, as well as technology and entrepreneurship.

Coursework is enhanced by visiting lecturers, special projects with industry partners, and the on-site Helen Louise Allen Textile Collection. Upper-level students in the major are given the opportunity to professionally present their work to public audiences in an annual student showcase. Through capstone and thesis experiences in the final year, students are given time and mentoring to create and present their own unique body of work.

Our award-winning students are highly creative and superb craftspeople engaged in addressing real-world problems and offering sustainable solutions. Textile & Fashion Design students realize their creative visions in ways that are socially, culturally, ethically, and environmentally sensitive.

The Textiles & Fashion Design program highlights craft technique as a pathway to creative practice and prepares students for exciting and creative careers in industry, design, and art. While studies can focus on textiles or fashion, students are encouraged to explore both areas. The program emphasizes interdisciplinary partnerships and encourages "learning by doing" in studios, outreach projects, and sustainable practices. Through capstone and thesis experiences in the final year, students are given time and mentoring to create and present their own unique body of work.

OPPORTUNITY WITH THE FASHION INSTITUTE OF TECHNOLOGY

Students looking for additional industry experience can apply to the Fashion Institute of Technology (<http://www.fitnyc.edu/>) (FIT) in New York City for their senior year. This experience provides students with industry-specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Footwear & Accessories Design, Communication Design Foundation, Advertising and Marketing Communications, Fashion Business Management, Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a Bachelor of Science degree from the University of Wisconsin–Madison in Textiles & Fashion Design with a named option in FIT. A named option is a formally

documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (AAS) degree from FIT. Students attending FIT who are considered Wisconsin non-residents continue to pay out-of-state tuition, even if they reside in the state of New York.

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Students within their first 60 GPA credits at UW-Madison

Requirements	Details
How to get in	No application required. All students who meet the requirements listed below are able to declare. For information on how to declare, see: https://go.wisc.edu/sohe-declare (https://go.wisc.edu/sohe-declare/).
Courses required to get in	None.
GPA requirements to get in	<ul style="list-style-type: none"> First-semester students have no GPA requirement to declare. Non-first-semester students within the first 60 GPA credits: Minimum 2.750 cumulative GPA based on all UW-Madison coursework.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

All other students (who do not meet the declaration criteria above)

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://go.wisc.edu/sohe-apply (https://go.wisc.edu/sohe-apply/))
Courses required to get in	None.
GPA requirements to get in	None.
Credits required to get in	None.
Other	Must be in good academic standing with their current school or college.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.

To apply for a spring start	The fifth Friday of the term.	Students will be notified about decisions approximately one month after the application deadline.
To apply for a summer start	This program does not accept applications to start in the summer.	

Fashion Institute of Technology

Students intending to complete their final year of study at the Fashion Institute of Technology (FIT) must complete an additional application. Only students with a 3.0 or higher GPA in December of their third year in the program are eligible to apply for admission to FIT.

PROSPECTIVE UW-MADISON STUDENTS

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Students who indicate interest in Textiles and Fashion Design on their UW-Madison application will be admitted to the major upon admittance to the University. In addition, students may indicate interest in Textiles and Fashion Design when registering for Student Orientation, Advising, and Registration (SOAR).

ADDITIONAL INFORMATION

For transfer students, sequential courses and courses taught only once a year should be taken into account when calculating time toward completion of the degree, as graduation time may be extended.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF HUMAN ECOLOGY REQUIREMENTS

All Textiles and Fashion Design students complete the School of Human Ecology requirements listed below. Then, students complete the Textiles and Fashion Design requirements OR the Textiles and Fashion Design-FIT requirements.

Code	Title	Credits
Arts and Humanities		
Literature		3
Humanities		6
Social Science		
Select 9 credits from Social Science		9
Physical, Biological and Natural Science		
Select 9 credits from Physical, Biological and Natural Science		9
Human Ecology Breadth		
Select a Human Ecology course from CNSR SCI, CSCS, HDFS, or INTER-HE not otherwise included in the program requirements.		3
Total Credits		30

TEXTILES AND FASHION DESIGN REQUIREMENTS

A complete list of requirements is below. Students should follow the curriculum requirements in place at the time they entered the major. This requirement list should be used in combination with a DARS report.

Code	Title	Credits
Design Core		
DS 101	Introduction to Textile Design	3
DS 120	Design: Fundamentals I	3

· TEXTILES AND FASHION DESIGN: FIT (FASHION INSTITUTE OF TECHNOLOGY) (P. 1761)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Have grounding in the history and theory relevant to the human ecological perspective.
2. Have intellectual skills for inquiry, creative thinking, and critical analysis.
3. Have professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Textiles and Fashion Design students will have the ability to move beyond technique, taking creative risks to develop conceptually cohesive work through advanced knowledge of materials, processes, and an understanding of design principles.
5. Textiles and Fashion Design students will have the ability to participate in professional discussions and critique that are informed by foundational knowledge of fashion and/or textile history, theory, and science.

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Alterations Specialist
- Assistant Designer
- Associate Merchandise Manager
- Associate Print & Pattern Designer
- Costume Designer
- Custom Apparel Specialist
- Designer
- Editorial Specialist
- Fabric Designer

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

TEXTILES AND FASHION DESIGN: FIT (FASHION INSTITUTE OF TECHNOLOGY)

For those leaning toward an industry career, the Textiles and Fashion Design program gives students the option to apply to spend their senior year at Fashion Institute of Technology (<http://www.fitnyc.edu/>) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry-specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Footwear & Accessories Design, Communication Design Foundation, Advertising and Marketing Communications, Fashion Business Management, Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a bachelor of science (BS) degree from the University of Wisconsin-Madison in Textiles and Fashion Design with a named option in FIT. A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (AAS) degree from FIT. Students attending FIT who are considered Wisconsin non-residents continue to pay out-of-state tuition, even if they reside in the state of New York.

HUMAN DEVELOPMENT AND FAMILY STUDIES

The Department of Human Development and Family Studies (HDFS) serves undergraduate and graduate students by offering a bachelor of science in Human Development and Family Studies and a PhD in Human Ecology: Human Development and Family Studies. Students and faculty in HDFS are dedicated to improving the quality of life for children, adolescents, and adults by discovering, integrating, applying, and disseminating knowledge about lifespan human development, relationships, families, and communities, all in their larger social contexts. The application of human ecological and interdisciplinary perspectives to solve societal problems and strengthen the well-being of children, adults, and families is a distinctive feature of the department.

Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu>), Office of Student Assistance and Support (<https://osas.wisc.edu>), and University Health Services (<https://www.uhs.wisc.edu>).

HUMAN DEVELOPMENT AND FAMILY STUDIES, BS

The Bachelor of Science degree in Human Development & Family Studies (<https://humanecology.wisc.edu/academics/undergraduate-majors/human-development-family-studies/>) offers an in-depth education about human development and well-being across the lifespan, with a focus on relational health, including infant mental health, parenting, couples, and other family and social relationships. Students take specialized courses in policymaking, research methods, prevention and intervention, and ethnic/cultural diversity in families.

In addition to high-impact learning experiences and coursework, all students engage in a professional semester-long internship in a community or research setting related to their major and career goals. These settings include mental health organizations, early childhood education centers, healthcare agencies, legislative offices, university advising units, research labs, human resources, criminal justice systems, child and family life education programs, and other community-based organizations.

Human Development & Family Studies offers excellent preparation for students interested in graduate/professional school in areas such as clinical healthcare and public health; counseling and mental health; early childhood, K-12 and higher education; family law; social work and case management; occupational and physical therapy; program evaluation and applied research; and the child life profession.

Human Development & Family Studies students may choose to pursue these additional credentials while completing their degree:

- Certified Family Life Educator credential, provided by the National Council on Family Relations (<https://www.ncfr.org/cfle-certification/become-certified/>), recognized in the U.S. and Canada for Family Life Education professions.
- Infant/Early Childhood Mental Health Endorsement (<https://humanecology.wisc.edu/academics/undergraduate-majors/human-development-family-studies/infant-mental-health-imh-endorsement/>), provided by the Wisconsin Alliance for Infant Mental Health (<https://wiaimh.org/endorsement/>), which promotes the social-emotional development of children from newborn to 6 years within the family and community context.

For more information on these credentials, please contact the Advising & Career Center (<https://advising.humanecology.wisc.edu/>).

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Apply a developmental lens to describe lifespan human development in context, with emphasis on individual, family and community diversity
2. Apply a relational lens to understand interpersonal and internal family processes (e.g., relational health, parent-child relationships, couple relationships, family health and well-being)
3. Use systems thinking to describe how individuals and families affect and are affected by their social and ecological contexts (e.g., communities, institutions, policies, cultures), with an emphasis on building a more just and equitable society
4. Critically evaluate and ethically apply interdisciplinary social science research to promote health and wellbeing across the lifespan through assessment, prevention, intervention, research, and/or program evaluation
5. Work effectively in a professional setting with individuals from diverse backgrounds, including the exploration of HDFS-relevant professional

pathways and the development of broadly applicable professional skills essential to the discipline (e.g., cultural awareness, empathy, self-reflection)

ADVISING AND CAREERS

ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

Common job titles include, but are not limited to:

- Account Manager
- Behavioral Technician
- Clinical Research Coordinator
- Early Childhood/Preschool Teacher
- Patient Care Coordinator
- Research Assistant
- Special Education Teacher
- Talent Acquisition Manager
- Teaching Assistant

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s)

of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW–Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

HUMAN DEVELOPMENT AND FAMILY STUDIES: CHILD DEVELOPMENT, BS

The Child Development option within the Human Development & Family Studies (HDFS) major offers a focused study of human development and relationships during childhood. It includes foundational HDFS courses as well as specialized advanced courses and applied experiences that are focused on children's development and relationships.

The Child Development option within the HDFS major prepares students for a variety of careers related to the health and well-being of children and

their families, including healthcare, mental health, family support services, public policy, and family law. The curriculum of the Child Development track also meets the requirements for pursuing professional credentials, such as the Infant Mental Health Endorsement®, an internationally recognized credential for professionals who work with infants, toddlers, and their families, as well as the Certified Family Life Education (CFLE) national credential provided by the National Council on Family Relations (NCFR) and recognized in the U.S. and Canada for Family Life Education professions.

Students can take advantage of learning opportunities and paid internships offered by centers and initiatives in the School of Human Ecology (SoHE), including the Child Development Lab (<https://childdevelopmentlab.wisc.edu/>) (CDL), an onsite laboratory preschool supporting applied learning, research, and class observations, and the PELICAN Center (<https://humanecology.wisc.edu/pelican-center/>), an interdisciplinary coalition of students and professionals working to support children and families through early literacy, child health advocacy, and early relational health. Students who pursue the Child Development track are given priority for CDL and PELICAN Center internships, including those with partners like the Early Childhood Health Consultation and Reach Out and Read Wisconsin.

REQUIREMENTS

REQUIREMENTS

Core requirements for the named option are below. Students should follow the curriculum requirements in place at the time they entered the major. This requirement list should be used in combination with a DARS report.

Code	Title	Credits
Foundation		
<i>Human Development in Context</i>		
HDFS 174	Introduction into Cultural Diversity of Families	3
Select one of the following:		3
HDFS 262	Development of the Young Child	
ED PSYCH 320	Human Development in Infancy and Childhood	
PSYCH 460	Child Development	
HDFS 263	Development from Adolescence to Old Age	3
HDFS 516	Stress and Resilience in Families Across the Lifespan	3
HDFS 345	Ecology of Child Health and Well-Being	3
<i>Research Foundations</i>		
Select one of the following:		3-4
HDFS 425	Research Methods in Human Development and Family Studies	
PSYCH 225	Research Methods

HUMAN ECOLOGY - SCHOOL-WIDE

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Individual Major, BS (p. 1768)
- School of Human Ecology Honors (p. 1770)

INDIVIDUAL MAJOR, BS

The individual major is a program for undergraduate students who want to fulfill a specific academic goal that is not attainable through a combination of existing majors in one or more departments. The major must meet a course of study that involves at least two departments and be targeted at a specific problem or academic interest identified by the student. A student proposal must be submitted and approved by the Human Ecology Undergraduate Program Council. Students are encouraged to begin working with faculty and advisors in the Advising & Career Center by the end of the sophomore year. Thirty credits must be earned in residence after the term in which the proposal is approved. The major will be guided by a committee of at least three faculty members (with no more than two faculty members from one department).

Individual majors are intended to create a unique program of study that otherwise does not exist on this campus individually or in a combination of majors and certificate programs. Students should carefully explore all University of Wisconsin-Madison majors and certificate programs before pursuing an individual major. A proposal that essentially parallels an existing Human Ecology or campus major will not be approved.

Graduates of the individual major earn a bachelor of science in human ecology. The major will match the approved proposal title, which must have a human ecology focus.

HOW TO GET IN

HOW TO GET IN

CURRENT UW-MADISON STUDENTS

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. Please contact the Human Ecology Advising & Career Center for the complete individual major application instructions.
Courses required to get in	None.
GPA requirements to get in	3.50 minimum cumulative GPA.
Credits required to get in	24 credits minimum.

Other Must be in good academic standing with their current school or college.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

INDIVIDUAL MAJOR REQUIREMENTS

The student will work with the faculty committee to develop the individual major proposal and select all required courses, the majority of which must be completed in Human Ecology. If the Individual Major is approved by the Human Ecology Undergraduate Program Council, the student will complete all required courses as outlined with the faculty committee.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

There is no standard four-year plan for the Individual Major.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students interested in pursuing an individual major should first meet with a Human Ecology academic advisor to ensure program eligibility and to discuss their area of interest and rationale. Appointments should be made by contacting the Human Ecology Advising & Career Center (<https://advising.humanecology.wisc.edu/>) at 608-262-2608.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE INTERNSHIPS

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For Human Ecology majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising & Career Center (https://go.wisc.edu/acc_office/).

For some Human Ecology majors, additional course prerequisites may be required. For more information, visit Human Ecology Internships (<https://advising.humanecology.wisc.edu/careers/internship-requirement/>).

STUDENT ORGANIZATIONS

To see our active list of Human Ecology Student Orgs and for more information about joining, please visit Human Ecology Student Organizations (<https://advising.humanecology.wisc.edu/studentlife/join-a-student-organization/>).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (<https://win.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS SCHOLARSHIPS

The School of Human Ecology (SoHE) awards many merit and need-based scholarships each year. Students can learn more about these opportunities on the Human Ecology scholarships webpage (<https://humanecology.wisc.edu/academics/scholarships/>). To be eligible for these awards, scholarship recipients must be registered as full-time Human Ecology students. For further questions on the scholarship application, please contact the School of Human Ecology Scholarship Coordinator at scholarships@sohe.wisc.edu.

SUPPORT RESOURCES

Human Ecology students experiencing personal, academic, or financial challenges should contact SoHE Academic Deans Services (<https://advising.humanecology.wisc.edu/academic-dean-services/>). Additional campus resources include the Financial Aid Basic Needs website (<https://basicneeds.students.wisc.edu/>), Office of Student Assistance and Support (<https://osas.wisc.edu/>), and University Health Services (<https://www.uhs.wisc.edu/>).

SCHOOL OF HUMAN ECOLOGY HONORS

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campus wide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a Human Ecology honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

HOW TO GET IN

HOW TO GET IN

Students interested in pursuing the School of Human Ecology Honors Programs should first meet with an academic advisor in the Advising & Career Center. Admission decisions are made by a faculty committee in the appropriate SoHE department and will take into consideration the eligibility criteria listed below and the strength of the written application.

- *Freshmen.* Admission as a newly enrolled freshman requires a 3.3 grade point average or high school class ranking in the top 10% and a composite ACT score of 27 or a combined SAT score of 1100.
- *Continuing Students.* Admission of currently enrolled students requires a minimum 3.3 grade point average. Students, both transfer and those currently enrolled in SoHE, may apply for entrance to the Honors Program in any semester of their undergraduate career after the 3.3 minimum grade point average has been established.

REQUIREMENTS

REQUIREMENTS

In addition to the School of Human Ecology degree requirements, honors program students must:

- Complete a total of at least 24 honors credits, with at least 12 of the honors credits obtained in Human Ecology coursework.
- Maintain a minimum grade point average of 3.3 in all UW-Madison courses to continue in the honors program.
- Receive a grade of B or above in a course to receive honors credit for that course.
- Complete an honors thesis for at least three, but no more than six, senior honors thesis credits. Students are strongly recommended to consider registering for two semesters of senior honors thesis credits for adequate time to plan and complete the senior honors thesis. Senior honors thesis credits may count toward the 12 credits minimum of Human Ecology honors credits.

ADVISING AND CAREERS

ADVISING AND CAREERS ADVISING & CAREER CENTER

The Advising & Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience—from exploring our majors as prospective students to becoming Human Ecology alumni.

Academic Advising

Each Human Ecology student is assigned to an academic advisor in the Advising & Career Center. Human Ecology academic advisors support academic and personal success by partnering with current and prospective Human Ecology students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with Human Ecology academic advisor, visit Academic Advising in Human Ecology (<https://advising.humanecology.wisc.edu/academics/scheduling/>).

Career Development

Each Human Ecology student is assigned to a career advisor in the Advising & Career Center. Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. Human Ecology career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a Human Ecology career advisor, visit Career Development in Human Ecology (<https://advising.humanecology.wisc.edu/careers/scheduling/>).

SCHOOL OF NURSING

The School of Nursing (<https://nursing.wisc.edu/>), established in 1924, is the leading nursing research institution in Wisconsin and a crucial part of the state's health care system.

The school offers a full array of degree programs; the bachelor of science in nursing (BSN), the doctor of nursing practice (DNP), and the doctor of philosophy in nursing (PhD), along with several graduate-level certificate programs.

Undergraduate (BSN) programs include:

- Traditional BSN: a four year program
- Accelerated BSN: a 12-month program for second-degree candidates
- RN to BSN: for registered nurses who hold an associate's degree in nursing and wish to earn the baccalaureate degree.

Additionally, options exist for honors study in the major, as well as joint programs whereby students can earn the master of public health along with the BSN or transition directly to the PhD program via the Early Entry PhD Option.

Student life pairs the educational and social resources of a large, world-class university with a supportive environment at the school. Students receive comprehensive support services related to advising, program planning, clinical placements, career services, financial aid, and post-graduation credentialing.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center, and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; long-term care facilities; schools; and public health agencies. The university's location in Wisconsin's capital offers additional opportunities in state government and policy making.

On campus, Signe Skott Cooper Hall, the home of the School of Nursing's, has state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff, and the communities and populations we serve.

The school's mission is to develop nurses leaders, innovators, and advocates for the profession and society through research, education, practice, policy, and outreach.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Nursing, BSN (p. 1778)
- Nursing, BSN (Accelerated Program) (p. 1783)
- Nursing, BSN (Collaborative Program) (p. 1789)

ENTERING THE SCHOOL

ENTERING THE SCHOOL ADMISSION TO UW-MADISON

All prospective UW-Madison nursing students must apply through the central Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>).

Pre-Nursing Freshmen

Students who indicate interest in the nursing major on their UW-Madison application will be admitted to the School of Nursing as pre-nursing (PRN) students. In addition, students may indicate interest in the nursing major when registering for Student Orientation, Advising, and Registration (SOAR). The School of Nursing is the academic home for pre-nursing students, providing orientation, academic advising, academic support, etc., while students complete nursing prerequisite courses and general education requirements in preparation to apply to the nursing major. Most pre-nursing students apply to the nursing major midway through their sophomore year to enter the two-year Traditional BSN program as juniors.

Pre-Nursing Transfers

Students may transfer to UW-Madison as pre-nursing students. As with pre-nursing freshmen, transfer students have an academic home in the School of Nursing as they work to complete prerequisites and general education requirements in preparation to apply to the two-year Traditional BSN program.

Second-degree Candidates

Students seeking to earn a second degree in nursing can apply directly to either the Traditional BSN program or the Accelerated BSN program upon completing necessary admission requirements (see details below). Second-degree candidates must be admitted directly into the nursing program; they cannot enter UW-Madison as pre-nursing students.

ADMISSION TO THE NURSING PROGRAM

Traditional BSN

As students complete the requirements to be eligible to apply to the nursing program, they apply to the two-year Traditional BSN program. To be eligible to apply, students must complete the necessary prerequisite courses and have the minimum 2.75 cumulative and prerequisite GPAs; complete details on the Traditional BSN admission requirements and application process can be found on the Traditional BSN admission page (p. 1778) of this *Guide*.

Accelerated BSN for Second-Degree Candidates

Second-degree candidates can apply for the Accelerated BSN program. This is a 12-month intensive baccalaureate program that offers the quickest route to licensure as a registered nurse (RN) for students who have already completed a bachelor's degree or graduate degree in a non-nursing discipline. Students must complete nursing prerequisite courses and the university General Education Requirements, and have the minimum GPAs, to be eligible to apply. Complete details on the accelerated BSN admission requirements and application process can be found on the Accelerated BSN admission page (p. 1783) of this *Guide*.

RN to BSN (BSN@Home)

Registered nurses who have an associate's degree or diploma in nursing can apply to enter the BSN@Home program to earn their bachelor's degree in nursing (BSN). There are GPA minimums and course

requirements necessary for admission eligibility. These details are included on the BSN@Home admission page (p. 1789) of this *Guide*.

CURRENT UW-MADISON STUDENTS

Students with at least a 2.75 cumulative and nursing prerequisite GPA may transfer into the School of Nursing as pre-nursing (PRN) students. Students who are not in the School of Nursing may also apply for the Traditional BSN program without being pre-nursing students. Transfer requests (i.e., classification changes) must be made before the twelfth week of the semester in order to be applied to that semester. Requests made after the twelfth week will take effect at the start of the following semester. For more information and to request a classification change to PRN, students should contact the nursing Office of Academic Affairs at 608-263-5202 or academic.affairs@nursing.wisc.edu.

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

The students, faculty, administration, and staff of the School of Nursing are part of the University of Wisconsin–Madison's academic community, and as such, are subject to the policies, rules, and regulations of the university. In addition, the school and its respective programs may, as deemed necessary, develop their own policies and procedures to augment those of the university. Following are the specific School of Nursing policies and regulations that expand upon or differ from the policies of the university as a whole.

ACADEMIC STATUS

Academic Actions (Warning, Probation, Drop)

Every student (pre-nursing and nursing) is expected to maintain at least a 2.5 GPA on all work carried, whether passed or not, in each semester or summer session. Students who maintain this average are considered in **good academic standing**. Failure to earn this minimum GPA will result in the academic action of **warning, probation, or dropped** (academically dismissed). Students must be in good academic standing in order to be eligible for graduation.

If not on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = warning
2. Earns a GPA in a semester or summer session of less than 1.75 = probation

If on warning and:

1. Earns a GPA in a semester or summer session of 1.75–2.49 = probation
2. Earns a GPA in a semester or summer session of less than 1.75 = dropped from the program

If on probation and:

1. Earns a GPA in a semester or summer session of 2.5 or above but cumulative GPA remains under 2.5 = continued probation
2. Earns a GPA in a semester or summer session of less than 2.5 or a nursing cumulative GPA below 2.5 = dropped from the program

In addition to the academic actions detailed above, nursing (NUR) students are placed on probation if they:

1. Earn a grade of F or NC in any nursing course, and/or
2. Earn a nursing cumulative GPA below 2.5

Any student on academic action will automatically be cleared of action status when the semester GPA is 2.5 or above and the cumulative GPA is 2.5 or above; and if NUR or NCP (i.e., BSN@Home) classification, the nursing cumulative GPA is at least 2.5 or above.

Dean's Honor List

The purpose of the Dean's Honor List is to recognize superior academic achievement of undergraduate students. Students must achieve a minimum GPA of 3.75 on a semester load of not fewer than 12 credits in order to be placed on the Dean's Honor List. A notation of *Dean's Honor List* will appear on the student's grade report and transcript. Students who earn a semester GPA of 3.25–3.74 on 12 or more credits will receive a congratulatory statement on their end-of-semester grade report form.

English as a Second Language

All nursing students must be proficient in English to provide safe patient care and to be successful academically. Students facing challenges in these areas may be referred by self-identification, a faculty member, or advisor to support services. Although limited English proficiency in itself is not a reason for dismissal, it can interfere with a student's ability to complete course requirements, leading to failure to progress or meet program requirements.

Good Academic Standing

To be in good academic standing, students must maintain:

- a cumulative GPA of 2.5 or above, and
- a cumulative GPA of 2.5 or above on all nursing courses completed, and
- a GPA of 2.5 or above in the semester just completed

Graduating with Distinction

Graduation with Distinction will be noted on the transcript of students who earned 60 or more credits at UW–Madison and a GPA that places them in the top 20 percent of those graduating from the School of Nursing that term.

Satisfactory Academic Progress

The time required to complete the program depends on the sequence of courses, plan of study, and placement availability in nursing courses. Students may complete the program in four years; however, additional semesters or summer sessions may be needed to fulfill requirements. If requirements for the degree have not been completed within five years after admission to the nursing major, the student's academic record will be reviewed by the Office of Academic Affairs to establish additional requirements, if appropriate.

PROGRESSION REQUIREMENTS

Students must successfully complete all courses for each term before proceeding to the next term. Successful course completion in the School of Nursing requires students to earn a grade of C or Credit/CR (in the clinical course that are offered on a Credit/No Credit basis) in each required nursing (NURSING#) course. Any student who earns a grade below C or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program. Because nursing courses are not offered every semester, a student who does not successfully complete one or more courses during a term will fall off standard progression and will complete a modified program plan with an extended time to degree.

STUDENT APPEALS, PETITIONS, AND GRIEVANCES PROCEDURES

Section One: Appeals

Appeals are limited to requests to continue in the curriculum after being dropped from the program and/or course grade appeals.

Drop Appeals

Any undergraduate or graduate student who feels they should not have been dropped from the program has the right to file an appeal. The appeals procedure is available for students to provide additional information regarding their circumstances which have contributed to their dropped status. The appeal procedure is described below. Throughout the appeal process, the student (hereby referred to as appellant) may be accompanied by a support person.

Course Grade Appeals

A student who believes a grade received in a Nursing course was an error or not consistent with guidelines outlined in the syllabus or campus standards has the right to appeal the grade.

The student should first speak with the course faculty member in an effort to resolve the issue informally. This must be done within 10 business days of the grade posted to the student's record. During this informal process both student and faculty may consult with the Associate or Assistant Deans for Academic Affairs to seek resolution of the issue.

If the student remains dissatisfied with the grade, the student has the option to initiate the formal appeal procedure. To do this, the student (hereby referred to as appellant) must submit the appeal, as outlined below.

Filing Appeal

1. The student must submit a petition for special consideration form to the Assistant Dean for Academic Affairs within 10 business days of notification of academic status or grade posting. The appeal must include:
 - a. Precise grounds on which the appeal is based.
 - b. Circumstances associated with the need to appeal.
 - c. Arguments supporting the appeal.
 - d. Description of proposed remedial actions to be taken to improve the student's academic performance.
 - e. The appellant may also submit letters of support from persons knowledgeable about the appellant's current and/or past academic work and/or other matters related to the appellant's academic performance. Any such letters must be submitted to the Assistant Dean via email by the same deadline.
2. Within 15 business days after receiving the appeal, the Assistant Dean for Academic Affairs shall arrange for a committee meeting. The committee may request additional information from the appellant and/or request them to appear before the committee. The appellant may bring a support person to the appeal meeting and must notify the Assistant Dean for Academic Affairs at least three business days prior to the meeting. The appellant's chosen support person is limited to providing advice and support to the appellant.
3. Within 60 calendar days after the committee receives the appeal from the Assistant Dean for Academic Affairs, the committee shall send a written report of the committee's recommendations to the Assistant Dean for Academic Affairs.
4. The Assistant Dean for Academic Affairs will consider the committee's recommendation and issue a decision on the appeal. The decision will

be communicated by email to the student within 10 business days after the receipt of the committee's recommendation.

5. If the appeal is granted, the Assistant Dean for Academic Affairs will discuss with the appellant any stipulations (binding) and recommendations (non-binding) for continuation in the program.
6. If a student chooses to appeal the decision, the appeal will be directed to the Associate Dean for Academic Affairs. The student must submit a written appeal, by email, to the Associate Dean within 10 business days upon being sent the decision from the Assistant Dean for Academic Affairs. The written document must include specific justifications regarding the grounds of the appeal, which are limited to:
 - a. School policies were incorrectly applied;
 - b. Decision is contrary to state or federal law;
 - c. Proper appeal procedures were not followed; or
 - d. Unfounded, arbitrary, or irrelevant assumptions of fact regarding the appellant's performance were made by the Appeals Committee. Appellant must also identify the specific aspects of the decision that they believe meet the criteria cited as a basis for appeal.

The Assistant Dean for Academic Affairs will provide the Associate Dean for Academic Affairs with a copy of the initial grievance, the committee's recommendation, and the Assistant Dean for Academic Affairs's decision. No new information relevant to the grievance may be introduced to or considered by the Associate Dean for Academic Affairs. The Associate Dean for Academic Affairs shall notify the student and the committee of the decision in writing within 30 business days. The Associate Dean's decision is final.

Section Two: Petitions

If a student in the School of Nursing wishes to request an exception to a School of Nursing academic policy or regulation they should first consult their academic advisor. Then, the student must formally submit their request using the Petition for Special Consideration (https://uwmadison.co1.qualtrics.com/jfe/form/SV_07Y6YZUOYXJnQ2O/) form. Exception requests could be related to academics (i.e. dropping a course or withdrawing after the deadline etc), clinicals/compliance (i.e. waiver for specific compliance requirement), or admission to one of the School of Nursing's academic programs.

Exceptions to established policies, regulations, and/or program requirements should be rare and will be considered on an individual case by case basis. They will be reviewed by the School of Nursing's Academic Affairs office.

Section Three: Grievances

The following School of Nursing Student Grievance Policy and associated procedures are designed for use in response to individual student grievances regarding faculty or staff in the School of Nursing.

Any individual student who feels they have been treated unfairly by a School of Nursing faculty or staff member has the right to file a grievance and receive a timely response addressing their concerns. Any student, undergraduate or graduate, may use these grievance procedures, except student employees whose complaints are covered under other campus policies. The grievance procedure is available to resolve student concerns regarding inequitable treatment that have not been satisfactorily resolved through the informal resolution process or where the student believes that informal resolution would not be productive. The grievance procedure is described below. Throughout the grievance process, the student may be accompanied by a support person. The use of this grievance procedure

shall not prevent the student from seeking redress through another administrative or legal process.

For grievances regarding discrimination based on protected bases (i.e., race, color, national origin, sex, disability, age, etc.), contact the Office of Compliance (<https://compliance.wisc.edu/eo-complaint/>).

For grievances or concerns regarding sexual harassment or sexual violence (including sexual assault, dating/domestic violence, stalking and sexual exploitation), contact the Sexual Misconduct Resource and Response Program within the Office of Compliance (<https://compliance.wisc.edu/titleix/>).

For grievances that involve the behavior of a student, contact the Office of Student Conduct and Community Standards in the Dean of Students Office at <https://conduct.students.wisc.edu/>.

For grievances about, or directed at, faculty or staff in the School of Nursing, students should follow these steps:

Informal Resolution

Any student in the School of Nursing who believes they have been treated inequitably is encouraged to resolve the matter informally. The student should first talk with the person or group at whom the grievance is directed in an attempt to resolve the issue informally. The student may contact the Associate Dean for Academic Affairs for assistance in resolving the matter informally. If students are unable to resolve concerns directly or without additional support, please see step two.

Formal Grievance Procedure

1. Any student in the School of Nursing who has attempted to informally resolve a grievance but has been unsuccessful, may submit a formal grievance to the Associate Dean for Academic Affairs.
2. The student must submit a written grievance by email to the Associate Dean for Academic Affairs within 20 business days of the alleged unfair treatment. To the fullest extent possible, a formal written grievance needs to contain a clear and concise statement of the issue(s) involved as well as the relief sought.
3. Within 30 business days after receiving the grievance, the Associate Dean for Academic Affairs shall arrange for a committee meeting. The committee may request a written response from the person or group at whom the grievance is directed, may ask for additional information from any or all parties involved, may request that the parties involved appear before the committee, and/or may take other steps in attempting to resolve the grievance.
4. Within 60 calendar days after the committee receives the grievance from the Associate Dean for Academic Affairs, the committee shall send a written report of the committee's recommendations to the Associate Dean for Academic Affairs.
5. The Associate Dean for Academic Affairs will consider the committee's recommendation and issue a decision on the grievance. The decision will be communicated by email to the student within 10 business days after the receipt of the committee's recommendation.
6. If a student chooses to appeal the decision, the appeal will be directed to the Dean of the School of Nursing. The student must submit a written appeal, by email, to the Dean within 10 business days upon being sent the decision from the Associate Dean for Academic Affairs. The written document must include specific justifications regarding the grounds of the appeal. The Associate Dean for Academic Affairs will provide the Dean with a copy of the initial grievance, the committee's recommendation, and the Associate Dean for Academic Affairs' decision. No new information relevant to the grievance may be introduced to or considered by the Dean. The Dean shall notify

the student and the committee of the decision in writing within 30 business days. The Dean's decision is final.

CLINICAL/EXPERIENTIAL LEARNING COURSES

All nursing students are required to complete credit hours in the clinical setting under the supervision of a nursing professional. In the School of Nursing, the term *experiential learning* is used to describe the clinical course experience. These clinical experiences support the mission of the School of Nursing, integrating practice and coursework, to provide a comprehensive nursing education. There are some policies specific to experiential learning courses:

Compliance Requirements

The School of Nursing is committed to ensuring all nursing students are compliant with national and state guidelines for personnel providing nursing care, as well as additional/specific requirements mandated by the school's clinical affiliates as set forth in the clinical affiliation agreements. Therefore all nursing students are required to be in full adherence to the school's compliance program while enrolled in the nursing program. The school's compliance program includes immunizations, trainings, and a background check. Students will be held accountable for complying with the clinical eligibility requirements prior to entering the program and throughout their program of study. All students are required to keep their compliance documents up to date as an essential part of their professional responsibility for patient safety. Review the Nursing Student Compliance Program (<https://students.nursing.wisc.edu/clinicals-compliance/compliance/>) for complete details.

Clinical Placements

Students are assigned to clinical placement sites based on the faculty's selection of clinical sites specific to the learning objectives of the course, site characteristics, and availability. Students need to be prepared to travel up to 90 miles from the School of Nursing and have varied schedules including evenings, nights and weekends. Clinical shifts may be 4-12 hours long. The School of Nursing secures clinical placements for all students who are eligible. Students are not asked to nor allowed to arrange their own clinical placements.

Clinical Hour Completion Within the Term/Rotation

Experiential learning/clinical work required for School of Nursing courses must be completed during the term or session of enrollment. These official terms and dates are when the faculty have effort allocated to course instruction and also when our clinical partners have agreed to engage with students in clinical rotations. Per the university's [Academic Calendar](https://secfac.wisc.edu/academic-calendar/) (<https://secfac.wisc.edu/academic-calendar/>), there are three terms each academic year: fall, spring, and summer. Each term has an official date instruction begins and last class day. In addition, some clinical courses are broken down into shorter rotations within a term, typically an eight-week session. Clinical work and clinical hours must be completed between these term/session/rotation dates. It is not an option to start clinical work prior to the first day of instruction or to complete clinical work after the last day. Exceptions may be made in the case of extenuating circumstances or if a student is assigned an Incomplete grade for the course. Any requests for an exception to this policy should be directed to the course instructor who will review the request with the Director of Clinical Practica to determine its appropriateness and feasibility.

Transportation

The School of Nursing recognizes that students need educational experiences beyond those available in hospitals in Madison, Wisconsin. In answer to this educational need, and in order to secure enough clinical sites for all students, the school places its students in a variety of

venues in and beyond Madison. This includes ambulatory sites, clinics, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, etc. This gives our students comprehensive exposure to a broad range of patients, illness, and care. Nursing students are responsible for arranging their own transportation to and from their clinical sites. First-year clinicals are accessible by public transportation from Signe Skott Cooper Hall and other points in Madison. Second-year clinicals require travel to and from an agency, as well as to and from homes, schools, and other sites. Locales may be up to 90 miles from Madison. Therefore, second-year nursing students are required to have (1) a valid driver's license, and (2) individual access to a car. Students are responsible for all transportation costs incurred, including gas and parking fees. Students with extenuating circumstances that have an impact on their clinical transportation options (e.g., driving/medical restrictions) should use the Petition for Special Consideration (<https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf>) to request an accommodation or exception to the transportation policy. The petition must be submitted on/by March 1 for clinical placements during the next fall term and on/by November 1 for the next spring term placements. These deadlines are firm, as a petition must be reviewed in advance of clinical assignments. There is no guarantee the school will be able to honor such requests/conditions, and exceptions are granted in very rare circumstances.

Uniforms

Nursing students are required to purchase the approved School of Nursing uniform. The uniform consists of a white top and navy pants. The white top, embroidered with the School of Nursing logo, is available in two styles and the pants will be available in three styles. Lab coats embroidered with the school logo are also required and are worn when students are on their clinical units doing clinical preparation and during most community clinical experiences. In addition to the uniform requirements, there are also professional appearance guidelines (<https://students.nursing.wisc.edu/clinical-compliance/clinical-information/>) for students.

Unsafe Clinical Performance

A student who demonstrates unsafe nursing practice that jeopardizes the client's or family's physical or emotional welfare may be dismissed at any time from the clinical area. Unsafe clinical practice is defined as any behavior determined by faculty or a preceptor to be actually or potentially detrimental to the client or to the healthcare agency. Unsafe clinical practice can include behaviors related to physical or mental health problems; use of alcohol, drugs, or chemicals; lack of preparation for clinical; or deficits in problem-solving skills. Reports of unsafe clinical performance will be routed through the course professor and/or the course coordinator to the Associate Dean for Academic Affairs who will work with the faculty and student to determine the appropriate outcome, which may include immediate removal from the course (i.e., administrative drop) and subsequent implications for academic progression.

Student Invasive Procedures

During clinical laboratory classes, experiential learning sessions, and/or at any other time, students may not practice invasive procedures on themselves, other students, faculty, preceptors, staff, and/or any other unauthorized individuals. This includes, but is not limited to, any invasive procedures that require needles, syringes, and/or intravenous supplies; nasogastric tube insertion; catheterization; etc. During some non-invasive experiences, such as physical assessment, listening to a heartbeat, or taking a blood pressure, students may be asked to act as practice participants. If a student has any objection to providing this

experience, they should notify the instructor immediately so that an alternate experience can be provided.

COURSES AND ENROLLMENT

Enrollment

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc.

Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Attendance

The School of Nursing expects that students recognize they have entered a profession in which their commitment to full participation in the learning environment is an essential component of what will become a style of life-long learning. Regular class attendance is a student obligation and students are responsible for all the work of all educational activities. Students should not expect to be excused from required coursework for personal/family events, work obligations, or because of non-compliance with School of Nursing or clinical agency health and onboarding requirements. In extraordinary circumstances, an absence may be granted at the discretion of the course instructor. This might include an absence due to personal crisis, military or civic obligation, authorized university activity, religious observances, or health concerns that affect the student's ability to safely care for patients. In most cases, students will be required to provide documentation regarding the absence.

Didactic Course Attendance

In most didactic courses, attendance and/or participation are factored into the grading process. Absences may place students in jeopardy of not meeting course learning outcomes and thus successfully completing the course. If this occurs, the instructor will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs to determine the appropriate course of action, which may include being removed (i.e., administratively dropped) from the course. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences, if applicable.

Experiential Learning Attendance

It is the expectation that students attend all Experiential Learning activities as clinical learning is essential to the completion of the nursing program. If a student must miss an Experiential Learning session due to an extraordinary circumstance, a decision as to whether the student will make up the experience/hours will be based on the student's progress in meeting course learning outcomes. The instructor, in consultation with the Course Coordinator (if applicable), will determine if the absence will be made up and the nature of the make-up experience. The instructor/Course Coordinator will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs in situations where absence is placing the student's success in the course at risk. A student who misses more than 7.5 percent of Supervised Experiential Learning hours, as specified in the course syllabus, for any reason will be removed (i.e., administratively dropped) from the course for as the result of not being able to meet course learning outcomes. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences/hours, if applicable.

Credit/No Credit Courses

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or N (meaning the student did not earn any credit for the class). Students may not take such courses on any other basis.

Concurrent Registration and Enrollment

In some rare circumstances, and only with prior approval of the academic dean, students may enroll to earn degree credit concurrently at UW–Madison and any other accredited postsecondary school, including the UW–Extension. Requests for approval should be made prior to the end of the second week of classes of the semester in which dual registration is desired. Courses must be completed during the semester in which concurrent enrollment is allowed. To request permission for concurrent enrollment, submit the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Drop Notation

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see Deadlines at a Glance (<https://registrar.wisc.edu/dates/>) on the Office of the Registrar website. Please note that the School of Nursing does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

Dropping a Nursing Course

A student who drops a nursing (NURSING#) course may reenroll in the course when space is available. A student who drops a nursing course a second time is not eligible for the course a third time.

Independent Study

Students are responsible for identifying their area of interest or question, establishing objectives for their learning experience, and developing a learning contract with the faculty member. All independent study requires the consent of the instructor. Approval forms are available on the forms page (<https://students.nursing.wisc.edu/policies-forms/forms/>) within the School of Nursing Student Site.

Registration Changes

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc.

Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (<http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf>).

Reentry

Any student who leaves the School of Nursing and wishes to return after an absence of one semester or more must file a reentry application with the UW–Madison Office of Admissions and Recruitment. Permission to reenter is dependent on program capacity, previous academic standing, and length of absence. Immediate placement in required nursing courses is not assured. Students seeking reentry to the baccalaureate program who have left on academic action must be reviewed by the Office of Academic Affairs. If readmission is granted, academic requirements may be specified

to insure currency in nursing knowledge and skills prior to enrolling in clinical nursing courses. These requirements may include remediation and/or repetition of courses, depending on academic standing or length of time since leaving the program. The remaining program will be planned as considered best for the student and according to the current curriculum.

Retaking Courses

Each individual required nursing course may be repeated only once with a maximum of two repeated courses in the curriculum. Students who do not successfully complete a course after two attempts or who must repeat more than two different courses will be dis-enrolled from the nursing program. A course for which a student earned a grade below C (or NC in a clinical course) must be repeated within the next two semesters in residence. All grades earned will be used in calculating the student's cumulative and nursing grade point averages, but credits will be counted only once toward the minimum nursing and degree credit requirements.

Didactic/Theory Courses: Undergraduate students may repeat any required didactic/theory course once without special permission.

Clinical Courses: To repeat a clinical course, an appeal must be made to the Associate Dean for Academic Affairs who will determine if the appeal merits approval. Upon a successful appeal, a student may repeat a clinical course based upon course schedule and program capacity.

Withdrawal

A nursing student who finds it necessary to withdraw during a semester or summer session must talk with an academic advisor and complete the withdrawal process. Failure to do so may result in a recording of failure for all courses. Any student may withdraw from the program without grades being recorded during the first 12 weeks of a semester. After the 12th week, a student may withdraw only with the permission of the Office of Academic Affairs.

CREDITS

30-Credit residence requirement

Students must complete at least 30 credits at UW–Madison. Baccalaureate students must complete at least 15 credits in nursing courses from the School of Nursing, including one required clinical nursing course at the 400 level or above.

Credit Load

A full-time program is 12 to 18 credits for a semester. Students who wish to carry more than 18 credits per semester must obtain permission from the Office of Academic Affairs. Students will be assessed additional tuition per credit on all credits carried over 18.

Retrocredits

The School of Nursing grants retroactive foreign language credit to students for foreign language skill developed in high school or elsewhere. To earn retroactive credits for language, students must enroll in a higher level language course at UW–Madison before the end of the first two semesters in residence. Transfer students must enroll in the course on the UW–Madison campus before they earn 30 degree credits (including credits transferred from other campuses but not including AP, CLEP, IB, or retro credits in another language). Students must earn a grade of B or better. If these conditions are met, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester. Students will receive credit for the UW course completed and for all lower level courses in that language up to 16 retroactive credits maximum. These retroactive language credits may be used to meet degree requirements of the college or department, but may not be used to meet humanities requirements. They will be counted as electives only.

DEGREES

Second Undergraduate Degree

Second undergraduate degree candidates are considered for admission to both the pre-nursing and nursing classifications. Students who apply as second undergraduate program candidates must meet the admission and transfer grade point requirements of the university in place at the time they apply for admission. If admitted, an action is taken granting permission to pursue a second degree.

Second Major

Students may request permission to pursue a second major along with the nursing degree. Students must complete the nursing school's Petition for Special Consideration (<https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf>) to make the request.

GRADES

Grading Scale

The school has a standard grading scale in nursing courses that are graded A-F, as noted below. Some Experiential Learning (i.e., clinical) courses are graded Credit/No Credit.

A: 94–100
AB: 88–93.99
B: 82–87.99
BC: 76–81.99
C: 70–75.99
D: 65–69.99
F: <65

Incompletes

A grade of Incomplete may be assigned to a student who, because of illness or another unusual and substantiated cause beyond their control, is unable to complete the coursework.

To be eligible for an Incomplete grade, the student must:

- be earning a passing grade to-date in the course,
- and have a limited amount of work to complete by the end of the term.

For a short summary of the policy, see the Enrollment and Records - Incompletes section (<https://uwprod-my.sharepoint.com/undergraduate/#undergraduateincompletes>) of Guide.

Minimum Grade Requirement

Students must earn a grade of C (2.0) or higher in each required nursing (NURSING#) course, including didactic/theory and clinical courses.

Students must receive credit (CR) in any clinical course that is offered on a Credit/No Credit basis. Any student who earns a grade below C or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program in accordance with subsequent course prerequisites.

Pass/Fail

The total number of ungraded credits (i.e., pass/fail) applied to graduation requirements may not exceed 24. Students who plan graduate study are advised to consult with graduate studies departments to determine acceptance of credits taken under the pass/fail option. Students eligible for the pass/fail privilege are continuing students with NUR, NCP (BSN@Home), or PRN classifications who have a minimum 2.5 cumulative GPA on all courses completed and have no end-of-semester academic actions on their current record. Newly admitted students in these classifications are also eligible for the pass/fail privilege. Only one course

can be carried on pass/fail basis during each semester or summer session; or 3 or 4 credits of 1-credit modular courses. No required courses may be carried under the pass/fail option. The registrar's office will convert final letter grades reported by the student's instructor to an S (pass) grade if the letter grade is C or higher or to a U (fail) if the final letter grade is below C. Course credits in which a student obtains a U grade cannot be counted toward the minimum of 124 credits required for graduation. Students interested in the pass/fail option must contact their nursing academic advisor to determine eligibility.

PROFESSIONAL STANDARDS

Students in the School of Nursing must demonstrate patterns of professional behavior that 1) follow the legal and ethical codes of nursing; 2) demonstrate intellectual honesty and a strong sense of personal integrity; 3) show exemplary moral and ethical character; 4) display a responsible, civil attitude towards patients, fellow healthcare workers, classmates, faculty, and staff; 5) show respect for the human rights of individuals; and 6) demonstrate appropriate action to ensure the safety of clients, self, and others. Professional behavior is expected in the classroom, clinical settings, learning activities, and in any additional circumstances where a student represents the university or the School of Nursing. Students whose behavior does not comply with these professional standards will receive sanctions that may include but are not limited to a lower or failing grade in a course, immediate removal from a course (i.e., administrative drop), or dismissal from the nursing program.

RESOURCES

RESOURCES

Signe Skott Cooper Hall

The School of Nursing is located in Signe Skott Cooper Hall. The building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes.

Office of Academic Affairs

The Office of Academic Affairs functions as the academic dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor and support students having academic difficulties; coordinate compliance; facilitate the admissions process; and maintain the official files of students in the school.

Academic and Career Advising

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and nursing years. Detailed information can be found on each individual degree guide page and on the School of Nursing's Student Website (<https://students.nursing.wisc.edu/>).

Academic Support Services

Career & Student Success (<https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/>) is available at the School of Nursing. Students can utilize support by Student Success course TAs and peer led study groups.

Student Support Services

Information about student support: academic and non-academic resources, policies, forms, clinicals, and compliance can be found on the School of Nursing’s Student Website (<https://students.nursing.wisc.edu/>).

Student Organizations

The School of Nursing encourages and supports students to pursue their interests and form social networks. You can also find more opportunities by going to the Wisconsin Involvement Network (<https://win.wisc.edu/organizations/>) page.

Scholarships and Financial Aid

The School of Nursing offers a generous scholarship program to incoming and current School of Nursing students. All School of Nursing applicants and current students are highly encouraged to apply for scholarships. Applications will be considered for all School of Nursing scholarships depending on a variety of factors, including: academic achievement, financial need, leadership experiences, community involvement, personal qualifications, and career interests.

Students are invited to apply to nursing-specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>). For more information, see the School of Nursing website (<https://students.nursing.wisc.edu/undergraduate-menu/scholarship-aid/>).

In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for additional information about financing your education.

HONORS

HONORS

The School of Nursing offers an Honors Program for those high-ability students seeking early research involvement with a faculty mentor. Students who successfully complete the Honors Program graduate with distinguished academic performance and receive a Bachelor of Science in Nursing (BSN) with Honors. In addition, students of the Honors Program acquire an enriched view of nursing science.

Each student in the Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Interested students apply for admission to the Honors Program during their first semester in the two-year Traditional BSN program. Admission to the Honors Program is based on past academic work, a short essay, and a letter of reference.

Review the Honors Program (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-program/>) page of the Student Site for complete details.

SCHOOL OF NURSING

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Nursing, BSN (p. 1778)
- Nursing, BSN (Accelerated Program) (p. 1783)
- Nursing, BSN (Collaborative Program) (p. 1789)
- School of Nursing Honors (p. 1792)

NURSING, BSN

The Traditional Bachelor of Science in Nursing (TBSN) degree program prepares individuals for careers in professional nursing in hospitals and other health care agencies. This TBSN program provides a foundation for progressing to positions of increased responsibility, leadership, and continued education in graduate programs. Upon successful completion of the program, students receive a bachelor of science in nursing degree from the UW–Madison School of Nursing.

The curriculum includes courses in nursing as well as in liberal arts and sciences. Most students enter UW–Madison as pre-nursing students and spend their first two years completing nursing prerequisite and general education courses. Students apply midway through their sophomore year to start the nursing program once admitted. From there, the two-year nursing component includes lectures, laboratory, and clinical courses. Nursing courses emphasize clinical decision-making and the application of theoretical knowledge. Clinical experiences can be up to 90 miles from Madison and may include ambulatory sites, clinics, hospitals, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, policy centers, etc. This range of sites and opportunities gives students comprehensive exposure to a broad range of patients, illness, and care in both clinical patient and community health settings. Elective courses in general education and in nursing permit students to pursue individual interests.

HOW TO GET IN

HOW TO GET IN
CURRENT UW-MADISON STUDENTS

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://nursing.wisc.edu/undergraduate/bsn-traditional (https://nursing.wisc.edu/undergraduate/bsn-traditional/))

Courses required to get in Students are required to complete a course in each of the seven prerequisites listed below. Requirements can be completed via coursework, test credit, transfer work, or placement exam (if applicable).

Chemistry

- CHEM 103
- CHEM 104
- CHEM 108
- CHEM 109

Microbiology

- MICROBIO 101
- CHEM 343
- NUTR SCI 332

Human Anatomy

- ANAT&PHY 337

Human Physiology

- ANAT&PHY 335

Psychology

- PSYCH 202

Sociology

- Any SOC course that carries a social science attribute (<https://guide.wisc.edu/courses/soc> (<https://guide.wisc.edu/courses/soc/>))
- ANTHRO 100
- ANTHRO 104

Human Growth and Development

- ED PSYCH 320
- ED PSYCH 321
- ED PSYCH 331
- HDFS 262
- HDFS 263
- PSYCH 460
- PSYCH 464

GPA requirements to get in At the point of application submission (mid-January):

- Earn a "C" or higher in any four of the seven prerequisite courses.
- Have a minimum cumulative GPA of 2.75 for all undergraduate courses.
- Have a minimum prerequisite GPA of 2.75 for all completed prerequisite courses.

Prior to admission (at the conclusion of the spring term):

- Earn a "C" or higher in each of the individual seven prerequisite courses
- Have a minimum cumulative GPA of 2.75 for all undergraduate courses.
- Have a minimum prerequisite GPA of 2.75 for all completed prerequisite courses.

Credits required to get in At the conclusion of the spring application term, complete at least 54-degree credits.

Other Have not previously enrolled in a professional Bachelor of Science-Nursing program at another institution.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	Mid January	On or before July 1st
To apply for a spring start	This program does not accept applications to start in the spring.	
To apply for a summer start	This program does not accept applications to start in the summer	

Admission to the nursing major is competitive and determined by a comprehensive review of each student's academic preparation and performance, leadership, extracurricular activities and service, health care experience and background, diversity in experience and background, and the quality of application statements/essays.

UPPER DIVISION ADMISSION

Upper division admission is the standard route into the Traditional BSN nursing program. In this model, students enter UW-Madison as pre-nursing students (PRN), they spend the first two years completing general education requirements and nursing prerequisites, and then apply for admission to the nursing program for the final two years on campus.

PROSPECTIVE TRANSFER AND SECOND-DEGREE APPLICANTS

Students transferring to the University of Wisconsin-Madison, as well as students who already have a bachelor's degree and wish to earn a second degree in nursing, also apply to the Traditional BSN program via the Upper Division Admission option. More information on the admission process and requirements for transfer students and second-degree students is available on the School of Nursing website (<https://nursing.wisc.edu/undergraduate/bsn/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

TRADITIONAL BSN MAJOR REQUIREMENTS

Note: This program requires a minimum of 124 credits to earn the degree.

SCIENCE

Code	Title	Credits
Chemistry		
Complete one of the following:		4-5
CHEM 103	General Chemistry I

RESIDENCE AND QUALITY OF WORK

- A cumulative GPA of 2.5 is required for graduation.
- Students must earn a C or better in all nursing coursework.
- 30 credits of coursework must be completed in-residence

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Below is a sample four-year plan. There are many potential variations of this plan, especially in the pre-nursing years. The degree requires 124 credits minimum which could be more than 15 credits per semester depending on individual situations.

Freshman

Total Credits 124-125

*It is recommended to complete NURSING/S&A PHM/SOC WORK 105 before starting the nursing program if possible.

ADVISING AND CAREERS**ADVISING AND CAREERS**

The School of Nursing's advising team helps students identify academic pathways and educational goals to aid in developing meaningful plans to ensure academic and career success. We believe that advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process.

ACADEMIC ADVISING

All students are assigned an academic advisor based on the nursing or pre-nursing program with which they are affiliated. Detailed information on the school's advising structure and staff is available on the School of Nursing's academic advising website. (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>)

CAREER ADVISING

The School of Nursing offers extensive career advising services which provide resources and strategies for career readiness and licensure

planning. This includes workshops, career fairs, resume review, prospective employment resources, and licensure information. More information about career advising is available on the School of Nursing's career advising website (<https://students.nursing.wisc.edu/career-advising/career/>).

STUDENT SUPPORT

The School of Nursing offers academic support, leadership & connection, mentorship, and wellness throughout the student experience. Additionally, admitted nursing students have access to onsite UHS mental health services. Information about student support is available on the School of Nursing's student support website. (<https://students.nursing.wisc.edu/career-advising/nursing-learning-center/>)

CERTIFICATION/LICENSURE**CERTIFICATION/LICENSURE**

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

NCLEX-RN PASS RATES

National Council of State Boards of Nursing NCLEX-RN (<https://www.ncsbn.org/nclex.htm>)

Year of Exam	UW-Madison National Graduates:	First Attempt
April-September 2024	96%	91%
April-September 2023	96%	81%
April-September 2022	85%	80%

Note: UW-Madison BSN Graduates pass rate reflects all UW-Madison Bachelor of Science-Nursing graduates who tested during the April-to-September test period for the first time, including recent and previous graduates.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure.

The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Oklahoma, Ohio, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

The requirements of this program do not meet certification/licensure requirements in the following states:

California, New York

Updated: 1 June 2025

guide page and on the School of Nursing's Student Website (<https://students.nursing.wisc.edu/>).

Academic Support Services

Career & Student Success (<https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/>) is available at the School of Nursing. Students can utilize support by Student Success course TAs and peer led study groups.

Student Support Services

Information about student support: academic and non-academic resources, policies, forms, clinicals, and compliance can be found on the School of Nursing's Student Website (<https://students.nursing.wisc.edu/>).

Student Organizations

The School of Nursing encourages and supports students to pursue their interests and form social networks. You can also find more opportunities by going to the Wisconsin Involvement Network (<https://win.wisc.edu/organizations/>) page.

Scholarships and Financial Aid

The School of Nursing offers a generous scholarship program to incoming and current School of Nursing students. All School of Nursing applicants and current students are highly encouraged to apply for scholarships.

Applications will be considered for all School of Nursing scholarships depending on a variety of factors, including: academic achievement, financial need, leadership experiences, community involvement, personal qualifications, and career interests.

Students are invited to apply to nursing-specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>). For more information, see the School of Nursing website (<https://students.nursing.wisc.edu/undergraduate-menu/scholarship-aid/>).

In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for additional information about financing your education.

RESOURCES AND SCHOLARSHIPS

RESOURCES

Signe Skott Cooper Hall

The School of Nursing is located in Signe Skott Cooper Hall. The building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes.

Office of Academic Affairs

The Office of Academic Affairs functions as the academic dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor and support students having academic difficulties; coordinate compliance; facilitate the admissions process; and maintain the official files of students in the school.

Academic and Career Advising

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and nursing years. Detailed information can be found on each individual degree

ACCREDITATION

ACCREDITATION

Commission on Collegiate Nursing Education (<http://www.aacnursing.org/CCNE/>)

Accreditation status: Next accreditation review: 2029–2030.

NURSING, BSN (ACCELERATED PROGRAM)

Students who already have a bachelor's degree or higher and are interested in making a career change to nursing can apply to enter this fast-track professional program to earn the Bachelor of Science in Nursing in 12 months. In the Accelerated Bachelor of Science in Nursing (ABSN) program, students complete approximately one credit per week including classroom-based, clinical, and out-of-class hours each week.

For tuition rates, see: <https://bursar.wisc.edu/tuition-and-fees/> (<https://bursar.wisc.edu/tuition-and-fees/>)

HOW TO GET IN

HOW TO GET IN

SCHOOL OF NURSING ADMISSIONS REQUIREMENTS

Requirements	Details
How to get in	<p>Application required. Meeting the requirements listed below does not guarantee admission.</p> <p>The program requires two applications: one to UW-Madison (https://admissions.wisc.edu/apply-as-a-second-degree-student) and one to the School of Nursing for the Accelerated BSN program (https://nursing.wisc.edu/undergraduate/bsn-accelerated).</p>

Courses required to get in Applicants are required to complete a course (or its equivalent) in each of the seven prerequisite areas. Requirements can be completed via coursework, test credit, transfer work, or placement exam (if applicable).

Chemistry

- CHEM 103
- CHEM 104
- CHEM 108
- CHEM 109

Microbiology

- MICROBIO 101
- CHEM 343
- NUTR SCI 332

Human Anatomy

- ANAT&PHY 337

Human Physiology

- ANAT&PHY 335

Psychology

- PSYCH 202

Sociology

- Any SOC course that carries a social science attribute (<https://guide.wisc.edu/courses/soc> (<https://guide.wisc.edu/courses/soc/>))
- ANTHRO 100
- ANTHRO 104

Human Growth and Development

- ED PSYCH 320
- ED PSYCH 321
- ED PSYCH 331
- HDFS 262
- HDFS 263
- PSYCH 460
- PSYCH 464

The first four prerequisites (science courses) must be completed by the application deadline and within seven years of program start date. The Anatomy and Physiology prerequisite may be satisfied by one stand alone Anatomy course and one stand alone Physiology course or by two semesters of a combined Anatomy and Physiology I and II. The pairing of one combined Anatomy and Physiology course and a stand alone Anatomy or Physiology is not acceptable for this requirement.

All prerequisites must be completed before the program start date. Prerequisite equivalency information is available on the BSN Prerequisite Course Equivalencies page (<https://nursing.wisc.edu/undergraduate/course-equivalencies> (<https://nursing.wisc.edu/undergraduate/course-equivalencies/>)).

Applicants must complete the following university-wide General Education Requirements (<https://gened.wisc.edu/general-education-requirements> (<https://gened.wisc.edu/general-education-requirements/>)). At least two must be completed by the application deadline, and all must be completed before the program start date.

- Communications Part A: Literacy Proficiency
- Quantitative Reasoning Part A: QR Proficiency
- Quantitative Reasoning Part B: Enhanced QR Proficiency
- Ethnic Studies

Note: Communications Part B is not required for Accelerated BSN applicants.

GPA requirements to get in

At the point of application submission (mid-September):

- A minimum combined prerequisite GPA of 2.75 on all prerequisites completed at time of application.
- A minimum cumulative GPA of 2.75 on all undergraduate college credits.

Prior to program start (early May):

- Have at least a C grade in each of the individual seven prerequisite courses.
- A minimum combined prerequisite GPA of 2.75 on all seven prerequisites.
- A minimum cumulative GPA of 2.75 on all prior undergraduate college credits.

Credits required to get in

- Bachelor's degree in a non-nursing field from an accredited institution, completed by the program start date.

Other

- Bachelor's degree in a non-nursing field from an accredited institution, completed by the program start date.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	This program does not accept applications to start in the fall	
To apply for a spring start	This program does not accept applications to start in the spring	

To apply for a summer start Mid-September On or before December 31

TRANSFER CREDIT EVALUATION

An unofficial transfer credit evaluation to check for completion of the nursing prerequisite courses and the university's General Education Requirements will be completed by the School of Nursing prior to the decision release date. Admission is contingent upon official verification by the UW–Madison Office of Admissions and Recruitment.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SCHOOL OF NURSING REQUIREMENTS

The Accelerated Bachelor of Science in Nursing (ABSN) degree is a 53-credit curriculum comprised of didactic and experiential learning (i.e., clinical) nursing courses. The program builds on coursework students completed in their prior undergraduate and/or graduate degree(s) and the prerequisite coursework, including the university's General Education Requirements, completed in preparation for admission to the program.

MAJOR REQUIREMENTS

During the 12-months in the ABSN program, students complete 53-credits of required nursing coursework, including classroom-based active learning courses and experiential learning courses in the clinical environment. This nursing coursework will include Pathology and Pharmacology.

RESIDENCE AND QUALITY OF WORK

- A cumulative GPA of 2.5 is required for graduation.
- Students must earn a C or better in all nursing coursework.
- 30 credits of coursework must be completed in-residence

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

ADVISING AND CAREERS

ADVISING AND CAREERS

The School of Nursing's advising team helps students identify academic pathways and educational goals to aid in developing meaningful plans to ensure academic and career success. We believe that advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process.

ACADEMIC ADVISING

All students are assigned an academic advisor based on the nursing or pre-nursing program with which they are affiliated. Detailed information on the school's advising structure and staff is available on the School of Nursing's academic advising website. (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>)

CAREER ADVISING

The School of Nursing offers extensive career advising services which provide resources and strategies for career readiness and licensure planning. This includes workshops, career fairs, resume review, prospective employment resources, and licensure information. More information about career advising is available on the School of Nursing's career advising website (<https://students.nursing.wisc.edu/career-advising/career/>).

STUDENT SUPPORT

The School of Nursing offers academic support, leadership & connection, mentorship, and wellness throughout the student experience. Additionally, admitted nursing students have access to onsite UHS mental health services. Information about student support is available on the School of Nursing’s student support website. (<https://students.nursing.wisc.edu/career-advising/nursing-learning-center/>)

CERTIFICATION/LICENSURE

CERTIFICATION/LICENSURE

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

NCLEX-RN PASS RATES

National Council of State Boards of Nursing NCLEX-RN (<https://www.ncsbn.org/nclex.htm>)

Year of Exam	UW-Madison Graduates:	National First Attempt Pass Rate
April-September 2024	100%	100%
April-September 2023	96%	81%
April-September 2022	85%	80%

Note: UW-Madison BSN Graduates pass rate reflects all UW-Madison Bachelor of Science–Nursing graduates who tested during the April-to-September test period for the first time, including recent and previous graduates.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education (via 34 CFR Part 668 (<https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-668/toc=1>)) requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure. The expectation is that institutions will determine whether each applicable academic program meets state professional licensure requirements and provide a general disclosure of such on an official university website.

Professional licensure requirements vary from state-to-state and can change year-to-year; they are established in a variety of state statutes, regulations, rules, and policies; and they center on a range of educational requirements, including degree type, specialized accreditation, total credits, specific courses, and examinations.

UW-Madison has taken reasonable efforts to determine whether this program satisfies the educational requirements for certification/licensure in states where prospective and enrolled students are located and is disclosing that information as follows.

Disclaimer: This information is based on the most recent annual review of state agency certification/licensure data and is subject to change. All students are strongly encouraged to consult with the individual/office listed in the Contact Information box on this page and with the applicable state agency for specific information.

The requirements of this program meet certification/licensure requirements in the following states:

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

The requirements of this program do not meet certification/licensure requirements in the following states:

California, New York

Updated: 1 June 2025

RESOURCES AND SCHOLARSHIPS

RESOURCES

Signe Skott Cooper Hall

The School of Nursing is located in Signe Skott Cooper Hall. The building features world-class technology and innovative educational spaces that will allow the nursing school to address health care’s new standard of excellence—high-tech and high-touch methods and practices that result in better patient outcomes.

Office of Academic Affairs

The Office of Academic Affairs functions as the academic dean’s office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor and support students having academic difficulties; coordinate compliance; facilitate the admissions process; and maintain the official files of students in the school.

Academic and Career Advising

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and nursing years. Detailed information can be found on each individual degree guide page and on the School of Nursing’s Student Website (<https://students.nursing.wisc.edu/>).

Academic Support Services

Career & Student Success (<https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/>) is available at the School of Nursing. Students can utilize support by Student Success course TAs and peer led study groups.

Student Support Services

Information about student support: academic and non-academic resources, policies, forms, clinicals, and compliance can be found on the School of Nursing's Student Website (<https://students.nursing.wisc.edu/>).

Student Organizations

The School of Nursing encourages and supports students to pursue their interests and form social networks. You can also find more opportunities by going to the Wisconsin Involvement Network (<https://win.wisc.edu/organizations/>) page.

Scholarships and Financial Aid

The School of Nursing offers a generous scholarship program to incoming and current School of Nursing students. All School of Nursing applicants and current students are highly encouraged to apply for scholarships.

Applications will be considered for all School of Nursing scholarships depending on a variety of factors, including: academic achievement, financial need, leadership experiences, community involvement, personal qualifications, and career interests.

Students are invited to apply to nursing-specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (<http://scholarships.wisc.edu/Scholarships/>). For more information, see the School of Nursing website (<https://students.nursing.wisc.edu/undergraduate-menu/scholarship-aid/>).

In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for additional information about financing your education.

ACCREDITATION

ACCREDITATION

Commission on Collegiate Nursing Education (<http://www.aacnursing.org/CCNE/>)

Accreditation status: Accredited. Next accreditation review: 2029-2030.

NURSING, BSN (COLLABORATIVE PROGRAM)

The RN to BSN program, called the BSN@Home (<http://bsnathome.com/>) program, is for Registered Nurses who already have an associate's degree or diploma in nursing and wish to earn the bachelor of science in nursing degree.

The curriculum is designed for working adults. Almost all required coursework is completed online. Students can complete the program in as little as a year and a half.

The BSN@Home program is cooperatively administered by six campuses in the University of Wisconsin System: UW-Madison, UW-Eau Claire, UW-Green Bay, UW-Milwaukee, UW-Oshkosh and UW-Stevens Point.

Students typically select their home institution based on proximity. All BSN@Home students are required to complete the same core nursing curriculum, but specific admission and degree requirements vary among campuses.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. Complete the UW System Application for admission (https://apply.wisconsin.edu/) by following detailed instructions listed on the website: https://nursing.wisc.edu/undergraduate/bsn-online (https://nursing.wisc.edu/undergraduate/bsn-online/).
Courses required to get in	<ul style="list-style-type: none"> Associate's Degree in Nursing (ADN), equivalent degree, or Diploma in Nursing from an accredited nursing program 2 years of a high school world language, or 2 semesters of a college world language, or 1 of each in same language 3 years of high school math including Algebra, Geometry & College Prep math (or similar courses at the college level)
GPA requirements to get in	<ul style="list-style-type: none"> GPA of 2.5 from all college-level coursework
Credits required to get in	<ul style="list-style-type: none"> At least 24 transferable (college-level) non-nursing credits in addition to the nursing classes completed in a Associate's Degree in Nursing (ADN), equivalent degree, or Diploma in Nursing from an accredited nursing program
Other	<ul style="list-style-type: none"> Reside in one of the 50 states and have a RN license in that state by program start date A high school transcript showing proof of graduation or GED/HSED certification

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	March 1	On or before April 30
To apply for a spring start	October 1	On or before December 31
To apply for a summer start	This program does not accept applications to start in the summer	

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core

of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

NURSING COLLABORATIVE (BSN@HOME) MAJOR REQUIREMENTS

Students may transfer up to 90 credits of coursework (from a two-year or a four-year institution). A total of 120 credits are required for the Nursing, BSN (Collaborative).

SCIENCE

Code	Title	Credits
Chemistry		
Complete one of the following:		3
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	
Microbiology		
Complete one of the following:		3
MICROBIO 101	General Microbiology	
CHEM 343	Organic Chemistry I	
NUTR SCI 332	Human Nutritional Needs	
Anatomy & Physiology		
ANAT&PHY 335	Physiology	5
ANAT&PHY 337	Human Anatomy	3
Total Credits		14

HUMANITIES AND SOCIAL SCIENCE

Code	Title	Credits

NURSING COURSES

These must be completed at UW-Madison.

Code	Title	Credits
CNP 306	Transitions: Practice, Professional and Personal	3
CNP 407	Foundations of Professional Nursing Practice	3
CNP 441	Chronic Care Management	3
CNP 446	Nursing Research and Evidence-Based Practice	3
CNP 447	Leadership and Management	3
CNP 453	Information Management and Healthcare Technology	3
CNP 454	Community Health Nursing	3
CNP 519	Capstone Practicum for Registered Nurses	3
Total Credits		24

NURSING TRANSFER CREDITS

Students pursuing a Nursing BSN may transfer in credits from another institution to fulfill some of the requirements of the degree. These transfer credits are awarded in recognition of an Associate's Degree in Nursing (ADN) or nursing diploma. Students who earned an ADN from a Wisconsin Technical College (1996 or after) receive 30 transfer credits¹. All other students receive 24 credits.²

¹ Transcribed as NURSINGX02 and NURSINGX28.

² Transcribed as NURSINGX02 and NURSINGX22.

ELECTIVES

Complete additional coursework to reach 120 credits.

RESIDENCE AND QUALITY OF WORK

- A cumulative GPA of 2.5 is required for graduation.
- Students must earn a C or better in all nursing coursework.
- 30 credits of coursework must be completed in-residence.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

The Nursing Collaborative program requires a 120 credits. The plan below only outlines nursing specific coursework that must be completed while enrolled in the collaborative program and does not include the additional 96 credits required to graduate.

Semester 1	Credits

ADVISING AND CAREERS

ADVISING AND CAREERS

The School of Nursing's advising team helps students identify academic pathways and educational goals to aid in developing meaningful plans to ensure academic and career success. We believe that advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process.

ACADEMIC ADVISING

All students are assigned an academic advisor based on the nursing or pre-nursing program with which they are affiliated. Detailed information on the school's advising structure and staff is available on the School of Nursing's academic advising website. (<https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-advising/>)

CAREER ADVISING

The School of Nursing offers extensive career advising services which provide resources and strategies for career readiness and licensure planning. This includes workshops, career fairs, resume review, prospective employment resources, and licensure information. More information about career advising is available on the School of Nursing's career advising website (<https://students.nursing.wisc.edu/career-advising/career/>).

STUDENT SUPPORT

The School of Nursing offers academic support, leadership & connection, mentorship, and wellness throughout the student experience. Additionally, admitted nursing students have access to onsite UHS mental health services. Information about student support is available on the School of Nursing's student support website. (<https://students.nursing.wisc.edu/career-advising/nursing-learning-center/>)

RESOURCES AND SCHOLARSHIPS

RESOURCES

Signe Skott Cooper Hall

SCHOOL OF NURSING HONORS

HOW TO GET IN

HOW TO GET IN

All Traditional BSN students may apply to the Nursing Honors Program. The application process occurs during the first fall of enrollment in the nursing program. Admission to the Nursing Honors Program is based on academic performance and one essay.

REQUIREMENTS

REQUIREMENTS

Each student in the Nursing Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Honors students enroll in NURSING 679 Nursing Honors Research Seminar during the spring term of the first year of enrollment in the nursing program. They complete 1-2 credits of the NURSING 681 Senior Honors Thesis/NURSING 682 Senior Honors Thesis course during both the fall and spring of the second year. Honors students also take the required NURSING 442 Health Systems, Policy, and Economics during the spring of the second year.

SCHOOL OF PHARMACY

If you are interested in becoming a pharmacist, a PharmD (Doctor of Pharmacy) degree is needed. PharmD degrees do not require a bachelor's degree first, but you do need to complete a set of college prerequisite courses and a specific number of college credits to apply to the PharmD degree program.

- For more information on the PharmD degree and program, visit the PharmD section of the Guide (<https://guide.wisc.edu/pharmacy/pharmacy-school-wide/pharmacy-dph/>).

- If you are a current or prospective UW–Madison undergraduate student, and interested in entering the PharmD program in the future, visit our pre-pharmacy at (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>) UW (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>)– (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>) Madison (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>) website (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>) for more information on resources and pre-pharmacy advising available to you.
- If you are a high school student or a first-semester college freshman interested in becoming a pharmacist, learn about our PharmD Early Assurance (<https://pharmacy.wisc.edu/academics/pharmd/early-assurance/>) program and how you can get conditional admission to UW–Madison's PharmD program.
- For prerequisite and admissions information for all other students, visit the PharmD admissions website (<https://pharmacy.wisc.edu/academics/pharmd/admissions/>).

If you are interested in a pharmacy or biomedical sciences-related career that does not require a pharmacist license, consider checking out our BS in Pharmacology and Toxicology program below.

BS IN PHARMACOLOGY AND TOXICOLOGY

The BS in Pharmacology and Toxicology (PharmTox) focuses on the biomedical sciences. **Pharmacology** is concerned with the properties, effects, and mechanisms of action of drugs, and with the interactions between chemical agents and biological systems. **Toxicology**, the science of poisons, combines the elements of biology and chemistry with those of many other disciplines to help us understand the harmful effects of chemicals on living organisms.

A major challenge for the **pharmacologist** is to determine how drugs act. This can be carried out at the subcellular and molecular level, the cellular level, the tissue level, the organ level, or the whole-animal level. Pharmacologists also are concerned with the development of new drugs that produce fewer side effects while curing disease, and provide more effective and/or more rapid treatment of disease in humans or animals.

Toxicologists find scientifically sound answers to questions about chemicals that may potentially threaten our health, about pesticides in the food we eat, pollutants in the air we breathe, chemicals in the water we drink, and toxic waste sites near our homes. Some toxicologists are concerned with determining the cellular mechanisms by which drugs and chemicals produce toxic effects. Many are involved in subspecialty areas in toxicology research, such as reproductive and developmental toxicology, neurotoxicology, immunotoxicology, and inhalation toxicology. Researchers in these areas utilize both laboratory animals and in vitro systems to examine the cellular, biochemical, and molecular processes underlying toxic responses.

BS IN PHARMACEUTICAL SCIENCES

The BS in Pharmaceutical Sciences **is not a major** but is an internal degree granted to current Doctor of Pharmacy (PharmD) students after they complete at least one year of the PharmD program. In order to qualify for the BS in Pharmaceutical Sciences, students must have attended UW–

Madison as an undergraduate prior to entering the School of Pharmacy and must meet all degree requirements.

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/CERTIFICATES

- Pharmaceutical Sciences, BS (p. 1794)
- Pharmacology and Toxicology, BS (p. 1796)

ENTERING THE SCHOOL

ENTERING THE SCHOOL

Admission to either the BS in Pharmacology and Toxicology or the Doctor of Pharmacy program is selective and competitive, and requires specific prerequisite coursework as well as a complete admissions application. Completion of required prerequisite coursework does not guarantee admission. Each applicant's admission credentials are considered not only on their own merit, but also in comparison with the credentials of other applicants.

For detailed information on prerequisites and the application for the BS in Pharmacology and Toxicology (PharmTox), see the major's "How to Get In" tab in the (<http://guide.wisc.edu/undergraduate/pharmacy/pharmacy/pharmacology-toxicology-bs/#howtogetintext>) *Guide*.

Information about the required elements of the application and prerequisites for the PharmD (Doctor of Pharmacy) program can be found on the School of Pharmacy website (<https://pharmacy.wisc.edu/programs/pharmd/admissions/>).

Most pre-pharmacy students are admitted to UW–Madison as College of Letters & Science students with an intention to pursue a School of Pharmacy program (PharmTox undergraduate degree **and/or** the professional PharmD program). While our School of Pharmacy does not directly admit students from high school, we do offer comprehensive academic, admissions, and career advising to students who have expressed an interest in either of these programs. The School of Pharmacy also offers an Early Assurance program for high school seniors and first-semester freshmen admitted to a Universities of Wisconsin campus. The Early Assurance program provides conditional admission to UW–Madison's PharmD program. The Early Assurance application is offered through the School of Pharmacy and is separate from the undergraduate application process. Please refer to the Resources (<https://guide.wisc.edu/undergraduate/pharmacy/#resourcestext>) section to start exploring available resources and opportunities available for pre-School of Pharmacy students at UW–Madison.

POLICIES AND REGULATIONS

POLICIES AND REGULATIONS

For a list of Pharmacology and Toxicology (PharmTox) undergraduate policies, including academic standing and probation policies, please visit the PharmTox Policy Handbook (<https://students.pharmacy.wisc.edu/pharm-tox-handbook/>).

RESOURCES

RESOURCES

ACADEMIC ADVISING

If you're a current UW–Madison undergraduate student, you have access to dedicated, structured pre-pharmacy advising at the School of Pharmacy. Please choose the School of Pharmacy as your advising group option when you make your SOAR reservation in April. We're here to help you with:

- Career paths related to pharmacy, pharmacology, and toxicology
- Understanding prerequisites and developing a plan for completion
- Accessing courses and guidance on how to sequence classes
- PharmD and PharmTox curriculum and degree options
- Admissions selection criteria
- Application process and components

Who is a pre-pharmacy student? A pre-pharmacy student is anyone who is taking the courses necessary to be considered for admission to the Doctor of Pharmacy (PharmD) professional program and/or the BS in Pharmacology and Toxicology (PharmTox) at the UW–Madison School of Pharmacy. Completion of prerequisite coursework does not guarantee admission as admission is selective and competitive.

How do I get started with pre-pharmacy advising? Schedule your pre-pharmacy advising appointment using the Starfish app (<https://wisc.starfishsolutions.com/starfish-ops/>) in MyUW. Search for "Kendra Gurnee" to meet with the pre-PharmTox advisor or "Amy Zwaska" to meet with the pre-PharmD advisor. Any UW–Madison student with any major or no major can access our dedicated pre-pharmacy advising services at the School of Pharmacy. Individual appointments are typically scheduled for 30 minutes.

If you experience any trouble with the scheduling process:

- You can get help with Starfish here (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- You can also contact the School of Pharmacy Student and Academic Affairs Office at 608-262-6234 to set up your advising appointment.

Due to the selective nature of the PharmD and PharmTox admissions processes, interested students are encouraged to meet with School of Pharmacy advisors early and often to explore our programs and get valuable guidance about prerequisites, selection criteria, application timeline/procedures, and career opportunities. We recommend that you meet with your pre-pharmacy advisor at least once per semester.

For more information on preparing for and applying to our programs, visit our admissions resources for PharmD (<https://pharmacy.wisc.edu/academics/pharmd/admissions/>) and PharmTox (<https://pharmacy.wisc.edu/academics/pharm-tox/admissions/>).

EARLY ASSURANCE

Early Assurance (<https://pharmacy.wisc.edu/academics/pharmd/early-assurance/>) offers high school and first-semester college freshmen conditional admission to the UW–Madison PharmD program. Eligible students must be admitted to a Universities of Wisconsin campus and complete the Early Assurance application which is separate from the undergraduate application process.

FINANCIAL AID

Students who seek financial assistance should contact the UW–Madison Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for financial aid applications and information about scholarships, loans, grants, work-study programs, and student employment.

SCHOOL OF PHARMACY SCHOLARSHIPS

The School of Pharmacy awards a variety of scholarships each year to admitted PharmTox and PharmD students. Awards are based on both academic merit and financial need. Students are invited to apply to School of Pharmacy-specific scholarships, as well as campus-wide or non-Pharmacy scholarships, through the Wisconsin Scholarship Hub (<https://wisc.academicworks.com/>).

STUDENT ORGANIZATIONS

Students will find many organizations of interest, both in the School and across the UW–Madison campus. The School of Pharmacy student organizations website (<https://students.pharmacy.wisc.edu/student-life/student-organizations/>) has a comprehensive listing of student organizations and groups that are affiliated with the School.

FACILITIES

The School of Pharmacy is located in Rennebohm Hall on the west side of campus, near University Hospital and Clinics and Health Sciences Learning Center. The School of Pharmacy provides students and faculty with the finest possible physical environment for professional pharmacy and for research in pharmaceutical fields of study.

SCHOOL OF PHARMACY

DEGREES/MAJORS/CERTIFICATES

DEGREES/MAJORS/
CERTIFICATES

- Pharmaceutical Sciences, BS (p. 1794)
- Pharmacology and Toxicology, BS (p. 1796)

PHARMACEUTICAL
SCIENCES, BS

The BS in Pharmaceutical Sciences **is not a major**, but is a milestone degree granted to current Doctor of Pharmacy (PharmD) students while working toward the PharmD degree. In order to qualify for the BS in Pharmaceutical Sciences, students must have attended UW–Madison prior to entering the School of Pharmacy, and must meet all degree requirements. More detailed information about this degree may be found on the school website (<https://students.pharmacy.wisc.edu/student-services/sop-advising/pre-pharmacy-uwmadison/>).

Information about our Doctor of Pharmacy program (PharmD) can be found at <https://pharmacy.wisc.edu/programs/pharmd/>. The PharmD is required to be eligible to take the North American Pharmacist Licensure Examination (NAPLEX) and be registered and licensed as a pharmacist.

Students interested in pursuing an **undergraduate** degree offered by the School of Pharmacy may want to investigate the BS Pharmacology

and Toxicology (p. 1796) program. This interdisciplinary major in the biomedical sciences can serve as a foundation for further education in graduate or professional degree programs, or for entry-level scientific employment.

HOW TO GET IN

HOW TO GET IN

The BS in Pharmaceutical Sciences is a non-admitting milestone degree. Students earn this credential once degree requirements have been met while working toward their Doctor of Pharmacy (PharmD) degree. For more information on how to apply, see the Doctor of Pharmacy Program's Admissions (<https://pharmacy.wisc.edu/academics/pharmd/admissions/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

MAJOR REQUIREMENTS

The bachelor's degree will be awarded once all Pharmaceutical Sciences major requirements are met, as well as the university general education requirements and other coursework totaling at least 120 credits.

Code	Title	Credits
PHM SCI 420	Physicochemical Principles of Drug Formulation and Delivery	3

ADDITIONAL NOTES

- World language coursework can count towards the "Humanities/Literature/Arts" gen ed requirement.
- AP, IB, retro-credits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the elective credit requirement.
- Students must also complete coursework appropriate for admissions to the PharmD program.
- Students earning the BS Pharmaceutical Sciences degree will NOT be able to earn additional majors or undergraduate certificates.

QUALITY OF WORK

- Students must have a minimum 2.000 cumulative grade point average.
- School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmD student policy handbook (<https://students.pharmacy.wisc.edu/pharmd-handbook/>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
------------------	---

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Drug properties: Apply knowledge of the physical, chemical, and pharmacologic, and formulation properties of drugs and influence on drug parameters (such as pharmacology, pharmacodynamics, stability, drug/dose delivery design). Differentiate among the therapeutic classes based on mechanisms of action, clinical use, adverse effects, contraindications, interactions, and dosage forms and regimens.
- 2. Patient-centered care: Use the pharmacist patient care process (PPCP) to employ personalized medicine and social, behavioral and other evidence-based principles to design and deliver individualized patient-care plans that optimize safety, efficacy, and medication used to improve therapeutic outcomes.
- 3. Drug kinetics: Design or modify treatment regimens including dose, schedule, and duration using patient-specific or population pharmacokinetic data, plasma concentration-time profile of drugs, and factors that alter them.
- 4. Pharmaceutical calculations and product processing: Ensure accurate and safe sterile and non-sterile compounding, calculation, labeling, and dispensing of medications.
- 5. Health equity and inclusion: Identify root causes of health disparities and incorporate principles of cultural and structural humility to promote access, inclusion, and equitable health outcomes.

PHARMACOLOGY AND TOXICOLOGY, BS

Pharmacology and Toxicology (PharmTox) is an undergraduate major offered by the School of Pharmacy, leading to a Bachelor of Science in Pharmacology and Toxicology. This major covers two related biomedical sciences:

- **Pharmacology:** The study of drug actions, including their sites, properties, effects, and mechanisms.
- **Toxicology:** The study of harmful effects of chemicals on humans and animals, including exposure assessment, hazard identification, dose response, and risk characterization.

Both fields integrate various scientific disciplines and use advanced biotechnological methods to understand drug and toxicant actions at the molecular level. The curriculum is multidisciplinary, spanning several biomedical sciences. This major can prepare students for a variety of future careers and paths, including graduate school in the biomedical sciences, health professions like medical or dental school, or to work in the biotech or pharmaceutical industry.

The PharmTox major is a limited enrollment, selective admission major. An application is required along with prerequisite courses – for details, see How to Get In (p. 1796). Pre-PharmTox students are usually enrolled in the College of Letters & Science or the College of Agricultural and Life Sciences during their first two years. Students should stay in contact

with the PharmTox advisor to keep up with admission requirements and program updates. Once admitted, the core curriculum takes two years to complete (typically junior and senior years).

For those interested in becoming pharmacists, information about the Doctor of Pharmacy (PharmD) program is available here: <https://pharmacy.wisc.edu/programs/pharmd/>. The PharmD is required to take the North American Pharmacist Licensure Examination (NAPLEX) and become a registered and licensed pharmacist.

HOW TO GET IN

HOW TO GET IN

Requirements	Details
How to get in	Application required. Meeting the requirements listed below does not guarantee admission. (https://pharmacy.wisc.edu/academics/pharm-tox/admissions (https://pharmacy.wisc.edu/academics/pharm-tox/admissions/))

Courses required to get in	Students must complete the following by the end of the summer semester prior to entering the program.
	Calculus I (one of) <ul style="list-style-type: none"> MATH&#160;221 MATH&#160;171 and MATH&#160;217
	General Chemistry (one of) <ul style="list-style-type: none"> CHEM&#160;103 and CHEM&#160;104 CHEM&#160;109 CHEM&#160;115
	Organic Chemistry <ul style="list-style-type: none"> CHEM&#160;343 CHEM&#160;345 CHEM&#160;344
	Introductory Biology (one of) <ul style="list-style-type: none"> BIOLOGY/&#8203;BOTANY/&#8203;ZOOLOGY&#160;&#160;151 and BIOLOGY/&#8203;BOTANY/&#8203;ZOOLOGY&#160;&#160;152 BIOLOGY/&#8203;ZOOLOGY&#160;&#160;101, BIOLOGY/&#8203;ZOOLOGY&#160;&#160;102, and BIOLOGY/&#8203;BOTANY&#160;&#160;130 BIOCORE&#160;381, BIOCORE&#160;382, BIOCORE&#160;383, and BIOCORE&#160;384
	Communication A
	Social Science <ul style="list-style-type: none"> Any Social Sciences (S) or Humanities or Social Sciences (Z) (3 credits)

GPA requirements to get in None.

Credits required to get in 60 credits must be completed by the end of the summer semester prior to entering the program. AP, IB, retrocredits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) count.

Other None.

Semester	Deadline to apply	Decision notification timeline
To apply for a fall start	Early February	End of March
To apply for a spring start	This program does not accept applications to start in the spring.	

To apply for a summer start This program does not accept applications to start in the summer.

PROSPECTIVE TRANSFER APPLICANTS

Transfer students apply separately for admission to both the University of Wisconsin-Madison and the Pharmacology and Toxicology program during the spring term for fall enrollment. Information for prospective transfer students can be found on the School of Pharmacy Information for Transfer Students (<https://pharmacy.wisc.edu/academics/pharm-tox/admissions/transfers/>) page.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 33) section of the Guide.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

OVERVIEW OF REQUIREMENTS

The Pharmacology and Toxicology BS degree requires the following groups of coursework:

- University general education requirements (above – those that are also prerequisite requirements will be completed before entering the program; remaining gen ed requirements can be completed at any time prior to graduation)
- Prerequisite requirements (completed prior to admittance/entrance to the program)
- Pharmacology and Toxicology major requirements (mostly completed after entering the program, though some courses can be completed earlier)

The PharmTox degree does not require any additional breadth courses beyond the university general education requirements. World language

coursework can count towards the "Humanities/Literature/Arts" gen ed requirement.

School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmTox student policy handbook (<https://students.pharmacy.wisc.edu/pharm-tox-handbook/>).

PREREQUISITES

CALCULUS I

Code	Title	Credits
Select one of the following options: ¹		
MATH 221	Calculus and Analytic Geometry I	5
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	10

¹ MATH 211 Survey of Calculus I taken at UW-Madison does not fulfill the Calculus I requirement for this major.

GENERAL AND ORGANIC CHEMISTRY

Code	Title	Credits
Complete one of the following general chemistry options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5
Complete all of the following organic chemistry courses:		
CHEM 343	Organic Chemistry I	3
CHEM 345	Organic Chemistry II	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

INTRODUCTORY BIOLOGY

Code	Title	Credits
Complete one of the following options:		
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	10
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	10
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	10

COMMUNICATION

The UW-Madison communication A requirement must be fulfilled.

SOCIAL SCIENCE

Any course that qualifies as social science (S or Z) credit, 3 credits required.

OTHER COLLEGE COURSES

Sixty (60) credits must be completed by the end of the summer semester prior to entering the program. AP, IB, retrocredits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the 60 credits.

PHARMACOLOGY AND TOXICOLOGY MAJOR REQUIREMENTS

Students must take most of their major-level coursework in very specific semesters in order to graduate within four semesters of starting the program, due to prerequisites and fall or spring-only courses – see four year plans (p. 1800) for course sequences. It may be possible to take some major-level courses earlier if prerequisites are met; consult the advisor. The five credits of elective coursework, statistics, genetics, and physics requirements can be completed at any time, including prior to admission to the program. The directed/independent study requirement must be performed after matriculation into the program (i.e. the first fall semester officially declared in the major or any semester thereafter).

DIRECTED/INDEPENDENT STUDY (699), 2 CREDITS

Must be completed after matriculation into the major (i.e. the first fall semester officially declared in the major or any semester thereafter) and have prior approval to meet PharmTox major requirements. Students should not wait until the final semester to try to fulfill this requirement, as it can be difficult to find a research opportunity close to graduation. The research-based directed/independent study (typically a course numbered 699) must be in a biological, chemical, or biomedical sciences department, and can include laboratory-based research, library or literature-based research, or clinical research. Experiences such as peer mentoring or teaching assistance, even if a 699 course is used for credit, cannot fulfill this requirement.

PHYSICS I AND II

Code	Title	Credits
Complete one of the following sequences: (consult with advisor on recommended sequences):		
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	8
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	10

STATISTICS

Code	Title	Credits
Complete one of the following:		
STAT 240	Data Science Modeling I	4

STAT 301	Introduction to Statistical Methods	3
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	3
STAT 324	Introduction to Statistics for Science and Engineering	3
STAT/B M I 541	Introduction to Biostatistics	3

BIOCHEMISTRY

Code	Title	Credits
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	6

PHYSIOLOGY

Code	Title	Credits
Complete one of the following:		
ANAT&PHY 335	Physiology	5
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	5

GENETICS

Code	Title	Credits
Complete one of the following:		
GENETICS 466	Principles of Genetics	3
GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 ¹	6
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory ²	10

¹ If students choose GENETICS 467 & GENETICS 468, 3 credits from this sequence will count towards the 5 required elective credits.

² Students who have taken BIOCORE for introductory biology will have typically also completed the genetics requirement via BIOCORE courses taken sophomore/second year.

PATHOLOGY

Code	Title	Credits
PATH 404	Pathophysiologic Principles of Human Diseases	3

PHARMACOLOGY AND TOXICOLOGY CORE

Code	Title	Credits
Complete all of the following:		
PHM SCI 558	Laboratory Techniques in Pharmacology and Toxicology	2
PHM SCI 679	Pharmacology and Toxicology Seminar (taken twice) ¹	1
PHM SCI 510	Pharmacology Principles and Applications	2
PHM SCI/ M&ENVTOX/ ONCOLOGY/ PHMCOL-M/ POP HLTH 625	Toxicology I	3

PHM SCI/ M&ENVTOX/PATH/ PHMCOL-M/ POP HLTH 626	Toxicology II	3
---	---------------	---

¹ Students need to take PHM SCI 679 in both their first and second years in the major in spring semesters (typically junior and senior years); the course is repeatable for degree credit.

ADDITIONAL PHARMACOLOGY

Code	Title	Credits
Complete one of the following:		
BIOCHEM/ NUTR SCI 560	Principles of Human Disease and Biotechnology	2
BOTANY 575	Special Topics (Topic: Medical Botany)	3
PATH-BIO 307	Superbugs, Sex, & Drugs: Why Modern Medicine Needs Evolutionary Biology	2
PHM SCI 581	Molecular and Cellular Principles in Pharmacology	4
PHM SCI 680	Principles of Pharmaceutical Sciences	3

ELECTIVES IN THE MAJOR

Students must complete at least 5 elective credits in the Pharmacology and Toxicology major from the below list, in any subject. Another option for fulfilling a portion or all of these 5 credits are additional directed/independent study (699) credits beyond the minimum 2 credits required for the major. Additional 699 credits must be approved by the PharmTox program to count towards the elective requirement if they are not done under the same principle investigator that was approved for the original two credits required.

Code	Title	Credits
ANAT&PHY 337	Human Anatomy	3
ANAT&PHY 338	Human Anatomy Laboratory	2
AN SCI/DY SCI 434	Reproductive Physiology	3
BIOCHEM/ NUTR SCI 510	Nutritional Biochemistry and Metabolism	3
BIOCHEM 551	Biochemical Methods	4
BIOCHEM/ M M & I 575	Biology of Viruses	2
BIOCHEM 601	Protein and Enzyme Structure and Function	2
BIOCHEM/ GENETICS/ MICROBIO 612	Prokaryotic Molecular Biology	3
BIOCORE 587	Biological Interactions	3
BOTANY/AMER IND/ ANTHRO 474	Ethnobotany	3-4
CHEM 547	Advanced Organic Chemistry	3
CHEM 561	Physical Chemistry I	3
CHEM 562	Physical Chemistry II	3
CHEM 563	Physical Chemistry Laboratory I	1
CHEM 564	Physical Chemistry Laboratory II	1
CHEM 665	Biophysical Chemistry	3

MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO 305	Critical Analyses in Microbiology	1
MICROBIO 357	General Bioinformatics for Microbiologists	3
MICROBIO 626	Microbial and Cellular Metabolomics	3
M&ENVTOX/ CIV ENGR/ SOIL SCI 631	Toxicants in the Environment: Sources, Distribution, Fate, & Effects	3
ONCOLOGY 401	Introduction to Experimental Oncology	2
ONCOLOGY/ M M & I/ PL PATH 640	General Virology-Multiplication of Viruses	3
PHARMACY 632	Neuroscience of Psychedelics	3
PHM SCI/B M E 430	Biological Interactions with Materials	3
PSYCH 450	Primate Psychology: Insights into Human Behavior	3-4
PSYCH 454	Behavioral Neuroscience	3-4
PSYCH/ ZOOLOGY 523	Neurobiology	3
SOC WORK 453	Substance Use Disorders	3
ZOOLOGY 425	Behavioral Ecology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 470	Introduction to Animal Development	3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 570	Cell Biology	3

QUALITY OF WORK REQUIREMENTS AND PASS/FAIL

Students must have a 2.000 cumulative grade point average at the time of graduation in order to earn a Pharmacology and Toxicology BS degree.

No course that is used for Pharmacology and Toxicology degree requirements may be taken as pass/fail and must be taken for a letter grade (AP, IB, or other test credits or placement exemptions are excluded

from this requirement). This includes all prerequisite coursework, major requirements, and university general education requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

LEARNING OUTCOMES

1. Demonstrate a knowledge and understanding of the supportive biomedical fields.
2. Demonstrate a knowledge and understanding of Pharmacology.
3. Demonstrate a knowledge and understanding of Toxicology.
4. Understand scientific principles of laboratory design and presentation of scientific data.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

A minimum of 120 credits is required to earn the BS in Pharmacology and Toxicology. Below are sample four-year plans for the Pharmacology and Toxicology major, incorporating both prerequisites and major coursework. They focus on science coursework sequencing and do not take into account factors such as AP or advance standing credits, additional summer courses, study abroad, or preparing for standardized tests like the MCAT or PCAT.

It is **critical** that you talk with your advisor about your tentative plan for course sequences and prerequisites, which courses are offered fall vs. spring vs. summer, etc.

EXAMPLE PLAN: CHEMISTRY 103/104

First Year		
Fall	Credits Spring	Credits
CHEM 103	4 CHEM 104	5
MATH 221	5 STAT 371 or 301	3
Communication A	3 Social Science	3-4

Electives	3-4 Electives	3-4
	15-16	14-16

Second Year

Fall	Credits Spring	Credits
CHEM 343	3 CHEM 345	3
BIOLOGY/BOTANY/ ZOOLOGY 151 (or Biocore)	5 CHEM 344	2

Total Credits 111-122

THREE-YEAR PLAN

THREE-YEAR PLAN

Below is a sample 3 year plan for the Pharmacology and Toxicology major, incorporating prerequisites, major coursework, and university-wide breadth and general education requirements. Students interested in graduating in three years should meet with the PharmTox academic advisor early and often to discuss feasibility, appropriate course sequencing, post-graduation plans (careers, graduate school, etc.), and other considerations.

While there are many advantages to attending four years of college, including making the most of research and study abroad opportunities, exploring alternative majors, completing additional majors and certificates, developing skills and interests through student groups, and personal growth, students may have various reasons for wanting to graduate in three years, and the PharmTox advisor will work with students to help them prioritize their goals.

This example plan assumes that students will:

- Enter their first year at UW-Madison with at least 25 advanced standing credits (to be able to meet the PharmTox application prerequisite of 60 credits by the start of their second year), including equivalency credit for Introductory Biology (ZOOLOGY/BIOLOGY/BOTANY 151) . Entering with fewer credits would require more credits in the fall, spring, and/or summer terms in the first year than in the example plan.
- Place into or are eligible to enroll in MATH 221 for first semester.
- Apply to the PharmTox major during their first year for admission for fall of their second year and have all prerequisite coursework complete by the end of the summer term after the first year.
- Enroll in enough credits each term to earn 120 total credits. Some terms may require more or less credits than the example plan, depending on the number of advanced standing credits a student brings in.

Summer coursework will be required after the first year for students without chemistry advanced standing credits, in order to complete general and organic chemistry before the start of the second year. Other summer

coursework is not necessarily required, but may be helpful to alleviate credit loads and course combinations in fall or spring terms.

First Year

Fall	Credits Spring	Credits Summer	Credits
MATH 221	5 CHEM 343	3 CHEM 345	3
CHEM 109	5 ZOOLOGY/ BIOLOGY/ BOTANY 152	5 CHEM 344	2
Communication A	3 Social Science	3-4	
Humanities	3-4 Ethnic Studies	3-4	
16-17		14-16	5

Second Year

Fall	Credits Spring	Credits
BIOCHEM 507	3 BIOCHEM 508	3-4
ANAT&PHY 335	5 PATH 404	3
PHM SCI 558	2 PHM SCI 679	1
STAT 371 or 301	3 PHYSICS 103	4
Research (699) credits	2 Electives in the Major or add'l research credits	2-3
15		13-15

Third Year

Fall	Credits Spring	Credits
PHM SCI/ M&ENVTOX/ ONCOLOGY/ PHMCOL-M/ POP HLTH 625	3 PHM SCI/ M&ENVTOX/ PATH/ PHMCOL-M/ POP HLTH 626	3
PHYSICS 104	4 PHM SCI 679	1
Additional Pharmacology	2-4 PHM SCI 510	2
Humanities	3-4 GENETICS 466	3
	Electives in the Major or add'l research credits	2-3
Electives		3
12-15		14-15

Total Credits 89-98

ADVISING AND CAREERS

ADVISING AND CAREERS
ADVISING

During their first two college years, pre-PharmTox students are typically in the College of Letters & Science or the College of Agricultural and Life Sciences. This time is spent completing prerequisite courses and preparing to apply to the PharmTox major. Students can request to be assigned to the PharmTox advisor in addition to their primary academic advisor from their current school. They are welcome to meet with the PharmTox advisor at any time for guidance. There is no official "pre-PharmTox" designation or program to declare or be in administratively.

The PharmTox advisor supports both current undergraduates and prospective high school or transfer students interested in the major.

High school and transfer students can schedule appointments by calling (608) 262-6234 or emailing the advisor, while current UW-Madison students can book their sessions online via Starfish (<https://wisc.starfishsolutions.com/starfish-ops/>). Advising is also available during SOAR for incoming students, which includes help with curriculum planning and introductions to enrollment tools. The advisor can also connect prospective undergraduates with upperclassmen and alumni who share similar interests.

Once admitted to the major, students will have the PharmTox advisor as their primary academic advisor, ensuring they receive continuous support throughout their academic journey.

CAREERS

Graduates of the program are well-prepared for entry-level scientific jobs in various industries like biotechnology, consumer products, contract research, regulatory affairs, and pharmaceuticals. They can also work in academic research labs or government agencies focused on science, health, or the environment. The program provides a strong foundation for graduate education in pharmacology, toxicology, or other biomedical sciences, as well as for health professions like medical, veterinary, dental, optometry, and public health programs. With the right general education and elective courses, students can also pursue careers in scientific writing, business, regulatory roles, environmental positions, or law school. Graduates are equipped to make significant contributions to human and animal health.

The program has strong connections with its 400+ alumni who are located across the country and the globe. The PharmTox advisor can help students connect with alumni to explore careers and learn about employers.

Available Career Resources

- The PharmTox advisor can assist with resume building, interview preparation, and career exploration, and also gives all PharmTox students access to a virtual career center via Canvas.
- Many L&S and CALS career workshops and fairs are open to all students, including PharmTox students. The Career Exploration Center (<https://cec.ccas.wisc.edu/>) (CEC) is also available to students who are in the early stages of career exploration, especially those who have lots of ideas or no ideas yet.
- Current students can join the Pharmacology and Toxicology LinkedIn group (<https://www.linkedin.com/groups/12266662/>) to network with fellow students and alumni.
- Handshake (<https://app.joinhandshake.com/auth/?auth=648>) features employer job postings specifically available to UW-Madison students and is a great place to browse for internships and full-time jobs. Students can also post resumes and allow employers to contact them regarding potential employment.
- The Center for Prehealth Advising (<http://www.prehealth.wisc.edu>) assists students with preparing for and applying to professional healthcare programs, including medicine, physical therapy, physician assistant, dentistry, and more.

- The program's small size and cohort-based model makes it easy to arrange study groups, tutoring, and social events, and funds can be requested to support these activities.
- Students have access to a student commons, group study rooms, lockers, and a variety of gathering spaces in Rennebohm Hall. Ebling Library, located adjacent to Rennebohm Hall in the Health Sciences Learning Center, serves the School of Pharmacy student body, in addition to that of students from medicine, veterinary medicine, and nursing.
- The School of Pharmacy hosts a variety of student organizations (<https://pharmacy.wisc.edu/student-organizations/>), several of which are available to PharmTox students. Junior and senior class presidents are elected each year and represent each cohort by providing feedback, as well as serve on various School of Pharmacy committees to represent the PharmTox program.
- Students are required to participate in a scientific research experience for at least one semester after being admitted to the major, though continued research involvement before and after admission to the major is highly encouraged. The Biocommons website (<http://biology.wisc.edu/finding-mentor/>) has step-by-step information on how to find a research opportunity, and students can also speak with the advisor for additional guidance.
- Study abroad is definitely possible, although a winter session, spring break, or summer session experience fits most easily with the PharmTox curriculum. Visit the Study Abroad Major Advising Page for PharmTox (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/pharmacology-and-toxicology/>) to learn more.
- One to two travel awards are given annually to allow seniors to attend a national conference in the field of pharmacology and toxicology, and funding is often available to facilitate travel for interested students to regional conferences near Madison.
- The annual PharmD/PharmTox Research Symposium provides students with an opportunity to present their research projects each spring.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in pharmacology, toxicology, and other biomedical sciences, build relationships with faculty and staff, and contribute to out-of-classroom learning:
